NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

INTERIM FINANCIAL STATEMENTS

The accompanying condensed consolidated balance sheets of bebe stores, inc. (the Company) as of April 5, 2008, July 7, 2007 and April 7, 2007, the condensed consolidated statements of income for the three and nine months ended April 5, 2008 and April 7, 2007 and the condensed consolidated statements of cash flows for the nine months ended April 5, 2008 and April 7, 2007 have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X, without audit. Accordingly, they do not include all of the information required by accounting principles generally accepted in the United States of America for annual financial statements. Therefore, these condensed consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended July 7, 2007.

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary to present fairly the financial position at the balance sheet dates and the results of operations for the periods presented have been included. The condensed consolidated balance sheet at July 7, 2007, presented herein, was derived from the audited balance sheet included in the Form 10-K for the fiscal year ended July 7, 2007.

Our business is affected by the pattern of seasonality common to most retail apparel businesses. The results for the periods presented are not necessarily indicative of future financial results.

FISCAL YEAR

Our fiscal year is a 52 or 53 week period, each period ending on the first Saturday after June 30. Fiscal years 2008 and 2007 include 52 weeks and 53 weeks, respectively.

The three month periods ended April 5, 2008 and April 7, 2007 included 13 weeks and 14 weeks, respectively. The nine month periods ended April 5, 2008 and April 7, 2007 included 39 weeks and 40 weeks, respectively.

INVENTORIES

The Company's inventories consist of:

Edgar Filing: bebe stores, inc. - Form 10-Q

	April 5, 2008	As of July 7, 2007 (In thousands)	April 7, 2007
Raw materials	\$ 5,903	\$ 7,136	\$ 8,106
Merchandise available for sale	38,721	36,928	35,398
Inventories	\$ 44,624	\$ 44,064	\$ 43,504

EARNINGS PER SHARE

Basic earnings per share is computed as net earnings divided by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur from common shares issuable through the exercise of dilutive stock options.

Edgar Filing: bebe stores, inc. - Form 10-Q

The following is a reconciliation of the number of shares used in the basic and diluted earnings per share computations:

	Three Months Ended		Nine Months Ended	
	April 5, 2008	April 7, 2007	April 5, 2008	April 7, 2007
	(In thousands)		(In thousands)	
Basic weighted average number of shares outstanding	88,833	93,069	90,077	92,638
Incremental shares from the assumed issuance of stock options	1,282	1,920	1,396	2,276
Diluted weighted average number of shares outstanding	90,115	94,989	91,473	94,914

The number of incremental shares from the assumed issuance of stock options is calculated applying the treasury stock method.

Excluded from the computation of the number of diluted weighted average shares outstanding were options of 3,143,000, and 1,903,000 for the three months ended April 5, 2008 and April 7, 2007, respectively, and 2,793,000, and 1,559,000 for the nine months ended April 5, 2008 and April 7, 2007, respectively, which in each case would have been anti-dilutive.

COMMON STOCK PURCHASES

On September 13, 2007, the Company entered into an agreement with the Company's former Vice Chairperson Neda Mashouf to purchase 5 million shares of its outstanding common stock beneficially owned by Ms. Mashouf at a price per share of \$13.39, an aggregate purchase price of \$66,950,000. The Company completed the purchase and retired the shares during the first quarter of fiscal 2008.

COMPREHENSIVE INCOME (LOSS)

Comprehensive income (loss) consists of net income and other comprehensive income (income, expenses, gains and losses that bypass the income statement and are reported directly as a separate component of equity). The Company's comprehensive income (loss) consists of net income, unrealized losses on long term investments and foreign currency translation adjustments for all periods presented.

	Three Months Ended		Nine Months Ended	
	April 5, 2008	April 7, 2007	April 5, 2008	April 7, 2007
	(In thousands)			
Net income	\$ 8,348	\$ 12,928	\$ 47,095	\$ 57,627
Unrealized loss on long term investments	(7,173)		(7,173)	
Accumulated translation adjustments	(2,509)	258	(166)	(630)
Total comprehensive income (loss)	\$ (1,334)	\$ 13,186	\$ 39,756	\$ 56,997

INVESTMENTS

Edgar Filing: bebe stores, inc. - Form 10-Q

We hold a variety of interest bearing auction rate securities (ARS) comprised of federally insured student loan backed securities and insured municipal authority bonds. As of April 5, 2008, our ARS portfolio totaled approximately \$264 million, of which \$251 million were classified as long term investments and \$13 million were classified as short term marketable securities because either the ARS was sold in a successful auction or was called by issuer. Our ARS portfolio includes approximately 83% federally insured student loan backed securities and 17% municipal authority bonds. Our ARS portfolio is comprised of approximately 85% AAA rated investments, 4% AA rated investments and 11% A rated investments. These ARS investments are intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. The recent uncertainties in the credit markets have affected our holdings in ARS investments and auctions for the majority of our investments in these securities have failed to settle on their respective settlement dates. Consequently, the investments are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful. Maturity dates for these ARS investments range from 2010 to 2045 with principal distributions occurring on certain securities prior to maturity. We currently have the ability and intent to hold these ARS investments until a recovery of the auction process or until maturity.

Typically the fair value of ARS investments approximates par value due to the frequent resets through the auction process. While we continue to earn interest on our ARS investments at the maximum contractual rate, these investments are not currently

trading and therefore do not currently have a readily determinable market value. Accordingly, the estimated fair value of ARS no longer approximates par value.

We determined the estimated fair value of our investment in ARS as of April 5, 2008 using a discounted cash flow model to estimate the fair value of our investments in ARS. The assumptions used in preparing the discounted cash flow model include estimates for interest rates, timing and amount of cash flows and expected holding periods of the ARS. Based on this assessment of fair value, as of April 5, 2008 we determined there was a decline in the fair value of our ARS investments of \$7.2 million, with no related tax benefit, of which all was deemed temporary and an impairment charge was recorded in the other comprehensive income component of shareholders' equity.

We review our impairments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, and related guidance issued by the FASB and SEC in order to determine the classification of the impairment as temporary or other-than-temporary. A temporary impairment charge results in an unrealized loss being recorded in the other comprehensive income component of shareholders' equity. Such an unrealized loss does not affect net income for the applicable accounting period. An other-than-temporary impairment charge is recorded as a realized loss in the condensed consolidated statement of income and reduces net income for the applicable accounting period. The differentiating factors between temporary and other-than-temporary impairment are primarily the length of the time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer and our current intent and ability to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

The valuation of our investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact its valuation include changes to credit ratings of the securities as well as to the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral value, discount rates and ongoing strength and quality of market credit and liquidity.

CREDIT FACILITIES

The Company has an unsecured commercial line of credit agreement with a bank, which provides for borrowings and issuance of letters of credit up to a combined total of \$25 million and expires on March 31, 2009. The outstanding balance bears interest at either the bank's reference rate (which was 5.25% as of April 5, 2008) or the LIBOR rate plus 1.75 percentage points. As of April 5, 2008, there were no outstanding borrowings, and there was \$1.9 million outstanding in letters of credit.

This credit facility requires the Company to comply with certain financial covenants, including amounts for minimum tangible net worth, unencumbered liquid assets and profitability, and certain restrictions on making loans and investments.

