5

ENVIRO VORAXIAL TECHNOLOGY, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
MARCH 31, 2008

NOTE A - ORGANIZATION AND OPERATIONS

Organization

Enviro Voraxial Technology, Inc. (the "Company") is a provider of environmental and industrial separation technology. The Company has developed and patented the Voraxial(R) Separator, which is a technology that efficiently separates liquid/liquid, liquid/solid or liquid/liquid/solid fluid streams with distinct specific gravities. Potential commercial applications and markets include oil exploration and production, oil refineries, mining, manufacturing and municipal wastewater industry. The Company currently operates within one segment, which is the manufacture and sale of the Voraxial(R) Separator.

Florida Precision Aerospace, Inc. (FPA) is the wholly-owned subsidiary of the Company and is used to manufacture, assemble and test the Voraxial Separator.

NOTE B - GOING CONCERN

The Company has experienced net losses, has negative cash flows from operating activities, and has to raise capital to sustain operations. There is no assurance that the Company's developmental and marketing efforts will be successful, that the Company will ever have commercially accepted products, or that the Company will achieve a level of revenue sufficient to provide cash

## Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

inflows to sustain operations. The Company will continue to require the infusion of capital until operations become profitable. During 2008, the Company anticipates seeking additional capital, increasing sales of the Voraxial (R) Separator and continuing to restrict expenditures. As a result of the above, the accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### NOTE C - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### Interim Financial Statements

-----

The interim financial statements presented herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. The interim financial statements should be read in conjunction with the Company's annual financial statements, notes and accounting policies included in the Company's annual report on Form 10-KSB for the year ended December 31, 2007 as filed with the SEC. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) which are necessary to provide a fair presentation of financial position as of March 31, 2008 and the related operating results and cash flows for the interim period presented have been made. The results of operations, for the period presented are not necessarily indicative of the results to be expected for the year.

6

### ENVIRO VORAXIAL TECHNOLOGY, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS MARCH 31, 2008

#### Principles of Consolidation

-----

The consolidated financial statements include the accounts of the parent company, Enviro Voraxial Technology, Inc., and its wholly-owned subsidiary, Florida Precision Aerospace, Inc. All significant intercompany accounts and transactions have been eliminated.

#### Estimates

-----

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results may differ.

#### Revenue Recognition

-----

The Company derives its revenue from the sale and short-term rental of the Voraxial (R) Separator. The Company presents revenue in accordance with Staff Accounting Bulletin (SAB) No. 104 "Revenue Recognition in Financial Statements". Under SAB 104, revenue is realized when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable and collectability is reasonably assured.

Revenues that are generated from sales of equipment are typically recognized

## Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

upon shipment. Our standard agreements generally do not include customer acceptance or post shipment installation provisions. However, if such provisions have been included or there is an uncertainty about customer acceptance, revenue is deferred until we have evidence of customer acceptance and all terms of the agreement have been complied with. There were no agreements with such provisions as of March 31, 2008.

The Company recognizes revenue from the short term rental of equipment, ratably over the life of the agreement, which is usually three to six months.

### Fair Value of Instruments

-----

The carrying amounts of the Company's financial instruments, including cash and cash equivalents, inventory, accounts payable and accrued expenses at March 31, 2008, approximate their fair value because of their relatively short-term nature.

### Cash and Cash Equivalents

-----

The Company considers all highly liquid investments with a maturity of three months or less at the date of purchase to be cash equivalents. The Company maintains its cash balances with various financial institutions. Balances at these institutions may at times exceed the Federal Deposit Insurance Corporate limits.

7

ENVIRO VORAXIAL TECHNOLOGY, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
MARCH 31, 2008

### Inventory

-----

Inventory consists of components for the Voraxial(R) Separator and is priced at lower of first-in, first-out cost or market. Inventory includes units being rented on a short term basis and components held by third parties in connection with pilot programs as part of the continuing evaluation by such third parties as to the effectiveness and usefulness of the service to be incorporated into their respective operations.

