SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report
Pursuant to
Section 13 Or
15(d) of the
Securities
Exchange Act of
1934 for the
quarterly period
ended
March 31, 2018 or
Transition Report
Pursuant to
Section 13 or
15(d) of the
Securities
Exchange Act of
1934 for the
transition period
from ____ to
____.

Commission File No. 000-30109

LUMINEX CORPORATION

(Exact name of registrant as specified in its charter)

DELAWARE

(State or other jurisdiction of incorporation or organization)

12212 TECHNOLOGY BLVD., AUSTIN, TEXAS

(Address of principal executive offices)

(512) 219-8020

Registrant's Telephone Number, Including Area Code

72-2747608

(I.R.S. Employer Identification No.)

78727

(Zip Code)

None

Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of

this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate
by check
mark
whether the
registrant is
a shell
company
(as defined
in
Rule 12b-2
of the Act).

.. Yes
No

There were 44,448,132 shares of the Company's Common Stock, par value \$0.001 per share, outstanding on May 7, 2018.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 — BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared by Luminex Corporation (the Company or Luminex) in accordance with United States generally accepted accounting principles (U.S. GAAP) for interim financial information and the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. In the opinion of management, all adjustments (consisting of normal recurring entries) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2017 (the 2017 10-K).

NOTE 2 — INVESTMENTS AND OTHER ASSETS

Marketable Securities

The Company determines the appropriate classification of its investments in debt and equity securities at the time of purchase and re-evaluates such determinations at each balance sheet date. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Debt securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are stated at amortized cost, which approximates the fair value of these investments. Debt securities for which the Company does not have the intent or ability to hold to maturity are classified as available-for-sale. Debt and marketable equity securities not classified as held-to-maturity or as trading are classified as available-for-sale, and are carried at fair market value, with the unrealized gains and losses included in the determination of comprehensive income and reported in stockholders' equity. As of March 31, 2018 and December 31, 2017, all of the Company's marketable securities were classified as available-for-sale. Marketable securities are recorded as either short-term or long-term on the balance sheet based on the contractual maturity date. The fair value of all securities is determined by quoted market prices, market interest rate inputs, or other than quoted prices that are observable either directly or indirectly (as of the end of the reporting period). Declines in fair value below the Company's carrying value deemed to be other than temporary are charged against net earnings. As of March 31, 2018, the Company had no short or long term investments.

Available-for-sale securities consisted of the following as of March 31, 2018 (in thousands):

	Amortized Cost	Gains in Accumulated Other Comprehensive Income	Losses in Accumulated Other Comprehensive Income	Estimated Fair Value
Current:				
Cash equivalents	\$ 701	\$ —	\$ —	\$ 701
Total current securities	701	—	—	701
Noncurrent:				
Total noncurrent securities	—	—	—	—

Total available-for-sale securities \$ 701 \$ — \$ — \$ 701

5

Table of Contents

Available-for-sale securities consisted of the following as of December 31, 2017 (in thousands):

	Amortized Cost	Gains in Accumulated Other Comprehensive Income	Losses in Accumulated Other Comprehensive Income	Estimated Fair Value
Current:				
Cash equivalents	\$ 701	\$ —	\$ —	\$ 701
Total current securities	701	—	—	701
Noncurrent:				
Total noncurrent securities	—	—	—	—
Total available-for-sale securities	\$ 701	\$ —	\$ —	\$ 701

There were no proceeds from the sales of available-for-sale securities during the three months ended March 31, 2018. Realized gains and losses on sales of investments are determined using the specific identification method. Realized gains and losses are included in Other Income, net in the Consolidated Statements of Comprehensive Income. All of the Company's available-for-sale securities with gross unrealized holding losses as of March 31, 2018 and December 31, 2017 had been in a loss position for less than 12 months.

There were no available-for-sale debt securities as of March 31, 2018 and December 31, 2017.

Expected maturities may differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties.

Non-Marketable Securities and Impairment

During each of the years ended December 31, 2017 and December 31, 2016, the Company made a \$1.0 million minority interest investment (an aggregate of \$2.0 million), in a private company based in the U.S. that is focused on development of next generation technologies. This minority interest is included at cost in other long-term assets on the Company's Consolidated Balance Sheets as the Company does not have significant influence over the investee since the Company owns less than 20% of the voting equity in the investee and the investee is not publicly traded. Although we may invest further in this entity over the course of the next several quarters, we do not anticipate our ownership interest to exceed 20% in the short term. During the year ended December 31, 2017, the Company also entered into a \$1.4 million promissory note with this same private company. The promissory note is payable at the annual interest rate of 1.95% with a maturity date of 5 years from the date of issuance. As of March 31, 2018, the notes receivable balance was \$1.9 million, up \$0.5 million from December 31, 2017.

The Company owns a minority interest in a second private company based in the U.S. through its investment of \$1.0 million in the third quarter of 2012. This minority interest is included at cost in other long-term assets on the Company's Consolidated Balance Sheets as the Company does not have significant influence over the investee since the Company owns less than 20% of the voting equity in the investee and the investee is not publicly traded.

These investments do not have readily determinable fair values. Therefore, the Company has elected the measurement alternative for these minority interests and the investments are recorded at cost, less any impairment, including changes resulting from observable price changes. The Company regularly evaluates the carrying value of its cost-method investment for impairment and whether any events or circumstances are identified that would significantly harm the fair value of the investment. The primary indicators the Company utilizes to identify these events and circumstances are the investee's ability to remain in business, such as the investee's liquidity and rate of cash use, and the investee's ability to secure additional funding and the value of that additional funding. In the event a

decline in fair value is less than the investment's carrying value, the Company will record an impairment charge in Other Income, net in the Consolidated Statements of Comprehensive Income. As of March 31, 2018, the Company has not recorded any impairment charges related to the cost-method investments discussed above.

Table of Contents

As the inputs utilized for the Company's periodic impairment assessment are not based on observable market data, the determination of fair value of this cost-method investment is classified within Level 3 of the fair value hierarchy. See Note 4 - Fair Value Measurement to our Condensed Consolidated Financial Statements for further information on the fair value hierarchy and the three classification levels. To determine the fair value of these investments, the Company uses all available financial information related to the entities, including information based on recent or pending third-party equity investments in these entities. In certain instances, a cost-method investment's fair value is not estimated as there are no identified events or changes in the circumstances that may have a significant adverse effect on the fair value of the investments and to do so would be impractical.

Other long-term assets consisted of the following (in thousands):

	March 31, 2018	December 31, 2017
Purchased technology rights (net of accumulated amortization of \$7,140 and \$7,012 as of March 31, 2018 and December 31, 2017, respectively)	\$7,022	\$ 3,149
Cost-method investments	3,000	3,000
Notes receivable ⁽¹⁾	1,900	1,400
Other	966	1,050
	\$12,888	\$ 8,599

⁽¹⁾ During the three months ended March 31, 2018, the Company increased the promissory note with a private company, for which it owns an aggregate of \$2.0 million minority interest, as discussed above.

For the three months ending March 31, 2018 and year ended December 31, 2017, the Company recognized amortization expense related to the amortization of purchased technology rights of approximately \$127,000 and \$559,000, respectively. Future amortization expense is estimated to be \$367,000 in the three remaining quarters of 2018, \$488,000 in 2019, \$382,000 in 2020, \$355,000 in 2021, \$349,000 in 2022, \$341,000 in 2023 and \$2,382,000 thereafter.

NOTE 3 — INVENTORIES, NET

Inventories are stated at the lower of cost or net realizable value, with cost determined according to the standard cost method, which approximates the first-in, first-out method. Net realizable value is defined as the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The Company routinely assesses its on-hand inventory for timely identification and measurement of obsolete, slow-moving or otherwise impaired inventory. Net inventories consisted of the following (in thousands):

	March 31, 2018	December 31, 2017
Parts and supplies	\$ 30,917	\$ 29,266
Work-in-progress	10,438	8,712
Finished goods	10,893	11,500
	\$ 52,248	\$ 49,478

NOTE 4 — FAIR VALUE MEASUREMENT

The Fair Value Measurements and Disclosures Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) defines fair value, establishes a framework for measuring fair value under U.S. GAAP and enhances disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The ASC describes a fair value hierarchy based on the following three levels of inputs that may be used to measure fair value, of which the first two are considered observable and the last unobservable:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

7

Table of Contents

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company determines the fair value of its investment portfolio assets by obtaining non-binding market prices from its third-party portfolio managers on the last day of the quarter, whose sources may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value. There were no transfers between Level 1, Level 2, or Level 3 measurements for the three month period ended March 31, 2018.

The Company's financial assets and liabilities were all Level 1 money market fund assets and were measured at fair value on a recurring basis. These Level 1 assets were \$0.7 million as of March 31, 2018 and December 31, 2017.

