Notes to Condensed Consolidated Financial Statements

(Amounts in Thousands, Except per Share Amounts, or as Otherwise Indicated)

(Unaudited)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

The accompanying Unaudited Condensed Consolidated Financial Statements include the accounts of AptarGroup, Inc. and our subsidiaries. The terms AptarGroup or Company as used herein refer to AptarGroup, Inc. and our subsidiaries. All significant intercompany accounts and transactions have been eliminated. Certain previously reported amounts have been reclassified to conform to the current period presentation.

In the opinion of management, the Unaudited Condensed Consolidated Financial Statements include all adjustments, consisting of only normal recurring adjustments, necessary for a fair statement of consolidated financial position, results of operations, comprehensive income, changes in equity and cash flows for the interim periods presented. The accompanying Unaudited Condensed Consolidated Financial Statements have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures made are adequate to make the information presented not misleading. Also, certain financial position data included herein was derived from the Audited Consolidated Financial Statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2014 but does not include all disclosures required by GAAP. Accordingly, these Unaudited Condensed Consolidated Financial Statements and related notes should be read in conjunction with the Audited Consolidated Financial Statements and notes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2014. The results of operations of any interim period are not necessarily indicative of the results that may be expected for the year.

CHANGE IN ACCOUNTING PRINCIPLE

During the second quarter of 2015, the Company changed its inventory valuation method for certain operating entities in its North American business to the first-in first-out (FIFO) method from the last-in first-out (LIFO) method. Prior to the change, the Company utilized two methods of inventory costing: LIFO for inventories in these operating entities and FIFO for inventories in other operating entities. The Company believes that the FIFO method is preferable as it better reflects the current value of inventory on the Company s Condensed Consolidated Balance Sheet, provides better matching of revenues and expenses, results in uniformity across the Company s global operations with respect to the method of inventory accounting and improves comparability with the Company s peers. The cumulative pre-tax effect of this change is a gain of approximately \$7.4 million and was recognized as a decrease to Cost of sales (exclusive of depreciation and amortization). The effect of the change on Net Income Attributable to AptarGroup was approximately \$4.8 million, representing approximately \$0.08 per diluted share. We have determined that this change is not material to the Company s previously issued financial statements and that the cumulative effect of the change is not material to current operations or to the trend of reported results of operations. Therefore, we conclude it was appropriate to recognize the cumulative effect of the change as an operating item in the current period s Condensed Consolidated Statement of Income and not to adopt the change by retrospective application.

ADOPTION OF RECENT ACCOUNTING PRONOUNCEMENTS

Changes to GAAP are established by the Financial Accounting Standards Board (FASB) in the form of accounting standards updates to the FASB s Accounting Standards Codification. During the first nine months of 2015, there have been no developments to the recently adopted accounting pronouncements from those disclosed in the Company s 2014 Annual Report on Form 10-K that are considered to have a material impact on our Unaudited Condensed Consolidated Financial Statements.

SHORT TERM INVESTMENTS

Short term investments reflect funds invested in a time deposit instrument with a two-year maturity. However, during the life of the investment the funds can be redeemed at any time with a 35-90 day notice. There are no penalties for early redemption. We do not consider this investment a marketable security as there is no active market for this type of product.

RETIREMENT OF TREASURY SHARES

During the third quarter of 2015, the Company retired 20 million shares of treasury stock. Common stock was reduced by the number of shares retired at \$0.01 par value while treasury stock was reduced by the purchase price of the shares retired. The excess of purchase price over par or stated value may be charged entirely to retained earnings or may be allocated between additional paid-in capital and retained earnings. The Company has elected to allocate the excess purchase price over par value between additional paid-in capital and retained earnings subject to the limitations stated in ASC 505-30-30-8 regarding accounting for treasury share retirements.

INCOME TAXES

The Company computes taxes on income in accordance with the tax rules and regulations of the many taxing authorities where income is earned. The income tax rates imposed by these taxing authorities may vary substantially. Taxable income may differ from pre-tax income for financial accounting purposes. To the extent that these differences create differences between the tax basis of an asset or liability and our reported amount in the financial statements, an appropriate provision for deferred income taxes is made.

In making the determination of which foreign earnings are permanently reinvested in foreign operations, the Company considers numerous factors, including the financial requirements of the U.S. parent company and those of our foreign

Table of Contents

subsidiaries, the U.S. funding needs for dividend payments and stock repurchases, and the tax consequences of remitting earnings to the U.S. From this analysis, current year repatriation decisions are made in an attempt to provide a proper mix of debt and shareholder capital both within the U.S. and for non-U.S. operations. The Company's policy is to permanently reinvest our accumulated foreign earnings and the Company will only make a distribution out of current year earnings to meet the cash needs at the parent company. As such, the Company does not provide for taxes on earnings that are deemed to be permanently reinvested. Since no distribution to the U.S. of foreign earnings is expected in 2015, the effective tax rate for 2015 includes no tax cost of repatriation.

The Company provides a liability for the amount of tax benefits realized from uncertain tax positions. This liability is provided whenever the Company determines that a tax benefit will not meet a more-likely-than-not threshold for recognition. See Note 4 of the Unaudited Notes to the Condensed Consolidated Financial Statements for more information.

REVISION OF PRIOR PERIOD FINANCIAL STATEMENTS

During the third quarter of 2015, the Company determined that it had incorrectly accounted for the reissuance of treasury shares in connection with certain employee stock option exercises. The Company's policy is to reissue treasury shares at cost on a first-in, first-out (FIFO) basis. However, beginning in 2007 shares were reissued at a cost other than FIFO. The effect of correcting this error results in a credit adjustment to the treasury stock at cost with a corresponding debit adjustment to the capital in excess of par value. As this adjustment represents a reclassification between two accounts within Stockholders' Equity, the Condensed Consolidated Balance Sheets and the Condensed Consolidated Statements of Changes in Equity are impacted by this change. The revisions, which the Company determined are not material, had no impact on consolidated results of operations or cash flows. Following is a summary of the previously issued financial statement line items impacted by this revision for all periods and statements included in this report:

	Year Ended December 31, 2014

Total	\$ 310,844	\$ 311,072

Table of Contents

As discussed in Note 1 above, the Company changed its inventory valuation method for certain operating entities in its North American business to the first-in first-out (FIFO) method from the last-in first-out (LIFO) method during the second quarter of 2015. Had this change not been implemented, the Company would have reported a LIFO reserve for the current quarter ended September 30, 2015 of \$6,105 as compared to \$7,769 for the fiscal year ended December 31, 2014.

