

Nuveen Short Duration Credit Opportunities Fund
Form 497
March 13, 2017
PROSPECTUS

1 Million Common Shares

Nuveen Short Duration Credit Opportunities Fund

Nuveen Short Duration Credit Opportunities Fund (the Fund) is a diversified, closed-end management investment company. The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund seeks to achieve its investment objective by investing, under normal circumstances, at least 70% of its Managed Assets (as defined below under Portfolio Contents) in adjustable rate corporate debt instruments, including senior secured loans, second lien loans and other adjustable rate corporate debt instruments. The Fund's portfolio will be invested primarily in below investment grade adjustable corporate debt instruments (commonly referred to as junk bonds), including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. In addition, under normal circumstances, the Fund may make limited tactical investments in high yield debt and other debt instruments in an amount of up to 30% of its Managed Assets. Under normal circumstances, no more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any nationally recognized statistical rating organization (NRSRO) that rate such security or are unrated but judged to be of comparable quality by the Fund's investment sub-adviser, Symphony Asset Management, LLC. The Fund may also, under normal circumstances, enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Under normal circumstances, the Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers that are U.S. dollar or non-U.S. dollar denominated, including debt instruments of issuers located, or conducting their business in, emerging markets countries. In addition, the Fund uses leverage to seek to enhance current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective.

Investing in the Fund's common shares involves certain risks that are described in the Risk Factors section of this Prospectus (the Prospectus), including the specific risks relating to the Fund's use of leverage.

Neither the Securities and Exchange Commission (the SEC) nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information, dated March 8, 2017 (the SAI), containing additional information about the Fund, has been filed with the SEC and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI, the table of contents of which is on the last page of this Prospectus, annual and semi-annual reports to shareholders and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. You also may obtain a copy of the SAI (and other information regarding the Fund) from the SEC's web site (<http://www.sec.gov>).

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other governmental agency.

Portfolio Contents. The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets (as defined below) in adjustable rate senior loans and second lien loans. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein. The Fund also may enter into tactical short positions consisting primarily of high yield debt. The Fund may invest its Managed Assets without limit in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality; however, the Fund may not invest more than 30% of its Managed Assets in securities rated below CCC+ or Caa, including securities in default. Such debt instruments are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). The Fund may invest up to 20% of its Managed Assets in securities of non-U.S. Issuers, which may include debt securities of Issuers located, or conducting their business in, emerging market countries. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Managed Assets for this purpose includes the proceeds realized and managed from the Fund's use of leverage as set forth in the Fund's investment management agreement between Nuveen Fund Advisors, LLC and the Fund. Total assets for this purpose shall include assets attributable to the Fund's use of leverage.

Leverage. The Fund uses leverage to seek to enhance its potential current income and capital appreciation over time. There can be no assurance that the Fund's leverage strategy will be successful.

Adviser and Sub-Adviser. Nuveen Fund Advisors, LLC, the Fund's investment adviser, is responsible for determining the Fund's overall investment strategies and their implementation. Symphony Asset Management, LLC is the Fund's investment sub-adviser and oversees the day-to-day investment operations of the Fund.

The minimum price on any day at which Common Shares may be sold will not be less than the current net asset value per share plus the per share amount of the commission to be paid to the Fund's distributor, Nuveen Securities, LLC (Nuveen Securities). The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price. The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions. For information on how Common Shares may be sold, see the Plan of Distribution section of this Prospectus.

As of March 1, 2017, the Fund has sold an aggregate of 36,711 Common Shares, representing net proceeds to the Fund of \$731,376, after payment of commissions of \$7,388 in the aggregate.

Common Shares are listed on the New York Stock Exchange (the NYSE). The trading or ticker symbol of the Fund is JSD. The Fund's closing price on the NYSE on March 1, 2017 was \$18.40.

The date of this Prospectus is March 8, 2017

You should rely only on the information contained or incorporated by reference into this Prospectus. The Fund has not authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. The Fund is not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus. The Fund's business, financial condition and prospects may have changed since that date. The Fund will update this Prospectus to reflect any material changes to the disclosures herein.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the Statement of Additional Information (the SAI).

The Fund

Nuveen Short Duration Credit Opportunities Fund (the Fund) is a diversified, closed-end management investment company. See The Fund. The Fund's common shares, \$.01 par value (Common Shares), are traded on the New York Stock Exchange (the NYSE) under the symbol JSD. See Description of Common Shares. As of January 31, 2017, the Fund had 10,095,286 Common Shares outstanding, 35,000 Term Preferred Shares (referred to herein as TP Shares), and net assets applicable to Common Shares of \$183,682,149.

Investment Objectives and Policies

The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective.

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Managed Assets for this purpose includes the proceeds realized and managed from the Fund's use of leverage as set forth in the Fund's investment management agreement between Nuveen Fund Advisors, LLC (as defined under Investment Adviser) and the Fund. Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles). See The Fund's Investments for additional information on the types of securities in which the Fund may invest. Senior loans and second lien loans are made to U.S. and non-U.S. corporations, partnerships and other similar types of business entities (Borrowers, and each, a Borrower) that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate, primarily the London Interbank Offered Rate (LIBOR) (of any tenor, but typically between one month and six months, and currency), plus a premium, and are therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein. The Fund's investment objective and certain investment policies identified as such are considered fundamental and may not be changed without shareholder approval.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's average portfolio duration (including the effect of leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

The Fund may invest its Managed Assets without limit in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality; however, the Fund may not invest, at the time of investment, more than 30% of its Managed Assets in securities rated below CCC+ or Caa, including securities in default. Investment rating limitations are considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities. Investment grade quality securities are those securities that, at the time of investment, are (i) rated by at least one nationally recognized statistical rating organization (NRSRO) within the four highest grades (BBB- or Baa3 or better by Standard & Poor's Corporation, a division of The McGraw-Hill Companies (S&P), Moody's Investor Service Inc. (Moody's) or Fitch Ratings, part of the Fitch Group (Fitch)), or (ii) unrated but judged to be of comparable quality. The Fund may invest a substantial portion of its Managed Assets in debt instruments of below investment grade quality. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See Risks Issuer Level Risks Issuer Credit Risk, Risks Issuer Level Risks Below Investment Grade Risk and Risks Security Level Risks Short Exposure Risk.

The Fund uses leverage to seek to enhance current income and capital appreciation.

Under normal circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments.

The Fund will make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio manager to be of comparable quality. Investment rating limitations are considered to apply only at the time of investment and will not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities.

The Fund may enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this prospectus includes Borrowers (as defined below)) that are U.S. dollar or non-U.S. dollar denominated. The Fund's investments in debt instruments of non-U.S. issuers may include debt instruments located, or conducting their business, in emerging market countries.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange traded funds (ETFs)) that invest primarily in securities of the types in which the Fund may invest directly.

See The Fund's Investments, Investment Objective, and Investment Policies.

The Fund may enter into certain derivative transactions, such as credit default swaps and interest rate swaps, as a hedging technique to protect against potential adverse changes in the market value of portfolio instruments. The Fund also may use derivatives to attempt to protect the net asset value (NAV) of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective interest rate exposure, and as a temporary substitute for purchasing or selling particular instruments. From time to time, the Fund also may enter into derivative transactions such as total return swaps on an underlying index to create investment exposure to the extent such transactions may facilitate implementation of its strategy more efficiently than through outright purchases or sales of portfolio instruments.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten

duration). In this prospectus, average duration and average portfolio duration are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields adjusted to reflect the effect of the Fund's effective leverage. When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. Prices of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. In general, the value of a portfolio of instruments with a shorter duration can be expected to be less sensitive to interest rate changes than a portfolio with a longer duration. For example, the price of a bond with an effective duration of two years will rise (fall) two percent for every one percent decrease (increase) in its yield, and the price of a five-year duration bond will rise (fall) five percent for a one percent decrease (increase) in its yield. As of January 31, 2017, the average leverage-adjusted effective duration of the Fund's portfolio was 0.43 years.

During temporary defensive periods or in order to keep the Fund's cash fully invested, including during the period when the net proceeds of the offering of Common Shares are first being invested, the Fund may deviate from its investment policies and objective. During such periods, the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities, or may invest in short-, intermediate-, or long-term U.S. Treasury securities. There can be no assurance that such strategies will be successful. For a more complete discussion of the Fund's portfolio composition, see The Fund's Investments.

Investment Adviser

Nuveen Fund Advisors, LLC (NFALLC), the Fund's investment adviser, is responsible for overseeing the Fund's overall investment strategy and its implementation. NFALLC offers advisory and investment management services to a broad range of investment company clients. NFALLC has overall responsibility for management of the Fund, oversees the management of the Fund's portfolio, manages the Fund's business affairs and provides certain clerical, bookkeeping and other administrative services. NFALLC is located at 333 West Wacker Drive, Chicago, Illinois 60606. NFALLC is an indirect subsidiary of Nuveen, LLC (Nuveen), the investment management arm of Teachers Insurance and Annuity Association of America (TIAA). TIAA is a life insurance company founded in 1918 by the Carnegie Foundation for the Advancement of Teaching and is the companion organization of College Retirement Equities Fund. As of December 31, 2016, Nuveen managed approximately \$882 billion in assets, of which approximately \$126 billion was managed by NFALLC.

Sub-Adviser

Symphony Asset Management LLC (Symphony or Sub-Adviser) is the Fund s sub-adviser and oversees the day-to-day investment operations of the Fund.

Symphony, a registered investment adviser, is an indirect wholly-owned subsidiary of Nuveen Investments. Founded in 1994, Symphony had approximately \$18.7 billion in assets under management as of December 31, 2016. Symphony specializes in the management of both long-only and alternative equity and debt strategies.

Nuveen Securities, LLC (Nuveen Securities), a registered broker-dealer affiliate of NFALLC and Symphony, is involved in the offering of the Fund s Common Shares. See Plan of Distribution-Distribution Through At-the-Market Transactions.

Use of Leverage

Regulatory leverage consists of senior securities as defined under the Investment Company Act of 1940, as amended (the 1940 Act), which include (1) borrowings, including loans from financial institutions (Borrowings); (2) issuance of debt securities; and (3) issuance of preferred shares ((1), (2), and (3) are hereinafter collectively referred to as regulatory leverage).

In addition, the Fund may also enter into certain derivatives transactions, such as certain credit default swaps, total return swaps and bond futures, that have the economic effect of leverage by creating additional investment exposure. The Fund may utilize leverage to the extent permissible under the 1940 Act. See Use of Leverage and The Fund s Investments Portfolio Composition and Other Information Derivatives in the Prospectus and Hedging Transactions in the SAI.

The Fund currently employs regulatory leverage through borrowings and currently has outstanding TP Shares. As of December 31, 2016, the Fund had 35,000 TP Shares outstanding for a total of \$35 million. The Fund has entered into a credit agreement with State Street Bank and Trust Company as lender (State Street) (the Credit Agreement). The borrowing capacity under the Credit Agreement is \$75 million. The term of the Credit Agreement ends on August 3, 2017, unless extended. The Fund has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement. This credit facility is secured by substantially all of the assets of the Fund. As of July 31, 2016, the Fund s outstanding balance on the Credit Agreement was \$64,000,000. For the fiscal year ended July 31, 2016, the average daily balance outstanding and the average annual interest rate on these Borrowings were \$71,279,781 and 1.17%, respectively.

Leverage involves special risks. See Risk Factors Leverage Risk. There is no assurance that the Fund s leveraging strategy will be successful. The Fund will seek to invest the proceeds of any future

leverage in a manner consistent with the Fund's investment objective and policies. See Use of Leverage.

The Fund pays a management fee to NFALLC (which in turn pays a portion of its fee to the Fund's sub-adviser, Symphony) based on a percentage of Managed Assets. NFALLC will be responsible for using leverage to pursue the Fund's investment objectives, and will base its decision regarding whether and how much leverage to use for the Fund based on its assessment of whether such use of leverage is in the best interests of the Fund. However, the fact that a decision to employ or increase the Fund's leverage will have the effect, all other things being equal, of increasing Managed Assets and therefore NFALLC's fees means that NFALLC may have a conflict of interest in determining whether to use or increase leverage. NFALLC will seek to manage that potential conflict by leveraging the Fund (or increasing such leverage) when it determines that such action is in the best interest of the Fund and by periodically reviewing the Fund's performance and use of leverage with the Fund's Board of Trustees.

Offering Methods

The Fund may offer shares using one or more of the following methods: (i) at-the-market transactions through one or more broker-dealers that have entered into a selected dealer agreement with Nuveen Securities, one of the Fund's underwriters; (ii) through an underwriting syndicate; and (iii) through privately negotiated transactions between the Fund and specific investors. See Plan of Distribution.

Distribution Through At-the-Market Transactions. The Fund from time to time may issue and sell its Common Shares through Nuveen Securities, to certain broker-dealers that have entered into selected dealer agreements with Nuveen Securities. Currently, Nuveen Securities has entered into a selected dealer agreement with UBS Securities LLC (UBS) pursuant to which UBS will be acting as Nuveen Securities' sub-placement agent with respect to at-the-market offerings of Common Shares. Common Shares will only be sold on such days as shall be agreed to by the Fund and Nuveen Securities. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per share plus the per share amount of the commission to be paid to Nuveen Securities. The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen Securities with respect to sales of the Common Shares at a commission rate of up to 1.0% of the gross proceeds of the sale of Common Shares. Nuveen Securities will compensate broker-dealers participating in the offering at a rate of up to 0.8% of the gross sales proceeds of the sale of Common Shares

sold by that broker-dealer. Settlements of Common Share sales will occur on the third business day following the date of sale.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen Securities may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act"), and the compensation of Nuveen Securities may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, Nuveen Securities will act as underwriter on a reasonable efforts basis.

The offering of Common Shares pursuant to the Distribution Agreement (defined below under "Plan of Distribution - Distribution Through At-the-Market Transactions") will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Distribution Agreement. The Fund and Nuveen Securities each have the right to terminate the Distribution Agreement in its discretion at any time. See "Plan of Distribution - Distribution Through At-the-Market Transactions."

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

UBS, its affiliates and their respective employees hold or may hold in the future, directly or indirectly, investment interests in Nuveen Investments, Inc. and its funds. The interests held by employees of UBS or its affiliates are not attributable to, and no investment discretion is held by, UBS or its affiliates.

The Fund's closing price on the NYSE on March 1, 2017 was \$18.40.

Distribution Through Underwriting Syndicates. The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, underwriters will market and price the offering on an expedited basis (e.g., overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen Securities and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 5% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen Securities in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the

gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 91% of the closing market price of the Fund's Common Shares on the day prior to the offering date. See Plan of Distribution Distribution Through Underwriting Syndicates.

Distribution Through Privately Negotiated Transactions. The Fund, through Nuveen Securities, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares. No sales commission or other compensation will be paid to Nuveen Securities or any other FINRA member in connection with such transaction.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis. See Plan of Distribution Distribution Through Privately Negotiated Transactions.

Special Risk Considerations

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See Risk Factors for a more complete discussion of the special risk considerations of an investment in the Fund.

Investment and Market Risk. An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the securities owned by the Fund, substantially all of which are traded on a national securities exchange or in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. See Risk Factors Investment and Market Risk.

Recent Market Conditions. The financial crisis in the U.S. and global economies over the past several years, including the European sovereign debt crisis, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased and credit has become scarcer worldwide. Recent regulatory changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and the introduction of new international capital and liquidity requirements set forth by the Basel Committee on Banking Supervision (known as Basel III), may cause lending activity within the financial services sector to be constrained for several years as Basel III rules phase in and rules and regulations are promulgated and interpreted under the Dodd-Frank Act.

Since 2010, the risks of investing in certain foreign government debt have increased dramatically as a result of the ongoing European debt crisis, which began in Greece and has spread to varying degrees throughout various other European countries. These debt crises and the ongoing efforts of governments around the world to address these debt crises have also resulted in increased volatility and uncertainty in the global securities markets and it is impossible to predict the effects of these or similar events in the future on the Fund, though it is possible that these or similar events could have a significant adverse impact on the value and risk profile of the Fund. In the United States, on August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. federal government debt to AA+ from AAA. Any additional downgrade by S&P, or any other rating agency, could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt.

Global economies and financial markets are also becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. For example, in a referendum held on June 23, 2016, citizens of the United Kingdom voted to leave the European Union (EU), creating economic and political uncertainty in its wake. The country's departure from the EU (known as Brexit) sparked depreciation in the value of the British pound, short-term declines in the stock markets and heightened risk of continued economic volatility worldwide.

As a consequence of the United Kingdom's vote to withdraw from the EU, the government of the United Kingdom may, pursuant to the Treaty of Lisbon (the Treaty), give notice of its withdrawal and enter into negotiations with the EU Council to agree to terms for the United Kingdom's withdrawal from the EU. The Treaty provides for a two-year negotiation period, which may be shortened or extended by agreement of the parties. However, there is still considerable uncertainty relating to the potential consequences and precise

timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom's exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties.

The impact of these developments in the near- and long-term is unknown and could have additional adverse effects on economies, financial markets and asset valuations around the world.

Market Discount from Net Asset Value. Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be reduced by shareholder transaction costs (if applicable, which vary depending on the offering method used). Depending on the premium of the Common Shares at the time of any offering of Common Shares hereunder, the Fund's net asset value may be reduced by an amount up to the offering costs borne by the Fund.

The net asset value per Common Share will also be reduced by costs associated with any future issuances of Common or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes. See *Risk Factors* *Market Discount from Net Asset Value*.

Issuer Level Risks.

Issuer Credit Risk. Issuers of debt instruments in which the Fund may invest may default on their obligations to pay principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of a debt instrument experiencing non-payment and, potentially, a decrease in the net asset value of the Fund. Even if an issuer remains current on principal and interest payments, a deterioration the market's perception of the issuer's ability to make such payments in the future may cause a reduction in the value of the issuer's securities, and a commensurate

decrease in the value of the Fund's net assets, to the extent that an issuer must refinance its debt instruments in order to make principal payments at maturity, the issuer's inability to refinance may present increased risk of loss to the Fund. There can be no assurance that liquidation of collateral would satisfy the issuer's obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a debt instrument. See *Risks Issuer Level Risks Issuer Credit Risk*.

Below Investment Grade Risk. The Fund may invest without limitation in debt instruments that are rated below investment grade at the time of investment or that are unrated but judged by the portfolio managers to be of comparable quality. No more than 30% of the Fund's Managed Assets may be invested in debt instruments rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. Issuers of lower grade instruments may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade instruments are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher rated instruments. The secondary market for lower rated instruments, including some senior loans, may not be as liquid as the secondary market for more highly rated instruments, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. Distressed and defaulted securities, including debtor-in-possession loans, generally present the same risks as investments in below investment grade debt instruments. However, in most cases, these risks are of a greater magnitude because of the uncertainties of investing in an issuer undergoing financial distress. See *Risks Issuer Level Risks Below Investment Grade Risk*.

Non-U.S. Issuer Risk. Investments in instruments of non-U.S. issuers may involve special risks not presented by investments in instruments of U.S. issuers, including the following: (i) less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) possible

seizure of a company's assets, including expropriation and nationalization; (vii) restrictions imposed by non-U.S. countries limiting the ability of non-U.S. issuers to make payments of principal and/or interest due to blockages of foreign currency exchanges or otherwise; and (viii) withholding and other non-U.S. taxes may decrease the Fund's return. In addition, settlement, clearing, safe custody and registration procedures may be underdeveloped, which increases the chance of an error, fraud or default, which could cause loss to the Fund. Also, enforcing legal rights, such as security interests in collateral underlying loans, may be difficult, costly and slow in non-U.S. countries. Given this possibility, underlying collateral of non-U.S. Borrowers may be insufficient to fully discharge their obligations to the Fund. These risks are more pronounced to the extent that the Fund invests a significant portion of its assets in companies located in one region and to the extent that the Fund invests in instruments of issuers in emerging markets countries. In addition, economic, political and social developments may significantly disrupt the financial markets or interfere with the Fund's ability to enforce its rights against non-U.S. issuers. The Fund's Managed Assets to be invested in debt instruments of non-U.S. issuers may include debt instruments of issuers located, or conducting their business in, emerging markets countries. See Risks Issuer Level Risks Non-U.S. Issuer Risk.

Security Level Risks.

Senior Loan Risk. Senior loans hold the most senior position in the capital structure of a business entity, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. Senior loans that the Fund intends to invest in are usually rated below investment grade, and share the same risks of other below investment grade debt instruments.

Although the Fund invests primarily in senior loans that are secured by specific collateral, there can be no assurance the liquidation of such collateral would satisfy a Borrower's obligation to the Fund in the event of Borrower default or that such collateral could be readily liquidated under such circumstances. If the terms of a senior loan do not require the Borrower to pledge additional collateral in the event of a decline in the value of the already pledged collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the senior loan.

In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a senior loan. Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the senior loans

to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of senior loans.

Second Lien Loans and Unsecured Loans Risk. Second lien loans and unsecured loans generally are subject to the same risks associated with investments in senior loans, as discussed above. Because second lien loans and unsecured loans are lower in priority of payment to senior loans, they are subject to the additional risk that the cash flow of the Borrower and property securing the loan, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the Borrower. This risk is generally higher for unsecured loans, which are not backed by a security interest in any specific collateral. Second lien loans and unsecured loans are expected to have greater price volatility than senior loans and may be less liquid. Second lien loans and unsecured loans of below investment grade quality also share the same risks of other below investment grade debt instruments.

Subordinated Loans and Other Subordinated Debt Instruments. Issuers of subordinated loans and other subordinated debt instruments in which the Fund may invest usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, such subordinated loans or other debt instruments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments in respect of subordinated loans or other subordinated debt instruments in which it invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of an issuer, holders of debt instruments ranking senior to the Fund's subordinated loans or other debt instruments would typically be entitled to receive payment in full before the Fund receives any distribution in respect of its investment. After repaying such senior creditors, the issuer may not have any remaining assets to use for repaying its obligation to the Fund. In the case of debt ranking equally with subordinated loans or other subordinated debt instruments in which the Fund invests, the Fund would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant issuer. In addition, the Fund will likely not be in a position to control any issuer by investing in its debt instruments. As a result, the Fund will be subject to the risk that an issuer in which it invests may make business decisions with which the Fund disagrees and the management of such issuer, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve the Fund's interests as debt investors.

Risk of Settlement Delays. Portfolio transactions in loans may settle in as short as seven days but typically can take up to two or three weeks, and in some cases much longer. Unlike the securities markets, there is no central clearinghouse for loan transactions, and the loan market has not established enforceable settlement standards or remedies for failure to settle.

Loans Not Considered Securities. Loan interests may not be considered securities, and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Interest Rate Risk. Interest rate risk is the risk that fixed rate debt instruments will decline in value because of changes in market interest rates. When market interest rates rise, the market value of such instruments generally will fall. The Fund's investment in such fixed rate instruments means that the net asset value and market price of Common Shares will tend to decline if market interest rates rise. Market interest rates in the U.S. and in certain other countries in which the Fund may invest currently are near historically low levels. NFALLC and Symphony expect the Fund's policy of investing at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans will make the Fund less volatile and its net asset value less sensitive to changes in market interest rates than if the Fund invested exclusively in fixed rate obligations. However, because interest rates on most adjustable rate instruments typically only reset periodically (*e.g.*, monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's net asset value. See Risks Security Level Risks Interest Rate Risk.

Risks in Loan Valuation. The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments including, but not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions may make it difficult to value or sell such instruments. Because non-U.S. instruments may trade on days when Common Shares are not priced, net asset value can change at times when Common Shares cannot be sold.

Loan Participation Risk. The Fund may purchase a participation interest in a loan and by doing so acquire some or all of the interest of a bank or other lending institution in a loan to a Borrower. A

participation typically will result in the Fund having a contractual relationship only with the lender, not the Borrower. As a result, the Fund assumes the credit risk of the lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the Borrower. In the event of insolvency or bankruptcy of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not have a senior claim to the lender's interest in the loan. If the Fund only acquires a participation in the loan made by a third party, the Fund may not be able to control the exercise of any remedies that the lender would have under the loan. Such third party participation arrangements are designed to give loan investors preferential treatment over high yield investors in the event of a deterioration in the credit quality of the Borrower. Even when these arrangements exist, however, there can be no assurance that the principal and interest owed on the loan will be repaid in full.

Prepayment Risk. During periods of declining interest rates or for other purposes, issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding instruments. This is known as call or prepayment risk.

Short Exposure Risk. The Fund may enter into tactical short positions, either directly or through derivatives, to create negative investment exposure or to hedge existing investment exposure. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments. A short sale creates the risk of an unlimited loss, in that the price of the underlying instrument could theoretically increase without limit, thus increasing the cost of buying those instruments to cover the short position. There can be no assurance that the instruments necessary to cover a short position will be available for purchase. Purchasing instruments to close out the short position can itself cause the price of the instruments to rise further, thereby exacerbating the loss. The success of the Fund's short selling to create negative investment exposure is dependent on Symphony's ability to correctly determine which investments are likely to decline in value, either in absolute terms or relative to corresponding long positions in the portfolio, which may be different than Symphony's ability to invest in long portfolio positions.

Illiquid Securities Risk. The Fund may invest in securities that, at the time of investment, are illiquid. Illiquid securities are not readily marketable and may include some restricted securities. Illiquid

securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.

Other Risks Associated with Loans. Many senior loans, second lien loans and other loans in which the Fund may invest may not be rated by an NRSRO, generally will not be registered with the SEC and generally will not be listed on a securities exchange. In addition, the amount of public information available with respect to loans generally may be less extensive than that available for registered and exchange-listed securities. The frequency and magnitude of such changes cannot be predicted. No active trading market currently exists for some senior loans and most subordinated loans in which the Fund may invest and, thus, those loans may be illiquid. As a result, such senior loans and subordinated loans generally are more difficult to value than more liquid securities for which a trading market exists. See Risks Security Level Risks Other Risks Associated with Loans.

Derivatives Risk, including the Risk of Swaps. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if NFALLC and Symphony correctly forecast market values, interest rates and other applicable factors. If NFALLC and Symphony incorrectly forecast these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. The Fund may enter into total return swaps on an underlying index to create investment exposure. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by NFALLC and Symphony of not only of the referenced asset, rate or index, but also of the swap itself. The derivatives market is subject to a changing regulatory environment. It is possible that regulatory or other developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments. See Risk Factors Derivatives Risk, Including the Risk of Swaps, Risk Factors Counterparty Risk, Risk Factors Hedging Risk and the SAI.

Legislation and Regulatory Risk. At any time after the date of this Prospectus, legislation or additional regulations may be enacted that

could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the entities and/or securities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objectives.

In addition, as new rules and regulations resulting from the passage of Dodd-Frank Act are implemented and new international capital and liquidity requirements are introduced under the Basel III Accords (Basel III), the market may not react the way NFALLC or Symphony expects. Whether the Fund achieves its investment objectives may depend on, among other things, whether NFALLC or Symphony correctly forecast market reactions to this and other legislation. In the event NFALLC and Symphony incorrectly forecast market reaction, the Fund may not achieve its investment objectives and a Common Shareholder's shares may be worth less than his or her original investment.

Leverage Risk. The use of leverage creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders, including potential interest rate risks (specifically the risks that shorter term market interest rates could rise, causing a rise in the Fund's leverage costs) and the likelihood of greater volatility of NAV and market price of, and distributions on, the Common Shares. In shorter investment horizons or in periods of economic downturn, sharply increasing inflation or higher volatility, leverage will typically magnify downside outcomes. The Fund will pay (and Common Shareholders will bear) any costs and expenses relating to the Fund's use of leverage, which will result in a reduction in the NAV of the Common Shares. The Fund's use of leverage similarly can magnify the impact of changing market conditions on Common Share market prices. See Risk Factors Leverage Risk. There is no assurance that the Fund will continue to utilize leverage or that the Fund's use of leverage will be successful.

Because the long-term debt securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short- to intermediate-term yields, the incremental earnings from leverage will vary over time. However, the Fund may use derivatives, such as interest rate swaps, to manage the Fund's effective cost of leverage exposure in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. The income benefit from leverage will increase to the extent that the difference widens between the net earnings on the Fund's portfolio

securities and its cost of leverage. If short- or intermediate-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing income and returns to Common Shareholders. This could occur even if both short- or intermediate-term and long-term interest rates rise. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on borrowing, or dividends paid on preferred shares, as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund is subject to requirements imposed by its use of leverage through Borrowings, including the Credit Agreement, and its Preferred Shares, including TP Shares. These requirements may include asset coverage and/or restrictions relating to portfolio characteristics such as portfolio diversification and credit rating criteria. In addition, the TP Shares are required to use commercially reasonable efforts to maintain a rating by at least one NRSRO and are subject to asset coverage requirements of 225%. While these restrictions may be different than those under the 1940 Act, it is not anticipated that these restrictions will impede the management of the Fund's portfolio in accordance with the Fund's investment objectives and policies. However, in order to maintain such requirements, the Fund may be required to take certain actions, such as redeeming Preferred Shares or reducing Borrowings with the proceeds from portfolio transactions at what might be an inopportune time in the market. Such actions could reduce the net earnings or returns to Common Shareholders over time.

Furthermore, the amount of fees paid to NFALLC (which in turn pays a portion of its fees to Symphony) for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for NFALLC and Symphony to leverage the Fund.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above and magnify the Fund's leverage risk.

See Risk Factors Leverage Risk and Use of Leverage.

Currency Risk. The Fund may invest up to 20% of its Managed Assets in securities of non-U.S. Issuers that are non-U.S. dollar denominated. Investments by the Fund in non-U.S.-dollar denominated securities will be subject to currency risk. Currency risk is the risk that fluctuations in the exchange rates between the U.S. dollar and non-U.S. currencies may negatively affect an investment. The value of securities denominated in non-U.S. currencies may fluctuate based on changes in the value of those currencies relative to

the U.S. dollar, and a decline in applicable foreign exchange rates could reduce the value of such securities held by the Fund.

Counterparty Risk. Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives or other transactions supported by another party's credit may affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant losses and financial hardships, including bankruptcy, as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using such derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. See Risk Factors Counterparty Risk.

Potential Conflicts of Interest Risk. NFALLC and Symphony each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, NFALLC and Symphony may provide investment management services to other funds and accounts that follow investment objectives similar to those of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Symphony may have to allocate a limited investment opportunity among its clients, which include closed-end funds, open-end funds and other commingled funds. NFALLC and Symphony have each adopted policies and procedures designed to address such situations and other potential conflicts of interests. For additional information about potential conflicts of interest, and the way in which NFALLC and Symphony address such conflicts, please see the SAI.

Other Risks.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Share's market price or your overall returns. See Risk Factors Reinvestment Risk.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. See Risk Factors Inflation Risk.

Deflation Risk. Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of Issuers and may make Issuer default more likely, which may result in a decline in the value of the Fund's portfolio. See Risk Factors Deflation Risk.

Hedging Risk. The Fund's use of derivatives or other transactions to reduce risks involves costs and will be subject to NFALLC and Symphony's ability to predict correctly changes in the relationships of such hedge instruments to the Fund's portfolio holdings or other factors. No assurance can be given that NFALLC and Symphony's judgment in this respect will be correct. In addition, no assurance can be given that the Fund will enter into hedging or other transactions at times or under circumstances in which it may be advisable to do so. See Risk Factors Hedging Risk.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the Declaration) and the Fund's By-Laws (the By-Laws) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust and Risk Factors Anti-Takeover Provisions.

Reliance on Investment Adviser. The Fund is dependent upon services and resources provided by its investment adviser, NFALLC, and therefore NFALLC's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2014 or to fund its other liquidity needs. Nuveen Investments failure to satisfy the terms of its indebtedness, including covenants therein, generally may have an adverse effect on the financial condition of Nuveen Investments.

In addition, an investment in the Fund's Common Shares raises other risks, which are more fully disclosed in the Risk Factors section of this Prospectus.

Distributions

The Fund pays monthly distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors, including dividends payable on

preferred shares, if issued in the future. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. For each taxable year, the Fund will distribute all or substantially all of its net investment income (after it pays accrued dividends on any outstanding preferred shares). In addition, the Fund intends to distribute, at least annually, the net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) and taxable ordinary income, if any, to Common Shareholders so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any preferred shares, if issued in the future. While not currently anticipated, if the Fund makes total distributions during a given calendar year in an amount that exceeds the Fund's net investment income and net capital gain for that calendar year, the excess would generally be treated by Common Shareholders as a return of capital for tax purposes. A return of capital reduces a shareholder's tax basis, which could result in higher taxes when the shareholder sells his or her shares. This may cause the shareholder to pay taxes even if he or she sells shares for less than the original price. You may elect to reinvest automatically some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan.

If the Fund does not distribute all of its net capital gain for a taxable year, it will pay federal income tax on the retained gain. Each Common Shareholder of record as of the end of the Fund's taxable year (i) will include in income for federal income tax purposes as long-term capital gain his or her share of the retained gain, (ii) will be deemed to have paid his or her proportionate share of the tax paid by the Fund on such retained gain, and (iii) will be entitled to an income tax credit or refund for that share of the tax. The Fund may treat the retained capital gain amount as a substitute for equivalent cash distributions. See [Distributions](#) and [Dividend Reinvestment Plan](#).

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time, subject to a Finding by the Fund's Board of Trustees that change is in the best interests of the Fund and its Common Shareholders.

Special Tax Considerations

Dividends with respect to the Common Shares generally will not constitute qualified dividend income for federal income tax purposes and thus generally will not be eligible for taxation at long-term capital gain tax rates (except in the case of capital gain dividends). See [Tax Matters](#).

Custodian and Transfer Agent

State Street Bank and Trust Company serves as custodian and transfer agent of the Fund's assets. See [Custodian and Transfer Agent](#).

Voting Rights

The holders of the Fund's preferred shares, voting as a separate class, would have the right to elect at least two Trustees at all times and to elect a majority of the Trustees in the event two full years' dividends on the preferred shares, including the preferred shares, are unpaid. In each case, the remaining Trustees will be elected by holders of shares of Common Shares and preferred shares, including the preferred shares, voting together as a single class. The holders of preferred shares, including the preferred shares, will vote as a separate class or classes on certain other matters as required under the Declaration, the 1940 Act and Massachusetts law.

SUMMARY OF FUND EXPENSES

The purpose of the table below and the examples below are to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The table shows the expenses of the Fund as a percentage of the average net assets applicable to Common Shares, and not as a percentage of total assets or Managed Assets.

Shareholder Transaction Expenses (as a percentage of offering price)	
Maximum Sales Charge	4.00%
Dividend Reinvestment Plan Fees ⁽¹⁾	None
	As a Percentage of Net Assets Attributable to Common Shares(2)
<hr/>	
Annual Expenses	
Management Fees	1.26%
Interest Expenses on Borrowings and Fees on TP Shares ⁽³⁾	1.01%
Other Expenses ⁽⁴⁾	0.18%
<hr/>	
Total Annual Expenses	2.45%
<hr/>	

- (1) You will be charged a \$2.50 service charge and pay brokerage charges if you direct State Street Bank and Trust Company, as agent for the Common Shareholders (the Plan Agent), to sell your Common Shares held in a dividend reinvestment account.
- (2) Stated as percentages of average net assets attributable to Common Shares for the fiscal year ended July 31, 2016.
- (3) Interest Expense on Borrowings and Fees on TP Shares has been restated using current fees as if they had been in effect during the previous fiscal year. Interest Expense on Borrowings are calculated at a rate per annum equal to 1-Month LIBOR plus 0.85%. Fees on TP Shares assume annual dividends paid and amortization of offering costs. The actual Interest Expense on Borrowings and Fees on TP Shares incurred in the future may be higher or lower. The Fund's use of leverage will increase the amount of management fees paid to NFALLC and Symphony.
- (4) Other Expenses is based on estimated amounts for the current fiscal year. Expenses attributable to the Fund's investments, if any, in other investment companies are currently estimated not to exceed 0.01%. See Portfolio Composition Other Investment Companies in the SAI.

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. See Management of the Fund Investment Adviser.

Examples

The following examples illustrate the expenses (including the applicable transaction fees, (referred to as the Maximum Sales Charge in the fee table above) if any, that a shareholder would pay on a \$1,000 investment that is held for the time periods provided in the table. Each example assumes that all dividends and other distributions are reinvested in the Fund and that the Fund's Annual Expenses, as provided above, remain the same. The examples also assume a 5% annual return.⁽¹⁾

Example # 1 (At-the-Market Transaction)

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

The following example assumes a transaction fee of 1.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$35	\$ 86	\$ 139	\$ 286

Example # 2 (Underwriting Syndicate Transaction)

The following example assumes a transaction fee of 4.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$64	\$ 113	\$ 165	\$ 307

Example # 3 (Privately Negotiated Transaction)

The following example assumes there is no transaction fee.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$25	\$ 76	\$ 131	\$ 279

The examples should not be considered a representation of future expenses. Actual expenses may be greater or less than those shown above.

- (1) The examples assume that all dividends and distributions are reinvested at Common Share net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

FINANCIAL HIGHLIGHTS

The following Financial Highlights table is intended to help a prospective investor understand the Fund's financial performance for the periods shown. Certain information reflects financial results for a single Common Share of the Fund. The total returns in the table represent the rate an investor would have earned or lost on an investment in Common Shares of the Fund (assuming reinvestment of all dividends). The Fund's annual financial statements as of and for the fiscal years ended July 31, 2016 and 2015, including the financial highlights for the fiscal years then ended, have been audited by KPMG LLP, an independent registered public accounting firm. KPMG has not reviewed or examined any records, transactions or events after the date of such reports. The information with respect to the fiscal years ended prior to July 31, 2015 has been audited by other auditors. A copy of the Annual Report may be obtained from www.sec.gov or by visiting www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. Past results are not indicative of future performance.

The following per share data and ratios have been derived from information provided in the financial statements.

Selected data for a Common Share outstanding throughout each period:

	Year Ended July 31,					
	2016	2015	2014	2013	2012	2011(h)
PER SHARE OPERATING PERFORMANCE

- (a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.
- (b) Total Return Based on NAV is the combination of changes in NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.
Total Return Based on Share Price is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period takes place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.
- (c) Ratios do not reflect the effect of dividend payments to Preferred shareholders, where applicable.
Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to Preferred shares and/or borrowings, where applicable.
Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank where applicable.
Each ratio includes the effect of all interest expense paid and other costs related to preferred shares and/or borrowings, where applicable, as follows:

	Year Ended July 31,					
	2016	2015	2014	2013	2012	2011(h)
Ratios of Interest Expense to Average Net Assets	0.82%	0.45%	0.50%	0.50%	0.47%	%

- (d) Each ratio of Net Investment Income (Loss) includes the effect of the increase (decrease) of the net realizable value of the receivable for matured senior loans. The increase (decrease) to the Ratios of Net Investment Income (Loss) to Average Net Assets were as follows:

Increase (Decrease) of Ratios of Net Investment Income (Loss) to Average Net Assets Applicable to Common Shares(g)	
Year Ended 7/31:	
2016	%
2015	
2014	
2013	
2012	
2011	

- (e) For the fiscal year ended July 31, 2016, Asset Coverage per \$1,000 of Borrowings reflects the amount of Fund total assets (less all liabilities not represented by Borrowings and Preferred Shares) per \$1,000 of the combined amount of Borrowings and outstanding Preferred Shares, which are considered to be debt for financial reporting purposes. For purposes of calculating Asset Coverage as defined under the 1940 Act, the outstanding Preferred Shares are excluded because they are considered to be equity. Calculated in accordance with the 1940 Act, the Asset Coverage per \$1,000 of Borrowings reflect the amount of Fund total assets (less all liabilities not represented by Borrowings and Preferred Shares) per \$1,000 of Borrowings alone, and the Asset Coverage per \$1,000 of Borrowings for the fiscal year ended July 31, 2016 is \$4,305.
- (f) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales (as disclosed in Note 5 Investment Transactions, in the most recent Shareholder report) divided by the average long-term market value during the period.
- (g) The Fund has not had any matured senior loans since its commencement of operations on May 25, 2011.
- (h) For the period May 25, 2011 (commencement of operations) through July 31, 2011.
- * Rounds to less than \$.01 per share.
- ** Annualized.

TRADING AND NET ASSET VALUE INFORMATION

The following table shows for the periods indicated: (i) the high and low sales prices for the Common Shares reported as of the end of the day on the NYSE, (ii) the high and low net asset values of the Common Shares, and (iii) the high and low of the premium/(discount) to net asset value (expressed as a percentage) of the Common Shares.

Fiscal Quarter Ended	Market Price		Net Asset Value		Premium/(Discount)	
	High	Low	High	Low	High	Low
January 2017	\$ 18.15	\$ 16.06	\$ 18.24	\$ 17.66	(0.27)%	(9.71)%
October 2016	\$ 16.87	\$ 15.89	\$ 17.96	\$ 17.47	(4.74)%	(9.48)%
July 2016	\$ 16.23	\$ 15.15	\$ 17.51	\$ 17.04	(7.20)%	(11.53)%
April 2016	\$ 15.35	\$ 13.65	\$ 17.17	\$ 16.01	(9.63)%	(14.79)%

April 2015	\$ 17.46	\$ 16.76	\$ 19.08	\$ 18.68	(8.30)%	(10.89)%
January 2015	\$ 17.43	\$ 16.49	\$ 19.18	\$ 18.37	(8.89)%	(11.77)%
October 2014	\$ 17.96	\$ 16.60	\$ 19.46	\$ 18.81	(7.14)%	(12.03)%

The net asset value per Common Share, the market price and percentage of premium/(discount) to net asset value per Common Share on March 1, 2017 were \$18.45, \$18.40 and (0.27)%, respectively. As of January 31, 2017, the Fund had 10,095,286 Common Shares outstanding, 35,000 TP Shares outstanding and net assets applicable to Common Shares of \$183,682,149. See [Repurchase of Fund Shares; Conversion to Open-End Fund](#).

