Financial Statements for the

Years Ended December 31, 2004 and 2003 and

Independent Auditors Report

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders

Chunghwa Telecom Co., Ltd.

We have audited the accompanying balance sheets of Chunghwa Telecom Co., Ltd. as of December 31, 2004 and 2003, and the related statements of operations, changes in stockholders' equity and cash flows for the years then ended, all expressed in New Taiwan dollars. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Regulations for Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those regulations and standards required that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidences supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the Company as of December 31, 2004 and 2003, and the results of its operations and its cash flows for the years then ended in conformity with relevant regulations, regulations governing the preparation of financial statements of public companies and accounting principles generally accepted in the Republic of China.

As stated in Notes 2 and 3 to the financial statements, the Company's accounts are subject to examination by the Executive Yuan and by the Ministry of Audit of the Control Yuan. The accounts as of and for the year ended December 31, 2003 have been examined by these government agencies, and adjustments from this examinations have been recognized in the accompanying financial statements.

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

CHUNGHWA TELECOM CO., LTD.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2004 AND 2003

(Amounts in Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL

Chunghwa Telecom Co., Ltd. (Chunghwa or the Company) was incorporated on July 1, 1996 in the Republic of China (ROC) pursuant to the Telecommunications Act No. 30. The Company is a company limited by shares and, prior to August 2000, was wholly owned by the Ministry of Transportation and Communications (MOTC). Prior to July 1, 1996, the current operations of Chunghwa were carried out under the Directorate General of Telecommunications (DGT). The DGT was established by the MOTC in June 1943 to take primary responsibility in the development of telecommunications infrastructure and to formulate policies related to telecommunications. On July 1, 1996, the telecom operations of the DGT were spun-off to form Chunghwa and the DGT continues to be the industry regulator.

As a dominant telecommunications service provider of fixed-line and cellular telephone services, within the meaning of applicable telecommunications regulations of the ROC, the Company is subject to additional requirements imposed by the MOTC.

The MOTC is in the process of privatizing the Company by reducing the government ownership to below 50% in various stages. In July 2000, the Company received approval from the Securities and Futures Commission (the SFC) for a domestic initial public offering and its common shares were listed and traded on the Taiwan Stock Exchange (the TSE) on October 27, 2000. Certain of the Company s common shares were sold by an auction, in connection with the foregoing privatization plan, in domestic public offerings in June 2001, December 2002, March 2003, April 2003 and July 2003. Certain of the Company s common shares were also sold in an international offering of securities in the form of American Depositary Shares (ADS) in July 17, 2003 and were listed and traded on the New York Stock Exchange (the NYSE). The MOTC intends to continue to sell certain of the Company s common shares and throughout the privatization process to the Company s employees. The MOTC has sold 35.11% shares of the Company as of December 31, 2004.

The number of employees as of December 31, 2004 and 2003 are 28,526 and 29,070, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared in conformity with relevant regulations, regulations governing the preparation of financial statements of public companies and accounting principles generally accepted in the Republic of China. The preparation of financial statements requires management to make certain estimates and assumptions that affect the recorded amounts of assets, liabilities, revenues and expenses of the Company. The Company continually evaluates these estimates, including those related to allowances for doubtful accounts, valuation allowances on inventories, useful lives of long term assets, pension plans and income tax. The Company bases its estimates on historical experience and other assumptions, which it believes to be reasonable under the circumstances. Actual results may differ from these estimates. The significant accounting policies are summarized as follows:

Basis of Presentation

As a state-owned company, the Company maintains statutory accounts in accordance with the laws and regulations issued by the Executive Yuan, the MOTC, the Ministry of Audit (the MOA) of the Control Yuan and, in the absence of any specific laws and regulations applicable to a particular transaction or account, the regulations governing the preparation of financial statements of public companies and generally accepted accounting principles in the Republic of China. The accounts are subject to annual

examinations by the Executive Yuan and by the MOA (the Executive Yuan and MOA are hereinafter referred to as government agencies). The objective of these examinations is to evaluate the Company's performance against the budget approved by the Legislative Yuan. The accounts are considered final only after adjustments, if any, based on the annual examinations, are recorded. The accounts for the year ended December 31, 2003 have been examined by these government agencies and the resulting adjustments were recorded retroactively.

Current Assets and Liabilities

Current assets are commonly identified as those which are reasonably expected to be realized in cash, or sold or consumed within one year. Current liabilities are obligations which mature within one year.

Cash Equivalents

Cash equivalents are commercial paper purchased with maturities of three months or less from the date of acquisition.

Short-term Investments

The investments are carried at the lower of cost or market value. An allowance for decline in value is provided when the aggregate carrying value of the investments exceeds the aggregate market value. A reversal of the allowance will result from a subsequent recovery of the carrying value.

The cost of short-term investment sold are determined using the moving weighted-average method.

Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided on the basis of a review of the collectibility of individual receivables.

Inventories

Inventories are stated at the lower of cost (weighted-average cost method) or market value (replacement cost or net realizable value).

Investments in Unconsolidated Companies

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

Investments in shares of stock in companies where the Company exercises significant influence in their operating and financial policy decisions are accounted for using the equity method. Under the equity method, the investment is initially stated at cost and subsequently adjusted for its proportionate share in the net earnings of investee companies. Any cash dividends received are recognized as a reduction in the carrying value of the investments. Unrealized profits arising from downstream transactions to equity investees are deferred in the Company's portion of equity income or loss. Profits and losses arising from equipment purchased from equity investees are eliminated and recognized over the estimated remaining useful life of the equipment.

Investments in shares of stock with no readily determinable market values are accounted for using the cost method when the ownership is less than 20%. Reductions in carrying value of those investments for decline in value are charged to stockholder's equity. Reductions which are determined to be other than temporary are charged to current income. Cash dividends received are recorded as income.

Stock dividends received are accounted for as increases in the number of shares held and are not recognized as income.

The costs of investments sold are determined using the weighted-average method.

Property, Plant and Equipment

Property, plant and equipment are stated at cost plus a revaluation increment, if any, less accumulated depreciation. The interest costs that are directly attributable to the acquisition, construction of a qualifying asset are capitalized as property, plant and equipment. Major renewals and betterments are capitalized, while maintenance and repairs are expensed currently.

An impairment loss is recognized when the recoverable amount of an asset is less than its carrying amount. A reversal of the impairment loss is recognized if there is a subsequent recovery in the value of the asset. The recoverable amount cannot exceed the original cost less accumulated depreciation. An impairment loss on a revalued asset is recognized directly against capital surplus from revaluation for the asset to the extent that the impairment loss does not exceed the amount in the capital surplus from revaluation for that same asset. A reversal of an impairment loss on a revalued asset is credited directly to capital surplus from revaluation under the heading capital surplus from revaluation. However, to the extent that an impairment loss on the same revalued asset was previously recognized in profit or loss, a reversal of that impairment loss is also recognized in profit or loss.

Depreciation expense is determined based upon the asset's estimated useful life using the straight-line method. The estimated useful lives are as follows: land improvements, 10 to 30 years; buildings, 10 to 60 years; machinery and equipment, 6 to 10 years; telecommunication network facilities, 6 to 15 years; and miscellaneous equipment, 3 to 10 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is credited or charged to income.

Intangible Assets

The amount recorded for the 3G Concession will be amortized upon the MOTC approval of using the straight-line method over the lower of the legal useful life or estimated useful life. Patents are amortized using the straight-line method over the estimated useful lives ranging from 12 to 20 years. Computer software costs are capitalized and amortized using the straight-line method over the estimated useful lives of three years.

