For the nine-month periods ended March 31, 2006 and 2005

**Notes to the Financial Statements**

**NOTE 1: ACCOUNTING STANDARDS**

Below is a description of the most relevant accounting standards used by the Company in the preparation of these Financial Statements, which have been applied on a consistent basis from the previous period.

a. Presentation standards

These financial statements are stated in Argentine pesos, and have been prepared in accordance with the disclosure and valuation accounting standards contained in the Technical Resolutions issued by the F.A.C.P.C.E., as approved, with resolutions issued by the Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (C.P.C.E.C.A.B.A.) and the C.N.V.

b. New Accounting Standards

The C.P.C.E.C.A.B.A. enacted the following technical resolutions: No. 16: Conceptual regime for professional accounting regulations ; No. 17: Professional accounting regulations: development of matters of general application , No. 18: Professional accounting regulations: development of some matters of particular application and No. 19 Modifications to technical resolutions No. 6, 8, 9, 11 and 14 and No. 20 Derivative instruments and hedging transactions , through Resolutions C 238/01, C 243/01, C 261/01, C 262/01 and C 187/02, respectively; establishing that such technical resolutions and the modifications incorporated, will be in force for periods initiated as from July 1, 2002 (other than Technical Resolution No. 20, which shall become effective for fiscal years beginning as from January 1, 2003).

The C.N.V., through Resolution No. 434/03 has adopted such technical resolutions with some exceptions and modifications, which have been in force for fiscal years initiated as from January 1, 2003.

The last changes basically result from the registration of income tax under the deferred tax method, as concerns agreements involving derivative instruments at their fair value and the valuation of receivables and payables with no stated rate at their discounted value.

As at February 19, 2003, the C.P.C.E.C.A.B.A., enacted Technical Resolution No. 21 Proportional value- consolidation of financial statements-information to provide on related parties through Resolution M.D. No. 5/2003.

The above mentioned Technical Resolution and the amendments introduced became effective for fiscal years ended as from April 1, 2003. Furthermore, The C.N.V. has adopted such Technical Resolution, through Resolution No. 459/04 introducing some modifications, which will be in force for fiscal years started as from April 1, 2004, consequently the Company has considered their application.

**NOTE 1:** (Continued)

On January 12, 2005, the C.P.C.E.C.A.B.A. approved Technical Resolution No. 22, Professional accounting rules: agricultural business under its Resolution M.D. No. 01/2005 effective for fiscal years starting as from July 1, 2005. The C.N.V. adopted such Technical Resolution through its Resolution No. 485 of December 29, 2005, effective for complete or interim periods of fiscal years commencing as from January 1, 2006. In accordance with the Company's evaluation, the application of such resolution will not produce an impact on respect of the valuation of biological assets and it represents an improvement in the exposure. To such extent, production of meat is shown in these financial statements in Schedule F.

On August 10, 2005, the Professional Council in Economic Sciences of the City of Buenos Aires (C.P.C.E.C.A.B.A.) through its Resolution CD 93/2005 approved the consolidation of the professional accounting principles of its jurisdiction with those issued by the Argentine Federation of Professional Councils in Economic Sciences.

For the purpose of such Resolution, the issuance of reports from Certified Public Accountants on Financial Statements, Audit Standards, Statutory Audit Committee Standards and Professional Accounting Principles which are to be applied on a mandatory basis in the City of Buenos Aires, are contained in:

- a) Technical Resolutions 6, 7, 8, 9, 11, 14, 15, 16, 17, 18, 21 and 22 of the Argentine Federation of Professional Councils in Economic Sciences including the changes therein made by such entity up to April 1, 2005;
- b) Resolution No. 287/03 of the Governing Body of such Federation;
- c) Other interpretations of the accounting and audit standards 1, 2, 3 and 4 of such Federation with the changes therein made by such entity up to April 1, 2005

The above-mentioned standards will become effective for complete or interim periods of fiscal years commencing as from January 1, 2006 their anticipated application being admitted, and will substitute those standards contained in Resolutions CD No. 87/2003 and MD No. 1/2005 of the Professional Council of Economic Sciences of the City of Buenos Aires.

On December 29, 2005, through Resolutions 485 and 487, the National Securities Commission (CNV) adopted with certain changes the standards of the C.P.C.E.C.A.B.A. The standards adopted will become effective for the Company on July 1, 2006 (date of beginning of the next fiscal period). The principal change arising from the consolidation of the accounting standards is related to the treatment given to the adjustment for inflation in the calculation of the deferred tax, which can be taken as a temporary difference, according to the Company's criteria. The adjustment for inflation is currently considered as a permanent difference in the calculation of the deferred tax. The Company has decided to maintain this accounting criteria.

