Protecting Your Privacy
Our Pledge to You

THE FUND IS COMMITTED TO YOUR PRIVACY. On this page, you will find the Fund's policies and practices for collecting, disclosing, and safeguarding "nonpublic personal information," which may include financial or other customer information. These policies apply to individuals who purchase Fund shares for personal, family, or household purposes, or have done so in the past. This notification replaces all previous statements of the Fund's consumer privacy policy, and may be amended at any time. We'll keep you informed of changes as required by law.

YOUR ACCOUNT IS PROVIDED IN A SECURE ENVIRONMENT. The Fund maintains physical, electronic and procedural safeguards that comply with federal regulations to guard nonpublic personal information. The Fund's agents and service providers have limited access to customer information based on their role in servicing your account.

THE FUND COLLECTS INFORMATION IN ORDER TO SERVICE AND ADMINISTER YOUR ACCOUNT. The Fund collects a variety of nonpublic personal information, which may include:

- Information we receive from you, such as your name, address, and social security number.
- Information about your transactions with us, such as the purchase or sale of Fund shares.
- Information we receive from agents and service providers, such as proxy voting information.

THE FUND DOES NOT SHARE NONPUBLIC PERSONAL INFORMATION WITH ANYONE, EXCEPT AS PERMITTED BY LAW.

Thank you for this opportunity to serve you.

The views expressed in this report reflect those of the portfolio manager(s) only through the end of the period covered and do not necessarily represent the views of Dreyfus or any other person in the Dreyfus organization. Any such views are subject to change at any time based upon market or other conditions and Dreyfus disclaims any responsibility to

update such views. These views may not be relied on as investment advice and, because investment decisions for a Dreyfus fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Dreyfus fund.

Dreyfus High Yield Strategies Fund

The Fund

A LETTER FROM THE CEO OF DREYFUS

Dear Shareholder:

We are pleased to present this semiannual report for Dreyfus High Yield Strategies Fund, covering the six-month period from April 1, 2017 through September 30, 2017. For information about how the fund performed during the reporting period, as well as general market perspectives, we provide a Discussion of Fund Performance on the pages that follow.

Financial markets generally rallied over the past six months as corporate earnings grew and global economic conditions improved. While the rally was relatively broad-based, U.S. stock market leadership shifted toward

growth-oriented companies and away from more economically sensitive companies that had been expected to benefit from a new presidential administration's stimulative policy proposals. International stocks fared particularly well amid more positive economic data from Europe, Japan, and the emerging markets. In the bond market, despite two short-term interest rate hikes from the Federal Reserve Board, yields of longer term U.S. government securities moderated somewhat and prices rose when it became clearer that pro-growth legislation would take time and political capital to enact.

The markets' strong performance has been supported by solid underlying fundamentals, most notably rising corporate profits, a robust labor market, and muted inflation. While we currently expect these favorable conditions to persist, we remain watchful for economic and political risks that could derail the rallies. As always, we encourage you to discuss the risks and opportunities of today's investment environment with your financial advisor.

Thank you for your continued confidence and support.

Sincerely,

Mark D. Santero
Chief Executive Officer
The Dreyfus Corporation
October 16, 2017

2

DISCUSSION OF FUND PERFORMANCE

For the period from April 1, 2017 through September 30, 2017, as provided by Chris Barris, Portfolio Manager

Market and Fund Performance Overview

For the six-month period ended September 30, 2017, Dreyfus High Yield Strategies Fund produced a total return of 5.02% (on a net-asset-value basis) and provided aggregate income dividends of \$0.153 per share.¹ In comparison, the BofA Merrill Lynch U.S. High Yield Master II Constrained Index (the "Index"), the fund's benchmark, achieved a total return of 4.22% for the same period.²

High yield bonds produced solidly positive total returns amid expectations of stronger economic growth and improving business conditions. Our sector allocation strategy and some favorable security selections enabled the fund to outperform the Index. In a low-interest-rate environment, the fund reduced its dividend distribution rate in July 2017.

The Fund's Investment Approach

The fund primarily seeks high current income. The fund also seeks capital growth as a secondary objective, to the extent consistent with its objective of seeking high current income. The fund invests primarily in fixed-income securities of below-investment-grade credit quality. Issuers of below-investment-grade securities may include companies in early stages of development and companies with a highly leveraged financial structure. To compensate investors for taking on greater risk, such companies typically must offer higher yields than those offered by more established or conservatively financed companies. The fund may invest up to 10% of its total assets in floating rate

loans.