	Fair Value Measurements as of March 31, 2018 Using			
	Level 1	Level 2	Level 3	Total
Assets:				
Money Market funds	\$701	\$	-\$	-\$701

	Fair Value Measurements as of December 31, 2017 Using			
	Level 1	Level 2	Level 3	Total
Assets:				
Money Market funds	\$701	\$	-\$	-\$701

NOTE 5 — GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill is reviewed for impairment at least annually at the beginning of the fourth quarter, or more frequently if impairment indicators arise. The Company's goodwill is not expected to be deductible for tax purposes. There were no changes in the carrying amount of the Company's goodwill during the three months ended March 31, 2018 and twelve months ended December 31, 2017 as follows (in thousands):

	March 31, December 31,	
	2018	2017
Balance at beginning of year	\$ 85,481	\$ 85,481
Balance at end of period	\$ 85,481	\$ 85,481

Table of Contents

The Company's intangible assets are reflected in the table below (in thousands, except weighted average lives):

	\$60,837
IP R&D	12,982
	\$73,819

NOTE 6 — OTHER COMPREHENSIVE INCOME (LOSS)

Other comprehensive income (loss) represents a measure of all changes in equity that result from recognized transactions and other economic events other than those resulting from investments by and distributions to shareholders. Other comprehensive income (loss) for the Company includes foreign currency translation adjustments.

Table of Contents

The following table presents the changes in each component of accumulated other comprehensive income (loss), net of tax (in thousands):

	Foreign Currency Items	Available-for-Sale Investments	Accumulated Other Comprehensive Income (Loss) Items
Balance as of December 31, 2017	\$ (625)	\$ —	\$ (625)

Foreign currency translation adjustments	\$392	\$ —	—\$392
Unrealized gains on available-for-sale investments	—	—	—
Other comprehensive income (loss)	\$392	\$ —	—\$392

NOTE 7 — EARNINGS PER SHARE

A reconciliation of the denominators used in computing per share net income (EPS) is as follows (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2018	2017
Basic:		
Net income	\$13,397	\$9,231
Less: allocation to participating securities	(205)	(173)
Net income attributable to common stockholders	\$13,192	\$9,058
Weighted average common stock outstanding	43,462	42,898
Net income per share attributable to common stockholders	\$0.30	\$0.21
Diluted:		
Net income	\$13,397	\$9,231
Less: allocation to participating securities	(205)	(173)
Net income attributable to common stockholders	\$13,192	\$9,058
Weighted average common stock outstanding	43,462	42,898
Effect of dilutive securities: stock options and awards	171	91
Weighted-average shares used in computing net income per share	43,633	42,989
Net income per share attributable to common stockholders	\$0.30	\$0.21

Basic net income per share is computed by dividing the net income for the period by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income

for the period by the weighted average number of common and common equivalent shares outstanding during the period. Stock options to acquire approximately 2.2 million and 2.3 million shares for the three months ended March 31, 2018 and 2017, respectively, were excluded from the computations of diluted EPS because the effect of including those stock options would have been anti-dilutive.

Table of Contents

We apply the two-class method of computing EPS, which requires the calculation of separate EPS amounts for our non-vested, time-based restricted stock awards with non-forfeitable dividends and for our common stock. Our non-vested, time-based restricted stock awards with non-forfeitable dividends are considered securities which participate in undistributed earnings with common stock. Under the two-class computation method, net losses are not allocated to participating securities unless the holder of the security has a contractual obligation to share in the losses. Our non-vested, time-based restricted stock awards with non-forfeitable dividends do not have such an obligation so they are not allocated losses.

NOTE 8 — STOCKHOLDERS' EQUITY AND STOCK-BASED COMPENSATION

Dividends

On January 24, 2018, the Board of Directors declared a cash dividend on the Company's common stock of \$0.06 per share. The dividend declared was payable to stockholders of record as of March 23, 2018 and was paid on April 13, 2018. The Company's intent is to pay a continuing dividend on a quarterly basis.

Stock-Based Compensation

The Company's stock option activity for the three months ended March 31, 2018 was as follows:

Stock Options (shares in thousands)	Shares	Weighted Average Exercise Price
Outstanding as of December 31, 2017	3,086	\$ 18.10
Granted	752	21.98
Exercised	(40)	17.36
Cancelled or expired	(370)	18.50
Outstanding as of March 31, 2018	3,428	\$ 18.96

The Company had \$15.8 million of total unrecognized compensation costs related to stock options as of March 31, 2018. These costs are expected to be recognized over a weighted average period of 2.88 years.

The Company's restricted share activity for the three months ended March 31, 2018 was as follows:

Restricted Stock Awards (shares in thousands)	Shares	Weighted Average Grant Price
Non-vested as of December 31, 2017	715	\$ 18.46
Granted	367	21.97
Vested	(271)	18.35
Cancelled or expired	(24)	19.00
Non-vested as of March 31, 2018	787	\$ 20.12

Restricted Stock Units (in thousands)	Shares
Non-vested as of December 31, 2017	423
Granted	55
Vested	(46)
Cancelled or expired	—
Non-vested as of March 31, 2018	432

Table of Contents

As of March 31, 2018, there were \$17.0 million and \$2.8 million of total unrecognized compensation costs related to Restricted Stock Awards (RSAs) and Restricted Stock Units (RSUs), respectively. These costs are expected to be recognized over a weighted average period of 3.04 years for the RSAs and 2.49 years for the RSUs. The Company issues a small number of cash settled RSUs pursuant to the Company's equity incentive plan in certain foreign countries. These grants do not result in the issuance of common stock and are considered immaterial by the Company.

The following are the stock-based compensation costs recognized in the Company's condensed consolidated statements of comprehensive income (in thousands):

	Three Months Ended March 31,	
	2018	2017
Cost of revenue	\$410	\$335
Research and development	(337)	(162)
Selling, general and administrative	1,188	549
Stock-based compensation costs reflected in net income	\$1,261	\$722

NOTE 9 — ACCRUED LIABILITIES

Accrued liabilities consisted of the following (in thousands):

	March 31, December 31,	
	2018	2017
Compensation and employee benefits	\$ 8,093	\$ 18,218
Dividends payable	2,666	2,671
Income and other taxes	271	1,070
Warranty costs	1,284	1,308
Other	2,874	2,723
	\$ 15,188	\$ 25,990

The following table summarizes the changes in the warranty accrual (in thousands):

Accrued warranty costs as of December 31, 2017	\$1,308
Warranty adjustments/settlements	(376)
Accrual for warranty costs	352
Accrued warranty costs as of March 31, 2018	\$1,284

NOTE 10 — REVENUE RECOGNITION

On January 1, 2018, the Company adopted a new standard on revenue recognition, Accounting Standards Codification 606 (the Standard), using the modified retrospective transition method consistent with the guidance issued by the FASB in May 2014. Under this method, the Company applied the guidance retrospectively, only to those contracts which were not completed as of the date of initial application, and recognized the cumulative effect of initially applying the Standard as an adjustment to the opening balance of retained earnings as of January 1, 2018. The comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. The Company does not expect the impact of the adoption of the Standard to be material to its net income on an ongoing basis.

Table of Contents

The Standard applies to all contracts with customers, except for contracts that are within the scope of other standards, such as leases, insurance, collaboration arrangements and financial instruments. Under the Standard, the Company recognizes revenue when its customer obtains control of promised goods or services, in an amount that reflects the consideration which the Company expects to receive in exchange for those goods or services. To determine revenue recognition for arrangements that the Company determines are within the scope of the Standard, the Company performs the following five steps: (i) identify the contract(s) with a customer; (ii) identify the performance obligations in the contract; (iii) determine the transaction price; (iv) allocate the transaction price to the performance obligations in the contract; and (v) recognize revenue when the Company satisfies a performance obligation. The Company only applies the five-step model to contracts when it is probable that the Company will collect the consideration it is entitled to in exchange for the goods or services it transfers to the customer. At contract inception, once the contract is determined to be within the scope of the Standard, the Company assesses the goods or services promised within each contract, identifies the performance obligations and assesses whether each promised good or service is distinct. The Company allocates the total transaction price to each performance obligation in an amount based on the estimated relative standalone selling prices of the promised goods or service underlying each performance obligation and recognizes as revenue when such performance obligation is satisfied.

Revenue is generated primarily from the sale of the Company's products and related services, which are primarily support and maintenance services on the Company's systems. The Company recognizes product revenue when the Customer obtains control of the Company's product, which typically occurs upon shipment or delivery to the Customer depending upon the shipping terms. We treat shipping and handling costs performed after a customer obtains control of the good as a fulfillment cost. Our customers do not typically have any contractual rights of return outside of our warranty provisions. The Company has allowed few returns to date and believes that returns of its products will be minimal.