Aggregate amortization expense for the intangible assets above for the nine months ended September 30, 2015 and 2014 was \$3,237 and \$4,050, respectively.

Future estimated amortization expense for the years ending December 31 is as follows:

2015	\$	1,025	(remaining estimated amortization for 2015)
2016		3,747	
2017		3,323	
2018		3,322	
2019 and thereafter		23,711	

Future amortization expense may fluctuate depending on changes in foreign currency rates. The estimates for amortization expense noted above are based upon foreign exchange rates as of September 30, 2015.

NOTE 4 INCOME TAX UNCERTAINTIES

The Company had approximately \$5.4 and \$6.4 million recorded for income tax uncertainties as of September 30, 2015 and December 31, 2014, respectively. The \$1.0 million decrease in income tax uncertainties was primarily due to the settlement of various tax audits in 2015 as well as changes in foreign currency rates. The amount, if recognized, that would impact the effective tax rate is \$5.3 and \$6.3 million, respectively. The Company estimates that it is reasonably possible that the liability for uncertain tax positions will decrease by no more than \$4.9 million in the next twelve months from the resolution of various uncertain positions as a result of the completion of tax audits, litigation and the expiration of the statute of limitations in various jurisdictions.

NOTE 5 LONG TERM OBLIGATIONS

In December 2014, we executed a \$475 million private placement to take advantage of low long-term interest rates. At that time, we closed on \$250 million of the private placement to fund our accelerated share repurchase (ASR) program (see Note 11). This closing consisted of two maturity tranches, with \$125 million of 9 year notes at an interest rate of 3.49% and \$125 million of 11 year notes at an interest rate of 3.61%. We closed on the remaining \$225 million of the private placement in February 2015, consisting of \$100 million of 9 year notes at an interest rate of 3.49% and \$125 million of 11 year notes at an interest rate of 3.61%. The proceeds from this closing were used to pay down the existing revolving line of credit.

The Company s long-term obligations consisted of the following:

NOTE 8 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company maintains a foreign exchange risk management policy designed to establish a framework to protect the value of the Company's non-functional denominated transactions from adverse changes in exchange rates. Sales of the Company's products can be denominated in a currency different from the currency in which the related costs to produce the product are denominated. Changes in exchange rates on such inter-country sales or intercompany loans can impact the Company's results of operations. The Company's policy is not to engage in speculative foreign currency hedging activities, but to minimize our net foreign currency transaction exposure, defined as firm commitments and transactions recorded and denominated in currencies other than the functional currency. The Company may use foreign currency forward exchange contracts, options and cross currency swaps to economically hedge these risks.

For derivative instruments designated as hedges, the Company formally documents the nature and relationships between the hedging instruments and the hedged items, as well as the risk management objectives, strategies for undertaking the various hedge transactions, and the method of assessing hedge effectiveness. Additionally, in order to designate any derivative instrument as a hedge of an anticipated transaction, the significant characteristics and expected terms of any anticipated transaction must be specifically identified, and it must be probable that the anticipated transaction will occur.

HEDGE OF NET INVESTMENTS IN FOREIGN OPERATIONS

A significant number of the Company's operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial condition and results of operations of the Company's foreign subsidiaries. A strengthening U.S. dollar relative to foreign currencies has a dilutive translation effect on the Company's financial condition and results of operations. Conversely, a weakening U.S. dollar has an additive effect. The Company in some cases maintains debt in these subsidiaries to offset the net asset exposure. The Company does not otherwise actively manage this risk using derivative financial instruments. In the event the Company plans on a full or partial liquidation of any of our foreign subsidiaries where the Company's net investment is likely to be monetized, the Company will consider hedging the currency exposure associated with such a transaction.

OTHER

As of September 30, 2015, the Company has recorded the fair value of foreign currency forward exchange contracts of \$4.9 million in prepaid and other, \$0.1 million in miscellaneous other assets, and \$0.5 million in accounts payable and accrued liabilities in the balance sheet. All forward exchange contracts outstanding as of September 30, 2015 had an aggregate contract amount of \$83.4 million.

NOTE 9 FAIR VALUE

Authoritative guidelines require the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant management judgment. The three levels are defined as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets and liabilities.
- Level 2: Observable inputs other than those included in Level 1. For example, quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.
- Level 3: Unobservable inputs reflecting management's own assumptions about the inputs used in pricing the asset or liability.

Edgar Filing: APTARGROUP INC - Form 10-Q

As of September 30, 2015, the fair values of our financial assets and liabilities were categorized as follows:

	Total	Level 1	Level 2	Level 3

Table of Contents

The carrying amounts of the Company's other current financial instruments such as cash and equivalents, notes payable and current maturities of long-term obligations approximate fair value due to the short-term maturity of the instrument. The Company considers our long-term obligations a Level 2 liability and utilizes the market approach valuation technique based on interest rates that are currently available to the Company for issuance of debt with similar terms and maturities. The estimated fair value of the Company's long-term obligations was \$781 million as of September 30, 2015 and \$606 million as of December 31, 2014.

NOTE 10 COMMITMENTS AND CONTINGENCIES

The Company, in the normal course of business, is subject to a number of lawsuits and claims both actual and potential in nature. While management believes the resolution of these claims and lawsuits will not have a material adverse effect on the Company's financial position or results of operations or cash flows, claims and legal proceedings are subject to inherent uncertainties, and unfavorable outcomes could occur that could include amounts in excess of any accruals which management has established. Were such unfavorable final outcomes to occur, it is possible that they could have a material adverse effect on our financial position, results of operations and cash flows.