THE FUND

The Fund is a diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on January 3, 2011, pursuant to the Declaration governed by the laws of the Commonwealth of Massachusetts. The Fund's Common Shares are listed on the NYSE under the symbol JSD. The Fund has also issued preferred shares.

The following provides information about the Fund's outstanding Common Shares as of January 31, 2017:

Title of Class	Amount Authorized	Amount Held by the Fund or for its Account	Amount Outstanding
Common Shares	unlimited	0	10,095,286
Preferred Shares	unlimited		
TP Shares	35,000	0	35,000

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

The Fund's principal office is located at 333 West Wacker Drive, Chicago, Illinois 60606, and its telephone number is (800) 257-8787.

USE OF PROCEEDS

The net proceeds from the issuance of Common Shares hereunder will be invested in accordance with the Fund's investment objective and policies as stated below. Pending investment, the timing of which may vary depending on the size of the investment but in no case is expected to exceed 30 days, it is anticipated that the proceeds will be invested in short-term or long-term securities issued by the U.S. Government and its agencies or instrumentalities or in high quality, short-term money market instruments. See [Risk Factors](#), [Leverage Risk](#) and [Use of Leverage](#).

THE FUND'S INVESTMENTS

Investment Objective

The Fund's investment objective is to provide current income and the potential for capital appreciation.

Investment Philosophy

Symphony believes that deep fundamental credit analysis and bottom-up portfolio construction are key to managing risk within the below investment grade corporate credit market. Symphony utilizes an industry focused approach that seeks to select the debt instruments of corporate issuers that provide attractive income opportunities and offer the potential for additional total return through the identification of near-term catalysts (such as restructurings, refinancing, mergers and acquisitions, liquidity events, management changes, rating and earnings announcements) and relative value opportunities. At the same time, Symphony's fundamental approach seeks to evaluate and minimize potential downside risks associated with below investment grade instruments. Additionally, Symphony focuses primarily on liquid securities to help implement its highly active management style, which helps the team manage and optimize risk exposures over the course of the investment cycle.

Investment Process

In identifying securities for potential purchase, Symphony evaluates the universe of below investment grade corporate issuers from an industry perspective. Symphony's analysts are industry experts and will seek long and short investment opportunities across an issuer's capital structure. Symphony's investment process involves the holistic review of each investment, taking into account such factors as issuer liquidity, company and industry dynamics, relative value, potential corporate actions, and other possible positive or negative catalysts. Symphony then evaluates the identified investment candidates for liquidity constraints and other technical factors. Symphony also combines its deep industry view with a top-down macro overlay which allows the team to make tactical investments in undervalued debt instruments within appropriate sectors given industry and economic activity, and avoid or short issuers and sectors where the team has a negative outlook. The final portfolio is constructed using risk management and monitoring systems to ensure proper diversification.

Investment Policies

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. Senior loans and second lien loans are made to Borrowers that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate, primarily LIBOR (of any tenor, but typically between one month and six months, and currency), plus a premium, and are therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

average portfolio duration (including the effect of leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of

comparable quality. A debt instrument is considered investment grade quality if it is rated within the four highest letter grades (BBB or Baa or better) by at least one NRSRO that rates such instrument (even if it is rated lower by another), or if it is unrated by any NRSRO but judged to be of comparable quality by the portfolio managers. Such debt instruments are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See [Risk Factors Issuer Level Risks Issuer Credit Risk](#) and [Risk Factors Issuer Level Risks Below Investment Grade Risk](#).

Under normal circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate corporate debt instruments, including senior secured, and second lien loans and other adjustable rate corporate debt instruments.

The Fund may make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality.

The Fund may enter into tactical short positions consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this prospectus includes Borrowers) that are U.S. dollar or non-U.S. dollar denominated. The Fund's investments in debt instruments of non-U.S. issuers may include debt instruments of issuers located, or conducting their business, in emerging markets countries.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange-traded funds, often referred to as ETFs) that invest primarily in securities of the types in which the Fund may invest directly.

Given the current economic and debt market environment with historically low short-term to intermediate-term interest rates, the Fund currently uses derivatives such as interest rate swaps, with terms that may range from one to seven years, to manage the Fund's effective interest rate exposure.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. For example, the Fund may use futures with an interest-bearing instrument as the underlying asset, such as a bond. Bond futures are typically used to adjust duration positions by creating offsetting positions that thereby reduce the portfolio's overall average duration. Values of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. To the extent the Fund utilizes interest rate swaps and futures to maintain an average portfolio duration of two years or less, and such instruments do not perform as intended resulting in the Fund's portfolio behaving as if it had an average duration longer than two years, the Fund's net asset value may be more susceptible to interest rate increases than it would have had those instruments performed as intended. See [Leverage](#) and [The Fund's Investments Portfolio Composition and Other Information Other Investments Hedging Transactions](#) for additional information.

As previously noted, in this prospectus, average duration and average portfolio duration are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields adjusted to reflect the effect of the Fund's effective leverage. In general, the value of a portfolio of instruments with a shorter duration can be expected to be less sensitive to interest rate changes than a portfolio with a longer duration. For example, the price of a bond with an effective duration of two years will rise (fall) two percent for every one percent decrease (increase) in its yield, and the price of a five-year duration bond will rise (fall) five percent for a one percent decrease (increase) in its yield. See The Fund's Investments Portfolio Composition and Other Information Adjustable Rate Corporate Debt Instruments Senior Loans.

The Fund uses leverage to seek to enhance its potential current income and capital appreciation over time. The use of leverage involves increased risk, including increased variability of the Fund's net income, distributions and/or net asset value in relation to market changes. The use of leverage creates special risks for holders of Common Shareholders. The Fund's leverage strategy may not work as planned or achieve its goals. See Risk Factors Fund Level Risks Leverage Risk. See also Use of Leverage.

The Fund may enter into certain derivative transactions as a hedging technique to protect against potential adverse changes in the market value of portfolio instruments. The Fund also may use derivatives to attempt to protect the net asset value of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective interest rate exposure, and as a temporary substitute for purchasing or selling particular instruments. The Fund also may enter into derivative transactions such as total return swaps on an underlying index to create investment exposure to the extent such transactions may facilitate implementation of the Fund's investment strategy.

Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the net amount of interest payments that the Fund is to receive. Interest rate swap positions are valued daily. Although there are economic advantages of entering into interest rate swap transactions, there are also additional risks. The Fund helps manage the credit risks associated with interest rate swap transactions by entering into agreements only with counterparties whom NFALLC and Symphony believe have the financial resources to honor their obligations and by having NFALLC and Symphony continually monitor the financial stability of the swap counterparties.

Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of the Common Shares. To the extent interest rates decline, the value of the interest rate swap could decline, and could result in a decline in the net asset value of the Common Shares. In addition, if the counterparty to an interest rate swap defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset the interest payments on Borrowings or the dividend payments on any outstanding preferred shares. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of the Common Shares. In addition, at the time an interest rate swap transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of the Common Shares. The Fund could be required to prepay the principal amount of any Borrowings. Such redemption or prepayment would likely result in the Fund seeking to terminate early all or a portion of any swap transaction. Early termination of a swap could result in a termination payment by or to the Fund.

The Fund will not enter into interest rate swap transactions having a notional amount that exceeds the outstanding amount of the Fund's leverage. See Leverage and The Fund's Investments Portfolio Composition and Other Information Other Investments Hedging Transactions for additional information.

During temporary defensive periods, including during the period when the net proceeds of the offering of Common Shares are being invested, the Fund may deviate from its investment policies and objectives. During such periods, (e.g., times of adverse market, economic or political conditions), the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities or may invest in short-, intermediate-, or long-term U.S. Treasury Bonds. There can be no assurance that such strategies will be successful. For more information, see the SAI under Tax Matters.

The Fund's investment objective and certain investment policies in the SAI specifically identified as such are considered fundamental and may not be changed without shareholder approval. See Investment Restrictions in the SAI. All of the Fund's other investment policies are not considered to be fundamental by the Fund and can be changed by the Fund's Board of Trustees without a vote of the Common Shareholders. The Fund cannot change its investment objective or fundamental policies without the approval of the holders of a majority of the outstanding Common Shares and preferred shares, if issued in the future, voting together as a single class, and of the holders of a majority of the outstanding preferred shares, if issued in the future, voting as a separate class. When used with respect to particular shares of the Fund, a majority of the outstanding shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. See Description of Shares Preferred Shares Voting Rights for additional information with respect to the voting rights of holders of preferred shares.

Portfolio Composition and Other Information

The Fund's portfolio will be composed principally of the following investments. More detailed information about the Fund's portfolio investments are contained below under Portfolio Composition and in the SAI under Portfolio Composition.

Adjustable Rate Corporate Debt Instruments

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium.

Senior loans. The Fund may invest in (i) senior loans made by banks or other financial institutions to Borrowers, (ii) assignments of such interests in senior loans, or (iii) participation interests in senior loans. Senior loans hold the most senior position in the capital structure of a Borrower, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. The capital structure of a Borrower may include senior loans, senior and junior subordinated debt, preferred stock and common stock issued by the Borrower, typically in descending order of seniority with respect to claims on the Borrower's assets. The proceeds of senior loans primarily are used by Borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, refinancings, internal growth and for other corporate purposes. A senior loan is typically originated, negotiated and structured by a U.S. or non-U.S. commercial bank, insurance company, finance company or other financial institution (Agent) for a lending syndicate of financial institutions which typically includes the Agent (Lenders). The Agent typically administers and enforces the senior loan on behalf of the other Lenders in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Lenders. The Fund normally will rely primarily on the Agent to collect principal of and interest on a senior loan. Also, the Fund usually will rely on the Agent to monitor compliance by the Borrower with the restrictive covenants in a loan agreement.

Senior loans typically have rates of interest that are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate plus a premium or credit spread. These base lending rates are

primarily LIBOR, (of any tenor, but typically between one month and six months, and currency), and secondarily the prime rate offered by one or more major U.S. banks and the certificate of deposit rate or other base lending rates used by commercial lenders. As adjustable rate loans, the frequency of how often a senior loan resets its interest rate will impact how closely such senior loans track current market interest rates. The senior loans held by the Fund will have a dollar-weighted average period until the next interest rate adjustment of approximately 90 days or less. As a result, as short-term interest rates increase, interest payable to the Fund from its investments in senior loans should increase, and as short-term interest rates decrease, interest payable to the Fund from its investments in senior loans should decrease. In the experience of Symphony, the average life of senior loans in recent years has been approximately two years because of prepayments.

The Fund primarily purchases senior loans by assignment from a participant in the original syndicate of Lenders or from subsequent assignees of such interests. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning Lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning Lender.

The Fund may purchase participation interests in the original syndicate making senior loans. Loan participation interests typically represent direct participations in a loan to a corporate Borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a senior loan, becoming a part Lender. When purchasing a participation interest, the Fund assumes the credit risk associated with the corporate Borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which the Fund may invest may not be rated by any NRSRO. Given the Fund's policy to invest up to 30% of its Managed Assets in debt securities that are, at the time of investment, rated CCC+ or Caa or below by S&P, Moody's or Fitch (see Investment Objective and Policies in the Prospectus Summary), the Fund may invest no more than 30% of its Managed Assets in Borrowers that, at the time of investment, have filed for protection under the federal bankruptcy laws or that have had involuntary bankruptcy petitions filed against them by creditors. Investment rating limitations are considered to apply only at the time of investment and the Fund is under no obligation to sell securities as a result of changes in market values or ratings. You should expect the Fund's net asset value to fluctuate as a result of changes in the credit quality of Borrowers and other factors. A serious deterioration in the credit quality of one or more Borrowers could cause a permanent decrease in the Fund's net asset value. See Risk Factors Security Level Risks Loan Participation Risk.

The Fund may purchase and retain in its portfolio senior loans payable by Borrowers that have experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation. At times, in connection with the restructuring of a senior loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior debt instruments in exchange for all or a portion of a senior loan. See The Fund's Investments Portfolio Composition and Other Information Other Investments Warrants and Equity Securities.

Second lien loans. The Fund may invest in second lien loans and unsecured loans. Such loans are made by public and private corporations and other non-governmental Borrowers for a variety of purposes. As in the case of senior loans, the Fund may purchase interests in second lien loans and unsecured loans through assignments or participations.

Second lien loans have similar characteristics as senior loans except that such interests are second in lien property rather than first. Second lien loans are second in priority of payment to one or more senior loans of the related Borrower and are typically secured by a second priority security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. They typically have similar protections and

rights as senior loans. Second lien loans are not (and by their terms cannot become) subordinate in priority of payment to any obligation of the related Borrower other than senior loans of such Borrower. Second lien loans may feature fixed or floating rate interest payments. Because second lien loans are second to senior loans, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. In addition, second lien loans of below investment grade quality share many of the risk characteristics of other below investment grade debt instruments.

Unsecured loans generally have lower priority in right of payment compared to holders of secured interests of the Borrower. Unsecured loans are not secured by a security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. Unsecured loans by their terms may be or may become subordinate in right of payment to other obligations of the Borrower, including senior loans, second lien loans and other interests. Unsecured loans may have fixed or adjustable floating rate interest payments. Because unsecured loans are subordinate to senior loans and other secured debt of the Borrower, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. Such investments generally are of below investment grade quality. Unsecured loans of below investment grade quality share the same risks of other below investment grade debt instruments.

Adjustable rate subordinated loans. The subordinated loans in which the Fund may invest are typically privately-negotiated investments that rank subordinate in priority of payment to senior debt, such as senior loans, and are often unsecured. Because subordinated interests may rank lower as to priority of payment than senior loans and second lien loans of the Borrower, they may present a greater degree of investment risk than senior loans and second lien loans but often pay interest at higher rates reflecting this additional risk. Other than their more subordinated status, such investments have many characteristics and risks similar to senior loans and second lien loans discussed above. Subordinated interests of below investment grade quality share risks of other below investment grade debt instruments. Subordinated loans rank senior to common and preferred equity in a Borrower's capital structure. Subordinated loans may have elements of both debt and equity instruments, offering fixed or adjustable rates of return in the form of interest payments associated with senior debt, while providing lenders an opportunity to participate in the capital appreciation of a Borrower, if any, through an equity interest. This equity interest may take the form of warrants or direct equity investments which will be in conjunction with the subordinated loans. Due to their higher risk profile and often less restrictive covenants as compared to senior loans, subordinated loans generally earn a higher return than secured senior loans. The warrants associated with subordinated loans are typically detachable, which allows lenders the opportunity to receive repayment of their principal on an agreed amortization schedule while retaining their equity interest in the Borrower. Subordinated loans also may include a put feature, which permits the holder to sell its equity interest back to the Borrower at a price determined through an agreed formula.

The Fund may invest in subordinated loans that are primarily unsecured and that provide for relatively high, adjustable rates of interest, providing the Fund with significant current interest income. The subordinated loans in which the Fund may invest may have interest-only payments in the early years, with amortization of principal deferred to the later years of the subordinated loans. In some cases, the Fund may acquire subordinated loans that, by their terms, convert into equity or additional debt instruments or defer payments of interest for the first few years after issuance. Also, in some cases the subordinated loans in which the Fund may invest will be collateralized by a subordinated lien on some or all of the assets of the Borrower. Typically, subordinated loans in which the Fund may invest will have maturities of four to eight years.

The subordinated loan industry is highly specialized and the Fund will rely on Symphony and its employees' expertise in sourcing, evaluating, structuring, documenting and monitoring such investments by the Fund.

Certain structured notes. The Fund may invest in structured notes (as described below) that are designed to provide returns and risks that emulate those of senior loans, second lien loans and other adjustable rate corporate debt instruments.

The Fund acting as Originating Lender, Sole Lender and/or Agent. The Fund, in connection with its investments in senior secured loans, second lien loans and other loans, particularly those made to middle-market companies, may act as one of the group of lenders originating a loan (Originating Lender), may purchase the entire amount of a particular loan (Sole Lender), and may act as Agent in the negotiation of the terms of a loan and in the formation of a group of investors in a Borrower's loan.

When the Fund acts as an Originating Lender or Sole Lender it will generally participate in structuring the loan, and may share in an origination fee paid by the Borrower. When the Fund is an Originating Lender or Sole Lender it will generally have a direct contractual relationship with the Borrower, and may enforce compliance by the Borrower with the terms of the loan agreement. As Sole Lender the Fund generally also would have full voting and consent rights under the applicable loan agreement.

Acting in the capacity of an Agent with respect to a loan may subject the Fund to certain risks in addition to those associated with the Fund's role as a lender.

The Fund's ability to receive fee income also may be constrained by certain requirements for qualifying as a regulated investment company under the Internal Revenue Code of 1986, as amended (the Code). The Fund intends to comply with those requirements and may limit its investments in loans in which it acts as Originating Lender, Sole Lender or Agent in order to do so.

Other Investments

The Fund may invest in fixed or floating rate debt instruments and other securities as described below:

Structured products. The Fund may invest in structured products such as structured notes issued by a financial institution. As a fundamental policy, the Fund will not invest in collateralized loan obligations.

Structured notes have a defined maturity and pay a nominal interest rate, and potentially additional returns, based upon the cash flow or rate of return earned on either a reference portfolio of leveraged loans or the return represented by a reference index to the market for adjustable rate corporate loans. Such instruments may be leveraged or geared by applying a multiplier to the rate of total return on the underlying investments or referenced market index. Structured products that employ leverage increase the potential for gain and the risk of loss in that particular structured product investment. As a result, a relatively small decline in the value of the underlying investments or referenced indicator could result in a relatively large loss in the value of a structured product. Holders of structured products bear risks of the underlying investment, index or reference obligation (including income risk, credit risk and market risk) and are subject to counterparty risk.

The Fund may have the right to receive payments to which it is entitled only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to the structured product. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. Structured products may be private investment funds (structured as trusts or other types of pooled investment companies that are excluded from the definition of investment company under the 1940 Act by the operation of Section 3(c) (1) or 3(c) (7) thereof) or investment companies that are registered under the 1940 Act. Investment in such products involve operating expenses and fees that are in addition to the expenses and fees of the Fund, and such expenses and fees are borne indirectly by holders of the Common Shares. For structured products that are registered under the 1940 Act, please also see The Fund's Investments Portfolio Composition and Other Information Other Investments Other Investment Companies.

Debtor-in-possession loans (DIPs). The Fund may invest in debtor-in-possession loans (DIPs), which are newly issued loans in connection with special situation restructuring and refinancing transactions. DIPs are loans to a debtor-in-possession in a proceeding under the U.S. bankruptcy code that have been approved by the

bankruptcy court. DIPs are typically adjustable rate and fully secured by a lien on the debtor's otherwise unencumbered assets or secured by a junior lien on the debtor's encumbered assets (so long as the loan is fully secured based on the most recent current valuation or appraisal report of the debtor). DIPs are often required to close with certainty and in a rapid manner in order to satisfy existing creditors and to enable the issuer to emerge from bankruptcy or to avoid a bankruptcy proceeding.

Derivatives. The Fund may invest in certain derivative instruments. Such instruments may include credit default swaps, or other derivative instruments whose prices, in Symphony's opinion, correlate with the prices of the Fund's investments. Credit default swaps may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. If the Fund is a seller of a contract, the Fund would be required to pay the par (or other agreed upon) value of a referenced debt obligation to the counterparty in the event of a default or other credit event by the reference issuer, such as a U.S. or foreign corporate issuer, with respect to such debt obligations. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations. As the seller, the Fund would be subject to investment exposure on the notional amount of the swap. If the Fund is a buyer of a contract, the Fund would have the right to deliver a referenced debt obligation and receive the par (or other agreed-upon) value of such debt obligation from the counterparty in the event of a default or other credit event (such as a credit downgrade) by the reference issuer, such as a U.S. or foreign corporation, with respect to its debt obligations. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the Fund. Interest rate swaps involve the exchange by the Fund with a counterparty of their respective commitments to pay or receive interest, such as an exchange of fixed-rate payments for floating rate payments. The Fund will usually enter into interest rate swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments.

The Fund may utilize certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. The Fund also may use derivatives to attempt to protect the net asset value of the Fund, to facilitate the sale of certain portfolio securities, to manage the Fund's effective interest rate exposure as a temporary substitute for purchasing or selling particular securities. From time to time, the Fund also may utilize derivative instruments to create investment exposure to the extent such derivatives may facilitate implementation of its strategy more efficiently than through outright purchases or sales of portfolio securities.

The Fund may invest in derivative instruments including total return swaps; interest rate swaps; credit default swaps; interest rate caps; interest rate floors; interest rate collars; swaptions; credit-linked notes; securities indices; other indices or other financial instruments; stock and bond index futures; futures contracts on securities; options on securities; options on futures contracts; options on stock and bond indexes; interest rate futures; exchange-traded and over-the-counter options on securities or indices; index linked securities; currency exchange transactions; financial futures; options on financial futures; index futures; index options; index options on futures contracts; interest rate options; interest rate option on futures contracts; short sales; structured notes; options on U.S. Treasury security or U.S. Government Agency securities; U.S. Treasury security or U.S. Government Agency security futures contracts; and options on U.S. Treasury security or U.S. Government Agency security futures contracts.

The Fund may invest in certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. The Fund also may use derivatives to attempt to protect the NAV of the Fund, to facilitate the sale of certain portfolio securities, to manage the Fund's effective interest rate exposure, or as a means of gaining investment exposure.

Other derivative instruments that may be used, or other transactions that may be entered into, by the Fund may include the purchase or sale of futures contracts on securities, credit-linked notes, securities indices, other indices or other financial instruments; options on futures contracts; exchange-traded and over-the-counter options on securities or indices; index linked securities; swaps; and currency exchange transactions. Some, but not all, of the derivative instruments may be traded and listed on an exchange. The positions in derivatives will be marked-to-market daily at the closing price established on the exchange or at a fair value.

There is no assurance that these derivative strategies will be available at any time, that NFALLC and Symphony will determine to use them for the Fund, or, if used, that the strategies will be successful.

Hedging transactions. As noted above, the Fund may invest in certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. These types of strategies may generate taxable income. There is no assurance that these derivative strategies will be available at any time, that NFALLC and Symphony will determine to use them for the Fund or, if used, that the strategies will be successful. See *Hedging Strategies and Other Uses Of Derivatives* in the SAI for further information on hedging transactions.

Limitations on the Use of Futures, Options on Futures and Swaps. NFALLC has claimed, with respect to the Fund, the exclusion from the definition of commodity pool operator under the Commodity Exchange Act (CEA) provided by Commodity Futures Trading Commission (CFTC) Regulation 4.5 and is therefore not currently subject to registration or regulation as such under the CEA with respect to the Fund. In addition, Symphony has claimed the exemption from registration as a commodity trading advisor provided by CFTC Regulation 4.14(a)(8) and is therefore not currently subject to registration or regulation as such under the CEA with respect to the Fund. Under CFTC Regulation 4.5, if the Fund uses futures, options on futures or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options that are in-the-money at the time of purchase are in-the-money) may not exceed 5% of the Fund's net asset value, or alternatively, the aggregate net notional value of those positions may not exceed 100% of the Fund's net asset value (after taking into account unrealized profits and unrealized losses on any such positions). The Fund intends to comply with Regulation 4.5's requirements such that NFALLC will not be required to register as a commodity pool operator with the CFTC with respect to the Fund. The Fund reserves the right to employ futures, options on futures and swaps to the extent allowed by CFTC regulations in effect from time to time and in accordance with the Fund's policies. The requirements for qualification as a regulated investment company may also limit the extent to which the Fund may employ futures, options on futures or swaps.

Other corporate debt instruments. Corporate debt instruments generally are used by corporations to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and normally must repay the amount borrowed on or before maturity. Certain debt instruments in which the Fund may invest may be perpetual in that they have no maturity date and some may be convertible into equity securities of the issuer or its affiliates. The Fund may invest in debt instruments of any quality and such debt instruments may be secured or unsecured. In addition, certain debt instruments in which the Fund may invest may be subordinated to the payment of an issuer's senior debt.

U.S. Government securities. U.S. Government securities include (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance: U.S. Treasury bills (maturities of one year or less), U.S. Treasury notes (maturities of one year to ten years) and U.S. Treasury bonds (generally maturities of greater than ten years) and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are supported by any of the following: (i) the full faith and credit of the U.S. Treasury, (ii) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Treasury, (iii) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality or (iv) the credit of the agency or instrumentality. The Fund also may invest in any other security or agreement

collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S. Government include but are not limited to: Federal Land Banks, Federal Financing Banks, Banks for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Banks, Federal Home Loan Banks, FHLMC, FNMA, GNMA, Student Loan Marketing Association, United States Postal Service, Small Business Administration, Tennessee Valley Authority and any other enterprise established or sponsored by the U.S. Government. Because the U.S. Government generally is not obligated to provide support to its instrumentalities, the Fund invests in obligations issued by these instrumentalities only if Symphony determines that the credit risk with respect to such obligations is minimal.

The principal of and/or interest on certain U.S. Government securities which may be purchased by the Fund could be (i) payable in non-U.S. currencies rather than U.S. dollars or (ii) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of non-U.S. currencies. The value of such portfolio securities may be affected by changes in the exchange rate between foreign currencies and the U.S. dollar.

Commercial paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Warrants and equity securities. The Fund may acquire equity securities and warrants issued by an issuer or its affiliates as part of a package of investments in the issuer or its affiliates issued in connection with an adjustable rate instrument or other debt instrument of the issuer. The Fund also may convert a warrant so acquired into the underlying security.

Repurchase agreements. For cash management purposes, the Fund may enter into repurchase agreements (a purchase of, and a simultaneous commitment to resell, a financial instrument at an agreed upon price on an agreed upon date) only with member banks of the Federal Reserve System and member firms of the NYSE. When participating in repurchase agreements, the Fund buys securities from a vendor, e.g., a bank or brokerage firm, with the agreement that the vendor will repurchase the securities at a higher price at a later date. Such transactions afford an opportunity for the Fund to earn a return on available cash at minimal market risk, although the Fund may be subject to various delays and risks of loss if the vendor is unable to meet its obligation to repurchase. Under the 1940 Act, repurchase agreements are deemed to be collateralized loans of money by the Fund to the seller. In evaluating whether to enter into a repurchase agreement, NFALLC will consider carefully the creditworthiness of the vendor. If the member bank or member firm that is the party to the repurchase agreement petitions for bankruptcy or otherwise becomes subject to the U.S. Bankruptcy Code, the Fund might experience delays in recovering its cash. The securities underlying a repurchase agreement will be marked to market every business day so that the value of the collateral is at least equal to the value of the loan, including the accrued interest thereon, and NFALLC will monitor the value of the collateral. No specific limitation exists as to the percentage of the Fund's assets which may be used to participate in repurchase agreements.

Non-U.S. Companies. The Fund may invest in securities of non-U.S. companies. The Fund will classify an issuer of a security as being located in a country based on the determination of an unaffiliated, recognized financial data provider. Such determinations are based on a number of criteria, such as the issuer's country of domicile, the primary stock exchange on which the security trades, the location from which the majority of the issuer's revenue, comes and the issuer's reporting currency.

Zero coupon bonds. A zero coupon bond is a bond that typically does not pay interest either for the entire life of the obligation or for an initial period after the issuance of the obligation. When held to its maturity, the holder receives the par value of the zero coupon bond, which generates a return equal to the difference between the purchase price and its maturity value. A zero coupon bond is normally issued and traded at a deep discount from face value. This original issue discount (OID) approximates the total amount of interest the security will accrue and compound prior to its maturity and reflects the payment deferral and credit risk associated with the instrument. Because zero coupon securities and other OID instruments do not pay cash interest at regular

intervals, the instruments' ongoing accruals require ongoing judgments concerning the collectability of deferred payments and the value of any associated collateral. As a result, these securities may be subject to greater value fluctuations and less liquidity in the event of adverse market conditions than comparably rated securities that pay cash on a current basis. Because zero coupon bonds, and OID instruments generally, allow an issuer to avoid or delay the need to generate cash to meet current interest payments, they may involve greater payment deferral and credit risk than coupon loans and bonds that pay interest currently or in cash. The Fund generally will be required to distribute dividends to shareholders representing the income of these instruments as it accrues, even though the Fund will not receive all of the income on a current basis or in cash. Thus, the Fund may have to sell other investments, including when it may not be advisable to do so, and use the cash proceeds to make income distributions to its shareholders. For accounting purposes, these cash distributions to shareholders will not be treated as a return of capital.

Further, NFALLC collects management fees on the value of a zero coupon bond or OID instrument attributable to the ongoing non-cash accrual of interest over the life of the bond or other instrument. As a result, NFALLC receives non-refundable cash payments based on such non-cash accruals while investors incur the risk that such non-cash accruals ultimately may not be realized.

When-issued and delayed delivery transactions. The Fund may buy and sell securities on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15 to 45 days of the trade date. This type of transaction may involve an element of risk because no interest accrues on the bonds prior to settlement and, because bonds are subject to market fluctuations, the value of the bonds at time of delivery may be less (or more) than cost. A separate account of the Fund will be established with its custodian consisting of cash, cash equivalents, or liquid securities having a market value at all times at least equal to the amount of the commitment.

Illiquid securities. The Fund may invest in securities and other instruments that, at the time of investment, are illiquid (*i.e.*, securities that are not readily marketable). For this purpose, illiquid securities may include, but are not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may only be resold pursuant to Rule 144A under the 1933 Act that are deemed to be illiquid, and certain repurchase agreements.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the 1933 Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid securities will be priced at fair value as determined in good faith by the Board of Trustees or its delegate. If, through the appreciation of illiquid securities or the depreciation of liquid securities, the Fund should be in a position where more than 50% of the value of its Managed Assets is invested in illiquid securities, including restricted securities that are not readily marketable, the Fund will take such steps as are deemed advisable, if any, to protect liquidity.

Short positions. The Fund may enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments. All or a portion of the proceeds received from the Fund's short sales may in the future be used to purchase additional long positions in corporate debt instruments, which would increase the Fund's effective leverage ratio. See Risk Factors Fund Level Risks Leverage Risk.

Lending of Portfolio Securities. To increase its income, the Fund may lend financial instruments in its portfolio. Such loans may be made to brokers, dealers, banks or other recognized institutional borrowers of

financial instruments and would be required to be secured continuously by collateral, including cash, cash equivalents or U.S. Treasury bills maintained on a current basis at an amount at least equal to the market value of the financial instruments loaned. The Fund would have the right to call a loan and obtain the financial instruments loaned at any time on five days' notice. For the duration of a loan, the Fund would continue to receive the equivalent of the interest paid by the issuer on the financial instruments loaned and also may receive compensation from the investment of the collateral.

The Fund would not have the right to vote any financial instruments having voting rights during the existence of the loan, but the Fund could call the loan in anticipation of an important vote to be taken among holders of the financial instruments or in anticipation of the giving or withholding of their consent on a material matter affecting the financial instruments. As with other extensions of credit, risks of delay in recovery or even loss of rights in the collateral exist should the borrower of the financial instruments fail financially. However, the loans would be made only to firms deemed by Symphony to be creditworthy and when, in the judgment of Symphony, the consideration which can be earned currently from loans of this type justifies the attendant risk. The creditworthiness of firms to which the Fund lends its portfolio holdings will be monitored on an ongoing basis by Symphony. Although no specific policy limits the percentage of the Fund's assets which the Fund may lend, under current SEC guidance the Fund may not have on loan at any given time securities representing more than one-third of its total asset value.

Other investment companies. The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including ETFs) that invest primarily in securities of the types in which the Fund may invest directly. In addition, the Fund may invest a portion of its Managed Assets in pooled investment vehicles (other than investment companies) that invest primarily in securities of the types in which the Fund may invest directly. The Fund generally expects that it may invest in other investment companies and/or other pooled investment vehicles either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Common Shares or Borrowings. The Fund may invest in investment companies that are advised by NFALLC, Symphony or their respective affiliates to the extent permitted by applicable law and/or pursuant to exemptive relief from the SEC. The Fund has not applied for and currently does not intend to apply for such relief. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies.

Symphony will take expenses into account when evaluating the investment merits of an investment in an investment company relative to available security investments. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the section entitled "Risk Factors," the net asset value and market value of leveraged shares will be more volatile and the yield to Common Shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

Portfolio Turnover

The Fund may engage in portfolio trading when considered appropriate, but short-term trading will not be used as the primary means of achieving the Fund's investment objective. Although the Fund cannot accurately predict its annual portfolio turnover rate, it is generally not expected to exceed 100% under normal circumstances. For the fiscal year ended July 31, 2016, the Fund's portfolio turnover rate was 34%. However, there are no limits on the Fund's rate of portfolio turnover, and investments may be sold without regard to length of time held when, in Symphony's opinion, investment considerations warrant such action. A higher portfolio turnover rate would result in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. Although these commissions and expenses are not reflected in the Fund's Total Annual Expenses under "Summary of Fund Expenses" in this Prospectus, under "Summary of Fund Expenses," as a percentage of net assets, they will be reflected in the Fund's total return. In addition, high portfolio turnover

may result in the realization of net short-term capital gains by the Fund which, when distributed to shareholders, will be taxable as ordinary income. See Tax Matters.

FUND ALLOCATION

The following table sets forth certain information with respect to the composition of the Fund's securities, as a percentage of net assets, as of July 31, 2016.

Fund Allocation*	Percent
Variable Rate Senior Loan Interests	135.9%
Common Stocks	0.6%
Corporate Bonds	16.5%
Repurchase Agreements	4.3%
Other Assets Less Liabilities	(1.2)%
Net Assets Plus Borrowings and TP Shares, at Liquidation Preference	156.1%
Borrowings	(36.3)%
TP Shares, at Liquidation Preference	(19.8)%
Net Assets	100%

* The relative percentages of the value of the investments attributable the securities could change over time as a result of rebalancing the Fund's assets by Symphony, market value fluctuations, issuance of additional shares and other events.

USE OF LEVERAGE

Regulatory leverage consists of senior securities as defined under the 1940 Act, which include (1) borrowings, including loans from financial institutions (Borrowings); (2) issuance of debt securities; and (3) issuance of preferred shares ((1), (2), and (3) are hereinafter collectively referred to as regulatory leverage). In addition, the Fund may enter into certain derivatives transactions, such as certain credit default swaps, total return swaps and bond futures, that have the economic effect of leverage by creating additional investment exposure. The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities. The Fund may use leverage in an amount permissible under the 1940 Act and related SEC guidance. The amounts and forms of leverage used by the Fund may vary with prevailing market or economic conditions. The timing and terms of any leverage transactions is determined by the Fund's Board of Trustees.

Following an offering of additional Common Shares from time to time, the Fund's leverage ratio will decrease as a result of the increase in net assets attributable to Common Shares. The Fund's leverage ratio may decline further to the extent that the net proceeds of an offering of Common Shares are used to reduce the Fund's financial leverage. A lower leverage ratio may result in lower (higher) returns to Common Shareholders over a period of time to the extent that net returns on the Fund's investment portfolio exceed (fall below) its cost of leverage over that period, which lower (higher) returns may impact the level of the Fund's distributions. See Risk Factors Leverage Risk.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

The Fund currently employs leverage through borrowings and currently has outstanding TP Shares. As of December 31, 2016, the Fund had 35,000 TP Shares outstanding for a total of \$35 million. The Fund has entered into a Credit Agreement with State Street Bank and Trust Company. The borrowing capacity under the Credit Agreement is \$75 million. The term of the Credit Agreement ends on August 3, 2017, unless extended. The Fund has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such

augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement. This credit facility is secured by substantially all of the assets of the Fund. As of July 31, 2016 the Fund's outstanding balance on the Credit Agreement was \$64,000,000. For the fiscal year ended July 31, 2016, the average daily balance outstanding and the average annual interest rate on these Borrowings were \$71,279,781 and 1.17%, respectively.

The Fund's currently outstanding TP Shares pay a fixed dividend rate. The Fund has entered into an interest rate swap that seeks to convert the economic impact of the fixed dividend payable under the currently outstanding TP Shares to a variable rate exposure. Under the swap, the Fund receives a fixed payment at a rate equal to the applicable dividend rate being paid by the Fund on the TP Shares and in turn pays a fixed spread to 1-Month Libor.

The Fund's Borrowings and TP shares have seniority over the Common Shares.

As a part of its leverage strategy, the Fund may use derivatives such as interest rate swaps to manage the Fund's effective interest rate exposure. In general, interest rate swaps may be used to fix all, or a portion of, the Fund's variable rate leverage exposure and/or to convert fixed rate exposures to a variable rate exposure. Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of the Shares. The Fund's use of interest rate swaps is subject to certain risks. See [Portfolio Composition and Other Information](#) [Derivatives](#), [Hedging Transactions](#) [Interest Rate Transactions](#) and [Risk Factors](#) [Swap Risk](#).

Leverage involves special risks. See [Risk Factors](#) [Leverage Risk](#). The Fund's leverage strategy may not work as planned or achieve its goals.

The Fund pays a management fee to NFALLC (which in turn pays a portion of its fee to the Fund's sub-adviser, Symphony) based on a percentage of Managed Assets. NFALLC will be responsible for using leverage to pursue the Fund's investment objectives, and will base its decision regarding whether and how much leverage to use for the Fund based on its assessment of whether such use of leverage is in the best interests of the Fund. However, the Assets and therefore NFALLC's fees means that NFALLC may have a conflict of interest in determining whether to use or increase leverage. NFALLC will seek to manage that potential conflict by leveraging the Fund (fact that a decision to employ or increase the Fund's leverage will have the effect, all other things being equal, of increasing Managed or increasing such leverage) when it determines that such action is in the best interest of the Fund and by periodically reviewing the Fund's performance and use of leverage with the Fund's Board of Trustees.

For tax purposes, the Fund is currently required to allocate net capital gain and other taxable income, if any, between the Common Shares and preferred shares, including TP Shares, in proportion to total dividends paid to each class for the year in which the net capital gain or other taxable income is realized. If net capital gain or other taxable income is allocated to preferred shares (instead of solely tax-exempt income), the Fund will likely have to pay higher total dividends to preferred shareholders or make special payments to preferred shareholders to compensate them for the increased tax liability. This would reduce the total amount of dividends paid to the Common Shareholders.

Under the 1940 Act, the Fund generally is not permitted to borrow or issue commercial paper or notes or borrow unless immediately after the borrowing or commercial paper or note issuance the value of the Fund's total assets less liabilities other than the principal amount represented by commercial paper, notes or borrowings, is at least 300% of such principal amount. If the Fund borrows, the Fund intends, to the extent possible, to prepay all or a portion of the principal amount of any outstanding borrowing, notes or commercial paper to the extent necessary in order to maintain the required asset coverage. Failure to maintain certain asset coverage requirements could result in an event of default and entitle the debt holders to elect a majority of the Board of Trustees.

Under the 1940 Act, the Fund is not permitted to issue preferred shares unless immediately after such issuance, the value of the Fund's asset coverage is at least 200% of the liquidation value of the outstanding preferred shares (i.e., such liquidation value may not exceed 50% of the Fund's asset coverage). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund's asset coverage less liabilities other than borrowings is at least 200% of such liquidation value. The Fund intends, to the extent possible, to purchase or redeem preferred shares, including TP Shares, from time to time to the extent necessary in order to maintain asset coverage with respect to the preferred shares. Holders of preferred shares, voting separately, are entitled to elect two of the Fund's trustees. The remaining trustees of the Fund would be elected by holders of Common Shares and preferred shares voting together as a single class. In the event the Fund would fail to pay dividends on preferred shares for two years, preferred shareholders would be entitled to elect a majority of the trustees of the Fund.

The Fund is subject to requirements imposed by its use of leverage through Borrowings, including the Credit Agreement, and its Preferred Shares, including TP Shares. These requirements may include asset coverage and/or restrictions relating to portfolio characteristics such as portfolio diversification and credit rating criteria. In addition, the TP Shares are required to use commercially reasonable efforts to maintain a rating by at least one NRSRO and are subject to asset coverage requirements of 225%. While these restrictions may be different than those under the 1940 Act, it is not anticipated that these restrictions will impede the management of the Fund's portfolio in accordance with the Fund's investment objectives and policies. However, in order to maintain such requirements, the Fund may be required to take certain actions, such as redeeming Preferred Shares or reducing Borrowings with the proceeds from portfolio transactions at what might be an inopportune time in the market. Such actions could reduce the net earnings or returns to Common Shareholders over time. In addition to other considerations, to the extent that the Fund believes that these requirements would impede its ability to meet its investment objective, the Fund will not incur additional borrowings or issue additional preferred shares.

Assuming the utilization of leverage through a combination of borrowings and preferred in the aggregate amount of approximately 36% of the Fund's Managed Assets, at a combined interest or payment rate of 2.00% payable on such leverage, the income generated by the Fund's portfolio (net of non-leverage expenses) must exceed 0.720% in order to cover such interest or payment rates and other expenses specifically related to leverage. These numbers are merely estimates, used for illustration. Actual interest or payment rates may vary frequently and may be significantly higher or lower than the rate estimated above.

The following table is furnished in response to requirements of the SEC. It is designed to illustrate the effect of leverage on Common Share total return, assuming investment portfolio total returns (comprised of income and changes in the value of investments held in the Fund's portfolio net of expenses) at the assumed portfolio total return rates provided in the table. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table further reflects the use of leverage representing 36% of the Fund's Managed Assets and the Fund's currently projected annual dividend rate, borrowing interest rate or payment rate set by an interest rate transaction of 2.00%. See Risk Factors Leverage Risk and Use of Leverage.

Assumed Portfolio Total Return (Net of Expenses)	-10%	-5%	0%	5%	10%
Common Share Total Return	-16.75%	-8.94%	-1.13%	6.69%	14.50%

Common Share total return is composed of two elements—the Common Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying interest on any borrowings and after paying dividends on the preferred shares and other expenses associated with the preferred shares) and gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table assumes that the Fund is more likely to suffer capital losses than capital appreciation.

RISK FACTORS

Risk is inherent in all investing. Investing in any investment company security involves risk, including the risk that you may receive little or no return on your investment or even that you may lose part or all of your investment. Therefore, before investing you should consider carefully the following risks that you assume when you invest in Common Shares.

