ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary (consisting only of normal recurring accruals) to present fairly the financial information contained therein. These statements do not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP) for annual periods and should be read in conjunction with the Company's audited consolidated financial statements and related notes for the year ended December 31, 2008. The Company prepared the unaudited condensed consolidated financial statements following the requirements of the Securities and Exchange Commission for interim reporting. As permitted under those rules, certain footnotes or other financial information that are normally required by GAAP can be condensed or omitted. The results of operations for the three and six month periods ended June 30, 2009 are not necessarily indicative of the results to be expected for the year ending December 31, 2009 or any other period(s).

Reclassifications

Certain reclassifications of prior year amounts have been made to conform to the current year presentation.

All prior period information has been retrospectively adjusted to reflect the impact of the adoptions of Financial Accounting Standards Board (FASB) Staff Position No. APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (FSP APB 14-1) and Statement of Financial Accounting Standards No. 160, *Accounting and Reporting of Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51* (SFAS No. 160) in the first quarter of 2009.

Goodwill

In July 2009, the Company decided to change the timing of the annual impairment testing for goodwill from January 1 to October 1 of each year as a preferable method of applying the provisions of Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). Accordingly, the Company expects to perform its next annual impairment assessment of goodwill in the fourth quarter of 2009. The Company decided to adopt this change in timing in order to assess the recorded values of goodwill for potential impairment at a time closer to its fiscal year end reporting date. The Company's management believes this change is preferable in reducing the potential risk that an undetected impairment indicator could occur in between the timing of the Company's annual impairment test and the preparation of its year end financial statements. This change has no effect on reported earnings for any current or prior periods.

Subsequent Events

The Company has evaluated subsequent events through August 7, 2009, the date of issuance of the unaudited condensed consolidated financial statements, and disclosed, if necessary, any material subsequent events in the notes to these financial statements.

Recently Adopted Accounting Standards

In May 2009, the FASB issued Statement of Financial Accounting Standards No. 165, *Subsequent Events* (SFAS No. 165), which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. SFAS No. 165 became effective for interim periods and fiscal years ending after June 15, 2009. The Company adopted the provisions of SFAS No. 165 in the second quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In April 2009, the FASB issued Staff Position No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (FSP FAS 107-1 and APB 28-1), which requires publicly traded companies to include in their interim financial reports certain disclosures about the carrying value and fair value of financial instruments previously required only in annual financial statements and to disclose changes in significant assumptions used to calculate the fair value of financial instruments. FSP FAS 107-1 and APB 28-1 is effective for all interim reporting periods ending after June 15, 2009, with early adoption permitted for interim reporting periods ending after March 15, 2009. The Company adopted FSP FAS 107-1 and APB 28-1 in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In November 2008, the FASB ratified the consensus reached by the Emerging Issues Task Force (EITF) in EITF Issue No. 08-7, *Accounting for Defensive Intangible Assets* (EITF 08-7), which clarifies how to account for acquired intangible assets subsequent to initial measurement in situations in which an entity does not intend to actively use the assets but intends to hold the asset to prevent others from obtaining access to the asset (a defensive intangible asset), except for intangible assets that are used in research and development activities. EITF 08-7 requires that a defensive intangible asset be accounted for as a separate unit of accounting and assigned a useful life that reflects the entity's consumption of the expected benefits related to that asset. EITF 08-7 became effective for intangible assets acquired on or after December 15, 2008. The Company adopted the provisions of EITF 08-7 in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In May 2008, the FASB issued FSP APB 14-1, which clarifies the accounting for convertible debt instruments that may be settled fully or partially in cash upon conversion. FSP APB 14-1 requires entities to separately measure and account for the liability and equity components of qualifying convertible debt and amortize the value of the equity component to interest cost over the estimated life of the convertible debt instrument. By amortizing the value of the equity component, an entity will effectively recognize interest cost at its non-convertible debt borrowing rate. FSP APB 14-1 also requires re-measurement of the liability and equity components upon extinguishment of a convertible debt instrument, which may result in a gain or loss recognized in the financial statements for the extinguishment of the liability component. FSP APB 14-1 requires retrospective application for all instruments that were outstanding during any periods presented. FSP APB 14-1 became effective for fiscal years beginning after December 15, 2008. The Company adopted FSP APB 14-1 on January 1, 2009 and the adoption impacted both current year and historical accounting for the Company's 1.50% Convertible Senior Notes due 2026 (2026 Convertible Notes), resulting in an increase of \$5.9 million and \$12.4 million, respectively, in interest expense for the three and six month periods ended June 30, 2009 and a reduction of \$2.2 million and \$4.7 million, respectively, in the provision for income taxes, and for the three and six month periods ended June 30, 2008, an increase of \$6.2 million and \$12.3 million, respectively, in interest expense and a reduction of \$2.3 million and \$4.7 million, respectively, in the provision for income taxes. The adoption also resulted in an \$80.4 million increase in additional paid-in capital, a \$64.8 million reduction in long-term convertible notes, a \$24.9 million increase in deferred tax liabilities, a \$0.5 million increase in non-current assets and a \$40.0 million decrease in retained earnings as of January 1, 2009. The impact on basic and diluted earnings per share for the three and six month periods ended June 30, 2009 is a reduction of \$0.01 and \$0.03, respectively, and the impact on basic and diluted earnings per share for the three and six month periods ended June 30, 2008 is a reduction of \$0.01 and \$0.02, respectively.

In June 2008, the FASB ratified the consensus reached by the EITF in EITF Issue No. 07-5, *Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock* (EITF 07-5), which clarifies the criteria for determining whether certain financial instruments should be classified as derivative instruments or equity instruments under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133). EITF 07-5 became effective for fiscal years beginning after December 15, 2008. The Company adopted the provisions of EITF 07-5 in the first quarter of 2009 and, as required, evaluated the equity component of its 2026 Convertible Notes under the provisions of EITF 07-5 in connection with the adoption of FSP APB 14-1. The Company determined that the conversion feature of its 2026 Convertible Notes is indexed to its own stock and is therefore classified as an equity instrument.

In April 2008, the FASB issued Staff Position No. FAS 142-3, *Determination of the Useful Life of Intangible Assets* (FSP FAS 142-3), which amends the guidance for estimating the useful lives of recognized intangible assets and requires additional disclosure related to renewing or extending the useful lives of recognized intangible assets under SFAS No. 142. FSP FAS 142-3 became effective for fiscal years and interim periods beginning after December 15, 2008. The Company adopted the provisions of FSP FAS 142-3 in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB Statement No. 133* (SFAS No. 161), which requires entities to disclose: (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS No. 161 became effective for fiscal years and interim periods beginning after November 15, 2008. The Company adopted the provisions of SFAS No. 161 in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141 (revised), *Business*

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Combinations (SFAS No. 141R), which significantly changes the accounting and reporting requirements for business combination transactions, including capitalization of in-process research and development assets and expensing acquisition costs as incurred. SFAS No. 141R became effective for business combination transactions occurring in fiscal years beginning after December 15, 2008. The Company adopted the provisions of SFAS No. 141R in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, which changes the accounting and financial reporting of ownership interests in subsidiaries held by parties other than the parent, and the allocation of net income attributable to the parent and the noncontrolling interest. SFAS No. 160 also establishes disclosure requirements to separately identify the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 became effective for fiscal years beginning after December 15, 2008. The Company adopted the provisions of SFAS No. 160 in the first quarter of 2009. The adoption of SFAS No. 160 changed the presentation format of the Company's consolidated statements of earnings and consolidated balance sheets, but did not have an impact on net earnings or equity attributable to the Company's stockholders.

In December 2007, the FASB ratified the consensus reached by the EITF in EITF Issue No. 07-1, *Accounting for Collaborative Arrangements* (EITF 07-1), which defines collaborative arrangements and requires that transactions with third parties that do not participate in the arrangement be reported in the appropriate income statement line items pursuant to the guidance in EITF 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*. Income statement classification of payments made between participants of a collaborative arrangement are to be based on other applicable authoritative accounting literature. If the payments are not within the scope or analogy of other authoritative accounting literature, a reasonable, rational and consistent accounting policy is to be elected. EITF 07-1 became effective for fiscal years beginning after December 15, 2008 and applied as a change in accounting principle to all prior periods retrospectively for all collaborative arrangements existing as of the effective date. The Company adopted the provisions of EITF 07-1 in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

New Accounting Standards Not Yet Adopted

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 167, *Amendments to FASB Interpretation No. 46(R)* (SFAS No. 167), which amends FASB Interpretation No. 46(R) to require an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. This analysis identifies the primary beneficiary of a variable interest entity as the enterprise that has both the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance, and the obligation to absorb losses or the right to receive benefits of the entity that could potentially be significant to the variable interest entity. SFAS No. 167 also requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and eliminates the quantitative approach previously required for determining the primary beneficiary. SFAS No. 167 will be effective for fiscal years beginning after November 15, 2009, which will be the Company's fiscal year 2010. The Company does not expect that the adoption of SFAS No. 167 will have a material impact on the Company's consolidated financial statements.

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 168, *The FASB Accounting Standards CodificationTM and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No. 162* (SFAS No. 168), which establishes the FASB Accounting Standards CodificationTM as the single source of authoritative U.S. GAAP to be applied by nongovernmental entities and modifies the U.S. GAAP hierarchy to only two levels: authoritative and nonauthoritative. SFAS No. 168 will be effective for interim periods and fiscal years ending after September 15, 2009, which will be the Company's fiscal third quarter ending on September 30, 2009. The Company does not expect that the adoption of SFAS No. 168 will have a material impact on the Company's consolidated financial statements.

In December 2008, the FASB issued Staff Position No. FAS 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets* (FSP FAS 132(R)-1), which amends FASB Statement No. 132 (revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits*, and provides guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. FSP FAS 132(R)-1 requires an employer to disclose information about how investment allocation decisions are made, and to disclose separately for pension plans and other postretirement benefit plans the fair value of each major category of plan assets based on the nature and risks of assets as of each annual reporting date for which a statement of financial position is presented and information that enables users of financial statements to assess the inputs and valuation techniques used to develop fair value measurements of plan assets at the annual reporting date. The disclosures about plan assets are to be provided for fiscal years ending after December 15, 2009, which will be the Company's fiscal year 2009. Upon initial adoption, the provisions are not required for earlier periods that are presented for

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

comparative purposes. The Company does not expect that the adoption of FSP FAS 132(R)-1 will have a material impact on the Company's consolidated financial statements.

Note 2: Aczone® Asset Purchase

On July 11, 2008, the Company completed the acquisition of assets related to Aczone® (dapson) gel 5%, a topical treatment for acne vulgaris, from QLT USA, Inc. (QLT) for approximately \$150.0 million. The acquisition was funded from cash and equivalents balances. The Company acquired QLT's right, title and interest in and to the intellectual property, assigned contracts, registrations and inventories related to Aczone®, which is approved for sale in both the United States and Canada for the treatment of certain dermatological conditions. The Company accounted for the acquisition as a purchase of net assets.

The Company determined that the assets acquired consist of product rights for developed technology for Aczone® of \$145.6 million and inventories of \$4.4 million. The useful life of the developed technology was determined to be approximately eight years. The Company believes the fair values assigned to the assets acquired were based on reasonable assumptions.

Note 3: Restructuring Charges and Integration and Transition Costs

2009 Restructuring Plan

On February 4, 2009, the Company announced a restructuring plan that involves a workforce reduction of approximately 460 employees, primarily in the United States and Europe. The majority of the employees affected by the restructuring plan are U.S. urology sales and marketing personnel as a result of the Company's decision to focus on the urology specialty and to seek a partner to promote *Sanctura XR* to general practitioners, and marketing personnel in the United States and Europe as the Company adjusts its back-office structures to a reduced short-term sales outlook for some businesses. The restructuring plan also includes modest workforce reductions in other functions as the Company re-engineers its processes to increase efficiency and productivity.

As part of the restructuring plan, the Company modified the outstanding stock options issued in its February 2008 full-round employee stock option grant. The stock options were originally granted with an exercise price of \$64.47 with a standard four year graded vesting term, a ten year contractual term, and standard 90 day expiration upon termination of employment provisions. These options were modified to be immediately vested in full and to remove the 90 day expiration upon termination of employment provision. Because the modified awards became fully vested and there was no future derived service period, all unamortized compensation expense related to the original grant and the additional compensation expense attributable to the modification of the awards was recognized in full on the modification date.

In addition, the contractual provisions of outstanding stock options, other than the February 2008 full-round employee stock option grant, held by employees impacted by the workforce reduction were modified to extend the stock option expiration dates. Under the original contractual provisions, outstanding stock options held by employees involved in a workforce reduction automatically become fully vested upon termination of employment and the stock options expire after the earlier of 90 days from termination of employment or the remaining stock option contractual term. Under the modified terms, stock options for the impacted employees will expire after the earlier of three years from termination of employment or the remaining contractual term. All unamortized compensation expense related to the original stock option awards plus the incremental compensation expense associated with the modifications will be recognized ratably from the modification date to the employees' expected termination date.

The Company estimates that the total pre-tax charges related to the 2009 restructuring plan will be between \$119.0 million and \$126.0 million, of which \$40.0 million to \$45.0 million are expected to be cash expenditures. The total estimated pre-tax charges consist primarily of employee severance and other one-time termination benefits of \$40.0 million to \$45.0 million, asset write-offs of \$2.0 million to \$3.0 million, costs associated with the modification of stock options issued in the February 2008 full-round employee stock option grant of approximately \$73.0 million and costs associated with the modification of stock options, other than the February 2008 full-round employee stock option grant, for employees impacted by the workforce reduction of \$4.0 million to \$5.0 million.

Edgar Filing: ALLERGAN INC - Form 10-Q

The Company began to record costs associated with the 2009 restructuring plan in the first quarter of 2009 and expects to continue to recognize costs through the fourth quarter of 2009. As of June 30, 2009, the Company substantially completed all activities related to the restructuring plan. During the three month period ended June 30, 2009, the Company recorded pre-tax restructuring charges of \$0.7 million and recognized a total of \$0.6 million related to employee stock option modifications, consisting of \$0.3 million in selling, general and administrative (SG&A) expenses and \$0.3 million in research

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

and development (R&D) expenses. During the six month period ended June 30, 2009, the Company recorded pre-tax restructuring charges of \$39.1 million and recognized a total of \$77.6 million related to employee stock option modifications, consisting of \$5.0 million of cost of sales, \$52.0 million in SG&A and \$20.6 million in R&D expenses, and recognized \$2.2 million of asset write-offs in SG&A expenses.

The following table presents the restructuring charges related to the 2009 restructuring plan during the six month period ended June 30, 2009:

	Employee Severance	Other (in millions)	Total
Net charge during the six month period ended June 30, 2009	\$ 32.6	\$ 6.5	\$ 39.1
Spending	(21.5)	(5.5)	(27.0)
Balance at June 30, 2009 (included in Other accrued expenses)	\$ 11.1	\$ 1.0	\$ 12.1

Restructuring and Phased Closure of Arklow Facility

On January 30, 2008, the Company announced the phased closure of its breast implant manufacturing facility at Arklow, Ireland and the transfer of production to the Company's manufacturing plant in Costa Rica. The Arklow facility was acquired by the Company in connection with its 2006 acquisition of Inamed Corporation (Inamed) and employed approximately 360 people. As of March 31, 2009, all production activities at the Arklow facility had ceased. Based on current foreign currency exchange rates, the Company estimates that the total pre-tax restructuring and other transition related costs associated with the closure of the Arklow manufacturing facility will be between \$59.0 million and \$67.0 million, consisting primarily of employee severance and other one-time termination benefits of \$30.0 million to \$33.0 million, asset impairments and accelerated depreciation of \$15.0 million to \$17.0 million, and contract termination and other costs of \$14.0 million to \$17.0 million. The Company expects that \$44.0 million to \$50.0 million of the pre-tax charges will be cash expenditures. Certain employee retention termination benefits and accelerated depreciation costs related to inventory production in Arklow will be capitalized to inventory as incurred and recognized as cost of sales in the periods the related products are sold.

The Company began to record costs associated with the closure of the Arklow manufacturing facility in the first quarter of 2008 and expects to continue to recognize costs through the fourth quarter of 2009. The restructuring charges primarily consist of employee severance, one-time termination benefits, contract termination costs and other costs related to the closure of the Arklow manufacturing facility. During the three and six month periods ended June 30, 2009, the Company recorded \$0.2 million and \$4.2 million of pre-tax restructuring charges, respectively. During the three and six month periods ended June 30, 2008, the Company recorded \$0.1 million and \$27.6 million of pre-tax restructuring charges, respectively. During the three and six month periods ended June 30, 2009, the Company recognized \$7.2 million and \$11.6 million, respectively, of cost of sales for the rollout of capitalized employee retention termination benefits and accelerated depreciation costs related to inventory production. During the six month period ended June 30, 2009, the Company also recognized \$0.1 million of R&D expenses related to one-time termination benefits. During the three month period ended June 30, 2008, the Company recognized \$0.1 million of cost of sales, \$0.1 million of SG&A expenses and \$0.1 million of R&D expenses related to one-time termination benefits. During the six month period ended June 30, 2008, the Company recognized \$0.1 million of cost of sales, \$0.7 million of SG&A expenses and \$0.2 million of R&D expenses related to one-time termination benefits and asset impairments.

At June 30, 2009, \$2.7 million of capitalized employee retention termination benefits and accelerated depreciation costs are included in Inventories in the accompanying unaudited condensed consolidated balance sheet.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the restructuring activities related to the phased closure of the Arklow facility through June 30, 2009:

	Employee Severance	Contract Termination Costs	Other	Total
	(in millions)			
Net charge during 2008	\$ 20.5	\$ 5.6	\$ 1.1	\$ 27.2
Spending	(7.2)	(0.5)	(1.0)	(8.7)
Foreign exchange translation effects	(1.8)	(0.6)		(2.4)
Balance at December 31, 2008	11.5	4.5	0.1	16.1
Net charge during the six month period ended June 30, 2009	3.4		0.8	4.2
Spending	(16.1)	(0.5)	(0.1)	(16.7)
Foreign exchange translation effects	(0.6)		0.1	(0.5)
Balance at June 30, 2009 (included in Other accrued expenses) (a)	\$ (1.8)	\$ 4.0	\$ 0.9	\$ 3.1

(a) Total accrued expenses are net of expected statutory employee severance reimbursements from government sponsored social benefit programs of approximately \$2.2 million.

Other Restructuring Activities and Integration Costs

Included in the three and six month periods ended June 30, 2009 are \$0.1 million of restructuring charges and a \$0.3 million restructuring charge reversal, respectively, related to the Company's closure of its collagen manufacturing facility in Fremont, California. Included in the six month period ended June 30, 2009 are \$0.1 million of restructuring charges for an abandoned leased facility related to the Company's fiscal year 2005 restructuring and streamlining of its European operations.

Included in the three and six month periods ended June 30, 2008 are \$0.4 million of restructuring charges related to the Company's closure of its collagen manufacturing facility in Fremont, California, and \$3.1 million of restructuring charges for an abandoned leased facility related to the Company's fiscal year 2005 restructuring and streamlining of its European operations. Included in the three and six month periods ended June 30, 2008 are \$5.8 million and \$6.6 million, respectively, of restructuring charges related to the Company's 2007 acquisition of Groupe Cornéal Laboratoires (Cornéal). Included in the six month period ended June 30, 2008 are \$0.1 million of restructuring charges related to the Company's 2007 acquisition of EndoArt SA.

Included in the three and six month periods ended June 30, 2009 are \$0.2 million of SG&A expenses related to transaction costs associated with the Company's joint venture investment in Korea announced in July 2009 and \$0.4 million of SG&A expenses related to integration costs associated with the Cornéal acquisition. Included in the three month period ended June 30, 2008 are \$0.1 million of cost of sales and \$1.2 million of SG&A expenses, respectively, and in the six month period ended June 30, 2008 are \$0.1 million of cost of sales and \$1.8 million of SG&A expenses, respectively, related to integration costs associated with the Company's 2007 acquisitions of Esprit Pharma Holding Company, Inc. and Cornéal.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4: Intangibles**

At June 30, 2009 and December 31, 2008, the components of amortizable and unamortizable intangibles and certain other related information were as follows:

	June 30, 2009			December 31, 2008		
	Gross Amount (in millions)	Accumulated Amortization	Weighted Average Amortization Period (in years)	Gross Amount (in millions)	Accumulated Amortization	Weighted Average Amortization Period (in years)
Amortizable Intangible Assets:						
Developed technology	\$ 1,390.9	\$ (265.6)	14.3	\$ 1,390.8	\$ (215.0)	14.3
Customer relationships	42.3	(41.5)	3.1	42.3	(37.8)	3.1
Licensing	223.8	(90.5)	10.0	223.5	(78.9)	10.0
Trademarks	27.3	(17.3)	6.3	27.3	(14.9)	6.3
Core technology	190.5	(42.9)	15.2	190.4	(36.5)	15.2
	1,874.8	(457.8)	13.5	1,874.3	(383.1)	13.5
Unamortizable Intangible Assets:						
Business licenses	0.7			0.7		
	\$ 1,875.5	\$ (457.8)		\$ 1,875.0	\$ (383.1)	

Developed technology consists primarily of current product offerings, primarily saline and silicone gel breast implants, obesity intervention products, dermal fillers, skin care and urologics products acquired in connection with business combinations and asset acquisitions. Customer relationship assets consist of the estimated value of relationships with customers acquired in connection with the Inamed acquisition, primarily in the breast implant market in the United States. Licensing assets consist primarily of capitalized payments to third party licensors related to the achievement of regulatory approvals to commercialize products in specified markets and up-front payments associated with royalty obligations for products that have achieved regulatory approval for marketing. Core technology consists of proprietary technology associated with silicone gel breast implants, gastric bands and intragastric balloon systems acquired in connection with the Inamed acquisition, dermal filler technology acquired in connection with the Cornéal acquisition, gastric band technology acquired in connection with the EndoArt acquisition, and a drug delivery technology acquired in connection with the Company's 2003 acquisition of Oculex Pharmaceuticals, Inc.

The following table provides amortization expense by major categories of acquired amortizable intangible assets for the three and six month periods ended June 30, 2009 and 2008, respectively:

	Three months ended		Six months ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
	(in millions)		(in millions)	
Developed technology	\$ 25.2	\$ 22.9	\$ 50.4	\$ 45.6
Customer relationships	0.2	3.4	3.6	6.8
Licensing	5.8	5.0	11.6	9.4
Trademarks	1.1	1.2	2.2	2.4
Core technology	3.2	3.3	6.3	6.5

Edgar Filing: ALLERGAN INC - Form 10-Q

\$ 35.5 \$ 35.8 \$ 74.1 \$ 70.7

Amortization expense related to acquired intangible assets generally benefits multiple business functions within the Company, such as the Company's ability to sell, manufacture, research, market and distribute products, compounds and intellectual property. The amount of amortization expense excluded from cost of sales consists primarily of amounts amortized with respect to developed technology and licensing intangible assets.