STOCK BASED COMPENSATION

The 1997 Stock Plan as amended (the "Stock Plan") provides for the grant of incentive stock options, non-qualified stock options, stock purchase rights, stock awards and restricted stock units. Although the Stock Plan allows for stock options and related awards to be granted at prices below fair market value, the Company has historically granted such options at the fair market value of the stock on the date of grant. Stock options and related awards have a maximum term of ten years. Options and restricted stock units granted to employees and options granted to Directors generally vest over four years with 20% of the award vested in each of the first and second years, and 30% vested in each of the remaining two

Edgar Filing: bebe stores, inc. - Form 10-Q

years. Restricted stock units awarded to Directors generally vest over a period of one year from the date of grant. As of April 5, 2008, the Company has reserved 7,409,061 shares of common stock for issuance under the Stock Plan and there were 555,051 shares available for future grant.

The Company accounts for share-based compensation under the provisions of SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123(R)), which requires share-based payment compensation related to stock options to be measured based on the estimated fair value at the date of grant using an option pricing model.

The Company recognized share-based compensation expense of \$2.2 million and \$2.8 million in the three months ended April 5, 2008 and April 7, 2007, respectively, as a component of selling, general and administrative expenses. The Company recognized share-based compensation expense of \$8.5 million and \$7.8 million in the nine months ended April 5, 2008 and April 7, 2007, respectively. As of April 5, 2008, there was \$7.5 million (before any related tax benefit) of total unrecognized compensation cost related to nonvested share-based compensation that is expected to be recognized over a weighted-average period of 3.1 years.

The fair value of each option grant was estimated on the date of the grant using the Black-Scholes valuation model. The expected life of the options represents the period of time the options are expected to be outstanding and is based on historical trends. The expected stock price volatility is based on an average of the historical volatility of the Company's stock for a period approximating the expected life and the implied volatility based on traded options of the Company's stock. The expected dividend yield is based on the Company's most recent annual dividend payout. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant and has a term that approximates the expected life.

Edgar Filing: bebe stores, inc. - Form 10-Q

The following table presents the weighted average assumptions used in the option pricing model for the stock options granted in the three and nine months ended April 5, 2008 and April 7, 2007:

	Three Months Ended		Nine Months Ended	
	April 5, 2008	April 7, 2007	April 5, 2008	April 7, 2007
Expected dividend rate	1.8%	1.1%	1.4%	0.9%
Volatility	49.8%	45.2%	47.0%	48.7%
Risk-free interest rate	2.8%	4.7%	4.0%	4.7%
Expected lives (years)	4.3	4.1	4.3	4.1
Fair value per option granted	\$ 4.56	\$ 6.98	\$ 5.32	\$ 8.68

The following table summarizes stock option activity during the nine months ended April 5, 2008:

	Options (In thousands)	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (In thousands)
Outstanding, July 7, 2007	6,098	\$ 11.95		
Granted	1,253	13.25		
Exercised	(291)	7.41		
Cancelled	(340)	16.51		
Outstanding, April 5, 2008	6,720	\$ 12.16	6.92	\$ 18,582
Exercisable, April 5, 2008	4,335	\$ 9.92	5.91	\$ 18,175

Intrinsic value for stock options is defined as the difference between the current market value and the grant price. For the three months and nine months ended April 5, 2008, the total intrinsic value of stock options exercised was \$0.2 million and \$1.9 million, respectively. Cash received from stock options exercised during the three and nine months ended April 5, 2008 was \$0.2 million and \$2.2 million, respectively, and the actual tax benefit realized for tax deductions from stock options exercised totaled \$0.1 million and \$0.7 million, respectively.

The following table summarizes restricted stock unit activity during the nine months ended April 5, 2008:

	Shares (In thousands)	Weighted Average Grant Date Fair Value Per Share
Nonvested, July 7, 2007	67	\$ 17.23
Granted	33	13.16
Vested	(10)	21.34
Cancelled	(2)	20.60
Nonvested, April 5, 2008	88	\$ 16.42

INCOME TAXES

Effective July 8, 2007, the Company adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The cumulative effect of adoption was a decrease to retained earnings of approximately \$0.6 million. As of July 8, 2007, the total unrecognized tax benefits were approximately \$5.2 million. Of this amount, approximately \$2.0 million would reduce our effective tax rate if recognized.

The Company accounts for interest and penalties related to unrecognized tax benefits as a component of income tax expense. As of the date of adoption, the Company had \$0.7 million of interest and penalties accrued associated with unrecognized tax benefits.

The Company could be subject to Federal and state tax examinations for years 2002 and forward. The Company may also be subject to audits in Canada for years 2000 and forward. The Company is currently under state income tax audit in Arizona, Texas and New York and expects the commencement of certain state tax audits in the near term. At this time, the Company does not believe that the outcome of any examination will have a material impact on the Company's financial statements.

As of July 8, 2007, the total amount of unrecognized tax benefits were approximately \$5.2 million. At the end of the third quarter, the Company recognized that there were \$2.5 million related to tax positions that were no longer uncertain. This amount is comprised of a \$2.2 million decrease in unrecognized tax benefits due to the filing of amended Canadian income tax returns and a \$0.3 million decrease in unrecognized tax benefits due to statute expirations.

LEGAL MATTERS

A former employee sued bebe, purportedly on behalf of a class of all hourly, non-managerial employees similarly situated, in a complaint filed on April 28, 2005 in the United States District Court for the Northern District of California (case no. C050177) alleging violations under the Fair Labor Standards Act, specifically that bebe obligated her to buy and wear its brand clothing as a uniform, without reimbursement or credit, and the net effect of deducting the value of such required purchases from her wages would often result in her not being paid minimum wages. The lawsuit seeks compensatory, statutory and injunctive relief. On January 25, 2008, the Court preliminarily approved the confidential settlement we previously reached in this case and we moved forward with class notification. The process of class notification is now complete and the claims period is over. A hearing has been set for May 19, 2008 to determine whether the preliminarily approved settlement should be finally approved. We have accrued an amount that we believe reasonably estimates the potential liability, which does not have a material impact on our financial position or results of operations.

A former employee sued bebe in a complaint filed July 27, 2006 in the Superior Court of California, San Mateo County (case no. CIV 456550) alleging a failure to pay all wages, failure to pay overtime wages, failure to pay minimum wages, failure to provide meal periods, violation of Labor Code §450, violation of Labor Code §2802 and California Code of Regulations §11040(9)(A), statutory wage violations (late payment of wages), unlawful business practices under Business and Professions Code §16720 and §17200, conversion of wages and violation of Civil Code §52.1. The plaintiff purports to bring the action also on behalf of current and former California bebe employees who are similarly situated. The lawsuit seeks compensatory, statutory, punitive, restitution and injunctive relief. The Court has re-set the hearing date regarding whether class certification would be appropriate to September 2008.

Edgar Filing: bebe stores, inc. - Form 10-Q

The previously reported complaint filed by a former employee on July 24, 2007 in the Superior Court of California, Orange County (case no. 07CC08220) alleging a failure to pay overtime wages, failure to provide for meal and rest breaks, and unfair business practices has been dismissed with no liability to us.

A former employee sued bebe in a complaint filed September 20, 2007 in the United States District Court for the District of New Jersey (case no. 07-cv-4514 (D.N.J.)) alleging various state and federal statutory breaches based on a failure to pay all wages, including overtime wages and bonus, failure to provide and/or pay for meal and rest break periods, failure to credit vacation time and other benefits and retaliation, wrongful termination, breach of contract, breach of covenant of good faith and fair dealing, and unjust enrichment. Plaintiff purports to bring the action on behalf of current and former store management employees who are or were similarly situated. The complaint seeks compensatory, statutory and punitive damages and equitable relief. We filed our answer in January 2008 and the matter is in the pre-discovery stage. The matter is in the early stages of discovery and the Court is considering whether conditional certification of a class is appropriate.

A customer sued the company in a complaint filed December 14, 2006 in the Superior Court of Contra Costa County (case no. C06-02630) alleging that we utilized a certain type of preprinted credit card form in a return transaction in violation of California Civil Code §1747.08. The plaintiff purports to bring the action also on behalf of other customers who are similarly situated. The lawsuit seeks compensatory, statutory, and injunctive relief. This matter is in the discovery stage.

On February 9, 2007, a customer, purportedly on behalf of other customers similarly situated, filed suit against bebe in the Central District of California (case no. CV-07-0972) alleging we violated the Fair Credit Reporting Act (the FCRA) by printing on receipts more than the last five digits of the credit or debit card numbers and/or the expiration date. The suit seeks statutory and punitive damages, attorney's fees and injunctive relief. On October 11, 2007, the Court stayed this case in its entirety pending the outcome of an interlocutory appeal in the Ninth Circuit Court of Appeals involving class certification issues in a similar FCRA action entitled, Soualian v. International Coffee and Tea, LLC, Case No. CV-07-00502-RGK, United States District Court for the Central District of California, Appellate Case No. 07-56377.

We are also involved in various other legal proceedings arising in the normal course of business. None of these matters nor the matters listed above are expected, individually or in the aggregate, to have a material adverse effect on our business, financial condition or results of operations.

We intend to defend ourselves vigorously against each of these claims. However, the results of any litigation are inherently uncertain. We cannot assure you that we will be able to successfully defend ourselves in these lawsuits. Where required, and/or otherwise appropriate, we have recorded an estimate of potential liabilities that we believe is reasonable. Any estimates are revised as further information becomes available.

RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements . SFAS No. 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements and accordingly does not require any new fair value measurements. The provisions of SFAS No. 157 are to be applied prospectively as of the beginning of the fiscal year in which it is initially applied, with any transition adjustment recognized as a cumulative-effect adjustment to the opening balance of retained earnings. The provisions of SFAS No. 157 are effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position No. FAS 157-2 which delays the effective date of SFAS No. 157 for nonfinancial assets and liabilities except for items recognized or disclosed at fair value in the financial statements on a recurring basis to fiscal years beginning after November 15, 2008. The Company does not expect the adoption of SFAS No. 157 to have a material impact on our financial position and results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB Statement No. 115 . SFAS No. 159 permits entities to choose to measure eligible items at fair value at specified election dates and report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material impact on our financial position and results of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements, which involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements. Statements that are predictive in nature, that depend upon or refer to future events or conditions or that include words such as expects, anticipates, intends, plans, believes, estimates, thinks, and similar expressions are forward-looking statements. Forward-looking statements include statements about our expected results of operations, capital expenditures and store openings. Although we believe that these statements are based upon reasonable assumptions, we cannot assure you that our goals will be achieved. These forward-looking statements are made as of the date of this Form 10-Q, and we assume no obligation to update or revise them or provide reasons why actual results may differ. Factors that

might cause such a difference include, but are not limited to, our ability to respond to changing fashion trends, miscalculation of the demand for our products, effective management of our growth, decline in comparable store sales performance, ongoing competitive pressures in the apparel industry, changes in the level of consumer spending or preferences in apparel, our ability to attract and retain key management personnel and/or other factors discussed in Risks Factors and elsewhere in this Form 10-Q.

OVERVIEW

We design, develop and produce a distinctive line of contemporary women's apparel and accessories. While we attract a broad audience, our target customer is a 21 to 35-year-old woman who seeks current fashion trends to suit her lifestyle. The bebe look appeals to a hip, sexy, sophisticated, body-conscious woman who takes pride in her appearance. The bebe customer expects value in the form of current fashion and high quality at a competitive price.

Our distinctive product offering includes a full range of separates, tops, sweaters, dresses, active wear and accessories in the following lifestyle categories: career, evening, casual and active. We design and develop the majority of our merchandise in-house, which is manufactured to our specifications. The remainder of our merchandise is sourced directly from third-party manufacturers.

We market our products under the bebe, BEBE SPORT, bbsp and bebe O brand names through our 290 retail stores, of which 207 are bebe stores, 62 are BEBE SPORT stores, 20 are bebe outlet stores and 1 is a bebe accessories store as of April 5, 2008. These stores are located in 35 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands and Canada. In addition, we have an on-line store at www.bebe.com and our licensees operate 20 international stores. During the three months ended April 5, 2008, we opened 4 stores, including 3 bebe stores and 1 BEBE SPORT store and closed 4 bebe stores. During the nine months ended April 5, 2008, we opened 21 stores, including 13 bebe stores and 8 BEBE SPORT stores and closed 4 bebe stores. We expect to open approximately 35 stores, including approximately 19 bebe stores, 9 BEBE SPORT stores and 7 bebe outlet stores during our fiscal 2008. We also plan to renovate 1 existing store and relocate or expand 6 existing stores, resulting in square footage growth of approximately 14%.

bebe stores. We were founded by Manny Mashouf, Chairman of the Board. We opened our first store in San Francisco, California in 1976, which was also the year we incorporated.

BEBE SPORT. We launched BEBE SPORT during fiscal 2003 to address the performance and active lifestyle needs of the bebe customer.

bebe outlets. We utilize the outlets as a clearance vehicle for merchandise from our retail stores. In addition, the inventory includes a strong presentation of bebe logo merchandise and special cuts produced under the bebe O label exclusively for the outlet stores. In the last quarter of 2008, we plan to open 7 new outlet stores under the new name 2b bebe and will continue to offer a selection of bebe logo product, bebe sale consolidations and an expanded assortment of product made exclusively for our outlet stores under the new name 2b bebe.

On-line. bebe.com is an extension of the bebe store experience and provides a complete assortment of bebe and BEBE SPORT merchandise. It is also used as an advertising vehicle to communicate with our customers. We are currently able to ship to customers in the United States and Canada.

bebe accessories. In September 2006, we opened our first accessory concept store featuring shoes imported from Italy, Brazil and China and a selection of fine leather goods, bebe logo merchandise, outerwear and gift items.

CRITICAL ACCOUNTING POLICIES

Management's Discussion and Analysis of Financial Condition and Results of Operations are based upon our consolidated financial statements, which have been prepared in conformity with accounting principles generally accepted in the United States of America.

The preparation of these financial statements requires the appropriate application of certain accounting policies, many of which require us to make estimates and assumptions about future events and their impact on amounts reported in our financial statements and related notes. Since future events and their impact cannot be determined with certainty, the actual results will inevitably differ from our estimates. Such differences

Edgar Filing: bebe stores, inc. - Form 10-Q

could be material to the financial statements. We believe our application of accounting policies, and the estimates inherently required therein, are reasonable. These accounting policies and estimates are constantly reevaluated, and adjustments are made when facts and circumstances dictate a change. Our accounting policies are more fully described in Note 1 to the consolidated financial statements in our annual report on Form 10-K for the fiscal year ended July 7, 2007.

We have identified certain critical accounting policies, which are described below:

Revenue recognition. We recognize revenue at the time the products are received by the customers in accordance with the provisions of Staff Accounting Bulletin (SAB) No. 101, Revenue Recognition in Financial Statements as amended by SAB No. 104, Revenue Recognition . We recognize revenue for store sales at the point at which the customer receives and pays for the merchandise at the register with either cash or credit card. For on-line sales, we recognize revenue at the time the customer receives the product. We estimate and defer revenue and the related product costs for shipments that are in transit to the customer. Customers typically receive goods within one week of shipment. Amounts related to shipping billed to customers are reflected in net sales and the related costs are reflected in cost of goods sold. Sales tax collected from customers on retail sales are recorded net of retail sales at the time of the transaction.

