**Mitsui's entrance to the local gas distribution business in Brazil
through acquisition of Gaspart**

Mitsui & Co., Ltd. (Mitsui) announces that in New York (U.S.A.) on³⁰October 2005 local time, it has entered into a share purchase agreement with Global Petroleum & Gas Industry, L.L.C., (U.S.A.) (Global) to acquire all of the equity interest held by Global in Gás Participações Ltda. (Brazil) (Gaspart), which currently owns a part of the capital of seven local gas distribution companies (LDC)(*1) in seven States (*2) in Brazil. Global owns 100% of the equity interest in Gaspart. The total purchase price is approximately US\$250 million, and Mitsui intends to close the deal by the end of February next year.

Gaspart runs the seven LDCs, in which the other shareholders are Petrobras Gas S.A. (Gaspetro), a 100% subsidiary of the Brazilian state-owned petroleum company Petróleo Brasileiro S.A. (Petrobras), and the respective State governments in which each LDC is located. Each LDC runs its business under an exclusive concession for the period of approx. 30 to 50 years, granted by the respective State, and sells the gas, all of which is purchased from Petrobras, to mainly large clients for industrial use and as fuel for natural gas vehicles. The total volume of gas which the seven LDCs handle is significant in the Brazilian market, and accounts for nearly 20% of total gas distributions in Brazil. With the purchase of Gaspart, Mitsui can enter into the downstream of the energy business chain, which will contribute to diversifying its energy business in Brazil. By its diversification of business, Mitsui also hopes to strengthen and develop its relationship with those entities which operate the LDCs, namely Petrobras and the State governments. Mitsui anticipates the further development of its energy related business in Brazil, where energy demand is growing, based on stable economic growth.
