Telephone 513-397-9900

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Shares (par value \$0.01 per share)	New York Stock Exchange
Preferred Share Purchase Rights	National Stock Exchange
6 ³ / ₄ % Convertible Preferred Shares	New York Stock Exchange

Securities requested pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes x No "

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes " No x

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No "

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act:

Large accelerated filer x Accelerated filer " Non-accelerated filer "

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting shares owned by non-affiliates of the registrant was \$1,057,414,896, computed by reference to the closing sale price of the stock on the New York Stock Exchange on June 30, 2005, the last trading day of the registrant's most recently completed second fiscal quarter.

At February 28, 2006, there were 247,125,771 common shares outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive proxy statement relating to the Company's 2006 Annual Meeting of Shareholders are incorporated by reference into Part III of this report to the extent described herein. Information required under Item 9 to this Report is incorporated by reference to the Company's Current Report on Form 8-K filed on March 24, 2005.

Part I

Item 1. Business

General

Cincinnati Bell Inc. (the Company) is a full-service local provider of data and voice communications services and equipment and a regional provider of wireless and long distance communications services. The Company provides telecommunications service on its owned local and wireless networks with a well-regarded brand name and reputation for service. The Company has five reportable business segments: Local, Wireless, Hardware and Managed Services, Other, and Broadband. The Broadband segment no longer has any substantive, on-going operations.

The Company's primary businesses consist of the Local and Wireless segments, which predominately provide voice and data telecommunications services. For the year ended December 31, 2005, these two segments generated 82% of the Company's 2005 consolidated revenue and 87% of the Company's 2005 consolidated operating income. The Hardware and Managed Services (HMS) segment provides information technology consulting and data center collocation services. The HMS segment also sells equipment, typically located on the customer's premises, through which the Company provides its telecommunications and managed services. In its Other segment, the Company operates Cincinnati Bell Any Distance Inc. (CBAD), which provides long distance services, Cincinnati Bell Complete Protection Inc. (CBCP), which provides security monitoring services and related surveillance hardware, the Company's public payphone business (Public), and Cincinnati Bell Entertainment (CBE), which intends to offer in the future television programming over the internet as an alternative to cable or satellite television service.

In 2003, the Company sold substantially all of the assets of its broadband business. These assets were held by the Company's wholly-owned subsidiary, BRCOM Inc. (f/k/a Broadwing Communications Inc.). Refer to Note 16 to the Consolidated Financial Statements for a detailed discussion of the sale.

In addition to the sale of substantially all of the broadband assets, on June 13, 2003, the Company's subsidiaries entered into agreements with the buyer of the broadband assets whereby the Company will continue to market Broadwing Communications LLC's (Broadwing) (f/k/a C III Communications Operations LLC) broadband products to business customers and purchase capacity on Broadwing's national network in order to sell long distance services, under the CBAD brand, to residential and business customers in the Greater Cincinnati area market.

Although the Company operates in distinct business segments, it offers each of its operating segments' services through common distribution channels. These channels include the Company's direct sales force, 20 Company-run retail locations, independent agents, and the Company's service centers. For its consumers and small business customers, the Company markets the services of its operating segments in a combined package of services. The most comprehensive package of services that the Company offers is the Custom ConnectionsSM Super Bundle, comprised of a customized package of local, long distance, wireless, and digital subscriber line (DSL) services on a single monthly bill and at a price that is discounted compared to the purchase price of each service on an individual basis. As of December 31, 2005, the Company had approximately 150,000 subscribers in this comprehensive bundling package, which represents 16% of the Company's primary consumer and business access lines.

The Company is an Ohio corporation, incorporated under the laws of Ohio in 1983. Its principal executive offices are at 201 East Fourth Street, Cincinnati, Ohio 45202 (telephone number (513) 397-9900 and website address <http://www.cincinnati-bell.com>). The Company makes available

Edgar Filing: CINCINNATI BELL INC - Form 10-K

on its website at the investor relations tab (<http://investor.cincinnati-bell.com>) its reports on Form 10-K, 10-Q, and 8-K (as well as all amendments to these reports), free of charge, as soon as practicable after they have been electronically filed.

The Company files annual, quarterly and special reports, proxy statements and other information with the Securities and Exchange Commission (the SEC) under the Exchange Act. These reports and other information filed by the Company may be read and copied at the Public Reference Room of the SEC, 100 F Street N.E., Washington, D.C. 20549. Information may be obtained about the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet site that contains reports, proxy statements, and other information about issuers, like the Company, which file electronically with the SEC. The address of that site is <http://www.sec.gov>.

Local

The Local segment provides local voice, data, and other telephone services. Voice services include local service, switched access, information services, and value-added services. These value-added services include enhanced custom calling features, such as caller identification, voicemail, call waiting, and call return. Data services include dedicated network access, Gigabit Ethernet (Gig-E) and Asynchronous Transfer Mode (ATM) based data transport, and DSL and dial-up Internet access. Other services consist of inside wire installation for business enterprises and billing, clearinghouse and other ancillary services primarily for inter-exchange (long distance) carriers. The Local segment provides these services through the operations of Cincinnati Bell Telephone LLC (CBT) to customers located in southwestern Ohio, northern Kentucky and southeastern Indiana. The Company has operated as the Incumbent Local Exchange Carrier (ILEC) in the Greater Cincinnati area for approximately the past 130 years. This market consists of primarily 2,400 square miles located within approximately a 25-mile radius of Cincinnati, Ohio.

The Local segment continues to develop a presence outside its ILEC territory, particularly in Dayton and Mason, Ohio through a product suite of local voice/data services to business and residential customers. Effective January 1, 2005, all operations outside of its ILEC territory are operated by a subsidiary of CBT, Cincinnati Bell Extended Territories LLC (CBET). CBET operates as a Competitive Local Exchange Carrier (CLEC) and provides substantially all of its services on its own network or through purchasing Unbundled Network Elements (UNE-L or loops) from the incumbent local carrier. The Local segment links its Cincinnati and Dayton geographies through its synchronous optical fiber network (SONET), which provides route diversity via two separate paths.

CBT provides voice and related value added services over a 100% digital, circuit switch-based network to end users via lines of access and has deployed DSL capable electronics throughout its territory, allowing it to offer DSL services to approximately 90% of its access lines qualified or addressable for this service. CBT 's network also includes the use of fiber-optic cable, with SONET rings linking Cincinnati 's downtown with other area business centers. These SONET rings offer increased reliability and redundancy to CBT 's major business customers. CBT also has an extensive business-oriented data network, offering native speed Ethernet services over an interlaced ATM Gig-E backbone network, delivered to end users via high-capacity circuits.

CBT had approximately 931,000 network access lines in service on December 31, 2005, a 4% and 6% reduction in comparison to 970,000 and 986,000 access lines in service at December 31, 2004 and 2003, respectively. Approximately 78%, 21%, and 1% of CBT 's network access lines serve customers in Ohio, Kentucky and Indiana, respectively. Despite the decline in access lines, the Company has been able to nearly offset the effect of these losses on revenue by increasing DSL penetration to existing access line customers and by increasing the sale of high capacity data circuits.

In 2004, CBT increased the speed of its existing DSL service to compete with, and to offer comparable speeds to, its main high-speed internet competitors. The Company believes that this improvement and marketing programs, which offer this service in combination with local voice, long distance and wireless services, have helped its DSL subscriber base to increase to 163,000 as of December 31, 2005, a 24% and 63% increase in comparison to 131,000 and 100,000 subscribers at December 31, 2004 and 2003, respectively. CBT 's consumer penetration of DSL service was 26% of addressable lines at the end of 2005, an increase of six percentage points from 20% at the end of 2004. Business penetration of addressable lines has grown to 10% at the end of 2005, up two percentage points from 8% penetration at the end of 2004. On a combined basis, approximately 163,000 subscribers represent 22% penetration of addressable lines compared to 17% penetration at the end of 2004.

CBT operates the National Payphone Clearinghouse (NPC) in an agency function, facilitating payments from inter-exchange carriers to payphone service providers (PSPs) relating to the compensation due to PSPs for originating access code calls, subscriber 800 calls, and other toll free and qualifying calls pursuant to the rules of the Federal Communications Commission and state regulatory agencies. As the NPC agent, the Company does not take equitable title to the inter-exchange carriers ' cash to be paid to the PSPs, nor does the Company accept liability for the payments owed to the PSPs.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

The Local segment produced \$755.6 million, \$761.7 million, and \$774.5 million, or 62%, 63%, and 50%, of consolidated Company revenue in 2005, 2004, and 2003, respectively. The Local segment produced consolidated operating income of \$276.1 million, \$279.1 million, and \$282.7 million in 2005, 2004, and 2003, respectively.

Wireless

The Wireless segment provides advanced digital voice and data communications services through the operation of a regional wireless network in a licensed service territory, which surrounds Cincinnati and Dayton, Ohio including areas of northern Kentucky and southeastern Indiana and includes a population of approximately 3.4 million. As of December 31, 2005, the segment served approximately 496,000 subscribers, which represents 15% of the licensed population. Of its total subscribers, 315,000 were postpaid subscribers, who are billed monthly in arrears, and 181,000 were prepaid i-wirelessSM subscribers, who purchase service in advance. The segment also sells related telecommunications equipment, wireless handset devices, and related accessories to support its service business.

Cincinnati Bell Wireless LLC (CBW) has historically operated the Wireless segment as a joint venture with Cingular Wireless Corporation (Cingular) through its subsidiary, AT&T PCS LLC (AWE). At December 31, 2005, the Company owned 80.1% of CBW while Cingular owned the remaining 19.9%. In response to Cingular's acquisition of AWE (the Merger), the Company entered into an agreement (the Agreement) with Cingular on August 4, 2004 and subsequently amended it on February 14, 2005. The Agreement modified CBW's operating agreement between the Company and AWE, whereby the Company agreed to waive AWE's prohibition against competing with CBW and Cingular agreed to forego certain minority rights including membership on CBW's governing member committee. In the Agreement, both parties agreed to new reciprocal roaming agreements, to the disposition of certain TDMA assets, which CBW and AWE had jointly used, and put/call obligations for the sale/purchase of the 19.9% of CBW owned by AWE. On February 14, 2006, Cingular exercised its contractual put right to require the Company to purchase Cingular's 19.9% membership interest in CBW. Pursuant to the terms of the put right, the Company paid Cingular \$83.2 million for its 19.9% ownership interest in the joint venture. As a result, CBW is now a wholly-owned subsidiary of the Company. The Company funded the purchase with borrowings from its bank credit facility. Refer to Note 21 to the Consolidated Financial Statements.

As CBW was jointly owned with Cingular through February 14, 2006, income or losses generated by the Wireless segment in the periods covered by this report were shared between the Company and Cingular in accordance with respective ownership percentages of 80.1% and 19.9%. As a result, 19.9% of the net income or loss of the Wireless segment is reflected as minority interest expense or income in the Company's Consolidated Statements of Operations. Refer to Note 9 to the Consolidated Financial Statements for a detailed discussion of Cingular's minority interest in this venture.

CBW operates a digital wireless network, which is comprised of centralized switching and messaging equipment connected to approximately 390 radio base station locations utilizing 30 MHz of wireless spectrum in the Cincinnati and Dayton Basic Trading Areas (BTA). The Company owns the licenses to 30 MHz of spectrum in Cincinnati and 20 MHz of spectrum in Dayton, and leases a 10 MHz license owned by Cingular in the Dayton BTA. The lease for the Dayton spectrum expires in April 2007.

Since October 2003, CBW has deployed service on both Time Division Multiple Access (TDMA) and Global System for Mobile Communications (GSM) and General Packet Radio Service (GPRS) technologies, and in the first quarter of 2005, CBW upgraded GPRS to enhanced data rates for GSM evolution (EDGE), which provides up to three times the capacity of GPRS. TDMA is CBW's legacy technology and provides both voice and short message service (SMS) data services. GPRS and EDGE technology provide, in addition to SMS, enhanced wireless data communication services, such as mobile web browsing, internet access, email and picture messaging. As of December 31, 2005, the Company has transitioned over 80% of its customers to GSM and delivers over 90% of network minutes of use (MOU's) via the GSM network.

As a result of retiring certain TDMA assets, which produced write-downs of \$23.7 million in the first quarter of 2005, and an impairment charge in the fourth quarter of 2005 totaling \$18.6 million, the carrying value of the TDMA assets was less than \$1 million at December 31, 2005. The Company plans to discontinue the operation of the TDMA network in 2006 due to the limited number of remaining customers it serves and the reduced revenue and cash flow it now generates. As the Company migrates these remaining TDMA customers and retires the TDMA network, it expects it will increase handset costs but will reduce network operating costs and capital expenditures.

The Wireless segment contributed \$237.5 million, \$261.7 million, and \$259.5 million, or 20%, 22%, and 17% of consolidated revenue in 2005, 2004, and 2003, respectively. The Wireless segment produced an operating loss of \$51.7 million and \$1.4 million in 2005 and 2004, respectively, and operating income of \$60.2 million in 2003. Included in the 2005 operating loss are impairment charges related to the TDMA network assets totaling \$42.3 million and depreciation of the TDMA assets totaling \$36.5 million.

Postpaid subscriber service generated approximately 70% of total 2005 segment revenue. A variety of rate plans are available to postpaid subscribers, and these plans typically include a fixed number of national minutes and/or an unlimited number of mobile-to-mobile (calls to and from other CBW subscribers) or local minutes for a flat monthly rate. For plans with a fixed number of minutes, the postpaid subscriber can purchase additional minutes at a per-minute-of-use rate. Prepaid i-wirelessSM subscribers, who accounted for 18% of 2005 revenue, can purchase minutes at a per-minute-of-use rate and unlimited minutes for mobile-to-mobile calls for a flat, per day fee. Revenue from other wireless service providers for the purchase of roaming minutes for the carrier's own subscribers using minutes on CBW's network, collocation revenue (rent received for the placement of other carriers' radios on CBW towers), and reciprocal compensation for other carriers' subscribers who terminate calls on CBW's network accounted for approximately 3% of total 2005 segment revenue.

Sales of handsets and accessories generated the remaining 9% of segment revenue. CBW sells handsets and accessories, often below its own purchase cost, to promote the retention and sale of new service plans. Sales also take place through the Company's direct sales force, on the Company's website and in the retail stores of major electronic and other retailers pursuant to agency agreements. Equipment sales are seasonal in nature, as customers often purchase handsets and accessories as gifts during the holiday season in the Company's fourth quarter. CBW purchases handsets and accessories from a variety of manufacturers and maintains an inventory to support sales.

Hardware and Managed Services

The HMS segment provides data center collocation, IT consulting services, telecommunications and computer equipment, and installation and maintenance of telecommunications and computer equipment through the Company's subsidiary, CBTS. CBTS has relationships with over 20 technology vendors that offer a wide array of equipment and operating systems to meet the needs of small to large businesses. CBTS currently operates three data centers, two owned and one leased, to warehouse the equipment purchased by its customers in a triple-wall, disaster-safe environment. The data center service provides 24-hour monitoring, redundant power, environmental controls, and high-speed, highly-available optical network connections. The Company also provides outsourced IT project management and recurring management of its customers' data hardware and telephony equipment.

The segment produced total revenue of \$172.7 million, \$134.7 million, and \$162.8 million in 2005, 2004, and 2003, respectively. In 2005, 2004, and 2003 hardware revenues were \$106.6 million, \$74.0 million, and \$89.6 million, respectively, while managed service revenues accounted for \$66.1 million, \$60.7 million, and \$73.2 million. The opening of the Florence, Kentucky data center in June 2005 and the purchase of the Mason, Ohio facility in late 2004 provided CBTS with additional opportunity for hardware sales to its new data center customers. This has caused an increase in hardware revenue as a percentage of total revenue in 2005 as compared to previous years. The HMS segment revenue constituted approximately 14% of consolidated revenue in 2005 and 11% of consolidated revenue in 2004 and 2003. The HMS segment produced operating income of \$13.4 million, \$12.7 million, and \$17.5 million in 2005, 2004, and 2003, respectively.

In 2004, CBTS sold certain operating assets, which were generally residing outside of the Company's operating area, for approximately \$3.2 million in cash. Subsequently in 2004, CBTS paid \$1.3 million to the buyer of the assets in working capital adjustments related to the sale.

Other

Edgar Filing: CINCINNATI BELL INC - Form 10-K

The Other segment combines the operations of CBAD, CBCP, Public and CBE. CBAD sells long distance services in the Company's operating area, and CBCP sells surveillance hardware and monitoring services to

residential and business customers in the Company's operating area, while Public provides public payphone services principally in the Company's ILEC operating area.

The Other segment produced revenue of \$77.7 million, \$78.6 million, and \$81.1 million in 2005, 2004, and 2003, respectively, constituting approximately 6%, 7%, and 5% of consolidated revenue in 2005, 2004, and 2003, respectively. The Other segment produced operating income of \$26.6 million, \$18.0 million, and \$6.5 million in 2005, 2004, and 2003, respectively.

Cincinnati Bell Any Distance

CBAD provides long distance services to businesses and residential customers in the Greater Cincinnati and Dayton, Ohio areas. At December 31, 2005, CBAD had approximately 564,000 subscribers, 413,000 residential and 151,000 business, compared to 562,000 and 539,000 long distance subscribers at December 31, 2004 and 2003, respectively. For Local segment access lines for which a long distance carrier is chosen, CBAD's market share, as measured by the number of CBT lines for which a long distance carrier was selected, within the Greater Cincinnati area increased in 2005, with residential and business market share growing to approximately 80% and 52%, respectively, from 76% and 48%, respectively, at the end of 2004. In 2005, CBAD produced \$70.2 million in revenue for the Other segment, representing approximately 6% of consolidated revenue, compared to \$64.1 million or 5% of consolidated revenue in 2004, and \$64.5 million or 4% of consolidated revenue in 2003.

Cincinnati Bell Complete Protection Inc.

CBCP provides surveillance hardware and monitoring services to residential and business customers in the Greater Cincinnati and Dayton, Ohio areas. At December 31, 2005 and 2004, CBCP had approximately 7,000 monitoring subscribers in comparison to 6,000 monitoring subscribers at December 31, 2003. CBCP produced \$2.9 million, \$3.9 million, and \$3.7 million in revenue in 2005, 2004, and 2003, respectively, for the Other segment. At the end of 2004, CBCP decided to focus its operations on providing monitoring services in which it could leverage operating synergies with the Company's local operation. At that time, CBCP discontinued sales of surveillance equipment to business customers who do not also have an on-going monitoring service relationship. These sales comprised approximately \$2 million of CBCP's 2004 revenue; however, discontinuing these sales did not reduce the Other segment's 2005 profitability.

Payphone Business

In the fourth quarter of 2004, the Company sold its payphone assets located at correctional institutions and those outside of the Company's operating area for \$1.4 million. Prior to the sale, Public provided public payphone services to customers in a seven state regional area. Services are now provided in a three state regional area—Ohio, Kentucky, and Indiana. Public had approximately 3,700, 4,600, and 8,100 stations in service as of December 31, 2005, 2004, and 2003, respectively, and generated approximately \$4.5 million, \$10.6 million, and \$12.8 million in revenue in 2005, 2004, and 2003, respectively, or less than 1% of consolidated revenue in each year. The revenue decrease is a result of fewer stations in service and reduced calls per line caused by continued penetration of wireless communications and a targeted reduction in unprofitable lines. The out-of-territory assets sold contributed approximately \$2.6 million to the Other segment's total revenue in 2004 with only marginal contribution to the segment's operating income.

Cincinnati Bell Entertainment

The Company created Cincinnati Bell Entertainment in 2005, which intends to offer in the future television programming over the internet as an alternative to cable or satellite television service. The Company is reviewing the rapidly evolving technologies involved with the internet protocol television (IPTV) product, and, while the Company intends to provide this service to the customers in its operating areas, it does not expect significant revenues to be associated with this product in 2006.

Broadband

The Broadband segment no longer has any substantive, on-going operations. On February 22, 2003, certain of the Company's subsidiaries entered into a definitive agreement to sell substantially all of the operating assets of the Broadband segment for up to \$129 million in cash and the assumption of certain long-term operating

contractual commitments. On June 6, 2003 and June 13, 2003, this agreement was amended to, among other things, reduce the initial purchase price to \$108.7 million (an estimated \$91.5 million in cash and a \$17.2 million preliminary working capital promissory note, which was ultimately reduced to zero based on the final working capital position of the broadband business). The buyer paid the initial cash purchase price of \$91.5 million, which was subsequently reduced to \$82.7 million by virtue of agreed upon performance-related purchase price adjustments. On June 13, 2003, the Company effectively transferred control of the broadband business to the buyer.

Broadband revenue was \$332.4 million, or 21%, of consolidated revenue in 2003. Broadband generated operating income of \$344.5 million in 2003, or 50% of consolidated operating income, which included \$336.7 million related to the gain on sale of the broadband assets. Operating income of \$12.3 million and \$10.7 million in 2005 and 2004 is primarily due to the adjustment of liabilities not assumed by the buyer and, in 2004, also due to the reduction of the indemnity liability as a result of the expiration of certain indemnities to the buyer.

Subsequent to the closing of the asset sale, the Broadband segment consists of certain liabilities not assumed by the buyer. Prior to the sale of the broadband assets, the Broadband segment generated revenue from broadband transport (which included non-cash revenue from infeasible right of use agreements (IRUs)), switched voice services, data and Internet services (including data collocation and managed services) and other services. BRCOM generally provided these transport and switched voice services over its national optical network, which comprised approximately 18,700 route miles of fiber-optic transmission facilities. Due to the sale of the broadband business, the Company's Broadband segment revenue was zero in 2005 and 2004 and is expected to be zero going forward.

Employees

At February 28, 2006, the Company had approximately 2,900 employees. CBT had approximately 1,500 employees covered under a collective bargaining agreement with the Communications Workers of America, which is affiliated with the AFL-CIO. This collective bargaining agreement expires in 2008.

Business Segment Information

The amount of revenue, intersegment revenue, operating income (loss), assets, capital expenditures, and depreciation and amortization attributable to each of the Company's business segments as of and for the years ended December 31, 2005, 2004, and 2003 is set forth in Note 14 to the Consolidated Financial Statements.

Item 1A. Risk Factors

The Company's substantial debt could limit its ability to fund operations, expose it to interest rate volatility, limit its ability to raise additional capital and have a material adverse effect on its ability to fulfill its obligations and on its business and prospects generally.

The Company has a substantial amount of debt and has significant debt service obligations. As of December 31, 2005 the Company had outstanding indebtedness of \$2,084.7 million and a total shareholders' deficit of \$737.7 million. In addition, the Company had the ability to borrow additional amounts under its revolving credit facility, subject to compliance with certain conditions. The Company may incur additional

Edgar Filing: CINCINNATI BELL INC - Form 10-K

debt from time to time, subject to the restrictions contained in its credit facilities and other debt instruments.

