Hanson PLC Interim Results 2005

These interim results are reported under International Financial Reporting Standards.

Group turnover[#] £1,746.8 million (£1,597.5m) up 9.3%

Operating profit* £197.3 million (£162.4m) up 21.5%

Profit before tax £172.3 million (£134.6m) up 28.0%

Profit after tax £132.9 million (£143.2m) down 7.2% (up 29.4% excluding 2004 tax credit**)

Basic EPS 18.2p (19.5p) down 6.7% (up 30.5% excluding 2004 tax credit**)

Free cash flow (net cash inflow from operating activities) **£138.2m (£135.9m) up 1.7%**

Gearing (net debt divided by equity) **43.1% (40.1%) up 3.0ppts**

Interim dividend 5.85p (5.35p) up 9.3%

Excluding joint-ventures and associates

* Continuing operations before impairments, including share of joint-ventures and associates profit after tax

** 2004 interim results, restated for IFRS, include a non-recurring tax credit of £40.5 million.

Alan Murray, Chief Executive, said: Hanson has delivered a strong performance for the first half of 2005, continuing progress made in the second half of last year. The performance of Hanson Building Products North America and Hanson Aggregates UK is particularly pleasing. The first half has also been excellent for bolt-on acquisitions with a total spend of £304.6 million on eight deals. Overall, Hanson expects to make further progress in the second half of 2005, albeit against a good performance and significant property profits in the second half of 2004.

Overview

Hanson has delivered a strong performance for the first half of 2005, continuing progress made in the second half of last year. Operating profit*, including earnings from acquisitions of £7.7 million, was £197.3 million, 21.5% ahead of the first half of 2004 (£162.4m). Profit before tax increased by 28.0% to £172.3 million (£134.6m). Profit after tax and discontinued operations decreased by 7.2% to £132.9 million (£143.2m). This was due to the recognition of a significant one-off tax benefit (£40.5m) in 2004.

Edgar Filing: HANSON PLC - Form 6-K

The improvement comes from many areas of the group, led by Hanson Building Products North America and Hanson Aggregates UK. It is driven by selling price increases and cost saving initiatives which have exceeded the ongoing pressure from additional input costs.

Significant progress has been made to develop the group through bolt-on acquisitions and total acquisition spend for the first half was £304.6 million (£50.8m).

Group turnover[#] increased by 9.3% to £1,746.8 million (£1,597.5m). Approximately £45.0 million of this increase, 2.8%, is attributable to earnings from acquisitions, primarily in Hanson Building Products UK. The impact of foreign currency translation was to reduce turnover by £14.1 million.

Operating profit of £197.3 million (£162.4m) consists of Hanson's group operating profit of £182.7 million (£153.0m) and share of joint-ventures and associates' profit after tax of £14.6 million (£9.4m).

Operating profit and profit before tax includes profit from property disposals of £1.3 million (£9.8m). Excluding property, operating profit increased by 28.4% and profit before tax increased by 37.0%.

Outlook

In general, no significant benefit from volume is anticipated in the second half. Underlying demand patterns for the remainder of 2005 are expected to follow similar trends to those experienced in the first half of this year. The US construction market is expected to remain generally robust. Hanson's US geographic market positions mean that whilst second half aggregates volumes are not expected to exceed the strong second half of last year, further increases in concrete product volumes are anticipated. In the UK, demand, in particular housing-related construction, is expected to remain weak. Consequently, first half underlying volume reductions in aggregates and bricks are expected to continue into the second half of the year. UK asphalt volumes, exceptionally strong in the first half, are expected to be more in line with last year for the second half. In Australia, some weakening of demand remains possible in the second half of the year.

Hanson will continue to focus on improving margins. Input cost increases continue in such areas as energy, particularly fuel and gas, and other key areas such as cement and US employee benefits. As a consequence, each and every one of our divisions will continue to focus on maintaining price increases to recover these additional costs. The benefits of the cost saving initiatives made over the last two years in the USA and the UK have been significant and further benefit is expected in the second half in the UK.

Overall, Hanson expects to make further progress in the second half of 2005, albeit against a good performance and significant property profits in the second half of 2004.

Corporate development

Hanson has made good progress in the first half of the year. Total spend on acquisitions was £304.6 million (£50.8m).

Hanson Building Products UK acquired Marshalls Clay Products for £65.0 million in January, to further enhance its position in UK bricks, and acquired Thermalite, a market leader in aircrete blocks, for £120.0 million in March to expand its product range.

