NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

In the opinion of management, the unaudited condensed consolidated financial statements contain all adjustments consisting only of normal recurring accruals considered necessary to present fairly the Company's financial position at March 31, 2005, the results of operations for the three months ended March 31, 2005, and cash flows for the three months ended March 31, 2005. The results for the three months ended March 31, 2005 are not necessarily indicative of the results to be expected for the entire fiscal year ending December 31, 2005. These financial statements should be read in conjunction with the Company's annual report on Form 10-KSB as filed with the Securities and Exchange Commission.

NOTE 2 REVERSE MERGER

China North East Petroleum Holdings Limited ("North East Petroleum") is a US listed company which was incorporated in Nevada on August 20, 1999 under the name of Draco Holding Corporation ("Draco"). Draco is authorized to issue 20,000,000 shares of common stock of \$0.001 par value. On June 28, 2004, the Articles of Incorporation were amended to change the name of the Company to China North East Petroleum Holdings Limited and increase its authorized shares of common stock from 20,000,000 to 50,000,000.

Hong Xiang Petroleum Group Limited ("Hong Xiang Petroleum Group") was incorporated in the British Virgin Islands ("BVI") on August 28, 2003.

On December 5, 2003, Song Yuan City Hong Xiang Petroleum Technical Services Co., Ltd. ("Hong Xiang Technical") was incorporated in the People's Republic of China ("PRC") as a limited liability company with a registered capital of \$484,000. Hong Xiang Technical provides technical advisory services to oil and gas exploration companies in the PRC.

During 2004, Hong Xiang Petroleum Group acquired a 100% ownership of Hong Xiang Technical.

During 2004, Hong Xiang Technical acquired a 100% interest in Song Yuan City Yu Qiao Qianan Hong Xiang Oil and Gas Development Co., Ltd. ("Hong Xiang Oil Development"), a limited liability company incorporated on April 1, 2003 in the PRC with a registered capital of \$604,800.

Hong Xiang Oil Development is engaged in the exploration and production of crude oil in Jilin Oil Region, the PRC. Subsequent to the Cooperative Exploration Contract entered by the non-operating interest owner and Jilin Office, PetroChina Group ("Sub-Owner") in December 2002, Hong Xiang Oil Development entered into another Cooperative Exploration Contract (the "Contract") with the non-operating interest owner in respect of the development rights to the proven reserves in the Qian'an Oil Field Zone 112 (the "Zone") in Jilin Oil Region for 20 years (the "Contract Period").

In accordance with the Contract, Hong Xiang Oil Development was responsible to provide working capital and developing the Zone. Production from the Zone is shared in the following manner:-

The acquisition of Hong Xiang Oil Development by Hong Xiang Technical has been accounted for as a reorganization of entities under common control as the companies were beneficially owned by principally identical shareholders and share common management. The financial statements have been prepared as if the reorganization had occurred retroactively.

CHINA NORTH EAST PETROLEUM HOLDINGS LIMITED
AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
AS OF MARCH 31, 2005
(UNAUDITED)

On March 29, 2004, Draco executed a Plan of Exchange (“the Agreement”) with all the shareholders of Hong Xiang Petroleum Group to exchange 18,700,000 shares of common stock of Draco for 100% of the outstanding shares of Hong Xiang Petroleum Group.

The Agreement was consummated on April 30, 2004. As a result of the Agreement, the exchange of shares with Hong Xiang Petroleum Group have been accounted for as a reverse acquisition under the purchase method of accounting since the shareholders of Hong Xiang Petroleum Group obtained control of the consolidated entity (“North East Petroleum”). Accordingly, the merger of North East Petroleum and Hong Xiang Petroleum Group has been recorded as a recapitalization by Hong Xiang Petroleum Group, with Hong Xiang Petroleum Group being treated as the continuing entity. The financial statements have been prepared as if the reorganization had occurred retroactively. North East Petroleum, Hong Xiang Petroleum Group, Hong Xiang Technical and Hong Xiang Oil Development are hereafter referred to as (“the Company”).

Accordingly, the financial statements include the following:

- a) The balance sheet consists of the net assets of the acquirer at historical cost and the net assets of the acquiree at historical cost; and
- b) The statements of operations include the operations of the acquirer for the years presented and the operations of the acquiree from the date of the merger.

The financial statements of the acquiree are not significant. Therefore, no pro forma financial statements are submitted.

In addition to completion of the Exchange, on April 30, 2004, Draco executed a Distribution Agreement with its wholly-owned subsidiary, Jump’n Jax, Inc., a Utah corporation (“Jump’n Jax”) pursuant to which the Company agreed to distribute all of the outstanding shares of Jump’n Jax as a dividend to the shareholders of record of Draco as of March 8, 2004. Under the Distribution Agreement, the effective date of dividend was also April 30, 2004.

NOTE 3 PRINCIPLES OF CONSOLIDATION

The accompanying unaudited condensed financial statements for 2005 (consolidated) and 2004 include the financial statements of North East Petroleum and its wholly owned subsidiaries, Hong Xiang Petroleum Group, Hong Xiang Technical and Hong Xiang Oil Development. All significant inter-company accounts and transactions have been eliminated in consolidation.

NOTE 4 USE OF ESTIMATES

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 5 OIL AND GAS PROPERTIES

The Company follows the full cost method of accounting for oil and gas properties. Accordingly, all costs associated with acquisition of development rights, and development of oil reserves, including directly related overhead costs, are capitalized.

Depreciation, depletion and amortization of capitalized costs, excluding unproved properties, are based on the unit-of-production methods based on proved reserves. Investments in unproved properties and

CHINA NORTH EAST PETROLEUM HOLDINGS LIMITED
AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
AS OF MARCH 31, 2005
(UNAUDITED)

major development projects are not amortized until proved reserves associated with the projects can be determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the amount of the impairment is added to the capitalized costs to be amortized.

In addition, the capitalized costs are subject to a “ceiling test”, which basically limits such costs to the aggregate of the “estimated present value”, discounted at a 10-percent interest rate of future net revenues from proved reserves, based on current economic and operating conditions, plus the lower of cost or fair market value of unproved properties.

Sales of portion of development rights and other proved and unproved properties are accounted for as adjustments of capitalized costs with no gain or loss recognized, unless such adjustments would significantly alter the relationship between capitalized costs and proved reserves of oil and gas, in which case the gain or loss is recognized in income.

Abandonment of oil and gas properties other than the development rights are accounted for as adjustments of capitalized costs with no loss recognized

NOTE 6 EARNINGS PER SHARE

Basic earnings per share are computed by dividing income available to common stockholders by the weighted average number of common stocks outstanding during the period. Diluted income per share is computed similar to basic income per share except that the denominator is increased to include the number of additional common stocks that would have been outstanding if the potential common stocks had been issued and if the additional common stocks were diluted. There are no potentially dilutive securities for 2005 and 2004.

NOTE 7 ENVIRONMENTAL COSTS

The PRC has adopted extensive environmental laws and regulations that affect the operations of the oil and gas industry. The outcome of environmental liabilities under proposed or future environmental legislation cannot be reasonably estimated at present, and could be material. Under existing legislation, however, the management believes that there are no probable liabilities that will have a material adverse effect on the financial position of the Company.

NOTE 8 SHAREHOLDERS' EQUITY

(A) Stock issuances

On March 29, 2004, the Company executed a Plan of Exchange pursuant to which the Company agreed to issue 18,700,000 new shares of common stock to the shareholders of Hong Xiang Petroleum Group in exchange for 100% of registered capital of Hong Xiang Petroleum Group. The Plan of Exchange was consummated on April 30, 2004.

During 2004, North East Petroleum issued 1,199,080 shares of common stock for the recapitalization with Hong Xiang Petroleum Group (see Note 1).

During 2004, the Company issued 90,000 and 100,000 shares of common stock for consulting services. The stock was valued at the closing price on the date of grant, or at \$1.11 and \$0.45 per share respectively, yielding an aggregate value of \$99,900 and 45,000 respectively. The expense of the services was charged to operations in the accompanying financial statements.

During January 2005, a stockholder of the Company returned 2,715,000 shares of common stock to the Company.

CHINA NORTH EAST PETROLEUM HOLDINGS LIMITED
AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
AS OF MARCH 31, 2005
(UNAUDITED)

During February 2005, the Company issued 750,000 and 150,000 shares of common stock for consulting services. The stock was valued at the closing price on the date of grant, or at \$1.08 and \$0.92 per share respectively, yielding an aggregate value of \$810,000 and 138,000 respectively. The expense of the services was charged to operations in the accompanying financial statements.

(B) Appropriated retained earnings

The Company is required to make appropriations to reserves funds, comprising the statutory surplus reserve, statutory public welfare fund and discretionary surplus reserve, based on after-tax net income determined in accordance with generally accepted accounting principles of the People's Republic of China (the "PRC GAAP"). Appropriation to the statutory surplus reserve should be at least 10% of the after tax net income determined in accordance with the PRC GAAP until the reserve is equal to 50% of the entities' registered capital. Appropriations to the statutory public welfare fund are at 5% to 10% of the after tax net income determined in accordance with the PRC GAAP. The statutory public welfare fund is established for the purpose of providing employee facilities and other collective benefits to the employees and is non-distributable other than in liquidation. Appropriations to the discretionary surplus reserve are made at the discretion of the Board of Directors.

During 2005 and 2004, the Company appropriated \$49,969 and \$0, respectively to the reserves funds based on its net income under the PRC GAAP.

NOTE 9 RELATED PARTY TRANSACTIONS

Two directors and stockholders had advanced funds totaling \$2,174,524 to the Company as of June 30, 2004 as unsecured loan, accruing interest at rate of 6% per annum. The advances are payable upon demand. Total interest expense payable to the director and stockholder amounted to \$34,442 and \$0 for the three months ended March 31, 2005 and 2004 respectively.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

The discussion contained in this prospectus contains "forward-looking statements" that involve risk and uncertainties. These statements may be identified by the use of terminology such as "believes", "expects", "may", or "should", or "anticipate" or expressing this terminology negatively or similar expressions or by discussions of strategy. The cautionary statements made in this prospectus should be read as being applicable to all related forward-looking statements wherever they appear in this prospectus. Our actual results could differ materially from those discussed in this prospectus. Important factors that could cause or contribute to such differences include those discussed under the caption entitled "risk factors," as well as those discussed elsewhere in this prospectus.

OUR COMPANY

We were incorporated in the State of Nevada on August 20, 1999. Since 2004, we have been engaged in the extraction and production of crude oil in Jilin Province, People's Republic of China, through Song Yuan City Yu Qiao Qianan Hong Xiang Oil and Gas Development Co., Limited, our wholly-owned subsidiary organized and existing under the laws of the People's Republic of China. The oil field is called Jilin Qian'an Oil Field Zone 112 ("Qian'an 112"), located at 9 kilometers southwest of Qian'an City with a total exploration area of 20.7 square kilometers. Pursuant to a 20-year exclusive Cooperative Exploration Contract (the "Contract") signed between and among PetroChina Group, a corporation organized and existing under the laws of the People's Republic of China ("PetroChina"), Song Yuan City Yu Qiao Oil and Gas Exploration Limited Corp., a corporation organized and existing under the laws of the People's Republic of China ("Yu Qiao") and us, we have the right to explore and pump oil at Qian'an 112 and take responsibility for well logging, drill-stem testing and core sampling. PetroChina will take 20% of our output in the first ten years and then 40% of our output until the end of the Contract; and Yu Qiao will take 2% of our output as a management fee for managing the process of oil production.

We are also seeking the opportunities to acquire additional extraction rights in other portions of the Qian'an Field or in other newly discovered fields.

Results of Operations.

Sales.

We recorded revenue of \$351,113 for the three months ended March 31, 2005, versus sales revenue of \$447,608 for the same period ended in 2004, a decrease of approximately \$96,000 or 21%. Such decrease was a result of decreased drilling output in the first quarter of 2005. Some of the pipes and equipments were maintained periodically. Our limited capital investment restricted our ability to finish the maintenance in time, resulting approximately 10% of the drilling equipments stopped operating.

Cost of Sales.

Costs of sales for the three months ended March 31, 2005 were \$24,509, or approximately 7% of sales, compared to \$189,483, or approximately 42% of sales, for the same period ended in 2004. A decrease of approximately \$160,000 or 87% was primarily the result of decreased cost of oil well drilling operation and decreased depreciation and amortization.

Oil well drilling operation costs from our producing properties for the three months ended March 31, 2005 were \$7,652 compared to \$164,403 for the three months ended March 31, 2004, a decrease of approximately \$150,000 or 95%. Such decrease was due to the construction of most oil wells done in 2004. The cost related to drilling operation was limited.

Depreciation, depletion, and amortization costs for the three months ended March 31, 2005 decreased to 7,861 from \$12,540 for the three months ended March 31, 2004, a decrease of approximately \$5,000 or 37%. Such decrease was due to the disposal of oil and gas properties in the first quarter of 2005.

We expect to keep cost of sales as a percentage of sales at a low level because we had short-distance delivery which was good for us to control the storage and delivery cost.

Expenses.

Operating expenses for the three months ended March 31, 2005 were \$996,691, compared to \$27,030 for the three months March 31, 2004, an increase of approximately \$970,000. The increase was due primarily to the costs of consulting fees, which amounted to \$948,000 for the three months ended March 31, 2005.

Income Taxes

Income taxes are provided in accordance with Statement of Financial Accounting Standards No. 109 (SFAS No. 109), "*Accounting for Income Taxes*." A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss-carryforwards.

Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that, some portion or all of the deferred tax asset will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment. We currently do not have any deferred tax assets.

Net Income / Loss

We had a net loss of \$790,007, or \$0.04 per common share, for the three months ended March 31, 2005, versus a net income of \$153,358, or \$0.01 per common share, for the same period ended March 31, 2004. The increase in net loss in the first quarter of 2005 was due primarily to the consulting fee of \$948,000 for the three months ended March 31, 2005, versus no consulting fees for the same period ended in 2004.

Impact of Inflation.

We believe that inflation has had a negligible effect on operations since inception. We believe that we can offset inflationary increases in the cost of operations by increasing sales and improving operating efficiencies.

Oil Pricing

Oil prices were near or above record levels for most of the first quarter. Our oil prices are largely determined by oil prices in the world market. Global supply and demand and geopolitical factors are the key determinants of oil prices. The rapid growth of energy use in developing countries, most notably China, is driving a rapid increase in worldwide oil consumption. Higher prices could result in reduced consumption and/or increasing supplies that could moderate the current high price levels. Over the past several years oil has been an increasing part of our production mix. As a result higher oil prices have contributed to the increased revenue from oil sales more than in the past, and we would suffer a greater impact if oil prices were to decrease.

Liquidity and Capital Resources.

On March 31, 2005, we had cash of \$2,935 and working capital deficit of \$3,950,390. The working capital deficit was due primarily to the other payable and accrued liabilities of \$875,981, which was related to the management fee payable to Yu Qiao, and the director and stockholder loan of \$2,174,524, which was related to our initial investment in oil and gas properties.

On March 31, 2004, we had cash of \$7,936 and working capital deficit of \$3,876,441. The working capital deficit was due primarily to the other payable and accrued liabilities of \$1,769,439, which was attributable to the management fee payable to Yu Qiao, and the director and stockholder loan of \$1,692,647 for the initial investment.

Net cash flows provided by operating activities were \$2,148 for the three months ended March 31, 2005 as compared with net cash flows used in operating activities of \$415,505 for the same period in 2004. The increase in cash provided by operations was primarily attributable to the increase in stocks issued for services and decrease in accounts payable and other payable for the first quarter of 2004.

Net cash flows provided by investing activities were \$182,005 for the three months ended March 31, 2005 as compared with net cash flows used in investing activities of \$13,043 for the same period in 2004. The cash flows provided by investment in the first quarter of 2005 were primarily attributable to the disposal of oil and gas properties. The cash flows used in investment in the first quarter of 2004 were due to the purchase of oil and gas properties.

Net cash flows used in financing activities were \$182,005 for the three months ended March 31, 2005 as compared with net cash flows provided by financing activities of \$428,785 for the same period in 2004. The cash flows used in financing activities in the first quarter of 2005 were due primarily to the repayment to directors and stockholders.

Overall, the estimated capital investment required to fully develop Qian'an 112 is approximately \$23 million. If we raise the funds through issuance of equity related or debt securities, such securities may have rights to obtain our common stock, such as warrants or options. Shareholders may experience additional dilution from exercise of these financial instruments. We cannot be certain that additional financing will be available when required or at all. If we raise capital successfully, we will seek to acquire additional extraction rights in other portions of the Qian'an Field or in other newly discovered fields. If we are unable to receive additional cash from our majority stockholder, we may need to rely on financing from outside sources through debt or equity transactions. Failure to obtain such financing could have a material adverse effect on operations and financial condition.

ITEM 3. CONTROLS AND PROCEDURES

Quarterly Evaluation of Controls

As of the end of the period covered by this quarterly report on Form 10-Q, we evaluated the effectiveness of the design and operation of (i) our disclosure controls and procedures ("Disclosure Controls"), and (ii) our internal control over financial reporting ("Internal Controls"). This evaluation ("Evaluation") was performed by our Chief Executive Officer, Wei, Guo Ping ("CEO") and by our President and Acting Principal Accounting Officer, Wang, Hong Jun, ("CFO"). In this section, we present the conclusions of our CEO based on and as of the date of the Evaluation, (i) with respect to the effectiveness of our Disclosure Controls, and (ii) with respect to any change in our Internal Controls that occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect our Internal Controls.

CEO and CFO Certifications

Attached to this quarterly report, as Exhibits 31.1 and 31.2, are certain certifications of the CEO and CFO, which are required in accordance with the Exchange Act and the Commission's rules implementing such section (the "Rule 13a-14(a)/15d-14(a) Certifications"). This section of the quarterly report contains the information concerning the Evaluation referred to in the Rule 13a-14(a)/15d-14(a) Certifications. This information should be read in conjunction with the Rule 13a-14(a)/15d-14(a) Certifications for a more complete understanding of the topic presented.

Disclosure Controls and Internal Controls

Disclosure Controls are procedures designed with the objective of ensuring that information required to be disclosed in our reports filed with the Commission under the Exchange Act, such as this quarterly report, is recorded, processed, summarized and reported within the time period specified in the Commission's rules and forms. Disclosure Controls are also designed with the objective of ensuring that material information relating to the Company is made known to the CEO and the CFO by others, particularly during the period in which the applicable report is being prepared. Internal Controls, on the other hand, are procedures which are designed with the objective of providing reasonable assurance that (i) our transactions are properly authorized, (ii) our assets are safeguarded against unauthorized or improper use, and (iii) our transactions are properly recorded and reported, all to permit the preparation of complete and accurate financial statements in conformity with accounting principals generally accepted in the United States.

Limitations on the Effectiveness of Controls

Our management does not expect that our Disclosure Controls or our Internal Controls will prevent all error and all fraud. A control system, no matter how well developed and operated, can provide only reasonable, but not absolute assurance that the objectives of the control system are met. Further, the design of the control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances so of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision -making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of a system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated objectives under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or because the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Scope of the Evaluation

The CEO and CFO's evaluation of our Disclosure Controls and Internal Controls included a review of the controls' (i) objectives, (ii) design, (iii) implementation, and (iv) the effect of the controls on the information generated for use in this quarterly report. In the course of the Evaluation, the CEO and CFO sought to identify data errors, control problems, acts of fraud, and they sought to confirm that appropriate corrective action, including process improvements, was being undertaken. This type of evaluation is done on a quarterly basis so that the conclusions concerning the effectiveness of our controls can be reported in our quarterly reports on Form 10-QSB and annual reports on Form 10-KSB. The overall goals of these various evaluation activities are to monitor our Disclosure Controls and our Internal Controls, and to make modifications if and as necessary. Our external auditors also review Internal Controls in connection with their audit and review activities. Our intent in this regard is that the Disclosure Controls and the Internal Controls will be maintained as dynamic systems that change (including improvements and corrections) as conditions warrant.

Among other matters, we sought in our Evaluation to determine whether there were any significant deficiencies or material weaknesses in our Internal Controls, which are reasonably likely to adversely affect our ability to record, process, summarize and report financial information, or whether we had identified any acts of fraud, whether or not material, involving management or other employees who have a significant role in our Internal Controls. This information was important for both the Evaluation, generally, and because the Rule 13a-14(a)/15d-14(a) Certifications, Item 5, require that the CEO and CFO disclose that information to our Board (audit committee), and to our independent auditors, and to report on related matters in this section of the quarterly report. In the professional auditing literature, "significant deficiencies" are referred to as "reportable conditions". These are control issues that could have significant adverse affect on the ability to record, process, summarize and report financial data in the financial statements. A "material weakness" is defined in the auditing literature as a particularly serious reportable condition where the internal control does not reduce, to a relatively low level, the risk that misstatement cause by error or fraud may occur in amounts that would be material in relation to the financial statements and not be detected within a timely period by employee in the normal course of performing their assigned functions. We also sought to deal with other controls matters in the Evaluation, and in each case, if a problem was identified, we considered what revisions, improvements and/or corrections to make in accordance with our ongoing procedures.

Conclusions

Based upon the Evaluation, the Company's CEO and CFO have concluded that, subject to the limitations noted above, our Disclosure Controls are effective to ensure that material information relating to the Company is made known to management, including the CEO and CFO, particularly during the period when our periodic reports are being prepared, and that our Internal Controls are effective to provide reasonable assurance that our financial statements are fairly presented inconformity with accounting principals generally accepted in the United States. Additionally, there has been no change in our Internal Controls that occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to affect, our Internal Controls.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 2. Changes in Securities

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders
