Table of Contents**NORTHWEST PIPE COMPANY****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. The financial information as of December 31, 2010 is derived from the audited consolidated financial statements presented in the Northwest Pipe Company (the "Company") Annual Report on Form 10-K for the year ended December 31, 2010. Certain information or footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, the accompanying condensed consolidated financial statements include all adjustments necessary (which are of a normal and recurring nature) for the fair statement of the results of the interim periods presented. The accompanying condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2010, as presented in the Company's 2010 Annual Report on Form 10-K. Prior period equity in earnings of unconsolidated subsidiary, net of dividends, has been reclassified to conform to current period presentation in the condensed consolidated statements of cash flows. This reclassification had no impact on income from operations, net income, or total assets.

The Condensed Consolidated Financial Statements include the accounts of Northwest Pipe Company and its subsidiaries in which the Company exercises control as of the financial statement date. Intercompany accounts and transactions have been eliminated.

Northwest Pipe Asia Pte. Ltd. ("NWPA"), in which the Company exercises significant influence but does not control, is accounted for under the equity method of accounting. During the first three months of 2011, the Company recorded purchases of property and equipment of \$0.2 million, net of eliminations. At March 31, 2011, intercompany balances with NWPA included a receivable of \$16,000. See Note 12 of the Condensed Consolidated Financial Statements for discussion of subsequent events related to NWPA.

Operating results for the three months ended March 31, 2011 are not necessarily indicative of the results that may be expected for the entire fiscal year ending December 31, 2011.

2. Inventories

Inventories are stated at the lower of cost or market and consist of the following:

	March 31, 2011	December 31, 2010
	(in thousands)	
Short-term inventories:		
Raw materials	\$ 70,662	\$ 58,610
Work-in-process	2,382	2,521
Finished goods	18,258	17,566
Supplies	2,299	2,190
	93,601	80,887
Long-term inventories:		
Finished goods	2,997	2,554
Total inventories	\$ 96,598	\$ 83,441

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

Long-term inventories are recorded in other assets. The lower of cost or market adjustment was \$4.0 million at March 31, 2011 and \$4.5 million at December 31, 2010.

3. Fair Value Measurements

The Company records its financial assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability, in the principal or most advantageous market for the asset or liability, in an orderly transaction between market participants at the measurement date.

Table of Contents

The authoritative guidance establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. These levels are: Level 1 (inputs are quoted prices in active markets for identical assets or liabilities); Level 2 (inputs are other than quoted prices that are observable, either directly or indirectly through corroboration with observable market data); and Level 3 (inputs are unobservable, with little or no market data that exists, such as internal financial forecasts). The Company is required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The following table summarizes information regarding the Company's financial assets and financial liabilities that are measured at fair value (in thousands):

Description	Balance at			
	March 31, 2011	Level 1	Level 2	Level 3
Financial Assets				
Escrow account	\$ 2,726	\$ 2,726	\$	\$
Deferred compensation plan assets	4,584	4,584		
Total Assets	\$ 7,310	\$ 7,310	\$	\$
Financial Liabilities				
Derivatives	\$ (1,011)	\$	\$ (1,011)	\$

Description	Balance at			
	December 31, 2010	Level 1	Level 2	Level 3
Financial Assets				
Escrow account	\$ 2,726	\$ 2,726	\$	\$
Deferred compensation plan assets	4,560	4,560		
Total Assets	\$ 7,286	\$ 7,286	\$	\$
Financial Liabilities				
Derivatives	\$ (622)	\$	\$ (622)	\$

4. Derivative Instruments and Hedging Activities

The Company conducts business in various foreign countries, and, from time to time, settles transactions in foreign currencies. The Company has established a program that utilizes foreign currency forward contracts to offset the risk associated with the effects of certain foreign currency exposures, typically arising from sales contracts denominated in Canadian currency. These derivative contracts are consistent with the Company's strategy for financial risk management. The Company uses cash flow hedge accounting treatment for qualifying foreign currency forward contracts. The Company initially reports any gain or loss on the effective portion of a cash flow hedge as a component of other comprehensive income and subsequently reclassifies any gain or loss to net sales when the hedged revenues are recorded. Instruments that do not qualify for cash flow hedge accounting treatment are re-measured at fair value on each balance sheet date and resulting gains and losses are recognized in net income. As of March 31, 2011 and December 31, 2010, the total notional amount of the derivative contracts not designated as hedges was \$1.0 million (CAD\$1.0 million) and \$1.3 million (CAD\$1.3 million), respectively. As of March 31, 2011 and December 31, 2010, the total notional amount of the derivative contracts designated as hedges was \$16.3 million (CAD\$15.8 million) and \$15.1 million (CAD\$15.0 million), respectively.

For each derivative contract entered into in which the Company seeks to obtain cash flow hedge accounting treatment, the Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking the hedge transaction, the nature of the risk being hedged, how the hedging instrument's effectiveness in offsetting the hedged risk will be assessed prospectively and retrospectively, and a description of the method of measuring ineffectiveness. This process includes linking all derivatives to specific firm commitments or forecasted transactions and the derivatives are designated as cash flow hedges. The Company

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative contracts that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. The effective portion of these hedged items is reflected in other comprehensive income (loss). If it is determined that a derivative contract is not highly effective, or that it has ceased to be a highly effective hedge, the Company will be required to discontinue hedge accounting with respect to that derivative contract prospectively.

Though most Canadian forward contracts have maturities not longer than 12 months at March 31, 2011, two of the Company's contracts at that date with a total notional value of \$3.6 million (CAD\$3.4 million) have maturities greater than 12 months, with the greatest maturity being 18 months.

