POWERSHARES DB MULTI-SECTOR COMMODITY TRUST

PowerShares DB Agriculture Fund	153,772,875	Common Units of Beneficial Interest
--	--------------------	--

PowerShares DB Multi-Sector Commodity Trust, or the Trust, is organized in seven separate series as a Delaware statutory trust, one of which is offered pursuant to this Prospectus. PowerShares DB Agriculture Fund, or the Fund, is a series of the Trust. The Fund issues common units of beneficial interest, or Shares, which represent units of fractional undivided beneficial interest in and ownership of the Fund.

Authorized Participants may sell the Shares they purchase from the Fund in blocks of 200,000 Shares, called Baskets, to other investors at prices that are expected to reflect, among other factors, the trading price of the Fund's Shares on the NYSE Arca, Inc., or the NYSE Arca, and the supply of and demand for Shares of the Fund at the time of sale and are expected to fall between net asset value and the trading price of the Shares of the Fund on the NYSE Arca at the time of sale.

The Shares trade on the NYSE Arca under the symbol DBA.

The Fund trades exchange-traded futures contracts on the commodities comprising the DBIQ Diversified Agriculture Index Excess Return, or the Index, with a view to tracking the Index over time. The Fund also earns interest income from United States Treasury and other high credit quality short-term fixed income securities.

The Index, which is comprised of one or more underlying commodities, or Index Commodities, is intended to reflect the agricultural sector. The Index Commodities consist of Corn, Soybeans, Wheat, Kansas City Wheat, Sugar, Cocoa, Coffee, Cotton, Live Cattle, Feeder Cattle and Lean Hogs.

The common units of beneficial interest of five of the other six series of the Trust (PowerShares DB Energy Fund, PowerShares DB Oil Fund, PowerShares DB Precious Metals Fund, PowerShares DB Gold Fund and PowerShares DB Base Metals Fund) are offered pursuant to a separate prospectus. The common units of beneficial interest of the sixth series of the Trust, PowerShares DB Silver Fund, is offered pursuant to a separate prospectus.

Edgar Filing: PowerShares DB Multi-Sector Commodity Trust - Form 424B3

Except when aggregated in Baskets, the Shares are not redeemable securities.

DB Commodity Services LLC serves as the Managing Owner, commodity pool operator and commodity trading advisor of the Fund.

INVESTING IN THE SHARES INVOLVES SIGNIFICANT RISKS. PLEASE REFER TO THE RISKS YOU FACE BEGINNING ON PAGE 18.

Futures trading is volatile and even a small movement in market prices could cause large losses.

The success of the Fund's trading program depends upon the skill of the Managing Owner and its trading principals.

You could lose all or substantially all of your investment.

The Index is concentrated in a small number of commodities. Concentration may result in greater volatility.

Investors pay fees in connection with their investment in the Shares, including asset-based fees of 0.85% per annum. Additional charges include brokerage fees of approximately 0.16% per annum in the aggregate.

Authorized Participants may offer to the public, from time-to-time, Shares from any Baskets they create. Shares offered to the public by Authorized Participants will be offered at a per-Share offering price that will vary depending on, among other factors, the trading price of the Shares on the NYSE Arca, the net asset value per Share and the supply of and demand for the Shares at the time of the offer. Shares initially comprising the same Basket but offered by Authorized Participants to the public at different times may have different offering prices. Authorized Participants will not receive from the Fund, the Managing Owner or any of their affiliates, any fee or other compensation in connection with their sale of Shares to the public.

An Authorized Participant may receive commissions or fees from investors who purchase Shares through their commission or fee-based brokerage accounts. In addition, the Managing Owner pays a distribution services fee to ALPS Distributors, Inc. and pays a marketing fee to Invesco Distributors, Inc. without reimbursement from the Trust or the Fund. For more information regarding these items of compensation paid to FINRA members, please see the Plan of Distribution section on page 93.

These securities have not been approved or disapproved by the Securities and Exchange Commission or any state securities commission nor has the Securities and Exchange Commission or any state securities commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense. The Fund is not a mutual fund or any other type of investment company within the meaning of the Investment Company Act of 1940, as amended, and the Fund is not subject to regulation thereunder.