We record a reserve for estimated product returns based on historical return trends. As of April 5, 2008 and April 7, 2007, the reserve was \$1,283,000 and \$955,000, respectively. If actual returns are greater than those projected, additional sales returns may be recorded in the future.

Discounts offered to customers consist primarily of point of sale markdowns and are recorded at the time of the related sale as a reduction of revenue.

We include the value of points and rewards earned by our loyalty program members as a liability and a reduction of revenue at the time the points and rewards are earned based on historical conversion and redemption rates. We recognize revenue when the rewards are redeemed or expire.

We carry gift certificates sold as a liability and we recognize revenue when the gift certificate is redeemed or four years after issuance if the gift certificate is unredeemed. Similarly, customers may receive a store credit in exchange for returned goods. We carry store credits as a liability until redeemed or three years after issuance if the store credit is unredeemed.

We ship bebe goods to various international locations and recognize revenue from these wholesale sales when the licensee receives the shipment.

We record royalty revenue from product licensees as earned, which is based on the licensee's sales.

Stock Based Compensation. We account for stock options and awards issued to employees in accordance with the fair value recognition provisions of Financial Accounting Standards Board (FASB) Statement No. 123(R) (SFAS No. 123(R)), Share-Based Payment, using the modified prospective transition method. Under SFAS No. 123(R), stock-based awards to employees are required to be recognized as compensation expense, based on the calculated fair value on the date of grant. We determine the fair value using the Black Scholes option pricing model. This model requires subjective assumptions, including future stock price volatility and expected term, which affect the calculated values.

Inventories. Our inventories are stated at the lower of weighted average cost or market. Market is determined based on the estimated net realizable value, which is generally the merchandise selling price. To ensure that our raw material is properly valued we age the fabric inventory and record a reserve in accordance with our established policy, which is based on historical experience. To ensure our finished goods inventory is properly valued we review the age and turnover of our inventory and record a reserve if the selling price is marked down below cost. These assumptions can have an impact on current and future operating results and financial position. We estimate shrinkage for the period between the last physical count and balance sheet date based on historic shrinkage trends.

Marketable securities. We hold a variety of interest bearing auction rate securities (ARS) comprised of federally insured student loan backed securities and insured municipal authority bonds. As of April 5, 2008, our ARS portfolio totaled approximately \$264 million, of which \$251 million were classified as long term investments and \$13 million were classified as short term marketable securities because either the ARS was sold in a successful auction or was called by issuer. Our ARS portfolio includes approximately 83% federally insured student loan backed securities and 17% municipal authority bonds. Our ARS portfolio is comprised of approximately 85% AAA rated investments, 4% AA rated investments and 11% A rated investments. These ARS investments are intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. The recent uncertainties in the credit markets have affected our holdings in ARS investments and auctions for the majority of our investments in these securities have failed to settle on their respective settlement dates. Consequently, the investments are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful. Maturity dates for these ARS investments range from 2010 to 2045 with principal distributions occurring on certain securities prior to maturity. We currently have the ability and intent to hold these ARS investments until a recovery of the auction process or until maturity.

Typically the fair value of ARS investments approximates par value due to the frequent resets through the auction process. While we continue to earn interest on our ARS investments at the maximum contractual rate, these investments are not currently trading and therefore do not currently have a readily determinable market value. Accordingly, the estimated fair value of ARS no longer approximates par value.

We determined the estimated fair value of our investment in ARS as of April 5, 2008 using a discounted cash flow model to estimate the fair value of our investments in ARS. The assumptions used in preparing the discounted cash flow model include estimates for interest rates, timing and amount of cash flows and expected holding periods of the ARS. Based on this assessment of fair value, as of April 5, 2008 we determined there was a decline in the fair value of our ARS investments of \$7.2 million, with no related tax benefit, of which all was deemed temporary and an impairment charge was recorded in the other comprehensive income component of shareholders' equity.

We review our impairments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, and related guidance issued by the FASB and SEC in order to determine the classification of the impairment as temporary or other-than-temporary. A temporary impairment charge results in an unrealized loss being recorded in the other comprehensive income component of shareholders' equity. Such an unrealized loss does not affect net income for the applicable accounting period. An other-than-temporary impairment charge is recorded as a realized loss in the condensed consolidated statement of income and reduces net income for the applicable accounting period. The differentiating factors between temporary and other-than-temporary impairment are primarily the length of the time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer and our current intent and ability to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

The valuation of our investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact its valuation include changes to credit ratings of the securities as well as to the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral value, discount rates and ongoing strength and quality of market credit and liquidity.

Long-lived assets. We review long-lived assets for impairment whenever events or changes in circumstances, such as store closures or poor performing stores, indicate that the carrying value of an asset may not be recoverable. If the undiscounted cash flows from the long-lived assets are less than the carrying value we record an impairment charge equal to the difference between the carrying value and the asset's fair value. In addition, at the time a decision is made to close a store, we record an impairment charge, if appropriate, or accelerate depreciation over the revised useful life of the asset. Historically, our impairment charges have been immaterial. During the nine months ended April 5, 2008 and April 7, 2007 we recorded \$773,000 and \$0, respectively, of impairment charges. We believe at this time that the long-lived assets' carrying values and useful lives continue to be appropriate.

Accrued Litigation. We accrue estimates of probable liabilities associated with lawsuits and claims. The results of any litigation are inherently uncertain. As information becomes available, we assess the potential liabilities related to pending litigation and may revise our estimates as necessary. Such revisions of estimates could materially impact the results of operations and financial position.

Self Insurance. We use a combination of insurance and self insurance for employee related health care benefits. We record self insurance liabilities based on claims filed and an estimate of those claims incurred but not reported. Any projection of losses concerning our liability is subject to a high degree of variability. Among the causes of this variability are unpredictable external factors such as future inflation rates, changes in severity, benefit level changes, medical costs and claim settlement patterns. Should a different amount of claims occur compared to what was estimated or costs of the claims increase or decrease beyond what was anticipated, reserves may need to be adjusted in the future.

Income Taxes. On July 8, 2007, we adopted FIN 48. FIN 48 prescribes a recognition threshold that a tax position is required to meet before being recognized in the financial statements and provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition issues. To the extent that our estimates change or the final tax outcome of these matters is different than the amounts recorded, such differences will impact the income tax provision in the period in which such determinations are made. Our effective tax rate in a given financial statement period may be materially impacted by changes in the mix and level of earnings, changes in the expected outcome of audits or changes in the deferred tax valuation allowance.

RESULTS OF OPERATIONS

Our fiscal year is a 52 or 53 week period, each period ending on the first Saturday after June 30. Fiscal years 2008 and 2007 include 52 weeks and 53 weeks, respectively. The three months ended April 5, 2008 and April 7, 2007 include 13 weeks and 14 weeks, respectively. The nine months ended April 5, 2008 and April 7, 2007 include 39 weeks and 40 weeks, respectively.

