ENTEGRIS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Entegris is a worldwide developer, manufacturer and supplier of materials integrity management solutions to the microelectronics industry in general and to the semiconductor and data storage markets in particular. The condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. Intercompany profits, transactions and balances have been eliminated in consolidation.

In the opinion of the Company, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary to present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position as of September 29, 2007 and December 31, 2006, the results of operations for the three and nine months ended September 29, 2007 and September 30, 2006, and shareholders' equity and comprehensive income, and cash flows for the three and nine months ended September 29, 2007 and September 30, 2006.

The preparation of the condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, particularly receivables, inventories, accrued expenses and income taxes, and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Certain amounts reported in previous years, primarily related to discontinued operations, have been reclassified to conform to the current year's presentation.

The consolidated financial statements and notes are presented as permitted by Form 10-Q and do not contain certain information included in the Company's annual consolidated financial statements and notes. The information included in this Form 10-Q should be read in conjunction with Management's Discussion and Analysis and consolidated financial statements and notes thereto included in the Company's Form 10-K for the year ended December 31, 2006. The results of operations for the three and nine months ended September 29, 2007 are not necessarily indicative of the results to be expected for the full year.

**Table of Contents****2. ACQUISITION**

On August 16, 2007, Entegris acquired the business and certain of the assets of the specialty coatings business of Surmet Corporation, a privately-held company located in Burlington, Mass. This specialty coatings business develops and applies proprietary low temperature high-purity coatings to critical wafer handling components used in ion implant operations as well as to other critical components used in semiconductor manufacturing

The purchase price was \$41.8 million in cash, including transaction costs of \$0.1 million; additional consideration of \$4.0 million may also be due to the seller if certain financial metrics related to calendar 2007 results are met. This acquisition was accounted for under the purchase method of accounting and the results of operations of this specialty coatings business are included in our consolidated and combined financial statements since August 16, 2007. Pro forma results are not included since this acquisition does not constitute a material business combination.

The following table summarizes the preliminary allocation of the purchase price to the fair values of the assets at the date of acquisition:

<b>(In thousands):</b>	
Inventory	\$ 1,478
Equipment	600
Other intangible assets	26,200
Goodwill	13,566
<b>Total assets acquired</b>	<b>\$ 41,844</b>

The amount allocated to acquired inventories above replacement cost was \$0.8 million. Accordingly, the results of operations for the three months ended September 29, 2007 include an incremental charge of \$0.7 million in cost of sales, with the remainder to be recorded in the fourth quarter.

The \$26,200 of other intangible assets included \$16,100 of customer relationships (12-year economic consumption life), \$10,000 developed technologies (12-year economic consumption life), and \$100 of non-competition agreements (5-year economic consumption life). These intangible assets were valued at fair value as determined by the Company with the assistance of an independent valuation specialist.

The goodwill recorded in connection with the acquisition will not be amortized, but is deductible for tax purposes. The goodwill is expected to be realized through the benefits of cost-saving synergies associated with the leveraging of the Company's manufacturing and administrative functions as well as the enhancement of sales and marketing efforts through the Company's expanded global sales and distribution network and product offerings.

**3. DISCONTINUED OPERATIONS**

In June 2007, the Company announced its intent to divest its cleaning equipment business. This divestiture is expected to be completed no later than June 2008. The cleaning equipment business sells precision cleaning systems to semiconductor and hard disk drive customers for use in their manufacturing operations. In conjunction with the establishment of management's plan to sell the cleaning equipment business, the fair value of the assets of that business was tested for impairment and, where applicable, adjusted to fair value less costs to sell. The Company determined that long-lived assets of \$2.4 million were impaired and accordingly recorded a pretax charge to Impairment loss on assets of discontinued operations in the second quarter of 2007. The assets and liabilities of the cleaning equipment business have been classified as Assets of discontinued operations and assets held for sale and Liabilities of discontinued operations in the accompanying consolidated balance sheet.

In February 2006, the Company sold the assets of its gas delivery product line for \$15.0 million. The gas delivery products include mass flow controllers, pressure controllers and vacuum gauges that are used by customers in manufacturing operations to measure and control process gas flow rates and to control and monitor

**Table of Contents**

pressure and vacuum levels during the manufacturing process. After adjustments for severance, sublease payments and closing costs, the net proceeds of the sale totaled \$13.1 million. As part of the purchase accounting allocation of the August 2005 acquisition of Mykrolis Corporation (Mykrolis), the fair value of the assets of the gas delivery product line were classified as assets held for sale as of the date of the acquisition. Accordingly, the Company adjusted its purchase price allocation related to the assets of the gas delivery product line and did not recognize a gain or loss from the sale.

The consolidated financial statements have been reclassified to segregate as discontinued operations the assets and liabilities, and operating results of, the cleaning equipment business and gas delivery product lines for all periods presented. The summary of operating results from discontinued operations is as follows:

(In thousands)	Three months ended		Nine months ended	
	September 29, 2007	September 30, 2006	September 29, 2007	September 30, 2006
Net sales	\$ 874	\$ 1,382	\$ 4,404	\$ 7,446
Loss from discontinued operations, before income taxes	\$ (859)	\$ (317)	\$ (3,467)	\$ (1,672)
Income tax benefit	323	120	1,847	2,233
(Loss) income from discontinued operations, net of taxes	\$ (536)	\$ (197)	\$ (1,620)	\$ 561

Net assets of discontinued operations at September 29, 2007 consisted of the following:

(In thousands)	September 29, 2007
Accounts receivable	\$ 2,662
Inventory	3,003
Assets held for sale	1,586
Total assets	7,251
Current liabilities	4,309
Liabilities associated with assets held for sale	137
Total liabilities	4,446
Net assets of discontinued operations	\$ 2,805

The results of discontinued operations for the nine months ended September 29, 2007 included a pre-tax impairment charge of \$2.4 million recorded in the second quarter associated with write-downs of long-lived assets to fair value less cost to sell associated with the exit from the cleaning equipment business. Results of discontinued operations also included a tax benefit of \$0.7 million related to a reduction in the Company's deferred tax asset valuation allowance resulting from the utilization of a capital loss carryforward from a previously discontinued business to offset a portion of the capital gain on the sale of an equity investment.

The results of discontinued operations for the nine months ended September 30, 2006 included a tax benefit of \$1.6 million related to the change in the deferred tax asset valuation allowance. The change in the valuation allowance resulted from the settlement of negotiations regarding the terms of sale of a discontinued operation which established the characterization of certain gains and losses.

#### 4. DERIVATIVE FINANCIAL INSTRUMENTS

During the first quarter of 2007, the Company entered into a 10-month Japanese yen-based cross-currency interest rate swap, with aggregate notional principal amounts of 2.4 billion Japanese yen and U.S. \$20 million that matures on November 30, 2007. This swap effectively hedges a

## Edgar Filing: ENTEGRIS INC - Form 10-Q

portion of the Company's net investment in its Japanese subsidiary. During the term of this transaction, the Company will remit to, and receive from, its counterparty interest payments based on rates that are reset quarterly equal to three-month Japanese and three-month

**Table of Contents**

U.S. LIBOR rates, respectively. The Company has designated this hedging instrument as a hedge of a portion of the net investment in its Japanese subsidiary, and will use the spot rate method of accounting to value changes of the hedging instrument attributable to currency rate fluctuations. As such, for the nine months ended September 29, 2007, a \$0.9 million adjustment in the fair market value of the hedging instrument related to changes in the spot rate was recorded as a charge to Cumulative translation adjustment in shareholders' equity to offset changes in a portion of the yen-denominated net investment in the Company's Japanese subsidiary. Amounts recorded to foreign currency translation within accumulated other comprehensive loss will remain there until the net investment is disposed. In addition, the Company recorded \$0.3 million and \$0.6 million in interest income during the three-month and nine-month periods ended September 29, 2007 in connection with the cross currency interest rate swap.

**5. INVENTORIES**

Inventories consisted of the following:

<b>(In thousands):</b>	<b>September 29, 2007</b>	<b>December 31, 2006</b>
Raw materials	\$ 23,130	\$ 30,679
Work-in process	4,483	4,019
Finished goods	52,544	58,032
Supplies	991	696
<b>Total inventories</b>	<b>\$ 81,148</b>	<b>\$ 93,426</b>

**6. INTANGIBLE ASSETS AND GOODWILL**

As of September 29, 2007, goodwill amounted to approximately \$407.4 million, an increase of \$12.9 million from December 31, 2006. The increase relates primarily to business acquisition completed in August 2007 as described in Note 2. The increase was partially offset by changes associated with various tax-related purchase price adjustments related to the Mykrolis acquisition completed in August 2005 and by the allocation of goodwill to the discontinued cleaning equipment business as described in Note 3.

