NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 Organization and Basis of Presentation

PennyMac Financial Services, Inc. (*PFSI* or the *Company*) was formed as a Delaware corporation on December 31, 2012. Pursuant to a reorganization, the Company became a holding corporation and its primary asset is an equity interest in Private National Mortgage Acceptance Company, LLC (*PennyMac*). The Company is the managing member of PennyMac and operates and controls all of the businesses and affairs of PennyMac subject to the consent rights of other members under certain circumstances and, through PennyMac and its subsidiaries, continues to conduct the business previously conducted by these subsidiaries.

PennyMac is a Delaware limited liability company which, through its subsidiaries, engages in mortgage banking and investment management activities. PennyMac's mortgage banking activities consist of residential mortgage loan production (including correspondent production and consumer-direct lending) and mortgage loan servicing. PennyMac's investment management activities and a portion of its loan servicing activities are conducted on behalf of investment vehicles that invest in residential mortgage loans and related assets. PennyMac's primary wholly owned subsidiaries are:

- *PNMAC Capital Management, LLC* (*PCM*) a Delaware limited liability company registered with the Securities and Exchange Commission (*SEC*) as an investment adviser under the Investment Advisers Act of 1940, as amended. PCM enters into investment management agreements with entities that invest in residential mortgage loans and related assets.

Presently, PCM has management agreements with PennyMac Mortgage Investment Trust (*PMT*), a publicly held real estate investment trust, and three investment funds: PNMAC Mortgage Opportunity Fund, LLC and PNMAC Mortgage Opportunity Fund, L.P., (the *Master Fund*), both registered under the Investment Company Act of 1940, as amended; and PNMAC Mortgage Opportunity Fund Investors, LLC (collectively, *Investment Funds*). Together, the Investment Funds and PMT are referred to as the *Advised Entities*.

- *PennyMac Loan Services, LLC* (*PLS*) a Delaware limited liability company that services portfolios of residential mortgage loans on behalf of non-affiliates or the *Advised Entities*, originates new prime credit quality residential mortgage loans, and engages in other mortgage banking activities for its own account and the account of *PMT*.

PLS is approved as a seller/servicer of mortgage loans by the Federal National Mortgage Association (*Fannie Mae*) and the Federal Home Loan Mortgage Corporation (*Freddie Mac*) and as an issuer of securities guaranteed by the Government National Mortgage Association (*Ginnie Mae*). PLS is a licensed Federal Housing Administration Nonsupervised Title II Lender with the U.S. Department of Housing and Urban Development (*HUD*) and a lender/servicer with the Veterans Administration (*VA*) (each an *Agency* and collectively the *Agencies*).

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

- *PNMAC Opportunity Fund Associates, LLC (PMOFA)* a Delaware limited liability company and the general partner of the Master Fund. PMOFA is entitled to incentive fees representing allocations of profits (*Carried Interest*) from the Master Fund.

Initial Public Offering and Recapitalization

On May 14, 2013, PFSI completed an initial public offering (*IPO*) in which it sold approximately 12.8 million shares of its Class A common stock, at a public offering price of \$18.00 per share. PFSI received net proceeds of \$216.8 million, after deducting underwriting discounts and commissions, from sales of its shares in the IPO. PFSI used these net proceeds to purchase approximately 12.8 million Class A units of PennyMac. PFSI operates and controls all of the business and affairs and consolidates the financial results of PennyMac and its subsidiaries.

The purchase of 12.8 million Class A units of PennyMac has been accounted for as a transfer of interests under common control. Accordingly, the accompanying consolidated financial statements reflect a reclassification of members' equity to noncontrolling interests in the Company of \$315.5 million. This amount represents the carrying value in the Company of the existing owners of PennyMac on the date of the IPO.

Before the IPO, PennyMac completed a reorganization by amending its limited liability company agreement to convert all classes of ownership interests held by its existing owners to a single class of common units. The conversion of existing interests was based on the various interests liquidation priorities as specified in PennyMac's prior limited liability company agreement. In connection with that reorganization, PFSI became the sole managing member of PennyMac.

Table of Contents

After the completion of the recapitalization and reorganization transactions, PennyMac became a consolidated subsidiary of the Company. Accordingly, PennyMac's consolidated financial statements are the Company's historical financial statements. The historical consolidated financial statements of PennyMac are reflected herein based on the historical ownership interests of the then-existing PennyMac unitholders.

Tax Receivable Agreement

As part of the IPO, PFSI entered into an Exchange Agreement with PennyMac's existing unitholders whereby the existing unitholders may exchange their PennyMac units for PFSI stock. PennyMac has made an election pursuant to Section 754 of the Internal Revenue Code which remains in effect. As a result of this election an exchange under the Exchange Agreement results in a special adjustment for PFSI that may increase PFSI's tax basis of certain assets of PennyMac that otherwise would not have been available. These increases in tax basis may reduce the amount of income tax that PFSI would otherwise be required to pay in the future. These increases in tax basis may also decrease tax gains (or increase tax losses) on future dispositions of certain assets to the extent a portion of the increased tax basis is allocated to those assets.

As part of the IPO, PFSI entered into a tax receivable agreement with PennyMac's existing unitholders that will provide for the payment by PFSI to PennyMac exchanged unitholders an amount equal to 85% of the amount of the benefits, if any, that PFSI is deemed to realize as a result of (i) increases in tax basis resulting from the exchanges noted above and (ii) certain other tax benefits related to PFSI entering into the tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement.

The term of the tax receivable agreement will continue until all such tax benefits have been utilized or expired, unless PFSI exercises its right to terminate the tax receivable agreement. In the event of termination of the tax receivable agreement, the Company would be required to make an immediate payment equal to the present value of the anticipated future net tax benefits, which upfront payment may be made years in advance of the actual realization of such future benefits.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in compliance with accounting principles generally accepted in the United States (U.S. GAAP) as codified in the Financial Accounting Standards Board's (FASB) *Accounting Standards Codification* (Codification) for interim financial information and with the SEC's instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, these financial statements and notes do not include all of the information required by U.S. GAAP for complete financial statements. The interim consolidated information should be read together with the Company's Annual Report on Form 10-K for the year ended December 31, 2013. Intercompany accounts and transactions have been eliminated.

The accompanying unaudited consolidated financial statements reflect all normal recurring adjustments necessary to present fairly the financial position, income, and cash flows for the interim periods, but are not necessarily indicative of the results of operations to be anticipated for the full year ending December 31, 2014.

Note 2 Concentration of Risk

A substantial portion of the Company's activities relate to the Advised Entities. Fees charged to these entities (generally comprised of management fees, loan servicing fees, Carried Interest and fulfillment fees) totaled 33% and 50% of total net revenues for the quarters ended September 30, 2014 and 2013, respectively, and 35% and 47% for the nine months ended September 30, 2014 and 2013, respectively.

Other Transactions

In connection with the IPO of PMT's common shares on August 4, 2009, the Company entered into an agreement with PMT pursuant to which PMT agreed to reimburse PennyMac for the \$2.9 million payment that it made to the underwriters in such offering (the Conditional Reimbursement) if PMT satisfied certain performance measures over a specified period of time. Effective February 1, 2013, the parties amended the terms of the reimbursement agreement to provide for the reimbursement to the Company of the Conditional Reimbursement if PMT is required to pay the Company performance incentive fees under the management agreement at a rate of \$10 in reimbursement for every \$100 of performance incentive fees earned. The reimbursement of the Conditional Reimbursement is subject to a maximum reimbursement in any particular 12 month period of \$1.0 million and the maximum amount that may be reimbursed under the agreement is \$2.9 million. The Company received payments from PMT totaling \$256,000 and \$292,000, respectively, during the quarter and nine months ended September 30, 2014.

In the event the termination fee is payable to the Company under the management agreement and the Company has not received the full amount of the reimbursements and payments under the reimbursement agreement, such amount will be paid in full. The term of the reimbursement agreement expires on February 1, 2019.

PMT reimburses the Company for other expenses, including common overhead expenses incurred on its behalf by the Company, in accordance with the terms of its management agreement. Such amounts are summarized below:

Exchanged Private National Mortgage Acceptance Company, LLC Unitholders

As discussed in Note 1, *Organization and Basis of Presentation*, the Company entered into a tax receivable agreement with PennyMac's existing unitholders on the date of the IPO that will provide for the payment by PFSI to PennyMac's exchanged unitholders an amount equal to 85% of the amount of the benefits, if any, that PFSI is deemed to realize as a result of (i) increases in tax basis resulting from such unitholders' exchanges and (ii) certain other tax benefits related to entering into the tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement. Based on the PennyMac unitholder exchanges to date, the Company has recorded a \$75.9 million *Payable to Exchanged Private National Mortgage Acceptance Company, LLC unitholders under tax receivable agreement* and it has not made any payments under such agreement as of September 30, 2014.

Note 4 Earnings Per Share of Common Stock

Basic earnings per share of common stock is determined using net income attributable to the Company's common stockholders divided by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share of common stock is determined by dividing net income attributable to the Company's common stockholders by the weighted average number of shares of common stock outstanding, assuming all potentially dilutive shares of common stock were issued.

The Company applies the treasury stock method to determine the dilutive weighted average shares of common stock represented by the unvested stock-based compensation awards and the exchangeable PennyMac Class A units. The diluted earnings per share calculation assumes the exchange of these PennyMac Class A units for shares of common stock. Accordingly, earnings attributable to the Company's common stockholders is also adjusted to include the earnings allocated to the PennyMac Class A units after taking into account the income taxes applicable to the shares of common stock assumed to be exchanged.

Note 5 Loan Sales and Servicing Activities

The Company purchases and sells mortgage loans in the secondary mortgage market without recourse for credit losses. However, the Company maintains continuing involvement with the loans in the form of servicing arrangements and the liability under representations and warranties it makes to purchasers and insurers of the loans.

The following table summarizes cash flows between the Company and transferees as a result of the sale of mortgage loans in transactions where the Company maintains continuing involvement with the mortgage loans (primarily the obligation to service the loans on behalf of the loans owners or owners agents):

Table of Contents

Following is a summary of the geographical distribution of loans included in the Company's servicing portfolio for the top five and all other states as measured by the total unpaid principal balance (UPB):

State	September 30, 2014	December 31, 2013
	(in thousands)	
California	\$ 33,373,669	\$ 30,320,616

All other states	45,921,782	33,429,843
	\$ 100,083,777	\$ 78,167,439

Certain of the loans serviced by the Company are subserviced on the Company's behalf by other mortgage loan servicers. Loans are subserviced for the Company on a transitional basis for loans where the Company has obtained the rights to service the loans but servicing of the loans has not yet transferred to the Company's servicing system.