The following table sets forth certain financial data as a percentage of net sales for the periods indicated:

Edgar Filing: bebe stores, inc. - Form 10-Q

	Three Months Ended		Nine Months Ended	
	April 5, 2008	April 7, 2007	April 5, 2008	April 7, 2007
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales, including production and occupancy (1)	56.2	54.7	54.1	52.1
Gross margin	43.8	45.3	45.9	47.9
Selling, general and administrative expenses (2)	38.9	35.1	34.5	32.1
Operating income	4.9	10.2	11.4	15.8
Interest and other income, net	3.4	2.9	2.5	2.0
Income before income taxes	8.3	13.1	13.9	17.8
Provision for income taxes	2.8	4.7	4.8	6.5
Net income	5.5%	8.4%	9.1%	11.3%

(1) Cost of sales includes the cost of merchandise, occupancy costs, distribution center and production costs.

(2) Selling, general and administrative expenses primarily consist of non-occupancy store costs, corporate overhead and advertising costs.

Net Sales. Net sales decreased to \$151.7 million during the three months ended April 5, 2008 from \$154.4 million for the comparable period of the prior year, a decrease of \$2.7 million, or 1.7%. The decrease in sales is primarily due to an additional \$10 million in sales in fiscal 2007 due to the extra week in fiscal January 2007. Net sales excluding the additional week in fiscal 2007 increased by \$7.3 million or 5.1%. The increase in sales is primarily due to a \$17.4 million increase in stores not included in the comparable store sales, an increase in on-line sales and an increase in wholesale sales to international licensees partially offset by a 7.6% decrease in comparable store sales totaling \$9.6 million. Same store sales exclude the additional week from January 2007.

For the nine months ended April 5, 2008, net sales increased to \$516.1 million from \$508.2 million for the comparable period of the prior year, an increase of \$7.9 million, or 1.6%. Net sales excluding the additional week in fiscal 2007 increased by \$17.9 million or 3.6%. The increase in sales is primarily due to a \$54.2 million increase in sales for stores not included in the comparable store sales base, an increase in on-line sales and an increase in wholesale sales to international licensees, partially offset by an 8.3% decrease in comparable store sales totaling \$36.8 million during the nine months ended April 5, 2008 as compared to the same period in the prior. Same store sales exclude the additional week from January 2007.

	Three Months Ended		Nine Months Ended	
	April 5, 2008	April 7, 2007	April 5, 2008	April 7, 2007
Net sales (In thousands)	\$ 151,729	\$ 154,354	\$ 516,140	\$ 508,215
Total net sales increase (decrease) percentage	(1.7)%	16.3%	1.6%	19.0%
Comparable store sales increase (decrease) percentage	(7.6)%	(0.4)%	(8.3)%	5.9%
Net sales per average square foot (1)	\$ 141	\$ 162	\$ 495	\$ 550
Square footage at end of period (In thousands)	1,060	942	1,060	942
Number of store locations:				
Beginning of period	290	258	273	242
New store locations	4	6	21	22
Closed store locations	4	5	4	5
Number of stores open at end of period	290	259	290	259

(1) We calculate net sales per average square foot using net store sales and a monthly average store square footage.

Gross Margin. Gross margin decreased to \$66.3 million during the three months ended April 5, 2008 from \$69.9 million for the comparable period of the prior year, a decrease of \$3.6 million, or 5.2%. As a percentage of net sales, gross margin decreased to 43.8% for the three months ended April 5, 2008 from 45.3% in the comparable period of the prior year. The decrease in gross margin as a percentage of net sales resulted primarily due to unfavorable occupancy leverage partially offset by higher merchandise margin as a result of lower markdowns. In addition, gross margin in the third quarter of fiscal 2007 included substantial raw material reserves reversals.

Edgar Filing: bebe stores, inc. - Form 10-Q

For the nine months ended April 5, 2008, gross margin decreased to \$236.9 million from \$243.5 million for the comparable period of the prior year, a decrease of \$6.6 million, or 2.7%. As a percentage of net sales, gross margin decreased to 45.9% for the nine months ended April 5, 2008 from 47.9% in the comparable period of the prior year. The decrease in gross margin as a percentage of net sales resulted primarily due to higher markdowns and unfavorable occupancy leverage, partially offset by a decrease in inventory reserves.

Selling, General and Administrative Expenses. Selling, general and administrative expenses, which primarily consist of non-occupancy store costs, corporate overhead and advertising costs, increased to \$59.0 million during the three months ended April 5, 2008 from \$54.1 million for the comparable period of the prior year, an increase of \$4.9 million, or 9.1%. As a percentage of net sales, selling, general and administrative expenses increased to 38.9% during the three months ended April 5, 2008 from 35.1% in the comparable period of the prior year. The increase in selling, general and administrative expenses as a percentage of net sales from the prior year of 3.8% was primarily due to higher total compensation expense, advertising expense and the recording of an impairment charge for three underperforming store locations.

Selling, general and administrative expenses increased to \$177.9 million during the nine months ended April 5, 2008 from \$163.4 million for the comparable period of the prior year, an increase of \$14.5 million, or 8.9 %. As a percentage of net sales, these expenses increased to 34.5% during the nine months ended April 5, 2008 from 32.1% in the comparable period of the prior year. The increase as a percentage of net sales from the prior year of 2.4% was primarily due to an increase in total compensation expense, including stock based compensation, advertising expense and depreciation expense.

Interest and Other Income, Net. We generated approximately \$5.2 million of interest and other income (net of other expenses) during the three months ended April 5, 2008 compared to approximately \$4.4 million in the comparable period of the prior year. The increase was primarily the result of higher interest rates on our tax-exempt investments and \$0.6 million in foreign currency gains related to settling intercompany inventory accounts due from Canada.

For the nine months ended April 5, 2008, we generated approximately \$13.0 million of interest and other income (net of other expenses), compared to \$10.1 million in the comparable period of the prior year. The increase was primarily the result of higher interest rates on our tax-exempt investments and \$0.6 million in foreign currency gains related to settling intercompany inventory accounts due from Canada.

Provision for Income Taxes. Our effective tax rate decreased to 33.6% for the three months ended April 5, 2008 from 35.9% for the comparable period in the prior year primarily due to an increase in tax-exempt interest income as a percent of total pretax income and an increase in our allowable domestic manufacturing deduction.

For the nine months ended April 5, 2008, our effective tax rate decreased to 34.5% from 36.1% for the comparable period in the prior year primarily due to an increase in tax-exempt interest income as a percentage of total pretax income and an increase in our allowable domestic manufacturing deduction.

Seasonality of Business and Quarterly Results

Our business varies with general seasonal trends that are characteristic of the retail and apparel industries. As a result, our typical store generates a higher percentage of our annual net sales and profitability in the second quarter of our fiscal year, which includes the holiday selling season, compared to the other quarters of our fiscal year. If for any reason our sales were below seasonal norms during the second quarter of our fiscal year, our annual operating results would be negatively impacted. Because of the seasonality of our business, results for any quarter are not necessarily indicative of results that may be achieved for a full fiscal year.

LIQUIDITY AND CAPITAL RESOURCES

Our working capital requirements vary widely throughout the year and generally peak during the first and second fiscal quarters. At April 5, 2008, we had approximately \$347.4 million of cash and equivalents and investments on hand of which approximately, \$264 million, net of a temporary impairment charge of \$7.2 million, were invested in auction rate securities (ARS). Due to the recent failures of these auctions we have classified \$251 million of these investments as long term investments. We do not anticipate the lack of liquidity in the ARS to impact our liquidity and believe we have sufficient cash and equivalents to fund ongoing operations. In addition, we had a revolving line of credit, under

Edgar Filing: bebe stores, inc. - Form 10-Q

which we could borrow or issue letters of credit up to a combined total of \$25 million. As of April 5, 2008, there were no cash borrowings outstanding under the line of credit, and letters of credit outstanding totaled \$1.9 million.