In June, Hanson's two US divisions completed acquisitions totalling approximately £100.0 million. Hanson Aggregates North America acquired Mission Valley Rock, Berkeley Ready Mix and Berkeley Asphalt in northern California. With an estimated 60 million tons of permitted aggregates reserves, Mission Valley Rock has some of the largest remaining reserves of increasingly scarce land-based aggregates in the San Francisco Bay area. Hanson Building Products North America acquired the assets of Sherman Pipe, a concrete pipe and pre-cast concrete products business in Alabama and Georgia, which expands Hanson's existing presence in the south east of the USA.

Other acquisitions in the period totalled £19.6 million. In January, Hanson Australia acquired Rescrete, a pre-cast concrete manufacturer based in Sydney. At the end of June, Hanson Building Products North America acquired Fiore Concrete Products, a concrete pipe and pre-cast concrete products business in Rhode Island, Massachusetts, which extends Hanson's position into the north east of the USA.

Edgar Filing: HANSON PLC - Form 6-K

Disposal proceeds totalled £49.0 million in the first half and included the sale of Hanson's 50% interest in Campbell Concrete and Materials, a ready-mixed concrete business operating in Houston, Texas and the disposal of 19 ready-mixed concrete plants in Spain.

Hanson continued to invest in its existing business through capital expenditure totalling £79.9 million (£95.6m), which was equivalent to 103.5% (121.5%) of depreciation. The focus is on value adding projects wherever possible. In the USA, construction has commenced on several replacement pipe and pre-cast manufacturing plants. Two large ready-mixed concrete plants are under construction in San Diego and additional mineral reserves have been acquired in the Mideast. In the UK, capital expenditure includes kiln refurbishment, plant automation and information technology projects. A truck replacement programme continues in Australia and additional mineral reserves have been secured in Spain.

Exchange impact

Foreign exchange translation reduced turnover by £14.1 million, operating profit by £0.8 million and had no impact on profit before tax.

The US dollar exchange rate moved from \$1.9199 at December 31, 2004 to \$1.7715 at June 30, 2005. The net impact of foreign exchange movements resulted in an increase in sterling translated net debt from December 31, 2004 to June 30, 2005 of £28.2 million.

Dividend

The Board has declared an interim dividend of 5.85 pence (5.35p) per share payable on September 16, 2005 to those shareholders on the register at the close of business on August 26, 2005. This represents an increase of 9.3% compared to the first half of last year. The shares are expected to trade ex-dividend on August 24, 2005.

Asbestos

Approximately 6,700 new asbestos claimants filed in the first half of 2005 (11,700). Resolutions for the same period were around 8,850 (3,500), over 90% of which were dismissals (70%). Outstanding claimants at the half year were approximately 133,600, compared to 135,750 at the end of December 2004.

First half gross costs were \$22.2 million, compared to \$32.0 million in the first half and \$27.3 million in the second half, of 2004. \$6.8 million of the insurance asset was utilised in the period, giving a net cost before tax of \$15.4 million (\$2.6m). The annual gross cost is assumed to average \$60 million over the next eight years, equivalent to approximately £20 million post-tax. The charge for the half year is therefore \$30 million, or approximately £10 million post-tax. This is funded by the group's annual net cash flow from operating activities which was £507.5 million last year. On this basis, the closing gross cost provision at June 30, 2005 was \$487.8 million before insurance, tax and discounting.

Hanson supports Federal reform but believes that the likelihood of success remains uncertain given the complexities involved and the political nature of the process. In the meantime, Hanson's subsidiaries will continue to litigate and negotiate for additional insurance cover and will look to settle only those cases with proven disease and product identification.

Financial position

Hanson continues to maintain a strong financial position. Free cashflow for the period (after finance and tax, before capital expenditure) was £138.2 million (£135.9m). Working capital increased at June 30, 2005 following strong first half earnings and this should benefit the second half cash inflow. Net debt increased to £1,063.2 million (£695.2m at December 31, 2004, £933.2m at June 30, 2004). Gearing was 43.1% at the half year (28.5% at December 31, 2004).

Edgar Filing: HANSON PLC - Form 6-K

A new £500 million five year revolving credit facility was signed on April 13, 2005. This replaced a £519.2 million facility which was due to expire in March 2006. The group has a total of £980.2 million of committed bank debt facilities of which £705.5 million was unutilised at June 30, 2005.