The Company's substantial debt could have important consequences, including the following:

the Company will be required to use a substantial portion of its cash flow from operations to pay principal and interest on its debt, thereby reducing the availability of cash flow to fund working capital, capital expenditures, strategic acquisitions, investments and alliances, and other general corporate requirements;

the Company's interest expense could increase if interest rates, in general, increase because approximately 40% of its debt bears interest at floating rates;

the Company's substantial debt will increase its vulnerability to general economic downturns and adverse competitive and industry conditions and could place the Company at a competitive disadvantage compared to those of its competitors that are less leveraged;

the Company's debt service obligations could limit its flexibility to plan for, or react to, changes in its business and the industry in which it operates;

the Company's level of debt may restrict it from raising additional financing on satisfactory terms to fund working capital, capital expenditures, strategic acquisitions, investments and joint ventures and other general corporate requirements; and

a potential failure to comply with the financial and other restrictive covenants in the Company's debt instruments, which, among other things, require it to maintain specified financial ratios could, if not cured or waived, have a material adverse effect on the Company's ability to fulfill its obligations and on its business and prospects generally.

The servicing of the Company's indebtedness requires a significant amount of cash, and its ability to generate cash depends on many factors beyond its control.

The Company's ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory, and other factors, many of which are beyond its control. The Company cannot provide assurance that its business will generate sufficient cash flow from operations, that additional sources of debt financing will be available or that future borrowings will be available under its credit facilities, in each case, in amounts sufficient to enable the Company to service its indebtedness, or to fund other liquidity needs. If the Company cannot service its indebtedness, it will have to take actions such as reducing or delaying capital expenditures, strategic acquisitions, investments and joint ventures, selling assets, restructuring or refinancing indebtedness, or seeking additional equity capital, which may adversely affect its customers and affect their willingness to remain customers. The Company cannot provide assurance that any of these remedies could, if necessary, be reached on commercially reasonable terms, or at all. In addition, the terms of existing or future debt instruments may restrict the Company from adopting any of these alternatives.

The Company depends on the receipt of dividends or other intercompany transfers from its subsidiaries.

Certain of the Company's material subsidiaries are subject to regulatory issues that potentially restrict their ability to distribute funds or assets to the Company. If the Company's subsidiaries were to be prohibited from paying dividends or making distributions to the Company, it would have a material adverse effect on the Company's liquidity and the trading price of the Cincinnati Bell common stock, preferred stock, and debt instruments.

The Company's creditors and preferred stockholders will have claims to the assets and earnings of these subsidiaries that are superior to claims of the holders of Cincinnati Bell common stock. Accordingly, in the event of the Company's dissolution, bankruptcy, liquidation, or reorganization, amounts may not be available for payments to Cincinnati Bell common stock holders until after the payment, in full, of the claims of creditors of the Company and its subsidiaries, the Company's creditors, and preferred stockholders.

The Company depends upon its credit facilities to provide for its financing requirements in excess of amounts generated by operations.

The Company depends on its credit facilities to provide for temporary financing requirements in excess of amounts generated by operations. The Company has a \$250 million revolving credit facility with no outstanding borrowings and \$6.4 million in letters of credit issued against the facility at December 31, 2005. The ability to borrow from the credit facilities is predicated on the Company's and its subsidiaries' compliance with covenants. Failure to satisfy these covenants will constrain its ability to borrow under the credit facilities. As of December 31, 2005, the

Company was in compliance with all of the covenants of its credit facilities.

The credit facilities and other indebtedness impose significant restrictions on the Company.

The Company's debt instruments impose, and the terms of any future debt may impose, operating and other restrictions on the Company. These restrictions affect, and in many respects limit or prohibit, among other things, the Company's and its subsidiaries' ability to:

incur additional indebtedness;

create liens;

make investments;

enter into transactions with affiliates;

sell assets;

guarantee indebtedness;

declare or pay dividends or other distributions to shareholders;

repurchase equity interests;

redeem debt that is junior in right of payment to such indebtedness;

enter into agreements that restrict dividends or other payments from subsidiaries;

issue or sell capital stock of certain of its subsidiaries; and

consolidate, merge, or transfer all or substantially all of its assets and the assets of its subsidiaries on a consolidated basis.

In addition, the Company's credit facilities and debt instruments include restrictive covenants that may materially limit the Company's ability to prepay debt and preferred stock. The agreements governing the credit facilities also require the Company to achieve and maintain compliance with specified financial ratios.

The restrictions contained in the terms of the credit facilities and its other debt instruments could:

limit the Company's ability to plan for or react to market conditions or meet capital needs or otherwise restrict the Company's activities or business plans; and

adversely affect the Company's ability to finance its operations, strategic acquisitions, investments or alliances, or other capital needs, or to engage in other business activities that would be in its interest.

A breach of any of these restrictive covenants or the Company's inability to comply with the required financial ratios and financial results could result in a default under the credit facilities. During the occurrence and continuance of a default under the credit facilities, the lenders may elect not to provide loans until such default is cured or waived. Additionally, if certain defaults occur, the lenders may elect to declare all outstanding borrowings, together with accrued interest and other fees, to be immediately due and payable. The lenders will also have the right in these circumstances to terminate any commitments they have to provide further borrowings. Additionally, the Company's debt instruments contain cross-acceleration provisions, which generally cause each instrument to accelerate upon a qualifying acceleration of any other debt instrument.

The Company's future cash flows could be adversely affected if it is unable to realize fully its deferred tax assets.

As of December 31, 2005, the Company had a net deferred tax asset of \$680.6 million, which includes U.S. federal net operating loss carryforwards of approximately \$611.7 million, state and local net operating loss carryforwards of approximately \$205.6 million, deferred tax temporary differences and other tax attributes of \$47.2 million, and valuation allowances of \$183.9 million. The valuation allowances have been provided against certain state and local net operating losses and other deferred assets due to the uncertainty of the Company's ability to utilize the assets within the statutory expiration period. For more information concerning the Company's net operating loss carryforwards, deferred tax assets, and valuation allowance, see Note 12 to the Consolidated Financial Statements. If the Company is unable for any reason to fully realize its deferred tax assets, its business and future cash flows could be adversely affected.

The Company operates in a highly competitive industry and its customers may not continue to purchase services, which could result in reduced revenue and loss of market share.

The telecommunications industry is very competitive. Either new entrants, such as cable companies, or existing competitors, attempting to respond to difficult market conditions, may reduce pricing, create new bundled offerings, or develop new, potentially disruptive technologies, products, and services. If the Company cannot continue to offer reliable, competitively priced, value-added services, or if the Company does not keep pace with technological advances, competitive forces could adversely affect it through a loss of market share or a

decrease in revenue and profit margins. The Company has lost, and may continue to lose, access lines as a part of its customer base utilizes service of competitive wireline or wireless providers in lieu of the Company's local wireline service. The Company also competes with voice over internet protocol (VoIP) providers as well as broadband service providers utilizing cable or powerline access technologies.

CBT faces competition from other local exchange carriers, wireless service providers, inter-exchange carriers, and cable, broadband, and Internet service providers. The Company believes CBT could face greater competition as new facilities-based service providers with existing service relationships with CBT's customers compete more aggressively and focus greater resources on the Greater Cincinnati operating area. In June 2004, Time Warner Cable began offering VoIP and long distance service in both Cincinnati and Dayton. In July 2004, both AT&T and Verizon began offering VoIP and long distance service in Cincinnati and Dayton. Also, in July 2004, the local gas and electric supplier began offering high-speed Internet access over electrical lines to customers in limited neighborhoods of CBT's operating area.

If the Company is unable to effectively implement strategies to retain access lines, the Company's traditional telephone business will be adversely affected.

CBW is one of several active wireless service providers in the Cincinnati and/or Dayton, Ohio metropolitan market areas, including Cingular, Sprint Nextel, T-Mobile, Verizon, and Leap, all of which are nationally known and most are well funded. In addition, in 2005, Time Warner Cable announced a joint venture with Sprint Nextel to explore offering wireless services. The Company anticipates that continued competition could compress its gross margins for wireless products and services as carriers continue to offer more minutes for equivalent or lower service fees because CBW cannot offer more minutes without incremental costs. CBW's ability to compete will depend, in part, on its ability to anticipate and respond to various competitive factors affecting the telecommunications industry. Furthermore, as evidenced by Cingular's acquisition of AWE and the merger of Sprint and Nextel, there has been a trend in the wireless communications industry towards consolidation through joint ventures, reorganizations, and acquisitions. The Company expects this consolidation to lead to larger competitors with greater resources and more service offerings than CBW. Furthermore, wireless subscribers are permitted to retain their wireless phone numbers when changing to another wireless carrier within the same geographic area. The Company generally does not enter into long-term contracts with its wireless subscribers, and, therefore, this portability could have a significant adverse affect on the Company.

The Company's other subsidiaries operate in a largely local or regional area, and each of these subsidiaries faces significant competition. CBTS competes against numerous other information technology consulting, web-hosting, and computer system integration companies, many of which are larger, national in scope, and better financed. CBAD competitors include large national long-distance carriers, such as AT&T, MCI, Sprint, and emerging VoIP providers, and wireless providers that offer plans with no additional fees for long distance. CBCP competes against national companies, such as ADT, and against local providers. Public competes with several other public payphone providers, some of which are national in scope and offer lower prices for coin-based local calling services. Public has also continued to be adversely impacted by the growing popularity of wireless communications.

The effect of the foregoing competition on any of the Company's subsidiaries could have a material adverse impact on its businesses, financial condition, results of operations, and cash flows. This could result in increased reliance on borrowed funds and could impact the Company's ability to maintain its wireline and wireless networks.

Maintaining the Company's networks requires significant capital expenditures and its inability or failure to maintain its networks would have a material impact on its market share and ability to generate revenue.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

During the year ended December 31, 2005, capital expenditures totaled \$143 million. The Company expects to spend approximately 12% of future revenue on capital expenditures in future periods, excluding any significant expenditures associated with the introduction of new products, services, or a major network or data center expansion. The Company may incur significant additional capital expenditures as a result of unanticipated developments, regulatory changes, and other events that impact the business. If the Company is unable or fails to adequately maintain or expand its networks to meet customer needs, there could be a material adverse impact on the Company's market share and its ability to generate revenue.

Maintenance of CBW's wireless network, growth in the wireless business, or the addition of new wireless products and services may require CBW to obtain additional spectrum, which may not be available or be available only on less than favorable terms.

The TDMA wireless network currently operates on spectrum licensed to CBW by the FCC. For its GSM network, CBW uses spectrum licensed to the Company and to Cingular. Introduction of new wireless products and services, as well as maintenance of the existing wireless business, may require CBW to obtain additional spectrum in the Cincinnati or Dayton markets, either to supplement or to replace the existing spectrum. Furthermore, the Company network depends upon the deployment of radio frequency equipment on towers and atop of buildings. The Company both owns and leases spaces on these towers and buildings and typically leases underlying land. There can be no assurance that spectrum or the appropriate radio frequency equipment locations will be available to CBW or will be available on commercially favorable terms. Failure to obtain or to retain any needed spectrum or radio equipment locations could have a materially adverse impact on the wireless business as a whole, the quality of the wireless networks, and the ability to offer new competitive products and services.

The regulation of the Company's businesses by federal and state authorities may, among other things, place the Company at a competitive disadvantage, restrict its ability to price its products and services, and threaten its operating licenses.

Several of the Company's subsidiaries are subject to regulatory oversight of varying degrees at both the state and federal levels, which may differ from the regulatory scrutiny faced by the Company's competitors. A significant portion of CBT's revenue is derived from pricing plans that require regulatory overview and approval. Different interpretations by regulatory bodies may result in adjustments to revenue in future periods. In recent years, these regulated pricing plans have required CBT to decrease or fix the rates it charges for some services while its competition has typically been able to set rates for its services with limited restriction. In the future, regulatory initiatives that would put CBT at a competitive disadvantage or mandate lower rates for its services could result in lower profitability and cash flow for the Company. In addition, different regulatory interpretations of existing regulations or guidelines may affect the Company's revenues in future periods.

At the federal level, CBT is subject to the Telecommunications Act of 1996, including the rules subsequently adopted by the FCC to implement the 1996 Act, which has impacted Cincinnati Bell Telephone's in-territory local exchange operations in the form of greater competition. At the state level, CBT conducts local exchange operations in portions of Ohio, Kentucky, and Indiana, and, consequently, is subject to regulation by the Public Utilities Commissions in those states. Various regulatory decisions or initiatives at the federal or state level may from time to time have a negative impact on Cincinnati Bell Telephone's ability to compete in territory or upon its out-of-territory subsidiary's ability to compete in its markets.

CBW's FCC licenses to provide wireless services are subject to renewal and revocation. Although the FCC has routinely renewed wireless licenses in the past, the Company cannot be assured that challenges will not be brought against those licenses in the future. Revocation or non-renewal of CBW's licenses would result in lower operating results and cash flow for the Company.

There are currently many regulatory actions under way and being contemplated by federal and state authorities regarding issues that could result in significant changes to the business conditions in the telecommunications industry. No assurance can be given that changes in current or future regulations adopted by the FCC or state regulators, or other legislative, administrative, or judicial initiatives relating to the telecommunications industry, will not have a material adverse effect on the Company's business, financial condition, results of operations, and cash flows.

Failure to anticipate the needs for and introduce new products and services or to compete with new technologies may compromise the Company's success in the telecommunications industry.

The Company's success depends, in part, on being able to anticipate the needs of current and future enterprise, carrier, and residential customers. The Company seeks to meet these needs through new product introductions, service quality, and technological superiority. The Company has implemented GSM technology for wireless communications and works with vendors to ensure the newest handsets and accessories are available to its customers. New products and services are important to the Company's success as its industry is

technologically driven, such that new technologies can offer alternatives to the Company's existing services. The development of new technologies could accelerate the Company's loss of access lines and have a material adverse effect on the Company's business, financial condition, results of operations, and cash flows.

Terrorist attacks and other acts of violence or war may affect the financial markets and the Company's business, financial condition, results of operations, and cash flows.

Terrorist attacks may negatively affect the Company's operations and financial condition. There can be no assurance that there will not be further terrorist attacks against the United States of America, U.S. businesses or armed conflict involving the United States of America. Further terrorist attacks or other acts of violence or war may directly impact the Company's physical facilities or those of its customers and vendors. These events could cause consumer confidence and spending to decrease or result in increased volatility in the United States and world financial markets and economy. They could result in an economic recession in the United States or abroad. Any of these occurrences could have a material adverse impact on the Company's business, financial condition, results of operations, and cash flows.

The Company could incur significant costs resulting from complying with, or potential violations of, environmental, health, and human safety laws.

The Company's operations are subject to laws and regulations relating to the protection of the environment, health, and human safety, including those governing the management and disposal of, and exposure to, hazardous materials and the cleanup of contamination, and the emission of radio frequency. While the Company believes its operations are in substantial compliance with environmental, health, and human safety laws and regulations, as an owner or operator of property, and in connection with the current and historical use of hazardous materials and other operations at our sites, the Company could incur significant costs resulting from complying with or violations of such laws, the imposition of cleanup obligations, and third-party suits. For instance, a number of the Company's sites formerly contained underground storage tanks for the storage of used oil and fuel for back-up generators and vehicles. In addition, a few sites currently contain underground tanks for back-up generators, and many of the Company's sites have aboveground tanks for similar purposes.

The Company could incur significant costs as a result of a number of putative class action and derivative lawsuits that were filed against the Company.

A number of putative class action and derivative lawsuits have been filed against the Company and certain of its current and former officers and directors, which allege a number of violations of securities laws. The Company is vigorously contesting these matters, but such litigation could result in substantial costs and have a material impact on the Company's financial condition, results of operations, and cash flows. In February 2006, the Company settled one of these cases, its ERISA class action lawsuit, for \$11 million, to be paid by its insurers (refer to Note 11 to the Consolidated Financial Statements). An adverse decision or settlement in any of the remaining cases could require the Company to pay substantial damages, which would have a material adverse effect on business and operations.

The Company generates substantially all of its revenue by serving a limited geographic area.

The Company generates substantially all of its revenue by serving customers in the Greater Cincinnati and Dayton, Ohio areas. An economic downturn or natural disaster occurring in this limited operating territory could have a disproportionate effect on the Company's business,

Edgar Filing: CINCINNATI BELL INC - Form 10-K

financial condition, results of operations, and cash flows compared to similar companies of a national scope and similar companies operating in different geographic areas.

Third parties may claim that the Company is infringing their intellectual property, and the Company could suffer significant litigation or licensing expenses or be prevented from selling products.

Although the Company does not believe that any of its products or services infringes the valid intellectual property rights of third parties, the Company may be unaware of intellectual property rights of others that may cover some of its technology, products or services. Any litigation growing out of third party patents or other intellectual property claims could be costly and time-consuming and could divert its management and key

personnel from the business operations. The complexity of the technology involved and the uncertainty of intellectual property litigation increase these risks. Resolution of claims of intellectual property infringement might also require the Company to enter into costly license agreements. Likewise, the Company may not be able to obtain license agreements on acceptable terms. The Company also may be subject to significant damages or injunctions against development and sale of certain of its products. Further, the Company often relies on licenses of third party intellectual property useful for its businesses. The Company cannot ensure that these licenses will be available in the future on favorable terms or at all.

Third parties may infringe the Company's intellectual property, and the Company may expend significant resources enforcing its rights or suffer competitive injury.

The Company's success depends in significant part on the competitive advantage it gains from its proprietary technology and other valuable intellectual property assets. The Company relies on a combination of patents, copyrights, trademarks and trade secrets protections, confidentiality provisions and licensing arrangements to establish and protect its intellectual property rights. If the Company fails to successfully enforce its intellectual property rights, its competitive position could suffer, which could harm its operating results.

The Company's pending patent and trademark registration applications may not be allowed, or competitors may challenge the validity or scope of its patents, copyrights or trademarks. Further, the Company may be required to spend significant resources to monitor and police its intellectual property rights. The Company may not be able to detect third party infringements and its competitive position may be harmed before the Company does so. In addition, competitors may design around the Company's technology or develop competing technologies. Furthermore, some intellectual property rights are licensed to other companies, allowing them to compete with the Company using that intellectual property.

Uncertainty in the U.S. securities markets and adverse medical cost trends could cause the Company's pension and postretirement costs to increase.

The Company's pension and postretirement costs have increased in recent years, primarily due to a continued increase in medical and prescription drug costs. Investment returns of the Company's pension funds depend largely on trends in the U.S. securities markets and the U.S. economy in general. In particular, uncertainty in the U.S. securities markets and U.S. economy could result in investment returns less than those previously assumed and a decline in the value of plan assets used in pension and postretirement calculations, which the Company would be required to recognize over the next several years under generally accepted accounting principles. Should the securities markets decline and medical and prescription drug costs continue to increase significantly, the Company would expect to face increasing annual combined net pension and postretirement costs. Refer to Note 8 to the Consolidated Financial Statements.

If the Company fails to extend or renegotiate its collective bargaining agreements with its labor union when they expire, or if its unionized employees were to engage in a strike or other work stoppage, the Company's business and operating results could be materially harmed.

The Company is a party to collective bargaining agreements with its labor union, which represent a significant number of its employees. Although the Company believes that its relations with its employees are satisfactory, no assurance can be given that the Company will be able to successfully extend or renegotiate its collective bargaining agreements when they expire. If the Company fails to extend or renegotiate its collective bargaining agreements, if disputes with its union arise, or if its unionized workers engage in a strike or a work stoppage, the Company could experience a significant disruption of operations or incur higher ongoing labor costs, either of which could have a material adverse effect on the business.

Item 1B. Unresolved SEC Staff Comments

None.

Item 2. Properties

Cincinnati Bell Inc. and its subsidiaries own or maintain telecommunications facilities in three states. Principal office locations are in Cincinnati, Ohio.

The property of the Company is principally comprised of telephone plant and equipment in its local telephone franchise area (i.e., Greater Cincinnati), and the infrastructure associated with its wireless business in the Greater Cincinnati and Dayton, Ohio operating areas. Each of the Company's subsidiaries maintains some investment in furniture and office equipment, computer equipment and associated operating system software, application system software, leasehold improvements, and other assets. Facilities equipment and access circuits leased as part of an operating lease arrangement are expensed as equipment or services are used.

With regard to its local telephone operations, substantially all of the central office switching stations are owned and situated on land owned by the Company. Some business and administrative offices are located in rented facilities, some of which are recorded as capitalized leases. With regard to its wireless operations, CBW both owns and leases the locations which house its switching and messaging equipment. It owns approximately 50% of the tower structures and leases almost all of the land upon which its radio base stations reside. CBW leases space primarily from other wireless carriers or tower companies for the remaining tower sites and its ground leases are typically renewable at CBW's option with predetermined rate escalations. CBTS operates three data centers—two owned and one leased—in Ohio and Kentucky through which it provides 24-hour monitoring, redundant power, environmental controls, and high-speed, highly-available optical network connections to its customers.

The Company's gross investment in property, plant, and equipment was \$2,509.1 million and \$2,583.4 million at December 31, 2005 and 2004, respectively, and was divided among the operating segments as follows:

	December 31,	
	2005	2004
	_____	_____
Local	87.8%	82.8%
Wireless	9.9%	15.8%
Hardware and Managed Services	1.5%	0.7%
Other	0.8%	0.7%
	_____	_____
Total	100.0%	100.0%
	_____	_____

For additional information about the Company's properties, see Note 4 to the Consolidated Financial Statements that are contained in Item 8 of this Report on Form 10-K.

Item 3. Legal Proceedings

Edgar Filing: CINCINNATI BELL INC - Form 10-K

The information required by this Item is included in Note 11 to the Consolidated Financial Statements that are contained in Item 8 of this Report on Form 10-K.

Item 4. Submission of Matters to a Vote of the Security Holders

None.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

The Company's common shares (symbol: CBB) are listed on the New York Stock Exchange and on the National Stock Exchange. As of February 28, 2006, there were 72,924 holders of record of the 247,125,771 outstanding common shares of the Company. The high and low daily closing prices during each quarter for the last two fiscal years are listed below:

Quarter		1st	2nd	3rd	4th
2005	High	\$ 4.71	\$ 4.39	\$ 4.64	\$ 4.43
	Low	\$ 3.94	\$ 3.51	\$ 4.02	\$ 3.51
2004	High	\$ 5.89	\$ 4.49	\$ 4.35	\$ 4.30
	Low	\$ 4.00	\$ 3.85	\$ 3.46	\$ 3.26

Dividends

The Company does not currently intend to pay dividends on its common shares and is furthermore restricted in its ability to pay dividends pursuant to certain covenants in its various debt agreements. Refer to Note 6 to the Consolidated Financial Statements.