An impairment loss is recognized when the recoverable amount of an intangible asset other than goodwill is less than its carrying amount. A reversal of the impairment loss is recognized if there is a subsequent recovery in the value of the asset. The recoverable amount cannot exceed the original cost less accumulated amortization.

Pension Costs

Pension costs are recognized according to the budget approved by the Legislative Yuan and the actuarial report. In addition, the DGBAS issued instructions that the pension costs of all state-owned companies to be privatized should be measured and recognized on the assumption that there is no privatization and that an additional amount should be calculated on the basis of the employees' service years if the additional amount does not reduce the budgeted net income. An additional minimum liability is recognized, if an unfunded accumulated benefit obligation exists, and an equal amount is recognized as an intangible asset, provided that the asset recognized does not exceed the amount of unrecognized net transition

obligation and unrecognized prior service cost.

Revenue Recognition

Revenues are recognized when revenues are realized or realizable and earned. Related costs are expensed as incurred.

Service revenue is based on the fair value of the sales price, after business discount and quantity discount, between the Company and customer. The sales price of service revenue is the amount which matures within one year. The difference between fair value and maturity value is not material and the transactions occur frequently so the interest factor is not included in calculating fair value.

Usage revenues from fixed-line services (including local, domestic long distance and international long distance), cellular services, Internet and data services, and interconnection and call transfer fees from other telecommunications companies and carriers are billed in arrears and are recognized based upon minutes of traffic processed when the services are provided in accordance with contract terms.

Other revenues are recognized as follows: (a) one-time subscriber connection fees are recognized upon activation, (b) fixed-monthly fees (on fixed-line services, wireless, internet and data services) are accrued every month, and (c) prepaid services (fixed line, cellular and Internet) are recognized as income based upon actual usage by customers or when the right to use those services expire.

Expense Recognition

Expenses including commissions paid to agencies and handset subsidy costs paid to vendors that sell handsets to customers who subscribe to the service (as an inducement to enter into a service contract) are charged to income as incurred.

Income Tax

The Company accounts for income tax using the asset and liability method. Under this method, deferred income tax is recognized for investment tax credits and tax consequences of differences between financial statement carrying amounts and their respective tax bases. A valuation allowance is recognized if, available evidence indicates it is more likely than not that a portion or the entire deferred tax asset will not be realized. A deferred tax asset or liability should be classified as current or noncurrent according to the classification of its related asset or liability. However, if a deferred asset or liability cannot be related to an asset or liability in the financial statements, it should be classified as current or non-current depending on the expected reversal date of the temporary difference.

Investment tax credits utilized are recognized as reduction of income tax expense.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

Income taxes (10%) on undistributed earnings are recorded as expense in the year when the stockholders have resolved that the earnings shall be retained.

Earnings Per Share

Earnings per share is computed by dividing net income by the weighted-average number of common shares outstanding during the period.

Foreign-currency Transactions

The functional currency of the Company is the local currency, the New Taiwan dollar. Thus, the transactions of the Company that are denominated in currencies other than the New Taiwan dollars (the foreign currency) are recorded in New Taiwan dollars at the exchange rates prevailing on the transaction dates. Gains or losses realized upon the settlement of a foreign currency transaction are included in the period in which the transaction is settled. The balances, at the balance sheet dates, of the foreign currency assets and liabilities are adjusted to reflect the prevailing exchange rates, and the resulting differences are recorded as follows:

- a. Long-term stock investments accounted for by the equity method as cumulative translation adjustment under stockholders' equity; and

- b. Other assets and liabilities credited or charged to current income.

Foreign Currency Forward Exchange Contracts

The Company enters into foreign currency forward contracts to manage currency exposures in foreign currency-denominated assets and liabilities. The differences in the New Taiwan dollar amounts translated using the current rate and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the balance sheet dates, the receivables or payables arising from forward contracts are restated using the prevailing current rate at the balance sheet date and the resulting differences are recognized and charged to income. Also the receivables and payables related to the forward contract are netted with the resulting amount presented as either other current monetary asset or other current liability. Any resulting gain or loss upon settlement is charged to income in the period of settlement.

3. ADJUSTMENTS OF FINANCIAL STATEMENTS

Pursuant to the related regulation, the Company revalued its land owned as of April 30, 2000 based on the publicly announced value on July 1, 1999. These revaluations which were approved by the MOA resulted in increases in the carrying values of property, plant and equipment of \$5,986,074 thousand, long-term liabilities for land value incremental tax of \$211,182 thousand, and capital surplus of \$5,774,892 thousand.

On July 1, 1996, pursuant to the guidance on the incorporation of the Company and as instructed by the ROC's Executive Yuan (executive branch), the ROC Government (through the MOTC) transferred to the Company certain land and buildings with a carrying value of \$120,957,303 thousand. Those properties, as of that date, were registered in the name of the ROC's National Properties Bureau (NPB). On September, 2004, all the properties had been registered in the name of the Company.

Depreciation on property, plant and equipment for the years ended December 31, 2004 and 2003 amounted to \$40,840,195 thousand and \$41,710,486 thousand, respectively. No interest expense was capitalized for the year ended December 31, 2004. Capitalized interest expense aggregated to \$45,890 thousand for the year ended December 31, 2003. The rate of capitalized interest was from 0.56%-1.67%.

The insurance coverages on property, plant and equipment as of December 31, 2004 aggregated \$1,801,943 thousand.

13. LONG-TERM LOANS (INCLUDING CURRENT PORTION)

The loan from the Common Tunnel Fund was obtained pursuant to a long-term loan agreement with the Common Tunnel Fund managed by Ministry of Interior that allows the Company to obtain unsecured interest-free credit until March 12, 2007. The outstanding principal amounts as of December 31, 2003 are payable in three annual installments (NT\$0.2 billion, NT\$0.2 billion and NT\$0.3 billion) starting on March 12, 2005.

As of December 31, 2004, the Company had unused credit lines totaling approximately \$190,000,000 thousand, which are available for short-term and long-term borrowings.

14. STOCKHOLDERS EQUITY

Under the Company's Articles of Incorporation, authorized capital is divided into 9,647,724,900 common shares (at \$10 par value per share), all of which are issued and outstanding. The Company's Articles of Incorporation and the Republic of China Telecommunications Act provide that the MOTC has the right to purchase two redeemable preferred shares (NT\$10 par value) in the event its ownership in the Company falls below 50% of the outstanding common shares.

For the purpose of privatizing the company, the MOTC sold 1,109,750 common shares of the Company in an international offering of securities in the form of American Depositary Shares (ADS) amounting to 110,975 thousand units (one ADS represents ten common shares) on the New York Stock Exchange in July 17, 2003.

The ADS holders generally have the same rights and obligations as other common shareholders, subject to the provision of relevant laws. The exercise of such rights and obligations shall comply with the related regulations and deposit agreement, which stipulate, among other things, that ADS holders can, through deposit agents:

- a. Exercise their voting rights;
- b. Sell their ADSs; and

- c. Receive dividends declared and subscribe to the issuance of new shares.

As of December 31, 2004, the outstanding ADSs were 110,975 thousand units, which equaled approximately 1,109,749 thousand common shares and represented 11.50% of the Company's total outstanding common shares.