Note 6 Netting of Financial Instruments

The Company uses derivative financial instruments to manage exposure to interest rate risk for the interest rate lock commitments (IRLCs) it makes to purchase or originate mortgage loans at specified interest rates, its inventory of mortgage loans held for sale and mortgage servicing rights (MSRs). The Company has elected to present net derivative asset and liability positions, and cash collateral obtained from (or posted to) its counterparties when subject to a master netting arrangements that are legally enforceable on all counterparties in the event of default. The derivatives that are not subject to a master netting arrangement are IRLCs.

Note 7 Fair Value

The Company's consolidated financial statements include assets and liabilities that are measured based on their fair values. The application of fair value may be on a recurring or nonrecurring basis depending on the accounting principles applicable to the specific asset or liability and whether management has elected to carry the item at its fair value as discussed in the following paragraphs.

Fair Value Accounting Elections

Management identified all of its non-cash financial assets and its originated MSRs relating to loans with initial interest rates of more than 4.5% and MSRs purchased subject to excess servicing spread (ESS) financing to be accounted for at fair value so changes in fair value will be

reflected in income as they occur and more timely reflect the results of the Company's performance. Management has also identified its ESS financing to be accounted for at fair value as a means of hedging the related MSR's fair value risk.

For originated MSRs relating to mortgage loans with initial interest rates of less than or equal to 4.5%, management has concluded that such assets present different risks to the Company than originated MSRs relating to mortgage loans with initial interest rates of more than 4.5% and therefore require a different risk management approach. Management's risk management efforts relating to these assets are aimed at mainly moderating the effects of non-interest rate risks on fair value, such as the effect of changes in home prices on the assets' fair values. Management has identified these assets for accounting using the amortization method.

Table of Contents

Management's risk management efforts in connection with MSR's relating to mortgage loans with initial interest rates of more than 4.5% are aimed at mainly moderating the effects of changes in interest rates on the assets' fair values. At times during the quarter and nine months ended September 30, 2014 and the quarter ended September 30, 2013, derivatives were used to hedge the fair value changes of the MSR's.

Fair Value of Financial Instruments Carried at Amortized Cost

The Company's *Cash* as well as its *Mortgage loans sold under agreements to repurchase*, *Note payable*, *Carried Interest due from Investment Funds*, and amounts receivable from and payable to the Advised Entities are carried at amortized cost.

Cash is measured using a Level 1 input. The Company's borrowings carried at amortized cost do not have observable inputs and the fair value is measured using management's estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation. The Company has classified these financial instruments as Level 3 financial statement items as of September 30, 2014 and December 31, 2013 due to the lack of observable inputs to estimate the fair value.

Management has concluded that the carrying value of the *Carried Interest due from Investment Funds* approximates its fair value as the balance represents the amount distributable to the Company at the balance sheet date assuming liquidation of the Investment Funds. Management has concluded that the fair value of the *Note payable* approximates the agreements' carrying value due to the agreement's short term and variable interest rate. The Company has classified these financial instruments as Level 3 financial statement items due to the Company's reliance on unobservable inputs to estimate these instruments' fair value.

The Company also carries the receivables from and payables to the Advised Entities at cost. Management has concluded that the fair value of such balances approximates the carrying value due to the short terms of such balances.

Valuation Techniques and Assumptions

Most of the Company's financial assets and its ESS liability are carried at fair value with changes in fair value recognized in current period income. Certain of the Company's financial assets and all of its MSRs and ESS are Level 3 financial statement items which require the use of unobservable inputs that are significant to the estimation of the items' fair values. Unobservable inputs reflect the Company's own assumptions about the factors that market participants use in pricing an asset or liability, and are based on the best information available under the circumstances.

Due to the difficulty in estimating the fair values of Level 3 financial statement items, management has assigned the estimating of fair value of these assets to specialized staff and subjects the valuation process to significant executive management oversight. The Company's Financial Analysis and Valuation group (the FAV group), which is responsible for valuing and monitoring the Company's investment portfolios and maintenance of its valuation policies and procedures, estimates the fair values of Level 3 financial instruments and MSRs.

The FAV group reports to the Company's senior management valuation committee, which oversees and approves the valuations. The FAV group monitors the models used for valuation of the Company's Level 3 financial statement items, including the models' performance versus actual results, and reports those results to the Company's senior management valuation committee. The Company's senior management valuation committee includes PFSI's chief executive, financial, operating, credit and asset/liability management officers.

The FAV group is responsible for reporting to the Company's senior management valuation committee on a monthly basis on the changes in the valuation of the portfolio, including major factors affecting the valuation and any changes in model methods and inputs. To assess the reasonableness of its valuations, the FAV group presents an analysis of the effect on the valuation of changes to the significant inputs to the models.

Following is a description of the techniques and inputs used in estimating the fair values of Level 2 and Level 3 fair value financial statement items:

Mortgage Loans Held for Sale

A substantial portion of the Company's mortgage loans held for sale at fair value are salable into active markets and are therefore categorized as Level 2 fair value financial statement items and their fair values are determined using their quoted market or contracted price or market price equivalent.

Table of Contents

The Company may purchase certain delinquent government guaranteed or insured mortgage loans from Ginnie Mae guaranteed pools in its servicing portfolio. The Company's right to purchase such loans arises as the result of the borrower's failure to make payments for three consecutive months preceding the month of repurchase by the Company and provides an alternative to the Company's obligation to continue advancing principal and interest at the coupon rate of the related Ginnie Mae security. To the extent such loans (early buyout loans) have not become salable into another Ginnie Mae guaranteed security by becoming current either through the borrower's reperformance or through completion of a modification of the loan's terms, the Company measures such loans using Level 3 inputs. Certain of the Company's mortgage loans may become non salable into active markets due to identification of a defect by the Company or to the repurchase of a mortgage loan with an identified defect. Because such mortgage loans are generally not salable into active mortgage markets, they are classified as Level 3 financial statement items.

The significant unobservable inputs used in the fair value measurement of the Company's Level 3 mortgage loans held for sale at fair value are discount rates, home price projections, voluntary prepayment speeds and default speeds. Significant changes in any of those inputs in isolation could result in a significant change to the loans' fair value measurement. Increases in home price projections are generally accompanied by an increase in voluntary prepayment speeds.

Following is a quantitative summary of key Level 3 inputs used in the valuation of mortgage loans held for sale at fair value:

Key inputs	September 30, 2014	December 31, 2013
Discount rate		
Range	2.2% - 7.8%	7.8% - 13.4%
Weighted average	2.3%	8.9%
Twelve-month projected housing price index change		
Range	0.2% - 8.2%	4.5% - 4.7%
Weighted average	4.5%	4.6%
Prepayment/resale speed (1)		
Range	7.6% - 14.8%	1.6% - 5.1%
Weighted average	14.7%	4.4%
Total prepayment speed (2)		
Range	7.6% - 36.8%	2.9% - 5.2%
Weighted average	35.2%	4.7%

(1) Prepayment/resale speed is measured using Life Voluntary Conditional Prepayment Rate (CPR).

(2) Total prepayment speed is measured using Life Total CPR.

Changes in fair value attributable to changes in instrument specific credit risk are measured by the change in the respective loan's delinquency status at period end from the later of the beginning of the period or acquisition date. Changes in fair value of mortgage loans held for sale are included in *Net gains on mortgage loans held for sale at fair value* in the consolidated statements of income.

Derivative Financial Instruments

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

The Company categorizes IRLCs as a Level 3 financial statement item. The Company estimates the fair value of an IRLC based on quoted Agency mortgage-backed securities (MBS) prices, its estimate of the fair value of the MSRs it expects to receive in the sale of the loans and the probability that the mortgage loan will fund or be purchased (the pull-through rate).

The significant unobservable inputs used in the fair value measurement of the Company s IRLCs are the pull-through rate and the MSR component of the Company s estimate of the value of the mortgage loans it has committed to purchase. Significant changes in the pull-through rate or the MSR component of the IRLCs, in isolation, could result in significant changes in fair value measurement. The financial effects of changes in these assumptions are generally inversely correlated as increasing interest rates have a positive effect on the fair value of the MSR component of IRLC value, but increase the pull-through rate for loans that have decreased in fair value.

Table of Contents

Following is a quantitative summary of key unobservable inputs used in the valuation of IRLCs:

Key inputs	September 30, 2014	December 31, 2013
Pull-through rate		
Range	61.2% - 99.0%	62.1% - 98.1%
Weighted average	79.7%	81.7%
Mortgage servicing rights value expressed as:		
Servicing fee multiple		
Range	1.7 - 5.0	2.0 - 5.0
Weighted average	3.8	3.7
Percentage of unpaid principal balance		
Range	0.4% - 2.5%	0.4% - 2.4%
Weighted average	1.2%	0.9%

The remaining derivative financial instruments held or issued by the Company are categorized as Level 2 financial statement items. The Company estimates the fair value of commitments to sell and purchase loans based on quoted MBS prices. The Company estimates the fair value of MBS options based on observed interest rate volatilities in the MBS market. Changes in fair value of IRLCs and related hedging derivatives are included in *Net gains on mortgage loans held for sale at fair value* in the consolidated statements of income.

Mortgage Servicing Rights

MSRs are categorized as Level 3 financial statement items. The Company uses a discounted cash flow approach to estimate the fair value of MSRs. This approach consists of projecting net servicing cash flows discounted at a rate that management believes market participants would use in their determinations of fair value. The key inputs used in the estimation of the fair value of MSRs include prepayment rates of the underlying loans, the applicable discount rate or pricing spread, and the per-loan annual cost to service the respective mortgage loans. Changes in the fair value of MSRs are included in *Net servicing fees Amortization, impairment and change in estimated fair value of mortgage servicing rights* in the consolidated statements of income.

(1) Pricing spread represents a margin that is applied to a reference interest rate's forward rate curve to develop periodic discount rates. The Company applies a pricing spread to the United States Dollar London Interbank Offering Rate (LIBOR) curve for purposes of discounting cash flows relating to MSRs acquired as proceeds from the sale of mortgage loans.

(2) Prepayment speed is measured using Life Total CPR.

(1) Pricing spread represents a margin that is applied to a reference interest rate's forward rate curve to develop periodic discount rates. The Company applies a pricing spread to the United States Dollar LIBOR curve for purposes of discounting cash flows relating to MSRs acquired as proceeds from the sale of mortgage loans.

(2) Prepayment speed is measured using Life Total CPR.