The net deficit on the group's pension schemes increased to £114.8 million (£50.8 m at December 31, 2004), principally reflecting the fall in US bond yields used to discount the group's US pension scheme obligations.

Review of operations

Hanson Aggregates North America

Turnover increased by 2.7% to £421.1 million (£410.0m). The increase was after a reduction of £11.5 million due to foreign exchange translation. Operating profit increased by 5.3% to £39.8 million (£37.8m) which increased operating margin by 0.3ppts to 9.5% (9.2%). Excluding property profits of £0.2 million (£8.1m), underlying operating profit increased by 33.3% and operating margin increased by 2.2ppts.

Increases in average selling prices ranged from 6.0% for aggregates to 19.0% for cement. These increases were necessary to offset increased input costs, most notably fuel, bitumen and cement. Demand in most markets remained relatively robust, although total aggregates volumes fell by 2.0% in the half. This was largely due to subdued activity in California, Arizona and Georgia, much of which was caused by poor weather at the start of the year.

Despite the marginal decline in volumes, operating efficiency improvements were maintained and profit levels increased in all four regions within the aggregates division compared to last year.

The acquisition of Mission Valley Rock in June 2005 strengthens Hanson's position in the strategically important San Francisco Bay area market.

Hanson Building Products North America

Turnover increased by 17.8% to £344.5 million (£292.4m). The increase was after a reduction of £5.2 million due to foreign exchange translation. Operating profit increased by 31.2% to £56.3 million (£42.9m) which increased operating margin by 1.6ppts to 16.3% (14.7%). Operating profit included £0.3 million attributable to acquisitions and property profits of £0.6 million (£nil).

Increases in selling prices averaged between 5.7% for bricks and 14.7% for concrete products compared to the first half of 2004. These increases have now offset the significant increases in steel and other input costs. Demand for concrete products has been good, particularly in Texas and Florida, and heritage concrete products volumes increased by 10.1%. The order backlog for pipe and products remains strong at approximately \$430 million (December 31, 2004: \$400m).

Overall brick volumes fell by 2.1% as strong sales in the East and in Texas were offset by reductions in Canada. However, price rises of 5.7% and further cost improvements were sufficient to more than offset an increase in natural gas costs. Good volume and price increases were also achieved in the roof tiles business.

The acquisition of Sherman Pipe in June 2005 is consistent with the division's geographic expansion strategy and will enhance the service offering to customers in Alabama and Georgia.

Hanson Aggregates UK

Turnover increased by 10.9% to £403.7 million (£364.1m). Operating profit increased by 81.8% to £42.9 million (£23.6m) which increased operating margin by 4.1ppts to 10.6% (6.5%). Operating profit included property profits of £0.4 million (£0.1m).

Increases in selling prices averaged 7.0% for aggregates, 6.5% for ready-mixed concrete and 5.4% for asphalt. Aggregates volumes were 5.2% below the first half of 2004, largely due to planned site closures and a reduction in non-premium product sales. The 14.7% increase in asphalt volume is due to buoyant market demand and the benefit of capital expenditure on four new production facilities. The first half of 2005 includes approximately half of the £10 million annualised cost saving benefits anticipated following the restructuring last year.

The strategy of rebalancing aggregates production towards premium product has contributed to the margin improvement. Productivity gains continue to be delivered through a combination of capital expenditure and industry rationalisation, such as the agreement to share capacity at four quarries with Lafarge.

The share of joint-ventures and associates' profit after tax primarily consists of the 50% interests in Midland Quarry Products and United Marine Holdings. Hanson's share of net profit after tax increased by £1.3 million largely due to an improved performance in Midland Quarry Products against a difficult first half of 2004.

Hanson Building Products UK

Turnover increased by 25.2% to £196.2 million (£156.7m). The increase included £35.7 million due to acquisitions. Operating profit increased by 20.1% to £21.5 million (£17.9m) and included £6.8 million attributable to acquisitions. No property disposals were made during the period (£0.5m). The operating margin reduced by 0.4ppts to 11.0% (11.4%).

Whilst overall brick volumes increased by 14.9%, excluding acquisitions the heritage brick volumes declined by 8.0% compared to the first half of 2004. This reflects the difficult market conditions in both the new build and improvement sectors of the housing market. Heritage concrete block volumes increased by 2.5%. Price increases of 7.6% and 2.4% were achieved for bricks and concrete blocks respectively.