The changes to the carrying amount of goodwill for the nine months ended September 29, 2007 were as follows:

<b>(In thousands)</b>	<b>Nine months ended September 29, 2007</b>
Beginning of period	\$ 394,531
Acquisition of specialty coatings business	13,566
Adjustment to Mykrolis purchase price allocation	(411)
Impairment of goodwill associated with assets held for sale	(408)
Foreign currency translation adjustment	105
End of period	\$ 407,383

**Table of Contents**

Other intangible assets, net of amortization, of approximately \$81.4 million as of September 29, 2007 are being amortized over useful lives ranging from 2 to 10 years and are as follows:

(In thousands)	As of September 29, 2007

	\$ 109,791	\$ 40,914	\$ 68,877

Aggregate amortization expense for the three-month and nine-month periods ended September 29, 2007 amounted to \$4.7 million and \$13.7 million, respectively. Estimated amortization expense for calendar years 2007 to 2011 and thereafter is approximately \$18.4 million, \$17.7 million, \$15.2 million, \$9.9 million, \$6.4 million and \$27.5 million, respectively.

**7. WARRANTY**

The Company accrues for warranty costs based on historical trends and the expected material and labor costs to provide warranty services. The majority of products sold are covered by warranties for periods ranging from 90 days to one year. The following table summarizes the activity related to the product warranty liability during the three-month and nine-month periods ended September 29, 2007 and September 30, 2006:

(In thousands)	Three months ended		Nine months ended	
	September 29,	September 30,	September 29,	September 30,
	2007	2006	2007	2006
Balance at beginning of period	\$ 2,208	\$ 1,842	\$ 1,824	\$ 1,795
Accrual for warranties during the period	215	707	1,381	1,776
Adjustment of unused previously recorded accruals	(283)		(443)	(37)
Settlements during the period	(147)	(424)	(769)	(1,409)
Balance at end of period	\$ 1,993	\$ 2,125	\$ 1,993	\$ 2,125

8. RESTRUCTURING COSTS

The Company closed its manufacturing plant located in Bad Rappenau, Germany in 2006 and relocated the production of products made in that facility to other existing manufacturing plants located in the United States and Asia. In addition, the Company moved its Bad Rappenau administrative center to Dresden, Germany. In

**Table of Contents**

connection with these actions, the Company incurred charges for employee severance and retention costs (generally over the employees' required remaining term of service), and asset impairment and accelerated depreciation.

Severance and retention costs related to this closure, mainly classified as selling, general and administrative expense (income), totaled \$(0.1) million and \$3.8 million for the nine-month periods ended September 29, 2007 and September 30, 2006, respectively. Other costs of \$0.4 million and \$0.9 million related to fixed asset write-offs and accelerated depreciation, classified in cost of sales, were also recorded for the nine-month periods ended September 29, 2007 and September 30, 2006, respectively.

The Company's facility in Bad Rappenau became available for sale during the third quarter of 2006 and was classified in Assets held for sale until it was sold for cash proceeds of \$1.8 million in the second quarter of 2007.

For the three-month and nine-month periods ended September 29, 2007 and September 30, 2006, the accrued liabilities, provisions and payments associated with the employee severance and retention costs of the Bad Rappenau restructuring activity were as follows:

	Three months ended		Nine months ended	
	September 29, 2007	September 30, 2006	September 29, 2007	September 30, 2006
<b>(In thousands)</b>				
Accrued liabilities at beginning of period	\$ 641	\$ 1,493	\$ 641	\$ 568
Provision (reversal)		374	(145)	3,781
Payments		(1,345)	(496)	(3,827)
Accrued liabilities at end of period	\$ 522	\$ 522	\$ 522	\$ 522

**9. INCOME TAXES**

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109* (FIN No. 48). FIN No. 48 became effective for the Company as of January 1, 2007. FIN No. 48 defines the threshold for recognizing the benefits of tax positions in the financial statements as more-likely-than-not to be sustained upon examination. The interpretation also provides guidance on the de-recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN No. 48 also requires expanded disclosure at the end of each annual reporting period, including a tabular reconciliation of unrecognized tax benefits.

The Company adopted the provisions of FIN No. 48 on January 1, 2007. As a result of the implementation of FIN No. 48, the Company recognized a decrease of \$1.1 million in the liability for unrecognized tax benefits, which was accounted for as an increase to the January 1, 2007 balance of retained earnings. After recognizing the decrease in liability noted above, the Company's unrecognized tax benefits totaled \$11.7 million and \$11.8 million as of the date of adoption and September 29, 2007 respectively. During the quarter ending September 29, 2007, there was an increase of \$0.4 million in the amount of unrecognized tax benefits primarily resulting from a change in the tax effects from cross jurisdictional transactions. Included in the balance at January 1, 2007 are \$9.3 million of unrecognized tax positions, the recognition of which would not affect the annual effective income tax rate. In the quarter ended September 29, 2007, the balance increased to \$9.7 million. Of those tax positions at January 1, 2007, \$7.0 million were estimated as part of an acquisition and would result in a decrease to goodwill should they become realizable. In the quarter ended September 29, 2007, the balance increased to \$7.5 million as a result of a cross jurisdictional issue.

The Company and its subsidiaries file federal income tax returns in the U.S., as well as in various states of the U.S. and in foreign jurisdictions. The Company is no longer subject to U.S. federal income tax examinations for years before 2004 and, with few exceptions, is no longer subject to foreign income tax examinations, state and local or non-U.S. income tax examinations by tax authorities for years before 2001.

---

## Table of Contents

The German tax authorities are currently examining certain tax returns for the years 2001 through 2005. To date, there are no final adjustments.

Included in the balance of unrecognized tax benefits at January 1, 2007 are \$0.8 million of tax positions for which the ultimate deductibility is highly certain, but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than any interest and penalties that may be assessed if the timing of deductibility is changed, a change in the timing of deductibility would not affect the annual effective tax rate, but would accelerate the payment of cash to the taxing authorities to an earlier period. There were no material changes to this balance during the quarter ended September 29, 2007.

The Company recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses. The Company had approximately \$2.2 million accrued at January 1, 2007 for the payment of interest and penalties. During the nine-month period ended September 29, 2007, the Company recognized approximately \$0.1 million in potential interest associated with uncertain tax positions.

The Company does not anticipate that the total unrecognized tax benefits will significantly change prior to September 27, 2008.

The year-to-date effective tax rate was 25.4% in 2007 compared to 33.1% in the 2006 period. The Company's tax rate was lower than statutory rates due to the benefits associated with export activities and a tax holiday. The 2007 effective tax rate was also lower due to a corporate income tax refund of \$0.8 million reflecting new legislation in Germany and a \$0.9 million adjustment recorded to recognize the reconciliation of the Company's 2006 federal tax return and tax accounts.

As described in Note 15, in October 2007, the Company's Japanese subsidiary declared a dividend of 6.8 billion yen (approximately U.S. \$60 million) and will also lend 4.6 billion yen (approximately U.S. \$40 million) to the Company. The resulting recharacterization of \$100 million of the Japanese subsidiary's accumulated undistributed earnings is expected to result in a fourth quarter U.S. tax benefit estimated to be approximately \$10 million. The actual amount of this U.S. tax benefit is subject to multiple variables not fully determinable until completion of fiscal 2007.

The nine-month results of loss from discontinued operations in 2007 included a tax benefit of \$0.7 million related to a reduction in the Company's deferred tax asset valuation allowance resulting from the utilization of a capital loss carryforward to offset a portion of the capital gain on the sale of an equity investment. The year-to-date results of income from discontinued operations in 2006 included a tax benefit of \$1.6 million recorded in the first quarter of 2006 related to the change in the Company's deferred tax asset valuation allowance. The change in the valuation allowance resulted from the settlement of negotiations regarding the terms of sale of a discontinued operation, which established the characterization of certain gains and losses.

## 10. CREDIT AGREEMENT

During the quarter ended June 30, 2007, the Company executed a new credit agreement, which expires in June 2010, and allows for aggregate borrowings of up to \$85 million with interest at LIBOR rates plus an incremental factor ranging from 0.75% to 1.25% based on the current funded debt to EBITDA ratio (as defined therein). Under the credit agreement, which includes a \$60 million revolver and a \$25 million one-year term note, the Company is prohibited from paying cash dividends. The Company is also subject to, and is in compliance with, certain financial covenants including a leverage ratio of funded debt to EBITDA (as defined therein) of not more than 3.00 to 1.00. In addition, the Company must maintain consolidated aggregate amounts of cash and cash equivalents (which under the agreement may also include auction rate securities classified as short-term investments) of not less than \$50 million. Borrowings outstanding under the credit agreement were \$35.0 million at September 29, 2007.