Table of Contents

The balance sheet location and the fair values of derivative instruments are:

Foreign Currency Forward Contracts	March 31, 2011	December 31, 2010
	(in thousands)	
Liabilities		
Derivatives designated as hedging instruments		
Accrued liabilities	\$ 320	\$ 317
Derivatives not designated as hedging instruments		
Accrued liabilities	691	305
 Total liabilities	 \$ 1,011	 \$ 622

The amounts of the gains and losses related to the Company's derivative contracts designated as hedging instruments for the three months ended March 31, 2011 and March 31, 2010 are (in thousands):

	March 31, 2011				
	Pretax Loss Recognized in Comprehensive Income on Effective Portion of Derivative	Pretax Loss Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income	Pretax Loss Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income	Ineffective Portion of Loss on Derivative and Amount Excluded from Effectiveness Testing Recognized in Income	
Derivatives in Cash Flow Hedging Relationships	Amount	Location	Amount	Location	Amount
Foreign currency forward contracts	\$ (253)	Net sales	\$ (248)	Net sales	\$ (25)

	March 31, 2010				
	Pretax Loss Recognized in Comprehensive Income on Effective Portion of Derivative	Pretax Gain Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income	Pretax Gain Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income	Ineffective Portion of Loss on Derivative and Amount Excluded from Effectiveness Testing Recognized in Income	
Derivatives in Cash Flow Hedging Relationships	Amount	Location	Amount	Location	Amount
Foreign currency forward contracts	\$ (134)	Net sales	\$ (104)	Net sales	\$ 20

At March 31, 2011, the effective portion of our cash flow hedges was a pretax loss of \$287,000, all of which is expected to be reclassified from comprehensive income to net sales within the next 12 months.

For the three months ended March 31, 2011, losses from our derivative contracts not designated as hedging instruments recognized in net sales were \$0.2 million. For the three months ended March 31, 2010, losses from our derivative contracts not designated as hedging instruments recognized in net sales were \$0.4 million.

5. Commitments and Contingencies

Securities Litigation. On November 20, 2009, a complaint against the Company, captioned *Richard v. Northwest Pipe Co. et al.*, No. C09-5724 RBL, was filed in the United States District Court for the Western District of Washington. The plaintiff is allegedly a purchaser of the Company's stock. In addition to the Company, Brian W. Dunham, the Company's former President and Chief Executive Officer, and Stephanie J. Welty, the Company's former Chief Financial Officer, are named as defendants. The complaint alleges that defendants violated Section 10(b) of the Securities Exchange Act of 1934 by making false or misleading statements between April 23, 2008 and November 11, 2009. Plaintiff seeks to represent a class of persons who purchased the Company's stock during the same period, and seeks damages for losses caused by the alleged wrongdoing.

Table of Contents

A similar complaint, captioned *Plumbers and Pipefitters Local Union No. 630 Pension-Annuity Trust Fund v. Northwest Pipe Co. et al.*, No. C09-5791 RBL, was filed against the Company in the same court on December 22, 2009. In addition to the Company, Brian W. Dunham, Stephanie J. Welty and William R. Tagmyer, the Company's current Chairman of the Board, are named as defendants in the *Plumbers* complaint. In the *Plumbers* complaint, as in the *Richard* complaint, the plaintiff is allegedly a purchaser of the Company's stock and asserts that defendants violated Section 10(b) of the Securities Exchange Act of 1934 by making false or misleading statements between April 23, 2008 and November 11, 2009. Plaintiff seeks to represent a class of persons who purchased the Company's stock during that period, and seeks damages for losses caused by the alleged wrongdoing.

The *Richard* action and the *Plumbers* action were consolidated on February 25, 2010. Plumbers and Pipefitters Local No. 630 Pension-Annuity Trust Fund was appointed lead plaintiff in the consolidated action. Defendants and lead plaintiff subsequently agreed that defendants did not need to respond immediately to either of the two outstanding complaints, and that a consolidated amended complaint would be filed within 45 days of us having completed the filing of our Quarterly Report on Form 10-Q for the quarter ended September 30, 2009 and our 2009 Form 10-K with the SEC. A consolidated amended complaint was filed by the plaintiff on December 21, 2010, and our motion to dismiss was filed on February 25, 2011, as were similar motions filed by the individual defendants. Under the scheduling order currently in effect, briefing on those motions will conclude by May 24, 2011. We intend to vigorously defend ourselves against these claims. This securities litigation is at an early stage and, at this time, it is not possible to predict its outcome. Therefore, we have not accrued any charges related to this litigation.

On March 3, 2010, the Company was served with a derivative complaint, captioned *Ruggles v. Dunham et al.*, No. C10-5129 RBL, and filed in the United States District Court for the Western District of Washington. The plaintiff in this action is allegedly a current shareholder of the Company. The Company is a nominal defendant in this litigation. Plaintiff seeks to assert, on the Company's behalf, claims against Brian W. Dunham, Stephanie J. Welty, William R. Tagmyer, Keith R. Larson, Wayne B. Kingsley, Richard A. Roman, Michael C. Franson and Neil R. Thornton. The asserted basis of the claims is that defendants breached fiduciary duties to the Company by causing the Company to make improper statements between April 23, 2008 and August 7, 2009. Plaintiff seeks to recover, on the Company's behalf, damages for losses caused by the alleged wrongdoing.

Neither the Company nor the defendants are required to respond to the current complaint. Pursuant to an agreement among the parties, the Court on February 15, 2011, entered an Order staying the *Ruggles* action until after the same Court has ruled on the motions to dismiss the securities class action described above. Any amended complaint in the *Ruggles* action would be due within 45 days after such a ruling. It should also be noted that derivative claims by their nature do not seek to recover damages from us, but purport instead to seek to recover damages for the benefit of us. This litigation is at a very early stage and, at this time, it is not possible to predict its outcome. Therefore, we have not accrued any charges related to this litigation.

SEC Investigation. On March 8, 2010, the staff of the Enforcement Division of the SEC issued a formal order of investigation and a subpoena for the production of documents. The Company is cooperating with the SEC, but does not know when the inquiry and investigation will be resolved or what, if any, actions the SEC may require as part of that resolution. Any action by the SEC or other governmental agency could result in civil or criminal sanctions against the Company and/or certain of its current or former officers, directors and/or employees. The investigation is at an early stage and, at this time, it is not possible to predict its outcome. Therefore, the Company has not accrued any charges related to this investigation.

