SHAREHOLDER LETTER

April 30, 2010 (unaudited)

During the six months ended April 30, 2010 the Reaves Utility Income Fund (the Fund) continued its rebound from the losses incurred during the Great Recession. The Fund's total return for the period was 32.6%, of which 27.4% came from share price appreciation and 5.2 % from the dividend, which we have maintained throughout the upheaval in the markets. We are pleased to note that during the period the Fund's share price moved from trading at a discount to its net asset value (NAV) to trading at small premium to NAV. In our view, the ability to maintain the dividend throughout the turmoil of the last couple of years and the achievement of a share price premium to NAV are not unrelated events. We re-iterate our commitment to the dividend and to our long-term goal of growing it over time commensurate with the rising earnings power of the Fund's underlying investments.

Performance was stronger in the earlier part of the period compared to the latter part, when investors began to look more closely at the European sovereign debt and currency risks and their implications for global growth. Within the utilities sector, we maintained our preference for regulated utilities over the independent power producers and utilities with significant merchant fleets. We think we were largely rewarded for doing so. Some regulated utilities of note include CMS Energy Corporation, DTE Energy, and NSTAR. The underlying portfolio particularly benefitted from our investment in Integrys Energy Corporation, a Chicago-based supplier of electricity and natural gas to retail markets in Chicago and parts of the upper Midwest. The company successfully argued a favorable rate case in Illinois. To reduce liabilities, it also completed a restructuring through the sale of most of its marketing operations. We believe these actions assured the market that its dividend was sustainable, a central tenet of our investment thesis.

Oneok Inc., a gatherer, processor, and transporter of natural gas, also contributed significantly to the performance of the underlying portfolio. Oneok's success underscores the importance of reliable gas processing, storage, and distribution to the national economy, even during periods of relatively low gas prices such as the current one. Oneok Inc. serves as the general partner of Oneok Partners, a master limited partnership (MLP) and important driver of Oneok's success. The Fund has a small direct investment in Oneok Partners as well.

The \$3.5 billion transfer of mid-stream assets from the Williams Companies to Williams Partners LP. on February 17, 2010 created additional value in the Fund's holding in Williams Partners. Such transactions are typically structured to lower the overall cost of capital to the corporation by placing the assets in a tax-advantaged entity. The Fund's exposure to the MLP asset class is focused on natural gas processing and storage operations.

Telephones remain the highest yielding sector of the underlying portfolio. At the end of the period, the telephone sector yielded 7.9%. This is partly a reflection of how out-of-favor telecoms have become among investors. Indeed AT&T, a single A-rated company with solid free cash flow, a strong balance sheet, a twenty-six year history of dividend increases, and a 10% top-line growth rate in its wireless services business yielded 6.4% at April 30th. The negative investor sentiment undoubtedly stems from the continued erosion of the landline voice business, the increasing competition in the wireless and broadband spaces, and the possibility of a tougher Federal Communications Commission (FCC) regulatory regime governing broadband network operations. Nonetheless, at these yields, we believe the negative sentiment is overdone. The most significant contributor to telecom

Table of Contents

S SHAREHOLDER LETTER

April 30, 2010 (unaudited)

performance came from BCE Inc., the largest carrier in Canada. Over the course of the period it became evident in BCE's reported results that the company was gaining traction with its wireless offerings after several years of stagnation and was on target with its cost-cutting initiatives. Two dividend increases within one year made it clear to the equity markets that the company was intent on returning meaningful cash to its shareholders.

The Fund has maintained significant exposure to the high-yielding rural telecom space with investments in CenturyLink Inc., Frontier Communications and Windstream Corporation. Overall, the rural wireline space is in secular decline and rural businesses are managed primarily for cash flow. Successful consolidation is a key to survival in the sector. CenturyLink is successfully integrating the assets of Embarq Corporation, which it acquired in mid 2009 and recently announced the acquisition of Qwest Corporation, which it hopes to complete in mid 2011. The acquisition by Frontier Communications of about 4.5 million primarily rural Verizon lines has received all required shareholder and regulatory approval and is expected to close on July 1. We expect the transaction to be accretive to Frontier's cash flow after one year and to improve significantly Frontier's financial metrics. Windstream has consolidated as well, but has pursued a different strategy than its two peers by completing a series of smaller, more easily digestible, acquisitions.