Fund Level Risks

Investment and Market Risk

An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the corporate debt obligations owned by the Fund, which generally trade in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Recent Market Circumstances

The financial crisis in the U.S. and global economies over the past several years, including the European sovereign debt crisis, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased and credit has become scarcer worldwide. Recent regulatory changes, including the Dodd-Frank Act and the introduction of new international capital and liquidity requirements under Basel III, may cause lending activity within the financial services sector to be constrained for several years as Basel III rules phase in and rules and regulations are promulgated and interpreted under the Dodd-Frank Act. These market conditions may continue or deteriorate further and may add significantly to the risk of short-term volatility in the Fund. In response to the crisis, the U.S. and other governments and the Federal Reserve and certain foreign central banks have taken steps to support financial markets. Withdrawal of this support, failure of efforts in response to the crisis, or investor perception that such efforts are not succeeding, could adversely impact the value and liquidity of certain securities. Because the situation is widespread and largely unprecedented, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these market conditions. The severity or duration of these conditions may also be affected by policy changes made by governments or quasi-governmental organizations. Changes in market conditions will not have the same impact on all types of securities.

Since 2010, the risks of investing in certain foreign government debt have increased dramatically as a result of the ongoing European debt crisis, which began in Greece and has spread to varying degrees throughout various other European countries. These debt crises and the ongoing efforts of governments around the world to address these debt crises have also resulted in increased volatility and uncertainty in the global securities markets and it is impossible to predict the effects of these or similar events in the future on the Fund, though it is possible that these or similar events could have a significant adverse impact on the value and risk profile of the Fund. In the United States, on August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. federal government debt to AA+ from AAA. Any additional downgrade by S&P, or any other rating agency, could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt.

Global economies and financial markets are also becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. For example, during the summer of 2015, stock markets in China suffered a significant downturn, which continues to persist, and is expected to continue to slow economic growth in China. The slowdown

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

in the Chinese economy could negatively affect the country's major trading partners and could, in turn, widely affect the global financial markets. State involvement in the Chinese economy and stock markets is such that it may be

difficult to predict or gauge the extent or duration of the slowdown. In addition, in a referendum held on June 23, 2016, citizens of the United Kingdom voted to leave the EU, creating economic and political uncertainty in its wake. The country's departure from the EU (known as Brexit) sparked depreciation in the value of the British pound, short-term declines in the stock markets and heightened risk of continued economic volatility worldwide.

As a consequence of the United Kingdom's vote to withdraw from the EU, the government of the United Kingdom may, pursuant to the Treaty, give notice of its withdrawal and enter into negotiations with the EU Council to agree to terms for the United Kingdom's withdrawal from the EU. The Treaty provides for a two year negotiation period, which may be shortened or extended by agreement of the parties. However, there is still considerable uncertainty relating to the potential consequences and precise timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom's exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties.

The impact of these developments in the near- and long-term is unknown and could have additional adverse effects on economies, financial markets and asset valuations around the world.

Market Disruption and Geopolitical Risk

The aftermath of the war in Iraq, instability in Afghanistan, Pakistan, Egypt, Libya, Syria, Russia, Ukraine and the Middle East, possible terrorist attacks in the United States and around the world, growing social and political discord in the United States, the European debt crisis, the response of the international community through economic sanctions and otherwise to Russia's recent annexation of the Crimea region of Ukraine and posture vis-a-vis Ukraine, further downgrade of U.S. Government securities and other similar events, may have long-term effects on the U.S. and worldwide financial markets and may cause further economic uncertainties in the United States and worldwide. The Fund does not know and cannot predict how long the securities markets may be affected by these events and the effects of these and similar events in the future on the U.S. economy and securities markets. The Fund may be adversely affected by abrogation of international agreements and national laws which have created the market instruments in which the Fund may invest, failure of the designated national and international authorities to enforce compliance with the same laws and agreements, failure of local, national and international organization to carry out their duties prescribed to them under the relevant agreements, revisions of these laws and agreements which dilute their effectiveness or conflicting interpretation of provisions of the same laws and agreements. The Fund may be adversely affected by uncertainties such as terrorism, international political developments, and changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of the countries in which it is invested.

Legislation and Regulatory Risk

At any time after the date of this Prospectus, legislation or additional regulations may be enacted that could negatively affect the assets of the Fund, securities held by the Fund or the issuers of such securities. Changing approaches to regulation may have a negative impact on the entities and/or securities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. Fund shareholders may incur increased costs resulting from such legislation or additional regulation. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objectives. For example, the Dodd-Frank Act is designed to impose stringent regulation on the over-the-counter derivatives market in an attempt to increase transparency and accountability and provides for, among other things, new clearing, execution, margin, reporting, recordkeeping,

business conduct, disclosure, position limit, minimum net capital and registration requirements. Although the CFTC has released final rules under the Dodd-Frank Act, many of the provisions are subject to further final rulemaking, and thus the Dodd-Frank Act's ultimate impact remains unclear.

The SEC recently proposed rules governing the use of derivatives by registered investment companies, which could affect the nature and extent of derivatives use by the Fund. The proposed rules have not yet been adopted and therefore the full impact of such rules is uncertain at this time. It is possible that such rules, if adopted, could limit the implementation of the Fund's use of derivatives, which could have an adverse effect on the Fund.

Additionally, the Fund is operated by persons who have claimed an exclusion, granted to operators of registered investment companies like the Fund, from registration as a commodity pool operator under Rule 4.5 promulgated by the CFTC pursuant to its authority under the Commodity Exchange Act (CEA) and, therefore, is not subject to registration or regulation as a commodity pool operator. As a result, the Fund is limited in its ability to use commodity futures (which include futures on broad-based securities indexes and interest rate futures) or options on commodity futures, engage in swaps transactions or make certain other investments (whether directly or indirectly through investments in other investment vehicles) for purposes other than bona fide hedging. With respect to transactions other than for bona fide hedging purposes, either: (1) the aggregate initial margin and premiums required to establish the Fund's positions in such investments may not exceed 5% of the liquidation value of the Fund's portfolio (after accounting for unrealized profits and unrealized losses on any such investments); or (2) the aggregate net notional value of such instruments, determined at the time the most recent position was established, may not exceed 100% of the liquidation value of the Fund's portfolio (after accounting for unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the Fund may not market itself as a commodity pool or otherwise as a vehicle for trading in the futures, options or swaps markets. If the Fund does not continue to claim the exclusion, it would likely become subject to registration and regulation as a commodity pool operator. The Fund may incur additional expenses as a result of the CFTC's registration and regulatory requirements.

Market Discount from Net Asset Value

Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be reduced by transaction costs (if applicable, which vary depending on the offering method used). Depending on the premium of the Common Shares at the time of any offering of Common Shares hereunder, the Fund's net asset value may be reduced by an amount up to the offering costs borne by the Fund. The net asset value per Common Share will be reduced by costs associated with any future offerings of Common or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes.

Leverage Risk

The use of leverage creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders, including potential interest rate risks (specifically the risks that shorter term market interest rates could rise, causing a rise in the Fund's leverage costs) and the likelihood of greater volatility of NAV and market price of, and distributions on, the Common Shares. In shorter investment horizons or in periods of economic downturn, sharply increasing inflation or higher volatility, leverage will typically magnify downside outcomes. The Fund will pay (and Common Shareholders will bear) any costs and expenses relating to the Fund's use of leverage, which will result in a reduction in the NAV of the Common Shares. The Fund's use of leverage similarly can magnify the impact of changing market conditions on Common

Share market prices. There is no assurance that the Fund will continue to utilize leverage or that the Fund's use of leverage will be successful.

Because the long-term debt securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short- to intermediate term yields, the incremental earnings from leverage will vary over time. However, the Fund may use derivatives, such as interest rate swaps, to manage the Fund's effective cost of leverage exposure in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. The income benefit from leverage will increase to the extent that the difference widens between the net earnings on the Fund's portfolio securities and its cost of leverage. If short- or intermediate-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing income and returns to Common Shareholders. This could occur even if short-term or intermediate-term and long-term interest rates rise. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on borrowing, or dividends paid on preferred shares, as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund is subject to requirements imposed by its use of leverage through Borrowings, including the Credit Agreement, and its Preferred Shares, including TP Shares. These requirements may include asset coverage and/or restrictions relating to portfolio characteristics such as portfolio diversification and credit rating criteria. In addition, the TP Shares are required to use commercially reasonable efforts to maintain a rating by at least one NRSRO and are subject to asset coverage requirements of 225%. While these restrictions may be different than those under the 1940 Act, it is not anticipated that these restrictions will impede the management of the Fund's portfolio in accordance with the Fund's investment objectives and policies. However, in order to maintain such requirements, the Fund may be required to take certain actions, such as redeeming Preferred Shares or reducing Borrowings with the proceeds from portfolio transactions at what might be an inopportune time in the market. Such actions could reduce the net earnings or returns to Common Shareholders over time.

So long as the rate of distributions received from the Fund's portfolio investments purchased with the proceeds of leverage, net of applicable Fund expenses, exceeds the then current all in costs of such leverage, the investment of the proceeds of such leverage will generate more cash flow than will be needed to make interest and/or dividend payments or otherwise meet the all in costs of leverage. If so, the excess cash flow may be available to pay higher distributions to holders of Common Shares. However, if the rate of cash flow received from the Fund's portfolio investments purchased with the proceeds of leverage, net of applicable Fund expenses, is less than the then current all in costs of such leverage, this may result in reduced net investment income available for distribution to holders of Common Shares.

Furthermore, the amount of fees paid to NFALLC and Symphony for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for NFALLC and Symphony to leverage the Fund.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above and magnify the Fund's leverage risk.

Swap Risk

Swap agreements are typically over-the-counter, two-party contracts entered into primarily by institutional investors for periods typically ranging from a few weeks to more than one year, where the parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. Interest rate swaps involve the

exchange with another party of their respective commitments to pay or receive interest (for example, an exchange of floating rate payments for fixed-rate payments). The use of interest rate swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that the Fund is contractually obligated to make. If the other party to an interest rate swap defaults, the Fund's risk of loss generally consists of the net amount of interest payments that the Fund contractually is entitled to receive.

Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of the Shares. In addition, if the counterparty to an interest rate swap defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset the interest payments on Borrowings or the dividend payments on outstanding TP Shares. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of the Shares. In addition, at the time an interest rate swap transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of the Shares. The Fund could be required to prepay the principal amount of any Borrowings. Such redemption or prepayment would likely result in the Fund seeking to terminate early all or a portion of any swap transaction. Early termination of a swap could result in a termination payment by or to the Fund.

There can be no assurance that any interest rate swap entered into by the Fund, including the interest rate swap associated with the TP Shares, as described above under "Use of Leverage," will have the intended effect.

Issuer Level Risks

Issuer Credit Risk

Debt instruments in which the Fund may invest are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. There can be no assurance that the liquidation of any collateral securing a debt obligation would satisfy the issuer's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a debt obligation. The collateral securing a debt obligation may lose all or substantially all of its value in the event of bankruptcy of an issuer. Some debt obligations are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such debt obligations to presently existing or future indebtedness of the issuer or take other action detrimental to the holders of debt obligations, including, in certain circumstances, invalidating such debt obligations or causing interest previously paid to be refunded to the issuer. If interest were required to be refunded, it would negatively affect the Fund's performance.

There can be no assurance that the liquidation of any collateral securing a debt obligation would satisfy the issuer's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a debt obligation. The collateral securing a debt obligation may lose all or substantially all of its value in the event of bankruptcy of an issuer. Some debt obligations are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such debt obligations to presently existing or future indebtedness of the issuer or take other action detrimental to the holders of debt obligations, including, in certain circumstances, invalidating such debt obligations or causing interest previously paid to be refunded to the issuer. If interest were required to be refunded, it would negatively affect the Fund's performance.

In evaluating the creditworthiness of issuers, Symphony may consider, and may rely in part on, analyses performed by others. Issuers may have outstanding debt obligations that are rated below investment grade by a NRSRO. NRSROs are private services that provide ratings of the credit quality of debt instruments. Ratings assigned by a NRSRO are not absolute standards of credit quality and do not evaluate market risks or the liquidity of securities. NRSROs may fail to make timely changes in credit ratings and an issuer's current financial condition may be better or worse than a rating indicates. To the extent that the issuer of a security pays a NRSRO for the analysis of its security, an inherent conflict of interest may exist that could affect the reliability of the rating. Many of the debt obligations acquired by the Fund will have been assigned ratings below investment grade quality. Because of the protective features of senior loans, Symphony believes that senior loans tend to have more favorable loss recovery rates as compared to more junior types of below investment grade debt obligations. In addition, Symphony believes there are investment opportunities in the subordinated loan segment, which it believes create the potential for attractive risk-adjusted returns. Symphony does not view ratings as the determinative factor in its investment decisions and relies more upon its credit analysis abilities.

Below Investment Grade Risk

The Fund invests in debt instruments that are rated below investment grade at the time of investment or that are unrated but judged by the portfolio managers to be of comparable quality. Substantially all of the Fund's portfolio likely will be invested in debt instruments of below investment grade quality. No more than 30% of the Fund's Managed Assets may be invested in debt instruments rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which may be subject to higher price volatility and default risk than investment grade instruments of comparable terms and duration. Issuers of lower grade instruments may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade instruments are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade instruments. The secondary market for lower grade instruments, including some senior loans and most subordinated loans may not be as liquid as the secondary market for more highly rated instruments, a factor which may have an adverse effect on the Fund's ability to dispose of a particular instrument. There are fewer dealers in the market for lower grade securities than for investment grade obligations. The prices quoted by different dealers for lower grade instruments may vary significantly and the spread between the bid and ask price for such instruments is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for lower grade securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become illiquid. As a result, the Fund could find it more difficult to sell these instruments or may be able to sell the instruments only at prices lower than if such instruments were widely traded. Prices realized upon the sale of such lower rated or unrated instruments, under these circumstances, may be less than the prices used in calculating the Fund's net asset value.

Distressed and defaulted securities, including DIPs, generally present the same risks as investments in below investment grade debt instruments. However, in most cases, these risks are of a greater magnitude because of the uncertainties of investing in an issuer undergoing financial distress. An issuer of distressed securities may be in bankruptcy or undergoing some other form of financial restructuring. Interest and/or principal payments on distressed securities may be in default. Distressed securities present a risk of loss of principal value, including potentially a total loss of value. Distressed securities may be highly illiquid and the prices at which distressed securities may be sold may represent a substantial discount to what Symphony believes to be the ultimate value of such obligations.

Non-U.S. Securities Risk

Investments in securities of non-U.S. companies involve special risks not presented by investments in securities of U.S. companies, including the following: less publicly available information about non-U.S. companies or markets due to less rigorous disclosure or accounting standards or regulatory practices; restrictions on foreign investment; possible restrictions on repatriation of investment income and capital; reduced levels of government regulation of foreign securities markets; many non-U.S. markets may be smaller, less liquid and more volatile; potential adverse effects of fluctuations in controls on the value of the Fund's investments; the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; the impact of economic, political, social or diplomatic events; possible seizure of a company's assets, including expropriation and nationalization; restrictions imposed by non-U.S. countries limiting the ability of non-U.S. issuers to make payments of principal and/or interest; and withholding and other non-U.S. taxes may decrease the Fund's return. These risks are more pronounced to the extent that the Fund invests a significant amount of its assets in companies located in one region and to the extent that the Fund invests in securities of issuers in emerging markets. The Fund's income from non-U.S. issuers may be subject to non-U.S. withholding taxes. In some countries, the Fund also may be subject to taxes on trading profits and, on certain securities transactions, transfer or stamp duties tax. To the extent foreign income taxes are paid by the Fund, it is unlikely that U.S. Common Shareholders will be able to claim a credit or deduction for U.S. federal income tax purposes. See Tax Matters.

Risks of investing in emerging markets issuers include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war, and ethnic, religious and racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth, and which may in turn diminish the value of the companies in those markets.

Security Level Risks

Senior Loan Risk

Senior loans hold the most senior position in the capital structure of a business entity, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. Senior loans that the Fund intends to invest in are usually rated below investment grade, and share the same risks of other below investment grade debt instruments.

Although the Fund invests primarily in senior loans that are secured by specific collateral, there can be no assurance the liquidation of such collateral would satisfy a Borrower's obligation to the Fund in the event of Borrower default or that such collateral could be readily liquidated under such circumstances. If the terms of a senior loan do not require the Borrower to pledge additional collateral in the event of a decline in the value of the already pledged collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the senior loan.

In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a senior loan. If a secured loan is foreclosed, the Fund would likely bear the costs and liabilities associated with owning and disposing of the collateral. The collateral may be difficult to sell and the Fund would bear the risk that the collateral may decline in value

while the Fund is holding it. Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or

other similar laws, could subordinate the senior loans to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of senior loans.

Loan interests may not be considered Securities, and purchasers, such as the Fund, therefore may not be entitled to rely on the protections of the federal securities laws.

Second Lien Loans and Unsecured Loans Risk

Second lien loans and unsecured loans generally are subject to the same risks associated with investments in senior loans, as discussed above. Because second lien loans and unsecured loans are lower in priority of payment to senior loans, they are subject to the additional risk that the cash flow of the Borrower and property securing the loan, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the Borrower. This risk is generally higher for unsecured loans, which are not backed by a security interest in any specific collateral. Second lien loans and unsecured loans are expected to have greater price volatility than senior loans and may be less liquid. Second lien loans and unsecured loans of below investment grade quality also share the same risks of other below investment grade debt instruments.

Subordinated Loans and Other Subordinated Debt Instruments

Issuers of subordinated loans and other subordinated debt instruments in which the Fund may invest usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, the subordinated loans or other subordinated debt instruments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments in respect of subordinated loans or other subordinated debt instruments in which it invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of an issuer, holders of debt instruments ranking senior to the subordinated loan or other debt instrument in which the Fund invests would typically be entitled to receive payment in full before the Fund receives any distribution in respect of its investment. After repaying such senior creditors, such issuer may not have any remaining assets to use for repaying its obligation to the Fund. In the case of debt ranking equally with subordinated loans or other subordinated debt instruments in which the Fund invests, the Fund would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant issuer. In addition, the Fund will likely not be in a position to control any issuer by investing in its debt instruments. As a result, the Fund will be subject to the risk that an issuer in which it invests may make business decisions with which the Fund disagrees and the management of such issuer, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve the Fund's interests as a debt investor.

Risk of Settlement Delays

Portfolio transactions in loans may settle in as short as seven days but typically can take up to two or three weeks, and in some cases much longer. Unlike the securities markets, there is no central clearinghouse for loan transactions, and the loan market has not established enforceable settlement standards or remedies for failure to settle.

Loans Not Considered Securities

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

Loan interests may not be considered securities, and purchasers, such as the Fund, therefore may not be entitled to rely on the protections of the federal securities laws.

Interest Rate Risk

Interest rate risk is the risk that fixed rate debt instruments will decline in value because of changes in market interest rates. When interest rates rise, the value of a fund invested in fixed rate obligations can be expected to decline. Conversely, when interest rates decline, the value of a fund invested in fixed rate obligations can be expected to rise. The Fund's investments in such fixed rate instruments means that the net asset value of the Fund and market price of the Common Shares will tend to decline if market interest rates rise. Market interest rates in the U.S. and in certain other countries in which the Fund may invest are near historically low levels. Because interest rates on most adjustable rate instruments typically only reset periodically (*e.g.*, monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's net asset value.

Risks in Loan Valuation

The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments including, but not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions may make it difficult to value or sell such instruments.

Senior Loan Agent Risk

A financial institution's employment as an Agent under a senior loan might be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor Agent would generally be appointed to replace the terminated Agent, and assets held by the Agent under the loan agreement would likely remain available to holders of such indebtedness. However, if assets held by the terminated Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a senior loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (*e.g.*, an insurance company or government agency) similar risks may arise.

Loan Participation Risk

The Fund may purchase a participation interest in a loan and by doing so acquire some or all of the interest of a bank or other lending institution in a loan to a Borrower. A participation typically will result in the Fund having a contractual relationship only with the Lender, not the Borrower. As a result, the Fund assumes the credit risk of the Lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the participation and only upon receipt by the Lender of the payments from the Borrower. In the event of insolvency or bankruptcy of the Lender selling the participation, the Fund may be treated as a general creditor of the Lender and may not have a senior claim to the Lender's interest in the loan. If the Fund only acquires a participation in the loan made by a third party, the Fund may not be able to control the exercise of any remedies that the Lender would have under the loan. Such third party participation arrangements are designed to give loan investors preferential treatment over high yield investors in the event of a deterioration in the credit quality of the Borrower. Even when these arrangements exist, however, there can be no assurance that the principal and interest owed on the loan will be repaid in full.

Prepayment Risk

During periods of declining interest rates or for other purposes, Issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding instruments. This is known as call or prepayment risk. Prepayments cannot be predicted with accuracy. Loans in particular may be subject to early prepayment and thus the actual maturity of loans is typically shorter than their stated final maturity calculated solely on the basis of the stated life and payment schedule. In addition, below investment grade debt instruments frequently have call features that allow an issuer to redeem an instrument at dates prior to its stated maturity at a specified price (typically greater than par) only if certain prescribed conditions are met (commonly referred to as call protection). An issuer may redeem a lower grade instrument if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Senior loans typically have no such call protection. For premium bonds (bonds acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be increased.

Short Exposure Risk

The Fund may enter into tactical short positions, either directly or through derivatives, to create negative investment exposure to or hedge existing investment exposure. Short selling involves selling securities that may be owned, and if not owned, borrowing the same securities for delivery to the purchaser, with an obligation to replace the borrowed securities at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the securities. A short sale creates the risk of an unlimited loss, in that the price of the underlying security could theoretically increase without limit, thus increasing the cost of buying those securities to cover the short position. There can be no assurance that the securities necessary to cover a short position will be available for purchase. Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. The success of the Fund's short selling to create negative investment exposure is dependent on Symphony's ability to correctly determine which investments are likely to decline in value, either in absolute terms or relative to corresponding long positions in the portfolio, which may be different than Symphony's ability to invest in long portfolio positions.

Structured Product Risk

The Fund may invest in structured products such as structured notes. As a fundamental policy, the Fund will not invest in collateralized loan obligations. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk. The Fund may have the right to receive payments to which it is entitled only from the structured product, and generally does not have direct rights against the issuer or the entity that sold assets to the special purpose trust. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. When investing in structured products, it is impossible to predict whether the underlying index or prices of the underlying securities will rise or fall, but prices of the underlying indices and securities (and, therefore, the prices of structured products) will be influenced by the same types of political and economic events that affect particular issuers of securities and capital markets generally. Certain structured products may be thinly traded or have a limited trading market and may have the effect of increasing the illiquidity of the Fund's portfolio to the extent that the Fund, at a particular point in time, may be unable to find qualified buyers for these securities. Investments in structured notes involve risks including income risk, credit and market risk. Where the Fund's investments in structured notes are based upon the movement of one or more factors, including interest rates, referenced bonds and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of the factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on the structured note to be reduced to zero and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured notes may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the note.

Warrants and Equity Securities Risk

Investments in warrants and equity securities entail certain risks in addition to those associated with investments in adjustable rate instruments or other debt instruments. The value of warrants and equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. The Fund may possess material non-public information about an issuer as a result of its ownership of an adjustable rate instrument or other debt instrument of such issuer. Because of prohibitions on trading in securities of issuers while in possession of such information, the Fund might be unable to enter into a transaction in a security of such an issuer when it would otherwise be advantageous to do so.

Duration Risk

Duration is the sensitivity, expressed in years, of the price of a fixed income security to changes in the general level of interest rates (or yields). Securities with longer durations tend to be more sensitive to interest rate (or yield) changes than securities with shorter durations. Duration differs from maturity in that it considers potential changes to interest rates, and a security's coupon payments, yield, price and par value and call features, in addition to the amount of time until the security matures. The duration of a security will be expected to change over time with changes in market factors and time to maturity. The duration of the Fund's portfolio is not subject to any limits and therefore the portfolio may be very sensitive to interest rate changes.

Zero Coupon Bonds Risk

The market prices of zero coupon bonds of below investment grade quality will normally be affected to a greater extent by interest rate changes, and therefore tend to be more volatile than securities which pay interest currently and in cash.

Floating-Rate and Fixed-to-Floating-Rate Securities Risk

The market value of floating-rate securities is a reflection of discounted expected cash flows based on expectations for future interest rate resets. The market value of such securities may fall in a declining interest rate environment and may also fall in a rising interest rate environment if there is a lag between the rise in interest rates and the reset. This risk may also be present with respect to fixed-to-floating-rate securities in which the Fund may invest. A secondary risk associated with declining interest rates is the risk that income earned by the Fund on floating-rate and fixed-to-floating-rate securities will decline due to lower coupon payments on floating rate securities.

When-Issued and Delayed Delivery Transactions Risk

When-issued and delayed-delivery transactions may involve an element of risk because no interest accrues on the securities prior to settlement and, because securities are subject to market fluctuations, the value of the securities at time of delivery may be less (or more) than their cost. A separate account of the Fund will be established with its custodian consisting of cash equivalents or liquid securities having a market value at all times at least equal to the amount of any delayed payment commitment.

Illiquid Securities Risk

The Fund may invest in securities and other instruments that, at the time of investment, are illiquid. Illiquid securities are securities that are not readily marketable and may include some restricted securities, which are securities that may not be resold to the public without an effective registration statement under the 1933 Act or, if they are unregistered, may be sold only in a privately negotiated transaction or pursuant to an exemption from registration. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.

Other Risks Associated With Loans

Many senior loans, second lien loans and other loans in which the Fund invests may not be rated by a NRSRO, will not be registered with the SEC or any state securities commission and will not be listed on any national securities exchange. To the extent that a secondary market does exist for certain loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. In addition, the amount of public information available with respect to loans generally may be less extensive than that available for registered or exchange listed securities. As a result, the Fund is particularly dependent on the analytical abilities of Symphony with respect to investments in such loans. Symphony's judgment about the credit quality of a Borrower may be wrong. Economic and other events (whether real or perceived) can reduce the demand for certain loans or loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. No active trading market may exist for some senior loans and some loans may be subject to restrictions on resale. A secondary market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which may impair the ability to realize full value and thus cause a material decline in the Fund's net asset value. During periods of limited supply and liquidity of loans, the Fund's yield may be lower. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain loans and other securities or market conditions that reduce liquidity) can reduce the value of loans and other debt obligations, impairing the Fund's net asset value.

Derivatives Risk, Including the Risk of Swaps

The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. The risks associated with derivatives include (i) the imperfect correlation between the value of such instruments and the underlying assets, (ii) the possible default of the counterparty to the transaction, (iii) illiquidity of the derivative instruments, and (iv) high volatility losses caused by unanticipated market movements, which are potentially unlimited. Whether the Fund's use of derivatives is successful will depend on, among other things, if NFALLC and Symphony correctly forecast market values, interest rates and other applicable factors. If NFALLC and Symphony incorrectly forecast these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund is subject to the credit risk that its counterparty (whether a clearing corporation in the case of exchange traded instruments or another third party in the case of over-the-counter instruments) may be unable to meet its obligations. In addition, there is a risk of loss by the Fund of margin deposits in the event of the bankruptcy of the dealer with whom the Fund has an open position in an option or futures or forward contract. Derivative instruments traded in foreign markets may offer less liquidity and greater credit risk than comparable instruments traded in domestic markets. The ability of the Fund to close out its positions also may be affected by exchange imposed daily trading limits on options and futures contracts. If the Fund is unable to close out a position, it will be unable to realize its profit or limit its losses until such time as the option becomes exercisable or expires or the futures or forward contract terminates, as the case may be. The inability to close out options, futures and forward positions could also have an adverse impact on the Fund's ability to use derivative instruments as a hedging strategy.

The Fund may enter into debt-related derivatives instruments including credit default swap contracts and interest rate swaps. The Fund may enter into total return swaps on an underlying index to create investment exposure. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Credit default and total return swap agreements may effectively add leverage to the Fund's portfolio. Total return swap agreements are subject to the risk that a counterparty will default on its payment obligations to the Fund thereunder. In addition, the use of swaps requires an understanding by NFALLC and Symphony not only of the referenced asset, rate or index, but also of the swap itself. Because they are two-party contracts and because they

may have terms of greater than seven days, swap agreements may be considered to be illiquid, increasing the Fund's interest rate risk. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements. The derivatives market is subject to a changing regulatory environment. It is possible that regulatory or other developments in the derivatives market, including the swaps market, could adversely affect the Fund's ability to successfully use derivative instruments. See also, Risk Factors Security Level Risks Counterparty Risk and Risk Factors Other Risks Hedging Risk and Hedging Transactions in the SAI.

Counterparty Risk

Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives, insured securities or other transactions supported by another party's credit may affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant losses and financial hardships including bankruptcy as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. In the event of insolvency of a counterparty, the Fund may sustain losses or be unable to liquidate a derivatives position.

Call Risk

The Fund may invest in preferred securities and debt instruments, which are subject to call risk. Preferred securities and debt instruments may be redeemed at the option of the issuer, or called, before their stated maturity date. In general, an issuer will call its preferred securities or debt instruments if they can be refinanced by issuing new instruments which bear a lower interest rate. The Fund is subject to the possibility that during periods of falling interest rates, an issuer will call its high-yielding preferred securities or debt instruments. The Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

Issuer Credit Risk

Issuers of preferred securities and debt instruments in which the Fund may invest may default on their obligations to pay dividends, principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of a preferred security or debt instrument experiencing non-payment and, potentially, a decrease in the net asset value of the Fund. There can be no assurance that liquidation of collateral would satisfy the issuer's obligation in the event of non-payment of scheduled dividend, interest or principal or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a preferred security or debt instrument. To the extent that the credit rating assigned to a security in the Fund's portfolio is downgraded, the market price and liquidity of such security may be adversely affected. Preferred securities are subordinated borrowings to bonds and debt instruments in a company's capital structure in terms of priority to corporate income and assets upon liquidation, and therefore will be subject to greater credit risk than those debt instruments.

Other Risks

Hedging Risk

The Fund's use of derivatives or other transactions to reduce risk involves costs and will be subject to NFALLC and Symphony's ability to predict correctly changes in the relationships of such hedge instruments to

the Fund's portfolio holdings or other factors. No assurance can be given that NFALLC and Symphony's judgment in this respect will be correct. In addition, no assurance can be given that the Fund will enter into hedging or other transactions at times or under circumstances in which it may be advisable to do so.

Reinvestment Risk

Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called securities at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the market price of the Common Shares or your overall returns.

Inflation Risk

Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. In addition, during any period of rising inflation, interest rates on borrowings would likely increase, which would tend to further reduce returns to Common Shareholders.

Borrowing Risk

In addition to borrowing for leverage (See *Leverage*), the Fund may borrow for temporary or emergency purposes, pay dividends, repurchase its shares, or clear portfolio transactions. Borrowing may exaggerate changes in the net asset value of the Fund's shares and may affect the Fund's net income. When the Fund borrows money, it must pay interest and other fees, which will reduce the Fund's returns if such costs exceed the returns on the portfolio securities purchased or retained with such borrowings. Any such borrowings are intended to be temporary. However, under certain market conditions, such borrowings might be outstanding for longer periods of time.

Regulatory Risk

To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of adjustable rate instruments for investment may be adversely affected. Further, such legislation or regulation could depress the market value of adjustable rate instruments.

Reliance on Investment Adviser

The Fund is dependent upon services and resources provided by its investment adviser, NFALLC, and therefore NFALLC's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2014 or to fund its other liquidity needs. Nuveen

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

Investments failure to satisfy the terms of its indebtedness, including covenants therein, may generally have an adverse effect on the financial condition of Nuveen Investments.

Anti-Takeover Provisions

The Declaration and By-Laws include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust and By-Laws.

Other Investment Companies Risk

The Fund may invest up to 10% of its Managed Assets in the securities of other investment companies. Such securities may be leveraged. As a result, the Fund may be indirectly exposed to leverage through an investment in such securities. Utilization of leverage is a speculative investment technique and involves certain risks. An investment in securities of other investment companies that are leveraged may expose the Fund to higher volatility in the market value of such securities and the possibility that the Fund's long-term returns on such securities will be diminished.

Deflation Risk

Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Certain Affiliations

Certain broker-dealers may be considered to be affiliated persons of the Fund, NFALLC and/or Nuveen Investments. Absent an exemption from the SEC or other regulatory relief, the Fund is generally precluded from effecting certain principal transactions with affiliated brokers, and its ability to purchase securities being underwritten by an affiliated broker or a syndicate including an affiliated broker, or to utilize affiliated brokers for agency transactions, is subject to restrictions. The Fund has not applied for and does not currently intend to apply for such relief. This could limit the Fund's ability to engage in securities transactions, purchase certain adjustable rate senior loans, if applicable, and take advantage of market opportunities. In addition, unless and until the underwriting syndicate is broken in connection with the initial public offering of the Common Shares, the Fund will be precluded from effecting principal transactions with brokers who are members of the syndicate.

Potential Conflicts of Interest Risk

NFALLC and Symphony each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, NFALLC and Symphony may provide investment management services to other funds and accounts that follow investment objectives similar to that of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Symphony may have to allocate a limited investment opportunity among its clients, which include closed-end funds, open-end funds, other commingled funds, collateralized loan obligations, collateralized debt obligations, simplified employee pension accounts and other private funds. NFALLC and Symphony have adopted policies and procedures designed to address such situations and other potential conflicts of interests. For additional information about potential conflicts of interest, and the way in which NFALLC and Symphony address such conflicts, please see the Fund's SAI.

Cybersecurity Risk

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

Technology, such as the internet, has become more prevalent in the course of business, and as such, the Fund and its service providers are susceptible to operational and information security risk resulting from cyber incidents. Cyber incidents refer to both intentional attacks and unintentional events including: processing errors, human errors, technical errors including computer glitches and system malfunctions, inadequate or failed internal or external processes, market-wide technical-related disruptions, unauthorized access to digital systems (through hacking or malicious software coding), computer viruses, and cyber-attacks which shut down, disable, slow or otherwise disrupt operations, business processes or website access or functionality (including denial of service attacks). Cyber incidents could adversely impact the Fund and cause the Fund to incur financial loss and expense,

as well as face exposure to regulatory penalties, reputational damage, and additional compliance costs associated with corrective measures. Cyber incidents may cause a Fund or its service providers to lose proprietary information, suffer data corruption, lose operational capacity or fail to comply with applicable privacy and other laws. Among other potentially harmful effects, cyber incidents also may result in theft, unauthorized monitoring and failures in the physical infrastructure or operating systems that support the Fund and its service providers. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Fund's service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cybersecurity plans and systems put in place by its service providers or any other third parties whose operations may affect the Fund.

MANAGEMENT OF THE FUND

Trustees and Officers

The Board of Trustees is responsible for the Fund's management, including supervision of the duties performed by NFALLC. The names and business addresses of the trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under Management of the Fund in the SAI.

Investment Adviser, Sub-Adviser and Portfolio Managers

Investment Adviser. Nuveen Fund Advisors LLC, a registered investment adviser, is responsible for overseeing the Fund's overall investment strategy and its implementation. NFALLC also is responsible for the ongoing monitoring of Symphony, overseeing the Fund's use of leverage, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services to the Fund. NFALLC is located at 333 West Wacker Drive, Chicago, IL 60606. NFALLC is an indirect subsidiary of Nuveen, the investment management arm of TIAA. TIAA is a life insurance company founded in 1918 by the Carnegie Foundation for the Advancement of Teaching and is the companion organization of College Retirement Equities Fund. As of December 31, 2016, Nuveen managed approximately \$882 billion in assets, of which approximately \$126 billion was managed by NFALLC.

Sub-Adviser. Symphony Asset Management, LLC, located at 555 California Street, Suite 2975, San Francisco, CA 94104, serves as the Fund's sub-adviser, pursuant to a sub-advisory agreement between NFALLC and Symphony (the Sub-Advisory Agreement). Symphony, a registered investment adviser, commenced operations in 1994 and had approximately \$18.7 billion in assets under management as of December 31, 2016. Symphony is an indirect wholly-owned subsidiary of Nuveen Investments. Symphony oversees day-to-day investment operations of the Fund. Pursuant to the Sub-Advisory Agreement, Symphony will be compensated for the services it provides to the Fund with a portion of the management fee NFALLC receives from the Fund. NFALLC and Symphony retain the right to reallocate investment advisory responsibilities and fees between themselves in the future.

Portfolio Management. Gunther Stein (a Portfolio Manager) is Chief Investment Officer and Chief Executive Office at Symphony. Prior to that, he was Director of Fixed Income Strategies. Mr. Stein is responsible for leading Symphony's fixed-income and equity investments strategies and research and overseeing firm trading. Prior to joining Symphony in 1999, Mr. Stein was a high yield portfolio manager at Wells Fargo Bank, where he managed a high yield portfolio, was responsible for investing in public high yield bonds and bank loans and managed a team of credit analysts.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

Scott Caraher (a Portfolio Manager) is a Co-Portfolio Manager and a member of Symphony 's fixed-income team, and his responsibilities include portfolio management and trading for Symphony 's bank loan strategies and credit and equity research for its fixed-income strategies. Prior to joining Symphony in 2002, Mr. Caraher was an Investment Banking Analyst in the industrial group at Deutsche Banc Alex Brown in New York.

Jenny Rhee (a Portfolio Manager) joined Symphony in 2001 and since then has been responsible for trading and portfolio management of fixed-income securities. In 2008, Ms. Rhee was a Senior Vice President and Portfolio Manager at Basso Capital Management, and returned to Symphony as a Co-Portfolio Manager in 2009. Prior to initially joining Symphony, Ms. Rhee was an analyst with Epoch Partners.

Additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers and the Portfolio Managers' ownership of securities in the Fund is provided in the SAI. The SAI is available free of charge by calling (800) 257-8787 or by visiting the Fund's website at www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus or the SAI.

Investment Management and Sub-Advisory Agreements

Investment Management Agreement. Pursuant to an investment management agreement between NFALLC and the Fund (the Investment Management Agreement), the Fund has agreed to pay an annual management fee for the services and facilities provided by NFALLC, payable on a monthly basis, based on the sum of a fund-level fee and a complex-level fee, as described below.

Fund-Level Fee.

Through July 31, 2016, the annual fund-level fee for the Fund, payable monthly, is calculated according to the following schedule:

<u>Average Daily Managed Assets⁽¹⁾</u>	<u>Fund-Level Fee Rate</u>
For the first \$500 million	0.6500%
For the next \$500 million	0.6375%
For the next \$500 million	0.6250%
For the next \$500 million	0.6125%
For managed assets over \$2 billion	0.6000%

Effective August 1, 2016, the annual fund-level fee for the Fund, payable monthly, is calculated according to the following schedule:

<u>Average Daily Managed Assets⁽¹⁾</u>	<u>Fund-Level Fee Rate</u>
For the first \$500 million	0.6500%
For the next \$500 million	0.6250%
For the next \$500 million	0.6000%
For the next \$500 million	0.5750%
For managed assets over \$2 billion	0.5500%

Complex-Level Fee. The annual complex-level fee for the Fund, payable monthly, is calculated according to the following schedule:

<u>Complex-Level Managed Asset Breakpoint Level⁽²⁾</u>	<u>Effective Rate at Breakpoint Level</u>
\$55 billion	0.2000%
\$56 billion	0.1996%
\$57 billion	0.1989%
\$60 billion	0.1961%
\$63 billion	0.1931%
\$66 billion	0.1900%
\$71 billion	0.1851%

<u>Complex-Level Managed Asset Breakpoint Level⁽²⁾</u>	<u>Effective Rate at Breakpoint Level</u>
\$76 billion	0.1806%
\$80 billion	0.1773%
\$91 billion	0.1691%
\$125 billion	0.1599%
\$200 billion	0.1505%
\$250 billion	0.1469%
\$300 billion	0.1445%

- (1) For the Fund, *Managed Assets* means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles), such as, but not limited to, the portion of assets in special purpose trusts of which the Fund owns the inverse floater certificates that has been effectively financed by the trust's issuance of floating rate certificates.
- (2) The complex-level fee is calculated based upon the aggregate daily *eligible assets* of all Nuveen Funds. Eligible assets do not include assets attributable to investments in other Nuveen Funds or assets in excess of a determined amount (originally \$2 billion) added to the Nuveen fund complex in connection with NFALLC's assumption of the management of the former First American Funds effective January 1, 2011. With respect to closed-end funds, eligible assets include assets managed by NFALLC that are attributable to certain types of leverage. For these purposes, leverage includes the use of preferred stock and borrowings and certain investments in the residual interest certificates in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by issuance of floating rate securities, subject to an agreement by NFALLC as to certain funds to limit the amount of such assets for determining eligible assets in certain circumstances. As of July 31, 2016, the complex-level fee rate for the Fund was 0.1610%.

In addition to the fee of NFALLC, the Fund pays all other costs and expenses of its operations, including compensation of its trustees (other than those affiliated with NFALLC and Symphony), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses associated with any Borrowings, expenses of issuing any preferred shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies, and taxes, if any. All fees and expenses are accrued daily and deducted before payment of dividends to investors.

A discussion regarding the basis for the Board of Trustees' decision to renew the Investment Management Agreement for the Fund may be found in the Fund's annual report to shareholders dated July 31 of each year.

Sub-Advisory Agreement. Pursuant to the Sub-Advisory Agreement, Symphony will receive from NFALLC a management fee equal to the portion specified below of the management fee payable by the Fund to NFALLC, payable on a monthly basis:

<u>Average Daily Managed Assets</u>	<u>Percentage of Net Management Fee</u>
Up to \$125 million	50.0%
\$125 million to \$150 million	47.5%
\$150 million to \$175 million	45.0%
\$175 million to \$200 million	42.5%
\$200 million and over	40.0%

NFALLC and Symphony retain the right to reallocate investment advisory responsibilities and fees between themselves in the future.

