UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q

(Mark one)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended September 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____
Commission file number: 1-8606

Verizon Communications Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction

of incorporation or organization)

140 West Street

New York, New York

(Address of principal executive offices)

Registrant's telephone number, including area code: (212) 395-1000

23-2259884

(I.R.S. Employer Identification No.)

10007

(Zip Code)

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At September 30, 2013, 2,861,750,762 shares of the registrant's common stock were outstanding, after deducting 105,859,357 shares held in treasury.

Notes to Condensed Consolidated Financial Statements

Verizon Communications Inc. and Subsidiaries

(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared based upon Securities and Exchange Commission rules that permit reduced disclosure for interim periods. For a more complete discussion of significant accounting policies and certain other information, you should refer to the financial statements included in the Verizon Communications Inc. (Verizon or the Company) Annual Report on Form 10-K for the year ended December 31, 2012. These financial statements reflect all adjustments that are necessary for a fair presentation of results of operations and financial condition for the interim periods shown including normal recurring accruals and other items. The results for the interim periods are not necessarily indicative of results for the full year. We have reclassified prior year amounts to conform to the current year presentation.

Recently Adopted Accounting Standards

During the first quarter of 2013, we adopted the accounting standard update regarding testing of intangible assets for impairment. This standard update allows companies the option to perform a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired. An entity is not required to calculate the fair value of an indefinite-lived intangible asset and perform the quantitative impairment test unless the entity determines that it is more likely than not the asset is impaired. The adoption of this standard update did not have an impact on our condensed consolidated financial statements.

During the first quarter of 2013, we adopted the accounting standard update regarding reclassifications out of accumulated other comprehensive income. This standard update requires companies to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in our condensed consolidated statements of income if the amount being reclassified is required to be reclassified in its entirety to net income. For other amounts that are not required to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference to other required disclosures that provide additional detail about those amounts. See Note 8 (Equity and Accumulated Other Comprehensive Income) for additional details.

During the third quarter of 2013, we adopted the accounting standard update regarding the ability to use the Federal Funds Effective Swap Rate as a United States (U.S.) benchmark interest rate for hedge accounting purposes. Previously the interest rates on direct Treasury obligations of the U.S. government and the London Interbank Offered Rate (LIBOR) were considered to be the only benchmark interest rates. The adoption of this standard update did not have a significant impact on our condensed consolidated financial statements.

Leasing Arrangements

At each reporting period, we monitor the credit quality of the various lessees in our portfolios. Regarding the leveraged lease portfolio, external credit reports are used where available and where not available we use internally developed indicators. These indicators or internal credit risk grades factor historic loss experience, the value of the underlying collateral, delinquency trends, and industry and general economic conditions. The credit quality of our lessees primarily varies from AAA to CCC+. For each reporting period the leveraged leases within the portfolio are reviewed for indicators of impairment where it is probable the rent due according to the contractual terms of the lease will not be collected. All significant accounts, individually or in the aggregate, are current and none are classified as impaired.

Earnings Per Common Share

There were a total of approximately 8 million outstanding dilutive securities, primarily consisting of restricted stock units, included in the computation of diluted earnings per common share for the three and nine months ended September 30, 2013, respectively. There were a total of approximately 9 million outstanding dilutive securities, primarily consisting of restricted stock units, included in the computation of diluted earnings per common share for the three and nine months ended September 30, 2012, respectively. Outstanding options to purchase shares that were not included in the computation of diluted earnings per common share because to do so would have been anti-dilutive for the period, were

not significant for the three and nine months ended September 30, 2013, and 2012, respectively.

Table of Contents

Recent Accounting Standards

In July 2013, the accounting standard update relating to the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists was issued. The standard update provides that a liability related to an unrecognized tax benefit should be offset against same jurisdiction deferred tax assets for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. We will adopt this standard update during the first quarter of 2014. We are currently evaluating the impact that this standard update will have on our condensed consolidated financial statements.

2. Acquisitions and Divestitures

Wireless Transaction

On September 2, 2013, Verizon entered into a stock purchase agreement (the Stock Purchase Agreement) with Vodafone Group Plc (Vodafone) and Vodafone 4 Limited (Seller), pursuant to which Verizon agreed to acquire Vodafone's indirect 45% interest in Cellco Partnership d/b/a Verizon Wireless (the Partnership, and such interest, the Vodafone Interest).

Pursuant to the terms and subject to the conditions set forth in the Stock Purchase Agreement, Verizon will acquire (the Wireless Transaction) from Seller all of the issued and outstanding capital stock (the Transferred Shares) of Vodafone Americas Finance 1 Inc., a subsidiary of Seller (VF1 Inc), which indirectly through certain subsidiaries (together with VF1 Inc, the Purchased Entities) owns the Vodafone Interest. In consideration for the Transferred Shares, Verizon has agreed to, upon completion of the Wireless Transaction, (i) pay approximately \$58.89 billion in cash, (ii) issue approximately \$60.15 billion of Verizon's common stock, par value \$0.10 per share (the Stock Consideration), (iii) issue senior unsecured Verizon notes in an aggregate principal amount of \$5.0 billion (the Verizon Notes), (iv) transfer Verizon's indirectly owned 23.1% interest in Vodafone Omnitel N.V. (Omnitel, and such interest, the Omnitel Interest), valued at \$3.5 billion and (v) provide other consideration of approximately \$2.5 billion. The exact number of shares of Verizon's common stock to be issued in the Wireless Transaction will be determined prior to the closing of the Wireless Transaction based on the volume-weighted average trading price per share of Verizon common stock on the New York Stock Exchange during the 20 trading days ending on the third business day prior to the closing, except that the price used for this purpose will not be less than \$47.00 or more than \$51.00 per share. As a result of the Wireless Transaction, Verizon expects to issue a minimum of 1.18 billion shares and a maximum of 1.28 billion shares. In addition, Verizon has the right to increase the cash portion of the purchase price (and correspondingly reduce the Stock Consideration) by up to \$15.0 billion in certain circumstances. All of the Stock Consideration will be issued directly or distributed to the Vodafone ordinary shareholders. The total cash expected to be paid to Vodafone and the other expected costs of the Wireless Transaction, including financing, legal and bank fees, is expected to be financed through the incurrence of third-party indebtedness (see Note 4). The Wireless Transaction is expected to close during the first quarter of 2014.

Each of Verizon and Vodafone has made representations, warranties and covenants with respect to itself and the Wireless Transaction and, in the case of Vodafone, with respect to the Vodafone Interest and the Purchased Entities. The Stock Purchase Agreement also provides that each of Verizon and Vodafone will indemnify the other for certain losses, subject to the limits set forth therein. The closing of the Wireless Transaction is subject to the satisfaction or waiver of certain conditions, including, among others, approval by the shareholders of Verizon and Vodafone and the receipt of any required approval by the Federal Communications Commission.

The Stock Purchase Agreement contains certain termination rights for each of Verizon and Vodafone, which if exercised give rise to termination fees or expense reimbursement obligations in specified circumstances. Verizon must pay to Vodafone a termination fee of (i) \$1.55 billion in the event of termination by either party as a result of failure to obtain Verizon shareholder approval of the share issuance, (ii) \$4.65 billion in the event of termination by Vodafone as a result of a change of recommendation of the Verizon Board of Directors or (iii) \$10.0 billion in the event of a termination by Vodafone as a result of a financing failure as defined in the Stock Purchase Agreement. Vodafone must pay to Verizon a termination fee of \$1.55 billion in the event of (i) a termination by either party as a result of failure to obtain Vodafone shareholder approval of the Vodafone sale resolutions, (ii) a termination by Verizon as a result of a change of recommendation of the Vodafone Board of Directors or (iii) a termination by Vodafone as a result of a Vodafone material adverse financial effect as defined in the Stock Purchase Agreement. If the Stock Purchase Agreement is terminated by either party for a material incurable or uncured breach, the breaching party must reimburse the terminating party's out-of-pocket expenses, subject to a limit of \$1.55 billion.

In accordance with the accounting standard on consolidation, a change in a parent's ownership interest while the parent retains a controlling financial interest in its subsidiary is accounted for as an equity transaction and remeasurement of assets and liabilities of previously controlled and consolidated subsidiaries is not permitted. As a result, we will account for the Wireless Transaction by adjusting the carrying amount of the

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

noncontrolling interest to reflect the change in Verizon's ownership interest in Verizon Wireless. Any difference between the fair value of the consideration paid and the amount by which the noncontrolling interest is adjusted will be recognized in equity attributable to Verizon.

Table of Contents*Omnitel Transaction*

Verizon and Vodafone have agreed to implement the transfer of the Omnitel Interest (the Omnitel Transaction) by a subsidiary of Verizon to a subsidiary of Vodafone in connection with the Wireless Transaction pursuant to a separate share purchase agreement. The completion of the Wireless Transaction is a condition to the completion of the Omnitel Transaction. However, completion of the Omnitel Transaction is not a condition to the completion of the Wireless Transaction. If the Omnitel Transaction does not close concurrently with the Wireless Transaction, Verizon has agreed to issue a note to Seller in the amount of \$3.5 billion, which note will be surrendered to the Verizon subsidiary upon completion of the Omnitel Transaction in payment for the Omnitel Interest. Either party may terminate the Omnitel share purchase agreement if the Omnitel Transaction has not been consummated by the second anniversary of the completion of the Wireless Transaction. The Omnitel Note would mature upon such termination and may be settled in cash, Verizon common stock or a combination thereof, at Verizon's election. We expect to recognize a gain on the disposal of the Omnitel interest.

Verizon Notes

The Stock Purchase Agreement provides that the Verizon Notes will be issued pursuant to Verizon's existing indenture. The Verizon Notes will be issued in two separate series, with \$2.5 billion due on the eighth anniversary of the closing of the Wireless Transaction and \$2.5 billion due on the eleventh anniversary of the closing of the Wireless Transaction. The Verizon Notes will bear interest at a floating rate equal to three-month LIBOR, plus an agreed margin, which rate will be reset quarterly, with interest payable quarterly in arrears, beginning three months after closing of the Wireless Transaction. The indenture that will govern the Verizon Notes contains certain negative covenants, including a negative pledge covenant and a merger or similar transaction covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. An event of default for either series of the Verizon Notes may result in acceleration of the entire principal amount of all debt securities of that series. Beginning two years after the closing of the Wireless Transaction, Verizon may redeem all or any portion of the outstanding Verizon Notes held by Vodafone or any of its affiliates for a redemption price of 100% of the principal amount plus accrued and unpaid interest. The Verizon Notes may only be transferred by Vodafone to third parties in specified amounts during specified periods, commencing January 1, 2017. The Verizon Notes held by third parties will not be redeemable. Verizon has agreed to file a registration statement with respect to the Verizon Notes at least three months prior to the Verizon Notes becoming transferable.

Other Consideration

Included in the other consideration to be paid to Vodafone is the indirect assumption of long-term obligations with respect to 5.143% Class D and Class E cumulative preferred stock issued by one of the Purchased Entities. Both the Class D (825,000 shares outstanding) and Class E shares (825,000 shares outstanding) are mandatorily redeemable in April 2020 at \$1,000 per share plus any accrued and unpaid dividends. Dividends accrue at 5.143% per annum and will be treated as interest expense. Both the Class D and Class E shares will be classified as liability instruments and will be recorded at fair value as determined at the closing of the Wireless Transaction.

Spectrum License Transactions

During the first quarter of 2013, we completed license exchange transactions with T-Mobile License LLC (T-Mobile) and Cricket License Company, LLC, a subsidiary of Leap Wireless, to exchange certain Advanced Wireless Services (AWS) licenses. These non-cash exchanges include a number of intra-market swaps that will enable Verizon Wireless to make more efficient use of the AWS band. As a result of these exchanges, we received an aggregate \$0.5 billion of AWS licenses at fair value and recorded an immaterial gain.

On April 18, 2012, we announced plans to initiate an open sale process for all of our 700 MHz lower A and B block spectrum licenses, subject to the receipt of acceptable bids. We acquired these licenses as part of Federal Communications Commission (FCC) Auction 73 in 2008. On January 25, 2013, Verizon Wireless agreed to sell 39 lower 700 MHz B block spectrum licenses to AT&T Inc. (AT&T) in exchange for a payment of \$1.9 billion and the transfer by AT&T to Verizon Wireless of AWS (10 MHz) licenses in certain markets in the western United States. Verizon Wireless also agreed to sell certain lower 700 MHz B block spectrum licenses to an investment firm for a payment of \$0.2 billion. During the third quarter of 2013, after receiving the required regulatory approvals, Verizon Wireless completed these spectrum license transactions. As a result, we received \$0.5 billion of AWS licenses at fair value and we recorded a pretax gain of approximately \$0.3 billion in Selling, general and administrative expense on our condensed consolidated statements of income for the three and nine months ended September 30, 2013. We are still exploring various options regarding the 700 MHz A block licenses. We expect to deploy any licenses for which we do not enter a sale or swap transaction to meet network capacity requirements.

Table of Contents**Technology Innovation Joint Venture**

In August 2013, Verizon Wireless and affiliates of Comcast Corporation, Time Warner Cable and Bright House Networks (cable companies) dissolved the technology innovation joint venture they had formed in 2011 for the development of technology to better integrate wireline and wireless products and services. Verizon Wireless and the cable companies, together with cable provider Cox Communications, continue to market certain of each other's products under the agent agreements also entered into in 2011.

3. Wireless Licenses, Goodwill and Other Intangible Assets**Wireless Licenses**

Changes in the carrying amount of Wireless licenses are as follows:

(dollars in millions)	
Balance at January 1, 2013	\$ 77,744
Acquisitions (Note 2)	574
Dispositions (Note 2)	(2,338)
Capitalized interest on wireless licenses	419
Reclassifications, adjustments and other	104
Balance at September 30, 2013	\$ 76,503

Reclassifications, adjustments and other includes the exchange of wireless licenses completed during the first quarter of 2013. See Note 2 for additional details.

At September 30, 2013, approximately \$7.7 billion of Wireless licenses were under development for commercial service for which we were capitalizing interest costs.

Goodwill

Changes in the carrying amount of Goodwill are as follows:

(dollars in millions)		Wireless	Wireline	Total
Balance at January 1, 2013	\$ 18,172	\$ 5,967	\$ 24,139	
Acquisitions	203		203	
Reclassifications, adjustments and other		(3)	(3)	
Balance at September 30, 2013	\$ 18,375	\$ 5,964	\$ 24,339	

The increase in Goodwill at September 30, 2013 was recorded by Verizon Wireless upon obtaining control of previously unconsolidated wireless partnerships, which were previously accounted for under the equity method and are now consolidated. This resulted in an immaterial gain recorded during the nine months ended September 30, 2013.

Table of Contents**Other Intangible Assets**

The following table displays the composition of Other intangible assets, net:

(dollars in millions)	At September 30, 2013			At December 31, 2012		
	Gross Accumulated Amount	Amortization	Net Amount	Gross Accumulated Amount	Amortization	Net Amount
Customer lists (6 to 13 years)	\$ 3,592	\$ (2,589)	\$ 1,003	\$ 3,556	\$ (2,338)	\$ 1,218
Non-network internal-use software (3 to 7 years)	11,366	(7,015)	4,351	10,415	(6,210)	4,205
Other (2 to 25 years)	736	(358)	378	802	(292)	510
Total	\$ 15,694	\$ (9,962)	\$ 5,732	\$ 14,773	\$ (8,840)	\$ 5,933

The amortization expense for Other intangible assets was as follows:

(dollars in millions)	Three Months Ended September 30,	Nine Months Ended September 30,
2013	\$ 398	\$ 1,183
2012	384	1,112

Estimated annual amortization expense for Other intangible assets is as follows:

Years	(dollars in millions)
2013	\$ 1,574
2014	1,404
2015	1,154
2016	914

4. Debt

Changes to debt during the nine months ended September 30, 2013 are as follows:

(dollars in millions)	Debt Maturing within One Year	Long-term Debt	Total
Balance at January 1, 2013	\$ 4,369	\$ 47,618	\$ 51,987
Proceeds from long-term borrowings		49,166	49,166
Repayments of long-term borrowings and capital leases obligations	(2,142)	(250)	(2,392)
Decrease in short-term obligations, excluding current maturities	(324)		(324)
Reclassifications of long-term debt	6,045	(6,045)	
Other	254	449	703
Balance at September 30, 2013	\$ 8,202	\$ 90,938	\$ 99,140

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

During March 2013, we issued \$0.5 billion aggregate principal amount of floating rate Notes due 2015 in a private placement resulting in cash proceeds of approximately \$0.5 billion, net of discounts and issuance costs. The proceeds were used for the repayment of commercial paper.

During April 2013, \$1.25 billion of 5.25% Verizon Communications Notes matured and were repaid. During May 2013, \$0.1 billion of 7.0% Verizon New York Inc. Debentures matured and were repaid. During June 2013, \$0.5 billion of 4.375% Verizon Communications Notes and \$0.1 billion of 7.0% Verizon New York Inc. Debentures matured and were repaid. In addition, during June 2013, we redeemed \$0.25 billion of 7.15% Verizon Maryland LLC Debentures at a redemption price of 100% of the principal amount of the debentures.