Estimated amortization expense is \$145.7 million for 2009, \$141.8 million for 2010, \$138.3 million for 2011, \$133.0 million for 2012 and \$120.0 million for 2013.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 5: Inventories**

Components of inventories were:

	June 30, 2009	December 31, 2008
	(in millions)	
Finished products	\$ 154.5	\$ 174.9
Work in process	32.0	36.8
Raw materials	49.4	50.8
Total	\$ 235.9	\$ 262.5

At June 30, 2009 and December 31, 2008, approximately \$7.1 million and \$11.2 million, respectively, of the Company's finished goods medical device inventories, primarily breast implants, were held on consignment at a large number of doctors' offices, clinics and hospitals worldwide. The value and quantity at any one location are not significant.

Note 6: Convertible Notes

In 2006, the Company issued the 2026 Convertible Notes for an aggregate principal amount of \$750.0 million. The 2026 Convertible Notes are unsecured and pay interest semi-annually on the principal amount of the notes at a rate of 1.50% per annum. The 2026 Convertible Notes will be convertible into cash and, if applicable, shares of the Company's common stock based on an initial conversion rate of 15.7904 shares of the Company's common stock per \$1,000 principal amount of the 2026 Convertible Notes if the Company's stock price reaches certain specified thresholds. As of June 30, 2009, the conversion criteria had not been met. The Company was not permitted to redeem the 2026 Convertible Notes prior to April 5, 2009, will be permitted to redeem the 2026 Convertible Notes from and after April 5, 2009 to April 4, 2011 if the closing price of its common stock reaches a specified threshold, and will be permitted to redeem the 2026 Convertible Notes at any time on or after April 5, 2011. Holders of the 2026 Convertible Notes will also be able to require the Company to redeem the 2026 Convertible Notes on April 1, 2011, April 1, 2016 and April 1, 2021 or upon a change in control of the Company. The 2026 Convertible Notes mature on April 1, 2026, unless previously redeemed by the Company or earlier converted by the note holders.

The Company accounts for the liability and equity components of the 2026 Convertible Notes in accordance with FSP APB 14-1. As of June 30, 2009, the carrying value of the liability component is \$605.3 million with an effective interest rate of 5.59%. The difference between the carrying value of the liability component and the principal amount of the 2026 Convertible Notes of \$649.7 million is recorded as debt discount and is being amortized to interest expense through the first noteholder put date in April 2011.

In the first quarter of 2009, the Company paid \$98.3 million to repurchase \$100.3 million principal amount of the 2026 Convertible Notes with a carrying value of \$92.3 million and a calculated fair value of approximately \$97.0 million. The Company recognized a \$4.7 million loss on extinguishment of the convertible debt. In addition, the Company wrote off \$0.6 million of related unamortized deferred debt issuances costs as loss on extinguishment of the convertible debt. The difference between the amount paid to repurchase the 2026 Convertible Notes and the calculated fair value of the liability component was recognized as a reduction to additional paid in capital, net of the effect of deferred taxes.

Note 7: Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally less than the U.S. federal statutory rate, primarily because of lower tax rates in certain non-U.S. jurisdictions, R&D tax credits available in the United States and other foreign jurisdictions and deductions available in the United States for domestic production activities. The effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pre-tax earnings in the various tax jurisdictions in which the Company operates, valuation allowances

Edgar Filing: ALLERGAN INC - Form 10-Q

against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, utilization of R&D tax credits and changes in or the interpretation of tax laws in jurisdictions where the Company conducts business. The Company recognizes deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of its assets and liabilities along with net operating loss and tax credit carryovers.

The Company records a valuation allowance against its deferred tax assets to reduce the net carrying value to an amount that it believes is more likely than not to be realized. When the Company establishes or reduces the valuation allowance against its deferred tax assets, the provision for income taxes will increase or decrease, respectively, in the period such determination is made. Valuation allowances against deferred tax assets were \$8.4 million as of June 30, 2009 and December 31, 2008.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In February 2009, the California Legislature enacted 2009-2010 budget legislation containing various California tax law changes including an election to apply a single sales factor apportionment formula for taxable years beginning on or after January 1, 2011. The Company anticipates making the election and as a result, the state and federal deferred tax assets and deferred tax liabilities have been re-determined to reflect an adjustment to the resulting tax rate. The impact of the adjustment was an increase to the provision for income taxes of \$1.5 million which was reflected in the first quarter of 2009.

The total amount of unrecognized tax benefits was \$40.2 million and \$47.5 million as of June 30, 2009 and December 31, 2008, respectively. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was \$38.2 million and \$42.0 million as of June 30, 2009 and December 31, 2008, respectively. The Company expects that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities will decrease by approximately \$17.6 million due to the settlement of an income tax audit in the United States.

Total interest accrued related to uncertainty in income taxes included in the Company's unaudited condensed consolidated balance sheet was \$5.9 million and \$12.8 million as of June 30, 2009 and December 31, 2008, respectively.

The Company has not provided for withholding and U.S. taxes for the unremitted earnings of certain non-U.S. subsidiaries because it has currently reinvested these earnings indefinitely in these foreign operations. At December 31, 2008, the Company had approximately \$1,630.9 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Income tax expense would be incurred if these funds were remitted to the United States. It is not practicable to estimate the amount of the deferred tax liability on such unremitted earnings. Upon remittance, certain foreign countries impose withholding taxes that are then available, subject to certain limitations, for use as credits against the Company's U.S. tax liability, if any. The Company annually updates its estimate of unremitted earnings outside the United States after the completion of each fiscal year.

Note 8: Share-Based Compensation

The Company recognizes compensation expense for all share-based awards made to employees and directors. The fair value of share-based awards is estimated at the grant date using the Black-Scholes option-pricing model and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period using the straight-line single option method. The fair value of modifications to share-based awards is generally estimated using a lattice model.

The determination of fair value using the Black-Scholes and lattice option-pricing models is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors. The Company estimates stock price volatility based on an equal weighting of the historical average over the expected life of the award and the average implied volatility of at-the-money options traded in the open market. The Company estimates employee stock option exercise behavior based on actual historical exercise activity and assumptions regarding future exercise activity of unexercised, outstanding options.

Share-based compensation expense is recognized only for those awards that are ultimately expected to vest, and the Company has applied an estimated forfeiture rate to unvested awards for the purpose of calculating compensation cost. These estimates will be revised in future periods if actual forfeitures differ from the estimates. Changes in forfeiture estimates impact compensation cost in the period in which the change in estimate occurs.

For the three and six month periods ended June 30, 2009 and 2008, share-based compensation expense was as follows:

Three months ended		Six months ended	
June 30,	June 30,	June 30,	June 30,
2009	2008	2009	2008
(in millions)		(in millions)	

Edgar Filing: ALLERGAN INC - Form 10-Q

Cost of sales	\$ 1.5	\$ 2.4	\$ 8.2	\$ 4.2
Selling, general and administrative	12.2	15.0	78.1	31.4
Research and development	4.5	5.2	30.1	11.6
Pre-tax share-based compensation expense	18.2	22.6	116.4	47.2
Income tax benefit	6.1	8.0	37.9	16.9
Net share-based compensation expense	\$ 12.1	\$ 14.6	\$ 78.5	\$ 30.3

Share-based compensation expense for the three and six month periods ended June 30, 2009 includes \$0.6 million and \$77.6 million, respectively, of pre-tax compensation expense from stock option modifications related to the 2009 restructuring plan.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of June 30, 2009, total compensation cost related to non-vested stock options and restricted stock not yet recognized was approximately \$129.2 million, which is expected to be recognized over the next 48 months (35 months on a weighted-average basis). The Company has not capitalized as part of inventory any share-based compensation costs because such costs were negligible as of June 30, 2009.

Note 9: Employee Retirement and Other Benefit Plans

The Company sponsors various qualified defined benefit pension plans covering a substantial portion of its employees. In addition, the Company sponsors two supplemental nonqualified plans covering certain management employees and officers and one retiree health plan covering U.S. retirees and dependents.

Components of net periodic benefit cost for the three and six month periods ended June 30, 2009 and 2008, respectively, were as follows:

	Three months ended			
	Pension Benefits		Other Postretirement Benefits	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
	(in millions)		(in millions)	
Service cost	\$ 5.7	\$ 6.4	\$ 0.4	\$ 0.4
Interest cost	9.3	8.8	0.6	0.6
Expected return on plan assets	(10.7)	(10.7)		
Amortization of prior service cost				(0.1)
Recognized net actuarial loss	3.2	1.6		
Net periodic benefit cost	\$ 7.5	\$ 6.1	\$ 1.0	\$ 0.9

	Six months ended			
	Pension Benefits		Other Postretirement Benefits	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
	(in millions)		(in millions)	
Service cost	\$ 11.3	\$ 12.8	\$ 0.8	\$ 0.8
Interest cost	18.5	17.6	1.2	1.2
Expected return on plan assets	(21.3)	(21.4)		
Amortization of prior service cost			(0.1)	(0.2)
Recognized net actuarial loss	6.3	3.2		
Net periodic benefit cost	\$ 14.8	\$ 12.2	\$ 1.9	\$ 1.8

In 2009, the Company expects to pay contributions of between \$10.0 million and \$15.0 million for its U.S. and non-U.S. pension plans and between \$1.0 million and \$2.0 million for its other postretirement plan.

Note 10: Legal Proceedings

Edgar Filing: ALLERGAN INC - Form 10-Q

The following supplements and amends the discussion set forth in Note 10 Legal Proceedings in the Company's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2009 and in Note 14 Legal Proceedings in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

In July 2008, a complaint entitled Kramer, Bryant, Spears, Doolittle, Clark, Whidden, Powell, Moore, Hennessey, Sody, Breeding, Downey, Underwood-Boswell, Reed-Momot, Purdon & Hahn v. Allergan, Inc. was filed in the Superior Court for the State of California for the County of Orange. The complaint makes allegations against the Company relating to *Botox*[®] and *Botox*[®] Cosmetic including failure to warn, manufacturing defects, negligence, breach of implied and express warranties, deceit by concealment and negligent misrepresentation and seeks damages, attorneys' fees and costs. In 2009, the plaintiffs filed requests for dismissal without prejudice as to plaintiffs Hennessey, Hahn, Underwood-Boswell, Purdon, Moore and Clark and the court dismissed these plaintiffs without prejudice.

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In March 2008, the Company received service of a Subpoena Duces Tecum from the U.S. Attorney, U.S. Department of Justice, Northern District of Georgia (DOJ). The subpoena requests the production of documents relating to the Company's sales and marketing practices in connection with *Botox*[®].

The Company is involved in various other lawsuits and claims arising in the ordinary course of business. These other matters are, in the opinion of management, immaterial both individually and in the aggregate with respect to the Company's consolidated financial position, liquidity or results of operations.

Because of the uncertainties related to the incurrence, amount and range of loss on any pending litigation, investigation, inquiry or claim, management is currently unable to predict the ultimate outcome of any litigation, investigation, inquiry or claim, determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome. The Company believes however, that the liability, if any, resulting from the aggregate amount of uninsured damages for any outstanding litigation, investigation or claim, other than the inquiry being conducted by the DOJ discussed herein or any related qui tam or other action and in Note 11, Contingencies, will not have a material adverse effect on the Company's consolidated financial position, liquidity or results of operations. However, an adverse ruling in a patent infringement lawsuit involving the Company could materially affect the Company's ability to sell one or more of its products or could result in additional competition. In view of the unpredictable nature of such matters, the Company cannot provide any assurances regarding the outcome of any litigation, investigation, inquiry or claim to which the Company is a party or the impact on the Company of an adverse ruling in such matters.

Note 11: Contingencies

During fiscal year 2008, the Company incurred approximately \$25.7 million of costs associated with the DOJ's inquiry discussed in Note 10, Legal Proceedings above. During the three and six month periods ended June 30, 2009, the Company incurred \$7.4 million and \$15.2 million, respectively, of costs associated with the DOJ's inquiry. Costs associated with responding to the DOJ investigation are expected to total approximately \$30.0 million to \$34.0 million during fiscal year 2009. Estimated costs include attorneys' fees and costs associated with document production, imaging and information services support. Because of the uncertainties related to the incurrence, amount and range of loss, if any, that might be incurred related to this inquiry, management is currently unable to predict the ultimate outcome or determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome associated with this inquiry.

Note 12: Guarantees

The Company's Restated Certificate of Incorporation, as amended, provides that the Company will indemnify, to the fullest extent permitted by the Delaware General Corporation Law, each person that is involved in or is, or is threatened to be, made a party to any action, suit or proceeding by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of the Company or was serving at the request of the Company as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise. The Company has also entered into contractual indemnity agreements with each of its directors and executive officers pursuant to which, among other things, the Company has agreed to indemnify such directors and executive officers against any payments they are required to make as a result of a claim brought against such executive officer or director in such capacity, excluding claims (i) relating to the action or inaction of a director or executive officer that resulted in such director or executive officer gaining illegal personal profit or advantage, (ii) for an accounting of profits made from the purchase or sale of securities of the Company within the meaning of Section 16(b) of the Securities Exchange Act of 1934, as amended, or similar provisions of any state law or (iii) that are based upon or arise out of such director's or executive officer's knowingly fraudulent, deliberately dishonest or willful misconduct. The maximum potential amount of future payments that the Company could be required to make under these indemnification provisions is unlimited. However, the Company has purchased directors' and officers' liability insurance policies intended to reduce the Company's monetary exposure and to enable the Company to recover a portion of any future amounts paid. The Company has not previously paid any material amounts to defend lawsuits or settle claims as a result of these indemnification provisions. As a result, the Company believes the estimated fair value of these indemnification arrangements is minimal.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company customarily agrees in the ordinary course of its business to indemnification provisions in agreements with clinical trials investigators in its drug, biologics and medical device development programs, in sponsored research agreements with academic and not-for-profit institutions, in various comparable agreements involving parties performing services for the Company in the ordinary course of business, and in its real estate leases. The Company also customarily agrees to certain indemnification provisions in its discovery and development collaboration agreements. With respect to the Company's clinical trials and sponsored research agreements, these indemnification provisions typically apply to any claim asserted against the investigator or the investigator's institution relating to personal injury or property damage, violations of law or certain breaches of the Company's contractual obligations arising out of the research or clinical testing of the Company's products, compounds or drug candidates. With respect to real estate lease agreements, the indemnification provisions typically apply to claims asserted against the landlord relating to personal injury or property damage caused by the Company, to violations of law by the Company or to certain breaches of the Company's contractual obligations. The indemnification provisions appearing in the Company's collaboration agreements are similar, but in addition provide some limited indemnification for the collaborator in the event of third party claims alleging infringement of intellectual property rights. In each of the above cases, the terms of these indemnification provisions generally survive the termination of the agreement. The maximum potential amount of future payments that the Company could be required to make under these provisions is generally unlimited. The Company has purchased insurance policies covering personal injury, property damage and general liability intended to reduce the Company's exposure for indemnification and to enable the Company to recover a portion of any future amounts paid. The Company has not previously paid any material amounts to defend lawsuits or settle claims as a result of these indemnification provisions. As a result, the Company believes the estimated fair value of these indemnification arrangements is minimal.

Note 13: Product Warranties

The Company provides warranty programs for breast implant sales primarily in the United States, Europe and certain other countries. Management estimates the amount of potential future claims from these warranty programs based on actuarial analyses. Expected future obligations are determined based on the history of product shipments and claims and are discounted to a current value. The liability is included in both current and long-term liabilities in the Company's consolidated balance sheets. The U.S. programs include the *ConfidencePlus*® and *ConfidencePlus*® Premier warranty programs. The *ConfidencePlus*® program generally provides lifetime product replacement and \$1,200 of financial assistance for surgical procedures within ten years of implantation. The *ConfidencePlus*® Premier program, which normally requires a low additional enrollment fee, generally provides lifetime product replacement, \$2,400 of financial assistance for surgical procedures within ten years of implantation and contralateral implant replacement. The enrollment fee is deferred and recognized as income over the ten year warranty period for financial assistance. The warranty programs in non-U.S. markets have similar terms and conditions to the U.S. programs. The Company does not warrant any level of aesthetic result and, as required by government regulation, makes extensive disclosures concerning the risks of the use of its products and breast implant surgery. Changes to actual warranty claims incurred and interest rates could have a material impact on the actuarial analysis and the Company's estimated liabilities. A large majority of the product warranty liability arises from the U.S. warranty programs. The Company does not currently offer any similar warranty program on any other product.

The following table provides a reconciliation of the change in estimated product warranty liabilities through June 30, 2009:

	(in millions)
Balance at December 31, 2008	\$ 29.5
Provision for warranties issued during the period	3.1
Settlements made during the period	(2.9)
Balance at June 30, 2009	\$ 29.7
Current portion	\$ 6.6
Non-current portion	23.1
Total	\$ 29.7

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 14: Earnings Per Share**

The table below presents the computation of basic and diluted earnings per share:

	Three months ended		Six months ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008
	(in millions, except per share amounts)			
Net earnings attributable to Allergan, Inc.	\$ 176.1	\$ 143.4	\$ 220.8	\$ 251.1
Weighted average number of shares issued	303.7	304.4	303.7	304.7
Net shares assumed issued using the treasury stock method for options and non-vested equity shares and share units outstanding during each period based on average market price	1.7	2.6	1.4	2.9
Diluted shares	305.4	307.0	305.1	307.6
Earnings per share attributable to Allergan, Inc. stockholders:				
Basic	\$ 0.58	\$ 0.47	\$ 0.73	\$ 0.82
Diluted	\$ 0.58	\$ 0.47	\$ 0.72	\$ 0.82

For the three and six month periods ended June 30, 2009, options to purchase 17.2 million and 18.3 million shares of common stock at exercise prices ranging from \$39.67 to \$65.63 per share, respectively, were outstanding but were not included in the computation of diluted earnings per share because the effect from the assumed exercise of these options calculated under the treasury stock method would be anti-dilutive. There were no potentially diluted common shares related to the Company's 2026 Convertible Notes for the three and six month periods ended June 30, 2009, as the Company's average stock price for the respective periods was less than the conversion price of the notes.

For the three and six month periods ended June 30, 2008, options to purchase 11.7 million and 8.4 million shares of common stock at exercise prices ranging from \$48.07 to \$65.63 per share, respectively, were outstanding but were not included in the computation of diluted earnings per share because the effect from the assumed exercise of these options calculated under the treasury stock method would be anti-dilutive. There were no potentially diluted common shares related to the Company's 2026 Convertible Notes for the three and six month periods ended June 30, 2008, as the Company's average stock price for the respective periods was less than the conversion price of the notes.

Note 15: Comprehensive Income

The following table summarizes the components of comprehensive income for the three and six month periods ended June 30, 2009 and 2008:

	June 30, 2009		Three months ended		June 30, 2008	
	Before Tax Amount	Tax (Expense) or Benefit	Net-of-Tax Amount	Before Tax Amount	Tax (Expense) or Benefit	Net-of-Tax Amount

Note 16: Financial Instruments

In the normal course of business, operations of the Company are exposed to risks associated with fluctuations in interest rates and foreign currency exchange rates. The Company addresses these risks through controlled risk management that includes the use of derivative financial instruments to economically hedge or reduce these exposures. The Company does not enter into derivative financial instruments for trading or speculative purposes.

The Company has not experienced any losses to date on its derivative financial instruments due to counterparty credit risk.

To ensure the adequacy and effectiveness of its interest rate and foreign exchange hedge positions, the Company continually monitors its interest rate swap positions and foreign exchange forward and option positions both on a stand-alone basis and in conjunction with its underlying interest rate and foreign currency exposures, from an accounting and economic perspective.

However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, the Company cannot assure that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect the Company's consolidated operating results and financial position.

Interest Rate Risk Management

The Company's interest income and expense is more sensitive to fluctuations in the general level of U.S. interest rates than to changes in rates in other markets. Changes in U.S. interest rates affect the interest earned on cash and equivalents, interest expense on debt as well as costs associated with foreign currency contracts.

On January 31, 2007, the Company entered into a nine-year, two-month interest rate swap with a \$300.0 million notional amount with semi-annual settlements and quarterly interest rate reset dates. The swap receives interest at a fixed rate of 5.75% and pays interest at a variable interest rate equal to 3-month LIBOR plus 0.368%, and effectively converts \$300.0 million of the Company's \$800.0 million in aggregate

Edgar Filing: ALLERGAN INC - Form 10-Q

principal amount of 5.75% Senior Notes due 2016 (2016 Notes) to a variable interest rate. Based on the structure of the hedging relationship, the hedge meets the criteria for using the short-cut method for a fair value hedge under the provisions of SFAS No. 133. Under the provisions of SFAS No. 133, the investment in the derivative and the related long-term debt are recorded at fair value. At June 30, 2009 and December 31, 2008, the Company recognized in its consolidated balance sheets an asset reported in Investments and other assets and a corresponding increase in Long-term debt associated with the fair value of the derivative of \$31.7 million and \$61.9 million, respectively. The differential to be paid or received as interest rates change is accrued and recognized as an adjustment of interest expense related to the 2016 Notes. During the three and six month periods ended June 30, 2009, the Company recognized \$3.6 million and \$6.7 million, respectively, as a reduction of interest expense due to the differential to

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

be received. During the three and six month periods ended June 30, 2008, the Company recognized \$1.9 million and \$3.9 million, respectively, as a reduction of interest expense due to the differential to be received.

In February 2006, the Company entered into interest rate swap contracts based on 3-month LIBOR with an aggregate notional amount of \$800.0 million, a swap period of 10 years and a starting swap rate of 5.198%. The Company entered into these swap contracts as a cash flow hedge to effectively fix the future interest rate for the 2016 Notes. In April 2006, the Company terminated the interest rate swap contracts and received approximately \$13.0 million. The total gain was recorded to accumulated other comprehensive loss and is being amortized as a reduction to interest expense over a 10 year period to match the term of the 2016 Notes. During the three and six month periods ended June 30, 2009 and 2008, the Company recognized \$0.4 million and \$0.7 million, respectively, as a reduction of interest expense due to the amortization of deferred holding gains on derivatives designated as cash flow hedges. These amounts were reclassified from accumulated other comprehensive loss. As of June 30, 2009, the remaining unrecognized gain of \$8.8 million (\$5.3 million, net of tax) is recorded as a component of accumulated other comprehensive loss. The Company expects to reclassify an estimated pre-tax amount of \$1.3 million from accumulated other comprehensive loss as a reduction in interest expense during fiscal year 2009 due to the amortization of deferred holding gains on derivatives designated as cash flow hedges.