### Fixed Assets

-----

Fixed assets are stated at cost less accumulated depreciation. The cost of maintenance and repairs is expensed to operations as incurred. Depreciation is computed by the straight-line method over the estimated economic useful life of the assets (5-10 years). Gains and losses recognized from the sales or disposal of assets is the difference between the sales price and the recorded cost less accumulated depreciation less costs of disposal.

### Net Loss Per Share

-----

Basic and diluted loss per share has been computed by dividing the net loss available to common stockholders by the weighted average number of common shares outstanding. The warrants and stock options have been excluded from the calculation since they would be anti-dilutive.

Such equity instruments may have a dilutive effect in the future and include the following potential common shares:

Warrants	5,589,367
Stock options	6,335,666
	-----

# Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

11,925,033

=====

## Income Taxes

-----

Deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

## Research and Development Expenses

-----

Research and development costs, which consist of travel expenses, consulting fees, subcontractors and salaries are expensed as incurred.

## Advertising Costs

-----

Advertising costs are expensed as incurred and are included in general and administrative expenses.

8

### ENVIRO VORAXIAL TECHNOLOGY, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS MARCH 31, 2008

## Stock-Based Compensation

-----

The company adopted SFAS No. 123(R) effective January 1, 2006. This statement requires compensation expense relating to share-based payments to be recognized in net income using a fair-value measurement method. Under the fair value method, the estimated fair value of awards is charged to income on a straight-line basis over the requisite service period, which is generally the vesting period. The company elected the modified prospective method as prescribed in SFAS No. 123 (R) and therefore, prior periods were not restated. Under the modified prospective method, this statement was applied to new awards granted after the time of adoption, as well as to the unvested portion of previously granted equity-based awards for which the requisite service has not been rendered as of January 1, 2006.

Prior to January 1, 2006, the Company accounted for stock-based employee compensation under Accounting Principles Board (APB) Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations. The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for Stock-Based Compensation," and SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure," which was released in December 2002 as an amendment of SFAS No. 123. The Company currently accounts for stock-based compensation under the fair value method using the Black-Scholes option pricing model as indicated in Note G.

## Accounting for the Impairment of Long-Lived Assets

-----

The long-lived assets held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of assets may not be recoverable. It is reasonably possible that these assets could become impaired as a result of technology or other industry changes. Determination of recoverability of assets to be held and used is by comparing the carrying amount of an asset to future net undiscounted cash flows to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying

## Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

amount of assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. There were no impairments of long-lived assets in 2008 or 2007.

### Recent accounting pronouncements

-----

#### Disclosure about Derivative Instruments and Hedging Activities

In March 2008, the FASB issued SFAS No. 161, "Disclosure about Derivative Instruments and Hedging Activities," an amendment of FASB Statement No. 133, (SFAS 161). This statement requires that objectives for using derivative instruments be disclosed in terms of underlying risk and accounting designation. The Company is required to adopt SFAS 161 on January 1, 2009. The Company is currently evaluating the potential impact of SFAS No. 161 on the Company's consolidated financial statements.

9

ENVIRO VORAXIAL TECHNOLOGY, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
MARCH 31, 2008

### Determination of the Useful Life of Intangible Assets

-----

In April 2008, the FASB issued FSP FAS 142-3, "Determination of the Useful Life of Intangible Assets," which amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of intangible assets under FASB 142 "Goodwill and Other Intangible Assets". The intent of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of the expected cash flows used to measure the fair value of the asset under FASB 141 (revised 2007) "Business Combinations" and other U.S. generally accepted accounting principles. The Company is currently evaluating the potential impact of FSP FAS 142-3 on its consolidated financial statements.

#### NOTE D - CONCENTRATION OF CREDIT RISK

One customer accounted for approximately 100% and 63% of revenue for three months ended March 31, 2008 and 2007. As of March 31, 2008 and 2007, there was \$3,500 and \$0 in outstanding receivables from this customer.

#### NOTE E - RELATED PARTY TRANSACTIONS

For the three months ended March 31, 2008, the Company incurred consulting expenses from the chief executive officer and majority stockholder of the Company of \$78,860. Of these amounts, \$28,485 has been paid out for the three months ended March 31, 2008. The unpaid balance has been included in accrued expenses.