Table of Contents

During September 2013, in connection with the Wireless Transaction, we issued \$49.0 billion aggregate principal amount of fixed and floating rate notes resulting in cash proceeds of approximately \$48.7 billion, net of discounts and issuance costs. The issuances consisted of the following: \$2.25 billion aggregate principal amount of floating rate Notes due 2016 that bear interest at a rate equal to three-month LIBOR plus 1.53% which rate will be reset quarterly, \$1.75 billion aggregate principal amount of floating rate Notes due 2018 that bear interest at a rate equal to three-month LIBOR plus 1.75% which rate will be reset quarterly, \$4.25 billion aggregate principal amount of 2.50% Notes due 2016, \$4.75 billion aggregate principal amount of 3.65% Notes due 2018, \$4.0 billion aggregate principal amount of 4.50% Notes due 2020, \$11.0 billion aggregate principal amount of 5.15% Notes due 2023, \$6.0 billion aggregate principal amount of 6.40% Notes due 2033 and \$15.0 billion aggregate principal amount of 6.55% Notes due 2043 (collectively, the new notes). The proceeds of the new notes will be used to finance, in part, the Wireless Transaction and to pay related fees and expenses. In the event that (i) the Wireless Transaction is not completed on or prior to September 2, 2014 or (ii) the Stock Purchase agreement is terminated on or prior to such date, we are required to redeem each series of new notes at 101% of the aggregate principal amount of such series, plus accrued and unpaid interest. As a result of the issuance of the new notes, we incurred interest expense related to the Wireless Transaction of \$0.1 billion during the three and nine months ended September 30, 2013.

During October 2013, \$0.3 billion of 4.75% Verizon New England Inc. Debentures matured and were repaid.

Term Loan Agreement

During October 2013, we entered into a term loan agreement with a group of major financial institutions pursuant to which we may draw up to \$12.0 billion to finance, in part, the Wireless Transaction and to pay transaction costs. Half of any loans under the term loan agreement will have a maturity of three years and the other half will have a maturity of five years (the 5-Year Loans). The 5-Year Loans will provide for the partial amortization of principal during the last two years that they are outstanding. Loans under the term loan agreement will bear interest at floating rates. The term loan agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. In addition, the term loan agreement requires us to maintain a leverage ratio (as defined in the term loan agreement) not in excess of 3.50:1.00, until our credit ratings reach a certain level.

As a result of our entry into additional debt agreements to finance the Wireless Transaction, we expect to incur fees of approximately \$0.7 billion, which includes fees associated with the bridge credit agreement noted below.

Bridge Credit Agreement

During September 2013, we entered into a \$61.0 billion bridge credit agreement with a group of major financial institutions. The credit agreement provided us with the ability to borrow up to \$61.0 billion to finance, in part, the Wireless Transaction and to pay related transaction costs. Following the September 2013 issuance of the notes described above, borrowing availability under the bridge credit agreement was reduced to \$12.0 billion. Following the effectiveness of the term loan agreement in October 2013, as described above, the bridge credit agreement was terminated in accordance with its terms and as such, the related fees of \$0.2 billion will be recognized in the fourth quarter of 2013.

Other Credit Facilities

On August 13, 2013, we amended our \$6.2 billion credit facility with a group of major financial institutions to extend the maturity date to August 12, 2017. As of September 30, 2013, the unused borrowing capacity under this credit facility was approximately \$6.1 billion.

During October 2013, we entered into a \$2.0 billion 364-day revolving credit agreement with a group of major financial institutions. Although effective as of October 2013, we may not draw on this revolving credit agreement prior to the completion of the Wireless Transaction. We may use borrowings under the 364-day credit agreement for general corporate purposes. The 364-day revolving credit agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. In addition, this agreement requires us to maintain a leverage ratio (as defined in the agreement) not in excess of 3.50:1.00, until our credit ratings reach a certain level.

Early Debt Redemption

During October 2013, we announced that our subsidiary, Verizon New York Inc., will redeem the entire outstanding principal amount of its \$0.3 billion 6.70% Debentures due November 1, 2023. The redemption date for the securities will be November 18, 2013 (the Redemption Date). The redemption price will be equal to 100% of the principal amount of these securities, plus accrued and unpaid interest to the Redemption Date, and

will be payable on the Redemption Date.

Table of Contents*Guarantees*

We guarantee the debentures and first mortgage bonds of our operating telephone company subsidiaries. As of September 30, 2013, \$3.8 billion principal amount of these obligations remain outstanding. Each guarantee will remain in place for the life of the obligation unless terminated pursuant to its terms, including the operating telephone company no longer being a wholly-owned subsidiary of Verizon.

We also guarantee the debt obligations of GTE Corporation that were issued and outstanding prior to July 1, 2003. As of September 30, 2013, \$1.7 billion principal amount of these obligations remain outstanding.

Debt Covenants

We and our consolidated subsidiaries are in compliance with all of our debt covenants.

5. Fair Value Measurements

The following table presents the balances of assets and liabilities measured at fair value on a recurring basis as of September 30, 2013:

(dollars in millions)	Level 1 ⁽¹⁾	Level 2 ⁽²⁾	Level 3 ⁽³⁾	Total
Assets:				
Cash and cash equivalents:				
Fixed income securities	\$ 3,000	\$	\$	\$ 3,000
Short-term investments:				
Equity securities	367			367
Fixed income securities		264		264
Other current assets:				
Interest rate swaps		16		16
Other assets:				
Fixed income securities		885		885
Cross currency swaps		142		142
Total	\$ 3,367	\$ 1,307	\$	\$ 4,674

⁽¹⁾ quoted prices in active markets for identical assets or liabilities

⁽²⁾ observable inputs other than quoted prices in active markets for identical assets and liabilities

⁽³⁾ no observable pricing inputs in the market

Equity securities consist of investments in common stock of domestic and international corporations measured using quoted prices in active markets.

Fixed income securities consist primarily of investments in U.S. Treasuries, as well as municipal bonds. We use quoted prices in active markets for our U.S. Treasury securities, and therefore these securities are classified as Level 1. For all other fixed income securities that do not have quoted prices in active markets, we use alternative matrix pricing resulting in these debt securities being classified as Level 2.

Derivative contracts are valued using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified within Level 2. We use mid-market pricing for fair value measurements of our derivative instruments. Our derivative instruments are recorded on a gross basis.

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

We recognize transfers between levels of the fair value hierarchy as of the end of the reporting period. There were no transfers within the fair value hierarchy during the nine months ended September 30, 2013.

Fair Value of Short-term and Long-term Debt

The fair value of our debt is determined using various methods, including quoted prices for identical terms and maturities, which is a Level 1 measurement, as well as quoted prices for similar terms and maturities in inactive markets and future cash flows discounted at current rates, which are Level 2 measurements. The fair value of our short-term and long-term debt, excluding capital leases, was as follows:

(dollars in millions)	At September 30, 2013		At December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Short- and long-term debt, excluding capital leases	\$ 98,839	\$ 107,401	\$ 51,689	\$ 61,552

Table of Contents

Derivative Instruments

We enter into derivative transactions to manage our exposure to fluctuations in foreign currency exchange rates, interest rates, and equity and commodity prices. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, foreign currency and prepaid forwards and collars, interest rate swap agreements, commodity swap and forward agreements and interest rate locks. We do not hold derivatives for trading purposes.

We measure all derivatives, including derivatives embedded in other financial instruments, at fair value and recognize them as either assets or liabilities on our condensed consolidated balance sheets. Changes in the fair values of derivative instruments not qualifying as hedges or any ineffective portion of hedges are recognized in earnings in the current period. Changes in the fair values of derivative instruments used effectively as fair value hedges are recognized in earnings, along with changes in the fair value of the hedged item. Changes in the fair value of the effective portions of cash flow hedges are reported in Other comprehensive income (loss) and recognized in earnings when the hedged item is recognized in earnings.

Interest Rate Swaps

We have entered into domestic interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates based on the London Interbank Offered Rate, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against changes in the fair value of our debt portfolio. We record the interest rate swaps at fair value on our condensed consolidated balance sheets as assets and liabilities. During the second quarter of 2013, interest rate swaps with a notional value of \$1.25 billion matured and the impact to our condensed consolidated financial statements was not material. During the third quarter of 2013, we entered into interest rate swaps with a notional value of \$1.8 billion. The fair value of these contracts was not material at September 30, 2013 and December 31, 2012, respectively. As of September 30, 2013, the total notional amount of the interest rate swaps was \$1.8 billion.

Cross Currency Swaps

Verizon Wireless previously entered into cross currency swaps designated as cash flow hedges to exchange approximately \$1.6 billion of British Pound Sterling and Euro-denominated debt into U.S. dollars and to fix our future interest and principal payments in U.S. dollars, as well as to mitigate the effect of foreign currency transaction gains or losses. A portion of the gains and losses recognized in Other comprehensive income (loss) was reclassified to Other income, net to offset the related pretax foreign currency transaction gain or loss on the underlying debt obligations. The fair value of the outstanding swaps was \$0.1 billion at September 30, 2013 and was not material at December 31, 2012. During the three and nine months ended September 30, 2013, a pretax gain of \$0.1 billion and an immaterial pretax loss, respectively, were recognized in Other comprehensive income (loss). During the three and nine months ended September 30, 2012, the pretax gains recognized in Other comprehensive income (loss) were not material.

6. Stock-Based Compensation

Verizon Communications Long-Term Incentive Plan

The Verizon Communications Inc. Long-Term Incentive Plan (the Plan) permits the granting of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance stock units and other awards. The maximum number of shares available for awards from the Plan is 119.6 million shares.

Restricted Stock Units

The Plan provides for grants of Restricted Stock Units (RSUs) that generally vest at the end of the third year after the grant. The RSUs are classified as equity awards because the RSUs will be paid in Verizon common stock upon vesting. The RSU equity awards are measured using the grant date fair value of Verizon common stock and are not remeasured at the end of each reporting period. Dividend equivalent units are also paid to participants at the time the RSU award is paid, and in the same proportion as the RSU award.

Performance Stock Units

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

The Plan also provides for grants of Performance Stock Units (PSUs) that generally vest at the end of the third year after the grant. As defined by the Plan, the Human Resources Committee of the Board of Directors determines the number of PSUs a participant earns based on the extent to which the corresponding performance goals have been achieved over the three-year performance cycle. The PSUs are classified as liability awards because the PSU awards are paid in cash upon vesting. The PSU

Table of Contents

award liability is measured at its fair value at the end of each reporting period and, therefore, will fluctuate based on the price of Verizon common stock as well as performance relative to the targets. Dividend equivalent units are also paid to participants at the time that the PSU award is determined and paid, and in the same proportion as the PSU award.

The following table summarizes the Restricted Stock Unit and Performance Stock Unit activity:

(shares in thousands)	Restricted Stock Units	Performance Stock Units
Outstanding, beginning of year	18,669	39,463
Granted	4,739	7,182
Payments	(7,237)	(22,703)
Cancelled/Forfeited	(122)	(436)
Outstanding, September 30, 2013	16,049	23,506

As of September 30, 2013, unrecognized compensation expense related to the unvested portion of outstanding RSUs and PSUs was approximately \$0.5 billion and is expected to be recognized over approximately two years.

The RSUs granted in 2013 have a weighted-average grant date fair value of \$47.96 per unit.

7. Employee Benefits

We maintain non-contributory defined benefit pension plans for many of our employees. In addition, we maintain postretirement health care and life insurance plans for our retirees and their dependents, which are both contributory and non-contributory, and include a limit on our share of the cost for certain recent and future retirees. In accordance with our accounting policy for pension and other postretirement benefits, operating expenses include pension and benefit related credits and/or charges based on actuarial assumptions, including projected discount rates and an estimated return on plan assets. These estimates are updated in the fourth quarter to reflect actual return on plan assets and updated actuarial assumptions. The adjustment will be recognized in the income statement during the fourth quarter or upon a remeasurement event pursuant to our accounting policy for the recognition of actuarial gains and losses.

Net Periodic Benefit Cost

The following table summarizes the benefit (income) cost related to our pension and postretirement health care and life insurance plans:

(dollars in millions)	Pension		Health Care and Life	
Three Months Ended September 30,	2013	2012	2013	2012
Service cost	\$ 99	\$ 89	\$ 79	\$ 92
Amortization of prior service cost (credit)	2	(1)	(62)	(8)
Subtotal	101	88	17	84
Expected return on plan assets	(311)	(442)	(36)	(44)
Interest cost	251	362	273	327
Net periodic benefit cost	\$ 41	\$ 8	\$ 254	\$ 367

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

(dollars in millions)

	Pension		Health Care and Life	
Nine Months Ended September 30,	2013	2012	2013	2012
Service cost	\$ 296	\$ 268	\$ 238	\$ 277
Amortization of prior service cost (credit)	5	(3)	(185)	(26)
Subtotal	301	265	53	251
Expected return on plan assets	(933)	(1,327)	(108)	(129)
Interest cost	752	1,086	821	980
Subtotal	120	24	766	1,102
Remeasurement (gain) loss, net	(237)			
Net periodic benefit (income) cost	\$ (117)	\$ 24	\$ 766	\$ 1,102

Table of Contents**Pension Remeasurement**

During the second quarter of 2013, we recorded net pretax pension remeasurement credits of approximately \$0.2 billion, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur. The pension remeasurement credits relate to settlements for employees who received lump-sum distributions. The credits were primarily driven by an approximately 75 basis point increase in our discount rate assumption used to determine the current year liabilities of one of our pension plans. The change in discount rate resulted in a gain of \$0.3 billion, partially offset by a loss resulting from the difference between our expected return on assets assumption of 7.5% at December 31, 2012 and our annualized actual return on assets of 7.2% at June 30, 2013, as well as other losses (\$0.1 billion). Our weighted-average discount rate assumption increased from 4.2% at December 31, 2012 to 5.0% at June 30, 2013.

During the three months ended September 30, 2013, as a result of the settlements noted above, we performed a pension remeasurement in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur. This remeasurement was not material to our condensed consolidated statement of income for the period.

Severance Payments

During the three and nine months ended September 30, 2013, we paid severance benefits of \$0.1 billion and \$0.3 billion, respectively. At September 30, 2013, we had a remaining severance liability of \$0.7 billion, a portion of which includes future contractual payments to employees separated as of September 30, 2013.

Employer Contributions

During the three and nine months ended September 30, 2013, we contributed \$0.4 billion and \$1.1 billion to our other postretirement benefit plans, respectively. The contributions to our qualified pension plans were not material during the three and nine months ended September 30, 2013. During the three and nine months ended September 30, 2013, we contributed an immaterial amount and \$0.1 billion to our nonqualified pension plans, respectively. There have been no material changes to the estimated qualified and nonqualified pension contributions in 2013 as previously disclosed in Part II. Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2012.

8. Equity and Accumulated Other Comprehensive Income**Equity**

Changes in the components of Total equity were as follows:

(dollars in millions)	Attributable to Verizon	Noncontrolling Interests	Total Equity
Balance at January 1, 2013	\$ 33,157	\$ 52,376	\$ 85,533
Net income	6,430	9,201	15,631
Other comprehensive loss	(117)	(11)	(128)
Comprehensive income	6,313	9,190	15,503
Contributed capital	(72)		(72)
Dividends declared	(4,464)		(4,464)
Common stock in treasury	101		101
Distributions and other	(50)	(6,286)	(6,336)

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Balance at September 30, 2013	\$ 34,985	\$ 55,280	\$ 90,265
--------------------------------------	-----------	-----------	-----------

Noncontrolling interests included in our condensed consolidated financial statements primarily consist of Vodafone's 45% ownership interest in Verizon Wireless.

Table of Contents*Common Stock*

During the first quarter of 2013, Verizon purchased approximately 3.5 million shares under our authorized share buyback program for approximately \$0.2 billion. At September 30, 2013, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 96.5 million.

Special Distribution

In May 2013, the Board of Representatives of Verizon Wireless declared a distribution to its owners, which was paid in the second quarter of 2013 in proportion to their partnership interests on the payment date, in the aggregate amount of \$7.0 billion. As a result, Vodafone received a cash payment of \$3.15 billion and the remainder of the distribution was received by Verizon.

Accumulated Other Comprehensive Income

The changes in the balances of Accumulated other comprehensive income by component are as follows:

	Unrealized loss on cash		Unrealized Defined benefit loss on pension and flow marketable postretirement securities plans		Total
(dollars in millions)	Foreign currency translation adjustments	hedges	loss on securities	pension and postretirement plans	
Balance at January 1, 2013	\$ 793	\$ 88	\$ 101	\$ 1,253	\$ 2,235
Other comprehensive income	4		12		16
Amounts reclassified to net income		(12)	(13)	(108)	(133)
Net other comprehensive income (loss)	4	(12)	(1)	(108)	(117)
Balance at September 30, 2013	\$ 797	\$ 76	\$ 100	\$ 1,145	\$ 2,118

The amounts presented above in net other comprehensive income (loss) are net of taxes and noncontrolling interests, which are not significant. For the nine months ended September 30, 2013, the amounts reclassified to net income related to defined benefit pension and postretirement plans in the table above are included in Cost of services and sales and Selling, general and administrative expense on our condensed consolidated statements of income. For the nine months ended September 30, 2013, all other amounts reclassified to net income in the table above are included in Other income, net on our condensed consolidated statements of income.