No portion of amounts recognized from contracts designated as cash flow hedges were considered to be ineffective during the three and six month periods ended June 30, 2009 and 2008, respectively.

Foreign Exchange Risk Management

Overall, the Company is a net recipient of currencies other than the U.S. dollar and, as such, benefits from a weaker dollar and is adversely affected by a stronger dollar relative to major currencies worldwide. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, may negatively affect the Company's consolidated revenues or operating costs and expenses as expressed in U.S. dollars.

From time to time, the Company enters into foreign currency option and forward contracts to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus its attention on its core business issues. Accordingly, the Company enters into various contracts which change in value as foreign exchange rates change to economically offset the effect of changes in the value of foreign currency assets and liabilities, commitments and anticipated foreign currency denominated sales and operating expenses. The Company enters into foreign currency option and forward contracts in amounts between minimum and maximum anticipated foreign exchange exposures, generally for periods not to exceed one year. The Company does not designate these derivative instruments as accounting hedges.

The Company uses foreign currency option contracts, which provide for the sale or purchase of foreign currencies to offset foreign currency exposures expected to arise in the normal course of the Company's business. While these instruments are subject to fluctuations in value, such fluctuations are anticipated to offset changes in the value of the underlying exposures.

Probable but not firmly committed transactions are comprised of sales of products and purchases of raw material in currencies other than the U.S. dollar. A majority of these sales are made through the Company's subsidiaries in Europe, Asia Pacific, Canada and Brazil. The Company purchases foreign exchange option contracts to economically hedge the currency exchange risks associated with these probable but not firmly committed transactions. The duration of foreign exchange hedging instruments, whether for firmly committed transactions or for probable but not firmly committed transactions, currently does not exceed one year.

All of the Company's outstanding foreign currency option contracts are entered into to reduce the volatility of earnings generated in currencies other than the U.S. dollar, primarily earnings denominated in the Canadian dollar, Mexican peso, Australian dollar, Brazilian real, euro, U.K. pound and Japanese yen. Current changes in the fair value of open foreign currency option contracts are recorded through earnings as Unrealized gain (loss) on derivative instruments, net while any realized gains (losses) on settled contracts are recorded through earnings as Other, net in the accompanying unaudited condensed consolidated statements of earnings. During the three and six month periods ended June 30, 2009, the Company recognized realized gains on settled foreign currency option contracts of \$4.1 million and \$9.4 million, respectively. During the three and six month periods ended June 30, 2008, the Company recognized realized gains on settled foreign currency option contracts of \$0.2 million. The premium costs of purchased foreign exchange option contracts are recorded in Other current assets and amortized to Other, net over the life of the options.

Edgar Filing: ALLERGAN INC - Form 10-Q

All of the Company's outstanding foreign exchange forward contracts are entered into to protect the value of certain intercompany receivables or payables that are subject to fluctuations in foreign currency exchange rates. The realized and unrealized gains and losses from foreign currency forward contracts and the revaluation of the foreign denominated

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

intercompany receivables or payables are recorded through Other, net in the accompanying unaudited condensed consolidated statements of earnings. During the three and six month periods ended June 30, 2009, the Company recognized total realized and unrealized losses from foreign exchange forward contracts of \$6.6 million and \$5.9 million, respectively. During the three and six month periods ended June 30, 2008, the Company recognized total realized and unrealized losses from foreign exchange forward contracts of \$1.9 million and \$6.5 million, respectively.

The fair value of outstanding foreign exchange option and forward contracts, collectively referred to as foreign currency derivative financial instruments, are recorded in Other current assets and Accounts payable, respectively. At June 30, 2009 and December 31, 2008, foreign currency derivative assets associated with the foreign exchange option contracts of \$6.1 million and \$24.3 million, respectively, were included in Other current assets. At June 30, 2009, net foreign currency derivative assets associated with the foreign exchange forward contracts of \$0.2 million were included as a reduction of Accounts payable, and at December 31, 2008, net foreign currency derivative liabilities associated with the foreign exchange forward contracts of \$0.9 million were included in Accounts payable.

At June 30, 2009 and December 31, 2008, the notional principal and fair value of the Company's outstanding foreign currency derivative financial instruments were as follows:

	June 30, 2009		December 31, 2008	
	Notional Principal	Fair Value	Notional Principal	Fair Value
	(in millions)			
Foreign currency forward exchange contracts (Receive U.S. dollar/pay foreign currency)	\$ 119.6	\$ (0.8)	\$ 112.2	\$ (3.6)
Foreign currency forward exchange contracts (Pay U.S. dollar/receive foreign currency)	41.6	1.0	63.3	2.7
Foreign currency sold put options	115.7	6.1	216.5	24.3

The notional principal amounts provide one measure of the transaction volume outstanding as of June 30, 2009 and December 31, 2008, and do not represent the amount of the Company's exposure to market loss. The estimates of fair value are based on applicable and commonly used pricing models using prevailing financial market information as of June 30, 2009 and December 31, 2008. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

Other Financial Instruments

At June 30, 2009 and December 31, 2008, the Company's other financial instruments included cash and equivalents, trade receivables, equity investments, accounts payable and borrowings. The carrying amount of cash and equivalents, trade receivables and accounts payable approximates fair value due to the short-term maturities of these instruments. The fair value of marketable equity investments, notes payable and long-term debt were estimated based on quoted market prices and interest rates. The fair value of non-marketable equity investments which represent investments in start-up technology companies or partnerships that invest in start-up technology companies, are estimated based on the fair value and other information provided by these ventures.

The carrying amount and estimated fair value of the Company's other financial instruments at June 30, 2009 and December 31, 2008 were as follows:

	June 30, 2009		December 31, 2008	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in millions)			

Edgar Filing: ALLERGAN INC - Form 10-Q

Cash and equivalents	\$ 1,388.1	\$ 1,388.1	\$ 1,110.4	\$ 1,110.4
Non-current investments:				
Marketable equity	1.5	1.5	0.6	0.6
Non-marketable equity	5.3	5.3	5.3	5.3
Notes payable	12.2	12.2	4.4	4.4
Long-term debt	875.2	891.0	885.3	860.9
Long-term convertible notes	605.3	633.9	685.2	712.9

Marketable equity investments include unrealized holding losses, net of tax of \$1.2 million and \$1.4 million at June 30, 2009 and December 31, 2008, respectively, which are included as a component of Accumulated other comprehensive loss in the consolidated balance sheets. During the three and six month periods ended June 30, 2009, the Company recognized

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

unrealized pre-tax holding gains related to changes in the fair value of marketable equity investments of \$0.7 million and \$0.9 million, respectively, as a component of Other comprehensive income (loss). During the three and six month periods ended June 30, 2008, the Company recognized unrealized pre-tax holding losses related to changes in the fair value of marketable equity investments of \$2.7 million and \$4.1 million, respectively, as a component of Other comprehensive income (loss).

Concentration of Credit Risk

Financial instruments that potentially subject the Company to credit risk principally consist of trade receivables. Wholesale distributors, major retail chains and managed care organizations account for a substantial portion of trade receivables. This risk is limited due to the number of customers comprising the Company's customer base, and their geographic dispersion. At June 30, 2009, no single customer represented more than 10% of trade receivables, net. Ongoing credit evaluations of customers' financial condition are performed and, generally, no collateral is required. The Company has purchased an insurance policy intended to reduce the Company's exposure to potential credit risks associated with certain U.S. customers. To date, no claims have been made against the insurance policy. The Company maintains reserves for potential credit losses and such losses, in the aggregate, have not exceeded management's estimates.

Note 17: Fair Value Measurements

The Company accounts for the methods of measuring fair value in accordance with the provisions of Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS No. 157). As defined in SFAS No. 157, fair value is based on the prices that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In order to increase consistency and comparability in fair value measurements, SFAS No. 157 establishes a three-tier fair value hierarchy that prioritizes the inputs used to measure fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs for which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

As of June 30, 2009, the Company has certain assets and liabilities that are required to be measured at fair value on a recurring basis. These include commercial paper and foreign time deposits classified as cash equivalents, other cash equivalents, available-for-sale securities, foreign exchange derivatives and the interest rate swap with a \$300.0 million notional amount. These assets and liabilities are classified in the table below in one of the three categories of the fair value hierarchy described above.

	Total	Level 1	Level 2	Level 3
		(in millions)		
Assets				
Commercial paper	\$ 131.4	\$ 131.4	\$	\$
Foreign time deposits	107.8	107.8		
Other cash equivalents	1,056.6	1,056.6		
Available-for-sale securities	1.5	1.5		
Foreign exchange derivative assets	6.3		6.3	
Interest rate swap derivative asset	31.7		31.7	
	\$ 1,335.3	\$ 1,297.3	\$ 38.0	\$
Liabilities				
Interest rate swap derivative liability	\$ 31.7	\$	\$ 31.7	\$

Edgar Filing: ALLERGAN INC - Form 10-Q

Commercial paper, foreign time deposits and other cash equivalents are valued at cost, which approximates fair value due to the short-term maturities of these instruments. Available-for-sale securities are valued using quoted stock prices from the National Association of Securities Dealers Automated Quotation System at the reporting date. Foreign currency derivative assets and liabilities are valued using quoted forward foreign exchange prices and option volatility at the reporting date. The interest rate swap derivative asset and liability are valued using LIBOR yield curves at the reporting date. The Company believes the fair values assigned to its available-for-sale securities and derivative instruments as of June 30, 2009 and December 31, 2008 are based upon reasonable estimates and assumptions.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 18: Business Segment Information**

The Company operates its business on the basis of two reportable segments – specialty pharmaceuticals and medical devices. The specialty pharmaceuticals segment produces a broad range of pharmaceutical products, including: ophthalmic products for glaucoma therapy, ocular inflammation, infection, allergy and chronic dry eye; *Botox*[®] for certain therapeutic and aesthetic indications; skin care products for acne, psoriasis, eyelash growth and other prescription and over-the-counter dermatological products; and urologics products. The medical devices segment produces a broad range of medical devices, including: breast implants for augmentation, revision and reconstructive surgery; obesity intervention products, including the *Lap-Band*[®] System and the *Orbera* Intra gastric Balloon System (formerly known as the *BIB*[®] System); and facial aesthetics products. The Company provides global marketing strategy teams to ensure development and execution of a consistent marketing strategy for its products in all geographic regions that share similar distribution channels and customers.

The Company evaluates segment performance on a revenue and operating income basis exclusive of general and administrative expenses and other indirect costs, restructuring charges, in-process research and development expenses, amortization of identifiable intangible assets related to business combinations and asset acquisitions and certain other adjustments, which are not allocated to the Company's segments for performance assessment by the Company's chief operating decision maker. Other adjustments excluded from the Company's segments for performance assessment represent income or expenses that do not reflect, according to established Company-defined criteria, operating income or expenses associated with the Company's core business activities. Because operating segments are generally defined by the products they design and sell, they do not make sales to each other. The Company does not discretely allocate assets to its operating segments, nor does the Company's chief operating decision maker evaluate operating segments using discrete asset information.

Operating Segments

	Three months ended		Six months ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008

Edgar Filing: ALLERGAN INC - Form 10-Q

- (a) Represents amortization of identifiable intangible assets related to business combinations and asset acquisitions and related capitalized licensing costs, as applicable.

Product net sales for the Company's various global product portfolios are presented below. The Company's principal markets are the United States, Europe, Latin America and Asia Pacific. The U.S. information is presented separately as it is the Company's headquarters country. U.S. sales, including manufacturing operations, represented 65.4% and 63.2% of the Company's total consolidated product net sales for the three month periods ended June 30, 2009 and 2008, respectively, and 66.3% and 63.6% of the Company's total consolidated product net sales for the six month periods ended June 30, 2009 and 2008, respectively.

Sales to two customers in the Company's specialty pharmaceuticals segment each generated over 10% of the Company's total consolidated product net sales. Sales to Cardinal Health for the three month periods ended June 30, 2009 and 2008 were 12.8% and 10.7%, respectively, of the Company's total consolidated product net sales, and 12.4% and 11.0%,

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

respectively, of the Company's total consolidated product net sales for the six month periods ended June 30, 2009 and 2008. Sales to McKesson Drug Company for the three month periods ended June 30, 2009 and 2008 were 12.2% and 12.0%, respectively, of the Company's total consolidated product net sales, and 12.2% and 12.1%, respectively, of the Company's total consolidated product net sales for the six month periods ended June 30, 2009 and 2008. No other country or single customer generates over 10% of the Company's total consolidated product net sales. Net sales for the Europe region also include sales to customers in Africa and the Middle East, and net sales in the Asia Pacific region include sales to customers in Australia and New Zealand.

Long-lived assets are assigned to geographic regions based upon management responsibility for such items.

Note 19: Subsequent Events

On July 7, 2009, the Company and Samil Pharmaceutical Co. Ltd. entered into a joint venture (Samil Allergan Ophthalmic Joint Venture Company) in Korea by integrating the Samil Eyecare and Allergan Korea ophthalmology divisions. In addition, the Company paid approximately \$16.7 million to Samil Pharmaceutical Co. Ltd. to complete the Company's joint venture investment and received a 50.005% stockholder interest (50% plus one share) in the joint venture.

On July 31, 2009, the U.S. Food and Drug Administration approved the Company's Risk Evaluation and Mitigation Strategy program for *Botox*[®], which addresses the risks related to botulinum toxin spread beyond the injection site and the lack of botulinum toxin interchangeability.

Table of Contents**ALLERGAN, INC.****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This financial review presents our operating results for the three and six month periods ended June 30, 2009 and 2008, and our financial condition at June 30, 2009. Except for the historical information contained herein, the following discussion contains forward-looking statements which are subject to known and unknown risks, uncertainties and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. We discuss such risks, uncertainties and other factors throughout this report and specifically under the caption "Risk Factors" in Part II, Item 1A below. The following review should be read in connection with the information presented in our unaudited condensed consolidated financial statements and related notes for the three and six month periods ended June 30, 2009 included in this report and our audited consolidated financial statements and related notes for the year ended December 31, 2008 included in our 2008 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Critical Accounting Policies, Estimates and Assumptions

The preparation and presentation of financial statements in conformity with accounting principles generally accepted in the United States, or GAAP, requires us to establish policies and to make estimates and assumptions that affect the amounts reported in our consolidated financial statements. In our judgment, the accounting policies, estimates and assumptions described below have the greatest potential impact on our consolidated financial statements. Accounting assumptions and estimates are inherently uncertain and actual results may differ materially from our estimates.

Revenue Recognition

We recognize revenue from product sales when goods are shipped and title and risk of loss transfer to our customers. A substantial portion of our revenue is generated by the sale of specialty pharmaceutical products (primarily eye care pharmaceuticals, skin care and urologics products) to wholesalers within the United States, and we have a policy to attempt to maintain average U.S. wholesaler inventory levels at an amount less than eight weeks of our net sales. A portion of our revenue is generated from consigned inventory of breast implants maintained at physician, hospital and clinic locations. These customers are contractually obligated to maintain a specific level of inventory and to notify us upon the use of consigned inventory. Revenue for consigned inventory is recognized at the time we are notified by the customer that the product has been used. Notification is usually through the replenishing of the inventory, and we periodically review consignment inventories to confirm the accuracy of customer reporting.

We generally offer cash discounts to customers for the early payment of receivables. Those discounts are recorded as a reduction of revenue and accounts receivable in the same period that the related sale is recorded. The amounts reserved for cash discounts were \$4.1 million and \$3.3 million at June 30, 2009 and December 31, 2008, respectively. Provisions for cash discounts deducted from consolidated sales in the second quarter of 2009 and 2008 were \$12.2 million and \$10.4 million, respectively. Provisions for cash discounts deducted from consolidated sales in the first six months of 2009 and 2008 were \$23.0 million and \$20.8 million, respectively.

We permit returns of product from most product lines by any class of customer if such product is returned in a timely manner, in good condition and from normal distribution channels. Return policies in certain international markets and for certain medical device products, primarily breast implants, provide for more stringent guidelines in accordance with the terms of contractual agreements with customers. Our estimates for sales returns are based upon the historical patterns of product returns matched against sales, and management's evaluation of specific factors that may increase the risk of product returns. The amount of allowances for sales returns recognized in our consolidated balance sheets at June 30, 2009 and December 31, 2008 were \$29.8 million and \$25.3 million, respectively, and are recorded in "Other accrued expenses" and "Trade receivables, net" in our consolidated balance sheets. Provisions for sales returns deducted from consolidated sales were \$95.4 million and \$87.9 million in the second quarter of 2009 and 2008, respectively. Provisions for sales returns deducted from consolidated sales were \$181.0 million and \$165.9 million in the first six months of 2009 and 2008, respectively. The increase in the provision for sales returns in the second quarter and first six months of 2009 compared to the second quarter and first six months of 2008 is primarily due to an increase in estimated product return rates for our specialty pharmaceuticals products and increased sales returns related to breast implant products. Historical allowances for cash discounts and product returns have been within the amounts reserved or accrued.

We participate in various managed care sales rebate and other incentive programs, the largest of which relates to Medicaid and Medicare. Sales rebate and other incentive programs also include contractual volume rebate programs and chargebacks, which are contractual discounts given primarily to federal government agencies, health maintenance organizations, pharmacy benefits managers and group purchasing organizations. We also offer rebate and other incentive programs for our aesthetic products, including *Botox*[®] Cosmetic, *Juvéderm*[®] and *Latisse*[®], and for certain skin care products.

Table of Contents

Sales rebates and incentive accruals reduce revenue in the same period that the related sale is recorded and are included in Other accrued expenses in our consolidated balance sheets. The amounts accrued for sales rebates and other incentive programs were \$119.6 million and \$100.9 million at June 30, 2009 and December 31, 2008, respectively. Provisions for sales rebates and other incentive programs deducted from consolidated sales were \$111.0 million and \$73.7 million in the second quarter of 2009 and 2008, respectively. Provisions for sales rebates and other incentive programs deducted from consolidated sales were \$198.4 million and \$147.7 million in the first six months of 2009 and 2008, respectively. The increases in the amounts accrued at June 30, 2009 compared to December 31, 2008 and the provisions for sales rebates and other incentive programs in the second quarter and the first six months of 2009 compared to the second quarter and first six months of 2008 are primarily due to increased incentive programs, primarily related to our eye care pharmaceuticals, *Botox*[®] Cosmetic, skin care and facial aesthetics products. In addition, an increase in our published list prices in the United States for pharmaceutical products, which occurred for several of our products early in each of 2009 and 2008, generally results in higher provisions for sales rebates and other incentive programs deducted from consolidated sales.

Our procedures for estimating amounts accrued for sales rebates and other incentive programs at the end of any period are based on available quantitative data and are supplemented by management's judgment with respect to many factors, including but not limited to, current market dynamics, changes in contract terms, changes in sales trends, an evaluation of current laws and regulations and product pricing. Quantitatively, we use historical sales, product utilization and rebate data and apply forecasting techniques in order to estimate our liability amounts. Qualitatively, management's judgment is applied to these items to modify, if appropriate, the estimated liability amounts. There are inherent risks in this process. For example, customers may not achieve assumed utilization levels; customers may misreport their utilization to us; and actual movements of the U.S. Consumer Price Index-Urban, or CPI-U, which affect our rebate programs with U.S. federal and state government agencies, may differ from those estimated. On a quarterly basis, adjustments to our estimated liabilities for sales rebates and other incentive programs related to sales made in prior periods have not been material and have generally been less than 0.5% of consolidated product net sales. An adjustment to our estimated liabilities of 0.5% of consolidated product net sales on a quarterly basis would result in an increase or decrease to net sales and earnings before income taxes of approximately \$5.0 million to \$6.0 million. The sensitivity of our estimates can vary by program and type of customer. Additionally, there is a significant time lag between the date we determine the estimated liability and when we actually pay the liability. Due to this time lag, we record adjustments to our estimated liabilities over several periods, which can result in a net increase to earnings or a net decrease to earnings in those periods. Material differences may result in the amount of revenue we recognize from product sales if the actual amount of rebates and incentives differ materially from the amounts estimated by management.

We recognize license fees, royalties and reimbursement income for services provided as other revenues based on the facts and circumstances of each contractual agreement. In general, we recognize income upon the signing of a contractual agreement that grants rights to products or technology to a third party if we have no further obligation to provide products or services to the third party after entering into the contract. We defer income under contractual agreements when we have further obligations that indicate that a separate earnings process has not been completed.

Pensions

We sponsor various pension plans in the United States and abroad in accordance with local laws and regulations. Our U.S. pension plans account for a large majority of our aggregate pension plans' net periodic benefit costs and projected benefit obligations. In connection with these plans, we use certain actuarial assumptions to determine the plans' net periodic benefit costs and projected benefit obligations, the most significant of which are the expected long-term rate of return on assets and the discount rate.

Our assumption for the weighted average expected long-term rate of return on assets in our U.S. funded pension plans for determining the net periodic benefit cost is 8.25% for 2009, which is the same rate used for 2008. Our assumptions for the weighted average expected long-term rate of return on assets in our non-U.S. funded pension plans are 6.03% and 6.82% for 2009 and 2008, respectively. For our U.S. funded pension plan, we determine, based upon recommendations from our pension plans' investment advisors, the expected rate of return using a building block approach that considers diversification and rebalancing for a long-term portfolio of invested assets. Our investment advisors study historical market returns and preserve long-term historical relationships between equities and fixed income in a manner consistent with the widely-accepted capital market principle that assets with higher volatility generate a greater return over the long run. They also evaluate market factors such as inflation and interest rates before long-term capital market assumptions are determined. For our non-U.S. funded pension plans, the expected rate of return was determined based on asset distribution and assumed long-term rates of return on fixed income instruments and equities. Market conditions and other factors can vary over time and could significantly affect our estimates of the weighted average expected long-term rate of return on plan assets. The expected rate of return is applied to the market-related value of plan assets. As a sensitivity measure, the effect of a 0.25% decline in our rate of return on assets assumptions for our U.S. and non-U.S. funded pension plans would increase our expected 2009 pre-tax pension benefit cost by approximately \$1.4 million.

