Comments from José María Álvarez-Pallete, Executive Chairman:

Third quarter results showed growth acceleration in the main operational metrics, driven by a broad improvement across different business units, and reflected the success of our transformation strategy, initiated before most of our competitors, focused on network differentiation as a way to capture and monetise the growing demand for data, and on efficiencies, cost optimisation and synergy capture.

All this translated into an acceleration in deleverage in the quarter, mainly due to the significant improvement in free cash flow generation. In this context, the Company has decided to modify the dividend in order to strengthen the balance sheet and intensify organic deleverage, maintaining an attractive shareholder remuneration .