Environmental Litigation. On December 1, 2000, a section of the lower Willamette River known as the Portland Harbor was included on the National Priorities List at the request of the U.S. Environmental Protection Agency (the "EPA"). While the Company's Portland, Oregon manufacturing facility does not border the Willamette River, an outfall from the facility's storm water system drains into a neighboring property's privately owned slip. The Company and approximately 140 other parties have been notified by the EPA and the Oregon Department of Environmental Quality (the "ODEQ") of potential liability under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"). As of March 2011, approximately 326 entities on and nearby the river have been asked to file information disclosure reports with the EPA. By agreement with the EPA, the ODEQ is responsible with overseeing remedial investigation and source control activities for all upland sites to prevent future contamination to the river. A remedial investigation and feasibility study of the Portland Harbor is currently being directed by a group of potentially responsible parties known as the Lower Willamette Group (the "LWG"). The Company made a payment of \$175,000 to the LWG in June 2007 as part of an interim settlement, and is under no obligation to make any further payment. A draft remedial investigation report was submitted to the EPA by the LWG in the fall of 2009; the final remediation investigation is expected to be complete in 2011. The feasibility study is underway, and a draft is expected to be completed by the LWG in 2011.

In 2001, groundwater containing elevated organic compounds ("VOCs") was identified in one localized area of the Company's property furthest from the river. Assessment work in 2002 and 2003 to further characterize the groundwater is consistent with the initial conclusion that the source of the VOCs is located off of Company-owned property. In February 2005, the Company entered into a Voluntary Agreement for Remedial Investigation and Source Control Measures ("Agreement") with the ODEQ. The Company is one of 90 Upland Source Control Sites working with the ODEQ on Source Control and is ranked a medium priority. The Company performed Remedial Investigation work required under the

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

Agreement and submitted a draft Remedial Investigation/Source Control Evaluation Report on December 30, 2005. The conclusions of the report indicated that the VOCs found in the groundwater do not present an unacceptable risk to human or ecological receptors in the Willamette River. The report also indicated there is no evidence at this time showing a connection between detected VOCs in groundwater and Willamette River sediments. In 2009, the ODEQ requested the Company to revise its Remedial Investigation/Source Control Evaluation Report to include recent information available related to nearby properties. ODEQ approved the Company's remediation plan in August 2010.

Table of Contents

Also, based on the remedial investigation and reporting required under the Portland, Oregon manufacturing facility's National Pollutant Discharge Elimination System permit for storm water, the Company and the ODEQ have identified small amounts of polynuclear aromatic compounds and polychlorinated biphenyls and have periodically identified trace amounts of zinc in storm water. Storm water from the Portland, Oregon manufacturing facility site is discharged to a neighboring property's privately owned slip, as is storm water from surrounding industrial properties. The slip was historically used for shipbuilding and subsequently for ship breaking and metal recycling. Studies of the river sediments have revealed concentration of polynuclear aromatic compounds, polychlorinated biphenyls and zinc, which are common constituents in urban storm water discharges. To minimize the zinc traces in its storm water, the Company painted a substantial part of the Portland facility's roofs and made certain paving improvements at the Portland facility. In June 2009, under the ODEQ Agreement, the Company submitted a Final Supplemental Work Plan to evaluate and assess soil and storm water, and further assess groundwater risk. The Company is working with the City of Portland and the ODEQ to facilitate further soil and storm water source control measures. Expected expenditures in 2011 are approximately \$1.9 million to address these issues.

Concurrent with the activities of the EPA and the ODEQ, the Portland Harbor Natural Resources Trustee Council (Trustees) sent some or all of the same parties, including the Company, a notice of intent to perform a Natural Resource Damage Assessment (NRDA) for the Portland Harbor Site to determine the nature and extent of natural resource damages under CERCLA section 107. The Trustees for the Portland Harbor Site consist of representatives from several Northwest Indian Tribes, three federal agencies and one state agency. The Trustees act independently of the EPA and the ODEQ, but the Company expects their assessment will be coordinated with the remedial investigation and feasibility study work underway at the Portland Harbor Site. In 2009, the Trustees completed phase one of their three-phase NRDA. Phase one of the NRDA consisted of environmental studies to fill gaps in the information available from the EPA, and development of a framework for evaluating, quantifying and determining the extent of injuries to the natural resource and the resulting damages. Phase two of the NRDA began in 2010 and consists largely of implementing the framework developed in phase one.

The Trustees have encouraged potentially responsible parties to voluntarily participate in the funding of their injury assessments. In 2009, one of the Tribal Trustees (the Yakima Nation) resigned and has requested funding from the same parties to support its own assessment. The Company has not assumed any payment obligation or liability related to either request. The extent of the Company's obligation with respect to Portland Harbor matters is not known, and no further adjustment to the consolidated financial statements has been recorded as of March 31, 2011.

We operate our facilities under numerous governmental permits and licenses relating to air emissions, storm water run-off, and other environmental matters. Our operations are also governed by many other laws and regulations, including those relating to workplace safety and worker health, principally the Occupational Safety and Health Act and regulations there under which, among other requirements, establish noise and dust standards. We believe we are in material compliance with our permits and licenses and these laws and regulations, and we do not believe that future compliance with such laws and regulations will have a material adverse effect on our financial position, results of operations or cash flows.

From time to time, the Company is involved in litigation relating to claims arising out of its operations in the normal course of its business. The Company maintains insurance coverage against potential claims in amounts that are believed to be adequate. The Company believes that it is not presently a party to any other litigation, the outcome of which would have a material adverse effect on its business, financial condition, results of operations or cash flows.

Guarantees. The Company has entered into certain stand-by letters of credit that total \$11.2 million at March 31, 2011. The stand-by letters of credit relate to workers' compensation insurance and certain suppliers.

6. Segment Information

The Company's operations are organized in two reportable segments, the Water Transmission Group and the Tubular Products Group, which are based on the nature of the products and the manufacturing process. The Water Transmission Group manufactures large-diameter, high-pressure steel pipeline systems for use in water infrastructure applications, primarily related to drinking water systems. These products are also used for hydroelectric power systems, wastewater systems and other applications. In addition, the Water Transmission Group makes products for industrial plant piping systems and certain structural applications. The Tubular Products Group manufactures and markets smaller diameter, electric resistance welded steel pipe used in a wide range of applications, including energy, construction, agricultural and traffic signpost systems. These two segments represent distinct business activities, which management evaluates based on segment gross profit and operating income. Transfers between segments in the periods presented were not material.