(1) Pricing spread represents a margin that is applied to a reference interest rate's forward curve to develop periodic discount rates. The Company applies a pricing spread to the United States Dollar LIBOR curve for purposes of discounting cash flows relating to MSRs acquired as proceeds from the sale of mortgage loans and purchased MSRs not backed by pools of distressed mortgage loans.

(2) Prepayment speed is measured using Life Total CPR.

The preceding sensitivity analyses are limited in that they were performed at a particular point in time; only contemplate the movements in the indicated variables; do not incorporate changes to other variables; are subject to the accuracy of various models and assumptions used; and do not incorporate other factors that would affect the Company's overall financial performance in such scenarios, including operational adjustments made by management to account for changing circumstances. For these reasons, the preceding estimates should not be viewed as earnings

forecasts.

Table of Contents*Excess Servicing Spread Financing at Fair Value*

The Company categorizes ESS financing as a Level 3 financial statement item. The Company uses a discounted cash flow approach to estimate the fair value of ESS financing. The key inputs used in the estimation of ESS financing include pricing spread and prepayment speed. Significant changes to any of those inputs in isolation could result in a significant change in the ESS financing fair value measurement. Changes in these key assumptions are not necessarily directly related.

ESS is generally subject to fair value increases when mortgage interest rates increase. Increasing mortgage interest rates normally slow mortgage refinancing activity. Decreased refinancing activity increases the life of the loans underlying the ESS, thereby increasing ESS financing's fair value and the liability owed to PMT. Increases in the fair value of ESS financing increase *Amortization, impairment and change in estimated fair value of mortgage servicing rights*.

Interest expense for ESS financing is accrued using the interest method based upon the expected cash flows from the ESS through the expected life of the underlying mortgage loans. Other changes in fair value are recorded in *Amortization, impairment and change in estimated fair value of mortgage servicing rights*.

Following are the key inputs used in determining the fair value of ESS financing:

Key inputs	September 30, 2014	December 31, 2013
Unpaid principal balance of underlying loans (in thousands)	\$27,702,102	\$20,512,659
Average servicing fee rate (in basis points)	31	32
Average excess servicing spread (in basis points)	16	16
Pricing spread (1)		
Range	1.7% - 11.8%	2.8% - 14.4%
Weighted average	5.0%	5.4%
Average life (in years)		
Range	0.4 - 7.3	0.9 - 8.0
Weighted average	5.8	6.1
Annualized prepayment speed (2)		
Range	7.6% - 72.4%	7.7% - 48.6%
Weighted average	10.8%	9.7%

(1) Pricing spread represents a margin that is applied to a reference interest rate's forward rate curve to develop periodic discount rates. The Company applies a pricing spread to the United States LIBOR curve for purposes of discounting cash flows relating to ESS.

(2) Prepayment speed is measured using Life Total CPR.

Note 9 Derivative Financial Instruments

The Company is exposed to fair value risk relative to its mortgage loans held for sale as well as to its IRLCs and MSRs. The Company bears fair value risk from the time an IRLC is made to PMT or a loan applicant to the time the mortgage loan is sold. The Company is exposed to loss in fair value of its IRLCs and mortgage loans held for sale when mortgage rates increase. The Company is exposed to loss in fair value of its MSRs when interest rates decrease.

The Company engages in interest rate risk management activities in an effort to reduce the variability of earnings caused by changes in market interest rates. To manage this fair value risk resulting from interest rate risk, the Company uses derivative financial instruments acquired with the intention of reducing the risk that changes in market interest rates will result in unfavorable changes in the fair value of the Company's IRLCs, inventory of mortgage loans held for sale and MSRs.

The Company does not use derivative financial instruments for purposes other than in support of its risk management activities other than IRLCs, which are generated in the normal course of business when the Company commits to purchase or originate mortgage loans held for sale. The Company records all derivative financial instruments at fair value and records changes in fair value in current period income.

Balance at end of period	\$	67,035	\$	58,134	\$	67,035	\$ 58,134

The amount of the Carried Interest that will be received by the Company depends on the Investment Funds' future performance. As a result, the amount of Carried Interest recorded by the Company at period end is subject to adjustment based on future results of the Investment Funds and may be reduced in future periods. However, the Company is not required to pay guaranteed returns to the Investment Funds and the amount of any reduction to Carried Interest will be limited to the extent of amounts previously recognized.

Management expects the Carried Interest to be collected by the Company when the Investment Funds liquidate. The commitment period for the Investment Funds ended on December 31, 2011. The Investment Fund limited liability company and limited partnership agreements specify that the funds will continue in existence through December 31, 2016, subject to three one-year extensions by PCM at its discretion.

Note 13 Borrowings

As of September 30, 2014, the Company maintained six borrowing facilities: four facilities that provide funding for sales of mortgage loans under agreements to repurchase; one facility that provides for sales of mortgage loan participation certificates; and one note payable secured by MSR and servicing advances made relating to certain loans in the Company's loan servicing portfolio.

Mortgage Loans Sold Under Agreement to Repurchase

The borrowing facilities secured by mortgage loans held for sale are in the form of loan sale and repurchase agreements. Eligible loans are sold at advance rates based on the loan type. Interest is charged at a rate based on the buyer's overnight cost of funds rate for one agreement and on LIBOR for the other three agreements. Loans financed under these agreements may be re-pledged by the lenders.

Financial data pertaining to mortgage loans sold under agreements to repurchase are as follows:

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's mortgage loans held for sale sold under agreements to repurchase is summarized by counterparty below as of September 30, 2014:

Counterparty	Amount at risk (in thousands)	Weighted average maturity of advances under repurchase agreement	Facility maturity
Credit Suisse First Boston Mortgage Capital LLC	\$ 105,334		October 31, 2014
Bank of America, N.A.	\$ 41,811	December 21, 2014	January 30, 2015
Morgan Stanley	\$ 11,080	November 19, 2014	June 29, 2015
Citibank, N.A.	\$		September 7, 2015

The Company is subject to margin calls during the period the agreements are outstanding and therefore may be required to repay a portion of the borrowings before the respective agreements mature if the fair value (as determined by the applicable lender) of the mortgage loans securing those agreements decreases. The Company had \$1.5 million on deposit with its mortgage loan repurchase agreement counterparties at September 30, 2014 and December 31, 2013. Such amounts are included in *Other assets* on the consolidated balance sheets.

Mortgage Loan Participation and Sale Agreement

The mortgage loan participation and sale agreement is summarized below:

	September 30, 2014	December 31, 2013
	(in thousands)	
Mortgage loan participation and sale agreement secured by mortgage loans	\$ 142,383	\$
Mortgage loans pledged to secure mortgage loan participation and sale agreement	\$ 146,798	\$

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

One of the borrowing facilities secured by mortgage loans held for sale is in the form of a mortgage loan participation and sale agreement. Participation certificates, each of which represents an undivided beneficial ownership interest in a pool of mortgage loans that have been pooled with Fannie Mae, Freddie Mac or Ginnie Mae, are sold to the lender pending the securitization and sale of the resulting securities. A commitment to sell the securities resulting from the pending securitization between the Company and a non-affiliate is also assigned to the lender at the time a participation certificate is sold.

Table of Contents

The purchase price paid by the lender for each participation certificate is based on the trade price of the security, plus an amount of interest expected to accrue on the security to its anticipated delivery date, minus a present value adjustment, any related hedging costs and a holdback amount that is based on a percentage of the purchase price and is not required to be paid to the Company until the settlement of the security and its delivery to the lender.

Note Payable

The note payable is summarized below:

	September 30, 2014		December 31, 2013
	(in thousands)		
Note payable secured by:			
Mortgage servicing rights	\$ 154,948	\$	48,302
Servicing advances			3,852
	\$ 154,948	\$	52,154
Assets pledged to secure note payable:			
Mortgage servicing rights	\$ 350,758	\$	258,241
Servicing advances	\$	\$	5,564

The note payable matured on October 31, 2014. Interest is charged at a rate based on the lender's overnight cost of funds. The note payable is secured by servicing advances and MSRs relating to certain loans in the Company's servicing portfolio, and currently provides for advance rates ranging from 50% to 85% of the amount of the servicing advances or the carrying value of the MSR pledged.

The borrowing facilities contain various covenants, including financial covenants governing the Company's net worth, debt to equity ratio, profitability and liquidity. Management believes that the Company was in compliance with these requirements as of September 30, 2014.

Excess Servicing Spread Financing

In conjunction with the Company's purchase from non-affiliates of certain MSRs on pools of Agency-backed residential mortgage loans, the Company has entered into sale and assignment agreements which are treated as financings and are carried at fair value with changes in fair value recognized in current period income. Under these agreements, the Company sold to PMT the right to receive ESS cash flows relating to certain MSRs. The Company retained all ancillary income associated with servicing the loans and a fixed base servicing fee. The Company continues to be the servicer of the mortgage loans and provides all servicing functions, including responsibility to make servicing advances.

Note 18 Stock-based Compensation

The Company's 2013 Equity Incentive Plan provides for grants of stock options, time-based and performance-based restricted stock units (RSUs), stock appreciation rights, performance units and stock grants. As of September 30, 2014, the Company has 16.5 million units available for future awards. The Company estimates the cost of the stock options, time-based restricted stock units and performance-based restricted stock units awarded with reference to the fair value of PFSI's common stock on the date of the award. Compensation costs are fixed, except for the performance-based restricted stock units, at the grant's estimated fair value on the grant date as all grantees are employees of PennyMac or directors of the Company. Expense relating to awards is included in *Compensation* in the consolidated statements of income.

Following is a summary of the stock-based compensation expense by instrument awarded:

Note 19 Income Taxes

For the quarter and nine months ended September 30, 2014, the Company's effective tax rates were 11.5% and 11.4%, respectively. For the quarter and nine months ended September 30, 2013, the Company's effective tax rates were 9.9% and 4.0%, respectively. The difference between the Company's effective tax rate and the statutory rate is primarily due to the allocation of earnings to the noncontrolling interest unitholders. As the noncontrolling interest unitholders convert their ownership units into the Company's shares, the portion of the Company's income that will be

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

subject to corporate federal and state statutory tax rates will increase, which will in turn increase PFSI's effective income tax rate.

Table of Contents**Note 21 Regulatory Net Worth and Agency Capital Requirements**

The Company, through PLS and PennyMac, is required to maintain specified levels of equity to remain a seller/servicer in good standing with the Agencies. Such equity requirements generally are tied to the size of the Company's loan servicing portfolio or loan origination volume.