The MOTC, as the holder of those preferred shares is entitled to the same rights as holders of common shares and certain additional rights as specified in the Company's Articles of Incorporation as follows:

- a. The holder of the preferred shares, or its nominated representative, will act as a director and/or supervisor during the entire period in which the preferred shares are outstanding.
- b. The holder of preferred shares has the same option as holders of common shares when the Company raises capital by issuing new shares.
- c. The holder of the preferred shares will have the right to vote on any change in the name of the Company or the nature of its business and any transfer of a substantial portion of the Company's business or property.
- d. The holder of the preferred shares may not transfer the ownership. The Company must redeem all outstanding preferred shares within three years from the date of their issuance.

Under the ROC Company Law, capital surplus can only be utilized to offset deficits or be declared as stock dividends. Also, such capital surplus and donations can only be declared as a stock dividend by the Company at an amount calculated in accordance with the provisions of existing regulations.

In addition, before distributing a dividend or making any other distribution to stockholders, the Company must pay all outstanding taxes, recover any past losses and set aside a legal reserve equal to 10% of its net income, and depending on its business needs or requirements, may also set aside a special reserve. The cash dividends to be distributed shall not be less than 10% of the total amount of the dividends to be distributed. In addition, if the cash dividend to be distributed is less than \$0.10 per share, such cash dividend shall be distributed in the form of common shares.

Telecommunications service is a Taiwan's capital-intensive industry and the Corporation requires capital expenditures to sustain its competitive position in high-growth market. Thus, the Company's dividend policy takes into account future capital expenditure outlays. In this regard, a portion of the earnings may be retained to finance these capital expenditures. The remaining earnings can then be distributed as dividends if approved by the stockholders in the following year and will be recorded in the financial statements of that year.

Furthermore, under the ROC Company Law, the appropriation for legal reserve shall be made until the accumulated reserve equals the aggregate par value of the outstanding capital stock of the Company. This reserve can only be used to offset a deficit, or when the balance is 50% of the aggregate par value of the outstanding capital stock of the Company, the Company may, at its option, declare 50% of the reserve as a stock dividend and transfer the amount to capital.

The appropriations and distributions of the 2004 earnings of the Company have not been approved by the board of directors and stockholders as of March 4, 2005. Related information can be accessed through the Market Observation Post System on the Web site of the Taiwan Stock Exchange Corporation. The Company did not distribute bonuses for employees and remunerations of directors and supervisors for the 2003 earnings.

Under the Integrated Income Tax System that became effective on July 1, 1998, non-corporate stockholders are allowed a tax credit for the income tax paid by the Company on earnings generated in 1999 and onwards. An Imputation Credit Account (ICA) is maintained by the Company for such income tax and the tax credit is allocated to each stockholder.

18. PENSION PLAN

The Company has different pension plans for its employees depending on their classifications. In general, the employees' pension entitlement is based on MOTC regulations, Labor Standards Law and/or the private pension plan of the Company.

The funding of the pension plan for employees classified as staff is based on the budget approved by the Legislative Yuan and a supplementary budget approved by the Executive Yuan. The staff pension fund is administered by a pension fund committee and deposited in its name in a commercial bank. The pension plan for employees classified as workers is funded monthly at 15% or less of their wages and is also administered by a pension committee and deposited in its name in the Central Trust of China Company.

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

The Labor Pension Act of ROC will be effective beginning July 1, 2005 and this pension mechanism is considered as a defined contribution plan. The employees who were subject to the Labor Standards Law prior to the enforcement of this Act may choose to be subject to the pension mechanism under this Act or continue to remain to be subject to the pension mechanism under the Labor Standards Law. For those employees who were subject to the Labor Standards Law prior to July 1, 2005 and still work for the same company after July 1, 2005 and choose to be subject to the pension mechanism under this Act, their seniority as of July 1, 2005 shall be maintained. The rate of contribution by an employer to the Labor Pension Fund per month shall not be less than 6% of each employee's monthly salary or wage.

The privatization of the Company was not completed on December 31, 2004, and the new target privatization date is expected to be December 31, 2005. Therefore, based on the assumption that the timing of the privatization is December 31, 2005, the accrued pension cost for staff was \$2,297,081 thousand and prepaid pension cost for worker was \$280,151 thousand as of December 31, 2004, as a result of net accrued pension cost of \$2,016,930 thousand.

19. TRANSACTIONS WITH RELATED PARTIES

As the Company is a state-owned enterprise, the ROC Government is one of the Company's customers. The Company provides fixed-line services, wireless services, Internet and data and other services to the various departments and agencies of the ROC Government and other state-owned enterprises in the normal course of business and at arm's-length prices. The information on service revenues from government bodies and related organizations have not been provided because details of the type of users were not maintained by the Company. The Company believes that all costs of doing business are reflected in the financial statements and that no additional expenditures will be incurred as a result of the privatization being completed.

- a. The Company engages in business transactions with the following related parties:

<u>Company</u>	<u>Relationship</u>
Taiwan International Standard Electronics (TISE)	Equity-accounted investee
Chunghwa System Integration (CSI)	Subsidiary of equity - accounted investee

The foregoing acquisitions were conducted under normal commercial terms.

20. COMMITMENTS AND CONTINGENT LIABILITIES

As of December 31, 2004, the Company's remaining commitments under non-cancelable contracts with various parties were as follows:

a. Acquisitions of buildings of \$3,391,411 thousand.

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

- b. Acquisitions of telecommunications equipment of \$12,125,769 thousand.
- c. Unused letters of credit of about \$6,147,272 thousand.
- d. Contract to print billing, envelopes and telephone directories of approximately \$342,862 thousand.

-25-

- e. The Company also has non-cancelable operating leases covering certain buildings, computers, computer peripheral equipment and operation system software under contracts that expire in various years. Minimum rental commitments under those leases are as follows:

Year	Rental Amount
2005	\$ 1,226,033
2006	983,677
2007	636,168
2008	332,509
2009 and thereafter	135,922

- f. A commitment to contribute \$2,500,000 thousand to a Fixed Line Fund administered by the Ministry of Interior Affairs and Taiwan Power Company, of which \$1,000,000 thousand has been contributed by the Company on June 30, 1995. If the balance of the Fixed Line Fund is not sufficient for its purpose, the above three parties will determine when to raise additional funds and the contribution amounts from each party.
- g. A commitment to contribute \$2,000,000 thousand to a Piping Fund administered by the Taipei City Government, of which \$1,000,000 thousand was contributed by the Company on August 15, 1996.

21. FAIR VALUE OF FINANCIAL INSTRUMENTS

- a. Derivative financial instruments

The Company entered into derivative financial instrument transactions to manage exposures related to foreign-currency denominated payable fluctuation. There were no foreign currency forward exchange contracts outstanding as of December 31, 2004.

- 1) Transaction risk

- a) Credit risk

The Company is exposed to credit risk in the event of non-performance of the counter parties to forward contracts on maturity. In order to manage this risk, the Company conducts transactions only with financial institutions with good credit ratings. As a result, no material losses resulting from counter party defaults are anticipated.

- b) Market risk

Market risk is the exposure created by potential exposures to changes of foreign exchange rate related to its foreign-currency-denominated assets and/or liabilities and changes on interest rates related to its obligations.

- c) Liquidation risk and cash flow risk

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

The Company entered into foreign currency forward exchange contracts to hedge its exposure to the effect of exchange rate fluctuations on net liabilities. At the maturity of the contracts, the Company has sufficient cash to cover the cash out, therefore the Company believes there are no significant liquidation risk and cash flow risk.