Under the dispositions of Resolution 487 of the National Securities Commission (CNV) and according to the Company decision, informed to the CNV by note of March 31, 2006, of including the quantification in a note to the financial statements, we inform that the amount is \$ 60,070,168 as of closing of these financial statements.

Notes to the Financial Statements (Continued)**

**NOTE 1:** (Continued)

The financial statements for the nine-month period ended as of March 31, 2006 and 2005 have not been audited. The Company management estimates that all necessary adjustments are included to reasonably present the income statements accounts of each year. The nine-month periods income statements accounts as of March 31, 2006 and 2005 do not necessarily reflect the proportion of the Company's income statements accounts for the complete periods.

c. Accounting for inflation

The Company's financial statements have been prepared in accordance with Resolution M.D. 3/02 of the C.P.C.E.C.A.B.A., which has established the application of Technical Resolution No. 6, as amended by Technical Resolution No. 19 of the F.A.C.P.C.E., as from fiscal years or interim periods ended on or after March 31, 2002.

On March 25, 2003, the National Executive Power issued Decree No. 664 establishing that financial statements for fiscal years ended as from that date should be stated in nominal currency.

Therefore, in accordance with Resolution No. 441 issued by the C.N.V. on April 8, 2003, the Company discontinued restatement of its financial statements effective March 1, 2003. This criteria does not comply with Resolution M.D. 041/2003, enacted by the C.P.C.E.C.A.B.A., by means of which the restatement of financial statements as of October 1, 2003 is no longer compulsory. However, as of March 31, 2006, this deviation did not have a material effect on the Company's financial statements.

As a consequence of the above mentioned, the initial balances at the Company's financial statements are presented in constant currency as of February 28, 2003, having considered the accounting measurements restated by the changes in the purchasing power money until interruption of the adjustment and those arising in the period of stability, restated into currency of December 2001. Transactions subsequent to February 28, 2003 have been recorded at their historical values.

The coefficients prepared based on the domestic wholesale price index, published by the Instituto Nacional de Estadísticas y Censos, have been applied for purposes of the abovementioned restatement of comparative information.

d. Comparative Information

For comparison purposes certain, reclassifications have been made as of March 31, 2005.

**NOTE 2: SIGNIFICANT ACCOUNTING POLICIES**

a. Use of estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Estimates are used when accounting for the allowance for conversion of convertible bonds into shares of stock, doubtful accounts, depreciation, impairment of current and non-current assets, income taxes, deferred liabilities and provisions for contingencies, accrual for expenses, donations and assets recoverable value of the current and non-current assets. **Buenos Aires, May 11, 2006** - Cresud S.A.C.I.F. y A. (Nasdaq: CRESY BCBA: CRES), one of the leading agricultural companies in Argentina, announced today its results for the nine-month period of fiscal year 2006, ended March 31, 2006.

**The results for the nine-month period of 2006 showed a net profit of Ps. 23.4 million** compared to the Ps. 62.2 million profit for the same period the previous fiscal year.

The decrease in the net result is mainly due to: (i) a decrease in results from our ownership interests in related companies, (ii) a reduction in results from the sale of previously acquired Convertible Bonds, and (iii) a reduction in results from livestock holdings compared to those for the same period the previous year.

**Consolidated net sales for the period** were Ps. 68.8 million, 38% higher than consolidated net sales for the same period the previous fiscal year, mainly due to increases in the sales of crops and milk for the nine-month period of fiscal year 2006.

**Gross profit** for the nine-month period of fiscal year 2006 was Ps. 18.8 million compared to Ps. 12.4 million gross profit for the same period the previous year.

This rise in gross profit is due to an increase in the sales of crops and milk, in addition to an increase in average prices per ton and per liter, compared to the same period the previous fiscal year.

There was also an increase in the production of milk as a result of the start-up of production activities in the new dairy facilities in our El Tigre farm. The production of milk rose by 122% compared to the same period the previous fiscal year, with a highly positive impact on the margin of the segment.

**Operating results** for the period ended March 31, 2006 were a Ps. 18.7 million profit, compared to the Ps. 20.7 million profit for the same period the previous fiscal year.

**Results from related companies** were a Ps. 11.5 million profit, mainly due to our ownership share in IRSA Inversiones y Representaciones S.A. as of March 31, 2006.

**Summary of operations**

**Crops**

Crop sales totaled Ps. 31.6 million for the period, compared to Ps. 15.0 million crop sales for the previous period. Crops sales amounted to 94,993 tons at an average price per ton of Ps. 333 compared to 45,531 tons sold at an average price of Ps. 330 during the same period the previous fiscal year.