Royalties: For arrangements that include sales-based royalties, including minimum payments, the Company recognizes revenue at the later of (i) when the related sales occur, or (ii) when the performance obligation, to which some or all of the royalty has been allocated has been satisfied. This is a change from how the Company has historically treated royalty payments, by recognizing royalty revenue when our strategic partners reported the end-user sales to the Company, and is primarily the basis for our cumulative adjustment to retained earnings of \$10.6 million before related tax impacts or \$8.1 million net of related tax impacts. Royalty payments are typically received when our strategic partners report the end-user sales to the Company.

Reagent Rentals: The Company provides systems and certain other hardware to customers through reagent rental agreements under which the customers commit to purchasing minimum quantities of disposable products at a stated price over a defined contract term, which is normally two to three years. Instead of rental payments, the Company recovers the cost of providing the system and other hardware in the amount charged for assays. Revenue is recognized over the defined contract term as assays are shipped. The depreciation costs associated with the system and other hardware are charged to cost of sales on a straight-line basis over the estimated life of the system. The costs to maintain these instruments in the field are charged to cost of sales as incurred. Under the Standard, the Company has reclassified the portion of reagent rental revenue associated with the recovery of the cost of providing the system and other hardware in reagent rental agreements from assay revenue to system revenue effective January 1, 2018. This change will not have any impact on top line revenue and the Company does not anticipate any material effects to its revenue categorization.

Warranties: The Company provides a limited, assurance-type warranty, typically for twelve months from installation for the systems sold to end customers and fifteen months for the systems sold to partners. The Company accrues for the estimated cost of initial product warranties at the time revenue is recognized. The actual warranty expense could differ from the estimates made by the Company based on product performance. Warranty expenses are evaluated and adjusted periodically.

License Revenues: The Company enters into out-licensing agreements which are within the scope of the Standard, under which it licenses certain rights to its technology to third parties. These licenses are typically not distinct, as the customer cannot benefit from the license on its own, and do not have significant standalone functionality, but represent single performance obligations together with the sales of our consumables, systems and assays. The terms of these arrangements typically include payment to the Company of non-refundable, up-front license fees and can extend up to twenty years, although our current agreements extend through 2027. Each of these payments results in license revenues which are recognized ratably over time and are included in other revenues, except for revenues from royalties on net sales of licensed products, which are classified as royalty revenues. Deferred revenues related to these out-licensing agreements are shown in contract liabilities in the table below.

Table of Contents

Performance Obligations: Revenue from extended service agreements is deferred when payment is received in advance of the performance obligation being satisfied or completed. Luminex provides an integrated service of maintenance and related activities for equipment sold to customers, where the nature of the overall promise is to provide a stand ready service. As such, the performance obligation is recognized as a series of distinct service periods and the service revenue is recognized ratably over the term of the agreement. The extended service agreements typically range from one to four years and payment is typically received up-front.

Reserves for Variable Consideration: Revenues from product sales are recorded at the net sales price (transaction price), which includes estimates of variable consideration for which reserves are established and which result from discounts and any other allowances that are offered within contracts between the Company and its customers relating to the Company's sales of its products. These reserves are based on the amounts earned or to be claimed on the related sales and are classified as reductions of accounts receivable. Where appropriate, these estimates take into consideration a range of possible outcomes which are probability-weighted for relevant factors such as the Company's historical experience, current contractual requirements, industry data and forecasted customer buying and payment patterns. Overall, these reserves reflect the Company's best estimates of the amount of consideration to which it is entitled based on the terms of the contract. The amount of variable consideration which is included in the transaction price may be constrained, and is included in the net sales price only to the extent that it is probable that a significant reversal in the amount of the cumulative revenue recognized will not occur in a future period. Actual amounts of consideration ultimately received may differ from the Company's estimates. If actual results in the future vary from the Company's estimates, the Company adjusts these estimates, which would affect net product revenue and earnings in the period when such variances become known.

Contract assets are included within Accounts receivables, net and contract liabilities are included in Deferred revenue on the Company's Balance Sheet. The following table presents the opening and closing balances of the Company's contract assets and liabilities for the three months ended March 31, 2018 (in thousands):

	Balance at Beginning of Period	Balance at End of Period
Contract assets:		
Unbilled receivables - Royalties	\$ 10,643	\$11,183
Contract liabilities - short-term:		
Deferred revenue - Service	\$ 4,438	\$4,807
Deferred revenue - Licenses	246	246
Deferred revenue - Other	37	184
Total Contract liabilities - short-term	\$ 4,721	\$5,237
Contract liabilities - long-term:		
Deferred revenue - Service	\$ 315	\$289
Deferred revenue - Licenses	1,099	1,038
Deferred revenue - Other	83	83
Total Contract liabilities - long-term	\$ 1,497	\$1,410

During the three months ended March 31, 2018, the Company recognized the following revenues as a result of changes in the contract asset and contract liability balances in the period (in thousands):

Three
Months

	Ended
	March
	31,
Revenue recognized in the period from:	2018
Amounts included as contract liabilities at the beginning of the period	\$ 2,955
Performance obligations satisfied in previous periods	-

Table of Contents

In accordance with the Standard, the disclosure of the impact of adoption on our consolidated income statement and balance sheet was as follows (in thousands):

Income Statement	Three Months Ended March 31, 2018		
	As Reported in this Quarterly Report	Amounts Before Adoption of the Standard	Net Effect of Adoption of the Standard
System sales	\$7,931	\$ 7,508	\$ 423
Consumable sales	11,872	11,872	—
Royalty revenue	12,239	11,713	526
Assay revenue	45,841	46,249	(408)
Other revenue	4,779	4,779	—
Revenue	82,662	82,121	541
Gross profit	53,588	53,047	541
Income from operations	15,266	14,725	541
Income tax benefit (expense)	(2,318)	(2,188)	(130)
Net Income	13,397	12,986	411

Balance Sheet	As of March 31, 2018		
	As Reported in this Quarterly Report	Balances Before Adoption of ASC 606	Effect of Adoption of the Standard
ASSETS			
Accounts receivable, net	46,283	35,099	11,184
Deferred income taxes	34,858	37,542	(2,684)
LIABILITIES AND STOCKHOLDERS' EQUITY			
Retained earnings	106,385	97,885	8,500

NOTE 11 — INCOME TAXES

At the end of each interim reporting period, an estimate is made of the effective tax rate expected to be applicable for the full year. The estimated full year's effective tax rate is used to determine the income tax rate for each applicable interim reporting period. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period of the enactment date. The effective tax rate for the three months ended March 31, 2018 was 14.8%, including amounts recorded for discrete events. This differs from the statutory rate of 21% primarily as a result of the worldwide mix of consolidated earnings and losses before taxes and changes to provisional amounts recorded for certain aspects of the Tax Cuts and Jobs Act (the Tax Act). The Company currently expects a 2018 full year effective tax rate of 25% to 35%, excluding amounts recorded for discrete events. The Company's tax expense reflects the full federal, various state, and foreign blended statutory rates. The Company will be subject to the Tax Act provisions regarding U.S. federal taxation of foreign intangible income and has included in its estimate of income tax the effects of this tax. The effect of this estimate is still under evaluation as the Company gains a more thorough understanding of these provisions and changes may materially impact income tax expenses. The Company is utilizing its net operating losses (NOLs) and tax credits in the U.S., Canada and the Netherlands and, therefore, cash taxes to be paid are expected to be less than 10% of book tax expense.

Table of Contents

The Tax Act was enacted on December 22, 2017. The Tax Act includes, among other things, a U.S. federal corporate income tax rate decrease from 35% to 21%, requires companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred, and creates new taxes on certain foreign sourced earnings. On December 22, 2017, Staff Accounting Bulletin No. 118 (SAB 118) was issued to address the application of U.S. GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Act. The Company is applying the guidance in SAB 118 when accounting for the enactment-date effect of the Tax Act. As of March 31, 2018, the Company has not completed its accounting for all of the tax effects of the Tax Act; however, the Company has made a reasonable estimate of the effects. During the three month period ended March 31, 2018, the Company recognized adjustments totaling \$2.2 million to the provisional amounts recorded at December 31, 2017 and included these adjustments as a component of income tax expense from continuing operations. The Company will continue to make and refine its calculations as additional analysis is completed. These changes could be material to income tax expense.

Deferred tax assets and liabilities. The Company remeasured certain deferred tax assets and liabilities based on the tax rates at which they are expected to reverse in the future, which is generally 21%. The Company recorded a provisional amount of \$2.7 million at December 31, 2017 related to the remeasurement of certain deferred tax balances. Upon further analyses of certain aspects of the Tax Act and refinement of its calculations during the three months ended March 31, 2018, the Company increased its provisional amount by \$164,000, which is included as a component of income tax expense from continuing operations. Due to the continued refinement of its calculations for the transition tax, certain aspects of deferred compensation, and the effect these calculations may have on the measurement of NOLs and other carryforwards, the Company will continue to analyze and refine its calculations related to the measurement of these balances. As of March 31, 2018, the Company's deferred tax assets and liabilities continue to have provisional amounts recorded for remeasurement.