2) Transaction gains and losses

Net foreign exchange loss for the year ended December 31, 2004 was \$26,784 thousand.

b. Fair value of financial instruments:

Customers deposits	6,176,863	6,176,863	5,606,588	5,606,588

The Company's basis for determining the fair values is as follows:

- 1) Financial instruments except those mentioned in b) and c) above the carrying values reported in the balance sheet approximate the fair values of these assets.
- 2) Fair values of investments in unconsolidated companies and funds are based on the net asset values of the investments in unconsolidated companies, if quoted market prices are not available.
- 3) Long-term loans (including current portion). The fair value is discounted value based on projected cash flow. The projected cash flows were discounted using the maturity dates of long-term loans.

CHUNGHWA TELECOM CO., LTD.

NOTES TO FINANCIAL STATEMENTS

(Amounts in Millions of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL

Chunghwa Telecom Co., Ltd. (Chunghwa or the Company) was incorporated on July 1, 1996 in the Republic of China (ROC) pursuant to the Telecommunications Act No. 30. The Company is a company limited by shares and, prior to August 2000, was wholly owned by the Ministry of Transportation and Communications (MOTC). Prior to July 1, 1996, the current operations of Chunghwa were carried out under the Directorate General of Telecommunications (DGT). The DGT was established by the MOTC in June 1943 to take primary responsibility in the development of telecommunications infrastructure and to formulate policies related to telecommunications. On July 1, 1996, the telecom operations of the DGT were spun-off as Chunghwa which continues to carry out the business and the DGT continues to be the industry regulator.

As a dominant telecommunications service provider of fixed-line and cellular telephone services, within the meaning of applicable telecommunications regulations of the ROC, the Company is subject to additional requirements imposed by the MOTC.

The MOTC is in the process of privatizing the Company by reducing the government ownership to below 50% in stages. Certain of the Company's common shares were sold, in connection with the foregoing privatization plan, in domestic public offerings at various dates from August 2000 to July 2003. Certain of the Company's common shares were also sold to its employees at various dates from October 2000 to December 2003. In July 2003, the MOTC sold the Company's common shares in an international offering of securities in the form of American Depository Shares (ADS). The MOTC intends to continue to sell the Company's common shares in the ROC and throughout the process of privatization to the Company's employees. As of December 31, 2004, the MOTC owns 64.89% shares of the Company.

The Company's common shares were listed and traded on Taiwan Stock Exchange and New York Stock Exchange on October 27, 2000 and on July 17, 2003, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company maintains its accounting books and records based on the ROC Government regulations and accounting principles generally accepted in the ROC (ROC GAAP). The accompanying financial statements have been prepared to present its financial position, results of operations and cash flows in accordance with generally accepted accounting principles in the United States (US GAAP).

Use of Estimates

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

The preparation of financial statements requires management to make certain estimates and assumptions that affect the recorded amounts of assets, liabilities, revenues and expenses of the Company. The Company continually evaluates these estimates, including those related to allowances for doubtful accounts, useful lives of long term assets, pension plans, valuation allowances on deferred income taxes, customer service periods, impairment of assets and the fair value of financial instruments. The Company bases its estimates on historical experience and other assumptions, which it believes to be reasonable under the circumstances. Actual results may differ from these estimates.

Foreign Currency Transactions

The functional currency of the Company is the local currency, the New Taiwan dollar (NT\$) as it is the currency of the primary economic environment. Thus, the transactions of the Company that are denominated in currencies other than the New Taiwan dollars (the foreign currency) are recorded in New Taiwan dollars at the exchange rates prevailing on the transaction dates. Gains or losses realized upon the settlement of a foreign currency transaction are included in the period in which the transaction is settled. The balances, at the balance sheet dates, of the foreign currency assets and liabilities are adjusted to reflect the prevailing exchange rates and the resulting differences are recorded as follows:

- a. Long-term stock investments accounted for by the equity method as cumulative translation adjustment under stockholders' equity.
- b. Other assets and liabilities credited or charged to current income.

Cash Equivalents

Cash equivalents include commercial paper purchased with maturities of three months or less from the date of acquisition.

Short-term Investments

Short-term Investments include commercial paper and repurchaseable bonds purchased with original maturities greater than 90 days. The Company has classified investments as held to maturity which the Company has the ability to and intends to hold to maturity. Held-to-maturity investments are reported at amortized cost with any realized gains and losses recorded in other income and expense. Investments in mutual funds are designated as trading and are carried at their fair value with unrealized valuation gains and losses recognized in earnings.

Inventories

Inventories, consisting mainly of telecommunication cables, are stated at the lower of cost (weighted-average cost method) or market value (replacement cost or net realizable value). If the market value is below cost, the Company writes down the inventory to the market value which then becomes the new cost basis.

Investments in Unconsolidated Companies

Investments in shares of stock in companies where the Company exercises significant influence over operating and financial policy decisions are accounted for using the equity method of accounting. The difference between the investment cost and the Company's proportionate share in the net assets of the investee at the date of acquisition is amortized over the estimated useful life of any intangible assets identified. Any goodwill identified is not amortized and evaluated for impairment annually or when circumstances warrant. Any cash dividends received are recognized as a reduction in the carrying value of the investment. Unrealized profits arising from downstream transactions to equity investees are deferred in

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

the Company's portion of equity income or loss. Profits and losses arising from equipment purchases from equity investees are eliminated and recognized over the estimated remaining useful life of the equipment.

Investments in shares of stock with no readily determinable market values are accounted for using the cost method when the ownership is less than 20%. Cash dividends received are recorded as income and stock dividends received are accounted for as increases in the number of shares held but not recognized as income.

The costs of investments sold are determined using the weighted-average method.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Depreciation expense is determined based upon the assets' estimated useful life using the straight-line method.

The estimated useful lives are as follows:

	Useful Life (Years)
Buildings and improvements	10-60
Telecommunications equipment:	
Transmission equipment	9-15
Exchange equipment	6-12
Miscellaneous equipment	3-10

Cost of maintenance and repairs, including the cost of replacing minor items not constituting substantial improvements, is charged to current income.

Losses incurred for the sale or disposal of property, plant and equipment are recorded as costs of services.

Valuation of Long-lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the total of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the assets, a loss is recognized for the excess of the carrying amount over the fair value of the asset. No impairment charge was recorded throughout the periods presented in the accompanying financial statements.

3G Concession

3G Concession represents the amount paid by the Company to the ROC government in connection with the grant of a concession to provide various telecommunication services using spectrum assigned by the MOTC that utilizes the International Mobile Telecommunication 2000: The Global Standard for Third Generation Wireless Communications technical standards as announced by the International Telecommunications Union (the 3G concession). Licenses for 3G mobile telecommunication services are granted by the MOTC through a three-step procedure. Applicants first obtain a concession from the MOTC through a bidding process. The concession is valid from the issue date to December 31, 2004. The Company may apply to extend this date by one year with approval from the MOTC. The holder of the concession must then obtain a network construction permit from the Directorate General of Telecommunications (the DGT, the regulator of the telecommunication industry). Once the network construction is complete, the applicant may apply for a 3G license from the MOTC. The 3G license is valid through December 31, 2018. The 3G concession and any additional licensing fees will be amortized on a straight-line basis from the date operations commence through the date the license expires. The 3G Concession cost is subject to review for impairment as other long-lived assets.

Patents and Computer Software

Patents are amortized using the straight-line method over the estimated useful lives ranging from 12 to 20 years. Computer software costs are capitalized and amortized using the straight-line method over the estimated useful lives of three years. Amortization expenses for the years ended December 31, 2002, 2003 and 2004 were NT\$122 million, NT\$154 million and NT\$166 million, respectively. Accumulated amortization was NT\$813 million and NT\$979 million as of December 31, 2003 and 2004, respectively.