## 11. SHARE-BASED COMPENSATION EXPENSE

The Company accounts for the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors under Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123(R)). Total share-based compensation expense recorded under SFAS 123(R) for the nine months ended September 29, 2007 and September 30, 2006 was \$8.6 million and \$11.7 million, respectively.

**Table of Contents**

Share-based payment awards in the form of restricted stock awards for 0.8 million shares and 1.1 million shares were granted to employees during the nine months ended September 29, 2007 and September 30, 2006, respectively. The awards generally vest annually over a four-year period. Compensation expense for these awards is based on the grant date fair value of the Company's common stock and is being recognized using the straight-line single-option method based on the portion of share-based payment awards ultimately expected to vest. The weighted average grant date fair value of these share-based payment awards was \$11.23 per share and \$10.46 per share in 2007 and 2006, respectively.

During the nine months ended September 29, 2007 and September 30, 2006, the Company also made awards of restricted stock to be issued upon the achievement of performance conditions (Performance Shares) under the Company's stock incentive plans for up to 0.9 million shares and 0.9 million shares, respectively.

For Performance Share awards granted in 2006, 25% of the shares are available to be awarded each of the ensuing four years, if and to the extent the financial performance criteria for fiscal years 2006 through 2009 are achieved. The number of performance shares earned in a given year may vary based on the level of achievement of financial performance objectives for that year. If the Company's performance for a year fails to achieve the specified performance threshold, then the performance shares allocated to that year are forfeited. Each annual tranche will have its own service period beginning at the date (the grant date) at which the Board of Directors establishes the annual performance targets for the applicable year, or January 1 of that year, whichever occurs later. Compensation expense to be recorded in connection with the Performance Shares is based on the grant date fair value of the Company's common stock on the date the financial performance criteria are established for each annual tranche. Awards of Performance Shares are expensed over the service period based on an evaluation of the probability of achieving the performance objectives.

For Performance Share awards granted in 2007, 50% of the shares are available to be awarded if and to the extent that two financial performance criteria for fiscal year 2007 are achieved, while the remaining 50% of the shares are available to be awarded if and to the extent that a third financial performance criteria for the three-year period including fiscal years 2007 through 2009 are achieved. The number of performance shares earned may vary based on the level of achievement of financial performance criteria indicated. If the Company's performance fails to achieve the specified performance threshold, then the performance shares are forfeited. Compensation expense to be recorded in connection with the 2007 Performance Shares is based on the grant date fair value of the Company's common stock on the date the financial performance criteria were established. All shares earned in connection with the 2007 Performance Share awards are also subject to service conditions. Shares available upon attainment of the financial performance criteria for fiscal year 2007 vest annually over a four-year period, while shares available upon attainment of the financial performance criteria for the three-year period from fiscal years 2007 through 2009 will be cliff-vested at the end of 2009, with the final 25% vesting in 2010.

**12. OTHER INCOME**

Other income in the nine-month period ended September 29, 2007 includes a second-quarter gain of \$6.1 million (\$3.8 million after taxes) on the sale of the Company's interest in a privately-held equity investment accounted for using the cost method. Proceeds from the sale totaled \$6.6 million.

**13. EARNINGS PER COMMON SHARE**

The following table presents a reconciliation of the denominators used in the computation of basic and diluted earnings per share:

	Three months ended		Nine months ended	
	September 29, 2007	September 30, 2006	September 29, 2007	September 30, 2006
<b>(In thousands)</b>				
Basic earnings per share-weighted common shares outstanding	114,333	135,538	125,251	136,624
Weighted common shares assumed upon exercise of stock options and vesting of restricted stock	2,082	3,383	2,729	3,357
Diluted earnings per share-weighted common shares and common shares equivalent outstanding	116,415	138,921	127,980	139,981

---

**Table of Contents**

**14. SHARE REPURCHASE**

In May 2007, the Company's Board of Directors authorized a self-tender offer program to acquire up to \$250 million of the Company's stock. A modified Dutch Auction tender offer began on May 11, 2007, and expired on June 8, 2007, and was subject to the terms and conditions described in the offering materials mailed to the Company's shareholders and filed with the Securities and Exchange Commission. The tender offer was completed on June 14, 2007 with the Company purchasing 21.1 million shares of its common stock at a price of \$11.80 per share. The Company incurred \$2.3 million in costs associated with the tender offer for a total cost of approximately \$251.4 million.

In August 2006, the Company's Board of Directors authorized a share repurchase program of up to \$150 million over the succeeding 12 to 18 months. In connection therewith, the Company entered into an Accelerated Share Repurchase Agreement (ASRA) and a Collared Accelerated Share Repurchase Agreement (CASRA) with Goldman, Sachs & Co. (GS) in August 2006 to repurchase the Company's common stock. Under the ASRA and CASRA, the Company acquired 8.9 million shares of common stock for \$100 million in 2006, leaving \$50 million remaining available for repurchases pursuant to the August 2006 authorization. Under the ASRA and the CASRA, GS repurchased an equivalent number of shares in the open market from September 2006 through August 2007. Upon GS's completion of trading in August 2007, the Company's price under the ASRA was adjusted up based on the volume-weighted average price of the stock repurchased by GS, resulting in a cash payment to GS of \$0.6 million in the third quarter. Also during the third quarter, the Company received 0.4 million additional shares of common stock pursuant to the CASRA, based on the volume-weighted average price of the stock repurchased by GS.

**15. SUBSEQUENT EVENT**

On October 22, 2007, the Company's Japanese subsidiary, Nihon Entegris KK (NEKK), acted to declare a dividend of 6.8 billion yen (approximately U.S. \$60 million) and to lend 4.6 billion yen (approximately U.S. \$40 million) to the Company. It is expected that these transactions will be completed in early November of 2007. The dividend and loan will be funded from available cash and lines of credit to be established with Japanese banks during this same time period. Prior to the declaration of the dividend, the accumulated undistributed earnings of NEKK were considered to be reinvested indefinitely as allowed by the provisions of Accounting Principles Board (APB) Opinion No. 23, *Accounting for Income Taxes - Special Areas*, as amended by SFAS No. 109, such that no U.S. tax effect had been provided with respect to such accumulated undistributed NEKK earnings. The dividend and loan transactions will result in a recharacterization of \$100 million of NEKK's accumulated undistributed earnings as no longer being indefinitely reinvested. This recharacterization of the NEKK accumulated undistributed earnings is expected to result in a fourth quarter U.S. tax benefit estimated to be approximately \$10 million. The actual amount of this U.S. tax benefit is subject to multiple variables not fully determinable until completion of fiscal 2007.

**16. RECENT ACCOUNTING PRONOUNCEMENTS**

In June 2006, the Financial Accounting Standards Board (FASB) ratified the Emerging Issues Task Force (EITF) consensus on EITF Issue No. 06-3 *How Taxes Collected From Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)*(EITF No. 06-3). The scope of EITF No. 06-3 includes any tax assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer, and provides that a company may adopt a policy of presenting taxes either gross within revenue or on a net basis. For any such taxes that are reported on a gross basis, a company should disclose the amounts of those taxes for

**Table of Contents**

each period for which an income statement is presented if those amounts are significant. This statement is effective to financial reports for interim and annual reporting periods beginning after December 15, 2006. EITF No. 06-3 became effective for the Company as of January 1, 2007. The Company collects various sales and value-added taxes on certain product and service sales, which are accounted for on a net basis.

In September 2006, the FASB issued Statement of Financial Accounting Standard (SFAS) No. 157, *Fair Value Measurements* (SFAS No.157). This statement provides a single definition of fair value, a framework for measuring fair value and expanded disclosures concerning fair value. Previously, different definitions of fair value were contained in various accounting pronouncements, creating inconsistencies in measurement and disclosures. SFAS No. 157 applies under those previously issued pronouncements that prescribe fair value as the relevant measure of value, except SFAS No. 123(R) and related interpretations and pronouncements that require or permit measurement similar to fair value, but are not intended to measure fair value. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company has not yet determined the impact on its consolidated financial statements, if any, of adopting the provisions of SFAS No. 157.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115* (SFAS No. 159). SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 is effective as of the beginning of fiscal years that begin after November 15, 2007. The Company has not yet determined the impact on its consolidated financial statements, if any, of adopting the provisions of SFAS No. 159.