Under our Certificate of Incorporation, the Company has agreed to indemnify our officers and directors for certain events or occurrences while the officer or director is, or was, serving at our request in such capacity. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has a directors and officers liability insurance policy that covers a portion of our exposure. As a result of our insurance policy coverage, the Company believes the estimated fair value of these indemnification agreements is minimal. The Company has no liabilities recorded for these agreements as of September 30, 2015.

NOTE 11 STOCK REPURCHASE PROGRAM

On October 30, 2014, the Company announced a new share repurchase authorization of up to \$350 million of common stock. This new authorization replaces previous authorizations and has no expiration date. AptarGroup may repurchase shares through the open market, privately negotiated transactions or other programs, subject to market conditions.

On December 16, 2014, the Company entered into an agreement to repurchase approximately \$250 million of its common stock under an accelerated share repurchase program (the ASR program). The ASR program is part of the Company's \$350 million share repurchase authorization. On December 17, 2014, the Company paid \$250 million to Wells Fargo Bank N.A. (Wells Fargo) in exchange for approximately 3.1 million shares, estimated to represent approximately 80% of the total number of shares expected to be purchased in the ASR program based on then current market prices. On September 25, 2015, the Company settled the ASR program with Wells Fargo and received approximately 719 thousand additional shares. The total number of shares repurchased under the ASR program was approximately 3.8 million shares.

During the three and nine months ended September 30, 2015, the Company did not repurchase any additional shares outside of the ASR program settlement. During the three and nine months ended September 30, 2014, the Company repurchased approximately 600 thousand and 1.4 million shares for approximately \$37.6 million and \$90.5 million, respectively. Shares repurchased were returned to Treasury Stock.

NOTE 12 STOCK-BASED COMPENSATION

The Company issues stock options and restricted stock units to employees under Stock Awards Plans approved by shareholders. Stock options and restricted stock units are issued to non-employee directors under Director Stock Option Plans and the Director Restricted Stock Unit Plan approved by shareholders. Options are awarded with the exercise price equal to the market price on the date of grant and generally become exercisable over three years and expire 10 years after grant. Restricted stock units granted to employees generally vest over three years.

Edgar Filing: APTARGROUP INC - Form 10-Q

Compensation expense recorded attributable to stock options for the first nine months of 2015 was approximately \$14.9 million (\$9.7 million after tax). The income tax benefit related to this compensation expense was approximately \$5.2 million. Approximately \$13.2 million of the compensation expense was recorded in selling, research & development and administrative expenses and the balance was recorded in cost of sales. Compensation expense recorded attributable to stock options for the first nine months of 2014 was approximately \$15.0 million (\$9.8 million after tax). The income tax benefit related to this compensation expense was approximately \$5.2 million. Approximately \$13.4 million of the compensation expense was recorded in selling, research & development and administrative expenses and the balance was recorded in cost of sales.

The Company uses historical data to estimate expected life and volatility. The weighted-average fair value of stock options granted under the Stock Awards Plans was \$12.83 and \$14.84 per share in 2015 and 2014, respectively. These values were estimated on the respective dates of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

The intrinsic value of units vested during the nine months ended September 30, 2015 and 2014 was \$877 thousand and \$761 thousand, respectively. As of September 30, 2015,

Table of Contents

there was \$1.5 million of total unrecognized compensation cost relating to restricted stock unit awards which is expected to be recognized over a weighted-average period of 1.3 years.

The Company has a long-term incentive program for certain employees. The program is based on the cumulative total shareholder return of our common stock during a three year performance period. Total expense related to this program is expected to be approximately \$2.7 million over the performance period, of which \$857 thousand and \$480 thousand was recognized in the first nine months of 2015 and 2014, respectively.

Operations that sell dispensing systems primarily to the prescription drug, consumer health care and injectables markets form the Pharma segment. Operations that sell dispensing systems primarily to the food and beverage markets form the Food + Beverage segment.

The accounting policies of the segments are the same as those described in Note 1, Summary of Significant Accounting Policies, in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Financial information regarding the Company's reportable segments is shown below:

NOTE 15 INSURANCE SETTLEMENT RECEIVABLE

A fire caused damage to the roof and production area of a facility owned by an AptarGroup subsidiary in Brazil on September 1, 2014. There were no injuries. The facility is primarily an internal supplier to AptarGroup of anodized aluminum components for certain dispensing systems sold to the regional beauty and personal care markets. Repairs of the facility continue to progress as planned. AptarGroup is insured for the damages caused by the fire, including business interruption insurance. While the Company is still in the process of reviewing claims with our insurance carriers, we have currently recognized a \$1.0 million receivable related to costs incurred but not yet reimbursed, which is included in Prepaid and Other in the Condensed Consolidated Balance Sheet. This incident did not have a material impact on our financial results during the first nine months of 2015 and we expect to reach a final insurance settlement during the first half of 2016.

NET SALES

We reported net sales of \$586.3 million for the third quarter ended September 30, 2015, 10% below third quarter 2014 reported net sales of \$651.9 million. The average U.S. dollar exchange rate strengthened significantly relative to the Euro and also strengthened relative to other currencies impacting our business, resulting in a negative currency translation impact of 13%. Therefore, sales excluding changes in foreign currency rates (core sales) increased by 3% in the third quarter of 2015 compared to the third quarter of 2014. Core sales for our Pharma and Food + Beverage business segments increased while our Beauty + Home business segment's core sales were slightly lower than the prior year:

Third Quarter 2015 Net Sales Change over Prior Year	Beauty + Home	Pharma	Food + Beverage	Total
Sales Growth Before Currency Effects (Core Sales)	(1%)	10%	3%	3%
Currency Effects(1)	(14%)	(12%)	(8%)	(13%)
Total Reported Sales Growth	(15%)	(2%)	(5%)	(10%)

(1) Currency effects are approximated by translating last year's amounts at this year's foreign exchange rates.

