Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q (or the Report) contains forward-looking statements relating to, among other matters, our future financial performance and results of operations; the competitive environment in our key markets, demand for our services and industry trends; the outcome of litigation and regulatory matters; our continued access to the credit and capital markets; the pace of our network expansion and improvement, including our level of estimated future capital expenditures and our realization of the benefits of these investments; and management's plans and strategy for the future. These forward-looking statements are based on estimates, projections, beliefs, and assumptions and are not guarantees of future events or results. Actual future events and results could differ materially from the events and results indicated in these statements as a result of many factors, including, among others, (1) the general performance of our operations, including operating margins, wholesale revenues, and the future growth and retention of our subscriber base; (2) regulatory changes affecting our businesses, including the loss of certain FCC and other telecommunications licenses; (3) economic, political and other risks facing our foreign operations; (4) our ability to maintain favorable roaming arrangements; (5) our ability to efficiently and cost-effectively upgrade our networks and IT platforms to address rapid and significant technological changes in the telecommunications industry; (6) the loss of or our inability to recruit skilled personnel in our various jurisdictions, including key members of management; (7) our ability to find investment or acquisition or disposition opportunities that fit our strategic goals for the Company; (8) increased competition; (9) our reliance on a limited number of key suppliers and vendors for timely supply of equipment and services relating to our network infrastructure; (10) the adequacy and expansion capabilities of our network capacity and customer service system to support our customer growth; (11) the occurrence of severe weather and natural catastrophes; (12) our continued access to capital and credit markets; and (13) our ability to realize the value that we believe exists in our businesses. These and other additional factors that may cause actual future events and results to differ materially from the events and results indicated in the forwardlooking statements above are set forth more fully under Item 1A Risk Factors of the Company's Annual Report on Form 10-K for the year ended December 31, 2013, filed with the SEC on March 17, 2014 and the other reports we file from time to time with the SEC. The Company undertakes no obligation to update these forward-looking statements to reflect actual results, changes in assumptions or changes in other factors that may affect such forward-looking statements.

In this Report, the words the Company , we, our, ours, us and ATN refer to Atlantic Tele-Network, Inc. and its subsidiaries. This Report contains trademarks, service marks and trade names that are the property of, or licensed by, ATN, and its subsidiaries.

Reference to dollars (\$) refer to U.S. dollars unless otherwise specifically indicated.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND BUSINESS OPERATIONS

The Company is a telecommunications holdings company that, through its operating subsidiaries, provides wireless and wireless telecommunications services in North America, Bermuda and the Caribbean. The Company is actively evaluating strategic acquisitions and investment opportunities, both domestic and international, that meet its return-on-investment and other acquisition criteria.

The Company offers the following principal services:

- **Wireless.** In the United States, the Company offers wholesale wireless voice and data roaming services to national, regional, local and selected international wireless carriers in rural markets located principally in the Southwest and Midwest. The Company also offers wireless voice and data services to retail customers in Bermuda, Guyana, the Caribbean and smaller markets in the United States.
- **Wireline.** The Company's local telephone and data services include its operations in Guyana and the mainland United States. The Company is the exclusive licensed provider of domestic wireline local and long-distance telephone services in Guyana and international voice and data communications into and out of Guyana. The Company also offers facilities-based integrated voice and data communications services to enterprise and residential customers in New England, primarily in Vermont, and wholesale transport services in Vermont and New York State. In addition, the Company offers wholesale long-distance voice services to telecommunications carriers.

The following chart summarizes the operating activities of the Company's principal subsidiaries, the segments in which the Company reports its revenue and the markets it served as of March 31, 2014:

Services	Segment	Markets	Tradenames
Wireless	U.S. Wireless	United States (rural markets)	Commnet, Choice
	Island Wireless	Aruba, Bermuda, Turks and Caicos, U.S. Virgin Islands	Mio, CellOne, Islandcom, Choice
	International Integrated Telephony	Guyana	Cellink
Wireline	International Integrated Telephony	Guyana	GT&T, eMagine
	U.S. Wireline	United States (New England and New York State)	Sovernet, ION, EssexTel

The Company provides management, technical, financial, regulatory, and marketing services to its subsidiaries and typically receives a management fee equal to a percentage of their respective revenue. Management fees from subsidiaries are eliminated in consolidation. For information about the Company's business segments and geographical information about its revenue, operating income and long-lived assets, see

Note 11 to the Condensed Consolidated Financial Statements.

2. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). The financial information included herein is unaudited; however, the Company believes such information and the disclosures herein are adequate to make the information presented not misleading and reflect all adjustments (consisting only of normal recurring adjustments) that are necessary for a fair statement of the Company's financial position and results of operations for such periods. The year-end condensed balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. Results of interim periods may not be indicative of results for the full year. These condensed consolidated financial statements and related notes should be read in conjunction with the Company's 2013 Annual Report on Form 10-K.

See Note 4 for information regarding the Company's sale of its U.S. retail wireless business operated under the Alltel name. The assets, liabilities and operations of the Alltel business have been classified as discontinued for all periods presented. Unless indicated otherwise, the information in the notes to the Condensed Consolidated Financial Statements refer to our continuing operations.

Table of Contents

Consolidation

The consolidated financial statements include the accounts of the Company, its majority-owned subsidiaries and certain entities, which are consolidated in accordance with the provisions of the Financial Accounting Standards Board's (FASB) authoritative guidance on the consolidation of variable interest entities since it is determined that the Company is the primary beneficiary of these entities.

During the three months ended March 31, 2014, the Company recognized approximately \$0.7 million in general and administrative expenses to correct for an understatement of transactional tax liabilities generated in periods during 2013. The Company determined that the impact of the correction of this error was not material to the current or any prior period financial statements.

The Company's effective tax rate declined in 2014 as the result of increased income in lower taxed jurisdictions, such as Bermuda, as compared to 2013. The Company's effective tax rate in 2013 was higher than the statutory federal income tax rate of 35% (plus applicable statutory state income tax rates) due primarily to (i) the portion of our earnings that are taxed in Guyana at 45%, and (ii) a portion of the Company's earnings that include losses generated in foreign jurisdictions for which we receive no tax benefit since these are non-tax jurisdictions. The Company's effective tax rates for the three months ended March 31, 2013 and 2014 were 40.1% and 34.8%, respectively.

Recent Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. ASU 2014-08 provides guidance on determining when disposals can be presented as discontinued operations. ASU 2014-08 requires that only disposals representing a strategic shift in operations should be presented as discontinued operations. A strategic shift may include a disposal of a major line of business, major equity method investment or a major part of an entity. Additionally, ASU 2014-08 requires expanded disclosures regarding discontinued operations. This standard is effective prospectively for reporting periods beginning after December 15, 2014. The adoption of this amendment is not expected to have a material impact on the Company's consolidated financial statements.

