The Information was prepared in connection with negotiations between the Company and the Applicable Lenders to set financial covenant levels for the exit facility that the Applicable Lenders have agreed to provide to the Company pursuant to the terms of the Junior DIP, subject to the satisfaction of certain conditions.

The Information below is a reconciliation of Commercial Imaging EBITDA as set forth in the January Projections (as defined below) to Covenant EBITDA before Credit Agreement Adjustments which will be used to set financial covenant levels in the exit facility, subject to certain exit facility credit agreement adjustments. The Information below does not reflect the impact of fresh start accounting.

- (b) Assumes the completion of the previously announced dispositions of PI and DI during fiscal year 2013 and includes EBITDA contribution from PI and DI prior to such disposition, stranded costs subsequent to such dispositions, and the estimated costs relating to such dispositions.

The financial projections on which the Information was based were prepared in connection with a presentation to the Applicable Lenders on January 22, 2013 (the January Projections). The January Projections were furnished on a Current Report on Form 8-K on January 22, 2013 and the Information is subject to the same limitations and disclaimers set forth in the January Projections. The January Projections are not incorporated by reference herein. The Information is not an update of the January Projections and does not take into account any events or information subsequent to January 22, 2013. The Information was prepared for purposes of discussions with the Applicable Lenders and not for any other purpose and the Company makes no representation and warranty to any person in relation to the Information.

In addition, the projections on which the Information was based reflect numerous estimates and assumptions made by management of the Company with respect to its financial condition, the performance of its business and conditions within its industry, general economic, market and financial conditions and numerous other matters. These factors are difficult to predict accurately and in many cases are outside of the Company's control. Consequently, it is likely that actual results will differ from those reflected in the Information and such differences may be material. The Company has not made and does not make any representation to any person regarding the Company's future results. Furthermore, the Company is not required to publicly update the Information to reflect more current facts or estimates or the occurrence of future events, including if the facts, estimates and assumptions upon which the Information is based are erroneous. In addition, the Information and the January Projections will be further impacted by restructuring activities related to certain obligations including but not limited to domestic and foreign pension obligations, other postretirement obligations (OPEB), pre-petition obligations and borrowings. The Company does not make any representation as to how these obligations will be treated as part of the restructuring. In addition, the Information does not reflect the cash costs of the pension and OPEB obligations.

The financial information contained in the Information does not purport to present the Company's financial condition in accordance with accounting principles generally accepted in the United States (GAAP). The Company's independent accountants have not audited or performed any review procedures on the information contained in either the January Projections or the Information. The Information includes EBITDA measures that are not measures recognized under GAAP. These measures do not purport to be alternatives to measures presented in accordance with GAAP, and do not purport to be an alternative to Net Income (Loss) as a measure of profitability or cash flows from operations as an alternative to liquidity.