Foreign tax effects

One-time transition tax. The one-time transition tax is based on the Company's total post-1986 earnings and profits (E&P), which the Company had deferred from U.S. income taxes under previous U.S. law. The Company originally recorded a provisional amount for its one-time transition tax liability of \$6.7 million at December 31, 2017. Upon further analysis of certain aspects of the E&P of its Canadian subsidiary and refinement of its calculations for its foreign subsidiaries during the three months ended March 31, 2018, the Company decreased this provisional amount by \$1.3 million, which is included as a component of income tax expense from continuing operations. As of March 31, 2018, the Company continues to have provisional amounts recorded for the one-time tax liability. As the Company continues to refine its E&P analysis, the Company will refine its calculations of the one-time transitions tax, which could affect the measurement of this liability.

Deferred tax liabilities for withholding tax. The excess of financial reporting basis over tax basis of the Company's foreign subsidiaries is considered permanently reinvested with the exception of certain earnings of the Canadian subsidiary. The Company originally recorded a provisional amount of deferred tax liability for withholding and state income taxes associated with the ultimate repatriation from Canada to the U.S. of these certain earnings of \$3.2 million at December 31, 2017. Upon further analysis of its calculations of the Canadian withholding tax during the three months ended March 31, 2018, the Company decreased its provisional amount by \$2.5 million, which is included as a component of income tax expense from continuing operations. The deferred tax liabilities for withholding tax are still provisional as of March 31, 2018 as the Company's permanent reinvestment assertions for foreign earnings associated with certain aspects of the Tax Act are not yet finalized.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, Australia, Canada, China, Hong Kong, Japan, the Netherlands, and various U.S. states. Due to net operating losses, the U.S., Canadian and Australian tax returns dating back to 2011 can still be reviewed by the taxing authorities. The Netherlands tax returns dating back to 2013 can still be reviewed by the taxing authorities. For the three months ended March 31, 2018, unrecognized tax benefits related to the U.S. transition tax on earnings of certain foreign subsidiaries and deferred tax liabilities for withholding tax of \$1.3 million and \$140,000, respectively, were recorded. The Company does not expect any material changes to the unrecognized tax benefit liability within the next 12 months. The Company recognizes interest and penalties related to uncertain tax positions in the provision for income taxes.

Table of Contents

NOTE 12 - COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Company is subject to claims, lawsuits and legal proceedings. When and if it appears probable in management's judgment, and based upon consultation with outside counsel, that we will incur monetary damages or other costs in connection with any claims or proceedings, and such costs can be reasonably estimated, we record the estimated liability in the financial statements. If only a range of estimated losses can be estimated, we record an amount within the range that, in management's judgment, reflects the most likely outcome; if none of the estimates within that range is a better estimate than any other amount, we record the liability at the low end of the range of estimates. Any such accrual would be charged to expense in the appropriate period. We disclose significant contingencies when the loss is not probable and/or the amount of the loss is not estimable, when we believe there is at least a reasonable possibility that a loss has been incurred. We recognize costs associated with legal proceedings in the period in which the services were provided.

NOTE 13 — RECENT ACCOUNTING PRONOUNCEMENTS

Recently adopted accounting guidance

In May 2014, the FASB issued the Standard which outlines a single comprehensive model to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The Company adopted the Standard effective January 1, 2018, using the modified retrospective approach. Under this method, the Company recorded a cumulative adjustment increasing retained earnings of \$10.6 million before related tax impacts or \$8.1 million net of related tax impacts. See Note 10, "Revenue Recognition" for additional discussion related to the Company's adoption of the Standard. Under the Standard, estimated royalty revenue will be recorded each quarter on an accrual basis to more closely coincide with the timing of the end user sale by the strategic partner; with reconciliation made upon submission of the royalty report by the partner indicating actual royalties owed in the following quarter. In addition, the Company began recording the portion of reagent rental revenue associated with the recovery of the cost of providing the system and other hardware in reagent rental agreements as system revenue rather than assay revenue effective January 1, 2018. This change will not have any impact on top line revenue and the Company does not anticipate any material effects to its revenue categorization.

In January 2016, the FASB issued guidance that amends various aspects of the recognition, measurement, presentation, and disclosure for financial instruments. This guidance was effective for annual reporting periods, and interim periods within those years beginning after December 15, 2017. The Company adopted this standard during the quarter ended March 31, 2018. The adoption of this new standard resulted in a change to the Company's accounting policy; however, adoption did not have a material impact on its consolidated financial position or results of operations.

In August 2016, the FASB issued specific guidance on eight cash flow classification issues that are not currently addressed by current U.S. GAAP and thereby reduce the current diversity in practice. This guidance is effective for annual periods beginning after December 15, 2017. The Company adopted this standard during the quarter ended March 31, 2018, and its adoption did not have a material impact on its consolidated financial statements.

In October 2016, the FASB issued guidance on income taxes which requires companies to recognize the income tax effects of intercompany sales and transfers of assets, other than inventory, in the income statement as income tax expense (or benefit) in the period in which the transfer occurs. The new standard became effective for the Company

on January 1, 2018. The Company has adopted this new standard using the modified retrospective method, through a cumulative-effect adjustment based on currently enacted tax rates directly to retained earnings as of the beginning of that date. The adoption of this new standard resulted in a change to the Company's accounting policy; however, adoption did not have a material impact on the Company's consolidated financial position or results of operations.

On January 10, 2018, the FASB issued guidance on the accounting for tax on the global intangible low-taxed income (GILTI) provisions of the Tax Act. The GILTI provisions impose a tax on foreign income in excess of a deemed return on tangible assets of foreign corporations. Effective January 1, 2018, the Company recognizes the tax on GILTI as a period expense in the period the tax is incurred. Under this policy, the Company has not provided deferred taxes related to temporary differences that upon their reversal will affect the amount of income subject to GILTI in the period.

Table of Contents

Recent accounting guidance not yet adopted

In January 2018, the FASB issued guidance related to reporting comprehensive income, which gives entities the option to reclassify to retained earnings the tax effects resulting from the Tax Act related to items in Additional Other Comprehensive Income (AOCI) that the FASB refers to as having been “stranded” in AOCI. The guidance is effective for annual and interim periods beginning after December 15, 2018, and is applicable to the Company in fiscal year 2019, however, early adoption is permitted. The guidance, when adopted, will require new disclosures regarding the Company's accounting policy for releasing the tax effects in AOCI and permit the Company the option to reclassify to retained earnings the tax effects resulting from the Tax Act that are stranded in AOCI. The Company is currently evaluating how to apply the new guidance. The Company does not anticipate that this guidance will have a material impact on its consolidated financial statements.

In January 2017, the FASB issued guidance on intangibles, including goodwill, which simplifies how companies calculate goodwill impairments by eliminating Step 2 of the impairment test. The guidance requires companies to compare the fair value of a reporting unit to its carrying amount and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value. The guidance is effective for annual periods beginning after December 15, 2019, and is applicable to the Company in fiscal year 2020, however, early adoption is permitted. The Company does not anticipate that this guidance will have a material impact on its consolidated financial statements.

In February 2016, the FASB issued guidance requiring lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases with the exception of short-term leases. The effective date of the new guidance is for the Company's first quarter of fiscal year 2019 and early adoption is permitted. The new standard must be adopted using a modified retrospective transition and requires application of the new guidance at the beginning of the earliest comparative period presented. The Company continues to evaluate the impact of the adoption of this requirement on its consolidated financial statements, but has completed an inventory of the Company's leases, and does not anticipate that adoption of this guidance will have a material impact on its consolidated financial statements except for the addition of the right-of-use asset and a lease liability to the balance sheet.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following information should be read in conjunction with the condensed consolidated financial statements and the accompanying notes included in Part I, Item 1 of this Report, and the "Risk Factors" included in Part I, Item 1A of the 2017 10-K.