In March 2013, the FASB issued ASU 2013-05, Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity. ASU 2013-05 provides clarification regarding whether ASC 810-10, Consolidation Overall or ASC 830-30, Foreign Currency Matters Translation of Financial Statements, applies to the release of cumulative translation adjustments into net income when a reporting entity either sells a part or all of its investment in a foreign entity or ceases to have a controlling financial interest in a subsidiary or group of assets that constitute a business within a foreign entity. The revised standard is effective for reporting periods beginning after December 15, 2013. The adoption of this amendment did not have a material impact on the Company's consolidated financial statements.

In July 2013, the FASB issued Accounting Standards Update No. 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (a consensus of the Emerging Issues Task Force), which states that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. If a company does not have: (i) a net operating loss carryforward; (ii) a similar tax loss; or (iii) a tax credit carryforward is not available at the

reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the entity does not intend to use the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The authoritative guidance is effective for fiscal years and the interim periods within those fiscal years beginning on or after December 15, 2013 and was applied on a prospective basis. The adoption of this authoritative guidance did not have a material impact on the Company's consolidated financial statements.

3. USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting periods. The most significant estimates relate to the allowance for doubtful accounts, useful lives of the Company's fixed

Table of Contents

and finite-lived intangible assets, allocation of purchase price to assets acquired and liabilities assumed in purchase business combinations, fair value of indefinite-lived intangible assets, goodwill and income taxes. Actual results could differ significantly from those estimates.

4. DISCONTINUED OPERATIONS SALE OF U.S. RETAIL WIRELESS BUSINESS

On September 20, 2013, the Federal Communications Commission announced its approval of the previously announced proposed sale of the Company's U.S. retail wireless business operated under the Alltel name to AT&T Mobility for approximately \$780.0 million in cash plus \$16.8 million in working capital adjustments. The Company previously reported the operations of this business within its U.S. Wireless segment. As a result of that approval, the Company completed the sale of certain U.S. retail wireless assets on that date.

The \$796.8 million in cash proceeds included \$78.0 million of cash to be held in a general indemnity escrow account. Subject to the terms and conditions of the purchase agreement between AT&T Mobility and the Company governing the sale, the restrictions on \$19.5 million of these funds expired March 2014. The remaining \$58.5 million has been recorded as restricted cash on the Company's March 31, 2014 balance sheet and classified as a current asset since \$19.5 million and \$39.0 million will be released, subject to any indemnity claims, to the Company in September 2014 and March 2015, respectively.

As of March 31, 2014, the Company has also recorded \$10.2 million for the minority shareholders' interests in the sold operation which is based on the estimated final distributions to the minority shareholders and is included in non-controlling interests on its balance sheet.

The Company has reclassified the assets of its Alltel operations, consisting of prepaid expenses and other current assets, and liabilities of its Alltel operations, consisting of accounts payable and other current liabilities, to assets of discontinued operations and liabilities of discontinued operations, respectively, within its December 31, 2013 and March 31, 2014 balance sheets.

Revenues and income from discontinued operations related to the Alltel business for the three months ended March 31, 2013 and 2014 were as follows (in thousands):

	Three Months Ended March 31,	
	2013	2014
Revenue from discontinued operations	\$ 108,037	\$
Income from discontinued operations, net of tax expense of \$2,417	4,034	

5. FAIR VALUE MEASUREMENTS

Edgar Filing: ATLANTIC TELE NETWORK INC /DE - Form 10-Q

In accordance with the provisions of fair value accounting, a fair value measurement assumes that a transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability and defines fair value based upon an exit price model.

The fair value measurement guidance establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The guidance describes three levels of inputs that may be used to measure fair value:

Table of Contents

- Level 1 Quoted prices in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset and liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 assets and liabilities include money market funds, debt and equity securities and derivative contracts that are traded in an active exchange market.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes corporate obligations and non-exchange traded derivative contracts.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments and intangible assets that have been impaired whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Assets and liabilities of the Company measured at fair value on a recurring basis as of December 31, 2013 and March 31, 2014 are summarized as follows (in thousands):

Description	Quoted Prices in Active Markets (Level 1)	December 31, 2013 Significant Other Observable Inputs (Level 2)	Total
Certificates of deposit	\$ 363	\$ 363	\$ 363
Money market funds	\$ 2,244	\$ -	\$ 2,244
Total assets measured at fair value	\$ 2,244	\$ 363	\$ 2,607

Certificate of deposit	\$ 363	\$ 363	\$ 363
Money market funds	\$ 2,538	\$ -	\$ 2,538
Total assets measured at fair value	\$ 2,538	\$ 363	\$ 2,901

Certificate of Deposit

As of December 31, 2013 and March 31, 2014, this asset class consisted of a time deposit at a financial institution denominated in U.S. dollars. The asset class is classified within Level 2 of the fair value hierarchy because the fair value was based on observable market data.

Money Market Funds

Edgar Filing: ATLANTIC TELE NETWORK INC /DE - Form 10-Q

As of December 31, 2013 and March 31, 2014, this asset class consisted of a money market portfolio that comprises Federal government and U.S. Treasury securities. The asset class is classified within Level 1 of the fair value hierarchy because its underlying investments are valued using quoted market prices in active markets for identical assets.

Table of Contents

6. LONG-TERM DEBT

The Company has a credit facility (the "Credit Facility") which previously included two term loans and currently provides for a revolver loan of up to \$100.0 million. The revolver loan also has a \$10.0 million swingline sub-facility and a \$55.0 million letter of credit sub-facility for issuance in connection with the Company's Mobility Fund Grant obligations (see Note 8).

On September 20, 2013 the Company repaid its outstanding term loans in full. Amounts borrowed under the term loans bore interest at a rate equal to, at the Company's option, either (i) at the London Interbank Offered Rate (LIBOR) plus an applicable margin ranging between 2.00% to 4.00% or (ii) a base rate plus an applicable margin ranging from 1.00% to 3.00%. The base rate was equal to the higher of (i) 1.50% plus the higher of (x) the one-week LIBOR and (y) the one-month LIBOR; or (ii) the prime rate (as defined in the Credit Facility). The applicable margin was determined based on the ratio of our indebtedness (as defined in the Credit Facility) to our EBITDA (as defined in the Credit Facility).

Amounts borrowed under the revolver loan bear interest at a rate equal to, at our option, either (i) LIBOR plus an applicable margin ranging between 2.00% to 3.50% or (ii) a base rate plus an applicable margin ranging from 1.00% to 2.50% (or, in the case of amounts borrowed under the swing-line sub-facility, an applicable margin ranging from 0.50% to 2.00%.) We must also pay a fee ranging from 0.25% to 0.50% of the average daily unused portion of the revolver loan over each calendar quarter, which fee is payable in arrears on the last day of each calendar quarter.

The Credit Facility contains customary representations, warranties and covenants, including covenants by the Company limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, the Credit Facility contains financial covenants by the Company that (i) impose a maximum leverage ratio of indebtedness to EBITDA, (ii) require a minimum debt service ratio of EBITDA to principal, interest and taxes payments and (iii) require a minimum ratio of equity to consolidated assets. As of March 31, 2014, we were in compliance with all of the financial covenants of the Credit Facility.