Table of Contents**9. Segment Information****Reportable Segments**

We have two reportable segments, which we operate and manage as strategic business units and organize by products and services. We measure and evaluate our reportable segments based on segment operating income, consistent with the chief operating decision maker's assessment of segment performance.

Corporate, eliminations and other includes unallocated corporate expenses, intersegment eliminations recorded in consolidation, the results of other businesses, such as our investments in unconsolidated businesses, pension and other employee benefit related costs, lease financing, as well as other adjustments and gains and losses that are not allocated in assessing segment performance due to their non-operational nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses that are not individually significant are included in all segment results as these items are included in the chief operating decision maker's assessment of segment performance.

Our segments and their principal activities consist of the following:

Segment	Description
Wireless	Wireless communications products and services include wireless voice and data services and equipment sales, which are provided to consumer, business and government customers across the United States.
Wireline	Wireline's voice, data and video communications products and enhanced services include local and long distance voice, broadband Internet access and video, corporate networking solutions, data center and cloud services and security and managed network services. We provide these products and services to consumers in the United States, as well as to carriers, businesses and government customers both in the United States and in over 150 other countries around the world.

Table of Contents

Interest expense	(555)	(632)	(1,606)	(1,996)
Income Before Provision For Income Taxes	\$ 6,612	\$ 4,923	\$ 18,517	\$ 14,633

We generally account for intersegment sales of products and services and asset transfers at current market prices. No single customer accounted for more than 10% of our total operating revenues during the three and nine months ended September 30, 2013 and 2012.

10. Commitments and Contingencies

In the ordinary course of business Verizon is involved in various commercial litigation and regulatory proceedings at the state and federal level. Where it is determined, in consultation with counsel based on litigation and settlement risks, that a loss is probable and estimable in a given matter, the Company establishes an accrual. In none of the currently pending matters is the amount of accrual material. An estimate of the reasonably possible loss or range of loss in excess of the amounts already accrued cannot be made at this time due to various factors typical in contested proceedings, including (1) uncertain damage theories and demands; (2) a less than complete factual record; (3) uncertainty concerning legal theories and their resolution by courts or regulators; and (4) the unpredictable nature of the opposing party and its demands. We continuously monitor these proceedings as they develop and adjust any accrual or disclosure as needed. We do not expect that the ultimate resolution of any pending regulatory or legal matter in future periods, including the Hicksville matter described below, will have a material effect on our financial condition, but it could have a material effect on our results of operations for a given reporting period.

During 2003, under a government-approved plan, remediation commenced at the site of a former Sylvania facility in Hicksville, New York that processed nuclear fuel rods in the 1950s and 1960s. Remediation beyond original expectations proved to be necessary and a reassessment of the anticipated remediation costs was conducted. A reassessment of costs related to remediation efforts at several other former facilities was also undertaken. In September 2005, the Army Corps of Engineers (ACE) accepted the Hicksville site into the Formerly Utilized Sites Remedial Action Program. This may result in the ACE performing some or all of the remediation effort for the Hicksville site with a corresponding

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

decrease in costs to Verizon. To the extent that the ACE assumes responsibility for remedial work at the Hicksville site, an adjustment to a reserve previously established for the remediation may be made. Adjustments to the reserve may also be made based upon actual conditions discovered during the remediation at this or any other site requiring remediation.

Verizon is currently involved in approximately 50 federal district court actions alleging that Verizon is infringing various patents. Most of these cases are brought by non-practicing entities and effectively seek only monetary damages; a small number are

Table of Contents

brought by companies that have sold products and seek injunctive relief as well. These cases have progressed to various stages and a small number may go to trial in the coming 12 months if they are not otherwise resolved. In the third quarter of 2012, we settled a number of patent litigation matters, including cases with ActiveVideo Networks Inc. (ActiveVideo) and TiVo Inc. (TiVo). In connection with the settlements with ActiveVideo and TiVo, we recorded a charge of \$0.4 billion in the third quarter of 2012 and will pay and recognize over the following six years an additional \$0.2 billion.

In connection with the execution of agreements for the sales of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as indemnity from certain financial losses. From time to time, counterparties may make claims under these provisions, and Verizon will seek to defend against those claims and resolve them in the ordinary course of business.

Subsequent to the sale of Verizon Information Services Canada in 2004, we continue to provide a guarantee to publish directories, which was issued when the directory business was purchased in 2001 and had a 30-year term (before extensions). The preexisting guarantee continues, without modification, despite the subsequent sale of Verizon Information Services Canada and the spin-off of our domestic print and Internet yellow pages directories business. The possible financial impact of the guarantee, which is not expected to be adverse, cannot be reasonably estimated as a variety of the potential outcomes available under the guarantee result in costs and revenues or benefits that may offset each other. We do not believe performance under the guarantee is likely.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, information and entertainment products and services to consumers, businesses and governmental agencies with a presence in over 150 countries around the world. Our offerings, designed to meet customers' demand for speed, mobility, security and control, include voice, data and video services on our wireless and wireline networks. We have two reportable segments, Wireless and Wireline. Our wireless business, operating as Verizon Wireless, provides voice and data services and equipment sales across the United States using one of the most extensive and reliable wireless networks. Our wireline business provides consumer, business and government customers with communications products and services, including voice, broadband data and video services, network access, long distance and other communications products and services, and also owns and operates one of the most expansive end-to-end global Internet Protocol (IP) networks. We have a highly skilled, diverse and dedicated workforce of approximately 178,300 employees as of September 30, 2013.

In recent years, Verizon has embarked upon a strategic transformation as advances in technology have changed the ways that our customers interact in their personal and professional lives and that businesses operate. To meet the changing needs of our customers and the changing technological landscape, we are focusing our efforts around higher margin and growing areas of our business: wireless data, wireline data and Strategic services, including cloud computing services.

Our strategy requires significant capital investments primarily to acquire wireless spectrum, put the spectrum into service, expand the fiber optic network that supports our wireless and wireline businesses, maintain our wireless and wireline networks and develop and maintain significant advanced database capacity.

In our Wireless business, during the three months ended September 30, 2013 compared to the similar period in 2012, revenue growth of 7.2% was driven by connection growth and the demand for smartphones and Internet data devices. At September 30, 2013, we experienced a 5.3% increase in retail postpaid connections as compared to September 30, 2012, with smartphones representing 67.2% of our retail postpaid phone base at September 30, 2013. Also during the three months ended September 30, 2013, postpaid smartphone activations represented 84.9% of phones activated compared to 77.3% in the similar period in 2012.

Our fourth-generation (4G) Long-Term Evolution (LTE) network covers our existing 3G network footprint. Our 4G LTE network is available in more than 500 markets to approximately 97% of the U.S. population and covers approximately 303 million people, including those in areas served by our LTE in Rural America partners. Our 4G LTE network provides higher data throughput performance for data services at lower cost compared to those offered by 3G technologies. On August 25, 2013, we launched the new Verizon Edge device payment plan option which allows customers to trade in their phone for a new phone as often as every six months, subject to certain conditions. In September 2013, over 63% of our total data traffic was carried on our 4G LTE network.

In Wireline, during the three months ended September 30, 2013 compared to the similar period in 2012, the 1.0% overall decline in revenue was primarily due to declines in Global Enterprise Core and Global Wholesale, partially offset by revenue increases in Consumer retail driven by FiOS services and Strategic services within Global Enterprise. FiOS represented approximately 72% of Consumer retail revenue during the three months ended September 30, 2013 compared to approximately 66% during the similar period in 2012. As the FiOS products mature, we continue to seek ways to increase incremental revenue and further realize operating and capital efficiencies as well as maximize profitability. As more applications are developed for this high-speed service, we expect that FiOS will become a hub for managing multiple home services that will eventually be part of the digital grid, including not only entertainment and communications, but also machine-to-machine communications, such as home monitoring, home health care, energy management and utilities management.

Also positively contributing to Wireline's revenues during the three months ended September 30, 2013 was a 5.2% increase in Strategic services revenue, which represented 58% of total Global Enterprise revenues. However, total Global Enterprise and Global Wholesale revenues declined as customers continue to be adversely affected by the economy, resulting in delayed discretionary spending and delayed purchasing decisions. To compensate for the shrinking market for traditional voice service, we continue to build our Wireline segment around data, video and advanced business services' areas where demand for reliable high-speed connections is growing.

During the first quarter of 2013, we completed license exchange transactions with T-Mobile License LLC (T-Mobile) and Cricket License Company, LLC, a subsidiary of Leap Wireless, to exchange certain Advanced Wireless Services (AWS) licenses. These non-cash exchanges include a number of intra-market swaps that will enable Verizon Wireless to make more efficient use of the AWS band. As a result of these exchanges, we received an aggregate \$0.5 billion of AWS licenses at fair value and recorded an immaterial gain.

Table of Contents

On April 18, 2012, we announced plans to initiate an open sale process for all of our 700 MHz lower A and B block spectrum licenses, subject to the receipt of acceptable bids. We acquired these licenses as part of Federal Communications Commission (FCC) Auction 73 in 2008. On January 25, 2013, Verizon Wireless agreed to sell 39 lower 700 MHz B block spectrum licenses to AT&T Inc. (AT&T) in exchange for a payment of \$1.9 billion and the transfer by AT&T to Verizon Wireless of AWS (10 MHz) licenses in certain markets in the western United States. Verizon Wireless also agreed to sell certain lower 700 MHz B block spectrum licenses to an investment firm for a payment of \$0.2 billion. During the third quarter of 2013, after receiving the required regulatory approvals, Verizon Wireless completed these spectrum license transactions. As a result, we received \$0.5 billion of AWS licenses at fair value and we recorded a pretax gain of approximately \$0.3 billion in Selling, general and administrative expense on our condensed consolidated statements of income for the three and nine months ended September 30, 2013. We are still exploring various options regarding the 700 MHz A block licenses. We expect to deploy any licenses for which we do not enter a sale or swap transaction to meet network capacity requirements.

On September 2, 2013, we announced that we had entered into a definitive agreement to acquire Vodafone Group Plc's (Vodafone) indirect 45% interest in Celco Partnership d/b/a Verizon Wireless for consideration totaling approximately \$130 billion. The consideration to be paid will be primarily comprised of cash and Verizon common stock, as well as other consideration. See [Acquisitions and Divestitures](#) for additional information.

Investing in innovative technology like wireless networks, high-speed fiber and cloud services has positioned Verizon at the center of the growth trends of the future. By investing in our own capabilities, we are also investing in the markets we serve by making sure our communities have an efficient, reliable infrastructure for competing in the information economy. We are committed to putting our customers first and being a responsible member of our communities. Guided by this commitment and by our core values of integrity, respect, performance excellence and accountability, we believe we are well-positioned to produce a long-term return for our shareowners, create meaningful work for ourselves and provide something of lasting value for society.

Trends

Our 2013 capital program includes capital to fund advanced networks and services, including 4G LTE and FiOS, the continued expansion of our core networks, including IP and data center enhancements, maintenance and support for our legacy voice networks and other expenditures to drive operating efficiencies. The level and the timing of the Company's capital expenditures within these broad categories can vary significantly as a result of a variety of factors outside our control, including, for example, material weather events. We believe that we have significant discretion over the amount and timing of our capital expenditures on a Company-wide basis as we are not subject to any agreement that would require significant capital expenditures on a designated schedule or upon the occurrence of designated events. Previously, we expected our full year capital expenditures for 2013 to be consistent with 2012. During 2013, strong connections growth driven by 4G LTE and our Share Everything® plans has resulted in expectations for higher demand, and for this reason, we now expect capital expenditures during 2013 to be approximately \$16.6 billion.

There have been no significant changes to the information related to trends affecting our business that was disclosed in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2012, except to the extent described above.

Table of Contents**Consolidated Results of Operations**

In this section, we discuss our overall results of operations and highlight items of a non-operational nature that are not included in our segment results. We have two reportable segments, Wireless and Wireline, which we operate and manage as strategic business units and organize by products and services. In Segment Results of Operations, we review the performance of our two reportable segments.

Corporate, eliminations and other includes unallocated corporate expenses such as certain pension and other employee benefit related costs, intersegment eliminations recorded in consolidation, the results of other businesses such as our investments in unconsolidated businesses, lease financing and other adjustments and gains and losses that are not allocated in assessing segment performance due to their non-operational nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses that are not individually significant are included in all segment results as these items are included in the chief operating decision maker's assessment of segment performance. We believe that this presentation assists users of our financial statements in better understanding our results of operations and trends from period to period.

Consolidated Revenues

(dollars in millions)	Three Months Ended				Nine Months Ended			
	September 30,		Increase/		September 30,		Increase/	
	2013	2012	(Decrease)		2013	2012	(Decrease)	
Wireless								
Service revenue	\$ 17,516	\$ 16,154	\$ 1,362	8.4%	\$ 51,322	\$ 47,340	\$ 3,982	8.4%
Equipment and other	2,883	2,870	13	0.5	8,576	8,534	42	0.5
Total	20,399	19,024	1,375	7.2	59,898	55,874	4,024	7.2
Wireline								
Mass Markets	4,359	4,225	134	3.2	12,890	12,473	417	3.3
Global Enterprise	3,668	3,781	(113)	(3.0)	11,057	11,453	(396)	(3.5)
Global Wholesale	1,669	1,782	(113)	(6.3)	5,082	5,470	(388)	(7.1)
Other	118	126	(8)	(6.3)	349	394	(45)	(11.4)
Total	9,814	9,914	(100)	(1.0)	29,378	29,790	(412)	(1.4)
Corporate, eliminations and other	66	69	(3)	(4.3)	209	137	72	52.6
Consolidated Revenues	\$ 30,279	\$ 29,007	\$ 1,272	4.4	\$ 89,485	\$ 85,801	\$ 3,684	4.3

The increase in consolidated revenues during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 was primarily due to higher revenues at Wireless, as well as higher Mass Markets revenues driven by FiOS services and increased Strategic services revenues within Global Enterprise at our Wireline segment. Partially offsetting these increases were lower Global Enterprise Core and Global Wholesale revenues at our Wireline segment.

Wireless revenues increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to growth in service revenue. Service revenue increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily driven by higher retail postpaid service revenue, which increased largely as a result of an increase in retail postpaid connections as well as the continued increase in penetration of smartphones, tablets and other Internet devices through our Share Everything® plans. During the three months ended September 30, 2013, retail postpaid connection net additions decreased compared to the similar period in 2012 primarily due to an increase in our retail postpaid connection churn rate and a decrease in retail postpaid connection gross additions. During the nine months ended September 30, 2013, retail postpaid connection net additions decreased compared to the similar period in 2012 primarily due to an increase in our retail postpaid connection churn rate, partially offset by an increase in retail postpaid connection gross additions. Retail postpaid connections per account increased as of September 30, 2013 compared to September 30, 2012, primarily due to the increased penetration of tablets and other Internet devices.

Wireline's revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily driven by declines in Global Enterprise Core and Global Wholesale, partially offset by higher Mass Markets revenues driven by FiOS services and increased Strategic services revenues within Global Enterprise.

Table of Contents

Mass Markets revenues increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to the expansion of FiOS services (Voice, Internet and Video), partially offset by the continued decline of local exchange revenues. During the nine months ended September 30, 2013 compared to the similar period in 2012, Mass Markets revenues also increased due to changes in our pricing strategies adopted in the third quarter of 2012.

Global Enterprise revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to a decline in Core customer premise equipment revenues and lower voice services and data networking revenues. This decrease was partially offset by higher Strategic services revenues, primarily due to growth in advanced services, such as contact center solutions, IP communications and our cloud and data center offerings. During the three months ended September 30, 2013 compared to the similar period in 2012, the increase in Strategic services revenues was also due to growth in professional services. During the nine months ended September 30, 2013 compared to the similar period in 2012, the increase in Strategic services revenues included revenue from a telematics services business that we acquired in the third quarter of 2012.

Global Wholesale revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to a decline in traditional voice revenues as a result of decreased minutes of use (MOUs) and a decline in domestic wholesale connections, partially offset by continuing demand for high-speed digital data services from fiber-to-the-cell customers upgrading their core data circuits to Ethernet facilities as well as Ethernet migrations from other core customers.

Other revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to reduced volumes outside of our network footprint.