Table of Contents

	Three months ended March 31,	
	2011	2010
	(in thousands)	
Net sales:		
Water Transmission	\$ 58,645	\$ 52,685
Tubular Products	52,813	27,697
Total	\$ 111,458	\$ 80,382
Gross profit:		
Water Transmission	\$ 10,191	\$ 6,673
Tubular Products	5,393	2,424
Total	\$ 15,584	\$ 9,097
Operating income:		
Water Transmission	\$ 8,557	\$ 4,656
Tubular Products	4,368	1,854
Corporate	(4,656)	(4,058)
Total	\$ 8,269	\$ 2,452

7. Share-based Compensation

The Company has one active stock incentive plan for employees and directors, the 2007 Stock Incentive Plan, which provides for awards of stock options to purchase shares of common stock, stock appreciation rights, restricted and unrestricted shares of common stock, restricted stock units and performance awards. In addition, the Company has two inactive stock option plans, the 1995 Stock Option Plan for Nonemployee Directors and the Amended 1995 Stock Incentive Plan, under which previously granted options remain outstanding.

The Company recognizes compensation cost as service is rendered based on the fair value of the awards. The following summarizes share-based compensation expense recorded:

	Three months ended March 31,	
	2011	2010
	(in thousands)	
Cost of sales	\$ 5	\$ 27
Selling, general and administrative expenses	213	466
Total	\$ 218	\$ 493

As of March 31, 2011, unrecognized compensation expense related to the unvested portion of the Company's restricted stock units and performance awards was \$321,000, which is expected to be recognized over a weighted average period of 1.2 years.

Table of Contents**Stock Option Awards**

A summary of the status of the Company's stock options as of March 31, 2011 and changes during the three months then ended is presented below:

	Options Outstanding	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value (In thousands)
Balance, January 1, 2011	145,209	\$ 17.64		
Options granted				
Options exercised or exchanged	(2,215)	15.97		
Options canceled				
Balance, March 31, 2011	142,994	17.67	2.48	\$ 875
Exercisable, March 31, 2011	142,994	17.67	2.48	\$ 875

The total intrinsic value, defined as the difference between the current market value and the grant price, of options exercised or exchanged during the three months ended March 31, 2011 was \$17,000.

Restricted Stock Units and Performance Awards

A summary of the status of the Company's restricted stock units and performance awards as of March 31, 2011 and changes during the three months then ended is presented below:

	Number of Restricted Stock Units and Performance Awards	Weighted Average Grant Date Fair Value
Unvested restricted stock units and performance awards at January 1, 2011	55,843	\$ 37.00
Restricted stock units and performance awards granted	18,000	23.79
Restricted stock units and performance awards vested	(14,980)	37.66
Restricted stock units and performance awards canceled	(8,254)	37.97
Unvested restricted stock units and performance awards at March 31, 2011	50,609	31.95

Restricted stock units (RSU's) and performance stock awards (PSA's) are measured at market value on the date of grant. RSU's are service-based awards and generally vest equally over a three-year period. PSA's are performance and service-based awards. PSA's are awarded at the end of a three-year performance period, if certain performance objectives are met, and vest equally over a two-year period. The Company recognizes compensation expense related to the performance awards based on the probable outcome of the performance conditions.

8. Income Taxes

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

The Company files income tax returns in the United States Federal jurisdiction, in a limited number of foreign jurisdictions, and in many state jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal, state or foreign income tax examinations for years before 2007.

The Company had \$125,000 of unrecognized tax benefits at March 31, 2011 and December 31, 2010. The Company does not believe it is reasonably possible that the total amounts of unrecognized tax benefits will change significantly in the following twelve months; however, actual results could differ from those currently expected.

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. The Company provided for income taxes at estimated effective tax rates of 38.7% and 47.1% for the three month periods ended March 31, 2011 and March 31, 2010, respectively.

Table of Contents**9. Comprehensive Income**

Comprehensive income is reconciled to net income for the three months ended March 31, 2011 and 2010 as follows:

	Three Months Ended March 31,	
	2011	2010
	(In thousands)	
Net income	\$ 3,566	\$ 1,056
Pension liability adjustment, net of tax	44	44
Unrealized gain (loss) on derivative financial instruments, net of tax	19	(30)
 Total comprehensive income	 \$ 3,629	 \$ 1,070

10. Earnings per Share

Net income per basic and diluted weighted average common share outstanding was calculated as follows for the three months ended March 31, 2011 and 2010:

	Three Months Ended March 31,	
	2011	2010
Net income (in thousands)	\$ 3,566	\$ 1,056
 Basic weighted-average common shares outstanding	 9,304,481	 9,249,240
Effect of potentially dilutive common shares ⁽¹⁾	39,339	92,772
 Diluted weighted-average common shares outstanding	 9,343,820	 9,342,012
 Net income per common share:		
Net income per basic common share	\$ 0.38	\$ 0.11
Net income per diluted common share	\$ 0.38	\$ 0.11
Antidilutive shares not included in diluted common share calculation	45,600	13,117

- (1) Represents the effect of the assumed exercise of stock options and the vesting of restricted stock units and performance stock awards, based on the treasury stock method.

11. Recent Accounting and Reporting Developments

In December 2010, the FASB issued amendments that modify Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance, which requires that goodwill of a reporting unit be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. These amendments were effective January 1, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial position, results of operations or cash flows.