Note Payable Other

In connection with the CellOne Merger with M3 Wireless, Ltd., the Company assumed a term loan of approximately \$7.0 million owed to Keytech Ltd., the former parent company of M3 and current 42% minority shareholder in the Company's Bermuda operations. This term loan, which bore interest at 7% per annum, was repaid in full in July 2013.

7. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company's objective in using interest rate derivatives was to add stability to interest expense and to manage its exposure to the interest rate movements of its variable-rate debt. To accomplish this objective, the Company primarily used interest rate derivatives as part of its interest rate risk management strategy. Interest rate derivatives designated as cash flow hedges involved the receipt of variable-rate amounts from a

counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

The effective portion of changes in the fair value of interest rate derivatives designated and that qualified as cash flow hedges was recorded in accumulated other comprehensive income and was subsequently reclassified into earnings in the period that the hedged forecasted transaction affected earnings.

Amounts previously reported in accumulated other comprehensive income related to the interest rate derivatives were reclassified to Unrealized loss on interest rate derivative contracts as of the date of the prepayment of the Company's outstanding term notes.

The table below presents the effect of the Company's derivative financial instruments on the consolidated income statements for the three months ended March 31, 2013 and 2014 (in thousands):

Table of Contents

Three Months Ended March 31,	Derivative in Cash Flow Hedging Relationships	Amount of Gain or (Loss) Recognized in Other Comprehensive Income on Derivative (Effective Portion)	Location of Gain or (Loss) Reclassified from Accumulated Other Comprehensive Income into Income (Effective Portion)	Amount of Gain or (Loss) Reclassified from Accumulated Other Comprehensive Income into Income (Effective Portion)
2013	Interest Rate Swap	\$ (1,068)	Interest expense	\$ 1,033
2014	Interest Rate Swap	\$	Interest expense	\$

8. GOVERNMENT GRANTS

The Company has received funding from the U.S. Government and its agencies under Stimulus and Universal Services Fund programs. These are generally designed to fund telecommunications infrastructure expansion into rural or underserved areas of the United States. The fund programs are evaluated to determine if they represent funding related to capital expenditures (capital grants) or operating activities (income grants).

Stimulus Grants

The Company was awarded several federal stimulus grants in 2009 and 2010 by the U.S. Government under provisions of the American Recovery and Reinvestment Act of 2009 intended to stimulate the deployment of broadband infrastructure and services to rural, unserved and underserved areas. As of March 31, 2014, the Company has spent (i) \$35.7 million in capital expenditures (of which \$27.5 million has been funded by the federal stimulus grant) in connection with the Company's build of ten new segments of fiber-optic, middle-mile broadband infrastructure in upstate New York and parts of Pennsylvania and Vermont; (ii) \$7.6 million in capital expenditures (of which \$5.3 million has been funded by the federal stimulus grant) in connection with the Company's last-mile broadband infrastructure buildout in the Navajo Nation across Arizona, New Mexico and Utah; and (iii) \$44.8 million in capital expenditures (of which \$31.4 million has been or will be funded by the federal stimulus grant) in connection with the Company's fiber-optic middle mile network buildout to provide broadband and transport services to over 340 community anchor institutions in Vermont. The results of the Company's New York and Vermont stimulus projects are included in the Company's U.S. Wireline segment and the results of the Company's Navajo stimulus project are included in the Company's U.S. Wireless segment. The New York and Navajo Stimulus projects were completed during 2013. The Vermont stimulus project will be completed during the latter half of 2014 and the Company anticipates that it will incur an additional \$3.0 million of capital expenditures of which \$2.1 million is expected to be funded by the federal stimulus grants.

Mobility Fund Grants

As part of the Federal Communications Commission's (FCC) reform of its Universal Service Fund (USF) program, which previously provided support to carriers seeking to offer telecommunications services in high-cost areas and to low-income households, the FCC created two new funds, including the Mobility Fund, a one-time award meant to support wireless coverage in underserved geographic areas in the United States. In August 2013, the Company received FCC final approval for approximately \$21.7 million of Mobility Fund support to its wholesale wireless business (the Mobility Funds) to expand voice and broadband networks in certain geographic areas in order to offer either 3G or 4G coverage. As part of the receipt of the Mobility Funds, the Company committed to comply with certain additional FCC construction and other requirements. A portion of these funds will be used to offset network capital costs and a portion is used to offset the costs of supporting the networks for a period of five years. In connection with the Company's application for the Mobility Funds, the Company has posted

Edgar Filing: ATLANTIC TELE NETWORK INC /DE - Form 10-Q

approximately \$9.9 million in letters of credit to the Universal Service Administrative Company (USAC) to secure these obligations. If the Company fails to comply with any of the terms and conditions upon which the Mobility Funds were granted, or if it loses eligibility for the Mobility Funds, USAC will be entitled to draw the entire amount of the letter of credit applicable to the affected project plus penalties and may disqualify the Company from the receipt of additional Mobility Fund support. As of March 31, 2014, all of the letters of credit remain outstanding. and no amounts have been drawn thereon

The Company began the construction of its Mobility Funds projects during the third quarter of 2013 and its results are included in the Company's U.S. Wireless segment. As of March 31, 2014, the Company has received approximately \$7.3 million in Mobility Funds. Of these funds, \$1.0 million was recorded as an offset to the cost of the property, plant, and equipment associated with these projects and, consequentially, a reduction of future depreciation expense and \$6.3 million was recorded as a liability to reduce future operating expenses.. The balance sheet presentation is based on the timing of the expected recognition of the funds and

Table of Contents

accordingly, \$2.5 million is recorded within other current liabilities while the remaining \$3.8 million is recorded within other long-term liabilities.

9. EQUITY

Stockholders' equity was as follows (in thousands):

	Three Months Ended March 31,					
	Atlantic Tele- Network, Inc.	2013 Non-Controlling Interests	Total Equity	Atlantic Tele- Network, Inc.	2014 Non-Controlling Interests	Total Equity
Equity, beginning of period	\$ 334,146	\$ 60,094	\$ 394,240	\$ 643,330	\$ 56,525	\$ 699,855
Stock-based compensation	844		844	1,058		1,058
Comprehensive income:						
Net income	8,776	1,142	9,918	7,841	2,560	10,401
Other comprehensive income-Gain on interest rate swap (net of tax)	641		641			
Total comprehensive income	9,417	1,142	10,559	7,841	2,560	10,401
Issuance of common stock upon exercise of stock options	2,667		2,667	930		930
Dividends declared on common stock	(3,933)		(3,933)	(4,305)		(4,305)
Distributions to non-controlling interests		(1,469)	(1,469)		(1,482)	(1,482)
Investments made by minority shareholders		60	60			
Purchase of treasury stock	(3,272)		(3,272)	(1,756)		(1,756)
Equity, end of period	\$ 339,869	\$ 59,827	\$ 399,696	\$ 647,098	\$ 57,603	\$ 704,701

10. NET INCOME PER SHARE

For the three months ended March 31, 2013 and 2014, outstanding stock options were the only potentially dilutive securities. The reconciliation from basic to diluted weighted average common shares outstanding is as follows (in thousands):

Table of Contents

	Three Months Ended March 31,	
	2013	2014
Basic weighted-average common shares outstanding	15,588	15,830
Stock options	107	120
Diluted weighted-average common shares outstanding	15,695	15,950

The above calculation for the three months ended March 31, 2013 does not include 240,000 shares related to certain stock options because the effects of such were anti-dilutive. There were no anti-dilutive securities for the three months ended March 31, 2014.