#### NOTE F - CAPITAL TRANSACTIONS

##### Common stock

-----

During the three months ended March 31, 2008 the Company sold 416,666 shares of restricted common stock for \$.60 per share in a private placement offering. Total proceeds from the sale were \$250,000. The shares contain legends restricting their transferability absent registration or applicable exemption.

##### Warrants

Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

-----

In January 2008, the Company extended the exercisable life of certain warrants issued to investors to purchase an aggregate of 243,200 shares of common stock issued in 2000 for a period of one year. The warrants now expire in February 2009. The purchase price of these warrants ranges from \$6.00 - \$9.00 per share. The Company calculated the fair value of the extended warrants by using the Black-Scholes option-pricing model with the following weighted average assumptions: no dividend yield for all the years; expected volatility of 25%; risk-free interest rate of 5% and an expected life of five years. No increase in fair value was noted and, therefore, no adjustment has been made to the financial statements as of March 31, 2008.

10

ENVIRO VORAXIAL TECHNOLOGY, INC.  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 MARCH 31, 2008

In January 2008, the Company extended the exercisable life of certain warrants issued to investors to purchase an aggregate of 200,000 shares of common stock issued in 2001 for a period of one year. The warrants now expire in April 2009. The purchase price of the stock under these warrants ranges from \$3.00-\$4.00 per share. The Company calculated the fair value of the extended warrants by using the Black-Scholes option-pricing model with the following weighted average assumptions: no dividend yield for all the years; expected volatility of 25%; risk-free interest rate of 5% and an expected life of five years. No increase in fair value was noted and, therefore, no adjustment has been made to the financial statements as of March 31, 2008.

Information with respect to warrants outstanding and exercisable at March 31, 2008 is as follows:

	Number Outstanding	Range of Exercise Price	Ex
Balance, December 31, 2006	5,589,367	\$0.75 - \$9.00

Management's Discussion and Analysis of Financial Condition and Plan of Operations

General

Forward-Looking Statements

-----

The following discussion of the financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes thereto. The following discussion contains forward-looking statements. Enviro Voraxial Technology, Inc. is referred to herein as "the Company", "we" or "our." The words or phrases "would be," "will allow," "intends to," "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project," or similar expressions are intended to identify "forward-looking statements". Such statements include those concerning our expected financial performance, our corporate strategy and operational plans. Actual results could differ materially from those projected in the forward-looking statements as a result of a number of risks and uncertainties. Statements made herein are as of the date of the filing of this Form 10-Q with the Securities and Exchange Commission and should not be relied upon as of any subsequent date. Unless otherwise required by applicable law, we do not undertake, and we specifically disclaim any obligation, to update any forward-looking statements to reflect occurrences, developments, unanticipated events or circumstances after the date of such statement.

Application of Critical Accounting Policies

-----

The Company's consolidated condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Certain accounting policies have a significant impact on amounts reported in the financial statements. A summary of these significant accounting policies can be found in Note B to the Company's financial statements in the Company's 2007 Annual Report on Form 10-KSB. The Company has not adopted any significant new policies during the quarter ended March 31, 2008.

Among the significant judgments made in preparation of the Company's financial statements are the determination of the allowance for doubtful accounts and adjustments of inventory valuations. These adjustments are made each quarter in

## Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

the ordinary course of accounting.

Results of Operations for the Three Months ended March 31, 2008 and 2007:

### Revenue

-----

Our revenues were \$4,012 for the three months ended March 31, 2008 as compared to \$53,631 for the three months ended March 31, 2007. The Company is currently working on numerous opportunities with customers for slop-oil treatment, produced water and refinery applications; however sales to these customers have yet to materialize. The Company continues to focus on its sales and marketing program for the Voraxial(R) Separator and management believes such efforts will result in increasing revenues in 2008.

