BANK OF NOVA SCOTIA Form 424B5 May 04, 2016

Filed Pursuant to Rule 424(b)(5) Registration Statement No. 333-200089 Amendment No. 1 to the Pricing Supplement dated April 28, 2016
(To Prospectus dated December 1, 2014, Prospectus Supplement dated December 1, 2014 and Product Prospectus Supplement EQUITY INDICES LIRN-1 dated June 25, 2015)

The notes are being issued by The Bank of Nova Scotia (BNS). There are important differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See <u>Risk Factors</u> beginning on page TS-6 of this term sheet and beginning on page PS-6 of product prospectus supplement EQUITY INDICES LIRN-1.

The initial estimated value of the notes as of the pricing date is \$9.685 per unit, which is less than the public offering price listed below.

See <u>Summary</u> on the following page. <u>Risk Fac</u>tors beginning on page TS-6 of this term sheet <u>and Structuring the</u> Notes on page TS-10 of this term sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

None of the U.S. Securities and Exchange Commission (the SEC), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

	<u> </u>	er Unit	<u>Total</u>
Public offering price	\$	10.00	\$ 18,124,290.00
Underwriting discount	\$	0.20	\$ 362,485.80
Proceeds, before expenses, to BNS	\$	9.80	\$ 17,761,804.20

This amended pricing supplement is being filed solely to assign a new CUSIP and ISIN to the Notes and supersedes in its entirety the related pricing supplement dated April 28, 2016 for the Notes. We refer to this amended pricing supplement as the pricing supplement.

Merrill Lynch & Co.

Amended Pricing Supplement dated May 4, 2016

Linked to the EURO STOXX 50® Index, due April 27, 2018

Summary

The Capped Leveraged Index Return Notes® Linked to the EURO STOXX 50® Index, due April 27, 2018 (the notes) are our senior unsecured debt securities. The notes are not guaranteed or insured by the Canada Deposit Insurance Corporation or the FDIC, and are not, either directly or indirectly, an obligation of any third party. The notes will rank equally with all of our other unsecured senior debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BNS. The notes provide you a leveraged return, subject to a cap, if the Ending Value of the Market Measure, which is the EURO STOXX 50® Index (the Index), is greater than the Starting Value. If the Ending Value is equal to or less than the Starting Value but greater than or equal to the Threshold Value, you will receive the principal amount of your notes. If the Ending Value is less than the Threshold Value, you will lose a portion, which could be significant, of the principal amount of your notes. Payments on the notes, including the amount you receive at maturity, will be calculated based on the \$10 principal amount per unit and will depend on the performance of the Index, subject to our credit risk. See Terms of the Notes below.

The economic terms of the notes (including the Capped Value) are based on our internal funding rate, which is the rate we would pay to borrow funds through the issuance of market-linked notes, and the economic terms of certain related hedging arrangements. Our internal funding rate is typically lower than the rate we would pay when we issue conventional fixed rate debt securities. This difference in funding rate, as well as the underwriting discount and the hedging related charge described below, reduced the economic terms of the notes to you and the initial estimated value of the notes on the pricing date. Due to these factors, the public offering price you pay to purchase the notes is greater than the initial estimated value of the notes.

On the cover page of this term sheet, we have provided the initial estimated value for the notes. This estimated value was determined by reference to our internal pricing models, which take into consideration certain factors, such as our internal funding rate on the pricing date and our assumptions about market parameters. For more information about the initial estimated value and the structuring of the notes, see Structuring the Notes on page TS-10.

Terms of the Notes

Issuer:

The Bank of Nova Scotia (BNS)

Principal Amount: \$10.00 per unit

Term: Approximately two years

Market Measure: The EURO STOXX 50® Index

(Bloomberg symbol: SX5E), a price

return index.

Starting Value: 3,125.43

Ending Value: The average of the closing levels of

the Market Measure on each scheduled calculation day occurring during the Maturity Valuation Period. The calculation days are subject to postponement in the event of Market Disruption Events, as described beginning on page PS-19 of product prospectus supplement EQUITY

INDICES LIRN-1.

Threshold Value: 2,812.89 (90% of the Starting Value,

rounded to two decimal places).

Redemption Amount Determination

On the maturity date, you will receive a cash payment per unit determined as follows:

Participation Rate: 200%

Capped Value: \$12.38 per unit, which represents a

return of 23.80% over the principal

amount.

Maturity Valuation Period: April 18, 2018, April 19, 2018,

April 20, 2018, April 23, 2018 and April 24, 2018.

Fees and Charges: The underwriting discount of \$0.20

per unit listed on the cover page and the hedging related charge of \$0.075 per unit described in Structuring the Notes on

page TS-10.