Net cash provided by operating activities for the nine months ended April 5, 2008 was \$64.7 million versus \$62.7 million for the nine months ended April 7, 2007. Cash provided by operating activities for the period was primarily generated by net income of \$47.1 million adjusted for stock compensation of \$8.5 million, depreciation of \$16.9 million, deferred rent of \$5.3 million, deferred income taxes of \$2.4 million and net loss on disposal of property of \$0.8 million, as well as changes in working capital. The changes in working capital were primarily due to an increase in prepaid expenses and other assets of \$6.0 million, an increase in receivables of \$5.1 million, a decrease in accounts payable of \$1.9 million and an increase in inventory of \$0.5 million, partially offset by an increase in accrued liabilities of \$2.0 million.

Net cash provided by investing activities for the nine months ended April 5, 2008 was \$28.5 million versus net cash used by investing activities of \$53.9 million for the nine months ended April 7, 2007. Cash provided by investing activities for the period was primarily due to the sales of marketable securities of \$393.0 million, partially offset by purchases of marketable securities of \$337.0 million and capital expenditures of \$28.0 million related to the opening of new stores. We opened 21 new stores in the nine months ended April 5, 2008 and expect to open approximately 35 stores during fiscal 2008. We estimate that total capital expenditures will be approximately \$45 million in fiscal 2008.

Net cash used by financing activities was \$78.0 million for the nine months ended April 5, 2008 versus net cash provided by financing activities of \$3.0 million for the nine months ended April 7, 2007. Cash used by financing activities for the period was primarily due to the purchase of 5 million shares of our outstanding common stock totaling \$66.9 million and payments of quarterly dividends for the fourth quarter of fiscal 2007 and the first and second quarters of fiscal 2008 totaling \$13.8 million, partially offset by proceeds received from stock option exercises of \$2.2 million and the related tax benefit of \$0.6 million.

As of April 5, 2008, we had a balance of approximately \$264 million in investments in ARS, of which \$251 million were classified as long term investments and \$13 million were classified as short term marketable securities because either the ARS was sold in a successful auction or was called by issuer. Our ARS portfolio includes approximately 83% federally insured student loan backed securities and 17% municipal authority bonds. Our ARS portfolio is comprised of approximately 85% AAA rated investments, 4% AA rated investments and 11% A rated investments. These ARS investments are intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. The recent uncertainties in the credit markets have affected our holdings in ARS investments and auctions for the majority of our investments in these securities have failed to settle on their respective settlement dates. Consequently, the investments are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful. Maturity dates for these ARS investments range from 2010 to 2045 with principal distributions occurring on certain securities prior to maturity. We currently have the ability and intent to hold these ARS investments until a recovery of the auction process or until maturity.

During our first quarter of fiscal 2008, we entered into an agreement with our former Vice Chairperson Neda Mashouf to purchase 5 million shares of our common stock beneficially owned by Ms. Mashouf at a price per share of \$13.39, an aggregate purchase price of \$66,950,000. We may purchase additional shares from Ms. Mashouf or other shareholders in the future.

We believe that our cash on hand, together with our cash flows from operations, will be sufficient to meet our capital and operating requirements for at least the next twelve months. Our future capital requirements, however, will depend on numerous factors, including without limitation, liquidity of our auction rate securities, the size and number of new and expanded stores and/or store concepts, investment costs for management information systems, potential acquisitions and/or joint ventures, repurchase of stock and future results of operations.

Inflation

We do not believe that inflation has had a material effect on the results of operations in the recent past. However, we cannot assure you that our business will not be affected by inflation in the future.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks, which include changes in U.S. interest rates and, to a lesser extent, foreign exchange rates. We do not engage in financial transactions for trading or speculative purposes.

Interest Rate Risk

We currently maintain a portfolio of variable interest rate investments consisting of cash equivalents, and short term marketable securities and long term investments comprised of auction rate securities (ARS). Our ARS portfolio includes approximately 83% federally insured student loan backed securities and 17% municipal authority bonds. Our ARS portfolio includes approximately 85% AAA rated investments, 4% AA rated investments and 11% A rated investments. According to our investment policy, we may invest in taxable and tax-exempt instruments. In addition, the policy establishes limits on credit quality, maturity, issuer and type of instrument. Marketable securities are classified as available for sale . We do not use derivative financial instruments in our investment portfolio.

All highly liquid investments with a maturity of three months or less at the date of purchase are considered to be cash equivalents. Investments are considered short term marketable securities if the original maturity is between three months and twelve months, or long term investments if the original maturity is greater than twelve months. Typically the fair value of ARS investments approximates par value due to the frequent resets through the auction process. While we continue to earn interest on our ARS investments at the maximum contractual rate, these investments are not currently trading and therefore do not currently have a readily determinable market value. Accordingly, the estimated fair value of ARS no longer approximates par value. We determined the estimated fair value of our investment in ARS as of April 5, 2008 using a discounted cash flow model to estimate the fair value of our investments in ARS. The assumptions used in preparing the discounted cash flow model include estimates for interest rates, timing and amount of cash flows and expected holding periods of the ARS. Based on this assessment of fair value, as of April 5, 2008 we determined there was a decline in the fair value of our ARS investments of \$7.2 million, with no related tax benefit, of which all was deemed temporary and an impairment charge was recorded in the other comprehensive income component of shareholders' equity. As of April 5, 2008, we reclassified \$251 million of our short term marketable securities to long term investments on our condensed consolidated balance sheet because of our inability to determine when our investments in ARS will settle. We have also modified our current investment strategy and increased our investments in more liquid money market investments. An immediate and uniform increase in market interest rate of 100 basis points from levels at April 5, 2008 would cause an additional decline of approximately 3%, or \$7.3 million, in the fair market value of our investments in ARS.

Edgar Filing: bebe stores, inc. - Form 10-Q

The following table lists our cash equivalents and investments at April 5, 2008:

	Book Value		Fair Value
	(Dollars in thousands)		
Cash equivalents	\$	64,342	\$ 64,342
Weighted average interest rate (1)		2.94%	
Short term marketable securities	\$	13,400	\$ 13,400
Weighted average interest rate (1)		6.29%	
Long term investments	\$	250,503	\$ 250,503
Weighted average interest rate (1)		5.53%	
Total	\$	328,245	\$ 328,245

(1) Represents the weighted average interest rate for tax-exempt municipal bonds, municipal preferreds, corporate preferreds and taxable and tax-exempt institutional money market instruments.

The interest payable on outstanding cash borrowings under our bank line of credit is based on variable interest rates and therefore affected by changes in market interest rates. As we have no outstanding cash borrowings, if interest rates rose significantly, our results from operations and cash flows would not be affected.

Foreign Currency Risks

We enter into a significant amount of purchase obligations outside of the United States, substantially all of which are negotiated and settled in U.S. Dollars and, therefore, have only minimal exposure to foreign currency exchange risks. We also operate a subsidiary for which the functional currency is the Canadian Dollar. In accordance with SFAS No. 52, *Foreign Currency Translation*, assets and liabilities of Canada's operations are translated into U.S. dollars at quarter-end rates, while income and expenses are translated at the weighted average exchange rates for the quarter. The related translation adjustments are recorded in accumulated other comprehensive income as a separate component of shareholders' equity. Fluctuations in exchange rates therefore impact our financial condition and results of operations, as reported in U.S. Dollars. We do not hedge against foreign currency risks and believe that foreign currency exchange risk is immaterial.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report at the reasonable assurance level.