Looking out to the second half of our fiscal year, we continue to believe this is a good time to be invested in utilities and telecom. The interest rate outlook remains benign; indeed higher rates may not materialize until 2011. In the telecom sector we think that the recent announcement of tiered wireless broadband pricing by AT&T is a very encouraging sign and may be the first step back to more rational pricing based on usage. We continue to think there will be growing demand for broadband services. Among utilities we are still focused primarily on the regulated space in states with favorable regulatory regimes and are not banking on a resurgence of electric demand growth this year. We remain bullish on natural gas. We think its importance as a fuel in the US will grow as a result of environmental and political considerations.

At April 30 the Fund held positions in BP Plc, 0.9% of assets, Transocean, 0.3%, and Diamond Offshore, 1.6%. We have budgeted no dividends from BP for the balance of 2010. Transocean will pay the dividend previously announced. Diamond Offshore's dividend may be negatively affected by the offshore moratorium currently in effect.

Based on our current projections of earnings, cash flows, and dividends of the companies in the Fund's portfolio, we believe the Fund is well-positioned to maintain its current monthly dividend.

We appreciate your support and look forward to serving you in the future.

Sincerely,

Ronald J. Sorenson

Portfolio Manager of the Reaves Utility Income Fund

Chief Executive Officer and Chief Investment Officer of W. H. Reaves & Company.

Past performance is not a guarantee of future results.

Ratings:

Moody's and S&P's ratings are believed to be the most recent as of April 30, 2010.

For Fund compliance purposes, the Fund's industry classifications refer to any one of the industry sub-classifications used by one or more widely recognized market indexes, and /or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting case. Industries are shown as a percentage of net assets. These industry classifications are unaudited.

See Notes to Financial Statements.

(1) Total investment return is calculated assuming a purchase of a common share at the opening on the first day and a sale at closing on the last day of each period reported. Total investment return on net asset value excludes a sales load of \$0.90 per share for the period, effectively reducing the net asset value at issuance from \$20.00 to \$19.10. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment returns do not reflect brokerage commissions on the purchase or sale of the Fund's common shares. Total investment returns for less than a full year are not annualized. Past performance is not a guarantee of future results.

NOTES to FINANCIAL STATEMENTS

April 30, 2010 (unaudited)

1. SIGNIFICANT ACCOUNTING AND OPERATING POLICIES

The Fund is a closed-end management investment company that was organized under the laws of the state of Delaware by an Agreement and Declaration of Trust dated September 15, 2003. The Fund is a non-diversified fund with an investment objective to provide a high level of after-tax income and total return consisting primarily of tax-advantaged dividend income and capital appreciation. The Declaration of Trust provides that the Trustees may authorize separate classes of shares of beneficial interest. The Fund commenced operations on February 24, 2004. The Fund's common shares are listed on the New York Stock Exchange Amex (Exchange) and trade under the ticker symbol UTG.

The Fund may have elements of risk, including the risk of loss of equity. There is no assurance that the investment process will consistently lead to successful results. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The preparation of financial statements is in accordance with generally accepted accounting principles in the United States of America (GAAP), which requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

In June 2009, the Financial Accounting Standards Board (FASB) issued The Accounting Standards Codification (the Codification) which revises the framework for selecting the accounting principles to be used in the preparation of financial statements that are presented in conformity with GAAP. The objective of the Codification is to establish the FASB Accounting Standards Codification (ASC) as the source of authoritative accounting principles recognized by the FASB. Codification was effective for interim and annual periods ended after September 15, 2009. In adopting the Codification, all non-grandfathered, non-SEC accounting literature not included in the Codification is superseded and deemed non-authoritative. Codification requires any references within the Fund's financial statements be modified from FASB issues to ASC.

