FORM 6-K
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

REPORT OF FOREIGN PRIVATE ISSUER

PARTICIPATION IN THE PROJECT OF THE DEVELOPMENT OF NICKEL MINE AND BUILDING A
PROCESSING PLANT IN NEW CALEDONIA

PURSUANT TO RULE 13a-16 OR 15d-16
OF THE SECURITIES EXCHANGE ACT OF 1934

For the month of October 21, 2004

Commission File Number 09929

MITSUI & CO., LTD.

(Translation of registrant's name into English)

2-1, OHTEMACHI 1-CHOME CHIYODA-KU, TOKYO 100-0004 JAPAN

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports
under cover of Form 20-F or Form 40-F:

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a
Form 6-K if submitted solely to provide an attached annual report to security
holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a
Form 6-K if submitted to furnish a report or other document that the registrant
foreign private issuer must furnish and make public under the laws of the
jurisdiction in which the registrant is incorporated, domiciled or legally
organized (the registrant's "home country"), or under the rules of the home
country exchange on which the registrant's securities are traded, as long as the

Edgar Filing: MITSUI & CO LTD - Form 6-K

report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes [] No [X]

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Re: Participation in the project of the development of nickel mine and building a processing plant in New Caledonia

Sumitomo Metal Mining Co., Ltd. (Sumitomo) and Mitsui & Co., Ltd. (Mitsui) (Sumitomo and Mitsui, collectively referred to as the "Japanese Consortium") jointly announced today that they have reached an agreement in principle with Inco Limited (Canada) to participate jointly in the Goro Nickel Development Project (Goro Nickel Project), which is being promoted by Inco Limited in New

Edgar Filing: MITSUI & CO LTD - Form 6-K

Caledonia, and that they have concluded a Memorandum of Understanding (MOU) in order to negotiate definitive agreements with Inco concerning the terms and conditions of their acquisition and certain other arrangements covering their participation in the project.

The Goro Nickel Project is a large-scale project that will use a hydrometallurgical process technology ("HPAL Project") which has received a great deal of industry attention. Recently, following the completion of the reviewing study, which indicates a total project capital cost of approximately US\$1.87 billion, taking into account certain assumptions for escalation in costs and currency transaction gains and an outline of the plant, Sumitomo and Mitsui have been negotiating with Inco Limited regarding their participation in the Goro Nickel Project and have reached an agreement in principle on participation by acquiring the equity of Goro Nickel S.A., the project company for the Goro Nickel Project, from Inco Limited. The detailed terms and conditions of the equity participation have yet to be decided, but the equity position of the Japanese Consortium will be 21% (Sumitomo: 11%, Mitsui: 10%).

Sumitomo and Mitsui understand that The Goro Nickel Project has a very extensive nickel resource base and its operations are currently expected to continue a very long period of time. The Goro Nickel Project is expected to start production in the late summer of 2007 and have a life of mine capacity of 60,000 metric tonnes of nickel as nickel oxide and between 4,300 and 5,100 metric tonnes of cobalt as cobalt carbonate per year.

The Japanese Consortium will have the right to off-take nickel and cobalt in proportion to its equity ratio. The consortium will aim to respond to the growing stainless steel market in Asia led by China which is a major demand segment of nickel and to the battery market which is a major growing market for cobalt.

Inco Limited and Sumitomo have developed a long term good relationship through joint investment in nickel projects, i.e. PT International Nickel Indonesia Tbk (Indonesia). Sumitomo has been negotiating with Inco regarding participation in the Goro Nickel Project for several years, since Sumitomo believes that the Goro Nickel Project is a promising project due to the size of its mineral resource base and expected competitiveness of its operating costs.

Sumitomo disclosed in its mid-term business plan that it regards resource and metal business as its core business. In order to achieve its goal of being a major player in non-ferrous business within ten years, Sumitomo is making a consistent effort to acquire valuable nickel business resources, such as the Coral Bay Nickel Project (Philippines), which produces nickel-cobalt mixed sulfide at its refinery. Sumitomo believes that the foundation of Sumitomo's nickel business will be strengthened by its participation in the Goro Nickel Project.