THE COMMODITY FUTURES TRADING COMMISSION HAS NOT PASSED UPON THE MERITS OF PARTICIPATING IN THIS POOL NOR HAS THE COMMISSION PASSED ON THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

The Shares are neither interests in nor obligations of any of the Managing Owner, the Trustee or any of their respective affiliates. The Shares are not insured by the Federal Deposit Insurance Corporation or any other governmental agency.

The Trust and the Fund

PowerShares DB Multi-Sector Commodity Trust, or the Trust, was formed as a Delaware statutory trust, in seven separate series, or funds, on August 3, 2006. PowerShares DB Agriculture Fund, or the Fund, is a series of the Trust. The Fund issues common units of beneficial interest, or Shares, which represent units of fractional undivided beneficial interest in and ownership of the Fund. The term of the Trust and the Fund is perpetual (unless terminated earlier in certain circumstances). The principal offices of the Trust and the Fund are located at c/o DB Commodity Services LLC, 60 Wall Street, New York, New York 10005, and the telephone number of each of them is (212) 250-5883.

The Trust was organized in separate series as a Delaware statutory trust rather than as separate statutory trusts in order to achieve certain administrative efficiencies. The interests of investors are not adversely affected by the choice of form of organization. As of the date of this Prospectus, the Trust consists of the following seven series PowerShares DB Energy Fund, PowerShares DB Oil Fund, PowerShares DB Precious Metals Fund, PowerShares DB Gold Fund, PowerShares DB Silver Fund, PowerShares DB Base Metals Fund and PowerShares DB Agriculture Fund. This Prospectus is for the Fund only and not for the first 6 funds listed in the prior sentence, or the Sectors Funds. The Sectors Funds, which are series of the Trust, are not being

offered by this Prospectus. Information regarding both the Fund and the Sectors Funds (and any other additional series of the Trust, as applicable) is available at www.dbxus.com.

Shares Listed on the NYSE Arca

The Shares of the Fund are listed on the NYSE Arca under the symbol DBA.

Secondary market purchases and sales of Shares will be subject to ordinary brokerage commissions and charges.

Purchases and Sales in the Secondary Market on the NYSE Arca

The Shares trade on the NYSE Arca like any other equity security.

Baskets of Shares may be created or redeemed only by Authorized Participants. It is expected that Baskets will be created when the market price per Share is at a premium to the net asset value per Share. Authorized Participants are expected to sell such Shares, which are listed on the NYSE Arca, to the public at prices that are expected to reflect, among other factors, the trading price of the Shares on the NYSE Arca and the supply of and demand for Shares at the time of sale and are expected to fall between net asset value and the trading price of the Shares on the NYSE Arca at the time of sale. Similarly, it is expected that Baskets will be redeemed when the market price per Share is at a discount to the net asset value per Share. Retail investors seeking to purchase or sell Shares on any day are expected to effect such transactions in the secondary market, on the NYSE Arca, at the market price per Share, rather than in connection with the creation or redemption of Baskets.

The market price of the Shares may not be identical to the net asset value per Share, but these valuations are expected to be very close. Investors are able to use the indicative intra-day value per Share to determine if they want to purchase in the secondary market via the NYSE Arca. The intra-day indicative value per Share is based on the prior day's final net asset value, adjusted four times per minute throughout the day to reflect the continuous price changes of the Fund's futures positions to provide a continuously updated estimated net asset value per Share.

Table of Contents

Retail investors may purchase and sell Shares through traditional brokerage accounts. Purchases or sales of Shares may be subject to customary brokerage commissions. Investors are encouraged to review the terms of their brokerage accounts for applicable charges.

Risk Factors

An investment in Shares is speculative and involves a high degree of risk. The summary risk factors set forth below are intended merely to highlight certain risks of the Fund. The Fund has particular risks that are set forth elsewhere in this Prospectus.

Past performance is not necessarily indicative of future results; all or substantially all of an investment in the Fund could be lost.

The trading of the Fund takes place in very volatile markets.

The Fund is subject to fees and expenses in the aggregate amount of approximately 1.01% per annum as described herein and will be successful only if its annual returns from futures trading, plus its annual interest income

Table of Contents

from its holdings of United States Treasury securities and other high credit quality short-term fixed income securities, exceed such fees and expenses of approximately 1.01% per annum. The Fund is expected to earn interest income equal to 0.05% per annum, based upon the yield of 3-month U.S. Treasury bills as of February 28, 2014, or \$0.01 per annum per Share at \$25.00 as the net asset value per Share. Therefore, based upon the difference between the current yield of 3-month U.S. Treasury bills and the annual fees and expenses, the Fund will be required to earn approximately 0.96% per annum, or \$0.25 per annum per Share at \$25.00 as the net asset value per Share, in order for an investor to break-even on an investment during the first twelve months of an investment. Actual interest income could be higher or lower than the current yield of 3-month U.S. Treasury bills.