Table of Contents

The weighted average discount rates used to calculate our U.S. and non-U.S. pension benefit obligations at December 31, 2008 were 6.19% and 5.71%, respectively. The weighted average discount rates used to calculate our U.S. and non-U.S. net periodic benefit costs for 2009 are 6.19% and 5.71%, respectively, and for 2008 were 6.25% and 5.50%, respectively. We determine the discount rate based upon a hypothetical portfolio of high quality fixed income investments with maturities that mirror the pension benefit obligations at the plans' measurement date. Market conditions and other factors can vary over time and could significantly affect our estimates for the discount rates used to calculate our pension benefit obligations and net periodic benefit costs for future years. As a sensitivity measure, the effect of a 0.25% decline in the discount rate assumption for our U.S. and non-U.S. pension plans would increase our expected 2009 pre-tax pension benefit costs by approximately \$3.6 million and increase our pension plans' projected benefit obligations at December 31, 2008 by approximately \$26.9 million.

Share-Based Compensation

We recognize compensation expense for all share-based awards made to employees and directors. The fair value of share-based awards is estimated at the grant date using the Black-Scholes option-pricing model and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period using the straight-line single option method. The fair value of modifications to share-based awards is generally estimated using a lattice model.

The determination of fair value using the Black-Scholes and lattice option-pricing models is affected by our stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors. We currently estimate stock price volatility based upon an equal weighting of the historical average over the expected life of the award and the average implied volatility of at-the-money options traded in the open market. We estimate employee stock option exercise behavior based on actual historical exercise activity and assumptions regarding future exercise activity of unexercised, outstanding options.

Share-based compensation expense is recognized only for those awards that are ultimately expected to vest, and we have applied an estimated forfeiture rate to unvested awards for the purpose of calculating compensation cost. These estimates will be revised in future periods if actual forfeitures differ from the estimates. Changes in forfeiture estimates impact compensation cost in the period in which the change in estimate occurs.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally less than the U.S. federal statutory rate, primarily because of lower tax rates in certain non-U.S. jurisdictions, research and development, or R&D, tax credits available in the United States and other foreign jurisdictions and deductions available in the United States for domestic production activities. Our effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pre-tax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, utilization of R&D tax credits and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities along with net operating loss and tax credit carryovers.

We record a valuation allowance against our deferred tax assets to reduce the net carrying value to an amount that we believe is more likely than not to be realized. When we establish or reduce the valuation allowance against our deferred tax assets, our provision for income taxes will increase or decrease, respectively, in the period such determination is made. Valuation allowances against deferred tax assets were \$8.4 million as of June 30, 2009 and December 31, 2008.

In February 2009, the California Legislature enacted 2009-2010 budget legislation containing various California tax law changes including an election to apply a single sales factor apportionment formula for taxable years beginning on or after January 1, 2011. We anticipate making the election and as a result, the state and federal deferred tax assets and deferred tax liabilities have been re-determined to reflect an adjustment to the resulting tax rate. The impact of the adjustment was an increase to the provision for income taxes of \$1.5 million which was reflected in the first quarter of 2009.

We have not provided for withholding and U.S. taxes for the unremitted earnings of certain non-U.S. subsidiaries because we have currently reinvested these earnings indefinitely in these foreign operations. At December 31, 2008, we had approximately \$1,630.9 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Income tax expense would be incurred if these funds were remitted to the United States. It is not practicable to estimate the amount of the deferred tax liability on such unremitted earnings. Upon remittance, certain foreign countries impose withholding taxes that are then available, subject to certain limitations, for use as credits against our

U.S. tax liability,

Table of Contents

if any. We annually update our estimate of unremitted earnings outside the United States after the completion of each fiscal year.

Purchase Price Allocation

The purchase price allocation for acquisitions requires extensive use of accounting estimates and judgments to allocate the purchase price to the identifiable tangible and intangible assets acquired, including in-process research and development, and liabilities assumed based on their respective fair values. Additionally, we must determine whether an acquired entity is considered to be a business or a set of net assets, because a portion of the purchase price can only be allocated to goodwill in a business combination.

Impairment Evaluations for Goodwill and Purchased Intangible Assets

In accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*, or SFAS No. 142, we evaluate goodwill for impairment on an annual basis, or more frequently if we believe indicators of impairment exist, by comparing the carrying value of each of our reporting units to their estimated fair value. We have two reporting units, specialty pharmaceuticals and medical devices, and historically performed our evaluation as of January 1 of each year. We primarily use the income approach and the market approach to valuation that include the discounted cash flow method, the guideline company method, as well as other generally accepted valuation methodologies to determine the fair value of our reporting units. Upon completion of the January 2009 annual impairment assessment, we determined that no impairment was indicated as the estimated fair value of each of the two reporting units exceeded its respective carrying value. As of June 30, 2009, we do not believe any significant indicators of impairment exist for our goodwill that would require additional analysis before our next annual evaluation.

In July 2009, we decided to change the timing of our annual impairment testing for goodwill from January 1 to October 1 of each year as a preferable method of applying the provisions of SFAS No. 142. Accordingly, we expect to perform our next annual impairment assessment of goodwill in the fourth quarter of 2009. We decided to adopt this change in timing in order to assess the recorded values of goodwill for potential impairment at a time closer to our fiscal year end reporting date. We believe this change is preferable in reducing the potential risk that an undetected impairment indicator could occur in between the timing of our annual impairment test and the preparation of our year end financial statements. This change has no effect on reported earnings for any current or prior periods.

In accordance with Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, or SFAS No. 144, we also review purchased intangible assets for impairment when events or changes in circumstances indicate that the carrying value of our other intangible assets may not be recoverable. An impairment in the carrying value of an intangible asset is recognized whenever anticipated future undiscounted cash flows from an intangible asset are estimated to be less than its carrying value.

Significant management judgment is required in the forecasts of future operating results that are used in our impairment evaluations. The estimates we have used are consistent with the plans and estimates that we use to manage our business. It is possible, however, that the plans may change and estimates used may prove to be inaccurate. If our actual results, or the plans and estimates used in future impairment analyses, are lower than the original estimates used to assess the recoverability of these assets, we could incur future impairment charges.

Operations

Headquartered in Irvine, California, we are a multi-specialty health care company focused on discovering, developing and commercializing innovative pharmaceuticals, biologics and medical devices that enable people to see more clearly, move more freely and express themselves more fully. Our diversified approach enables us to follow our research and development into new specialty areas where unmet needs are significant.

We discover, develop and commercialize specialty pharmaceutical, medical device and over-the-counter products for the ophthalmic, neurological, medical aesthetics, medical dermatology, breast aesthetics, obesity intervention, urological and other specialty markets in more than 100 countries around the world. We are a pioneer in specialty pharmaceutical research, targeting products and technologies related to specific disease areas such as chronic dry eye, glaucoma, retinal disease, psoriasis, acne, movement disorders, neuropathic pain and genitourinary diseases. Additionally, we are a leader in discovering, developing and marketing therapeutic and aesthetic biologic, pharmaceutical and medical device products, including saline and silicone gel breast implants, dermal fillers and obesity intervention products. At June 30, 2009, we employed approximately 8,200 persons around the world. Our principal markets are the United States, Europe, Latin America and Asia Pacific.

Table of Contents**Results of Operations**

We operate our business on the basis of two reportable segments – specialty pharmaceuticals and medical devices. The specialty pharmaceuticals segment produces a broad range of pharmaceutical products, including: ophthalmic products for glaucoma therapy, ocular inflammation, infection, allergy and chronic dry eye; *Botox*[®] for certain therapeutic and aesthetic indications; skin care products for acne, psoriasis, eyelash growth and other prescription and over-the-counter dermatological products; and urologics products. The medical devices segment produces a broad range of medical devices, including: breast implants for augmentation, revision and reconstructive surgery; obesity intervention products, including the *Lap-Band*[®] System and the *Orbera*[™] Intra-gastric Balloon System (formerly known as the *BIB*[®] System); and facial aesthetics products. We provide global marketing strategy teams to coordinate the development and execution of a consistent marketing strategy for our products in all geographic regions that share similar distribution channels and customers.

Management evaluates our business segments and various global product portfolios on a revenue basis, which is presented below in accordance with GAAP. We also report sales performance using the non-GAAP financial measure of constant currency sales. Constant currency sales represent current period reported sales, adjusted for the translation effect of changes in average foreign exchange rates between the current period and the corresponding period in the prior year. We calculate the currency effect by comparing adjusted current period reported sales, calculated using the monthly average foreign exchange rates for the corresponding period in the prior year, to the actual current period reported sales. We routinely evaluate our net sales performance at constant currency so that sales results can be viewed without the impact of changing foreign currency exchange rates, thereby facilitating period-to-period comparisons of our sales. Generally, when the U.S. dollar either strengthens or weakens against other currencies, the growth at constant currency rates will be higher or lower, respectively, than growth reported at actual exchange rates.

The following table compares net sales by product line within each reportable segment and certain selected pharmaceutical products for the three and six month periods ended June 30, 2009 and 2008:

	Three months ended		Change in Product Net Sales			Percent Change in Product Net Sales

(a) Percentage change in selected product net sales is calculated on amounts reported to the nearest whole dollar.

Product Net Sales

The \$37.1 million decrease in product net sales in the second quarter of 2009 compared to the second quarter of 2008 was the combined result of a decrease of \$5.2 million in our specialty pharmaceuticals product net sales and a decrease of \$31.9 million in our medical devices product net sales. The decrease in specialty pharmaceuticals product net sales is due primarily to decreases in product net sales of our eye care pharmaceuticals and *Botox*[®] product lines, partially offset by increases in product net sales of our skin care and urologics product lines. The decrease in medical devices product net sales reflects a decrease in product net sales across all of our medical devices product lines. The overall decrease in product net sales was primarily due to the negative impact of a general weakening of foreign currencies compared to the U.S. dollar in countries where we operated during the second quarter of 2009 compared to the second quarter of 2008, partially offset by an increase in specialty pharmaceuticals product net sales measured in constant currency.

Several of our products, including *Botox*[®] Cosmetic, and our facial aesthetics, obesity intervention and breast implant products, are purchased based on consumer choice and have limited reimbursement or are not reimbursable by government or other health care plans and are partially or wholly paid for directly by the consumer. If the negative economic environment and related decline in consumer spending that have prevailed since early 2008 continue, we believe there could be a corresponding negative effect on our sales, operations and profitability for the remainder of 2009.

In the second half of 2008 and the first quarter of 2009, the U.S. dollar strengthened significantly compared to certain foreign currencies of countries where we operate. If the foreign currency exchange rates between the U.S. dollar and these currencies remain at current levels, or if the

Edgar Filing: ALLERGAN INC - Form 10-Q

U.S. dollar continues to strengthen against these currencies, our net sales for the remainder of 2009 could be negatively affected compared to the corresponding period in 2008.

Eye care pharmaceuticals sales decreased in the second quarter of 2009 compared to the second quarter of 2008 primarily due to a decrease in sales of our *Refresh*[®] brand of artificial tears products, a decrease in sales of our glaucoma drugs *Alphagan*[®] and *Alphagan P* 0.15%, and decreases in our anti-inflammatory drugs *Zymar*[®] and *Acular*[®], partially offset by

Table of Contents

an increase in sales of *Combigan*, our *Alphagan*® and timolol combination for the treatment of glaucoma, an increase in sales of *Ganfort*®, our *Lumigan*® and timolol combination for the treatment of glaucoma, and an increase in sales of *Alphagan*® P 0.1%. International product net sales in the second quarter of 2009 compared to the second quarter of 2008 were negatively impacted by a general weakening of foreign currencies compared to the U.S. dollar. During 2009, we increased the published list prices for certain eye care pharmaceutical products in the United States. Effective January 3, 2009, we increased the published U.S. list price for *Combigan*®, *Lumigan*® and *Zymar*® by five percent, *Alphagan*® P 0.15%, *Alphagan*® P 0.1%, *Acular*® and *Acular LS*® by eight percent, and *Elestat*® by seven percent. Effective January 24, 2009, we increased the published list price in the United States for *Restasis*® by five percent. Effective April 1, 2009 we increased the published U.S. list price of *Acular*® and *Acular LS*® by an additional nine percent, and effective May 2, 2009 we increased the published U.S. list price of *Alphagan*® P 0.15% by an additional eight percent. These price increases had a positive net effect on our U.S. sales for the second quarter of 2009 compared to the second quarter of 2008, but the actual net effect is difficult to determine due to the various managed care sales rebate and other incentive programs in which we participate. Wholesaler buying patterns and the change in dollar value of the prescription product mix also affected our reported net sales dollars, although we are unable to determine the impact of these effects.

Botox® sales decreased in the second quarter of 2009 compared to the second quarter of 2008 primarily due to decreased sales in the United States for cosmetic use and in international markets for both cosmetic and therapeutic use, partially offset by an increase in sales in the United States for therapeutic use. In the United States, total sales of *Botox*® increased slightly in the second quarter of 2009 compared to the second quarter of 2008. The decrease in product net sales of *Botox*® in international markets was primarily due to a general weakening of foreign currencies compared to the U.S. dollar in the foreign countries where we sold *Botox*® during the second quarter of 2009 compared to the second quarter of 2008. We believe sales of *Botox*®, primarily *Botox*® Cosmetic, continued to be negatively impacted in the second quarter of 2009 by declines in consumer spending in all of our principal geographic markets. We believe our share in the worldwide neuromodulator market is currently approximately 83%.

Skin care sales, which are presently concentrated in the United States, increased in the second quarter of 2009 compared to the second quarter of 2008 primarily due to new product sales of *Latisse*®, our treatment for inadequate or insufficient eyelashes, which we launched in the United States in January 2009, and sales of *Aczone*® (dapsone) gel 5%, a topical treatment for acne vulgaris, which we launched in the fourth quarter of 2008, an increase in sales of *Vivite*®, and an increase in sales of our Clinique Medical line of skin care products, which we launched in the fourth quarter of 2008. These increases were partially offset by a decrease in sales of *Tazorac*®, *Zorac*® and *Avage*®, our topical tazarotene treatments for acne and psoriasis, and lower sales of other physician dispensed creams, including *M.D. Forte*® and *Prevage* MD. Net sales of *Tazorac*®, *Zorac*® and *Avage*® were \$16.2 million in the second quarter of 2009 compared to \$20.6 million in the second quarter of 2008. We increased the published U.S. list price for *Tazorac*®, *Zorac*® and *Avage*® by approximately ten percent effective January 3, 2009.

Urologics sales, which are presently concentrated in the United States and consist primarily of our *Sanctura*® franchise products for the treatment of overactive bladder, increased in the second quarter of 2009 compared to the second quarter of 2008. Net sales of our *Sanctura*® franchise products were \$16.2 million in the second quarter of 2009 compared to \$11.0 million in the second quarter of 2008. The increase in *Sanctura*® franchise product net sales in the second quarter of 2009 compared to the second quarter of 2008 was primarily due to lower wholesaler demand for *Sanctura XR*® in the second quarter of 2008 after the launch of *Sanctura XR*® in the United States in January 2008. In February 2009, we announced a restructuring plan to focus our sales efforts on the urology specialty market and to seek a partner to promote *Sanctura XR*®, our once-daily anticholinergic for the treatment of overactive bladder, to general practitioners, which resulted in a significant reduction in our urology sales force. Effective June 1, 2009, we increased the published U.S. list price for *Sanctura*®, our twice-a-day anticholinergic for the treatment of overactive bladder, by approximately nine percent.

We have a policy to attempt to maintain average U.S. wholesaler inventory levels of our specialty pharmaceutical products at an amount less than eight weeks of our net sales. At June 30, 2009, based on available external and internal information, we believe the amount of average U.S. wholesaler inventories of our specialty pharmaceutical products was at the lower end of our stated policy levels.

Breast aesthetics product net sales, which consist primarily of sales of silicone gel and saline breast implants and tissue expanders, decreased in the second quarter of 2009 compared to the second quarter of 2008 primarily due to decreases in sales in the United States, Canada, Europe and Asia. The decline in sales of breast aesthetics products in the United States was primarily due to lower unit volume, partially offset by the transition from lower priced saline products to higher priced silicone gel products. The decline in sales of breast aesthetics products in our international markets was due primarily to lower unit volume and the impact of a general weakening of foreign currencies compared to the U.S. dollar in the foreign countries where we sold breast aesthetics products during the second quarter of 2009 compared to the second quarter of 2008. We believe that sales of our breast aesthetics products continued to be negatively impacted in the second quarter of 2009 by

Table of Contents

declines in consumer spending in all of our principal geographic markets.

Obesity intervention product net sales, which consist primarily of sales of devices used for minimally invasive long-term treatments of obesity such as our *Lap-Band*[®] and *Lap-Band AP*[®] Systems and *Orbera* System, decreased in the second quarter of 2009 compared to the second quarter of 2008 due to decreases in sales in most of our principal geographic markets. We believe sales of obesity intervention products in the United States continued to be negatively impacted in the second quarter of 2009 by declines in consumer spending and a competitive product that was launched in the United States in 2008. International sales of obesity intervention products declined primarily due to a general weakening of foreign currencies compared to the U.S. dollar in the foreign countries where we sold obesity intervention products during the second quarter of 2009 compared to the second quarter of 2008, partially offset by an increase in sales measured at constant currency in Canada and Asia Pacific.

Facial aesthetics product net sales, which consist primarily of sales of hyaluronic acid-based and collagen-based dermal fillers used to correct facial wrinkles, decreased in the second quarter of 2009 compared to the second quarter of 2008 primarily due to decreases in sales in the United States and Europe, partially offset by an increase in sales in Latin America, Asia Pacific and Canada. Sales of facial aesthetics products were also negatively impacted by a general weakening of foreign currencies compared to the U.S. dollar in the foreign countries where we sold facial aesthetics products during the second quarter of 2009 compared to the second quarter of 2008 and a general decline in sales of older generation collagen-based dermal fillers. We believe sales of facial aesthetics products continued to be negatively impacted in the second quarter of 2009 by declines in consumer spending in all of our principal geographic markets.

Foreign currency changes decreased product net sales by \$62.2 million in the second quarter of 2009 compared to the second quarter of 2008, primarily due to the weakening of the euro, Brazilian real, U.K. pound, Australian dollar, and Canadian dollar compared to the U.S. dollar.

U.S. sales as a percentage of total product net sales increased by 2.2 percentage points to 65.4% in the second quarter of 2009 compared to U.S. sales of 63.2% in the second quarter of 2008, due to an increase in U.S. product net sales as a percentage of total product net sales in all of our specialty pharmaceuticals product lines, and our breast aesthetics and obesity intervention product lines, partially offset by a decline in U.S. product net sales as a percentage of total product net sales for our facial aesthetics product line. A significant portion of the increase in U.S. sales as a percentage of total product net sales is related to the general weakening of foreign currencies compared to the U.S. dollar in countries where we sell products.

The \$103.5 million decrease in product net sales in the first six months of 2009 compared to the first six months of 2008 was the combined result of a decrease of \$35.9 million in our specialty pharmaceuticals product net sales and a decrease of \$67.6 million in our medical devices product net sales.

The decrease in specialty pharmaceutical product net sales in the first six months of 2009 compared to the first six months of 2008 is primarily due to the same factors discussed above with respect to the decrease in specialty pharmaceuticals product net sales for the second quarter of 2009. In addition, net sales of eye care pharmaceuticals benefited from an increase in net sales of *Restasis*[®], our therapeutic treatment for chronic dry eye disease, in the first six months of 2009 compared to the first six months of 2008. Urologics product net sales decreased in the first six months of 2009 compared to the first six months of 2008, primarily due to the impact of our reduced sales force related to our February 2009 restructuring plan.

The decrease in medical devices product net sales in the first six months of 2009 compared to the first six months of 2008 is primarily due to the same factors discussed above with respect to the decrease in medical devices product net sales for the second quarter of 2009. In addition, net sales of breast aesthetics products in Latin America decreased in the first six months of 2009 compared to the first six months of 2008.

Foreign currency changes decreased product net sales by \$124.8 million in the first six months of 2009 compared to the first six months of 2008, primarily due to the weakening of the euro, Brazilian real, U.K. pound, Australian dollar, and Canadian dollar compared to the U.S. dollar.

U.S. sales as a percentage of total product net sales increased by 2.7 percentage points to 66.3% in the first six months of 2009 compared to U.S. sales of 63.6% in the first six months of 2008, due primarily to the same factors described above with respect to the increase in U.S. sales as a percentage of total product net sales in the second quarter of 2009.

Other Revenues

Other revenues decreased \$4.1 million to \$12.1 million in the second quarter of 2009 compared to \$16.2 million in the second quarter of 2008. The decrease in other revenues is primarily related to a decrease in royalty income, a decrease in reimbursement income for services provided to GlaxoSmithKline related to certain licensing and strategic support

Table of Contents

agreements, and a decrease in other reimbursement income.

Other revenues decreased \$7.1 million to \$24.7 million in the first six months of 2009 compared to \$31.8 million in the first six months of 2008. The decrease in other revenues in the first six months of 2009 is due primarily to the same factors discussed above with respect to the decrease in other revenues in the second quarter of 2009.

Cost of Sales

Cost of sales increased \$0.8 million, or 0.4%, in the second quarter of 2009 to \$198.3 million, or 17.7% of product net sales, compared to \$197.5 million, or 17.1% of product net sales, in the second quarter of 2008. Cost of sales in the second quarter of 2009 includes the rollout of \$7.2 million of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the phased closure of our Arklow, Ireland breast implant manufacturing facility. Cost of sales in the second quarter of 2008 includes a charge of \$5.0 million for the purchase accounting fair market value inventory adjustment rollout related to our acquisition of Esprit Pharma Holding Company, Inc., or Esprit. Excluding the effect of these charges, cost of sales decreased \$1.4 million, or 0.7%, in the second quarter of 2009 compared to the second quarter of 2008. This decrease in cost of sales, excluding the charges described above, primarily resulted from the 3.2% decrease in product net sales. Cost of sales as a percentage of product net sales, excluding the effect of the charges described above, increased to 17.1% in the second quarter of 2009 compared to 16.7% in the second quarter of 2008, primarily due to an overall increase in cost of sales as a percentage of product net sales for our products sold outside of the United States due to the negative translation impact on international product net sales related to the general weakening of foreign currencies against the U.S. dollar in the second quarter of 2009 compared to the second quarter of 2008 in countries where we sell our products. The cost of manufacturing our products is principally incurred in U.S. dollars and is generally impacted to a lesser degree by foreign currency fluctuations than our international product sales, which are primarily transacted in foreign currencies.

