- (1) The dollar gains under these columns result from calculations required by the Securities and Exchange Commission's rules and are not intended to forecast future price appreciation of the Company's common stock. Options have value only if the stock price increases above the exercise price shown in the table during the effective option period. In order for the executive to realize the potential values set forth in the 5% and 10% columns in the table, the price per share of the Company's common stock as of the expiration date of the options for all January 31, 2002 grants would be approximately \$1.12 per share and \$1.79 per share, respectively, for all February 21, 2002 grants would be approximately \$0.99 per share and \$1.58 per share, respectively, and for all March 12, 2002 grants would be approximately \$1.11 per share and \$1.76 per share, respectively.
- (2) The shares covered by this option grant are fully vested as of the grant date.
- (3) Of the shares covered by this option grant, none can be purchased during the first year following the grant; 100% can be purchased after the first anniversary of the grant.

The following table summarizes for each of the named executive officers the number of shares acquired and value realized upon exercise of options during fiscal 2002 and the aggregate dollar value of in-the-money, unexercised options at December 31, 2002.