Security Valuation: The net asset value per common share (NAV) of the Fund is determined no less frequently than daily, on each day that the Exchange is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). Securities held by the Fund for which exchange quotations are readily available are valued at the last sale price, or if no sale price or if traded on the over-the-counter market, at the evaluated bid prices on such day, as provided by the Fund's primary pricing service. Debt securities for which the over-the-counter market is the primary market are normally valued on the basis of prices furnished by one or more pricing services at the mean between the latest available bid and asked prices. As authorized by the Trustees, debt securities (other than short-term obligations) may be valued on the basis of valuations furnished by a pricing service

Table of Contents**NOTES to FINANCIAL STATEMENTS**

April 30, 2010 (unaudited)

which determines valuations based upon market transactions for normal, institutional-size trading units of securities. Short-term obligations maturing within 60 days are valued at amortized cost which approximates market value. Over-the-counter options are valued at the mean between bid and asked prices provided by dealers. Financial futures contracts listed on commodity exchanges and exchange-traded options are valued at closing settlement prices. Securities for which there is no such quotation or valuation and all other assets are valued at fair value in good faith by or at the direction of the Trustees. Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors may include, but are not limited to, the type and cost of the security; the fundamental analytical data relating to the investment; an evaluation of the forces which influence the market in which the security is sold, including the liquidity and depth of the market; information as to any transactions or offers with respect to the security; price, yield and the extent of public or private trading in similar securities of the issuer or comparable companies. The valuation assigned to fair-valued securities for purposes of calculating the Fund's NAV may differ from the security's most recent closing market price and from the prices used by other funds to calculate their NAVs.

The Fund has adopted FASB ASC and follows the provisions of ASC 820, Fair Value Measurements and Disclosures (ASC 820). ASC 820 established a three-tier hierarchy to create classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 unadjusted quoted prices in active markets for identical investments

Level 2 significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

2010 Semi-Annual Report 15

Table of Contents**NOTES to FINANCIAL STATEMENTS**

April 30, 2010 (unaudited)

The following is a summary of the inputs used to value the Fund's investments as of April 30, 2010:

Investments

in Securities	Level 1	Level 2	Level 3	Total
	Quoted Prices	Significant	Significant Unob-	
at Value		Observable Inputs	servable Inputs	
Common Stock	\$ 609,407,722	\$	\$	\$ 609,407,722
Preferred Stock	7,421,245	2,643,156		10,064,401
Limited Partnerships	31,537,572			31,537,572
Corporate Bonds		16,550,000		16,550,000
Mutual Funds	4,354,185			4,354,185
Short Term Investments	1,607,884			1,607,884
Total	\$ 654,328,608	\$ 19,193,156	\$	\$ 673,521,764

For the six months ended April 30, 2010, the Fund did not have significant unobservable inputs (Level 3) used in determining fair value. Thus, a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value is not applicable.

Foreign Securities: The Fund may invest a portion of its assets in foreign securities. In the event that the Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The accounting records of the Fund are maintained in U.S. dollars. Prices of securities denominated in foreign currencies are translated into U.S. dollars at the closing rates of exchange at period end. Amounts related to the purchase and sale of foreign securities and investment income are translated at the rates of exchange prevailing on the respective dates of such transactions.

The effect of changes in foreign currency exchange rates on investments is separately identified from the fluctuations arising from changes in market values of securities held and reported with all other foreign currency gains and losses in the Fund's Statement of Operations. As of April 30, 2010, the Fund had no outstanding forward foreign currency contracts.

Options: In order to hedge against adverse market shifts, the Fund may utilize up to 5% of its total assets to purchase put and call options on securities. When the Fund purchases a call or put option, an amount equal to the premium paid is included in the Fund's Statement of Assets & Liabilities, as an investment, and is subsequently marked-to-market to reflect the current market value of the option. If an option expires on the stipulated expiration date or if the Fund enters into a closing sale transaction, a gain or loss is realized. If the Fund exercises a call, the cost of the security acquired is increased by the premium paid for the call. If the Fund exer-

Table of Contents**NOTES to FINANCIAL STATEMENTS**

April 30, 2010 (unaudited)

cises a put option, a gain or loss is realized from the sale of the underlying security, and the proceeds from such a sale are decreased by the premium originally paid.