12. Subsequent Events

On April 1, 2011, the Company sold its interest in NWPA for \$0.8 million. Under the terms of the sales agreement, \$0.3 million was due at signing, \$0.3 million is due on or before June 30, 2011 and \$0.2 million is due on or before August 18, 2011.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Report contain forward-looking statements within the meaning of the Securities Litigation Reform Act of 1995 and Section 21E of the Exchange Act that are based on current expectations, estimates and projections about our business, management's beliefs, and assumptions made by management. Words such as expects, anticipates, intends, plans, believes, seeks, estimates, forecasts, should, could, and variations of such expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements as a result of a variety of important factors. While it is impossible to identify all such factors, those that could cause actual results to differ materially from those estimated by us include changes in demand and market prices for our products, product mix, bidding activity, the timing of customer orders and deliveries, production schedules, the price and availability of raw materials, excess or shortage of production capacity, international trade policy and regulations and other risks discussed in our 2010 Form 10-K and from time to time in our other Securities and Exchange Commission filings and reports. Such forward-looking statements speak only as of the date on which they are made and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this Report. If we do update or correct one or more forward-looking statements, investors and others should not conclude that we will make additional updates or corrections with respect thereto or with respect to other forward-looking statements.

Overview

We are a leading North American manufacturer of large-diameter, high-pressure steel pipeline systems for use in water infrastructure applications, primarily related to drinking water systems, and we also manufacture other welded steel pipe products for use in a wide range of applications, including energy, construction, agriculture, industrial and traffic signpost systems. Our pipeline systems are also used for hydroelectric power systems, wastewater systems and other applications, and we also make products for industrial plant piping systems and certain structural applications. These pipeline systems are produced by our Water Transmission Group from seven manufacturing facilities located in Portland, Oregon; Denver, Colorado; Adelanto, California; Parkersburg, West Virginia; Saginaw, Texas; Pleasant Grove, Utah; and Monterrey, Mexico. Our Water Transmission Group accounted for approximately 53% of net sales in the first three months of 2011.

Our water infrastructure products are generally sold to installation contractors, who include our products in their bids to municipal agencies or privately-owned water companies for specific projects. Within the total pipeline, our products best fit the larger-diameter, higher-pressure applications. We believe our sales are substantially driven by spending on new water infrastructure with additional spending on water infrastructure upgrades, replacements, and repairs. Pricing of our water infrastructure products is largely determined by the competitive environment in each regional market, and the regional markets generally operate independently of each other. We operate our Water Transmission business with a long-term time horizon. Projects are often planned for many years in advance, and are sometimes part of fifty-year build out plans. However, in the near-term, we expect strained municipal budgets will impact the Water Transmission Group.

Our Tubular Products Group manufactures other welded steel products in three facilities: Atchison, Kansas; Houston, Texas; and Bossier City, Louisiana. We produce a range of products used in several different markets. We currently make pipe for a wide variety of uses, including energy, industrial, construction, agricultural, and traffic signpost systems, which are sold to distributors and used in many different applications. Our Tubular Products Group's sales volume is typically driven by energy spending, non-residential construction spending, highway spending and general economic conditions. We believe the greatest potential for significant sales growth in our Tubular Products Group is through our energy products. Our Tubular Products Group generated approximately 47% of net sales in the first three months of 2011.

Purchased steel represents a substantial portion of our cost of sales, and changes in our selling prices often correlate directly to changes in steel costs. This correlation is the greatest in our Tubular Products Group. Tubular Products' margins are highly sensitive to changes in steel costs, although the amounts of margins are also influenced by the current level of demand in the marketplace.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. As discussed in our Form 10-K for the year ended December 31, 2010, we performed our annual goodwill

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

impairment analysis as of December 31, 2010 and determined no impairment had occurred. A description of all other critical accounting policies and related judgments and estimates that affect the preparation of our consolidated financial statements is set forth in our Annual Report on Form 10-K for the year ended December 31, 2010.

Table of Contents**Recent Accounting Pronouncements**

See Note 11 of the Condensed Consolidated Financial Statements in Part I Item I, Financial Statements for a description of recent accounting pronouncements, including the dates of adoption and estimated effects on financial position, results of operations and cash flows.

Results of Operations

The following table sets forth, for the period indicated, certain financial information regarding costs and expenses expressed as a percentage of total net sales and net sales of our business segments.

	Three months ended March 31,	
	2011	2010
Net sales		
Water Transmission	52.6%	65.5%
Tubular Products	47.4	34.5
Total net sales	100.0	100.0
Cost of sales	86.0	88.7
Gross profit	14.0	11.3
Selling, general and administrative expense	6.6	8.2
Operating income	7.4	3.1
Other (income) expense	0.1	(0.8)
Interest income	(0.0)	(0.3)
Interest expense	2.1	1.7
Income before income taxes	5.2	2.5
Provision for income taxes	2.0	1.2
Net income	3.2%	1.3%
Gross profit as a percentage of segment net sales:		
Water Transmission	17.4%	12.7%
Tubular Products	10.2	8.8

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010

Net sales. Net sales increased 38.7% to \$111.5 million for the first quarter of 2011 compared to \$80.4 million for the first quarter of 2010. One customer in the Tubular Products segment accounted for 10.9% of total net sales in the first quarter of 2011. No single customer accounted for 10% of net sales in the first quarter of 2010.

Water Transmission sales increased by 11.3% to \$58.6 million in the first quarter of 2011 from \$52.7 million in the first quarter of 2010. The increase in sales in the first quarter of 2011 compared to the first quarter of 2010 was due to a 23% increase in selling prices per ton partially offset by a 10% decrease in volume. The increase in selling prices per ton in the first three months of 2011 was due to an increase in steel costs over 2010 and our mix of contracts produced during the quarter. Higher steel costs generally lead to higher contract values. Steel prices are discussed further in the gross margin analysis. The decrease in volume also resulted from continued weakness of municipal markets. Bidding activity, backlog and production levels may vary significantly from period to period affecting sales volumes.