Deferred Income

Deferred income represents one-time connection fees received from subscribers. The deferred income is recognized over the average expected customer service periods.

The average expected customer service periods (in years) are as follows:

	As of December 31	
	2003	2004
Fixed-line	13	13
Cellular	5	5
Paging	2	2
Internet	3	3

Revenue Recognition

The Company evaluates revenue recognition for its transactions using the SEC Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition .

The Company records service revenues over the periods they are earned. The costs of providing services are recognized as incurred. Handset subsidy costs are paid to a vendor that sells a handset to a customer who subscribes to the service, as an inducement to enter into a service contract, and are recognized as a cost of service when incurred. Usage revenues from fixed-line services, cellular services, Internet and data services, and inter-connection and call transfer fees from other telecommunications companies and carriers are billed in arrears and are recognized based upon minutes of traffic processed when the services are provided in accordance with contract terms. The Company had accrued unbilled revenues for services provided amounting to NT\$1,329 million and NT\$1,383 million as of December 31, 2003 and 2004, and are included in accounts receivable in the accompanying balance sheets.

Other revenues are recognized as follows: (a) one-time subscriber connection fees are deferred and recognized over the average expected customer service periods, (b) fixed-monthly fees (on fixed-line services, wireless (cellular and paging) and Internet and data services) are accrued every month, and (c) prepaid services (fixed line, cellular and internet) are recognized as income based upon actual usage by customers or when the right to use those services expires.

Concentrations

For all periods presented, no individual customer or supplier constituted more than 10% of the Company's revenues, trade notes and accounts receivables, purchases or trade notes and accounts payable. The Company also does not have concentrations of available sources of labor, services or other rights that could, if suddenly eliminated, severely impact its operations. However, telecommunications franchises and licenses are issued solely by authority of the ROC government. The withdrawal or the revocation of the franchise and licenses by the ROC government would severely impact the Company's operations. The Company invests its cash with several high-quality financial institutions.

Pension Costs

Pension costs are recorded on the basis of actuarial calculations. As a foreign registrant, the Company adopted SFAS No. 87 on July 1, 1996 as it was not feasible for the Company to obtain the information necessary to adopt SFAS No. 87 as of July 1, 1989. The Company has allocated a portion of the transition obligation directly to equity on the date of adoption based on the ratio of: (a) the years elapsed between the effective date in SFAS No. 87 and the adoption date, to (b) the remaining service period of employees expected to receive benefits as estimated at the adoption date.

Advertising and Promotional Expenses

Advertising and promotional expenses are charged to income as incurred. These expenses were NT\$1,935 million, NT\$1,861 million and NT\$2,526 million for the years ended December 31, 2002, 2003 and 2004, respectively.

Research and Development Costs

Research and development costs are charged to income as incurred.

Employee Stock Compensation

In connection with the privatization plan of the Company, employees may be offered to purchase shares of common stock of the Company at less than fair market value. The Company records the difference between the quoted market price of the stock on the date of purchase and the purchase price as compensation expense and charges to income in the period of the purchase.

Derivative Financial Instruments

The Company enters into forward contracts to reduce its exposure to foreign currency risk and variability in operating results due to fluctuations in exchange rates underlying the value of liabilities denominated in foreign currencies until such liabilities are paid. A forward contract obligates the Company to exchange predetermined amounts of specified foreign currencies at specified exchange rates on specified dates. These foreign currency forward exchange contracts are denominated in the same currency in which the underlying foreign currency liabilities are denominated and bear a contract value and maturity date that approximate the value and expected settlement date, respectively, of the underlying transactions. For contracts that are designated and effective as hedges, unrealized gains and losses on open contracts at the end of each accounting period, resulting from changes in the fair value of these contracts, are recognized in earnings in the same period as gains and losses on the underlying foreign denominated receivables are recognized and generally offset. Gains and losses on forward contracts and foreign denominated liabilities are included in other income (expense), net. The Company does not enter into or hold derivatives for trading or speculative purposes and only enters into contracts with highly rated financial institutions.

Derivatives are recognized at fair value and included in either other current liabilities or other current assets on the balance sheet.

Income Tax

The Company is subject to income tax in the ROC. The Company accounts for income tax using the asset and liability method. Under this method, deferred income tax is recognized for investment tax credits, losses carried forward and the future tax consequences attributable to differences between financial statement carrying amounts and their respective tax bases, using enacted laws. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that a portion or the entire deferred tax asset will not be realized.

Income taxes on undistributed earnings (10%) generated after 1998 are recorded as expense in the current year.

Comprehensive Income

Comprehensive income includes all changes in equity during a period from sources other than the stockholders. The balance of comprehensive income is zero for all balance sheet dates presented.

Net Income Per Share and Per Equivalent ADS

Net income per share is computed by dividing net income by the weighted-average number of common shares outstanding during the periods. Net income per equivalent ADS is calculated by multiplying the above net income per share by ten as each ADS represents ten common shares.

Recent Accounting Pronouncements

In December 2004, the FASB issued SFAS No. 123(R) Share-Based Payment. SFAS No. 123(R) requires that companies recognize compensation expense equal to the fair value of stock options or other share based payments for the annual reporting period that begins after June 15, 2005. SFAS No. 123(R) applies to all awards granted after June 15, 2005, and prior period's awards that are modified, repurchased, or cancelled after June 15, 2005. There is no impact to the Company as a result of this standard as the Company does not currently issue stock options to its employees or others.

3. U.S. DOLLAR AMOUNTS

The Company maintains its accounts and expresses its financial statements in New Taiwan dollars. For convenience only, U.S. dollar amounts presented in the accompanying financial statements have been translated at the noon buying rate for cable transfers as certified for customs purposes by the Federal Reserve Bank of New York as of December 31, 2004, which was NT\$31.74 to US\$1.00. The convenience translations should not be construed as representations that the New Taiwan dollar amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

12. LONG-TERM LOANS (INCLUDING CURRENT PORTION OF LONG-TERM LOANS)

The loan from the Common Tunnel Fund was obtained pursuant to a long-term loan agreement with the Common Tunnel Fund managed by Ministry of Interior that allows the Company to obtain unsecured interest-free credit until March 12, 2007. The outstanding principal amounts as of December 31, 2004 are payable in three annual installments (NT\$0.2 billion, NT\$0.2 billion and NT\$0.3 billion) starting on March 12, 2005.

As of December 31, 2004, the Company has unused credit lines of approximately NT\$190,000 million, which are available for short-term and long-term borrowings.

13. STOCKHOLDERS EQUITY

Under the Company's Articles of Incorporation, authorized capital is 9,647,724,900 common shares. The Company's Articles of Incorporation and the Republic of China Telecommunications Act provide that the MOTC has the right to purchase two redeemable preferred shares (NT\$10 par value) in the event its ownership in the Company falls below 50% of the outstanding common shares.

The MOTC, as the holder of those preferred shares is entitled to the same rights as holders of common shares and certain additional rights as specified in the Company's Articles of Incorporation as follows:

- a. The holder of the preferred shares, or its nominated representative, will act as a director and/or supervisor during the entire period in which the preferred shares are outstanding.
- b. The holder of preferred shares has the same stock option as holders of common shares when the Company raises capital by issuing new shares.
- c. The holder of the preferred shares will have the right to vote on any change in the name of the Company or the nature of its business and any transfer of a substantial portion of the Company's business or property.