In addition, the Fund may seek to increase its income or may hedge a portion of its portfolio investments through writing (i.e., selling) covered put and call options. When the Fund writes a put or call option, an amount equal to the premium received is included in the Statement of Assets & Liabilities, as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option. If an option expires on its stipulated expiration date or if the Fund enters into a closing purchase transaction, a gain or loss is realized. If a written call option is exercised, a gain or loss is realized for the sale of the underlying security and the proceeds from the sale are increased by the premium originally received. If a written put option is exercised, the cost of the security acquired is decreased by the premium originally received. As the writer of an option, the Fund has no control over whether the underlying securities are subsequently sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the security underlying the written option. Written and purchased options are non-income producing securities.

The Fund may utilize up to 5% of its total assets to purchase put and call options on domestic stock indices to hedge against risks of market-wide price movements affecting its assets. In addition, the Fund may write covered put and call options on stock indices. Because no underlying security can be delivered, however, the option represents the holder's right to obtain from the writer, in cash, a fixed multiple of the amount by which the exercise price exceeds (in the case of a put) or is less than (in the case of a call) the closing value of the underlying index on the exercise date.

There was no written option activity during the six months ended April 30, 2010.

Distributions to Shareholders: The Fund intends to make a level dividend distribution each month to Common Shareholders after payment of interest on any outstanding borrowings or distributions on any outstanding preferred shares. The level dividend rate may be modified by the Board of Trustees from time to time. Any net capital gains earned by the Fund are distributed at least annually to the extent necessary to avoid federal income and excise taxes. Distributions to shareholders are recorded by the Fund on the ex-dividend date. Effective August 10, 2009, the Fund received approval from the Securities and Exchange Commission (the Commission) on its application for exemption from Section 19(b) of the Investment Company Act of 1940, and Rule 19b-1 thereunder permitting the Fund to make periodic distributions of long-term capital gains, provided that the distribution policy of the Fund with respect to its Common Shares calls for periodic (e.g., quarterly/ monthly) distributions in an amount equal to a fixed percentage of the Fund's average net asset value over a specified period of time or market price per common share at or about the time of distribution or pay-out of a level dollar amount. At this time the Fund has not implemented a managed distribution plan, as permitted under the exemption.

2010 Semi-Annual Report 17

Table of Contents**NOTES to FINANCIAL STATEMENTS**

April 30, 2010 (unaudited)

Income Taxes: The Fund's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

The Fund follows ASC 740 - Income Taxes (ASC 740), which requires that the financial statement effects of a tax position taken or expected to be taken in a tax return be recognized in the financial statements when it is more likely than not, based on the technical merits, that the position will be sustained upon examination. Management has concluded that the Fund has taken no uncertain tax positions that require adjustment to the financial statements to comply with the provisions of ASC 740. The Fund files income tax returns in the U.S. federal jurisdiction and Colorado. The statute of limitations on the Fund's federal and state tax filings remains open for the fiscal years ended October 31, 2005 through October 31, 2009.

Securities Transactions and Investment Income: Investment security transactions are accounted for as of trade date. Dividend income is recorded on the ex-dividend date. Interest income, which includes amortization of premium and accretion of discount, is accrued as earned. Realized gains and losses from securities transactions and unrealized appreciation and depreciation of securities are determined using the First In First Out basis for both financial reporting and income tax purposes.

2. INCOME TAXES

Net investment income (loss) and net realized gain (loss) may differ for financial statement and tax purposes. The character of distributions made during the year from net investment income or net realized gains may differ from its ultimate characterization for federal income tax purposes. Also, due to the timing of dividend distributions, the fiscal year in which amounts are distributed may differ from the fiscal year in which the income or realized gain was recorded by the Fund.

