Item 8.01. Other Events

Northern States Power Company (NSP-Minnesota), a Minnesota corporation, and a wholly owned subsidiary of Xcel Energy Inc., filed a request with the Minnesota Public Utilities Commission (MPUC) for an increase in annual revenues of approximately \$285 million, or 10.7 percent. The rate filing is based on a 2013 forecast test year, a requested return on equity (ROE) of 10.6 percent, an average electric rate base of approximately \$6.3 billion and an equity ratio of 52.56 percent. In January 2013, interim rates of approximately \$251 million became effective, subject to refund.

NSP-Minnesota subsequently revised the requested annual revenue increase to approximately \$209 million, or 7.8 percent, based on an ROE of 10.6 percent, a rate base of approximately \$6.3 billion and an equity ratio of 52.56 percent. The revenue requirement reflects a requested deficiency of \$259 million combined with \$50 million of rate mitigation through deferral mechanisms.

On Aug. 8, 2013, the MPUC voted to approve a rate increase that is estimated to be approximately \$103 million or 3.8 percent based on a 9.83 percent ROE and 52.56 percent equity ratio. In addition, the MPUC authorized approximately \$22 million in deferrals, as well as a \$24 million reduction in revenue and depreciation expense.

Specifically the MPUC determined that:

Sherco 3 was not used and useful, but allowed for recovery of property taxes and deferral of 2013 depreciation expense;

Approximately 41.6 percent of the investment in the Monticello life cycle management (LCM)/ extended power uprate (EPU) made since our last rate case was found to be associated with the EPU and should be left in construction work in progress until an uprate license has been obtained from the Nuclear Regulatory Commission (NRC) and the MPUC makes a determination on the prudence of the Monticello costs. In addition, the MPUC opened an investigation with respect to the higher-than-expected costs associated with our LCM/EPU program;

Reduce revenue and depreciation expense by approximately \$24 million due to an eight-year amortization of the theoretical depreciation reserve for transmission, distribution and general property;

Implement a low-income surcharge beginning in 2014, reducing the 2013 revenue requirement by that amount;

Use the weighted average cost of capital of 7.45 percent to calculate the interest charge associated with the interim rate refund. Previously, the interest rate for the interim rate refund was based on the prime rate.

The MPUC generally followed the Administrative Law Judge's (ALJ) report in other respects.

Recommended rate increase	\$ 209	\$ 127	\$ 103
Estimated impact of cost deferrals	50	34	22
Estimated impact of the theoretical depreciation reserve	-	-	24
Impact on pre-tax income	\$ 259	\$ 161	\$ 149

The MPUC has ordered the completion of various studies and reporting requirements. Further clarifications and changes to the estimate may result when the MPUC issues its order, which is expected in September 2013.

2013 Guidance

Xcel Energy reaffirms 2013 earnings guidance of \$1.85 to \$1.95 per share.

Except for the historical statements contained in this 8-K, the matters discussed herein, including our 2013 earnings per share guidance and assumptions and the expected impact of rate cases, are forward-looking statements that are subject to certain risks, uncertainties and assumptions.