As of the date of this Prospectus, the CFTC and commodity exchange rules impose speculative position limits on market participants trading in all eleven commodities included in the Index (Corn, Soybeans, Wheat, Kansas City Wheat, Sugar, Cocoa, Coffee, Cotton, Live Cattle, Feeder Cattle and Lean Hogs, or the Affected Index Commodities). Because the Fund is subject to position limits, its ability to issue new Baskets or its ability to reinvest income in additional futures contracts corresponding to the Affected Index Commodities may be limited to the extent that these activities would cause the Fund to exceed its applicable position limits. Limiting the size of the Fund may affect the correlation between the price of its Shares, as traded on the NYSE Arca, and its net asset value. That is, the inability to create additional Baskets could result in Shares trading at a premium or discount to net asset value of the Fund.

If the Managing Owner determines in its commercially reasonable judgment that it has become impracticable or inefficient for any reason for the Fund to gain full or partial exposure to any Index Commodity by investing in a specific futures contract that comprises the Index, the Fund may invest in a futures contract referencing the particular Index Commodity other than the specific contract that comprises the Index or, in the alternative, invest in other futures contracts not based on the particular Index Commodity if, in the commercially reasonable judgment of the Managing Owner, such futures contracts tend to exhibit trading prices that correlate with a futures contract that comprises the Index.

There can be no assurance that the Fund will achieve profits or avoid losses, significant or otherwise.

Performance of the Fund may not track the Index during particular periods or over the long term. Such tracking error may cause the Fund to outperform or underperform the Index.

Certain potential conflicts of interest exist between the Managing Owner and its affiliates and the Shareholders. For example, because the Managing Owner and the Commodity Broker are both indirect wholly-owned subsidiaries of Deutsche Bank AG, the Managing Owner has a disincentive to replace the Commodity Broker. The Commodity Broker may have a conflict of interest between its execution of trades for the Fund and for its other customers. More specifically, the Commodity Broker will benefit from executing orders for other clients, whereas the Fund may be harmed to the extent that the Commodity Broker has fewer resources to allocate to the Fund's accounts due to the existence of such other clients. Allocation of resources among the Commodity Broker's clients adds to the potential conflict. Proprietary trading by the affiliates of the Managing Owner and the Commodity Broker may create conflicts of interest from time-to-time because such proprietary trades may take a position that is opposite of that of the Fund or may compete with the Fund for certain positions within the marketplace. See Conflicts of Interest for a more complete disclosure of various conflicts. Although the Managing Owner has established procedures designed to resolve certain of these conflicts equitably, the Managing Owner has not established formal procedures to resolve all potential conflicts of interest. Consequently, investors may be dependent on the good faith of the respective parties subject to such conflicts to resolve them equitably. Although

Table of Contents

the Managing Owner attempts to monitor these conflicts, it is extremely difficult, if not impossible, for the Managing Owner to ensure that these conflicts will not, in fact, result in adverse consequences to the Fund.

The Trustee

Wilmington Trust Company, or the Trustee, a Delaware trust company, is the sole trustee of the Trust. The Trustee delegated to the Managing Owner all of the power and authority to manage the business and affairs of the Trust and the Fund and has only nominal duties and liabilities to the Trust and the Fund.

Investment Objective

The Fund seeks to track changes, whether positive or negative, in the level of the DBIQ Diversified Agriculture Index Excess Return , or the Index, over time, plus the excess, if any, of the Fund's interest income from its holdings of United States Treasury and other high credit quality short-term fixed income securities over its expenses. The Shares are designed for investors who want a cost-effective and convenient way to invest in commodity futures on U.S. and non-U.S. markets.

Advantages of investing in the Shares include:

Ease and Flexibility of Investment. The Shares trade on the NYSE Arca and provide institutional and retail investors with indirect access to commodity futures markets. The Shares may be bought and sold on the NYSE Arca like other exchange-listed securities. Retail investors may purchase and sell Shares through traditional brokerage accounts.

Margin. Shares are eligible for margin accounts.