At March 31, 2006, wheat harvests had finished with yields way above expectations. At that date, we harvested 92% of the area sown with sunflower, while corn amounted to 26% and soybean to 19%.

Our crop stock as of the end of the nine-month period totaled 41,729 tons, of which 17,859 correspond to wheat, 7,629 correspond to corn and 8,081 to soybean.

In the period ended March 31, 2006 gross profit in this segment was Ps. 9.1 million compared to a profit of Ps. 3.3 million for the same period the previous fiscal year. Gross profit in this segment rose as a result of the boost in crop sales and an overall increase in the price of crops. In turn, at the close of the period accumulated stocks were favored by an increase in real terms in the average prices of the different crops.

In the current season, our agricultural activities extend over a surface area of 37,022 hectares, 17,004 of which are leased from third parties. The total number of hectares devoted to agricultural activities has risen by 1,174 compared to the previous year, mainly as a result of the acquisition of the El Invierno farm, which added to the number of own hectares in operation, and of the increase in land leased from third parties.

**Beef Cattle**

At March 31, 2006, the Company had a 92,773-head cattle stock, slightly lower than for the same period the previous year, with a total surface area devoted to beef cattle activities of 129,946 hectares.

Beef cattle sales decreased by 7.7% compared to the previous fiscal year, from Ps. 27.1 million at March 31, 2005 to Ps. 25.0 million at March 31, 2006. During the nine-month period of the current fiscal year, sales totaled 10,839 tons, whereas for the same period of fiscal year 2005 the tons sold had amounted to 13,078, i.e., a 17.1% reduction.

Gross profit in the beef cattle segment was Ps. 4.3 million, compared to Ps. 5.0 million for the same period of the previous fiscal year. This drop in the business unit's gross profit is mainly due to the drop in sales, as a result of a reduction in the production of beef cattle.

Beef cattle production was 7,759 tons, showing a 9% decrease compared to the previous fiscal year. This variation was due to a decrease in cattle stock derived from the sale of two farms and the effects of the drought that particularly impacted our farming establishment in the province of Catamarca.

**Cresud Sociedad Anónima, Comercial,**

**Inmobiliaria, Financiera y Agropecuaria**

**Business Highlight (continued)**

During the first three months of 2006, upward trends in the international prices of beef cattle intensified as a result of sustained demand (caused by the increase in the purchasing power of developing economies and higher consumption of red meat to the detriment of white meat) and of limited supply (derived from the restrictions arising from the requirements imposed by the health authorities on the main suppliers). These pressures fed local inflationary expectations, as a result of which the Argentine Government had to take the measures necessary to increase production in the area, such as a ban on exports and restrictions upon the minimum weight of cattle to be slaughtered.

**Milk**

Milk production increased by 122% in the nine-month period, from 4.9 million liters at March 31, 2005, to 10.9 million liters at March 31, 2006.

Gross profit in this segment at March 31, 2006 was Ps. 2.5 million, 121% higher than the profit for the same period of the previous year, as a result of the increase in production due to the start-up in activities at the El Tigre farming establishment and an increase in the average price per liter of milk, which went up from Ps. 0.45 to Ps. 0.54.

The El Tigre dairy farm, equipped with state-of-the-art technology, started to operate on March 1, 2005. This dairy farm can process 2,000 heads and its production capabilities can deliver up to 32,000 liters of milk per day. Forecasts for this business segment estimate yields even higher than those projected for the agricultural segment. The investment required by this project was US\$ 1.0 million.

At present, the Company has another dairy farm in La Juanita, whose feeding system is mainly pasture-based. This feeding system implies lower costs.

The milk business in Argentina has undergone major oscillations in recent decades: there was sustained growth until 1999 and afterwards, as a direct consequence of the economic crisis in 2001, there was a major drop in production. At present, thanks to increasingly attractive prices, the segment has become an interesting alternative again and the quantities of dairy products exported in 2005 have reached record high levels. This change in the trend seems to be strengthening in the first quarter of 2006, during which dairy exports increased by 26% in terms of tons and by 30% in US dollars compared to the same period in 2005.

**Feed Lot**

In the nine-month period ended March 31, 2006, the Company's Feed Lot, a 170-hectare establishment located in the province of San Luis, in which the Company owns a 50% interest through Cactus Argentina S.A., continued to play a key role in our company's cattle beef production which helped strengthen growth in the segment. The number of livestock head produced at Cresud's farming establishment and finished at Cactus pens produced high volumes of beef demanded by export markets. Given the high level of efficiency delivered by the use of feed lots, animals are finished with higher weights at younger ages.