A discussion regarding the basis for the Board of Trustees' decision to renew the Sub-Advisory Agreement for the Fund may be found in the Fund's annual report to shareholders dated July 31 of each year.

NET ASSET VALUE

The Fund's net asset value per share is determined as of the close of regular session trading (normally 4:00 p.m., Eastern Time) on each day the NYSE is open for business. Net asset value is calculated by taking the market value of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share. All valuations are subject to review by the Fund's Board of Trustees or its delegate.

The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount that an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments include, but are not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions which may make it difficult to value or sell such instruments. It is expected that the Fund's net asset value will fluctuate as a function of interest rate and credit factors. Because of the short-term nature of such instruments, however, the Fund's net asset value is expected to fluctuate less in response to changes in interest rates than the net asset values of investment companies with portfolios consisting primarily of longer term fixed-income instruments. Because non-U.S. instruments may trade on days when Common Shares are not priced, net asset value can change at times when Common Shares cannot be sold.

Independent pricing services typically value adjustable rate corporate debt instruments utilizing readily available market quotations obtained from broker-dealers making markets in such instruments. Other debt instruments and derivative instruments held by the Funds may be valued by the pricing services utilizing a range of market-based inputs and assumptions, cash flows, transactions for comparable instruments and correlations between instruments for normal, institutional-size trading units when determining market value. Equity securities listed and trading on U.S. national securities exchanges will be valued at the last reported sales price on the principal exchange on the valuation date. Unlisted equity securities traded primarily in a U.S. over-the-counter (OTC) market are valued at the last reported sales price on the valuation date, a quoted price as provided by an approved pricing service or market quotations obtained from brokers making markets in such securities. In the absence of readily available market quotations or, when in the opinion of NFALLC and/or Symphony a significant event has occurred such that market values are deemed unreliable, portfolio instruments may be valued by the Fund at their fair value as determined in good faith by or at the direction of the Fund's Board of Trustees. A range of factors and analysis may be considered when determining fair value including relevant market data, interest rates, credit considerations and/or issuer-specific news. The Fund may rely on an independent fair valuation service in making any such fair value determinations or adjustments.

Generally, trading in many foreign securities that the Fund may hold will be substantially completed each day at various times prior to the close of the NYSE. The values of these securities used in determining the net asset value of the Fund generally will be computed as of such times. Occasionally, events affecting the value of foreign securities may occur between such times and the close of the NYSE, which will not be reflected in the computation of the Fund's net asset value (unless the Fund deems that such events would materially affect its net asset value, in which case an adjustment would be made and reflected in such computation). The Fund may rely on an independent fair valuation service in making any such adjustment. Foreign securities and currency held by the Fund will be valued in U.S. dollars; such values will be computed by the custodian based on foreign currency exchange rate quotations supplied by an independent quotation service.

DISTRIBUTIONS

The Fund pays regular monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) that reflects the past and projected performance of the Fund. Distributions can only be made from net investment income after paying any accrued dividends to preferred shareholders, if any, or interest and required principal payments on borrowings.

The Fund's ability to maintain a level dividend rate will depend on a number of factors. The net income of the Fund includes all interest income accrued on portfolio assets less all expenses of the Fund. Expenses of the Fund are accrued each day. For each year, the Fund will distribute all or substantially all of its net investment income. At least annually, the Fund also intends to distribute substantially all of its net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) and taxable ordinary income, if any, after paying any accrued dividends or making any liquidation payments to preferred shareholders, if any preferred shares are issued in the future, and interest and required principal payments on borrowings. Although it does not now intend to do so, the Board of Trustees may change the Fund's dividend policy and the amount or timing of the distributions, based on a number of factors, including the amount of the Fund's undistributed net investment income and historical and projected investment income and the amount of the expenses and dividend rates on the outstanding preferred shares, if any, and expenses and interest on borrowings.

The Fund might not distribute all or a portion of any net capital gain for a taxable year. If the Fund does not distribute all of its net capital gain for a taxable year, it will pay federal income tax on the retained gain. Each Common Shareholder of record as of the end of the Fund's taxable year will include in income for federal income tax purposes, as long-term capital gain, his or her share of the retained gain, will be deemed to have paid his or her proportionate share of the tax paid by the Fund on such retained gain, and will be entitled to an income tax credit or refund for that share of the tax. The Fund will treat the retained capital gains as a substitute for equivalent cash distributions. While not currently anticipated, if the Fund makes total distributions during a given calendar year in an amount that exceeds the Fund's net investment income and capital gain for that calendar year, the excess will generally be treated by Common Shareholders as a return of capital for tax purposes.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time, subject to a finding by the Fund's Board of Trustees that such change is in the best interests of the Fund and its Common Shareholders.

DIVIDEND REINVESTMENT PLAN

If your Common Shares are registered directly with the Fund or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the "Plan"), you may elect to have all dividends, including any capital gain dividends, on your Common Shares automatically reinvested by the Plan Agent (defined below) in additional Common Shares under the Plan. You may elect to participate in the Plan by contacting Nuveen Investor Services at (800) 257-8787. If you do not participate, you will receive all distributions in cash paid by check mailed directly to you or your brokerage firm by State Street Bank and Trust Company as dividend paying agent (the "Plan Agent").

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

(1) If Common Shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then current market price;

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

(2) If Common Shares are trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the NYSE or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase

before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments; or

(3) If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions and a \$2.50 service fee.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Upon a repurchase of your shares, the Fund (or its administrative agent) may be required to report to the IRS and furnish to you cost basis and holding period information for Fund shares that you purchased on or after January 1, 2012 (covered shares).

For shares of the Fund held in the Plan, you are permitted to elect from among several permitted cost basis methods. In the absence of an election, the Plan will use first-in first-out (FIFO) methodology for tracking and reporting your cost basis on covered shares as its default cost basis method. The cost basis method you use may not be changed with respect to a repurchase of shares after the settlement date of repurchase. You should consult with your tax advisors to determine the best permitted cost basis method for your tax situation and to obtain more information about how the cost basis reporting rules apply to you.

Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained by writing to State Street Bank and Trust Company, Attn:

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

PLAN OF DISTRIBUTION

The Fund may sell the Common Shares offered under this Prospectus through

at-the-market transactions;

underwriting syndicates; and

privately negotiated transactions.

The Fund will bear the expenses of the offering, including but not limited to, the expenses of preparation of the Prospectus and SAI for the offering and the expense of counsel and auditors in connection with the offering.

Distribution Through At-the-Market Transactions

The Fund has entered into a distribution agreement with Nuveen Securities (the "Distribution Agreement"), which has been filed as an exhibit to the Registration Statement of which this Prospectus is a part, pursuant to which Nuveen Securities has been appointed as the distributor for up to 1 million of the Common Shares of the Fund issued pursuant to this registration statement. The summary of the Distribution Agreement contained herein is qualified by reference to the Distribution Agreement. Subject to the terms and conditions of the Distribution Agreement, the Fund may from time to time issue and sell its Common Shares through Nuveen Securities to certain broker-dealers which have entered into selected dealer agreements with Nuveen Securities. Currently, Nuveen Securities has entered into a selected dealer agreement with UBS pursuant to which UBS will be acting as Nuveen Securities' sub-placement agent with respect to at-the-market offerings of Common Shares. The selected dealer agreement has been filed as an exhibit to the Registration Statement of which this Prospectus forms a part. The summary of the selected dealer agreement contained herein is qualified by reference to the selected dealer agreement.

Common Shares will only be sold on such days as shall be agreed to by the Fund and Nuveen Securities. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per Common Share plus the per share amount of the commission to be paid to Nuveen Securities. The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen Securities with respect to sales of the Common Shares at a commission rate of up to 1.0% of the gross proceeds of the Sale of Common Shares. Nuveen Securities will compensate broker-dealers participating in the offering at a rate of up to 0.8% of the gross proceeds of the Sale of Common Shares sold by that broker-dealer. Settlements of sales of Common Shares will occur on the third business day following the date on which any such sales are made.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen Securities may be deemed to be an underwriter within the meaning of the 1933 Act, and the compensation of Nuveen Securities may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, Nuveen Securities will act as underwriter on a reasonable efforts basis.

The offering of Common Shares pursuant to the Distribution Agreement will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Distribution Agreement. The Fund and Nuveen Securities each have the right to terminate the Distribution Agreement in its discretion at any time.

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

UBS, its affiliates and their respective employees hold or may hold in the future, directly or indirectly, investment interests in Nuveen Investments, Inc. and its funds. The interests held by employees of UBS or its affiliates are not attributable to, and no investment discretion is held by, UBS or its affiliates.

As of March 1, 2017, the Fund has sold an aggregate of 36,711 Common Shares, representing net proceeds to the Fund of \$731,376, after payment of commissions of \$7,388 in the aggregate.

The Fund's closing price on the NYSE on March 1, 2017 was \$18.40.

Distribution Through Underwriting Syndicates

The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, underwriters will market and price the offering on an expedited basis (*e.g.*, overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen Securities, one of the Fund's underwriters, and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 5% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen Securities in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 91% of the closing market price of the Fund's Common Shares on the day prior to the offering date.

Distribution Through Privately Negotiated Transactions

The Fund, through Nuveen Securities, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the person seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis.

The principal business address of Nuveen Securities is 333 West Wacker Drive, Chicago, Illinois 60606.

DESCRIPTION OF OUTSTANDING SHARES AND DEBT

Common Shares

The Declaration authorizes the issuance of an unlimited number of Common Shares. The Common Shares have a par value of \$0.01 per share and, subject to the rights of holders of preferred shares, including TP Shares issued, and borrowings, if incurred, have equal rights to the payment of dividends and the distribution of assets

upon liquidation. The Common Shares when issued, were fully paid and, subject to matters discussed in Certain Provisions in the Declaration of Trust and By-Laws, non-assessable, and will have no pre-emptive or conversion rights except as may be determined by the Board of Trustees, in their sole discretion, or rights to cumulative voting. Each whole Common Share has one vote with respect to matters upon which a shareholder vote is required, and each fractional share shall be entitled to a proportional fractional vote consistent with the requirements of the 1940 Act and the rules promulgated thereunder, and will vote together as a single class. Whenever the Fund incurs borrowings and/or preferred shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all interest on such borrowings has been paid and all accrued dividends on preferred shares have been paid, unless asset coverage (as defined in the 1940 Act) with respect to any borrowings would be at least 300% after giving effect to the distributions and asset coverage (as defined in the 1940 Act) with respect to preferred shares would be at least 200% after giving effect to the distributions. See Preferred Shares below.

The Common Shares are listed on the NYSE and trade under the ticker symbol JSD, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing. The Fund will not issue share certificates.

Unlike open-end funds, closed-end funds like the Fund do not provide daily redemptions. Rather, if a shareholder determines to buy additional Common Shares or sell shares already held, the shareholder may conveniently do so by trading on the exchange through a broker or otherwise. Common Shares of closed-end investment companies may frequently trade on an exchange at prices lower than net asset value. Common Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value.

Because the market value of the Common Shares may be influenced by such factors as distribution levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, net asset value, relative demand for and supply of such shares in the market, general market and economic conditions, and other factors beyond the control of the Fund, the Fund cannot assure you that Common Shares are trading at a price equal to or higher than net asset value in the future. The Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See Repurchase of Fund Shares; Conversion to Open-End Fund.

Borrowings

The Declaration authorizes the Fund, without approval of the Common Shareholders, to borrow money. In this connection, the Fund may issue notes or other evidence of indebtedness (including bank borrowings or commercial paper) and may secure any such borrowings by mortgaging, pledging or otherwise subjecting as security the Fund's assets. The Fund borrows money at rates generally available to institutional investors. In connection with such Borrowings, the Fund may be required to maintain minimum average balances with the lender or to pay a commitment or other fee to maintain the line of credit. These requirements will increase the cost of any such borrowings over the stated interest rate. Under the requirements of the 1940 Act, the Fund, immediately after any such Borrowings, must have an asset coverage of at least 300%. With respect to any such borrowings, asset coverage means the ratio that the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of such borrowings represented by senior securities issued by the Fund. Under the Credit Agreement the Fund is subject to covenants in relating to asset coverages, portfolio coverages, and otherwise. In addition, as with the issuance of preferred shares, certain types of borrowings may result in the Fund being subject to certain restrictions imposed by guidelines of one or more rating agencies that may issue ratings for commercial paper or notes issued by the Fund. Such restrictions may be more stringent than those imposed by the 1940 Act.

The rights of lenders to the Fund to receive interest on and repayment of principal of any such borrowings will be senior to those of the Common Shareholders, and the terms of any such borrowings may contain

provisions which limit certain activities of the Fund, including the payment of dividends to Common Shareholders in certain circumstances. Further, the 1940 Act does (in certain circumstances) grant to the lenders to the Fund certain voting rights in the event of default in the payment of interest on or repayment of principal. In the event that such provisions would impair the Fund's eligibility for treatment as a regulated investment company under the Code, the Fund will attempt to repay or restructure the borrowings to preserve that eligibility. Any borrowings will likely be ranked senior or equal to all other existing and future borrowings of the Fund. The Fund may also borrow up to an additional 5% of its total assets for temporary purposes. The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency situations. See "Investment Restrictions" in the SAI.

Preferred Shares

The Declaration authorizes the issuance of an unlimited number of preferred shares in one or more classes or series, with rights as determined by the Board of Trustees, by action of the Board of Trustees without the approval of the Common Shareholders. The terms of any preferred shares that may be issued by the Fund may be the same as, or different from, the terms described below, subject to applicable law and the Declaration.

Limited Issuance of Preferred Shares. Under the 1940 Act, the Fund could issue preferred shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, including any liabilities associated with borrowings, measured immediately after issuance of the preferred shares. Liquidation value means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the preferred shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution.

Distribution Preference. Any preferred shares would have complete priority over the Common Shares as to distribution of assets.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of preferred shares, if issued in the future, would be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to Common Shareholders. After payment of the full amount of the liquidating distribution to which they are entitled, holders of preferred shares will not be entitled to any further participation in any distribution of assets by the Fund. A consolidation or merger of the Fund with or into any Massachusetts business trust or corporation or a sale of all or substantially all of the assets of the Fund shall not be deemed to be a liquidation, dissolution or winding up of the Fund.

Voting Rights. Preferred shares are required to be voting shares and to have equal voting rights with Common Shares. Except as otherwise indicated in this Prospectus or the SAI and except as otherwise required by applicable law, holders of preferred shares, if issued in the future, would vote together with Common Shareholders as a single class.

Holders of preferred shares, if issued in the future, voting as a separate class, would be entitled to elect two of the Fund's trustees (following the establishment of the Fund by an initial trustee, the Declaration provides for a total of no less than two and no more than 15 trustees). The remaining trustees would be elected by Common Shareholders and holders of preferred shares, if issued in the future, voting together as a single class. In the unlikely event that two full years of accrued dividends are unpaid on the preferred shares, if issued in the future, the holders of all outstanding preferred shares, if issued in the future, voting as a separate class, would be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment. In order for the Fund to take certain actions or enter into certain transactions, a separate class vote of holders of preferred shares, if issued in the future, would be required, in addition to the single class vote of the holders of preferred shares, if issued in the future, and Common Shares. See "Certain Provisions in the Declaration of Trust" and the SAI under "Description of Shares Preferred Shares Voting Rights."

Redemption, Purchase and Sale of Preferred Shares. The terms of the preferred shares, if issued in the future, would provide that they may be redeemed by the issuer at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends. Any redemption or purchase of preferred shares, if issued in the future, by the Fund will reduce the leverage applicable to Common Shares, while any issuance of shares by the Fund would increase such leverage.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and preferred shares, including TP Shares, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund, or (5) a removal of trustees by shareholders (except at the end of a trustee's term), and then only for cause unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-Laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and preferred shares, including TP Shares, outstanding at the time, voting together as a single class, is required; provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), only the required vote by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, including TP Shares, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's preferred shares, including TP Shares, outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-Laws, the affirmative vote of the holders of at least a majority of the Fund's preferred shares, if issued in the future, outstanding at the time, voting as a separate class. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and preferred shares, if issued in the future, voting together as a single class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, if issued in the future, are higher than those required by the 1940 Act. The Board of Trustees is divided into three classes, such a staggered board could delay for up to two years the replacement of a majority of the Board of Trustees. The

¹ Vacancies caused by the death, resignation, retirement, removal or disqualification of a trustee may be filled in any manner that is consistent with the Declaration and applicable law.

Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders. Note, the Fund's staggered Board could delay for up to two years the replacement of a majority of the Board of Trustees. See the SAI under Certain Provisions in the Declaration of Trust.

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objective and policies. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the SEC for the full text of these provisions.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Common Shares will trade in the open market at prices that are a function of several factors, including Common Shares dividend levels (which are in turn affected by expenses) in comparison to market rates for similar investments, net asset value, call protection, dividend stability, portfolio credit quality, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of closed-end investment companies may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion of the Fund to an open-end investment company. The Fund cannot assure you that its Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers will actually reduce market discount. As of January 31, 2017, the Fund has not repurchased any Common Shares under the program. The Fund will be unable to repurchase its Common Shares if it does not meet certain asset coverage requirements relating to outstanding preferred stock.

If the Fund converted to an open-end investment company, it would be required to redeem all preferred shares then outstanding, if any (requiring in turn that it liquidate a portion of its investment portfolio), and the Common Shares would no longer be listed on the NYSE. In contrast to a closed-end investment company, shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less any redemption charge that is in effect at the time of redemption. See the SAI under Certain Provisions in the Declaration of Trust for a discussion of the voting requirements applicable to the conversion of the Fund to an open-end investment company.

Before deciding whether to take any action if the Common Shares trade below net asset value, the Board would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders, and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken. See the SAI under Repurchase of Fund Shares; Conversion to Open-End Fund for a further discussion of possible action to reduce or eliminate such discount to net asset value. On November 16, 2011, the Fund's Board of Trustees approved an open market share repurchase program under which the Fund may repurchase up to 10% of its Common Shares. To date, the Fund has not repurchased any Common Shares under the program.

TAX MATTERS

The following information is meant as a general summary for U.S. shareholders. Please see the SAI for additional information. Investors should rely on their own tax advisers for advice about the particular federal, state and local tax consequences to them of investing in the Fund.

The Fund intends to qualify for the special tax treatment afforded to regulated investment companies (RICs) under the Code. As long as the Fund qualifies for treatment as a RIC, it pays no federal income tax on the earnings it timely distributes to shareholders.

In order to qualify for treatment as a RIC, the Fund must meet certain distribution requirements. Nevertheless, the Fund might not distribute all of its net investment income, and the Fund is not required to distribute any portion of its net capital gain. If the Fund qualifies for treatment as a RIC but does not timely distribute all of its net capital gain and net investment income, it will be subject to tax on the amount retained. If the Fund retains any net capital gain, it may designate the retained amount of capital gain as undistributed capital gains in a notice to its shareholders who, if subject to federal income tax on long-term capital gains, (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount; (ii) will be deemed to have paid their proportionate shares of the tax paid by the Fund on such undistributed amount and will be entitled to credit that amount of tax against their federal income tax liabilities, if any; and (iii) will be entitled to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder.

Unless your investment in the Fund is through a tax-exempt entity or tax deferred retirement account, such as a 401(k) plan, you will normally have to pay federal income taxes, and any state or local taxes, on the dividends and other distributions you receive from the Fund, whether you take the distributions in cash or reinvest them in additional shares. For U.S. federal income tax purposes, distributions from the Fund's net capital gains (if any) are considered long-term capital gains and may be taxable to you at reduced rates. Distributions from the Fund's net short-term capital gains are taxable as ordinary income. Other dividends are generally taxable as ordinary income. Since the Fund's income is derived primarily from sources that do not pay dividends, it is not expected that a substantial portion of dividends paid by the Fund will qualify for either the dividends-received deduction for corporations or the U.S. federal income tax rates available to non-corporate taxpayers on qualified dividend income. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will first be treated as a return of capital, which is applied against and reduces the shareholder's basis in his or her shares. To the extent the amount of any such distribution exceeds your basis in your shares, the excess will be treated as gain from a sale or exchange of the shares.

The Fund will report to shareholders annually the U.S. federal income tax status of all Fund distributions.

If the Fund declares a dividend in October, November or December, payable to shareholders of record in such a month, but pays it in January of the following year, you will be taxed on the dividend as if you received it in the year in which it was declared.

Investments by the Fund in zero coupon or other discount securities will result in income to the Fund equal to a portion of the excess of the face value of the securities over their issue price (the original issue discount or OID) each year that the securities are held, even though the Fund may receive no cash interest payments or may receive cash interest payments that are less than the income recognized for tax purposes. In addition, any market discount recognized on a market discount bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value, or below adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount. Because the income required to be recognized by the

Fund as a result of the OID and/or market discount rules may not be matched by a corresponding cash payment to the Fund, the Fund may be required to borrow money or dispose of securities to be able to make distributions to its shareholders in order to qualify for treatment as a RIC and eliminate taxes at the Fund level.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a surviving spouse for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains, including capital gain distributions and capital gains realized on the sale of Fund shares are generally taken into account in computing a shareholder's net investment income (among other categories of income).

Unless your investment in the Fund is through a tax-exempt or tax deferred retirement account, the repurchase of Common Shares normally will result in capital gain or loss to holders of Common Shares who hold their shares as capital assets. You will generally recognize a capital gain or capital loss in an amount equal to the difference between the net amount of sale proceeds (or, in the case of an exchange, the fair market value of the shares) that you receive and your tax basis for the shares that you sell or exchange. Generally a shareholder's gain or loss will be long-term capital gain or loss if the shares have been held for more than one year. Present law taxes both long-term and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, long-term capital gains are taxed at rates of up to 20%. Short-term capital gains and other ordinary income are taxed to non-corporate taxpayers at ordinary income rates.

The Fund will be required in certain cases to withhold (as backup withholding) federal income tax from amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is 28%.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets, including all foreign assets, of the Fund is State Street Bank and Trust Company, One Lincoln Street, Boston, Massachusetts 02111 (the Custodian). The Custodian performs custodial, fund accounting and portfolio accounting services. The Custodian may place and maintain the Fund's foreign securities with foreign banking institutions sub-custodians employed by State Street or foreign securities depositories, all in accordance with the applicable provisions of the Fund's Custody Agreement. The Fund's transfer, shareholder services and dividend paying agent is also State Street Bank and Trust Company (the Transfer Agent). The Transfer Agent is located at 250 Royall Street, Canton, Massachusetts 02021.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

KPMG LLP (KPMG), an independent registered public accounting firm, provides auditing services to the Fund. The principal business address of KPMG is 200 East Randolph, Chicago, Illinois, 60601.

LEGAL OPINION

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

Certain legal matters in connection with the Common Shares will be passed upon for the Fund by Morgan, Lewis & Bockius LLP, 1111 Pennsylvania Avenue NW, Washington, D.C. 20004.

AVAILABLE INFORMATION

The Fund is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the Exchange Act) and the 1940 Act and is required to file reports, proxy statements and other information with the SEC. These documents can be inspected and copied for a fee at the SEC's public reference room, 100 F Street, NE, Washington, D.C. 20549, and Northeast Regional Office, Woolworth Building, 233 Broadway, New York, New York 10013-2409. Reports, proxy statements, and other information about the Fund can be inspected at the offices of the NYSE.

This Prospectus does not contain all of the information in the Fund's Registration Statement, including amendments, exhibits, and schedules. Statements in this Prospectus about the contents of any contract or other document are not necessarily complete and in each instance reference is made to the copy of the contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by this reference.

Additional information about the Fund and Common Shares can be found in the Fund's Registration Statement (including amendments, exhibits, and schedules) on Form N-2 filed with the SEC. The SEC maintains a web site (<http://www.sec.gov>) that contains the Fund's Registration Statement, other documents incorporated by reference, and other information the Fund has filed electronically with the SEC, including proxy statements and reports filed under the Exchange Act.

NUVEEN SHORT DURATION CREDIT OPPORTUNITIES FUND

333 West Wacker Drive

Chicago, Illinois 60606

STATEMENT OF ADDITIONAL INFORMATION

March 8, 2017

Nuveen Short Duration Credit Opportunities Fund (the "Fund") is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund was organized on January 3, 2011.

This Statement of Additional Information (the "SAI") relating to Common Shares of the Fund ("Common Shares") does not constitute a prospectus, but should be read in conjunction with the Fund's prospectus relating thereto dated March 8, 2017 (the "Prospectus"). This SAI does not include all information that a prospective investor should consider before purchasing Common Shares. Investors should obtain and read the Prospectus prior to purchasing such shares. In addition, the Fund's financial statements and the independent registered public accounting firm's report therein included in the Fund's annual report dated July 31, 2016, are incorporated herein by reference. A copy of the Prospectus may be obtained without charge by calling (800) 257-8787. You may also obtain a copy of the Prospectus on the U.S. Securities and Exchange Commission's (the "SEC") web site (<http://www.sec.gov>). Capitalized terms used but not defined in this SAI have the meanings ascribed to them in the Prospectus.

USE OF PROCEEDS

The net proceeds from the issuance of Common Shares hereunder will be invested in accordance with the Fund's investment objective and policies as stated below. It is presently anticipated that the Fund will be able to invest substantially all of the net proceeds in accordance with the Fund's investment objective and policies within one month from the date on which the proceeds from an offering are received by the Fund. Pending such investment, it is anticipated that the proceeds will be invested in short-term or long-term securities issued by the U.S. Government and its agencies or instrumentalities or in high quality, short-term money market instruments. See Risk Factors Leverage Risk and Use of Leverage in the Prospectus.

INVESTMENT RESTRICTIONS

Except as described below, the Fund, as a fundamental policy, may not, without the approval of the holders of a majority of the outstanding common shares and, if issued in the future, preferred voting together as a single class, and, if issued in the future, of the holders of a majority of the outstanding preferred shares voting as a separate class:

- (1) Issue senior securities, as defined in the 1940 Act, except as permitted by the 1940 Act;¹
- (2) Borrow money, except as permitted by the 1940 Act and exemptive orders granted under the 1940 Act;^{1,2}
- (3) Act as underwriter of another issuer's securities, except to the extent that the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the Securities Act), in connection with the purchase and sale of portfolio securities or acting as an agent or one of a group of co-agents in originating adjustable rate securities;
- (4) Invest more than 25% of its total assets in securities of issuers in any one industry, provided, however, that such limitation shall not apply to obligations issued or guaranteed by the United States Government or by its agencies or instrumentalities, and provided further that for purposes of this limitation, the term issuer shall not include a lender selling a participation to the Fund together with any other person interpositioned between such lender and the Fund with respect to a participations;³
- (5) Purchase or sell real estate, except pursuant to the exercise by the Fund of its rights under loan agreements and except to the extent that interests in securities the Fund may invest in are considered to be interests in real estate, and this shall not prevent the Fund from investing in securities of companies that deal in real estate or are engaged in the real estate business, including real estate investment trusts, and securities secured by real estate or interests therein and the Fund may hold and sell real estate or mortgages on real estate acquired through default, liquidation, or other distributions of an interest in real estate as a result of the Fund's ownership of such securities;

¹ Section 18(c) of the 1940 Act generally limits a registered closed-end investment company to issuing one class of senior securities representing indebtedness and one class of senior securities representing stock, except that the class of indebtedness or stock may be issued in one or more series, and promissory notes or other evidences of indebtedness issued in consideration of any loan, extension, or renewal thereof, made by a bank or other person and privately arranged, and not intended to be publicly distributed, are not deemed a separate class of senior securities.

² Section 18(a) of the 1940 Act generally prohibits a registered closed-end fund from incurring borrowings if, immediately thereafter, the aggregate amount of its borrowings exceeds 33 1/3% of its total assets.

³ For purposes of this restriction, governments and their political subdivisions are not members of any industry.

(6) Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments except pursuant to the exercise by the Fund of its rights under loan agreements and except to the extent that interests in securities the Fund may invest in are considered to be interests in commodities and this shall not prevent the Fund from purchasing or selling options, futures contracts, derivative instruments or from investing in securities or other instruments backed by physical commodities;

(7) Make loans, except as permitted by the 1940 Act and exemptive orders granted under the 1940 Act;⁴ and Section 18(a) of the 1940 Act generally prohibits a registered closed-end fund from incurring borrowings if, immediately thereafter, the aggregate amount of its borrowings exceeds 33 ¹/₃% of its total assets. The Fund has not applied for, and currently does not intend to apply for, any exemptive relief that would allow it to borrow outside of the limits of the 1940 Act; and

(8) With respect to 75% of the value of the Fund's total assets, purchase any securities (other than obligations issued or guaranteed by the U.S. government or by its agencies or instrumentalities), if as a result more than 5% of the Fund's total assets would then be invested in securities of a single issuer or if as a result the Fund would hold more than 10% of the outstanding voting securities of any single issuer, and provided further that for purposes of this restriction, the term "issuer" includes both the Borrower under a loan agreement and the lender selling a participation to the Fund together with any other persons interpositioned between such lender and the Fund with respect to a participation.

In addition to and separate from the limitation set forth in paragraph 4 above, pursuant to SEC guidance, the Fund will not purchase any security if, as a result of such purchase, 25% or more of the Fund's total assets (taken at current value) would be invested in securities of borrowers and other issuers having their principal business activities in the same industry (the electric, gas, water, and telephone utility industries, commercial banks, thrift institutions and finance companies being treated as separate industries for purpose of this restriction) treating both the institution selling the loan participation interest and the ultimate borrower as "issuers" where the participation interest does not shift to the Fund the direct debtor-creditor relationship with the borrower; provided, that this limitation shall not apply with respect to obligations issued or guaranteed by the U.S. Government or by its agencies or instrumentalities.

For the purpose of applying the limitation set forth in subparagraph (1) above, the Fund may not issue senior securities not permitted by the 1940 Act simply by describing such securities in the Prospectus.

For the purpose of applying the limitation set forth in subparagraph (8) above, a governmental issuer shall be deemed the sole issuer of a security when its assets and revenues are separate from other governmental entities and its securities are backed only by its assets and revenues. Similarly, in the case of a non-governmental issuer, such as an industrial corporation or a privately owned or operated hospital, if the security is backed only by the assets and revenues of the non-governmental issuer, then such non-governmental issuer would be deemed to be the sole issuer. Where a security is also backed by the enforceable obligation of a superior or unrelated governmental or other entity (other than a bond insurer), it shall also be included in the computation of securities owned that are issued by such governmental or other entity. Where a security is guaranteed by a governmental entity or some other facility, such as a bank guarantee or letter of credit, such a guarantee or letter of credit would be considered a separate security and would be treated as an issue of such government, other entity or bank. When a security is insured by bond insurance, it shall not be considered a security that is issued or guaranteed by the insurer; instead, the issuer of such municipal security will be determined in accordance with the principles set forth above. The foregoing restrictions do not limit the percentage of the Fund's assets that may be invested in securities insured by any given insurer.

⁴ Section 21 of the 1940 Act makes it unlawful for a registered investment company, like the Fund, to lend money or other property if (i) the investment company's policies set forth in its registration statement do not permit such a loan or (ii) the borrower controls or is under common control with the investment company. The Fund has not applied for, and currently does not intend to apply for, such exemptive relief.

Under the 1940 Act, the Fund may invest only up to 10% of its Managed Assets in the aggregate in shares of other investment companies and only up to 5% of its Managed Assets in any one investment company, provided the investment does not represent more than 3% of the voting stock of the acquired investment company at the time such shares are purchased. As a stockholder in any investment company, the Fund will bear its ratable share of that investment company's expenses, and will remain subject to payment of the Fund's management, advisory and administrative fees with respect to assets so invested. Holders of common shares would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the Prospectus in the section entitled "Risk Factors", the net asset value and market value of leveraged shares will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

In addition to the foregoing fundamental investment policies, the Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the Board of Trustees. The Fund may not:

(1) Purchase securities of open-end or closed-end investment companies except in compliance with the 1940 Act or any exemptive relief obtained thereunder. The Fund will rely on representations of Borrowers in loan agreements in determining whether such Borrowers are investment companies.

(2) Purchase securities of companies for the purpose of exercising control, except to the extent that exercise by the Fund of its rights under loan agreements would be deemed to constitute exercising control.

The restrictions and other limitations set forth above will apply only at the time of purchase of securities and will not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities.

The Fund may be subject to certain restrictions imposed by either guidelines of one or more nationally recognized statistical ratings organization (NRSRO) that may issue ratings for preferred shares, if any, commercial paper or notes, or, if the Fund borrows from a lender, by the lender. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. If these restrictions were to apply, it is not anticipated that these covenants or guidelines would impede Symphony Asset Management LLC (Symphony or the Sub-Adviser), the Fund's investment sub-adviser, from managing the Fund's portfolio in accordance with the Fund's investment objective and policies.

INVESTMENT OBJECTIVES, POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment objective, policies, and techniques that are described in the Prospectus.

INVESTMENT OBJECTIVE

The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective. The Fund's investment objective is a fundamental policy of the Fund.

INVESTMENT PHILOSOPHY AND PROCESS

INVESTMENT PHILOSOPHY. Symphony believes that deep fundamental credit analysis and bottom-up portfolio construction are key to managing risk within the below investment grade corporate credit market. Symphony utilizes an industry focused approach that seeks to select the debt instruments of corporate issuers that provide attractive income opportunities and offer the potential for additional total return through the identification of near-term catalysts (such as restructurings, refinancing, mergers and acquisitions, liquidity

events, management changes, rating and earnings announcements) and relative value opportunities. At the same time, Symphony's fundamental approach seeks to evaluate and minimize potential downside risks associated with below investment grade instruments. Additionally, Symphony focuses primarily on liquid securities to help implement its highly active management style, which helps the team manage and optimize risk exposures over the course of the investment cycle.

INVESTMENT PROCESS. In identifying securities for potential purchase, Symphony evaluates the universe of below investment grade corporate issuers from an industry perspective. Symphony's analysts are industry experts and will seek long and short investment opportunities across an issuer's capital structure. Symphony's investment process involves the holistic review of each investment, taking into account such factors as issuer liquidity, company and industry dynamics, relative value, potential corporate actions, and other possible positive or negative catalysts. Symphony then evaluates the identified investment candidates for liquidity constraints and other technical factors. Symphony also combines its deep industry view with a top-down macro overlay which allows the team to make tactical investments in undervalued debt instruments within appropriate sectors given industry and economic activity, and avoid or short issuers and sectors where the team has a negative outlook. The final portfolio is constructed using risk management and monitoring systems to ensure proper diversification.

INVESTMENT POLICIES

The Fund seeks to achieve its investment objective by investing primarily in a blended portfolio of below-investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans and other adjustable rate corporate debt instruments. Adjustable rate loans will represent the Fund's core portfolio and, as discussed below, the Fund also may make limited tactical investments in high yield debt and other debt instruments as described herein. Substantially all of the Fund's portfolio likely will be of below investment grade quality, commonly referred to as junk bonds. The Fund's short duration investment strategy seeks to maintain, under normal market circumstances, an average portfolio duration that, including the effect of leverage, will not exceed two years. Through these investments, the Fund seeks to capitalize on the credit spread opportunity (as measured by the difference in yield between below investment grade instruments and high grade benchmarks) which prevails through all phases of the interest rate cycle, and to offer the opportunity for additional income if interest rates are rising.

The Fund's portfolio will be invested primarily in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. **Managed Assets** means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage. Senior loans and second lien loans are made to U.S. and non-U.S. corporations, partnerships and other business entities (**Borrowers**, and each, a **Borrower**) that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate, primarily London Interbank Offered Rate (**LIBOR**), (of any tenor, but typically between one month and six months, and currency), plus a premium, and therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's average portfolio duration (including the effective leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

Investment grade quality securities are those securities that, at the time of investment, are (i) rated by at least one NRSRO within the four highest grades (BBB- or Baa3 or better by Standard & Poor's Corporation, a division of The McGraw-Hill Companies (S&P), Moody's Investor Service Inc. (Moody's) or Fitch Ratings, part of the Fitch Group (Fitch), or (ii) unrated but judged to be of comparable quality. The Fund may purchase debt securities that are rated below investment grade, commonly referred to as junk bonds, or that are unrated but judged by Symphony to be of comparable quality. Investment rating limitations are considered to apply only at the time of investment and the Fund is under no obligation to sell securities as a result of changes in market values or ratings.

Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality. A debt instrument is considered investment grade quality if it is rated within the four highest letter grades (BBB or Baa or better) by at least one NRSRO that rates such instrument (even if it is rated lower by another), or if it is unrated by any NRSRO but judged to be of comparable quality by the portfolio managers. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to the issuer's capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See Risk Factors Issuer Level Risks Issuer Credit Risk and Risk Factors Issuer Level Risks Below Investment Grade Risk in the Prospectus.

Under normal market circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans.

The Fund may make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this SAI includes Borrowers) that are U.S. dollar or non-U.S. dollar denominated. The Fund's Managed Assets to be invested in senior loans, second lien loans and other debt instruments of non-U.S. issuers may include debt securities of issuers located, or conducting their business, in emerging markets countries.

The Fund may enter into tactical short positions consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange-traded funds, often referred to as ETFs) that invest primarily in securities of the types in which the Fund may invest directly.

The Fund may enter into certain derivative transactions, such as credit default swaps and interest rate swaps, as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. The Fund also may use derivatives to attempt to protect the net asset value of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective interest rate exposure, and as a temporary substitute for purchasing or selling particular securities. The Fund also may enter into derivative transactions such as total return swaps on an underlying index to create investment exposure to the extent such transactions may facilitate implementation of the Fund's investment strategy.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). In this SAI, average duration and average portfolio duration are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yield adjusted to reflect the effect of the Fund's effective leverage. Prices of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. For example, the Fund may use futures with an interest-bearing instrument as the underlying asset, such as a bond. Bond futures are typically used to adjust duration positions by creating offsetting positions that thereby reduce the portfolio's overall average duration. Values of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. To the extent the Fund utilizes interest rate swaps and futures to maintain an average portfolio duration of two years or less, and such instruments do not perform as intended resulting in the Fund's portfolio behaving as if it had an average duration longer than two years, the Fund's net asset value may be more susceptible to interest rates increases than it would have had those instruments performed as intended. See the Fund's Prospectus under The Fund's Investments Portfolio Composition and Other Information Adjustable Rate Corporate Debt Instruments Senior Loans. See also Other Investments and Segregation of Assets in this SAI for additional information.

During temporary defensive periods or in order to keep the Fund's case fully invested, including during the period when the net proceeds of the offering of Common Shares are first being invested, the Fund may deviate from its investment policies and objective. During such periods, the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities or may invest in short-, intermediate-, or long-term U.S. Treasury Bonds. There can be no assurance that such strategies will be successful.

The Fund cannot change its investment objective or fundamental policies without the approval of the holders of a majority of the outstanding Common Shares. When used with respect to particular shares of the Fund, a majority of the outstanding shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. See Description of Shares and Debt Preferred Shares Voting Rights in the Fund's Prospectus and in this SAI for additional information with respect to the voting rights of holders of Preferred Shares.

FUND ALLOCATION

The following table sets forth certain information with respect to the composition of the Fund's securities, as a percentage of net assets, as of July 31, 2016.

Fund Allocation*	Percent
Variable Rate Senior Loan Interests	135.9%
Common Stocks	0.6%
Corporate Bonds	16.5%
Repurchase Agreements	4.3%
Other Assets Less Liabilities	(1.2)%
Net Assets Plus Borrowings and TP Shares, at Liquidation Preference	156.1%
Borrowings	(36.3)%
TP Shares, at Liquidation Preference	(19.8)%
Net Assets	100%

* The relative percentages of the value of the investments attributable the securities could change over time as a result of rebalancing the Fund's assets by Symphony, market value fluctuations, issuance of additional shares and other events.

ADJUSTABLE RATE DEBT INSTRUMENTS

The Fund's portfolio will be invested primarily in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium.

Senior Loans. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. The Fund may invest in (i) senior loans made by banks or other financial institutions to Borrowers, (ii) assignments of such interests in senior loans, or (iii) participation interests in senior loans. Senior loans hold the most senior position in the capital structure of a Borrower, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. The capital structure of a Borrower may include senior loans, senior and junior subordinated debt, preferred stock and common stock issued by the Borrower, typically in descending order of seniority with respect to claims on the Borrower's assets. The proceeds of senior loans primarily are used by Borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, refinancings, internal growth and for other corporate purposes. A senior loan is typically originated, negotiated and structured by a U.S. or non-U.S. commercial bank, insurance company, finance company or other financial institution (Agent) for a lending syndicate of financial institutions which typically includes the Agent (Lenders). The Agent typically administers and enforces the senior loan on behalf of the other Lenders in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Lenders. The Fund normally will rely primarily on the Agent to collect principal of and interest on a senior loan. Also, the Fund usually will rely on the Agent to monitor compliance by the Borrower with the restrictive covenants in a loan agreement.

Senior loans typically have rates of interest that are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate plus a premium or credit spread. These base lending rates are primarily LIBOR, and secondarily the prime rate offered by one or more major U.S. banks (the Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders. As adjustable rate loans, the frequency of how often a senior loan resets its interest rate will impact how closely such senior loans track current market interest rates. The senior loans held by the Fund will have a dollar-weighted average period until the next interest rate adjustment of approximately 90 days or less. As a result, as short-term interest rates increase, interest payable to the Fund from its investments in senior loans should increase, and as short-term interest rates decrease, interest payable to the Fund from its investments in senior loans should decrease. As discussed above, the Fund may utilize derivative instruments to shorten the effective interest rate redetermination period of senior loans in its portfolio.

The Fund primarily purchases senior loans by assignment from a participant in the original syndicate of Lenders or from subsequent assignees of such interests. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning Lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning Lender.

The Fund may purchase participation interests in the original syndicate making senior loans. Loan participation interests typically represent direct participations in a loan to a corporate Borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a senior loan, becoming a part Lender. When purchasing a participation interest, the Fund assumes the credit risk associated with the corporate Borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which the Fund may invest may not be rated by any NRSRO.