Cost of sales decreased \$3.6 million, or 0.9%, in the first six months of 2009 to \$376.1 million, or 17.8% of product net sales, compared to \$379.7 million, or 17.1% of product net sales, in the first six months of 2008. Cost of sales in the first six months of 2009 includes the rollout of \$11.6 million of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the phased closure of our Arklow, Ireland breast implant manufacturing facility and a \$5.0 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan. Cost of sales in the first six months of 2008 includes a charge of \$11.7 million for the purchase accounting fair market value inventory adjustment rollout related to the Esprit acquisition. Excluding the effect of these charges, cost of sales decreased \$8.5 million, or 2.3%, in the first six months of 2009 compared to the first six months of 2008. This decrease in cost of sales, excluding the charges described above, primarily resulted from the 4.7% decrease in product net sales. Cost of sales as a percentage of product net sales, excluding the effect of the charges described above, increased to 17.0% in the first six months of 2009 compared to 16.6% in the first six months of 2008, primarily due to the same factors described above with respect to the increase in cost of sales as a percentage of product net sales for the second quarter of 2009.

Selling, General and Administrative

Selling, general and administrative, or SG&A, expenses decreased \$65.0 million, or 12.8%, to \$441.9 million, or 39.5% of product net sales, in the second quarter of 2009 compared to \$506.9 million, or 43.9% of product net sales, in the second quarter of 2008. The overall decrease in SG&A expenses during the second quarter of 2009 compared to the second quarter of 2008 was partially due to a general decline in foreign currency values compared to the U.S. dollar in countries where we operated. SG&A expenses in the second quarter of 2009 include a \$0.3 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan, and \$7.4 million of costs associated with the U.S. Department of Justice, or DOJ, investigation relating to sales and marketing practices in connection with *Botox*[®]. SG&A expenses in the second quarter of 2008 include \$9.0 million of costs associated with the DOJ investigation described above, \$1.2 million of integration and transition costs related to our Esprit and Groupe Cornéal Laboratoires, or Cornéal, acquisitions, \$0.3 million of costs related to our acquisition of the *Aczone*[®] assets and \$0.1 million of termination benefits related to the phased closure of our breast implant manufacturing facility in Arklow, Ireland. Excluding the effect of these charges, SG&A expenses decreased \$62.1 million, or 12.5%, in the second quarter of 2009 compared to the second quarter of 2008. The decrease in SG&A expenses, excluding the charges described above, primarily relates to significant decreases in selling, marketing, promotion, and general and administrative expenses. The decrease in selling and marketing expenses in the second quarter of 2009 compared to the second quarter of 2008 principally relates to a decline in personnel and related incentive compensation costs due to the impact of our 2009 restructuring plan and lower product net sales. The decline in promotion expenses includes reduced direct-to-consumer advertising and other promotional costs for our medical device products, urologics products and *Botox*[®] Cosmetic in the United States, partially offset by an increase in promotional and direct-to-consumer advertising costs for *Latisse*[®], which we launched in the United States in the first quarter of 2009. The decrease in general and administrative expenses in the second quarter of 2009 compared to the second quarter of 2008 primarily relates to lower human resource administration, finance, information services and incentive compensation costs. Costs associated with responding to the DOJ investigation are expected to total approximately \$30.0 million to \$34.0 million during fiscal year 2009.

Table of Contents

SG&A expenses decreased \$62.7 million, or 6.3%, to \$926.4 million, or 43.8% of product net sales, in the first six months of 2009 compared to \$989.1 million, or 44.6% of product net sales, in the first six months of 2008. SG&A expenses in the first six months of 2009 include a \$52.0 million charge related to the modification of certain employee stock options and \$2.2 million in asset write-offs in connection with our 2009 restructuring plan, and \$15.2 million of costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®]. SG&A expenses in the first six months of 2008 include \$9.0 million of costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®], \$1.8 million of integration and transition costs related to our Esprit and Cornéal acquisitions, \$0.3 million of costs related to our acquisition of the *Aczone*[®] assets and \$0.7 million of termination benefits and asset impairments related to the phased closure of our breast implant manufacturing facility in Arklow, Ireland. Excluding the effect of these charges, SG&A expenses decreased \$120.3 million, or 12.3%, in the first six months of 2009 compared to the first six months of 2008. The decrease in SG&A expenses, excluding the charges described above, is primarily due to the same factors described above with respect to the decrease in SG&A expenses for the second quarter of 2009.

Research and Development

Research and development, or R&D, expenses decreased \$51.8 million, or 24.3%, to \$161.6 million in the second quarter of 2009, or 14.4% of product net sales, compared to \$213.4 million, or 18.5% of product net sales, in the second quarter of 2008. The overall decrease in R&D expenses during the second quarter of 2009 compared to the second quarter of 2008 was partially due to a general decline in foreign currency exchange rates compared to the U.S. dollar in countries where we operated. R&D expenses for the second quarter of 2009 included a \$0.3 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan. R&D expenses for the second quarter of 2008 included a charge of \$13.9 million for an upfront payment for the in-licensing of *Sanctura XR*[®] product rights in Canada, where the product has not yet achieved regulatory approval. Excluding the effect of these charges, R&D expenses decreased by \$38.2 million, or 19.1%, to \$161.3 million in the second quarter of 2009, or 14.4% of product net sales, compared to \$199.5 million, or 17.3% of product net sales in the second quarter of 2008. The decrease in R&D expenses in dollars, excluding the charges described above, was primarily due to a reduction in expenses for eye care pharmaceuticals products, including *Ozurdex*[®], *Trivaris*, *Acuvail*, our advanced, preservative-free formulation of ketorolac, and *Zymar*[®], a reduction in expenses on the development of *Botox*[®] for the treatment of chronic migraine, a reduction in expenses on the development of *Latisse*[®] and lower spending on discovery programs, partially offset by an increase in expenses for urology products, primarily apaziquone, and obesity intervention products.

R&D expenses decreased \$52.6 million, or 13.3%, to \$343.7 million in the first six months of 2009, or 16.3% of product net sales, compared to \$396.3 million, or 17.9% of product net sales, in the first six months of 2008. R&D expenses for the first six months of 2009 included a \$20.6 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan. R&D expenses for the first six months of 2008 included a charge of \$13.9 million for an upfront payment for the in-licensing of *Sanctura XR*[®] product rights in Canada, where the product has not yet achieved regulatory approval. Excluding the effect of these charges, R&D expenses decreased by \$59.3 million, or 15.5%, to \$323.1 million in the first six months of 2009, or 15.3% of product net sales, compared to \$382.4 million, or 17.3% of product net sales in the first six months of 2008. The decrease in R&D expenses, excluding the charges described above, is primarily due to the same factors described above with respect to the decrease in R&D expenses for the second quarter of 2009, except that R&D expenses related to obesity intervention products declined slightly in the first six months of 2009 compared to the first six months of 2008.

Amortization of Acquired Intangible Assets

Amortization of acquired intangible assets decreased \$0.3 million to \$35.5 million in the second quarter of 2009, or 3.2% of product net sales, compared to \$35.8 million, or 3.1% of product net sales, in the second quarter of 2008. The decrease in amortization expense in dollars is primarily due to a decline in amortization expense associated with customer relationships acquired in connection with our 2006 acquisition of Inamed Corporation, or Inamed, partially offset by an increase in the balance of other intangible assets subject to amortization, primarily related to a buyout payment in 2008 of contingent licensing obligations related to the *Sanctura*[®] products, a milestone payment in 2008 related to expected annual *Restasis*[®] net sales, our July 2008 purchase of the *Aczone*[®] developed technology and a December 2008 milestone payment related to *Latisse*[®].

Amortization of acquired intangible assets increased \$3.4 million to \$74.1 million in the first six months of 2009, or 3.5% of product net sales, compared to \$70.7 million, or 3.2% of product net sales, in the first six months of 2008. The increase in amortization expense in dollars is primarily due to the increase in the balance of other intangible assets subject to amortization described above, partially offset by a decline in amortization expense associated with customer relationships acquired in connection with our 2006 acquisition of Inamed.

Table of Contents

Restructuring Charges and Integration and Transition Costs

Restructuring charges in the second quarter of 2009 were \$1.0 million, consisting of \$0.7 million related to the 2009 restructuring plan, \$0.2 million related to the restructuring and phased closure of the Arklow facility and \$0.1 million other restructuring charges. Restructuring charges in the second quarter of 2008 were \$9.4 million, consisting of \$0.1 million related to the restructuring and phased closure of the Arklow facility, \$5.8 million related to the restructuring and integration of the Cornéal operations and \$3.5 million of other restructuring charges.

Restructuring charges in the first six months of 2009 were \$43.1 million, consisting of \$39.1 million related to the 2009 restructuring plan, \$4.2 million related to the restructuring and phased closure of the Arklow facility and a \$0.2 million other restructuring charge net reversal. Restructuring charges in the first six months of 2008 were \$37.8 million, consisting of \$27.6 million related to the restructuring and phased closure of the Arklow facility, \$6.6 million related to the restructuring and integration of the Cornéal operations and \$3.6 million of other restructuring charges.

2009 Restructuring Plan

On February 4, 2009, we announced a restructuring plan that involves a workforce reduction of approximately 460 employees, primarily in the United States and Europe. The majority of the employees affected by the restructuring plan are U.S. urology sales and marketing personnel as a result of our decision to focus on the urology specialty and to seek a partner to promote *Sanctura XR*[®] to general practitioners, and marketing personnel in the United States and Europe as we adjust our back-office structures to a reduced short-term sales outlook for some businesses. The restructuring plan also includes modest workforce reductions in other functions as we re-engineer our processes to increase efficiency and productivity.

As part of the restructuring plan, we modified the outstanding stock options issued in our February 2008 full-round employee stock option grant. The stock options were originally granted with an exercise price of \$64.47 with a standard four year graded vesting term, a ten year contractual term, and standard 90 day expiration upon termination of employment provisions. These options were modified to be immediately vested in full and to remove the 90 day expiration upon termination of employment provision. Because the modified awards became fully vested and there was no future derived service period, all unamortized compensation expense related to the original grant and the additional compensation expense attributable to the modification of the awards was recognized in full on the modification date.

In addition, the contractual provisions of outstanding stock options, other than the February 2008 full-round employee stock option grant, held by employees impacted by the workforce reduction were modified to extend the stock option expiration dates. Under the original contractual provisions, outstanding stock options held by employees involved in a workforce reduction automatically become fully vested upon termination of employment and the stock options expire after the earlier of 90 days from termination of employment or the remaining stock option contractual term. Under the modified terms, stock options for the impacted employees will expire after the earlier of three years from termination of employment or the remaining contractual term. All unamortized compensation expense related to the original stock option awards plus the incremental compensation expense associated with the modifications will be recognized ratably from the modification date to the employees' expected termination date.

We estimate that the total pre-tax charges related to the 2009 restructuring plan will be between \$119.0 million and \$126.0 million, of which \$40.0 million to \$45.0 million are expected to be cash expenditures. The total estimated pre-tax charges consist primarily of employee severance and other one-time termination benefits of \$40.0 million to \$45.0 million, asset write-offs of \$2.0 million to \$3.0 million, costs associated with the modification of stock options issued in our February 2008 full-round employee stock option grant of approximately \$73.0 million and costs associated with the modification of stock options, other than the February 2008 full-round employee stock option grant, for employees impacted by the workforce reduction of \$4.0 million to \$5.0 million.

We began to record costs associated with the 2009 restructuring plan in the first quarter of 2009 and expect to continue to recognize costs through the fourth quarter of 2009. As of June 30, 2009, we substantially completed all activities related to the restructuring plan. During the three month period ended June 30, 2009, we recorded pre-tax restructuring charges of \$0.7 million and recognized a total of \$0.6 million related to employee stock option modifications, consisting of \$0.3 million in SG&A expenses and \$0.3 million in R&D expenses. During the six month period ended June 30, 2009, we recorded pre-tax restructuring charges of \$39.1 million and recognized a total of \$77.6 million related to employee stock option modifications, consisting of \$5.0 million of cost of sales, \$52.0 million in SG&A and \$20.6 million in R&D expenses, and recognized \$2.2 million of asset write-offs in SG&A expenses.

Table of Contents

The following table presents the restructuring charges related to the 2009 restructuring plan during the six month period ended June 30, 2009:

	Employee Severance	Other (in millions)	Total
Net charge during the six month period ended June 30, 2009	\$ 32.6	\$ 6.5	\$ 39.1
Spending	(21.5)	(5.5)	(27.0)
Balance at June 30, 2009 (included in Other accrued expenses)	\$ 11.1	\$ 1.0	\$ 12.1

Restructuring and Phased Closure of Arklow Facility

On January 30, 2008, we announced the phased closure of our breast implant manufacturing facility at Arklow, Ireland and the transfer of production to our manufacturing plant in Costa Rica. The Arklow facility was acquired by us in connection with our 2006 acquisition of Inamed and employed approximately 360 people. As of March 31, 2009, all production activities at our Arklow facility had ceased. Based on current foreign currency exchange rates, we estimate that the total pre-tax restructuring and other transition related costs associated with the closure of the Arklow manufacturing facility will be between \$59.0 million and \$67.0 million, consisting primarily of employee severance and other one-time termination benefits of \$30.0 million to \$33.0 million, asset impairments and accelerated depreciation of \$15.0 million to \$17.0 million, and contract termination and other costs of \$14.0 million to \$17.0 million. We expect that \$44.0 million to \$50.0 million of the pre-tax charges will be cash expenditures. Certain employee retention termination benefits and accelerated depreciation costs related to inventory production in Arklow will be capitalized to inventory as incurred and recognized as cost of sales in the periods the related products are sold.

We began to record costs associated with the closure of the Arklow manufacturing facility in the first quarter of 2008 and expect to continue to recognize costs through the fourth quarter of 2009. The restructuring charges primarily consist of employee severance, one-time termination benefits, contract termination costs and other costs related to the closure of the Arklow manufacturing facility. During the three and six month periods ended June 30, 2009, we recorded \$0.2 million and \$4.2 million of pre-tax restructuring charges, respectively. During the three and six month periods ended June 30, 2008, we recorded \$0.1 million and \$27.6 million of pre-tax restructuring charges, respectively. During the three and six month periods ended June 30, 2009, we recognized \$7.2 million and \$11.6 million, respectively, of cost of sales for the rollout of capitalized employee retention termination benefits and accelerated depreciation costs related to inventory production. During the six month period ended June 30, 2009, we also recognized \$0.1 million of R&D expenses related to one-time termination benefits. During the three month period ended June 30, 2008, we recognized \$0.1 million of cost of sales, \$0.1 million of SG&A expenses and \$0.1 million of R&D expenses related to one-time termination benefits. During the six month period ended June 30, 2008, we recognized \$0.1 million of cost of sales, \$0.7 million of SG&A expenses and \$0.2 million of R&D expenses related to one-time termination benefits and asset impairments.

At June 30, 2009, \$2.7 million of capitalized employee retention termination benefits and accelerated depreciation costs are included in Inventories in the accompanying unaudited condensed consolidated balance sheet.

The following table presents the restructuring activities related to the phased closure of the Arklow facility through June 30, 2009:

	Employee Severance	Contract Termination Costs	Other	Total
	(in millions)			
Net charge during 2008	\$ 20.5	\$ 5.6	\$ 1.1	\$ 27.2
Spending	(7.2)	(0.5)	(1.0)	(8.7)
Foreign exchange translation effects	(1.8)	(0.6)		(2.4)
Balance at December 31, 2008	11.5	4.5	0.1	16.1
Net charge during the six month period ended June 30, 2009	3.4		0.8	4.2
Spending	(16.1)	(0.5)	(0.1)	(16.7)
Foreign exchange translation effects	(0.6)		0.1	(0.5)

Edgar Filing: ALLERGAN INC - Form 10-Q

Balance at June 30, 2009 (included in Other accrued expenses) (a)	\$ (1.8)	\$ 4.0	\$ 0.9	\$ 3.1
---	----------	--------	--------	--------

- (a) Total accrued expenses are net of expected statutory employee severance reimbursements from government sponsored social benefit programs of approximately \$2.2 million.

Table of Contents

Other Restructuring Activities and Integration Costs

Included in the three and six month periods ended June 30, 2009 are \$0.1 million of restructuring charges and a \$0.3 million restructuring charge reversal, respectively, related to the closure of our collagen manufacturing facility in Fremont, California. Included in the six month period ended June 30, 2009 are \$0.1 million of restructuring charges for an abandoned leased facility related to the fiscal year 2005 restructuring and streamlining of our European operations.

Included in the three and six month periods ended June 30, 2008 are \$0.4 million of restructuring charges related to the closure of our collagen manufacturing facility in Fremont, California, and \$3.1 million of restructuring charges for an abandoned leased facility related to the fiscal year 2005 restructuring and streamlining of our European operations. Included in the three and six month periods ended June 30, 2008 are \$5.8 million and \$6.6 million, respectively, of restructuring charges related to our 2007 acquisition of Cornéal. Included in the six month period ended June 30, 2008 are \$0.1 million of restructuring charges related to our 2007 acquisition of EndoArt SA.

Included in the three and six month periods ended June 30, 2009 are \$0.2 million of SG&A expenses related to transaction costs associated with our joint venture investment in Korea announced in July 2009 and \$0.4 million of SG&A expenses related to integration costs associated with our Cornéal acquisition. Included in the three month period ended June 30, 2008 are \$0.1 million of cost of sales and \$1.2 million of SG&A expenses, respectively, and in the six month period ended June 30, 2008 are \$0.1 million of cost of sales and \$1.8 million of SG&A expenses, respectively, related to integration costs associated with our 2007 acquisitions of Esprit and Cornéal.

Operating Income (Loss)

Management evaluates business segment performance on an operating income basis exclusive of general and administrative expenses and other indirect costs, restructuring charges, in-process research and development expenses, amortization of identifiable intangible assets related to business combinations and asset acquisitions and certain other adjustments, which are not allocated to our business segments for performance assessment by our chief operating decision maker. Other adjustments excluded from our business segments for purposes of performance assessment represent income or expenses that do not reflect, according to established Company-defined criteria, operating income or expenses associated with our core business activities.

General and administrative expenses, other indirect costs and other adjustments not allocated to our business segments for purposes of performance assessment consisted of the following items: for the second quarter of 2009, general and administrative expenses of \$71.5 million, compensation expense from stock option modifications of \$0.6 million related to the 2009 restructuring plan, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$7.4 million, termination benefits and accelerated depreciation costs related to the phased closure of the Arklow facility of \$7.2 million, integration and transition costs related to the Cornéal acquisition of \$0.4 million, transaction costs related to our joint venture investment in Korea of \$0.2 million, and other net indirect costs of \$2.1 million; for the second quarter of 2008, general and administrative expenses of \$85.0 million, a \$13.9 million charge for an upfront payment for the in-licensing of *Sanctura XR*[®] product rights in Canada, where the product has not yet achieved regulatory approval, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$9.0 million, a purchase accounting fair market value inventory adjustment related to the Esprit acquisition of \$5.0 million, termination benefits related to the phased closure of the Arklow facility of \$0.3 million, integration and transition costs related to the acquisitions of Esprit and Cornéal of \$1.3 million, transaction costs related to the *Aczone*[®] asset acquisition of \$0.3 million, and other net indirect costs of \$2.5 million; for the first six months of 2009, general and administrative expenses of \$141.8 million, compensation expense from stock option modifications of \$77.6 million and asset impairments of \$2.2 million related to the 2009 restructuring plan, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$15.2 million, termination benefits and accelerated depreciation costs related to the phased closure of the Arklow facility of \$11.7 million, integration and transition costs related to the Cornéal acquisition of \$0.4 million, transaction costs related to our joint venture investment in Korea of \$0.2 million, and other net indirect costs of \$6.6 million; for the first six months of 2008, general and administrative expenses of \$166.6 million, a \$13.9 million charge for an upfront payment for the in-licensing of *Sanctura XR*[®] product rights in Canada, where the product has not yet achieved regulatory approval, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$9.0 million, a purchase accounting fair market value inventory adjustment related to the Esprit acquisition of \$11.7 million, termination benefits and asset impairments related to the phased closure of the Arklow facility of \$1.0 million, integration and transition costs related to the acquisitions of Esprit and Cornéal of \$1.9 million, transaction costs related to the *Aczone*[®] asset acquisition of \$0.3 million, and other net indirect costs of \$6.8 million.

Table of Contents

The following table presents operating income for each reportable segment for the three and six month periods ended June 30, 2009 and 2008 and a reconciliation of our segments' operating income to consolidated operating income:

	Three months ended		Six months ended	
	June 30, 2009 (in millions)	June 30, 2008 (in millions)	June 30, 2009 (in millions)	June 30, 2008 (in millions)
Operating income:				
Specialty pharmaceuticals	\$ 356.1	\$ 308.3	\$ 646.0	\$ 576.8
Medical devices	56.9	57.9	90.6	107.6
Total segments	413.0	366.2	736.6	684.4
General and administrative expenses, other indirect costs and other adjustments	89.4	117.3	255.7	211.2
Amortization of acquired intangible assets (a)	30.1	30.5	63.2	60.4
Restructuring charges	1.0	9.4	43.1	37.8
Total operating income	\$ 292.5	\$ 209.0	\$ 374.6	\$ 375.0

(a) Represents amortization of identifiable intangible assets related to business combinations and asset acquisitions and related capitalized licensing costs, as applicable.

Our consolidated operating income in the second quarter of 2009 was \$292.5 million, or 26.1% of product net sales, compared to consolidated operating income of \$209.0 million, or 18.1% of product net sales in the second quarter of 2008. The \$83.5 million increase in consolidated operating income was due to a \$65.0 million decrease in SG&A expenses, a \$51.8 million decrease in R&D expenses, a \$0.3 million decrease in amortization of acquired intangible assets and a \$8.4 million decrease in restructuring charges, partially offset by a \$37.1 million decrease in product net sales, a \$0.8 million increase in cost of sales and a \$4.1 million decrease in other revenues. Our consolidated operating income in the second quarter of 2009 includes charges totaling \$0.6 million for compensation costs associated with the modifications of certain employee stock options related to our 2009 restructuring plan.

Our specialty pharmaceuticals segment operating income in the second quarter of 2009 was \$356.1 million, compared to operating income of \$308.3 million in the second quarter of 2008. The \$47.8 million increase in our specialty pharmaceuticals segment operating income was due primarily to an increase in product net sales of our skin care and urologics product lines, a decrease in promotion, selling and marketing expenses and R&D expenses, partially offset by a decrease in product net sales of our eye care pharmaceuticals and *Botox*[®] product lines.

Our medical devices segment operating income in the second quarter of 2009 was \$56.9 million, compared to operating income of \$57.9 million in the second quarter of 2008. The \$1.0 million decrease in our medical devices segment operating income was due primarily to the \$31.9 million decrease in product net sales across all product lines, partially offset by an overall decrease in promotion, selling and marketing expenses.