The Agencies' capital requirements, the calculations of which are specified by each Agency, are summarized below:

Agency company subject to requirement	Agency Capital			
	September 30, 2014		December 31, 2013	
	Balance (1)	Requirement	Balance (1)	Requirement
	(in thousands)			
Fannie Mae PLS	\$ 542,020	\$ 90,616	\$ 409,552	\$ 83,148
Freddie Mac PLS	\$ 542,196	\$ 3,378	\$ 409,860	\$ 3,001
Ginnie Mae:

Issuer's parent PennyMac	\$ 712,107	\$ 128,136	\$ 598,198	\$ 112,881
HUD PLS	\$ 488,804	\$ 2,500	\$ 388,125	\$ 2,500

(1) Calculated in compliance with the respective Agency's requirements.

Noncompliance with the respective Agencies' capital requirements can result in the respective Agency taking various remedial actions up to and including removing PennyMac's ability to sell loans to and service loans on behalf of the respective Agency. PennyMac and PLS had Agency capital in excess of the respective Agencies' requirements at September 30, 2014.

Note 22 Commitments and Contingencies*Litigation*

The business of the Company involves the collection of numerous accounts, as well as the validation of liens and compliance with various state and federal lending and servicing laws. Accordingly, the Company may be involved in proceedings, claims, and legal actions arising in the ordinary course of business. As of September 30, 2014, the Company was not involved in any legal proceedings, claims, or actions that in management's view would be reasonably likely to have a material adverse effect on the Company.

Note 23 Segments and Related Information

Since the date of the Company's IPO, the Company has continued its development of internal management reporting. Such development has resulted in changes in the information that is provided to the Company's chief operating decision maker. Accordingly, during the quarter ended March 31, 2014, management re-evaluated this new information in relation to its definition of its operating segments.

As a result of the new reporting provided to the chief operating decision maker, management has concluded that its mortgage banking operations should be disclosed as two segments: loan production and loan servicing. Accordingly, the following segment disclosure includes three segments: loan production, loan servicing and investment management. Prior period segment disclosures have been restated to conform segment disclosures for the quarter and nine months ended September 30, 2013 to those for the quarter and nine months ended September 30, 2014.

Table of Contents

Two of the segments are in the mortgage banking business: loan production and loan servicing. The loan production segment performs origination, acquisition and sale activities. The loan servicing segment performs servicing of newly originated mortgage loans, execution and management of early buyout loans and servicing of mortgage loans sourced and managed by the investment management segment, including executing the loan resolution strategy identified by the investment management segment relating to distressed mortgage loans.

The investment management segment represents the activities of the Company's investment manager, which include sourcing, performing diligence, bidding and closing investment asset acquisitions, managing correspondent lending activities for PMT and managing the acquired assets for the Advised Entities.

Financial highlights by segment are as follows:

Note 24 Recently Issued Accounting Pronouncements

In January 2014, the FASB issued Accounting Standard Update (ASU) No. 2014-04, *Receivables: Troubled Debt Restructuring by Creditors Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure* (ASU 2014-04) to the *Troubled Debt Restructuring* subtopic of the *Receivables* topic of the Codification.

ASU 2014-04 clarifies when a creditor should be considered to have received physical possession of residential real estate collateralizing a mortgage loan and the mortgage loan derecognized in the receivable and recognized as real estate property. ASU 2014-04 specifies that an in substance repossession occurs when either the creditor has obtained the legal title to the property after a foreclosure or the borrower has transferred all interest in the property to the creditor through a deed in lieu of foreclosure or similar legal agreement so that at that time the asset should be reclassified from *mortgage loans at fair value* to *real estate acquired in settlement of loans*.

ASU 2014-04 also provides that a disclosure of the amount of *real estate acquired in settlement of loans* and the recorded investment in *mortgage loans at fair value* that are in the process of foreclosure must be included in both interim and annual financial statements.

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

ASU 2014-04 is effective for all year-end and interim periods beginning after December 15, 2014. The adoption of ASU 2014-04 is not expected to have a material effect on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers* (ASU 2014-09) to the *Revenue from Contracts with Customers* topic of the Codification. ASU 2014-09 was issued to standardize revenue recognition between public and private companies as well as across industries in an effort to more closely align GAAP revenue recognition with international standards to provide a more comparable revenue number for the users of the financial statements.

ASU 2014-09 specifies that for all contracts, revenue should be recognized when or as the entity satisfies a performance obligation. Revenue is recognized either over a period or at one point in time in accordance with how the control of the service or good is transferred.

Table of Contents

ASU 2014-09 is effective for all year-end and interim periods beginning after December 15, 2016 and early application is not permitted. The Company is evaluating the effect of adopting ASU 2014-09 to its consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-11, *Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures* (ASU 2014-11) to the *Transfers and Servicing* topic of the Codification. The amendments in ASU 2014-11 require two accounting changes. First, the amendments in ASU 2014-11 change the accounting for repurchase-to-maturity transactions to secured borrowing accounting. Second, for repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement.

ASU 2014-11 requires disclosures for certain transactions comprising (1) a transfer of a financial asset accounted for as a sale and (2) an agreement with the same transferee entered into in contemplation of the initial transfer that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. ASU 2014-11 also specifies certain disclosure requirements for those transactions outstanding at the reporting date and for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions, the transferor is required to make certain disclosures by type of transaction.

ASU 2014-11 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The adoption of ASU 2014-11 is not expected to have a material effect on the Company's consolidated financial statements.

In August 2014, The FASB issued ASU No. 2014-15, *Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern* (ASU 2014-15) to the *Going Concern* subtopic of the *Presentation of Financial Statements* topic of the Codification. ASU 2014-15 requires that when management identifies conditions or events that raise substantial doubt about an entity's ability to continue as a going concern, management should consider whether its plans that are intended to mitigate those relevant conditions or events will alleviate the substantial doubt. The mitigating effect of management's plans should be considered only to the extent that (1) it is probable that the plans will be effectively implemented and, if so, (2) it is probable that the plans will mitigate the conditions or events that raise substantial doubt about the entity's ability to continue as a going concern.

ASU 2014-15 requires that if conditions or events raise substantial doubt about an entity's ability to continue as a going concern, but the substantial doubt is alleviated as a result of consideration of management's plans, the entity should include a statement in the notes to its financial statements that enables users of the financial statements to understand all of the following:

- a. Principal conditions or events that raised substantial doubt about the entity's ability to continue as a going concern (before consideration of management's plans),
- b. Management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations, and
- c. Management's plans that alleviated substantial doubt about the entity's ability to continue as a going concern.

If conditions or events raise substantial doubt about an entity's ability to continue as a going concern, and substantial doubt is not alleviated after consideration of management's plans, an entity should include a statement in the notes to its financial statements indicating that there is substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or available to be issued). The entity should disclose information that enables users of the financial statements to understand all of the following:

- a. Principal conditions or events that raise substantial doubt about the entity's ability to continue as a going concern.

- b. Management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations, and

- c. Management's plans that are intended to mitigate the conditions or events that raise substantial doubt about the entity's ability to continue as a going concern.

ASU 2014-15 is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The adoption of ASU 2014-15 is not expected to have a material effect on the Company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward-Looking Statements

The following discussion and analysis of financial condition and results of operations should be read with the consolidated financial statements and the related notes of PennyMac Financial Services, Inc. included within this Quarterly Report on Form 10-Q.

Statements contained in this Quarterly Report on Form 10-Q may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements involve known and unknown risks, uncertainties and other factors, which may cause actual results to be materially different from those expressed or implied in such statements. You can identify these forward-looking statements by words such as may, will, should, expect, anticipate, believe, estimate, intend, plan and other similar expressions. You should read forward-looking statements in light of the risks discussed under the heading Risk Factors, as well as our consolidated financial statements, related notes, and the other financial information appearing elsewhere in this Quarterly Report on Form 10-Q and our other filings with the United States Securities and Exchange Commission (SEC). The forward-looking statements contained in this Quarterly Report on Form 10-Q are made as of the date hereof and we assume no obligation to update or supplement any forward-looking statements.

Overview

The following discussion and analysis provides information that we believe is relevant to an assessment and understanding of our consolidated results of operations and financial condition. Unless the context indicates otherwise, references in this Quarterly Report on Form 10-Q to the words we, us, our and the Company refer to PennyMac Financial Services, Inc. (PFSI).

Initial Public Offering and Recapitalization

On May 14, 2013, we completed an initial public offering (IPO) in which we sold approximately 12.8 million shares of Class A Common Stock par value \$0.0001 per share (Class A Common Stock) for cash consideration of \$16.875 per share (net of underwriting discounts). With the net proceeds from the IPO, we bought approximately 12.8 million Class A units of Private National Mortgage Acceptance Company, LLC (PennyMac) and became its sole managing member. We operate and control all of the business and affairs and consolidate the financial results of PennyMac.

Before the completion of the IPO, the limited liability company agreement of PennyMac was amended and restated to, among other things, change its capital structure by converting the different classes of interests held by its existing unitholders into Class A units. PennyMac and its existing unitholders also entered into an exchange agreement under which (subject to the terms of the exchange agreement) they have the right to exchange their Class A units for shares of our Class A Common Stock on a one for one basis, subject to customary conversion rate adjustments for stock splits, stock dividends, reclassifications and certain other transactions.

PennyMac has made an election pursuant to Section 754 of the Internal Revenue Code which remains in effect. As a result of this election, an exchange pursuant to the exchange agreement results in a special adjustment for PFSI that may increase PFSI's tax basis in certain assets of PennyMac that otherwise would not have been available. These increases in tax basis may reduce the amount of tax that PFSI would otherwise be required to pay in the future and result in increases in investment in PennyMac deferred tax assets net of the related deferred tax liabilities.

As part of the IPO, we entered into a tax receivable agreement with the then-existing unitholders of PennyMac that provides for payment to such owners of 85% of the tax benefits, if any, that we are deemed to realize under certain circumstances as a result of (i) increases in tax basis resulting from exchanges of Class A units and (ii) certain other tax benefits related to our tax receivable agreement, including tax benefits attributable to payments under the tax receivable agreement.

Our Company

We are a specialty financial services firm with a comprehensive mortgage platform and integrated business focused on the production and servicing of U.S. residential mortgage loans (activities which we refer to as mortgage banking) and the management of investments related to the U.S. residential mortgage market. We believe that our operating capabilities, specialized expertise, access to long term investment capital, and our management's experience across all aspects of the mortgage business will allow us to profitably grow these activities and capitalize on other related opportunities as they arise in the future.