Issuer Purchases of Equity Securities

The following table provides information regarding the Company's purchases of its common stock during the year ended December 31, 2005:

Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Appropriate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs *
25,469 shares	\$ 4.30	0	n/a

Edgar Filing: CINCINNATI BELL INC - Form 10-K

* Shares are purchased for the Company's deferred compensation plans, and are purchased on the open market. Future purchases are subject to participant elections.

Item 6. Selected Financial Data

The Selected Financial Data should be read in conjunction with the Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included in this document.

(dollars in millions, except per share amounts)	2005	2004	2003	2002	2001

- (a) See Notes 1, 3, and 5 to the Consolidated Financial Statements for discussion related to 2005, 2004, and 2003. An impairment charge of \$2.2 billion was recorded in 2002 related to the write-down of assets in the Broadband segment.
- (b) See Note 16 to the Consolidated Financial Statements.
- (c) See Note 9 to the Consolidated Financial Statements.
- (d) See Note 6 to the Consolidated Financial Statements.
- (e) See Note 4 to the Consolidated Financial Statements for discussion related to 2005, 2004, and 2003. An impairment charge of \$1.9 billion was recorded in 2002 related to the write-down of property, plant, and equipment in the Broadband segment.
- (f) See Notes 1 and 5 to the Consolidated Financial Statements for discussion related to 2005, 2004, and 2003. An impairment charge of \$2.2 billion was recorded in 2002 related to the write-down of assets in the Broadband segment. A goodwill impairment charge of \$2.0 billion, net of tax, was recorded in 2002 upon adoption of Statement of Financial Accounting Standards No. 142, Goodwill

Edgar Filing: CINCINNATI BELL INC - Form 10-K

and Other Intangible Assets.

- (g) Total long-term obligations comprise long-term debt, accrued pension and postretirement, and other noncurrent liabilities and the BRCOM Preferred Stock, which prior to its exchange in 2003 was classified as minority interest in the Consolidated Financial Statements.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations, should be read in conjunction with the Private Securities Litigation Reform Act of 1995 Safe Harbor Cautionary Statement, Risk Factors, and the Consolidated Financial Statements and accompanying Notes to Consolidated Financial Statements.

Executive Summary

Cincinnati Bell Inc. (the Company) is a full-service local provider of data and voice communications services and equipment and a regional provider of wireless and long distance communications services. The Company provides telecommunications service on its owned local and wireless networks with a well-regarded brand name and reputation for service. The Company has five reportable business segments: Local, Wireless, Hardware and Managed Services, Other, and Broadband. The Broadband segment no longer has any substantive, on-going operations.

In 2005, the Company continued to make progress on its primary objectives, which were to: (1) reduce indebtedness, (2) defend its core franchise against increasing competition, and (3) add to the Company's growth businesses.

Reduce indebtedness

The Company reduced total indebtedness by 3%, from \$2,141.2 million at December 31, 2004 to \$2,084.7 million at December 31, 2005, primarily with operating cash flows. This reduction is net of an \$82.8 million increase to debt from the \$55.1 million repayment premium on the 16% Senior Subordinated Discount Notes due 2009 (the 16% Notes) and the \$27.7 million write-off of debt discounts on those notes. The repayment of the 16% Notes was funded with the proceeds from a \$400 million term loan issued under the new corporate credit facility and borrowings under its revolving line of credit. Because of the lower interest rates on the Company's corporate credit facility as compared to the 16% Notes, the Company's cash payment for interest expense will be reduced by approximately \$20 million to \$25 million annually, and its interest expense will be reduced by \$45 million to \$50 million annually.

Defend the core franchise against increasing competition

The Company defended its core franchise through bundling, adding 27,000 net subscribers to its Custom ConnectionsSM Super Bundle which offers local, long distance, wireless, DSL, and the Company's value-added service package, Custom Connection[®], on a single bill at a price lower than the amount the customer would pay for all of the services individually. The Company finished the year with 150,000 Super Bundle subscribers, 22% more than at the end of 2004. Total access lines declined by 4% versus 2004, in line with Company expectations given wireless substitution and other competitive factors. The Company believes that its Super Bundle customers are less likely to disconnect existing services and change services to a competitor.

Add to growth businesses

Edgar Filing: CINCINNATI BELL INC - Form 10-K

The Company increased data revenues in the Local segment by \$15.3 million primarily as a result of an addition of 32,000 Digital Subscriber Line (DSL) subscribers. The Company finished the year with 163,000 DSL subscribers, an increase of 24% over 2004. Penetration of its DSL product increased to 22% of addressable access lines.

The Company increased wireless subscribers from 481,000 at December 31, 2004 to 496,000 at December 31, 2005. The Company experienced particularly strong subscriber growth in its fourth quarter in 2005, increasing its subscribers by 23,000 in this quarter. The increase was the Company's largest increase in wireless subscribers in any quarter since the fourth quarter of 2001, which the Company believes is a result of continued improvements to its wireless network's service quality and the introduction of more attractive rate plans. The Company's postpaid subscriber churn improved from 2.8% in the fourth quarter of 2004 to 1.8% in the fourth quarter of 2005.

The Company opened a new data center facility in 2005, increasing the Company's managed service and hardware revenues. Sales of information technology (IT) and computer-related hardware totaled \$80.2 million during 2005, which was a 55% increase over 2004 hardware sales.

Results of Operations

Consolidated Overview

The financial results for 2005, 2004, and 2003 referred to in this discussion should be read in conjunction with the Consolidated Statements of Operations and Note 14 to the Consolidated Financial Statements.

2005 Compared to 2004

Consolidated revenue totaled \$1,209.6 million in 2005, an increase of \$2.5 million, compared to 2004. The increase was primarily due to the following:

\$6.1 million lower revenues in the Local segment due to losses of access lines, partially offset by increased data and DSL revenues;

\$24.2 million lower revenues in the Wireless segment due to lower service revenue;

\$38.0 million increased revenues in the HMS segment primarily due to increased IT and computer-related, telephony and other equipment sales; and

\$0.9 million lower revenues in the Other segment, as \$6.2 million of increased long distance revenues partially offset \$7.1 million of decreases from businesses which the Company has exited.

Operating income for 2005 was \$258.8 million, a decrease of \$40.5 million compared to 2004. The decrease was primarily due to the following:

\$3.0 million decrease in Local operating income primarily as a result of lower revenue discussed above, \$22.7 million increased pension, postretirement benefits and medical expenses, and an increase of \$5.4 million in network and other related expenses from the out-of-territory expansion, partially offset by lower operating taxes of \$11.9 million, lower depreciation of \$9.0 million, and lower restructuring charges of \$8.9 million;

\$50.3 million decrease in Wireless operating income primarily due to decreased revenue discussed above and increased impairment charges of \$36.4 million associated with TDMA assets, partially offset by decreases in roaming expense of \$8.9 million and \$5.9 million of decreased depreciation and amortization, primarily associated with the accelerated amortization in 2004 of certain intangibles;

Edgar Filing: CINCINNATI BELL INC - Form 10-K

\$0.7 million increase in HMS operating income primarily due to the margin on increased hardware revenues; and

\$8.6 million increase in the Other segment primarily related to an increase at CBAD in long distance revenue, and lower long distance costs resulting from the installation of a long distance switch in June 2004.

The minority interest caption relates to the 19.9% minority interest of Cingular in the net income of Cincinnati Bell Wireless LLC. The TDMA asset impairment charges discussed above gave rise to CBW losses in 2005, and the minority interest income add back of \$11.0 million in 2005 represents Cingular's portion of the CBW losses. As a result of the Company's purchase of Cingular's 19.9% interest in CBW on February 14, 2006, the Company will recognize minority interest expense or income through this date of purchase, but no further minority interest expense or income will be recorded after this date as CBW will be wholly-owned.

Interest expense decreased to \$184.4 million for 2005 compared to \$203.3 million in 2004. This decrease is primarily a result of the net decrease of \$16 million from the extinguishment of the 16% Notes in August 2005, partially offset by interest on the corporate credit facility, which funded the repayment of the 16% Notes.

The loss on extinguishment of debt of \$99.8 million for 2005 was comprised of a \$91.9 million loss related to the repurchase of the 16% Notes and \$7.9 million associated with the repayment of previously existing credit facilities. See Note 6 to the Consolidated Financial Statements for further details.

Income tax expense was \$54.3 million for 2005. Although the Company had pre-tax losses for the year, income tax expense results from legislation that the state of Ohio passed on June 30, 2005 instituting a gross receipts tax and phasing out Ohio's corporate franchise and income tax over a 5 year period. As a result of this legislation, the Company no longer expects to realize state income tax benefits associated with \$47.5 million of deferred tax assets previously recorded. Therefore, the Company reduced deferred tax assets and increased income tax expense by \$47.5 million in 2005. Additionally, the Company had non-deductible expenses including interest on securities originally issued to acquire its broadband business (the Broadband Securities) or securities that the Company has subsequently issued to refinance the Broadband Securities. As a result of these items, the Company recorded income tax expense of \$54.3 million even though it had a loss before income taxes of \$10.2 million. For the future, the Company expects its effective tax rate to exceed statutory rates primarily due to the non-deductible expenses associated with the Broadband Securities. The Company used federal and state net operating loss carryforwards to substantially defray payment of federal and state tax liabilities in 2005. As a result, the Company had net federal and state cash tax payments of \$2.1 million during the year.

In February 2006, the Kentucky Revenue Cabinet issued state tax regulation, which may limit the Company's ability to use its state net operating loss carryforwards against future state taxable income. The Company expects this will result in a one-time income tax charge of approximately \$4 million in the first quarter of 2006.

2004 Compared to 2003

Consolidated revenue totaled \$1,207.1 million in 2004, which was \$350.7 million, or 23%, less than 2003. Foregone revenue associated with disposed broadband assets is the primary reason that 2004 revenue has declined. Revenue of the Broadband segment, which no longer generates any revenue, decreased \$332.4 million (or \$302.1 million net of intercompany eliminations) in 2004 compared to 2003. Related to the sale of its assets, which were located outside of the Company's local telephone or wireless operating territories, the Company estimates that revenue in its HMS segment decreased approximately \$33.4 million in 2004. Also, revenue in the Local segment declined \$12.8 million during 2004 as data revenue growth from DSL transport and dial-up Internet access only partially offset declines in voice revenue.

Operating income for 2004 was \$299.3 million. Operating income in 2003 was \$684.0 million, which includes a gain on the sale of broadband assets of \$336.7 million. The decrease in operating income from 2003 to 2004 was primarily due to the following:

\$333.8 million decrease in the Broadband segment due to the gain on sale of broadband assets of \$336.7 million in 2003;

\$3.6 million decrease in Local operating income as a result of decreased revenues discussed above and \$5.9 million of increased restructuring charges, partially offset by decreases in operating taxes of \$7.4 million due to changes in state tax laws and depreciation expense of \$8.5 million;

\$61.6 million decrease in Wireless operating income primarily as a result of increased costs of \$21.3 million for handset sales, subsidies and advertising related to new gross customer additions, increased depreciation and amortization of \$28.6 million primarily related to accelerated depreciation on TDMA assets and accelerated amortization on roaming and trade name intangibles, and asset impairments of \$5.9 million on assets removed from service;

\$4.8 million decrease in HMS operating income primarily as a result of reduced revenue from customer attrition and price decreases;

\$11.5 million increase in Other operating income primarily due to decreased access charges in the long distance business associated with installation of long distance switching equipment in June 2004 and renegotiation of wholesale long distance minute costs; and

Edgar Filing: CINCINNATI BELL INC - Form 10-K

\$7.6 million decrease in corporate costs primarily due to termination benefits incurred in 2003 in accordance with certain senior executives' employment agreements as discussed in Note 17 to the Consolidated Financial Statements.

Minority interest income of \$0.5 million in 2004 relates to the 19.9% minority interest of Cingular in the net income of CBW. This compares to minority interest expense of \$42.2 million in 2003 as a result of a

\$32.0 million decline resulting from the exchange of the 12 1/2% Junior Exchangeable Preferred Stock of BRCOM (the 12 1/2% Preferreds) for common stock of the Company in September 2003 and a decline in the net income of CBW.

Interest expense of \$203.3 million in 2004 decreased \$14.5 million compared to 2003. This was primarily the result of an \$8.4 million reduction in amortization of note issuance costs related to the prepayment of the Company's credit facilities in 2003, and \$6.1 million of lower interest expense primarily due to the net of approximately \$531.0 million reduced average debt outstanding offset partially by the issuance of the \$500.0 million 7 1/4% Notes in July 2003 and the issuance of the 16% Notes.

The Company recorded a loss on extinguishment of debt of \$17.6 million in 2003. The loss is comprised of \$17.4 million from retirement of the remaining \$46 million of BRCOM 9% notes and related accrued interest of \$1.6 million in exchange for approximately 11.1 million shares of common stock of the Company, which had a fair value of \$65.0 million at the exchange date. Additionally, the Company wrote off \$16.4 million of deferred financing costs related to the prepayment and amendments of the Company's credit facilities. These losses were offset by a non-cash gain of \$16.2 million from the Company purchasing all of its outstanding Convertible Subordinated Notes due 2009, which bore interest at a rate of 9%, at a discounted price equal to 97% of their accreted value.

The Company had income tax expense of \$36.1 million in 2004 compared to a benefit of \$828.8 million in 2003. The increase in expense is primarily the result of the fourth quarter 2003 reversal of the Company's deferred income tax valuation allowance as a result of the substantial resolution of uncertainties related to BRCOM's liquidity. The effective income tax rate in 2004 is 36%, which differs from the federal statutory rate primarily due to the effects of certain non-deductible interest expense amounts, benefits from the reduction of certain state deferred tax valuation allowances and recurring state income tax expenses. The Company used \$25.2 million of federal and state operating loss tax carryforwards in 2004 to defray payment of the majority of its federal and state tax liabilities. The Company paid \$2.3 million in federal and state tax liabilities during 2004.

Effective January 1, 2003, the Company recorded a benefit of \$85.9 million as a cumulative effect of a change in accounting principle, net of taxes, related to the adoption of SFAS 143. The benefit principally related to the estimated telephone plant removal costs previously included in accumulated depreciation, which were reversed. Refer to Note 1 to the Consolidated Financial Statements for a detailed discussion of the adoption of SFAS 143.

Discussion of Operating Segment Results

The Company realigned its business segments in 2004. CBTS, a data equipment and managed services subsidiary, was previously reported in the Broadband segment and is now reported in the Hardware and Managed Services segment. Additionally, the sale of telephony equipment of CBT and its associated installation and maintenance business, previously reported in the Local segment, is now included in the HMS segment. Accordingly, the historical results of operations of the Local, HMS, and Broadband segments have been recast to reflect the current segment reporting.

Local

The Local segment provides local voice telephone service, including enhanced custom calling features, and data services, which include dedicated network access, Gigabit Ethernet and Asynchronous Transfer Mode based data transport, and DSL and dial-up Internet access, to

Edgar Filing: CINCINNATI BELL INC - Form 10-K

customers in southwestern Ohio, northern Kentucky, and southeastern Indiana. These services are provided primarily by CBT, which operates as the Incumbent Local Exchange Carrier (ILEC) in its operating territory of an approximate 25-mile radius of Cincinnati, Ohio. CBT's network has full digital switching capability and can provide data transmission services to approximately 90% of its addressable access lines via DSL.

Outside of its ILEC territory, the Local segment provides these services through Cincinnati Bell Extended Territories LLC (CBET), which operates as a competitive local exchange carrier (CLEC) both in the communities north of CBT's operating territory and in the greater Dayton market. CBET provides voice services for residential as well as voice and data services for business customers on its own network and by purchasing UNE-L's or UNE-platform from the ILEC. CBET provides service through UNE-L to its customer base in the

Dayton, Ohio market. The Local segment links its Cincinnati and Dayton geographies through its fiber networks, which provides route diversity via two separate paths.

2005 Compared to 2004

Revenue

Voice revenue, which includes local service, switched access, information services and value added services revenues decreased by \$19.4 million versus 2004 as a result of a 4% decrease in local service access lines as well as the loss of value added services revenue.

Access lines within the segment's ILEC territory decreased by 47,000, or 5%, from 940,000 at December 31, 2004 to 893,000 at December 31, 2005, which the Company believes results from several factors including customers electing to use wireless communication (wireless substitution) in lieu of the traditional local service, Company-initiated disconnections of customers with credit problems, and customers electing to use service from other providers. The Company has partially offset its access line loss in its ILEC by targeting voice services to residential and small business customers in Dayton, Ohio. The Company had 38,000 total access lines outside its ILEC service territory at December 31, 2005, a 25% increase from the prior year.

Data revenue consists of data transport, high-speed Internet access (including DSL), dial-up Internet access, digital trunking, and Local Area Network (LAN) interconnection services. The increase in data revenue of \$15.3 million for 2005 as compared to 2004 is due to higher DSL

Edgar Filing: CINCINNATI BELL INC - Form 10-K

revenue and data transport revenue. An increase in average DSL subscribers of 32,000, partially offset by a slightly lower average rate per subscriber, produced an additional \$11.1 million in revenue for 2005 as compared to 2004. Also, data transport revenues were \$6.6 million higher in 2005 as compared to 2004. These increases were partially offset by a decrease of \$2.0 million in dial-up internet revenues, attributable to both a decrease in rate and average subscribers, as dial-up customers migrate to DSL. As of December 31, 2005, the Company's DSL penetration of addressable access lines was approximately 22%, up from 17% at December 31, 2004.

The Company believes its rate of access line loss would have been greater and its increase in DSL subscribers would have been less without the success of its Custom ConnectionsSM Super Bundle. The Company added 27,000 Super Bundle subscribers during 2005, bringing total subscribership to 150,000, of which 143,000 were consumer ILEC subscribers, a 26% penetration of access lines. The Company's Super Bundle offers local, long distance, wireless, DSL, and the Company's value-added service package, Custom Connection[®], on a single bill at a price lower than the amount the customer would pay for all of the services individually. An aggressive marketing campaign and the favorable bundled pricing associated with Custom ConnectionsSM Super Bundle has increased the demand for the Company's ZoomTown DSL offering, which

added 32,000 subscribers in 2005, growing 24% compared to December 31, 2004, to 163,000 subscribers. As a result of this growth, total lines to the customer (defined as access lines plus DSL subscribers) as of December 31, 2005 decreased only slightly compared to December 31, 2004, and revenue per household increased 3% to \$48.73.

Costs and Expenses

Cost of services and products increased by \$15.9 million for 2005 versus 2004 primarily due to the following:

\$15.5 million increase for higher pension and postretirement expense. See *Accounting for Pension and Postretirement Expenses* in the *Critical Accounting Policies and Estimates* section;

\$2.7 million increase in employee health costs;

\$11.9 million decrease in state gross receipts tax and property taxes. Beginning with the third quarter of 2004 through the second quarter of 2005, CBT was not subject to Ohio franchise taxes based on gross receipts, but instead was subject to state and local income tax. See *Accounting for Taxes* in the *Critical Accounting Policies and Estimates* section for discussion of Ohio tax legislation passed in 2005 that will impact the Company's future state income tax expense and operating tax expense;

\$5.4 million increase in network and other costs related to the out-of-territory expansion of the Company's CLEC operations;

\$1.3 million increase in rights-to-use fees for webhosting services and product costs to support additional DSL subscribers; and

remaining cost increases are primarily associated with increases in fuel and energy costs, higher regulatory fees, and software development.

Selling, general and administrative expenses decreased \$1.1 million compared to 2004. Higher costs of \$4.5 million for pension, postretirement and employee medical expenses were more than offset by lower advertising costs of \$2.4 million, lower labor and other employee costs, and lower consulting fees.

Depreciation expense decreased \$9.0 million in 2005 compared to 2004. The decreases were primarily due to changes in depreciation rates in the fourth quarter of 2004 used as a result of updated estimates of the depreciable assets' useful lives.

In 2004, the Company initiated a restructuring to improve operating efficiencies and reduce operating expenses resulting in a charge of \$10.4 million. The Company incurred a \$1.5 million charge in 2005 related to the outsourcing of its directory assistance services. See Note 3 to the Consolidated Financial Statements for further discussion.

2004 Compared to 2003

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Local service revenue of \$761.7 million during 2004 decreased 2%, or \$12.8 million, compared to 2003. Revenue declines related to access line losses were partially offset by DSL revenue growth.

Voice revenue of \$519.8 million in 2004 decreased 3%, or \$16.8 million, compared to 2003. Local service revenue declined \$11.9 million as a result of both fewer access lines in service, which declined 1.6% from 986,000 at December 31, 2003 to 970,000 at December 31, 2004, and a 1% lower average revenue per line. The lower average revenue per line is the result of selected price discounts to enterprise customers and certain rate plans related to the service launch in Dayton, Ohio.

Access lines within the segment's ILEC territory decreased 37,000, or 4%, from 977,000 to 940,000. The majority of this decrease is a 21,000 decrease in residential access lines, which the Company believes is primarily due to customers electing to use wireless communication (wireless substitution) in lieu of the traditional local service. In March 2004, the Company expanded its product suite in Dayton, Ohio and began to mass market voice services to residential and small business customers. This helped to increase CLEC access lines by 21,000 lines during 2004, bringing total access lines outside its ILEC service territory to 30,000, which is 3% of its total access lines at December 31, 2004.

Voice revenues also declined \$3.1 million as a result of decreases in trunking revenue and \$1.4 million as a result of decreases in value added services revenue due to price decreases to consumers and small businesses provided within the Company's Custom ConnectionsSM Super Bundle.

Data revenue in 2004 was \$203.9 million, representing a \$7.6 million, or 4%, increase compared to 2003. Internet-based revenue, high-speed DSL and dial-up access increased \$11.0 million in 2004 primarily driven by a 31,000 increase in DSL subscribers, which were 131,000 at December 31, 2004. As of December 31, 2004, 89% of CBT's access lines in its incumbent local exchange operating territory were loop-enabled for DSL transport with a penetration of approximately 17% of total access lines, up from 13% at December 31, 2003. Other high speed/high capacity data services such as transport, digital trunking, LAN, and customized services revenue decreased \$2.5 million in 2004 as a result of both competitive pressures and regulatory-mandated price decreases for wholesale services sold to other telecommunications providers.