Net unrealized appreciation/(depreciation) of investments based on federal tax cost were as follows:

As of April 30, 2010

Gross appreciation (excess of value over tax cost)	\$ 85,958,794
Gross depreciation (excess of tax cost over value)	(38,983,095)
Net unrealized appreciation	\$ 46,975,699
Cost of investments for income tax purposes	\$ 626,546,065

The tax basis components of capital differ from the amounts reflected in the Statement of Assets and Liabilities due to temporary book/tax differences primarily arising from wash sales and the tax treatment of certain preferred holdings.

Table of Contents**NOTES to FINANCIAL STATEMENTS**

April 30, 2010 (unaudited)

3. CAPITAL TRANSACTIONS

Common Shares: There are an unlimited number of no par value common shares of beneficial interest authorized.

Transactions in common shares were as follows:

	For the	
	Six Months Ended April 30, 2010	Year Ended October 31, 2009
Common Stock outstanding beginning of period	22,707,840	22,677,001
Common Stock issued as reinvestment of dividends	83,283	30,839
Common Stock outstanding end of period	22,791,123	22,707,840

Preferred Shares: On April 27, 2004, the Fund's Board of Trustees authorized the issuance of an unlimited number of no par value preferred shares, in addition to the existing common shares, as part of the Fund's leverage strategy. Preferred shares issued by the Fund have seniority over the common shares.

The Fund is subject to certain limitations and restrictions while preferred shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Fund from declaring any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of preferred shares at their liquidation value. Specifically, the Fund is required under the Investment Company Act of 1940 to maintain an asset coverage with respect to the outstanding preferred shares of 200% or greater. Through April 30, 2010, the Fund maintained certain coverage amounts for Standard & Poor's, according to restrictions issued by the rating agency to the Fund, which are generally more restrictive than the Investment Company Act of 1940 requirements. The Fund was in compliance with these coverage ratios as of April 30, 2010.

Effective November 23, 2009, the Fund no longer maintains coverage amounts for Fitch on the Fund's outstanding preferred shares.

The Fund has three series of Auction Market Preferred Shares (AMPS): M7, F7 and W28. On June 30, 2004, the Fund issued 3,200 shares of Series M7, 3,200 shares of Series F7, and 3,200 shares of Series W28 each with a net asset and liquidation value of \$25,000 per share plus accrued dividends. Dividends on the preferred shares are cumulative and are paid based on an annual rate set through auction procedures. Distributions of net realized capital gains, if any, are paid annually.

In February 2008, the AMPS market across all closed-end funds became illiquid resulting in failed auctions for the Fund's AMPS. As such, the Fund continues to pay dividends on the AMPS at the maximum rate (set forth in the Fund's Statement of Preferences, the governing document for the AMPS), set at LIBOR plus 125 basis points or LIBOR multiplied by 125%, whichever is greater. The 7-day LIBOR rate is used for the M7 and F7 Series and the 30-day LIBOR rate is used for the W28 Series.

As of April 30, 2010, the annualized dividend rates for Series M7, F7 and W28 were 1.52%, 1.52% and 1.52%, respectively.

Table of Contents

NOTES to FINANCIAL STATEMENTS

April 30, 2010 (unaudited)

The dividend rate, as set by the auction process, is generally expected to vary with short-term interest rates. These rates may vary in a manner unrelated to the income received on the Fund's assets, which could have either a beneficial or detrimental impact on net investment income and gains available to common shareholders.

Preferred shares, which are entitled to one vote per share, generally vote with the common shares but vote separately as a class to elect two Trustees and on any matters affecting the rights of the Preferred Shares.

4. PORTFOLIO SECURITIES

Purchases and sales of investment securities, other than short-term securities, for the six months ended April 30, 2010, aggregated \$182,077,021 and \$181,068,265, respectively.

5. INVESTMENT ADVISORY AND ADMINISTRATION AGREEMENTS

W.H. Reaves & Co., Inc. ("W.H. Reaves") serves as the Fund's investment adviser pursuant to an Investment Advisory and Management Agreement (the "Advisory Agreement") with the Fund. As compensation for its services to the Fund, W.H. Reaves receives an annual investment advisory fee of 0.575% based on the Fund's average daily total assets, computed daily and payable monthly.