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

- d. The holder of the preferred shares may not transfer the ownership. The Company must redeem all outstanding preferred shares within three years from the date of their issuance.

For the purpose of privatizing the company, the MOTC sold 1,109,750 thousand common shares of the Company in an international offering of securities in the form of American Depositary Shares (ADS) amounting to 110,975 thousand units (one ADS represents ten common shares) on the New York Stock Exchange in July 17, 2003.

The ADS holders generally have the same rights and obligations as other common shareholders, subject to the provision of relevant laws. The exercise of such rights and obligations shall comply with the related regulations and deposit agreement, which stipulate, among other things, that ADS holders can, through deposit agents; exercise their voting rights, sell their ADSs, and receive dividends declared and subscribe to the issuance of new shares.

As of December 31, 2004, the outstanding ADSs were 110,975 thousand units, which equaled approximately 1,109,749 thousand common shares, and represented 11.50% of the Company's total outstanding common shares.

Under the ROC Company Law, capital surplus may only be utilized to offset deficits or be declared as stock dividends. Also, such capital surplus can only be declared as a stock dividend by the Company at an amount calculated in accordance with the provisions of existing regulations. As of December 31, 2004, the amount of retained earnings available for dividends was NT\$50,776 million and was based on earnings as determined using ROC government regulations.

In addition, before distributing a dividend or making any other distribution to stockholders, the Company must pay all outstanding taxes, recover any past losses and set aside a legal reserve equal to 10% of its net income, and, depending on its business needs or requirements, may also set aside a special reserve. The cash dividends to be distributed shall not be less than 10% of the total amount of dividends to be distributed. If the cash dividend to be distributed is less than NT\$0.10 per share, such cash dividend shall be distributed in the form of common shares.

Under the ROC Company Law, the appropriation for legal reserve shall be made until the accumulated reserve equals the aggregate par value of the outstanding capital stock of the Company. This reserve can only be used to offset a deficit, or when reaching 50% of the aggregate par value of the outstanding capital stock of the Company, up to 50% of the reserve may, at the option of the Company, be declared as a stock dividend and transferred to capital.

The MOTC, in connection with the privatization plan of the Company, sold shares of stock at discounted prices, to employees at various times from October 2000 to October 31, 2003. The employees purchased the common shares at discounts of 10% and 20% in consideration for their commitment to hold the common shares for two and three years (the holding periods), respectively. In circumstances wherein the employees took advantage of such discounts, the common shares are held by an escrow agent on behalf of the employees/stockholders. There are no circumstances under which the MOTC or the Company would be required to repurchase these common shares. Also, the employees are not required to remain employed with the Company during the duration of the holding periods. The Company has recognized NT\$1,452 million as compensation expense for the shares purchased by employees that were subject to a discount for the year ended December 31, 2003.

The MOTC, in connection with the compensation of the employees, sold to employees 3,286,907 shares from February 27, 2004 to March 9, 2004, 14,579 shares from May 31, 2004 to June 18, 2004, 382,083 shares from June 30, 2004 to July 6, 2004 and 5,098,515 shares from November 30 to December 8, 2004 for total consideration of NT\$33 million, NT\$0.1 million, NT\$4 million, and NT\$50 million, respectively. The terms of the offers for the share purchases provided that employees purchase common shares from the above offering and hold the shares for one to three years. Such common shares, pursuant to the Enforcement Rule of the Statute Governing Privatization of State-Owned Enterprises, were sold at par value (NT\$10). The employees are not required to remain employed with the Company during the duration of the holding periods. The Company has recognized NT\$11 million, NT\$15 million, and NT\$457 million as compensation expense for the shares purchased by employees that were subject to par value for the year ended December 31, 2002, 2003, and 2004, respectively.

14. PENSION PLAN

At the time of its incorporation on July 1, 1996, the Company continued the existing two noncontributory defined benefit pension plans covering all its employees, as previously adopted by the DGT. The first plan (hereinafter referred to as Plan A) covers civil service eligible employees (i.e., employees who meet the necessary qualifications set by the ROC Government) and the second plan (hereinafter referred to as Plan B) covers all other employees of the Company (hereinafter referred to as non-civil service eligible employees). The adoption of two pension plans was necessary as different pension laws apply to civil service eligible and non-civil service eligible employees.

Plan A provides benefits equal to the sum of: (a) the lump-sum payment equivalent to one benefit unit per year for the first twenty service years rendered and one-half benefit unit per service year rendered thereafter, with one benefit unit equivalent to a portion of the salary of the employee at the time of retirement (referred to hereinafter as pensionable salary), and (b) annuity payments payable monthly equivalent to a certain percentage of the benefit unit. Plan B provides benefits equal to the lesser of: (a) forty-five benefit units, or (b) two benefit units per service year rendered for the first fifteen years, and one-half benefit unit per service year exceeding fifteen years rendered before August 1, 1984 and one benefit unit per service year for services rendered after August 1, 1984, with one benefit unit equivalent to the monthly average base salary (consisting of regular salary items plus overtime salary). Plan A is funded based on amounts included in budgets approved by the Legislative Yuan and supplementary budgets approved by the Executive Yuan while Plan B is funded at an amount equivalent to 2% to 15% of the monthly salary.

The Company adopted SFAS No. 87 on July 1, 1996 (adoption date), the date of its incorporation. The unrecognized net transition obligation recorded to shareholders' equity on July 1, 1996 was NT\$6,571 million which represents the difference in the net pension cost for the period from the issuance of SFAS No. 87 and the date of adoption. The remaining unrecognized net transition obligation of NT\$16,790 million is amortized over the estimated remaining service period of the employees as determined on July 1, 1996, which is a period of twenty-five years and seventeen years for civil service eligible employees and non-civil service eligible employees, respectively.

On June 23, 1997, the Council for Economic Planning and Development of the ROC Government officially instructed the Company to complete its privatization by June 30, 2001. Effective on the privatization date, except for those who will have reached the mandatory retirement age (the age of 65 for Plan A participants and age 60 for Plan B participants) by that day, employees will receive pension benefit payments calculated in accordance with the Guidelines on Payments of Severance Benefits to Employees of State-Owned Enterprises (Guidelines), as required by the ROC Government for state-owned enterprises instructed to undergo privatization plans. The employees not covered by the Guidelines will continue to receive benefits either as Plan A or Plan B participants.

Under the Guidelines, the Company was to pay all benefit payments on June 30, 2001, the initial expected date of privatization, to settle all employees' past service costs under the existing plans. On the actual privatization date, a replacement plan with substantially the same provisions will be put in place. The settlement benefit payments, regardless of the respective original plan participation, will be as follows: (a) employees who will voluntarily leave the Company on the privatization date (hereinafter referred to as separated employees) will receive a service clearance payment which is calculated similar to the benefit formula under the original Plan B as mentioned above plus an additional six-month salary and one-month advance notice pay (hereinafter referred to as the additional separation payments); (b) employees who opt to remain with the privatized company after the privatization date (hereinafter referred to as privatized company employees) will receive an amount equivalent to those received by the separated employees without the additional separation payments; and (c) privatized company employees who are involuntarily terminated by the Company within five years from the date of privatization (hereinafter referred to as redundant employees) will receive redundancy benefits equivalent to the amount computed based on one benefit unit for every year of service after privatization plus the additional separation payments (hereinafter referred to as redundancy benefit payments). The six-month portion of the additional separation payments and the redundancy benefit payments will be paid by the MOTC and the one-month portion will be paid by the Company.