The Company believes that its rate of access line loss would have been greater and its increase in DSL subscribers would have been less without the success of its Custom ConnectionsSM Super Bundle. The Company added 52,000 new, Super Bundle subscribers in 2004, to reach a total of 123,000, a 73% increase compared to December 31, 2003. At December 31, 2004, 20% of CBT's primary residential, ILEC access lines were in a Super Bundle. Also, as a result of its success, the Local segment in-territory revenue per consumer household (local revenue divided by average primary access lines) increased by \$0.88, or 2%, to \$47.49 in 2004 compared to \$46.61 in 2003.

Other services revenue of \$38.0 million during 2004 decreased \$3.6 million compared to 2003, primarily as a result of a decrease in wiring revenue.

Costs and Expenses

Cost of services and products decreased \$12.0 million, or 5%, to \$220.2 million in 2004 compared to 2003. The decrease was primarily due to a decline in operating taxes of approximately \$7.4 million, of which \$6.8 million relates to a change in Ohio law. CBT was no longer subject to franchise taxes based on gross receipts, but instead was subject to state and local income tax and included in the combined Ohio state income tax return with other Cincinnati Bell operating companies. See Accounting for Taxes in the Critical Accounting Policies and Estimates section for discussion of Ohio tax legislation passed in June 2005 that will impact future state income tax expense and operating tax expense. Additionally, cost of goods sold and material costs declined \$1.6 million during 2004 related to lower material costs associated with the decrease in wiring revenue compared to 2003.

Selling, general and administrative expenses increased 5%, or \$6.0 million, to \$134.8 million in 2004. This increase was due to an additional \$4.2 million of advertising and promotional expense related to a 25% increase in DSL gross additions and 26,000 gross additions in Dayton local customers.

Total labor and related expense decreased \$2.5 million, or 1%, as compared to 2003 primarily as a result of a \$2.4 million curtailment charge in 2003 related to the sale of substantially all of the broadband assets. A 2% reduction in CBT's headcount also helped to keep labor costs otherwise relatively flat.

Depreciation expense of \$117.2 million decreased \$8.5 million, or 7%, in 2004 compared to 2003, due to a decrease in depreciable assets and reduced capital spending.

Restructuring charges during 2004 of \$10.4 million were \$5.9 million higher than 2003. For further description and purpose of these restructuring charges, please refer to Note 3 to the Consolidated Financial Statements.

Wireless

The Wireless segment provides advanced digital, voice and data communications services through the operation of a regional wireless network in a licensed service territory, which surrounds Cincinnati and Dayton, Ohio and includes areas of northern Kentucky and southeastern Indiana. The segment offers service outside of its regional operating territory through wholesale and re-sale arrangements (roaming agreements) with other wireless operators. The segment also sells related telecommunications equipment, wireless handset devices and related accessories to support its service business.

The Wireless segment consists of CBW, which was historically a joint venture with Cingular Wireless Corporation PCS, LLC (Cingular), in which the Company owned 80.1% of CBW while Cingular owned the remaining 19.9%. On February 14, 2006, the Company purchased Cingular's interest such that CBW is now a wholly-owned subsidiary.

Since October 2003, CBW has deployed service on both TDMA and GSM networks. As of December 31, 2005, CBW had transitioned more than 80% of its subscribers to GSM technology, which provides voice communication, short message service (SMS) or text messaging, and enhanced data communication services, such as mobile web browsing, internet access, email, and picture messaging. In the first quarter of 2005, the Company completed its upgrade to enhanced data rates for GSM evolution (EDGE), which required only software upgrades to deliver higher speeds of data transmission and capacity. The Company expects to discontinue the use of its TDMA network during 2006.

* The Company has presented certain information regarding monthly average revenue per user (ARPU) because the Company believes ARPU provides a useful measure of the operational performance of the wireless business. ARPU is calculated by dividing service revenue, excluding roaming revenue, by the average subscriber base for the period.

2005 Compared to 2004

Revenue

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Service revenue decreased by \$27.2 million in 2005 as compared to 2004. This decrease is primarily attributed to the following:

\$22.4 million decrease in postpaid subscriber service revenue due to lower ARPU. The Company's postpaid ARPU decreased by \$6.26 compared to 2004 due to lower priced GSM rate plans and bundling plans, slightly offset by an increase in data revenues. The increase in subscribers from 306,300 at December 31, 2004 to 315,100 at December 31, 2005 is the result of the Company's efforts to recover subscribers that were lost as a result of network quality problems encountered in 2004 at the early stages of the Company's network migration from TDMA to GSM. The Company has resolved the difficulties

25

encountered in 2004, and fourth quarter net activations (gross activations less deactivations) of 14,700 in 2005 compared favorably to a loss of net subscribers of 1,800 in the same period of 2004. Average churn for the year was approximately 2.2%. However, churn declined over the course of the year from 2.8% in the fourth quarter of 2004 to 1.8% in the fourth quarter of 2005. This was due to the resolution of the aforementioned network problems and the introduction of more attractive rate plans;

\$1.7 million increase in prepaid service revenues primarily due to an increase in average subscribers. As of December 31, 2005, prepaid subscribers totaled approximately 180,500, compared to 174,700 at December 31, 2004. Prepaid ARPU was flat compared to 2004, as higher data ARPU offset lower voice ARPU. Average monthly prepaid customer churn increased from 6.1% in 2004 to 6.5% in 2005 primarily as a result of increased competition; and

\$9.4 million decrease in roaming revenue due to a decrease in minutes of use as a result of the merger between Cingular and AT&T Wireless Services Inc. CBW has lost substantial roaming revenue as Cingular customers are now using Cingular's network versus CBW's network. As part of CBW's agreement with Cingular, a substantial portion of this lost roaming revenue is offset by a rate reduction on the cost of roaming minutes purchased from Cingular. For 2005, roaming expense decreased \$8.9 million compared to 2004.

Total wireless subscribers at December 31, 2005 were approximately 496,000, which represents approximately 15% of the population in CBW's licensed operating territory.

Equipment revenue increased by \$3.0 million as the Company sold 41,000 more handsets during 2005 as compared to 2004 as 26,000 more TDMA customers migrated to the Company's GSM network.

Costs and Expenses

Cost of services and products consists largely of network operation costs, roaming expense (whereby CBW incurs costs associated with its subscribers using their handsets while in the territories of other wireless service providers), interconnection expenses, and cost of handsets and accessories sold. The decrease in costs of services of \$3.9 million compared to 2004 was due to lower roaming expense of \$8.9 million resulting from the renegotiation of rates with Cingular noted above, partially offset by \$1.9 million of higher handset and accessory costs related to the equipment revenue increase and \$2.5 million of higher operating taxes.

Selling, general and administrative expenses include certain customer acquisition expenses, such as advertising, distribution and promotional expenses. These expenses were flat as compared to 2004. Increases in advertising and promotional expenses of \$2.9 million were offset by decreased fees for outsourced services as a result of better negotiated rates and lower legal claim costs for the roaming litigation that was incurred in 2004. Refer to Note 11 to the Consolidated Financial Statements.

In 2005, the Company further revised its estimate of the remaining useful lives of certain of the TDMA assets, resulting in additional depreciation. The depreciation increase for 2005 versus 2004 results from the accelerated depreciation on TDMA assets as well as on certain GSM assets that were replaced in late 2005 as part of the Company's continued initiative to improve GSM network quality.

The Company incurred charges of \$42.3 million in 2005 to write down the recorded value of its TDMA network assets. A portion of the TDMA assets were taken out of service in 2005 in order to optimize the remaining spectrum associated with TDMA assets. This resulted in a charge of

Edgar Filing: CINCINNATI BELL INC - Form 10-K

\$23.7 million. Additionally, an asset impairment charge of \$18.6 million was incurred to write down to fair value the remaining TDMA assets in use. Due to the rapid migration of TDMA subscribers to the Company's GSM network and lower ARPU associated with the remaining TDMA customers, the remaining future cash flows associated with the TDMA assets could no longer support the recorded value of the TDMA assets, resulting in the impairment charge. After the charges, the book value of TDMA network assets was less than \$1 million at December 31, 2005. The Company expects to discontinue its TDMA network in 2006. Asset impairment charges in 2004 were recorded to write-down certain TDMA assets taken out of service and certain intangible assets.

Amortization expense in 2004 was a result of accelerated amortization related to the change in estimated economic useful life of certain roaming and trade name agreements as a result of the merger between Cingular and AT&T Wireless Services on October 26, 2004.

2004 Compared to 2003

Revenue

Wireless segment revenue increased \$2.2 million, or 1%, to \$261.7 million during 2004 compared to 2003. Equipment revenue increased \$6.6 million in 2004 primarily due to a 27% increase in new service activations and 17% of CBW's existing TDMA customers purchasing new handsets to switch their service to the Company's new GSM service. This increase in equipment revenue offset a \$3.6 million decrease in roaming revenue and a \$0.8 million decrease in CBW subscriber service revenue.

CBW's roaming revenue declined primarily as a result of a 20% decrease in average revenue per roaming minute as a greater amount of AWE roaming traffic used lower priced GSM minutes than in 2003. Total roaming revenue equaled \$13.0 million in 2004.

Subscriber service revenue declined \$0.8 million as a result of a \$3.8 million postpaid service revenue decrease more than offsetting a \$3.0 million increase in prepaid service revenue. Postpaid revenue decreased as a result of a 5,600 decrease in subscribers, driven primarily by an average monthly customer churn which increased to 2.6% in 2004 compared to 1.8% in 2003, and a \$0.50 decrease in postpaid ARPU, excluding roaming revenue, from \$51.42 in 2003 to \$50.92, which is in part the result of customer migrations to lower priced GSM rate plans. The Company believes that the increase in postpaid churn during the year is the result of a combination of factors, most notably network quality issues created by CBW's network migration. At December 31, 2004 CBW had 306,300 postpaid subscribers.

Prepaid service revenue increases were largely the result of increased subscribers. As of December 31, 2004, prepaid subscribers totaled approximately 174,700, a 12,200 increase over December 31, 2003. Likely a result of both the aforementioned network quality issues as well as unmeasured TDMA customer migrations to the new GSM network, average monthly prepaid customer churn increased to 6.1% in 2004 compared to 4.9% in 2003. Total wireless subscribers at December 31, 2004 were approximately 481,000, or approximately 14% of the population in CBW's licensed operating territory.

Data revenue of \$14.7 million increased \$5.6 million, or 62%, from \$9.1 million as compared to 2003. Data revenue is 6% of total revenue.

As mandated by the FCC, wireless local number portability (WLNP) was effective November 24, 2003 and allows customers the ability to change service providers within the same local area and retain the same phone number. WLNP did not have any significant impact in 2004.

Costs and Expenses

Cost of services and products increased \$22.7 million, or 21%, to \$133.2 million in 2004 compared to the prior year. The increase was due largely to an \$18.0 million increase of costs associated with increased handset subsidies, which supported both a 27% increase in new gross customer additions as well as the migration of 17% of the Company's legacy TDMA customers to its new GSM network.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

In the fourth quarter of 2004, CBW recorded a \$3.2 million adjustment related to prior periods to account for certain rent escalations associated with its tower site leases on a straight-line basis. These rent escalations are associated with lease renewal options that were deemed to be reasonably assured of renewal, thereby extending the initial term of the leases. The adjustment was not considered material to the current year or to any prior years' earnings, earnings trends, or individual financial statement line items. Additionally, customer service expense increased \$2.4 million as a result of increased customer contacts, driven by the GSM migration and quality issues, which was offset by a decrease in incollect expense of \$4.7 million. Lower incollect expense was the result of a 20% decrease in the average cost per roaming minute of which a greater percentage was on the lower priced GSM network.

Selling, general, and administrative expenses of \$56.5 million increased by \$6.5 million, or 13%, in 2004, primarily as a result of a \$3.3 million increase in advertising and promotional expense to support the 27% increase in new customer gross additions.

Depreciation expense of \$58.3 million increased \$20.0 million in 2004 compared to 2003. The increase was a result of \$20.6 million in additional depreciation related to the change in estimated economic useful life of the TDMA network to December 31, 2006.

Amortization expense of \$9.1 million increased \$8.6 million in 2004 compared to 2003. The increase was a result of \$7.4 million in accelerated amortization related to the shortened, estimated economic useful lives of certain AWE roaming and trade name agreements, as a result of the merger between Cingular Wireless and AWE, consummated on October 26, 2004.

Asset impairment charges of \$5.9 million in 2004 were comprised of \$3.5 million recorded to write-down certain TDMA assets, which CBW removed from service, and a \$2.4 million asset impairment charge related to certain intangible assets.

Hardware and Managed Services

The Hardware and Managed Services segment provides data center collocation, IT consulting services, telecommunications and computer equipment as well as related installation and maintenance. The Hardware and Managed Services is comprised of the operations within CBTS. In March 2004, CBTS sold certain operating assets, which were generally residing outside of the Company's operating area, for approximately \$3.2 million in cash. During the second quarter of 2004, CBTS paid \$1.3 million to the buyer of the assets in working capital adjustments related to the sale.

2005 Compared to 2004

Revenue

Hardware revenue is generated by the reselling of major manufacturers' IT, data and telephony equipment. Managed services revenue consists of the sale of outsourced technology resources, leveraging assets within the Company, including but not limited to data center assets, and revenue of technical services and maintenance directly related to the sale of IT, data and telephony equipment. The CBTS business model links the capability to sell a wide range of equipment from various manufacturers along with the Company's technical and infrastructure capability to offer complete technology solutions for the small, medium, and large business customer.

In March 2004, CBTS sold certain out-of-territory operations, which negatively impacted 2005 hardware revenue by \$20.7 million. This decrease was more than offset by increased hardware sales from core CBTS operations. This increase in core CBTS hardware sales was due to a \$49.1 million increase in IT and computer-related hardware revenue, resulting primarily from increased hardware revenue from data center customers. CBTS expanded its data center business with the purchase of its Mason, Ohio data center in late 2004 and the

opening of its Florence, Kentucky data center in June 2005. The increased hardware sales were for equipment used in CBTS data centers as well as for equipment to be used at customer facilities. Higher revenue for the sale of telephony and other equipment accounted for the remaining increase in 2005.

The newly operational data centers and increased hardware sales directly contributed to an increase of \$13.7 million in managed and data center services revenue in 2005, partially offset by decreased revenues of \$3.5 million related to the sale of out-of-territory offices and lower professional services revenue of \$3.9 million. Data center service revenue increased in 2005 as a result of the Florence facility opening in 2005 and the Mason facility being operational for a full year, in addition to increased revenue generated from services provided to CBTS data center customers outside of CBTS facilities.

Costs and Expenses

Cost of services and products increased for 2005 by \$34.8 million as compared to 2004. Higher sales from IT and computer-related hardware and telephony hardware through core CBTS operations caused an increase to cost of goods sold of \$44.6 million and \$1.9 million, respectively, which was partially offset by a decrease of \$19.8 million related to the sale of out-of-territory operations. Operational costs of the new data center facilities increased \$5.7 million in 2005 as both facilities were running during 2005, and managed services costs increased \$7.2 million related to higher revenue. These increases in 2005 were partially offset by lower professional services costs and lower operating costs due to the sale of out-of-territory operations.

The \$0.7 million increase in selling, general and administrative expenses for 2005 compared to 2004, is attributed to increased employee benefits expenses, sales commissions, and other performance-based compensation as a result of the revenue and earnings increases over 2004, offset by decreases as a result of the sale of out-of-territory assets in 2004.

The increase in depreciation expense in 2005 over 2004 is due to capital expenditures associated with providing data center collocation services.

Although revenue increased during 2005, operating margins decreased from 2004. The margin decrease is primarily due to an increased proportion of equipment sales, which have lower operating margins than service revenue.

2004 Compared to 2003

Revenue

Hardware revenue of \$74.0 million during 2004 decreased 17%, or \$15.6 million, compared to 2003. The decrease was primarily due to the sale of the assets of the out-of-territory business, offset by several large equipment sales and hardware sales including \$10.1 million to customers referred by the buyer of the out-of-territory assets, as a sales agent. The sale of the assets of the out-of-territory business better aligned the CBTS business model and better aligned the subsidiary with the growth strategy of its parent.

In 2004, managed services revenue of \$60.7 million decreased 17%, or \$12.5 million, compared to 2003. The decreases were primarily due to the sale of the assets of the out-of-territory business, price reductions and customer attrition. The managed services revenues associated with the sale of assets were based on billing of non-strategic outsourced technology resources.

Costs and Expenses

Cost of services and products decreased \$16.7 million, or 14%, to \$104.7 million in 2004 compared to 2003. The decrease in cost of services was primarily associated with the decrease in revenue discussed above.

Selling, general, and administrative expenses decreased 31%, or \$7.6 million, to \$16.7 million in 2004. The decreases were due to lower payroll and related expenses of \$7.7 million driven by lower headcount as a result of the sale of the out-of-territory assets.

In conjunction with the sale of the assets of the out-of-territory business discussed above, the Hardware and Managed Services segment recorded a gain of \$1.1 million during 2004.

Other

The Other segment combines the operations of Cincinnati Bell Any Distance (CBAD), Cincinnati Bell Complete Protection (CBCP), the Company's payphone business (Public) and Cincinnati Bell Entertainment (CBE). CBAD resells long distance voice services and audio conferencing, CBCP provides security monitoring for consumers and businesses as well as related hardware, Public provides public payphone services, and CBE intends to provide entertainment services. In the fourth quarter of 2004, the Company sold its payphone assets located at correctional institutions and those outside of the Company's operating area for \$1.4 million. During the same quarter, the Company discontinued offering security monitoring hardware to business customers without the related service monitoring.

(dollars in millions)	2005	2004	\$ Change 2005 vs. 2004	% Change 2005 vs. 2004	2003	\$ Change 2004 vs. 2003	% Change 2004 vs. 2003

Operating income	\$ 26.6	\$ 18.0	\$ 8.6	48%	\$ 6.5	\$ 11.5	177%
Operating margin	34.2%	22.9%		11 pts	8.0%		15 pts

2005 Compared to 2004**Revenue**

CBAD's revenue increased \$6.2 million, or 10%, in 2005 compared to 2004, primarily due to business products such as dedicated access and audio conferencing and increases in subscribed access lines. CBAD had 564,000 subscribed access lines as of December 31, 2005 in the Cincinnati and Dayton, Ohio operating areas, an increase of 2,000 lines over 2004. Usage increases from the growth of unlimited long distance plans within the Company's service bundles are the primary reason for this growth. The Company's market share has increased as a function of the Local segment's lines in service for which a long distance carrier has been chosen for residential and business access lines. CBAD's residential and business market share in Cincinnati increased to 80% and 52% at December 31, 2005, respectively, from 76% and 48%, respectively, at December 31, 2004.

Public's and CBCP's revenue decreased \$6.1 million and \$1.0 million, respectively, in 2005 compared to 2004 due primarily to the Company's sale or exiting of businesses as noted above.

Costs and Expenses

Cost of services and products decreased \$11.1 million in 2005 compared to 2004. This was a result of \$4.1 million of decreased costs per long distance minute due to the installation of long distance switching equipment in June 2004 and the renegotiation of wholesale transport rates in June 2004 and June 2005, and a decrease of \$7.0 million primarily related to the Company's sale or exiting of businesses related to CBCP and Public, partially offset by cost of services and products for the Company's new CBE division.

Selling, general and administrative expenses increased \$1.5 million for 2005 compared to 2004. Decreases in expenses of \$1.4 million at Public and CBCP, related to the sale or exiting of businesses discussed above, were offset by increases of \$2.4 million at CBAD and \$0.6 million at CBE. CBAD's increases primarily relate to higher payroll costs, increased bad debt expense, and software development charges from third parties. CBE is a new entertainment division of the Company in the current year and expenses primarily relate to payroll and administrative costs.

2004 Compared to 2003

Other segment revenue of \$78.6 million in 2004 decreased \$2.5 million, or 3%, compared to 2003. Decreases of \$2.2 million and \$1.7 million in Public and retail long distance revenue more than offset \$1.3 million and \$0.2 million increases in wholesale long distance and CBCP revenue. Revenue from both decreased as a result of a decline in usage. Despite an increase of 23,000 lines, to approximately 562,000 subscribed access lines as of December 31, 2004, or 4%, compared to December 31, 2003, decreases in long distance usage per line more than offset the positive revenue impact related to line growth. CBAD's Cincinnati market share for which a long distance carrier is selected was 76% in the consumer market and 48% in the business market up from 71% and 45%, respectively, compared to December 31, 2003.

Costs and Expenses

Cost of services and products totaled \$44.5 million in 2004, representing a decrease of 18% compared to the prior year. This was due primarily to decreased access charges for CBAD cost of services of \$10.2 million during 2004 due to a 35% lower cost per long distance minute associated with the Company's installation of long distance switching equipment in June 2004 and the negotiation of lower wholesale long distance minute costs.

Selling, general, and administrative expenses decreased \$0.5 million, or 3%, to \$14.3 million in 2004 compared to the prior year. The decrease was primarily due to decreased bad debt expense.

Public incurred a \$3.6 million asset impairment in 2003 to write down the value of its public payphone assets to fair value.

Broadband

In 2003, the Company completed the sale of substantially all of its broadband assets (refer to Note 16 to the Consolidated Financial Statements). Subsequent to the closing of the asset sale, the Broadband segment now consists substantially of retained liabilities not transferred to the buyer, such as contract termination restructuring liabilities, addressed in Note 3 to the Consolidated Financial Statements, and operating tax liabilities. Prior to the sale of the broadband assets, revenue for the Broadband segment was generated from broadband transport (which included revenue from IRU's), switched voice services, data and Internet services (including data collocation and managed services) and other services. These transport and switched voice services were generally provided over the Broadband segment's national optical network, which comprised approximately 18,700 route miles of fiber-optic transmission facilities.

2005 Compared to 2004

Costs and Expenses

During 2005 and 2004, selling, general, and administrative expenses primarily consisted of the reversals of certain operating tax reserves totaling \$11.2 million and \$3.5 million, respectively, primarily due to resolutions of audits.

Adjustments to restructuring reserves in 2005 and 2004 resulted in income of \$0.5 million and \$1.8 million, respectively, due to changes in estimates related to the termination of contractual obligations. The restructuring credit in 2004 was offset by a corporate restructuring adjustment of \$2.0 million. Refer to Note 3 to the Consolidated Financial Statements.

Asset impairments and other charges (gains) in 2005 and 2004 were primarily due to proceeds received from the sale of assets previously written off.

The gain on sale of \$3.7 million recorded in 2004 was due to the expiration of certain indemnities to the buyer. Refer to Note 16 to the Consolidated Financial Statements.

2004 Compared to 2003

Revenue

Broadband segment revenue decreased 100% in 2004 compared to 2003 due to the sale of substantially all of the Company's broadband assets.