11. SEGMENT REPORTING

The Company has four reportable segments for separate disclosure in accordance with the FASB's authoritative guidance on disclosures about segments of an enterprise. Those four segments are: i) U.S. Wireless, which generates all of its revenues in and has all of its assets located in the United States, ii) International Integrated Telephony, which generates all of its revenues in and has all of its assets located in Guyana, iii) Island Wireless, which generates a majority of its revenues in, and has a majority of its assets located in, Bermuda and which also generates revenues in and has assets located in the U.S. Virgin Islands, Aruba and Turks and Caicos and iv) U.S. Wireline, which generates all of its revenues in and has all of its assets located in the United States. The operating segments are managed separately because each offers different services and serves different markets.

The following tables provide information for each operating segment (in thousands):

For the Three Months Ended March 31, 2013						
	U.S. Wireless	International Integrated Telephony	Island Wireless	U.S. Wireline	Reconciling Items	Consolidated

12. COMMITMENTS AND CONTINGENCIES*Regulatory and Litigation Matters*

The Company and its subsidiaries are subject to certain regulatory and legal proceedings and other claims arising in the ordinary course of business, some of which involve claims for damages and taxes that are substantial in amount. The Company believes that, except for the items discussed below and in our Annual Report on Form 10-K for the year ended December 31, 2013, for which the Company is currently unable to predict the final outcome, the disposition of proceedings currently pending will not have a material adverse effect on the Company's financial position or results of operations.

On May 8, 2009, Digicel filed a lawsuit in Guyana challenging the legality of GT&T's exclusive license rights under Guyana's constitution. Digicel initially filed this lawsuit against the Attorney General of Guyana in the High Court. On May 13, 2009, GT&T petitioned to intervene in the suit in order to oppose Digicel's claims and that petition was granted on May 18, 2009. GT&T filed an answer to the charge on June 22, 2009 and the case is pending. The Company believes that any legal challenge to GT&T's exclusive license rights granted in 1990 is without merit and the Company is vigorously defending against the legal challenge.

Edgar Filing: ATLANTIC TELE NETWORK INC /DE - Form 10-Q

In Bermuda, the Regulatory Authority continued its implementation of the Electronic Communications Act of 2011, which allows communications service providers to enter new lines of business and introduces competition in the sector. As the government of Bermuda continues to reform the local telecommunications market it is possible that new or amended regulations may establish regulatory and other fees that could increase our regulatory costs. We cannot predict when or if these proposals will be adopted, or, if adopted, the impact that their implementation will have on our Island Wireless Segment.

The term of the Company's telecommunications license to operate in Aruba expired on January 15, 2014. The government of Aruba informed the Company earlier in January 2014 that a renewed license would be issued only upon payment by the Company of a fee in the amount of approximately \$4.0 million. In addition, the government of Aruba demanded that the Company pay overdue spectrum invoices in the amount of approximately \$1.0 million no later than May 1, 2014. While the Company has contested the assessment of these fees, it is continuing to operate and is actively seeking to reach a resolution with the Aruba government with respect to the fees, if any, to be paid in relation to a renewed license and the assessed spectrum fees.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The discussion and analysis of our financial condition and results of operations that follows are based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of our financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ significantly from these estimates under different assumptions or conditions. This discussion should be read in conjunction with our condensed consolidated financial statements herein and the accompanying notes thereto, and our Annual Report on Form 10-K for the year ended December 31, 2013, in particular, the information set forth therein under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

We are a telecommunications holdings company that, through our operating subsidiaries, provides wireless and wireless telecommunications services in North America, Bermuda and the Caribbean. We are actively evaluating strategic acquisitions and investment opportunities, both domestic and international, that meet our return-on-investment and other acquisition criteria. For a discussion of our investment strategy and risks involved, see *Risk Factors* *We are actively evaluating strategic investment and acquisition opportunities, which may affect our long-term growth prospects* in our Form 10-K for the year ended December 31, 2013

We offer the following principal services:

- **Wireless.** In the United States, we offer wholesale wireless voice and data roaming services to national, regional, local and selected international wireless carriers in rural markets located principally in the Southwest and Midwest. We also offer wireless voice and data services to retail customers in Bermuda, Guyana, the Caribbean and smaller markets in the United States.
- **Wireline.** Our local telephone and data services include our operations in Guyana and the mainland United States. We are the exclusive licensed provider of domestic wireline local and long-distance telephone services in Guyana and international voice and data communications into and out of Guyana. We also offer facilities-based integrated voice and data communications services to enterprise and residential customers in New England, primarily in Vermont, and wholesale transport services in Vermont and New York State. In addition, we offer wholesale long-distance voice services to telecommunications carriers.

The following chart summarizes the operating activities of our principal subsidiaries, the segments in which we report our revenue and the markets we served as of March 31, 2014:

Services	Segment	Markets	Tradenames
Wireless	U.S. Wireless	United States (rural markets)	Commnet, Choice

Edgar Filing: ATLANTIC TELE NETWORK INC /DE - Form 10-Q

	Island Wireless	Aruba, Bermuda, Turks and Caicos, U.S. Virgin Islands	Mio, CellOne, Islandcom, Choice
	International Integrated Telephony	Guyana	Cellink
Wireline	International Integrated Telephony	Guyana	GT&T, eMagine
	U.S. Wireline	United States (New England and New York State)	Sovernet, ION, Essexel

We provide management, technical, financial, regulatory, and marketing services to our subsidiaries and typically receive a management fee equal to a percentage of their respective revenue. Management fees from our subsidiaries are eliminated in consolidation.

Discontinued Operations Sale of U.S. Retail Wireless Business

On September 20, 2013, the Federal Communications Commission announced its approval of, and we completed, our previously announced proposed sale of our U.S. retail wireless business operated under the Alltel name to AT&T Mobility LLC for approximately \$796.8 million in cash that included a sale price adjustment for the working capital of the business of \$16.8 million (the Alltel Sale).

The operations of the Alltel business, which were previously included in our U.S. Wireless segment, have been classified as discontinued operations in all periods presented. Unless indicated otherwise, the information in this Management's Discussion and Analysis relates only to our continuing operations.

