Announcement | Lisbon | 4 June 2012

Meo achieves leadership in the triple-play market

Portugal Telecom SGPS, S.A. (PT) announces that Meo, its pay-TV service, achieved leadership in the triple-play market (customers that subscribe to fixed voice, fixed broadband and pay-TV through a single operator) in less than four years after having launched its service on a nationwide basis in April 2008. At the end of 1Q12, PT registered 728 thousand triple-play customers, which represented 66% of the Meo customer base. In 1Q12, PT's triple-play customers increased by 32.0% y.o.y, having registered 49 thousand net adds in the quarter. At the end of 1Q12, the second operator had 716 thousand triple-play customers.

After having launched on a nationwide basis its pay-TV operation, in April 2008, which at the time had only 21 thousand customers, PT has been gaining market share at an average rate of 0.8pp per month, having already reached 26.7% share of the pay-TV market according to the numbers disclosed by the operators. This solid growth underpins PT's innovation ability in the rollout of Meo, which is anchored in (1) a disruptive, non-linear and interactive experience providing access to live TV channels, personal video recording (PVR), catch-up TV, video on demand, and to games and music on demand, and (2) a differentiating content proposition, with over 150 channels, including channels with exclusive content, high definition and 3D content, more than three thousand movies available in Meo video club, and interactivity over anchor programs. Meo also offers advanced interactive applications, including Meo Kanal, an innovative service that aims at bringing the social network experience to the TV, thus creating a networking effect in a pay-TV service. With the launch of Meo Go, Meo offers access to 50 live TV channels and to the Meo video club through personal computers, tablets and smartphones using the Android, iOS and Windows mobile operating systems through the mobile networks (3G and 4G) and WiFi networks.

Meo's success is also built upon PT's investment in new technologies, including (1) fibre to the home (FTTH), which already covers 1.6 million homes and that will continue to underpin the growth of Meo and triple-play offers, and differentiate and improve further the quality of service, while increasing customer loyalty, and (2) PT's 4G network, which allows speeds of up to 100Mbps and already covers, since the end of April 2012, having PT the objective of achieving 90% population coverage by the end of 2012.