The integration of Marshalls Clay Products (bricks) and Thermalite (aircrete blocks) is progressing well and earnings from both operations are in line with expectations.

Hanson Australia & Asia Pacific

Turnover increased by 2.9% to £270.9 million (£263.3m). Operating profit decreased by 8.4% to £27.1 million (£29.6m) which decreased operating margin by 1.2ppts to 10.0% (11.2%). Including joint-ventures and associates, operating profit was £35.3 million (£34.1m), an increase of 3.5%. Operating profit included property profits of £0.1 million (£1.1m).

Australia

Aggregates selling prices increased 7.1%, in part due to changes in product mix, whilst ready-mixed concrete prices improved by 3.0%. Aggregates volumes were 1.2% below the first half of 2004 which included significant non-recurring secondary aggregates sales in Brisbane. Ready-mixed concrete volumes increased by 2.1%, with a reduction in Sydney from previously buoyant levels being offset by increases in all other regions.

Earnings from the Building Products division were slightly ahead of the same period last year following the acquisition of Rescrete.

Edgar Filing: HANSON PLC - Form 6-K

The share of joint-ventures and associates profit after tax increased by 54.2% to £7.4 million (£4.8m), primarily relating to the 25% holding in Cement Australia. This operation benefited from both increases in selling prices and productivity improvements.

Asia Pacific

Operating profit was £2.1 million (£1.7m), largely attributable to Malaysia which remains a difficult market. The share of joint-ventures and associates profit after tax relating to Asia Pacific was £0.8 million (loss £0.3m) reflecting improvements made in the Hong Kong joint-venture.

Hanson Continental Europe

Turnover decreased by 0.5% to £110.4 million (£111.0m). Operating profit decreased by 20.7% to £9.2 million (£11.6m). The operating margin reduced by 2.1ppts to 8.3% (10.4%).

Earnings reduced in Spain and The Netherlands, but were partly offset by strong results in the Czech Republic.

Heritage aggregates volumes reduced by 9.1%, largely due to a planned quarry closure in Barcelona and a lower level of road building in the Madrid market.

Heritage ready-mixed concrete volumes increased by 1.4%. A reduction in volumes in The Netherlands was offset by increases in all other countries.

Notes:

1. Hanson is one of the world's leading heavy building materials companies. It is the largest producer of aggregates – crushed rock, sand and gravel – and one of the largest producers of concrete products, clay bricks and ready-mixed concrete in the world. Its other principal products include asphalt and concrete roof tiles and its operations are in North America, the UK, Australia, Asia Pacific and Continental Europe.
2. Hanson operates through six divisions: Hanson Aggregates North America, Hanson Building Products North America, Hanson Aggregates UK, Hanson Building Products UK, Hanson Australia & Asia Pacific and Hanson Continental Europe.
3. Register for Hanson's e-mail distribution service for press releases and notification of the publication of corporate reports via www.hanson.biz.
4. High-resolution Hanson images for editorial use are available from www.hanson.biz and from www.pixmedia.co.uk/30/company.

- (1) Restated for the impact of transitioning to International Financial Reporting Standard (IFRS) See note 1.
- (2) Included within Net cash inflow from operating activities are cash outflows of £24.1m (June 2004 £33.4m) in respect of Returns on investments and servicing of finance and £19.6m (June 2004 £13.4m) in respect of Taxation.
- (3) As required by IAS 7, Cash flow statements, cash and cash equivalents of £1,372.5 million (June 2004 £1,318.5m) stated above includes overdrafts of £4.9 million (June 2004 £28.1m) disclosed within current liabilities on the balance sheet.

The average exchange rates used for the summary consolidated cash flow statement and the statement of recognised income and expense were June 30, 2005 \$1.8734 to the £, June 30, 2004 \$1.8210 to the £, and December 31, 2004 \$1.8294 to the £.

Notes to the interim financial information
1 Basis of preparation

As an EU-listed company, Hanson has been required to adopt International Financial Reporting Standards (IFRS) with effect from January 1, 2005. The results for the six months to June 2005 represent the group's first interim financial statements prepared in accordance with its accounting policies under IFRS. The group's first Annual Report and Form 20-F under IFRS will be for the year ended December 31, 2005. Previously Hanson reported under UK generally accepted accounting principles (UK GAAP). A description of how the group's reported results and financial position are affected by this change in accounting policy, including reconciliations from UK GAAP to IFRS for prior year results and the revised summary of significant accounting policies under IFRS, is published on the group's website at www.hanson.biz.