Our consolidated operating income in the first six months of 2009 was \$374.6 million, or 17.7% of product net sales, compared to consolidated operating income of \$375.0 million, or 16.9% of product net sales in the first six months of 2008. The \$0.4 million decrease in consolidated operating income was due to a \$103.5 million decrease in product net sales, a \$7.1 million decrease in other revenues, a \$3.4 million increase in amortization of acquired intangible assets and a \$5.3 million increase in restructuring charges, partially offset by a \$3.6 million decrease in cost of sales, a \$62.7 million decrease in SG&A expenses and a \$52.6 million decrease in R&D expenses. Our consolidated operating income in the first six months of 2009 includes charges totaling \$77.6 million for compensation costs associated with the modifications of certain employee stock options related to our 2009 restructuring plan.

Our specialty pharmaceuticals segment operating income in the first six months of 2009 was \$646.0 million, compared to operating income of \$576.8 million in the first six months of 2008. The \$69.2 million increase in our specialty pharmaceuticals segment operating income was due primarily to an increase in our skin care product net sales, a decrease in promotion, selling and marketing expenses and R&D expenses, partially offset by a decrease in product net sales of our eye care pharmaceuticals and *Botox*[®] product lines.

Edgar Filing: ALLERGAN INC - Form 10-Q

Our medical devices segment operating income in the first six months of 2009 was \$90.6 million, compared to operating income of \$107.6 million in the first six months of 2008. The \$17.0 million decrease in our medical devices segment operating income was due primarily to the same reasons discussed in the analysis of the second quarter of 2009.

Non-Operating Income and Expense

Total net non-operating expense in the second quarter of 2009 was \$35.5 million compared to total net non-operating expense of \$19.1 million in the second quarter of 2008. Interest income in the second quarter of 2009 was \$1.5 million

Table of Contents

compared to interest income of \$10.3 million in the second quarter of 2008. The decrease in interest income was primarily due to a decrease in average interest rates earned on all cash equivalent balances earning interest of approximately 2.2 percentage points, partially offset by higher average cash equivalent balances earning interest of approximately \$126.0 million in the second quarter of 2009 compared to the second quarter of 2008. Interest income in the second quarter of 2008 also included \$3.5 million of statutory interest income related to income taxes. Interest expense decreased \$2.5 million to \$18.5 million in the second quarter of 2009 compared to \$21.0 million in the second quarter of 2008, primarily due to \$3.6 million recognized as an offset to interest expense in the second quarter of 2009 as the interest rate differential under our \$300.0 million notional amount fixed to variable interest rate swap agreement compared to \$1.9 million recognized as an offset to interest expense in the second quarter of 2008. Additionally, interest expense also decreased in the second quarter of 2009 compared to the second quarter of 2008 due to a decrease in average outstanding borrowings during the respective periods. During the second quarter of 2009, we recorded a net unrealized loss on derivative instruments of \$11.7 million compared to a net unrealized loss of \$0.2 million in the second quarter of 2008. Other, net expense was \$6.8 million in the second quarter of 2009, consisting primarily of \$6.8 million in net realized losses from foreign currency transactions. Other, net expense was \$8.2 million in the second quarter of 2008, consisting primarily of \$8.3 million in net realized losses from foreign currency transactions.

Total net non-operating expense in the first six months of 2009 was \$54.2 million compared to total net non-operating expense of \$35.6 million in the first six months of 2008. Interest income in the first six months of 2009 was \$4.2 million compared to interest income of \$21.5 million in the first six months of 2008. The decrease in interest income was primarily due to a decrease in average interest rates earned on all cash equivalent balances earning interest of approximately 2.3 percentage points, partially offset by higher average cash equivalent balances earning interest of approximately \$61.0 million in the first six months of 2009 compared to the first six months of 2008. Interest income in the first six months of 2008 also included \$3.5 million of statutory interest income related to income taxes. Interest expense decreased \$4.6 million to \$37.9 million in the first six months of 2009 compared to \$42.5 million in the first six months of 2008, primarily due to \$6.7 million recognized as an offset to interest expense in the first six months of 2009 as the interest rate differential under our \$300.0 million notional amount fixed to variable interest rate swap agreement compared to \$3.9 million recognized as an offset to interest expense in the first six months of 2008. Additionally, interest expense also decreased in the first six months of 2009 compared to the first six months of 2008 due to a decrease in average outstanding borrowings during the respective periods. During the first six months of 2009, we recorded a net unrealized loss on derivative instruments of \$14.5 million compared to a net unrealized loss of \$3.5 million in the first six months of 2008. Other, net expense was \$6.0 million in the first six months of 2009, consisting primarily of \$0.7 million in net realized losses from foreign currency transactions and a loss of \$5.3 million on the extinguishment of a portion of our 1.50% Convertible Senior Notes due 2026, or 2026 Convertible Notes. Other, net expense was \$11.1 million in the first six months of 2008, consisting primarily of \$11.1 million in net realized losses from foreign currency transactions.

Income Taxes

Our effective tax rate for the second quarter of 2009 was 31.2%. Included in our operating income for the second quarter of 2009 are restructuring charges of \$1.0 million, a charge of \$0.6 million related to the modification of certain employee stock options in conjunction with our 2009 restructuring plan and the rollout of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the closure of our Arklow, Ireland breast implant manufacturing facility of \$7.2 million. In the second quarter of 2009, we recorded income tax benefits of \$0.4 million related to the restructuring charges, \$0.2 million related to the modification of certain employee stock options, \$0.8 million related to the costs described above related to the closure of our breast implant manufacturing facility in Arklow, Ireland, and \$9.3 million of income tax expense for a change in estimated taxes related to pre-acquisition periods associated with business combinations and uncertain tax positions included in prior year income tax filings. Excluding the impact of the pre-tax charges of \$8.8 million and the net income tax expense of \$7.9 million for the items discussed above, our adjusted effective tax rate for the second quarter of 2009 was 27.2%. We believe that the use of an adjusted effective tax rate provides a more meaningful measure of the impact of income taxes on our results of operations because it excludes the effect of certain discrete items that are not included as part of our core business activities. This allows stockholders to better determine the effective tax rate associated with our core business activities.

Table of Contents

The calculation of our adjusted effective tax rate for the second quarter of 2009 is summarized below:

	(in millions)
Earnings before income taxes, as reported	\$ 257.0
Restructuring charges	1.0
Charges related to the modification of certain employee stock options	0.6
Rollout of retention termination benefits and accelerated depreciation related to the closure of our Arklow, Ireland breast implant manufacturing facility	7.2
	\$ 265.8
Provision for income taxes, as reported	\$ 80.2
Income tax benefit (expense) for:	
Restructuring charges	0.4
Charges related to the modification of certain employee stock options	0.2
Rollout of retention termination benefits and accelerated depreciation related to the closure of our Arklow, Ireland breast implant manufacturing facility	0.8
Change in estimated taxes related to pre-acquisition periods associated with business combinations and uncertain tax positions included in prior year income tax filings	(9.3)
	\$ 72.3
Adjusted effective tax rate	27.2%

Our effective tax rate for the first six months of 2009 was 30.8%. Included in our operating income for the first six months of 2009 are restructuring charges of \$43.1 million, a charge of \$77.6 million related to the modification of certain employee stock options in conjunction with our 2009 restructuring plan, the rollout of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the closure of our Arklow, Ireland breast implant manufacturing facility of \$11.7 million, and a loss on the extinguishment of a portion of our 2026 Convertible Notes of \$5.3 million. In the first six months of 2009, we recorded income tax benefits of \$9.8 million related to the restructuring charges, \$27.3 million related to the modification of certain employee stock options, \$1.2 million related to the costs described above related to the closure of our breast implant manufacturing facility in Arklow, Ireland, \$1.2 million related to the loss on the extinguishment of a portion of our 2026 Convertible Notes and \$9.3 million of income tax expense for a change in estimated taxes related to pre-acquisition periods associated with business combinations and uncertain tax positions included in prior year income tax filings. Excluding the impact of the net pre-tax charges of \$137.7 million and the net income tax benefits of \$30.2 million for the items discussed above, our adjusted effective tax rate for the first six months of 2009 was 28.1%.

The calculation of our adjusted effective tax rate for the first six months of 2009 is summarized below:

	(in millions)
Earnings before income taxes, as reported	\$ 320.4
Restructuring charges	43.1
Charges related to the modification of certain employee stock options	77.6
Rollout of retention termination benefits and accelerated depreciation related to the closure of our Arklow, Ireland breast implant manufacturing facility	11.7
Loss on extinguishment of a portion of the 2026 Convertible Notes	5.3
	\$ 458.1
Provision for income taxes, as reported	\$ 98.6
Income tax benefit for:

Restructuring charges	9.8
Charges related to the modification of certain employee stock options	27.3
Rollout of retention termination benefits and accelerated depreciation related to the closure of our Arklow, Ireland breast implant manufacturing facility	1.2
Loss on extinguishment of a portion of the 2026 Convertible Notes	1.2
Change in estimated taxes related to pre-acquisition periods associated with business combinations and uncertain tax positions included in prior year income tax filings	(9.3)
	\$ 128.8
Adjusted effective tax rate	28.1%

Table of Contents

Our effective tax rate for the second quarter and first six months of 2008 was 24.3% and 25.8%, respectively, our effective tax rate for the year ended December 31, 2008 was 25.9%, and our adjusted effective tax rate for the year ended December 31, 2008 was 25.3%. The effective tax rate for the second quarter of 2008, the first six months of 2008, the year ended December 31, 2008 and the adjusted effective tax rate for the year ended December 31, 2008 reflect the retrospective effects of our adoption in the first quarter of 2009 of Financial Accounting Standards Board Staff Position APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*. Included in our operating income for the year ended December 31, 2008 were pre-tax charges of \$68.7 million for upfront payments for technologies that have not achieved regulatory approval, an \$11.7 million charge to cost of sales associated with the Esprit purchase accounting fair market value inventory adjustment rollout, a \$13.2 million charge for a settlement related to the termination of a distribution agreement in Korea, a \$5.6 million charge for the impairment of an intangible asset related to the phase out of a collagen product and total restructuring charges of \$41.3 million. For the year ended December 31, 2008, we recorded income tax benefits of \$21.6 million related to the upfront payments for technologies that have not achieved regulatory approval, \$4.6 million related to the Esprit purchase accounting fair market value inventory adjustment rollout, \$1.3 million related to the charge for a settlement related to the termination of a distribution agreement in Korea, \$2.0 million related to the impairment of an intangible asset, \$4.7 million related to the total restructuring charges and \$2.4 million related to deferred tax benefits related to the legal entity integration of Esprit and Inamed. In 2008, our tax provision was also affected by a \$5.5 million negative income tax impact from non-deductible losses associated with the liquidation of corporate-owned life insurance contracts previously used to fund our executive deferred compensation program. Excluding the impact of the total pre-tax charges of \$140.5 million and the total net income tax benefit of \$31.1 million for the items discussed above, our adjusted effective tax rate for 2008 was 25.3%.

The calculation of our adjusted effective tax rate for the year ended December 31, 2008 is summarized below:

	(in millions)
Earnings from continuing operations before income taxes, as reported	\$ 762.2
Upfront payments for technologies that have not achieved regulatory approval	68.7
Esprit fair market value inventory rollout	11.7
Settlement related to the termination of a distribution agreement in Korea	13.2
Impairment of an intangible asset	5.6
Total restructuring charges	41.3
	\$ 902.7
Provision for income taxes, as reported	\$ 197.5
Income tax benefit (provision) for:	
Upfront payments for technologies that have not achieved regulatory approval	21.6
Esprit fair market value inventory rollout	4.6
Settlement related to the termination of a distribution agreement in Korea	1.3
Impairment of an intangible asset	2.0
Total restructuring charges	4.7
Deferred tax benefit from the legal entity integration of Esprit and Inamed	2.4
Negative tax impact from non-deductible losses associated with the liquidation of corporate-owned life insurance contracts	(5.5)
	\$ 228.6
Adjusted effective tax rate	25.3%

The increase in the adjusted effective tax rate to 28.1% in the first six months of 2009 compared to the adjusted effective tax rate for the year ended December 31, 2008 of 25.3% is primarily due to an increase in the mix of earnings in higher tax rate jurisdictions.

The lower adjusted effective tax rate of 27.2% in the second quarter of 2009 compared to the adjusted effective tax rate of 28.1% for the first six months of 2009 is primarily due to the catch-up effect in the second quarter of 2009 related to adjusting the estimated annual effective tax rate for 2009.

Net Earnings Attributable to Allergan, Inc.

Our net earnings attributable to Allergan, Inc. in the second quarter of 2009 were \$176.1 million compared to \$143.4 million in the second quarter of 2008. The \$32.7 million increase in net earnings attributable to Allergan, Inc. was primarily the result of the increase in operating income of \$83.5 million, partially offset by the increase in net non-operating expense of

Table of Contents

\$16.4 million, the increase in the provision for income taxes of \$34.1 million and the increase in net earnings attributable to noncontrolling interest of \$0.3 million.

Our net earnings attributable to Allergan, Inc. in the first six months of 2009 were \$220.8 million compared to \$251.1 million in the first six months of 2008. The \$30.3 million decrease in net earnings attributable to Allergan, Inc. was primarily the result of the decrease in operating income of \$0.4 million, the increase in net non-operating expense of \$18.6 million, the increase in the provision for income taxes of \$10.9 million and the increase in net earnings attributable to noncontrolling interest of \$0.4 million.

Liquidity and Capital Resources

We assess our liquidity by our ability to generate cash to fund our operations. Significant factors in the management of liquidity are: funds generated by operations; levels of accounts receivable, inventories, accounts payable and capital expenditures; the extent of our stock repurchase program; funds required for acquisitions and other transactions; adequate funds available under our credit facilities; and financial flexibility to attract long-term capital on satisfactory terms.

Historically, we have generated cash from operations in excess of working capital requirements. The net cash provided by operating activities for the first six months of 2009 was \$449.2 million compared to \$245.5 million for the first six months of 2008. Cash flow from operating activities increased in the first six months of 2009 compared to the first six months of 2008 primarily as a result of a net decrease in cash required to fund changes in net operating assets and liabilities, principally trade receivables, inventories and accounts payable, partially offset by an increase in cash used to fund payments of accrued expenses, and an increase in earnings from operations, including the effect of adjusting for non-cash items. In the first six months of 2008, we paid pension contributions of \$5.0 million to our U.S. defined benefit pension plan. We did not make any pension contributions to our U.S. defined benefit pension plan in the first six months of 2009.

Net cash used in investing activities was \$33.2 million in the first six months of 2009 compared to \$149.8 million in the first six months of 2008. In the first six months of 2009, we received \$11.6 million related to contractual purchase price adjustments to our 2007 acquisitions of Cornéal and Esprit. Additionally, we invested \$27.4 million in new facilities and equipment and \$17.4 million in capitalized software. In the first six months of 2009, we purchased an office building contiguous to our main facility in Irvine, California for approximately \$20.7 million. We assumed a mortgage of \$20.0 million and paid \$0.7 million in cash. In the first six months of 2008, we collected \$3.0 million on a receivable related to the 2007 sale of the ophthalmic surgical device business that we acquired as a part of the Cornéal acquisition and \$3.0 million from the sale of assets that we acquired as a part of the Esprit acquisition. Additionally, we invested \$66.0 million in new facilities and equipment and \$26.8 million in capitalized software, and capitalized \$63.0 million as intangible assets including a buyout payment of contingent licensing obligations related to *Sanctura*[®] products and a milestone payment related to expected annual *Restasis*[®] net sales. We currently expect to invest between \$110 million and \$130 million in capital expenditures for manufacturing and administrative facilities, manufacturing equipment and other property, plant and equipment during 2009.

Net cash used in financing activities was \$141.3 million in the first six months of 2009 compared to \$175.0 million in the first six months of 2008. In the first six months of 2009, we repurchased approximately 0.7 million shares of our common stock for \$30.9 million, paid \$98.3 million to repurchase \$100.3 million principal amount of our 2026 Convertible Notes and paid \$30.3 million in dividends. This use of cash was partially offset by \$7.8 million in net borrowings of notes payable and \$10.4 million received from the sale of stock to employees. In the first six months of 2008, we repurchased approximately 2.6 million shares of our common stock for \$154.8 million, had net repayments of notes payable of \$34.7 million and paid \$30.4 million in dividends. This use of cash was partially offset by \$37.3 million received from the sale of stock to employees and \$7.6 million in excess tax benefits from share-based compensation.

Effective July 30, 2009, our Board of Directors declared a cash dividend of \$0.05 per share, payable September 7, 2009 to stockholders of record on August 17, 2009.

We maintain an evergreen stock repurchase program. Our evergreen stock repurchase program authorizes us to repurchase our common stock for the primary purpose of funding our stock-based benefit plans. Under the stock repurchase program, we may maintain up to 18.4 million repurchased shares in our treasury account at any one time. As of June 30, 2009, we held approximately 3.3 million treasury shares under this program. Effective February 6, 2009, we entered into a Rule 10b5-1 plan that authorizes our broker to purchase our common stock traded in the open market pursuant to our evergreen stock repurchase program. The terms of the plan set a maximum annual limit of 2.0 million shares to be repurchased, and certain quarterly maximum and minimum volume limits. The term of our Rule 10b5-1 plan ends on December 31, 2009 and is cancellable at any time in our sole discretion and in accordance with applicable insider trading laws.

Table of Contents

Our 2026 Convertible Notes pay interest semi-annually on the principal amount of the notes at a rate of 1.50% per annum and are convertible, at the holder's option, at an initial conversion rate of 15.7904 shares per \$1,000 principal amount of notes. In certain circumstances the 2026 Convertible Notes may be convertible into cash in an amount equal to the lesser of their principal amount or their conversion value. If the conversion value of the 2026 Convertible Notes exceeds their principal amount at the time of conversion, we will also deliver common stock or, at our election, a combination of cash and common stock for the conversion value in excess of the principal amount. We were not permitted to redeem the 2026 Convertible Notes prior to April 5, 2009, will be permitted to redeem the 2026 Convertible Notes from and after April 5, 2009 to April 4, 2011 if the closing price of our common stock reaches a specified threshold, and will be permitted to redeem the 2026 Convertible Notes at any time on or after April 5, 2011. Holders of the 2026 Convertible Notes will also be able to require us to redeem the 2026 Convertible Notes at the principal amount on April 1, 2011, April 1, 2016 and April 1, 2021 or upon a change in control of us. The 2026 Convertible Notes mature on April 1, 2026, unless previously redeemed by us or earlier converted by the note holders.

Our 5.75% Senior Notes due 2016, or 2016 Notes, were sold at 99.717% of par value with an effective interest rate of 5.79%, pay interest semi-annually at a rate of 5.75% per annum, and are redeemable at any time at our option, subject to a make-whole provision based on the present value of remaining interest payments at the time of the redemption. The aggregate outstanding principal amount of the 2016 Notes is due and payable on April 1, 2016, unless earlier redeemed by us.

At June 30, 2009, we had a committed long-term credit facility, a commercial paper program, a medium-term note program, an unused shelf registration statement that allows us to issue additional securities, including debt securities, in one or more offerings from time to time, and various foreign bank facilities. Our committed long-term credit facility expires in May 2012. The termination date can be further extended from time to time upon our request and acceptance by the issuer of the facility for a period of one year from the last scheduled termination date for each request accepted. The committed long-term credit facility allows for borrowings of up to \$800 million. The commercial paper program also provides for up to \$600 million in borrowings. Borrowings under the committed long-term credit facility and medium-term note program are subject to certain financial and operating covenants that include, among other provisions, maximum leverage ratios. Certain covenants also limit subsidiary debt. We believe we were in compliance with these covenants at June 30, 2009. As of June 30, 2009, we had no borrowings under our committed long-term credit facility, \$25.0 million in borrowings outstanding under the medium-term note program, \$12.2 million in borrowings outstanding under various foreign bank facilities and no borrowings under the commercial paper program. Commercial paper, when outstanding, is issued at current short-term interest rates. Additionally, any future borrowings that are outstanding under the long-term credit facility will be subject to a floating interest rate. We may from time to time seek to retire or purchase our outstanding debt.

As of December 31, 2008, we had net pension and postretirement benefit obligations totaling \$197.2 million. Future funding requirements are subject to change depending on the actual return on net assets in our funded pension plans and changes in actuarial assumptions. In 2009, we expect to pay pension contributions of between \$10.0 million and \$15.0 million for our U.S. and non-U.S. pension plans and between \$1.0 million and \$2.0 million for our other postretirement plan.

On February 4, 2009, we announced a restructuring plan that involves a workforce reduction of approximately 460 employees, primarily in the United States and Europe. We began to record charges in the first quarter of 2009 and currently expect to continue to recognize pre-tax charges through the fourth quarter of 2009 of between \$119.0 million and \$126.0 million, of which \$40.0 million to \$45.0 million are expected to be cash expenditures. The remaining charges are non-cash charges associated with the modifications of certain employee stock options and other non-cash asset write-offs.

In July 2009, we paid approximately \$16.7 million to Samil Pharmaceutical Co. Ltd. to complete our joint venture investment in Korea and received a 50.005% stockholder interest (50% plus one share) in the joint venture. Also in July 2009, we received gross proceeds of approximately \$25.5 million from the sale of a non-marketable equity investment.

A significant amount of our existing cash and equivalents are held by non-U.S. subsidiaries. We currently plan to use these funds in our operations outside the United States. Withholding and U.S. taxes have not been provided for unremitted earnings of certain non-U.S. subsidiaries because we have reinvested these earnings indefinitely in such operations. As of December 31, 2008, we had approximately \$1,630.9 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Tax costs would be incurred if these funds were remitted to the United States.

We believe that the net cash provided by operating activities, supplemented as necessary with borrowings available under our existing credit facilities and existing cash and equivalents, will provide us with sufficient resources to meet our current expected obligations, working capital requirements, debt service and other cash needs over the next year.

Table of Contents**ALLERGAN, INC.****Item 3. Quantitative and Qualitative Disclosures About Market Risk**

In the normal course of business, our operations are exposed to risks associated with fluctuations in interest rates and foreign currency exchange rates. We address these risks through controlled risk management that includes the use of derivative financial instruments to economically hedge or reduce these exposures. We do not enter into financial instruments for trading or speculative purposes.

To ensure the adequacy and effectiveness of our interest rate and foreign exchange hedge positions, we continually monitor our interest rate swap positions and foreign exchange forward and option positions both on a stand-alone basis and in conjunction with our underlying interest rate and foreign currency exposures, from an accounting and economic perspective.

