(All figures are in US dollars unless stated otherwise)

Vancouver, British Columbia - December 18, 2006 - GOLDCORP INC. (GG:NYSE; G:TSX) announced today that it expects to produce approximately 2.8 million ounces of gold in 2007 at an anticipated total cash cost of \$150 per ounce. By-product assumptions used to forecast cash costs are silver at \$10 per ounce and copper at \$3 per pound.

Expected metals production is as follows:

Copper (lbs)	75,000,000	88,000,000	163,000,000

The ramp-up of production at Los Filos in Mexico and Marlin in Guatemala is expected to drive the increase in gold production in the second half of the year.

*Los Filos includes Nukay with approximately 30,000 ounces in gold production.

Capital expenditures for the year are forecast at \$750 million, including approximately \$315 million at the Peñasquito project in Mexico, \$110 million at Red Lake mine in Canada and \$95 million at Los Filos and San Dimas--the latter of which includes the on-going construction of a hydroelectric power plant. Exploration expense for 2007 is forecast at \$55 million, including \$23 million in Canada and \$22 million in Mexico.

Management Appointments