For the first nine months of 2015, we reported net sales of \$1.77 billion, 11% below the first nine months of 2014 reported net sales of \$2.00 billion. Consistent with the third quarter, the average U.S. dollar exchange rate strengthened relative to the Euro along with all other major currencies impacting our business. Core sales for the first nine months of 2015 increased slightly compared to the first nine months of 2014:

COST OF SALES (EXCLUSIVE OF DEPRECIATION AND AMORTIZATION SHOWN BELOW)

Our cost of sales (COS) as a percentage of net sales was 65.1% in the third quarter of 2015 compared to 68.0% in the same period a year ago. The decrease in COS as a percentage of net sales is mainly due to the mix of sales favoring higher margin products including those sold to the pharmaceutical, food and beverage markets. Lower material costs, the timing of the pass-through of resin price decreases, segment-driven cost savings initiatives and productivity improvements also resulted in broad-based margin improvement.

Cost of sales as a percent of net sales decreased to 64.5% in the first nine months of 2015 compared to 67.4% in the same period a year ago. The decrease is partly due to a one-time favorable \$7.4 million change in our inventory accounting principle recorded in the second quarter of 2015. Operationally, we benefitted from the favorable mix of sales as well as the lower material costs, cost savings and productivity improvements mentioned above. We also experienced a positive impact from the timing delay of resin pass-throughs of approximately \$6.9 million as resin prices declined significantly during the first quarter 2015.

SELLING, RESEARCH & DEVELOPMENT AND ADMINISTRATIVE

Our Selling, Research & Development and Administrative expenses (SG&A) decreased by approximately \$10.2 million to \$81.4 million in the third quarter of 2015 compared to \$91.6 million during the same period a year ago. Excluding changes in foreign currency rates, SG&A increased \$0.7 million in the quarter. Higher pension costs related to lower interest rates along with higher professional fees related to information systems implementations and other normal inflationary increases were partially offset by the recovery of previously recorded bad debts during the third quarter of 2015. SG&A as a percentage of net sales decreased to 13.9% compared to 14.1% in the same period of the prior year due to better cost containment and leveraging of our administrative structure.

SG&A decreased by approximately \$27.9 million to \$266.9 million in the first nine months of 2015 compared to \$294.8 million during the same period a year ago. Excluding changes in foreign currency rates, SG&A increased by approximately \$7.4 million in the first nine months of the year. As discussed above, this increase is mainly due to higher pension and professional fees along with a \$0.6 million unclaimed property settlement with the State of Delaware in the second quarter 2015 and other normal inflationary increases. SG&A as a percentage of net sales increased to 15.1% in the first nine months of 2015 compared to 14.8% in the first nine months of 2014 primarily due to the higher expenses during the current year noted above.

DEPRECIATION AND AMORTIZATION

Reported depreciation and amortization expenses decreased to \$35.4 million in the third quarter of 2015 compared to \$38.2 million during the same period a year ago due to changes in foreign currency exchange rates. Excluding changes in foreign currency rates, depreciation and amortization increased by approximately \$2.1 million in the quarter compared to the same period a year ago. The increase is mainly due to our continued investments in new products and our global enterprise resource planning systems implementations. Depreciation and amortization as a percentage of net sales increased slightly to 6.0% in the third quarter of 2015 compared to 5.8% for the same period a year ago.

For the first nine months of 2015, reported depreciation and amortization expenses decreased by approximately \$10.2 million to \$103.7 million compared to \$113.9 million in the first nine months of 2014. Excluding changes in foreign currency rates, depreciation and amortization increased by approximately \$4.0 million in the first nine months of 2015. As discussed above, this increase is mainly due to our investments in new products and our global enterprise resource planning system. Depreciation and amortization as a percentage of net sales also increased to 5.9% compared to 5.7% for the same period a year ago.

OPERATING INCOME

Edgar Filing: APTARGROUP INC - Form 10-Q

Operating income increased approximately \$9.5 million in the third quarter of 2015 to \$88.1 million compared to \$78.6 million in the same period in the prior year. Excluding changes in foreign currency rates, operating income increased by approximately \$18.9 million in the quarter. As mentioned above, we benefitted from the strong operating results due to a favorable mix of products sold, cost saving initiatives and productivity improvements across all three of our operating segments. Operating income as a percentage of net sales increased to 15.0% in the third quarter of 2015 compared to 12.1% for the same period in the prior year.

Operating income increased approximately \$15.2 million to \$257.2 million in the first nine months of 2015 compared to \$242.0 million in the same period in the prior year. Excluding changes in currency rates, operating income increased by approximately \$49.0 million in the first nine months of 2015. We benefitted from the \$7.4 million change in inventory accounting principle along with the strong results of our Pharma and Food + Beverage segments. We also benefitted from a positive impact from the timing delay in passing through resin cost decreases and certain cost saving initiatives driven by the segments. Operating income as a percentage of sales increased to 14.5% in the first nine months of 2015 compared to 12.1% for the same period in the prior year.

Table of Contents

NET OTHER EXPENSE

Net other expense in the third quarter of 2015 increased to \$8.7 million from \$4.5 million in the same period in the prior year. During 2015, we incurred higher interest expense related to our \$475 million senior notes issued in December 2014 and February 2015, the proceeds of which were mainly used to fund our accelerated share repurchase in December 2014 and replace variable rate debt with fixed rate debt in order to take advantage of the lower interest rate environment. We also incurred increased costs related to our forward exchange contracts due to exchange rate volatility in certain countries.

Net other expense for the nine months ended September 30, 2015 increased to \$24.3 million from \$14.5 million in the same period in the prior year. During 2015, we incurred higher interest expense related to our \$475 million senior notes and increased costs of our forward exchange contracts while in 2014 we recognized a \$1.5 million write-down on a non-controlling investment in the prior year.

EFFECTIVE TAX RATE

The reported effective tax rate decreased to 32.9% for the three months ended September 30, 2015 compared to 34.4% for the same period ended September 30, 2014. The reported effective tax rate also decreased for the nine months ended September 30, 2015 to 33.0% compared to 34.0% for the nine months ended September 30, 2014. The decrease in the rates for the three and nine months ended September 30, 2015 is attributable to the mix of income earned by tax jurisdiction. Also, our 2014 tax rate included tax costs related to our non-U.S. subsidiary legal reorganization.

NET INCOME ATTRIBUTABLE TO APTARGROUP, INC.