Changing Monetary Policies Influenced Bond Markets

Robust labor markets and evidence of stronger economic growth prompted a gradual move away from central banks' aggressively accommodative monetary policies of the past few years. Although the Federal Reserve Board raised its target for the overnight federal funds rate during the reporting period, longer-term U.S. interest rates moderated as investors increasingly realized that the new presidential administration's policy reforms were far from certain. Consequently, yield differences narrowed along the broad bond market's maturity range.

High yield bonds generally produced higher returns than their higher-quality counterparts in an environment of stronger global economic growth, rising corporate earnings, and falling default rates. CCC-rated bonds typically produced higher returns than B- or BB-rated bonds, leading to narrower spreads along the high yield credit-quality spectrum. The health care and banking sectors fared especially well. Although energy companies struggled over much of the reporting period, they later rebounded when oil prices stabilized.

In addition, low interest rates have led to an increased level of early redemptions ("calls") of high yield bonds so far in 2017. As of September 30, approximately 19% of the fund's holdings were callable within one year, compared to an average of 15% over the past five years.³

Sector Allocation Strategy Bolstered Relative Results

The fund's performance compared to the Index during the reporting period was enhanced by our sector allocation strategy. Most notably, we maintained underweighted exposure to traditional retailers facing competitive challenges from online sellers. Relatively light holdings of broadcasters also aided relative results. Conversely, the fund held an overweighted position among homebuilders that fared well in a robust housing market.

3

DISCUSSION OF FUND PERFORMANCE *(continued)*

The fund further benefited from several individual security selections, particularly bonds backed by certain companies in the telecommunications and services sectors. However, the impact of these winners on relative results was offset by weaker security selections in the energy sector. Therefore, our security selection strategy overall produced results that were roughly in line with the Index.

The fund's interest-rate strategy proved relatively ineffective over the reporting period. We set the fund's average duration in a short position compared to the Index in order to capture higher levels of income more quickly in a rising interest-rate environment. However, our focus on securities with maturities between one and five years prevented the fund from participating more in the benefits of falling long-term interest rates.

Positioned for Economic and Earnings Growth

We remain optimistic regarding the prospects for high yield bonds. As of the end of the reporting period, market fundamentals appear strong, supported by rising corporate earnings, robust labor markets, strengthening housing markets, and solid consumer and business confidence. Technical factors also appear to remain positive, as indicated by low default rates and relatively high credit ratings for newly issued high yield securities. While valuations have become richer, they remain below long-term averages.

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

In this generally constructive environment, we have maintained overweighted exposure to packaging companies and homebuilders that seem likely to continue to benefit from current economic and political trends. We also have emphasized certain technology companies, including software developers, in the midst of several positive secular growth trends, such as cloud computing. Conversely, we have identified relatively few opportunities among retailers and landline telecommunication services providers that are struggling with competition from online sellers and wireless carriers, respectively.

October 16, 2017

¹ Total return includes reinvestment of dividends and any capital gains paid, based upon net asset value per share. Past performance is no guarantee of future results. Share price, yield, and investment return fluctuate such that upon redemption, fund shares may be worth more or less than their original cost.

² Source: FactSet — The BofA Merrill Lynch U.S. High Yield Master II Constrained Index contains all securities in the BofA Merrill Lynch U.S. High Yield Index but caps issuer exposure at 2%. Index constituents are capitalization-weighted, based on their current amount outstanding, provided the total allocation to an individual issuer does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face values of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. In the event there are fewer than 50 issuers in the index, each is equally weighted and the face values of their respective bonds are increased or decreased on a pro-rata basis. Investors cannot invest directly in any index.

³ Callable securities give the issuer the option to prepay or “call” the securities before their maturity date, which may reduce the market value of the security if the security’s market price is above its call price. Issuers often exercise this right when interest rates are lower than when the security was issued. If an issuer “calls” its securities during a time of lower interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield, which could impact the fund’s yield and, indirectly, its market price.

Bonds are subject generally to interest-rate, credit, liquidity, and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes, and rate increases can cause price declines. High yield bonds are subject to increased credit risk and are considered speculative in terms of the issuer’s perceived ability to continue making interest payments on a timely basis and to repay principal upon maturity. The use of leverage may magnify the fund’s gains or losses. For derivatives with a leveraging component, adverse changes in the value or level of the underlying asset can result in a loss that is much greater than the original investment in the derivative.

FINANCIAL HIGHLIGHTS

The following table describes the performance for the fiscal periods indicated. Total return shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These figures have been derived from the fund's financial statements and market price data for the fund's shares.

See notes to financial statements.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

NOTE 1—Significant Accounting Policies:

Dreyfus High Yield Strategies Fund (the “fund”) is registered under the Investment Company Act of 1940, as amended (the “Act”), as a non-diversified, closed-end management investment company. The fund’s primary investment objective is to seek high current income. Under normal market conditions, the fund invests at least 65% of its total assets in income securities of U.S. issuers rated below investment grade quality or unrated income securities that The Dreyfus Corporation (the “Manager” or “Dreyfus”), a wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY Mellon”), serving as the fund’s investment manager and administrator, determines to be of comparable quality. The fund’s Common Stock trades on the New York Stock Exchange (the “NYSE”) under the ticker symbol DHF.

The Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) is the exclusive reference of authoritative U.S. generally accepted accounting principles (“GAAP”) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal laws are also sources of authoritative GAAP for SEC registrants. The fund’s financial statements are prepared in accordance with GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

(a) Portfolio valuation: The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Additionally, GAAP provides guidance on determining whether the volume and activity in a market has decreased significantly and whether such a decrease in activity results in transactions that are not orderly. GAAP requires enhanced disclosures around valuation inputs and techniques used during annual and interim periods.

Various inputs are used in determining the value of the fund’s investments relating to fair value measurements. These inputs are summarized in the three broad levels listed below:

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

Level 1—unadjusted quoted prices in active markets for identical investments.

Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the fund’s own assumptions in determining the fair value of investments).

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. Valuation techniques used to value the fund's investments are as follows:

Registered investment companies that are not traded on an exchange are valued at their net asset value and are generally categorized within Level 1 of the fair value hierarchy.

Investments in securities, floating rate loan interests and other securities, excluding short-term investments (other than U.S. Treasury Bills), and forward foreign currency exchange contracts ("forward contracts") are valued each business day by an independent pricing service (the "Service") approved by the fund's Board of Trustees (the "Board"). Investments for which quoted bid prices are readily available and are representative of the bid side of the market in the judgment of the Service are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). Other investments (which constitute a majority of the portfolio securities) are valued as determined by the Service, based on methods which include consideration of the following: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. These securities are generally categorized within Level 2 of the fair value hierarchy.

The Service is engaged under the general supervision of the Board.

When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the fund calculates its net asset value, the fund may value these investments at fair value as determined in accordance with the procedures approved by the Board. Certain factors may be considered when fair

24

valuing investments such as: fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold, and public trading in similar securities of the issuer or comparable issuers. These securities are either categorized within Level 2 or 3 of the fair value hierarchy depending on the relevant inputs used.

For restricted securities where observable inputs are limited, assumptions about market activity and risk are used and are generally categorized within Level 3 of the fair value hierarchy.

Investments denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange.

Forward contracts are valued at the forward rate and are generally categorized within Level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of September 30, 2017 in valuing the fund's investments:

Level 1– Unadjusted Quoted Prices	Level 2–Other Significant Observable Inputs	Level 3–Significant Unobservable Inputs	Total
--------------------------------------	---	--	-------

Assets (\$)

Investments in Securities:				
Corporate Bonds [†]	–	357,702,814	–	357,702,814
Floating Rate Loan Interests [†]	–	7,222,672	–	7,222,672
Registered Investment Company	8,221,141	–	–	8,221,141
U.S. Treasury Bills [†]	–	258,789	–	258,789
Other Financial Instruments:				
Forward Foreign Currency Exchange Contracts ^{††}	–	212,182	–	212,182

[†]See Statement of Investments for additional detailed categorizations.

^{††}Amount shown represents unrealized appreciation (depreciation) at period end.

At September 30, 2017, there were no transfers between levels of the fair value hierarchy. It is the fund's policy to recognize transfers between levels at the end of the reporting period.

(b) Foreign currency transactions: The fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

25**NOTES TO FINANCIAL STATEMENTS (Unaudited) (continued)**

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized on securities transactions between trade and settlement date, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments resulting from changes in exchange rates. Foreign currency gains and losses on foreign currency transactions are also included with net realized and unrealized gain or loss on investments.

(c) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Dividend income is recognized on the ex-dividend date and interest income, including, where applicable, accretion of discount and amortization of premium on investments, is recognized on the accrual basis.

(d) Affiliated issuers: Investments in other investment companies advised by Dreyfus are defined as "affiliated" under the Act.

(e) Risk: The fund invests primarily in debt securities. Failure of an issuer of the debt securities to make timely interest or principal payments, or a decline or the perception of a decline in the credit quality of a debt security, can cause the debt security's price to fall, potentially lowering the fund's share price. High yield ("junk") bonds involve greater credit risk, including the risk of default, than investment grade bonds, and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. In addition, the value of debt securities may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment. They may also decline because of factors that affect a

particular industry.

The fund is permitted to invest up to 5% of its assets directly in the common stock of junk bond issuers. This percentage will be in addition to any other common stock holdings acquired as part of warrants or “units”, so that the fund’s total common stock holdings could exceed 5% at a particular time. However, the fund currently intends to invest directly in common stocks (including those offered in an initial public offering) to gain sector exposure and when suitable junk bonds are not available for sale. The fund expects to sell the common stock promptly when suitable junk bonds are subsequently acquired.

26

The fund is permitted to invest up to 10% of the fund’s total assets in floating rate loans. Unlike publicly-traded common stocks which trade on national exchanges, there is no central market or exchange for loans to trade. Loans trade in an over-the-counter market, and confirmation and settlement, which are effected through standardized procedures and documentation, may take significantly longer than seven days to complete. The secondary market for floating rate loans also may be subject to irregular trading activity and wide bid/ask spreads. The lack of an active trading market for certain floating rate loans may impair the ability of the fund to realize full value in the event of the need to sell a floating rate loan and may make it difficult to value such loans. There may be less readily available, reliable information about certain floating rate loans than is the case for many other types of securities, and the fund’s portfolio managers may be required to rely primarily on their own evaluation of a borrower’s credit quality rather than on any available independent sources. The value of collateral, if any, securing a floating rate loan can decline, and may be insufficient to meet the issuer’s obligations in the event of non-payment of scheduled interest or principal or may be difficult to readily liquidate. In the event of the bankruptcy of a borrower, the fund could experience delays or limitations imposed by bankruptcy or other insolvency laws with respect to its ability to realize the benefits of the collateral securing a loan. The floating rate loans in which the fund invests typically will be below investment grade quality and, like other below investment grade securities, are inherently speculative. As a result, the risks associated with such floating rate loans are similar to the risks of below investment grade securities, although senior loans are typically senior and secured in contrast to other below investment grade securities, which are often subordinated and unsecured. Floating rate loans may not be considered to be “securities” for purposes of the anti-fraud protections of the federal securities laws, including those with respect to the use of material non-public information, so that purchasers, such as the fund, may not have the benefit of these protections.

(f) Dividends and distributions to Shareholders: Dividends and distributions are recorded on the ex-dividend date. Dividends from investment income-net are normally declared and paid monthly. Dividends from net realized capital gains, if any, are normally declared and paid annually, but the fund may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the “Code”). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the fund not to distribute such gains. Income and capital gain distributions are

27

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

determined in accordance with income tax regulations, which may differ from GAAP.

Shareholders will have their distributions reinvested in additional shares of the fund, unless such Shareholders elect to receive cash, at the lower of the market price or net asset value per share (but not less than 95% of the market price). If

market price is equal to or exceeds net asset value, shares will be issued at net asset value. If net asset value exceeds market price, Computershare Inc., the transfer agent, will buy fund shares in the open market and reinvest those shares accordingly.

On September 27, 2017, the Board declared a cash dividend of \$0.0235 per share from undistributed investment income-net, payable on October 26, 2017 to Shareholders of record as of the close of business on October 12, 2017. The ex-dividend date was October 11, 2017.

(g) Federal income taxes: It is the policy of the fund to continue to qualify as a regulated investment company, if such qualification is in the best interests of its shareholders, by complying with the applicable provisions of the Code, and to make distributions of taxable income sufficient to relieve it from substantially all federal income and excise taxes.

As of and during the period ended September 30, 2017, the fund did not have any liabilities for any uncertain tax positions. The fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of Operations. During the period ended September 30, 2017, the fund did not incur any interest or penalties.

Each tax year in the three-year period ended March 31, 2017 remains subject to examination by the Internal Revenue Service and state taxing authorities.

Under the Regulated Investment Company Modernization Act of 2010 (the “2010 Act”), the fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 (“post-enactment losses”) for an unlimited period. Furthermore, post-enactment capital loss carryovers retain their character as either short-term or long-term capital losses rather than short-term as they were under previous statute. The 2010 Act requires post-enactment losses to be utilized before the utilization of losses incurred in taxable years prior to the effective date of the 2010 Act (“pre-enactment losses”). As a result of this ordering rule, pre-enactment losses may be more likely to expire unused.

The fund has an unused capital loss carryover of \$60,340,346 available for federal income tax purposes to be applied against future net realized capital gains, if any, realized subsequent to March 31, 2017. If not applied,

28

\$33,464,139 of the carryover expires in fiscal year 2018. The fund has \$5,308,104 of post-enactment short-term capital losses and \$21,568,103 of post enactment long-term capital losses which can be carried forward for an unlimited period

The tax character of distributions paid to shareholders during the fiscal year ended March 31, 2017 was as follows: ordinary income \$23,477,376. The tax character of current year distributions will be determined at the end of the current fiscal year.

NOTE 2—Borrowings:

The fund has a \$125,000,000 Revolving Credit and Security Agreement (the “Agreement”), which was renewed until November 21, 2018, subject to certain amendments. Under the terms of the Agreement, the fund may borrow “Advances” (including Eurodollar Advances), on a collateralized basis with certain fund assets used as collateral, which amounted to \$252,679,022 as of September 30, 2017. The interest to be paid by the fund on such Advances is determined with reference to the principal amount of each Advance (and/or Eurodollar Advance) outstanding from

time to time. The fund also pays additional fees pursuant to the Agreement. During the period ended September 30, 2017, total expenses pursuant to the Agreement amounted to \$1,315,015.

The average amount of borrowings outstanding under the Agreement during the period ended September 30, 2017 was \$116,480,900, with a related weighted average annualized interest rate of 2.25% and is inclusive of all expenses related to the Agreement.

NOTE 3—Management Fee and Other Transactions with Affiliates:

(a) Pursuant to a management and administration agreement with Dreyfus, the management and administration fee is computed at the annual rate of .75% of the value of the fund's average weekly total assets minus the sum of accrued liabilities (other than the aggregate indebtedness constituting financial leverage) (the "Managed Assets") and is payable monthly.

(b) The fund compensates The Bank of New York Mellon, a subsidiary of BNY Mellon and an affiliate of Dreyfus, under a custody agreement for providing custodial services for the fund. These fees are determined based on net assets and transaction activity. During the period ended September 30, 2017, the fund was charged \$12,133 pursuant to the custody agreement.

The fund has an arrangement with the custodian whereby the fund may receive earnings credits when positive cash balances are maintained, which

29

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

are used to offset custody fees. For financial reporting purposes, the fund includes net earnings credits as an expense offset in the Statement of Operations.

During the period ended September 30, 2017, the fund was charged \$3,363 for services performed by the Chief Compliance Officer and his staff.

The components of "Due to The Dreyfus Corporation and affiliates" in the Statement of Assets and Liabilities consist of: management fees \$231,616, custodian fees \$12,000 and Chief Compliance Officer fees \$3,363.

(c) Each Board member also serves as a Board member of other funds within the Dreyfus complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

NOTE 4—Securities Transactions:

The aggregate amount of purchases and sales of investment securities, excluding short-term securities and forward contracts, during the period ended September 30, 2017, amounted to \$88,255,791 and \$95,524,398, respectively.

Derivatives: A derivative is a financial instrument whose performance is derived from the performance of another asset. The fund enters into International Swaps and Derivatives Association, Inc. Master Agreements or similar agreements (collectively, "Master Agreements") with its over-the-counter ("OTC") derivative contract counterparties in order to, among other things, reduce its credit risk to counterparties. Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under a Master Agreement, the fund may offset with the counterparty certain derivative financial instrument's payables and/or receivables with collateral held

and/or posted and create one single net payment in the event of default or termination.

Each type of derivative instrument that was held by the fund during the period ended September 30, 2017 is discussed below.

Forward Foreign Currency Exchange Contracts: The fund enters into forward contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to settle foreign currency transactions or as a part of its investment strategy. When executing forward contracts, the fund is obligated to buy or sell a foreign currency at a specified rate on a certain date in the future. With respect to sales of forward contracts, the fund incurs a loss if the value of the contract increases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of

30

the contract decreases between those dates. With respect to purchases of forward contracts, the fund incurs a loss if the value of the contract decreases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract increases between those dates. Any realized or unrealized gains or losses which occurred during the period are reflected in the Statement of Operations. The fund is exposed to foreign currency risk as a result of changes in value of underlying financial instruments. The fund is also exposed to credit risk associated with counterparty nonperformance on these forward contracts, which is generally limited to the unrealized gain on each open contract. This risk may be mitigated by Master Agreements, if any, between the fund and the counterparty and the posting of collateral, if any, by the counterparty to the fund to cover the fund's exposure to the counterparty. Forward Contracts open at September 30, 2017 are set forth in the Statement of Forward Foreign Currency Exchange Contracts.

The provisions of ASC Topic 210 "Disclosures about Offsetting Assets and Liabilities" require disclosure on the offsetting of financial assets and liabilities. These disclosures are required for certain investments, including derivative financial instruments subject to Master Agreements which are eligible for offsetting in the Statement of Assets and Liabilities and require the fund to disclose both gross and net information with respect to such investments. For financial reporting purposes, the fund does not offset derivative assets and derivative liabilities that are subject to Master Agreements in the Statement of Assets and Liabilities.

At September 30, 2017, derivative assets and liabilities (by type) on a gross basis are as follows:

Derivative Financial Instruments:	Assets (\$)	Liabilities (\$)
Forward contracts	212,182	-
Total gross amount of derivative assets and liabilities in the Statement of Assets and Liabilities	212,182	-
Derivatives not subject to Master Agreements	-	-
Total gross amount of assets and liabilities subject to Master Agreements	212,182	-

31

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

The following table presents derivative assets net of amounts available for offsetting under Master Agreements and net of related collateral received or pledged, if any, as of September 30, 2017:

Counterparty	Gross Amount of Assets (\$)	Financial Instruments and Derivatives Available for Offset (\$)	Collateral Received (\$)	Net Amount of Assets (\$)
Barclays Bank	26,394	-	-	26,394
Commonwealth Bank of Australia	54,246	-	-	54,246
Goldman Sachs International	91,615	-	-	91,615
Morgan Stanley Capital Services	39,927	-	-	39,927
Total	212,182	-	-	212,182

¹ Absent a default event or early termination, OTC derivative assets and liabilities are presented at gross amounts and are not offset in the Statement of Assets and Liabilities.

The following summarizes the average market value of derivatives outstanding during the period ended September 30, 2017:

	Average Market Value (\$)
Forward contracts	19,378,268

At September 30, 2017, accumulated net unrealized appreciation on investments inclusive of derivative contracts was \$16,169,634, consisting of \$19,221,313 gross unrealized appreciation and \$3,051,679 gross unrealized depreciation.

At September 30, 2017, the cost of investments inclusive of derivative contracts for federal income tax purposes was substantially the same as the cost for financial reporting purposes (see the Statement of Investments).

32

ADDITIONAL INFORMATION (Unaudited)

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Products and Performance. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current.

33

PROXY RESULTS (Unaudited)

Holders of Beneficial Interest voted on the following proposal presented at the annual shareholders' meeting held on August 3, 2017.

	Shares For	Authority Withheld
To elect two Class III Trustees: †		
Joseph S. DiMartino	59,494,680	2,752,552
Kenneth A. Himmel	52,362,272	9,884,960

†The terms of these Class III Trustees expire in 2020.

DHF

The fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission (“SEC”) for the first and third quarters of each fiscal year on Form N-Q. The fund’s Forms N-Q are available on the SEC’s website at www.sec.gov and may be reviewed and copied at the SEC’s Public Reference Room in Washington, D.C. (phone 1-800-SEC-0330 for information).

A description of the policies and procedures that the fund uses to determine how to vote proxies relating to portfolio securities and information regarding how the fund voted these proxies for the most recent 12-month period ended June 30 is available at www.dreyfus.com and on the SEC’s website at www.sec.gov and without charge, upon request, by calling 1-800-DREYFUS.