There has been no change in our internal control over financial reporting during the quarter ended April 5, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See the Legal Matters section of the Notes to the Condensed Consolidated Financial Statements for a discussion of legal proceedings.

ITEM 1A. RISK FACTORS

Our past performance may not be a reliable indicator of future performance because actual future results and trends may differ materially depending on a variety of factors, including, but not limited to, the risks and uncertainties discussed below. In addition, historical trends should not be used to anticipate results or trends in future periods.

Factors that might cause our actual results to differ materially from the forward looking statements discussed elsewhere in this report, as well as affect our ability to achieve our financial and other goals, include, but are not limited to, those set forth below. There have been no material changes in our risk factors from those disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended July 7, 2007, other than with respect to our investments in auction rate securities.

RISKS RELATING TO OUR BUSINESS:

1. The success of our business depends in large part on our ability to identify fashion trends as well as to react to changing customer demand in a timely manner. Consequently, we depend in part upon the customer response to the creative efforts of our merchandising, design and marketing teams and their ability to anticipate trends and fashions that will appeal to our consumer base. If we miscalculate our customers' product preferences or the demand for our products, we may be faced with excess inventory. Historically, this type of occurrence has resulted in excess fabric for some products and markdowns and/or write-offs, which has impaired our profitability, and may do so in the future. Similarly, any failure on our part to anticipate, identify and respond effectively to changing consumer demands and fashion trends will adversely affect our sales.

2. If we are unable to obtain raw materials, or unable to find manufacturing facilities or if our manufacturers perform unacceptably, our sales may be negatively affected and our financial condition may be harmed. We do not own any manufacturing facilities and therefore depend on contractors and third parties to manufacture our products. We place all of our orders for production of merchandise and raw materials by purchase order and do not have any long-term contracts with any manufacturer or supplier. If we fail to maintain favorable relationships with our manufacturers and suppliers or are unable to obtain sufficient quantities of quality raw materials on commercially reasonable terms, it could harm our business and results of operations. We cannot assure you that contractors and third-party manufacturers (1) will not supply similar products to our competitors, (2) will not stop supplying products to us completely or (3) will supply products in a timely manner. Untimely receipt of products may result in lower than anticipated sales and markdowns which would have a negative impact on earnings. Furthermore, we have received in the past, and may receive in the future, shipments of products from manufacturers that fail to conform to our quality control standards. In such event, unless we are able to obtain replacement products in a timely manner, we may lose sales. Certain of our third-party manufacturers store our raw materials. In the event our inventory is damaged or destroyed while in storage and we are unable to obtain replacement raw materials, our earnings may be negatively impacted.

3. Our success depends on our ability to attract and retain qualified employees in order to support our existing business and future expansion. From time to time we actively recruit qualified candidates to fill key executive positions from within the Company. There is substantial competition for experienced personnel, which we expect will continue. We compete for experienced personnel with companies who have greater financial resources than we do. In the past, we have experienced significant turnover of our executive management team and retail store personnel. We are also exposed to employment practice litigation due to the large number of employees and high turnover of our sales associates. If we fail to attract, motivate, and retain qualified personnel, it could harm our business and limit our ability to expand.

In addition, we depend on the expertise and execution of our key employees, particularly Manny Mashouf, our founder and Chairman of the Board, and Gregory Scott, our Chief Executive Officer and member of the Board of Directors. If we lose the services of Mr. Mashouf or

Mr. Scott, or any key officers or employees, it could harm our business and results of operations.

4. If we are not able to successfully develop new concepts, including BEBE SPORT and 2b bebe, our revenue base and earnings may be impaired. From time to time, we may pursue new concepts. If the BEBE SPORT and 2b bebe or other new concepts are not successful, our financial condition may be harmed.

5. We cannot assure you that future store openings will be successful, and new store openings may impact existing stores. We expect to open approximately 35 stores in fiscal 2008, of which 19 will be bebe stores, 9 will be BEBE SPORT stores and 7 will be 2b bebe stores. We cannot assure you that the stores that we plan to open in fiscal 2008, or any other stores that we might open in the future, will be successful or that our overall operating profit will increase as a result of opening these stores. During fiscal 2008 we closed 4 bebe stores and do not anticipate closing any additional stores for the remainder of the fiscal year. For fiscal 2008, we plan to grow our operations primarily through the opening of new stores. Most of our new store openings in fiscal 2008 will be in existing markets. These openings may affect the existing stores' net sales and profitability. Our failure to predict accurately the demographic or retail environment at any future store location could have a material adverse effect on our business, financial condition and results of operations.

Our ability to effectively obtain real estate to open new stores depends upon the availability of real estate that meets our criteria, including traffic, square footage, co-tenancies, average sales per square foot, lease economics, demographics, and other factors, and our ability to negotiate terms that meet our financial targets. In addition, we must be able to effectively renew our existing store leases. Failure to secure real estate locations adequate to meet annual targets as well as effectively managing the profitability of our existing fleet of stores could have a material adverse effect on our results of operations.

6. We are subject to risks associated with our on-line sales. We operate an on-line store at www.bebe.com to sell our merchandise.

Although our on-line sales encompass a relatively small percentage of our total sales, our on-line operations are subject to numerous risks, including unanticipated operating problems, reliance on third-party computer hardware and software providers. The on-line operations also involve other risks that could have an impact on our results of operations including but not limited to diversion of sales from our stores, rapid technological change, liability for on-line content, security breaches, consumer privacy concerns, credit card fraud, and risks related to the failure of the computer systems that operate the website and its related support systems. In addition, given our use of a third party platform, we do not have direct control of certain aspects of our on-line business. We cannot assure you that our on-line store will continue to achieve sales and profitability growth or even remain at its current level.

7. Any serious disruption at our major facilities could have a harmful effect on our business. We currently operate a corporate office in Brisbane, California, a distribution facility in Benicia, California, and a design studio and production facility in Los Angeles, California. Any serious disruption at these facilities whether due to construction, relocation, fire, earthquake, terrorist acts or otherwise would harm our operations and could have a harmful effect on our business and results of operations. Furthermore, we have little experience operating essential functions away from our main corporate offices and are uncertain what effect operating such satellite facilities might have on business, personnel and results of operations.

8. We rely on information technology, the disruption of which could adversely impact our business. We rely on various information systems to manage our operations and regularly make investments to upgrade, enhance or replace such systems. To support our growth we initiated a three year IS&T strategic plan and we are currently entering year three of this plan. If we fail to successfully implement the plan, our business could be adversely affected.

9. We face significant competition in the retail and apparel industry, which could harm our sales and profitability. The retail and apparel industries are highly competitive and are characterized by low barriers to entry. We expect competition in our markets to increase. The primary competitive factors in our markets are: brand name recognition, sourcing, product styling, quality, presentation and pricing, timeliness of product development and delivery, store ambiance, customer service and convenience. We compete with traditional department stores, specialty store retailers, business to consumer websites, off-price retailers and direct marketers for, among other things, raw materials, market share, retail space, finished goods, sourcing and personnel. Because many of these competitors are larger and have substantially greater financial, distribution and marketing resources than we do, we may lack the resources to adequately compete with them. If we fail to remain competitive in any way, it could harm our business, financial condition and results of operations.

10. Purchases of the merchandise we sell are generally discretionary and are therefore particularly susceptible to economic conditions. The outlook for the United States economy is uncertain and is directly affected by global factors that are beyond our control. Such factors include disposable consumer income, oil prices, recession and fears of recession, war and fears of war, terrorist attacks, inclement weather, consumer debt, interest rates, sales tax rates, consumer confidence in future economic conditions and political conditions, and consumer perceptions of personal well-being and security. Consumers are generally more willing to make discretionary purchases, including purchases of fashion products, during periods in which favorable economic conditions prevail. If economic conditions change, our business, financial

condition and results of operations could be adversely affected. We cannot predict the indirect effects such as rising oil and freight prices, consumer spending or other economic factors that natural disasters will have on our results of operations.