Consolidated Operating Expenses

(dollars in millions)	Three Months Ended		Increase/ (Decrease)		Nine Months Ended		Increase/ (Decrease)	
	September 30, 2013	September 30, 2012			September 30, 2013	September 30, 2012		
Cost of services and sales	\$ 10,960	\$ 10,991	\$ (31)	(0.3)%	\$ 32,925	\$ 33,206	\$ (281)	(0.8)%
Selling, general and administrative expense	8,037	8,366	(329)	(3.9)	24,232	23,943	289	1.2
Depreciation and amortization expense	4,154	4,167	(13)	(0.3)	12,423	12,323	100	0.8
Consolidated Operating Expenses	\$ 23,151	\$ 23,524	\$ (373)	(1.6)	\$ 69,580	\$ 69,472	\$ 108	0.2

Cost of Services and Sales

Cost of services and sales decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to decreases in network connection costs, costs for data services and data roaming at our Wireless segment, as well as decreases in costs related to customer premise equipment and a decline in access costs at our Wireline segment. Partially offsetting these decreases were higher content costs associated with continued FiOS subscriber growth and vendor rate increases at our Wireline segment, as well as increases in cost of equipment sales and cost of network services at our Wireless segment.

Selling, General and Administrative Expense

Selling, general and administrative expense decreased during the three months ended September 30, 2013 compared to the similar period in 2012 primarily due to the non-operational items noted in the table below as well as declines in employee costs at our Wireline segment. Partially offsetting these decreases was higher sales commission expense at our Wireless segment.

Selling, general and administrative expense increased during the nine months ended September 30, 2013 compared to the similar period in 2012 primarily due to higher sales commission expense at our Wireless segment and higher transaction and property tax expenses at our Wireline segment, partially offset by the non-operational items noted in the table below and declines in employee costs at our Wireline segment.

Depreciation and Amortization Expense

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Depreciation and amortization expense decreased during the three months ended September 30, 2013 compared to the similar periods in 2012 primarily due to decreases in net depreciable assets and amortization expense related to customer lists at our Wireline segment, partially offset by increases in net depreciable assets at our Wireless segment as well as an increase in amortization expense related to non-network software and other intangible assets at our Wireline segment.

Table of Contents

Depreciation and amortization expense increased during the nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to an increase in net depreciable assets at our Wireless segment and an increase in amortization expense related to non-network software and other intangible assets at our Wireline segment, partially offset by a decline in net depreciable assets and lower amortization expense related to customer lists at our Wireline segment.

Non-operational Credits (Charges)

Non-operational credits (charges) included in operating expenses were as follows:

(dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Gain on spectrum license transactions	\$ 278	\$	\$ 278	\$
Pension remeasurement			237	
Litigation settlements		(384)		(384)

See **Other Items** for a description of non-operational items.

Consolidated Operating Income and EBITDA

Consolidated earnings before interest, taxes, depreciation and amortization expenses (Consolidated EBITDA) and Consolidated Adjusted EBITDA, which are presented below, are non-GAAP measures and do not purport to be alternatives to operating income as a measure of operating performance. Management believes that these measures are useful to investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as they exclude the depreciation and amortization expense related primarily to capital expenditures and acquisitions that occurred in prior years, as well as in evaluating operating performance in relation to our competitors. Consolidated EBITDA is calculated by adding back interest, taxes, depreciation and amortization expense, equity in earnings of unconsolidated businesses and other income, net to net income.

Consolidated Adjusted EBITDA is calculated by excluding the effect of non-operational items from the calculation of Consolidated EBITDA. Management believes that this measure provides additional relevant and useful information to investors and other users of our financial data in evaluating the effectiveness of our operations and underlying business trends in a manner that is consistent with management's evaluation of business performance. See **Other Items** for additional details regarding these non-operational items.

Operating expenses include pension and benefit related credits and/or charges based on actuarial assumptions, including projected discount rates and an estimated return on plan assets. These estimates will be updated in the fourth quarter to reflect actual return on plan assets and updated actuarial assumptions. The adjustment will be recognized in the income statement during the fourth quarter or upon a remeasurement event pursuant to our accounting policy for the recognition of actuarial gains/losses. During the second quarter of 2013, we recorded pension remeasurements in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur. During the third quarter of 2013, as a result of the previously recorded settlements, we performed a pension remeasurement, which was not material. In the fourth quarter of 2013, we expect to remeasure our pension assets and liabilities based on updated actuarial assumptions. These remeasurements could result in significant charges or credits to one or more of our pension plans.

Table of Contents

It is management's intent to provide non-GAAP financial information to enhance the understanding of Verizon's GAAP financial information, and it should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP. Each non-GAAP financial measure is presented along with the corresponding GAAP measure so as not to imply that more emphasis should be placed on the non-GAAP measure. The non-GAAP financial information presented may be determined or calculated differently by other companies.

(dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Consolidated Operating Income	\$ 7,128	\$ 5,483	\$ 19,905	\$ 16,329
Add Depreciation and amortization expense	4,154	4,167	12,423	12,323
Consolidated EBITDA	11,282	9,650	32,328	28,652
Less Gain on spectrum license transactions	(278)		(278)	
Less Pension remeasurement			(237)	
Add Litigation settlements		384		384
Consolidated Adjusted EBITDA	\$ 11,004	\$ 10,034	\$ 31,813	\$ 29,036

The changes in the table above during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 were a result of the factors described in connection with operating revenues and operating expenses above.

Table of Contents**Other Consolidated Results***Equity in Earnings of Unconsolidated Businesses*

Equity in earnings of unconsolidated businesses decreased \$43 million and \$103 million during the three and nine months ended September 30, 2013, respectively, compared to the similar periods in 2012 primarily due to lower earnings from operations at Vodafone Omnitel N.V. (Vodafone Omnitel). In addition, the decrease during the nine months ended September 30, 2013 was partially offset by an immaterial gain recorded by Verizon Wireless upon obtaining control of previously unconsolidated wireless partnerships, which were previously accounted for under the equity method and are now consolidated.

Other Income, Net

Additional information relating to Other income, net is as follows:

(dollars in millions)	Three Months Ended		Increase/		Nine Months Ended		Increase/	
	September 30,		(Decrease)		September 30,		(Decrease)	
	2013	2012		%	2013	2012		%
Interest income	\$ 14	\$ 14	\$	%	\$ 41	\$ 44	\$ (3)	(6.8)%
Foreign exchange gains (losses), net	(6)	(10)	4	(40.0)	12	(3)	15	nm
Other, net	12	6	6	100.0	31	22	9	40.9
Total	\$ 20	\$ 10	\$ 10	100.0	\$ 84	\$ 63	\$ 21	33.3

nm not meaningful

Interest Expense

(dollars in millions)	Three Months Ended		Increase/		Nine Months Ended		Increase/	
	September 30,		(Decrease)		September 30,		(Decrease)	
	2013	2012		%	2013	2012		%
Total interest costs on debt balances	\$ 745	\$ 737	\$ 8	1.1%	\$ 2,159	\$ 2,234	\$ (75)	(3.4)%
Less capitalized interest costs	190	105	85	81.0	553	238	315	nm
Total	\$ 555	\$ 632	\$ (77)	(12.2)	\$ 1,606	\$ 1,996	\$ (390)	(19.5)

Average debt outstanding	\$ 56,636	\$ 52,515	\$ 54,524	\$ 52,555
Effective interest rate	5.3%	5.6%	5.3%	5.7%

nm not meaningful

Total interest costs on debt balances increased during the three months ended September 30, 2013 compared to the similar period in 2012 due to the issuance of fixed and floating rate notes to finance the Wireless Transaction (see Acquisitions and Divestitures) resulting in an increase in average debt as well as an incremental increase in interest expense of \$0.1 billion. Total interest costs on debt balances decreased during the nine months ended September 30, 2013 compared to the similar period in 2012 due to a lower effective interest rate (see Consolidated Financial Condition). Capitalized interest costs were higher in 2013 primarily due to increases in wireless licenses that are currently under development.

Table of Contents*Provision for Income Taxes*

(dollars in millions)	Three Months Ended			Nine Months Ended				
	September 30,		Increase/ (Decrease)	September 30,		Increase/ (Decrease)		
	2013	2012		2013	2012	2013	2012	
Provision for income taxes	\$ 1,034	\$ 631	\$ 403	63.9%	\$ 2,886	\$ 2,150	\$ 736	34.2%
Effective income tax rate	15.6%	12.8%			15.6%	14.7%		

The effective income tax rate is calculated by dividing the provision for income taxes by income before the provision for income taxes. Our annual effective income tax rate is significantly lower than the statutory federal income tax rate due to the inclusion of income attributable to Vodafone's noncontrolling interest in the Verizon Wireless partnership within our income before the provision for income taxes, which resulted in our effective income tax rate being 16.1 and 15.6 percentage points lower during the three months ended September 30, 2013 and 2012, respectively, and 15.4 and 14.9 percentage points lower during the nine months ended September 30, 2013 and 2012, respectively.

The increase in the provision for income taxes and effective income tax rate during the three months ended September 30, 2013 compared to the similar period in 2012 is primarily due to higher income before income taxes as well as income tax charges resulting from state income tax legislation enacted in the current period.

The increase in the provision for income taxes and effective income tax rate during the nine months ended September 30, 2013 compared to the similar period in 2012 is primarily due to higher income before income taxes, partially offset by higher tax benefits resulting from the favorable resolution of various income tax matters in the current period.

Unrecognized Tax Benefits

Unrecognized tax benefits were \$2.2 billion at September 30, 2013 and \$2.9 billion at December 31, 2012. Interest and penalties related to unrecognized tax benefits were \$0.3 billion (after-tax) and \$0.4 billion (after-tax) at September 30, 2013 and December 31, 2012, respectively. The decrease in unrecognized tax benefits was primarily due to the resolution of issues with the Internal Revenue Service (IRS) involving tax years 2004 through 2006, as well as the resolution of a tax examination in Italy.

As a large taxpayer, we are under audit by the IRS and multiple state and foreign jurisdictions for various open tax years. The IRS is currently examining the Company's U.S. income tax returns for tax years 2007-2009. Significant tax examinations are ongoing in New York City for tax years as early as 2000. It is reasonably possible that the amount of the liability for unrecognized tax benefits could change by a significant amount in the next twelve months. An estimate of the range of the possible change cannot be made until these tax matters are further developed or resolved.

Net Income Attributable to Noncontrolling Interests

(dollars in millions)	Three Months Ended			Nine Months Ended				
	September 30,		Increase/ (Decrease)	September 30,		Increase/ (Decrease)		
	2013	2012		2013	2012	2013	2012	
Net income attributable to noncontrolling interests	\$ 3,346	\$ 2,699	\$ 647	24.0%	\$ 9,201	\$ 7,379	\$ 1,822	24.7%

The increase in Net income attributable to noncontrolling interests during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 was due to higher earnings in our Wireless segment, which has a 45% noncontrolling partnership interest attributable to Vodafone.

Table of Contents

Segment Results of Operations

We have two reportable segments, Wireless and Wireline, which we operate and manage as strategic business units and organize by products and services. We measure and evaluate our reportable segments based on segment operating income. The use of segment operating income is consistent with the chief operating decision maker's assessment of segment performance.

Segment earnings before interest, taxes, depreciation and amortization (Segment EBITDA), which is presented below, is a non-GAAP measure and does not purport to be an alternative to operating income as a measure of operating performance. Management believes that this measure is useful to investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as it excludes the depreciation and amortization expenses related primarily to capital expenditures and acquisitions that occurred in prior years, as well as in evaluating operating performance in relation to our competitors. Segment EBITDA is calculated by adding back depreciation and amortization expense to segment operating income.

Wireless Segment EBITDA service margin, also presented below, is calculated by dividing Wireless Segment EBITDA by Wireless service revenues. Wireless Segment EBITDA service margin utilizes service revenues rather than total revenues. Service revenues primarily exclude equipment revenues in order to reflect the impact of providing service to the wireless customer base on an ongoing basis. Wireline EBITDA margin is calculated by dividing Wireline EBITDA by total Wireline revenues.

Table of Contents**Wireless**

Our Wireless segment is primarily comprised of Cellco Partnership doing business as Verizon Wireless. Cellco Partnership is a joint venture formed in April 2000 by the combination of the U.S. wireless operations and interests of Verizon and Vodafone. Verizon owns a controlling 55% interest in Verizon Wireless and Vodafone owns the remaining 45%. Verizon Wireless provides wireless communications services across one of the most extensive wireless networks in the United States.

We provide these services and equipment sales to consumer, business and government customers in the United States on a postpaid and prepaid basis. Postpaid connections represent individual lines of service for which a customer is billed in advance a monthly access charge in return for a monthly network service allowance, and usage beyond the allowances is billed monthly in arrears. Our prepaid service enables individuals to obtain wireless services without a long-term contract or credit verification by paying for all services in advance.

⁽¹⁾ As of end of period

⁽²⁾ Excluding acquisitions and adjustments

The increase in Wireless total operating revenues during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 was primarily the result of growth in service revenue.

Accounts and Connections

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Retail (non-wholesale) postpaid accounts represent retail customers under contract with Verizon Wireless that are directly served and managed by Verizon Wireless and use its branded services. Accounts include single connection plans, family plans, Share Everything[®] plans and corporate accounts. A single account may receive monthly wireless services for a variety of connected devices. Retail connections represent our retail customer device connections. Churn is the rate at which service to connections is terminated.

Retail connections under an account may include: smartphones, basic phones, Home Phone Connect, Home Fusion, tablets, and other Internet devices. We expect to continue to experience retail connection growth based on the strength of our product

Table of Contents

offerings and network service quality. Retail postpaid connection net additions decreased during the three months ended September 30, 2013 compared to the similar period in 2012 primarily due to an increase in our retail postpaid connection churn rate and a decrease in retail postpaid connection gross additions. Retail postpaid connection net additions decreased during the nine months ended September 30, 2013 compared to the similar period in 2012 primarily due to an increase in our retail postpaid connection churn rate, partially offset by an increase in retail postpaid connection gross additions.

Retail Postpaid Connections per Account

Retail postpaid connections per account is calculated by dividing the total number of retail postpaid connections by the number of retail postpaid accounts as of the end of the period. Retail postpaid connections per account increased as of September 30, 2013 compared to September 30, 2012, primarily due to the increased penetration of tablets and other Internet devices.

Service Revenue

Service revenue increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily driven by higher retail postpaid service revenue, which increased largely as a result of an increase in retail postpaid connections as well as the continued increase in penetration of smartphones, tablets and other Internet devices through our Share Everything plans. The penetration of smartphones was driven by the activation of smartphones by new customers as well as existing customers migrating from basic phones to smartphones.

The increase in retail postpaid ARPA (the average revenue per account from retail postpaid accounts) during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 was primarily driven by increases in smartphone penetration and retail postpaid connections per account. As of September 30, 2013, we experienced a 4.6% increase in retail postpaid connections per account, compared to September 30, 2012, with smartphones representing 67.2% of our retail postpaid phone base as of September 30, 2013 compared to 53.2% as of September 30, 2012. The increased penetration in retail postpaid connections per account is primarily due to increases in Internet data devices, which represented 10.2% of our retail postpaid connection base as of September 30, 2013 compared to 8.8% as of September 30, 2012, primarily due to activations of tablets and other Internet devices. Additionally, during the nine months ended September 30, 2013, postpaid smartphone activations represented 84.5% of phones activated compared to 73.4% in the similar period in 2012.

Other service revenue increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 due to growth in wholesale connections, partially offset by a decrease in revenue related to third party roaming.

Equipment and Other Revenue

Equipment and other revenue increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to increases in revenue related to upgrade fees and equipment sales, partially offset by a decline in regulatory fees.

Operating Expenses

(dollars in millions)	Three Months Ended				Nine Months Ended			
	September 30,		Increase/		September 30,		Increase/	
	2013	2012	(Decrease)		2013	2012	(Decrease)	
Cost of services and sales	\$ 5,652	\$ 5,690	\$ (38)	(0.7)%	\$ 17,102	\$ 17,158	\$ (56)	(0.3)%
Selling, general and administrative expense	5,801	5,250	551	10.5	16,915	15,773	1,142	7.2
Depreciation and amortization expense	2,060	2,037	23	1.1	6,113	5,966	147	2.5
Total Operating Expenses	\$ 13,513	\$ 12,977	\$ 536	4.1	\$ 40,130	\$ 38,897	\$ 1,233	3.2

Cost of Services and Sales

Cost of services and sales decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to a decrease in network connection costs due to the deployment of Ethernet backhaul facilities primarily targeted at sites upgrading to 4G LTE, a decline in cost for data services and decreased data roaming, partially offset by an increase in cost of equipment sales and an increase in cost of network services.

Table of Contents*Selling, General and Administrative Expense*

Selling, general and administrative expense increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to higher sales commission expense in our indirect channel. Indirect sales commission expense increased \$0.3 billion and \$1.0 billion during the three and nine months ended September 30, 2013, respectively, compared to the similar periods in 2012 primarily as a result of an increase in the average commission per unit, as the mix of units continues to shift toward smartphones as more customers activate data services.

Depreciation and Amortization Expense

Depreciation and amortization expense increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily driven by an increase in net depreciable assets.