We reported net income attributable to AptarGroup, Inc. of \$53.2 million and \$156.0 million in the three and nine months ended September 30, 2015, respectively, compared to \$48.6 million and \$150.1 million for the same periods in the prior year.

BEAUTY + HOME SEGMENT

Operations that sell dispensing systems primarily to the personal care, beauty and home care markets form the Beauty + Home segment.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net Sales	\$ 321,638	\$ 378,905	\$ 970,176	\$ 1,155,367
Segment Income	27,961	25,399	78,529	80,378
Segment Income as a percentage of Net Sales	8.7%	6.7%	8.1%	7.0%

Edgar Filing: APTARGROUP INC - Form 10-Q

Net sales for the quarter ended September 30, 2015 decreased 15% to \$321.6 million compared to \$378.9 million in the third quarter of the prior year primarily due to changes in foreign currency exchange rates. Core sales decreased 1% in the third quarter of 2015 compared to the same quarter of the prior year. Core sales to the personal care market decreased 6% while core sales to the beauty market were flat when compared to the same period in the prior year as the global market softness we've experienced over the past year continued in the third quarter. Core sales to the home care market improved 8% on a combination of improved product and tooling sales. In total, customer tooling sales, excluding foreign currency changes, increased by \$5.8 million in the third quarter of 2015 compared to the third quarter of the prior year. Decreases in prices due to resin pass-throughs to our customers negatively impacted sales by \$3.0 million.

Net sales decreased 16% in the first nine months of 2015 to \$970.2 million compared to \$1.2 billion in the first nine months of the prior year. Core sales decreased 3% in the first nine months of 2015 compared to the first nine months of the prior year. Core sales to the personal care, beauty and home care markets decreased by 4%, 3% and 2%, respectively, in the first nine months of 2015 compared to the first nine months of 2014. Consistent with the quarter, we continued to experience global market softness as all regions except Asia reported sales declines on a constant currency basis compared to the prior year. Decreases in prices due to resin pass-throughs to our customers negatively impacted sales by \$6.9 million.

In spite of the decrease in sales, segment income increased 10% to \$28.0 million in the third quarter 2015 compared to \$25.4 million during the third quarter of 2014. The negative impacts of foreign currency rate changes and lower product sales were more than offset by improved product sales mix, cost savings initiatives and improved productivity, mainly in North America. There was also a \$0.7 million favorable impact from the timing of resin pass-throughs in the quarter.

Segment income in the first nine months of 2015 decreased approximately 2% to \$78.5 million compared to \$80.4 million reported in the same period in the prior year. The decrease compared to the prior year is due to the impact of foreign currency rate changes and lower product sales discussed above. This decrease was partially offset by the positive impact of the timing of resin pass-throughs, cost savings initiatives and improved productivity in North America in the current year. Prior year segment income also included approximately \$3.1 million related to facility expansion costs in Latin America.

PHARMA SEGMENT

Operations that sell dispensing systems to the prescription drug, consumer health care and injectables markets form the Pharma segment.

Edgar Filing: APTARGROUP INC - Form 10-Q

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net Sales	\$ 175,427	\$ 179,191	\$ 537,396	\$ 569,230
Segment Income	52,941	49,314	160,404	154,589
Segment Income as a percentage of Net Sales	30.2%	27.5%	29.8%	27.2%

Net sales for the Pharma segment decreased approximately 2% in the third quarter of 2015 to \$175.4 million compared to \$179.2 million in the third quarter of 2014 primarily due to changes in foreign currency exchange rates. Core sales increased 10% in the third quarter of 2015 compared to the same quarter of the prior year. Core sales to the prescription and injectables markets increased 16% and 9%, respectively. The prescription market's growth over the prior year was mainly due to strong sales in our respiratory application fields such as asthma/COPD and allergic rhinitis, while the injectables market continues to show positive growth momentum both with stoppers and syringe components with strong demand in Europe, U.S., India and Latin America. Core sales to the consumer health care market in the third quarter of 2015 were flat as sales increases across most applications were offset by lower sales in Eastern Europe and targeted customer inventory reduction plans.

Net sales for the first nine months of 2015 decreased approximately 6% to \$537.4 million compared to \$569.2 million in the first nine months of the prior year. However, core sales increased by 8% in the first nine months of 2015 compared to the first nine months of 2014. Core sales to the prescription and injectables markets increased 14% and 7%, respectively, in the first nine months of 2015 compared to the same period in the prior year. Prescription growth was led by strong sales of our asthma/COPD and allergic rhinitis products while injectables grew on increased stopper and syringe component demand as noted above. Core sales to the consumer health care market were comparable to the prior year as growth in our non-prescription nasal decongestant business offset the softness in Eastern Europe and customer inventory reduction plans discussed above.

In spite of negative currency effects, segment income in the third quarter of 2015 increased approximately 7% to \$52.9 million compared to \$49.3 million reported in the same period in the prior year. Results were favorably impacted by the additional product volume discussed above along with favorable product mix within the segment combined with cost containment initiatives.

Segment income in the first nine months of 2015 increased approximately 4% to \$160.4 million compared to \$154.6 million reported in the same period of the prior year. This increase is again mainly attributed to the higher volume and improved product mix within the segment as well as cost containment initiatives. Prior year results also included a \$1.5 million write-down on a non-controlling investment to align with the current fair value.

FOOD + BEVERAGE SEGMENT

Operations that sell dispensing systems primarily to the food and beverage markets form the Food + Beverage segment.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net Sales	\$ 89,225	\$ 93,846	\$ 262,804	\$ 274,027
Segment Income	13,236	11,713	37,277	33,209
Segment Income as a percentage of Net Sales	14.8%	12.5%	14.2%	12.1%

Net sales for the Food + Beverage segment decreased approximately 5% in the third quarter of 2015 to \$89.2 million compared to \$93.8 million in the third quarter of 2014. However, core sales increased 3% in the third quarter of 2015 compared to the same quarter of the prior year. Core

Edgar Filing: APTARGROUP INC - Form 10-Q

sales to the food market increased approximately 5% driven by condiments and coffee product sales. Core sales to the beverage market increased 2% with bottled water and juices products demonstrating the strongest growth. Lower tooling sales and decreases in resin pass-throughs to our customers negatively impacted sales by \$6.8 million and \$2.3 million, respectively.