---

## **Table of Contents**

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### **Overview**

Entegris, Inc. is a leading provider of products and services that purify, protect and transport the critical materials used in key technology-driven industries. Entegris derives most of its revenue from the sale of products and services to the semiconductor and data storage industries. The Company's customers consist primarily of semiconductor manufacturers, semiconductor equipment and materials suppliers, and hard disk manufacturers which are served through direct sales efforts, as well as sales and distribution relationships, in the United States, Asia, Europe and the Middle East.

The Company offers a diverse product portfolio which includes more than 13,000 standard and customized products that we believe provide the most comprehensive offering of materials integrity management products and services to the microelectronics industry. Certain of these products are unit driven and consumable products that rely on the level of semiconductor manufacturing activity to drive growth, while others rely on expansion of manufacturing capacity to drive growth. The Company's unit driven and consumable product class includes wafer shippers, disk shipping containers and test assembly and packaging products, membrane based liquid filters and housings, metal based gas filters and resin based gas purifiers, as well as PVA roller brushes for use in post CMP cleaning applications. The Company's capital expense driven products include its process carriers that protect the integrity of in-process wafers, components, systems and subsystems that use electro-mechanical, pressure differential and related technologies, to permit semiconductor and other electronics manufacturers to monitor and control the flow and condition of process liquids used in these manufacturing processes.

The Company's fiscal year is the calendar period ending each December 31. The Company's fiscal quarters consist of 13-week periods that end on Saturday. The Company's fiscal quarters in 2007 end on March 31, 2007, June 30, 2007, September 29, 2007 and December 31, 2007. Unaudited information for the three and nine months ended September 29, 2007 and the financial position as of September 29, 2007 and December 31, 2006 are included in this Quarterly Report on Form 10-Q.

#### **Forward-Looking Statements**

The information in this Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements. These statements are subject to risks and uncertainties. These forward-looking statements could differ materially from actual results. The Company assumes no obligation to publicly release the results of any revision or updates to these forward-looking statements to reflect future events or unanticipated occurrences. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and the related Notes, which are included elsewhere in this report.

#### **Key operating factors**

Key factors which management believes have the largest impact on the overall results of operations of Entegris, Inc. include:

***The level of sales*** Since a large portion of the Company's product costs (excepting raw materials, purchased components and direct labor) are largely fixed in the short/medium term, an increase or decrease in sales affects gross profits and overall profitability significantly. Also, increases or decreases in sales and operating profitability affect certain costs such as incentive compensation and commissions, which are highly variable in nature. The Company's sales are subject to effects of industry cyclicalities, technological change and substantial competition, including pricing pressures.

***The variable margin on sales*** The Company's variable margin on sales is determined by selling prices, and the costs of manufacturing and raw materials. This is also affected by a number of factors, which include the Company's sales mix, purchase prices of raw material (especially resin and purchased components), competition, both domestic and international, direct labor costs, and the efficiency of the Company's production operations, among others.

---

**Table of Contents**

*The Company's fixed cost structure* Increases or decreases in sales have a large impact on profitability. There are a number of large fixed or semi-fixed cost components, which include salaries, indirect labor and benefits, lease expense, and depreciation and amortization. It is not possible to vary these costs easily and in the short term as volumes fluctuate. Thus changes in sales volumes can affect the usage and productivity of these cost components and can have a large effect on the Company's results of operations.

**Overall Summary of Financial Results for the Three and Nine Months Ended September 29, 2007**

For the three months ended September 29, 2007, net sales decreased 11% to \$151.8 million from the comparable period last year, due to lower demand for certain of the Company's products, mainly reflecting the demand drivers of the semiconductor industry. The sales comparison is positively affected by approximately \$2.3 million due to the year-over-year strengthening of certain international currencies versus the U.S. dollar over the period, most notably the Euro. Sales were down 1% on a sequential basis from the second quarter of calendar 2007. Reflecting the year-over-year sales decrease, the Company reported lower gross profits and a reduced gross margin.

For the nine-month period ended September 29, 2007, net sales decreased 8% to \$464.9 million from the comparable period last year. The sales comparison is positively affected by approximately \$3.7 million due to the year-over-year strengthening of certain international currencies versus the U.S. dollar over the period, most notably the Euro. Mainly reflecting the year-over-year sales decrease, the Company reported lower gross profits and a reduced gross margin.

On August 16, 2007, Entegris acquired the assets of a specialty coatings business for cash consideration of \$41.8 million. Additional consideration of \$4.0 million may also be due to the seller if certain financial metrics related to calendar 2007 results are met. Net sales for the three-month and nine-month periods ended September 29, 2007 were positively affected by the inclusion of approximately \$2.1 million in sales attributable to the acquisition.

The Company's selling, general and administrative (SG&A) costs increased by \$0.7 million and decreased by \$12.3 million for the three-month and nine-month periods, respectively. The year-to-date reduction reflected lower costs incurred by the Company in connection with the integration activities associated with the merger with Mykrolis as well as the benefit of lower salaries and other costs resulting from the realignment of activities after the merger.

The Company reported income from continuing operations of \$9.0 million for the three-month period compared to income from continuing operations of \$18.0 million in the comparable prior year period, while income from continuing operations of \$35.2 million for the nine-month period compared to income from continuing operations of \$46.8 million in the year-ago period. Included in income from continuing operations in the nine-month period ended September 29, 2007 was a gain of \$6.1 million on the sale of the Company's interest in a privately-held equity investment.

During the nine months ended September 29, 2007, the Company generated cash of \$99.2 million from operations as the cash generated by the Company's net earnings, non-cash charges and the net positive impact of changes in operating assets and liabilities, most notably accounts receivable and inventory. Cash and cash equivalents were \$125.9 million at September 29, 2007, compared with cash, cash equivalents and short-term investments of \$275.0 million at December 31, 2006. The decline reflects the use of \$251.4 million to purchase the Company's common shares in connection with its second quarter Dutch auction tender offer.

In June 2007, the Company announced that it will divest its cleaning equipment business. In conjunction with the establishment of management's second quarter plan to sell the cleaning equipment business, the fair value of the assets of that business was tested for impairment and, where applicable, adjusted to fair value less costs to sell. The Company determined that long-lived assets of \$2.4 million were impaired and accordingly recorded a pretax charge to impairment loss on assets of discontinued businesses. The assets and liabilities, and operating results, of the business divested have been classified as discontinued operations for all periods presented.

---

**Table of Contents**

**Critical Accounting Policies**

Management's discussion and analysis of financial condition and results of operations is based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires the Company to make estimates, assumptions and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. At each balance sheet date, management evaluates its estimates, including, but not limited to, those related to accounts receivable, warranty and sales return obligations, inventories, long-lived assets, and income taxes. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. The critical accounting policies affected most significantly by estimates, assumptions and judgments used in the preparation of the Company's consolidated financial statements are discussed below.

**Net Sales** The Company's net sales consist of revenue from sales of products net of trade discounts and allowances. The Company recognizes revenue upon shipment, primarily FOB shipping point, when evidence of an arrangement exists, contractual obligations have been satisfied, title and risk of loss have been transferred to the customer and collection of the resulting receivable is probable based upon historical collection results and regular credit evaluations. In most transactions, the Company has no obligations to its customers after the date products are shipped other than pursuant to warranty obligations. In the event that significant post-shipment obligations or uncertainties exist such as customer acceptance, revenue recognition is deferred as appropriate until such obligations are fulfilled or the uncertainties are resolved.

**Accounts Receivable-Related Valuation Accounts** The Company maintains allowances for doubtful accounts and for sales returns and allowances. Significant management judgments and estimates must be made and used in connection with establishing these valuation accounts. Material differences could result in the amount and timing of the Company's results of operations for any period if we made different judgments or utilized different estimates. In addition, actual results could be different from the Company's current estimates, possibly resulting in increased future charges to earnings.

The Company provides an allowance for doubtful accounts for all individual receivables judged to be unlikely for collection. For all other accounts receivable, the Company records an allowance for doubtful accounts based on a combination of factors. Specifically, management considers the age of receivable balances and historical bad debts write-off experience when determining its allowance for doubtful accounts. The Company's allowance for doubtful accounts was \$0.6 million and \$0.8 million at September 29, 2007 and December 31, 2006, respectively.

An allowance for sales returns and allowances is established based on historical trends and current trends in product returns. At September 29, 2007 and December 31, 2006, the Company's reserve for sales returns and allowances was \$1.9 million and \$1.8 million, respectively.