Table of Contents

Stimulus Grants

We were awarded several federal stimulus grants in 2009 and 2010 by the U.S. Government under provisions of the American Recovery and Reinvestment Act of 2009 intended to stimulate the deployment of broadband infrastructure and services to rural, unserved and underserved areas. As of March 31, 2014, we have spent (i) \$35.7 million in capital expenditures (of which \$27.5 million has been funded by the federal stimulus grant) in connection with our build of ten new segments of fiber-optic, middle-mile broadband infrastructure in upstate New York and parts of Pennsylvania and Vermont; (ii) \$7.6 million in capital expenditures (of which \$5.3 million has been funded by the federal stimulus grant) in connection with our last-mile broadband infrastructure buildout in the Navajo Nation across Arizona, New Mexico and Utah; and (iii) \$44.8 million in capital expenditures (of which \$31.4 million has been or will be funded by the federal stimulus grant) in connection with our fiber-optic middle mile network buildout to provide broadband and transport services to over 340 community anchor institutions in Vermont. The results of our New York and Vermont stimulus projects are included in our U.S. Wireline segment and the results of our Navajo stimulus project are included in our U.S. Wireless segment. The New York and Navajo Stimulus projects were completed during 2013. The Vermont stimulus project will be completed during the latter half of 2014 and we anticipate that it will incur an additional \$3.0 million of capital expenditures of which \$2.1 million is expected to be funded by the federal stimulus grants.

Mobility Fund Grants

As part of the Federal Communications Commission's (FCC) reform of its Universal Service Fund (USF) program, which previously provided support to carriers seeking to offer telecommunications services in high-cost areas and to low-income households, the FCC created two new funds, including the Mobility Fund, a one-time award meant to support wireless coverage in underserved geographic areas in the United States. In August 2013, we received FCC final approval for approximately \$21.7 million of Mobility Fund support to our wholesale wireless business (the Mobility Funds), to expand voice and broadband networks in certain geographic areas in order to offer either 3G or 4G coverage. As part of the receipt of the Mobility Funds, we committed to comply with certain additional FCC construction and other requirements. In connection with our application for the Mobility Funds, we posted approximately \$9.9 million in letters of credit to the Universal Service Administrative Company (USAC) to secure these obligations. If we fail to comply with any of the terms and conditions upon which the Mobility Funds were granted, or if we lose eligibility for the Mobility Funds, USAC will be entitled to draw the entire amount of the letter of credit applicable to the affected project plus penalties and may disqualify us from the receipt of additional Mobility Fund support. As of March 31, 2014, all of the letters of credit remain outstanding and no amounts have been drawn thereon.

We began the construction of our Mobility Funds projects during the fourth quarter of 2013 and its results are included in our U.S. Wireless segment. As of March 31, 2014, we have received approximately \$7.3 million in Mobility Funds. Of these funds, \$1.0 million has been recorded as an offset to the cost of the property, plant and equipment associated with these projects and, consequentially, a reduction of the future depreciation expense and \$6.3 million was recorded as a liability to reduce future operating expenses. The presentation of current versus long-term is based on the timing of the expected usage of the funds and accordingly, \$2.5 million is recorded within other current liabilities while the remaining \$3.8 million is recorded within other long-term liabilities.

U.S. wireless revenue. The substantial majority of U.S. wireless revenue consists of wholesale revenue. For the three months ended March 31, 2013 and 2014 wholesale revenue represented 97% of total U.S. wireless revenue. In addition, U.S. wireless revenue also includes a small amount of retail revenues generated by our operations in certain smaller rural markets already covered by our wholesale network in the western United States. Wholesale revenue is generated from providing mobile voice or data services to the customers of other wireless carriers, the provision of network switching services and certain transport services using our wireless networks. Wholesale wireless revenue is primarily driven by the number of sites and base stations we operate, the amount of voice and data traffic from the subscribers of other carriers that each of these sites generates, and the rates we are paid from our carrier customers for carrying that traffic.

The most significant competitive factor we face in our wholesale wireless business is the extent to which our carrier customers choose to roam on our networks or elect to build or acquire their own infrastructure in our markets, reducing or eliminating their need for our services in those markets.

Our U.S. wireless revenue increased to \$28.4 million for the three months ended March 31, 2014 from \$21.2 million for the three months ended March 31, 2013, an increase of \$7.2 million or 34%. The revenue growth was a result of capacity and technology upgrades to our network, an increase in the demand for data services and an increase in the base stations used in our wholesale operations from 567 as of March 31, 2013 to 605 as of March 31, 2014.

We expect to see continued growth in domestic data traffic in 2014, offset by an expected decline in contracted wholesale data prices. As a result, we expect revenue to increase in future periods although at a slower growth rate than what we experienced during the quarter ended March 31, 2014.

International wireless revenue. International wireless revenue includes retail and wholesale voice and data wireless revenue from our operations in Bermuda and the Caribbean, including the U.S. Virgin Islands.

International wireless revenue increased by \$1.7 million, or 8%, to \$23.1 million for the three months ended March 31, 2014, from \$21.4 million for the three months ended March 31, 2013. This increase was mainly due to subscriber growth in our Island Wireless segment as well as increased roaming revenues in Bermuda and the Caribbean. International wireless, which includes

Table of Contents

subscribers in our Island Wireless segment as well as Guyana, subscribers decreased from 335,000 subscribers as of March 31, 2014 to 323,000 subscribers as of March 31, 2013 of which 88% were prepaid subscribers.

While we have experienced subscriber growth in a number of our international markets, competition remains strong, and the high proportion of prepaid subscribers means that subscribers and revenue could shift relatively quickly in future periods. Additionally, wholesale revenues in these markets are subject to seasonality and can fluctuate between quarters.

Wireline revenue. Wireline revenue is generated by our wireline operations in Guyana, including international telephone calls into and out of that country, our integrated voice and data operations in New England, our wholesale transport operations in New York State and our wholesale long-distance voice services to telecommunications carriers. This revenue includes basic service fees, measured service revenue, and internet access fees, as well as installation charges for new lines, monthly line rental charges, long- distance or toll charges, and maintenance and equipment sales.

Wireline revenue increased by \$0.9 million, or 4%, to \$21.5 million for the three months ended March 31, 2014, from \$20.6 million during the three months ended March 31, 2013. Revenues from our domestic wireline businesses increased by \$1.9 million. This increase, however, was partially offset by a \$1.0 million decline in local landline revenue and international calls into Guyana.

We anticipate that wireline revenue from our international long-distance business in Guyana will be negatively impacted, principally through the loss of market share, should we cease to be the exclusive provider of domestic fixed and international long-distance service in Guyana, whether by reason of the Government of Guyana enacting legislation to such effect or a modification, revocation or lack of enforcement of our exclusive rights. While the loss of our exclusive rights will likely cause an immediate reduction in our wireline revenue, over the longer term such declines may be offset by increased revenue from data services to consumers and enterprises in Guyana, an increase in regulated local calling rates in Guyana, and increased wholesale transport services and large enterprise and agency sales in the United States.

We currently cannot predict when or if the Government of Guyana will enact such legislation or take, or fail to take, any action that would otherwise affect our exclusive rights in Guyana. See Business Guyana Regulation .