Net sales for the first nine months of 2015 decreased approximately 4% to \$262.8 million compared to \$274.0 million in the first nine months of the prior year. Core sales increased by 3% in the first nine months of 2015 compared to the first nine months of 2014. Core sales to the food market increased 5% and core sales to the beverage market increased approximately 1% in the first nine months of 2014 compared to the same period in the prior year. Broad based growth in the food market was partially offset by lower tooling sales of \$9.1 million in the first nine months of 2015 compared to 2014. In addition, strong sales growth to the beverage market during the last two quarters was partially offset by residual inventory destocking by certain customers in the first quarter of the year. Decreases in prices due to resin pass-throughs of \$5.6 million also negatively impacted sales for the first nine months of 2015.

In spite of negative currency effects, segment income in the second quarter of 2015 increased approximately 13% to \$13.2 million compared to \$11.7 million during the same period in the prior year. Segment income was positively impacted mainly by the increased product sales discussed above along with cost savings initiatives and productivity improvements. The impact of the timing of resin pass-throughs was also favorable by \$0.5 million in the third quarter.

Segment income in the first nine months of 2015 increased approximately 12% to \$37.3 million compared to \$33.2 million reported in the same period of the prior year. Higher product sales volumes and improved operational performance along with a \$3.0 million favorable impact due to the timing of resin pass-throughs drove this increase for the first nine months of 2015.

CORPORATE & OTHER

In addition to our three operating business segments, AptarGroup assigns certain costs to Corporate & Other, which is presented separately in Note 14 of the Unaudited Notes to the Condensed Consolidated Financial Statements. Corporate & Other primarily includes certain professional fees, compensation and information system costs which are not allocated directly to our operating segments. Corporate & Other expense decreased to \$7.6 million for the quarter ended September 30, 2015 compared to \$8.4 million in the third quarter of the prior year mainly due to the translation of costs incurred in foreign currencies as the stronger dollar has a dilutive effect on our foreign-based costs.

Corporate & Other expense in the first nine months of 2015 decreased to \$22.5 million compared to \$28.7 million reported in the same period of the prior year due to the impact of a \$7.4 million change in accounting principle related to our inventory valuation method during the second quarter as well as the translation of foreign based costs. These decreases are partially offset by a \$0.6 million unclaimed property settlement.

FOREIGN CURRENCY

Because of our international presence, movements in exchange rates may have a significant impact on the translation of the financial statements of our foreign subsidiaries. Our primary foreign exchange exposure is to the Euro, but we also have foreign exchange exposure to the Brazilian Real, British Pound, Swiss Franc and others. A strengthening U.S. dollar relative to foreign currencies has a dilutive translation effect on our financial statements. Conversely, a weakening U.S. dollar has an additive effect. In some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. We manage our exposures to foreign exchange principally with forward exchange contracts to economically hedge recorded transactions and firm purchase and sales commitments denominated in foreign currencies. Changes in exchange rates on such inter-country sales could materially impact our results of operations.

QUARTERLY TRENDS

Our results of operations in the last quarter of the year typically are negatively impacted by our plant shutdowns in December. In the future, our results of operations in a quarterly period could be impacted by factors such as changes in foreign currency rates, changes in product mix, changes in material costs, changes in growth rates in the industries to which our products are sold, recognition of equity based compensation expense for retirement eligible employees in the period of grant and changes in general economic conditions in any of the countries in which we do business.

We generally incur higher stock option expense in the first quarter compared with the rest of the fiscal year. Our stock option expense on a pre-tax basis (in \$ millions) for the year 2015 compared to 2014 is as follows:

	2015		2014	
First Quarter	\$	8.8	\$	8.4
Second Quarter		3.2		3.7
Third Quarter		3.0		3.0
Fourth Quarter (estimated for 2015)		2.9		2.9
	\$	17.9	\$	18.0

We recognized higher first quarter expense in 2015 compared to 2014 due to costs associated with a higher number of retirement eligible employees in the first quarter of the current year.

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are cash flow from operations and our revolving credit facility. In the first nine months of 2015, our operations provided approximately \$231.4 million in cash flow compared to \$201.4 million for the same period a year ago. In both periods, cash flow from operations was primarily derived from earnings before depreciation and amortization. The increase in cash provided by operations is primarily attributable to lower working capital requirements to support our business.

We used \$171.1 million in cash for investing activities during the first nine months of 2015, compared to \$127.3 million during the same period a year ago. The increase in cash used for investing activities is due to the purchase of \$67.4 million in short term investments. Short term investments reflect funds invested in a time deposit instrument with a two-year maturity. However, during the life of the investment the funds can be redeemed at any time with a 35-90 day notice. There are no penalties for early redemption. This increase was partially offset by a decrease in capital expenditures of \$19.2 million in the first nine months of 2015 compared to the first nine months of 2014. Cash outlays for capital expenditures for 2015 are estimated to be approximately \$150 million but could vary due to changes in exchange rates as well as the timing of capital projects.

We used \$10.0 million in cash for financing activities during the first nine months of 2015, compared to \$6.4 million during the same period a year ago. For 2015, proceeds from stock option exercises were offset by our dividends paid while in 2014 proceeds received from notes payable were used to cover our dividends paid along with the repurchase of our treasury stock. There is no repurchase of treasury stock in 2015 as this activity is currently part of our ASR program detailed in Note 11 of the Unaudited Notes to Condensed Consolidated Financial Statements.

Cash and equivalents increased to \$434.1 million at September 30, 2015 from \$399.8 million at December 31, 2014. Total short and long-term interest bearing debt decreased in the first nine months of 2015 to \$836.5 million from \$840.9 million at December 31, 2014. The ratio of our Net Debt (interest bearing debt less cash and cash equivalents) to Net Capital (stockholder's equity plus Net Debt) was 22.4% at September 30, 2015 compared to 28.6% at December 31, 2014.