The unrecognized prior service costs, which amounted to NT\$30,018 million, related to the increased benefits provided under the plan amendment described in the preceding paragraph were amortized through June 30, 2001. The unrecognized prior service costs associated with the plan amendment exclude any costs expected to be incurred for the additional separation payments or redundancy benefit payments. The additional separation payments under the Guidelines are accounted for as special termination benefits and will be recognized in the period when the employee accepts the offer while the redundancy benefit payments will be recognized in the period management has approved a plan of termination.

In order to increase operational efficiency, the Company approved a Special Retirement Incentive Program (Program). The Program allows eligible employees who voluntarily leave the Company on February 1, 2005 to also receive benefit payments based on the respective original plan (meaning Plan A or Plan B) plus the additional separation payments. The present value of such amount over and above the lump sum amount that would have been paid to the employees had they stayed until February 1, 2005 was accounted for as special termination benefits. Accordingly, such benefits were recognized as a liability and charged to income when employees formally accepted the terms of the Program.

The privatization of the Company was not completed on December 31, 2004. The Chairman, as representative of the MOTC, approved the new target privatization date to be December 31, 2005. The Company accounted for the change in the privatization date as a change in the assumption with the resulting adjustment in the projected benefit obligation accounted for as an actuarial loss.

In addition, pursuant to a regulation issued by the Executive Yuan, the obligation related to annuity payments due after the date of privatization for Plan A participants who retire prior to that date will be borne by the MOTC. Such amounts have been included in the Company's pension computation as of December 31, 2003 and 2004. Upon privatization, the portion of liabilities that will be taken over by the MOTC will be accounted for as contributed capital and recorded in stockholders' equity.

The Labor Pension Act of ROC will be effective beginning July 1, 2005 and this pension mechanism is considered as a defined contribution plan. The employees who were subject to the Labor Standards Law prior to the enforcement of this Act may choose to be subject to the pension mechanism under this Act or continue to remain subject to the pension mechanism under the Labor Standards Law. For those employees who were subject to the Labor Standards Law prior to July 1, 2005 and still work for the same company after July 1, 2005 and choose to be subject to the pension mechanism under this Act, their seniority as of July 1, 2005 shall be maintained. The rate of contribution by an employer to the Labor Pension Fund per month shall not be less than 6% of each employee's monthly salary or wage.

The target asset allocations are established through an investment policy established by the Chunghwa Telecom's Employee Pension Fund Committee and agreed to by the MOF. As increased liquidity of the fund is necessary due to the privatization of the Company, the current policy for plan assets is to place funds in time deposit accounts of the financial and postal institutions, non-designated trust funds in an investing company or financial institution and government bonds. In addition, the pension fund may invest in beneficial certificates of equity securities.

The Company expects to contribute NT\$6,100 million to the pension plans in 2005. Under the terms agreed upon for the privatization of the Company, the MOTC will contribute NT\$45,687 million to the pension plans in 2005.

The discount rate and expected return on plan assets presented in the table above is used to determine pension expense for the succeeding year. We select the expected rate of return on plan assets on the basis of a near term view of asset portfolio performance of our pension plans due to the privatization of the Company and the near term potential need for liquidity.

15. INCOME TAXES

The components of income taxes are as follows:

	<u>Year Ended December 31</u>		
	<u>2002</u>	<u>2003</u>	<u>2004</u>
	<u>NT\$</u>	<u>NT\$</u>	<u>NT\$</u>

Upon privatization in the period when the government's ownership percentage falls below 50%, the Company will continue to be subject to a 10% tax on its undistributed earnings as required by the Income Tax Law of the ROC. As the Company is currently and has historically been required under government regulations to distribute all its earnings within six months subsequent to year end, it has been required to pay a minimal amount of tax under this regulation. For ROC GAAP purposes, the 10% tax on undistributed earnings is recorded as an expense at the time shareholders resolve that its earnings shall be retained and the liability is incurred. Upon privatization, the 10% tax on undistributed earnings will be recorded as an expense in the year of the earnings.

Permanent differences consist primarily of tax-exempt income from the sale of marketable securities and interest income on commercial paper purchased, which are subject to a separate income tax rate of 20%.

Deferred income taxes arise due to temporary differences in the book and tax bases of certain assets and liabilities. Significant components of deferred income tax assets are shown in the following table:

	December 31	
	2003	2004
	NT\$	NT\$
Current:		
Provision for doubtful accounts	\$ 1,614	\$ 685
Deferred income	797	658
Accrued pension costs	15,237	15,723
Prepaid card revenues (related liability is included in other current liabilities)	850	735
Other, net	435	1,963
	<u>18,933</u>	<u>19,764</u>
Less valuation allowance	1,950	2,481
	<u>\$ 16,983</u>	<u>\$ 17,283</u>
Non-current:		
Deferred income	\$ 2,887	\$ 2,444

	<u>4,715</u>	<u>2,688</u>
Less valuation allowance	1,814	244
	<u>\$ 2,901</u>	<u>\$ 2,444</u>

The above deferred income tax assets were computed based on a tax rate of 25%. A portion of the amount included in other relates to the timing differences between US GAAP reporting and the taxable base for the 10% undistributed earnings tax. These differences are computed based on a tax rate of 10%.

16. TRANSACTIONS WITH RELATED PARTIES

As the Company is a state-owned enterprise, the ROC Government is one of the Company's customers. The Company provides fixed-line services, wireless services, Internet and other services to the various departments and agencies of the ROC Government and other state-owned enterprises in the normal course of business and at arm's-length prices. The information on service revenues from government bodies and related organizations have not been provided because details of the type of users were not maintained by the Company. The Company believes that all costs of doing business are reflected in the financial statements and that no additional expenditures will be incurred as a result of the privatization being completed.

17. COMMITMENTS AND CONTINGENT LIABILITIES

As of December 31, 2004, the Company has remaining commitments under non-cancelable contracts with various parties as follows: (a) acquisitions of land and buildings of NT\$3,391 million, and (b) acquisitions of telecommunications equipment of NT\$12,126 million.

The Company also has non-cancelable operating leases covering certain buildings, computers, computer peripheral equipment and operating system software under contracts that expire in various years. Minimum rental commitments under those leases are as follows:

	December 31, 2004
	NT\$
Within the following year	\$ 1,226
During the second year	984
During the third year	636
During the fourth year	332
During the fifth year and thereafter	136
	\$ 3,314

As of December 31, 2004, the Company had unused letters of credit of NT\$6,147 million.

The Company has a commitment to contribute NT\$2,500 million to a Fixed Line Fund administered by the Ministry of Interior Affairs and Taiwan Power Company, of which NT\$1,000 million was contributed by the Company on June 30, 1995. If the balance of the Fixed Line Fund is not sufficient for its purpose, the above three parties will determine when to raise additional funds and the contribution amounts from each party. In addition, the Company has a commitment to contribute NT\$2,000 million to a Piping Fund administered by the Taipei City Government, of which NT\$1,000 million was contributed by the Company on August 15, 1996.

18. LITIGATION

The Company is involved in various legal proceedings of a nature considered normal to its business. It is the Company's policy to accrue for amounts related to these legal matters when it is probable that a liability has been incurred and the amount is reasonably estimable.

The Company believes that the various asserted claims and litigation in which it is involved will not materially affect its financial position, future operating results or cash flows, although no assurance can be given with respect to the ultimate outcome of any such claim or litigation.