Tubular Products sales increased 90.7% to \$52.8 million in the first quarter of 2011 from \$27.7 million in the first quarter of 2010. The sales increase in the first quarter of 2011 as compared to the first quarter of 2010 was due to a 65% increase in tons sold and a 16% increase in selling price per ton. The most significant increase in demand was the result of increases in natural gas and oil drilling operations, with energy pipe representing 94% of the total Tubular Product volume increase in the first quarter of 2011 compared to the first quarter of 2010. In the first quarter of 2010, there were large amounts of imported energy pipe in the U.S. As import duties imposed by the U.S. Government took effect in

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

the second quarter of 2010, volumes of energy pipe imported in the U.S. declined, leading to the higher volumes and profits in the first quarter of 2011. With the increase in demand, we installed manufacturing equipment in our Bossier City, Louisiana facility in 2010, increasing our capacity for energy pipe. Energy pipe volume increased 117% and energy pipe selling prices per ton increased 20% in the first quarter of 2011 compared to the first quarter of 2010.

Gross profit. Gross profit increased 71.3% to \$15.6 million (14.0% of total net sales) in the first quarter of 2011 from \$9.1 million (11.3% of total net sales) in the first quarter of 2010.

Table of Contents

Water Transmission gross profit increased \$3.5 million, or 52.7%, to \$10.2 million (17.4% of segment net sales) in the first quarter of 2011 from \$6.7 million (12.7% of segment net sales) in the first quarter of 2010. Our gross margin was impacted by the higher sales discussed above and higher materials cost per ton, including steel. Our Water Transmission materials cost per ton increased by 22% in the first quarter of 2011 compared to the first quarter of 2010 as a result of higher steel costs. Gross margins were positively impacted as lower margin projects awarded in 2009 which flowed through the 2010 income statement had less impact in 2011.

Gross profit from Tubular Products increased \$3.0 million, or 122.5%, to \$5.4 million (10.2% of segment net sales) in the first quarter of 2011 from \$2.4 million (8.8% of segment net sales) in the first quarter of 2010. As noted above, demand for our Tubular Products increased significantly, particularly for our energy products, which had sales revenue of \$13.2 million in the first quarter of 2010 and increased 161% to \$34.5 million in the first quarter of 2011. The significant increase in volume contributed to the increase in gross profit in 2011, as the market conditions led to higher production which allowed us to recover more of our fixed costs than in the same period in 2010. The increased margins were partially offset by higher steel costs per ton of 10% in the first quarter of 2011 compared to the first quarter of 2010 and by our inventory lower of cost or market adjustment, which decreased by \$678,000 in the first quarter of 2010 compared to no change in the first quarter of 2011.

Selling, general and administrative expenses. Selling, general and administrative expenses increased to \$7.3 million (6.6% of total net sales) in the first quarter of 2011 from \$6.6 million (8.2% of total net sales) in the first quarter of 2010. In the first quarter of 2011 as compared to the first quarter of 2010, bonus expense of \$402,000 was recorded as a result of improved financial outlook, Tubular Product sales commission expense increased \$311,000 with the increase in our Tubular Products sales volume, and severance costs increased \$377,000 related to the departure of our former Chief Financial Officer in January, 2011. These were partially offset by reduced accounting investigation costs of \$565,000.

Interest expense. Interest expense was \$2.4 million in the first quarter of 2011 and \$1.3 million in the first quarter of 2010. Higher average borrowings and higher average interest rates increased interest expense in the first quarter of 2011 compared to the first quarter of 2010.

Income Taxes. The tax provision was \$2.2 million in the first quarter of 2011 (an effective tax rate of 38.7%) while the tax provision for the first quarter of 2010 was \$0.9 million (an effective tax rate of 47.1%). Our effective tax rate of 38.7% exceeds our federal statutory rate of 35% due primarily to state taxes and the relationship of permanent income tax deductions and tax credits to estimated pre-tax income for the year 2011. When pre-tax earnings move between loss and income positions, the effective income tax rate can change significantly depending on the relationship of permanent income tax deductions and tax credits to estimated pre-tax income or loss. Accordingly, the comparison of effective rates between periods is not meaningful in those situations.

Liquidity and Capital Resources

Sources and Uses of Cash

Our principal sources of liquidity generally include operating cash flow and our bank credit agreement. Our principal uses of liquidity generally include capital expenditures, working capital and debt service. Information regarding our cash flows for the three months ended March 31, 2011 is presented in our condensed consolidated statements of cash flows contained in this Form 10-Q, and is further discussed below.

As of March 31, 2011, our working capital (current assets minus current liabilities) was \$163.3 million as compared to \$155.2 million as of December 31, 2010.

Net cash used in operating activities in the first three months of 2011 was \$2.9 million. This was primarily the result of fluctuations in our working capital accounts, which result from timing differences between production, shipment and invoicing of our products, as well as changes in levels of production and costs of materials. We typically have a relatively large investment in working capital, as we are generally obligated to pay for goods and services early in the life cycle of a Water Transmission segment project while cash is not received until much later in the project. Our revenues in the Water Transmission segment are recognized on a percentage-of-completion method; therefore, there is little correlation between revenue and cash receipts and the elapsed time can be significant. As such, our payment cycle is a significantly shorter interval than our collection cycle, although the effect of this difference in the cycles may vary from period to period.

Net cash used in investing activities in the first three months of 2011 was \$3.5 million, primarily for capital expenditures for capacity expansion in our Tubular Products plants. Capital expenditures in 2011 are expected to be approximately \$16 million to \$18 million for standard capital replacement and recently announced strategic investment projects. These include an expansion at our Atchison, Kansas facility that will increase its production capacity by more than 50%, improve productivity and enable the facility to produce product up to 0.375 inch wall. In addition, we are upgrading our Houston, Texas mill to facilitate production of 2-3/8 and 2-7/8 inch tubing with physical properties suitable for heat treating.

Table of Contents

Net cash provided by financing activities in the first three months of 2011 was \$6.4 million, which resulted primarily from net borrowings of \$9.5 million under our Amended and Restated Credit Agreement (*Credit Agreement*), partially offset by long-term debt payments of \$2.8 million.

We anticipate that our existing cash and cash equivalents, cash flows expected to be generated by operations, and amounts available under our credit agreements will be adequate to fund our working capital and capital requirements for at least the next twelve months. We also expect to continue to rely on cash generated from operations and other sources of available funds to make required principal payments under our long term debt during 2011. To the extent necessary, we may also satisfy capital requirements through additional bank borrowings, senior notes, term notes, subordinated debt, and capital and operating leases, if such resources are available on satisfactory terms. See the discussion below under

Line of Credit and Long-Term Debt for a discussion of recent developments regarding compliance with the terms of our line of credit and long-term debt agreements. We have from time to time evaluated and continue to evaluate opportunities for acquisitions and expansion. Any such transactions, if consummated, may use a portion of our working capital or necessitate additional bank borrowings or other sources of funding.