Equipment and other revenue. Equipment and other revenue represent revenue from wireless equipment sales, primarily handsets to retail customers, and other miscellaneous revenue items.

Equipment and other revenue increased by \$0.5 million, or 29% to \$2.1 million for the three months ended March 31, 2014, from \$1.6 million for the three months ended March 31, 2013. Equipment revenue primarily increased as the result of an increase in subscribers in our Island Wireless segment.

We believe that equipment and other revenue could continue to increase as a result of gross subscriber additions, more aggressive subsidies driving demand for devices and the continued growth in smartphone penetration.

Termination and access fee expenses. Termination and access fee expenses are charges that we pay for voice and data transport circuits (in particular, the circuits between our wireless sites and our switches), internet capacity and other access fees we pay to terminate our calls, as well as customer bad debt expense.

Termination and access fees increased by \$2.8 million, or 21%, from \$13.1 million for the three months ended March 31, 2013 to \$15.9 million for the three months ended March 31, 2014. This increase in our termination and access fees was incurred across all of our segments. Our U.S. Wireless segment reported an increase of \$1.5 million in these costs as the result of us expanding and upgrading our networks and increased data traffic volumes. Increased traffic volumes and roaming costs in our Island Wireless segment resulted in a \$0.3 million increase in termination and access fee. The remaining increase was experienced in our U.S. Wireline segment as a result of increased volumes.

Termination and access fees are expected to increase in future periods with expected growth in volume but remain fairly proportionate to their related revenue as our networks expand.

Engineering and operations expenses. Engineering and operations expenses include the expenses associated with developing, operating and supporting our expanding networks, including the salaries and benefits paid to employees directly involved in the development and operation of our networks.

Engineering and operations expenses decreased by \$0.1 million from \$9.7 million to \$9.6 million for the three months ended March 31, 2013 and 2014, respectively. The decrease in engineering and operations was predominantly caused by a decrease of \$0.4

Table of Contents

million in our Island Wireless segment due to the continuing realization of operational synergies, particularly in Bermuda. This decrease was partially offset by an increase in our other segments as a result of the expansion and upgrades to our networks.

We expect that engineering and operations expenses will increase over time due to an expected increase in our network capacity and geographic expansion of our networks, both of which will require additional support.

Sales and marketing expenses. Sales and marketing expenses include salaries and benefits we pay to sales personnel, customer service expenses, sales commissions and the costs associated with the development and implementation of our promotion and marketing campaigns.

Sales and marketing expenses increased by \$0.5 million, or 11%, from \$4.5 million for the three months ended March 31, 2013 to \$5.0 million for the three months ended March 31, 2014. Sales and marketing expenses increased \$0.3 million in our U.S. Wireless segment's retail operations and an increase of \$0.2 million in our U.S. Wireline segment wholesale transport services in New York State.

We expect that sales, marketing and customer service expenses will remain fairly consistent as a percentage of revenues in future periods.

Equipment expenses. Equipment expenses include the costs of our handset and customer resale equipment in our retail wireless businesses.

Equipment expenses remained consistent at \$2.7 million for the three months ended March 31, 2013 and 2014, respectively.

We believe that equipment expenses could continue to rise, from time to time, as we may choose to raise device subsidies to attract and retain customers.

General and administrative expenses. General and administrative expenses include salaries, benefits and related costs for general corporate functions including executive management, finance and administration, legal and regulatory, facilities, information technology and human resources. General and administrative expenses also include internal costs associated with our performance of due-diligence on our pending or completed acquisitions.

General and administrative expenses increased by \$1.8 million, or 15% from \$11.9 million for the three months ended March 31, 2013 to \$13.7 million for the three months ended March 31, 2014 as a result of an increase in overhead costs within all of our operating segments as well as the parent company in order to support out increased revenues.

We expect that these general and administrative expenses will remain fairly consistent as a percentage of revenues in future periods.

Transaction related charges. Transaction related charges include the external costs, such as legal, tax and accounting, and consulting fees directly associated with acquisition and disposition-related activities, which are expensed as incurred. Transaction related charges do not include internal costs, such as employee salary and travel-related expenses, incurred in connection with acquisitions or dispositions or any integration-related costs.

We incurred nominal transaction related charges for the three months ended March 31, 2013 and 2014 respectively.

We expect that acquisition and disposition related expenses will continue to be incurred from time to time as we continue to explore additional acquisition or disposition opportunities.

Depreciation and amortization expenses. Depreciation and amortization expenses represent the depreciation and amortization charges we record on our property and equipment and on certain intangible assets.

Depreciation and amortization expenses remained consistent at \$12.0 million for the three months ended March 31, 2013 and 2014 respectively. Increases in depreciation expense in a majority of our operating segments and corporate overhead were offset by a decrease in our U.S. Wireless segment of \$0.3 million a result of the sale of certain network assets.

We expect depreciation expense to increase as a result of ongoing network investments in our businesses.

Table of Contents

Gain on disposition of long-lived assets. During the three months ended March 31, 2013, we sold certain network assets and telecommunications licenses in our U.S. Wireless segment for proceeds of \$1.5 million and recognized a gain on such disposition of \$1.1 million.

Interest income (expense), net. Interest income (expense), net represents commitment fees and interest incurred on our outstanding credit facilities, including our interest rate derivatives, net of interest income.

Interest income (expense), net decreased \$2.1 million from \$2.3 million of expense to \$0.2 million of expense for the three months ended March 31, 2013 and 2014, respectively. The decrease was primarily the result of the repayment of our long-term debt on September 20, 2013 and the termination of our interest rate derivative contracts.

Other income (expense), net. Other income (expense), net represents miscellaneous non-operational income we earned or expenses we incurred. Other income (expense), net was nominal for the three months ended March 31, 2013 and 2014 respectively,

Income taxes. Our effective tax rates for the three months ended March 31, 2013 and 2014 were 40.1% and 34.8%, respectively. Our effective tax rate declined in 2014 as the result of increased income in lower taxed jurisdictions, such as Bermuda, as compared to 2013. Our effective tax rate in 2013 was higher than the statutory federal income tax rate of 35% (plus applicable statutory state income tax rates) due primarily to (i) the portion of our earnings that are taxed in Guyana at 45%, and (ii) a portion of our earnings that include losses generated in foreign jurisdictions for which we receive no tax benefit since these are non-tax jurisdictions. Our consolidated tax rate will continue to be impacted by the mix of income generated among the jurisdictions in which we operate.

Income from discontinued operations, net of tax. Income from discontinued operations, net of tax was \$4.0 million and zero for the three months ended March 31, 2013 and March 31, 2014 respectively.

Net income attributable to non-controlling interests. Net income attributable to non-controlling interests reflected an allocation of \$1.1 million and \$2.6 million of income generated by our less than wholly-owned subsidiaries for the three months ended March 31, 2013 and 2014, respectively. Included within these amounts was \$0.1 million related to our discontinued operations for the three months ended March 31, 2013.

Net income attributable to Atlantic Tele-Network, Inc. stockholders. Net income attributable to Atlantic Tele-Network, Inc. stockholders decreased to \$7.8 million for the three months ended March 31, 2014 from \$8.8 million for the three months ended March 31, 2013.

On a per share basis, net income decreased to \$0.49 per diluted share from \$0.56 per diluted share for the three months ended March 31, 2014 and 2013, respectively. Included within net income per diluted share was \$0.25 of net income per diluted share of discontinued operations for the three months ended March 31, 2013.

Regulatory and Tax Issues

We are involved in a number of regulatory and tax proceedings. A material and adverse outcome in one or more of these proceedings could have a material adverse impact on our financial condition and future operations. For discussion of ongoing proceedings, see Note 12 to the Consolidated Financial Statements in this report.

Liquidity and Capital Resources

Historically, we have met our operational liquidity needs through a combination of cash on hand and internally generated funds and have funded capital expenditures and acquisitions with a combination of internally generated funds, cash on hand and borrowings under our credit facilities. We believe our current cash, cash equivalents and availability under our current credit facility will be sufficient to meet our cash needs for the next twelve months for working capital and capital expenditures.

Uses of Cash

Capital Expenditures. A significant use of our cash has been for capital expenditures to expand and upgrade our networks.

For the three months ended March 31, 2013 and 2014, we spent approximately \$15.4 million and \$8.7 million, respectively, on capital expenditures. The following notes our capital expenditures, by operating segment, for these periods:

Table of Contents

	Capital Expenditures (in thousands)						
	U.S. Wireless	International Integrated Telephony	Island Wireless	U.S. Wireline	Reconciling Items	Consolidated	
Three Months Ended March 31,							
2013	\$ 4,480	\$ 4,120	\$ 1,111	\$ 5,095	\$ 549	\$ 15,355	
2014	5,337	2,176	366	430	427	8,736	

We are continuing to invest in upgrading and expanding our networks in many of our markets, along with upgrading our operating and business support systems. We currently anticipate that capital expenditures for our continuing operations for the year ended December 31, 2014 will be between \$65 million and \$70 million.

We expect to fund our current capital expenditures primarily from our current cash balances and cash generated from operations.

Acquisitions and Investments. Historically, we have funded our acquisitions with a combination of cash on hand and borrowings under our credit facilities.

We continue to explore opportunities to acquire or expand our existing communications properties and licenses in the United States, the Caribbean and elsewhere. Such acquisitions may require external financing. While there can be no assurance as to whether, when or on what terms we will be able to acquire any such businesses or licenses or make such investments, such acquisitions may be accomplished through the issuance of shares of our capital stock, payment of cash or incurrence of additional debt. From time to time, we may raise capital ahead of any definitive use of proceeds to allow us to move more quickly and opportunistically if an attractive investment materializes.

As of March 31, 2014, we had approximately \$411.6 million in cash, cash equivalents and restricted cash primarily as a result of the proceeds from our Alltel Sale, and no long-term debt. How and when we deploy our balance sheet capacity will figure prominently in our longer-term growth prospects and stockholder returns.

Income taxes. We use cash-on-hand to make payments for income taxes. As of March 31, 2014, we have made tax payments for substantially all of the expected tax liability owed on the gain we recognized on the sale of the Alltel business.

Dividends. We use cash-on-hand to make dividend payments to our common stockholders when declared by our Board of Directors. For the three months ended March 31, 2014, our Board declared dividends to our stockholders, which includes a \$0.27 per share dividend declared on March 24, 2014, and paid on April 4, 2014, of \$4.3 million. We have declared quarterly dividends for the last 62 fiscal quarters.

Stock repurchase plan. Our Board of Directors approved a \$5.0 million stock buyback plan in September 2004 pursuant to which we have spent approximately \$2.1 million through March 31, 2014. Our last repurchase of our Common Stock under this plan was in 2007. We may repurchase shares at any time depending on market conditions, our available cash and our cash needs.

Sources of Cash

Total liquidity. As of March 31, 2014, we had approximately \$411.6 million in cash, cash equivalents and restricted cash, a decrease of \$23.0 million from the December 31, 2013 balance of \$434.6 million. The decrease is attributable to cash used by our operating activities of \$9.0 million (which includes income tax payments of \$32.9 million during the three months ended March 31, 2014, primarily related to taxes owed from the 2013 gain on the sale of the Alltel business), cash used in our investing activities of \$7.4 million and cash used in our financing activities of \$6.6 million.

Cash generated (used in) by operations. Cash used by operating activities was \$9.0 million for the three months ended March 31, 2014. Cash provided by operating activities was \$25.0 million for the three months ended March 31, 2013. The decrease of \$34.0 million was predominately driven by a decrease in cash provided by our discontinued operations of \$18.4 million, an increase in cash used for accounts payable and other current liabilities of \$14.5 million and a change in accrued taxes of \$4.6 million.

Cash used in investing activities. Cash used in investing activities was \$19.4 million for the three months ended March 31, 2013. Cash provided by investing activities was \$11.8 million for the three months ended March 31, 2014. The \$31.2 million increase was predominately the result of a decrease in the restricted cash of \$19.2 million, a decrease in capital expenditures of \$6.6 million and no effect from our discontinued operations during 2014 as compared to a usage of cash of \$5.5 million during 2013. The three months ended March 31, 2014 also included \$1.4 million in proceeds from the sale of certain network equipment used in our U.S. Wireless segment. The \$1.1 million gain on this sale is being deferred over ten years, the life of the lease which was entered into by us for the purpose of leasing the sold assets.

Cash used in financing activities. Cash used in financing activities increased by \$5.1 million, from \$1.5 million for the three months ended March 31, 2013 to \$6.6 million of cash for the three months ended March 31, 2014. The increase was primarily

Table of Contents

the result of the timing impact of paying a dividend declared by our Board of Directors on December 6, 2012 in the fourth quarter of 2012 as opposed to in the first quarter of 2013.

Credit facilities. We have a credit facility (the Credit Facility) which previously included two term loans and currently provides for a revolver loan of up to \$100.0 million. The revolver loan also has a \$10.0 million swingline sub-facility and a \$55.0 million letter of credit sub-facility for issuance in connection with our Mobility Fund Grant obligations (see Note 8).

On September 20, 2013 we repaid our outstanding term loans in full. Amounts borrowed under the term loans bore interest at a rate equal to, at our option, either (i) at the London Interbank Offered Rate (LIBOR) plus an applicable margin ranging between 2.00% to 4.00% or (ii) a base rate plus an applicable margin ranging from 1.00% to 3.00%. The base rate was equal to the higher of (i) 1.50% plus the higher of (x) the one-week LIBOR and (y) the one-month LIBOR; or (ii) the prime rate (as defined in the Credit Facility). The applicable margin was determined based on the ratio of our indebtedness (as defined in the Credit Facility) to our EBITDA (as defined in the Credit Facility).