The Fund may purchase and retain in its portfolio senior loans where payable by Borrowers that have experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation. At times, in connection with the restructuring of a senior loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior debt instruments in exchange for all or a portion of a senior loan. See Portfolio Composition Other Investments Warrants and Equity Securities.

Second Lien Loans and Unsecured Loans. The Fund may invest in second lien loans and other unsecured loans. Such loans are made by public and private corporations and other non-governmental Borrowers for a variety of purposes. As in the case of senior loans, the Fund may purchase interests in second lien loans and unsecured loans through assignments or participations.

Second lien loans have similar characteristics as senior loans except that such interests are second in lien property rather than first. Second lien loans are second in priority of payment to one or more senior loans of the related Borrower and are typically secured by a second priority security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. They typically have similar protections and rights as senior loans. Second lien loans are not (and by their terms cannot become) subordinate in priority of payment to any obligation of the related Borrower other than senior loans of such Borrower. Second lien loans may feature fixed or floating rate interest payments. Because second lien loans are second to senior loans, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. In addition, second lien loans of below investment grade quality share many of the risk characteristics of other below investment grade debt instruments.

Unsecured loans generally have lower priority in right of payment compared to holders of secured interests of the Borrower. Unsecured loans are not secured by a security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. Unsecured loans by their terms may be or may become subordinate in right of payment to other obligations of the Borrower, including senior loans, second lien loans and other interests. Unsecured loans may have fixed or adjustable floating rate interest payments. Because unsecured loans are subordinate to Senior Loans and other secured debt of the Borrower, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. Such investments generally are of below investment grade quality. Unsecured loans of below investment grade quality share the same risks of other below investment grade debt instruments.

Adjustable Rate Subordinated Loans. The subordinated loans in which the Fund may invest are typically privately-negotiated investments that rank subordinate in priority of payment to senior debt, such as senior loans, and are often unsecured. Because subordinated interests may rank lower as to priority of payment than senior loans and second lien loans of the Borrower, they may present a greater degree of investment risk than senior loans and second lien loans but often pay interest at higher rates reflecting this additional risk. Other than their more subordinated status, such investments have many characteristics and risks similar to senior loans and second lien loans discussed above. Subordinated interests of below investment grade quality share risks of other below investment grade debt instruments. Subordinated loans rank senior to common and preferred equity in a Borrower's capital structure. Subordinated loans may have elements of both debt and equity instruments, offering fixed or adjustable rates of return in the form of interest payments associated with senior debt, while providing lenders an opportunity to participate in the capital appreciation of a Borrower, if any, through an equity interest. This equity interest may take the form of warrants or direct equity investments which will be in conjunction with the subordinated loans. Due to their higher risk profile and often less restrictive covenants as compared to senior loans, subordinated loans generally earn a higher return than secured senior loans. The warrants associated with subordinated loans are typically detachable, which allows lenders the opportunity to receive repayment of their principal on an agreed amortization schedule while retaining their equity interest in the Borrower. Subordinated loans also may include a put feature, which permits the holder to sell its equity interest back to the Borrower at

a price determined through an agreed formula. Symphony believes that there are investment opportunities in the subordinated loan segment, which it believes create the potential for attractive risk-adjusted returns.

The Fund may invest in subordinated loans that are primarily unsecured and that provide for relatively high, adjustable rates of interest, providing the Fund with significant current interest income. The subordinated loans in which the Fund may invest may have interest-only payments in the early years, with amortization of principal deferred to the later years of the subordinated loans. In some cases, the Fund may acquire subordinated loans that, by their terms, convert into equity or additional debt instruments or defer payments of interest for the first few years after issuance. Also, in some cases the subordinated loans in which the Fund may invest will be collateralized by a subordinated lien on some or all of the assets of the Borrower. Typically, subordinated loans in which the Fund may invest will have maturities of four to eight years.

The subordinated loan industry is highly specialized and the Fund will rely on Symphony and its employees' expertise in sourcing, evaluating, structuring, documenting and monitoring such investments by the Fund.

Certain Structured Notes. The Fund invests in structured notes (as defined below) that are designed to provide returns and risks that emulate those of senior loans, second lien loans and other adjustable rate corporate debt instruments.

The Fund acting as Originating Lender, Sole Lender and/or Agent. The Fund, in connection with its investments in senior secured loans, second lien loans and other loans, particularly those made to middle-market companies, may act as one of the group of lenders originating a loan (Originating Lender), may purchase the entire amount of a particular loan (Sole Lender), and may act as Agent in the negotiation of the terms of a loan and in the formation of a group of investors in a Borrower's loan.

When the Fund acts as an Originating Lender or Sole Lender it will generally participate in structuring the loan, and may share in an origination fee paid by the Borrower. When the Fund is an Originating Lender or Sole Lender it will generally have a direct contractual relationship with the Borrower, and may enforce compliance by the Borrower with the terms of the loan agreement. As Sole Lender the Fund generally also would have full voting and consent rights under the applicable loan agreement.

Acting in the capacity of an Agent with respect to a loan may subject the Fund to certain risks in addition to those associated with the Fund's role as a lender.

The Fund's ability to receive fee income also may be constrained by certain requirements for qualifying as a regulated investment company under the Internal Revenue Code of 1986, as amended (the Code). The Fund intends to comply with those requirements and may limit its investments in loans in which it acts as Originating Lender, Sole Lender or Agent in order to do so.

OTHER INVESTMENTS

The Fund may invest in fixed or floating rate debt instruments and other securities as described below:

The Fund may invest in structured products, such as structured notes. As a fundamental policy, the Fund will not invest in collateral loan obligations. Generally, investments in structured products are interests in entities organized and operated for the purpose of restructuring the investment characteristics of underlying investment interests or securities.

Structured Notes and Other Structured Products. The Fund may invest in structured notes issued by a financial institution. Structured notes are privately negotiated debt obligations, swap agreements or economically equivalent instruments where the principal and/or interest is determined by reference to the performance of a

benchmark asset, market or interest rate (an embedded index), such as selected securities or loans, an index of securities or loans, or specified interest rates, or the differential performance of two assets or markets. Structured notes may be issued by corporations, including banks, as well as by governmental agencies. Structured notes frequently are assembled in the form of medium-term notes, but a variety of forms are available and may be used in particular circumstances. The terms of such structured notes normally provide that their principal and/or interest payments are to be adjusted upwards or index while the structured notes are outstanding. As a result, the interest and/or principal payments that may be made on a structured product may vary widely, depending on a variety of factors, including the volatility of the embedded index and the effect of changes in the embedded index on principal and/or interest payments. The rate of return on structured notes may be determined by applying a multiplier to the performance or differential performance of the referenced index(es) or other asset(s). Application of the multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss. Symphony may utilize structured notes for investment purposes and also for risk management purposes, such as to reduce the duration and interest rate sensitivity of the Fund's portfolio. While structured notes may offer the potential for a favorable rate of return from time to time, they also entail certain risks. Structured notes may be less liquid than other debt instruments, and the price of structured notes may be more volatile. In some cases, depending on the terms of the embedded index, a structured note may provide that the principal and/or interest payments may be adjusted below zero. Structured notes also may involve significant credit risk and risk of default by the counterparty. Although structured notes are not necessarily illiquid, Nuveen Fund Advisors, LLC (NFA LLC), the Fund's investment adviser, believes that currently most structured notes are illiquid. Like other sophisticated strategies, the Fund's use of structured notes may not work as intended. If the value of the embedded index changes in a manner other than that expected by Symphony, principal and/or interest payments received on the structured notes may be substantially less than expected.

The Fund may have the right to receive payments to which it is entitled only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to the structured product trust. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. Structured products may be private investment funds (structured as trusts or other types of pooled investment companies that are excluded from the definition of investment company under the 1940 Act by the operation of Section 3(c) (1) or 3(c) (7) thereof) or investment companies that are registered under the 1940 Act. Investment in such products involve operating expenses and fees that are in addition to the expenses and fees of the Fund, and such expenses and fees are borne indirectly by holders of Common Shares. For structured products that are registered under the 1940 Act, please also see Portfolio Composition Other Investment Companies.

Debtor-In-Possession Loans (DIPs). The Fund may invest in debtor-in-possession loans (DIPs), which are newly issued loans in connection with special situation restructuring and refinancing transactions. DIPs are loans to a debtor-in-possession in a proceeding under the U.S. bankruptcy code that have been approved by the bankruptcy court. DIPs are typically adjustable rate and fully secured by a lien on the debtor's otherwise unencumbered assets or secured by a junior lien on the debtor's encumbered assets (so long as the loan is fully secured based on the most recent current valuation or appraisal report of the debtor). DIPs are often required to close with certainty and in a rapid manner in order to satisfy existing creditors and to enable the issuer to emerge from bankruptcy or to avoid a bankruptcy proceeding.

Derivatives. The Fund may engage in certain derivative instruments. Such instruments may include credit default swaps, or other derivative instruments whose prices, in Symphony's opinion, correlate with the prices of the Fund's investments. Credit default swaps may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. If the Fund is a seller of a contract, the Fund would be required to pay the par (or other agreed upon) value of a referenced debt obligation to the counterparty in the event of a default or other credit event by the reference issuer, such as a U.S. or foreign corporate issuer, with respect to such debt obligations. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no event

of default has occurred. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations. As the seller, the Fund would be subject to investment exposure on the notional amount of the swap. If the Fund is a buyer of a contract, the Fund would have the right to deliver a referenced debt obligation and receive the par (or other agreed-upon) value of such debt obligation from the counterparty in the event of a default or other credit event (such as a credit downgrade) by the reference issuer, such as a U.S. or foreign corporation, with respect to its debt obligations. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the Fund. Interest rate swaps involve the exchange by the Fund with a counterparty of their respective commitments to pay or receive interest, such as an exchange of fixed-rate payments for floating rate payments. The Fund will usually enter into interest rate swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments.

The Fund may utilize certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. The Fund also may use derivatives to attempt to protect the net asset value of the Fund, to facilitate the sale of certain portfolio securities, to manage the Fund's effective interest rate exposure as a temporary substitute for purchasing or selling particular securities. From time to time, the Fund also may utilize derivative instruments to create investment exposure to the extent such derivatives may facilitate implementation of the Fund's investment strategy.

Other derivative instruments that may be used, or other transactions that may be entered into, by the Fund may include the purchase or sale of futures contracts on securities, credit-linked notes, securities indices, other indices or other financial instruments; options on futures contracts; exchange-traded and over-the-counter options on securities or indices; index linked securities; swaps; and currency exchange transactions. Some, but not all, of the derivative instruments may be traded and listed on an exchange. The positions in derivatives will be marked-to-market daily at the closing price established on the exchange or at a fair value.

There is no assurance that these derivative strategies will be available at any time or that NFALLC and Symphony will determine to use them for the Fund or, if used, that the strategies will be successful.

Other Corporate Debt Instruments. Corporate debt instruments generally are used by corporations to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and normally must repay the amount borrowed on or before maturity. Certain debt instruments in which the Fund may invest may be perpetual in that they have no maturity date and some may be convertible into equity securities of the issuer or its affiliates. The Fund may invest in debt instruments of any quality and such debt instruments may be secured or unsecured. In addition, certain debt instruments in which the Fund may invest may be subordinated to the payment of an issuer's senior debt.

U.S. Government Securities. U.S. Government securities include (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance: U.S. Treasury bills (maturities of one year or less), U.S. Treasury notes (maturities of one year to ten years) and U.S. Treasury bonds (generally maturities of greater than ten years) and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are supported by any of the following: (i) the full faith and credit of the U.S. Treasury, (ii) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Treasury, (iii) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality or (iv) the credit of the agency or instrumentality. The Fund also may invest in any other security or agreement collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S. Government include but are not limited to: Federal Land Banks, Federal Financing Banks, Banks for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Banks, Federal Home Loan Banks, FHLMC, FNMA, GNMA, Student Loan Marketing Association, United States Postal Service, Small Business Administration, Tennessee Valley Authority and any other enterprise established or sponsored by the U.S.

Government. Because the U.S. Government generally is not obligated to provide support to its instrumentalities, the Fund invests in obligations issued by these instrumentalities only if Symphony determines that the credit risk with respect to such obligations is minimal.

The principal of and/or interest on certain U.S. Government securities which may be purchased by the Fund could be (i) payable in non-U.S. currencies rather than U.S. dollars or (ii) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of non-U.S. currencies. The value of such portfolio securities may be affected favorably by changes in the exchange rate between foreign currencies and the U.S. dollar.

Commercial Paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Warrants and Equity Securities. The Fund may acquire equity securities and warrants issued by an issuer or its affiliates as part of a package of investments in the issuer or its affiliates issued in connection with an adjustable rate instrument or other debt instrument of the issuer. The Fund also may convert a warrant so acquired into the underlying security. Investments in warrants and equity securities entail certain risks in addition to those associated with investments in adjustable rate instruments or other debt instruments. The value of warrants and equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. The Fund may possess material non-public information about an issuer as a result of its ownership of an adjustable rate instrument or other debt instrument of such issuer. Because of prohibitions on trading in securities of issuers while in possession of such information the Fund might be unable to enter into a transaction in a security of such an issuer when it would otherwise be advantageous to do so.

Below Investment Grade Securities. Investments in below investment grade securities generally provide greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk, including the possibility of issuer default and bankruptcy. Issuers of below investment grade securities may be highly leveraged and may not have available to them more traditional methods of financing. Securities in the lowest investment grade category also may be considered to possess some speculative characteristics by certain rating agencies. In addition, analysis of the creditworthiness of issuers of below investment grade securities may be more complex than for issuers of higher quality securities. Below investment grade securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in lower-grade security prices because the advent of a recession could lessen the ability of an issuer to make principal and interest payments on its debt obligations. If an issuer of below investment grade securities defaults, in addition to risking payment of all or a portion of interest and principal, the Fund may incur additional expenses to seek recovery. In the case of below investment grade securities structured as zero coupon or payment-in-kind securities, their market prices will normally be affected to a greater extent by interest rate changes, and therefore tend to be more volatile than securities which pay interest currently and in cash. Symphony seeks to reduce these risks through diversification, credit analysis and attention to current developments and trends in both the economy and financial markets.

The secondary market for below investment grade securities may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. There are fewer dealers in the market for below investment grade securities than for investment grade obligations. The prices quoted by different dealers may vary significantly and the spread between the bid and ask price is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for below investment grade securities could contract further,

independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become illiquid. As a result, the Fund could find it more difficult to sell these securities or may be able to sell the securities only at prices lower than if such securities were widely traded. Prices realized upon the sale of such lower rated or unrated securities, under these circumstances, may be less than the prices used in calculating the Fund's net asset value.

Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of below investment grade securities, especially in a thinly traded market. When secondary markets for below investment grade securities are less liquid than the market for investment grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available. During periods of thin trading in these markets, the spread between bid and asked prices is likely to increase significantly and the Fund may have greater difficulty selling its portfolio securities. The Fund will be more dependent on Symphony's research and analysis when investing in below investment grade securities. Symphony seeks to minimize the risks of investing in all securities through in-depth credit analysis and attention to current developments in interest rates and market conditions.

A general description of the ratings of securities by Moody's, S&P and Fitch is set forth in Appendix A to this SAI. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the securities they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, in the case of debt obligations, certain debt obligations with the same maturity, coupon and rating may have different yields while debt obligations with the same maturity and coupon with different ratings may have the same yield. For these reasons, the use of credit ratings as the sole method of evaluating lower-grade securities can involve certain risks. For example, credit ratings evaluate the safety of principal and interest payments, not the market value risk of lower-grade securities. Also, credit rating agencies may fail to change credit ratings in a timely fashion to reflect events since the security was last rated.

Symphony does not rely solely on credit ratings when selecting securities for the Fund, and develops its own independent analysis of issuer credit quality.

The Fund's credit quality policies apply only at the time a security is purchased, and the Fund is not required to dispose of a security in the event that a rating agency or Symphony downgrades its assessment of the credit characteristics of a particular issue. In determining whether to retain or sell such a security, Symphony may consider such factors as its assessment of the credit quality of the issuer of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies. However, analysis of the creditworthiness of issuers of below investment grade securities may be more complex than for issuers of higher quality debt instruments.

Convertible Securities. Convertible securities are bonds, debentures, notes, preferred securities or other securities that may be converted or exchanged (by the holder or the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio or predetermined price (the "conversion price"). Convertible securities have general characteristics similar to both debt instruments and common stocks. The interest paid on convertible securities may be fixed or floating rate. Floating rate convertible securities may specify an interest rate or rates that are conditioned upon changes to the market price of the underlying common stock. Convertible securities also may be issued in zero coupon form with an original issue discount. See *Portfolio Composition Other Investments Zero Coupon Bonds*. Although to a lesser extent than with debt instruments, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stocks and, therefore, will also react to variations in the general market for common stocks. Depending upon the relationship of the conversion price to the market value of the underlying common stock, a convertible security may trade more like a common stock than a debt instrument. A convertible security generally entitles the

holder to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Convertible securities rank senior to common stock in a corporation's capital structure and, therefore, generally entail less risk than the corporation's common stock, although the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a debt obligation. Before conversion, convertible securities have characteristics similar to non-convertible debt obligations and can provide for a stable stream of income with generally higher yields than common stocks. However, convertible securities fall below debt obligations of the same issuer in order of preference or priority in the event of a liquidation, and are typically unrated or rated lower than such debt obligations. In addition, contingent payment convertible securities allow the issuer to claim deductions based on its nonconvertible cost of debt which generally will result in deductions in excess of the actual cash payments made on the securities (and accordingly, holders will recognize income in amounts in excess of the cash payments received). There can be no assurance of current income because the issuers of the convertible securities may default on their obligations. The convertible securities in which the Fund may invest may be below investment grade quality.

Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar credit quality because of the potential for capital appreciation. A convertible security, in addition to providing current income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from any increases in the market price of the underlying common stock. The common stock underlying convertible securities may be issued by a different entity than the issuer of the convertible securities.

The value of convertible securities is influenced by both the yield of non-convertible securities of comparable issuers and by the value of the underlying common stock. The value of a convertible security viewed without regard to its conversion feature (*i.e.*, strictly on the basis of its yield) is sometimes referred to as its investment value. The investment value of the convertible security typically will fluctuate based on the credit quality of the issuer and will fluctuate inversely with changes in prevailing interest rates. However, at the same time, the convertible security will be influenced by its conversion value, which is the market value of the underlying common stock that would be obtained if the convertible security were converted. Conversion value fluctuates directly with the price of the underlying common stock, and will therefore be subject to risks relating to the activities of the issuer and/or general market and economic conditions. Depending upon the relationship of the conversion price to the market value of the underlying security, a convertible security may trade more like an equity security than a debt instrument.

If, because of a low price of the common stock, the conversion value is substantially below the investment value of the convertible security, the price of the convertible security is governed principally by its investment value. If the conversion value of a convertible security increases to a point that approximates or exceeds its investment value, the value of the security will be principally influenced by its conversion value. A convertible security will sell at a premium over its conversion value to the extent investors place value on the right to acquire the underlying common stock while holding a fixed-income security.

Mandatory convertible securities are distinguished as a subset of convertible securities because the conversion is not optional and the conversion price at maturity (or redemption) is based solely upon the market price of the underlying common stock, which may be significantly less than par or the price (above or below par) paid. Mandatory convertible securities may be called for conversion by the issuer after a particular date and under certain circumstances (including at specified price) established upon its issuance. For these reasons, the risks associated with the investing in mandatory convertible securities most closely resemble the risks inherent in common stocks. Mandatory convertible securities customarily pay a higher coupon yield to compensate for the potential risk of additional price volatility and loss upon redemption. Since the correlation of common stock risk increases as the security approaches its redemption date, there can be no assurance that the higher coupon will compensate for the potential loss. If a mandatory convertible security is called for conversion, the Fund will be required to either convert it into the underlying common stock or sell it to a third party, which may have an adverse effect on the Fund's ability to achieve its investment objective. Convertible securities generally offer

lower interest or dividend yields than non-convertible fixed-income securities of similar credit quality because of the potential for capital appreciation. The market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. However, a convertible security's market value also tends to reflect the market price of the common stock of the issuing company, particularly when the stock price is greater than the convertible security's conversion price. The conversion price is defined as the predetermined price or exchange ratio at which the convertible security can be converted or exchanged for the underlying common stock. As the market price of the underlying common stock declines below the conversion price, the price of the convertible security tends to be increasingly influenced more by the yield of the convertible security than by the market price of the underlying common stock.

Repurchase Agreements. For cash management purposes, the Fund may invest in repurchase agreements. A repurchase agreement is a contractual agreement whereby the seller of securities agrees to repurchase the same security at a specified price on a future date agreed upon by the parties. The agreed-upon repurchase price determines the yield during the Fund's holding period. Repurchase agreements are considered to be loans collateralized by the underlying security that is the subject of the repurchase contract. The Fund will only enter into repurchase agreements with registered securities dealers or domestic banks that, in the opinion of Symphony, present minimal credit risk. The risk to the Fund is limited to the ability of the issuer to pay the agreed-upon repurchase price on the delivery date; however, although the value of the underlying collateral at the time the transaction is entered into always equals or exceeds the agreed-upon repurchase price, if the value of the collateral declines there is a risk of loss of both principal and interest. In the event of default, the collateral may be sold but the Fund might incur a loss if the value of the collateral declines, and might incur disposition costs or experience delays in connection with liquidating the collateral. In addition, if bankruptcy proceedings are commenced with respect to the seller of the security, realization upon the collateral by the Fund may be delayed or limited. Symphony will monitor the value of the collateral at the time the transaction is entered into and at all times subsequent during the term of the repurchase agreement in an effort to determine that such value always equals or exceeds the agreed-upon repurchase price. In the event the value of the collateral declines below the repurchase price, Symphony will demand additional collateral from the issuer to increase Symphony of the collateral to at least that of the repurchase price, including interest.

Non-U.S. Companies. The Fund may invest in securities of non-U.S. companies. The Fund will classify an issuer of a security as being located in a country based on the determination of an unaffiliated, recognized financial data provider. Such determinations are based on a number of criteria, such as the issuer's country of domicile, the primary stock exchange on which the security trades, the location from which the majority of the issuer's revenue, comes and the issuer's reporting currency.

The Fund may invest in securities of emerging markets issuers. Emerging markets issuers are those (i) whose securities are traded principally on a stock exchange or over-the-counter in an emerging market country, (ii) organized under the laws of an emerging market country or (iii) whose principal place of business or principal office(s) is in an emerging market country. Emerging market countries include any country other than Canada, the United States and the countries comprising the MSCI EAFE® Index (currently, Australia, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom).

Zero Coupon Bonds. The Fund's investments in debt instruments may be in the form of a zero coupon bond. A zero coupon bond is a bond that typically does not pay interest either for the entire life of the obligation or for an initial period after the issuance of the obligation. When held to its maturity, the holder receives the par value of the zero coupon bond, which generates a return equal to the difference between the purchase price and its maturity value. A zero coupon bond is normally issued and traded at a deep discount from face value. This original issue discount (OID) approximates the total amount of interest the security will accrue and compound prior to its maturity and reflects the payment deferral and credit risk associated with the instrument. Because zero coupon securities and other OID instruments do not pay cash interest at regular intervals, the instruments' ongoing accruals require ongoing judgments concerning the collectability of deferred payments and the value of

any associated collateral. As a result, these securities may be subject to greater value fluctuations and less liquidity in the event of adverse market conditions than comparably rated securities that pay cash on a current basis. Because zero coupon bonds, and OID instruments generally, allow an issuer to avoid or delay the need to generate cash to meet current interest payments, they may involve greater payment deferral and credit risk than coupon loans and bonds that pay interest currently or in cash. The Fund generally will be required to distribute dividends to shareholders representing the income of these instruments as it accrues, even though the Fund will not receive all of the income on a current basis or in cash. Thus, the Fund may have to sell other investments, including when it may not be advisable to do so, and use the cash proceeds to make income distributions to its shareholders. For accounting purposes, these cash distributions to shareholders will not be treated as a return of capital.

Further, NFALLC collects management fees on the value of a zero coupon bond or OID instrument attributable to the ongoing non-cash accrual of interest over the life of the bond or other instrument. As a result, NFALLC receives non-refundable cash payments based on such non-cash accruals while investors incur the risk that such non-cash accruals ultimately may not be realized.

WHEN-ISSUED AND DELAYED DELIVERY TRANSACTIONS

The Fund may buy and sell securities on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15-45 days of the trade date. On such transactions the payment obligation and the interest rate are fixed at the time the buyer enters into the commitment. Beginning on the date the Fund enters into a commitment to purchase securities on a when-issued or delayed delivery basis, the Fund is required under rules of the Securities and Exchange Commission (the SEC) to maintain in a separate account liquid assets, consisting of cash, cash equivalents or liquid securities having a market value at all times of at least equal to the amount of any delayed payment commitment. The Fund may enter into contracts to purchase securities on a forward basis (*i.e.*, where settlement will occur more than 60 days from the date of the transaction) only to the extent that the Fund specifically collateralizes such obligations with a security that is expected to be called or mature within sixty days before or after the settlement date of the forward transaction. The commitment to purchase securities on a when-issued, delayed delivery or forward basis may involve an element of risk because no interest accrues on the bonds prior to settlement and at the time of delivery the market value may be less than their cost.

SEGREGATION OF ASSETS

As a closed-end investment company registered with the SEC, the Fund is subject to the federal securities laws, including the 1940 Act, the rules thereunder, and various interpretive positions of the SEC and its staff. In accordance with these laws, rules and positions, the Fund must set aside (often referred to as asset segregation) liquid assets, or engage in other SEC or staff-approved measures, to cover open positions with respect to certain kinds of derivatives instruments. In the case of swaps, futures contracts, options, forward contracts and other derivative instruments that do not cash settle, for example, the Fund must identify on its books liquid assets equal to the full notional amount of the instrument while the positions are open, to the extent there is not an offsetting position. However, with respect to certain swaps, futures contracts, options, forward contracts and other derivative instruments that are required to cash settle, the Fund may identify liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (*i.e.*, the Fund's daily net liability) under the instrument, if any, rather than its full notional amount.

In connection with credit default swaps in which the Fund is the buyer, the Fund may segregate cash or liquid assets, or enter into certain offsetting positions, with a value at least equal to the Fund's exposure (any accrued but unpaid net amounts owed by the Fund to any counterparty), on a marked-to-market basis. In connection with credit default swaps in which the Fund is the seller, the Fund will segregate cash or liquid assets with a value at least equal to the full notional amount of the swap.

With respect to interest rate swaps that are cash settled, the Fund intends to segregate cash or liquid securities having a value at least equal to the Fund's net payment obligations under the interest rate swap transaction, marked to market daily.

For total return swaps, the Fund intends to segregate the marked-to-market value of any current liability.

If the Fund engages in a short sale, (other than a short sale against-the-box), the Fund may segregate cash or liquid securities equal to the difference between (1) the market value of the securities sold short at the time they were sold short and (2) any cash or securities required to be deposited as collateral with the broker in connection with the short sale (not including the proceeds from the short sale). The Fund will daily maintain the segregated assets at such a level that the amount of segregated assets plus the amount deposited with the broker as collateral equals the current market value of the securities sold short.

The Fund reserves the right to modify its asset segregation policies in the future to comply with any changes in the positions from time to time articulated by the SEC or its staff regarding asset segregation. By identifying assets equal to only its net obligations under certain instruments, the Fund will have the ability to employ leverage to a greater extent than if the Fund were required to identify assets equal to the full notional amount of the instrument.

To the extent that the Fund uses its assets to cover its obligations as required by the 1940 Act, the rules thereunder, and applicable positions of the SEC and its staff, such assets may not be used for other operational purposes. NFALLC will monitor the Fund's use of derivatives and will take action as necessary for the purpose of complying with the asset segregation policy stated above. Such actions may include the sale of the Fund's portfolio investments. Asset segregation will not limit the Fund's exposure to loss.

ILLIQUID SECURITIES

The Fund may invest in securities that, at the time of investment, are illiquid (*i.e.*, securities that are not readily marketable). For this purpose, illiquid securities may include, but are not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may only be resold pursuant to Rule 144A under the Securities Act, that are deemed to be illiquid, and certain repurchase agreements. The Board of Trustees or its delegate has the ultimate authority to determine which securities are liquid or illiquid. The Board of Trustees has delegated to NFALLC the day-to-day determination of the illiquidity of any security held by the Fund, although it has retained oversight and ultimate responsibility for such determinations. No definitive liquidity criteria are used. The Board of Trustees has directed NFALLC, when making liquidity determinations, to look for such factors as (i) the nature of the market for a security (including the institutional private resale market; the frequency of trades and quotes for the security; the number of dealers willing to purchase or sell the security; the amount of time normally needed to dispose of the security; and the method of soliciting offers and the mechanics of transfer), (ii) the terms of certain securities or other instruments allowing for the disposition to a third party or the issuer thereof (*e.g.*, certain repurchase obligations and demand instruments), and (iii) other relevant factors. The assets used to cover OTC derivatives used by the Fund will be considered illiquid until the OTC derivatives are sold to qualified dealers who agree that the Fund may repurchase them at a maximum price to be calculated by a formula set forth in an agreement. The cover for an OTC derivative subject to this procedure would be considered illiquid only to the extent that the maximum repurchase price under the formula exceeds the intrinsic value of the derivative.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid securities will be

priced at fair value as determined in good faith by the Board of Trustees or its delegatee. If, through the appreciation of illiquid securities or the depreciation of liquid securities, the Fund should be in a position where more than 50% of the value of its Managed Assets is invested in illiquid securities, including restricted securities that are not readily marketable, the Fund will take such steps as are deemed advisable by NFALLC, if any, to protect liquidity.

SHORT-TERM INVESTMENTS

Short-Term Taxable Fixed Income Securities. For temporary defensive purposes or to keep cash on hand fully invested, the Fund may invest up to 100% of its Managed Assets in cash equivalents and short-term taxable fixed-income securities. Short-term taxable fixed income investments are defined to include, without limitation, the following:

(1) U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government agency securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. government provides financial support to such U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. government, its agencies and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.

(2) Certificates of Deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current Federal Deposit Insurance Company regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000; therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Repurchase agreements, which involve purchases of debt instruments. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest temporarily available cash. The Fund may enter into repurchase agreements only with respect to obligations of the U.S. government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the value of the collateral declines after the agreement is entered into, and if the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The investment adviser monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The investment adviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. NFALLC will consider the financial condition of the corporation (*e.g.*, earning power, cash flow, and other liquidity measures) and will continuously monitor the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a major rating agency and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

OTHER INVESTMENT COMPANIES

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including ETFs) that invest primarily in securities of the types in which the Fund may invest directly. The Fund generally expects that it may invest in other investment companies either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Common Shares, or during periods when there is a shortage of attractive securities available in the market. The Fund may invest in investment companies that are advised by NFALLC or its affiliates to the extent permitted by applicable law and/or pursuant to exemptive relief from the SEC. As a shareholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Symphony will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available securities. In addition, because the securities of other investment companies may be leveraged and subject to leverage risk, the Fund may indirectly be subject to risks related to leverage. Market value of leveraged shares will tend to fluctuate more than the market value of unleveraged shares.

LENDING OF PORTFOLIO SECURITIES

The Fund may lend its portfolio securities to broker-dealers and banks. Any such loan must be continuously secured by collateral in cash or cash equivalents maintained on a current basis in an amount at least equal to the market value of the securities loaned by the Fund. The Fund would continue to receive the equivalent of the interest or dividends paid by the issuer on the securities loaned through payments from the borrower. The Fund would also receive an additional return that may be in the form of a fixed fee or a percentage of the collateral. The Fund may pay reasonable fees to persons unaffiliated with the Fund for services in arranging these loans. The Fund would have the right to call the loan and obtain the securities loaned at any time on notice of not more than five business days. The Fund would not have the right to vote the securities during the existence of the loan but would call the loan to permit voting of the securities, if, in Symphony's judgment, a material event requiring a shareholder vote would otherwise occur before the loan was repaid. In the event of bankruptcy or other default of the borrower, the Fund could experience both delays in liquidating the loan collateral or recovering the loaned securities and losses, including (a) possible decline in the value of the collateral or in the value of the securities loaned during the period while the Fund seeks to enforce its rights thereto, (b) possible subnormal levels of income and lack of access to income during this period, and (c) expenses of enforcing its rights.

PORTFOLIO TRADING AND TURNOVER

Portfolio trading may be undertaken to accomplish the investment objective of the Fund in relation to actual and anticipated movements in interest rates. In addition, a security may be sold and another of comparable quality purchased at approximately the same time to take advantage of what Symphony believes to be a temporary price disparity between the two securities. Temporary price disparities between two comparable

securities may result from supply and demand imbalances where, for example, a temporary oversupply of certain securities may cause a temporarily low price for such securities, as compared with other securities of like quality and characteristics. A security also may be sold when Symphony anticipates a change in the price of such security, Symphony believes the price of a security has reached or is near a realistic maximum, or there are other securities that Symphony believes are more attractive given the Fund's investment objective. The Fund also may engage to a limited extent in short-term trading consistent with its investment objective. Securities may be sold in anticipation of a market decline or purchased in anticipation of a market rise and later sold, but the Fund will not engage in trading solely to recognize a gain. Subject to the foregoing, the Fund will attempt to achieve its investment objective by prudent selection of securities with a view to holding them for investment. While there can be no assurance thereof, the Fund anticipates that its annual portfolio turnover rate will generally not exceed 100%. For the fiscal year ended July 31, 2016, the Fund's portfolio turnover rate was 34%. However, the rate of turnover will not be a limiting factor when the Fund deems it desirable to sell or purchase securities. Therefore, depending on market conditions, the annual portfolio turnover rate of the Fund may exceed 100% in particular years. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to shareholders, will be taxable as ordinary income.

INTEREST RATE TRANSACTIONS

Under current market conditions, the Fund intends to use derivatives such as interest rate swaps to manage the Fund's effective interest rate exposure. Given the current economic and debt market environment with historically low short to intermediate-term interest rates, the Fund currently uses derivatives such as interest rate swaps, with terms that may range from one to seven years, to manage the Fund's effective interest rate exposure.

The use of interest rate swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In an interest rate swap, the Fund would agree to pay to the other party to the interest rate swap (which is known as the counterparty) a fixed rate payment in exchange for the counterparty agreeing to pay to the Fund a variable rate payment obligation on any variable rate borrowings. The payment obligations would be based on the notional amount of the swap.

Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the net amount of interest payments that the Fund is to receive. Interest rate swap positions are valued daily. Although there are economic advantages of entering into interest rate swap transactions, there are also additional risks. The Fund helps manage the credit risks associated with interest rate swap transactions by entering into agreements only with counterparties whom NFALLC believes have the financial resources to honor their obligations and by having NFALLC continually monitor the financial stability of the swap counterparties.

Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of the Common Shares. To the extent interest rates decline, the value of the interest rate swap could decline, and could result in a decline in the net asset value of the Common Shares. In addition, if the counterparty to an interest rate swap defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset the interest payments on borrowings. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of the Common Shares. In addition, at the time an interest rate swap transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of the Common Shares. The Fund could be required to prepay the principal amount of any Borrowings. Such redemption or prepayment would likely result in the Fund seeking to terminate early all or a portion of any swap transaction. Early termination of a swap could result in a termination payment by or to the Fund.

The Fund will not enter into interest rate swap transactions having a notional amount that exceeds the outstanding amount of the Fund's leverage. See Use of Leverage and The Fund's Investments Portfolio Composition and Other Information Other Investments Hedging Transactions in the Prospectus and Hedging Strategies and Other Uses of Derivatives and Segregation of Assets in the SAI for additional information.

HEDGING STRATEGIES AND OTHER USES OF DERIVATIVES

The Fund may periodically engage in hedging transactions, and otherwise use various types of derivative instruments, described below, to reduce risk, to effectively gain particular market exposures, to seek to enhance returns, and to reduce transaction costs, among other reasons.

Hedging is a term used for various methods of seeking to preserve portfolio capital value by offsetting price changes in one investment through making another investment whose price should tend to move in the opposite direction.

A derivative is a financial contract whose value is based on (or derived from) a traditional security (such as a stock or a bond), an asset (such as a commodity like gold), or a market index (such as the Lehman Municipal Bond Index). Some forms of derivatives may trade on exchanges, while non-standardized derivatives, which tend to be more specialized and complex, trade in over-the-counter or a one-on-one basis. It may be desirable and possible in various market environments to partially hedge the portfolio against fluctuations in market value due to market interest rate or credit quality fluctuations, or instead to gain a desired investment exposure, by entering into various types of derivative transactions, including financial futures and index futures as well as related put and call options on such instruments, structured notes, or interest rate swaps on taxable or tax-exempt securities or indexes (which may be forward-starting), credit default swaps, and options on interest rate swaps, among others.

These transactions present certain risks. In particular, the imperfect correlation between price movements in the futures contract and price movements in the securities being hedged creates the possibility that losses on the hedge by the Fund may be greater than gains in the value of the securities in the Fund's portfolio. In addition, futures and options markets may not be liquid in all circumstances. As a result, in volatile markets, the Fund may not be able to close out the transaction without incurring losses substantially greater than the initial deposit. Finally, the potential deposit requirements in futures contracts create an ongoing greater potential financial risk than do options transactions, where the exposure is limited to the cost of the initial premium. Losses due to hedging transactions will reduce yield. Net gains, if any, from hedging and other portfolio transactions will be distributed as taxable distributions to shareholders. Successful implementation of most hedging strategies will generate taxable income.

Short Sales. The Fund may enter into tactical short positions consisting primarily of high yield debt, either directly or through the use of derivatives including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments. The Fund may invest in credit default swaps to gain short exposure. The Fund may make short sales of securities if, at all times when a short position is open, the Fund owns at least an equal amount of such securities or securities convertible into or exchangeable for, without payment of any further consideration, securities of the same issuer as, and equal in amount to, the securities sold short. This technique is called selling short against the box.

In a short sale, the Fund will not deliver from its portfolio the securities sold and will not receive immediately the proceeds from the sale. Instead, the Fund will borrow the securities sold short from a broker-dealer through which the short sale is executed and the broker-dealer will deliver such securities, on behalf of the

Fund, to the purchaser of such securities. Such broker-dealer will be entitled to retain the proceeds from the short sale until the Fund delivers to such broker-dealer the securities sold short. In addition, the Fund will be required to pay the broker-dealer the amount of any dividends paid on shares sold short. Finally, to secure its obligation to deliver to such broker-dealer the securities sold short, the Fund must deposit and continuously maintain in a separate account with its custodian an equivalent amount of the securities sold short or securities convertible into or exchangeable for such securities without the payment of additional consideration. The Fund is said to have a short position in the securities sold until it delivers to the broker-dealer the securities sold, at which time the Fund will receive the proceeds of the sale. Because the Fund ordinarily will want to continue to hold securities in its portfolio that are sold short, the Fund will normally close out a short position by purchasing on the open market and delivering to the broker-dealer an equal amount of the securities sold short, rather than delivering portfolio securities.

Short sales may protect the Fund against the risk of losses in the value of its portfolio securities because any unrealized losses with respect to such portfolio securities should be wholly or partially offset by a corresponding gain in the short position. However, any potential gain in such portfolio securities should be wholly or partially offset by a corresponding loss in the short position. The extent to which such gains or losses are offset will depend upon the amount of securities sold short relative to the amount the Fund owns, either directly or indirectly, and, in the case where the Fund owns convertible securities, changes in the conversion premium. The Fund will incur transaction costs in connection with short sales.

In addition to enabling the Fund to hedge against market risk, short sales may afford the Fund an opportunity to earn additional current income to the extent the Fund is able to enter into arrangements with broker-dealers through which the short sales are executed to receive income with respect to the proceeds of the short sales during the period the Fund's short positions remain open. All or a portion of the proceeds received from the Fund's short sales may be used in the future to purchase additional long positions in corporate debt instruments, which would increase the Fund's effective leverage ratio. See Risk Factors Fund Level Risks Leverage Risk in the Fund's Prospectus.

The Code imposes constructive sale treatment for federal income tax purposes on certain hedging strategies with respect to appreciated financial positions. Under these rules, taxpayers will recognize gain, but not loss, with respect to securities if they enter into short sales or offsetting notional principal contracts (as defined by the Code) with respect to, or futures or forward contracts to deliver, the same or substantially identical property, or if they enter into such transactions and then acquire the same or substantially identical property. See Tax Matters.

Options on Securities. In order to hedge against adverse market shifts, the Fund may purchase put and call options on stock, bonds or other securities. In addition, the Fund may seek to hedge a portion of its portfolio investments through writing (*i.e.*, selling) covered put and call options. A put option embodies the right of its purchaser to compel the writer of the option to purchase from the option holder an underlying security or its equivalent at a specified price at any time during the option period. In contrast, a call option gives the purchaser the right to buy the underlying security covered by the option or its equivalent from the writer of the option at the stated exercise price at any time during the option period.

As a holder of a put option, the Fund will have the right to sell the securities underlying the option and as the holder of a call option, the Fund will have the right to purchase the securities underlying the option, in each case at their exercise price at any time during the option period prior to the option's expiration date. The Fund may choose to exercise the options it holds, permit them to expire or terminate them prior to their expiration by entering into closing sale or purchase transactions. In entering into a closing sale or purchase transaction, the Fund would sell an option of the same series as the one it has purchased. The ability of the Fund to enter into a closing sale transaction with respect to options purchased and to enter into a closing purchase transaction with respect to options sold depends on the existence of a liquid secondary market. There can be no assurance that a closing purchase or sale transaction can be effected when the Fund so desires. The Fund's ability to terminate

option positions established in the over-the-counter market may be more limited than in the case of exchange-traded options and also may involve the risk that securities dealers participating in such transactions would fail to meet their obligations to the Fund.