SAFE HARBOR CAUTIONARY STATEMENT

This quarterly report on Form 10-Q contains statements that are forward-looking statements under the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide our current expectations of forecasts of future events. All statements other than statements of current or historical fact contained in this quarterly report, including statements regarding our future financial position, business strategy, impact of the reimbursement landscape, new products including ARIES®, VERIGENE® and NxTAG®, assay sales, consumables sales patterns and bulk purchases, budgets, system sales, anticipated gross margins, liquidity, cash flows, projected costs and expenses, taxes, deferred tax assets, regulatory approvals or the impact of laws or regulations applicable to us, plans and objectives of management for future operations, and future acquisition impacts and integration and the expected benefit of our future acquisitions are forward-looking statements. The words "anticipate," "believe," "continue," "should," "estimate," "expect," "intend," "may," "plan," "projects," "will" and similar expressions as they relate to us, are intended to identify forward-looking statements. These statements are based on our current plans and actual future activities, and our financial condition and results of operations may be materially different from those set forth in the forward-looking statements as a result of known or unknown risks and uncertainties, including, among other things:

concentration of our revenue in a limited number of direct customers and strategic partners, some of which may experience decreased demand for their products utilizing or incorporating our technology, budget or finance constraints in the current economic environment, or periodic variability in their purchasing patterns or practices as a result of material resource planning challenges;

risks and uncertainties relating to market demand and acceptance of our products and technology, including ARIES®, MultiCode®, NxTAG®, xMAP® and VERIGENE®;

our ability to scale manufacturing operations and manage operating expenses, gross margins and inventory levels;

our ability to obtain and enforce intellectual property protections on our products and technologies;

the impact on our growth and future results of operations with respect to the loss of the LabCorp women's health business anticipated in June 2018;

our ability to successfully launch new products in a timely manner;

dependence on strategic partners for development, commercialization and distribution of products;

risks and uncertainties associated with implementing our acquisition strategy, our ability to identify acquisition targets including our ability to obtain financing on acceptable terms, our ability to integrate acquired companies or selected assets into our consolidated business operations, and the ability to fully realize the benefits of our acquisitions;

the timing of and process for regulatory approvals;

competition and competitive technologies utilized by our competitors;

fluctuations in quarterly results due to a lengthy and unpredictable sales cycle, fluctuations in bulk purchases of consumables, fluctuations in product mix, the seasonal nature of some of our assay products, and the variability of operating expense timing;

our ability to comply with applicable laws, regulations, policies and procedures;

the impact of the ongoing uncertainty in global finance markets and changes in government and government agency funding, including effects on the capital spending policies of our partners and end users and their ability to finance purchases of our products;

Table of Contents

• changes in interpretation, assumptions and expectations regarding the Tax Act, including additional guidance that may be issued by federal and state taxing authorities;

• changes in principal members of our management staff;

• potential shortages, or increases in costs, of components or other disruptions to our manufacturing operations;

• our increasing dependency on information technology to enable us to improve the effectiveness of our operations and to monitor financial accuracy and efficiency;

• the implementation, including any modification, of our strategic operating plans;

• the uncertainty regarding the outcome or expense of any litigation brought against or initiated by us; and

risks relating to our foreign operations, including fluctuations in exchange rates, tariffs, customs and other barriers to importing/exporting materials and products in a cost effective and timely manner; difficulties in accounts receivable collections; our ability to monitor and comply with foreign and international laws and treaties; and our ability to comply with changes in international taxation policies.

Many of these risks, uncertainties and other factors are beyond our control and are difficult to predict. Any or all of our forward-looking statements in this quarterly report may turn out to be inaccurate. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. New factors could also emerge from time to time that could adversely affect our business. The forward-looking statements herein can be affected by inaccurate assumptions we might make or by known or unknown risks, uncertainties and assumptions, including the risks, uncertainties and assumptions outlined above and described in the 2017 10-K. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this quarterly report may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. When you consider these forward-looking statements, you should keep in mind these risk factors and other cautionary statements in this quarterly report, including in this "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" and in our other annual and periodic reports.

Our forward-looking statements speak only as of the date made. We undertake no obligation to publicly update or revise forward-looking statements whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements contained in this quarterly report.

Unless the context requires otherwise, references in this Quarterly Report on Form 10-Q to "Luminex," the "Company," "we," "us" and "our" refer to Luminex Corporation and its subsidiaries.

OVERVIEW

We develop, manufacture and sell proprietary biological testing technologies and products with applications throughout the life sciences industries, including diagnostics, pharmaceutical and research. These industries depend on a broad range of tests, called assays, to perform diagnostic testing and conduct life science research. We have established a position in several segments of the life sciences industries by developing and delivering products that satisfy a variety of customer needs in specific market segments, including multiplexing, accuracy, precision,

sensitivity, specificity, reduction of labor and ability to test for proteins and nucleic acids. These needs are addressed by our proprietary technologies.

Multiplexing, the foundation of our Company, allows the end user in a laboratory to generate multiple laboratory results from a single sample with a single assay. This is important because our end user customers, which include laboratory professionals performing discovery, and research and clinical laboratories performing tests on patients as ordered by physicians and other laboratories, have a fundamental need to perform high quality testing as efficiently as possible. Until the availability of multiplexing technology, the laboratory professional had to perform one assay at a time in a sequential manner, and if additional testing was required on a sample, a second assay would be performed to generate the second result, and so on until all the necessary tests were performed.

Table of Contents

Our xMAP Technology

Our xMAP technology is an open architecture, multiplexing technology that combines existing biological testing techniques with illumination, advanced digital signal processing, detection and proprietary software. With our technology, discrete assays are performed on the surface of color-coded microspheres. These microspheres are read in a compact analyzer that utilizes lasers or light emitting diodes (LEDs), detectors, charge-coupled device imaging and high-speed digital signal processing to simultaneously identify the assay and measure the individual assay results.

Our xMAP technology is currently being used within various segments of the life sciences industries, including the fields of drug discovery and development, and for clinical diagnostics, bio-defense, food safety and biomedical research.

We have a full range of instruments using our xMAP technology: our LUMINEX[®] 100/200[™] Systems offer 100-plex testing; our FLEXMAP 3D[®] System is our high-throughput, 500-plex testing system; and our MAGPIX[®] System provides 50-plex testing at a lower cost using imaging rather than flow cytometry. By using our xMAP technology, the end users are able to be more efficient by generating multiple simultaneous results per sample. We believe that this technology may also offer advantages in other industries, such as in food safety, animal health and bio-defense/bio-threat markets. Using the xMAP products Luminex has available today, up to 500 simultaneous analyte results can be determined from a single sample.

Our Non-Automated Technologies

Our xTAG technology consists of several components including multiplexed PCR or target identification primers, DNA Tags, xMAP microspheres and data analysis software. xTAG technology permits the development of molecular diagnostic assays for clinical use by hospital and reference laboratories. xTAG technology has been applied to human genetic assays, pharmacogenetic assays and infectious disease assays.

Our MultiCode technology is based upon a unique assay chemistry that is a flexible platform for both real-time PCR and multiplex PCR-based applications. MultiCode-based PCR assays are primarily used for the detection of infectious diseases and genetic-based conditions. We have multiple molecular diagnostic (MDx) assays based on the MultiCode chemistry. MultiCode products are based upon the unique MultiCode bases, isoC and isoG. The synthetic isoC:isoG DNA base pair differs from the naturally occurring base pairs in its hydrogen bonding pattern. As a result, the MultiCode bases, isoC and isoG, can only pair with each other, but can co-exist with naturally occurring nucleotide pairs. This property enables site-specific incorporation of the isobases during amplification. The MultiCode base pair is recognized by naturally occurring enzymes and can be used for the specific placement of reporter molecules and to increase the molecular recognition capabilities of hybridization-based assays. The MultiCode base pair enables solutions to complex molecular challenges that were previously not possible with natural nucleic acid alone.

We have multiple assay development activities ongoing and these activities are focused in the areas of infectious disease, human genetics, and pharmacogenomics.

Our ARIES[®] Technology

The ARIES[®] System is our sample-to-answer platform for our MultiCode[®]-RTx technology, including In Vitro Diagnostic (IVD) assays. The ARIES[®] System is a clinical test system which automates and integrates extraction of nucleic acid from a clinical sample, performs real-time PCR, and detects multiple signals generated by target-specific probes. The ARIES[®] system is used with specific assays to measure multiple analytes indicative of infectious disease. The ARIES[®] System uses internal barcode scanning and other advanced features to minimize operator errors. Each independent module supports from one to six cassettes, allowing both STAT and Batch testing. The ARIES[®] System

can run both IVD and MultiCode[®] Analyte Specific Reagents (ASRs) simultaneously with a common Universal Assay Protocol. The ARIES[®] system was commercially launched in the fourth quarter of 2015.

Table of Contents

Our VERIGENE Technology

Our offering in the molecular diagnostic market segment includes proprietary diagnostic tools that enable rapid and accurate detection of respiratory, gastrointestinal and bloodstream infections. Our U.S. Food and Drug Administration (FDA) cleared VERIGENE® Gram-Positive Blood Culture (BC-GP) and Gram-Negative Blood Culture (BC-GN) test panels for the early detection of pathogens associated with bloodstream infections are leading products in the high-growth bloodstream infection testing segment. In addition to detecting bacteria, these panels also detect yeast and identify antibiotic resistance markers. In contrast to traditional methodologies, which can take several days, these assays enable physicians to identify the pathogen, including any associated resistance markers, and prescribe the most appropriate antibiotic regimen, all within 2.5 hours after identification of a positive blood culture. The ability for clinicians to make earlier, better informed therapeutic decisions results in improved patient outcomes and lower healthcare costs. Our VERIGENE product offering also includes FDA-cleared products for the detection of gastrointestinal and respiratory infections. These consist of a targeted product for the detection of *C. difficile*, as well as highly multiplexed molecular enteric, blood and respiratory pathogen panels which test for a wide spectrum of microorganisms often associated with these types of infections. With the combination of the ARIES® and VERIGENE platforms, Luminex offers customers automated molecular platforms for both syndromic and targeted molecular diagnostic testing.