19. INFORMATION ON FINANCIAL INSTRUMENTS

a. Derivative financial instruments

The Company enters into forward contracts to reduce its exposure to foreign currency risk and variability in operating results due to fluctuations in exchange rates underlying the value of liabilities denominated in foreign currencies until such liabilities are paid. There were no foreign currency forward exchange contracts outstanding as of December 31, 2004. The net realized exchange loss for the year ended December 31, 2004 was of NT\$27 million.

b. Non-derivative financial instruments are as follows:

	December 31			
	2003		2004	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	NT\$	NT\$	NT\$	NT\$
Assets				
Cash and cash equivalents	\$ 13,553	\$ 13,553	\$ 29,283	\$ 29,283
Short-term investments			9,115	9,115
Investments in unconsolidated companies, accounted for using the equity method	1,420	1,857	1,429	1,767
Refundable deposits (included in other assets other)	4,018	4,018	3,357	3,357
Liabilities				
Customers deposits	10,957	9,337	9,262	7,771
Long-term loans (including current portion)	700	700	700	700

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

- 1) Cash and cash equivalents. The carrying amounts approximate fair values because of the short maturity of those instruments.
- 2) Short-term investments. The carrying amounts approximate fair values because of the short maturity of those instruments.
- 3) Investments in unconsolidated companies, accounted for using the equity method. The fair value is based on net asset values of the investments in unconsolidated companies if quoted market prices are not available.
- 4) Refundable deposits. The carrying amounts approximate fair values as the average lease term associated with these deposits is approximately one year.
- 5) Customers deposits. The fair value is the discounted value based on projected cash flows. The projected cash flows were discounted using the average expected customer service periods.

- 6) Long-term loans (including current portion). The fair value is the discounted value based on projected cash flows. The projected cash flows were discounted using the maturity dates of long-term loans.

20. SEGMENT REPORTING

Operating segments are defined as components of an enterprise regarding which separate financial information is available for regular evaluation by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance.

The Company organizes its business segments based on the various types of telecommunications services provided to customers. The major business segments operated by the Company are classified as below:

Local operations the provision of local telephone services;

DLD operations the provision of domestic long distance call services;

ILD operations the provision of international long distance call services;

Cellular operations the provision of cellular and related services;

Paging operation the provision of paging and related services;

Internet and data operation the provision of Internet access, lease line, and related services;

All other operations the services other than the above six categories, such as carrying out project research and providing training.

The operating segments are managed separately because each operating segment represents a strategic business unit that serves different markets. All the operating segments of the Company have been aggregated into the above reportable segments.

The Company evaluates performance based on several factors using information prepared on the ROC government regulations basis. The information below is provided on this basis with a summary of US GAAP adjustments to reconcile to the amounts presented in the statement of operations. The Company does not allocate interest and other income, interest expense or taxes to operating segments, nor does the Company's chief operating decision maker evaluate operating segments on these criteria. Except as discussed above, the accounting policies for segment reporting are the same as for the company as a whole. The Company's primary measure of segment profit is based on income or loss from operations.

c. Gross sales to major customers

The Company has no single customer account representing 10% or more of its total revenues for all periods presented.

The Company has non-revenue generating offices in Hong Kong, Thailand and the United States of America. All non-current assets (including investments in unconsolidated companies, property, plant and equipment, intangible assets, and other assets) except for NT\$0.04 million and NT\$0.02 million at December 31, 2003 and 2004, respectively, are located in Taiwan, ROC.

Chunghwa Telecom Reports Operating Results for Year 2004:

Company posts steady increases in revenue and profitability on the back of strong Internet and data service growth and stringent cost controls

Taipei, Taiwan, R.O.C. March 31, 2005 - Chunghwa Telecom Co., Ltd (TAIEX: 2412, NYSE: CHT) (Chunghwa or the Company), today announced its operating results for the year 2004. All figures were prepared in accordance with US GAAP.

Highlights for the year 2004:

Revenues were NT\$185.2 billion, a 1.5% YoY increase

Net income was NT\$50.9 billion, a 7.6 % YoY increase

Fully-diluted earnings per common share (EPS) was NT\$5.28, or US\$1.66 per ADS, an 7.6% YoY increase

The proposed cash dividend for 2004 will be NT\$4.7 per share, representing a payout ratio of 90% subject to the approval of the shareholders meeting in June.

We are pleased to announce that Chunghwa's full-year revenues increased 1.5% and net income increased 7.6% in an extremely competitive year for the Taiwanese telecom market, said Tan Ho Chen, Chairman of Chunghwa Telecom. Despite strong competition in our fixed-line business, including continuing trends of mobile substitution and migration to broadband services, our market share actually remained flat. Our growth and profitability are primarily being driven by our Internet and data business. The broadband business saw a 26.7% year-on-year jump in subscriber numbers, with a net increase of around 650,000 subscribers. We are expecting another 650,000 of net new subscribers in 2005 and we believe we will reach our target of 3.7mn total subscribers by the end of the year. In 2005, as telecommunication technologies continue to converge and as market changes continue to exert significant pressure on our traditional fixed line businesses, we believe we can evolve and adapt by expanding our presence in new and rapidly growing markets. Multimedia-on-demand interactive services and 3G network implementation are just a few of the exciting new areas that we expect to lead our expansion in the years to come.

Summary

Total revenues for year 2004 was NT\$185.2bn, a 1.5% YoY increase. Of this, 38.9% was from fixed-line services, 38.2% from wireless services and 21.2% from Internet and data services. The remainder was from other services. Revenue from the Company's mobile, and Internet and data services grew 6.2% and 10.5%, respectively. International long distance (ILD) revenue declined slightly by 2.9%, mainly due to increased competition and a drop in unit pricing. Domestic long distance (DLD) revenue declined 11.1%, mainly due to mobile substitution and a decrease in interconnection revenues because alternative operators provided a greater number of direct links themselves. Local call revenue declined 7.2% YoY, again mainly due to mobile substitution, but also because dial-up Internet subscribers continued to migrate to ADSL services.

Total operating costs and expenses for year 2004 decreased by 1% YoY, mainly because of a decrease in bad debt provisions, and depreciation and amortization. The company will continue to implement stringent cost controls.

Businesses Performance Highlights

Internet and Data Services

Internet and data revenue for year 2004 increased by 10.5% YoY to approximately NT\$39.3bn. This was primarily driven by the growth in both ADSL and Internet revenues.

The total number of Internet subscribers was about 3.8mn as of Dec. 31, 2004, a 7.6% YoY increase.

ADSL subscribers totaled 3.1mn as of Dec. 31, 2004, a 26.6% YoY increase.

Mobile Service

Mobile revenue for year 2004 increased by 6.2% YoY to NT\$70.3bn due to increases in minute usage and growth of Value-Added Service (VAS) revenue.

At the end of December 2004, the total number of mobile subscribers was 8.2mn, a 0.9% YoY decrease that was due to an effort to limit the number of inactive users by lowering the percentage of prepaid subscribers.

Our blended Average Revenue per User (ARPU) was NT\$712 for year 2004.

Chunghwa continues to be the leading mobile operator in Taiwan in both revenue and subscriber market share with 35.4% and 38% respectively as of the end of year 2004, according to data announced on the Directorate General of Telecommunications (DGT) website.

Fixed Line Services

Total fixed line revenues for year 2004 declined by 7.0% to NT\$72.1bn, mainly due to fixed-line competition, mobile substitution and a continuous migration of dial-up internet subscribers to ADSL broadband services.

Chunghwa's total fixed line subscriber base stood at approximately 13.2mn as of Dec. 31, 2004, a 0.8% YoY increase.