In purchasing a put option, the Fund seeks to benefit from a decline in the market price of the underlying security, while in purchasing a call option, the Fund seeks to benefit from an increase in the market price of the underlying security. If an option purchased is not sold or exercised when it has remaining value, or if the market price of the underlying security remains equal to or greater than the exercise price, in the case of a put, or remains equal to or below the exercise price, in the case of a call, during the life of the option, the option will expire worthless. For the purchase of an option to be profitable, the market price of the underlying security must decline sufficiently below the exercise price, in the case of a put, and must increase sufficiently above the exercise price, in the case of a call, to cover the premium and transaction costs. Because option premiums paid by the Fund are small in relation to the market value of the instruments underlying the options, buying options can result in additional amounts of leverage to the Fund. The leverage caused by trading in options could cause the Fund's net asset value to be subject to more frequent and wider fluctuation than would be the case if the Fund did not invest in options.

The Fund will receive a premium when it writes put and call options, which increases the Fund's return on the underlying security in the event the option expires unexercised or is closed out at a profit. By writing a call, the Fund will limit its opportunity to profit from an increase in the market value of the underlying security above the exercise price of the option for as long as the Fund's obligation as the writer of the option continues. Upon the exercise of a put option written by the Fund, the Fund may suffer an economic loss equal to the difference between the price at which the Fund is required to purchase the underlying security and its market value at the time of the option exercise, less the premium received for writing the option. Upon the exercise of a call option written by the Fund, the Fund may suffer an economic loss equal to an amount not less than the excess of the security's market value at the time of the option exercise over the Fund's acquisition cost of the security, less the sum of the premium received for writing the option and the difference, if any, between the call price paid to the Fund and the Fund's acquisition cost of the security. Thus, in some periods the Fund might receive less total return and in other periods greater total return from its hedged positions than it would have received from its underlying securities unhedged.

Options on Stock and Bond Indexes. The Fund may purchase put and call options on stock and bond indexes to hedge against risks of market-wide price movements affecting its assets. In addition, the Fund may write covered put and call options on stock and bond indexes. A stock or bond index measures the movement of a certain group of stocks or bonds by assigning relative values to the stocks or bonds included in the index. Options on a stock or bond index are similar to options on securities. Because no underlying security can be delivered, however, the option represents the holder's right to obtain from the writer, in cash, a fixed multiple of the amount by which the exercise price exceeds (in the case of a put) or is less than (in the case of a call) the closing value of the underlying index on the exercise date. The advisability of using stock or bond index options to hedge against the risk of market-wide movements will depend on the extent of diversification of the Fund's investments and the sensitivity of its investments to factors influencing the underlying index. The effectiveness of purchasing or writing stock or bond index options as a hedging technique will depend upon the extent to which price movements in the Fund's investments correlate with price movements in the stock or bond index selected. In addition, successful use by the Fund of options on stock or bond indexes will be subject to the ability of Symphony to predict correctly changes in the relationship of the underlying index to the Fund's portfolio holdings. No assurance can be given that Symphony's judgment in this respect will be correct. When the Fund writes an option on a stock or bond index, it will establish a segregated account with its custodian in which the Fund will deposit liquid securities in an amount equal to the market value of the option, and will maintain the account while the option is open.

Stock and Bond Index Futures Contracts. The Fund may purchase and sell stock index futures as a hedge against movements in the equity markets. Stock and bond index futures contracts are agreements in which one

party agrees to deliver to the other an amount of cash equal to a specific dollar amount times the difference between the value of a specific stock or bond index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of securities is made. For example, if Symphony expects general stock or bond market prices to decline, it might sell a futures contract on a particular stock or bond index. If that index does in fact decline, the value of some or all of the securities in the Fund's portfolio also may be expected to decline, but that decrease would be offset in part by the increase in the value of the Fund's position in such futures contract. If, on the other hand, Symphony expects general stock or bond market prices to rise, it might purchase a stock or bond index futures contract as a hedge against an increase in prices of particular securities it wants ultimately to buy. If in fact the stock or bond index does rise, the price of the particular securities intended to be purchased also may increase, but that increase would be offset in part by the increase in the value of the Fund's futures contract resulting from the increase in the index. The Fund may purchase futures contracts on a stock or bond index to enable Symphony to gain immediate exposure to the underlying securities market pending the investment in individual securities of the Fund's portfolio.

The potential loss related to the purchase of an option on a futures contract is limited to the premium paid for the option (plus transaction costs). With respect to options purchased by the Fund, there are no daily cash payments made by the Fund to reflect changes in the value of the underlying contract; however, the value of the option does change daily and that change would be reflected in the net asset value of the Fund.

Other Futures Contracts and Options on Futures Contracts. The Fund's use of derivative instruments also may include (i) U.S. Treasury security or U.S. Government Agency security futures contracts and (ii) options on U.S. Treasury security or U.S. Government Agency security futures contracts. All such instruments must be traded and listed on an exchange. U.S. Treasury and U.S. Government Agency futures contracts are standardized contracts for the future delivery of a U.S. Treasury Bond or U.S. Treasury Note or a U.S. Government Agency security or their equivalent at a future date at a price set at the time of the contract. An option on a U.S. Treasury or U.S. Government Agency futures contract, as contrasted with the direct investment in such a contract, gives the purchaser of the option the right, in return for the premium paid, to assume a position in a U.S. Treasury or U.S. Government Agency futures contract at a specified exercise price at any time on or before the expiration date of the option. Upon exercise of an option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance in the writer's future margin account, which represents the amount by which the market price of the futures contract exceeds the exercise price of the option on the futures contract.

Risks Associated with Futures Contracts and Options on Futures Contracts. Futures prices are affected by many factors, such as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract. A purchase or sale of a futures contract may result in losses in excess of the amount invested in the futures contract. Because of low initial margin deposits made upon the opening of a futures position, futures transactions involve substantial leverage. As a result, relatively small movements in the price of the futures contracts can result in substantial unrealized gains or losses. There is also the risk of loss by the Fund of margin deposits in the event of bankruptcy of a broker with which the Fund has an open position in a financial futures contract. While the Fund may enter into futures contracts and options on futures contracts for hedging purposes, the use of futures contracts and options on futures contracts might result in a poorer overall performance for the Fund than if it had not engaged in any such transactions. If, for example, the Fund had insufficient cash, it might have to sell a portion of its underlying portfolio of securities in order to meet daily variation margin requirements on its futures contracts or options on futures contracts at a time when it might be disadvantageous to do so. There may be an imperfect correlation between the Fund's portfolio holdings and futures contracts or options on futures contracts entered into by the Fund, which may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. The degree of imperfection of correlation depends on circumstances such as: variations in speculative market demand for futures, futures options and the related securities, including technical influences in futures and futures options trading and differences between the securities markets and the securities underlying the standard contracts available for trading. Futures prices are affected by many factors, such as current and anticipated short-term

interest rates, changes in volatility of the underlying instrument and the time remaining until the expiration of the contract. Further, the Fund's use of futures contracts and options on futures contracts to reduce risk involves costs and will be subject to Symphony's ability to predict correctly changes in interest rate relationships or other factors. A decision as to whether, when and how to use futures contracts involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected stock price or interest rate trends. No assurance can be given that Symphony's judgment in this respect will be correct.

Futures exchanges may limit the amount of fluctuation permitted in certain futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of the current trading session. Once the daily limit has been reached in a futures contract subject to the limit, no more trades may be made on that day at a price beyond that limit. The daily limit governs only price movements during a particular trading day and therefore does not limit potential losses because the limit may work to prevent the liquidation of unfavorable positions. For example, futures prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of positions and subjecting some holders of futures contracts to substantial losses. Stock index futures contracts are not normally subject to such daily price change limitations.

The Fund may invest in other options. An option is an instrument that gives the holder of the instrument the right, but not the obligation, to buy or sell a predetermined number of specific securities (*i.e.* preferred stocks, common stocks or bonds) at a stated price within the expiration period of the instrument, which is generally less than 12 months from its issuance. If the right is not exercised after a specified period but prior to the expiration, the option expires. Both put and call options may be used by the Fund.

The Fund may purchase and sell various other kinds of financial futures contracts and options thereon. Futures contracts may be based on various debt instruments and securities indices (such as the Municipal Bond Index traded on the Chicago Board of Trade). Such transactions involve a risk of loss or depreciation due to unanticipated adverse changes in securities prices, which may exceed the Fund's initial investment in these contracts. The Fund will only purchase or sell futures contracts or related options in compliance with the rules of the CFTC. These transactions involve transaction costs. There can be no assurance that the Fund's use of futures will be advantageous to the Fund. Guidelines established by one or more NRSROs that rate any Preferred Shares issued by the Fund may limit use of these transactions.

Credit-Linked Notes. The Fund may invest in credit-linked notes (CLN) for risk management purposes, including diversification. A CLN is a derivative instrument that is a synthetic obligation between two or more parties where the payment of principal and/or interest is based on the performance of some obligation (a reference obligation). In addition to credit risk of the reference obligation and interest rate risk, the buyer/seller of the CLN is subject to counterparty risk. See Risk Factors Security Level Risks Counterparty Risk in the Fund's Prospectus.

Swap Transactions. The Fund may enter into total return, interest rate and credit default swap agreements and interest rate caps, floors and collars. The Fund may also enter into options on the foregoing types of swap agreements (swap options).

The Fund may enter into swap transactions for any purpose consistent with its investment objective, such as for the purpose of attempting to obtain or preserve a particular return or spread at a lower cost than obtaining a return or spread through purchases and/or sales of instruments in other markets, as a duration management technique, to reduce risk arising from the ownership of a particular instrument, or to gain exposure to certain sectors or markets in the most economical way possible.

Swap agreements are two party contracts entered into primarily by institutional investors for a specified period of time. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on a particular predetermined asset, reference rate or index. The gross returns to be exchanged or swapped between the parties are generally calculated with respect to a notional amount, *e.g.*, the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a basket of securities representing a particular index. The notional amount of the swap agreement generally is only used as a basis upon which to calculate the obligations that the parties to the swap agreement have agreed to exchange. The Fund's current obligations under a net swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by assets determined to be liquid by Symphony. The Fund will not enter into interest rate swap transactions having a notional amount that exceeds the outstanding amount of the Fund's leverage. See *Use of Leverage* and *Risk Factors* *Leverage Risks* in the Prospectus and *Segregation of Assets* in this SAI for additional information.

Some, but not all, swaps may be cleared, in which case a central clearing counterparty stands between each buyer and seller and effectively guarantees performance of each contract, to the extent of its available resources for such purpose. Uncleared swaps have no such protection; each party bears the risk that its direct counterparty will default.

In addition, the swaps market is subject to a changing regulatory environment. It is possible that regulatory or other developments in the swaps market could adversely affect the Fund's ability to successfully use swaps.

Historically, swap transactions have been individually negotiated non-standardized transactions entered into in OTC markets and have not been subject to the same type of government regulation as exchange-traded instruments. However, the OTC derivatives markets have become subject to comprehensive statutes and regulations. In particular, in the United States, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the *Dodd-Frank Act*) requires that certain derivatives with U.S. persons must be executed on a regulated market and a substantial portion of OTC derivatives must be submitted for clearing to regulated clearinghouses. As a result, swap transactions entered into by the Fund may become subject to various requirements applicable to swaps under the Dodd-Frank Act, including clearing, exchange-execution, reporting and recordkeeping requirements, which may make it more difficult and costly for the Fund to enter into swap transactions and may also render certain strategies in which the Fund might otherwise engage impossible or so costly that they will no longer be economical to implement. Furthermore, the number of counterparties that may be willing to enter into swap transactions with the Fund may also be limited if the swap transactions with the Fund are subject to swap regulation under the Dodd-Frank Act.

Interest Rate Swaps, Caps, Collars and Floors. Interest rate swaps are bilateral contracts in which each party agrees to make periodic payments to the other party based on different referenced interest rates (*e.g.*, a fixed rate and a floating rate) applied to a specified notional amount. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. Interest rate collars involve selling a cap and purchasing a floor or vice versa to protect the Fund against interest rate movements exceeding given minimum or maximum levels.

Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of Common Shares. To the extent interest rates decline, the value of the interest rate swap could decline, and could result in a decline in the net asset value of Common Shares. In addition, if the counterparty to an interest rate swap defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset the interest payments on borrowings or the dividend payments on any outstanding preferred shares. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of Common Shares. In addition, at the time an interest rate swap

transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of Common Shares. The Fund could be required to prepay the principal amount of any borrowings. Such redemption or prepayment would likely result in the Fund seeking to terminate early all or a portion of any swap transaction. Early termination of a swap could result in a termination payment by or to the Fund.

Total Return Swaps. In a total return swap, one party agrees to pay the other the total return of a defined underlying asset during a specified period, in return for periodic payments based on a fixed or variable interest rate or the total return from other underlying assets. A total return swap may be applied to any underlying asset but is most commonly used with equity indices, single stocks, bonds and defined baskets of loans and mortgages. The Fund might enter into a total return swap involving an underlying index or basket of securities to create exposure to a potentially widely-diversified range of securities in a single trade. An index total return swap can be used by Symphony to assume risk, without the complications of buying the component securities from what may not always be the most liquid of markets. Total return swap agreements may effectively add leverage to the Fund's portfolio. Total return swap agreements are subject to counterparty risk as well.

Credit Default Swaps. A credit default swap is a bilateral contract that enables an investor to buy or sell protection against a defined-issuer credit event. The Fund may enter into credit default swap agreements either as a buyer or a seller. The Fund may buy protection to attempt to mitigate the risk of default or credit quality deterioration in an individual security or a segment of the fixed income securities market to which it has exposure, or to take a short position in individual bonds or market segments which it does not own. The Fund may sell protection in an attempt to gain exposure to the credit quality characteristics of particular bonds or market segments without investing directly in those bonds or market segments.

As the buyer of protection in a credit default swap, the Fund would pay a premium (by means of an upfront payment or a periodic stream of payments over the term of the agreement) in return for the right to deliver a referenced bond or group of bonds to the protection seller and receive the full notional or par value (or other agreed upon value) upon a default (or similar event) by the issuer(s) of the underlying referenced obligation(s). If no default occurs, the protection seller would keep the stream of payments and would have no further obligation to the Fund. Thus, the cost to the Fund would be the premium paid with respect to the agreement. If a credit event occurs, however, the Fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. The Fund bears the risk that the protection seller may fail to satisfy its payment obligations.

If the Fund is a seller of protection in a credit default swap and no credit event occurs, the Fund would generally receive an up-front payment or a periodic stream of payments over the term of the swap. If a credit event occurs, however, generally the Fund would have to pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As the protection seller, the Fund effectively adds economic leverage to its portfolio because, in addition to being subject to investment exposure on its total net assets, the Fund is subject to investment exposure on the notional amount of the swap. Thus, the Fund bears the same risk as it would by buying the reference obligations directly, plus the additional risks related to obtaining investment exposure through a derivative instrument discussed below under Risks Associated with Swap Transactions.

Swap Options. A swap option is a contract that gives a counterparty the right (but not the obligation), in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel, or otherwise modify an existing swap agreement at some designated future time on specified terms. A cash-settled option on a swap gives the purchaser the right, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. The Fund may write (sell) and purchase put and call swap options. Depending on the terms of the particular option agreement, the Fund generally would incur a greater degree of risk when it writes a swap option than when it purchases a swap option. When the Fund purchases a

swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the Fund writes a swap option, upon exercise of the option the Fund would become obligated according to the terms of the underlying agreement.

Risks Associated with Swap Transactions. The use of swap transactions is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If Symphony is incorrect in its forecasts of default risks, market spreads or other applicable factors or events, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. As the protection seller in a credit default swap, the Fund effectively adds economic leverage to its portfolio because, in addition to being subject to investment exposure on its total net assets, the Fund is subject to investment exposure on the notional amount of the swap. The Fund generally may only close out a swap, cap, floor, collar or other two-party contract with its particular counterparty, and generally may only transfer a position with the consent of that counterparty. In addition, the price at which the Fund may close out such a two party contract may not correlate with the price change in the underlying reference asset. If the counterparty defaults, the Fund will have contractual remedies, but there can be no assurance that the counterparty will be able to meet its contractual obligations or that the Fund will succeed in enforcing its rights.

It also is possible that developments in the derivatives market, including changes in government regulation, could adversely affect the Fund's ability to terminate existing swap or other agreements or to realize amounts to be received under such agreements.

Other Hedging Transactions. The Fund may invest in relatively new instruments without a significant trading history for purposes of hedging the Fund's portfolio risks. As a result, there can be no assurance that an active secondary market will develop or continue to exist.

Limitations on the Use of Futures, Options on Futures and Swaps. NFALLC has claimed, with respect to the Fund, the exclusion from the definition of commodity pool operator under the Commodity Exchange Act (CEA) provided by Commodity Futures Trading Commission (CFTC) Regulation 4.5 and is therefore not currently subject to registration or regulation as such under the CEA with respect to the Fund. In addition, Symphony has claimed the exemption from registration as a commodity trading advisor provided by CFTC Regulation 4.14(a)(8) and is therefore not currently subject to registration or regulation as such under the CEA with respect to the Fund. Under CFTC Regulation 4.5, if the Fund uses futures, options on futures or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options that are in-the-money at the time of purchase are in-the-money) may not exceed 5% of the Fund's net asset value, or alternatively, the aggregate net notional value of those positions may not exceed 100% of the Fund's net asset value (after taking into account unrealized profits and unrealized losses on any such positions). The Fund intends to comply with amended Regulation 4.5's requirements such that NFALLC will not be required to register as a commodity pool operator with the CFTC with respect to the Fund. The Fund reserves the right to employ futures, options on futures and swaps to the extent allowed by CFTC regulations in effect from time to time and in accordance with the Fund's policies. The requirements for qualification as a regulated investment company may also limit the extent to which the Fund may employ futures, options on futures or swaps.

NFALLC may use derivative instruments to seek to enhance return, to hedge some of the risk of the Fund's investments in securities or as a substitute for a position in the underlying asset. These types of strategies may generate taxable income.

There is no assurance that these derivative strategies will be available at any time or that NFALLC will determine to use them for the Fund or, if used, that the strategies will be successful.

For further information regarding these investment strategies and risks presented thereby, see Appendix B to this SAI.

MANAGEMENT OF THE FUND
TRUSTEES AND OFFICERS

The management of the Fund, including general supervision of the duties performed for the Fund under the Investment Management Agreement (as defined under Investment Adviser, Sub-Adviser and Portfolio Managers Investment Management Agreement and Related Fees), is the responsibility of the Board of Trustees. The number of trustees of the Fund is twelve, two of whom are interested persons (as the term interested person is defined in the 1940 Act) and ten of whom are not interested persons (referred to herein as independent trustees). None of the independent trustees has ever been a director, trustee or employee of, or consultant to, Nuveen Investments, NFALLC, Symphony, or their affiliates. The Board of Trustees is divided into three classes, Class I, Class II and Class III, the Class I trustees serving until the 2019 annual meeting, the Class II trustees serving until the 2017 annual meeting and the Class III trustees serving until the 2018 annual meeting, in each case until their respective successors are elected and qualified, as described below. Currently, William C. Hunter, Judith M. Stockdale, Carole E. Stone and Margaret L. Wolff are slated in Class I, William Adams IV, David J. Kundert, John K. Nelson and Terence J. Toth are slated in Class II, and Margo L. Cook, Jack B. Evans, Albin F. Moschner and William J. Schneider are slated in Class III. If the Fund has preferred shares outstanding, two of the Fund's trustees will be elected by the holders of such preferred shares, voting separately as a class. The remaining trustees of the Fund are elected by holders of Common Shares and preferred shares, voting separately as a class. In the event that the Fund fails to pay dividends on outstanding preferred shares for two years, holders of preferred shares are entitled to elect a majority of trustees of the Fund. The officers of the Fund serve annual terms through August of each year and are elected on an annual basis. The names, business addresses and years of birth of the trustees and officers of the Fund, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below. The trustees of the Fund are directors or trustees, as the case may be, of 101 Nuveen-sponsored open-end mutual funds (the Nuveen Mutual Funds), 74 Nuveen-sponsored closed-end funds (the Nuveen Closed-End Funds) and seven Nuveen sponsored exchange-traded funds (collectively with the Nuveen Mutual Funds, and Nuveen Closed-End Funds, the Nuveen Funds).

* Each officer also serves as an officer of the Diversified Real Asset Income Fund, a closed-end management investment company advised by NFALLC but not overseen by Fund's Board of Trustees.

Board Leadership Structure and Risk Oversight

The Board of Directors or the Board of Trustees (as the case may be, each is referred to hereafter as the Board and the trustees or directors of the Nuveen Funds, as applicable, are each referred to herein as Trustees) oversees the operations and management of the Nuveen Funds, including the duties performed for the Nuveen Funds by NFALLC and Symphony. The Board has adopted a unitary board structure. A unitary board consists of one group of trustees who serve on the board of every fund in the complex. In adopting a unitary board structure, the Trustees seek to provide effective governance through establishing a board, the overall composition of which, will, as a body, possess the appropriate skills, independence and experience to oversee the Nuveen Funds' business. With this overall framework in mind, when the Board, through its Nominating and Governance Committee discussed below, seeks nominees for the Board, the Trustees consider, not only the candidate's particular background, skills and experience, among other things, but also whether such background, skills and experience enhance the Board's diversity and at the same time complement the Board given its current composition and the mix of skills and experiences of the incumbent Trustees.

The Board believes the unitary board structure enhances good and effective governance, particularly given the nature of the structure of the investment company complex. Funds in the same complex generally are served by the same service providers and personnel and are governed by the same regulatory scheme which raises common issues that must be addressed by the trustees across the fund complex (such as compliance, valuation, liquidity, brokerage, trade allocation or risk management). The Board believes it is more efficient to have a single board review and oversee common policies and procedures which increases the Board's knowledge and expertise with respect to the many aspects of fund operations that are complex-wide in nature. The unitary structure also enhances the Board's influence and oversight over NFALLC and other service providers.

In an effort to enhance the independence of the Board, the Board also has a Chairman that is an independent trustee. The Board recognizes that a chairman can perform an important role in setting the agenda for the Board, establishing the boardroom culture, establishing a point person on behalf of the Board for fund management, and reinforcing the Board's focus on the long-term interests of shareholders. The Board recognizes that a chairman may be able to better perform these functions without any conflicts of interests arising from a position with fund management. Accordingly, the Trustees have elected William J. Schneider as the Independent Chairman of the Board. Specific responsibilities of the Chairman include: (i) presiding at all meetings of the Board and of the shareholders; (ii) seeing that all orders and resolutions of the Trustees are carried into effect; and (iii) maintaining records of and, whenever necessary, certifying all proceedings of the Trustees and the shareholders.

Although the Board has direct responsibility over various matters (such as advisory contracts, underwriting contracts and Fund performance), the Board also exercises certain of its oversight responsibilities through several committees that it has established and which report back to the full Board. The Board believes that a committee structure is an effective means to permit Trustees to focus on particular operations or issues affecting the Nuveen Funds, including risk oversight. More specifically, with respect to risk oversight, the Board has delegated matters relating to valuation and compliance to certain committees (as summarized below) as well as certain aspects of investment risk. In addition, the Board believes that the periodic rotation of Trustees among the different committees allows the Trustees to gain additional and different perspectives of the Fund's operations. The Board has established six standing committees: the Executive Committee, the Dividend Committee, the Audit Committee, the Compliance, Risk Management and Regulatory Oversight Committee, the Nominating and Governance Committee and the Closed-End Funds Committee. The Board also may also from time to time create ad hoc committees to focus on particular issues as the need arises. The membership and functions of the standing committees are summarized below.

The Executive Committee, which meets between regular meetings of the Board, is authorized to exercise all of the powers of the Board. The members of the Executive Committee are William J. Schneider, Chair, William Adams IV and Terence J. Toth. During the fiscal year ended July 31, 2016, the Executive Committee met one (1) time.

The Dividend Committee is authorized to declare distributions on the Nuveen Funds shares including, but not limited to, regular and special dividends, capital gains and ordinary income distributions. The members of the Dividend Committee are William C. Hunter, Chair, Margaret L. Wolff and Terence J. Toth. During the fiscal year ended July 31, 2016, the Dividend Committee met four (4) times.

The Compliance, Risk Management and Regulatory Oversight Committee (the Compliance Committee) is responsible for the oversight of compliance issues, risk management and other regulatory matters affecting the Nuveen Funds that are not otherwise the jurisdiction of the other committees. The Board has adopted and periodically reviews policies and procedures designed to address the Nuveen Funds' compliance and risk matters. As part of its duties, the Compliance Committee reviews the policies and procedures relating to compliance matters and recommends modifications thereto as necessary or appropriate to the full Board; develops new policies and procedures as new regulatory matters affecting the Nuveen Funds arise from time to time; evaluates or considers any comments or reports from examinations from regulatory authorities and responses thereto; and performs any special reviews, investigations or other oversight responsibilities relating to risk management, compliance and/or regulatory matters as requested by the Board.

In addition, the Compliance Committee is responsible for risk oversight, including, but not limited to, the oversight of risks related to investments and operations. Such risks include, among other things, exposures to particular issuers, market sectors, or types of securities; risks related to product structure elements, such as leverage; and techniques that may be used to address those risks, such as hedging and swaps. In assessing issues brought to the committee's attention or in reviewing a particular policy, procedure, investment technique or strategy, the Compliance Committee evaluates the risks to the Nuveen Funds in adopting a particular approach or resolution compared to the anticipated benefits to the Nuveen Funds and their shareholders. In fulfilling its obligations, the Compliance Committee meets on a quarterly basis, and at least once a year in person. The Compliance Committee receives written and oral reports from the Nuveen Funds' Chief Compliance Officer (CCO) and meets privately with the CCO at each of its quarterly meetings. The CCO also provides an annual report to the full Board regarding the operations of the Nuveen Funds and other service providers' compliance programs as well as any recommendations for modifications thereto. The Compliance Committee also receives reports from the investment services group of Nuveen Investments regarding various investment risks. Notwithstanding the foregoing, the full Board also participates in discussions with management regarding certain matters relating to investment risk, such as the use of leverage and hedging. The investment services group therefore also reports to the full Board at its quarterly meetings regarding, among other things, Fund performance and the various drivers of such performance. Accordingly, the Board directly and/or in conjunction with the Compliance Committee oversees matters relating to investment risks. Matters not addressed at the committee level are addressed directly by the full Board. The committee operates under a written charter adopted and approved by the Board. The members of the Compliance Committee are William C. Hunter, Albin F. Moschner, John K. Nelson, Chair, Judith M. Stockdale, and Margaret L. Wolff. During the fiscal year ended July 31, 2016, the Compliance Committee met five (5) times.

The Audit Committee assists the Board in the oversight and monitoring of the accounting and reporting policies, processes and practices of the Nuveen Funds, and the audits of the financial statements of the Nuveen Funds; the quality and integrity of the financial statements of the Nuveen Funds; the Nuveen Funds' compliance with legal and regulatory requirements relating to the Nuveen Funds' financial statements; the independent auditors' qualifications, performance and independence; and the pricing procedures of the Nuveen Funds and the internal valuation group of Nuveen. It is the responsibility of the Audit Committee to select, evaluate and replace any independent auditors (subject only to Board and, if applicable, shareholder ratification) and to determine their compensation. The Audit Committee is also responsible for, among other things, overseeing the valuation of securities comprising the Nuveen Funds' portfolios. Subject to the Board's general supervision of such actions, the Audit Committee addresses any valuation issues, oversees the Nuveen Funds' pricing procedures and actions taken by Nuveen's internal valuation group which provides regular reports to the committee, reviews any issues relating to the valuation of the Nuveen Funds' securities brought to its attention and considers the risks to the Nuveen Funds in assessing the possible resolutions to these matters. The Audit Committee may also consider any financial risk exposures for the Nuveen Funds in conjunction with performing its functions.

To fulfill its oversight duties, the Audit Committee receives annual and semi-annual reports and has regular meetings with the external auditors for the Nuveen Funds and NFALLC's internal audit group. The Audit Committee also may review in a general manner the processes the Board or other Board committees have in place with respect to risk assessment and risk management as well as compliance with legal and regulatory matters relating to the Nuveen Funds' financial statements. The committee operates under a written charter adopted and approved by the Board. Members of the Audit Committee shall be independent (as set forth in the charter) and free of any relationship that, in the opinion of the Trustees, would interfere with their exercise of independent judgment as an Audit Committee member. The members of the Audit Committee are Jack B. Evans, Chair, David J. Kundert, John K. Nelson, Carole E. Stone and Terence J. Toth, each of whom is an independent trustee of the Nuveen Funds. During the fiscal year ended July 31, 2016, the Audit Committee met four (4) times.

The Nominating and Governance Committee is responsible for seeking, identifying and recommending to the Board qualified candidates for election or appointment to the Board. In addition, the Nominating and Governance Committee oversees matters of corporate governance, including the evaluation of Board

performance and processes, the assignment and rotation of committee members, and the establishment of corporate governance guidelines and procedures, to the extent necessary or desirable, and matters related thereto. Although the unitary and committee structure has been developed over the years and the Nominating and Governance Committee believes the structure has provided efficient and effective governance, the committee recognizes that as demands on the Board evolve over time (such as through an increase in the number of funds overseen or an increase in the complexity of the issues raised), the committee must continue to evaluate the Board and committee structures and their processes and modify the foregoing as may be necessary or appropriate to continue to provide effective governance. Accordingly, the Nominating and Governance Committee has a separate meeting each year to, among other things, review the Board and committee structures, their performance and functions, and recommend any modifications thereto or alternative structures or processes that would enhance the Board's governance over the Funds' business.

In addition, the Nominating and Governance Committee, among other things, makes recommendations concerning the continuing education of Trustees; monitors performance of legal counsel and other service providers; establishes and monitors a process by which security holders are able to communicate in writing with members of the Board; and periodically reviews and makes recommendations about any appropriate changes to trustee compensation. In the event of a vacancy on the Board, the Nominating and Governance Committee receives suggestions from various sources, including Shareholders, as to suitable candidates. Suggestions should be sent in writing to Lorna Ferguson, Manager of Fund Board Relations, Nuveen, 333 West Wacker Drive, Chicago, IL 60606. The Nominating and Governance Committee sets appropriate standards and requirements for nominations for new Trustees and reserves the right to interview any and all candidates and to make the final selection of any new Trustees. In considering a candidate's qualifications, each candidate must meet certain basic requirements, including relevant skills and experience, time availability (including the time requirements for due diligence site visits to internal and external sub-advisers and service providers) and, if qualifying as an independent trustee candidate, independence from NFALLC, Symphony, underwriters or other service providers, including any affiliates of these entities. These skill and experience requirements may vary depending on the current composition of the Board, since the goal is to ensure an appropriate range of skills, diversity and experience, in the aggregate. Accordingly, the particular factors considered and weight given to these factors will depend on the composition of the Board and the skills and backgrounds of the incumbent Trustees at the time of consideration of the nominees. All candidates, however, must meet high expectations of personal integrity, independence, governance experience and professional competence. All candidates must be willing to be critical within the Board and with management and yet maintain a collegial and collaborative manner toward other Board members. The committee operates under a written charter adopted and approved by the Board. This committee is composed of the independent trustees of the Nuveen Funds. The members of the Nominating and Governance Committee are Jack B. Evans, William C. Hunter, David J. Kundert, Albin F. Moschner, John K. Nelson, William J. Schneider, Chair, Judith M. Stockdale, Carole E. Stone, Margaret L. Wolff and Terence J. Toth. During the fiscal year ended July 31, 2016, the Nominating and Governance Committee met six (6) times.

The Closed-End Funds Committee is responsible for assisting the Board in the oversight and monitoring of the Nuveen Funds that are registered as closed-end management investment companies (Closed-End Funds). The committee may review and evaluate matters related to the formation and the initial presentation to the Board of any new Closed-End Fund and may review and evaluate any matters relating to any existing Closed-End Fund. The committee operates under a written charter adopted and approved by the Board. The members of the Closed-End Funds Committee are Jack B. Evans, William Adams, Albin F. Moschner, John K. Nelson, William J. Schneider, Terence J. Toth and Carole E. Stone, Chair. During the fiscal year ended July 31, 2016, the Closed-End Funds Committee met four (4) times.

Board Diversification and Trustee Qualifications

Listed below for each current Board member are the experiences, qualifications, attributes and skills that led to the conclusion, as of the date of this SAI, that each current Trustee should serve as a trustee of the Nuveen Funds.

William Adams IV. Mr. Adams, an interested Trustee of the Nuveen Funds, has been Co-Chief Executive Officer and Co-President since March 2016, prior to which he had been and was formerly Senior Executive Vice President, Global Structured Products of Nuveen Investments since November 2010. Mr. Adams is a member of the Senior Leadership Team of Nuveen, LLC, as well as co-chair of Nuveen Investment's Management and Operating Committees. Mr. Adams has also served as Co-President of NFALLC since January 2011. Prior to that, he was Executive Vice President, U.S. Structured Products from December 1999 until November 2010 and served as Managing Director of Structured Investments from September 1997 to December 1999 and Vice President and Manager, Corporate Marketing from August 1994 to September 1997. He is Co-President, Global Products and Solutions, of Nuveen Securities, LLC (Nuveen Securities). Mr. Adams earned his Bachelor of Arts degree from Yale University and his Masters of Business Administration M.B.A from the University of Chicago's Graduate School of Business. He is an Associate Fellow of Yale's Timothy Dwight College and is currently on the Board of the Chicago Symphony Orchestra and of Gilda's Club Chicago.

Margo L. Cook. Ms. Cook, an interested Trustee of the Nuveen Funds, has been Co-Chief Executive Officer and Co-President of Nuveen Investments since March 2016, prior to which she had been Senior Executive Vice President of Nuveen Investments since July 2015. Ms. Cook is a member of the Senior Leadership Team of Nuveen, LLC, as well as co-chair of Nuveen Investment's Management and Operating Committees. She is Co-President (since October 2016), formerly, Senior Executive Vice President (2015-2016) of NFALLC and Co-President, Global Products and Solutions, of Nuveen Securities. Since joining in 2008, she has held various leadership roles at Nuveen Investments, including as Head of Investment Services, responsible for investment-related efforts across the firm. Ms. Cook also serves on the Board of Nuveen Global Fund Investors. Before joining Nuveen Investments, she was the Global Head of Bear Stearns Asset Management's institutional business. Prior to that, she spent over 20 years within BNY Mellon's asset management business; including as Chief Investment Officer for Institutional Asset Management and Head of Institutional Fixed Income. Ms. Cook earned her bachelor's degree in finance from the University of Rhode Island, her Executive MBA from Columbia University, and is a Chartered Financial Analyst. She serves as Vice Chair of The University of Rhode Island Foundation Board of Trustees and Chair of the All Stars Project of Chicago Board.

Jack B. Evans. Mr. Evans has served as President of the Hall-Perrine Foundation, a private philanthropic corporation, since 1996. Mr. Evans was formerly President and Chief Operating Officer of the SCI Financial Group, Inc., a regional financial services firm headquartered in Cedar Rapids, Iowa. He was a member of the Board of the Federal Reserve Bank of Chicago as well as a Director of Alliant Energy and President Pro Tem of the Board of Regents for the State of Iowa University System. Mr. Evans is Chairman of the Board of United Fire Group, sits on the Board of The Gazette Company and is a Life Trustee of Coe College. He has a Bachelor of Arts from Coe College and a M.B.A. from the University of Iowa.

William C. Hunter. Mr. Hunter became Dean Emeritus of the Henry B. Tippie College of Business at the University of Iowa on June 30, 2012. He was appointed Dean of the College on July 1, 2006. He had been Dean and Distinguished Professor of Finance at the University of Connecticut School of Business since June 2003. From 1995 to 2003, he was the Senior Vice President and Director of Research at the Federal Reserve Bank of Chicago. While there he served as the Bank's Chief Economist and was an Associate Economist on the Federal Reserve System's Federal Open Market Committee (FOMC). In addition to serving as a Vice President in charge of financial markets and basic research at the Federal Reserve Bank in Atlanta, he held faculty positions at Emory University, Atlanta University, the University of Georgia and Northwestern University. A past Director of the Credit Research Center at Georgetown University, SS&C Technologies, Inc. (2005) and past President of the Financial Management Association International, he has consulted with numerous foreign central banks and official agencies in Western Europe, Central and Eastern Europe, Asia, Central America and South America. From 1990 to 1995, he was a U.S. Treasury Advisor to Central and Eastern Europe. He has been a Director of the Xerox Corporation since 2004 and Wellmark, Inc. since 2009. He is a past Director and a past President of Beta Gamma Sigma, Inc., the International Business Honor Society.

David J. Kundert. Mr. Kundert retired in 2004 as Chairman of JPMorgan Fleming Asset Management, President and CEO of Banc One Investment Advisors Corporation, and President of One Group Mutual Funds. Prior to the merger between Banc One Corporation and JPMorgan Chase and Co., he was Executive Vice President, Banc One Corporation and, since 1995, the Chairman and CEO, Banc One Investment Management Group. From 1988 to 1992, he was President and CEO of Bank One Wisconsin Trust Company. Mr. Kundert recently retired as a Director of the Northwestern Mutual Wealth Management Company (2006-2013). He started his career as an attorney for Northwestern Mutual Life Insurance Company. Mr. Kundert has served on the Board of Governors of the Investment Company Institute and he is currently a member of the Wisconsin Bar Association. He is on the Board of the Greater Milwaukee Foundation and chairs its Investment Committee. He is a Regent Emeritus and Member of the Investment Committee of Luther College. He also is a member of the Board of Directors (Milwaukee) of College Possible and on the Board of Trustees of the Milwaukee Repertory Theater (since 2016). He received his Bachelor of Arts from Luther College, and his Juris Doctor from Valparaiso University.

Albin F. Moschner. Mr. Moschner is a consultant in the wireless industry and, in July 2012, founded Northcroft Partners, LLC, a management consulting firm that provides operational, management and governance solutions. Prior to founding Northcroft Partners, LLC, Mr. Moschner held various positions at Leap Wireless International, Inc., a provider of wireless services, where he was as a consultant from February 2011 to July 2012, Chief Operating Officer from July 2008 to February 2011, and Chief Marketing Officer from August 2004 to June 2008. Before he joined Leap Wireless International, Inc., Mr. Moschner was President of the Verizon Card Services division of Verizon Communications, Inc. from 2000 to 2003, and President of One Point Services at One Point Communications from 1999 to 2000. Mr. Moschner also served at Zenith Electronics Corporation as Director, President and Chief Executive Officer from 1995 to 1996, and as Director, President and Chief Operating Officer from 1994 to 1995. Since 2012, Mr. Moschner has been a member of the Board of Directors of USA Technologies, Inc. and, from 1996 until 2016, he was a member of the Board of Directors of Wintrust Financial Corporation. In addition, he currently serves on the Advisory Boards of the Kellogg School of Management (since 1995) and the Archdiocese of Chicago Financial Council (since May 2012). Mr. Moschner received a Bachelor of Engineering degree in Electrical Engineering from The City College of New York in 1974 and a Master of Science degree in Electrical Engineering from Syracuse University in 1979.

John K. Nelson. Mr. Nelson is currently on the Board of Directors of Core12 LLC (since 2008), a private firm which develops branding, marketing, and communications strategies for clients. Mr. Nelson has served in several senior executive positions with ABN AMRO Holdings N.V. and its affiliated entities and predecessors, including LaSalle Bank Corporation from 1996 to 2008. From 2007 to 2008, Mr. Nelson was Chief Executive Officer of ABN AMRO N.V. North America, and Global Head of its Financial Markets Division. He was a member of the Foreign Exchange Committee of the Federal Reserve Bank of the United States, and during his tenure with ABN AMRO, served as the bank's representative on various committees of the Bank of Canada, European Central Bank, and the Bank of England. At Fordham University, he currently serves as a director of The Curran Center for Catholic American Studies, and The President's Council. He is also a member of The Economic Club of Chicago. He was formerly a senior external advisor to the financial services practice of Deloitte Consulting LLP, was formerly a member of the Hyde Park Angels, and was formerly a Trustee at St. Edmund Preparatory School in New York City. He formerly served as the Chairman of The Board of Trustees of Marian University. Mr. Nelson graduated and received his MBA from Fordham University.

William J. Schneider. Mr. Schneider, the Nuveen Funds' Independent Chairman, is currently Chairman, formerly Senior Partner and Chief Operating Officer (retired, December 2004) of Miller-Valentine Partners, a real estate investment company. He is an owner in several other Miller-Valentine Group entities. He is currently a member of the board of WDPR Public radio station. He is formerly a Director and Past Chair of the Dayton Development Coalition. He was formerly a member of the Community Advisory Board of the National City Bank in Dayton as well as a former member of the Business Advisory Council of the Cleveland Federal Reserve Bank. Mr. Schneider was also a member of the Business Advisory Council for the University of Dayton College of Business. He also served as Chair of the Miami Valley Hospital and as Chair of the Finance Committee of its

parent holding company. Mr. Schneider was an independent Trustee of the Flagship Funds, a group of municipal open-end funds. Mr. Schneider has a Bachelor of Science in Community Planning from the University of Cincinnati and a Masters of Public Administration from the University of Dayton.

Judith M. Stockdale. Ms. Stockdale retired in 2012 as Executive Director of the Gaylord and Dorothy Donnelley Foundation, a private foundation working in land conservation and artistic vitality in the Chicago region and the Low country of South Carolina. She is currently a board member of the U.S. Endowment for Forestry and Communities (since November 2013) and rejoined the board of the Land Trust Alliance in June 2013. Her previous positions include Executive Director of the Great Lakes Protection Fund, Executive Director of Openlands, and Senior Staff Associate at the Chicago Community Trust. She has served on the Advisory Councils of the National Zoological Park, the Governor's Science Advisory Council (Illinois) and the Nancy Ryerson Ranney Leadership Grants Program. She has served on the boards of Brushwood Center and the Donors Forum. Ms. Stockdale, a native of the United Kingdom, has a Bachelor of Science degree in geography from the University of Durham (UK) and a Master of Forest Science degree from Yale University.