Segment Operating Income and EBITDA

(dollars in millions)	Three Months Ended		Increase/ (Decrease)		Nine Months Ended		Increase/ (Decrease)	
	September 30,				September 30,			
	2013	2012			2013	2012

Other	118	126	(8)	(6.3)	349	394	(45)	(11.4)
Total Operating Revenues	\$ 9,814	\$ 9,914	\$ (100)	(1.0)	\$ 29,378	\$ 29,790	\$ (412)	(1.4)

Connections ('000):⁽¹⁾

Total voice connections	21,457	22,847	(1,390)	(6.1)
Total Broadband connections	8,995	8,768	227	2.6
FiOS Internet subscribers	5,946	5,280	666	12.6
FiOS Video subscribers	5,170	4,592	578	12.6

⁽¹⁾ As of end of period

Wireline's revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily driven by declines in Global Enterprise Core, Global Wholesale and Other revenues, partially offset by higher Consumer retail revenues driven by FiOS services and increased Strategic services revenues within Global Enterprise.

Mass Markets

Mass Markets operations provide local exchange (basic service and end-user access) and long distance (including regional toll) voice services, as well as broadband services (including high-speed Internet, FiOS Internet and FiOS Video) to Consumer retail and Small business subscribers.

Mass Markets revenues increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to the expansion of FiOS services (Voice, Internet and Video), partially offset by the continued decline of local exchange revenues. During the nine months ended September 30, 2013 compared to the similar period in 2012 Mass Markets revenues also increased due to changes in our pricing strategies adopted in the third quarter of 2012.

We have continued to grow our subscriber base and consistently improved penetration rates within our FiOS service areas during the nine months ended September 30, 2013. As of September 30, 2013, we achieved penetration rates of 39.2% and 34.9% for FiOS Internet and FiOS Video, respectively, compared to penetration rates of 37.0% and 32.9% for FiOS Internet and FiOS Video, respectively, as of September 30, 2012.

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

The increase in Mass Markets revenues, driven by FiOS, was partially offset by the decline of local exchange revenues primarily due to a 4.9% decline in Consumer retail voice connections resulting primarily from competition and technology substitution with wireless, VoIP (voice over internet protocol), broadband and cable services. Total voice connections include traditional switched access lines in service as well as FiOS digital voice connections. There was also a decline in Small business retail voice connections, primarily reflecting competition and a shift to both IP and high-speed circuits.

Table of Contents*Global Enterprise*

Global Enterprise offers Strategic services including network products and solutions, advanced communications services, and other core communications services to medium and large business customers, multinational corporations and state and federal government customers.

Global Enterprise revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to a decline in Core customer premise equipment revenues and lower voice services and data networking revenues, which consist of traditional circuit-based services such as frame relay, private line and Asynchronous Transfer Mode services. These core services declined compared to the similar periods in 2012 as our customer base continued to migrate to next generation IP services. The decline in customer premise equipment revenues reflects our focus on improving margins by continuing to de-emphasize sales of equipment that are not part of an overall enterprise solutions bundle as well as lower revenue from federal government customers. This decrease was partially offset by higher Strategic services revenues. Strategic services revenues increased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to growth in advanced services, such as contact center solutions, IP communications and our cloud and data center offerings. During the three months ended September 30, 2013 compared to the similar period in 2012, the increase in Strategic services revenues was also due to growth in professional services. During the nine months ended September 30, 2013 compared to the similar period in 2012 the increase in Strategic services revenues included revenue from a telematics services business that we acquired during the third quarter of 2012.

Global Wholesale

Global Wholesale provides communications services including data, voice and local dial tone and broadband services primarily to local, long distance and other carriers that use our facilities to provide services to their customers.

Global Wholesale revenues decreased during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 primarily due to a decline in traditional voice revenues as a result of decreased MOUs and a 5.7% decline in domestic wholesale connections as of September 30, 2013 compared to September 30, 2012. The traditional voice product reductions are primarily due to competitors de-emphasizing their local market initiatives coupled with the effect of technology substitution. Also contributing to the decline in voice revenues is the continuing contraction of market rates due to competition. Partially offsetting the overall decrease in wholesale revenue was a continuing demand for high-speed digital data services from fiber-to-the-cell customers upgrading their core data circuits to Ethernet facilities as well as Ethernet migrations from other core customers. As a result of the customer upgrades, the number of core data circuits experienced an 11.0% decline as compared to the similar periods in 2012.

Other

Other revenues include such services as local exchange and long distance services outside of our network footprint and operator services which are no longer being marketed. The decrease in revenues from other services during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 was primarily due to reduced volumes outside of our network footprint.

Operating Expenses

(dollars in millions)	Three Months Ended				Nine Months Ended			
	September 30,		Increase/		September 30,		Increase/	
	2013	2012	(Decrease)		2013	2012	(Decrease)	
Cost of services and sales	\$ 5,483	\$ 5,463	\$ 20	0.4%	\$ 16,347	\$ 16,535	\$ (188)	(1.1)%
Selling, general and administrative expense	2,102	2,303	(201)	(8.7)	6,535	6,570	(35)	(0.5)
Depreciation and amortization expense	2,074	2,107	(33)	(1.6)	6,254	6,299	(45)	(0.7)
Total Operating Expenses	\$ 9,659	\$ 9,873	\$ (214)	(2.2)	\$ 29,136	\$ 29,404	\$ (268)	(0.9)

Cost of Services and Sales

During the three months ended September 30, 2013, Cost of services and sales increased compared to the similar period in 2012 primarily due to higher content costs associated with continued FiOS subscriber growth and vendor rate increases. These increases were partially offset by a

decrease in customer premise equipment which reflects our focus on improving margins by de-emphasizing sales of equipment that are not part of an overall enterprise solutions bundle, a decrease in access costs resulting primarily from declines in overall wholesale long distance volumes costs and the net effect of storm-related insurance recoveries.

Table of Contents

During the nine months ended September 30, 2013, Cost of services and sales decreased compared to the similar period in 2012 primarily due to a decrease in customer premise equipment which reflects our focus on improving margins by de-emphasizing sales of equipment that are not part of an overall enterprise solutions bundle, a decrease in access costs resulting primarily from declines in overall wholesale long distance volumes costs and the net effect of storm-related insurance recoveries. These decreases were partially offset by higher content costs associated with continued FiOS subscriber growth and vendor rate increases.

Selling, General and Administrative Expense

During the three months ended September 30, 2013, Selling, general and administrative expense decreased compared to the similar period in 2012 primarily due to declines in employee costs and advertising expenses.

During the nine months ended September 30, 2013, Selling, general and administrative expense decreased compared to the similar period in 2012 primarily due to declines in employee costs and rent expenses, partially offset by higher transaction and property tax expenses.

Depreciation and Amortization Expense

During the three and nine months ended September 30, 2013, Depreciation and amortization expense decreased compared to the similar periods in 2012 due to decreases in net depreciable assets and amortization expense related to customer lists, partially offset by an increase in amortization expense related to non-network software and other intangible assets.

Segment Operating Income and EBITDA

nm not meaningful								

The changes in the table above during the three and nine months ended September 30, 2013 compared to the similar periods in 2012 were primarily a result of the factors described in connection with operating revenues and operating expenses above.

Other Items**Gain on Spectrum License Transactions**

On April 18, 2012, we announced plans to initiate an open sale process for all of our 700 MHz lower A and B block spectrum licenses, subject to the receipt of acceptable bids. We acquired these licenses as part of FCC Auction 73 in 2008. On January 25, 2013, Verizon Wireless agreed to sell 39 lower 700 MHz B block spectrum licenses to AT&T in exchange for a payment of \$1.9 billion and the transfer by AT&T to Verizon Wireless of AWS (10 MHz) licenses in certain markets in the western United States. Verizon Wireless also agreed to sell certain lower 700 MHz B block spectrum licenses to an investment firm for a payment of \$0.2 billion. During the third quarter of 2013, after receiving the required regulatory approvals, Verizon Wireless completed these spectrum license transactions. As a result, we received \$0.5 billion of AWS licenses at fair value and we recorded a pretax gain of approximately \$0.3 billion in Selling, general and administrative expense on our condensed consolidated statements of income for the three and nine months ended September 30, 2013. We are still exploring various options regarding the

700 MHz A block licenses. We expect to deploy any licenses for which we do not enter a sale or swap transaction to meet network capacity requirements.

Table of Contents

The Consolidated Adjusted EBITDA non-GAAP measure presented in the Consolidated Operating Income and EBITDA discussion (See Consolidated Results of Operations) excludes the gain on the spectrum license transactions described above.

Interest Expense Related to the Wireless Transaction

As a result of the issuance of the new notes, we incurred interest expense related to the Wireless Transaction of \$0.1 billion during the three and nine months ended September 30, 2013 (see Consolidated Financial Condition).

Pension Remeasurement

During the second quarter of 2013, we recorded net pretax pension remeasurement credits of approximately \$0.2 billion, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur. The pension remeasurement credits relate to settlements for employees who received lump-sum distributions. The credits were primarily driven by an approximately 75 basis point increase in our discount rate assumption used to determine the current year liabilities of one of our pension plans. The change in discount rate resulted in a gain of \$0.3 billion, partially offset by a loss resulting from the difference between our expected return on assets assumption of 7.5% at December 31, 2012 and our annualized actual return on assets of 7.2% at June 30, 2013, as well as other losses (\$0.1 billion). Our weighted-average discount rate assumption increased from 4.2% at December 31, 2012 to 5.0% at June 30, 2013.

In accordance with our accounting policy for pension and other postretirement benefits, in the fourth quarter of 2013 we will remeasure our pension assets and liabilities based on updated actuarial assumptions. These remeasurements could result in significant charges or credits to one or more of our pension plans.

The Consolidated Adjusted EBITDA non-GAAP measure presented in the Consolidated Operating Income and EBITDA discussion (See Consolidated Results of Operations) excludes the pension remeasurement described above.

Litigation Settlements

In the third quarter of 2012, we settled a number of patent litigation matters, including cases with ActiveVideo Networks Inc. (ActiveVideo) and TiVo Inc. (TiVo). In connection with the settlements with ActiveVideo and TiVo, we recorded a charge of \$0.4 billion in the third quarter of 2012 and will pay and recognize over the following six years an additional \$0.2 billion.

The Consolidated Adjusted EBITDA non-GAAP measure presented in the Consolidated Operating Income and EBITDA discussion (See Consolidated Results of Operations) excludes the litigation settlements described above.

Table of Contents**Consolidated Financial Condition**

(dollars in millions)	Nine Months Ended		
	September 30,		
	2013	2012	Change
Cash Flows Provided By (Used In)			
Operating activities	\$ 28,387	\$ 24,758	\$ 3,629
Investing activities	(10,023)	(15,425)	5,402
Financing activities	35,253	(12,981)	48,234
Increase (Decrease) In Cash and Cash Equivalents	\$ 53,617	\$ (3,648)	\$ 57,265

We use the net cash generated from our operations to fund network expansion and modernization, repay external financing, pay dividends, repurchase Verizon common stock from time to time and invest in new businesses. Our sources of funds, primarily from operations and, to the extent necessary, from external financing arrangements, are sufficient to meet ongoing operating and investing requirements. The cash portion of the purchase price for the Wireless Transaction will be primarily funded by the incurrence of third-party indebtedness (see Acquisitions and Divestitures). We expect that our capital spending requirements will continue to be financed primarily through internally generated funds. Debt or equity financing may be needed to fund additional investments or development activities or to maintain an appropriate capital structure to ensure our financial flexibility. Our cash and cash equivalents are primarily held domestically in diversified accounts and are invested to maintain principal and liquidity. Accordingly, we do not have significant exposure to foreign currency fluctuations.

The volatility in world debt and equity markets has not had a significant effect on our ability to access external financing. Our available external financing arrangements include credit available under credit facilities and other bank lines of credit, vendor financing arrangements, issuances of registered debt or equity securities and privately-placed capital market securities. We may also issue short-term debt through an active commercial paper program and have a \$6.2 billion credit facility to support such commercial paper issuances. In addition, during October 2013, we entered into a \$2.0 billion 364-day revolving credit agreement.

Cash Flows Provided By Operating Activities

Our primary source of funds continues to be cash generated from operations. Net cash provided by operating activities during the nine months ended September 30, 2013 increased by \$3.6 billion compared to the similar period in 2012 primarily due to higher consolidated earnings, and to a lesser extent, lower pension contributions.

Cash Flows Used In Investing Activities*Capital Expenditures*

Capital expenditures continue to be our primary use of capital resources as they facilitate the introduction of new products and services, enhance responsiveness to competitive challenges and increase the operating efficiency and productivity of our networks.

Capital expenditures, including capitalized software, were as follows:

(dollars in millions)	Nine Months Ended	
	September 30,	
	2013	2012
Wireless	\$ 6,720	\$ 6,066
Wireline	4,467	4,617
Other	620	632

\$ 11,807 \$ 11,315

Total as a percentage of revenue	13.2%	13.2%
----------------------------------	-------	-------

The increase in capital expenditures during the nine months ended September 30, 2013 compared to the similar period in 2012 was primarily due to the continued build-out of our 4G LTE network, partially offset by lower capital expenditures at Wireline.

Table of Contents

Acquisitions

During the nine months ended September 30, 2012, we paid approximately \$3.8 billion to acquire wireless licenses primarily to meet future LTE capacity needs and enable LTE expansion. Additionally, during the third quarter of 2012, we acquired HUGHES Telematics, a provider of telematics services, for \$0.6 billion.

Dispositions

During the nine months ended September 30, 2013, we completed spectrum license transactions. As a result, we received proceeds of \$2.1 billion (see *Acquisitions and Divestitures*).

Cash Flows Provided By (Used In) Financing Activities

We seek to maintain a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. During the nine months ended September 30, 2013 and 2012, net cash provided by (used in) financing activities was \$35.3 billion and (\$13.0) billion, respectively.

During March 2013, we issued \$0.5 billion aggregate principal amount of floating rate Notes due 2015 in a private placement resulting in cash proceeds of approximately \$0.5 billion, net of discounts and issuance costs. The proceeds were used for the repayment of commercial paper.

During April 2013, \$1.25 billion of 5.25% Verizon Communications Notes matured and were repaid. During May 2013, \$0.1 billion of 7.0% Verizon New York Inc. Debentures matured and were repaid. During June 2013, \$0.5 billion of 4.375% Verizon Communications Notes and \$0.1 billion of 7.0% Verizon New York Inc. Debentures matured and were repaid. In addition, during June 2013, we redeemed \$0.25 billion of 7.15% Verizon Maryland LLC Debentures at a redemption price of 100% of the principal amount of the debentures.

During September 2013, in connection with the Wireless Transaction, we issued \$49.0 billion aggregate principal amount of fixed and floating rate notes resulting in cash proceeds of approximately \$48.7 billion, net of discounts and issuance costs. The issuances consisted of the following: \$2.25 billion aggregate principal amount of floating rate Notes due 2016 that bear interest at a rate equal to three-month LIBOR plus 1.53% which rate will be reset quarterly, \$1.75 billion aggregate principal amount of floating rate Notes due 2018 that bear interest at a rate equal to three-month LIBOR plus 1.75% which rate will be reset quarterly, \$4.25 billion aggregate principal amount of 2.50% Notes due 2016, \$4.75 billion aggregate principal amount of 3.65% Notes due 2018, \$4.0 billion aggregate principal amount of 4.50% Notes due 2020, \$11.0 billion aggregate principal amount of 5.15% Notes due 2023, \$6.0 billion aggregate principal amount of 6.40% Notes due 2033 and \$15.0 billion aggregate principal amount of 6.55% Notes due 2043 (collectively, the new notes). The proceeds of the new notes will be used to finance, in part, the Wireless Transaction and to pay related fees and expenses. In the event that (i) the Wireless Transaction is not completed on or prior to September 2, 2014 or (ii) the Stock Purchase agreement is terminated on or prior to such date, we are required to redeem each series of new notes at 101% of the aggregate principal amount of such series, plus accrued and unpaid interest. As a result of the issuance of the new notes, we incurred interest expense related to the Wireless Transaction of \$0.1 billion during the three and nine months ended September 30, 2013.

During October 2013, \$0.3 billion of 4.75% Verizon New England Inc. Debentures matured and were repaid.

Term Loan Agreement

During October 2013, we entered into a term loan agreement with a group of major financial institutions pursuant to which we may draw up to \$12.0 billion to finance, in part, the Wireless Transaction and to pay transaction costs. Half of any loans under the term loan agreement will have a maturity of three years and the other half will have a maturity of five years (the 5-Year Loans). The 5-Year Loans will provide for the partial amortization of principal during the last two years that they are outstanding. Loans under the term loan agreement will bear interest at floating rates. The term loan agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. In addition, the term loan agreement requires us to maintain a leverage ratio (as defined in the term loan agreement) not in excess of 3.50:1.00, until our credit ratings reach a certain level.

As a result of our entry into additional debt agreements to finance the Wireless Transaction, we expect to incur fees of approximately \$0.7 billion, which includes fees associated with the bridge credit agreement noted below.

Bridge Credit Agreement

During September 2013, we entered into a \$61.0 billion bridge credit agreement with a group of major financial institutions. The credit agreement provided us with the ability to borrow up to \$61.0 billion to finance, in part, the Wireless Transaction and to pay

Table of Contents

related transaction costs. Following the September 2013 issuance of the notes described above, borrowing availability under the bridge credit agreement was reduced to \$12.0 billion. Following the effectiveness of the term loan agreement in October 2013, as described above, the bridge credit agreement was terminated in accordance with its terms and as such, the related fees of \$0.2 billion will be recognized in the fourth quarter of 2013.