Costs and Expenses

Cost of services and products in 2003 primarily reflects access charges paid to local exchange carriers and other providers, transmission lease payments to other carriers and costs incurred for network construction projects. In 2004, cost of services and products amounted to zero, compared to \$202.8 million incurred during 2003, due to the sale of substantially all of the Company's broadband assets.

During 2004, selling, general, and administrative expenses primarily consisted of the reversal of certain operating tax reserves totaling \$3.5 million. These expenses decreased from an expense of \$125.2 million in 2003 due to the sale of substantially all of the Company's broadband assets.

During 2004, the Broadband segment recorded a restructuring credit of \$1.8 million due to a change in estimate related to the termination of contractual obligations. The restructuring credit was offset by a corporate restructuring adjustment of \$2.0 million. Restructuring charges in 2003 consisted of an \$11.1 million reversal of previously recorded charges due to settlements and change in estimates related to contract terminations. Refer to Note 3 to the Consolidated Financial Statements.

The Broadband segment recorded a gain of \$1.5 million in 2004 related to the sale of assets previously written off. In 2003, the Company recorded a \$5.2 million charge to Asset impairments and other charges (gains) as a result of a settlement with a customer regarding a broadband network construction contract.

In conjunction with the sale of substantially all of the broadband assets, the Broadband segment recorded a gain of \$336.7 million in 2003. The gain on sale of \$3.7 million recorded in 2004 was due to the expiration of certain indemnities to the buyer. Refer to Note 16 to the Consolidated Financial Statements.

Financial Condition, Liquidity, and Capital Resources

Capital Investment, Resources and Liquidity

As the Company's businesses mature, investments in its local, wireless, and DSL networks will be focused on maintenance, strategic expansion, incremental revenue-generating penetration of these services with the bundle, cost and productivity improvements and technology enhancement initiatives undertaken to add and retain customers on the Company's networks.

Background

As of December 31, 2005, the Company had \$2,084.7 million of outstanding indebtedness and an accumulated deficit of \$3,604.5 million. The Company incurred a significant amount of indebtedness and a subsequent accumulated deficit from the purchase and operation of its broadband business.

In November of 1999, the Company acquired IXC Communications, Inc. (IXC) for approximately \$3.2 billion. In connection with the acquisition, the Company assumed approximately \$1.0 billion of debt. IXC, subsequently renamed BRCOM (f/k/a Broadwing Communications Inc.), provided long haul voice, data, and Internet service over an 18,700 mile fiber optic network. From the acquisition of BRCOM through June 2003, the Company used a total of approximately \$2.3 billion of both cash flow from its other businesses and borrowings under its credit facilities to finance the buildout of BRCOM's national optical network and to meet BRCOM's other cash needs. In 2001, the business environment for BRCOM and the broader telecommunications industry deteriorated rapidly and significantly. As a result of the acquisition of BRCOM, the Company incurred substantial operating and net losses.

In response to BRCOM's deteriorating financial results and concerns over liquidity, in October 2002, the Company announced a five-point restructuring plan intended to strengthen the Company's financial position, maintain the strength and stability of its local telephone business, reduce capital expenditures at BRCOM, facilitate the evaluation of strategic alternatives related to BRCOM and reduce debt. Throughout 2003, as a result of the execution of this plan, the Company completed the sale of BRCOM's broadband business, secured additional sources of capital, amended its credit facilities and completed the exchange of debt and preferred stock at BRCOM in 2003, as further discussed below.

Broadband Asset Sale

During 2003, the Company completed the sale of substantially all of the broadband assets of BRCOM to CIII Communications LLC, for a cash purchase price of \$82.7 million (net of certain post-closing adjustments).

The Company has indemnified the buyer of the broadband business against certain potential claims. In order to determine the fair value of the indemnity obligation, the Company performed a probability-weighted discounted cash flow analysis, utilizing the minimum and maximum potential claims and several scenarios within the range of possibilities. For 2003, the analysis originally resulted in a \$7.8 million estimated fair value of the indemnity obligations, which was included in other liabilities and has been reflected as a reduction of the gain on sale of broadband assets in the Consolidated Statement of Operations. In 2004, the Company decreased the liability related to the indemnity obligations to \$4.1 million due to the expiration of the general representations and warranties and no broker warranties, and recorded \$3.7 million as a gain on sale of broadband assets in the Consolidated Statement of Operations. There was no change to the indemnity obligation of \$4.1 million during 2005.

2003 New Financings

On March 26, 2003, the Company received \$350.0 million of gross cash proceeds from the issuance of the 16% Notes. Proceeds from the 16% Notes, net of fees, were used to pay down borrowings under the Company's then-existing credit facilities. Prior to extinguishment of the 16% Notes in August 2005, interest was payable 12% in cash and 4% was accreted on the aggregate principal amount. In addition, purchasers of the 16% Notes received 17.5 million common stock warrants, each to purchase one share of Cincinnati Bell Inc. common stock at \$3.00 each, which expire in March 2013. Of the total gross proceeds received, \$47.5 million was allocated to the fair value of the warrants using the Black-Scholes

Edgar Filing: CINCINNATI BELL INC - Form 10-K

option-pricing model and was recorded as a discount on the 16% Notes, which was being amortized to expense based on the original maturity date in January 2009.

On July 11, 2003, the Company issued \$500.0 million of 7¹/₄% Senior Notes due 2013 (the "7¹/₄% Notes due 2013"). Net proceeds of \$488.8 million were used to prepay term credit facilities and permanently reduce commitments under the Company's then-existing revolving credit facility. The 7¹/₄% Notes due 2013 are unsecured obligations and rank equally with all of the Company's existing and future senior unsecured debt and rank senior to all existing and future subordinated debt. The Company's subsidiaries, excluding CBT, CBET and certain immaterial subsidiaries, unconditionally guarantee the 7¹/₄% Notes due 2013 on a senior unsecured basis. Refer to Note 21 to the Consolidated Financial Statements regarding the Company's purchase of the CBW

minority interest. The indenture governing the 7¹/₄% Notes due 2013 contains customary covenants for notes of this type, including limitations on the following: dividends and other restricted payments; dividends and other payment restrictions affecting subsidiaries; issuance of indebtedness; asset dispositions; transactions with affiliates; liens; investments; issuances and sales of capital stock of subsidiaries; redemption of debt that is junior in right of payment; issuances of senior subordinated debt; and, mergers and consolidations. In January 2005, the indenture governing the 7¹/₄% Notes due 2013 (the 7¹/₄% Indenture) was amended to, among other things, permit the Company to repurchase or redeem the 16% Notes without regard to the extent of the Company's ability to make restricted payments (as defined in the 7¹/₄% Indenture) under the restricted payments covenant of the 7¹/₄% Indenture.

On November 19, 2003, the Company issued \$540.0 million of 8³/₈% Senior Subordinated Notes (the 8³/₈% Notes). The net proceeds, after deducting the initial purchasers' discounts, fees, and expenses, totaled \$528.2 million. The Company used the net proceeds to purchase all of the Company's then outstanding Convertible Subordinated Notes due 2009, which bore interest at a rate of 9%, at a discounted price equal to 97% of their accreted value and to reduce outstanding borrowings under the then-existing revolving credit facility.

2004 Debt Repayments

During 2004, the Company used a portion of cash flow generated from operations to repay debt in the amount of \$171.8 million.

2005 Financing Transactions and Credit Facilities

In the first quarter of 2005, the Company completed the first of a two stage refinancing plan of its 16% Notes. In the third quarter of 2005, the Company completed the second stage of its plan with the refinancing of the 16% Notes. In stage one, the Company:

paid \$9.7 million in fees to the holders of the Company's 7¹/₄% Notes due 2013 for their consent to permit the Company to refinance its 16% Notes with new debt that would be pari passu to the 7¹/₄% Notes due 2013;

issued, on February 16, 2005, \$250 million new 7% Senior Notes due 2015 (7% Senior Notes) and \$100 million in additional 8³/₈% Senior Subordinated Notes due 2014 (8³/₈% Notes) (collectively, the New Bonds);

established, on February 16, 2005, a new \$250 million revolving credit facility that matures in February 2010 and also includes the right to request, but no lender is committed to provide, an increase in the aggregate amount of the new credit facility of up to \$500 million in future incremental borrowing capacity;

used the proceeds from the New Bonds and borrowings from the new revolving credit facility to repay \$438.8 million outstanding at December 31, 2004 on its previous credit facility; and

executed \$350 million notional interest rate swaps to change the fixed rate nature of a part of the New Bonds and the previously outstanding 8³/₈% Notes to approximate the floating rate characteristics of the terminated credit facility.

In stage two, the Company:

Edgar Filing: CINCINNATI BELL INC - Form 10-K

issued \$400 million of new bank term notes (the Tranche B Term Loan) on August 31, 2005 under the terms of the Company's credit facility; and

retired the 16% Notes for \$447.8 million, including repayment of accrued interest, using the proceeds from the Tranche B Term Loan and additional borrowings under the new revolving credit facility.

In total, the Company recognized \$99.8 million of loss upon extinguishment of debt. In the first quarter, related to stage one of the refinancing plan, the loss was \$7.9 million for the write-off of unamortized deferred financing fees associated with the previous credit facility. In the third quarter, related to stage two of the refinancing plan, the loss was \$91.9 million, which was composed of \$9.1 million for the write-off of the unamortized deferred financing fees, \$27.7 million for the write-off of the unamortized discount, and \$55.1 million for the premium paid in conjunction with the extinguishment of the 16% Notes.

In addition to financial transactions consummated under the refinancing plan discussed above, during the fourth quarter of 2005, the Company made a scheduled payment of \$20 million to extinguish certain outstanding notes of Cincinnati Bell Telephone. On December 31, 2005, the Company paid the first of its \$1 million quarterly amortization payments on its Tranche B Term Loan, as required under the terms of its credit facility.

As of December 31, 2005, the Company had no outstanding borrowings under its revolving credit facility, and had outstanding letters of credit totaling \$6.4 million, leaving \$243.6 million in additional borrowing availability under its revolving credit facility.

The Company's credit facility financial covenants require that the Company maintain certain leverage ratios, interest coverage and fixed charge ratios. The facilities also contain certain covenants which, among other things, may restrict the Company's ability to incur additional debt or liens, pay dividends, repurchase Company common stock, sell, transfer, lease, or dispose of assets and make investments or merge with another company. If the Company were to violate any of its covenants and was unable to obtain a waiver, it would be considered a default. If the Company were in default under its credit facilities, no additional borrowings under the credit facilities would be available until the default was waived or cured. The Company's ability to borrow was not compromised as there is no such default as of the date of this filing.

Voluntary prepayments of borrowings under the credit facilities and voluntary reductions of the unutilized parts of the credit facilities commitments are, subject to proper notice, permitted at any time. The Company expects to use cash flows generated by its operations and in excess of investing activities to reduce outstanding indebtedness.

Contractual Obligations

The following table summarizes the Company's contractual obligations as of December 31, 2005:

(dollars in millions)	Payments Due by Period				
	Total	< 1 Year	1-3 Years	3-5 Years	Thereafter
Long-term debt (1)	\$ 2,071.7	\$ 6.4	\$ 8.3	\$ 8.0	\$ 2,049.0
Capital leases	22.2	4.9	4.1	8.4	4.8
Interest payments on long-term debt and capital leases (2)	1,410.2	152.6	303.1	303.1	651.4
Purchase of minority interest from Cingular (3)	83.2	83.2			
Noncancelable operating lease obligations	228.8	12.9	27.3	24.5	164.1
Purchase obligations (4)	161.8	40.2	64.9	56.7	
Other long-term liabilities (5)	43.7	14.2	3.4	2.4	23.7
Total	\$ 4,021.6	\$ 314.4	\$ 411.1	\$ 403.1	\$ 2,893.0

- (1) Long-term debt excludes net unamortized premiums and the fair value of the Company's interest rate swaps.
- (2) Interest payments on long-term debt and capital leases include interest obligations on both fixed and variable rate debt, assuming no early payment of debt in future periods. The Company used the interest rate forward curve at December 31, 2005 to compute the amount of the contractual obligation for interest payments on variable rate debt and interest rate swaps.
- (3) The Company repurchased Cingular's 19.9% interest in CBW for \$83.2 million on February 14, 2006. Refer to Note 21 to the Consolidated Financial Statements.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

- (4) Purchase obligations primarily consist of the Company's service agreement with Convergys as discussed below in Commitments.
- (5) Amount includes \$10.2 million of expected cash contributions in 2006 for postretirement benefits. Although the Company expects to continue operating the plans past 2006, its contractual obligation related to postretirement benefits only extends through the end of 2006. Amount includes \$2.4 million of expected cash contributions in 2006 for pension benefits. The Company's pension plan contributions are subject to ERISA regulations, plan investment performance, and other factors, and, as such, the Company is not able to estimate contributions after 2006. Amount also includes contractual obligation payments related to restructuring reserves and asset removal obligations.

The contractual obligations table is current as of December 31, 2005. The amount of these obligations can be expected to change materially over time as new contracts are initiated and existing contracts are completed, terminated, or modified.

Current maturities of long-term debt of \$11.3 million at December 31, 2005 consisted of \$4.0 million of principal payments for the Tranche B Term Loan, \$4.9 million related to the current portion of capital leases, and \$2.4 million related to other current debt. The Company expects to have the ability to meet its current obligations through borrowings from its revolving credit facility and cash flows generated by its operations.

As of December 31, 2005, Cingular Wireless Corporation (Cingular), through its subsidiary AT&T PCS LLC (AWE), maintained a 19.9% ownership in the Company's CBW subsidiary. In response to the acquisition (the Merger) of AWE by Cingular, announced on February 17, 2004, the Company entered into an agreement on August 4, 2004 with a subsidiary of Cingular whereby the parties restructured the CBW joint venture effective October 26, 2004, the date of consummation of the Merger (as subsequently amended, the Agreement). Specifically, under the Agreement, the Company could purchase AWE's interest in CBW at a price of \$85.0 million if purchased at any time prior to January 31, 2006, plus interest at an annual rate of 5%, compounded monthly, from the date of the Agreement. In addition, at any time beginning on January 31, 2006 (or earlier, if the member committee called for additional capital contributions which call has not been approved by AWE or Cingular), AWE or Cingular had a right to require the Company to purchase its interest in CBW at the purchase price of \$83.0 million, plus interest at an annual rate of 5%, compounded monthly, from January 31, 2006 if the purchase had not closed prior to such date. On February 14, 2006, Cingular exercised its put option, and as a result, the Company purchased Cingular's 19.9% interest in CBW for a purchase price of \$83.2 million.

Other

Labor Contract Ratification

On June 10, 2005, employees represented by the Communications Workers of America (CWA) ratified a three-year labor agreement extending through May 10, 2008. The new contract affects approximately 1,500 members of the CWA Locals 4400 and 4401. Terms of the new labor contract include:

Base pay increases for union employees of 1.75% retroactive to May 8, 2005, 2.75% effective May 14, 2006, and 3.00% effective May 13, 2007. The previous contract provided 2.0% base pay increases every six months;

Establishment of health reimbursement accounts for future retirees with an annual account balance and a 3% inflation factor. To the extent the actual cost of health care premiums for a future retiree exceeds the value credited to their account, the retiree will be responsible for the difference;

Establishment of health care premium payments for active employees beginning in 2007; and

Contribution increases of 10% to the union employees' pension plan.

The Company expects this contract will result in expense trends that are favorable to the previous labor contract.

Commitments and Contingencies

Commitments

In 1998, the Company entered into a ten-year contract with Convergys Corporation (Convergys), a provider of billing, customer service and other services, which remains in effect until June 30, 2008. The contract states that Convergys will be the primary provider of certain data processing, professional and consulting and technical support services for the Company within CBT 's operating territory. In return, the Company will be the exclusive provider of local telecommunications services to Convergys. During the second quarter of 2004, the Company and Convergys renegotiated the contract, the result of which extended the contract through December 31, 2010, reduced prices for certain provided services by Convergys, excluded certain third party costs and reduced the Company 's annual commitment in 2004 and 2005 to \$35.0 million from \$45.0 million. During 2005 and 2004, the Company paid a total of \$36.1 million and \$37.5 million, respectively, under the contract. Beginning in 2006, the minimum commitment will be reduced 5% annually.

Contingencies

In the normal course of business, the Company is subject to various regulatory and tax proceedings, lawsuits, claims and other matters. The Company believes adequate provision has been made for all such asserted and unasserted claims in accordance with accounting principles generally accepted in the United States. Such matters are subject to many uncertainties and outcomes that are not predictable with assurance.

In re Broadwing Inc. Securities Class Action Lawsuits, (Gallow v. Broadwing Inc., et al), U.S. District Court, Southern District of Ohio, Western Division, Case No. C-1-02-795.

Between October and December 2002, five virtually identical class action lawsuits were filed against Broadwing Inc. and two of its former Chief Executive Officers in U.S. District Court for the Southern District of Ohio.

These complaints were filed on behalf of purchasers of the Company's securities between January 17, 2001 and May 20, 2002, inclusive, and alleged violations of Section 10(b) and 20(a) of the Securities and Exchange Act of 1934 by, inter alia, (1) improperly recognizing revenue associated with Indefeasible Right of Use (IRU) agreements; and (2) failing to write-down goodwill associated with the Company's 1999 acquisition of IXC Communications, Inc. The plaintiffs seek unspecified compensatory damages, attorney's fees, and expert expenses.

On December 30, 2002, the Local 144 Group filed a motion seeking consolidation of the complaints and appointment as lead plaintiff. By order dated October 29, 2003, Local 144 Nursing Home Pension Fund, Paul J. Brunner and Joseph Lask were named lead plaintiffs in a putative consolidated class action.

On December 1, 2003, lead plaintiffs filed their amended consolidated complaint on behalf of purchasers of the Company's securities between January 17, 2001 and May 20, 2002, inclusive. This amended complaint contained a number of new allegations. Cincinnati Bell Inc. was added as defendant in this amended filing. The Company's motion to dismiss was filed on February 6, 2004. Plaintiffs filed their opposition on April 2, 2004 and the Company filed its reply on May 17, 2004.

On September 24, 2004, Judge Walter Rice issued an Order granting in part and denying in part the Company's motion to dismiss. The Order indicates that a more detailed opinion will follow. Until the detailed opinion is issued, there is no way of knowing which portions of the case have been dismissed. In the interim, Judge Rice directed that the stay of discovery will remain in effect. The Company is vigorously defending these matters. The timing and outcome of these matters are not currently predictable. An unfavorable outcome could have a material effect on the financial condition, results of operations and cash flows of the Company.

In re Broadwing Inc. Derivative Complaint, (Garlich v. Broadwing Inc., et al.), Hamilton County Court of Common Pleas, Case No. A0302720.

This derivative complaint was filed against Broadwing Inc. and ten of its current and former directors on April 9, 2003 alleging breaches of fiduciary duty arising out of the same allegations discussed in *In re Broadwing Inc. Securities Class Action Lawsuits* above. Pursuant to a stipulation between the parties, defendants are not required, absent further order by the Court, to answer, move, or otherwise respond to this complaint until 30 days after the federal court renders a ruling on defendants' motion to dismiss in *In re Broadwing Inc. Securities Class Action*

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Lawsuits. The Company is vigorously defending these matters. The timing and outcome of these matters are not currently predictable. An unfavorable outcome could have a material effect on the financial condition, results of operations and cash flows of the Company.

In re Broadwing Inc. ERISA Class Action Lawsuits, (Kurtz v. Broadwing Inc., et al), U.S District Court, Southern District of Ohio, Western Division, Case No. C-1-02-857.

Between November 18, 2002 and March 17, 2003, five putative class action lawsuits were filed against Broadwing Inc. and certain of its current and former officers and directors in the United States District Court for the Southern District of Ohio. Fidelity Management Investment Trust Company was also named as a defendant in these actions.

These cases, which purport to be brought on behalf of the Cincinnati Bell Inc. Savings and Security Plan, the Broadwing Retirement Savings Plan, and a class of participants in the Plans, generally allege that the defendants breached their fiduciary duties under the Employee Retirement Income Security Act of 1974 (ERISA) by improperly encouraging the Plan participant-plaintiffs to elect to invest in the Company stock fund within the relevant Plan and by improperly continuing to make employer contributions to the Company stock fund within the relevant Plan.

On October 22, 2003, a putative consolidated class action complaint was filed in the U.S. District Court for the Southern District of Ohio. The Company filed its motion to dismiss on February 6, 2004. Plaintiffs filed their opposition on April 2, 2004 and the Company filed its reply by May 17, 2004.

On October 6, 2004, the Judge issued a Scheduling Order in these matters. According to the Scheduling Order, discovery was permitted to commence immediately and was to have been completed by November 15, 2005. The trial was tentatively scheduled to take place in May 2006.

On February 22, 2006, the Company entered into a Stipulation and Agreement of Settlement of ERISA Actions (the Agreement) providing for the settlement of the consolidated case with no finding or admission of any wrongdoing by any of the defendants in the lawsuit. Under the Agreement, defendants are obligated to pay \$11 million, which payment will be made on their behalf by their insurers, to a fund to settle the claims of, and obtain a release of all claims from, the class members. On March 13, 2006, the Court issued an order giving preliminary approval of the Agreement and scheduling a settlement fairness hearing on June 22, 2006. If the Agreement is given final approval by the Court after the fairness hearing, the Agreement will result in a dismissal of the case with prejudice and will not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Cincinnati Bell Wireless Roaming Litigation

During 2004, a class action complaint against Cincinnati Bell Wireless Company and Cincinnati Bell Wireless, LLC was filed in Hamilton County, Ohio. The complaint alleges that the plaintiff and similarly-situated customers were wrongfully assessed roaming charges for wireless phone calls made or received within the Company's Home Service Area and/or within major metropolitan areas on the AT&T Wireless Network. The complaint asserted several causes of action, including negligent and/or intentional misrepresentation, breach of contract, fraud, unjust enrichment, conversion and violation of the Ohio Consumer Sales Practices Act. The plaintiff sought economic and punitive damages on behalf of himself and all similarly-situated customers.

On January 31, 2005 and April 7, 2005, respectively, substantially similar class action complaints were filed in Kenton County, Kentucky and Montgomery County, Ohio.

During the second quarter of 2005, a tentative settlement agreement was reached in the above-referenced cases. On October 21, 2005, the settlement was approved by the court. Under the settlement, the Company was to establish a fund capped at \$6 million from which customers who qualified and submitted a claim would receive a voucher of up to \$50.00 toward certain Cincinnati Bell services. Customers who could demonstrate that they had applicable roaming charges in excess of \$100.00 were eligible to be reimbursed for up to half of such charges in lieu of the \$50.00 voucher. The period for submitting proofs of claim ended on October 28, 2005. One objector appealed the order approving the settlement, but the appeal was subsequently settled and dismissed. As a result, no roaming charge litigation remains pending. The number of claims received was substantially below the above-referenced cap and the settlement did not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Freedom Wireless vs. BCGI, et al.