Carole E. Stone. Ms. Stone is currently on the Board of Directors of the Chicago Board Options Exchange, CBOE Holdings, Inc. and C2 Options Exchange, Incorporated. Ms. Stone retired from the New York State Division of the Budget in 2004, having served as its Director for nearly five years and as Deputy Director from 1995 through 1999. She has also served as the Chair of the New York Racing Association Oversight Board, as a Commissioner on the New York State Commission on Public Authority Reform and as a member of the Boards of Directors of several New York State public authorities. Ms. Stone has a Bachelor of Arts from Skidmore College in Business Administration.

Terence J. Toth. Mr. Toth is a Co-Founding Partner of Promus Capital (since 2008). From 2012 to 2016, he was a Director of LogicMark LLC. From 2008 to 2013, he was a Director of Legal & General Investment Management America, Inc. From 2004 to 2007, he was Chief Executive Officer and President of Northern Trust Global Investments, and Executive Vice President of Quantitative Management & Securities Lending from 2000 to 2004. He also formerly served on the Board of the Northern Trust Mutual Funds. He joined Northern Trust in 1994 after serving as Managing Director and Head of Global Securities Lending at Bankers Trust (1986 to 1994) and Head of Government Trading and Cash Collateral Investment at Northern Trust from 1982 to 1986. He currently serves on the Board of Fulcrum IT Service LLC (since 2010), Quality Control Corporation (since 2012) and Catalyst Schools of Chicago. He is on the Mather Foundation Board (since 2012) and is the Chair of its Investment Committee. Mr. Toth graduated with a Bachelor of Science degree from the University of Illinois, and received his M.B.A. from New York University. In 2005, he graduated from the CEO Perspectives Program at Northwestern University.

Margaret L. Wolff. Ms. Wolff retired from Skadden, Arps, Slate, Meagher & Flom LLP in 2014 after more than 30 years of providing client service in the Mergers & Acquisitions Group. During her legal career, Ms. Wolff devoted significant time to advising boards and senior management on U.S. and international corporate, securities, regulatory and strategic matters, including governance, shareholder, fiduciary, operational and management issues. Since 2013, she has been a Board member of Travelers Insurance Company of Canada and The Dominion of Canada General Insurance Company (each of which is a part of Travelers Canada, the Canadian operation of The Travelers Companies, Inc.). Ms. Wolff has been a trustee of New York-Presbyterian Hospital since 2005 and, since 2004, she has served as a trustee of The John A. Hartford Foundation (a philanthropy dedicated to improving the care of older adults) where she currently is the Chair. From 2005 to 2015, she was a trustee of Mt. Holyoke College and served as Vice Chair of the Board from 2011 to 2015. Ms. Wolff received her Bachelor of Arts from Mt. Holyoke College and her Juris Doctor from Case Western Reserve University School of Law.

Independent Chairman

The Trustees have elected William J. Schneider as the independent Chairman of the Board. Specific responsibilities of the Chairman include (a) presiding at all meetings of the Board and of the Fund's shareholders; (b) seeing that all orders and resolutions of the trustees are carried into effect; and (c) maintaining records of and, whenever necessary, certifying all proceedings of the trustees and the shareholders.

Class I Trustees will serve until the annual meeting of shareholders in 2019; Class II Trustees will serve until the annual meeting of shareholders in 2017; and Class III Trustees will serve until the annual meeting of shareholders in 2018. As each Trustee's term expires, shareholders will be asked to elect trustees and such trustees shall be elected for a term expiring at the time of the third succeeding annual meeting subsequent to their election or thereafter in each case when their respective successors are duly elected and qualified. These provisions could delay for up to two years the replacement of a majority of the Board. See Certain Provisions in the Declaration of Trust and By-Laws in the Prospectus.

COMPENSATION

The following table shows, for each independent trustee, (1) the aggregate compensation paid to each Trustee by the Fund for its fiscal year ended July 31, 2016, (2) the amount of total compensation paid to each Trustee by the Fund that has been deferred and (3) the total compensation paid to each Trustee by the Nuveen Funds during the calendar year ended December 31, 2016. The Fund does not have a retirement or pension plan. The officers and trustees affiliated with Nuveen Investments serve without any compensation from the Fund. Certain of the Nuveen Funds have a deferred compensation plan (the Compensation Plan) that permits any trustee who is not an interested person of certain funds to elect to defer receipt of all or a portion of his or her compensation as a trustee. The deferred compensation of a participating trustee is credited to the book reserve account of a fund when the compensation would otherwise have been paid to the trustee. The value of the trustee's deferral account at any time is equal to the value that the account would have had if contributions to the account had been invested and reinvested in shares of one or more of the eligible Nuveen Funds. At the time for commencing distributions from a trustee's deferral account, the trustee may elect to receive distributions in a lump sum or over a period of five years. The Fund will not be liable for any other fund's obligations to make distributions under the Compensation Plan.

	Aggregate Compensation from Fund ⁽¹⁾	Amount of Total Compensation From the Fund That Has Been Deferred ⁽²⁾	Total Compensation from Fund and Fund Complex ⁽³⁾
Jack B. Evans	\$ 760	\$ 80	\$ 354,312
William C. Hunter	728		332,500
David J. Kundert	753	753	354,764
Albin F. Moschner ⁽⁴⁾			70,000
John K. Nelson	751		350,375
William J. Schneider	987	987	393,412
Judith M. Stockdale	800	151	327,644
Carole E. Stone	759	389	346,482
Terence J. Toth	754	161	349,767
Margaret L. Wolff ⁽⁵⁾	271	93	205,819

(1) The compensation paid, including deferred amounts, to the independent trustees for the fiscal year ended July 31, 2016 for services to the Fund.

(2) Pursuant to a deferred compensation agreement with certain of the Nuveen Funds, deferred amounts are treated as though an equivalent dollar amount has been invested in shares of one or more eligible Nuveen Funds. Total deferred fees for the Fund (including the return from the assumed investment in the eligible Nuveen Funds) payable are stated above.

(3) Based on the compensation paid (including any amounts deferred) for the calendar year ended December 31, 2016 for services to the Nuveen open-end and closed-end funds. Because the funds in the Fund Complex have different fiscal year ends, the amounts shown in this column are presented on a calendar year basis.

(4) Mr. Moschner was appointed to the Board effective July 1, 2016.

(5) Ms. Wolff was appointed to the Board effective February 15, 2016.

Effective January 1, 2017, Independent trustees receive a \$170,500 annual retainer, increased from \$177,000 as of January 1, 2016, plus (a) a fee of \$5,750 per day, which is increased from \$5,500 per day as of January 1, 2016, for attendance in person or by telephone at regularly scheduled Meetings of the Board; (b) a fee of \$3,000 per meeting for attendance in person or by telephone at special, nonregularly scheduled Board meetings where in-person attendance is required and \$2,000 per meeting for attendance by telephone or in person at such meetings where in-person attendance is not required; (c) a fee of \$2,500 per meeting for attendance in-person or by telephone at Audit Committee meetings where in-person attendance is required and \$2,000 per meeting for attendance by telephone or in person at such meetings where in-person attendance is not required; (d) a fee of \$2,500 per meeting for attendance in person or by telephone at Compliance, Risk Management and Regulatory Oversight Committee meetings where in-person attendance is required and \$2,000 per meeting for attendance by telephone or in person at such meetings where in-person attendance is not required; (e) a fee of \$1,000 per meeting for attendance in person or by telephone at Dividend Committee meetings; (f) a fee of \$500 per meeting for attendance in person or by telephone at all other committee meetings (\$1,000 for shareholder meetings) where in-person attendance is required and \$250 per meeting for attendance by telephone or in-person at such committee meetings (excluding shareholder meetings) where in-person attendance is not required and \$100 per meeting when the Executive Committee acts as pricing committee for IPOs, plus, in each case, expenses incurred in attending such meetings, provided that no fees are received for meetings held on days on which regularly scheduled Board meetings are held and (g) a fee of \$2,500 per meeting for attendance in person or by telephone at Closed-End Funds Committee meetings where in-person attendance is required and \$2,000 per meeting for attendance by telephone or in person at such meetings where in-person attendance is not required; provided that no fees are received for meetings held on days on which regularly scheduled Board meetings are held. In addition to the payments described above, the Chairman of the Board receives \$80,000, the chairpersons of the Audit Committee, the Dividend Committee, the Compliance, Risk Management and Regulatory Oversight Committee and the Closed-End Funds Committee receive \$12,500 each and the chairperson of the Nominating and Governance Committee receives \$5,000 as additional retainers. Independent trustees also receive a fee of \$3,000 per day for site visits to entities that provide services to the Nuveen Funds on days on which no Board Meeting is held. When ad hoc committees are organized, the Nominating and Governance Committee will at the time of formation determine compensation to be paid to the members of such committee; however, in general, such fees will be \$1,000 per meeting for attendance in person or by telephone at ad hoc committee meetings where in-person attendance is required and \$500 per meeting for attendance by telephone or in person at such meetings where in-person attendance is not required. The annual retainer, fees and expenses are allocated among the Nuveen Funds on the basis of relative net assets, although management may, in its discretion, establish a minimum amount to be allocated to each fund. In certain instances fees and expenses will be allocated only to those Nuveen Funds that are discussed at a given meeting.

The Fund has no employees. The officers of the Fund and the trustees of the Fund who are not independent trustees serve without any compensation from the Fund.

SHARE OWNERSHIP

The following table sets forth the dollar range of equity securities beneficially owned by each Trustee as of December 31, 2016:

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
William Adams IV	None	Over \$100,000
Margo L. Cook	None	Over \$100,000
Jack B. Evans	None	Over \$100,000
William C. Hunter	None	Over \$100,000
David J. Kundert	None	Over \$100,000
Albin F. Moschner	None	None
John K. Nelson	None	Over \$100,000
William J. Schneider	None	Over \$100,000
Judith M. Stockdale	None	Over \$100,000
Carole E. Stone	None	Over \$100,000
Terence J. Toth	None	Over \$100,000
Margaret L. Wolff	None	\$50,000-\$100,000

As of December 31, 2016, the officers and Trustees as a group beneficially owned less than 1% of the any class of the Fund's outstanding securities. As of February 1, 2017, none of the disinterested Trustees or their immediate family members owned, beneficially, or of record, any securities in (i) an investment adviser or principal underwriter of the Fund or (ii) a person (other than a registered investment company) directly or indirectly controlling, controlled by, or under common control with an investment adviser or principal underwriter of the Fund.

5% Shareholders

The following table sets forth the percentage ownership of each person who, as of December 31, 2016, owned of record, or is known by the Fund to own of record beneficially, 5% or more of any class of the Fund's equity securities:

Name of Equity Security	Name and Address of Owner	% of Record Ownership
Common Stock	First Trust Portfolios L.P.	19.14%
	First Trust Advisors L.P.	
	The Charger Corporation	
	120 East Liberty Drive, Suite 400	
	Wheaton, Illinois 60187	

* The information contained in this table is based on Schedule 13G filings made January 11, 2017.

INVESTMENT ADVISER, SUB-ADVISER AND PORTFOLIO MANAGERS

Investment Adviser. Nuveen Fund Advisors, LLC, the Fund's investment adviser, is responsible for overseeing the Fund's overall investment strategy and its implementation. NFALLC offers advisory and investment management services to a broad range of investment company clients. NFALLC has overall responsibility for management of the Fund, oversees the management of the Fund's portfolio, manages the Fund's business affairs and provides certain clerical, bookkeeping and other administrative services. NFALLC is located at 333 West Wacker Drive, Chicago, Illinois 60606. NFALLC is an indirect subsidiary of Nuveen, LLC (Nuveen), the investment management arm of Teachers Insurance and Annuity Association of America (TIAA). TIAA is a life insurance company founded in 1918 by the Carnegie Foundation for the Advancement of Teaching and is the companion organization of College Retirement Equities Fund. As of December 31, 2016, Nuveen managed approximately \$882 billion in assets, of which approximately \$126 billion was managed by NFALLC.

Investment Management Agreement and Related Fees. Pursuant to an investment management agreement between NFALLC and the Fund (the Investment Management Agreement), the Fund has agreed to pay an annual management fee for the overall advisory and administrative services and general office facilities provided by NFALLC. The Fund's management fee is separated into two components—a complex-level component, based on the aggregate amount of all fund assets managed by NFALLC, and a specific fund-level component, based only on the amount of assets within the Fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by NFALLC.

Fund-Level Fee.

Through July 31, 2016, the annual fund-level fee for the Fund, payable monthly, is calculated according to the following schedule:

Average Daily Managed Assets ⁽¹⁾	Fund-Level Fee Rate
For the first \$500 million	0.6500%
For the next \$500 million	0.6375%
For the next \$500 million	0.6250%
For the next \$500 million	0.6125%
For managed assets over \$2 billion	0.6000%

Effective August 1, 2016, the annual fund-level fee for the Fund, payable monthly, is calculated according to the following schedule:

Average Daily Managed Assets ⁽¹⁾	Fund-Level Fee Rate
For the first \$500 million	0.6500%
For the next \$500 million	0.6250%
For the next \$500 million	0.6000%
For the next \$500 million	0.5750%
For managed assets over \$2 billion	0.5500%

Complex-Level Fee. The annual complex-level fee for the Fund, payable monthly, is calculated according to the following schedule:

Complex-Level Managed Asset Breakpoint Level ⁽²⁾	Effective Rate at Breakpoint Level
\$55 billion	0.2000%
\$56 billion	0.1996%
\$57 billion	0.1989%
\$60 billion	0.1961%
\$63 billion	0.1931%
\$66 billion	0.1900%
\$71 billion	0.1851%
\$76 billion	0.1806%
\$80 billion	0.1773%
\$91 billion	0.1691%
\$125 billion	0.1599%
\$200 billion	0.1505%
\$250 billion	0.1469%
\$300 billion	0.1445%

- (1) For the Fund, **Managed Assets** means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles), such as, but not limited to, the portion of assets in special purpose trusts of which the Fund owns the inverse floater certificates that has been effectively financed by the trust's issuance of floating rate certificates.
- (2) The complex-level fee is calculated based upon the aggregate daily eligible assets of all Nuveen Funds. Eligible assets do not include assets attributable to investments in other Nuveen Funds or assets in excess of a determined amount (originally \$2 billion) added to the Nuveen fund complex in connection with NFALLC's assumption of the management of the former First American Funds effective January 1, 2011. With respect to closed-end funds, eligible assets include assets managed by NFALLC that are attributable to certain types of leverage. For these purposes, leverage includes the use of preferred stock and borrowings and certain investments in the residual interest certificates in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by issuance of floating rate securities, subject to an agreement by NFALLC as to certain funds to limit the amount of such assets for determining eligible assets in certain circumstances. As of July 31, 2016, the complex-level fee rate for the Fund was 0.1610%.

The following table sets forth the management fee paid by the Fund to NFALLC for the last three fiscal years:

	Management Fee Net of Expense Reimbursement for the Fiscal Year Ended	Expense Reimbursement for the Fiscal Year Ended
Fiscal year ended July 31, 2014	\$ 2,323,137	\$
Fiscal year ended July 31, 2015	\$ 2,253,160	\$
Fiscal year ended July 31, 2016	\$ 2,197,363	\$

In addition to the fee of NFALLC, the Fund pays all other costs and expenses of its operations, including compensation of its directors (other than those affiliated with NFALLC and Symphony), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses of issuing preferred shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies and taxes, if any. All fees and expenses are accrued daily and deducted before payment of dividends to investors.

A discussion regarding the basis for the Board of Trustees' most recent decision to renew the Investment Management Agreement for the Fund may be found in the Fund's annual report to shareholders dated July 31 of each year.

Sub-Adviser. Symphony Asset Management, LLC, located at 555 California Street, Suite 2975, San Francisco, CA 94104, serves as the Fund's sub-adviser, pursuant to a sub-advisory agreement between NFALLC and Symphony (the Sub-Advisory Agreement). Symphony, a registered investment adviser, commenced operations in 1994 and had approximately \$12.36 billion in assets under management as of December 31, 2016. Symphony is an indirect wholly-owned subsidiary of Nuveen Investments. Symphony oversees day-to-day investment operations of the Fund. Pursuant to the Sub-Advisory Agreement, Symphony will be compensated for the services it provides to the Fund with a portion of the management fee NFALLC receives from the Fund. NFALLC and Symphony retain the right to reallocate investment advisory responsibilities and fees between themselves in the future.

Sub-Advisory Agreement and Related Fees. Pursuant to the Sub-Advisory Agreement, Symphony will receive from NFALLC a management fee equal to the portion specified below of the management fee payable by the Fund to NFALLC, payable on a monthly basis:

Average Daily Managed Assets	Percentage of Net Management Fee
Up to \$125 million	50.0%
\$125 million to \$150 million	47.5%
\$150 million to \$175 million	45.0%
\$175 million to \$200 million	42.5%
\$200 million and over	40.0%

The following table sets forth the management fee paid by NFALLC to Symphony for the last three fiscal years:

	Sub-advisory Fee Paid by NFALLC to
	Symphony
Fiscal year ended July 31, 2014	\$1,062,075
Fiscal year ended July 31, 2015	\$1,033,537
Fiscal year ended July 31, 2016	\$1,011,161

A discussion regarding the basis for the Board of Trustees' decision to renew the Sub-Advisory Agreement for the Fund is available in the Fund's annual report to shareholders dated July 31 of each year.

NFALLC and Symphony retain the right to reallocate investment advisory responsibilities and fees between themselves in the future.

Portfolio Managers. Unless otherwise indicated, the information below is provided as of the date of this SAI.

Portfolio Management. Gunther Stein (a Portfolio Manager) is Chief Investment Officer and Chief Executive Office at Symphony. Mr. Stein is responsible for leading Symphony's fixed-income and equity investments strategies and research and overseeing firm trading. Prior to joining Symphony in 1999, Mr. Stein was a high yield portfolio manager at Wells Fargo Bank, where he managed a high yield portfolio, was responsible for investing in public high yield bonds and bank loans and managed a team of credit analysts.

Scott Caraher (a Portfolio Manager) is a member of Symphony's fixed-income team and his responsibilities include portfolio management and trading for Symphony's bank loan strategies and credit and equity research for its fixed-income strategies. Prior to joining Symphony in 2002, Mr. Caraher was an Investment Banking Analyst in the industrial group at Deutsche Banc Alex Brown in New York.

Jenny Rhee (a Portfolio Manager) joined Symphony in 2001 and is currently responsible for trading and portfolio management of fixed-income securities. Prior to joining Symphony, Ms. Rhee was an analyst with Epoch Partners.

Other Accounts Managed. The Portfolio Managers also have responsibility for the day-to-day management of accounts other than the Fund. Information regarding these other accounts is set forth below.

Number of Other Accounts Managed and Assets by Account Type as of July 31, 2016

Name	Registered Investment Companies ¹		Other Pooled Accounts		Other Accounts	
	Number of Accounts	Total Assets	Number of Accounts	Total Assets	Number of Accounts	Total Assets
Gunther Stein	18	\$5.20 billion	37 ⁽¹⁾	\$8.45 billion ⁽¹⁾	12	\$1.02 billion
Scott Caraher	6	\$2.72 billion	4 ⁽²⁾	\$925 million	7	\$931 million
Jenny Rhee	3	\$678 million	1 ⁽²⁾	\$26 million ⁽²⁾	9	\$3.5 million

¹ For Other Pooled Accounts, 5 of Mr. Stein's accounts managed, totaling \$1.6 billion, are subject to performance based fees.

² For Other Pooled Accounts, 1 of Ms. Rhee's accounts managed, totaling \$819 million, are subject to performance based fees.

The Portfolio Managers are responsible for managing the Fund and other accounts, including separate accounts and unregistered funds.

As shown in the above table, the Portfolio Managers may manage accounts in addition to the Fund. The potential for conflicts of interest exists when a portfolio manager manages other accounts with similar investment objectives and strategies to the Fund (Similar Accounts). Potential conflicts may include, for example, conflicts between investment strategies and conflicts in the allocation of investment opportunities.

Responsibility for managing clients' portfolios is organized according to investment strategies. Generally, client portfolios with similar strategies are managed using the same objectives, approach and philosophy. Therefore, portfolio holdings, relative position sizes and sector exposures tend to be similar across similar portfolios which minimizes the potential for conflicts of interest.

Symphony may receive more compensation with respect to certain Similar Accounts than that received with respect to the Fund or may receive compensation based in part on the performance of certain Similar Accounts. This may create a potential conflict of interest for the Portfolio Manager by providing an incentive to favor these Similar Accounts when, for example, placing securities transactions. Potential conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities. Allocations of aggregated trades, particularly trade orders that were only partially completed due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest.

Compensation. Symphony investment professionals receive compensation based on three elements: fixed base salary, participation in a bonus pool and certain long-term incentives.

The fixed base salary is set at a level determined by Symphony and is reviewed periodically to ensure that it is competitive with base salaries paid by similar financial services companies for persons playing similar roles.

Each Portfolio Manager is also eligible to receive an annual bonus from a pool based on Symphony's aggregate asset-based and performance fees after all operating expenses. The level of this bonus to each individual portfolio manager is determined by senior management's assessment of the team's performance, and the individual's contribution to and performance on that team. Factors considered in that assessment include the total return and risk-adjusted total return pre-tax annual performance of the accounts for which the individual

serves as portfolio manager relative to any benchmarks established for those accounts; the individual's effectiveness in communicating investment performance to investors and/or their advisors; and the individual's contribution to the firm's overall investment process and to the execution of investment strategies.

Finally, certain key employees of Symphony, including the Portfolio Managers, have received profits interests in Symphony which entitle their holders to participate in the firm's growth over time.

Material Conflicts of Interest. The Portfolio Managers' simultaneous management of the Fund and the other accounts noted above may present actual or apparent conflicts of interest with respect to the allocation and aggregation of securities orders placed on behalf of the Fund and the other account. Symphony, however, believes that such potential conflicts are mitigated by the fact that Symphony has adopted several policies that address potential conflicts of interest, including trade execution and trade allocation policies that are designed to ensure (1) that portfolio management is seeking the best execution for portfolio securities under the circumstances, (2) fair and equitable allocation of investment opportunities among accounts over time and (3) compliance with applicable regulatory requirements. All accounts are to be treated in a non-preferential manner, such that allocations are not based upon account performance, fee structure or preference of the Portfolio Manager. In addition, Symphony's Compliance Manual and Code of Ethics includes policies regarding conflicts of interest.

Fund Shares Owned by Portfolio Managers. As of July 31, 2016, the Portfolio Managers beneficially owned (as determined pursuant to Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended (the "1934 Act")) shares of the Fund having values within the indicated dollar range.

Portfolio Managers	Dollar Range of Equity Securities Beneficially Owned in the Fund
Gunther Stein	None
Scott Caraher	\$100,001 - \$500,000
Jenny Rhee	\$10,001 - \$50,000

CODES OF ETHICS

The Fund, NFALLC, Symphony, Nuveen and other related entities have adopted codes of ethics that prohibit certain of their personnel, including the Fund's Portfolio Managers, from engaging in personal investments that compete or interfere with, or attempt to take advantage of a client's, including the Fund's, anticipated or actual portfolio transactions, and are designed to assure that the interests of clients, including Fund shareholders, are placed before the interests of personnel in connection with personal investment transactions. Personnel subject to the Code of Ethics may purchase shares of the Fund and may generally invest in securities in which the Fund may also invest subject to the restrictions set forth in the Code. Text-only versions of the codes of ethics of the Fund, NFALLC, Symphony and Nuveen Securities can be viewed online or downloaded from the EDGAR Database on the SEC's internet web site at www.sec.gov. You may also review and copy those documents by visiting the SEC's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 202-942-8090. In addition, copies of those codes of ethics may be obtained, after mailing the appropriate duplicating fee, by writing to the SEC's Public Reference Section, 100 F Street, N.E., Washington, D.C. 20549 or by e-mail request at publicinfo@sec.gov.

PROXY VOTING POLICIES

The Fund is responsible for voting proxies on securities held in its portfolio. When the Fund receives a proxy, the decision regarding how to vote such proxy will be made by Symphony in accordance with Symphony's proxy voting procedures.

The Fund has granted to Symphony the authority to vote proxies on its behalf. A senior member of Symphony is responsible for oversight of the Fund's proxy voting process. Symphony has engaged the services of Institutional Shareholder Services, Inc. (ISS) to make recommendations to Symphony on the voting of proxies relating to securities held by the Fund. ISS provides voting recommendations based upon established guidelines and practices. Symphony reviews ISS recommendations and frequently follows the ISS recommendations. However, on selected issues, Symphony may not vote in accordance with the ISS recommendations when it believes that specific ISS recommendations are not in the best economic interest of the Fund. If Symphony manages the assets of a company or its pension plan and any of Symphony's clients hold any securities of that company, Symphony will vote proxies relating to such company's securities in accordance with the ISS recommendations to avoid any conflict of interest. If a client requests Symphony to follow specific voting guidelines or additional guidelines, Symphony will review the request and inform the client only if Symphony is not able to follow the client's request.

Symphony has adopted the ISS Proxy Voting Guidelines. While these guidelines are not intended to be all-inclusive, they do provide guidance on Symphony's general voting policies. When required by applicable regulations, information regarding how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 will be available without charge by calling (800) 257-8787 or from the Fund's website at <http://www.nuveen.com>, and on the SEC's website at <http://www.sec.gov>.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to the supervision of the Board, Symphony is responsible for decisions to purchase and sell securities for the Fund, the negotiation of the prices to be paid and the allocation of transactions among various dealer firms. Transactions on stock exchanges involve the payment by the Fund of brokerage commissions. There generally is no stated commission in the case of securities traded in the over-the-counter (OTC) market but the price paid by the Fund usually includes an undisclosed dealer commission or mark-up. Transactions in the OTC market can also be placed with broker-dealers who act as agents and charge brokerage commissions for effecting OTC transactions. The Fund may place its OTC transactions either directly with principal market makers, or with broker-dealers if that is consistent with Symphony's obligation to obtain best qualitative execution. In certain instances, the Fund may make purchases of underwritten issues at prices that include underwriting fees.

Portfolio securities may be purchased directly from an underwriter or in the OTC market from the principal dealers in such securities, unless it appears that a better price or execution may be obtained through other means. Portfolio securities will not be purchased from Nuveen Investments or its affiliates or affiliates of NFALLC except in compliance with the 1940 Act. With respect to interests in Senior Loans, the Fund generally will engage in privately negotiated transactions for purchase or sale in which Symphony will negotiate on behalf of the Fund, although a more developed market may exist for many Senior Loans. The Fund may be required to pay fees, or forgo a portion of interest and any fees payable to the Fund, to the lender selling participations or assignments to the Fund. Symphony will determine the lenders from whom the Fund will purchase assignments and participations by considering their professional ability, level of service, relationship with the Borrower, financial condition, credit standards and quality of management. See "Risk Factors" in the Prospectus.

It is the policy of Symphony to seek the best execution under the circumstances of each trade. Symphony will evaluate price as the primary consideration, with the financial condition, reputation and responsiveness of the dealer considered secondary in determining best execution. Given the best execution obtainable, it will be Symphony's practice to select dealers which, in addition, furnish research information (primarily credit analyses of issuers and general economic reports) and statistical and other services to Symphony. It is not possible to place a dollar value on information and statistical and other services received from dealers. Since it is only supplementary to Symphony's own research efforts, the receipt of research information is not expected to reduce significantly Symphony's expenses. While Symphony will be primarily responsible for the placement of the business of the Fund, the policies and practices of Symphony in this regard must be consistent with the foregoing and will, at all times, be subject to review by the Board.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 497

Symphony may manage other investment accounts and investment companies for other clients that may invest in the same types of securities as the Fund and which may have investment objectives similar to those of the Fund. Symphony seeks to allocate portfolio transactions equitably whenever concurrent decisions are made to purchase or sell assets or securities by the Fund and another advisory account. If an aggregated order cannot be filled completely, allocations will generally be made on a pro rata basis. An order may not be allocated on a pro rata basis where, for example (i) consideration is given to portfolio managers who have been instrumental in developing or negotiating a particular investment; (ii) consideration is given to an account with specialized investment policies that coincide with the particulars of a specific investment; (iii) pro rata allocation would result in odd-lot or *de minimis* amounts being allocated to a portfolio or other client; or (iv) where NFALLC reasonably determines that departure from a pro rata allocation is advisable. There may also be instances where the Fund will not participate at all in a transaction that is allocated among other accounts. While these allocation procedures could have a detrimental effect on the price or amount of the securities available to the Fund from time to time, it is the opinion of the Board that the benefits available from Symphony's management outweigh any disadvantage that may arise from Symphony's larger management activities and its need to allocate securities.

Substantially all of the Fund's trades are effected on a principal basis. The following table sets forth the aggregate amount of brokerage commissions paid by the Fund for the last three fiscal years:

Fiscal Year Ended	Brokerage Commissions Paid
Fiscal year ended July 31, 2014	\$
Fiscal year ended July 31, 2015	\$
Fiscal year ended July 31, 2016	\$

During the fiscal year ended July 31, 2016, the Fund did not pay commissions to brokers in return for research services.

The Fund has acquired during the fiscal year ended July 31, 2016 the securities of its regular brokers or dealers as defined in Rule 10b-1 under the 1940 Act or of the parents of the brokers or dealers. The following table sets forth those brokers or dealers and states the value of the Fund's aggregate holdings of the securities of each issuer as of close of the fiscal year ended July 31, 2016:

Fund	Broker/Dealer	Issuer	Aggregate Fund Holdings of Broker/Dealer or Parent (as of July 31, 2016)
Nuveen Short Duration Credit Opportunities Fund	State Street Bank and Trust Company	Fixed Income Clearing Corporation, Repurchase Agreement	\$ 7,550,711
		Citibank, Credit Default Swap	(15,592)*
	Goldman Sachs	Goldman Sachs, Credit Default Swap	(64,316)*
		JPMorgan, Credit Default Swap	(31,186)*
	JPMorgan	JPMorgan, Credit Default Swap	(47,171)*
Morgan Stanley	Morgan Stanley, Interest	(371,936)*

NET ASSET VALUE

The Fund's net asset value per share is determined as of the close of regular session trading (normally 4:00 p.m., Eastern Time) on each day the New York Stock Exchange (the NYSE) is open for business. Net asset value is calculated by taking the fair value of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share. All valuations are subject to review by the Fund's Board or its delegate, Symphony.

In determining net asset value, expenses are accrued and applied daily, and securities and other assets for which market quotations are available are valued daily at market value. The prices of fixed income securities are provided by a pricing service and are based on the mean between the bid and asked price. When price quotes are not readily available, the pricing service establishes a security's fair value based on various factors, including prices of comparable fixed income securities utilizing a matrix pricing system. Due to the subjective and variable nature of fair value pricing, it is possible that the fair value determined for a particular security may be different from the value realized upon the sale of the security.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Board or its delegate at fair value. These securities generally include but are not limited to, restricted securities (securities that may not be publicly sold without registration under the Securities Act) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of net asset value; a security with respect to which an event has occurred that is likely to make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's fair value. As a general principle, the current fair value of a security would be the amount that the owner might reasonably expect to receive for it upon its current sale. A variety of factors may be considered in determining the fair value of such securities.

DISTRIBUTIONS

The Fund pays regular monthly distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) that reflects the past and projected performance of the Fund. Distributions can only be made from net investment income after paying any accrued dividends to preferred shareholders, if any, and interest and required principal payments on borrowings.

To permit the Fund to maintain a more stable monthly distribution, the Fund may from time to time distribute less than the entire amount of net investment income earned in a particular period. Such undistributed net investment income would be available to supplement future distributions, including distributions that might otherwise have been reduced by a decrease in the Fund's monthly net income due to fluctuations in investment income or expenses, an increase in interest payments on borrowings or due to an increase in the dividend rate on the Fund's outstanding preferred shares, if issued in the future. As a result, the distributions paid by the Fund for any particular period may be more or less than the amount of net investment income actually earned by the Fund during such period. However, the Fund intends to maintain distributions of net investment income for any period in amounts sufficient to continue to qualify under Subchapter M of the Code for treatment as a regulated investment company (as explained more fully below in Tax Matters). Undistributed net investment income will be added to the Fund's net asset value and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's net asset value. However, if the Fund does not distribute all of its net investment income for a taxable year, it will be subject to tax at regular corporate rates and potentially subject to

a 4% excise tax on the amount retained amount. Unlike retained capital gains (discussed below) Common Shareholders will not be entitled to an income tax credit or refund for their shares of taxes paid by the Fund.

As explained more fully below in Tax Matters, the Fund might not distribute to Common Shareholders all or a portion of any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) for a taxable year. If the Fund does not distribute all of its net capital gain for a taxable year, it will pay U.S. federal income tax on the retained gain. Each Common Shareholder of record as of the end of the Fund's taxable year will include in income for federal income tax purposes, as long-term capital gain, his or her share of the retained gain, will be deemed to have paid his or her proportionate share of the tax paid by the Fund on such retained gain, and will be entitled to an income tax credit or refund for that share of the tax. The Fund may treat retained capital gains as a substitute for equivalent cash distributions. While not currently anticipated, if the Fund makes total distributions during a given calendar year in an amount that exceeds the Fund's net investment income and net realized long-term capital gains for the calendar year, the excess will generally be treated by Common Shareholders as a return of capital for tax purposes.

For tax purposes, the Fund is currently required to allocate net capital gain and other taxable income, if any, between Common Shares and preferred shares, if preferred shares are issued in the future, in proportion to total dividends paid to each class for the year in which such net capital gain or other taxable income is realized. For information relating to the impact of the issuance of preferred shares on the distributions made by the Fund to Common Shareholders, see the Fund's Prospectus under Use of Leverage.

If preferred shares are outstanding, the Fund may not declare any cash dividend or other distribution on its Common Shares unless at the time of such declaration (1) all accumulated dividends on the preferred shares have been paid, (2) all interest and required principal on borrowings has been paid, (3) the net asset value of the Fund's portfolio (determined after deducting the amount of such dividend or other distribution) is at least 200% of the liquidation value of any outstanding preferred shares and (4) the net asset value of the Fund's portfolio (determined after deducting the amount of such dividend or other distribution) is at least 300% of the value of the Fund's borrowings. These limitations on the Fund's ability to make distributions on its Common Shares could under certain circumstances impair the ability of the Fund to maintain its qualification for treatment as a regulated investment company.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time, subject to a finding by the Fund's Board that such change is in the best interests of the Fund and its Common Shareholders.

DIVIDEND REINVESTMENT PLAN

If your Common Shares are registered directly with the Fund or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the Plan), you may elect to have all dividends, including any capital gain dividends, on your Common Shares automatically reinvested by the Plan Agent (defined below) in additional Common Shares under the Plan. You may elect to participate in the Plan by contacting Nuveen Investor Services at (800) 257-8787. If you do not participate, you will receive all distributions in cash paid by check mailed directly to you or your brokerage firm by State Street Bank and Trust Company as dividend paying agent (the Plan Agent).

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If Common Shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then current market price;

- (2) If Common Shares are trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the NYSE or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments; or
- (3) If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions and a \$2.50 service fee.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Upon a repurchase of your shares, the Fund (or its administrative agent) may be required to report to the Internal Revenue Service (IRS) and furnish to you cost basis and holding period information for Fund shares that you purchased on or after January 1, 2012 (covered shares).

For shares of the Fund held in the Plan, you are permitted to elect from among several permitted cost basis methods. In the absence of an election, the Plan will use first-in first-out (FIFO) methodology for tracking and reporting your cost basis on covered shares as its default cost basis method. The cost basis method you use may not be changed with respect to a repurchase of shares after the settlement date of repurchase. You should consult with your tax advisors to determine the best permitted cost basis method for your tax situation and to obtain more information about how the cost basis reporting rules apply to you.

Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from State Street Bank and Trust Company, Attn: ComputerShare Nuveen Investments, P.O. Box 43071, Providence, Rhode Island 02940-3071, (800) 257-8787.

PLAN OF DISTRIBUTION

The Fund may sell the Common Shares offered under this SAI through

at-the-market transactions;

underwriting syndicates; and

privately negotiated transactions.

The Fund will bear the costs of the offering, including but not limited to, the expense of preparing the Prospectus and this SAI for an offering, and the expense of counsel, auditors and others in connection with the offering.

Distribution Through At-The-Market Transactions

The Fund has entered into a distribution agreement with Nuveen Securities (the Distribution Agreement), which has been filed as an exhibit to the Registration Statement of which this SAI is a part. The summary of the Distribution Agreement contained herein is qualified by reference to the Distribution Agreement. Subject to the terms and conditions of the Distribution Agreement, the Fund may from time to time issue and sell its Common Shares through Nuveen Securities to certain broker-dealers which have entered into selected dealer agreements with Nuveen Securities. Currently, Nuveen Securities has entered into a selected dealer agreement with UBS Securities LLC (UBS) pursuant to which UBS will be acting as Nuveen Securities' sub-placement agent with respect to at-the-market offerings of Common Shares. The selected dealer agreement has been filed as an exhibit to the Registration Statement of which this SAI forms a part. The summary of the selected dealer agreement contained herein is qualified by reference to the selected dealer agreement.

Common Shares will only be sold on such days as shall be agreed to by the Fund and Nuveen Securities. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current NAV per Common Share plus the per share amount of the commission to be paid to Nuveen Securities. The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen Securities with respect to sales of the Common Shares at a commission rate of up to 1.0% of the gross proceeds of the sale of Common Shares. Nuveen Securities will compensate broker-dealers participating in the offering at a rate of up to 0.8% of the gross proceeds of the sale of Common Shares sold by that broker-dealer. Settlements of sales of Common Shares will occur on the third business day following the date on which any such sales are made.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen Securities may be deemed to be an underwriter within the meaning of the Securities Act, and the compensation of Nuveen Securities may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, Nuveen Securities will act as underwriter on a reasonable efforts basis.

The offering of Common Shares pursuant to the Distribution Agreement will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Distribution Agreement. The Fund and Nuveen Securities each have the right to terminate the Distribution Agreement in its discretion at any time.

The Fund currently intends to distribute the shares offered pursuant to this SAI primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this SAI describing such transactions.

As of March 1, 2017, the Fund has sold an aggregate of 36,711 Common Shares, representing net proceeds to the Fund of \$731,376, after payment of commissions of \$7,388 in the aggregate.

The Fund's closing price on the NYSE on March 1, 2017 was \$18.40.

Distribution Through Underwriting Syndicates

The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, underwriters will market and price the offering on an expedited basis, *e.g.*, in an overnight or similarly abbreviated offering period. The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen Securities, one of the Fund's underwriters, and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 2% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen Securities in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 91% of the closing market price of the Fund's Common Shares on the day prior to the offering date.

Privately Negotiated Transactions

The Fund, through Nuveen Securities, may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters, as defined in the Securities Act, for any resale of the Common Shares.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the person seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the NAV per Common Share or (ii) at a discount ranging from 0% to 5% of the average of the daily market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis.

The principal business address of Nuveen Securities is 333 West Wacker Drive, Chicago, Illinois 60606.

DESCRIPTION OF SHARES AND DEBT

COMMON SHARES

The Declaration of Trust (the Declaration) authorizes the issuance of an unlimited number of Common Shares. The Common Shares being offered have a par value of \$0.01 per share and, subject to the rights of holders of preferred shares, if issued, and borrowings, if incurred, have equal rights to the payment of dividends and the distribution of assets upon liquidation. The Common Shares being offered will, when issued, be fully paid and, subject to matters discussed in Certain Provisions in the Declaration of Trust, non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. Each whole Common Share has one vote with respect to matters upon which a shareholder vote is required, and each fractional share shall be entitled to a proportional fractional vote consistent with the requirements of the 1940 Act and the rules promulgated thereunder, and will vote together as a single class. Whenever the Fund incurs borrowings and/or preferred shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all interest on such borrowings has been paid and all accrued dividends on preferred shares have been paid, unless asset coverage (as defined in the 1940 Act) with respect to any borrowings would be at least 300% after giving effect to the distributions and asset coverage (as defined in the 1940 Act) with respect to preferred shares would be at least 200% after giving effect to the distributions. See Preferred Shares below.

The Common Shares are listed on the NYSE and trade under the ticker symbol JSD. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing. The Fund will not issue share certificates.

Unlike open-end funds, closed-end funds like the Fund do not provide daily redemptions. Rather, if a shareholder determines to buy additional Common Shares or sell shares already held, the shareholder may conveniently do so by trading on the exchange through a broker or otherwise. Shares of closed-end investment companies may frequently trade on an exchange at prices lower than net asset value. Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value.

Because the market value of the Common Shares may be influenced by such factors as distribution levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, net asset value, relative demand for and supply of such shares in the market, general market and economic conditions, and other factors beyond the control of the Fund, the Fund cannot assure you that Common Shares will trade at a price equal to or higher than net asset value in the future. The Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See Repurchase of Fund Shares; Conversion to Open-End Fund.

BORROWINGS

The Declaration authorizes the Fund, without approval of the Shareholders, to borrow money. In this connection, the Fund may issue notes or other evidence of indebtedness (including bank borrowings or commercial paper) and may secure any such Borrowings by mortgaging, pledging or otherwise subjecting as security the Fund's assets. The Fund borrows money at rates generally available to institutional investors. In connection with such Borrowings, the Fund is required to maintain minimum average balances with the lender or to pay a commitment or other fee to maintain the line of credit. These requirements increase the cost of any such Borrowings over the stated interest rate. Under the requirements of the 1940 Act, the Fund, immediately after any such Borrowings, must have an asset coverage of at least 300%. With respect to any such Borrowings, asset coverage means the ratio that the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of such Borrowings represented by senior securities issued by the Fund. Under the Credit Agreement, the Fund is subject to covenants relating to asset coverages, portfolio coverages and otherwise. In particular, the Fund may not make a

redemption payment with respect to the TP Shares, in the event that Asset Coverage is less than 225%. Notwithstanding the requirements of the 1940 Act, under the Credit Agreement, the Fund may not be permitted to redeem TP Shares unless at such time, the Fund meets certain asset coverage and borrowing base requirements and no event of default or other circumstance exists under the Credit Agreement that would limit or otherwise block payments in redemption.