Table of Contents

PennyMac was founded in 2008 by members of its executive leadership team and two strategic partners, BlackRock Mortgage Ventures, LLC, together with its affiliates, and HC Partners LLC, formerly known as Highfields Capital Investments LLC, together with its affiliates.

We conduct our business in three segments: loan production, loan servicing and investment management. Our principal mortgage banking subsidiary, PennyMac Loan Services, LLC (PLS), is a non-bank producer and servicer of mortgage loans in the United States. Our principal investment management subsidiary, PNMAC Capital Management, LLC (PCM), is an SEC registered investment adviser. PCM manages PennyMac Mortgage Investment Trust (PMT), a mortgage real estate investment trust, listed on the New York Stock Exchange under the ticker symbol PMT. PCM also manages PNMAC Mortgage Opportunity Fund, LLC and PNMAC Mortgage Opportunity Fund, LP, both registered under the Investment Company Act, an affiliate of these funds, and PNMAC Mortgage Opportunity Fund Investors, LLC. We refer to these funds collectively as our Investment Funds and, together with PMT, as our Advised Entities.

Mortgage Banking**Loan Production**

Our loan production segment is sourced through two channels: correspondent production and consumer-direct lending.

In correspondent production we manage, on behalf of PMT and for our own account, the acquisition of newly originated, prime credit quality, first lien residential mortgage loans that have been underwritten to investor guidelines. PMT acquires, from approved correspondent sellers, newly originated loans, including both conventional and government-insured or guaranteed residential mortgage loans that qualify for inclusion in securitizations that are guaranteed by the Agencies. For conventional loans, we perform fulfillment activities for PMT and earn a fulfillment fee for each loan purchased by PMT. In the case of government insured loans, we purchase them from PMT at PMT's cost plus a sourcing fee and fulfill them for our own account.

Through our consumer-direct lending channel, we originate new prime credit quality, first lien residential conventional and government-insured or guaranteed mortgage loans on a national basis to allow customers to purchase or refinance their homes. The consumer direct model relies on the Internet and call center based staff to acquire and interact with customers across the country. We do not have a brick and mortar branch network and have been developing our consumer direct operations with call centers strategically positioned across the United States.

Our loan production activity is summarized below:

Loan Servicing

Our loan servicing segment performs loan administration, collection and default activities, including the collection and remittance of loan payments; response to customer inquiries; accounting for principal and interest; holding custodial (impounded) funds for the payment of property taxes and insurance premiums; counseling delinquent mortgagors; and supervising foreclosures and property dispositions. We service a diverse portfolio of mortgage loans both as the owner of MSRs and on behalf of other MSR or mortgage owners. We provide prime servicing for conventional and government-insured or guaranteed loans, as well as special servicing for distressed loans that have been acquired as investments by our Advised Entities. As of September 30, 2014, the portfolio of mortgage loans that we serviced or subserviced totaled approximately \$100.1 billion in UPB.

Investment Management

We are an investment manager through an indirect subsidiary, PCM. PCM currently manages PMT and the Investment Funds. PMT and the Investment Funds had combined net assets of approximately \$2.0 billion as of September 30, 2014. For these activities, we earn management fees as a percentage of net assets and incentive compensation based on investment performance.

Observations on Current Market Conditions

Our business is affected by macroeconomic conditions in the United States, including economic growth, unemployment rates, the residential housing market and interest rate levels and expectations. During the third quarter of 2014, real U.S. gross domestic product expanded at an annual rate of 3.5% compared to a revised 4.6% increase for the second quarter of 2014 and a 4.5% increase for the third quarter of 2013. The national unemployment rate was 5.9% at September 30, 2014 compared to seasonally adjusted rates of 7.2% and 6.1% at September 30, 2013 and June 30, 2014, respectively. While delinquency rates on residential real estate loans continue to decrease, they remain elevated compared to historical rates. As reported by the Federal Reserve Bank, during the second quarter of 2014, the delinquency rate on residential real estate loans held by commercial banks was 7.4%, a reduction from 9.3% during the second quarter of 2013.

The seasonally adjusted annual rate of existing home sales for September 2014 was 1.7% lower than for September 2013 and the national median existing home price for all housing types was \$209,700, a 5.6% increase from September 2013. On a national level, foreclosure filings during the third quarter of 2014 decreased by 16% as compared to the third quarter of 2013. Foreclosure activity across the country remained relatively flat from the prior quarter and is expected to remain above historical average levels through 2014 and beyond.

Thirty-year fixed mortgage interest rates ranged from 4.12% to 4.16% during the third quarter of 2014. During the third quarter of 2013, thirty-year fixed mortgage interest rates ranged from 4.37% to 4.49% (Source: the Federal Home Loan Mortgage Corporation's Weekly Primary Mortgage Market Survey).

Changes in fixed rate residential mortgage loan interest rates generally follow changes in long term U.S. Treasury yields. Toward the end of the second quarter of 2013, an increase in these Treasury yields led to an increase in mortgage loan interest rates. As a result of this increase in mortgage loan interest rates, market volumes for mortgage originations have decreased led by a reduction in refinance activity. However, mortgage rates remain very low in a historical context.

Mortgage lenders originated an estimated \$335 billion of home loans during the quarter ended September 30, 2014, down 27.2% from the quarter ended September 30, 2013. Mortgage originations are forecast to continue to decline, with current industry estimates for 2014 totaling \$1.1 trillion compared to \$1.9 trillion for 2013 (Source: Average of Fannie Mae, Freddie Mac and Mortgage Bankers Association forecasts).

In recent periods, we have seen increased competition from new and existing market participants in the correspondent production business, as well as reductions in the overall level of refinancing activity. We believe that this change in supply and demand within the marketplace has been driving lower production margins in recent periods, which is reflected in our results of operations in our net gains on mortgage loans held for

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

sale. During the first several months of 2013, net gains on mortgage loans held for sale benefited from wider secondary spreads (the difference between interest rates charged to borrowers and yields on mortgage-backed securities in the secondary market); however, secondary spreads narrowed in subsequent months and we expect them to continue to normalize toward their long-term averages in 2014.

We believe there is significant long-term market opportunity in non-Agency jumbo mortgage loans. Pricing for non-Agency AAA rated bonds has steadily improved since the beginning of the year, however liquidity is fairly limited. During the nine months ended September 30, 2014, prime jumbo MBS issuance totaled \$4.5 billion in unpaid principal balance (UPB) compared to \$12.4 billion during the nine months ended September 30, 2013. During the nine months ended September 30, 2014, we fulfilled for PMT approximately \$262.3 million in UPB of jumbo loans, compared to \$189.4 million in UPB of jumbo loans fulfilled for PMT during the nine months ended September 30, 2013.

In our capacity as an investment manager, we continue to see substantial volumes of distressed residential mortgage loan sales (sales of loan pools that consist of either nonperforming loans, troubled but performing loans or a combination thereof) offered for sale by a limited number of sellers. During the third quarter of 2014, we reviewed 70 mortgage loan pools with UPB totaling approximately \$12.2 billion. This compares to our review of 25 mortgage loan pools with UPB totaling approximately \$7.3 billion during the third quarter of 2013. During the nine months ended September 30, 2014, we acquired for PMT distressed loans with fair value totaling \$287.5 million and \$1.0 billion during the same period in 2013. While we expect to see a continued supply of distressed whole loans, we believe the pricing for recent transactions has been less attractive for buyers. We remain patient and selective for PMT in making new investments in distressed whole loans and we continue to monitor the market to assess best execution opportunities for distressed portfolio investments held by the Advised Entities.

Comparison of the quarters and nine months ended September 30, 2014 and 2013

Net income increased by approximately \$24.0 million, or 76%, and \$15.5 million, or 11%, for the quarter and nine months ended September 30, 2014, respectively, when compared to the same periods in 2013. The increase in net income during the quarter and nine months ended September 30, 2014 is primarily due to increased loan servicing fee income resulting from the growth in our mortgage loan servicing portfolio and to increased gain on sale of mortgage loans at fair value, partly offset by increased expenses incurred to accommodate our growth. Our servicing portfolio increased from \$52.9 billion at September 30, 2013 to \$100.1 billion at September 30, 2014.

Net Gains on Mortgage Loans Held for Sale at Fair Value

During the quarter and nine months ended September 30, 2014, we recognized net gains on mortgage loans held for sale at fair value totaling \$48.1 million and \$122.4 million, respectively. This compares to net gains on mortgage loans held for sale at fair value totaling \$25.9 million and \$108.6 million, respectively, for the quarter and nine months ended September 30, 2013. The increase in net gains on mortgage loans held for sale at fair value was due to improvement in gain on sale margins along with growth in the volume of mortgage loans that we purchased and originated and subsequently sold during the quarter and nine months ended September 30, 2014 as compared to the same periods in 2013. The net gain for the quarter and nine months ended September 30, 2014 included \$61.2 million and \$148.4 million, respectively, in fair value of MSR's received as part of proceeds on sales. The net gain for the quarter and nine months ended September 30, 2013 included \$60.1 million and \$154.4 million, respectively, in fair value of MSR's received as part of proceeds on sales.

We have been able to sustain our margins through growth in our consumer direct mortgage loan activities, which generally produce higher margins than correspondent activities. In addition, the margins on correspondent government-insured or guaranteed mortgage loans have not been adversely affected over recent periods as much as conventional correspondent production. Government-insured or guaranteed mortgage lending is not as competitive as conventional conforming mortgage lending due to the added complexity and licensing involved in the origination and servicing of government-insured or guaranteed mortgage loans.

Our net gains on mortgage loans held for sale include both cash and non-cash elements. We receive proceeds on sale that include both cash and our estimate of the fair value of MSR's. We also recognize a liability for our estimate of the losses we expect to incur in the future as a result of our breach of representations and warranties created in the loan sales transactions.

Interest Rate Lock Commitments

We recognize a substantial portion of our gain on mortgage loans held for sale at fair value before we fund or purchase the loan. Our net gains on mortgage loans held for sale include our estimates of gains and losses that we expect to realize upon the sale of loans we have committed to purchase but have not yet purchased or sold. In the course of our loan production activities, we make contractual commitments to PMT and to mortgage loan applicants to purchase or fund mortgage loans at specified terms. We call these commitments interest rate lock commitments (IRLCs). We recognize the fair value of IRLCs at the time we make a commitment to PMT or the borrower and adjust the fair value of such IRLCs as the loan approaches the point of purchase or at the time the transaction is canceled. The fair value of IRLCs represents the expected value of the gain we expect to realize on the sale of the mortgage loan including the probability that we will acquire or fund the loan (the pull-through rate).

