#### NOTE 1 Disclosure of Fair Value Measurements

The Company classifies its assets based on three valuation methodologies. Level 1 investment securities are valued based on quoted market prices in active markets for identical assets. Level 2 investment securities are valued based on significant observable market inputs, such as quoted prices for similar assets and quoted prices in inactive markets or other market observable inputs. Level 3 investment securities are valued using significant unobservable inputs that reflect the Fund's determination of assumptions that market participants might reasonably use in valuing the assets. The valuation levels are not necessarily an indication of the risk associated with investing in those securities. The following table presents the valuation levels of the Fund's investments as of September 30, 2009:

Investments	Level 1	Level 2	Level 3	Total