Line of Credit and Long-Term Debt

We had the following significant components of debt at March 31, 2011: a \$125.0 million Credit Agreement, under which \$77.5 million was outstanding; \$6.4 million of Series A Term Note, \$6.0 million of Series B Term Notes, \$5.7 million of Series C Term Notes and \$2.6 million of Series D Term Notes.

The Credit Agreement expires on May 31, 2012, and bears interest at rates related to LIBOR plus 2.50% to 4.50%, or the lending institution's prime rate, plus 1.50% to 3.50%. Borrowings under the Credit Agreement are collateralized by substantially all of our personal property.

During 2010, we entered into several amendments to our Credit Agreement and our Amended and Restated Note Purchase and Private Shelf Agreement (*Note Purchase Agreement*). The amendments, among other things, reduced the aggregate availability of our Credit Agreement, increased interest rates charged on outstanding balances and waived compliance with certain covenants in the Agreements for the year ended December 31, 2009 and the quarters ended March 31, 2010 and June 30, 2010. Upon delivery to the lenders of the Company's financial statements and Compliance Certificate for the period ended September 30, 2010, the availability under the Credit Agreement was increased to \$117.5 million. Upon delivery of the March 31, 2011 Compliance Certificate, amounts available under our Credit Agreement will increase to \$125 million. In addition, the amendments changed the definitions, method of application and amounts of certain covenants. At March 31, 2011, we had \$77.5 million outstanding under the Credit Agreement bearing interest at a weighted average rate of 4.64%. At March 31, 2011, we had an additional net borrowing capacity under the credit facility of \$26.5 million.

The Series A Term Note in the principal amount of \$6.4 million matures on February 25, 2014 and requires annual payments in the amount of \$2.1 million plus interest of 10.75% paid quarterly on February 25, May 25, August 25 and November 25. The Series B Term Notes in the principal amount of \$6.0 million mature on June 21, 2014 and require annual payments in the amount of \$1.5 million plus interest of 10.47% paid quarterly on March 21, June 21, September 21 and December 21. The Series C Term Notes in the principal amount of \$5.7 million mature on October 26, 2014 and require annual payments of \$1.4 million plus interest of 9.36% paid quarterly on January 26, April 26, July 26 and October 26. The Series D Term Notes in the principal amount of \$2.6 million mature on January 24, 2015 and require annual payments in the amount of \$645,000 plus interest of 9.32% paid quarterly on January 24, April 24, July 24 and October 24. The Series A Term Note, the Series B Term Notes, the Series C Term Notes, and the Series D Term Notes (together, the *Term Notes*) are collateralized by accounts receivable, inventory and certain equipment.

We had \$8.6 million of capital lease outstanding at March 31, 2011, under which certain equipment used in the manufacturing process is leased. The average interest rate on the capital lease is 5.70%.

Our capital lease outstanding as of March 31, 2011 consists of an agreement entered into as of September 2009 to finance our Bossier City, Louisiana facility (the *Financing Arrangement*). As part of the Financing Arrangement, a \$10 million escrow account was provided for the Company by a local government entity through a financial institution and funds are released upon qualifying purchase requisitions. As we purchase equipment for the facility, we enter into a sale-leaseback transaction with the governmental entity as part of the Financing Arrangement. As of March 31, 2011, \$2.7 million was held in the escrow account, which is included in other assets, as a result of proceeds from the Financing Arrangement. The Financing Arrangement requires us to meet certain loan covenants, measured at the end of each fiscal quarter. These loan covenants follow the covenants required by our Credit Agreement.

Table of Contents

The Credit Agreement, the Note Purchase Agreement and certain of our leases place various restrictions on our ability to, among other things, incur certain additional indebtedness, create liens or other encumbrances on assets, and incur additional capital expenditures. The Credit Agreement, Note Purchase Agreement, and certain of our leases require us to be in compliance with certain financial covenants. The results of our financial covenants as of March 31, 2011 are below.

The Consolidated Senior Leverage Ratio must not be greater than 6.25:1.0. Our ratio as of March 31, 2011 is 4.28:1.0.

The Consolidated Total Leverage Ratio must not be greater than 6.25:1.0. Our ratio as of March 31, 2011 is 4.28:1.0.

The Consolidated Tangible Net Worth must be greater than \$195 million. Our tangible net worth as of March 31, 2011 is \$228 million.

The Asset Coverage Ratio cannot be less than 1.0:1.0. Our ratio as of March 31, 2011 is 1.83:1.0.

The Minimum Consolidated EBITDA cannot be less than \$18.5 million. Our consolidated EBITDA as of March 31, 2011 is \$22.5 million.

The Consolidated Rental and Operating Lease Expense to Consolidated Revenue Ratio must not be greater than 6.0%. Our ratio as of March 31, 2011 is 1.5%.

As of March 31, 2011, we are in compliance with all financial covenants. In accordance with the requirements, the Consolidated Fixed Charge Coverage Ratio will next be calculated as of June 30, 2011.

Based on our business plan and forecasts of operations, we believe we will remain in compliance with our amended covenants for the next 12 months.

Off Balance Sheet Arrangements

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future material effect on our financial position, results of operations or cash flows.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

For a discussion of the Company's market risk associated with foreign currencies and interest rates, see Item 7A, "Quantitative and Qualitative Disclosures about Market Risk" in Part II of the Company's Annual Report on Form 10-K for the year ended December 31, 2010. For the three months ended March 31, 2011, there has been no material change in market risk factors.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are designed to provide reasonable assurance that information required to be disclosed in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to our management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate to allow timely decisions regarding required disclosures.