The VERIGENE System is an automated multiplex-capable system that rapidly and accurately detects infectious pathogens and drug resistance markers. The VERIGENE System consists of: (i) VERIGENE Test Cartridges, which are single-use, self-contained test units, and (ii) VERIGENE instrumentation, including the VERIGENE Processor SP, which is a modular bench-top analyzer that combines automated nucleic acid extraction, purification, amplification (if needed), and hybridization in each module, as well as the VERIGENE Reader, which manages sample information and reads results from processed cartridges. Tests that run on the VERIGENE System are primarily designed to identify infections in the bloodstream, respiratory tract, and gastrointestinal tract.

The VERIGENE System utilizes advanced automation and proprietary chemistry to enable rapid sample to result detection of nucleic acid and protein targets. NanoGrid Technology, a unique gold nanoparticle probe chemistry, is the driving force behind all VERIGENE tests, providing a foundation for the VERIGENE System's menu of clinically meaningful diagnostics.

In addition to our menu of infectious disease tests, we are currently developing a next generation VERIGENE System, VERIGENE II, that will deliver an improved user experience. This next generation system is designed to provide a reduced time to result, an improved user interface and a room temperature cartridge, all in a fully automated sample to result system with an optimized footprint.

Our Market Approach

We primarily serve the life sciences industries by marketing products, including our specific testing equipment and assays, to various types of testing laboratories. We have a large base of installed systems that has grown primarily from the following:

- Placements made by customers within our Licensed Technologies Group (LTG) in which customers either:
 - license our xMAP technology and develop products that incorporate our xMAP technology into products that they then sell to end users, or
 - purchase our proprietary xMAP laboratory instrumentation and our proprietary xMAP microspheres and sell xMAP-based assay products and/or xMAP-based testing services, which run on the xMAP instrumentation, and pay a royalty to us; and
- In addition, we utilize a direct sales force that focuses on the sale of molecular diagnostic assays that run on our systems.

As of March 31, 2018, Luminex had 74 strategic partners, of which 52 have released commercialized reagent-based products utilizing our technology. Our remaining partners are in various stages of development and commercialization of products that incorporate our technology.

A primary focus for our growth is the development and sale of molecular diagnostic assays utilizing our proprietary MultiCode[®] and VERIGENE technologies for use on our installed base of systems. We utilize a direct sales model for sales of these products, which is intended to take advantage of our increasing installed base of instruments. Our assays are primarily focused on multiplexed applications for the human molecular clinical diagnostics market. Our assay products are currently focused on three segments of the molecular diagnostic testing market: human genetics, personalized medicine and infectious diseases.

Table of Contents

First Quarter 2018 Highlights

Consolidated revenue was \$82.7 million for the quarter ended March 31, 2018, representing a 6% increase over revenue for the first quarter of 2017.

Assay revenue was \$45.8 million for the quarter ended March 31, 2018, representing a 23% increase over assay revenue for the first quarter of 2017.

Sample-to-answer product revenue growth increased by 49% for the quarter ended March 31, 2018 from the first quarter of 2017.

Royalty revenue was \$12.2 million for the quarter ended March 31, 2018, representing a 6% increase over royalty revenue for the first quarter of 2017.

Table of Contents

Material Customer Activity

Based upon an extension agreement entered into in the third quarter of 2017, the Company will continue to sell its Cystic Fibrosis (CF) products to the Company's largest customer, LabCorp, through the end of 2019. Also, as previously stated in our Annual Report on Form 10-K for the year ended December 31, 2017, LabCorp elected to develop the next iteration of one of its women's health products with another party. We have negotiated significant minimum women's health purchases from LabCorp through June 2018, pursuant to which, LabCorp has committed to acquire no less than \$63.1 million of our women's health products from January 1, 2017 through June 30, 2018. Through March 31, 2018, LabCorp acquired approximately \$53.7 million of our women's health products. The anticipated future loss of the LabCorp business could have a material adverse effect on our growth and future results of operations if we are unable to effectively attract new customers and/or increase sales with existing customers.

Consumables Sales and Royalty Revenue Trends

We have experienced significant fluctuations in consumable revenue over the past several years. Overall, the fluctuations were partially due to periodic changes in volume from our largest purchasing customers. On a quarterly basis, our largest customers account for approximately 70% of our total consumable sales volume. We expect these fluctuations to continue as the ordering patterns and inventory levels of our largest bulk purchasing partners remain variable. Additionally, even though we experience variability in consumable revenue, the key indicator of the success of our partners' commercialization efforts is the rising level of royalties and reported royalty bearing sales.

Future Operations

We expect our areas of focus over the next twelve months to be:

- delivering on our revenue growth goals;
- accelerating development and commercialization of the assays on our sample-to-answer diagnostic systems;
- increasing the growth of our LTG revenue through enrichment of our existing partner relationships and the addition of new partners;
- completing development of and commercializing the next generation sample-to-answer system, VERIGENE II;
- improvement of ARIES® and VERIGENE gross margins;
- placements of our VERIGENE and ARIES® systems, our sample-to-answer platforms and assays;
- maintenance and improvement of our existing products and the timely development, completion and successful commercial launch of our pipeline products;
- adoption and use of our platforms and consumables by our customers for their testing services;
- expansion and enhancement of our installed base of systems and our market position within our identified target market segments; and
- monitoring and mitigating the effect of the ongoing uncertainty in global finance markets and changes in government funding on planned purchases by end users.

We anticipate continued revenue concentration in our higher margin items (assays, consumables and royalties) contributing to favorable, but variable, gross margin percentages. Additionally, we believe that sustained investment by the Company in research and development is necessary in order to meet the needs of our marketplace and provide a sustainable new product pipeline. We may experience volatility in research and development expenses as a percentage of revenue on a quarterly basis as a result of the timing of development expenses, clinical validation and clinical trials in advance of the commercial launch of our new products.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP for interim financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Estimates and assumptions are reviewed periodically. Actual results may differ from these estimates under different assumptions or conditions.

Management believes there have been no significant changes during the quarter ended March 31, 2018 to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2017 10-K, with the exception to the adoption of ASU 2014-09 in the current quarter, which is described in Note 10 - Revenue Recognition.

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2018 COMPARED TO THREE MONTHS ENDED MARCH 31, 2017

Selected consolidated financial data for the three months ended March 31, 2018 and 2017 is as follows (dollars in thousands):

	Three Months Ended March 31,		Variance	Variance (%)	
	2018	2017			
Revenue	\$82,662	\$77,779	\$4,883	6	%
Gross profit	\$53,588	\$52,786	802	2	%
Gross margin percentage	65 %	68 %	(3)%		N/A
Operating expenses	\$38,322	\$38,774	(452)	(1)%	
Income from operations	\$15,266	\$14,012	1,254	9	%

Total revenue increased by 6% to \$82.7 million for the three months ended March 31, 2018 from \$77.8 million for the comparable period in 2017. This increase was primarily driven by the growth in our sample-to-answer assay revenue, which comprised 32% of total assay revenue for the three months ended March 31, 2018 compared to 27% for the comparable period in 2017. This increase was partially offset by lower consumable sales in the first quarter 2018, which declined \$3.5 million or 23% as compared to the prior year quarter.

The following table presents our revenues disaggregated by revenue source for the three months ended March 31, 2018 and 2017 (dollars in thousands):

	Three Months Ended March 31,		Variance	Variance (%)	
	2018	2017			
System sales	\$7,931	\$8,501	\$(570)	(7)%	
Consumable sales	11,872	15,385	(3,513)	(23)%	
Royalty revenue	12,239	11,561	678	6	%
Assay revenue	45,841	37,407	8,434	23	%
Service revenue	2,878	2,905	(27)	(1)%	

Other revenue	1,901	2,020	(119)	(6)%
	\$82,662	\$77,779	\$4,883	6	%	

Table of Contents

We continue to experience revenue concentration in a limited number of customers. Five customers accounted for 44% (two of whom were 19% and 13%, respectively, and no other customer exceeded 6%) of consolidated total revenue in the first quarter of 2018. For comparative purposes, these top five customers accounted for 48% (two of whom were 17% and 18%, respectively, and no other customer exceeded 6%) of total consolidated revenue in the first quarter of 2017.