Other Credit Facilities

On August 13, 2013, we amended our \$6.2 billion credit facility with a group of major financial institutions to extend the maturity date to August 12, 2017. As of September 30, 2013, the unused borrowing capacity under this credit facility was approximately \$6.1 billion. The credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. We use the credit facility to support the issuance of commercial paper, for the issuance of letters of credit and for general corporate purposes.

During October 2013, we entered into a \$2.0 billion 364-day revolving credit agreement with a group of major financial institutions. Although effective as of October 2013, we may not draw on this revolving credit agreement prior to the completion of the Wireless Transaction. We may use borrowings under the 364-day credit agreement for general corporate purposes. The 364-day revolving credit agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. In addition, this agreement requires us to maintain a leverage ratio (as defined in the agreement) not in excess of 3.50:1.00, until our credit ratings reach a certain level.

Early Debt Redemption

During October 2013, we announced that our subsidiary, Verizon New York Inc., will redeem the entire outstanding principal amount of its \$0.3 billion 6.70% Debentures due November 1, 2023. The redemption date for the securities will be November 18, 2013 (the Redemption Date). The redemption price will be equal to 100% of the principal amount of these securities, plus accrued and unpaid interest to the Redemption Date, and will be payable on the Redemption Date.

Dividends

As in prior periods, dividend payments were a significant use of capital resources. During the third quarter of 2013, the Board increased our quarterly dividend payments by 2.9% to \$.53 per share from \$.515 per share in the same period in 2012. This is the seventh consecutive year that Verizon's Board of Directors has approved a quarterly dividend increase.

During the nine months ended September 30, 2013 and 2012, we paid \$4.4 billion and \$3.9 billion in cash dividends, respectively.

Common Stock

During the first quarter of 2013, we repurchased \$0.2 billion of our common stock, as part of our previously announced share buyback program.

Credit Ratings

During the third quarter of 2013, Verizon's credit ratings were downgraded by Moody's Investors Service (Moody's), Standard & Poor's Ratings Services (Standard & Poor's) and Fitch Ratings (Fitch) as a result of Verizon's pending acquisition of Vodafone's 45% noncontrolling interest in Verizon Wireless for approximately \$130 billion including the incurrence of third-party indebtedness to fund the cash portion of the purchase price for the Wireless Transaction. Moody's downgraded Verizon's long-term debt ratings from A3 to Baa1, while Standard & Poor's lowered its corporate credit rating and senior unsecured debt rating from A- to BBB+ and Fitch lowered its long-term issuer default rating and senior unsecured debt rating from A to A-.

Although the ratings downgrade noted above is not expected to significantly impact our access to capital, it could increase both the cost of refinancing debt and the cost of financing any new capital requirements. Securities ratings assigned by rating organizations are expressions of opinion and are not recommendations to buy, sell or hold securities. A securities rating is subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

Covenants

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Our credit agreements contain covenants that are typical for large, investment grade companies. These covenants include requirements to pay interest and principal in a timely fashion, pay taxes, maintain insurance with responsible and reputable insurance companies, preserve our corporate existence, keep appropriate books and records of financial transactions, maintain our properties, provide financial and other reports to our lenders, limit pledging and disposition of assets and mergers and consolidations, and other similar covenants. Additionally, the term loan credit agreement and the 364-day revolving credit agreement require us to maintain a leverage ratio (as such term is defined in those agreements) not in excess of 3.50:1.00 until our credit ratings are equal to or higher than A3 and A-.

We and our consolidated subsidiaries are in compliance with all debt covenants.

Table of Contents*Special Distribution*

In May 2013, the Board of Representatives of Verizon Wireless declared a distribution to its owners, which was paid in the second quarter of 2013 in proportion to their partnership interests on the payment date, in the aggregate amount of \$7.0 billion. As a result, Vodafone received a cash payment of \$3.15 billion and the remainder of the distribution was received by Verizon.

Increase (Decrease) In Cash and Cash Equivalents

Our Cash and cash equivalents at September 30, 2013 totaled \$56.7 billion, a \$53.6 billion increase compared to Cash and cash equivalents at December 31, 2012 for the reasons discussed above.

As of September 30, 2013, Wireless cash and cash equivalents and debt outstanding totaled \$6.6 billion and \$10.2 billion, respectively. As of December 31, 2012, Wireless cash and cash equivalents and debt outstanding totaled \$0.8 billion and \$10.1 billion, respectively.

Free Cash Flow

Free cash flow is a non-GAAP financial measure that management believes is useful to investors and other users of Verizon's financial information in evaluating cash available to pay debt and dividends. Free cash flow is calculated by subtracting capital expenditures from net cash provided by operating activities. The following table reconciles Net cash provided by operating activities to Free cash flow:

(dollars in millions)	Nine Months Ended		
	September 30,		
	2013	2012	Change
Net cash provided by operating activities	\$ 28,387	\$ 24,758	\$ 3,629
Less Capital expenditures (including capitalized software)	11,807	11,315	492
Free cash flow	\$ 16,580	\$ 13,443	\$ 3,137

The change in Free cash flow during the nine months ended September 30, 2013 compared to the similar period in 2012 was a result of the factors described in connection with Net cash provided by operating activities and Capital expenditures above.

Table of Contents

Market Risk

We are exposed to various types of market risk in the normal course of business, including the effects of interest rate changes, foreign currency exchange rate fluctuations, changes in investment, equity and commodity prices and changes in corporate tax rates. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, foreign currency and prepaid forwards and collars, interest rate swap agreements, commodity swap and forward agreements and interest rate locks. We do not hold derivatives for trading purposes.

It is our general policy to enter into interest rate, foreign currency and other derivative transactions only to the extent necessary to achieve our desired objectives in limiting our exposure to various market risks. Our objectives include maintaining a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. We do not hedge our market risk exposure in a manner that would completely eliminate the effect of changes in interest rates and foreign exchange rates on our earnings. We do not expect that our net income, liquidity and cash flows will be materially affected by these risk management strategies.

The functional currency for our foreign operations is primarily the local currency. The translation of income statement and balance sheet amounts of our foreign operations into U.S. dollars are recorded as cumulative translation adjustments, which are included in Accumulated other comprehensive income in our condensed consolidated balance sheets. Gains and losses on foreign currency transactions are recorded in the condensed consolidated statements of income in Other income, net. At September 30, 2013, our primary translation exposure was to the British Pound Sterling and the Euro.

We are exposed to changes in interest rates, primarily on our short-term debt and the portion of long-term debt that carries floating interest rates. As of September 30, 2013, approximately 92% of the aggregate principal amount of our total debt portfolio consisted of fixed rate indebtedness, including the effect of interest rate swap agreements designated as hedges. The impact of a 100 basis point change in interest rates affecting our floating rate debt would result in a change in annual interest expense, including our interest rate swap agreements that are designated as hedges, of approximately \$0.1 billion. The interest rates on our existing long-term debt obligations are unaffected by changes to our credit ratings.

Interest Rate Swaps

We have entered into domestic interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates based on the London Interbank Offered Rate, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against changes in the fair value of our debt portfolio. We record the interest rate swaps at fair value on our condensed consolidated balance sheets as assets and liabilities. During the second quarter of 2013, interest rate swaps with a notional value of \$1.25 billion matured and the impact to our condensed consolidated financial statements was not material. During the third quarter of 2013, we entered into interest rate swaps with a notional value of \$1.8 billion. The fair value of these contracts was not material at September 30, 2013 and December 31, 2012, respectively. As of September 30, 2013, the total notional amount of the interest rate swaps was \$1.8 billion.

Cross Currency Swaps

Verizon Wireless previously entered into cross currency swaps designated as cash flow hedges to exchange approximately \$1.6 billion of British Pound Sterling and Euro-denominated debt into U.S. dollars and to fix our future interest and principal payments in U.S. dollars, as well as to mitigate the effect of foreign currency transaction gains or losses. A portion of the gains and losses recognized in Other comprehensive income (loss) was reclassified to Other income, net to offset the related pretax foreign currency transaction gain or loss on the underlying debt obligations. The fair value of the outstanding swaps was \$0.1 billion at September 30, 2013 and was not material at December 31, 2012. During the three and nine months ended September 30, 2013, a pretax gain of \$0.1 billion and an immaterial pretax loss, respectively, were recognized in Other comprehensive income (loss). During the three and nine months ended September 30, 2012, the pretax gains recognized in Other comprehensive income (loss) were not material.

Table of Contents

Acquisitions and Divestitures

Wireless Transaction

On September 2, 2013, Verizon entered into a stock purchase agreement (the Stock Purchase Agreement) with Vodafone and Vodafone 4 Limited (Seller), pursuant to which Verizon agreed to acquire Vodafone's indirect 45% interest in Cellco Partnership d/b/a Verizon Wireless (the Partnership, and such interest, the Vodafone Interest).

Pursuant to the terms and subject to the conditions set forth in the Stock Purchase Agreement, Verizon will acquire (the Wireless Transaction) from Seller all of the issued and outstanding capital stock (the Transferred Shares) of Vodafone Americas Finance 1 Inc., a subsidiary of Seller (VF1 Inc), which indirectly through certain subsidiaries (together with VF1 Inc, the Purchased Entities) owns the Vodafone Interest. In consideration for the Transferred Shares, Verizon has agreed to, upon completion of the Wireless Transaction, (i) pay approximately \$58.89 billion in cash, (ii) issue approximately \$60.15 billion of Verizon's common stock, par value \$0.10 per share (the Stock Consideration), (iii) issue senior unsecured Verizon notes in an aggregate principal amount of \$5.0 billion (the Verizon Notes), (iv) transfer Verizon's indirectly owned 23.1% interest in Vodafone Omnitel N.V. (Omnitel, and such interest, the Omnitel Interest), valued at \$3.5 billion and (v) provide other consideration of approximately \$2.5 billion. The exact number of shares of Verizon's common stock to be issued in the Wireless Transaction will be determined prior to the closing of the Wireless Transaction based on the volume-weighted average trading price per share of Verizon common stock on the New York Stock Exchange during the 20 trading days ending on the third business day prior to the closing, except that the price used for this purpose will not be less than \$47.00 or more than \$51.00 per share. As a result of the Wireless Transaction, Verizon expects to issue a minimum of 1.18 billion shares and a maximum of 1.28 billion shares. In addition, Verizon has the right to increase the cash portion of the purchase price (and correspondingly reduce the Stock Consideration) by up to \$15.0 billion in certain circumstances. All of the Stock Consideration will be issued directly or distributed to the Vodafone ordinary shareholders. The total cash expected to be paid to Vodafone and the other expected costs of the Wireless Transaction, including financing, legal and bank fees, is expected to be financed through the incurrence of third-party indebtedness (see Consolidated Financial Condition). The Wireless Transaction is expected to close during the first quarter of 2014.

Each of Verizon and Vodafone has made representations, warranties and covenants with respect to itself and the Wireless Transaction and, in the case of Vodafone, with respect to the Vodafone Interest and the Purchased Entities. The Stock Purchase Agreement also provides that each of Verizon and Vodafone will indemnify the other for certain losses, subject to the limits set forth therein. The closing of the Wireless Transaction is subject to the satisfaction or waiver of certain conditions, including, among others, approval by the shareholders of Verizon and Vodafone and the receipt of any required approval by the Federal Communications Commission.

The Stock Purchase Agreement contains certain termination rights for each of Verizon and Vodafone, which if exercised give rise to termination fees or expense reimbursement obligations in specified circumstances. Verizon must pay to Vodafone a termination fee of (i) \$1.55 billion in the event of termination by either party as a result of failure to obtain Verizon shareholder approval of the share issuance, (ii) \$4.65 billion in the event of termination by Vodafone as a result of a change of recommendation of the Verizon Board of Directors or (iii) \$10.0 billion in the event of a termination by Vodafone as a result of a financing failure as defined in the Stock Purchase Agreement. Vodafone must pay to Verizon a termination fee of \$1.55 billion in the event of (i) a termination by either party as a result of failure to obtain Vodafone shareholder approval of the Vodafone sale resolutions, (ii) a termination by Verizon as a result of a change of recommendation of the Vodafone Board of Directors or (iii) a termination by Vodafone as a result of a Vodafone material adverse financial effect as defined in the Stock Purchase Agreement. If the Stock Purchase Agreement is terminated by either party for a material incurable or uncured breach, the breaching party must reimburse the terminating party's out-of-pocket expenses, subject to a limit of \$1.55 billion.

In accordance with the accounting standard on consolidation, a change in a parent's ownership interest while the parent retains a controlling financial interest in its subsidiary is accounted for as an equity transaction and remeasurement of assets and liabilities of previously controlled and consolidated subsidiaries is not permitted. As a result, we will account for the Wireless Transaction by adjusting the carrying amount of the noncontrolling interest to reflect the change in Verizon's ownership interest in Verizon Wireless. Any difference between the fair value of the consideration paid and the amount by which the noncontrolling interest is adjusted will be recognized in equity attributable to Verizon.

Table of Contents

Omnitel Transaction

Verizon and Vodafone have agreed to implement the transfer of the Omnitel Interest (the Omnitel Transaction) by a subsidiary of Verizon to a subsidiary of Vodafone in connection with the Wireless Transaction pursuant to a separate share purchase agreement. The completion of the Wireless Transaction is a condition to the completion of the Omnitel Transaction. However, completion of the Omnitel Transaction is not a condition to the completion of the Wireless Transaction. If the Omnitel Transaction does not close concurrently with the Wireless Transaction, Verizon has agreed to issue a note to Seller in the amount of \$3.5 billion, which note will be surrendered to the Verizon subsidiary upon completion of the Omnitel Transaction in payment for the Omnitel Interest. Either party may terminate the Omnitel share purchase agreement if the Omnitel Transaction has not been consummated by the second anniversary of the completion of the Wireless Transaction. The Omnitel Note would mature upon such termination and may be settled in cash, Verizon common stock or a combination thereof, at Verizon's election. We expect to recognize a gain on the disposal of the Omnitel interest.

Verizon Notes

The Stock Purchase Agreement provides that the Verizon Notes will be issued pursuant to Verizon's existing indenture. The Verizon Notes will be issued in two separate series, with \$2.5 billion due on the eighth anniversary of the closing of the Wireless Transaction and \$2.5 billion due on the eleventh anniversary of the closing of the Wireless Transaction. The Verizon Notes will bear interest at a floating rate equal to three-month LIBOR, plus an agreed margin, which rate will be reset quarterly, with interest payable quarterly in arrears, beginning three months after closing of the Wireless Transaction. The indenture that will govern the Verizon Notes contains certain negative covenants, including a negative pledge covenant and a merger or similar transaction covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. An event of default for either series of the Verizon Notes may result in acceleration of the entire principal amount of all debt securities of that series. Beginning two years after the closing of the Wireless Transaction, Verizon may redeem all or any portion of the outstanding Verizon Notes held by Vodafone or any of its affiliates for a redemption price of 100% of the principal amount plus accrued and unpaid interest. The Verizon Notes may only be transferred by Vodafone to third parties in specified amounts during specified periods, commencing January 1, 2017. The Verizon Notes held by third parties will not be redeemable. Verizon has agreed to file a registration statement with respect to the Verizon Notes at least three months prior to the Verizon Notes becoming transferable.

Other Consideration

Included in the other consideration to be paid to Vodafone is the indirect assumption of long-term obligations with respect to 5.143% Class D and Class E cumulative preferred stock issued by one of the Purchased Entities. Both the Class D (825,000 shares outstanding) and Class E shares (825,000 shares outstanding) are mandatorily redeemable in April 2020 at \$1,000 per share plus any accrued and unpaid dividends. Dividends accrue at 5.143% per annum and will be treated as interest expense. Both the Class D and Class E shares will be classified as liability instruments and will be recorded at fair value as determined at the closing of the Wireless Transaction.

Spectrum License Transactions

During the first quarter of 2013, we completed license exchange transactions with T-Mobile and Cricket License Company, LLC, a subsidiary of Leap Wireless, to exchange certain AWS licenses. These non-cash exchanges include a number of intra-market swaps that will enable Verizon Wireless to make more efficient use of the AWS band. As a result of these exchanges, we received an aggregate \$0.5 billion of AWS licenses at fair value and recorded an immaterial gain.

On April 18, 2012, we announced plans to initiate an open sale process for all of our 700 MHz lower A and B block spectrum licenses, subject to the receipt of acceptable bids. We acquired these licenses as part of FCC Auction 73 in 2008. On January 25, 2013, Verizon Wireless agreed to sell 39 lower 700 MHz B block spectrum licenses to AT&T in exchange for a payment of \$1.9 billion and the transfer by AT&T to Verizon Wireless of AWS (10 MHz) licenses in certain markets in the western United States. Verizon Wireless also agreed to sell certain lower 700 MHz B block spectrum licenses to an investment firm for a payment of \$0.2 billion. During the third quarter of 2013, after receiving the required regulatory approvals, Verizon Wireless completed these spectrum license transactions. As a result, we received \$0.5 billion of AWS licenses at fair value and we recorded a pretax gain of approximately \$0.3 billion in Selling, general and administrative expense on our condensed consolidated statements of income for the three and nine months ended September 30, 2013. We are still exploring various options regarding the 700 MHz A block licenses. We expect to deploy any licenses for which we do not enter a sale or swap transaction to meet network capacity requirements.