On September 16, 2005, Freedom Wireless filed a patent infringement action against 24 wireless service providers, including Cincinnati Bell Wireless (CBW). The suit alleges that the defendant wireless service providers are in violation of a patent owned by Freedom Wireless. CBW obtained its rights to use the technology in question through Boston Communications Group Inc. (BCGI). BCGI has acknowledged its obligation to indemnify CBW in accordance with the terms of the license agreement. This lawsuit was preceded by a direct patent infringement suit against BCGI by Freedom Wireless, in which BCGI was found liable. BCGI is appealing that verdict. CBW is not certain that BCGI will prevail in its appeal or whether BCGI will have sufficient

financial resources to honor all of its indemnification obligations. The timing and outcome of these matters are not currently predictable. An unfavorable outcome could have a material effect on the financial condition, results of operations and cash flows of the Company.

Off-Balance Sheet Arrangements

The Company is a party to off-balance sheet arrangements, consisting of certain indemnifications related to the sale of the broadband assets in 2003 and the Company's future obligation to sell common shares through exercise of outstanding warrants. Information pertaining to these arrangements is presented below.

Indemnifications

During the normal course of business, the Company makes certain indemnities, commitments and guarantees under which it may be required to make payments in relation to certain transactions. These include (a) intellectual property indemnities to customers in connection with the use, sales and/or license of products and services, (b) indemnities to customers in connection with losses incurred while performing services on their premises, (c) indemnities to vendors and service providers pertaining to claims based on negligence or willful misconduct of the Company, and (d) indemnities involving the representations and warranties in certain contracts. In addition, the Company has made contractual commitments to several employees providing for payments upon the occurrence of certain prescribed events. The majority of these indemnities, commitments, and guarantees do not provide for any limitation on the maximum potential for future payments that the Company could be obligated to make. Except for amounts recorded in relation to insured losses, the Company has not recorded a liability for these indemnities, commitments, and other guarantees in the Consolidated Balance Sheets, except as described below.

The following table summarizes the Company's indemnification obligations as of December 31, 2005:

<u>(dollars in millions)</u>	<u>Fair Value</u>	<u>Estimated Maximum Indemnities</u>
Indemnities to the buyer of the broadband assets	\$ 4.1	\$ 151.5
Indemnities related to legal settlement agreements	0.3	1.0
Total Indemnities	\$ 4.4	\$ 152.5

The Company has indemnified the buyer of the broadband assets against certain potential claims, including environmental, tax, title and authorization. The title and authorization indemnification was capped at 100% of the purchase price of the broadband assets, subject to reductions under the terms of the purchase agreement. The environmental indemnities were capped at 50% of the purchase price of the broadband assets.

In order to determine the fair value of the indemnity obligations, the Company performed a probability-weighted discounted cash flow analysis, utilizing the minimum and maximum potential claims and several scenarios within the range of possibilities. For 2003, the analysis originally resulted in a \$7.8 million estimated fair value of the indemnity obligations, which was included in other liabilities and has been reflected as a reduction of the gain on sale of broadband assets in the Consolidated Statement of Operations. In 2004, the Company decreased the liability

Edgar Filing: CINCINNATI BELL INC - Form 10-K

related to the indemnity obligations to \$4.1 million due to the expiration of the general representations and warranties and no broker warranties, and recorded \$3.7 million as a gain on sale of broadband assets in the Consolidated Statement of Operations. In 2005, no additional representations or warranties expired. Based on the updated probability-weighted discounted analysis, the estimated fair value of the indemnity obligations remained unchanged at \$4.1 million at December 31, 2005.

In order to determine the fair value of the indemnity obligations and warranties provided under the legal settlement agreements, the Company utilized a best estimates approach when possible and for certain transactions performed a probability-weighted discounted cash flow analysis, utilizing the minimum and maximum potential claims and certain scenarios within the range of possibilities. For the year ended December 31, 2003, the analysis originally resulted in a \$3.2 million estimated fair value of the indemnity obligations, which was included in other liabilities and was reflected as other operating expense in the

Consolidated Statement of Operations. In 2005 and 2004, the Company paid approximately \$0.2 million and \$2.7 million, respectively, related to these indemnity obligations. At December 31, 2005 and 2004, \$0.3 million and \$0.5 million, respectively, remained in other liabilities related to the indemnity for certain representations and warranties provided under the terms of the legal settlement agreement.

Warrants

As part of the issuance of the 16% Notes in March 2003, the purchasers of the 16% Notes received 17.5 million common stock warrants to purchase one share of Cincinnati Bell common stock at \$3.00 each, which expire in March 2013. Of the total gross proceeds received for the 16% Notes, \$47.5 million was allocated to the fair value of the warrants using the Black-Scholes option-pricing model. This value less applicable issuance costs was recorded to Additional paid-in capital in the Consolidated Balance Sheet. Warrants for 50,000 shares were exercised in 2005, with no exercises in 2004 and 2003.

Cash Flow

2005 Compared to 2004

Cash provided by operating activities for 2005 totaled \$322.3 million, an increase of \$21.6 million compared to the \$300.7 million provided by operating activities during 2004. This increase results primarily from an increase in cash earnings (net income less non-cash items) and favorable changes in working capital. Refer to Consolidated Statements of Cash Flows for further details.

The Company's 2005 capital expenditures of \$143.0 million were \$9.1 million higher than 2004 capital expenditures of \$133.9 million. The increase was primarily due to business transformation projects associated with the Company's 2004 restructuring charge and mandated wireless investments, partially offset by decreased HMS expenditures due to high 2004 additions for data center facilities. In 2004, the Company received \$3.3 million from the sale of certain assets of CBTS and Public, generally consisting of operating assets outside its current operating area.

During 2005, the Company received \$352.1 million of cash proceeds from the issuance of the new 7% Notes and the 8³/₈% Notes and \$400.0 million from the Tranche B Term Loan issued under the corporate credit facility in August 2005. The Company repaid \$903.3 million of borrowings during 2005, most of which was the \$438.8 million prepayment of borrowings under its previous credit facilities in February 2005 and the \$440.1 million repurchase of the 16% Notes in August 2005. Debt issuance costs and consent fees totaled \$21.9 million in 2005.

Preferred stock dividends of \$10.4 million were paid during both 2005 and 2004.

As of December 31, 2005, the Company held \$25.7 million in cash and cash equivalents. In 2006, the Company's primary sources of cash will be cash generated by operations and borrowings from the revolving line of credit under the Corporate credit facility. The Company expects the primary uses of cash in 2006 will be: to purchase the 19.9% minority interest in CBW owned by Cingular (see Subsequent Event Note 21 to the Consolidated Financial Statements); funding the maintenance and strategic expansion of the local and wireless networks; interest and principal payments on the Company's debt; dividends on the 6¹/₄% Cumulative Convertible Preferred Stock; and working capital.

2004 Compared to 2003

In 2004, the Company generated cash from operating activities of \$300.7 million, which was \$9.9 million less than in the prior year. This decrease was primarily attributable to increased handset subsidies for new customer additions and the migration of existing TDMA customers to its new GSM network. The Company also experienced higher cash consumption with regard to working capital on behalf of its ongoing businesses and due to payments on accrued liabilities that remained from the sale of substantially all the broadband segment assets. Offsetting these declines, however, was an improvement resulting from the sale of the broadband business in June 2003, which was operating at a cash deficit prior to the sale of the Company's broadband assets.

The Company's investing activities included outflows for capital expenditures and inflows from the sale of certain assets. Capital expenditures during 2004 totaled \$133.9 million, \$7.5 million higher than the \$126.4 million incurred in 2003. In 2003, the Company received \$82.7 million from the sale of certain assets of its broadband business and \$3.8 million from the sale of its entire equity investment in Terabeam, offset by \$6.1 million in fees related to the sale of the BRCOM assets. In 2004, the Company received \$3.3 million from the sale of certain assets of CBTS and Public, generally consisting of operating assets outside its current operating area, net of working capital adjustments.

During 2004, the Company reduced borrowings under its credit facilities by \$169.6 million primarily as a result of cash provided by operating activities. This is \$870.1 million less than during 2003, when the Company reduced borrowings under its credit facility with the net proceeds of \$350 million from the 16% Notes, \$500 million from the 7 1/4% Notes due 2013, \$540 million from the 8 3/8% Notes and approximately \$50 million of the proceeds from the sale of the broadband business.

The Company incurred no debt issuance costs during 2004, in comparison to the \$80.4 million incurred during 2003 as a result of the aforementioned capital structure transactions. The Company also paid approximately \$10.4 million and \$7.9 million in preferred stock dividends during years ended December 31, 2004 and 2003, respectively.

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue, and expenses. Additionally, the Company's senior management has discussed the critical accounting policies and estimates with the Audit and Finance Committee. The Company's significant accounting policies are summarized in Note 1 to the Consolidated Financial Statements.

The discussion below addresses major judgments used in:

revenue recognition;

accounting for allowances for uncollectible accounts receivable;

reviewing the carrying values of goodwill and indefinite-lived intangible assets;

reviewing the carrying values of property, plant, and equipment;

accounting for taxes; and

accounting for pension and postretirement expenses.

Revenue Recognition The Company recognizes revenue as services are provided. Local and special access fees, which are billed monthly, and prepaid wireless receipts are collected in advance, but the revenue is not recognized until the service is provided. Postpaid wireless, long distance, switched access, data center management services, reciprocal compensation, and data and Internet product services are billed monthly in arrears. The Company bills service revenue in regular monthly cycles, which are dispersed throughout the days of the month. As the day of each billing cycle rarely coincides with the end of the Company's reporting period for usage-based services such as postpaid wireless, long distance, and switched access, the Company must estimate service revenues earned but not yet billed. The Company bases its estimates upon historical usage and adjusts these estimates during the period in which the Company can determine actual usage, typically in the following reporting period.

CBT advanced billings for customer connections and activations are deferred and amortized into revenue on a straight-line basis over the average customer life. The associated connection and activation costs, to the extent of the upfront fees, are also deferred and amortized on a straight-line basis over the average customer life. Subsequent to July 1, 2003 and in accordance with the Emerging Issues Task Force Issue 00-21, Accounting for Revenue Arrangements with Multiple Deliverables (EITF 00-21), CBW ceased deferral of revenue and cost related to customer connections and activations. As CBW's activation costs exceed activation revenues, both the activation revenue and associated costs are recorded upon the sale of the wireless handset. This change did not have a material impact on the Company's financial position, results of operations, or cash flows.

With respect to arrangements with multiple deliverables, the Company follows the guidance in EITF 00-21 to determine whether more than one unit of accounting exists in an arrangement. To the extent that the deliverables are separable into multiple units of accounting, total consideration is allocated to the individual units of accounting based on their relative fair value, determined by the price of each deliverable when it is regularly sold on a stand-alone basis. Revenue is recognized for each unit of accounting as delivered or as service is performed depending on the nature of the deliverable comprising the unit of accounting.

The Company recognizes equipment revenue generally upon the performance of contractual obligations, such as shipment, delivery, installation or customer acceptance. The Company is a reseller of IT and telephony equipment and considers the criteria of EITF 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent, when recording revenue, such as title transfer, risk of product loss, and collection risk. Based on this guidance, these equipment revenues and associated costs have generally been recorded on a gross basis, rather than recording the revenues net of the associated costs.

Prior to the sale of the broadband assets in 2003, broadband transport services were billed monthly, in advance, while revenue was recognized as the services were provided. In addition, the Company had entered into indefeasible right-of-use (IRU) agreements, which represent the lease of network capacity or dark fiber, recording unearned revenue at the earlier of the acceptance of the applicable portion of the network by the customer or the receipt of cash. The buyer of IRU services typically paid cash or other consideration upon execution of the contract, and the associated IRU revenue was recognized over the life of the agreement as services were provided, beginning on the date of customer acceptance. In the event the buyer of an IRU terminated a contract prior to the contract expiration and released the Company from the obligation to provide future services, the remaining unamortized unearned revenue was recognized in the period in which the contract was terminated. The Company generated \$59.4 million in non-cash IRU revenue in 2003. Concurrent with the broadband asset sale in 2003, substantially all of the remaining IRU obligations were assumed by the buyer of the broadband assets.

Pricing of local services is generally subject to oversight by both state and federal regulatory commissions. Such regulation also covers services, competition and other public policy issues. Various regulatory rulings and interpretations could result in adjustments to revenue in future periods. The Company monitors these proceedings closely and adjusts revenue accordingly.

Accounting for Allowances for Uncollectible Accounts Receivable The Company established the allowances for uncollectible accounts using percentages of aged accounts receivable balances to reflect the historical average of credit losses as well as specific provisions for certain identifiable, potentially uncollectible balances. The Company believes its allowance for uncollectible accounts is adequate based on these methods. However, if one or more of the Company's larger customers were to default on its accounts receivable obligations or if general economic conditions in the Company's operating area deteriorated, the Company could be exposed to potentially significant losses in excess of the provisions established. Substantially all of the Company's outstanding accounts receivable balances are with entities located within its geographic operating areas. Regional and national telecommunications companies account for the remainder of the Company's accounts receivable balances. No one entity or collection of legally affiliated entities represents 10% or more of the outstanding accounts receivable balances.

Reviewing the Carrying Values of Goodwill and Indefinite-Lived Intangible Assets Pursuant to Statement of Financial Account Standards No. 142, Goodwill and Other Intangible Assets (SFAS 142), goodwill and intangible assets not subject to amortization are tested for impairment annually, or when events or changes in circumstances indicate that the asset might be impaired.

Substantially all of the Company's goodwill relates to its Wireless segment. The Company estimated the fair value of CBW based on expected future cash flows generated by CBW discounted at 10%. The estimated fair value of CBW was higher than its carrying value, and, as such, there was no indication of impairment at December 31, 2005.

Indefinite-lived intangible assets consist primarily of Federal Communications Commission (FCC) licenses for spectrum of the Wireless segment. The Company may renew the wireless licenses in a routine manner every ten years for a nominal fee, provided the Company continues to meet the service and geographic coverage provisions required by the FCC. The fair value of the licenses was appraised by an outside party using

the Greenfield method. The appraised value of the licenses was higher than its carrying value, and, as such, there was no indication of impairment at December 31, 2005.

Reviewing the Carrying Values of Property, Plant, and Equipment The Company's provision for depreciation of its telephone plant is determined on a straight-line basis using the group depreciation method. Provision for depreciation of other property, other than leasehold improvements, is based on the straight-line method over the estimated economic useful life. Depreciation of leasehold improvements is based on a straight-line method over the lesser of the economic useful life or term of the lease, including option renewal periods if renewal of the lease is probable or reasonably assured. Repairs and maintenance expense items are charged to expense as incurred.

The Company estimates the useful lives of plant and equipment in order to determine the amount of depreciation expense to be recorded during any reporting period. The majority of the Local segment plant and equipment is depreciated using the group method, which develops a depreciation rate (annually) based on the average useful life of a specific group of assets rather than for each individual asset as would be utilized under the unit method. The estimated life of the group changes as the composition of the group of assets and their related lives change. Such estimated life of the group is based on historical experience with similar assets, as well as taking into account anticipated technological or other changes. If technological changes were to occur more rapidly than anticipated, or in a different form than anticipated, the useful lives assigned to these assets may need to be shortened, resulting in the recognition of increased depreciation expense in future periods. Likewise, if the anticipated technological or other changes occur more slowly than expected, the life of the group could be extended based on the life assigned to new assets added to the group. This could result in a reduction of depreciation expense in future periods. A one-year decrease or increase in the useful life of these assets would increase or decrease annual depreciation expense by approximately \$10 million.

The Company reviews the carrying value of long-lived assets, other than goodwill and indefinite-lived intangible assets discussed above, when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. In assessing impairments, the Company follows the provisions of Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144). An impairment loss is recognized when the estimated future undiscounted cash flows expected to result from the use of an asset (or group of assets) and its eventual disposition are less than its carrying amount. An impairment loss is measured as the amount by which the asset's carrying value exceeds its estimated fair value.

During the fourth quarter of 2003, the Company shortened the estimated remaining economic useful life of its legacy TDMA wireless network to December 31, 2006 due to the expected migration of its TDMA customer base to its GSM network. In 2003, the change in estimate reduced operating income and net income by \$5.2 million and \$3.4 million, respectively; basic and diluted earnings per share were decreased by \$0.02 and \$0.01, respectively, as a result of this change in estimate.

As part of the process of redeploying spectrum from the Company's legacy TDMA wireless network to its GSM network to meet unexpected increasing demand for its GSM services, the Company made the decision in the first quarter of 2005 to retire certain TDMA assets in order to optimize its TDMA network performance. As a result of this early retirement of assets, in the first quarter of 2005 the Company recorded a charge of \$23.7 million under the caption *Asset impairments and other charges*. In the second quarter of 2005, the useful life of certain of the remaining TDMA assets was shortened from the December 31, 2006 date being used, and depreciation was accelerated. The change in depreciation expense due to the change in estimate in the second quarter decreased 2005 operating income and net income by \$7.7 million and \$4.6 million, respectively; basic and diluted earnings per share were decreased by \$0.02 per share as a result of this change in estimate.

In the fourth quarter of 2005, due to the rapid migration of TDMA customers to the Company's GSM network and decreased revenue per remaining TDMA subscriber, the Company determined that the carrying value of the TDMA assets was not recoverable from the estimated future undiscounted cash flows resulting from the use of the assets. Therefore, an impairment charge of \$18.6 million was recorded in the fourth quarter of 2005 to record the TDMA assets at fair value. The Company calculated the fair value of the assets based on the appraised amount at which the assets could be sold in a current transaction between willing parties. The impairment charge is recorded in the Consolidated

Statements of Operations under the caption Asset

impairments and other charges. After the impairment charges, the carrying value of the TDMA assets was less than \$1 million at December 31, 2005.

If technological change were to occur more rapidly than expected, it may have the effect of shortening the estimated depreciable life of other network and operating assets that the Company employs. This could have a substantial impact on the consolidated depreciation expense and net income of the Company. Competition from new or more cost effective technologies could affect the Company's ability to generate cash flow from its network-based services. This competition could ultimately result in an impairment of certain of the Company's tangible or intangible assets. This could have a substantial impact on the operating results of the consolidated Company.

Prior to the beginning of 2003, the Company estimated net removal costs for outside plant assets of CBT and to the extent these costs exceeded gross salvage values, the Company increased its periodic depreciation expense to capture the difference between estimated net removal costs and gross salvage values in accumulated depreciation. When the Company retired these assets and expended the net removal costs, the Company recognized net removal costs as a reduction to accumulated depreciation.

In connection with the adoption of Statement of Financial Accounting Standards No. 143, *Accounting for Asset Retirement Obligations* (SFAS 143), effective January 1, 2003, the Company removed the then existing accrued costs for the removal of outside telephone plant from the accumulated depreciation accounts. These accrued costs totaled \$85.9 million, net of taxes, which the Company recognized as income. Refer to Note 1 to the Consolidated Financial Statements.

Since the Company had previously accrued for net removal costs in excess of salvage value in depreciation expense, depreciation expense for CBT was \$6.7 million lower in 2003 than it would have otherwise been absent this accounting change. CBT expensed \$2.2 million of cost of products and services in 2003 related to net removal costs in excess of salvage value.

Accounting for Taxes

Income Taxes

The income tax provision consists of an amount for taxes currently payable and an amount for tax consequences deferred to future periods. The Company's previous tax filings are subject to normal reviews by regulatory agencies until the related statute of limitations expires. The Company's federal income tax audit periods through 2001 have been closed. The Company establishes liabilities for tax exposures it believes are probable of payment and believes adequate provision has been made for all open tax years. However, the ultimate resolution of these issues may differ from the amounts currently estimated, in which case an adjustment would be made to the tax provisions in that period.

On June 30, 2005, legislation was passed in the state of Ohio instituting a gross receipts tax and phasing out Ohio's corporate franchise and income tax over a five year period. As a result of this legislation, the Company does not expect it will be able to realize income tax benefits associated with \$47.5 million of deferred tax assets previously recorded, of which approximately \$36.5 million relates to Ohio net operating losses. The remaining amount of approximately \$11 million relates to the revaluation of other Ohio deferred tax assets to estimates of future realizable value. Therefore, the Company recognized additional income tax expense of approximately \$47.5 million in 2005. This additional income tax expense is based upon projections of taxable income, timing of reversing temporary differences, and the Company's current business structure.

As of December 31, 2005, the Company had \$680.6 million in net deferred tax assets, which includes \$1.7 billion in federal tax net operating loss carryforwards, with a deferred tax asset value of \$611.7 million. The tax loss carryforwards are available to the Company to offset taxable income in current and future periods. The Company utilized approximately \$80 million of gross federal tax net operating loss carryforwards during 2005. The remaining tax loss carryforwards will generally expire between 2017 and 2023 and are not currently limited under U.S. tax laws. The ultimate realization of the deferred income tax assets depends upon the Company's ability to generate future taxable income during the periods in which basis differences and other deductions become deductible and prior to the expiration of the net operating loss carryforwards. Based on current income levels and anticipated future reversal of existing temporary differences, the Company expects to utilize its federal net operating loss carryforwards within their expiration periods.

In addition to the federal tax net operating loss carryforwards, the Company has state and local net operating loss carryforwards with a deferred tax asset value of \$205.6 million and deferred tax temporary differences and other tax attributes of \$47.2 million. A valuation allowance of \$183.9 million is provided at December 31, 2005 against certain state and local net operating losses and other deferred tax assets due to the uncertainty of the Company's ability to utilize the assets within the statutory expiration period.

The Company determines its effective tax rate by dividing its income tax expense by its income before taxes as reported in its Consolidated Statement of Operations. For reporting periods prior to the end of the Company's fiscal year, the Company records income tax expense based upon an estimated annual effective tax rate. This rate is computed using the statutory tax rate and an estimate of annual net income adjusted for an estimate of non-deductible expenses.

The Company's effective tax rate in 2005 was adversely affected by the \$47.5 million income tax expense associated with the change in Ohio tax law noted above, as well as by the non-deductible interest expense related to securities originally issued to acquire its broadband business (the Broadband Securities) or securities which the Company has subsequently issued to refinance the Broadband Securities. As a result of these items, the Company recorded income tax expense of \$54.3 million even though it had a loss before income taxes of \$10.2 million.

Refer to Note 12 to the Consolidated Financial Statements for further information regarding the Company's income taxes.