13

### Cost of Goods Sold

-----

Our cost of goods sold decreased to zero for the three months ended March 31, 2008 as compared to \$11,686 for the three months ended March 31, 2007, a decrease of \$11,686, which is a directly related to the decrease in revenues reflected above.

### Research and Development Expenses

-----

Research and Development expenses increased by approximately 141% to \$198,975 for the three months ended March 31, 2008, as compared to \$82,595 for the previous three months ended March 31, 2007. Although the Company has finalized the development of the Voraxial(R) Separator, we targeted expenditures for specific applications for the technology within the oil industry during the three months ended March 31, 2008.

### General and Administrative Expenses

-----

General and Administrative expenses decreased approximately 84% to \$177,510 for the three months ended March 31, 2008 from \$1,086,494 for the three months ended March 31, 2007. The decrease was primarily due to a non-cash expenses relating to the issuance of options to employees and consultants in 2007. We continue to focus our efforts on marketing of the Voraxial(R) Separator.

### Liquidity and Capital Resources:

-----

Cash at March 31, 2008 was \$201,875. Working capital deficit at March 31, 2008 was \$319,218 as compared to a working capital deficit at December 31, 2007 of approximately \$191,322.

At March 31, 2008 the Company had an accumulated deficit of \$9,009,790. We anticipate generating positive cash flow from the Voraxial(R) Separator by the end of 2008. To the extent such revenues and corresponding cash flows do not materialize, we will require infusion of capital to sustain our operations. We cannot be assured that we will generate revenues or that the level of any future revenues will be self-sustaining.

The Company has funded working capital requirements and intends to fund current working capital requirements through third party financing, including the private placement of securities. We cannot provide any assurances that required capital will be obtained or that terms of such required capital may be

## Edgar Filing: ENVIRO VORAXIAL TECHNOLOGY INC - Form 10-Q

acceptable to us. If the Company is unable to obtain adequate financing, it may reduce its operating activities until sufficient funding is secured or revenues are generated to support operating activities.

### Continuing Losses

-----  
We may be unable to continue as a going concern, given our limited operations and revenues and our significant losses to date. Since 2001, we have encountered greater expenses in the development of our Voraxial(R) Separators and have had limited sales income from this development. Consequently, our working capital may not be sufficient and our operating costs may exceed those experienced in our prior years. In light of these recent developments, we may be unable to

14

continue as a going concern. The Company has experienced net losses, has a working capital deficit and sustained cash outflows from operating activities and had to raise capital to sustain operations. There is no assurance that the Company's developmental and marketing efforts will be successful, that the Company will ever have commercially accepted products, or that the Company will achieve significant revenues. However, we believe that the exposure received in the past year for the Voraxial Separator has positioned the Company to begin generating sales and supply us with sufficient working capital.

As a result of the above, the accompanying condensed consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The condensed consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not applicable to smaller reporting company.

### Item 4T. Controls and Procedures

#### Evaluation of disclosure controls and procedures

-----  
As of the end of the period covered by this report, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(e). This evaluation was done under the supervision and with the participation of our Principal Executive Officer and Principal Financial Officer. Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures are effective in gathering, analyzing and disclosing information needed to satisfy our disclosure obligations under the Exchange Act.

#### Changes in internal controls

-----  
There were no changes in our internal controls or in other factor during the period covered by this report that have materially affected, or is likely to materially affect the Company's internal controls over financial reporting.

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

None.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the three month period ended March 31, 2008, the Company received \$250,000 from an institution that purchased an aggregate of 416,666 shares of the Company's restricted common stock at \$0.60 per share. The institution was deemed to be an accredited investor. The issuances were exempt from registration under Section 4(2) of the Securities Act. The investor received information concerning the Company and had the opportunity to ask questions concerning the viability of the Company. The shares contain legends restricting their transferability absent registration or applicable exemption.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibits required by Item 601 of Regulation S-K

- 31.1 Form 302 Certification of Chief Executive Officer
- 31.2 Form 302 Certification of Principal Financial Officer
- 32.1 Form 906 Certification of Chief Executive Officer and Principal Financial Officer