Merrill Lynch, Pierce, Fenner & Smith Incorporated (MLPF&S). **Calculation Agent:**

Capped Leveraged Index Return Notes®	TS-2

Linked to the EURO STOXX 50® Index, due April 27, 2018

The terms and risks of the notes are contained in this term sheet and in the following:

- Product prospectus supplement EQUITY INDICES LIRN-1 dated June 25, 2015: http://www.sec.gov/Archives/edgar/data/9631/000089109215005429/e64808 424b5.htm
- § Prospectus supplement dated December 1, 2014: http://www.sec.gov/Archives/edgar/data/9631/000089109214008993/e61583-424b3.htm
- Prospectus dated December 1, 2014:
 http://www.sec.gov/Archives/edgar/data/9631/000089109214008992/e61582 424b3.htm

These documents (together, the Note Prospectus) have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated above or obtained from MLPF&S by calling 1-800-294-1322. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in product prospectus supplement EQUITY INDICES LIRN-1. Unless otherwise indicated or unless the context requires otherwise, all references in this document to we, us, our, or similar references are to BNS.

This amended and restated pricing supplement is being filed solely to assign a new CUSIP and ISIN to the Notes and supersedes the pricing supplement related hereto dated April 28, 2016 in its entirety.

Investor Considerations

You may wish to consider an investment in the notes if:

- § You anticipate that the Index will increase moderately from the Starting Value to the Ending Value.
- § You are willing to risk a substantial loss of principal if the Index decreases from the Starting Value to an Ending Value that is below the Threshold Value.
- You accept that the return on the notes will be capped.

The notes may not be an appropriate investment for you if:

- You believe that the Index will decrease from the Starting Value to the Ending Value or that it will not increase sufficiently over the term of the notes to provide you with your desired return.
- You seek 100% principal repayment or preservation of capital.
- § You seek an uncapped return on your investment.

- § You are willing to forgo the interest payments that are paid on conventional interest bearing debt securities.
- You are willing to forgo dividends or other benefits of owning the stocks included in the Index.
- \S You want to receive dividends or other distributions paid on the stocks included in the Index.
- § You are willing to accept a limited or no market for sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, our internal funding rate and fees and charges on the notes.
- § You seek an investment for which there will be a liquid secondary market.
- § You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount.
- § You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Hypothetical Payout Profile and Examples of Payments at Maturity

Capped Leveraged Index Return Notes®

This graph reflects the returns on the notes based on the Participation Rate of 200%, the Threshold Value of 90% of the Starting Value and the Capped Value of \$12.38 per unit. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

The following table and examples are for purposes of illustration only. They are based on hypothetical values and show hypothetical returns on the notes. They illustrate the calculation of the Redemption Amount and total rate of return based on a hypothetical Starting Value of 100, a Threshold Value of 90, the Participation Rate of 200%, the Capped Value of \$12.38 per unit and a range of hypothetical Ending Values. The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value and whether you hold the notes to maturity. The following examples do not take into account any tax consequences from investing in the notes.

For recent actual levels of the Market Measure, see The Index section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Ending Value	Percentage Change from the Starting Value to the Ending Value	Redemption Amount per Unit	Total Rate of Return on the Notes
0.00	-100.00%	\$1.00	-90.00%
50.00	-50.00%	\$6.00	-40.00%
80.00	-20.00%	\$9.00	-10.00%
90.00(1)	-10.00%	\$10.00	0.00%
94.00	-6.00%	\$10.00	0.00%
95.00	-5.00%	\$10.00	0.00%

97.00	-3.00%	\$10.00	0.00%
100.00(2)	0.00%	\$10.00	0.00%
102.00	2.00%	\$10.40	4.00%
105.00	5.00%	\$11.00	10.00%
110.00	10.00%	\$12.00	20.00%
120.00	20.00%	\$12.38(3)	23.80%
130.00	30.00%	\$12.38	23.80%
140.00	40.00%	\$12.38	23.80%
150.00	50.00%	\$12.38	23.80%
160.00	60.00%	\$12.38	23.80%

(1) This is the hypothetical Threshold Va	value.
--	--------

- (2) The **hypothetical** Starting Value of 100 used in these examples has been chosen for illustrative purposes only. The actual Starting Value is 3,125.43, which was the closing level of the Market Measure on the pricing date.
- (3) The Redemption Amount per unit cannot exceed the Capped Value.

Capped Leveraged Index Return Notes®	TS-4

Linked to the EURO STOXX 50® Index, due April 27, 2018

Redemption Amount Calculation Examples

Example 1

The Ending Value is 80.00, or 80.00% of the Starting Value:

Starting Value: 100.00 Threshold Value: 90.00 Ending Value: 80.00

Redemption Amount per unit

Example 2

The Ending Value is 95.00, or 95.00% of the Starting Value:
Starting Value:
100.00
Threshold Value:
90.00
Ending Value:
95.00

Redemption Amount (per unit) = \$10.00, the principal amount, since the Ending Value is less than the Starting Value but equal to or greater than the Threshold Value.