Operating taxes

The Company incurs certain operating taxes that are reported as expenses in operating income, such as property, sales, use, and gross receipts taxes. These taxes are not included in income tax expense because the amounts to be paid are not dependent on the level of income generated by the Company. The Company also records expense against operating income for the establishment of liabilities related to certain operating tax audit exposures. These liabilities are established based on the Company's assessment of the probability of payment. Upon resolution of audit, any remaining liability not paid is released and increases operating income. The Company recognized \$14.4 million of income in 2005 upon resolution of certain operating tax audits, net of new liabilities established, of which \$11.2 million was associated with the Broadband segment. Refer to Note 14 to the Consolidated Financial Statements. Additionally, the Company recognized \$4.4 million and \$0.2 million of income in 2004 and 2003, respectively, upon resolution of operating tax audits, net of new liabilities established.

Accounting for Pension and Postretirement Expenses The Company sponsors three noncontributory defined benefit pension plans: one for eligible management employees, one for non-management employees and one supplemental, nonqualified, unfunded plan for certain senior executives. The Company also provides health care and group life insurance benefits for eligible retirees. The key assumptions used to account for the plans are disclosed in Note 8 to the Consolidated Financial Statements. The actuarial assumptions attempt to anticipate future events and are used in calculating the expenses and liabilities related to these plans. The most significant of these numerous assumptions, which are reviewed annually, include the discount rate, expected long-term rate of return on plan assets and health care cost trend rates.

Discount rate

A discount rate is selected annually to measure the present value of the benefit obligations. In determining the selection of a discount rate, the Company estimates the timing and amounts of expected future benefit payments and applies a yield curve developed to reflect yields available on high-quality bonds. Based on the analysis, the discount rate was set at 5.50% for all of the plans as of December 31, 2005. At December 31,

Edgar Filing: CINCINNATI BELL INC - Form 10-K

2004, the discount rates were set at 5.50% and 5.75% for the pension plans and postretirement plans, respectively.

Expected rate of return

The expected long-term rate of return on plan assets, developed using the building block approach, is based on the following: the participant's benefit horizons; the mix of investments held directly by the plans, which is generally 60% equities and 40% bonds; and, the current view of expected future returns, which is influenced by historical averages. The required use of an expected versus actual long-term rate of return on plan assets may

result in recognized pension expense or income that is greater or less than the actual returns of those plan assets in any given year. Over time, however, the expected long-term returns are designed to approximate the actual long-term returns. To the extent the Company changed its estimate of the expected long-term rate of return on plan assets, there would be an impact on pension expense or income and the associated net liability or asset. The Company uses an assumed long-term rate of return of 8.25% for the Company's pension and postretirement trusts. Actual asset returns for the pension trusts, which represent nearly 90% of invested assets, were approximately 7% in 2005 and 11% in 2004.

In its pension calculations, the Company utilizes the market-related value of plan assets, which is a calculated asset value that recognizes changes in asset fair values in a systematic and rational manner. Differences between actual and expected returns are recognized in the market related value of plan assets over five years.

Health care cost trend

The Company's health care cost trend rate is developed on historical cost data, the near-term outlook and an assessment of likely long-term trends. The health care cost trend rate used to measure the postretirement health benefit obligation at December 31, 2005, was 7.62% and is assumed to decrease gradually to 4.42% by the year 2011.

The actuarial assumptions used may differ materially from actual results due to the changing market and economic conditions and other changes. Revisions to and variations from these estimates would impact assets, liabilities, costs of services and products and selling, general and administrative expenses.

The following table represents the sensitivity of changes in certain assumptions related to the Company's pension and postretirement plans:

(dollars in millions)	% Point Change	Pension Benefits		Postretirement and Other Benefits	
		Increase/ (Decrease) in Obligation	Increase/ (Decrease) in 2006 Expense	Increase/ (Decrease) in Obligation	Increase/ (Decrease) in 2006 Expense
Discount rate	+/- 0.5%	\$ 26.4 / (25.1)	\$ 0.3 / (0.4)	\$ 20.4 / (19.3)	\$0.8 / (0.9)
Expected return on assets	+/- 0.5%		\$ 2.1 / (2.1)		\$0.3 / (0.3)
Health care cost trend rate	+/- 1%	n/a	n/a	\$ 22.1 / (17.6)	\$1.7 / (1.3)

The assumption for cost sharing with retirees is also important to determining the postretirement and other benefits expense. The Company's collectively bargained-for labor contracts have historically had limits on the Company-funded portion of retiree medical costs (referred to as caps). However, the Company had waived the premiums in excess of the caps for bargained-for retirees who retired during the contract period. Similar benefits have been provided to non-bargained retirees. Prior to December 31, 2004, the Company's actuarial calculation of retiree medical costs included the assumption that the caps were in place in accordance with the terms of the collectively bargained-for agreement.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Effective December 31, 2004, based on its past practice of waiving the retiree medical cost caps, the Company began accounting for its retiree medical benefit obligation as if there were no caps. The accounting using this assumption remained in effect through May 2005.

In May 2005, the Company reached an agreement with the union for bargained-for employees as to the terms of a new labor contract. Employees retiring under the new agreement are provided Company-sponsored healthcare through the use of individual Health Reimbursement Accounts (HRAs), which provides for Company contributions of a fixed amount per retiree that the retiree can use to purchase their healthcare from among the various plans offered. The Company agreed to increase the HRA amount annually over the life of the labor agreement. The retiree pays for healthcare premiums and other costs in excess of the HRA amount. Contrary to past practice, no agreement was made to waive the implementation of this cost-sharing feature. Based on this new agreement, effective June 1, 2005, the Company modified its assumptions for the actuarial calculation of retiree medical costs, including assumptions regarding cost sharing by retirees. Postretirement medical and other expense was \$18.3 million for the five month period from January to May 2005 and including

the effect of these assumption changes, \$17.6 million for the seven month period from June to December 2005. The assumption change for cost sharing with retirees is the primary cause for the \$14.4 million increase in postretirement and other benefits expense in 2005 compared to 2004.

The unrecognized prior service cost for the postretirement and other benefit plans of \$80.8 million is primarily due to changes in the Company's substantive commitments with respect to retiree cost-sharing for the Company's medical plans.

At December 31, 2005, the Company had unrecognized net losses of \$79.3 million for the pension plans and \$79.7 million for the postretirement and other benefits plan. The unrecognized net losses have been primarily generated by changes in previous years related to discount rates, asset return differences and actual health care costs. Because gains and losses reflect refinements in estimates as well as real changes in economic values and because some gains in one period may be offset by losses in another or vice versa, the Company is not required to recognize these gains and losses in the period that they occur. Instead, if the gains and losses exceed a 10% corridor defined in the accounting literature, the Company amortizes the excess over the average remaining service period of active employees expected to receive benefits under the plan.

Changes in actual asset returns experience and discount rate assumptions can impact the Company's operating results, financial position and cash flows. Actual asset returns experience results in an increase or decrease in the asset base and this effect, in conjunction with a decrease in the pension discount rate, may result in a plan's assets being less than a plan's accumulated benefit obligation (ABO). The ABO is the present value of benefits earned to date and is based on past compensation levels. The Company is required to show in its consolidated balance sheet a net liability that is at least equal to the ABO less the market value of plan assets. This liability is referred to as an additional minimum pension liability (AML). An AML, which is recorded and updated on December 31 each year, is reflected as a long-term pension liability with the offset recorded as an intangible asset, to the extent the Company has unrecognized prior service costs, with the remainder recorded in accumulated other comprehensive income (loss) in the equity section of the Consolidated Balance Sheet, net of tax. An additional minimum pension liability adjustment was required in 2005 for the three pension plans as the accumulated benefit obligation exceeded the fair value of pension plan assets for each of those plans as of the measurement date. The Company's AML (before the effect of income taxes) was \$103.8 million and \$24.2 million at December 31, 2005 and 2004, respectively.

Regulatory Matters and Competitive Trends

Federal The Telecommunications Act of 1996 was enacted with the goal of establishing a pro-competitive, deregulatory framework to promote competition and investment in advanced telecommunications facilities and services to all Americans. Since 1996, federal regulators have considered a multitude of proceedings ostensibly aimed at fulfilling the goals of the Act and this process is continuing through numerous proceedings currently before the Federal Communications Commission (FCC) and the federal courts. Although the Act called for a deregulatory framework, the FCC's approach has been to maintain significant regulatory restraints on the traditional incumbent local exchange carriers while opening up opportunities for new competitive entrants and services with minimal regulation such as cable modem broadband providers and Voice over Internet Protocol (VoIP) providers. While Cincinnati Bell has expanded beyond its incumbent local exchange operations by offering wireless, long distance, broadband service, Internet access and out-of-territory competitive local exchange services, the majority of its revenue is still derived from its traditional local exchange services. The financial impact of the various federal proceedings will depend on many factors including the extent of competition in our market and the timing and outcome of the FCC's decisions and any appeals from those decisions.

Inter-carrier Compensation

Current rules specify different means of compensating carriers for the use of their networks depending on the type of traffic and technology used by the carriers. The FCC has opened a proceeding to consider various plans that have been proposed for revising the disparate inter-carrier

Edgar Filing: CINCINNATI BELL INC - Form 10-K

compensation system into a unified regime that treats all traffic in a uniform manner. The outcome of this proceeding could have significant impacts on all carriers and will probably be phased-in over a five to ten year period. This proceeding impacts the switched access and end-user components of CBT's revenue.

Reciprocal Compensation

Although the topic of reciprocal compensation will ultimately be addressed within the broader intercarrier compensation proceeding mentioned above, the FCC adopted an order which in the short-term directly impacted the rules for the termination of ISP-bound dial-up traffic. The previous rules capped the total number of minutes that could be compensated (growth cap) and limited compensation to markets in which the carriers previously exchanged traffic (new markets rule). The FCC's new order eliminated the growth cap and the new markets rule. This decision could increase the amount that CBT must pay to CLECs with which it exchanges such traffic. However, several carriers have sought reconsideration of the decision by the FCC and other carriers have filed appeals with the federal court.

VoIP

During 2004 the FCC declared that VoIP services are interstate services and purported to preempt state regulation. In addition, the FCC has considered several petitions asking it to rule on whether and under what circumstances voice services utilizing Internet Protocol (IP) are subject to access charges. It has ruled that peer-to-peer Internet voice services that do not use the public switched telephone network (PSTN) are not subject to access charges. Separately, it has ruled that services that originate and terminate on the PSTN but employ IP in the middle are subject to access charges. The FCC is still considering other VoIP petitions, including one that seeks to exempt from access charges calls that originate using VoIP, but terminate on the PSTN. In addition, the FCC is considering a broader rulemaking proceeding to determine the regulatory status of IP-enabled services generally.

Special Access

In early 2005 the FCC opened a proceeding to review the current special access pricing rules. Under the existing rules, CBT's special access services are subject to price cap regulation with no earnings cap. The new proceeding is examining the entire special access pricing structure, including whether or not to reinstate an earnings cap.

Universal Service

The federal Universal Service Fund is currently funded via an assessment on all telecommunications carriers' interstate end-user revenue. The FCC is currently considering alternatives to this method of funding. Some of the alternatives being considered include expanding the base to include intrastate revenue or switching to an assessment based on connections and telephone numbers. Any such alteration could result in a change in the manner in which carriers recover their contributions from end users.

Unbundled Network Elements

In early 2005, the FCC rewrote its unbundled network element rules in response to the federal court's remand of the previous rules. The latest rules have no significant impact on CBT. However, the elimination of unbundled circuit switching, and thus the UNE platform (UNE-P), required CBET to migrate its UNE-P lines to alternative arrangements by March 11, 2006 and/or to negotiate with the underlying ILEC for continued provision of UNE-P, which CBET did pursuant to a commercial agreement. This is not expected to have a significant adverse impact

Edgar Filing: CINCINNATI BELL INC - Form 10-K

on CBET since CBET had already planned to migrate the majority of its customers to its own switching facilities.

Broadband Internet Access

In an order adopted in the third quarter of 2005, the FCC provided wireline carriers the option of offering broadband Internet access as a non-regulated information service (comparable treatment to cable modem Internet access) or as a regulated telecommunications service. Each option has associated costs and benefits that must be weighed in light of a carrier's current mix of existing services and new services the carrier may be contemplating offering in the future.

FCC Inquiry Regarding Safeguards to Protect Customer Proprietary Network Information (CPNI)

By letter dated March 10, 2006, the Enforcement Bureau of the FCC directed the Company to provide information and documents necessary for the Bureau to determine whether the Company has implemented adequate safeguards and/or taken appropriate security measures pursuant to section 222 of the Communications Act of 1934, as amended, to protect CPNI. The Company is cooperating with the inquiry and plans to submit its response within the time period specified in the letter. The Company believes that the FCC has requested similar information from other telecommunications providers.

State Because CBT generates the majority of its revenue from the operation of its public switched telephone network, its financial results follow no particular seasonal pattern. CBT does derive a significant portion of its revenue from pricing plans that are subject to regulatory oversight and approval. In both Ohio and Kentucky, CBT operates under alternative regulation plans in which CBT cannot increase the price of basic local services and is subject to restrictions on its ability to increase the price of other related services. In return, CBT is not subject to an earnings cap or recapture in Ohio, as it would if regulated under a traditional regulatory plan based upon a targeted rate of return. CBT has operated under alternative regulation plans since 1994 during which price increases and enhanced flexibility for a limited number of services have partially offset the effect of fixed pricing for basic local service and reduced pricing for other, primarily wholesale services.

In June 2004, CBT adopted a new alternative regulation plan in Ohio, which although similar to its previous plan, gives CBT the option to remain in the alternative regulation plan indefinitely. Also, CBT's new plan requires the Local segment to operate as a CLEC in service areas outside of CBT's traditional ILEC franchise area. For approximately the past six years, CBT has offered local services, primarily on its own facilities-based network, to Ohio communities contiguous to its ILEC territory. In Dayton, the Local segment has provided its voice services offering using the port-loop-transport combination (UNE-P) as well as the UNE-L regulatory format. On February 4, 2005, the FCC released its unbundled network elements order on remand which will effectively abolish UNE-P as a regulated service and has left each carrier to negotiate new pricing arrangements under commercial agreements. The Local segment has entered into such an agreement; however, it does not expect the profitability of its Dayton local operations to change substantially because the segment had planned to migrate the provisioning of service to UNE-L, which is a more economic service delivery model as the segment has gained customers.

Statutory changes enacted by the Ohio General Assembly in August 2005 give the Public Utilities Commission of Ohio (the PUCO) the authority to provide ILECs with pricing flexibility for basic local rates upon a showing that consumers have sufficient competitive alternatives (House Bill 218). During 2006, the PUCO will adopt rules in accordance with the new law to establish more detailed requirements for Ohio ILECs to apply for this additional pricing flexibility.

Recently Issued Accounting Standards

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 123(R), Share-Based Payment (SFAS 123(R)) which is a revision of SFAS 123 and supersedes APB 25. This statement eliminates the intrinsic value method as an allowed method for valuing stock options granted to employees. Under the intrinsic value method, compensation expense was generally not recognized for the issuance of stock options. SFAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be valued at fair value on the date of grant and to be expensed over the applicable vesting period. In addition, companies must also recognize compensation expense related to any awards that are not fully vested as of the effective date. Commencing January 2006, the Company will recognize compensation expense for new options granted based on their fair value, and compensation expense for the unvested awards will be measured based on the fair value of the awards previously calculated in developing the pro forma disclosures in accordance with the provisions of SFAS 123. The Company does not expect the adoption of this standard to be material in 2006 as all of the previously issued stock options are fully vested as of December 30, 2005, and the Company does not expect to grant a material amount of stock option awards during 2006.

In April 2005, the FASB issued Financial Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations (FIN 47). This interpretation of FASB Statement of Financial Accounting Standards No. 143, Accounting for Asset Retirement Obligations (SFAS 143) refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. Accordingly, an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. FIN 47 did not have a material impact on the Company's results of operations.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

In May 2005, the FASB issued Statement of Financial Accounting Standards No. 154, Accounting Changes and Error Corrections: a replacement of APB Opinion No. 20 and FASB Statement No. 3. This statement requires retrospective application for voluntary changes in accounting principles and changes required

by an accounting pronouncement that does not include specific transition provisions, unless it is impracticable to do so. Retrospective application generally will require the restatement of prior periods' financial statements to reflect the change in accounting principle. The provisions of this statement are to be applied prospectively to accounting changes made in fiscal years beginning after December 15, 2005.

In June 2005, the FASB's Emerging Issues Task Force reached a consensus on Issue No. 05-6, "Determining the Amortization Period for Leasehold Improvements Purchased after Lease Inception or Acquired in a Business Combination" (EITF 05-6). This guidance requires that leasehold improvements acquired either in a business combination or purchased subsequent to the inception of a lease be amortized over the shorter of the useful life of the assets or a term that includes required lease periods and renewals that are reasonably assured at the date of the business combination or purchase. This guidance is applicable only to leasehold improvements that are purchased or acquired in reporting periods beginning after June 29, 2005. Implementation of EITF 05-6 did not have a material impact on the Company's results of operations.

In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155, "Accounting for Certain Hybrid Financial Instruments: an amendment of FASB Statements No. 133 and 140." The objective of the Statement is to simplify accounting for certain hybrid financial instruments, eliminate interim guidance in Statement 133 Implementation Issue No. D1 "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets," and eliminate a restriction on the passive derivative instruments that a qualifying special-purpose entity may hold. This Statement is effective for all financial instruments acquired or issued after the beginning of the entity's first fiscal year that begins after September 15, 2006. The Company has not yet assessed the effect of this Statement on the Company's financial statements.

Private Securities Litigation Reform Act of 1995 Safe Harbor Cautionary Statement

This Form 10-K contains forward-looking statements, as defined in federal securities laws including the Private Securities Litigation Reform Act of 1995, which are based on Cincinnati Bell Inc.'s current expectations, estimates and projections. Statements that are not historical facts, including statements about the beliefs, expectations and future plans and strategies of the Company, are forward-looking statements. These include any statements regarding:

future revenue, operating income, profit percentages, income tax refunds, realization of deferred tax assets, earnings per share or other results of operations;

the continuation of historical trends;

the sufficiency of cash balances and cash generated from operating and financing activities for future liquidity and capital resource needs;

the effect of legal and regulatory developments; and

the economy in general or the future of the communications services industries.

Actual results may differ materially from those expressed or implied in forward-looking statements. The following important factors could cause or contribute to actual results being materially different from those described or implied by such forward-looking statements include, but are not limited to:

Edgar Filing: CINCINNATI BELL INC - Form 10-K

changing market conditions and growth rates within the telecommunications industry or generally within the overall economy;

world and national events that may affect the Company's ability to provide services or the market for telecommunication services;

changes in competition in markets in which the Company operates;

pressures on the pricing of the Company's products and services;

advances in telecommunications technology;

the ability to generate sufficient cash flow to fund the Company's business plan and maintain its networks;

the ability to refinance the Company's indebtedness when required on commercially reasonable terms;

changes in the telecommunications regulatory environment;

changes in the demand for the services and products of the Company;

the demand for particular products and services within the overall mix of products sold, as the Company's products and services have varying profit margins;

the Company's ability to introduce new service and product offerings in a timely and cost effective basis;

the Company's ability to attract and retain highly qualified employees;

the Company's ability to access capital markets and the successful execution of restructuring initiatives; and

the outcome of any of the pending class and derivative shareholder lawsuits.

You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. The Company does not undertake any obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk Management The Company's objective in managing its exposure to interest rate changes is to limit the impact of interest rate changes on earnings, cash flows, and the fair market value of certain assets and liabilities, while maintaining low overall borrowing costs.

The Company is exposed to the impact of interest rate fluctuations. To manage its exposure to interest rate fluctuations over time, the Company uses both fixed and variable rate debt and utilizes derivative financial instruments. Because the Company is exposed to the impact of interest rate fluctuations, primarily in the form of variable rate borrowings from its credit facility and changes in current rates compared to that of its fixed rate debt, the Company sometimes employs derivative financial instruments to manage its exposure to these fluctuations and its total interest expense over time. The Company does not hold or issue derivative financial instruments for trading purposes or enter into transactions for speculative purposes.

Interest rate swap agreements, a particular type of derivative financial instrument, involve the exchange of fixed and variable rate interest payments between the Company and its counterparties in the transactions and do not represent an actual exchange of the notional amounts between the parties. Because the notional amounts are not exchanged, the notional amounts of these agreements are not indicative of the Company's exposure resulting from these derivatives. The amounts to be exchanged between the parties are primarily the net result of the fixed and variable rate percentages to be charged on the swap's notional amount.

In June 2004, the Company entered into a series of fixed-to-variable interest rate swaps with total notional amounts of \$100 million that qualify for fair value hedge accounting. In February and March 2005, in conjunction with the Company's 2005 refinancing plan, an additional \$350

Edgar Filing: CINCINNATI BELL INC - Form 10-K

million in fixed-to-variable interest rate swaps were executed which were also designated as fair value hedges. Fair value hedges offset changes in the fair value of underlying assets and liabilities. The Company's interest rate swaps at December 31, 2005 and 2004 are recorded at their fair value, and the carrying values of the underlying liabilities hedged (the 7% Notes and 8³/₈% Notes) are adjusted by the same corresponding value in accordance with the shortcut method of Statement of Financial Accounting Standard No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133). The fair value of the interest rate swap contracts was a liability of \$10.2 million at December 31, 2005. A hypothetical 10% change in market interest rates at December 31, 2005 would change the fair value of the interest rate swap contracts by approximately \$12 million.

The following table sets forth the face amounts, maturity dates and average interest rates for the fixed- and variable-rate debt held by the Company at December 31, 2005 (excluding capital leases and net unamortized premiums); the debt amounts are not effected for the hedging impact of the interest rate swaps:

(dollars in millions)	2006	2007	2008	2009	2010	Thereafter	Total	Fair Value
Fixed-rate debt:	\$ 0.3	\$ 0.3				\$ 1,670.0	\$ 1,670.6	\$ 1,655.1
Average interest rate on fixed-rate debt	4.30%	4.30%				7.60%	7.60%	
Variable-rate debt:	\$ 6.1	\$ 4.0	\$ 4.0	\$ 4.0	\$ 4.0	\$ 379.0	\$ 401.1	\$ 404.1
Average interest rate on variable-rate debt	7.90%	5.60%	5.60%	5.60%	5.60%	5.60%	5.60%	

At December 31, 2004, the carrying value and fair value of fixed-rate debt was \$1,720.7 million and \$1,799.8 million, respectively, and the carrying value and fair value of variable-rate debt was \$438.8 million and \$441.9 million, respectively. Including the impact of the interest rate swap agreements, approximately 60% and 75% of the Company's indebtedness was based on fixed interest rates at December 31, 2005 and 2004, respectively.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Cincinnati Bell Inc. and its subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control system is designed to produce reliable financial statements in conformity with accounting principles generally accepted in the United States.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2005. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on this assessment, management has concluded that, as of December 31, 2005, the Company's internal control over financial reporting is effective based on those criteria.