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

We carry IRLCs as either derivative assets or derivative liabilities on our consolidated balance sheet. The fair value of IRLCs is transferred to the fair value of mortgage loans held for sale at fair value when the mortgage loan is funded.

An active, observable market for IRLCs does not exist. Therefore, we estimate the fair value of IRLCs using methods and inputs we believe that market participants use in pricing IRLCs. We estimate the fair value of an IRLC based on quoted Agency MBS prices, our estimate of the fair value of the MSR that we expect to receive upon sale of the loans and the pull-through rate. We update our estimates of the value of the IRLCs as the mortgage loans move through the purchase or loan process for changes in our estimate of the probability the loan will fund and for changes in market interest rates.

Table of Contents

Pull-through rates and MSR fair values are based on our estimates as these inputs are difficult to observe in the mortgage marketplace. Significant changes in the pull-through rate and the MSR component of the IRLCs, in isolation, could result in a significant change in fair value measurement. The financial effects of changes in these assumptions are generally inversely correlated as increasing interest rates have a positive effect on the fair value of the MSR component of IRLC value, but rising interest rates increase the pull-through rate for loans that have decreased in fair value.

Following is a quantitative summary of key unobservable inputs we used in the valuation of IRLCs:

Key inputs	September 30, 2014	December 31, 2013

MSRs

MSRs represent the value of a contract that obligates us to service mortgage loans on behalf of the purchaser of the loan in exchange for servicing fees and the right to collect certain ancillary income from the borrower. We initially recognize MSRs at our estimate of the fair value of the contract to service the loans.

As economic fundamentals influence the loans we sell with servicing rights retained, our estimate of cash flows that we will receive under these contracts, and therefore the fair value of MSRs, will also change. As a result, we will record changes in fair value as a component of *Net loan servicing fees* for the MSRs we carry at fair value, and we may recognize changes in fair value relating to our MSRs carried at the lower of amortized cost or fair value depending on the relationship of the asset's fair value to its carrying value at the measurement date.

(1) Pricing spread represents a margin that is applied to a reference interest rate's forward rate curve to develop periodic discount rates. The Company applies a pricing spread to the United States Dollar LIBOR curve for purposes of discounting cash flows relating to MSR's resulting from the sale of mortgage loans.

(2) Annual total prepayment speed is measured using Life Total Conditional Prepayment Rate (CPR).

Table of Contents*Provision for Losses on Representations and Warranties*

We also provide for our estimate of the losses that we expect to incur in the future as a result of our breach of representations and warranties provided to the purchasers of the loans we sold. Our agreements with the Agencies include representations and warranties related to the loans we sell to the Agencies. The representations and warranties require adherence to Agency origination and underwriting guidelines, including but not limited to the validity of the lien securing the loan, property eligibility, borrower credit, income and asset requirements, and compliance with applicable federal, state and local law.

In the event of a breach of our representations and warranties, we may be required to either repurchase the mortgage loans with the identified defects or indemnify the investor or insurer. In such cases, we bear any subsequent credit loss on the mortgage loans. Our credit loss may be reduced by any recourse we have to correspondent lenders that sold such mortgage loans and breached similar or other representations and warranties. In such event, we have the right to seek a recovery of related repurchase losses from that correspondent lender.

The method used to estimate our losses on representations and warranties is a function of estimated future defaults, loan repurchase rates, our estimate of the severity of loss in the event of defaults and the probability of reimbursement by the correspondent loan seller. We establish a liability at the time loans are sold and review our liability estimate on a periodic basis.

During the quarter and nine months ended September 30, 2014, we recorded provisions for losses on representations and warranties totaling \$1.6 million and \$3.6 million, respectively. This compares to \$1.1 million and \$3.8 million during the quarter and nine months ended September 30, 2013, respectively. The increase in the quarter ended September 30, 2014 as compared to the quarter ended September 30, 2013 was primarily due to an increase in the volume of loan sales activity during 2014 as compared to 2013.

Following is a summary of the repurchase activity and unpaid balance of mortgage loans subject to representations and warranties:

Unpaid principal balance of mortgage loans subject to representations and warranties	\$	33,660,189	\$	20,428,213
---	----	------------	----	------------

During the quarter and nine months ended September 30, 2014, we repurchased mortgage loans with unpaid principal balances totaling \$1.0 million and \$2.7 million, respectively. We recorded no losses as a result of these repurchases as a result of our ability to recover our repurchase losses from the selling correspondent lenders. As the outstanding balance of loans we purchase and sell subject to representations and warranties increases and the loans sold continue to season, we expect the level of repurchase activity to increase.

The level of the liability for losses on representations and warranties is difficult to estimate and requires considerable management judgment. The level of mortgage loan repurchase losses is dependent on economic factors, investor loss mitigation strategies, our ability to recover any losses inherent in repurchased loans from the correspondent lenders and other external conditions that may change over the lives of the underlying loans. As economic fundamentals change, as investor and Agency evaluation of their loss mitigation strategies (including claims under representations and warranties) change and as the mortgage market and general economic conditions affect our correspondent lenders, the level of ensuing losses will change and such changes may be material to us. As a result of these changes we may be required to adjust the estimate of our liability for representations and warranties. Such an adjustment may be material to our financial condition and results of operations. We did not record any adjustments to previously recorded liabilities for representations and warranties during any of the periods presented.

Our representations and warranties are generally not subject to stated limits of exposure. However, we believe that the current UPB of loans sold by us to date represents the maximum exposure to repurchases related to representations and warranties. We believe the amount and range of reasonably possible losses in relation to the recorded liability is not material to our financial condition or results of operations.

Table of Contents*Other Loan Production-Related Revenues*

Loan origination fees increased \$5.5 million and \$10.8 million, respectively, in the quarter and nine months ended September 30, 2014 compared to the same periods in 2013. The increase was primarily due to increases in certain fees we charge in our loan production activities.

Loan fulfillment fees from PMT represent fees we collect for services we perform on behalf of PMT in connection with its acquisition, packaging and sale of mortgage loans. Fulfillment fees decreased \$2.8 million and \$31.8 million, respectively, in the quarter and nine months ended September 30, 2014 compared to the same periods in 2013. The decreases are due to reductions in the volume of Agency-eligible mortgage loans we fulfilled on behalf of PMT and a combination of contractual and discretionary reductions in the fulfillment fee rate charged to PMT. The loan fulfillment fees are calculated as a percentage of the UPB of the mortgage loans we fulfill for PMT. Summarized below are our fulfillment fees:

	Quarter ended September 30,		Nine months ended September 30,

During the quarter and nine months ended September 30, 2014, net loan servicing fees increased \$32.5 million and \$95.1 million, respectively, when compared to the same periods in 2013. The increase in the nine months ended September 30, 2014 was primarily due to:

- an increase of \$88.7 million in loan servicing fees from non-affiliates resulting from growth in our portfolio of loans serviced due to purchases of MSR's and ongoing sales of mortgage loans with servicing rights retained, partially offset by the sale of MSR's relating to a portfolio backed by distressed mortgage loans;
- an increase of \$15.1 million in loan servicing fees from our Advised Entities primarily due to activity-based fees, relating to their sale of reperforming mortgage loans along with continuing growth in PMT's MSR portfolio which we subservice;
- an increase of \$8.9 million in ancillary fees due to growth in the portfolios of mortgage loans serviced.

The increase in servicing fees during the quarter ended September 30, 2014 as compared to the quarter ended September 30, 2013 is similarly due to growth in our and PMT's servicing portfolios.

	\$ 646,522	\$ 227,505	\$ 566,281	\$ 176,034

Amortization, impairment and change in estimated fair value of mortgage servicing rights increased \$2.6 million and \$17.5 million, respectively, for the quarter and nine months ended September 30, 2014 compared to the same periods in 2013. The increase in *Amortization, impairment and change in estimated fair value of mortgage servicing rights* was primarily due to growth in our investment in MSR, which caused an increase in amortization of the asset, and to impairment, reflecting expectations for higher prepayment speeds as a result of lower interest rates throughout most of the period; partially offset with the positive change in fair value of the excess servicing spread financing.

Change in fair value and reversal of (provision for) impairment of MSR carried at lower of amortized cost or fair value during the quarter ended September 30, 2014 reflect the positive effects on fair value of increased mortgage interest rates at the end of the quarter.

Impairment and changes in fair value of MSR have a significant effect on net servicing fees, driven primarily by our monthly re-estimation of the fair value of MSR. As our investment in MSR grows, we expect that the effect of impairment and changes in fair value will have an increasing influence on our net income. The fair value of MSR reacts to changes in interest rates. Decreasing interest rates encourage increased borrower refinancing activity. Increased borrower refinancing activity shortens the life of our MSR assets, thereby reducing the income that we expect to receive from such assets and, by extension, MSR fair value.

The fair value of MSR is difficult to determine because MSR are not actively traded in observable markets. Considerable judgment is required to estimate the fair values of these assets and the exercise of such judgment can significantly affect our income. Because the fair value of MSR is difficult to estimate, our process includes performance of the valuation by a specialized staff and significant executive management oversight. We have assigned the responsibility for estimating the fair values of MSR and other Level 3 financial statement items to our Financial Analysis and Valuation group (the FAV group), which is responsible for valuing and monitoring our Level 3 financial statement items and maintenance of our valuation policies and procedures. The FAV group reports to our valuation committee, which oversees and approves the valuations. The

valuation committee includes our chief executive, financial, operating, credit, and asset/liability management officers.

Our MSR valuation process combines the use of a discounted cash flow model and analysis of current market data to arrive at an estimate of fair value at each balance sheet date. The cash flow and prepayment inputs used in our discounted cash flow model are based on market factors and include the historical performance of our MSRs, which we believe are consistent with inputs and data used by market participants valuing similar MSRs.

The key inputs used in the valuation of MSRs include mortgage prepayment and default rates of the underlying loans, the applicable discount rate, and cost to service loans. These inputs can, and generally do, change from period to period as market conditions change. Therefore, our estimate of the fair value of MSRs changes from period to period. A shift in the market for MSRs or a change in management's assessment of an input to the valuation of MSRs can have a significant effect on the fair value of MSRs and on our income for the period.