Diversification. The Shares may help to diversify a portfolio because historically the Index has tended to exhibit low to negative correlation with both equities and conventional bonds and positive correlation to inflation.

Optimum Yield . The Shares seek to track the Index, a portion of which employs the Optimum Yield rolling methodology, which seeks to minimize the effects of negative roll yield that may be experienced by conventional commodities indexes.

Transparency. The Shares provide a more direct investment in commodities than mutual funds that invest in commodity-linked notes, which have implicit imbedded costs and credit risk.

Investing in the Shares does not insulate Shareholders from certain risks, including price volatility.

The Fund pursues its investment objective by investing in a portfolio of exchange-traded futures on the commodities comprising the Index.

Edgar Filing: PowerShares DB Multi-Sector Commodity Trust - Form 424B3

The Index, which is comprised of one or more underlying commodities, or Index Commodities, is intended to reflect the agricultural sector. The Index Commodities consist of Corn, Soybeans, Wheat, Kansas City Wheat, Sugar, Cocoa, Coffee, Cotton, Live Cattle, Feeder Cattle and Lean Hogs.

If the Managing Owner determines in its commercially reasonable judgment that it has become impracticable or inefficient for any reason for the Fund to gain full or partial exposure to any Index Commodity by investing in a specific futures contract that comprises the Index, the Fund may invest in a futures contract referencing the particular Index Commodity other than the specific contract that comprises the Index or, in the alternative, invest in other futures contracts not based on the particular Index Commodity if, in the commercially reasonable judgment of the Managing Owner, such futures contracts tend to exhibit trading prices that correlate with a futures contract that comprises the Index.

The Index Sponsor calculates the Index on both an excess return basis and a total return basis. The excess return basis calculation reflects the change in market value over time, whether positive or negative, of the applicable underlying commodity futures only. The total return basis calculation reflects the sum of the change in market value over time, whether positive or negative, of the applicable underlying commodity futures plus the return on 3-month U.S. Treasury bills. The Fund seeks to track changes, whether positive or negative, in the level of the Index over time, plus the excess, if any, of its interest income from its holdings of United States Treasury and other high credit quality short-term fixed income securities over its expenses.

Table of Contents

The Fund will make distributions at the discretion of the Managing Owner. To the extent that the Fund's actual and projected interest income from its holdings of United States Treasury securities and other high credit quality short-term fixed income securities exceeds the actual and projected fees and expenses of the Fund, the Managing Owner expects periodically to make distributions of the amount of such excess. The Fund currently does not expect to make distributions with respect to capital gains. Depending on the Fund's performance for the taxable year and your own tax situation for such year, your income tax liability for the taxable year for your allocable share of the Fund's net ordinary income or loss and capital gain or loss may exceed any distributions you receive with respect to such year.

The Fund's portfolio also will include United States Treasury securities and other high credit quality short-term fixed income securities for deposit with the Fund's Commodity Broker as margin.

General

Each of the DBIQ Optimum Yield Index Excess Return, or DBIQ-OYER, and the DBIQ Index Excess Return, or DBIQ ER (DBIQ-OYER and DBIQ ER, collectively, DBIQ or DBIQ ER), is intended to reflect the changes in market value, positive or negative, in certain sectors of commodities, or an index. The Index is calculated on an excess return, or unfunded basis. The Index is rolled on both an Optimum Yield™ and non-Optimum Yield™ basis. The Optimum Yield™ rolling methodology is aimed at potentially maximizing the roll benefits in backwardated markets and minimizing the losses from rolling in contangoed markets. The non-Optimum Yield™ portion of the Index is rolled to the next to expire futures contract as provided below under Contract Selection (Non-OY Single Commodity Indexes only). The Index is comprised of one or more underlying commodities, or Index Commodities. Each Index Commodity is assigned a weight, or Index Base Weight, which is intended to reflect the proportion of such Index Commodity relative to the Index.

The Index has been calculated back to a base date, or Base Date. On the Base Date of January 18, 1989, the closing level of the Index, or Closing Level, was 100.

The sponsor of the Index is Deutsche Bank AG London, or Index Sponsor.

Composition of the Index

The Index is composed of notional amounts of each of the underlying Index Commodities. The notional amount of each Index Commodity included in the Index is intended to reflect the changes in market value of each such Index Commodity within the Index. The Closing Level of the Index is calculated on each business day by the Index Sponsor based on the closing price of the futures contracts for each of the underlying Index Commodities and the notional amounts of such Index Commodities.