**Inventory Valuation** The Company uses certain estimates and judgments to properly value inventory. In general, the Company's inventories are recorded at the lower of manufacturing cost or market value. Each quarter, the Company evaluates its ending inventories for obsolescence and excess quantities. This evaluation includes analyses of inventory levels, historical write-off trends, expected product lives, and sales levels by product. Inventories that are considered obsolete are written off or a full valuation allowance is recorded. In addition, valuation allowances are established for inventory quantities in excess of forecasted demand. Inventory valuation allowances were \$9.6 million and \$10.1 million at September 29, 2007 and December 31, 2006, respectively.

The Company's inventories comprise materials and products subject to technological obsolescence, which are sold in highly competitive industries. If future demand or market conditions are less favorable than current conditions, additional inventory write-downs or valuation allowances may be required and would be reflected in cost of sales in the period the revision is made.

---

## Table of Contents

**Impairment of Long-Lived Assets** The Company routinely considers whether indicators of impairment of its property and equipment assets, particularly its molding equipment, are present. If such indicators are present, it is determined whether the sum of the estimated undiscounted cash flows attributable to the assets in question is less than their carrying value. If less, an impairment loss is recognized based on the excess of the carrying amount of the assets over their respective fair values. Fair value is determined by discounting estimated future cash flows, appraisals or other methods deemed appropriate. If the assets determined to be impaired are to be held and used, the Company recognizes an impairment charge to the extent the present value of anticipated net cash flows attributable to the assets are less than the assets' carrying value. The fair value of the assets then becomes the assets' new carrying value, which is depreciated over the remaining estimated useful life of the assets.

The Company assesses the impairment of goodwill at least annually, or whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors considered important which could trigger an impairment review, and potentially an impairment charge, include the following:

significant underperformance relative to historical or projected future operating results;

significant changes in the manner of use of the acquired assets or the Company's overall business strategy;

significant negative industry or economic trends; and

significant decline in the Company's stock price for a sustained period changing the Company's market capitalization relative to its net book value.

**Income Taxes** In the preparation of the Company's consolidated financial statements, management is required to estimate income taxes in each of the jurisdictions in which the Company operates. This process involves estimating actual current tax exposures together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheet.

The Company has significant amounts of deferred tax assets. Management reviews its deferred tax assets for recoverability on a quarterly basis and assesses the need for valuation allowances. These deferred tax assets are evaluated by considering historical levels of income, estimates of future taxable income streams and the impact of tax planning strategies. A valuation allowance is recorded to reduce deferred tax assets when it is determined that it is more likely than not that the Company would not be able to realize all or part of its deferred tax assets. The Company carried no valuation allowance as of September 29, 2007 compared to a \$0.7 million valuation allowance against its deferred tax assets at December 31, 2006 related to a portion of a capital loss carryforward which at that time was deemed more likely than not to be unrealized. The elimination of the valuation allowance during the quarter ended June 30, 2007 reflected the utilization of the capital loss carryforward to offset a portion of the capital gain on the sale of an equity investment.

**Warranty Claims Accrual** The Company records a liability for estimated warranty claims. The amount of the accrual is based on historical claims data by product group and other factors. Estimated claims could be materially different from actual results for a variety of reasons, including a change in product failure rates and service delivery costs incurred in correcting a product failure, manufacturing changes that could impact product quality, or as yet unrecognized defects in products sold. At September 29, 2007 and December 31, 2006, the Company's accrual for estimated future warranty costs was \$2.0 million and \$1.8 million, respectively.

**Business Acquisitions** The Company accounts for acquired businesses using the purchase method of accounting which requires that the assets acquired and liabilities assumed be recorded at the date of acquisition at their respective fair values. The judgments made in determining the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact net income. Accordingly, for significant items, the Company typically obtains assistance from independent valuation specialists.

There are several methods that can be used to determine the fair value of assets acquired and liabilities assumed. For intangible assets, the Company normally utilizes the income method. This method starts with a forecast of all of the expected future net cash flows. These cash flows are then adjusted to present value by applying an

**Table of Contents**

appropriate discount rate that reflects the risk factors associated with the cash flow streams. Some of the more significant estimates and assumptions inherent in the income method or other methods include the projected future cash flows (including timing) and the discount rate reflecting the risks inherent in the future cash flows. Determining the useful life of an intangible asset also requires judgment. For example, different types of intangible assets will have different useful lives and certain assets may even be considered to have indefinite useful lives. All of these judgments and estimates can significantly impact net income.

**Share-Based Compensation Expense** Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123(R)) requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors based on estimated fair values. Share-based compensation expense recognized under SFAS 123(R) for the three months ended September 29, 2007 and September 30, 2006 was \$2.9 and \$3.4 million, respectively. Share-based compensation expense recognized under SFAS 123(R) for the nine months ended September 29, 2007 and September 30, 2006 was \$8.6 million and \$11.7 million, respectively.

Under SFAS 123(R), the Company must estimate the value of employee stock options and restricted stock on the date of grant. Prior to the adoption of SFAS 123(R), the value of each employee stock option was estimated on the date of grant using the Black-Scholes model for the purpose of the pro forma financial information in accordance with SFAS 123. The determination of fair value of share-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the expected stock price volatility over the term of the awards, risk-free interest rate and dividend yield assumptions, and actual and projected employee stock option exercise behaviors and forfeitures. Restricted stock and restricted stock unit awards are valued based on the Company's stock price on the date of grant.

Because share-based compensation expense recognized in the Consolidated Statement of Operations for the three and nine months ended September 29, 2007 is based on awards ultimately expected to vest, it has been recorded net of estimated forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience. If factors change and the Company employs different assumptions in the application of SFAS 123(R) in future periods, the compensation expense recorded under SFAS 123(R) may differ significantly from what was recorded in the current period.

**Three and Nine Months Ended September 29, 2007 Compared to Three and Nine Months Ended September 30, 2006**

The following table compares quarterly results with prior year results, as a percent of sales, for each caption.

	Three months ended		Nine months ended	
	September 29, 2007	September 30, 2006	September 29, 2007	September 30, 2006
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	56.8	55.4	57.1	53.4
Gross profit	43.2	44.6	42.9	46.6
Selling, general and administrative expenses	29.0	25.5	28.9	29.0
Engineering, research and development expenses	6.2	5.7	6.4	5.7
Operating income	8.0	13.5	7.7	12.0
Interest income, net	0.1	1.7	1.2	1.3
Other income, net		0.4	1.3	0.5
Income before income taxes and other items below	8.0	15.6	10.1	13.7
Income tax expense	2.1	5.0	2.6	4.5
Equity in net loss (income) of affiliates	0.1	(0.1)		(0.1)
Income from continuing operations	5.9	10.6	7.6	9.3
Effective tax rate	25.9%	32.2%	25.4%	33.1%

---

**Table of Contents**

**Net sales** Net sales were \$151.8 million for the three months ended September 29, 2007, down 11% compared to \$169.9 million in the three months ended September 30, 2006. Sequentially, sales for the quarter were 1% lower than the second quarter of fiscal 2007. Sales from products of the business acquired from Surmet Corporation totaled \$2.1 million for the third quarter. Net sales for the first nine months of fiscal 2007 were \$464.9 million, down 8% from \$505.6 million in the comparable year-ago period.

On a geographic basis, total sales to North America were 26%, Asia Pacific (excluding Japan) 37%, Europe 15% and Japan 22% for the third quarter. Net sales for the three months and nine months ended September 29, 2007 included favorable foreign currency effects in the amounts of \$2.3 million and \$3.7 million, respectively. This reflected the strengthening of certain international currencies versus the U.S. dollar, most notably the Euro.

Demand drivers for the Company's business primarily are comprised of semiconductor fab utilization and production (unit-driven) as well as capital spending for new or upgraded semiconductor fabrication facilities (capital-driven). The Company analyzes sales of its products by these two key drivers. Both unit-driven and capital-driven sales in the third quarter of 2007 decreased as compared with the third quarter of 2006. Semiconductor customers maintained relatively high production levels during the quarter, while slowing orders for certain capital equipment reflected further softening of capital spending and capacity expansion. Accordingly, unit-driven sales were up nominally, while capital-driven sales were down 5% compared to the second quarter of 2007.

By product type, sales of unit driven products represented 61% of sales and capital-driven products represented 39% of total sales in the quarter ended September 29, 2007. This compared to a 61%/39% unit-driven vs. capital-driven split both for the third quarter of 2006 and a 60%/40% ratio for the three months ended June 30, 2007, indicating a consistent pattern of demand within the industry over the past twelve months.