Technology Innovation Joint Venture

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

In August 2013, Verizon Wireless and affiliates of Comcast Corporation, Time Warner Cable and Bright House Networks (cable companies) dissolved the technology innovation joint venture they had formed in 2011 for the development of technology to better integrate wireline and wireless products and services. Verizon Wireless and the cable companies, together with cable provider Cox Communications, continue to market certain of each other's products under the agent agreements also entered into in 2011.

Table of Contents

Other Factors That May Affect Future Results

Regulatory and Competitive Trends

Regulatory and Competitive Landscape

Verizon operates in a regulated and highly competitive market. Current and potential competitors include other voice and data service providers such as other wireless companies, traditional telephone companies, cable companies, Internet service providers, software and application providers, and other non-traditional companies. Many of these companies have a strong market presence, brand recognition, and existing customer relationships, all of which contribute to intensifying competition and may affect our future revenue growth. Some of our competitors also are subject to fewer regulatory constraints than Verizon. For many services offered by Verizon, the Federal Communications Commission (FCC) is our primary regulator. The FCC has jurisdiction over interstate telecommunications services and other matters under the Communications Act of 1934, as amended (Communications Act or Act). Other Verizon services are subject to state and local regulation.

FCC Regulation

Broadband

Verizon offers many different broadband and Internet access services. The FCC has adopted a series of orders that impose lesser regulatory requirements on broadband services than apply to older voice and slower data services. For example certain facility unbundling requirements that apply to narrowband facilities of traditional telephone companies do not apply to broadband facilities. In addition, the FCC concluded that both wireline and wireless broadband Internet access services qualify as largely deregulated information services. Our broadband Internet access services are subject to so-called network neutrality rules, which are subject to a pending appeal, imposed by the FCC. These rules limit the ways that a broadband Internet access service provider can manage its network and the services it can provide over the network.

Video

Verizon offers a multi-channel video service that is regulated like traditional cable service. The FCC has a body of rules that apply to cable operators, and these rules also generally apply to Verizon. In addition, the Act generally requires companies to obtain a local cable franchise, and the FCC has adopted rules that interpret and implement this requirement. In areas where Verizon offers video services, Verizon has typically been required to obtain a franchise from local authorities.

Wireline Voice

Verizon offers many different wireline voice services, including traditional telephone service and other services that rely on newer technologies such as voice over Internet protocol (VoIP). For regulatory purposes, legacy telephone services are generally considered to be common carrier services. Common carrier services are subject to heightened regulatory oversight with respect to rates, terms and conditions, and other aspects of the services. The FCC has not decided the regulatory classification of VoIP but has said VoIP service providers must comply with certain rules, such as 911 capabilities and law enforcement assistance requirements.

Wireless Services

The FCC regulates several aspects of Verizon Wireless operation. Generally, the FCC has jurisdiction over the construction, operation, acquisition, and transfer of wireless communications systems. And all wireless services require use of radio frequency spectrum, the assignment and distribution of which is subject to FCC oversight. Verizon Wireless anticipates that it will need additional spectrum to meet future demand. It can meet spectrum needs by purchasing licenses or leasing spectrum from others, or by participating in a competitive bidding process for new spectrum from the FCC. Both processes are subject to certain reviews, approvals, and potential conditions.

Today, Verizon Wireless holds FCC spectrum licenses that allow it to provide a wide range of mobile and fixed communications services, including both voice and data services. FCC spectrum licenses typically have a term of 10 years, at which time they are subject to renewal. While the FCC has routinely renewed all of Verizon Wireless licenses, challenges could be raised in the future. If a wireless license were revoked or not renewed, Verizon Wireless would not be permitted to provide services on the spectrum. Some of our licenses require us to comply with so-called open access FCC regulations, which generally require

Table of Contents

licensees of particular spectrum to allow customers to use devices and applications of their choice, subject to certain technical limitations. The FCC has also imposed certain specific mandates on wireless carriers including construction and geographic coverage requirements, technical operating standards, provision of enhanced 911 services, roaming obligations, and requirements for wireless tower and antenna facilities.

The Communications Act imposes restrictions on foreign ownership of U.S. wireless systems. The FCC has approved the interest that Vodafone Group Plc holds in Verizon Wireless. In addition, Verizon Wireless, Verizon and Vodafone entered into an agreement with the federal government that imposes national security and law enforcement-related obligations on the ways in which Verizon Wireless stores information and otherwise conducts its business.

Intercarrier Compensation and Network Access

The FCC regulates some of the rates that carriers pay each other for the exchange voice traffic (particularly traditional wireline traffic) over different networks and other aspects of interconnection for some voice services. In many instances, Verizon makes payments to other providers, and in turn Verizon receives some payments from other carriers. In 2011, the FCC issued a broad reform order changing, among other things, the framework for many of the per-minute rates that carriers charge each other for the exchange of voice traffic. The new rules gradually reduce many of these rates to zero. This order is subject to pending reconsideration petitions and appeals. The FCC also regulates some of the rates and terms and conditions for certain wireline special access and other services and network facilities. Verizon is both a seller and a buyer of these services. For example, on the wireline side Verizon sells wholesale circuits to other voice and data service providers. On the wireless side, Verizon purchases special access and other services to transport traffic to and from cell towers. In addition, as required by the Act, Verizon unbundles certain wireline network elements and makes these facilities and services available to other network providers.

Universal Service

The Communications Act charges the FCC with ensuring that certain groups and areas have access to communications services, including rural and other high-cost areas, low income subscribers, schools and libraries, rural health-care organizations, and deaf and hard-of-hearing individuals. The FCC established different subsidy and discount programs to achieve these goals. To pay for these programs, the FCC requires contributions from providers such as Verizon based on reported revenues for certain services. Verizon also receives some payments from some of these programs but is a net payer into them.

State Regulation and Local Regulation

Wireline Services

State public utility commissions regulate Verizon's telephone operations with respect to certain telecommunications intrastate matters. Verizon operates as an incumbent local exchange carrier in 14 states. These incumbent operations are subject to various levels of pricing flexibility and other state oversight and requirements. Verizon also has other wireline operations that are more lightly regulated. In addition, as a video services operator in many states Verizon has been required to obtain a cable franchise from local government entities, or in some cases a state-wide franchise, and to comply with certain one-time and ongoing obligations as a result.

Wireless Services

The Communications Act generally preempts regulation by state and local governments of the entry of, or the rates charged by, wireless carriers. The Act does not prohibit states from regulating the other terms and conditions of wireless service. For example, some states attempt to regulate wireless customer billing matters and impose reporting requirements. Several states also have laws or regulations that address safety issues (e.g., use of wireless handsets while driving) and taxation matters. In addition, wireless tower and antenna facilities are often subject to state and local zoning and land use regulation, and securing approvals for new or modified facilities is often a lengthy and expensive process.

Environmental Matters

During 2003, under a government-approved plan, remediation commenced at the site of a former Sylvania facility in Hicksville, New York that processed nuclear fuel rods in the 1950s and 1960s. Remediation beyond original expectations proved to be necessary and a reassessment of the anticipated remediation costs was conducted. A reassessment of costs related to remediation efforts at several other former facilities was also undertaken. In September 2005, the Army Corps of Engineers (ACE) accepted the Hicksville site into the Formerly Utilized Sites Remedial Action Program. This may result in the ACE performing some or all of the remediation effort for the Hicksville site with a corresponding decrease in costs to Verizon. To the extent that the ACE assumes responsibility for remedial work at the Hicksville site, an adjustment to a

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

reserve previously established for the remediation may be made. Adjustments to the reserve may also be made based upon actual conditions discovered during the remediation at this or any other site requiring remediation.

Table of Contents

Recent Accounting Standards

In July 2013, the accounting standard update relating to the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists was issued. The standard update provides that a liability related to an unrecognized tax benefit should be offset against same jurisdiction deferred tax assets for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. We will adopt this standard update during the first quarter of 2014. We are currently evaluating the impact that this standard update will have on our condensed consolidated financial statements.

Cautionary Statement Concerning Forward-Looking Statements

In this report we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words anticipates, believes, estimates, hopes or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

The following important factors, along with those discussed elsewhere in this report and in our other filings with the SEC, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

the ability to realize the expected benefits of our proposed transaction with Vodafone in the timeframe expected or at all;

the ability to complete the Vodafone transaction in the timeframe expected or at all and the costs that could be required to do so;

failure to obtain applicable regulatory or shareholder approvals in connection with the Vodafone transaction in a timely manner or at all;

failure to satisfy other closing conditions to the Vodafone transaction or events giving rise to termination of the transaction agreement;

an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations or adverse conditions in the credit markets affecting the cost, including interest rates, and/or availability of financing;

the ability of Verizon to complete the financing of the Vodafone transaction on satisfactory terms;

significantly increased levels of indebtedness as a result of the Vodafone transaction;

changes in tax laws or treaties, or in their interpretation;

adverse conditions in the U.S. and international economies;

material adverse changes in labor matters, including labor negotiations, and any resulting financial and/or operational impact;

material changes in technology or technology substitution;

disruption of our key suppliers provisioning of products or services;

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

changes in the regulatory environment in which we operate, including any increase in restrictions on our ability to operate our networks;

breaches of network or information technology security, natural disasters, terrorist attacks or acts of war or significant litigation and any resulting financial impact not covered by insurance;

the effects of competition in the markets in which we operate;

changes in accounting assumptions that regulatory agencies, including the Securities and Exchange Commission, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings;

significant increases in benefit plan costs or lower investment returns on plan assets; and

the inability to implement our business strategies.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Information relating to market risk is included in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations under the caption Market Risk.

Item 4. Controls and Procedures

Our chief executive officer and chief financial officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), as of the end of the period covered by this quarterly report. Based on this evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective as of September 30, 2013.

In the ordinary course of business, we review our system of internal control over financial reporting and make changes to our systems and processes intended to ensure an effective internal control environment. We have begun an initiative to implement new financial systems that will continue in phases over the next several quarters. We have also begun an initiative to standardize and centralize transaction-processing activities within our accounting processes, which we expect to continue over the next several years. These initiatives will incorporate certain changes in personnel as well. In connection with these initiatives and the resulting changes in our financial systems and transaction-processing activities, the Company continues to enhance the design and documentation of our internal control processes to ensure that controls over our financial reporting remain effective.

Except as noted above, there were no changes in the Company's internal control over financial reporting during the third quarter of 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II - Other Information**Item 1. Legal Proceedings**

On September 15, 2010, the U.S. Bank National Association (U.S. Bank), as Litigation Trustee for the Idearc Inc. Litigation Trust (Litigation Trust), filed suit in U.S. District Court for the Northern District of Texas against Verizon and certain subsidiaries challenging the November 2006 spin-off of Verizon's former directories business then known as Idearc Inc. U.S. Bank, which represents a group of creditors who filed claims in Idearc's bankruptcy, alleged that Idearc was insolvent at the time of the spin-off or became insolvent shortly thereafter. The Litigation Trust sought over \$9 billion in damages. Following a two-week trial in October 2012 limited to the question of the value of Idearc Inc. on the date of the spin-off, on January 22, 2013, the Court issued a decision finding that the value was at least \$12 billion. As \$12 billion exceeds the value of the debt and cash that Idearc transferred to Verizon on the date of the spin-off, the Court issued a related Order to Show Cause directing the Litigation Trust to submit a brief that explains why any (or all) of its legal claims are viable in light of the court's finding on Idearc's value. In its June 18, 2013 decision, the Court entered judgment for Verizon and its subsidiaries and ruled that U.S. Bank would take nothing on its claims. U.S. Bank appealed the decision to the U.S. Court of Appeals for the Fifth Circuit, where briefing is scheduled to be completed in January 2014.

On October 25, 2011, a Litigation Trust created during the bankruptcy proceedings of FairPoint Communications, Inc. filed a complaint in state court in Mecklenburg County, North Carolina, against Verizon and other related entities. The complaint claims that FairPoint's acquisition of Verizon's landline operations in Maine, New Hampshire and Vermont in March 2008 was structured and carried out in a way that left FairPoint insolvent or led to its insolvency shortly thereafter and ultimately to its October 2009 bankruptcy. The Litigation Trust seeks approximately \$2 billion in damages. Verizon removed the case to the United States District Court for the Western District of North Carolina in November 2011. At the close of discovery in February 2012, Verizon filed a summary judgment motion to dismiss the two counts in the complaint—constructive fraudulent transfer and actual fraudulent transfer. At a hearing in April 2013, the judge originally assigned to the case recused himself due to a conflict of interest and the case was reassigned. On June 12, 2013, the Court granted Verizon's summary judgment motion in part, dismissing the Litigation Trust's constructive fraudulent transfer claim. A two-week bench trial limited to the actual fraudulent transfer claim is set for December 2, 2013.

Table of Contents**Item 1A. Risk Factors**

The following discussion of Risk Factors identifies the most significant factors that may adversely affect our business, operations, financial condition or future performance. This information should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Result of Operations and the condensed consolidated financial statements and related notes. The following discussion of risks is not all-inclusive but is designed to highlight what we believe are important factors to consider when evaluating our business and expectations. These factors could cause our future results to differ materially from our historical results and from expectations reflected in forward-looking statements.

Risks Related to the Wireless Transaction

The number of shares of Verizon common stock to be issued to Vodafone shareholders in the Wireless Transaction will not be determined until shortly prior to completion of the Wireless Transaction. If the market price per share of Verizon common stock at closing is above or below the price used to calculate the number of Verizon shares to be issued to Vodafone shareholders, such shares will have an aggregate market value greater or less than \$60.15 billion, respectively.

The exact number of shares of Verizon common stock to be issued or distributed to Vodafone shareholders in the Wireless Transaction will be equal to \$60.15 billion (as adjusted by any cash election, as described herein) divided by the average trading price, which is the volume-weighted average trading price per share of Verizon common stock on the NYSE during the 20 consecutive full trading days ending on the third business day prior to the closing of the Wireless Transaction, except that the average trading price will not be less than \$47.00 per share or more than \$51.00 per share. Verizon cannot determine the exact number of shares of Verizon common stock to be issued or distributed to Vodafone shareholders in the Wireless Transaction until shortly prior to completion of the transaction, subject to a minimum of approximately 1.18 billion shares and a maximum of approximately 1.28 billion shares to be issued or distributed as established by the stock consideration collar mechanism. Verizon also expects that the trading prices of Verizon common stock will vary between the date of this report and the closing of the Wireless Transaction.

Additionally, if the market price per share of Verizon common stock at closing is above the price used to calculate the number of shares to be issued to Vodafone shareholders, then such shares will have an aggregate market value greater than \$60.15 billion, subject to Verizon's right to exercise the cash election and correspondingly decrease a portion of the stock consideration. Conversely, if the market price per share of Verizon common stock at closing is below the price used to calculate the number of shares to be issued to Vodafone shareholders, then such shares will have an aggregate market value less than \$60.15 billion.

Sales of shares of Verizon common stock before and after the completion of the Wireless Transaction may cause the market price of Verizon common stock to fall.

As of September 30, 2013, Verizon had approximately 2.86 billion shares of common stock outstanding and approximately 106 million additional shares issuable upon the vesting or exercise of stock options and other outstanding stock-based compensation awards. Verizon currently expects that it will issue up to approximately 1.28 billion shares of Verizon common stock in connection with the Wireless Transaction. The issuance of these new shares of Verizon common stock could have the effect of depressing the market price for Verizon common stock.

In addition, many Vodafone shareholders are already shareholders of Verizon and those shareholders may decide not to hold the additional Verizon shares they will receive in the Wireless Transaction. Other Vodafone shareholders, such as funds with geographic limitations on their permitted investments, may be required to sell the shares of Verizon common stock that they receive in the Wireless Transaction. Such sales of Verizon common stock could also have the effect of depressing the market price for Verizon common stock.

The failure to complete the Wireless Transaction or to do so within the anticipated time frame, or to realize the expected benefits of the Wireless Transaction, could negatively affect the price of Verizon shares and the future business and financial results of Verizon.

The closing of the Wireless Transaction, which is expected to occur during the first quarter of 2014, is subject to the satisfaction or waiver of certain conditions, many of which are beyond the control of Verizon or Vodafone, including, among others, regulatory approvals and approvals by the shareholders of Verizon and the shareholders of Vodafone. Any delay in completion of the Wireless Transaction could reduce the expected benefits of the Wireless Transaction and adversely affect Verizon's results of operations. Moreover, there can be no assurance that Verizon will realize the benefits which it seeks to achieve from the Wireless Transaction.

