Item 2.02

Results of Operations and Financial Condition.

J. C. Penney Company, Inc. (the “Company”) issued an earnings press release on February 24, 2012 announcing its 2011 fourth quarter and full-year results of operations and financial condition. This information is attached as Exhibit 99.1.

The press release and accompanying schedules provide certain information regarding (i) adjusted operating income excluding restructuring and management transition charges, (ii) adjusted operating income, (iii) adjusted income from continuing operations excluding restructuring and management transition charges, (iv) adjusted income from continuing operations, (v) adjusted earnings per share from continuing operations excluding restructuring and management transition charges, (vi) adjusted earnings per share from continuing operations and (vii) free cash flow, all of which may be considered non-GAAP financial measures under the rules of the Securities and Exchange Commission. A reconciliation of each such non-GAAP financial measure to the most directly comparable financial measure calculated and presented in accordance with GAAP is included with the release.

We define (i) adjusted operating income excluding restructuring and management transition charges as operating (loss)/income excluding the impact of restructuring and management transition charges, (ii) adjusted operating income as operating (loss)/income excluding the impact of restructuring and management transition charges and the non-cash impact of the qualified pension plan expense, (iii) adjusted income from continuing operations excluding restructuring and management transition charges as (loss)/income from continuing operations excluding the impact of after-tax restructuring and management transition charges, (iv) adjusted income from continuing operations as (loss)/income from continuing operations excluding the impact of after-tax restructuring and management transition charges and the after-tax non-cash impact of the qualified pension plan expense, (v) adjusted earnings per share from continuing operations excluding restructuring and management transition charges as (loss)/earnings per share from continuing operations excluding the impact of after-tax restructuring and management transition charges and (vi) adjusted earnings per share from continuing operations as (loss)/earnings per share from continuing operations excluding the impact of after-tax restructuring and management transition charges and the after-tax non-cash impact of the qualified pension plan expense. We believe that these non-GAAP financial measures, which our management relies on to assess our operating results, are useful in order to better understand the operating performance of our core business, provide enhanced visibility into our selling, general and administrative expense structure and to facilitate the comparison of our results to the results of our peer companies.

We define free cash flow as cash flows from operating activities excluding discretionary cash contributions to the Company’s primary pension plan, less capital expenditures and dividends paid, plus proceeds from the sale of assets. Adjustments to exclude discretionary pension plan contributions are more indicative of the Company’s ability to generate cash flows from operating activities. We believe discretionary pension plan contributions are more reflective of financing transactions to pay-down off-balance sheet debt relating to the pension liability. In addition, we believe that free cash flow is a relevant indicator of our ability to repay maturing debt, both on and off-balance sheet, revise our dividend policy or fund other uses of capital that we believe will enhance stockholder value. Free cash flow is limited and does not represent remaining cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt maturities, pay-down of off-balance sheet pension debt, and other obligations or payments made for business acquisitions.

We believe it is important to view each of these non-GAAP financial measures in addition to, rather than as a substitute for, the GAAP measures of operating (loss)/income, (loss)/income from continuing operations, (loss)/earnings per share from continuing operations, and cash flows from operating activities, respectively.