The Company maintains a revolving credit facility that provides for unsecured financing of up to \$300 million. Each borrowing under this credit facility will bear interest at rates based on LIBOR, prime rates or other similar rates, in each case plus an applicable margin. A facility fee on the total amount of the facility is also payable quarterly, regardless of usage. The applicable margins for borrowings under the credit facility and the facility fee percentage may change from time to time depending on changes in AptarGroup's consolidated leverage ratio. On January 31, 2014, we amended the revolving credit facility to, among other things, increase the amount of permitted receivables transactions from \$100 to \$150 million, reduce the cost of committed funds by 12.5 basis points and uncommitted funds by 2.5 basis points, and extend the maturity date of the revolving credit facility by one year, to January 31, 2019. On December 16, 2014, we amended the credit facility to, among other things, change our financial covenants to the leverage and interest coverage ratios shown in the table below, and extend the maturity date of the revolving credit facility to December 16, 2019. At September 30, 2015, there was no outstanding balance under the credit facility. The outstanding balance under the credit facility was \$230 million at December 31, 2014 and is reported as notes payable in the current liabilities section of the Condensed Consolidated Balance Sheets. We incurred approximately \$115 thousand and \$744 thousand in interest and fees related to this credit facility during the quarter ended September 30, 2015 and 2014, respectively. We incurred approximately \$816 thousand and \$1.8 million in interest and fees related to this credit facility during the nine months ended September 30, 2015 and 2014, respectively.

Our revolving credit facility and corporate long-term obligations require us to satisfy certain financial and other covenants including:

	Requirement	Level at September 30, 2015
Consolidated Leverage Ratio (a)	Maximum of 3.50 to 1.00	0.93 to 1.00
Consolidated Interest Coverage Ratio (a)	Minimum of 3.00 to 1.00	15.35 to 1.00

(a) Definitions of ratios are included as part of the revolving credit facility agreement and the private placement agreements.

Based upon the above consolidated leverage ratio covenant, we would have the ability to borrow approximately an additional \$1.2 billion before the 3.50 to 1.00 ratio requirement was exceeded.

In December 2014, we executed a \$475 million private placement to take advantage of low long-term interest rates. At that time, we closed on \$250 million of the private placement to fund our accelerated share repurchase program. This closing consisted of two maturity tranches, with \$125 million of 9 year notes at an interest rate of 3.49% and \$125 million of 11 year notes at an interest rate of 3.61%. We closed on the remaining \$225 million of the private placement in February 2015, consisting of \$100 million of 9 year notes at an interest rate of 3.49% and \$125 million of 11 year notes at an interest rate of 3.61%. The proceeds from this closing were used to pay down the existing revolving line of credit.

Our foreign operations have historically met cash requirements with the use of internally generated cash or borrowings. These foreign subsidiaries have financing arrangements with several foreign banks to fund operations located outside the U.S., but the majority of these arrangements are uncommitted. Cash generated by foreign operations has generally been reinvested locally. The majority of our \$434.1 million in cash and equivalents is located outside of the U.S. We manage our global cash requirements considering (i) available funds among the many subsidiaries through which we conduct business, (ii) the geographic location of our liquidity needs, and (iii) the cost to access international cash balances. The repatriation of non-U.S. cash balances from certain subsidiaries could have adverse tax consequences as we may be required to pay income tax on those funds. Historically, the tax consequences associated with repatriating current year earnings to the U.S. has been between 10% and 14% of the repatriated amount. We do not expect future impacts to be materially different.

We believe we are in a strong financial position and have the financial resources to meet our business requirements in the foreseeable future. We have historically used cash flow from operations and our revolving credit facility as our primary source of liquidity. Our primary uses of liquidity are to invest in equipment and facilities that are necessary to support our growth and to make acquisitions that will contribute to the achievement of our strategic objectives. Other uses of liquidity include paying dividends to shareholders and repurchasing shares of our common stock. In the event that customer demand would decrease significantly for a prolonged period of time and negatively impact cash flow from operations, we would have the ability to restrict and significantly reduce capital expenditure levels, as well as evaluate our acquisition strategy and dividend and share repurchase programs. A prolonged and significant reduction in capital expenditure levels could increase future repairs and maintenance costs as well as have a negative impact on operating margins if we were unable to invest in new innovative products.

On October 22, 2015, the Board of Directors declared a quarterly cash dividend of \$0.30 per share payable on November 25, 2015 to stockholders of record as of November 4, 2015. This represents an increase of 7% over the previous quarter's cash dividend.

OFF-BALANCE SHEET ARRANGEMENTS

We lease certain warehouse, plant and office facilities as well as certain equipment under noncancelable operating leases expiring at various dates through the year 2027. Most of the operating leases contain renewal options and certain equipment leases include options to purchase during or at the end of the lease term. Other than operating lease obligations, we do not have any off-balance sheet arrangements.

RECENTLY ISSUED ACCOUNTING STANDARDS

We have reviewed the recently issued accounting standards updates to the FASB's Accounting Standards Codification that have future effective dates. As discussed in Note 1 of the Unaudited Notes to Condensed Consolidated Financial Statements,

Edgar Filing: APTARGROUP INC - Form 10-Q

Table of Contents

no Standards that are considered to have a material impact on our Unaudited Condensed Consolidated Financial Statements were effective for the first nine months of 2015.

In May 2014, the FASB amended the guidance for recognition of revenue from customer contracts. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in the amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB decided to defer the effective date by one year to December 15, 2017 for annual reporting periods beginning after that date. The FASB also decided to allow early adoption of the standard, but not before the original effective date of December 15, 2016. We are currently evaluating the impact the adoption of this standard will have on our Consolidated Financial Statements.

In April 2015, the FASB issued an ASU intended to simplify GAAP by changing the presentation of debt issuance costs. Under the new standard, debt issuance costs will be presented as a reduction of the carrying amount of the related liability, rather than as an asset. The new treatment is consistent with debt discounts. In August 2015, the FASB issued an ASU clarifying that debt issuance costs related to line of credit arrangements can be deferred and amortized ratably over the term of the line of credit arrangement. These standards are effective for annual reporting periods beginning after December 15, 2015, but early adoption is permitted. The Company does not believe that this new guidance will have a material impact on its consolidated financial statements.