Table of Contents

If the Wireless Transaction is not completed, Verizon will be subject to a number of risks, including the following:

paying termination fees or reimbursing expenses under the Stock Purchase Agreement, including a termination fee payable by Verizon to Vodafone of \$10.0 billion in the event of a termination by Vodafone because of a financing failure, \$4.65 billion in the event of a termination by Vodafone as a result of a Verizon change of recommendation or \$1.55 billion in the event of a termination by either party as a result of failure to obtain Verizon shareholder approval of the share issuance or reimbursing Vodafone's expenses in an amount up to \$1.55 billion in the event of a termination as a result of a material uncured or incurable breach of the Stock Purchase Agreement by Verizon;

facing negative reactions from the financial markets as a result of not completing the Wireless Transaction; and

without realizing any of the expected benefits of the Wireless Transaction, having dedicated substantial time and resources, including the attention of management, to the Wireless Transaction instead of to the pursuit of other business opportunities that could have been beneficial to Verizon.

Additionally, if the Wireless Transaction has not been completed on or before September 2, 2014 or the Stock Purchase Agreement is terminated prior to such date, Verizon will be required to redeem the \$49.0 billion aggregate principal amount of new notes at a 1% premium over their face value on the earlier of October 2, 2014 if the Wireless Transaction was not completed on or before September 2, 2014 and the twentieth business day after termination of the Stock Purchase Agreement.

If the Wireless Transaction is not completed, these risks may materialize and could have a material adverse effect on the share price, business and cash flows, financial condition and results of operations of Verizon.

If the Wireless Transaction is completed on or after May 1, 2014 for any reason other than as a result of Vodafone's or Seller's breach of the Stock Purchase Agreement, the purchase price will be increased by \$10 million in cash for each day from and including May 1, 2014 through and including the closing date.

Additionally, Verizon is subject to litigation, and in the future may be subject to further litigation, challenging the Wireless Transaction on various grounds. While Verizon believes the pending litigation is without merit, no assurances can be given that such litigation will not prevent or delay the closing of the Wireless Transaction or increase the costs of the Wireless Transaction to Verizon.

Verizon's debt has increased significantly, will increase further in connection with the financing of the Wireless Transaction and could increase further if Verizon incurs additional debt in the future and does not retire existing debt.

As of June 30, 2013, Verizon had approximately \$49.8 billion of outstanding indebtedness, as well as approximately \$6.1 billion of unused borrowing capacity under its existing credit facility. Since that date, Verizon has issued \$49.0 billion in aggregate principal amount of fixed and floating rate notes and entered into a 364-day revolving credit agreement that provides an additional \$2 billion of unused borrowing capacity subject to the satisfaction of certain conditions, including the consummation of the Wireless Transaction. Verizon also may incur up to \$12.0 billion of additional indebtedness under the term loan agreement to finance the cash consideration. Moreover, as part of the Wireless Transaction, Verizon is acquiring from Vodafone an entity that previously issued mandatorily redeemable preferred stock with a face amount of \$1.65 billion and is issuing Verizon notes to Vodafone in an aggregate principal amount of \$5.0 billion. Verizon's debt level and related debt service obligations could have negative consequences, including:

requiring Verizon to dedicate significant cash flow from operations to the payment of principal, interest and other amounts payable on its debt and the preferred stock issued by the entity to be acquired from Vodafone, which would reduce the funds Verizon has available for other purposes, such as working capital, capital expenditures and acquisitions;

making it more difficult or expensive for Verizon to obtain any necessary future financing for working capital, capital expenditures, debt service requirements, debt refinancing, acquisitions or other purposes;

reducing Verizon's flexibility in planning for or reacting to changes in its industry and market conditions;

making Verizon more vulnerable in the event of a downturn in its business; and

exposing Verizon to interest rate risk given that a portion of its debt obligations are at variable interest rates.

Table of Contents

In addition, the term loan agreement requires Verizon to maintain a certain leverage ratio unless Verizon's credit ratings are at or above a certain level, which could limit Verizon's ability to obtain additional financing in the future.

Verizon has incurred and will incur significant direct and indirect transaction and transaction-related costs in connection with the Wireless Transaction.

Verizon expects to incur a number of non-recurring costs in connection with the Wireless Transaction, including financing costs and legal, banking, accounting and other professional fees. Although Verizon expects that the benefits of the Wireless Transaction will offset these transaction and transaction-related costs over time, these net benefits may not be achieved in the near term or at all.

While the Wireless Transaction is pending, Verizon will be subject to contractual limitations that could adversely affect its business.

The Stock Purchase Agreement restricts Verizon from taking certain specified actions while the Wireless Transaction is pending without Vodafone's consent. These restrictions may prevent Verizon from pursuing otherwise attractive business opportunities and making other changes to its business prior to closing of the Wireless Transaction or termination of the Stock Purchase Agreement.

The Stock Purchase Agreement contains provisions that limit the ability of the Verizon Board of Directors to change its recommendation with respect to the Wireless Transaction, and such a change in recommendation would give Vodafone a right to terminate the Stock Purchase Agreement and receive a termination fee from Verizon.

Under the Stock Purchase Agreement, the Board of Directors of Verizon is limited in its ability to change its recommendation with respect to the share issuance in connection with the Wireless Transaction. In the event of such a change in recommendation by Verizon's Board of Directors, Vodafone would be permitted to terminate the Stock Purchase Agreement. If Vodafone terminated the Stock Purchase Agreement on this basis, Verizon would be required to pay Vodafone a termination fee of \$4.65 billion.

Verizon shareholders will have a reduced ownership and voting interest after the Wireless Transaction.

Depending on the trading prices of Verizon common stock prior to the closing of the Wireless Transaction, and subject to the assumptions described in the preliminary proxy statement filed in connection with the Wireless Transaction, it is expected that current Verizon shareholders will collectively own between approximately 69% and 71% of Verizon's outstanding common stock immediately following the closing, and current Vodafone shareholders will collectively own between approximately 29% and 31% of Verizon's outstanding common stock immediately following the closing. Consequently, current Verizon shareholders, as a group, will have reduced ownership and voting power in Verizon immediately following completion of the Wireless Transaction compared to their ownership and voting power in Verizon immediately prior to completion of the Wireless Transaction.

Risks Related to Verizon's Business

Adverse conditions in the U.S. and international economies could impact our results of operations.

Unfavorable general economic conditions, such as a recession or economic slowdown in the United States or elsewhere, could negatively affect the affordability of and demand for some of our products and services. In difficult economic conditions, consumers may seek to reduce discretionary spending by forgoing purchases of our products, electing to use fewer higher margin services or obtaining lower-cost products and services offered by other companies. Similarly, under these conditions, the business customers that we serve may delay purchasing decisions, delay full implementation of service offerings or reduce their use of services. In addition, adverse economic conditions may lead to an increased number of our consumer and business customers that are unable to pay for services. If these events were to occur, it could have a material adverse effect on our results of operations.

We face significant competition that may reduce our market share and lower our profits.

We face significant competition in our industry. The rapid development of new technologies, services and products has eliminated many of the traditional distinctions between wireless, cable, Internet, local and long distance communication services and brought new competitors to our markets, including other telephone companies, cable companies, wireless service providers, satellite providers, application and device providers, electric utilities and providers of voice over Internet protocol (VoIP) services. While these changes have enabled us to offer new types of services, they have also allowed other service providers to broaden the scope of their own competitive offerings. Our ability to compete effectively will depend on, among other things, our

Table of Contents

network quality, capacity and coverage, the pricing of our services and equipment, the quality of our customer service, our development of new and enhanced products and services, the reach and quality of our sales and distribution channels and our capital resources. It will also depend on how successfully we anticipate and respond to various factors affecting our industry, including new technologies and business models, changes in consumer preferences and demand for existing services, demographic trends and economic conditions. If we are not able to respond successfully to these competitive challenges, we could lose market share and experience reduced profits.

If we are not able to adapt to changes in technology and address changing consumer demand on a timely basis, we may experience a decline in the demand for our services, be unable to implement our business strategy and experience reduced profits.

Our industry is experiencing rapid change as new technologies are developed that offer consumers an array of choices for their communications needs. In order to grow and remain competitive, we will need to adapt to future changes in technology, enhance our existing offerings and introduce new offerings to address our customers' changing demands. If we are unable to meet future challenges from competing technologies on a timely basis or at an acceptable cost, we could lose customers to our competitors. We may not be able to accurately predict technological trends or the success of new services in the market. In addition, there could be legal or regulatory restraints to our introduction of new services. If our services fail to gain acceptance in the marketplace, or if costs associated with implementation and completion of the introduction of these services materially increase, our ability to retain and attract customers could be adversely affected.

In addition to introducing new technologies and offerings, we must phase out outdated and unprofitable technologies and services. If we are unable to do so on a cost-effective basis, we could experience reduced profits. In addition, there could be legal or regulatory restraints on our ability to phase out current services.

We depend on key suppliers and vendors to provide equipment that we need to operate our business.

We depend on various key suppliers and vendors to provide us, directly or through other suppliers, with equipment and services, such as switch and network equipment and handsets, that we need in order to operate our business and provide products to our customers. For example, our handset and other device suppliers often rely on one vendor for the manufacture and supply of critical components, such as chipsets, used in their devices. If these suppliers or vendors fail to provide equipment or service on a timely basis or fail to meet our performance expectations, we may be unable to provide products and services as and when requested by our customers. We also may be unable to continue to maintain or upgrade our networks. Because of the costs and time lags that can be associated with transitioning from one supplier to another, our business could be substantially disrupted if we were required to, or chose to, replace the products or services of one or more major suppliers with products or services from another source, especially if the replacement became necessary on short notice. Any such disruption could increase our costs, decrease our operating efficiencies and have a material adverse effect on our business, results of operations and financial condition.

The suppliers and vendors on which we rely may also be subject to litigation with respect to technology on which we depend, including litigation involving claims of patent infringement. Such claims have been growing rapidly in the communications industry. We are unable to predict whether our business will be affected by any such litigation. We expect our dependence on key suppliers to continue as we develop and introduce more advanced generations of technology.

Changes in the regulatory framework under which we operate could adversely affect our business prospects or results of operations.

Our domestic operations are subject to regulation by the FCC and other federal, state and local agencies, and our international operations are regulated by various foreign governments and international bodies. These regulatory regimes frequently restrict or condition our ability to operate in designated areas and to provide specified products or services. We are frequently required to maintain licenses for our operations and conduct our operations in accordance with prescribed standards. We are often involved in regulatory and other governmental proceedings related to the application of these requirements. It is impossible to predict with any certainty the outcome of pending federal and state regulatory proceedings relating to our operations, or the reviews by federal or state courts of regulatory rulings. Without relief, existing laws and regulations may inhibit our ability to expand our business and introduce new products and services. Similarly, we cannot guarantee that we will be successful in obtaining the licenses needed to carry out our business plan or in maintaining our existing licenses. For example, the FCC grants wireless licenses for terms generally lasting 10 years, subject to renewal. The loss of, or a material limitation on, certain of our licenses could have a material adverse effect on our business, results of operations and financial condition.

New laws or regulations or changes to the existing regulatory framework at the federal, state and local, or international level could restrict the ways in which we manage our wireline and wireless networks, impose additional costs, impair revenue opportunities, and potentially impede our ability to provide services in a manner that would be attractive to us and our customers. For example, the development of new technologies, such as intellectual property-based services, VoIP, and/or super high-speed broadband and video, could be subject to conflicting regulation by the FCC and/or various state and local authorities, which could significantly increase the cost of implementing and introducing new services. As

another example, we hold certain wireless licenses that require us to comply with so-called open access FCC regulations, which generally require licensees of particular

Table of Contents

spectrum to allow customers to use devices and applications of their choice. In addition, our broadband Internet access services are subject to so-called network neutrality rules, which are subject to a pending appeal, imposed by the FCC. These rules limit the ways that a broadband Internet access service provider can manage its network and the services it can provide over the network. The scope of both the open access and net neutrality rules are not fully defined. The further regulation of broadband, wireless, and our other activities and any related court decisions could restrict our ability to compete in the marketplace and limit the return we can expect to achieve on past and future investments in our networks.

Cyber attacks or other breaches of network or information technology security could have an adverse effect on our business.

Cyber attacks or other breaches of network or information technology (IT) security may cause equipment failures or disruptions to our operations. Our inability to operate our wireline or wireless networks as a result of such events, even for a limited period of time, may result in significant expenses and/or loss of market share to other communications providers. In addition, the potential liabilities associated with these events could exceed the insurance coverage we maintain. Cyber attacks, which include the use of malware, computer viruses and other means for disruption or unauthorized access, on companies, including Verizon, have increased in frequency, scope and potential harm in recent years. While, to date, we have not been subject to cyber attacks or other cyber incidents which, individually or in the aggregate, have been material to our operations or financial condition, the preventive actions we take to reduce the risk of cyber incidents and protect our information technology and networks may be insufficient to repel a major cyber attack in the future. The costs associated with a major cyber attack on Verizon could include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cyber security measures, lost revenues from business interruption, litigation and damage to our reputation. Further, certain of Verizon's businesses, including the provisioning of security solutions and infrastructure and cloud services to business customers, could be negatively affected if our ability to protect our own networks is called into question as a result of a cyber attack. In addition, if we fail to prevent the theft of valuable information such as financial data, sensitive information about Verizon and intellectual property, or if we fail to protect the privacy of customer and employee confidential data against breaches of network or IT security, it could result in damage to our reputation, which could adversely impact customer and investor confidence. Any of these occurrences could result in a material adverse effect on our results of operations and financial condition.

Natural disasters, terrorist acts or acts of war could cause damage to our infrastructure and result in significant disruptions to our operations.

Our business operations are subject to interruption by natural disasters, power outages, terrorist attacks, other hostile acts and events beyond our control. Such events could cause significant damage to our infrastructure upon which our business operations rely, resulting in degradation or disruption of service to our customers. While we maintain insurance coverage for some of these events, the potential liabilities associated with these events could exceed the insurance coverage we maintain. Our system redundancy may be ineffective or inadequate, and our disaster recovery planning may not be sufficient for all eventualities. These events could also damage the infrastructure of the suppliers that provide us with the equipment and services we need to operate our business and provide products to our customers. A natural disaster or other event causing significant physical damage could cause us to experience substantial losses resulting in significant recovery time and expenditures to resume operations. In addition, these occurrences could result in lost revenues from business interruption as well as damage to our reputation.

Adverse changes in the credit markets could increase our borrowing costs and the availability of financing.

We require a significant amount of capital to operate and grow our business. We fund our capital needs in part through borrowings in the public and private credit markets. Adverse changes in the credit markets, including increases in interest rates, could increase our cost of borrowing and/or make it more difficult for us to obtain financing for our operations or refinance existing indebtedness. In addition, our borrowing costs can be affected by short- and long-term debt ratings assigned by independent rating agencies, which are based, in significant part, on our performance as measured by customary credit metrics. A decrease in these ratings would likely increase our cost of borrowing and/or make it more difficult for us to obtain financing. A severe disruption in the global financial markets could impact some of the financial institutions with which we do business, and such instability could affect our access to financing.

Table of Contents

Increases in costs for pension benefits and active and retiree healthcare benefits may reduce our profitability and increase our funding commitments.

With approximately 172,000 employees and approximately 208,000 retirees as of October 1, 2013 eligible to participate in Verizon's benefit plans, the costs of pension benefits and active and retiree healthcare benefits have a significant impact on our profitability. Our costs of maintaining these plans, and the future funding requirements for these plans, are affected by several factors, including the continuing implementation of the provisions of the Patient Protection and Affordable Care Act and the Health Care Education Reconciliation Act of 2010, increases in healthcare costs, decreases in investment returns on funds held by our pension and other benefit plan trusts and changes in the discount rate used to calculate pension and other postretirement expenses. If we are unable to limit future increases in the costs of our benefit plans, those costs could reduce our profitability and increase our funding commitments.

A significant portion of our workforce is represented by labor unions, and we could incur additional costs or experience work stoppages as a result of the renegotiation of our labor contracts.

As of October 1, 2013, approximately 29% of our workforce was represented by labor unions. We are currently engaged in contract negotiations with labor unions representing approximately 7,100 employees of our wireline business, and we will engage in additional negotiations as other labor contracts expire in the future. Depending on the outcome of these negotiations, we could incur additional costs and/or experience lengthy work stoppages, which could adversely affect our business operations, including causing a loss of revenue and strained relationships with customers.

We are subject to a significant amount of litigation, which could require us to pay significant damages or settlements.

Our business faces a substantial amount of litigation, including, from time to time, patent infringement lawsuits, antitrust class actions, wage and hour class actions, personal injury claims and lawsuits relating to our advertising, sales, billing and collection practices. In addition, our wireless business also faces personal injury and consumer class action lawsuits relating to alleged health effects of wireless phones or radio frequency transmitters, and class action lawsuits that challenge marketing practices and disclosures relating to alleged adverse health effects of handheld wireless phones. We may incur significant expenses in defending these lawsuits. In addition, we may be required to pay significant awards or settlements.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Verizon did not repurchase any shares of Verizon common stock during the three months ended September 30, 2013. At September 30, 2013, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 96.5 million.