11. Our business could be adversely impacted by unfavorable international political conditions. Due to our international operations, our sales and operating results are, and will continue to be, affected by international social, political, legal and economic conditions. In particular, our business could be adversely impacted by instability or changes resulting in the disruption of trade with the countries in which our contractors, suppliers or customers are located, significant fluctuations in the value of the dollar against foreign currencies or restrictions on the transfer of funds, or additional trade restrictions imposed by the United States and other foreign governments. Trade restrictions, including increased tariffs or quotas, embargoes, and customs restrictions could increase the cost or reduce the supply of merchandise available to the company and adversely affect its financial condition and results of operations. In addition, we purchase a substantial amount of our raw materials from China and our business and operating results may be affected by changes in the political, social or economic environment in China.

12. If we are not able to successfully protect our intellectual property our ability to capitalize on the value of our brand name may be impaired. Even though we take actions to establish, register and protect our trademarks and other proprietary rights, we cannot assure you that we will be successful or that others will not imitate our products or infringe upon our intellectual property rights. In addition, we cannot assure that others will not resist or seek to block the sale of our products as infringements of their trademark and proprietary rights.

We are seeking to register our trademarks domestically and internationally. Obstacles may exist that may prevent us from obtaining a trademark for the bebe name or related names. We may not be able to register certain trademarks, purchase the right or obtain a license to use the bebe name or related names on commercially reasonable terms. If we fail to obtain trademark, ownership or license the requisite rights, it would limit our ability to expand. In some jurisdictions, despite successful registration of our trademarks, third parties may allege infringement and bring actions against us. In addition, if our licensees fail to use our intellectual property correctly, the reputation and value associated with our trademarks may be diluted. Furthermore, if we do not demonstrate use of our trademarks, our trademark rights may lapse over time.

13. We may be required to record impairment charges in future quarters as a result of the decline in value of our investments in auction rate securities. We hold a variety of interest bearing auction rate securities (ARS) comprised of federally insured student loan backed securities and insured municipal authority bonds. These ARS investments are intended to provide liquidity via an auction process that resets the applicable interest rate at predetermined calendar intervals, allowing investors to either roll over their holdings or gain immediate liquidity by selling such interests at par. The recent uncertainties in the credit markets have affected our holdings in ARS investments and the majority of auctions for our investments in these securities have failed to settle on their respective settlement dates. Consequently, \$251 million of our ARS are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful or a buyer is found outside of the auction process. Maturity dates for these ARS investments range from 2010 to 2045 with principal distributions occurring on certain securities prior to maturity.

The valuation of our investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact its valuation include changes to credit ratings of the securities as well as to the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral value, discount rates and ongoing strength and quality of market credit and liquidity.

Although we currently have the ability and intent to hold these ARS investments until a recovery of the auction process or until maturity, if the current market conditions deteriorate further, or the anticipated recovery in market values does not occur, we may be required to record additional unrealized losses in other comprehensive income or impairment charges in future quarters.

14. If an independent manufacturer violates labor or other laws, or is accused of violating any such laws, or if their labor practices diverge from those generally accepted as ethical, it could harm our business and brand image. While we maintain a policy to monitor the operations of our independent manufacturers by having an independent firm inspect these manufacturing sites, and all manufacturers are contractually required to comply with such labor practices, we cannot control the actions or the public's perceptions of such manufacturers, nor can we assure that these manufacturers will conduct their businesses using ethical or legal labor practices. Apparel companies can be held jointly liable for the wrongdoings of the manufacturers of their products. While we do not control their employees' employment conditions or the manufacturers' business practices, and the manufacturers act in their own interest, they may act in a manner that result in negative public perceptions of us and/or employee allegations or court determinations that we are jointly liable.

RISKS RELATING TO OUR COMMON STOCK:

1. Our stock price may fluctuate because of the relatively low number of shares that can be publicly traded. The vast majority of our outstanding shares of our common stock are subject to trading restrictions. As of April 5, 2008, of the approximately 89,000,000 shares of our common stock then outstanding, approximately 27,000,000 shares were available to be publicly traded, and as a result, our stock price is vulnerable to market swings due to large purchases, sales and short sales of our common stock.

2. Because Manny Mashouf beneficially owns a substantial portion of the outstanding shares, other shareholders may not be able to influence the direction the company takes. As of April 30, 2008, Manny Mashouf, the Chairman of the Board, beneficially owned approximately 56% of the outstanding shares of our common stock. As a result, he can control the election of directors and the outcome of all issues submitted to the shareholders. This may make it more difficult for a third party

to acquire shares, may discourage acquisition bids, and could limit the price that certain investors might be willing to pay for shares of common stock. This concentration of stock ownership may have the effect of delaying, deferring or preventing a change in control of our company.

3. Our significant shareholders hold a substantial portion of our stock which may result in the trading volatility or may adversely affect our common stock. As of April 30, 2008, Ms. Neda Mashouf currently owned approximately 13% of the outstanding shares of our common stock. As a result, any change in ownership of a significant portion of these shares, including sales by Ms. Mashouf, may result in trading volatility in our common stock or may adversely affect our stock price.

4. Our sales, margins and operating results are subject to seasonal and quarterly fluctuations. Our business varies with general seasonal trends that are characteristic of the retail and apparel industries, such as the timing of seasonal wholesale shipments and other events affecting retail sales. As a result, our stores typically generate a higher percentage of our annual net sales and profitability in the second quarter of our fiscal year, which includes the holiday selling season, compared to other quarters.

In addition, our comparable store sales have fluctuated significantly in the past, and we expect that they will continue to fluctuate in the future. A variety of factors affect comparable store sales, including fashion trends, competition, current economic conditions, the timing of release of new merchandise and promotional events, changes in our merchandise mix, the success of marketing programs and weather conditions. Our ability to deliver strong comparable store sales results and margins depends in large part on accurately forecasting demand and fashion trends, selecting effective marketing techniques, providing an appropriate mix of merchandise for our customer base, managing inventory effectively, and optimizing store performance by closing underperforming stores. Such fluctuations may adversely affect the market price of our common stock.

5. Failure to comply with Section 404 of the Sarbanes-Oxley Act of 2002 could negatively impact investor confidence. In order to meet the requirements of the Sarbanes-Oxley Act of 2002 in future periods, we must continuously document, test, monitor and enhance our internal control over financial reporting. We cannot assure you that the periodic evaluation of our internal controls required by Section 404 of the Sarbanes-Oxley Act will not result in the identification of significant control deficiencies and/or material weaknesses or that our auditors will be able to attest to the effectiveness of our internal control over financial reporting.

Failure to maintain the effectiveness of our internal control over financial reporting or to comply with the requirements of this Act could have a material adverse effect on our reputation, financial condition and market price of our common stock.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

ITEM 5. OTHER INFORMATION

Not applicable.

ITEM 6. EXHIBITS

(a) Exhibits. The following is a list of exhibits filed as part of this Report on Form 10-Q.

Exhibit	Description
31.1	Section 302 Certification of Chief Executive Officer.
31.2	Section 302 Certification of Chief Financial Officer.
32.1	Section 906 Certification of Chief Executive Officer.
32.2	Section 906 Certification of Chief Financial Officer.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