Under the Credit Agreement, the Fund cannot make any redemption or dividend payment on the TP Shares if immediately after giving effect to such payment the Fund will have less than 263% asset coverage with respect to senior securities representing indebtedness. Furthermore, the Fund must (i) have 300% asset coverage with respect to senior securities representing indebtedness, and (ii) meet certain borrowing base tests as a condition precedent to borrowing under the Credit Agreement. If the Fund fails to have asset coverage of at least 263% as of the close of business on any Business Day on which asset coverage is required to be calculated, the Fund must use available funds to prepay Borrowings on such date, and if it is unable, no later than the close of business on the fifth Business Day (as defined below) following such event, prepay any Borrowings, in each case such that the Fund regains asset coverage with respect to senior securities representing indebtedness of at least 300%. In addition, as with the issuance of preferred shares, certain types of Borrowings may result in the Fund being subject to certain restrictions imposed by guidelines of one or more rating agencies that may issue ratings for commercial paper or notes issued by the Fund. Such restrictions may be more stringent than those imposed by the 1940 Act.

The rights of lenders, including Citibank, to the Fund to receive interest on and repayment of principal of any such Borrowings is senior to those of the Shareholders, and the terms of these Borrowings contain provisions which limit certain activities of the Fund, including the payment of dividends to Shareholders in certain circumstances. Further, the 1940 Act does (in certain circumstances) grant to the lenders to the Fund certain voting rights in the event of default in the payment of interest on or repayment of principal. In the event that such provisions would impair the Fund's eligibility for treatment as a regulated investment company under the Code, the Fund will attempt to repay or restructure the Borrowings to preserve that eligibility. Borrowings, including the Credit Agreement, are ranked senior or equal to all other existing and future borrowings of the Fund. The Fund may also borrow up to an additional 5% of its total assets for temporary purposes. The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency situations. See *Investment Restrictions* in this SAI.

PREFERRED SHARES

The Declaration authorizes the issuance of an unlimited number of preferred shares in one or more classes or series, with rights as determined by the Board of Trustees, by action of the Board of Trustees without the approval of the Common Shareholders. The terms of any preferred shares that may be issued by the Fund may be the same as, or different from, the terms described below, subject to applicable law and the Declaration.

Limited Issuance of Preferred Shares. Under the 1940 Act, the Fund could issue preferred shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, including any liabilities associated with borrowings, measured immediately after issuance of the preferred shares. Liquidation value means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the preferred shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution.

Distribution Preference. Any preferred shares would have complete priority over the Common Shares as to distribution of assets.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of preferred shares, if issued in the future, would be entitled to receive a

preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to Common Shareholders. After payment of the full amount of the liquidating distribution to which they are entitled, holders of preferred shares will not be entitled to any further participation in any distribution of assets by the Fund. A consolidation or merger of the Fund with or into any Massachusetts business trust or corporation or a sale of all or substantially all of the assets of the Fund shall not be deemed to be a liquidation, dissolution or winding up of the Fund.

Voting Rights. Preferred shares are required to be voting shares and to have equal voting rights with Common Shares. Except as otherwise indicated in this SAI and except as otherwise required by applicable law, holders of preferred shares, if issued in the future, would vote together with Common Shareholders as a single class.

Holders of preferred shares, if issued in the future, voting as a separate class, would be entitled to elect two of the Fund's trustees (following the establishment of the Fund by an initial trustee, the Declaration provides for a total of no less than two and no more than 15 trustees). The remaining trustees would be elected by Common Shareholders and holders of preferred shares, if issued in the future, voting together as a single class. In the unlikely event that two full years of accrued dividends are unpaid on the preferred shares, if issued in the future, the holders of all outstanding preferred shares, if issued in the future, voting as a separate class, would be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment. In order for the Fund to take certain actions or enter into certain transactions, a separate class vote of holders of preferred shares, if issued in the future, would be required, in addition to the single class vote of the holders of preferred shares, if issued in the future, and Common Shares. See Certain Provisions in the Declaration of Trust.

Redemption, Purchase and Sale of Preferred Shares. The terms of the preferred shares, if issued in the future, would provide that they may be redeemed by the issuer at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends. Any redemption or purchase of preferred shares, if issued in the future, by the Fund will reduce the leverage applicable to Common Shares, while any issuance of shares by the Fund would increase such leverage.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and preferred shares, if issued in the future, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund, or (5) a removal of trustees by shareholders (except at the end of a trustee's term), and then only for cause, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative

vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-Laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and preferred shares, if issued in the future, outstanding at the time, voting together as a single class, is required; provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), only the required vote by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, if issued in the future, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's preferred shares, if issued in the future, outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-Laws, the affirmative vote of the holders of at least a majority of the Fund's preferred shares, if issued in the future, outstanding at the time, voting as a separate class. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and preferred shares, if issued in the future, voting together as a single class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, if issued in the future, are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders.

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objective and policies. The Board of Trustees is divided into three classes, such a staggered board could delay for up to two years the replacement of a majority of the Board of Trustees. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the SEC for the full text of these provisions.

The Declaration provides that the obligations of the Fund are not binding upon the trustees of the Fund individually, but only upon the assets and property of the Fund, and that the trustees shall not be liable for errors of judgment or mistakes of fact or law. Nothing in the Declaration, however, protects a trustee against any liability to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Fund's common shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), net asset value, call protection, price, dividend stability, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of a closed-end investment company may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of common shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion

of the Fund to an open-end investment company. There can be no assurance, however, that the Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers, if undertaken, will reduce market discount. On November 16, 2011, the Fund's Board of Trustees approved an open market share repurchase program under which the Fund may repurchase up to 10% of its Common Shares. As of January 31, 2017, the Fund has not repurchased any Common Shares under the program.

Notwithstanding the foregoing, at any time if the Fund has preferred shares outstanding, the Fund may not purchase, redeem or otherwise acquire any of its Common Shares unless (1) all accrued preferred shares dividends have been paid and (2) at the time of such purchase, redemption or acquisition, the net asset value of the Fund's portfolio (determined after deducting the acquisition price of the Common Shares) is at least 200% of the liquidation value of the outstanding preferred shares (expected to equal the original purchase price per share plus any accrued and unpaid dividends thereon). The staff of the SEC currently requires that any tender offer made by a closed-end investment company for its shares must be at a price equal to the net asset value of such shares at the close of business on the last day of the tender offer. Any service fees incurred in connection with any tender offer made by the Fund will be borne by the Fund and will not reduce the stated consideration to be paid to tendering shareholders.

Subject to its investment limitations, the Fund may borrow to finance the repurchase of shares or to make a tender offer. The Fund, however, is not currently contemplating any borrowing to finance the repurchase of shares or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board of Trustees would have to comply with the 1934 Act and the 1940 Act and the rules and regulations thereunder.

Although the decision to take action in response to a discount from net asset value will be made by the Fund's Board of the Fund at the time it considers such issue, it is the Board's present policy, which may be changed by the Board, not to authorize repurchases of common shares or a tender offer for such shares if (1) such transactions, if consummated, would (a) result in the delisting of the common shares from the NYSE, or (b) impair the Fund's eligibility for treatment as a regulated investment company under the Code or impair the Fund's status as a registered closed-end investment company under the 1940 Act; (2) the Fund would not be able to liquidate portfolio securities in an orderly manner and consistent with the Fund's investment objective and policies in order to repurchase shares; or (3) there is, in the Board's judgment, any (a) material legal action or proceeding instituted or threatened challenging such transactions or otherwise materially adversely affecting the Fund, (b) general suspension of or limitation on prices for trading securities on the NYSE, (c) declaration of a banking moratorium by Federal or state authorities or any suspension of payment by United States or state banks in which the Fund invests, (d) material limitation affecting the Fund or the issuers of its portfolio securities by federal or state authorities on the extension of credit by lending institutions or on the exchange of foreign currency, (e) commencement of war, armed hostilities or other international or national calamity directly or indirectly involving the United States, or (f) other event or condition which would have a material adverse effect (including any adverse tax effect) on the Fund or its shareholders if shares were repurchased. The Board of Trustees of the Fund may in the future modify these conditions in light of experience.

Conversion to an open-end company would require the approval of the holders of at least two-thirds of the Fund's common shares and preferred shares, if issued in the future, outstanding at the time, voting together as a single class, and of the holders of at least two-thirds of the Fund's preferred shares, if issued in the future, outstanding at the time, voting as a separate class, provided however, that such separate class vote shall be a majority vote if the action in question has previously been approved, adopted or authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or By-Laws. See the Prospectus under Certain Provisions in the Declaration of Trust for a discussion of voting requirements applicable to conversion of the Fund to an open-end company. If the Fund converted to an open-end company, it would be required to redeem all preferred shares then outstanding, and the Fund's common shares would no longer be listed on the NYSE. Shareholders of an open-end investment company may require the company to

redeem their shares on any business day (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less such redemption charge, if any, as might be in effect at the time of redemption. In order to avoid maintaining large cash positions or liquidating favorable investments to meet redemptions, open-end companies typically engage in a continuous offering of their shares. Open-end companies are thus subject to periodic asset in-flows and out-flows that can complicate portfolio management. The Fund's Board of Trustees of the Fund may at any time propose conversion of the Fund to an open-end company depending upon their judgment as to the advisability of such action in light of circumstances then prevailing.

The repurchase by the Fund of its shares at prices below net asset value would result in an increase in the net asset value of those shares that remain outstanding. However, there can be no assurance that share repurchases or tenders at or below net asset value would result in the Fund's shares trading at a price equal to their net asset value. Nevertheless, the fact that the Fund's shares may be the subject of repurchase or tender offers at net asset value from time to time, or that the Fund may be converted to an open-end company, may reduce any spread between market price and net asset value that might otherwise exist.

In addition, a purchase by the Fund of its common shares would decrease the Fund's total assets which would likely have the effect of increasing the Fund's expense ratio. Any purchase by the Fund of its common shares at a time when preferred shares are outstanding will increase the leverage applicable to the outstanding common shares then remaining.

Before deciding whether to take any action if the Fund's common shares trade below net asset value, the Board of the Fund would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Fund's Board may determine that, in the interest of the Fund and its shareholders, no action should be taken.

TAX MATTERS

The following is intended to be a general summary of certain U.S. federal income tax consequences of investing, holding and disposing of Common Shares of the Fund. It is not intended to be a complete discussion of all such federal income tax consequences, nor does it purport to deal with all categories of investors. **INVESTORS ARE THEREFORE ADVISED TO CONSULT WITH THEIR TAX ADVISORS BEFORE MAKING AN INVESTMENT IN THE FUND.**

Set forth below is a discussion of certain U.S. federal income tax issues concerning the Fund and the purchase, ownership and disposition of Fund shares. This discussion does not purport to be complete or to deal with all aspects of federal income taxation that may be relevant to shareholders in light of their particular circumstances. Unless otherwise noted, this discussion assumes you are a U.S. shareholder and that you hold your shares as a capital asset. This discussion is based upon present provisions of the Code, the regulations promulgated thereunder, and judicial and administrative ruling authorities, all of which are subject to change, which change may be retroactive. Prospective investors should consult their own tax advisers with regard to the federal tax consequences of the purchase, ownership, or disposition of Fund shares, as well as the tax consequences arising under the laws of any state, foreign country, or other taxing jurisdiction.

The Fund intends to qualify annually as a regulated investment company (a RIC) under the Code. To qualify for the favorable U.S. federal income tax treatment generally accorded to a RIC, the Fund must, among other things, (a) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to certain securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of investing in such stock, securities or currencies and net income derived from interests in qualified publicly traded partnerships; (b) diversify its holdings so that, at the end of each quarter of its taxable year, (i) at least 50% of the market value of the Fund's assets is

represented by cash and cash items (including receivables), U.S. Government securities, the securities of other RICs and other securities, with such other securities of any one issuer limited for the purposes of this calculation to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested, including through corporations in which the Fund owns a 20% or more voting stock interest, in the securities (other than U.S. Government securities or the securities of other RICs) of a single issuer, in the securities (other than securities of other RICs) of two or more issuers which the Fund controls and are engaged in the same, similar or related trades or businesses, or in the securities of one or more qualified publicly traded partnerships; and (c) distribute for each taxable year an amount at least equal to the sum of 90% of its investment company taxable income (determined without regard to the deduction for dividends paid) and 90% of its net tax exempt interest income.

The Fund might not distribute all of its net investment income, and the Fund is not required to distribute any portion of its net capital gain. If the Fund qualifies for treatment as a RIC but does not distribute all of its net capital gain and net investment income, it will be subject to tax at regular corporate rates on the amount retained. If the Fund retains any net capital gain, it may designate the retained amount of capital gain as undistributed capital gains in a notice to its shareholders who, if subject to federal income tax on long-term capital gains, (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount; (ii) will be deemed to have paid their proportionate shares of the tax paid by the Fund on such undistributed amount and will be entitled to credit that amount of tax against their federal income tax liabilities, if any; and (iii) will be entitled to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder.

As a RIC, the Fund generally will not be subject to U.S. federal income tax (which, includes dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses) on its investment company taxable income and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it timely distributes to shareholders. The Fund intends to distribute to its shareholders, at least annually, substantially all of its net investment income and net capital gain. Amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax. To prevent imposition of the excise tax, the Fund must distribute during each calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) at least 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed during those years. To prevent application of the excise tax, the Fund intends to make its distributions in accordance with the calendar year distribution requirement.

As of July 31, 2016, the Fund's tax year end, the Fund had unused capital loss carryforwards available for federal tax purposes to be applied against future capital gains, if any.

Not subject to expiration	\$ 2,361,607
---------------------------	--------------

Although dividends generally will be treated as distributed when paid, any dividend declared by the Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared. In addition, certain other distributions made after the close of a taxable year of the Fund may be spilled back and treated for certain purposes as paid by the Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a

RIC's undistributed income and gain subject to the 4% excise tax described above, such as spilled back dividends are treated as paid by the RIC when they are actually paid.

If the Fund fails to satisfy the qualifying income or diversification requirements in any taxable year, the Fund may be eligible for certain relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the diversification requirements where the Fund corrects the failure within a specified period. In order to be eligible for the relief provisions with respect to a failure to meet the diversification requirements, the Fund may be required to dispose of certain assets. If these relief provisions are not available to the Fund and it fails to qualify for treatment as a RIC for a taxable year, the Fund will be taxable at regular corporate tax rates (and, to the extent applicable, at corporate alternative minimum tax rates). In such an event, all distributions (including capital gains distributions) will be taxable as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits, subject to the dividends-received deduction for corporate shareholders and to the tax rates applicable to qualified dividend income distributed to non-corporate shareholders. In such an event, distributions in excess of the Fund's current and accumulated earnings and profits will be treated first as a tax-free return of capital to the extent of the holder's adjusted tax basis in the shares (reducing that basis accordingly), and any remaining distributions will be treated as a capital gain. To requalify for treatment as a RIC in a subsequent taxable year, the Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. In addition, if the Fund were to fail to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay a Fund-level tax on certain net built-in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year.

The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders.

Distributions

Dividends paid out of the Fund's net investment income will be taxable to a shareholder as ordinary income to the extent of the Fund's earnings and profits, whether paid in cash or reinvested in additional shares. The Fund does not expect to make any distributions that would be treated as qualified dividend income, which is taxable to non-corporate taxpayers at rates of up to 20%. Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, reported by the Fund as capital gain dividends are taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held Fund shares. Long-term capital gains are taxable to noncorporate taxpayers at rates of up to 20%. Distributions of short-term capital gain are taxable to shareholders as ordinary income. Shareholders receiving distributions in the form of additional shares, rather than cash, generally will have a cost basis in each such share equal to the greater of the net asset value or fair market value of a share of the Fund on the reinvestment date. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will first be treated by a shareholder as a return of capital which is applied against and reduces the shareholder's basis in his or her shares. To the extent the amount of any such distribution exceeds the shareholder's basis in his or her shares, the excess will be treated by the shareholder as gain from a sale or exchange of shares.

A dividend or distribution received shortly after the purchase of shares reduces the net asset value of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the net asset value of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions, although also in effect returns of capital, would be taxable to the shareholder in the same manner as other dividends or distributions. This is known as buying a dividend and should be avoided by taxable investors.

The Fund is required in certain circumstances to withhold (as backup withholding) a portion of dividends and certain other payments paid to certain holders of the Fund's shares who do not furnish to the Fund their

correct taxpayer identification numbers (in the case of individuals, their social security numbers) and certain certifications, or who are otherwise subject to backup withholding. The backup withholding rate is 28%. Backup withholding is not an additional tax. Any amounts withheld from payments made to a shareholder may be refunded or credited against such shareholder's federal income tax liability, provided the required information and forms are timely furnished to the IRS.

Capital losses in excess of capital gains (net capital losses) are not permitted to be deducted against a RIC's net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, the Fund may carry net capital losses from any taxable year forward to offset capital gains in future years. For U.S. federal income tax purposes, the Fund is permitted to carry forward a net capital loss from any taxable year that began on or before December 22, 2010 to offset its capital gains, if any, for up to eight years following the year of the loss. The Fund is permitted to carry forward indefinitely a net capital loss from any taxable year that began after December 22, 2010 to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to the Fund and may not be distributed as capital gains to shareholders. Carryforwards of losses from taxable years that began after December 22, 2010 must be fully utilized before the Fund may utilize carryforwards of losses from taxable years that began on or before December 22, 2010. Generally, the Fund may not carry forward any losses other than net capital losses. Under certain circumstances, the Fund may elect to treat certain losses as though they were incurred on the first day of the taxable year immediately following the taxable year in which they were actually incurred.

Sale or Exchange of Fund Shares

Sales and repurchases generally are taxable events for shareholders that are subject to tax. Shareholders should consult their own tax advisers with reference to their individual circumstances to determine whether any particular transaction in Fund shares is properly treated as a sale for tax purposes, as the following discussion assumes, and to ascertain the tax treatment of any gains or losses recognized in such transactions. In general, if Fund shares are sold, the shareholder will recognize gain or loss equal to the difference between the amount realized on the sale and the shareholder's adjusted tax basis in the shares. Such gain or loss generally will be treated as long-term capital gain or loss if the shares were held for more than one year and otherwise generally will be treated as short-term capital gain or loss. Any loss recognized by a shareholder upon the sale, repurchase or other disposition of shares with a tax holding period of six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the shareholder of long-term capital gain with respect to such shares (including any amounts credited to the shareholder as undistributed capital gains).

Losses on sales or other dispositions of shares may be disallowed under wash sale rules in the event of other investments in the fund (including investments made pursuant to reinvestment of dividends and/or capital gain distributions) within a period of 61 days beginning 30 days before and ending 30 days after the sale or other disposition of shares or in the event the shareholder enters into a contract or option to repurchase shares within such period. In such a case, the disallowed portion of any loss generally would be included in the adjusted tax basis of the shares acquired in the other investments.

Nature of Fund's Investments

Certain of the Fund's investment practices are subject to special and complex federal income tax provisions that may, among other things, (i) affect the ability of the Fund to qualify as a RIC, (ii) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (iii) convert long-term capital gain into short-term capital gain or ordinary income, (iv) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (v) cause the Fund to recognize income or gain without a corresponding receipt of cash, (vi) change the time at which a purchase or sale of stock or securities is deemed to occur and (vii) adversely alter the characterization of certain complex financial transactions. The Fund may make certain tax elections in order to mitigate the effect of these provisions.

The Code imposes constructive sale treatment for federal income tax purposes on certain hedging strategies with respect to appreciated financial positions. Under these rules, taxpayers will recognize gain, but not loss, with respect to securities if they enter into short sales or offsetting notional principal contracts (as defined by the Code) with respect to, or futures or forward contracts to deliver, the same or substantially identical property, or if they enter into such transactions and then acquire the same or substantially identical property.

As a result of entering into swap contracts, the Fund may make or receive periodic net payments. The Fund may also make or receive a payment when a swap is terminated prior to maturity through an assignment of the swap or other closing transaction. Periodic net payments will generally constitute ordinary income or expense, while termination of a swap will generally result in capital gain or loss (which will be a long-term capital gain or loss if the Fund has been a party to the swap for more than one year).

The Fund's investment program and the tax treatment of Fund distributions may be affected by IRS interpretations of the Code and future changes in tax laws and regulations.

Original Issue Discount Securities

Investments by the Fund in zero coupon or other discount securities will result in income to the Fund equal to a portion of the excess of the face value of the securities over their issue price (the original issue discount) each year that the securities are held, even though the Fund may receive no cash interest payments or may receive cash interest payments that are less than the income recognized for tax purposes. This income is included in determining the amount of income which the Fund must distribute to avoid the payment of federal income tax and the 4% excise tax. Because such income may not be matched by a corresponding cash payment to the Fund, the Fund may be required to borrow money or dispose of securities to be able to make distributions to its shareholders.

Market Discount

Any market discount recognized on a market discount bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value, or below adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

Futures Contracts and Options

The Fund's transactions in futures contracts and options will be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (*i.e.*, may affect whether gains or losses are ordinary or capital), may accelerate recognition of income to the Fund and may defer Fund losses. These rules could, therefore, affect the character, amount and timing of distributions to shareholders. These provisions also (a) may require the Fund to mark-to-market certain types of positions in its portfolio (*i.e.*, treat them as if they were closed out at the end of each taxable year), and (b) may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for qualifying to be taxed as a RIC and the distribution requirements for avoiding excise taxes. The Fund intends to monitor its transactions, make tax elections and make appropriate entries in its books and records when it acquires any futures contract, option or hedged investment in an effort to mitigate the effect of these rules and prevent disqualification of the Fund from being treated as a RIC.

Foreign Taxes

Since the Fund may invest in foreign securities, its income from such securities may be subject to non-U.S. taxes. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. Shareholders of the Fund generally will not be entitled to a credit or deduction with respect to any such taxes paid by the Fund.

Currency Fluctuations

Gains or losses attributable to fluctuations in exchange rates between the time the Fund accrues income or receivables or expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such income or receivables or pays such liabilities are generally treated as ordinary income or loss. Similarly, gains or losses on foreign currency forward contracts and the disposition of debt securities denominated in foreign currency, to the extent attributable to fluctuations in exchange rates between the acquisition and disposition dates, are also treated as ordinary income or loss.

Foreign Shareholders

U.S. taxation of a shareholder who, as to the United States, is a nonresident alien individual, a foreign trust or estate, a foreign corporation or foreign partnership (foreign shareholder) generally depends on whether the income received from the Fund is effectively connected with a U.S. trade or business carried on by the shareholder. In addition, unless certain foreign entities that hold Fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to Fund distributions payable to such entities and repurchase proceeds and certain capital gain dividends payable to such entities after December 31, 2018. A foreign shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

Income not Effectively Connected with a U.S. Trade or Business

If the income received from the Fund is not effectively connected with a U.S. trade or business carried on by the foreign shareholder, distributions of net investment income (including distributions of short-term capital gain) will generally be subject to a U.S. withholding tax of 30% (or lower treaty rate, except in the case of any excess inclusion income allocated to the shareholder), which tax is generally withheld from such distributions. Dividends reported by the Fund as (i) interest-related dividends, to the extent such dividends are derived from the fund's qualified net interest income, or (ii) short-term capital gain dividends, to the extent such dividends are derived from the Fund's qualified short-term gain, are generally exempt from this 30% withholding tax. Qualified net interest income is the Fund's net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. Qualified short-term gain generally means the excess of the Fund's net short-term capital gain for the taxable year over its net long-term capital loss, if any.

Distributions of net capital gain and any amounts retained by the Fund which are designated as undistributed capital gains generally will not be subject to U.S. tax at the rate of 30% (or lower treaty rate). In the case of a foreign shareholder who is a nonresident alien individual, the Fund may be required to withhold U.S. income tax from distributions of net capital gain unless the foreign shareholder certifies his or her non-U.S. status under penalties of perjury or otherwise establishes an exemption.

Income Effectively Connected with a U.S. Trade or Business

If the income from the Fund is effectively connected with a U.S. trade or business carried on by a foreign shareholder, then distributions of net investment income and capital gain dividends, any amounts retained by the Fund which are designated as undistributed capital gains and any gains realized upon the sale of shares of the Fund will be subject to U.S. federal income tax at the graduated rates applicable to U.S. citizens, residents and domestic corporations. Foreign corporate shareholders may also be subject to the branch profits tax imposed by the Code. Certain certification and disclosure requirements, including delivery of a properly executed IRS Form W-8ECI, must be satisfied for income effectively connected with a U.S. trade or business to be exempt from the 30% withholding described above under Foreign Shareholders-Income not Effectively Connected with a U.S. Trade or Business .

The tax consequences to a foreign shareholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. Foreign shareholders are advised to consult their own tax advisers with respect to the particular tax consequences to them of an investment in the Fund.

Other Tax Considerations

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a surviving spouse for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains including capital gain distributions and capital gains realized on the sale of Fund shares (among other categories of income) are generally taken into account in computing a shareholder's net investment income.

Fund shareholders may be subject to state, local and foreign taxes on their Fund distributions. Shareholders are advised to consult their own tax advisers with respect to the particular tax consequences to them of an investment in the Fund.

If a shareholder recognizes a loss on disposition of a Fund's Shares of \$2 million or more for an individual shareholder, or \$10 million or more for a corporate shareholder, in any single taxable year (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. In addition, significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

The foregoing discussion is a summary only and is not intended as a substitute for careful tax planning. Purchasers of Common Shares should consult their own tax advisors as to the tax consequences of investing in such Common Shares, including under state, local and other tax laws.

FINANCIAL STATEMENTS

The Financial Statements and the independent registered public accounting firm's report thereon, appearing in the Fund's annual shareholder report for the fiscal year ended July 31, 2016 is incorporated herein by reference in this SAI. The Fund's annual financial statements, including the financial highlights, as of and for the fiscal years ended July 31, 2016 and 2015, have been audited by KPMG LLP, an independent registered public accounting firm. KPMG has not reviewed or examined any records, transactions or events after the date of such report. The information with respect to the fiscal years ended prior to July 31, 2015 has been audited by other auditors. The Fund's annual shareholder report may be obtained without charge by calling (800) 257-8787.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets; including all foreign assets of the Fund is State Street Bank and Trust Company, One Lincoln Street, Boston, Massachusetts 02111. The Custodian performs custodial, fund accounting and portfolio accounting services. Custodian may place and maintain the Fund's foreign securities with foreign banking institutions sub-custodians employed by State Street or foreign securities depositories, all in accordance

with the applicable provisions of the Fund's Custody Agreement. The Fund's transfer, shareholder services and dividend paying agent is also State Street Bank and Trust Company (the Transfer Agent). The Transfer Agent is located at 250 Royall Street, Canton, Massachusetts 02021.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

KPMG LLP (KPMG), an independent registered public accounting firm, provides auditing services to the Fund. The principal business address of KPMG is 200 East Randolph, Chicago, Illinois, 60601.

LEGAL OPINION

Certain legal matters in connection with the Common Shares will be passed upon for the Fund by Morgan, Lewis & Bockius LLP, 1111 Pennsylvania Avenue NW Washington, D.C. 20004.

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the shares of the Fund offered hereby, has been filed by the Fund with the SEC, Washington, D.C. The Prospectus and this SAI do not contain all of the information set forth in the Registration Statement, including any exhibits and schedules thereto. For further information with respect to the Fund and the shares offered hereby, reference is made to the Registration Statement. Statements contained in the Prospectus and this SAI as to the contents of any contract or other document referred to are not necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by such reference. Copies of the Registration Statement may be inspected without charge at the SEC's principal office in Washington, D.C., and copies of all or any part thereof may be obtained from the SEC upon the payment of certain fees prescribed by the SEC.

APPENDIX A

Ratings of Investments

Standard & Poor's Corporation A brief description of the applicable Standard & Poor's Corporation, a division of The McGraw-Hill Companies (Standard & Poor's or S&P), rating symbols and their meanings (as published by S&P) follows:

A Standard & Poor's issue credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion evaluates the obligor's capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default. The issue credit rating is not a recommendation to purchase, sell, or hold a financial obligation, inasmuch as it does not comment as to market price or suitability for a particular investor.

Issue credit ratings are based on current information furnished by the obligors or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any credit rating and may, on occasion, rely on unaudited financial information. Credit ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

Issue credit ratings can be either long term or short term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term rating addresses the put feature, in addition to the usual long-term rating. Medium-term notes are assigned long-term ratings.

LONG-TERM ISSUE CREDIT RATINGS

Issue credit ratings are based, in varying degrees, on the following considerations:

Likelihood of payment capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;

Nature of and provisions of the obligation;

Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA

An obligation rated AAA has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated AA differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated A is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated BBB exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated BB, B, CCC, CC, and C are regarded as having significant speculative characteristics. BB indicates the least degree of speculation and C the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated BB is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated B is more vulnerable to nonpayment than obligations rated BB, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated CCC is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated CC is currently highly vulnerable to nonpayment.

C

A C rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the C rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms.

D

An obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Plus (+) or minus (-)

The ratings from AA to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR

This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

Short-Term Issue Credit Ratings

A-1

A short-term obligation rated A-1 is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated B is regarded as having significant speculative characteristics. Ratings of B-1, B-2, and B-3 may be assigned to indicate finer distinctions within the B category. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B-1.

A short-term obligation rated B-1 is regarded as having significant speculative characteristics, but the obligor has a relatively stronger capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-2.

A short-term obligation rated B-2 is regarded as having significant speculative characteristics, and the obligor has an average speculative-grade capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-3.

A short-term obligation rated B-3 is regarded as having significant speculative characteristics, and the obligor has a relatively weaker capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

C

A short-term obligation rated C is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Dual Ratings

Standard & Poor's assigns dual ratings to all debt issues that have a put option or demand feature as part of their structure. The first rating addresses the likelihood of repayment of principal and interest as due, and the second rating addresses only the demand feature. The long-term rating symbols are used for bonds to denote the long-term maturity and the short-term rating symbols for the put option (for example,

AAA/A-1+). With U.S. municipal short-term demand debt, note rating symbols are used with the short-term issue credit rating symbols (for example, SP-1+/A-1+).

Moody's Investors Service, Inc. A brief description of the applicable Moody's Investors Service, Inc. (Moody's) rating symbols and their meanings (as published by Moody's) follows:

Municipal Bonds

Aaa

Bonds that are rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as *gilt edged*. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds that are rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present that make the long-term risks appear somewhat larger than in Aaa securities.

A

Bonds that are rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present that suggest a susceptibility to impairment sometime in the future.

Baa

Bonds that are rated Baa are considered as medium grade obligations, *i.e.*, they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain

protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds that are rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds that are rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds that are rated Caa are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds that are rated Ca represent obligations that are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds that are rated C are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor Prospects of ever attaining any real investment standing.

#(hatchmark): Represents issues that are secured by escrowed funds held in cash, held in trust, invested and reinvested in direct, non-callable, non-prepayable United States government obligations or non-callable, non-prepayable obligations unconditionally guaranteed by the U.S. Government, Resolution Funding Corporation debt obligations.

Con. (): Bonds for which the security depends upon the completion of some act or the fulfillment of some condition are rated conditionally. These are bonds secured by (a) earnings of projects under construction, (b) earnings of projects unseasoned in operation experience, (c) rentals that begin when facilities are completed, or (d) payments to which some other limiting condition attaches. The parenthetical rating denotes probable credit stature upon completion of construction or elimination of the basis of the condition.

(P): When applied to forward delivery bonds, indicates the rating is provisional pending delivery of the bonds. The rating may be revised prior to delivery if changes occur in the legal documents or the underlying credit quality of the bonds.

Note: Moody's applies numerical modifiers 1,2 and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the issue ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

Short-Term Loans

MIG 1/VMIG 1

This designation denotes best quality. There is present strong protection by established cash flows, superior liquidity support or demonstrated broad-based access to the market for refinancing.

MIG 2/VMIG 2

This designation denotes high quality. Margins of protection are ample although not so large as in the preceding group.

MIG 3/VMIG 3

This designation denotes favorable quality. All security elements are accounted for but there is lacking the undeniable strength of the preceding grades. Liquidity and cash flow protection may be narrow and market access for refinancing is likely to be less well established.

MIG 4/VMIG 4

This designation denotes adequate quality. Protection commonly regarded as required of an investment security is present and although not distinctly or predominantly speculative, there is specific risk.

SG

This designation denotes speculative quality. Debt instruments in this category lack margins of protection.

Commercial Paper

Issuers (or supporting institutions) rated Prime-1 have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will normally be evidenced by the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structures with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers (or supporting institutions) rated Prime-2 have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation than is the case for Prime-2 securities. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability for repayment of senior short-term debt obligations. The effect of industry characteristics and market composition may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and the requirement for relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Fitch Ratings A brief description of the applicable Fitch Ratings (Fitch) ratings symbols and meanings (as published by Fitch) follows:

Long-Term Credit Ratings

Investment Grade

AAA

Highest credit quality. AAA ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

A-6

AA

Very high credit quality. AA ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. A ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. BBB ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Speculative Grade

BB

Speculative. BB ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. B ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. A CC rating indicates that default of some kind appears probable. C ratings signal imminent default.

DDD, DD, and D Default

The ratings of obligations in this category are based on their Prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. DDD obligations have the highest potential for recovery, around 90%-100% of outstanding amounts and accrued interest DD indicates potential recoveries in the range of 50%-90%, and D the lowest recovery potential, *i.e.*, below 50%. Entities rated in this category have defaulted on some or all of their obligations. Entities rated DDD have the highest Prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated DD and D are generally undergoing a formal reorganization or liquidation process; those rated DD are likely to satisfy a higher portion of their outstanding obligations, while entities rated D have a poor Prospect for repaying all obligations.

Short-Term Credit Ratings

The following ratings scale applies to foreign currency and local currency ratings. A Short-term rating has a time horizon of less than 13 months for most obligations, or up to three years for US public finance, in line with

industry standards, to reflect unique risk characteristics of bond, tax, and revenue anticipation notes that are commonly issued with terms up to three years. Short-term ratings thus place greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added + to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3

Fair credit quality. The capacity for timely payment of financial commitments is adequate; however, near-term adverse changes could result in a reduction to non-investment grade.

B

Speculative Minimal capacity for timely payment of financial commitments, plus vulnerability to near-term adverse changes in financial and economic conditions.

C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D

Default. Denotes actual or imminent payment default.

Notes to Long-term and Short-term ratings:

+ or - may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the AAA Long-term rating category, to categories below CCC, or to Short-term ratings other than FT.

NR indicates that Fitch Ratings does not rate the issuer or issue in question.

Withdrawn : A rating is withdrawn when Fitch Ratings deems the amount of information available to be inadequate for rating purposes, or when an obligation matures, is called, or refinanced.

Rating Watch: Ratings are placed on Rating Watch to notify investors that there is a reasonable probability of a rating change and the likely direction of such change. These are designated as Positive , indicating a potential upgrade, Negative , for a potential downgrade, or Evolving , if ratings may be raised, lowered or maintained. Rating Watch is typically resolved over a relatively short period.

A Rating Outlook indicates the direction a rating is likely to move over a one to two year period. Outlooks may be positive, stable, or negative. A positive or negative Rating Outlook does not imply a rating change is inevitable. Similarly, ratings for which outlooks are stable could be downgraded before an outlook moves to positive or negative if circumstances warrant such an action. Occasionally, Fitch Ratings may be unable to identify the fundamental trend. In these cases, the Rating Outlook may be described as evolving.

APPENDIX B

DERIVATIVE STRATEGIES AND RISKS

Set forth below is additional information regarding the various techniques involving the use of derivatives.

FINANCIAL FUTURES

A financial future is an agreement between two parties to buy and sell a security for a set price on a future date. They have been designed by boards of trade which have been designated contracts markets by the Commodity Futures Trading Commission (CFTC).

The purchase of financial futures is for the purpose of hedging the Fund's existing or anticipated holdings of long-term debt securities. For example, if the Fund desires to increase its exposure to long-term bonds and has identified long-term bonds it wishes to purchase at a future time, but expects market interest rates to decline (thereby causing the value of those bonds to increase), it might purchase financial futures. If interest rates did decrease, the value of those to-be-purchased long-term bonds would increase, but the value of the Fund's financial futures would be expected to increase at approximately the same rate, thereby helping maintain the Fund's purchasing power. When the Fund purchases a financial future, it deposits in cash or securities an initial margin, typically equal to an amount between 1% and 5% of the contract amount. Thereafter, the Fund's account is either credited or debited on a daily basis in correlation with the fluctuation in price of the underlying future or other requirements imposed by the exchange in order to maintain an orderly market. The Fund must make additional payments to cover debits to its account and has the right to withdraw credits in excess of the liquidity, the Fund may close out its position at any time prior to expiration of the financial future by taking an opposite position. At closing a final determination of debits and credits is made, additional cash is paid by or to the Fund to settle the final determination and the Fund realizes a loss or gain depending on whether on a net basis it made or received such payments.

The sale of financial futures is for the purpose of hedging the Fund's existing or anticipated holdings of long-term debt securities. For example, if the Fund owns long-term bonds and market interest rates were expected to increase (causing those bonds' values to decline), it might sell financial futures. If interest rates did increase, the value of long-term bonds in the Fund's portfolio would decline, but the value of the Fund's financial futures would be expected to increase at approximately the same rate thereby keeping the net asset value of the Fund from declining as much as it otherwise would have.

Among the risks associated with the use of financial futures by the Fund as a hedging or anticipatory device, perhaps the most significant is the imperfect correlation between movements in the price of the financial futures and movements in the price of the debt securities which are the subject of the hedge.

Thus, if the price of the financial future moves less or more than the price of the securities which are the subject of the hedge, the hedge will not be fully effective. To compensate for this imperfect correlation, the Fund may enter into financial futures in a greater dollar amount than the dollar amount of the securities being hedged if the historical volatility of the prices of such securities has been greater than the historical volatility of the financial futures. Conversely, the Fund may enter into fewer financial futures if the historical volatility of the price of the securities being hedged is less than the historical volatility of the financial futures.

The market prices of financial futures may also be affected by factors other than interest rates. One of these factors is the possibility that rapid changes in the volume of closing transactions, whether due to volatile markets or movements by speculators, would temporarily distort the normal relationship between the markets in the financial future and the chosen debt securities. In these circumstances as well as in periods of rapid and large price movements. The Fund might find it difficult or impossible to close out a particular transaction.

OPTIONS ON FINANCIAL FUTURES

The Fund may also purchase put or call options on financial futures which are traded on a U.S. Exchange or board of trade and enter into closing transactions with respect to such options to terminate an existing position. The purchase of put options on financial futures is analogous to the purchase of put options by the Fund on its portfolio securities to hedge against the risk of rising interest rates. As with options on debt securities, the holder of an option may terminate his position by selling an option of the Fund. There is no guarantee that such closing transactions can be effected.

INDEX CONTRACTS

INDEX FUTURES

A tax-exempt bond index which assigns relative values to the tax-exempt bonds included in the index is traded on the Chicago Board of Trade. The index fluctuates with changes in the market values of all tax-exempt bonds included rather than a single bond. An index future is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash—rather than any security—equal to a specified dollar amount times the difference between the index value at the close of the last trading day of the contract and the price at which the index future was originally written. Thus, an index future is similar to traditional financial futures except that settlement is made in cash.

INDEX OPTIONS

The Fund may also purchase put or call options on U.S. Government or tax-exempt bond index futures and enter into closing transactions with respect to such options to terminate an existing position. Options on index futures are similar to options on debt instruments except that an option on an index future gives the purchaser the right, in return for the premium paid, to assume a position in an index contract rather than an underlying security at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance of the writer's futures margin account which represents the amount by which the market price of the index futures contract, at exercise, is less than the exercise price of the option on the index future.

Bond index futures and options transactions would be subject to risks similar to transactions in financial futures and options thereon as described above.

SWAP AGREEMENTS

Swap agreements are two-party contracts entered into primarily by institutional investors, typically for periods ranging from a few weeks to several years. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or swapped between the parties are calculated with respect to a notional amount (the amount or value of the underlying asset used in computing the particular interest rate, return, or other amount to be exchanged) of a particular security, or in a basket of securities representing a particular index. Swap agreements may include, by way of example, (i) interest rate swaps, in which one party exchanges a commitment to pay a floating, shorter-term interest rate (typically by reference to the rate of a specific security or index) for the other party's commitment to pay a fixed, longer-term interest rate (either as specifically agreed, or by reference to a specified security or index); (ii) interest rate caps, in which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate or cap; (iii) interest rate floors, in which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified level or floor; (iv) interest rate collars, in which a party sells a cap and purchases a floor, or vice versa, in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels or collar amounts; (v) total return swaps, in which one party commits to pay the total return of an underlying security or asset in return for receiving from the other party a

specified return or the return of another instrument (typically a floating short-term interest rate), and (vi) credit default swap, in which the buyer pays a periodic fee in return for a contingent payment by the seller upon a credit event (such as a default) happening with respect to a specified instrument, typically in an amount equivalent to the loss incurred on a specific investment in that security due to the credit event.

A Fund may enter into such swap agreements for any purpose consistent with the Fund's investment objective, such as for the purpose of attempting to obtain, enhance, or preserve a particular desired return or spread at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded that desired return or spread. The Fund also may enter into swaps in order to protect against an increase in the price of securities that the Fund anticipates purchasing at a later date.

Whether the Fund's use of swap agreements will be successful in furthering its investment objective will depend, in part, on the ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments and the changes in the future values, indices, or rates covered by the swap agreement. Swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. The Fund will enter swap agreements only with counterparties that NFALLC reasonably believes are capable of performing under the swap agreements. If there is a default by the other party to such a transaction, the Fund will have to rely on its contractual remedies (which may be limited by bankruptcy, insolvency or similar laws) pursuant to the agreements related to the transaction. Certain requirements imposed on the Fund by the Code may limit the Fund's ability to use swap agreements. The swap market is largely unregulated.

Nuveen Short Duration Credit Opportunities Fund

STATEMENT OF ADDITIONAL INFORMATION

March 8, 2017