However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, we cannot assure you that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect our consolidated operating results and financial position.

Interest Rate Risk

Our interest income and expense is more sensitive to fluctuations in the general level of U.S. interest rates than to changes in rates in other markets. Changes in U.S. interest rates affect the interest earned on our cash and equivalents, interest expense on our debt as well as costs associated with foreign currency contracts.

On January 31, 2007, we entered into a nine-year, two-month interest rate swap with a \$300.0 million notional amount with semi-annual settlements and quarterly interest rate reset dates. The swap receives interest at a fixed rate of 5.75% and pays interest at a variable interest rate equal to 3-month LIBOR plus 0.368%, and effectively converts \$300.0 million of the \$800.0 million aggregate principal amount of our 2016 Notes to a variable interest rate. Based on the structure of the hedging relationship, the hedge meets the criteria for using the short-cut method for a fair value hedge under the provisions of Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*, or SFAS No. 133. Under the provisions of SFAS No. 133, the investment in the derivative and the related long-term debt are recorded at fair value. At June 30, 2009 and December 31, 2008, we recognized in our consolidated balance sheets an asset reported in

Investments and other assets and a corresponding increase in Long-term debt associated with the fair value of the derivative of \$31.7 million and \$61.9 million, respectively. The differential to be paid or received as interest rates change is accrued and recognized as an adjustment of interest expense related to the 2016 Notes. During the three and six month periods ended June 30, 2009, we recognized \$3.6 million and \$6.7 million, respectively, as a reduction of interest expense due to the differential to be received. During the three and six month periods ended June 30, 2008, we recognized \$1.9 million and \$3.9 million, respectively, as a reduction of interest expense due to the differential to be received.

In February 2006, we entered into interest rate swap contracts based on 3-month LIBOR with an aggregate notional amount of \$800.0 million, a swap period of 10 years and a starting swap rate of 5.198%. We entered into these swap contracts as a cash flow hedge to effectively fix the future interest rate for our 2016 Notes. In April 2006, we terminated the interest rate swap contracts and received approximately \$13.0 million. The total gain is being amortized as a reduction to interest expense over a 10 year period to match the term of the 2016 Notes. As of June 30, 2009, the remaining unrecognized gain, net of tax, of \$5.3 million is recorded as a component of accumulated other comprehensive loss.

At June 30, 2009, we had approximately \$12.2 million of variable rate debt. If interest rates were to increase or decrease by 1% for the year, annual interest expense, including the effect of the \$300.0 million notional amount of the interest rate swap entered into on January 31, 2007, would increase or decrease by approximately \$3.1 million. Commercial paper, when outstanding, is issued at current short-term interest rates. Additionally, any future borrowings that are outstanding under the long-term credit facility will be subject to a floating interest rate. Therefore, higher interest costs could occur if interest rates increase in the future.

The tables below present information about certain of our investment portfolio and our debt obligations at June 30, 2009 and December 31, 2008.

Table of Contents

Foreign Currency Risk

Overall, we are a net recipient of currencies other than the U.S. dollar and, as such, benefit from a weaker dollar and are adversely affected by a stronger dollar relative to major currencies worldwide. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, may negatively affect our consolidated revenues or operating costs and expenses as expressed in U.S. dollars.

From time to time, we enter into foreign currency option and forward contracts to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow our management to focus its attention on our core business issues. Accordingly, we enter into various contracts which change in value as foreign exchange rates change to economically offset the effect of changes in the value of foreign currency assets and liabilities, commitments and anticipated foreign currency denominated sales and operating expenses. We enter into foreign currency option and forward contracts in amounts between minimum and maximum anticipated foreign exchange exposures, generally for periods not to exceed one year.

We use foreign currency option contracts, which provide for the sale or purchase of foreign currencies to offset foreign currency exposures expected to arise in the normal course of our business. While these instruments are subject to fluctuations in value, such fluctuations are anticipated to offset changes in the value of the underlying exposures.

All of our outstanding foreign currency option contracts are entered into to reduce the volatility of earnings generated in currencies other than the U.S. dollar, primarily earnings denominated in the Canadian dollar, Mexican peso, Australian dollar, Brazilian real, euro, U.K. pound and Japanese yen. Current changes in the fair value of open foreign currency option contracts are recorded through earnings as Unrealized gain (loss) on derivative instruments, net while any realized gains (losses) on settled contracts are recorded through earnings as Other, net in the accompanying unaudited condensed consolidated statements of earnings. The premium costs of purchased foreign exchange option contracts are recorded in Other current assets and amortized to Other, net over the life of the options.

All of our outstanding foreign exchange forward contracts are entered into to protect the value of certain intercompany receivables or payables that are subject to fluctuations in foreign currency exchange rates. The realized and unrealized gains and losses from foreign currency forward contracts and the revaluation of the foreign denominated intercompany receivables or payables are recorded through Other, net in the accompanying unaudited condensed consolidated statements of earnings.

Table of Contents

The following table provides information about our foreign currency derivative financial instruments outstanding as of June 30, 2009 and December 31, 2008. The information is provided in U.S. dollars, as presented in our unaudited condensed consolidated financial statements:

	June 30, 2009		December 31, 2008

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and our Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Our management, including our Principal Executive Officer and our Principal Financial Officer, does not expect that our disclosure controls or procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, we have investments in certain unconsolidated entities. As we do not control or manage these entities, our disclosure controls and procedures with respect to such entities are necessarily substantially more limited than those we maintain with respect to our consolidated subsidiaries.

We carried out an evaluation, under the supervision and with the participation of our management, including our Principal Executive Officer and our Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2009, the end of the quarterly period covered by this report. Based on the foregoing, our Principal Executive Officer and our Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective and were operating at the reasonable assurance level.

Further, management determined that, as of June 30, 2009, there were no changes in our internal control over financial reporting that occurred during the first six month period of 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**ALLERGAN, INC.****PART II OTHER INFORMATION****Item 1. Legal Proceedings**

The following supplements and amends the discussion set forth under Part II, Item 1 Legal Proceedings of our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2009 and Part I, Item 3, Legal Proceedings in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

In August 2004, James Clayworth, R.Ph., doing business as Clayworth Pharmacy, filed a complaint entitled *Clayworth v. Allergan, et al.* in the Superior Court of the State of California for the County of Alameda. The complaint, as amended, named us and 12 other defendants and alleged unfair business practices, including a price fixing conspiracy relating to the reimportation of pharmaceuticals from Canada. The complaint sought damages, equitable relief, attorneys' fees and costs. On January 8, 2007, the court entered a notice of entry of judgment of dismissal against the plaintiffs dismissing the plaintiffs' complaint. On the same date, the plaintiffs filed a notice of appeal with the court of appeal. On April 14, 2007, the plaintiffs filed an opening brief with the Court of Appeal of the State of California. The defendants filed their joint opposition on July 5, 2007, and the plaintiffs filed their reply on August 24, 2007. On May 14, 2008, the court of appeal heard oral arguments and took the matter under submission. On July 25, 2008, the court of appeal affirmed the superior court's ruling granting our motion for summary judgment. On August 11, 2008, the plaintiffs filed a petition for rehearing with the court of appeal. On August 19, 2008, the court of appeal denied the plaintiffs' petition for rehearing. On September 3, 2008, the plaintiffs filed a petition for review with the Supreme Court of the State of California. On November 19, 2008, the Supreme Court of the State of California granted the plaintiffs' petition for review. On February 17, 2009, the plaintiffs filed their opening brief on the merits with the Supreme Court of the State of California. On May 11, 2009, defendants filed their answer brief on the merits with the Supreme Court of the State of California. On June 22, 2009, plaintiffs filed their reply brief on the merits with the Supreme Court of the State of California.

In March 2009, we filed a complaint in the U.S. District Court for the Central District of California alleging infringement of U.S. Patent Nos. 6,262,105, 7,351,404, and 7,388,029 against 13 defendants, including Athena Cosmetics, Inc., Pharma Tech, Dimensional Merchandising, Stella International, LLC, Product Innovations, LLC, Metics, LLC, Nutra-Luxe M.D., LLC, Skin Research Laboratories, Inc., Lifetech Resources LLC, Rocasuba, Inc., La Canada Ventures, Inc., Susan Lin, M.D., Peter Thomas Roth Labs, LLC and Peter Thomas Roth, Inc. In June 2009, we and La Canada Ventures, Inc. and Susan Lin, M.D. entered into a settlement agreement under which La Canada and Susan Lin, M.D. agreed to cease manufacturing and selling certain products and acknowledge the validity of our patents in exchange for our dismissing all claims against La Canada and Susan Lin, M.D. On June 29, 2009, the court consolidated this matter with *Allergan, Inc. v. Cayman Chemical Company, Jan Marini Skin Research, Inc., Athena Cosmetics, Inc., Dermaquest, Inc., Intuit Beauty, Inc., Civic Center Pharmacy and Photomedex, Inc.* and set an October 12, 2010 trial date for both cases. On July 7, 2009, we filed a motion to file a first amended complaint. On July 13, 2009, Athena Cosmetics filed a second amended answer and counterclaims to the complaint. On July 20, 2009, Lifetech Resources and Rocasuba filed an opposition to the motion to file a first amended complaint.

In July 2008, a complaint entitled *Kramer, Bryant, Spears, Doolittle, Clark, Whidden, Powell, Moore, Hennessey, Sody, Breeding, Downey, Underwood-Boswell, Reed-Momot, Purdon & Hahn v. Allergan, Inc.* was filed in the Superior Court for the State of California for the County of Orange. The complaint makes allegations against us relating to *Botox*[®] and *Botox*[®] Cosmetic including failure to warn, manufacturing defects, negligence, breach of implied and express warranties, deceit by concealment and negligent misrepresentation and seeks damages, attorneys' fees and costs. In 2009, the plaintiffs filed requests for dismissal without prejudice as to plaintiffs Hennessey, Hahn, Underwood-Boswell, Purdon, Moore and Clark and the court dismissed these plaintiffs without prejudice.

In February 2009 and in April 2009, we received paragraph 4 invalidity and noninfringement Hatch-Waxman Act certifications from Sandoz, Inc., or Sandoz, and Hi-Tech Pharmacal Co., or Hi-Tech, respectively, indicating that Sandoz and Hi-Tech had filed ANDAs seeking approval of generic forms of *Combigan*[®], a brimonidine tartrate 0.2%, timolol maleate 0.5% ophthalmic solution. In their separate certifications, Sandoz and Hi-Tech each contend that U.S. Patent Nos. 7,030,149 and 7,320,976, listed in the Orange Book under *Combigan*[®], are invalid and/or not infringed by the proposed Sandoz product and by the proposed Hi-Tech product. In April 2009, we filed a complaint against Sandoz in the U.S. District Court for the Eastern District of Texas. The complaint alleges that Sandoz's proposed product infringes U.S. Patent Nos. 7,030,149 and 7,320,976. On June 2, 2009, Sandoz filed a motion to dismiss for lack of personal jurisdiction and for improper venue. On

Table of Contents

June 5, 2009, we filed a complaint against Hi-Tech in the U.S. District Court for the Eastern District of Texas. The complaint alleges that Hi-Tech's proposed product infringes U.S. Patent Nos. 7,030,149 and 7,320,976. On July 17, 2009, we filed a response to Sandoz's motion to dismiss for lack of personal jurisdiction and for improper venue. On July 23, 2009, Hi-Tech filed a motion to dismiss for lack of personal jurisdiction and for improper venue.

In March 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Barr Laboratories, Inc., or Barr, indicating that Barr had filed an Abbreviated New Drug Application, or ANDA, seeking approval of a generic form of *Lumigan*[®], a bimatoprost 0.3% ophthalmic solution. In the certification, Barr contends that U.S. Patent Nos. 5,688,819 and 6,403,649, listed in the Orange Book under *Lumigan*[®], are invalid and/or not infringed by the proposed Barr product. In May 2009, we filed a complaint against Barr in the U.S. District Court for the District of Delaware. The complaint alleges that Barr's proposed product infringes U.S. Patent Nos. 5,688,819 and 6,403,649. On June 26, 2009, Barr filed an answer to the complaint.

In June 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Watson Pharmaceuticals, Inc., or Watson, through its subsidiary Watson Laboratories, Inc. Florida, indicating that Watson had filed an ANDA seeking approval of a generic form of *Sanctura*[®] XR, trospium chloride extended release capsules. In the certification, Watson contends that U.S. Patent No. 7,410,978, listed in the Orange Book under *Sanctura*[®] XR, is invalid and/or not infringed by the proposed Watson product. In July 2009, we, Endo Pharmaceuticals Solutions, Inc., and Supernus Pharmaceuticals, Inc. filed a complaint against Watson, Watson Laboratories, Inc. Florida, and Watson Pharma, Inc. in the U.S. District Court for the District of Delaware. The complaint alleges that Watson's proposed product infringes U.S. Patent No. 7,410,978.

In March 2008, we received service of a Subpoena Duces Tecum from the U.S. Attorney, U.S. Department of Justice, Northern District of Georgia, or DOJ. The subpoena requests the production of documents relating to our sales and marketing practices in connection with *Botox*[®].

We are involved in various other lawsuits and claims arising in the ordinary course of business. These other matters are, in the opinion of management, immaterial both individually and in the aggregate with respect to our consolidated financial position, liquidity or results of operations.

Because of the uncertainties related to the incurrence, amount and range of loss on any pending litigation, investigation, inquiry or claim, management is currently unable to predict the ultimate outcome of any litigation, investigation, inquiry or claim, determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome. We believe, however, that the liability, if any, resulting from the aggregate amount of uninsured damages for any outstanding litigation, investigation or claim, other than the inquiry being conducted by the DOJ or any related qui tam or other action, will not have a material adverse effect on our consolidated financial position, liquidity or results of operations. However, an adverse ruling in a patent infringement lawsuit involving us could materially affect our ability to sell one or more of our products or could result in additional competition. In view of the unpredictable nature of such matters, we cannot provide any assurances regarding the outcome of any litigation, investigation, inquiry or claim to which we are a party or the impact on us of an adverse ruling in such matters.

Item 1A. Risk Factors

The risk factors presented below update, and should be considered in addition to, the risk factors previously disclosed by us in Part II, Item 1A of our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2009 and Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

We operate in a highly competitive business.

The pharmaceutical and medical device industries are highly competitive and they require an ongoing, extensive search for technological innovation. They also require, among other things, the ability to effectively discover, develop, test and obtain regulatory approvals for products, as well as the ability to effectively commercialize, market and promote approved products, including communicating the effectiveness, safety and value of products to actual and prospective customers and medical professionals.

Many of our competitors have greater resources than we have. This enables them, among other things, to make greater research and development investments and spread their research and development costs, as well as their marketing and promotion costs, over a broader revenue base. Our competitors may also have more experience and expertise in obtaining

Table of Contents

marketing approvals from the U.S. Food and Drug Administration, or FDA, and other regulatory authorities. In addition to product development, testing, approval and promotion, other competitive factors in the pharmaceutical and medical device industries include industry consolidation, product quality and price, product technology, reputation, customer service and access to technical information.

It is possible that developments by our competitors could make our products or technologies less competitive or obsolete. Our future growth depends, in part, on our ability to develop products which are more effective. For instance, for our eye care products to be successful, we must be able to manufacture and effectively market those products and effectively detail them to a sufficient number of eye care professionals such that they determine to use or continue to use our current products and the new products we may introduce. Glaucoma must be treated over an extended period and doctors may be reluctant to switch a patient to a new treatment if the patient's current treatment for glaucoma remains effective. Sales of our existing products may decline rapidly if a new product is introduced by one of our competitors or if we announce a new product that, in either case, represents a substantial improvement over our existing products. Similarly, if we fail to make sufficient investments in research and development programs, our current and planned products could be surpassed by more effective or advanced products developed by our competitors.

Until December 2000, *Botox*[®] was the only neuromodulator approved by the FDA. At that time, the FDA approved *Myobloc*[®], a neuromodulator formerly marketed by Elan Pharmaceuticals and now marketed by Solstice Neurosciences, Inc. On April 30, 2009, the FDA approved *Dysport* (abobotulinumtoxinA) for the treatment of cervical dystonia and glabellar lines to be marketed by Ipsen Ltd., or Ipsen, and Medicis Pharmaceutical Corporation, or Medicis, respectively. The approved package for *Dysport* included a boxed warning regarding the symptoms associated with the spread of botulinum toxin beyond the injection site. Additionally, the FDA approved Ipsen's and Medicis' Risk Evaluation and Mitigation Strategy, or REMS, program, which addresses the lack of interchangeability of botulinum toxin products and the risks associated with the spread of botulinum toxin beyond the injection site. Ipsen has marketed *Dysport* in Europe since 1991, prior to our European commercialization of *Botox*[®] in 1992. In June 2006, Ipsen received marketing authorization for a cosmetic indication for *Dysport* in Germany. In 2007, Ipsen granted Galderma, a joint venture between Nestle and L'Oréal Group, an exclusive development and marketing license for *Dysport* for aesthetic indications in the European Union, Russia, Eastern Europe and the Middle East, and first rights of negotiation for other countries around the world, except the United States, Canada and Japan. In January 2008, Galderma became Ipsen's sole distributor for *Dysport* in Brazil, Argentina and Paraguay. Ipsen is also seeking approval for *Dysport* for cosmetic indications in the European Union, having submitted a file to the French regulatory authority in May 2003. In January 2009, the health authorities of 15 European Union countries granted approval of *Dysport* for glabellar lines under the trade name *Azzalure*.

Mentor Corporation, or Mentor, which was acquired by Johnson & Johnson, is conducting clinical trials for a competing neuromodulator in the United States. In addition, we are aware of competing neuromodulators currently being developed and commercialized in Asia, Europe, South America and other markets. A Chinese entity received approval to market a botulinum toxin in China in 1997, and we believe that it has launched or is planning to launch its botulinum toxin product in other lightly regulated markets in Asia, South America and Central America. These lightly regulated markets may not require adherence to the FDA's current Good Manufacturing Practice regulations, or cGMPs, or the regulatory requirements of the European Medical Evaluation Agency or other regulatory agencies in countries that are members of the Organization for Economic Cooperation and Development. Therefore, companies operating in these markets may be able to produce products at a lower cost than we can. In addition, Merz Pharmaceuticals, or Merz, botulinum toxin product *Xeomin*[®] is currently approved and for sale in certain countries in the European Union, and in Argentina, Canada and Mexico. Merz is pursuing approval in the United States for cervical dystonia, blepharospasm, spasticity and cosmetic indications and is awaiting therapeutic licenses for *Xeomin*[®] in many countries in the European Union. A Korean botulinum toxin, *Meditoxin*[®], was approved for sale in Korea in June 2006. The company, Medy-Tox Inc., received exportation approval from Korean authorities in early 2005 to ship their product under the trade name *Neuronox*[®]. Our sales of *Botox*[®] could be materially and negatively impacted by this competition or competition from other companies that might obtain FDA approval or approval from other regulatory authorities to market a neuromodulator.

Mentor is our principal competitor in the United States for breast implants. Mentor announced that, like us, it received FDA approval in November 2006 to sell its silicone breast implants. The conditions under which Mentor is allowed to market its silicone breast implants in the United States are similar to ours, including indications for use and the requirement to conduct post-marketing studies. If patients or physicians prefer Mentor's breast implant products to ours or perceive that Mentor's breast implant products are safer than ours, our sales of breast implants could materially suffer. In addition, Sientra, Inc. is currently conducting clinical studies of breast implant products in the United States. Internationally, we compete with several manufacturers, including Mentor, Silimed, MediCor Ltd and its subsidiaries BioSil Ltd, Nagor and Eurosilicone, Poly Implant Protheses, Sebbin Laboratories and certain Chinese implant manufacturers.

Table of Contents

Medicis began marketing the dermal fillers *Restylane*[®] in January 2004 and *Perlane*[®] in May 2007. Through our purchase of Cornéal, we acquired the rights to sell the *Juvéderm*[®] family of dermal filler products worldwide. *Juvéderm*[®] 30, *Juvéderm*[®] Ultra and *Juvéderm*[®] Ultra Plus were approved by the FDA for sale in the United States in June 2006, and we announced nationwide availability of *Juvéderm*[®] Ultra and *Juvéderm*[®] Ultra Plus in January 2007. We cannot assure you that our *Juvéderm*[®] family of products will offer equivalent or greater facial aesthetic benefits to competitive dermal filler products, that it will be competitive in price or gain acceptance in the marketplace.

In addition, in June 2007, the FDA approved label extensions for *Juvéderm*[®] Ultra and *Juvéderm*[®] Ultra Plus based on new clinical data demonstrating that the effects of both products may last for up to one year, which is a longer period of time than was reported in clinical studies that supported FDA approval of other hyaluronic acid dermal fillers. In addition, in 2008, we filed a supplement to our premarket approval, or PMA, for *Juvéderm*[®] Ultra and *Juvéderm*[®] Ultra Plus related to a new formulation containing lidocaine, an anesthetic that alleviates pain during injections. We cannot assure you that the FDA will continue to grant our label extensions, approve the supplement to our PMA or that other dermal fillers, including hyaluronic acid dermal fillers, do not have or will not obtain labels or label extensions that demonstrate product effects that are equivalent to or better than our products. Should our competitors obtain such labels or label extensions demonstrating product effects that are equivalent to or better than our products, our sales of *Juvéderm*[®] could be materially and negatively impacted.

In September 2007, Ethicon Endo-Surgery, Inc., a subsidiary of Johnson & Johnson, announced FDA approval of its gastric band product, the *Realize* band, which competes with our *Lap-Band*[®] System in the U.S. market. The *Lap-Band*[®] System also competes with surgical obesity procedures, including gastric bypass, vertical banded gastroplasty, sleeve gastrectomy and biliopancreatic diversion.

Our products for the treatment of overactive bladder, or OAB, *Sanctura*[®] and *Sanctura XR*[®], compete with several other OAB treatment products, many of which have been on the market for a longer period of time, including Pfizer Inc. *s Detrol*[®], *Detrol*[®] LA and *Toviaz*, Watson Pharmaceuticals, Inc. *s Oxytrol*[®], Novartis Pharmaceuticals Corporation and the Procter & Gamble Company *s Enablex*[®] and Astellas Pharma US, Inc. and GlaxoSmithKline *s Vesicare*[®] and certain generic OAB products. While we believe that *Sanctura*[®] and *Sanctura XR*[®] have advantages over these competing products, we cannot assure you that *Sanctura*[®] and *Sanctura XR*[®] offer more effective treatment of OAB for all patients, will be competitive in price or will obtain, maintain or increase market share in the OAB treatment market.