The Company's independent registered public accounting firm, Deloitte & Touche LLP, has issued an audit report on management's assessment of the Company's internal control over financial reporting. This report is included on page 55.

Chief Financial Officer

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareowners of Cincinnati Bell Inc.

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting that Cincinnati Bell Inc. and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2005, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2005 of the Company and our report dated March 14, 2006 expressed an unqualified opinion on those financial statements and financial statement schedule.

/s/ Deloitte & Touche LLP

Cincinnati, Ohio

March 14, 2006

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareowners of Cincinnati Bell Inc.

In our opinion, the accompanying consolidated balance sheet as of December 31, 2004, and the related statements of operations, shareowners equity (deficit) and comprehensive income (loss) and cash flows for the years ended December 31, 2004 and 2003, present fairly, in all material respects, the financial position of Cincinnati Bell Inc. and its subsidiaries at December 31, 2004, and the results of their operations and their cash flows for the years ended December 31, 2004 and 2003 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the Index at Item 15 presents fairly, in all material respects, the information set forth therein as of and for the years ended December 31, 2004 and 2003. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1 to the consolidated financial statements, on January 1, 2003, the Company changed its method of accounting for asset retirement obligations in connection with the adoption of Statement of Financial Accounting Standards No. 143.

/s/ PricewaterhouseCoopers LLP

Cincinnati, Ohio

March 14, 2005, except for Note 19, which is as of July 5, 2005

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareowners of Cincinnati Bell Inc.

We have audited the accompanying consolidated balance sheet of Cincinnati Bell Inc. and subsidiaries (the Company) as of December 31, 2005, and the related consolidated statements of operations, shareowners' equity (deficit) and comprehensive income (loss), and cash flows for the year ended December 31, 2005. Our audit also included the financial statement schedule (Schedule II) as of and for the year ended December 31, 2005 listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Cincinnati Bell Inc. and subsidiaries as of December 31, 2005, and the results of their operations and their cash flows for the year ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein as of and for the year ended December 31, 2005.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 14, 2006 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

The accompanying notes are an integral part of the consolidated financial statements.

Notes to Consolidated Financial Statements

1. Description of Business and Significant Accounting Policies

Description of Business Cincinnati Bell Inc. (the Company) provides diversified telecommunications services through businesses in five segments: Local, Wireless, Hardware and Managed Services, Other and Broadband. In 2003, the Company sold substantially all of the assets of the broadband business, which is reported in the Broadband segment. Refer to Note 16 for a detailed discussion of the sale.

The Company generates substantially all of its revenue by serving customers in the Greater Cincinnati and Dayton, Ohio areas. An economic downturn or natural disaster occurring in this limited operating territory could have a disproportionate effect on the Company's business, financial condition, results of operations and cash flows compared to similar companies of a national scope and similar companies operating in different geographic areas.

Basis of Presentation The consolidated financial statements of the Company have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) in accordance with accounting principles generally accepted in the United States of America. Certain prior year amounts have been reclassified to conform to the current year classifications.

Basis of Consolidation The consolidated financial statements include the consolidated accounts of Cincinnati Bell Inc. and its majority-owned subsidiaries over which it exercises control. Intercompany accounts and transactions have been eliminated in the consolidated financial statements.

Use of Estimates Preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported. Actual results could differ from those estimates.

Cash Equivalents Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less.

Accounts Receivables Accounts receivables consist principally of trade receivables from customers and are generally unsecured and due within 30 days. Unbilled receivables arise from services rendered but not yet billed. As of December 31, 2005 and 2004, unbilled receivables totaled \$23.1 million and \$25.4 million, respectively. Expected credit losses related to trade receivables are recorded as an allowance for uncollectible accounts in the Consolidated Balance Sheets. The Company establishes the allowances for uncollectible accounts using percentages of aged accounts receivable balances to reflect the historical average of credit losses as well as specific provisions for certain identifiable, potentially uncollectible balances. When internal collection efforts on accounts have been exhausted, the accounts are written off by reducing the allowance for uncollectible accounts.

Materials and Supplies Materials and supplies consist of wireless handsets, wireline network components, various finished goods to be sold to customers, telephony inventory including maintenance inventory and inventory in transit, and other materials and supplies, which are carried at the lower of average cost or market.

Property, Plant and Equipment Property, plant, and equipment is stated at original cost and presented net of accumulated depreciation and impairment charges. The Company's provision for depreciation of telephone plant is determined on a straight-line basis using the whole life and remaining life methods. Provision for depreciation of other property, other than leasehold improvements, is based on the straight-line method over the estimated economic useful life. Depreciation of leasehold improvements is based on a straight-line method over the lesser of the economic useful life or term of the lease, including option renewal periods if renewal of the lease is reasonably assured. Repairs and maintenance expense items are charged to expense as incurred.

The Company adopted Statement of Financial Accounting Standards No. 143, Accounting for Asset Retirement Obligations (SFAS 143) as of January 1, 2003. This statement requires entities to record the fair value of a legal liability for an asset retirement obligation in the period it is incurred. The removal cost is initially capitalized and depreciated over the remaining life of the underlying asset. The associated liability is accreted to its present value each period. Once the obligation is ultimately settled, any difference between the final cost and the recorded liability is recognized as income or loss on disposition.

Although the Company determined that the Local segment has no legal obligation to remove assets, the Company had historically included in the Company group depreciation rates estimated net removal cost associated with these outside plant assets in which estimated cost of removal exceeds gross salvage. These costs had been reflected in the calculation of depreciation expense, which results in greater periodic depreciation expense and the recognition in accumulated depreciation of future removal costs for existing assets. When the assets were actually retired and removal costs were expended, the net removal costs were recorded as a reduction to accumulated depreciation. In connection with the adoption of this standard, the Company removed existing accrued net costs of removal in excess of the related estimated salvage from its accumulated depreciation of those accounts. The adjustment was reflected as a non-recurring increase to net income as a cumulative effect of a change in accounting principle as of January 1, 2003 of \$86.3 million, net of tax. The Wireless segment recorded \$0.4 million in expense, resulting in a net cumulative change in accounting principle of \$85.9 million, net of tax. Additionally, the Company recorded an initial liability for removal costs at fair value of approximately \$2.6 million and an asset of approximately \$2.3 million in 2003 related to the Wireless and Other segments. During the fourth quarter of 2003, the Wireless segment recorded an additional retirement obligation of \$1.9 million due to a change in estimate.

Goodwill and Indefinite-Lived Intangible Assets Goodwill represents the excess of the purchase price consideration over the fair value of assets acquired recorded in connection with purchase business combinations. Indefinite-lived intangible assets consist of Federal Communications Commission (FCC) licenses for spectrum of the Wireless segment. The Company may renew the wireless licenses in a routine manner every ten years for a nominal fee, provided the Company continues to meet the service and geographic coverage provisions required by the FCC.

Pursuant to Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS 142), goodwill and intangible assets not subject to amortization are tested for impairment annually, or when events or changes in circumstances indicate that the asset might be impaired. The impairment test for goodwill involves comparing the estimated fair value of the reporting unit based on discounted future cash flows to the unit's carrying value. The impairment test for indefinite-lived intangibles consists of comparing the estimated fair value of the intangible asset based on external valuation information to its carrying value. For each intangible tested, the carrying values were lower than the estimated fair values, and no impairment charges were recorded in 2005, 2004, and 2003.

Impairment of Long-Lived Assets, Other than Goodwill and Indefinite-Lived Intangibles The Company reviews the carrying value of long-lived assets, other than goodwill and indefinite-lived assets discussed above, when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. In assessing impairments, the Company follows the provisions of Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144). An impairment loss is recognized when the estimated future undiscounted cash flows expected to result from the use of an asset (or group of assets) and its eventual disposition are less than the carrying amount. An impairment loss is measured as the amount by which the asset's carrying value exceeds its fair value.

The Company retired certain Time Division Multiple Access (TDMA) network assets resulting in a charge of \$23.7 million in the first quarter of 2005. Remaining TDMA assets were determined to be impaired in the fourth quarter in 2005, resulting in a charge of \$18.6 million. These charges were included in *Asset impairments and other charges* in the Consolidated Statements of Operations (refer to Note 14 for details of *Asset impairments and other charges*). The Company calculated the fair value of the assets based on the appraised amount at which the assets could be sold in a current transaction between willing parties (refer to Note 4). The Company recorded a \$3.6 million asset impairment in 2003 to write-down the value of its public payphone assets to fair value. The Company calculated the fair value of the assets utilizing a discounted cash flow analysis based on the best estimate of projected cash flows from the underlying assets.

Investments The Company has certain investments that do not have readily determinable fair market values. These investments are recorded at cost as the Company owns less than 20% and cannot exercise significant influence over the investee operations. The carrying value of these investments was approximately \$4.6 million and \$3.4 million as of December 31, 2005 and 2004, respectively. Investments are reviewed annually for impairment. If the carrying value of the investment exceeds its estimated fair value and the decline in value is determined to be other-than-temporary, an impairment loss is recognized for the difference. The

Company estimates fair value using external information and discounted cash flow analyses. In 2003, the Company received \$3.8 million from the sale of an investment. During 2004, the Company received a return on capital on an investment and recorded \$3.2 million in the Consolidated Statements of Operations under the heading Other income, net.

Revenue Recognition The Company recognizes revenue as services are provided. Local and special access fees, which are billed monthly, and prepaid wireless receipts are collected in advance, but the revenue is not recognized until the service is provided. Postpaid wireless, long distance, switched access, data center management services, reciprocal compensation, and data and Internet product services are billed monthly in arrears. The Company bills service revenue in regular monthly cycles, which are dispersed throughout the days of the month. As the day of each billing cycle rarely coincides with the end of the Company's reporting period for usage-based services such as postpaid wireless, long distance, and switched access, the Company must estimate service revenues earned but not yet billed. The Company bases its estimates upon historical usage and adjusts these estimates during the period in which the Company can determine actual usage, typically in the following reporting period.

Cincinnati Bell Telephone Company LLC (CBT) advanced billings for customer connection and activation are deferred and amortized into revenue on a straight-line basis over the average customer life. The associated connection and activation costs, to the extent of the upfront fees, are also deferred and amortized on a straight-line basis over the average customer life. Subsequent to July 1, 2003 and in accordance with the Emerging Issues Task Force Issue 00-21, Accounting for Revenue Arrangements with Multiple Deliverables (EITF 00-21), Cincinnati Bell Wireless LLC (CBW) ceased deferral of revenue and cost related to customer connections and activations. As CBW's activation costs exceed activation revenues, both the activation revenue and associated costs are recorded upon the sale of the wireless handset. This change did not have a material impact on the Company's financial position, results of operations, or cash flows.

With respect to arrangements with multiple deliverables, the Company follows the guidance in EITF 00-21 to determine whether more than one unit of accounting exists in an arrangement. To the extent that the deliverables are separable into multiple units of accounting, total consideration is allocated to the individual units of accounting based on their relative fair value, determined by the price of each deliverable when it is regularly sold on a stand-alone basis. Revenue is recognized for each unit of accounting as delivered or as service is performed depending on the nature of the deliverable comprising the unit of accounting.

The Company recognizes equipment revenue generally upon the performance of contractual obligations, such as shipment, delivery, installation or customer acceptance. The Company is a reseller of IT and telephony equipment and considers the criteria of EITF 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent, when recording revenue, such as title transfer, risk of product loss, and collection risk. Based on this guidance, these equipment revenues and associated costs have generally been recorded on a gross basis, rather than recording the revenues net of the associated costs.

Prior to the sale of the broadband assets in 2003, broadband transport services were billed monthly, in advance, while revenue was recognized as the services were provided. In addition, the Company had entered into indefeasible right-of-use (IRU) agreements, which represent the lease of network capacity or dark fiber, recording unearned revenue at the earlier of the acceptance of the applicable portion of the network by the customer or the receipt of cash. The buyer of IRU services typically paid cash or other consideration upon execution of the contract, and the associated IRU revenue was recognized over the life of the agreement as services were provided, beginning on the date of customer acceptance. In the event the buyer of an IRU terminated a contract prior to the contract expiration and released the Company from the obligation to provide future services, the remaining unamortized unearned revenue was recognized in the period in which the contract was terminated. The Company generated \$59.4 million in non-cash IRU revenue in 2003. Concurrent with the broadband asset sale in 2003, substantially all of the remaining IRU obligations were assumed by the buyer of the broadband assets.

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Pricing of local services is generally subject to oversight by both state and federal regulatory commissions. Such regulation also covers services, competition and other public policy issues. Various regulatory rulings and interpretations could result in adjustments to revenue in future periods. The Company monitors these proceedings closely and adjusts revenue accordingly.

Advertising Costs related to advertising are expensed as incurred and amounted to \$26 million, \$25 million, and \$21 million in 2005, 2004, and 2003, respectively.

Legal Expenses Legal costs incurred in connection with loss contingencies are expensed as incurred.

Income and Operating Taxes The income tax provision consists of an amount for taxes currently payable and an amount for tax consequences deferred to future periods. Deferred investment tax credits are being amortized as a reduction of the provision for income taxes over the estimated useful lives of the related property, plant and equipment. At December 31, 2005, the Company has \$680.6 million of deferred tax assets. The ultimate realization of the deferred income tax assets depends upon the Company's ability to generate future taxable income during the periods in which basis differences and other deductions become deductible and prior to the expiration of the net operating loss carryforwards. The Company's previous tax filings are subject to normal reviews by regulatory agencies until the related statute of limitations expires. The Company believes adequate provision has been made for all open tax years.

The Company incurs certain operating taxes that are reported as expenses in operating income, such as property, sales, use, and gross receipts taxes. These taxes are not included in income tax expense because the amounts to be paid are not dependent on the level of income generated by the Company. The Company also records expense against operating income for the establishment of liabilities related to certain operating tax audit exposures. These liabilities are established based on the Company's assessment of the probability of payment. Upon resolution of audit, any remaining liability not paid is released and increases operating income.

Stock-Based Compensation The Company accounts for stock-based compensation plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25), and related interpretations. Compensation cost is measured under the intrinsic value method. Expense for option grants is not reflected in net income (loss), as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant. Stock-based compensation expense related to restricted stock grants before related tax benefits totaled \$1.8 million in 2005, and \$0.3 million in 2004 and 2003. If the Company had applied the fair value recognition provisions of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation (SFAS 123), the compensation expense, net of tax, recognized related to options and restricted stock would have totaled \$7.6 million, \$8.5 million, and \$35.6 million in 2005, 2004, and 2003, respectively.

The following table illustrates the effect on net income (loss) and basic and diluted earnings (loss) per share if the Company had applied the fair value recognition provisions of SFAS 123, to stock-based employee compensation in all periods presented:

	Year Ended December 31,		
	2005	2004	2003
(dollars in millions except per share amounts)			
Net income (loss) as reported	\$ (64.5)	\$ 64.2	\$ 1,331.9
Add: Stock-based compensation expense included in reported net income, net of related tax benefits	1.1	0.2	0.2
Deduct: Stock-based employee compensation expense determined under fair value method, net of related tax benefits	(7.6)	(8.5)	(35.6)
Pro forma net income (loss)	\$ (71.0)	\$ 55.9	\$ 1,296.5
Basic earnings (loss) per share: As reported	\$ (0.30)	\$ 0.22	\$ 5.82

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Diluted earnings (loss) per share:	Pro forma	(0.33)	0.19	5.67
	As reported	(0.30)	0.21	5.36
	Pro forma	(0.33)	0.18	5.24

65

The weighted average fair values at the date of grant for the Company options granted to employees were \$1.37, \$1.09, and \$1.49 during 2005, 2004, and 2003, respectively. Such amounts were estimated using the Black-Scholes option-pricing model with the following weighted average assumptions:

	2005	2004	2003
Expected volatility	32.0%	35.0%	35.0%
Risk-free interest rate	4.3%	2.9%	2.2%
Expected holding period years	4	3	3
Expected dividends	0.0%	0.0%	0.0%

Derivative Financial Instruments The Company is exposed to the impact of interest rate fluctuations on its indebtedness. The Company periodically employs derivative financial instruments to manage its balance of fixed rate and variable rate indebtedness. The Company does not hold or issue derivative financial instruments for trading or speculative purposes. Interest rate swap agreements, a particular type of derivative financial instrument, involve the exchange of fixed and variable rate interest payments and do not represent an actual exchange of the notional amounts between the parties. The Company has entered into a series of interest rate swaps with total notional amounts of \$450 million that qualify as fair value hedges. Fair value hedges offset changes in the fair value of underlying assets and liabilities. The interest rate swaps are recorded at their fair values and the carrying value of the underlying hedged indebtedness is adjusted by the same corresponding value in accordance with the shortcut method of Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities. The shortcut method is appropriate because the terms of the interest rate swap match the underlying hedged item, and, therefore, there is no ineffectiveness in the hedge.

Recently Issued Accounting Standards In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 123(R), Share-Based Payment (SFAS 123(R)), which is a revision of SFAS 123 and supersedes APB 25. This statement eliminates the intrinsic value method as an allowed method for valuing stock options granted to employees. Under the intrinsic value method, compensation expense was generally not recognized for the issuance of stock options. SFAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be valued at fair value on the date of grant and to be expensed over the applicable vesting period. In addition, companies must also recognize compensation expense related to any awards that are not fully vested as of the effective date. Commencing January 2006, the Company will recognize compensation expense for new options granted based on their fair value, and compensation expense for the unvested awards will be measured based on the fair value of the awards previously calculated in developing the pro forma disclosures in accordance with the provisions of SFAS 123. The Company does not expect the adoption of this standard to be material in 2006 as all of the previously issued stock options are fully vested as of December 30, 2005 and the Company does not expect to grant a material amount of stock option awards during 2006.

In April 2005, the FASB issued Financial Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations (FIN 47). This interpretation of FASB Statement of Financial Accounting Standards No. 143, Accounting for Asset Retirement Obligations (SFAS 143) refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. Accordingly, an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. FIN 47 did not have a material impact on the Company's results of operations.

In May 2005, the FASB issued Statement of Financial Accounting Standards No. 154, Accounting Changes and Error Corrections: a replacement of APB Opinion No. 20 and FASB Statement No. 3. This statement requires retrospective application for voluntary changes in accounting principles and changes required by an accounting pronouncement that does not include specific transition provisions, unless it is impracticable to do so. Retrospective application generally will require the restatement of prior periods' financial statements to reflect the change in accounting principle. The provisions of this statement are to be applied prospectively to accounting changes made in fiscal years beginning after December 15, 2005.

In June 2005, the FASB's Emerging Issues Task Force reached a consensus on Issue No. 05-6, "Determining the Amortization Period for Leasehold Improvements Purchased after Lease Inception or Acquired in a Business Combination" (EITF 05-6). This guidance requires that leasehold improvements acquired either in a business combination or purchased subsequent to the inception of a lease be amortized over the shorter of the useful life of the assets or a term that includes required lease periods and renewals that are reasonably assured at the date of the business combination or purchase. This guidance is applicable only to leasehold improvements that are purchased or acquired in reporting periods beginning after June 29, 2005. Implementation of EITF 05-6 did not have a material impact on the Company's results of operations.

In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155, "Accounting for Certain Hybrid Financial Instruments: an amendment of FASB Statements No. 133 and 140." The objective of the Statement is to simplify accounting for certain hybrid financial instruments, eliminate interim guidance in Statement 133 Implementation Issue No. D1 "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets," and eliminate a restriction on the passive derivative instruments that a qualifying special-purpose entity may hold. This Statement is effective for all financial instruments acquired or issued after the beginning of the entity's first fiscal year that begins after September 15, 2006. The Company has not yet assessed the effect of this Statement on the Company's financial statements.

2. Earnings (Loss) Per Common Share

Basic earnings (loss) per common share (EPS) is based upon the weighted average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that would occur if common stock equivalents were exercised, but only to the extent that they are considered dilutive to the Company's diluted EPS. The following table is a reconciliation of the numerators and denominators of the basic and diluted EPS computations for income (loss) before cumulative effect of change in accounting principle for the following periods:

(dollars in millions, except per share amounts)	Year Ended December 31,		
	2005	2004	2003
Numerator:			
Income (loss) before cumulative effect of change in accounting principle	\$ (64.5)	\$ 64.2	\$ 1,246.0
Preferred stock dividends	(10.4)	(10.4)	(10.4)
Numerator for basic EPS	(74.9)	53.8	1,235.6
Preferred stock dividends			10.4
Interest expense, net of tax convertible subordinated notes			24.8
Numerator for diluted EPS	\$ (74.9)	\$ 53.8	\$ 1,270.8
Denominator:			
Denominator for basic EPS weighted average common shares outstanding	245.9	245.1	226.9
Convertible preferred stock			4.5
Convertible subordinated notes			14.9
Stock options and warrants		5.3	6.9
Stock-based compensation arrangements		0.1	0.1
Denominator for diluted EPS	245.9	250.5	253.3
EPS Income (loss) before cumulative effect of change in accounting principle:			
Basic	\$ (0.30)	\$ 0.22	\$ 5.44

Edgar Filing: CINCINNATI BELL INC - Form 10-K

Diluted	\$ (0.30)	\$ 0.21	\$ 5.02
---------	-----------	---------	---------

The assumed conversions to common stock of 22.8 million stock options, 0.2 million shares of restricted stock, 17.5 million warrants, and the 3.1 million shares of 6³/₄% Cumulative Convertible Preferred Stock (each preferred share convertible into 1.44 common shares) are excluded from the 2005 diluted EPS computations as these items, on an individual basis, have an anti-dilutive effect on diluted EPS.

3. Restructuring Charges

2005 Restructuring

In late 2005, the Company incurred employee separation expense of \$1.6 million related to the outsourcing of its directory assistance services. Substantially all of the expense is associated with the Local segment and will be paid in 2006. This restructuring reserve balance is included in Other current liabilities in the Consolidated Balance Sheet at December 31, 2005.

2004 Restructuring

In December 2004, the Company initiated a restructuring intended to improve operating efficiencies and reduce operating expenses. This restructuring includes a workforce reduction that will be implemented in stages, which began in the fourth quarter 2004 and will continue in stages through December 31, 2006. The 2004 restructuring charge of \$11.2 million was comprised of \$10.5 million in special termination benefits and \$0.7 million in employee separation benefits. Refer to Note 8 for further discussion on special termination benefits in 2004. The Local, Wireless and Hardware and Managed Services segments incurred charges of \$10.5 million, \$0.1 million, and \$0.6 million, respectively. The Company has pa