The group is required to present its interim financial statements in accordance with the relevant standards anticipated to be in effect at the first reporting date which is December 31, 2005. They have been prepared on the assumption that all IFRS statements, including Standing Interpretations Committee interpretations (SICs) and International Financial Reporting Interpretations Committee interpretations (IFRICs) issued by the International Accounting Standards Board (IASB) as effective for 2005 reporting will be endorsed by the European Commission. At the time of preparation of these interim financial statements not all standards have been endorsed by the European Commission. It is possible, therefore, that further changes will be required to the comparative financial information restated in accordance with IFRS, as well as the 2005 information presented in these 2005 interim financial statements, before the 2005 Annual Report and Form 20-F is published. The Directors have anticipated that the revised versions of IAS 39 Financial Instruments: Recognition and Measurement and IAS 19 Employee Benefits which have yet to be formally adopted for use in the EU, will be so adopted in time to be applicable to the next annual accounts.

As permitted by IFRS 1 First Time Adoption of International Financial Reporting Standards, the group has elected not to restate comparative information for the Financial Instrument standards IAS 32 and IAS 39. A restatement of the group's opening balance sheet at January 1, 2005 which provides the adjustments required under these standards is included in the Ancillary information section of these interim financial statements, along with the revised accounting policy applied.

The financial information presented here does not represent statutory accounts as defined in the Companies Act 1985. The group's statutory financial statements for the year ended December 31, 2004 were prepared under UK GAAP and filed with the Registrar of Companies. The auditors, Ernst & Young LLP, reported on those accounts and their report was unqualified and did not contain a statement under section 237(2) or (3) of the Companies Act 1985.

⁽¹⁾ Restated for the impact of transitioning to International Financial Reporting Standards (IFRS) See note 1.

⁽²⁾ The segmental results are restated following a reorganisation of the group in July 2004. The impact on the presentation of the results for June 30, 2004 is shown on the group's website, www.hanson.biz, as part of the restatement of the results for the adoption of IFRS.

3 Operating impairments

Included within Operating impairments of £2.2 million are a goodwill impairment charge of £16.0 million within Hanson Aggregates North America and other impairment charges of £0.6 million. These are offset by a reversal of a prior period tangible fixed asset impairment in respect of Hanson Aggregates North America of £14.4 million.

4 Finance costs

Finance costs of £22.8 million (£27.8m) include a net pensions and post-retirement benefits financing credit of £3.7 million (£5.9m); a net charge of £2.3 million (£3.3m) in respect of the unwind of the discount on the group's continuing provisions; and a credit of £3.5 million (£nil) in respect of the change in the fair value of financial instruments, in accordance with IAS 39. Hanson's share of its joint-ventures' and associates' interest charge of £1.4 million (£1.6m) is included within joint-ventures and associates as shown in note 2(c).

5 Tax on continuing operations

Tax on continuing operations of £32.4 million (June 2004 net tax credit £17.4m) excludes the group's share of joint-ventures' and associates' tax charge of £5.0 million (£3.8m) which is included within joint-ventures and associates as shown in note 2(c). The six months to June 30, 2004 included a non-recurring benefit of £40.5 million for the IFRS restatement of deferred tax assets, primarily relating to Australia.

6 Discontinued operations

The profit on current year's disposals of £0.1 million represents the profit after tax for the period in respect of the disposal of Hanson Aggregates North America's 50% interest in Campbell Concrete and Materials, a ready-mixed concrete business operating in Houston, Texas, and the disposal of 19 ready-mixed concrete sites following Hanson Continental Europe's restructuring of its Spanish operations.

The loss from prior years' disposals of £3.7 million includes a charge of £9.6 million relating to the post-tax cost of increasing the gross cost provision for asbestos by \$30 million. It also includes a post-tax charge of £2.6 million relating to the estimated cost of ancillary litigation and bodily injury claims against discontinued operations in the USA. In addition, the loss from prior years' disposals includes tax credits of £9.5 million and other post-tax charges of £1.0 million relating to discontinued operations.

7 Dividends

The Board has declared an interim dividend of 5.85p per ordinary share payable on September 16, 2005 (September 23, 2005 for ADS and CDI holders) to those shareholders on the register at the close of business on August 26, 2005. The shares are expected to trade ex-dividend on August 24, 2005 (August 22, 2005 for CDI holders). During the six months to June 30, 2005, the Company has paid the approved dividend of £93.5 million for the twelve months ended December 31, 2004.

8 Reconciliation of net equity for the 6 months ended June 30, 2005 and the 12 months ended December 31, 2004

December 2004 (restated)⁽¹⁾ £m		June 2005 £m	June 2004 (restated)⁽¹⁾ £m

	Restatement for effects of IAS 32 and IAS 39	(9.7)	
2,308.6	Restated opening equity as at January 1	2,433.6	2,308.6
315.5	Profit after taxation	132.9	143.2
(127.3)	Dividends paid	(93.5)	(87.8)
(0.6)	Minority interest	(0.1)	(0.1)
(24.4)	Foreign exchange adjustments	35.1	(36.2)
	Gains on cash flow hedges	0.6	
(11.0)	Net actuarial losses for pensions and other post-retirement benefits	(63.1)	(4.3)
4.9	Deferred taxation on net actuarial losses	23.6	(3.0)
(1.2)	Employee share awards	1.1	
(26.1)	Purchase of own shares held in treasury	(5.5)	
4.9	Disposal of own shares by ESOP Trust	3.9	4.6
2,443.3	Closing net equity	2,468.6	2,325.0

⁽¹⁾ Restated for the impact of transitioning to International Financial Reporting Standards (IFRS) See note 1.

9 Provisions

Certain obligations in respect of the Koppers environmental liabilities are recognised in provisions with a corresponding asset representing the amounts receivable under the insurance arrangements entered into in 1998. Under these arrangements, insurance cover of \$800.0 million in perpetuity (after payment by the group of the first \$100.0 million of remediation costs arising since January 1, 1998) was provided by subsidiaries of two re-insurance companies, Centre Solutions and Swiss Re. The Company estimates that this insurance cover is sufficient to meet future costs. Factors which could cause actual remediation costs to differ from these estimates include (i) unknown adverse conditions arising at sites; (ii) third party claims in excess of estimates; (iii) changes to regulatory requirements for remedial technology; (iv) any other significant variations to assumptions made in support of these estimates. Further details were provided in note 18 of the notes to the accounts in the Annual Report and 20F 2004.

Provisions include a discounted amount of £231.0 million (equivalent to \$487.8 million before discounting) for the gross cost of asbestos which is both probable and reliably estimable, which equates to approximately eight years of gross cost at current levels. An associated discounted insurance asset of £10.1 million and associated deferred tax asset of £86.1 million have also been recognised at June 30, 2005. Further details of the approach to accounting for asbestos is provided in notes 17 and 27 of the notes to the accounts in the Annual Report and 20-F 2004.

Other contingent liabilities were also described in note 27 of the notes to the accounts in the Annual Report and 20-F 2004. There has been no change to the status of these liabilities during the period.

10 Analysis of net (debt)

	December 2004	Acquisitions				June 2005
		Cash flow	and disposals	Non-cash movement	Exchange movement	
	£m	£m	£m	£m	£m	£m
Cash and cash equivalents per balance sheet	1,394.3	(81.8)			64.9	1,377.4
Debt due within one year						
Overdrafts	(5.3)	(1.4)	(0.1)		1.9	(4.9)
Bank debt	(123.4)	0.7			(4.7)	(127.4)
Debenture debt	(902.0)	(208.9)		(7.2)	(21.5)	(1,139.6)
Finance leases	(0.5)			(0.1)		(0.6)
Short-term borrowings per balance sheet	(1,031.2)	(209.6)	(0.1)	(7.3)	(24.3)	(1,272.5)
Debt due after one year						
Debenture and bank debt	(1,057.8)	1.1	(1.5)	(40.9)	(68.7)	(1,167.8)
Finance leases	(0.5)			0.3	(0.1)	(0.3)
Long-term borrowings per balance sheet	(1,058.3)	1.1	(1.5)	(40.6)	(68.8)	(1,168.1)
Net (debt)	(695.2)	(290.3)	(1.6)	(47.9)	(28.2)	(1,063.2)

Non-cash movements of £(47.9) million represent fair value adjustments of £(27.2) million and effective interest adjustment of £(21.1) million following the adoption of IAS 39 in the period. These are offset by other non-cash movements of £0.4 million.