ALPS Fund Services, Inc. ("ALPS") serves as the Fund's administrator pursuant to an Administration, Bookkeeping and Pricing Services Agreement with the Fund. As compensation for its services to the Fund, ALPS receives an annual administration fee of 0.265% based on the Fund's average daily total assets, computed daily and payable monthly. ALPS will pay all expenses incurred by the Fund, with the exception of advisory fees, trustees' fees, portfolio transaction expenses, litigation expenses, taxes, cost of preferred shares, expenses of conducting repurchase offers for the purpose of repurchasing fund shares, and extraordinary expenses.

6. OTHER

The Independent Trustees of the Fund receive a quarterly retainer of \$3,500 and an additional \$1,500 for each meeting attended.

7. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In January 2010, the FASB issued Accounting Standards Update "Improving Disclosures about Fair Value Measurements" that requires additional disclosures regarding fair value measurements. Certain required disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, and other required disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Management is currently evaluating the impact it will have on its financial statement disclosures.

8. INDEMNIFICATIONS

In the normal course of business, the Fund enters into contracts that contain a variety of representations which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred.

Table of Contents**DIVIDEND REINVESTMENT PLAN**

April 30, 2010 (unaudited)

Unless the registered owner of Common Shares elects to receive cash by contacting The Bank of New York Mellon (the Plan Administrator or BNY Mellon), all dividends declared on Common Shares will be automatically reinvested by the Plan Administrator for shareholders in the Fund's Dividend Reinvestment Plan (the Plan), in additional Common Shares. Shareholders who elect not to participate in the Plan will receive all dividends and other distributions in cash paid by check mailed directly to the shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by BNY Mellon as dividend disbursing agent. You may elect not to participate in the Plan and to receive all dividends in cash by contacting BNY Mellon, as dividend disbursing agent, at the address set forth below. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise, such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional Common Shares for you. If you wish for all dividends declared on your Common Shares to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each Common Shareholder under the Plan in the same name in which such Common Shareholder's Common Shares are registered. Whenever the Fund declares a dividend or other distribution (together, a Dividend) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common Shares from the Fund (Newly Issued Common Shares) or (ii) by purchase of outstanding Common Shares on the open market (Open-Market Purchases) on the American Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commissions per Common Share is equal to or greater than the net asset value per Common Share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per Common Share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per Common Share on the payment date. If, on the payment date for any Dividend, the net asset value per Common Share is greater than the closing market value plus estimated brokerage commissions, the Plan Administrator will invest the Dividend amount in Common Shares acquired on behalf of the participants in Open-Market Purchases. In the event of a market discount on the payment date for any Dividend, the Plan Administrator will have until the last business day before the next date on which the Common Shares trade on an ex-dividend basis or 30 days after the payment date for such Dividend, whichever is sooner (the Last Purchase Date), to invest the Dividend amount in Common Shares acquired in Open-Market Purchases. It is contemplated that the Fund will pay monthly income Dividends. Therefore, the period during which Open-Market Purchases can be made will exist only from the

2010 Semi-Annual Report 21

Table of Contents

DIVIDEND **R**EINVESTMENT **P**LAN

April 30, 2010 (unaudited)

payment date of each Dividend through the date before the next ex-dividend date which typically will be approximately ten days. If, before the Plan Administrator has completed its Open-Market Purchases, the market price per Common Share exceeds the net asset value per Common Share, the average per Common Share purchase price paid by the Plan Administrator may exceed the net asset value of the Common Shares, resulting in the acquisition of fewer Common Shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at the net asset value per Common Share at the close of business on the Last Purchase Date, provided that, if the net asset value is less than or equal to 95% of the then current market price per Common Share, the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants.

In the case of Common Shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Administrator will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Plan.

There will be no brokerage charges with respect to Common Shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. Participants that request a sale of Common Shares through the Plan Administrator are subject to brokerage commissions.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, The Bank of New York Mellon, 101 Barclay Street, New York, New York 10286, 11E Transfer Agency Services, 1-800-433-8191.