Revenue from the sale of systems and peripheral components decreased 7% to \$7.9 million for the three months ended March 31, 2018 from \$8.5 million for the three months ended March 31, 2017. This decrease is primarily the result of a decrease in total multiplexing analyzer placements, with fewer sales of MAGPIX and FLEXMAP 3D units, partially offset by higher sales of LUMINEX 100/200 Systems. We sold 218 multiplexing analyzers in the first quarter of 2018, as compared to 242 multiplexing analyzers sold for the corresponding prior year period. For the three months ended March 31, 2018, five of our partners accounted for 185 multiplexing analyzers, or 85%, of total multiplexing analyzers sold, as compared to five of our partners accounting for 187 multiplexing analyzers, or 77% of total multiplexing analyzers sold, for the three months ended March 31, 2017.

Consumable sales, comprised of microspheres and sheath fluid, decreased 23% to \$11.9 million for the three months ended March 31, 2018 from \$15.4 million for the three months ended March 31, 2017. During the three months ended March 31, 2018, we had 18 bulk purchases of consumables totaling approximately \$8.9 million (75% of total consumable revenue), ranging from \$0.1 million to \$3.8 million, as compared with 18 bulk purchases totaling approximately \$12.4 million (80% of total consumable revenue), ranging from \$0.1 million to \$6.4 million, for the three months ended March 31, 2017. The decrease in revenue from bulk purchases in the three months ended March 31, 2018 is the main reason for the decrease in consumable revenue in the first quarter of 2018 from the prior year period. We expect fluctuations in consumable sales on an ongoing basis. Partners who reported royalty bearing sales accounted for \$8.7 million, or 73%, of consumable sales for the three months ended March 31, 2018 compared to \$12.3 million, or 80%, of the total consumable sales for the three months ended March 31, 2017.

Royalty revenue, which results when our partners sell products or testing services incorporating our technology, increased by 6% to \$12.2 million for the three months ended March 31, 2018 from \$11.6 million for the three months ended March 31, 2017. This increase is primarily attributable to an increase in base royalties, partially offset by lower royalty minimums and audit findings and other adjustments. We expect modest fluctuations in the royalties submitted quarter to quarter based upon the varying contractual terms, differing reporting and payment requirements, and the addition of new partners. Our partners' end user sales may reflect volatility from quarter to quarter and, therefore, that same volatility is reflected in our reported royalty revenues on a quarterly basis.

Assay revenue increased 23% to \$45.8 million for the three months ended March 31, 2018 from \$37.4 million for the three months ended March 31, 2017, driven primarily by an increase in our sample-to-answer assay revenue, which consists of VERIGENE and ARIES[®] assay sales, in addition to increased sales of our non-automated infectious disease testing assays. Revenue for our sample-to-answer products increased by 49% for the three months ended March 31, 2018 from the first quarter of 2017. Revenue for our non-automated infectious disease testing products increased by 24% while our genetic testing assay products decreased by 19% from the comparable period in 2017. This decrease in genetic testing assay products was attributable to continued pricing and reimbursement challenges within the pharmacogenetic market segment, causing us to shift our focus towards infectious disease testing. The VERIGENE assay revenue stream represents approximately 29% of total assay revenue for the three months ended March 31, 2018, and consisted primarily of our sample-to-answer clinical tests. Our largest customer, by revenue, accounted for 34% of total assay revenue for the three months ended March 31, 2018 compared to 35% for the three months ended March 31, 2017. No other customer accounted for more than 10% of total assay revenue during those periods. As discussed under "Material Customer Activity" and previously disclosed in our prior quarterly reports, our largest assay customer, LabCorp, informed us that they plan on developing the next iteration of their women's health portfolio with another party, which could negatively impact our assay revenue in 2018 and beyond.

Service revenue, comprised of extended warranty contracts earned ratably over the term of a contract and time and materials for billable service work not under an extended warranty contract, remained consistent at \$2.9 million for the first quarter of 2018 and 2017. As of March 31, 2018, we had 2,048 Luminex systems covered under extended service agreements and \$5.1 million in deferred revenue related to those contracts. As of March 31, 2017, we had 1,669 Luminex systems covered under extended service agreements and \$4.7 million in deferred revenue related to those contracts.

Other revenue, which includes training revenue, shipping revenue, miscellaneous part sales, amortized license fees and revenue from agreements with U.S. government agencies, decreased 6% to \$1.9 million for the three months ended March 31, 2018 compared to \$2.0 million for the three months ended March 31, 2017.

Table of Contents

Gross Profit. Gross profit increased to \$53.6 million, or 2% for the three months ended March 31, 2018, as compared to \$52.8 million for the three months ended March 31, 2017. Gross margin (gross profit as a percentage of total revenue) was 65% for the three months ended March 31, 2018, a decrease from the prior year quarter's gross margin of 68%. The decrease in gross margin is primarily attributable to a change in product mix, where sales of consumables and royalties, two of our high-margin items, represented 29% of total sales in the three months ended March 31, 2018, down from 35% in the comparable period in 2017. This adverse mix was partially offset by improving margins within our sample-to-answer assays for the three months ended March 31, 2018 as compared to the prior year quarter. We anticipate continued fluctuation in gross margin and related gross profit primarily as a result of variability in revenue mix and seasonality effects inherent in our assay revenue.

Research and Development Expense. Research and development expense decreased to \$10.3 million, or 12% of total revenue, for the three months ended March 31, 2018 from \$12.4 million, or 16% of total revenue, for the three months ended March 31, 2017. The decrease in research and development expense was primarily driven by the timing of direct material and outside service expenses related to VERIGENE II and ARIES[®] assay development. Research and development headcount as of March 31, 2018 was 178 compared to 194 as of March 31, 2017. This 8% drop in headcount was primarily attributable to continued synergies between R&D locations across the U.S. The focus of our research and development activities is the development and commercialization of a pipeline of assays for the ARIES[®] System and the development and commercialization of the next generation VERIGENE System, VERIGENE II, and assays.

Selling, General and Administrative Expense. Selling, general and administrative expenses, excluding the amortization of acquired intangible assets, was \$25.8 million for the three months ended March 31, 2018, an increase of \$1.8 million from the three months ended March 31, 2017. The increase was primarily attributable to higher stock compensation, marketing materials and trade show expenses. Selling, general and administrative headcount as of March 31, 2018 was 360 as compared to 370 as of March 31, 2017. As a percentage of revenue, selling, general and administrative expense, excluding the amortization of acquired intangible assets, was 31% in the first quarter of 2018 and 2017.

Amortization of Acquired Intangible Assets. Amortization of acquired intangible assets decreased to \$2.2 million for the three months ended March 31, 2018 from \$2.4 million for the three months ended March 31, 2017. The decrease was primarily driven by acquired intangible assets reaching full amortization.

Income taxes. Our effective tax rate for the three months ended March 31, 2018 was 15%, or \$2.3 million, compared to 34%, or \$4.8 million, for the three months ended March 31, 2017. The 15% rate includes a \$2.5 million discrete benefit item related to a change in our provisional estimate of deferred tax liability for withholding tax on certain amounts of undistributed earnings of our Canadian subsidiary. We expect our consolidated full year effective tax rate to be 25% to 35%, absent any other significant discrete items. We continue to assess our business model and its impact in various tax jurisdictions.

LIQUIDITY AND CAPITAL RESOURCES

March 31, December 31,
2018 2017
(in thousands)

Cash and cash equivalents \$ 128,655 \$ 127,112

As of March 31, 2018, we held cash and cash equivalents of \$128.7 million and had working capital of \$199.7 million. At December 31, 2017, we held cash and cash equivalents of \$127.1 million and had working capital of \$179.4 million. The \$1.5 million increase in cash and cash equivalents is primarily attributable to an increase in operating cash flows of the Company in the amount of \$14.0 million for the three months ended March 31, 2018

driven primarily by net income of \$13.4 million. These operating cash flows were partially offset by capital expenditures of \$4.1 million, purchases of content licenses of \$4.0 million and dividends paid of \$2.6 million.

Cash provided by operations was \$14.0 million for the quarter ended March 31, 2018. Cash used in investing and financing activities was \$8.6 million and \$3.5 million, respectively, for the quarter ended March 31, 2018.

We have funded our operations to date primarily through cash generated from operations and the issuance of equity securities (in conjunction with an initial public offering in 2000, subsequent option exercises, and our secondary public offering in 2008). Our cash reserves are typically held directly or indirectly in a variety of short-term, interest-bearing instruments, including non-government sponsored debt securities. We do not have any investments in asset-backed commercial paper, auction rate securities, or mortgage backed or sub-prime style investments.

Table of Contents

Our future capital requirements will depend on a number of factors, including our success in developing and expanding markets for our products, payments under possible future strategic arrangements, continued progress of our research and development of potential products, the timing and outcome of regulatory approvals, the need to acquire licenses to new technology, costs associated with strategic acquisitions including integration costs and assumed liabilities, the status of competitive products and potential costs associated with both protecting and defending our intellectual property. Additionally, actions taken as a result of ongoing internal evaluations of our business could result in expenditures not currently contemplated in our estimates for 2018.

