Entergy SEC Disclosure

FORWARD-LOOKING INFORMATION

In this communication, and from time to time, Entergy makes certain forward-looking statements within the meaning of the Reform Act of 1995. Except to the extent required by the federal securities laws, Entergy undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. Forward-looking statements involve a number of uncertainties. There are factors that could cause actual results to differ materially from those expressed or implied in the forward-looking statements, including (i) those factors discussed in Entergy's Annual Report on Form 10-K for the year ended December 31, 2011, its Quarterly Reports on Form 10-Q for the quarters ended March 31, 2012, June 30, 2012 and September 30, 2012, and other filings made by Entergy with the Securities and Exchange Commission (the "SEC"); (ii) the following transactional factors (in addition to others described elsewhere in this communication):

statement/prospectus included in the registration statement on Form S-4 that ITC filed with the SEC on September 25, 2012 in proposed transactions, and in subsequent securities filings) involving risks inherent in the contemplated transaction, including: shareholder approval, (2) failure of Entergy and its shareholders to recognize the expected benefits of the transaction, (3) failure of approvals necessary to consummate the transaction or to obtain regulatory approvals on favorable terms, (4) the ability of Entergy LLC (TransCo) and ITC to obtain the required financings, (5) delays in consummating the transaction or the failure to consummate exceeding the expected costs of the transaction, and (7) the failure to receive an IRS ruling approving the tax-free status of the transaction and regulatory actions; and (iv) conditions of the capital markets during the periods covered by the forward-looking statements to certain conditions precedent, including regulatory approvals, approval of ITC's shareholders and the availability of financing. No assurance that the transaction or any of the proposed transactions related thereto will be completed, nor can it give assurances that such transactions will be consummated.

ADDITIONAL INFORMATION AND WHERE TO FIND IT

On September 25, 2012, ITC filed a registration statement on Form S-4 (Registration No. 333-184073) with the SEC registering common stock to be issued to Entergy shareholders in connection with the proposed transactions, but this registration statement will not become effective. This registration statement includes a proxy statement of ITC that also constitutes a prospectus of ITC, and a prospectus of TransCo to be issued to TransCo shareholders. In addition, TransCo will file a registration statement with the SEC registering TransCo common units to be issued to Entergy shareholders in connection with the proposed transactions. Entergy shareholders are urged to read the proxy statement/prospectus included in the ITC registration statement and the proxy statement/prospectus to be included in the TransCo registration statement (both available) and any other relevant documents, because they contain important information about ITC, TransCo and the proposed transactions. ITC shareholders are urged to read the proxy statement/prospectus included in the ITC Registration Statement and any other relevant documents because they contain important information about TransCo and the proposed transactions. The proxy statement/prospectus and other documents relating to the proposed transactions (when they are available) can be obtained free of charge from the SEC's website at www.sec.gov.