Investment in mineral resources business is one of the core strategies in Mitsui's medium term business plan ending March 2006. Mitsui believes that participation in the Goro Nickel Project will contribute to the diversification of its portfolio in mineral resources business and the reinforcement of the basis for future earnings.

Growth of world nickel demand is expected to remain stable due to the growth of nickel demand in Asia, mainly led by the IT industry and China, and there is an urgent need to cope with such growth. Both Sumitomo and Mitsui believe that participation in the Goro Nickel Project will strengthen the foundation of the nickel supply framework, not only to the domestic market, but also to foreign

Edgar Filing: MITSUI & CO LTD - Form 6-K

countries, centered around South East Asia.

GORO NICKEL PROJECT

The Goro Nickel Project, headed by Canadian company Inco Limited, is the largest nickel development operation ever planned. Under the plan, a high-pressure acid leaching process (HPAL) will be used to produce nickel oxide and cobalt carbonate from the extensive laterite ore deposits in the southern Goro provinces of New Caledonia.

Inco has been verifying the feasibility of the HPAL process through its pilot plant since the mid-1990s, and has achieved a high level of technical expertise. An outline of the Goro Nickel Project is as follows.

1. Operating body : Goro Nickel SA
Head Quarters : Paris, France
President : P. Alla
Employee at year end : 167 (December 2003)
Shareholder : Inco Limited (85%), BRGM* (15%)
(* BRGM : Bureau des Recherches Geologiques et Minieres)
2. Total Project Cost : about US\$1,878 million
3. Annual Ore Throughput : about 4 million tons
4. Annual Production : 60,000 tons of nickel as nickel oxide
4,300~5,000 tons of cobalt as cobalt carbonate
5. Start up : third quarter of 2007

Attachment 2

INCO LIMITED

Name of Company : Inco Limited

Edgar Filing: MITSUI & CO LTD - Form 6-K

Establishment : 1902
 Headquarters : Toronto, Ontario, Canada
 Officer of the company : Chairman : Scott M. Hand
 President : Peter C. Jones
 Capital : US\$2,858 million (end of 2003)
 Employee at year end : 10,478 (end of 2003)
 Main Business : Inco produces nickel ore and primary nickel,
 and undertakes processing and other nickel-related
 projects. The Company also produces copper, along with
 by-products of the nickel production process in the
 form of cobalt, gold, silver and platinum group metals.
 Inco is the second largest nickel producer in the
 world, after Norlisk of Russia.

Financial highlights (US\$ million)	:	2003	2002
Net sales		2,474	2,161
Net earnings (loss)		137	(1,482)
Total assets		9,006	8,577
Total liabilities		5,144	4,790
Total shareholder's equity		3,862	3,787

Production highlights	:	2003	2002
Primary nickel ('000 t)		187	207
Primary copper ('000 t)		91	116

Main mine sites : Sudbury : Location : Ontario, Canada.
 Inco's share : 100%.
 Sudbury has the largest sulfide ore deposit
 and produce nickel, copper, cobalt and
 other precious metal.
 Thompson : Location : Manitoba, Canada.
 Inco's share : 100%.
 Soroako : Location : Sulawesi Island, Indonesia.
 Inco's share : 59%. (Sumitomo Metal Mining 20.1%)
 Soroako has Lateratic nickel ore deposit
 and has a smelting plant at the mining site
 to produce nickel matt.
 Goro : New Caledonia

Main refineries : Cupper Cliff : Location : Ontario, Canada
 Inco's share : 100%
 Products : nickel, nickel products, copper, gold
 and silver.
 Thompson : Location : Manitoba, Canada
 Inco's share : 100%
 Products : nickel, cobalt and precious metals.
 Port Corborn : Location : Ontario, Canada
 Inco's share : 100%
 Products : nickel