Example 3

The Ending Value is 105.00, or 105.00% of the Starting Value:

Starting Value: 100.00 Ending Value: 105.00

= \$11.00 Redemption Amount per unit

Example 4

The Ending Value is 130.00, or 130.00% of the Starting Value:

Starting Value: 100.00 Ending Value: 130.00

= \$16.00, however, because the Redemption Amount for the notes cannot exceed the Capped Value, the Redemption Amount will be \$12.38 per unit

Risk Factors

those listed lon page PS-	aportant differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including below. You should carefully review the more detailed explanation of risks relating to the notes in the Risk Factors sections beginning 6 of product prospectus supplement EQUITY INDICES LIRN-1, page S-2 of the prospectus supplement, and page 6 of the prospectus ove. We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.
-	Depending on the performance of the Index as measured shortly before the maturity date, your investment may result in a loss; there is ed return of principal.
§ comparable	Your return on the notes may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of maturity.
-	Your investment return is limited to the return represented by the Capped Value and may be less than a comparable investment e stocks included in the Index.
	Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
§	The notes may be subject to write-off, write-down or conversion under current and proposed Canadian resolution powers.
an estimate.	Our initial estimated value of the notes is lower than the public offering price of the notes. Our initial estimated value of the notes is only The public offering price of the notes exceeds our initial estimated value because it includes costs associated with selling and ne notes, as well as hedging our obligations under the notes with a third party, which may include MLPF&S or one of its affiliates. These

costs include the underwriting discount and an expected hedging related charge, as further described in Structuring the Notes on page TS-10.

estimated value of the notes is determined by reference to our internal pricing models when the terms of the notes are set. These pricing models consider certain factors, such as our internal funding rate on the pricing date, the expected term of the notes, market conditions and other relevant factors existing at that time, and our assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for the notes that are different from our initial estimated value. In addition, market conditions and other relevant factors in the future may change, and any of our assumptions may prove to be incorrect. On future

Our initial estimated value of the notes does not represent future values of the notes and may differ from others estimates. Our initial

dates, the market value of the notes could change significantly based on, among other things, the performance of the Index, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors. These factors, together with various credit, market and economic factors over the term of the notes, are expected to reduce the price at which you may be able to sell the notes in any secondary market and will affect the value of the notes in complex and unpredictable ways. Our initial estimated value does not represent a minimum price at which we or any agents would be willing to buy your notes in any secondary market (if any exists) at any time.

Our initial estimated value is not determined by reference to credit spreads or the borrowing rate of fixed-rate debt securities. The internal funding rate used in the determination of our initial estimated value of the discount from the credit spreads for our conventional fixed-rate debt securities and the borrowing rate we would be securities. If we were to use the interest rate implied by the credit spreads for our conventional fixed-rate we would pay for our conventional fixed-rate debt securities, we would expect the economic terms of the notes Consequently, our use of an internal funding rate for the notes would have an adverse effect on the economic estimated value of the notes on the pricing date, and the price at which you may be able to sell the notes in an	he notes generally represents a ald pay for our conventional fixed-rate debt securities, or the borrowing rate s to be more favorable to you.
§ A trading market is not expected to develop for the notes. Neither we nor MLPF&S is obligated to the notes. There is no assurance that any party will be willing to purchase your notes at any price in any second	•
Your return on the notes and the value of the notes may be affected by exchange rate movement international securities markets, including economic, financial, social and political conditions. Specifically, the issued by companies located within the Eurozone. The Eurozone is and has been undergoing severe financia regulatory ramifications are impossible to predict. A Market Measure Business Day means a day on which:

You will have no rights of a holder of the securities included in the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
While we, MLPF&S or our respective affiliates may from time to time own securities of companies included in the Index, we, MLPF&S and our respective affiliates do not control any company included in the Index, and have not verified any disclosure made by any other company.
§ There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.
The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See Summary of U.S. Federal Income Tax Consequences below and Supplemental Discussion of U.S. Federal Income Tax Consequences beginning on page PS-28 of product prospectus supplement EQUITY INDICES LIRN-1.
The conclusion that no portion of the interest paid or credited or deemed to be paid or credited on a note will be Participating Debt Interest subject to Canadian withholding tax is based in part on the current published administrative position of the CRA. There cannot be any assurance that CRA is current published administrative practice will not be subject to change, including potential expansion in the current administrative interpretation of Participating Debt Interest subject to Canadian withholding tax. If, at any time, the interest paid or credited or deemed to be paid or credited on a note is subject to Canadian withholding tax, you will receive an amount that is less than the Redemption Amount. You should consult your own adviser as to the potential for such withholding and the potential for reduction or refund of part or all of such withholding, including under any bilateral Canadian tax treaty the benefits of which you may be entitled. For a discussion of the Canadian federal income tax consequences of investing in the notes, see Summary of Canadian Federal Income Tax Consequences below, Canadian Taxation Debt Securities on page 38 of the prospectus dated December 1, 2014.
Other Terms of the Notes
The provisions of this section supersede and replace the definition of Market Measure Business Day set forth in product supplement EQUITY INDICES LIRN-1.
Market Measure Business Day

(A) the Eurex (or any successor) is open for trading; and

(B) the Index or any successor thereto is calculated and published.