Table of Contents

We account for MSR's at either our estimate of the asset's estimated fair value with changes in fair value recorded in current period income or using the amortization method with the MSR's carried at the lower of amortized cost or estimated fair value based on how we finance certain of our MSR purchases and whether we believe the underlying mortgages are sensitive to prepayments resulting from changing market interest rates. We have identified an initial mortgage interest rate of 4.5% for MSR's originated through our loan production activities as the threshold for whether such mortgage loans are sensitive to changes in interest rates:

- Our risk management efforts in connection with purchased MSR's and MSR's relating to mortgage loans originated through our loan production activities with initial interest rates of more than 4.5% are aimed at moderating the effects of changes in interest rates on the assets values.
- For MSR's relating to mortgage loans with initial interest rates of less than or equal to 4.5% that were acquired as a result of our loan production activities, we have concluded that such assets present different risks than MSR's relating to mortgage loans with initial interest rates of more than 4.5% and therefore require a different risk management approach. Our risk management efforts relating to these assets are aimed at moderating the effects of non-interest rate risks on fair value, such as the effect of changes in home prices on the assets' values. We have identified these assets for accounting using the amortization method.
- MSR's purchased for which a financing in the form of ESS cash flows has been recorded are accounted for at fair value. The ESS financing at fair value is accounted for at fair value to align the accounting for the MSR with the related liability.

Our MSR's are summarized by the basis on which we account for the assets below:

Management fees from PMT increased \$1.1 million and \$3.1 million in the quarter and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. The increase was due primarily to:

- Base management fees increased by \$929,000 or 18% and \$3.3 million or 24% in the quarter and nine months ended September 30, 2014, respectively, compared to the same periods in 2013 due to an increase in PMT's shareholders' equity upon which its management fee is based.
- Performance incentive fees increased \$155,000 and decreased \$226,000 during the quarter and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. We began to recognize performance incentive fees as a result of the amendment to our management agreement with PMT effective February 1, 2013, which changed the basis on which profitability is measured for incentive fee purposes. Under the amended agreement, profitability is primarily based on net income for a rolling four-quarter period determined in compliance with U.S. GAAP. Previously, the agreement based profitability on U.S. GAAP net income generally excluding non-cash gains and losses.

Management fees from the Investment Funds decreased \$245,000 and \$12,000 in the quarter and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. The decrease was due to decreases in the Investment Funds' net asset values as a result of continued distributions to the Investment Funds' investors following the end of the Investment Funds' commitment periods at December 31, 2011, which reduced the investment base on which the management fees are computed.

Carried Interest from Investment Funds decreased \$910,000 and \$4.5 million in the quarter and nine months ended September 30, 2014, respectively, compared to the same period in 2013. Observed market demand for distressed loans, changes in the fair value of the loans as they proceed through the resolution process and continuing increases in collateral valuations for the properties underlying the Funds' mortgage loans in the quarter and nine months ended September 30, 2013 resulted in valuation gains. This was not repeated in the same magnitude and the Funds' investment portfolios are substantially smaller in the quarter and nine months ended September 30, 2014 as compared to the comparable periods in 2013.

Other revenues

Net interest expense increased \$3.7 million and \$7.1 million during the quarter and nine months ended September 30, 2014, respectively, compared to the same periods in 2013 due to growth in our investments in non-interest earning assets primarily MSR's which are financed in part with ESS financing. Income from MSR's is included in *Net loan servicing fees*.

The results of our holdings of common shares of PMT, which is included in *Changes in fair value of investment in, and dividends received from PMT* are summarized below:

Change in fair value of investment in and dividends received from PMT decreased \$157,000 and increased \$88,000 during the quarter and nine months ended September 30, 2014, respectively, when compared to the same periods in 2013. The decrease during the quarter ended September 30, 2014 was primarily due to a decrease in the fair value of our investment in common shares of PMT. The increase during the nine months ended September 30, 2014 was primarily due to a smaller decrease in the fair value of our investment in common shares of PMT as compared to the same period in 2013. During the periods ended September 30, 2014 and 2013, we held 75,000 common shares of PMT.

Compensation expense increased \$12.5 million and \$24.4 million, respectively, in the quarter and nine months ended September 30, 2014 compared to the same periods in 2013. The increase in compensation expense was primarily due to the development of and growth in our loan servicing segment. In addition, incentive compensation increased quarter over quarter due to changes in management's expectation of fiscal year financial performance compared to established targets. The increase in compensation for the nine months ended September 30, 2014 as compared to the nine months ended September 30, 2013 includes increased stock-based compensation expense as a result of employee and director equity awards granted late in the second quarter of 2013, partially offset by \$1.1 million and \$1.6 million of a cumulative expense reversal of certain performance condition RSU awards for the quarter and nine months ended September 30, 2014, respectively.

Loan origination expense decreased \$1.9 million for the nine months ended September 30, 2014 compared to the same period in 2013. The decrease was due to decreased loan production in 2014 compared to 2013.

Technology expense increased \$1.8 million and \$4.7 million, respectively, in the quarter and nine months ended September 30, 2014 compared to the same periods in 2013. The increase was due to growth in loan servicing operations and continued investment in loan production and servicing infrastructure.

Servicing expense increased \$12.0 million and \$23.6 million, respectively, in the quarter and nine months ended September 30, 2014 compared to the same periods in 2013. The increase was due to growth in our mortgage servicing portfolio and the initiation of an early buyout (EBO) program to purchase defaulted loans out of legacy Ginnie Mae pools. During the quarter and nine months ended September 30, 2014, we purchased \$217.5 million and \$897.4 million, respectively, in UPB of EBOs, producing current period expense as accumulated net interest advances are charged to servicing expense when the loans are purchased from the Ginnie Mae pools. The financial benefit of the EBO program is to reduce future servicing costs by purchasing and either selling the defaulted loans or otherwise financing them with debt at interest rates below the Ginnie Mae MBS pass-through rates rather than advancing principal and interest on such defaulted loans at the Ginnie Mae MBS pass-through rate until liquidation.

Table of Contents*Expenses Allocated to PMT*

PMT reimburses us for other expenses, including common overhead expenses incurred on its behalf by us, in accordance with the terms of our management agreement with PMT. The expense amounts presented in our income statement are net of these allocations. Expense amounts allocated to PMT during the periods ended September 30, 2014 and 2013 are summarized below:

	Quarter ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013

Other	454	729	1,565	2,335
Total expenses	\$ 2,802	\$ 2,527	\$ 8,018	\$ 7,793

The amount of total expenses that we allocated to PMT remained generally consistent in the quarter and nine months ended September 30, 2014 compared to the same periods in 2013.

Provision for Income Taxes

For the quarter and nine months ended September 30, 2014, our effective tax rates were 11.5% and 11.4%, respectively. For the quarter and nine months ended September 30, 2013, our effective tax rates were 9.9% and 4.0%, respectively. The difference between our effective tax rate and the statutory rate is primarily due to the allocation of earnings to the noncontrolling interest unitholders. As the noncontrolling interest unitholders convert their ownership units into our shares, we expect an increase in allocated earnings that will be subject to corporate federal and state statutory tax rates, which will in turn increase our effective income tax rate.

Table of Contents

Total assets increased \$954.2 million from \$1.6 billion at December 31, 2013 to \$2.5 billion at September 30, 2014. The increase was primarily due to an increase of \$729.0 million in mortgage loans held for sale at fair value primarily related to the initiation of the EBO program and an increase of \$193.7 million in MSRs, resulting from growth in our mortgage banking operations and purchases of MSRs, partially offset by a decrease in short-term investments of \$106.2 million as we deployed cash and proceeds from issuance of ESS to fund balance sheet growth.

Total liabilities increased by \$816.9 million from \$955.3 million as of December 31, 2013 to \$1.8 billion as of September 30, 2014. The increase was primarily attributable to an increase in mortgage loans sold under agreements to repurchase of \$458.2 million, an increase in sales of mortgage loan participation certificates of \$142.4 million, an increase in note payable of \$102.8 million, and an increase in liabilities relating to the sale of ESS to PMT of \$48.6 million.

Cash Flows

Comparison of nine-month periods ended September 30, 2014 and 2013

Our cash flows resulted in a net increase in cash of \$46.6 million during the nine months ended September 30, 2014. Cash used in operating activities totaled \$695.1 million during the nine months ended September 30, 2014. The cash used in operating activities was primarily due to growth of our inventory of mortgage loans held for sale as a result of our loan production and EBO purchases of loans exceeding loan sales.

Net cash provided by investing activities was \$1.2 million during the nine months ended September 30, 2014. The net cash provided by investing activities was primarily a result of the decrease in short term investments and proceeds from the sale of MSRs exceeding cash used for the purchase of MSRs.

Net cash provided by financing activities was \$740.5 million during the nine months ended September 30, 2014. Cash provided by financing activities was primarily an increase in loans sold under agreements to repurchase used to finance the growth in our inventory of mortgage loans held for sale discussed above.

Liquidity and Capital Resources

Our liquidity reflects our ability to meet our current obligations (including our operating expenses and, when applicable, the retirement of, and margin calls relating to, our debt, and margin calls relating to hedges on our commitments to purchase or originate mortgage loans), fund new originations and purchases, and make investments as we identify them. We expect our primary sources of liquidity to be through cash flows from business activities, earnings on our investments and proceeds from borrowings, proceeds from and issuance of ESS and/or additional equity offerings. We believe that our liquidity is sufficient to meet our current liquidity needs.

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

Our current leverage strategy is to finance our assets where we believe such borrowing is prudent, appropriate and available. Our borrowing activities are in the form of sales of mortgage loans under agreements to repurchase, sales of mortgage loan participation certificates, ESS financing and a note payable secured by MSR and loan servicing advances.

Our repurchase agreements represent the sales of mortgage loans together with agreements for us to buy back the mortgage loans at a later date. During the nine months ended September 30, 2014, the average balance outstanding under agreements to repurchase mortgage loans totaled \$505.1 million, and the maximum daily amount outstanding under such agreements totaled \$1.0 billion. During the nine months ended September 30, 2013, the average balance outstanding under agreements to repurchase mortgage loans totaled \$354.1 million, and the maximum daily amount outstanding under such agreements totaled \$623.5 million.

The difference between the maximum and average daily amounts outstanding is due to increases in the sizes and utilization of our existing facilities, all in support of the growth in our mortgage loan production and investment activities.

All of our borrowings discussed above, other than ESS, have short-term maturities. The transactions relating to mortgage loans under agreements to repurchase mature between January 30, 2015 and October 30, 2015 and provide for the repurchase from major financial institution counterparties based on the estimated fair value of the mortgage loans sold. Our mortgage loan participation and sale agreement has a maturity date of January 30, 2015. Our note payable secured by MSR and loan servicing advances at fair value has a maturity date of October 30, 2015.

Table of Contents

PLS's debt financing agreements require it to comply with various financial covenants. The most significant financial covenants currently include the following:

- positive net income during each calendar quarter;
- a minimum in unrestricted cash and cash equivalents of \$20 million;
- a minimum tangible net worth of \$200 million;
- a maximum ratio of total liabilities to tangible net worth of 10:1; and
- at least one other warehouse or repurchase facility that finances amounts and assets similar to those being financed under our existing debt financing agreements.

Although these financial covenants limit the amount of indebtedness that we may incur and affect our liquidity through minimum cash reserve requirements, we believe that these covenants currently provide us with sufficient flexibility to successfully operate our business and obtain the financing necessary to achieve that purpose.

With respect to servicing that we perform for PMT, we are also subject to certain covenants under its debt agreements. These covenants are as or less restrictive than those above.

Our debt financing agreements also contain margin call provisions that, upon notice from the applicable lender at its option, require us to transfer cash or, in some instances, additional assets in an amount sufficient to eliminate any margin deficit. A margin deficit will generally result from any decline in the market value (as determined by the applicable lender) of the assets subject to the related financing agreement. Upon notice from the applicable lender, we will generally be required to satisfy the margin call on the day of such notice or within one business day thereafter, depending on the timing of the notice.

We have purchased portfolios of MSRs and have financed them in part through the sale to PMT of the right to receive ESS. The repayment of the ESS financing is based on amounts received on the underlying mortgage loans.

We continue to explore a variety of additional means of financing our continued growth, including debt financing through bank warehouse lines of credit, additional repurchase agreements and corporate debt. However, there can be no assurance as to how much additional financing capacity such efforts will produce, what form the financing will take or whether such efforts will be successful.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Off-Balance Sheet Arrangements and Guarantees

As of September 30, 2014, we have not entered into any off-balance sheet arrangements or guarantees.

Contractual Obligations

As of September 30, 2014, we had on-balance sheet contractual obligations of \$929.7 million to finance assets under agreements to repurchase under facilities with maturities between October 31, 2014 and September 7, 2015 and \$142.4 million to finance assets under our mortgage loan participation and sale agreement with a maturity date of October 31, 2014. We also had a contractual obligation of \$154.9 million relating to a note payable secured by MSRs and loan servicing advances at fair value and with a maturity date of October 31, 2014. We also lease our primary office facilities under an agreement that expires on February 28, 2017 and we license certain software to support our loan servicing operations.

Total	\$ 7,300,761	\$ 7,279,118	\$ 15,641	\$ 3,032	\$ 2,970

(1) The contractual obligations relate to our mortgage loan acquisition obligations to affiliates and non-affiliates and our obligation to sell mortgage loans.

(2) Software licenses include both volume and activity-based fees that are dependent on the number of loans serviced during each period and include a base fee of approximately \$490,000 per year. Estimated payments for software licenses above are based on the number of loans currently serviced by us, which totaled approximately 482,000 at September 30, 2014. Future amounts due may significantly fluctuate based on changes in the number of loans serviced by us. Software license fees totaled \$4.5 million and \$11.3 million, respectively, for the quarter and nine months ended September 30, 2014. All figures contained in this footnote are in actual amounts and not in thousands (in contrast to the table above).

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to our assets sold under agreements to repurchase is summarized by counterparty below as of September 30, 2014:

Counterparty	Amount at risk (in thousands)	Weighted-average maturity of advances under repurchase agreement	Facility Maturity
Credit Suisse First Boston			
Mortgage Capital LLC	\$ 105,334		October 31, 2014
Bank of America, N.A.	\$ 41,811	December 21, 2014	January 30, 2015
Morgan Stanley	\$ 11,080	November 19, 2014	June 29, 2015
Citibank, N.A.	\$		September 7, 2015

Debt Obligations

As described further above in *Liquidity and Capital Resources*, we currently finance certain of our assets through borrowings with major financial institution counterparties in the form of sales of mortgage loans under agreements to repurchase, and a note payable secured by MSRs and loan servicing advances. The borrower under each of these facilities is PLS, and all obligations thereunder are guaranteed by Private National Mortgage Acceptance Company, LLC.

Under the terms of these agreements, PLS is required to comply with certain financial covenants, as described further above in *Liquidity and Capital Resources*, and various non-financial covenants customary for transactions of this nature. As of September 30, 2014, we were in compliance in all material respects with these covenants.

The agreements also contain margin call provisions that, upon notice from the applicable lender, require us to transfer cash or, in some instances, additional assets in an amount sufficient to eliminate any margin deficit. Upon notice from the applicable lender, we will generally be required to satisfy the margin call on the day of such notice or within one business day thereafter, depending on the timing of the notice.

Table of Contents

In addition, the agreements contain events of default (subject to certain materiality thresholds and grace periods), including payment defaults, breaches of covenants and/or certain representations and warranties, cross-defaults, guarantor defaults, servicer termination events and defaults, material adverse changes, bankruptcy or insolvency proceedings and other events of default customary for these types of transactions. The remedies for such events of default are also customary for these types of transactions and include the acceleration of the principal amount outstanding under the agreements and the liquidation by our lenders of the mortgage loans or other collateral then subject to the agreements.

All of PLS's borrowings discussed above have short-term maturities that expire as follows:

Counterparty (1)	Outstanding Indebtedness (2) (in thousands)	Committed Amount	Maturity Date (3)
Bank of America, N.A.	\$ 224,169	\$ 225,000	January 30, 2015

Citibank, N.A.	\$	\$ 50,000	September 7, 2015

(1) The borrowings with Bank of America, N.A., Citibank, N.A. and Credit Suisse First Boston Mortgage Capital LLC (with a committed amount of \$800 million) are in the form of sales of mortgage loans under agreements to repurchase. The borrowing with Credit Suisse First Boston Mortgage Capital LLC (with a committed amount of \$117 million) is in the form of a note payable secured by certain MSRs and loan servicing advances.

(2) Represents outstanding indebtedness reduced by cash collateral as of September 30, 2014.

(3) Represents maturity date, as of September 30, 2014.

Quantitative and Qualitative Disclosures about Market Risk

Market risk is the exposure to loss resulting from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices, real estate values and other market-based risks. The primary market risks that we are exposed to are credit risk, interest rate risk, prepayment risk, inflation risk and market value risk.

The following sensitivity analyses are limited in that they were (i) performed at a particular point in time, (ii) only contemplate certain movements in interest rates, (iii) do not incorporate changes in interest rate volatility or changes in the relationship of one interest rate index to another, (iv) are subject to the accuracy of various models and assumptions used, including prepayment forecasts and discount rates, and (v) do

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

not incorporate other factors that would affect our overall financial performance in such scenarios, including operational adjustments made by management to account for changing circumstances. For these reasons, the following estimates should not be viewed as an earnings forecast.

Factors That May Affect Our Future Results

This Report contains certain forward- looking statements that are subject to various risks and uncertainties. Forward- looking statements are generally identifiable by use of forward-looking terminology such as may, will, should, potential, intend, expect, seek, anticipate, approximately, believe, could, project, predict, continue, plan or other similar words or expressions. Forward-looking statements are based on certain assumptions, discuss future expectations, describe future plans and strategies, contain financial and operating projections or state other forward- looking information. Examples of forward-looking statements include the following:

- Projections of our revenues, income, earnings per share, capital structure or other financial items;
- Descriptions of our plans or objectives for future operations, products or services;
- Forecasts of our future economic performance, interest rates, profit margins and our share of future markets; and
- Descriptions of assumptions underlying or relating to any of the foregoing expectations regarding the timing of generating any revenues.

Our ability to predict results or the actual effect of future events, actions, plans or strategies is inherently uncertain. Although we believe that the expectations reflected in such forward-looking statements are based on reasonable assumptions, our actual results and performance could differ materially from those set forth in the forward-looking statements. There are a number of factors, many of which are beyond our control that could cause actual results to differ significantly from management's expectations. Some of these factors are discussed below.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties discussed elsewhere in this Report and as set forth in Item IA. of Part II hereof and the section entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2013, filed with the SEC on March 14, 2014.

Factors that could cause actual results to differ materially from historical results or those anticipated include but are not limited to:

- The continually changing federal, state and local laws and regulations applicable to the highly regulated industry in which we operate;

Edgar Filing: PENNYMAC FINANCIAL SERVICES, INC. - Form 10-Q

- Lawsuits or governmental actions if we do not comply with the laws and regulations applicable to our businesses;
- The creation of the Consumer Financial Protection Bureau (CFPB), its recently effective and future rules and the enforcement thereof by the CFPB;
- Changes in existing U.S. government-sponsored entities, their current roles or their guarantees or guidelines;
- Changes to government mortgage modification programs;
- The licensing and operational requirements of states and other jurisdictions applicable to our businesses, to which our bank competitors are not subject;
- Foreclosure delays and changes in foreclosure practices;
- Certain banking regulations that may limit our business activities;
- Changes in macroeconomic and U.S. residential real estate market conditions;
- Difficulties inherent in growing loan production volume;
- Difficulties inherent in adjusting the size of our operations to reflect changes in business levels;
- Purchase opportunities for mortgage servicing rights and our success in winning bids;

Table of Contents

- Changes in prevailing interest rates;
- Increases in loan delinquencies and defaults;
- Our reliance on PMT as a significant source of financing for, and revenue related to, our mortgage banking business;
- Any required additional capital and liquidity to support business growth that may not be available on acceptable terms, if at all;
- Our obligation to indemnify third-party purchasers or repurchase loans if loans that we originate, acquire, service or assist in the fulfillment of, fail to meet certain criteria or characteristics or under other circumstances;
- Our obligation to indemnify PMT and the Investment Funds if our services fail to meet certain criteria or characteristics or under other circumstances;
- Decreases in the historical returns on the assets that we select and manage for our clients, and our resulting management and incentive fees;
- The extensive amount of regulation applicable to our investment management segment;
- Conflicts of interest in allocating our services and investment opportunities among ourselves and our Advised Entities;
- The potential damage to our reputation and adverse impact to our business resulting from the ongoing negative publicity focused on Countrywide Financial Corporation, given the former association of certain of our officers with that entity; and
- Our recent rapid growth.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

In response to this Item, the information set forth on pages 74 to 76 of this Report is incorporated herein by reference.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Under the supervision and with the participation of management, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures as required by Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act) as of September 30, 2014. Based upon our evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective, as of September 30, 2014, to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. No matter how well a control system is designed and operated, it can provide only reasonable, not absolute, assurance that it will detect or uncover control issues and instances of fraud, if any, within the Company to disclose material information otherwise required to be set forth in our periodic reports.