Amounts borrowed under the revolver loan bear interest at a rate equal to, at our option, either (i) LIBOR plus an applicable margin ranging between 2.00% to 3.50% or (ii) a base rate plus an applicable margin ranging from 1.00% to 2.50% (or, in the case of amounts borrowed under the swing-line sub-facility, an applicable margin ranging from 0.50% to 2.00%). We must also pay a fee ranging from 0.25% to 0.50% of the average daily unused portion of the revolver loan over each calendar quarter, which fee is payable in arrears on the last day of each calendar quarter.

The Credit Facility contains customary representations, warranties and covenants, including covenants by us limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, the Credit Facility contains financial covenants by us that (i) impose a maximum leverage ratio of indebtedness to EBITDA, (ii) require a minimum debt service ratio of EBITDA to principal, interest and taxes payments and (iii) require a minimum ratio of equity to consolidated assets. As of March 31, 2014, we were in compliance with all of the financial covenants of the Credit Facility.

Factors Affecting Sources of Liquidity

Internally generated funds. The key factors affecting our internally generated funds are demand for our services, competition, regulatory developments, economic conditions in the markets where we operate our businesses and industry trends within the telecommunications industry.

Restrictions under Credit Facility. Our Credit Facility contains customary representations, warranties and covenants, including covenants by us limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, the Credit Facility contains financial covenants by us that (i) impose a maximum ratio of indebtedness to EBITDA (ii) require a minimum ratio of EBITDA to principal and interest payments and cash taxes and, (iii) require a minimum ratio of equity to consolidated assets. As of March 31, 2014, we were in compliance with all of the financial covenants of the Credit Facility.

Capital markets. Our ability to raise funds in the capital markets depends on, among other things, general economic conditions, the conditions of the telecommunications industry, our financial performance, the state of the capital markets and our compliance with Securities and Exchange Commission (SEC) requirements for the offering of securities. On May 13, 2013, our shelf registration statement that registered potential future offerings of our securities expired. We intend to renew this shelf registration statement in 2014.

Recent Accounting Pronouncements

In July 2013, the FASB issued Accounting Standards Update No. 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (a consensus of the Emerging Issues Task Force), which states that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. If a company does not have: (i) a net operating loss carryforward; (ii) a similar tax loss; or (iii) a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the entity does not intend to use the deferred tax

Table of Contents

asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The authoritative guidance is effective for fiscal years and the interim periods within those fiscal years beginning on or after December 15, 2013 and was applied on a prospective basis. The adoption of this authoritative guidance did not have a material impact on the Company's consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Sensitivity. With the exception of GT&T, all of our foreign subsidiaries operate in jurisdictions where the U.S. dollar is the recognized currency. The only foreign currency for which we have a material exposure is the Guyanese dollar, because a significant portion of our Guyana revenues and expenditures are transacted in Guyanese dollars. The Guyanese exchange rate remained relatively constant at approximately 205 Guyana dollars to 1 U.S. dollar from 2004 through May 2013. Beginning in May 2013, the exchange rate began to increase and ended at a rate of approximately 210 Guyana dollars to 1 U.S. dollar as of December 31, 2013. The exchange rate remained consistent at 210 Guyana dollars to 1 U.S. dollar during the three months ended March 31, 2014. The results of future operations may be affected by changes in the value of the Guyana dollar.

Interest Rate Sensitivity. As of March 31, 2014, we did not have any outstanding variable rate debt and as a result, we believe that we do not have an exposure to fluctuations in interest rates. We may have an exposure to fluctuations in interest rates if we again borrow amounts under our revolver loan within our Credit Facility.

ITEM 4. CONTROLS AND PROCEDURES

Management's Evaluation of Disclosure Controls and Procedures. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2014. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, the material weaknesses disclosed in Item 9A- Controls and Procedures—Management's Report on Internal Control over Financial Reporting—as described in our Annual Report on Form 10-K as filed with the SEC on March 17, 2014 resulting from the implementation of a new billing system in Guyana and the accounting personnel in our GT&T subsidiary possessing insufficient experience and training in the Company's business processes and accounting policies to enable them to make accounting and reporting decisions in a manner consistent with our financial reporting and U.S. GAAP timeline requirements continued to exist as of March 31, 2014 and as a result, our disclosure controls and procedures were not effective as of that date.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected in a timely basis. Notwithstanding the previously identified material weakness, management, based on the work performed as part of our remediation plan, has

concluded that the unaudited interim condensed consolidated financial statements included in this Quarterly Report on Form 10-Q are fairly stated in all material respects in accordance with generally accepted accounting principles.

Remediation Plan

As discussed in our Annual Report on Form 10-K as filed with the SEC on March 17, 2014, our management team took immediate action to begin remediating the material weaknesses, including (i) improving our technical ability to report information from the billing system to our financial reporting systems and (ii) providing increased training on our internal controls and procedures, including these remedial measures, to our personnel and (iii) providing additional enhanced local and centralized oversight and management of the accounting and IT services provided by our local personnel. The Company believes that these procedures will remediate the material weaknesses

Table of Contents

described above. While certain aspects of these remedial actions have been completed, we expect these efforts to continue through 2014 as we continue to actively plan for and implement additional control procedures to improve our overall control environment.

Changes in internal control over financial reporting. Except as noted above, there were no changes in our internal control over financial reporting that occurred during the three months ended March 31, 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

See Note 12 to the Condensed Consolidated Financial Statements included in this Report.

Item 1A. Risk Factors

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our 2013 Annual Report on Form 10-K as filed with the SEC on March 17, 2014. The risks described in our 2013 Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In September 2004, the Board of Directors authorized the Company to repurchase up to \$5.0 million of common stock. The repurchase authorizations do not have a fixed termination date and the timing of the buyback amounts and exact number of shares purchased will depend on market conditions. No repurchases were made under this plan during the quarter ended March 31, 2014.

The following table reflects the repurchases by the Company of its common stock during the quarter ended March 31, 2014:

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per	(c) Total Number of Shares Purchased as Part of Publicly	(d) Maximum Number (or Approximate
--------	---	-------------------------------------	---	---

Edgar Filing: ATLANTIC TELE NETWORK INC /DE - Form 10-Q

		Share (1)		Announced Plans or Programs	Dollar Value) of Shares that May be Purchased Under the Plans or Programs
January 1, 2014	January 31, 2014	7,082	\$	59.23	\$ 2,919,965
February 1, 2014	February 28, 2014	3,998	\$	58.45	\$ 2,919,965
March 1, 2014	March 31, 2014	16,769	\$	65.76	\$ 2,919,965

(1) Represents shares purchased on January 17, 2014, February 11, 2014, March 15, 2014, and March 27, 2014 from our executive officers and other employees who tendered these shares to the Company to satisfy their tax withholding obligations incurred in connection with the vesting of restricted stock awards at such date. These shares were not purchased under the plan discussed above. The price paid per share was the closing price per share of our Common Stock on the Nasdaq Stock Market on the date those shares were purchased.