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

In connection with the preparation of this March 2011 Form 10-Q, our management, under the supervision and with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2011. As described below, management has identified material weaknesses in our internal controls over financial reporting, which is an integral component of our disclosure controls and procedures. As a result of those material weaknesses, our CEO and CFO have concluded that, as of March 31, 2011, our disclosure controls and procedures were not effective.

Table of Contents

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended March 31, 2011 that materially affected or are reasonably likely to materially affect our internal control over financial reporting. However, as described below under Plans for Remediation of Material Weaknesses, we are dedicating significant resources to support our efforts to improve the control environment and to remedy the control weaknesses described herein.

Management's Report on Internal Control over Financial Reporting

In connection with management's assessment of our internal control over financial reporting described in our 2010 Form 10-K, management has identified the following deficiencies that constituted individually, or in the aggregate, material weaknesses in our internal control over financial reporting as of December 31, 2010:

We did not maintain an effective control environment, which is necessary for effective internal control over financial reporting, as evidenced by: (i) an insufficient number of personnel with an appropriate level of generally accepted accounting principles (GAAP) knowledge and experience or ongoing training in the application of GAAP commensurate with the Company's financial reporting requirements, and (ii) insufficient number of personnel appropriately qualified to perform an appropriately detailed review of the accounting for nonroutine transactions, which resulted in prior periods in erroneous or unsupported judgments regarding the proper application of GAAP. This control environment weakness also contributed to the additional material weaknesses described below.

We did not have effective controls to ensure regular validation of management assumptions used in certain of our accounting estimates.

We did not have effective controls over certain spreadsheets. Specifically, the Company did not have sufficient review procedures in place to ensure an accurate preparation of spreadsheets used to support the preparation of financial information.

We did not maintain effective controls to ensure timely internal notification of business transactions and decisions requiring accounting entries. Specifically, our sales and human resources teams and plant personnel did not communicate to our accounting staff all of the information necessary to make accurate accounting determinations for certain accounts receivable and accrued liability balances.

The material weaknesses described above could result in a misstatement in our annual or interim consolidated financial statements that would not be prevented or detected in a timely manner. Although we did not identify a material misstatement in 2011 which resulted from these deficiencies, management does not believe that the controls in place as of March 31, 2011 are sufficiently designed and effectively operating to prevent or detect such misstatement. Accordingly, management has determined that each of the control deficiencies above constitutes a material weakness and concluded that we did not maintain effective internal control over financial reporting as of March 31, 2011.

Plans for Remediation of Material Weaknesses

Our Board, the Audit Committee and management are adding resources and developing and implementing new processes and procedures to remediate, among other things, the material weaknesses that existed in our internal control over financial reporting, and our disclosure controls and procedures, as of March 31, 2011.

We have developed a remediation plan (the Remediation Plan) to address the material weaknesses for each of the affected areas presented above. The Remediation Plan ensures that each area affected by a material control weakness is put through a comprehensive remediation process. The Remediation Plan entails a thorough analysis which includes the following phases:

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

Define and assess each control deficiency: ensure a thorough understanding of the as is state, process owners, and procedural or technological gaps causing the deficiency. This work is underway for all identified areas;

Design and evaluate a remediation action for each control deficiency for each affected area: validate or improve the related policy and procedures; evaluate skills of the process owners with regard to the policy and adjust as required. The Remediation Plan will require an assessment of all control failures; we expect that many of the recent improvements will provide an appropriate starting point for the specific action plans;

Implement specific remediation actions: train process owners, allow time for process adoption and adequate transaction volume for next steps;

Test and measure the design and effectiveness of the remediation actions; test and provide feedback on the design and operating effectiveness of the controls, and;

Review and acceptance of completion of the remediation effort by management.

Table of Contents

Additionally, we are evaluating and enhancing our entity level controls as part of our Remediation Plan. The following are steps we have taken in this process:

In March 2010, our Board of Directors appointed a new CEO;

In August 2010, we hired a Director of Compliance and Controls to direct our remediation efforts;

In August 2010, our Board of Directors elected a new, independent member to the Board of Directors;

In the third quarter of 2010, we implemented a new sub-certification process with our management group in order to demonstrate a clear commitment to corporate integrity and compliance and a duty to report financial irregularities;

In the third quarter of 2010, we undertook an effort to enhance existing and adopt new, written policies and procedures; specifically, we have focused on our cost-to-cost percentage-of-completion revenue recognition method to describe more clearly our guiding principles related to the accounting for our Water Transmission segment contracts;

In December of 2010, our employees acknowledged, by way of signature, compliance with and understanding of our Code of Conduct;

In January of 2011, our Board of Directors appointed a new CFO, who oversaw the preparation of the 2010 Form 10-K. The Remediation Plan is being administered by our Director of Compliance and Controls and involves key leaders from across the organization, including the CEO and CFO. Each specific area of action within the Remediation Plan has been assigned an owner who will coordinate the resources required for timely completion of the remediation activities. The Director of Compliance and Controls will report quarterly and as needed to the Audit Committee of our Board of Directors on the progress made toward completion of the Remediation Plan.

We believe the steps taken to date have improved the effectiveness of our internal control over financial reporting; however, we have not completed the corrective processes and procedures identified herein. Accordingly, as we continue to monitor the effectiveness of our internal control over financial reporting in the areas affected by the material weaknesses described above, we will perform additional procedures prescribed by management including the use of manual mitigating control procedures and employ any additional tools and resources deemed necessary to ensure that our financial statements continue to be fairly stated in all material respects.

Part II Other Information

Item 1. Legal Proceedings

Information required by this Item 1 is contained in Note 5 to the Condensed Consolidated Financial Statements, Part I - Item 1, Financial Statements of this report, under the caption Commitments and Contingencies. The text under such caption is incorporated by reference into this Item 1.

Item 1A. Risk Factors

In addition to the other information set forth in this report, the factors discussed in Part I - Item 1A - Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 could materially affect our business, financial condition or operating results. The risks described in our Annual Report on Form 10-K are not the only risks facing us. There are additional risks and uncertainties not currently known to us or that we currently deem to be immaterial, that may also materially adversely affect our business, financial condition, or operating results.

Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

There have been no material changes in the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.