One of our short term projects that is expected to require significant capital to complete is our current in-process research and development of the next generation VERIGENE System, VERIGENE II, which we currently believe will start clinical trials in 2018 and commercially launch in 2019. The estimated aggregate cost to complete this project, including completion of development of the VERIGENE II System, cartridge, software and the initial assay, validation, verification, clinical trials and regulatory submission, is between \$3.5 million and \$5.5 million and is included in our research and development budget for 2018 and 2019. We believe that our existing cash and cash equivalents are sufficient to fund our operating expenses, capital equipment requirements and other expected liquidity requirements for the coming twelve months. Factors that could affect our capital requirements, in addition to those listed above, include, without limitation: (i) continued collections of accounts receivable consistent with our historical experience; (ii) our ability to manage our inventory levels consistent with past practices; (iii) volatility in our key partners' consumable purchasing patterns; (iv) execution of partnership agreements that include significant up front license fees; (v) execution of our stock repurchase and dividend programs from time to time and (vi) executing strategic investment or acquisition agreements requiring significant cash consideration. See also the "Safe Harbor Cautionary Statement" of this report and the risk factors in the 2017 10-K and our other filings with the SEC.

In February 2017, the Board of Directors initiated a cash dividend program under which the Company currently intends to pay a regular quarterly cash dividend. The timing and amount of future dividends and stock repurchases will vary based on a number of factors, including future capital requirements for strategic transactions, the availability of financing on acceptable terms, debt service requirements, changes to applicable tax laws or corporate laws, changes to our business model and periodic determination by our Board of Directors that cash dividends are in the best interests of stockholders and are in compliance with applicable laws and agreements of the Company. On January 24, 2018, our Board declared a quarterly cash dividend of \$0.06 per share of common stock payable to shareholders of record as of the close of business on March 23, 2018 with a payment date of April 13, 2018.

As previously disclosed, the Company's largest customer, LabCorp, has informed us that they have elected to develop the next iteration of one of their women's health products with another party. We have negotiated significant minimum women's health purchases through June 2018, pursuant to which LabCorp committed to acquire no less than \$63.1 million of our women's health products from January 1, 2017 through June 30, 2018. Through March 31, 2018, LabCorp acquired approximately \$53.7 million of our women's health products. In addition, based upon an extension agreement entered into in the third quarter of 2017, the Company will continue to sell its CF products to LabCorp through the end of 2019. Sales of CF products to LabCorp represents approximately \$10 million annually in revenue. Loss of the LabCorp women's health revenue stream could result in a significant reduction in cash flow generation compared to previous quarters.

We hold cash and cash equivalents at various foreign subsidiaries. As a result of reductions to the U.S. taxation of dividends from foreign subsidiaries under the Tax Act and increased profitability of our Canadian subsidiary, beginning this year we may repatriate earnings of our Canadian subsidiary. The cash and cash equivalents held by this subsidiary may be more readily available to meet domestic cash requirements beginning this year, but will continue to be subject to foreign withholding tax that would be incurred upon repatriation. We anticipate that cash and cash equivalents held by all other foreign subsidiaries will continue to be permanently reinvested and may not be readily available to meet domestic cash requirements.

To the extent our capital resources are insufficient to meet future capital requirements, we will have to raise additional funds to continue the development and deployment of our technologies, or to supplement our position through strategic acquisitions. There can be no assurance that debt or equity funds will be available on favorable terms, if at all. To the extent that additional capital is raised through the sale of equity or convertible debt securities, the issuance of those securities could result in dilution to our stockholders. Moreover, incurring debt financing could result in a substantial portion of our operating cash flow being dedicated to the payment of principal and interest on such indebtedness, could render us more vulnerable to competitive pressures and economic downturns and could impose restrictions on our operations. If adequate funds are not available, we may be required to curtail operations significantly or to obtain funds through entering into agreements on unattractive terms.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk. Our interest income is sensitive to changes in the general level of domestic interest rates, particularly since our investments are in short-term instruments available-for-sale. A 50 basis point fluctuation from average investment returns as of March 31, 2018 would yield a less than 0.5% variance in overall investment return, which would not have a material effect on our financial condition.

Foreign Currency Risk. Our international business is subject to risks, including, but not limited to: foreign exchange rate volatility, differing tax structures, unique economic conditions, other regulations and restrictions, and changes in political climate. Accordingly, our future results could be materially adversely impacted by changes in these and other factors.

As of March 31, 2018, as a result of our foreign operations, we have costs, assets and liabilities that are denominated in foreign currencies, primarily Canadian dollars and to a lesser extent the Euro, Renminbi, Hong Kong dollar and Yen. For example, some fixed asset purchases and certain expenses in our Canadian subsidiary are denominated in Canadian dollars while sales of products are primarily denominated in U.S. dollars. Transactions in our Netherlands, Japanese and Hong Kong subsidiaries are primarily denominated in Euros, Yen and Hong Kong dollars, respectively. The majority of transactions, with the exception of our initial capital investment, in our Chinese subsidiary are denominated in Renminbi. As a consequence, movements in exchange rates could cause our foreign currency denominated expenses to fluctuate as a percentage of net revenue, affecting our profitability and cash flows. A significant majority of our revenues are denominated in U.S. dollars. The impact of foreign exchange rates on foreign denominated balances will vary in relation to changes between the U.S. dollar, Canadian dollar, Euro, Yen, Renminbi and Hong Kong dollar exchange rates. A 10% change in these exchange rates in relation to the U.S. dollar would result in an income statement impact of approximately \$1.3 million on foreign currency denominated asset and liability balances as of March 31, 2018. As a result of our efforts to expand globally, in the future we will be exposed to additional foreign currency risk in multiple currencies; however, at this time, our exposure to foreign currency fluctuations is not material. We regularly assess the market to determine if additional strategies are appropriate to mitigate future risks.

In addition, the indirect effect of fluctuations in interest rates and foreign currency exchange rates could have a material adverse effect on our business, financial condition and results of operations. For example, currency exchange rate fluctuations could affect international demand for our products. In addition, interest rate fluctuations could affect our customers' buying patterns. Furthermore, interest rate and currency exchange rate fluctuations may broadly influence the United States and foreign economies resulting in a material adverse effect on our business, financial condition and results of operations. As a result, we cannot give any assurance as to the effect that future changes in foreign currency rates will have on our consolidated financial position, results of operations or cash flows. Our aggregate foreign currency transaction gain of approximately \$37,000 was included in determining our consolidated results for the quarter ended March 31, 2018.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act), which are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this quarterly report. Based on the evaluation and criteria of these disclosure controls and procedures, our Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective at a reasonable assurance level and designed to ensure that material information relating to the Company and its subsidiaries would be made known to such officers on a timely basis.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Exchange Act Rule 13a-15(d) during the quarter ended March 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the normal course of business, the Company is subject to claims, lawsuits and legal proceedings. When and if it appears probable in management's judgment, and based upon consultation with outside counsel, that we will incur monetary damages or other costs in connection with any claims or proceedings, and such costs can be reasonably estimated, we record the estimated liability in the financial statements. If only a range of estimated losses can be estimated, we record an amount within the range that, in management's judgment, reflects the most likely outcome; if none of the estimates within that range is a better estimate than any other amount, we record the liability at the low end of the range of estimates. Any such accrual would be charged to expense in the appropriate period. We disclose significant contingencies when the loss is not probable and/or the amount of the loss is not estimable, when we believe there is at least a reasonable possibility that a loss has been incurred. We recognize costs associated with legal proceedings in the period in which the services were provided.

ITEM 1A. RISK FACTORS

Reference is made to the factors set forth under the caption "Safe Harbor Cautionary Statement" in Part I, Item 2 of this report and other risk factors described in Part I, Item 1A of the 2017 10-K, which are incorporated herein by reference. There have been no material changes from the risk factors previously disclosed in the 2017 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The stock repurchase activity for the first quarter of 2018 was as follows:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
1/1/18 - 1/31/18	258	\$ 20.13	—	\$ —
2/1/18 - 2/28/18	—	—	—	—
3/1/18 - 3/31/18	75,604	21.64	—	—
Total First Quarter	75,862	\$ 21.64	—	\$ —

(1) Total shares purchased are attributable to the withholding of shares by Luminex to satisfy the payment of tax obligations related to the vesting of restricted shares.

ITEM 5. OTHER INFORMATION

Pursuant to approval by the Compensation Committee of the Board of Directors and effective May 7, 2018, the Company entered into amendments (Amendments) to the employment agreements with each of its executive officers to amend Section 3.3 of each such agreement to provide payments for COBRA, dental and vision coverage for such executive and his or her immediate family in the event of the termination of such executive in connection with a change of control of the Company. Pursuant to the Amendments, payment for such benefits would be for 18 months

with respect to the President & CEO and 12 months with respect to each of the other executive officers. The preceding description of the Amendments is qualified in its entirety by reference to the full text of the Amendments, a form of which is filed as Exhibit 10.1 to this report and is incorporated herein by reference.