The Index is rebalanced annually in November to ensure that each of the Index Commodities is weighted in the same proportion that such Index Commodities were weighted on the Base Date.

Edgar Filing: PowerShares DB Multi-Sector Commodity Trust - Form 424B3

The composition of the Index may be adjusted in the event that the Index Sponsor is not able to calculate the closing prices of the Index Commodities.

The Index includes provisions for the replacement of futures contracts as they approach maturity. This replacement takes place over a period of time in order to lessen the impact on the market for the futures contracts being replaced. With respect to each Index Commodity, the Fund employs a rule-based approach when it rolls from one futures contract to another. The Index is comprised of OY Single Commodity Indexes and non-OY Single Commodity Indexes. The Index Commodities that underlie the OY Single Commodity Indexes are Corn, Soybeans, Wheat, Kansas City Wheat and Sugar. The Index Commodities that underlie the non-OY Single Commodity Indexes are Cocoa, Coffee, Cotton, Live Cattle, Feeder Cattle and Lean Hogs. The OY Single Commodity Indexes are rolled to the futures contract which generates the best possible implied roll yield. The futures contract with a delivery month within the next thirteen months which generates the best possible implied roll yield will be included in each OY Single Commodity Index. As a result, each OY Single Commodity Index is able to potentially maximize the roll benefits in backwardated markets and minimize the losses from rolling in contangoed markets.

Each of the non-OY Single Commodity Indexes rolls only to the next to expire futures contract as provided below under Contract Selection (Non-OY Single Commodity Indexes only).

In general, as a futures contract approaches its expiration date, its price will move towards the spot

Table of Contents

price in a contangoed market. Assuming the spot price does not change, this would result in the futures contract price decreasing and a negative implied roll yield. The opposite is true in a backwardated market. Rolling in a contangoed market will tend to cause a drag on an Index Commodity's contribution to the Fund's return while rolling in a backwardated market will tend to cause a push on an Index Commodity's contribution to the Fund's return.

The futures contract price for each Index Commodity will be the exchange closing price for such Index Commodity on each weekday when banks in New York, New York are open, or Index Business Days. If a weekday is not an Exchange Business Day (as defined in the following sentence) but is an Index Business Day, the exchange closing price from the previous Index Business Day will be used for each Index Commodity. Exchange Business Day means, in respect of an Index Commodity, a day that is a trading day for such Index Commodity on the relevant exchange (unless either an Index disruption event or force majeure event has occurred).

Contract Selection (OY Single Commodity Indexes only)

On the first New York business day, or Verification Date, of each month, each Index Commodity futures contract will be tested in order to determine whether to continue including it in the applicable OY Single Commodity Index. If the Index Commodity futures contract requires delivery of the underlying commodity in the next month, known as the Delivery Month, a new Index Commodity futures contract will be selected for inclusion in such OY Single Commodity Index. For example, if the first New York business day is May 1, 2014, and the Delivery Month of the Index Commodity futures contract currently in such OY Single Commodity Index is June 2014, a new Index Commodity futures contract with a later Delivery Month will be selected.

For each underlying Index Commodity of an OY Single Commodity Index, the new Index Commodity futures contract selected will be the Index Commodity futures contract with the best possible implied roll yield based on the closing price for each eligible Index Commodity futures contract. Eligible Index Commodity futures contracts are any Index Commodity futures contracts having a Delivery Month (i) no sooner than the month after the Delivery Month of the Index Commodity futures contract currently in such OY Single

Commodity Index, and (ii) no later than the 13th month after the Verification Date. For example, if the first New York business day is May 1, 2014 and the Delivery Month of an Index Commodity futures contract currently in an OY Single Commodity Index is therefore June 2014, the Delivery Month of an eligible new Index Commodity futures contract must be between July 2014 and June 2015. The implied roll yield is then calculated and the futures contract on the Index Commodity with the best possible implied roll yield is then selected. If two futures contracts have the same implied roll yield, the futures contract with the minimum number of months prior to the Delivery Month is selected.

After selection of the replacement futures contract, each OY Single Commodity Index will roll such replacement futures contract as provided in the sub-paragraph Monthly Index Roll Period with respect to both OY Single Commodity Indexes and Non-OY Single Commodity Indexes.

After selection of the replacement futures contract, each non-OY Single Commodity Index will roll such replacement futures contract as provided in the sub-paragraph Monthly Index Roll Period with respect to both OY Single Commodity Indexes and Non-OY Single Commodity Indexes.

Monthly Index Roll Period with respect to both OY Single Commodity Indexes and Non-OY Single Commodity Indexes

After the futures contract selection with respect to both OY Single Commodity Indexes and non-OY Single Commodity Indexes, the monthly roll for each Index Commodity subject to a roll in that particular month unwinds the old futures contract and enters a position in the new futures contract. This takes place between the 2nd and 6th Index Business Day of the month.

On each day during the roll period, new notional holdings are calculated. The calculations for the old Index Commodities that are leaving the Index and the new Index Commodities are then calculated.

On all days that are not monthly index roll days, the notional holdings of each Index Commodity future remains constant.

Edgar Filing: PowerShares DB Multi-Sector Commodity Trust - Form 424B3

The Index is re-weighted on an annual basis on the 6th Index Business Day of each November.

The calculation of the Index is expressed as the weighted average return of the Index Commodities.

Trade Mark applications in the United States are pending with respect to both the Trust and aspects of the Index. Any use of these marks must be with the consent

There can be no assurance that the Fund will achieve its investment objective or avoid substantial losses.

Shares Should Track Closely the Value of its Index

The Shares are intended to provide investment results that generally correspond to changes, positive or negative, in the levels of the Index, over time.

The value of the Shares is expected to fluctuate in relation to changes in the value of its portfolio. The market price of the Shares may not be identical to the net asset value per Share, but these two valuations are expected to be very close.

The Fund holds a portfolio of long futures contracts on the Index Commodities which comprise its Index, each of which are traded on various commodity futures markets in the United States and abroad. The Fund also holds cash and United States Treasury securities and other high credit quality short-term fixed income securities for deposit with its Commodity Broker as margin. The Fund's portfolio is traded with a view to tracking the changes in its Index over time, whether the Index is rising, falling or flat over any particular period. The Fund is not managed by traditional methods, which typically involve effecting changes in the composition of a portfolio on the basis of judgments relating to economic, financial and market considerations with a view to obtaining positive results.

The principal office of the Managing Owner is located at 60 Wall Street, New York, New York 10005. The telephone number of the Managing Owner is (212) 250-5883.

The Fund pays the Managing Owner a Management Fee, monthly in arrears, in an amount equal to 0.85% per annum of the daily net asset value of the Fund.

The Management Fee is paid in consideration of the Managing Owner's commodity futures trading advisory services.

The Commodity Broker

A variety of executing brokers execute futures transactions on behalf of the Fund. Such executing brokers give-up all such transactions to Deutsche Bank Securities Inc., a Delaware corporation, which serves as clearing broker, or Commodity Broker of the Fund. The Commodity Broker is an affiliate of the Managing Owner. In its capacity as clearing broker, the Commodity Broker executes and clears the Fund's futures transactions and performs certain administrative services for the Fund. Deutsche Bank Securities Inc. is registered with the CFTC as a futures commission merchant and is a member of the NFA in such capacity.

The Fund pays to the Commodity Broker all brokerage commissions, including applicable exchange fees, NFA fees, give-up fees, pit brokerage fees and other

transaction related fees and expenses charged in connection with trading activities for the Fund. On average, total charges paid to the Commodity Broker are expected to be less than \$10.00 per round-turn trade, although the Commodity Broker's brokerage commissions and trading fees are determined on a contract-by-contract basis. The Managing Owner does not expect brokerage commissions and fees to exceed 0.16% of the net asset value of the Fund in any year, although the actual amount of brokerage commissions and fees in any year or any part of any year may be greater.

A round-turn trade is a completed transaction involving both a purchase and a liquidating sale, or a sale followed by a covering purchase.

The Administration Agreement will continue in effect from the commencement of trading operations unless terminated on at least 90 days' prior written notice by either party to the other party. Notwithstanding the foregoing, the Administrator may terminate the Administration Agreement upon 30 days' prior written notice if the Fund has materially failed to perform its obligations under the Administration Agreement.

The Administration Agreement provides for the exculpation and indemnification of the Administrator from and against any costs, expenses, damages, liabilities or claims (other than those resulting from the Administrator's own bad faith, negligence or willful misconduct) which may be imposed on, incurred by or asserted against the Administrator in performing its obligations or duties under the Administration Agreement.