In April 2015, the FASB issued new guidance on a customer's accounting for fees paid in a cloud computing arrangement (CCA). Previously, there was no specific GAAP guidance on accounting for such fees from the customer's perspective. Under the new standard, customers will apply the same criteria as vendors to determine whether a CCA contains a software license or is solely a service contract. This standard is effective for annual reporting periods beginning after December 15, 2015, but early adoption is permitted. We are currently evaluating the impact the adoption of this standard will have on our Consolidated Financial Statements.

In July 2015, the FASB issued new guidance for simplifying the measurement of inventory. The core principle of the guidance is that an entity should measure inventory at the lower of cost and net realizable value. This standard is effective for annual reporting periods beginning after December 15, 2016. The Company does not believe that this new guidance will have a material impact on its consolidated financial statements.

Other accounting standards that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

OUTLOOK

Currency exchange rates will continue to be a headwind on our translated results for the coming quarter. We don't expect any significant changes in the macroeconomic conditions that are currently affecting our business in the near-term, including selected softness in certain markets. Also, we anticipate that certain customers may choose to reduce inventory levels at year end as we have seen in recent years. Despite these near-term issues, we expect earnings on a comparable currency basis to improve over the prior year.

AptarGroup expects earnings per share for the fourth quarter, assuming a comparable effective tax rate as the prior year fourth quarter, to be in the range of \$0.61 to \$0.66 per share compared to \$0.63 per share reported in the prior year. Assuming a comparable foreign currency exchange rate environment, comparable earnings per share for the prior year would have been approximately \$0.58.

FORWARD-LOOKING STATEMENTS

Certain statements in Management's Discussion and Analysis and other sections of this Form 10-Q are forward-looking and involve a number of risks and uncertainties, including certain statements set forth in the Quarterly Trends, Liquidity and Capital Resources, and Outlook sections of this Form 10-Q. ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

A significant number of our operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial condition and results of operations of our entities. Our primary foreign exchange exposure is to the Euro, but we also have foreign exchange exposure to the Brazilian Real, British Pound and Swiss Franc, among others. A strengthening U.S. dollar relative to foreign currencies has a dilutive translation effect on our financial condition and results of operations. Conversely, a weakening U.S. dollar relative to foreign currencies has an additive translation effect on our financial condition and results of operations.

Additionally, in some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. Any changes in exchange rates on such inter-country sales may impact our results of operations.

We manage our exposures to foreign exchange principally with forward exchange contracts to hedge certain firm purchase and sales commitments and intercompany cash transactions denominated in foreign currencies.

The table below provides information as of September 30, 2015 about our forward currency exchange contracts. The majority of the contracts expire before the end of the fourth quarter of 2015.

Buy/Sell	Contract Amount (in thousands)	Average Contractual Exchange Rate	Min / Max Notional Volumes
Euro/Brazilian Real	\$ 16,522	3.6812	16,098-16,606

Total	\$ 83,441		

As of September 30, 2015, the Company has recorded the fair value of foreign currency forward exchange contracts of \$4.9 million in prepaid and other, \$0.1 million in miscellaneous other assets, and \$0.5 million in accounts payable and accrued liabilities in the balance sheet.

ITEM 4. CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The Company's management has evaluated, with the participation of the chief executive officer and chief financial officer of the Company, the effectiveness of the Company's disclosure controls and procedures (as that term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of September 30, 2015. Based on that evaluation, the chief executive officer and chief financial officer have concluded that these controls and procedures were effective as of such date.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No change in the Company's internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the Company's fiscal quarter ended September 30, 2015 that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

RECENT SALES OF UNREGISTERED SECURITIES

The employees of AptarGroup S.A.S. and Aptar France S.A.S., our subsidiaries, are eligible to participate in the FCP Aptar Savings Plan (the Plan). All eligible participants are located outside of the United States. An independent agent purchases shares of common stock available under the Plan for cash on the open market and we do not issue shares. We do not receive any proceeds from the purchase of common stock under the Plan. The agent under the Plan is Banque Nationale de Paris Paribas Fund Services. No underwriters are used under the Plan. All shares are sold in reliance upon the exemption from registration under the Securities Act of 1933 provided by Regulation S promulgated under that Act. During the quarter ended September 30, 2015, the Plan purchased 1,826 shares of our common stock on behalf of the participants at an average price of \$63.88 per share, for an aggregate amount of \$117 thousand, and sold 3,092 shares of our common stock on behalf of the participants at an average price of \$67.99 per share, for an aggregate amount of \$210 thousand. At September 30, 2015, the Plan owned 52,200 shares of our common stock.

ISSUER PURCHASES OF EQUITY SECURITIES

On October 30, 2014, the Company announced a share repurchase authorization of up to \$350 million of Common Stock. This authorization replaces previous authorizations and has no expiration date. AptarGroup may repurchase shares through the open market, privately negotiated transactions or other programs, subject to market conditions.

On December 16, 2014, the Company entered into an agreement to repurchase approximately \$250 million of its common stock under an accelerated share repurchase program (the ASR program). The ASR program is part of the Company's \$350 million share repurchase authorization. On December 17, 2014, the Company paid \$250 million to Wells Fargo Bank N.A. (Wells Fargo) in exchange for approximately 3.1 million shares, estimated to represent approximately 80% of the total number of shares expected to be purchased in the ASR program based on then current market prices. On September 25, 2015, the Company settled the ASR program with Wells Fargo and received approximately 719 thousand additional shares. The total number of shares repurchased under the ASR program was approximately 3.8 million shares. No additional securities were purchased during the quarter ended September 30, 2015 and approximately \$100 million of shares remain to be purchased under the current share repurchase authorization.

The following table summarizes the Company's purchases of its securities for the quarter ended September 30, 2015:

Period	Total Number Of Shares Purchased	Average Price Paid Per Share	Total Number Of Shares Purchased As Part Of Publicly Announced Plans Or Programs	Approximate Dollar Value Of Shares That May Yet Be Purchased Under The Plans Or Programs (in millions)