In the nine-month period ended March 31, 2006, Cactus Argentina S.A.'s gross profit was Ps. 1.0 million, i.e. 41% higher than the profit for the same period for the prior fiscal year. The net result for the period was a Ps. 0.3 million profit compared to a Ps. 0.2 million loss for the period ended March 31, 2005. This result was

mainly favored by the quantity of food sold to feed animals for exporting purposes (of higher weight) and to the increased profitability yielded by Cactus Argentina S.A. s own animals. Additionally, the price of corn remained at reasonable values for use as the basic diet for animals.

Feed-lot animals yield consistently standard-end products, therefore buyers obtain high quality, which facilitates trading activities, increases prices and enhances access to the European market.

Prospects for the coming period anticipate an uncertain situation brought about by the measures applied by the Argentine Government as regards recovery in exports. Such scenario leaves beef cattle producers puzzled, and they are likely to adopt a passive attitude as regards beef production. The Argentine beef-cattle plan recently published has good action potential and should it be complied with, there would be a substantial improvement in the beef-cattle business in Argentina.

**Development of marginal lands**

We believe that the potential of the segment lies on the development of marginal land, as has been the case in various countries worldwide. With the help of state-of-the-art technology we can obtain yields similar to, and returns better than, those in the core areas.

During the nine-month period ended March 31, 2006, the development efforts at our Los Pozos farm in the province of Salta contemplated by the second module were completed. Los Pozos is a farming establishment, with a surface area of 20,000 hectares for livestock production purposes and it is currently operational. In addition, during the quarter, the Secretariat of the Environment and Sustainable Development of the Province of Salta approved the development project contemplated by the third module of the farming establishment and consisting in the development of a further 40,000 hectares for livestock purposes.

Additionally, development efforts for agricultural purposes started in the first 5,000 hectares destined to farming activities at Agropecuaria Cervera S.A., located in the Province of Salta. This project, consisting in a total surface area of 35,000 hectares, has been approved by the Secretariat of the Environment and Sustainable Development of the Province of Salta.

At March 31, 2006 Cresud s own land reserves amounted to 258,477 hectares which had been acquired at very low prices. The development of these areas, accompanied by technological breakthroughs will contribute to an appreciation in the value of land which will in turn imply significant gains for the Company.

**Investments in Other Companies**

On December 27, 2005, Cresud and its subsidiary IGSA bought 100% of the shares in Agropecuaria Cervera S.A. (ACER) pursuant to a swap agreement. ACER has, among other assets and rights, the concession of the start-up of production activities in the framework of a comprehensive development project that comprises biological, economic and social aspects over various properties in the Anta department, province of Salta. ACER has been duly authorized to carry out a major agriculture, livestock and forestry project.

In consideration for this swap, Cresud transferred 3.6 million Convertible Bonds which may be converted into ordinary shares, issued by IRSA Inversiones y Representaciones S.A. and paid Ps. 0.96 million, while IGSA paid Ps. 0.1 million and US\$ 0.7 million.

**Results from IRSA Inversiones y Representaciones S.A.**

The result derived from our equity interest in IRSA Inversiones y Representaciones (NYSE: IRS BCBA: IRSA) showed a Ps. 40.9 million profit in the nine-month period compared to a Ps. 78.2 million profit at March 31, 2005.

This decrease in IRSA's net profit is mainly explained by: (i) the financial losses resulting from lower income from financial transactions and the depreciation of the peso against the dollar; and (ii) a decrease in the income generated by related companies.

IRSA is Argentina's leading real estate company with a fully diversified portfolio of properties. IRSA participates in the following business segments:

**Office rental** with more than 97,070 m<sup>2</sup> for lease of premium offices.

This amount has been calculated in accordance with the regulations of the Argentine Central Bank on the basis of temporary amounts as at the time of issuance of IRSA's financial statements at March 31, 2006, Banco Hipotecario S.A. had not yet completed the issuance and approval of its financial statements.

IRSA's total consolidated assets amount to Ps. 2,632.1 million and its net worth amounts to Ps. 1,340.8 million.

The loan mentioned has been secured through a repo transaction with IRSA's Convertible Notes for a total of US\$ 10 million. The proceeds have been fully applied to the subscription of BrasilAgro's shares.

**Perspectives for the coming quarter**

Prospects for the coming quarter are quite encouraging: the prices of commodities continue to be very firm and therefore we expect an increase in our profitability.

The last quarter of the year has the biggest impact on the agricultural industry as it is during this quarter that a major part of the soybean and corn crops are harvested. The conditions of both crops is as of the date of this release within budget, although we estimate a loss ranging from 5% to 10% of the corn crops as a result of the droughts sustained, but which will be offset by increased prices.

As regards the beef cattle market, we expect a stepwise re-opening of exports which will have a positive impact on the business.