As noted, unit-driven product sales were 61% of third quarter sales and rose nominally from the second quarter of 2007. Among unit-driven products, consumable liquid filter and shipper product sales benefited from relatively strong production levels at semiconductor customers. Sales of 200mm wafer shippers, after strong sales in the first quarter, continued to soften as expected. Sales of other unit-driven products such as data storage shippers rebounded modestly from second quarter levels.

Sales of capital-driven products represented 39% of third quarter sales. Sales of liquid systems products and gas microcontamination declined in the third quarter due to fewer facility buildout projects. Sales of wafer process carriers and FOUPs grew sequentially in the quarter, but trailed sales from the year-ago period.

**Gross profit** Gross profit for the three months ended September 29, 2007 decreased by \$10.3 million to \$65.5 million, a decrease of 14% from the \$75.8 million for the three months ended September 30, 2006. The gross margin percentage for the third quarter of 2007 was 43.2% versus 44.6% for the three months ended September 30, 2006 and 42.7% for the three months ended June 30, 2007.

For the first nine months of 2007, gross profit was \$199.5 million, down 15% from \$235.6 million recorded in the first nine months of 2006. As a percentage of net sales, gross margins for the first nine months of the year were 42.9% compared to 46.6% in the comparable period a year ago.

The gross profit declines for the three-month and nine-month periods were primarily due to lower utilization of the Company's production facilities compared to the year-ago periods. Production volumes were considerably lower in 2007 as the Company sold inventory on hand to satisfy customer demand, particularly in the first half of the year. Prices for raw materials were relatively stable on a sequential quarter basis and year-over-year basis.

---

**Table of Contents**

Gross margin for the three-month and nine-month periods also was affected by approximately \$1.0 million and \$1.5 million, respectively, in transition costs such as travel, sampling and customer qualification costs related to the transfer of four product lines from U.S. facilities to the Company's facility in Kulim, Malaysia.

The gross margin percentage figure for the three months ended September 29, 2007 included a \$0.7 million incremental cost of sales charge associated with the fair market value write-up of inventory acquired in the purchase of the assets of the high-purity semiconductor coatings business of Surmet Corporation. The inventory write-up was recorded as part of the purchase price allocation and is charged to cost of sales over inventory turns of the acquired inventory.

Costs of \$0.3 million were associated with the consolidation of manufacturing facilities in the U.S., Germany and Japan and reduced gross profit in the nine-month period ended September 29, 2007. The figures in 2006 for the third quarter and year-to-date were \$0.2 million and \$2.5 million, respectively. Offsetting these charges to the 2006 gross profit was a gain of \$0.7 million on the sale of a facility during the second quarter.

**Selling, general and administrative expenses.** Selling, general and administrative (SG&A) expenses increased \$0.7 million, or 2%, to \$44.0 million in the three months ended September 29, 2007, up from \$43.3 million in the comparable three-month period a year earlier. SG&A expenses, as a percent of net sales, rose to 29.0% from 25.5% a year earlier. On a year-to-year basis, SG&A expenses fell by \$12.3 million, or 8% to \$134.2 million compared to \$146.5 million a year earlier. On a year-to-date basis, SG&A costs, as a percent of net sales, fell to 28.9% from 29.0% a year ago.

The year-over-year decrease in SG&A costs reflects the lower SG&A expenses incurred by the Company in connection with the integration activities associated with the Mykrolis merger and other realignment activities, as well as the benefit of the combination of various sales, marketing and other corporate functions put in place during 2006. Integration costs were \$(0.1) million and \$2.6 million, respectively, in the three months and nine months ended September 29, 2007 compared to \$0.8 million and \$7.2 million, respectively, for the comparable periods ended September 30, 2006. The costs included in this category generally relate to expenses incurred to integrate Mykrolis' operations and systems into the Company's pre-existing operations and systems. These costs include, but are not limited to, the integration of information systems, employee benefits and compensation, accounting/finance, tax, treasury, risk management, compliance, administrative services, sales and marketing and other functions and includes severance and retention costs. The year-over-year decrease in SG&A expenses also includes a decline in incremental share-based compensation expense of \$2.7 million.

**Engineering, research and development expenses** Engineering, research and development (ER&D) expenses fell 3% to \$9.4 million in the third quarter of fiscal 2007 as compared to \$9.7 million for the same period in fiscal 2006. ER&D expenses increased 3% to \$29.6 million in the first nine months of 2007 as compared to \$28.7 million in the year-ago nine-month period. Year-to-date ER&D expenses, as a percent of net sales, increased to 6.4% from 5.7%. The year-to-date increase reflected higher product sampling costs as the Company continued to focus on the support of current product lines, and the development of new products and manufacturing technologies.

**Interest income, net** Net interest income was \$0.1 million in the three months ended September 29, 2007 compared to \$2.8 million in the year-ago period. Net interest income was \$5.5 million in the first nine months of 2007 compared to \$6.8 million in year-ago period. The third quarter decrease in interest income is the result of lower investment balances related to the Company's use of cash to repurchase of its common shares during the second quarter.

## Table of Contents

**Other income** Other income in the nine-month period ended September 29, 2007 includes a second-quarter gain of \$6.1 million on the sale of the Company's interest in a privately-held equity investment accounted for using the cost method. Proceeds from the sale totaled \$6.6 million.

**Income tax expense** The Company recorded income tax expense of \$3.2 million for the third quarter of 2007 compared to income tax expense of \$8.5 million for the third quarter a year earlier. For the first nine months of 2007, the Company booked income tax expense of \$12.0 million compared to income tax expense of \$23.0 million in the comparable period in fiscal 2006.

The year-to-date effective tax rate was 25.4% in 2007 compared to 33.1% in 2006 period. In both periods, the Company's tax rate was lower than statutory rates due to the benefits associated with export activities and tax holidays. The 2007 effective tax rate was also lower due to a corporate income tax refund of \$0.8 million reflecting new legislation in Germany and a \$0.9 million adjustment recorded to recognize the reconciliation of the Company's 2006 federal tax return and tax accounts.

In October 2007, the Company's Japanese subsidiary declared a dividend of 6.8 billion yen (approximately U.S. \$60 million) and will also lend 4.6 billion yen (approximately U.S. \$40 million) to the Company. The resulting recharacterization of \$100 million of the Japanese subsidiary's accumulated undistributed earnings is expected to result in a fourth quarter U.S. tax benefit estimated to be approximately \$10 million. The actual amount of this U.S. tax benefit is subject to multiple variables not fully determinable until completion of fiscal 2007.

### **Discontinued operations**

The Company's businesses classified as discontinued operations recorded a net losses of \$0.5 million and \$1.6 million, net of taxes, in the three-month and nine-month periods ended September 29, 2007. These results included an operating loss, a pre-tax impairment charge of \$2.4 million recorded in the second quarter associated with write-downs of long-lived assets to fair value less cost to sell and a tax benefit of \$0.7 million related to a reduction in the Company's deferred tax asset valuation allowance resulting from the utilization of a capital loss carryforward to offset a portion of the capital gain on the sale of an equity investment.

The year-to-date results of income from discontinued operations in 2006 included a tax benefit of \$1.6 million recorded in the first quarter related to the change in the Company's deferred tax asset valuation allowance. The change in the valuation allowance resulted from the settlement of negotiations regarding the terms of sale of a discontinued operation which established the characterization of certain gains and losses.

**Net income** The Company recorded net income of \$8.4 million, or \$0.07 per diluted share, in the three-month period ended September 29, 2007 compared to net income of \$17.8 million, or \$0.13 per diluted share, in the three-month period ended September 30, 2006. The net earnings from continuing operations for the three-month period were \$9.0 million, or \$0.08 per diluted share, compared to net income of \$18.0 million, or \$0.13 per diluted share, in the year ago period.

For the nine months ended September 29, 2007, the Company recorded net income of \$33.6 million, or \$0.26 per diluted share, compared to net income of \$47.4 million, or \$0.34 per diluted share, in the comparable period a year ago. The net earnings from continuing operations for the nine-month period were \$35.2 million, or \$0.28 per diluted share, compared to net income of \$46.8 million, or \$0.33 per diluted share, in the year ago period. Included in the 2007 results was other income of \$6.1 million (\$3.8 million after taxes, or \$0.03 per diluted share) related to the sale of one of the Company's equity investments. The after-tax earnings of discontinued operations in the first quarter of 2006 included the tax benefit of \$1.6 million associated with a decrease in the company's deferred tax asset valuation allowance described above.

### **Liquidity and Capital Resources**

**Operating activities** Cash provided by operating activities totaled \$99.2 million in the nine months ended September 29, 2007. Cash flow from operations was provided by the Company's net earnings of \$33.6 million and various non-cash charges, including depreciation and amortization of \$32.6 million, and share-based compensation expense of \$8.5 million. Also adding to operating cash flow was the net positive impact of changes in operating assets and liabilities, most notably accounts receivable and inventory.

---

**Table of Contents**

Accounts receivable, net of foreign currency translation adjustments, decreased by \$26.0 million from December 31, 2006, reflecting lower sales and an improvement in the Company's days sales outstanding which stood at 62 days compared to 70 days at the beginning of the period and 61 days at the end of the second quarter. Net of foreign currency translation adjustments, inventories declined by \$15.1 million from December 31, 2006 due to reduced production activity and improved inventory management.

Working capital at September 29, 2007 stood at \$264.9 million, down from \$463.6 million as of December 31, 2006, and included \$125.9 million in cash and cash equivalents.

Accounts payable and accrued expenses were \$10.2 million lower than reported at December 31, 2006, mainly reflecting the payment of last year's incentive compensation as well as lower accounts payable associated with reduced production activity.

**Investing activities** Cash flow provided by investing activities totaled \$55.3 million in the nine-month period ended September 29, 2007. The acquisition of a specialty coatings business in August 2007 totaled \$41.8 million. Acquisition of property and equipment totaled \$21.4 million, primarily for additions related to the facility expansion in Malaysia, manufacturing equipment, tooling and information systems. The Company expects total capital expenditures of approximately \$30 million for calendar 2007.

The company had proceeds from maturities and sales of short-term investments, net of purchases, of \$121.1 million during the period. The Company owned no short-term investments at September 29, 2007.

**Financing activities** Cash used in financing activities totaled \$186.0 million during the nine-month period ended September 29, 2007. As described below, Company repurchased and retired \$251.4 million of common stock during the second quarter. Proceeds from borrowings received during the quarter were \$62.0 million. The Company made payments of \$27.3 million on borrowings. The Company received proceeds of \$28.7 million in connection with common shares issued under the Company's stock option and stock purchase plans.

As of September 29, 2007, the Company's sources of available funds comprised \$125.9 million in cash and cash equivalents, as well as funds available under various credit facilities. Entegris has a credit agreement with one domestic commercial bank with aggregate borrowing capacity of \$85 million, with borrowings outstanding at September 29, 2007 in the amount of \$35.0 million. The Company also has a line of credit with one international bank that provides for borrowings of currencies for one of the Company's overseas subsidiaries, equivalent to an aggregate of approximately \$2.9 million. There were no borrowings outstanding on this line of credit at September 29, 2007.

In June 2007, the Company's Board of Directors authorized a share repurchase program to acquire up to \$250 million of the Company's stock. In a modified Dutch Auction tender offer completed in June 2007, the Company purchased 21.1 million shares of its common stock at a price of \$11.80 per share, plus costs to acquire the shares, for a total cash outlay of approximately \$251.4 million.

In August 2006, the Company entered into an accelerated share repurchase agreement (ASRA) and a collared accelerated repurchase agreement (CASRA) with Goldman, Sachs & Co. The Company completed the transaction in August 2007. The Company received an additional 0.4 million shares under the CASRA and paid an additional \$0.6 million under the ASRA, respectively.

During the quarter ended September 29, 2007, the Company's executed a new credit agreement, which expires in June 2010, allows for aggregate borrowings of up to \$85 million with interest at LIBOR rates plus an incremental factor ranging from 0.75% to 1.25% based on the current funded debt to EBITDA ratio (as defined therein). Under the credit agreement, which includes a \$60 million revolver and a \$25 million one-year term note, the Company is prohibited from paying cash dividends. The Company is also subject to, and is in compliance with, certain financial covenants including a leverage ratio of funded debt to EBITDA (as defined therein) of not more than 3.00 to 1.00. In addition, the Company must maintain consolidated aggregate amounts of cash and cash equivalents (which under the agreement may also include auction rate securities classified as short-term investments) of not less than \$50 million.

---

**Table of Contents**

At September 29, 2007, the Company's shareholders' equity stood at \$847.4 million, down 17% from \$1,016.0 million at the beginning of the period. The main decrease is primarily a result of the repurchase and retirement of \$252.0 million of the Company's stock. This was offset partially by the Company's net earnings of \$33.6 million, the proceeds of \$28.7 million received in connection with shares issued under the Company's stock option and stock purchase plans, and the increase to additional paid-in capital of \$12.9 million associated with the Company's share-based compensation expense and related tax benefits recorded during the period.

The Company believes that its cash and cash equivalents, cash flow from operations and available credit facilities will be sufficient to meet its working capital and investment requirements for the next 12 months.

**Update on Contractual Obligations:** As noted above, the Company adopted FIN 48, *Accounting for Uncertainty in Income Taxes-an Interpretation of FASB Statement No. 109* as of January 1, 2007. At the date of adoption, the Company had approximately \$12.5 million of total gross unrecognized tax benefits. The timing of any payments which could result from these unrecognized tax benefits will depend on a number of factors. Accordingly, the Company cannot make reasonably reliable estimates of the amount and period of potential cash settlements, if any, with taxing authorities.

**Cautionary Statements** This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect the Company's current views with respect to future events and financial performance. The words believe, expect, anticipate, intends, estimate, forecast, project, should and similar expressions are intended to identify these forward-looking statements. All forecasts and projections in this report are forward-looking statements, and are based on management's current expectations of the Company's near-term results, based on current information available pertaining to the Company. The risks which could cause actual results to differ from those contained in such forward looking statements include, without limit, (i) inability to meet customer demands associated with semiconductor industry spending; (ii) the transition to new products, the uncertainty of customer acceptance of new product offerings, and rapid technological and market change; (iii) insufficient, excess or obsolete inventory; (iv) competitive factors, including but not limited to pricing pressures; and (v) the risks described in the Company's Annual Report on Form 10-K for the year ended December 31, 2006 under the headings Risks Relating to our Business and Industry, Manufacturing Risks, International Risks, and Risks Related to the Securities Markets and Ownership of our Securities as well as in the Company's quarterly reports on Form 10-Q and current reports on Form 8-K as filed with the Securities and Exchange Commission.

---

**Table of Contents**

**Item 3: Quantitative and Qualitative Disclosures About Market Risk**

Entegris' principal financial market risks are sensitivities to interest rates and foreign currency exchange rates. The Company's interest-bearing cash equivalents and short-term investments, and long-term debt and short-term borrowings are subject to interest rate fluctuations. Most of its long-term debt at September 29, 2007 carries fixed rates of interest. The Company's cash equivalents and short-term investments are debt instruments with maturities of 24 months or less. A 100 basis point change in interest rates would potentially increase or decrease annual net income by approximately \$0.6 million annually.

The cash flows and earnings of the Company's foreign-based operations are subject to fluctuations in foreign exchange rates. The Company occasionally uses derivative financial instruments to manage the foreign currency exchange rate risks associated with its foreign-based operations. At September 29, 2007, the Company was party to forward contracts to deliver Chinese yuan, Malaysian ringgits, Japanese yen, New Taiwanese dollars, Singapore dollars and Euros with notional values of approximately \$1.2 million, \$16.0 million, \$12.0 million, \$6.0 million, \$4.6 million and \$1.6 million, respectively.

During the first quarter of 2007, the Company entered into a 10-month Japanese yen-based cross currency interest rate swap, with aggregate notional principal amounts of 2.4 billion Japanese yen and \$20 million that matures on November 30, 2007. This swap effectively hedges a portion of the Company's net investment in its Japanese subsidiary. During the term of this transaction, the Company will remit to, and receive from, its counterparty interest payments based on rates that are reset quarterly equal to three-month Japanese LIBOR and three-month U.S. LIBOR rates, respectively. The Company has designated this hedging instrument as a hedge of a portion of the net investment in its Japanese subsidiary, and will use the spot rate method of accounting to value changes of the hedging instrument attributable to currency rate fluctuations. As such, for the nine months ended September 29, 2007, a \$0.9 million adjustment in the fair market value of the hedging instrument related to changes in the spot rate was recorded as a charge to Cumulative translation adjustment in shareholders' equity to offset changes in a portion of the yen-denominated net investment in the Company's Japanese subsidiary. Amounts recorded to foreign currency translation within accumulated other comprehensive loss will remain there until the net investment is disposed. The Company recorded \$0.6 million in interest income during the nine months ended September 29, 2007 in connection with the cross currency interest rate swap.

**Item 4: Controls and Procedures**

(a) Evaluation of disclosure controls and procedures. Disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports that are filed or furnished under the Securities Exchange Act of 1934, as amended (Exchange Act) is recorded, processed, summarized and reported, within the time periods specified in the rules and forms of the Securities & Exchange Commission (SEC). Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports that are filed under the Exchange Act is accumulated and communicated to management, including the chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure. Under the supervision of and with the participation of management, including the chief executive officer and chief financial officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of September 29, 2007. Based on its evaluation and with the exception of the material weakness in internal control over financial reporting referenced below, our management, including our chief executive officer and chief financial officer, concluded that our disclosure controls and procedures were effective as of September 29, 2007.

(b) Changes in internal control over financial reporting. As previously reported in the Company's Annual Report on Form 10-K in connection with the Company's assessment of the effectiveness of our internal control over financial reporting at the end of our last fiscal year, we identified a material weakness in our internal control over financial reporting as of December 31, 2006 related to income taxes. Our policies and procedures did not provide for effective oversight and review of our accounting for income taxes. Specifically, our policies and procedures did not include adequate management review of various income tax calculations, reconciliations

**Table of Contents**

and related supporting documentation to ensure that our accounting for income taxes, including accounting for income taxes associated with acquisitions made by the Company, was in accordance with generally accepted accounting principles. Because of the material weakness described above, management concluded that (i) the Company did not maintain effective internal control over financial reporting as of December 31, 2006, based on the criteria established in "Internal Control Integrated Framework" issued by COSO. The Company's registered independent public accounting firm concurred with management's conclusion as to the existence of this material weakness as of December 31, 2006.

Management, with oversight from the Company's Audit & Finance Committee, is working to address the material weakness disclosed in its Form 10-K and is committed to remediate the material weaknesses as timely as possible. The Company identified the following remediation steps to address the material weakness in its internal controls relating to income taxes noted above:

Hiring additional tax personnel and providing additional training for select tax personnel;

Redesigning and implementing new review and approval procedures and processes associated with all income tax provision workpapers and the consolidated income tax reconciliation schedules; and

Increasing the oversight by our accounting department of income tax reconciliations.

Through September 29, 2007, the Company has taken the following actions related to the remediation steps noted above:

Hired additional tax personnel and had provided additional training for select tax personnel.

Retained an outside consultant to review the Company's tax procedures. The final report from the consultant was received in the third quarter. The report's key recommendations were:

Improve tax process documentation;

Implement standardized workpapers and procedures for tax calculations and reconciliations; and

Refine the Company's accounting records to make information more sensitive to tax reporting needs.

Based on the recommendations of the report, the Company is in the process of redesigning and implementing new review and approval procedures and processes associated with the income tax function, all of which are expected to be put in place in 2007.

Management believes these new policies and procedures, when fully implemented, will be effective in remediating this material weakness. However, the Company's material weakness will not be considered remediated until the new internal controls have been operational for a period of time, are tested and management and the Company's registered independent public accounting firm conclude that these controls are operating effectively.

There were no changes in internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation described.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

The following discussion provides information regarding certain litigation to which the Company was a party that were pending as of September 29, 2007.

As previously disclosed, on March 3, 2003 the Company's predecessor, Mykrolis Corporation, filed a lawsuit against Pall Corporation in the United States District Court for the District of Massachusetts alleging infringement of two of the Company's U.S. patents by certain fluid separation systems and related assemblies used in photolithography applications manufactured and sold by the defendant. The Company's lawsuit also sought a preliminary injunction preventing the defendant from the manufacture, use, sale, offer for sale or importation into the U.S. of any infringing product. On April 30, 2004, the Court issued a preliminary injunction against Pall Corporation and ordered Pall to immediately stop making, using, selling, or offering to sell within the U.S., or importing into the U.S., its PhotoKleen EZD-2 Filter Assembly products or any colorable imitation of those products. On January 18, 2005, the Court issued an order holding Pall Corporation in contempt of court for the violation of the preliminary injunction and ordering Pall to disgorge all profits earned from the sale of its PhotoKleen EZD-2 Filter Assembly products and colorable imitations thereof from the date the preliminary injunction was issued through January 12, 2005. In addition, Pall was also ordered to reimburse Mykrolis for certain of its attorney's fees associated with the contempt and related proceedings. The Court's order also dissolved the preliminary injunction, effective January 12, 2005, based on certain prior art cited by Pall which it alleged raised questions as to the validity of the patents in suit. On February 17, 2005, the Company filed notice of appeal to the U.S. Circuit Court of Appeals for the Federal Circuit appealing the portion of the Court's order that dissolved the preliminary injunction and Pall filed a notice of appeal to that court with respect to the finding of contempt and the award of attorneys' fees. On June 13, 2007 the Court of Appeals issued an opinion dismissing Pall's appeal for lack of jurisdiction and affirming the District Court's order dissolving the preliminary injunction.

On April 6, 2006 the Company filed a lawsuit against Pall Corporation in the United States District Court for the District of Massachusetts alleging infringement of the Company's newly issued U.S. patent No. 7,021,667 by certain filter assembly products used in photolithography applications that are manufactured and sold by the defendant. The Company's lawsuit also seeks a preliminary injunction preventing the defendant from the manufacture, use, sale, offer for sale or importation into the U.S. of the infringing products. On October 23, 2006 the Company's motion for preliminary injunction was argued before the court; a decision on this motion is pending.

On August 23, 2006 the Company filed a lawsuit against Pall Corporation in the United States District Court for the District of Massachusetts alleging infringement of the Company's newly issued U.S. patent No. 7,037,424 by certain fluid separation modules and related separation apparatus, including the product known as the EZD-3 Filter Assembly, used in photolithography applications that are manufactured and sold by the defendant. It is believed that the EZD-3 Filter Assembly was introduced into the market by the defendant in response to the action brought by the Company in March of 2003 as described above. This case is currently in the preliminary stages.

As previously disclosed, on December 16, 2005 Pall Corporation filed suit against the Company in U.S. District Court for the Eastern District of New York alleging patent infringement. Specifically, the suit alleges infringement of two of plaintiff's patents by one of the Company's gas filtration products and by the packaging for certain of the Company's liquid filtration products. Both products and their predecessor products have been on the market for a number of years. The Company intends to vigorously defend this suit and believes that it will ultimately prevail. This case is currently in the discovery stage.

On May, 4, 2007 Pall Corporation filed a lawsuit against the Company in the U.S. District Court for the Eastern District of New York alleging patent infringement. Specifically, the suit alleges that certain of the Company's point-of-use filtration products infringe a newly issued Pall patent, as well as three older Pall patents. Pall's action, which relates only to the U.S., asserts that "on information and belief" the Company's Impact 2 and

Impact Plus point-of-use photoresist filters infringe a patent issued to Pall on March 27, 2007, as well as three older patents. The Company intends to vigorously defend this suit and believes that it will ultimately prevail. This case is currently in the preliminary stage.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.****Issuer Purchases of Equity Securities**

The following table provides information concerning shares of the Company's Common Stock \$0.01 par value purchased during the three months ended September 29, 2007.

Period	(a) Total Number of Shares Purchased <sup>(1)</sup>	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
July 2007	0	N/A	0	\$ 50,000,000
August 2007	421,424 <sup>(1)</sup>	N/A <sup>(2)</sup>	421,424	\$ 49,437,547 <sup>(2)</sup>
September 2007	0	N/A	0	\$ 49,437,547
Total	421,424	N/A	421,424	\$ 49,437,547

(1) The Company announced on August 31, 2006 a plan to repurchase up to \$150 million of its outstanding common stock over a twelve to eighteen-month period. \$50 million of this stock repurchase program was to be pursuant to an Accelerated Stock Buyback Agreement (ASRA) with Goldman Sachs & Co. (GS), \$50 million to be pursuant to a Collared Accelerated Stock Buyback Agreement (CASRA) with GS and \$50 million pursuant to a Rule 10b5-1 trading plan to be established by the Company after the completion of the ASRA and the CASRA. On August 9, 2007, the Company received 421,424 shares at no additional cost pursuant to the CASRA.

The Company made initial payments totaling \$100 million to Goldman Sachs under the ASRA and the CASRA in 2006.

(2) In August 2007, the Company received 421,424 shares pursuant to the CASRA at no additional cost and paid an additional \$0.6 million to GS that was required under the ASRA plan, reducing the amount available for future repurchases to \$49.4 million. Both the ASRA and CASRA plans were completed in August 2007. Upon completion of the ASRA and the CASRA, the Company had acquired 9,301,592 shares of common stock pursuant to such plans.