We also face competition from generic drug manufacturers in the United States and internationally. For instance, Falcon Pharmaceuticals, Ltd., an affiliate of Alcon Laboratories, Inc., or Alcon, attempted to obtain FDA approval for a brimonidine product to compete with our *Alphagan*[®] P 0.15% product. Pursuant to our March 2006 settlement with Alcon, Alcon may sell, offer for sale or distribute its brimonidine 0.15% product after September 30, 2009, or earlier if specified market conditions occur. The primary market condition will have occurred if prescriptions of *Alphagan*[®] P 0.15% have reached a specified threshold as compared to other brimonidine-containing products. In February 2007, we received a paragraph 4 invalidity and non-infringement Hatch-Waxman Act certification from Exela PharmSci, Inc., or Exela, in which it purports to have sought FDA approval to market a generic form of *Alphagan*[®] P 0.15%. In April 2007, we received a paragraph 4 invalidity and non-infringement Hatch-Waxman Act certification from Apotex, Inc., or Apotex, in which it purports to have sought FDA approval to market a generic form of *Alphagan*[®] P 0.15% and *Alphagan*[®] P 0.1%. We filed complaints against Exela and Apotex and trial was held in March 2009. Furthermore, Apotex attempted to obtain FDA approval for and to launch generic forms of *Acular*[®] and *Acular LS*[®]. Pursuant to a federal court ruling in June 2006, Apotex is barred from obtaining approval before our patent related to *Acular*[®] and *Acular LS*[®] expires in November 2009. In February 2009 and in April 2009, we received paragraph 4 invalidity and noninfringement Hatch-Waxman Act certifications from Sandoz, Inc., or Sandoz, and Hi-Tech Pharmacal Co., or Hi-Tech, respectively, indicating that Sandoz and Hi-Tech had each filed an ANDA seeking approval of a generic form of *Combigan*[®], a brimonidine tartrate 0.2%, timolol maleate 0.5% ophthalmic solution. In April 2009, we filed a complaint against Sandoz. In March 2009, we received a paragraph 4 invalidity and non-infringement Hatch-Waxman Act certification in which Barr Laboratories, Inc., or Barr, seeks FDA approval to market a generic form of *Lumigan*[®], a bimatoprost 0.3% ophthalmic solution. In May 2009, we filed a complaint against Barr. In June 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Watson Pharmaceuticals, Inc., or Watson, through its subsidiary Watson Laboratories, Inc. Florida, indicating that Watson had filed an ANDA seeking approval of a generic form of *Sanctura*[®] XR, trospium 60 mg. chloride extended release capsules. In July 2009, we filed a complaint against Watson. See Part II, Item 1 of this report, *Legal Proceedings* for information concerning our current litigation.

Our future success depends upon our ability to develop new products, and new indications for existing products, that achieve regulatory approval for commercialization.

For our business model to be successful, we must continually develop, test and manufacture new products or achieve new indications or label extensions for the use of our existing products. Prior to marketing, these new products and product

Table of Contents

indications must satisfy stringent regulatory standards and receive requisite approvals or clearances from regulatory authorities in the United States and abroad. The development, regulatory review and approval, and commercialization processes are time consuming, costly and subject to numerous factors that may delay or prevent the development, approval or clearance, and commercialization of new products, including legal actions brought by our competitors. To obtain approval or clearance of new indications or products in the United States, we must submit, among other information, the results of preclinical and clinical studies on the new indication or product candidate to the FDA. The number of preclinical and clinical studies that will be required for FDA approval varies depending on the new indication or product candidate, the disease or condition for which the new indication or product candidate is in development and the regulations applicable to that new indication or product candidate. Even if we believe that the data collected from clinical trials of new indications for our existing products or for our product candidates are promising, the FDA may find such data to be insufficient to support approval of the new indication or product. The FDA can delay, limit or deny approval or clearance of a new indication or product candidate for many reasons, including:

a determination that the new indication or product candidate is not safe and effective;

the FDA may interpret our preclinical and clinical data in different ways than we do;

the FDA may not approve our manufacturing processes or facilities;

the FDA may not approve the REMS program;

the FDA may require us to perform post-marketing clinical studies; or

the FDA may change its approval policies or adopt new regulations.

Products that we are currently developing, other future product candidates or new indications or label extensions for our existing products, may or may not receive the regulatory approvals or clearances necessary for marketing or may receive such approvals or clearances only after delays or unanticipated costs. For example, in May 2009, we received a complete response letter from the FDA regarding our Supplemental Biologics License Application, or sBLA, for *Botox*[®] to treat upper limb spasticity in post-stroke adults. The complete response letter identified items needed to complete the sBLA submission, including that we independently verify underlying patient source documentation at study sites relating to one of the pivotal clinical studies conducted in 1999 and upon completion of the verification, provide the FDA an updated analysis. Further, the FDA may require us to implement a REMS program to manage known or potential serious risks associated with our pharmaceutical products to ensure that the benefits of our products outweigh their risks. A REMS program can include patient package inserts, medication guides, communication plans, an implementation system and other elements necessary to assure safe use of our pharmaceutical product. If the FDA determines that a REMS program is necessary, the agency will not approve our product without an approved REMS program, which could delay approval or impose additional requirements on our products. In addition, we may be subject to enforcement actions, including civil money penalties if we do not comply with REMS program requirements. Delays or unanticipated costs in any part of the process or our inability to obtain timely regulatory approval for our products, including those attributable to, among other things, our failure to maintain manufacturing facilities in compliance with all applicable regulatory requirements, including the cGMPs and Quality System Regulation, or QSR, could cause our operating results to suffer and our stock price to decrease. Our facilities, our suppliers' facilities and other third parties' facilities on which we rely must pass pre-approval reviews and plant inspections and demonstrate compliance with the cGMPs and QSR.

Further, even if we receive FDA and other regulatory approvals for a new indication or product, the product may later exhibit adverse effects that limit or prevent its widespread use or that force us to withdraw the product from the market or to revise our labeling to limit the indications for which the product may be prescribed. In addition, even if we receive the necessary regulatory approvals, we cannot assure you that new products or indications will achieve market acceptance. Our future performance will be affected by the market acceptance of products such as *Acuvail*, *Aczone*[®], *Alphagan*[®] P 0.15%, *Alphagan*[®] P 0.1%, *Botox*[®], *Botox*[®] Cosmetic, *Combigan*[®], *Elestat*[®], *Ganfort*, *Juvéderm*[®], the *Lap-Band*[®] System, *Latisse*[®], *Lumigan*[®], *Optive*, *Refresh*[®], *Restasis*[®], *Sanctura*[®], *Sanctura XR*[®], *Tazorac*[®], *Vistabel*[®] and *Zymar*[®], as well as the *Natrelle*[®] line of breast implant products, new indications for *Botox*[®] and new products such as *Ozurdex* and *Trivaris*. We cannot assure you that our currently marketed products will not be subject to further regulatory review and action.

Edgar Filing: ALLERGAN INC - Form 10-Q

On February 8, 2008, the FDA announced in an Early Communication its review of certain adverse events following the use of botulinum toxins, including *Botox*[®] and *Botox*[®] Cosmetic. On April 30, 2009, simultaneously with its approval of *Dysport*, the FDA announced the completion of its review and has requested that we adopt a REMS program equivalent to the REMS program required for *Dysport*. On July 31, 2009, the FDA approved our REMS program for *Botox*[®], which addresses the risks related to botulinum toxin spread beyond the injection site and the lack of botulinum toxin interchangeability. Further, we cannot assure you that any other compounds or products that we are developing for

Table of Contents

commercialization will be approved by the FDA or foreign regulatory bodies for marketing or that we will be able to commercialize them on terms that will be profitable, or at all. If any of our products cannot be successfully or timely commercialized, our operating results could be materially adversely affected.

Health care initiatives and other third-party payor cost-containment pressures could cause us to sell our products at lower prices, resulting in decreased revenues.

Some of our products are purchased or reimbursed by federal and state government authorities, private health insurers and other organizations, such as health maintenance organizations, or HMOs, and managed care organizations, or MCOs. Third-party payors increasingly challenge pharmaceutical and other medical device product pricing. There also continues to be a trend toward managed health care in the United States. Pricing pressures by third-party payors and the growth of organizations such as HMOs and MCOs could result in lower prices and a reduction in demand for our products.

In addition, legislative and regulatory proposals and enactments to reform health care and government insurance programs, including the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, or MMA, the Deficit Reduction Act of 2005, or DRA, and the hospital outpatient prospective payment system, or HOPPS, could significantly influence the manner in which pharmaceutical products and medical devices are prescribed and purchased. For example, effective January 1, 2006, the MMA established a new Medicare outpatient prescription drug benefit under Part D. Though it was postponed for calendar year 2009, the MMA also established a competitive acquisition program in which physicians who administer drugs in their offices are offered an option to acquire drugs covered under the Medicare Part B benefit from vendors who are selected in a competitive bidding process. Further, the DRA requires the Centers for Medicare & Medicaid Services, or CMS, the federal agency that both administers the Medicare program and administers and oversees the Medicaid Drug Rebate Program, to amend certain formulas used to calculate pharmacy reimbursement and rebates under Medicaid. In July 2007, CMS issued a final rule that, among other things, clarifies and changes how drug manufacturers must calculate and report key pricing data under the Medicaid Drug Rebate Program. This data is used by CMS and state Medicaid agencies to calculate rebates owed by manufacturers under the Medicaid Drug Rebate Program and to calculate the federal upper limits on cost-sharing for certain prescription drugs. In December 2007, following a judicial challenge brought by a national association of pharmacies, a federal judge ordered an injunction that prevents CMS from implementing portions of its July rule, as they affect Medicaid payment to pharmacies and the sharing by CMS of certain drug pricing data, known as average manufacturer price, or AMP. In addition, the Medicare Improvements for Patients and Providers Act of 2008, or MIPPA, which was passed in July 2008, delays the implementation dates of these portions of the July 2007 Medicaid final rule. The MIPPA prohibits the computation of Medicaid payments based on AMP and the public availability of AMP data through September 2009. If CMS is ultimately permitted to implement its rule, changes could lead to reduced payments to pharmacies and others dispensing prescriptions for certain pharmaceutical products. These and other cost containment measures and health care reforms could adversely affect our ability to sell our products.

The DRA also requires that each state collect key pricing information related to rebates owed by us and other manufacturers of certain physician administered single source drugs as a condition of that state's receipt of future Medicaid payments from the federal government. This change went into effect on January 1, 2006 for single source drugs and may result in an increase in the rebate amounts paid by us to each state for the period from February 2006 to the present and, in some cases, for periods prior to February 2006. These rebate amounts may be substantial and may adversely affect our revenues and profitability. Furthermore, effective January 1, 2008, CMS reduced Medicare reimbursement for most separately payable physician-administered drugs under HOPPS from an average sales price plus six percent to plus five percent. An additional reduction to average sales price plus four percent went into effect January 1, 2009. If its proposed rule is finalized, CMS would continue the same payment rate for 2010, but further reductions may be imposed in the future.

In addition, individual states have also become increasingly aggressive in passing legislation and implementing regulations designed to control pharmaceutical product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access, and to encourage importation from other countries and bulk purchasing. Legally-mandated price controls on payment amounts by third-party payors or other restrictions could negatively and materially impact our revenues and financial condition.

We expect there will continue to be federal and state laws and/or regulations, proposed and implemented, that could limit the amounts that federal and state governments will pay for health care products and services. The extent to which future legislation or regulations, if any, relating to the health care industry or third-party coverage and reimbursement may be enacted or what effect such legislation or regulation would have on our business remains uncertain. For example, the recent final rule issued by the U.S. Department of Defense, or DOD, places pricing limits on certain branded pharmaceutical products. Under these regulations, effective May 26, 2009, payments made to retail pharmacies under the TRICARE Retail Pharmacy Program for prescriptions filled on or after January 28, 2008 are subject to certain price ceilings utilized by other DOD programs. If fully implemented, as a condition for placement on the Uniform Formulary, the final rule requires manufacturers to, among other things, replace their existing contracts with the DOD with new contracts and to make refunds

Table of Contents

for prescriptions filled beginning on January 28, 2008 and extending to future periods based on the newly applicable price limits. In addition, the American Recovery and Reinvestment Act of 2009, also known as the stimulus package, includes \$1.1 billion in funding to study the comparative effectiveness of health care treatments and strategies. This funding will be used, among other things, to conduct, support or synthesize research that compares and evaluates the risk and benefits, clinical outcomes, effectiveness and appropriateness of products. Although Congress has indicated that this funding is intended to improve the quality of health care, it remains unclear how the research will impact coverage, reimbursement or other third-party payor policies. Such cost-containment measures or other health care system reforms that are adopted could have a material adverse effect on our industry generally and our ability to successfully commercialize our products or could limit or eliminate our spending on development projects and affect our ultimate profitability.

In addition, regional health care authorities and individual hospitals are increasingly using bidding procedures to determine what pharmaceutical and medical device products and which suppliers will be included in their prescription drug and other health care programs. This can reduce demand for our products or put pressure on our product pricing, which could negatively affect our revenues and profitability.

Our ability to sell our products to hospitals in the United States depends in part on our relationships with group purchasing organizations, or GPOs. Many existing and potential customers for our products become members of GPOs. GPOs negotiate pricing arrangements and contracts, sometimes on an exclusive basis, with medical supply manufacturers and distributors, and these negotiated prices are made available to a GPO's affiliated hospitals and other members. If we are not one of the providers selected by a GPO, affiliated hospitals and other members may be less likely to purchase our products, and if the GPO has negotiated a strict sole source, market share compliance or bundling contract for another manufacturer's products, we may be precluded from making sales to members of the GPO for the duration of the contractual arrangement. Our failure to renew contracts with GPOs may cause us to lose market share and could have a material adverse effect on our sales, financial condition and results of operations. We cannot assure you that we will be able to renew these contracts at the current or substantially similar terms. If we are unable to keep our relationships and develop new relationships with GPOs, our competitive position would likely suffer.

We encounter similar regulatory and legislative issues in most countries outside the United States. International operations are generally subject to extensive governmental price controls and other market regulations, and we believe the increasing emphasis on cost-containment initiatives in Europe and other countries has and will continue to put pressure on the price and usage of our pharmaceutical and medical device products. Although we cannot predict the extent to which our business may be affected by future cost-containment measures or other potential legislative or regulatory developments, additional foreign price controls or other changes in pricing regulation could restrict the amount that we are able to charge for our current and future products, which could adversely affect our revenue and results of operations.

If we market products in a manner that violates health care fraud and abuse laws, we may be subject to civil or criminal penalties.

The federal health care program Anti-Kickback Statute prohibits, among other things, knowingly and willfully offering, paying, soliciting or receiving remuneration to induce or in return for purchasing, leasing, ordering or arranging for the purchase, lease or order of any health care item or service reimbursable under Medicare, Medicaid or other federally financed health care programs. This statute has been interpreted to apply to arrangements between pharmaceutical or medical device manufacturers, on the one hand, and prescribers, purchasers and formulary managers, on the other hand. Although there are a number of statutory exemptions and regulatory safe harbors protecting certain common activities from prosecution, the exemptions and safe harbors are drawn narrowly, and practices that involve remuneration could be subject to scrutiny if they do not qualify for an exemption or safe harbor.

Federal false claims laws prohibit any person from knowingly presenting, or causing to be presented, a false claim for payment to the federal government, or knowingly making, or causing to be made, a false statement to get a false claim paid. Pharmaceutical companies have been prosecuted under these laws for a variety of alleged promotional and marketing activities, such as allegedly providing free product to customers with the expectation that the customers would bill federal programs for the product; reporting to pricing services inflated average wholesale prices that were then used by federal programs to set reimbursement rates; engaging in off-label promotion that caused claims to be submitted to Medicaid for non-covered off-label uses; and submitting inflated best price information to the Medicaid Drug Rebate Program.

In March 2008, we received service of a Subpoena Duces Tecum from the U.S. Attorney, U.S. Department of Justice, Northern District of Georgia, or DOJ. The subpoena requests the production of documents relating to our sales and marketing practices in connection with *Botox*®. The subpoena requires us to produce a significant number of electronic and hard copy documents created over multiple years and existing in numerous electronic data bases and hard copy files. Such subpoenas are often associated with previously filed qui tam actions, or lawsuits filed under seal under the False Claims Act, or FCA, 31 U.S.C. § 3729 et seq. Qui tam

Table of Contents

actions are brought by private plaintiffs suing on behalf of the federal government for alleged FCA violations. The time and expense associated with responding to the subpoena, and any related qui tam actions and conducting a substantive review of the documents, underlying facts and other matters involved in the DOJ's inquiry, may be extensive and we cannot predict the results of our review of the responsive documents and underlying facts or the results of the DOJ's inquiry. The costs of responding to the DOJ's inquiry, defending any claims raised, and any resulting fines, restitution, damages and penalties (including under the FCA), and administrative actions could have a material impact on our reputation, business and financial condition and divert the attention of our management from operating our business. See Part II, Item 1 of this report, Legal Proceedings and Note 11, Contingencies, in the notes to our unaudited condensed consolidated financial statements listed under Part I, Item 1(D) of this report, Notes to Unaudited Condensed Consolidated Financial Statements, for information concerning the DOJ's inquiry.

The Health Insurance Portability and Accountability Act of 1996 created two new federal crimes: health care fraud and false statements relating to health care matters. The health care fraud statute prohibits knowingly and willfully executing a scheme to defraud any health care benefit program, including private payors. The false statements statute prohibits knowingly and willfully falsifying, concealing or covering up a material fact or making any materially false, fictitious or fraudulent statement in connection with the delivery of or payment for health care benefits, items or services.

The majority of states also have statutes or regulations similar to these federal laws, which apply to items and services reimbursed under Medicaid and other state programs, or, in several states, apply regardless of the payor. In addition, some states have laws that require pharmaceutical companies to adopt comprehensive compliance programs. For example, under California law, pharmaceutical companies must adopt a comprehensive compliance program that is in accordance with both the April 2003 Office of Inspector General Compliance Program Guidance for Pharmaceutical Manufacturers and the Pharmaceutical Research and Manufacturers of America Code on Interactions with Healthcare Professionals, or the PhRMA Code, as updated in July 2008 and effective in January 2009. The PhRMA Code seeks to promote transparency in relationships between healthcare professionals and the pharmaceutical industry and to ensure that pharmaceutical marketing activities comport with the highest ethical standards. The most recent revisions to the PhRMA Code, effective January 2009, restrict or prohibit many activities previously permissible under the prior PhRMA Code, including: a prohibition on any entertainment or recreational events for non-employee healthcare professionals including strict limitations on meals with physicians; the elimination of non-educational business gifts; restrictions on speaker programs; and clarifications on continuing medical education funding. The updated PhRMA Code also requires that pharmaceutical companies train their representatives on all applicable laws, regulations and industry codes governing interactions with healthcare professionals. In addition, the Advanced Medical Technology Association's Revised Code of Ethics, or the AdvaMed Code, also seeks to ensure that medical device companies and healthcare professionals have collaborative relationships that meet high ethical standards; medical decisions are based on the best interests of patients; and medical device companies and healthcare professionals comply with applicable laws, regulations and government guidance. The AdvaMed Code was updated in December 2008 and became effective in July 2009. The revisions generally follow the 2008 changes in the PhRMA Code and include limitations on consulting arrangements, entertainment, meals and gifts, among others. We have adopted and implemented a compliance program which we believe satisfies the requirements of these laws, regulations and industry codes.

Sanctions under these federal and state laws may include civil monetary penalties, exclusion of a manufacturer's products from reimbursement under government programs, criminal fines and imprisonment. Because of the breadth of these laws and the narrowness of the safe harbors, it is possible that some of our business activities could be subject to challenge under one or more of such laws. For example, we and several other pharmaceutical companies are currently subject to suits by governmental entities in several jurisdictions, including Erie, Oswego and Schenectady Counties in New York and in Alabama alleging that we and these other companies, through promotional, discounting and pricing practices, reported false and inflated average wholesale prices or wholesale acquisition costs and failed to report best prices as required by federal and state rebate statutes, resulting in the plaintiffs overpaying for certain medications. If our past or present operations are found to be in violation of any of the laws described above or other similar governmental regulations to which we are subject, we may be subject to the applicable penalty associated with the violation which could adversely affect our ability to operate our business and our financial results.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table discloses the purchases of our equity securities during the second fiscal quarter of 2009.

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet be Purchased Under the Plans or Programs(2)
April 1, 2009 to April 30, 2009	210,000	\$ 47.33	210,000	15,378,307
May 1, 2009 to May 31, 2009	255,500	46.29	255,500	15,217,723
June 1, 2009 to June 30, 2009	201,500	45.18	201,500	15,069,140
Total	667,000	\$ 46.28	667,000	N/A

(1) We maintain an evergreen stock repurchase program, which we first announced on September 28, 1993. Under the stock repurchase program, we may maintain up to 18.4 million repurchased shares in our treasury account at any one time. As of June 30, 2009, we held approximately 3.3 million treasury shares under this program. Effective February 6, 2009, we entered into a Rule 10b5-1 plan that authorizes our broker to purchase our common stock traded in the open market pursuant to our evergreen stock repurchase program. The terms of the plan set forth a maximum annual limit of 2.0 million shares to be repurchased, and certain quarterly maximum and minimum volume limits. The term of our Rule 10b5-1 plan ends on December 31, 2009 and is cancellable at any time in our sole discretion and in accordance with applicable insider trading laws.

(2) The share numbers reflect the maximum number of shares that may be purchased under our stock repurchase program and are as of the end of each of the respective periods.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

We held our Annual Meeting of Stockholders on April 30, 2009 and there were present in person or by proxy 264,462,167 votes, representing approximately 86.85% of the total outstanding eligible votes. At the Annual Meeting, our stockholders elected four directors to our Board of Directors, ratified the appointment of Ernst & Young LLP as our independent registered public accounting firm for fiscal year 2009, and voted against the stockholder proposal related to additional animal testing, each as more fully described below.

1. Our stockholders elected the following directors for three-year terms of office expiring in 2012 and each director received the number of votes set forth opposite his name:

Directors	Affirmative Votes	Against	Abstain
Herbert W. Boyer, Ph.D.	258,164,964	5,866,885	430,318
Robert A. Ingram	241,025,396	22,934,340	502,431
David E.I. Pyott	253,951,277	10,119,106	391,784
Russell T. Ray	257,206,361	6,855,072	400,734

The following directors continue to serve on our Board of Directors with terms expiring as set forth opposite their names:
