2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements were prepared in accordance with accounting practices adopted in Brazil, in accordance with Brazilian corporation law, rules of the Brazilian Securities Commission (CVM) and rules applicable to Switched Fixed Telecommunications Services - STFC concessionaires.

As the Company is filed with the Securities and Exchange Commission (SEC), it is subject to its standards, and should prepare annually financial statements and other information by using criteria that comply with that entity s requirements. For complying with these requirements and aiming at meeting the market s information needs, the Company adopts, as a principle, the practice of publishing information in both markets in their respective languages.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

The notes to the financial statements are presented in thousands of reais, unless demonstrated otherwise in each note. According to each situation, the notes to the financial statement present information related with the Company and the consolidated financial statements, identified as PARENT COMPANY and CONSOLIDATED, respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED.

The accounting estimates were based on objective and subjective factors, based on the judgment of the management for determining the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, provision for doubtful accounts, inventories and deferred income tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to benefits for employees. The settlement of transactions involving these estimates may result in significant different amounts due to the inherent imprecision to the process of their determination. The Company reviews the estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the companies listed in Note 1.

Some of the main consolidation procedures are:

- Elimination of intercompany balances, as well as revenue and expenses of transactions among them;
- Elimination of the investor's shareholdings, reserves and accumulated results in the investees; and
- Segregation of the portions of shareholders' equity and income belonging to minority shareholders, indicated in specific items.

The reconciliation between the net income of the Parent Company and the consolidated is presented as follows:

	NET INCOME		SHAREHOLDERS' EQUITY	
	06/30/04	03/31/04	06/30/04	03/31/04
Parent company	154,465	132,779	6,590,778	6,557,523
Entries made directly in the Subsidiary Shareholders' Equity				
Donations and Subsidies for Investments	(942)	-	-	-
CONSOLIDATED	153,523	132,779	6,590,778	6,557,523

In addition, the Company presents, in Note 17, the statement of cash flows, prepared under the indirect method, in accordance with Accounting Rules and Procedures - NPC Nr. 20 of Brazilian Institute of Independent Auditors (IBRACON).

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refers to the practices adopted by the Company and its subsidiaries that are included in the consolidated balance sheet.

a. Cash and cash equivalents: Cash equivalents are short-term, high-liquidity investments, which immediately mature. They are recorded at cost, plus income earned to the end of the quarter, not exceeding market value.

b. Trade accounts receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff in effect on the date the service is rendered. Unbilled services provided to customers at the balance sheet date are also included in trade accounts receivable. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion and those for maintenance. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and noncurrent assets. Obsolete items are recorded as Allowance for losses.

d. Investments: Investments in subsidiaries are valued using the equity method. The goodwill was calculated based on the expectation of future results and its amortization is related to the volume and of timing forecasted over a period of not more than ten years. Other investments are

Edgar Filing: BRASIL TELECOM SA - Form 6-K

recorded at cost less allowance for probable losses, when applicable. The investments resulting from income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas, they remain recognized in noncurrent assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued at cost or market prices, when the latter is lower, and allowances for losses are recorded if required.

e. Property, plant and equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

The costs incurred, when they represent improvements (increase in installed capacity or useful life) are capitalized. Maintenance and repair are charged to the profit and losses accounts, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 24.

f. Deferred charges: Segregated between deferred charges on amortization and formation. Their breakdown is shown in Note 25. Amortization is calculated under the straight-line method in accordance with the legislation in force. When the asset does not generate benefits anymore, it is written off against nonoperating income.

g. Income and Social Contribution Taxes: Income and social contribution taxes are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses, and the negative social contribution base are recorded under assets or liabilities, as the case may be, according to the assumption of realization or future demand, within the parameters established in the CVM Instruction 371/02.

h. Loans and Financing: Updated to the balance sheet date for monetary or exchange variations and interest incurred. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: Recognized based on its risk assessment evaluation and quantified on economic grounds and legal the counselors' opinions on the lawsuits and other contingency factors known as of the balance sheet date. The basis and nature of the provisions are described in Note 7.

j. Recognition of Revenues: Revenues from services rendered are accounted for on the accrual basis. Local and long distance calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards are recorded upon sale.

k. Recognition of Expenses: Expenses are recognized on the accrual basis, considering their relation with revenue realization. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on accounts receivable settled after maturity and gains on financial investments, exchange variation and hedges, when earned. Financial expenses comprise interest incurred and other charges on loans, financing and other financial transactions.

Credited Interest on Shareholders' Equity is included in the financial expenses balance; for financial statement presentation purposes, the amounts are reversed to profit and loss accounts and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects linked to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period after the operations commence.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed by SISTEL and BrTPREV. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis. As of December 31, 2001, to comply with CVM Deliberation 371/00, the Company recorded its actuarial deficit on the balance sheet date against shareholders' equity, net of its tax effects. As from 2002, as new actuarial revaluations show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts, in accordance with the CVM deliberation above. Complementary information on private pension plans is described in Note 6.

o. Employees and directors Profit Sharing: The provisions for employee and directors' profit sharing are recognized according to the accrual basis. The calculation of the amount, which is paid in the year after the provision recognition, is in accordance with the target program established with the labor union, in accordance with Law 10,101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of shares outstanding at the balance sheet date, which comprises the total number of shares issued net of treasury stock.

4. RELATED-PARTY TRANSACTIONS

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiary assessed the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts, which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this Note was made based on their materiality. Those instruments the value of which approximates the fair value, and whose risk assessment is not significant, are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks; the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's and subsidiaries' business are the following:

a. Credit Risk

The majority of the services provided by Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit policy, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the Company may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the Company's default was 3.07% of the gross revenue (2,60% for the same period last year). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense.

b. Exchange Rate Risk

Assets

The Company has asset loans in foreign currency subject in exchange rate fluctuations. The asset amount exposure at this risk of the exchange rate is as follows:

	PARENT COMPANY	
	BOOK AND MARKET VALUE	
	06/30/04	03/31/04
Assets		
Loans with Parent Company	159,773	-
Total	159,773	-
Current	159,773	-

Loan agreement granted in US dollar to BrT SCS Bermuda in April 2, 2004 at an interest rate of 3% p.a.

Liabilities

The Company has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 29% of the total liabilities (16% on March 31, 2004). To minimize this type of risk, the subsidiary enters into swap agreements with financial institutions to hedge foreign exchange exposures, 25% of the debt portion in foreign currency is covered by hedge agreements (7.5% on March 31, 2004). Unrealized positive or negative effects of these operations are recorded in the profit and loss as gain or loss. To the quarter, consolidated net gain totaled R\$28,142

Edgar Filing: BRASIL TELECOM SA - Form 6-K

(losses of R\$74,546 for the same period of last year).

Net exposure as per book and market values, at the exchange rate prevailing on the balance sheet date, is as follows:

Noncurrent	1,447,269	1,426,429	761,589	754,145

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was the discounted cash flow at the market rates prevailing at the balance sheet date.

c. Interest Rate Risk

Assets

The Company has loans with a company producing telephone directories agreement by IGP-DI and resulting from the sale of fixed assets to other telephone companies, interest rate by Column 27 (FGV), and loan agreement to BrT CS Ltda., indexed to CDI. In the consolidated balance is included a loan agreement by Freelance S.A., indexed to IGP-M.

At the balance sheet date, these assets are represented as follows:

	PARENT COMPANY		CONSOLIDATED	
	Book and Market Value		Book and Market Value	
	06/30/04	03/31/04	06/30/04	03/31/04

Noncurrent assets	7,929	7,705	7,929	7,705
-------------------	-------	-------	-------	-------

The carrying values are equal to market values, since the current contracting conditions for this type of financial instrument are similar to the original conditions.

Liabilities

Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates linked to indexing units TJLP, UMBNDES, CDI (Rate DI - CETIP) and IGP-M. The risk inherent in these liabilities arises from possible variations in these rates. The Company has contracted derivative contracts to hedge 78% (78% in 03/31/04) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts, considering the influence of the dollar on the interest rate (basket of currencies) of these liabilities. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates.

In addition to the loans and financing, the Company issued non-convertible private and public debentures. These liabilities were contracted at interest rates tied to the CDI, and the risk linked with this liability is the result of the possible increase in the rate.

The aforementioned liabilities at the balance sheet date are as follows:

	PARENT COMPANY AND CONSOLIDATED			
	06/30/04		30/31/04	
	Book Value	Market Value	Book Value	Market Value
LIABILITIES				
Debentures - CDI	1,788,521	1,788,651	2,292,216	2,292,216

Loans linked to IGP-M	18,853	18,853	19,875	19,875
Other loans	18,108	18,108	19,377	19,377
TOTAL	3,630,323	3,752,292	4,244,286	4,207,630
Current	1,398,328	1,445,308	1,901,435	1,885,013
Long-term	2,231,995	2,306,984	2,342,851	2,322,617

Book value is equivalent to market values because the current contractual conditions for these types of financial instruments are similar to those in which they were originated.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by the Company are not linked to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates, which affect the company's debts. Consequently, a risk arises from this lack of linking.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risk are recorded as liabilities. Details of these risks are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity method and stated at acquisition cost. The investments valued by the equity method are presented in Note 23, for which there exists no market value, as they are represented by close corporations or private limited companies. Provisions are recorded for losses when the future cash flows expected from an investment lead to expectations of losses.

In this quarter a provision was recorded with respect to the negative equity of VANT, which was R\$17,033 at June 30, 2004.

The investments valued at cost are immaterial in relation to total assets. The risks related with them would not cause significant impacts to the Company if significant losses were to occur on these investments.

g. Temporary Cash Investment Risks

The company has temporary cash investments in exclusive financial investment funds (FIFs), whose assets are constituted by post fixed federal securities, pre fixed and exchange linked CDI, through future indexed to the exchange rate of the Futures and Commodities Exchange - BM&F and in an investment fund in foreign currency, with no credit risks in such operations. The Company maintains cash investments in the value of R\$1,030,484 (R\$1,985,138 as of March 31, 2004). Income earned to the balance sheet date is recorded in financial income and amounts to R\$102,185 (R\$70,240 in 2003). Amounts in the consolidated financial statements, are of R\$1,898,343 (R\$2,033,933 as of March 31, 2004) related to investments and R\$105,722 (R\$74,318 in 2003) income earned.

6. BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company and its wholly-owned subsidiary. These companies are better described together, and can be referred to as Brasil Telecom (group) and for the purpose of the pension scheme cited in this note, are also denominated Sponsor .

(a) Private Pension Plan

The Company sponsors private pension schemes related with retirement for its employees and assisted members, and in the case of the latter, medical assistance in some cases. These plans are managed by two foundations, which are Fundação de Seguridade Social (SISTEL), which originated from certain companies of the former Telebrás System and Fundação BrTPREV (FBrTPREV) former Fundação dos Empregados da Companhia Riograndense de Telecomunicações (FCRT), which manages the benefit plans of CRT, a company merged on December 28, 2000.

The Company bylaws stipulate approval of the supplementary pension policy, and the joint liability attributed to the defined benefit plans is linked to the acts signed with the foundations, with the agreement of the Supplementary Pensions Department - SPC, where applicable to the specific plans.

The plans sponsored are valued by independent actuaries on the balance sheet date and, in the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. The full liabilities are provided for plans showing deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Ruling 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing the surpluses.

The characteristics of the supplementary pension plans sponsored by the Company are described below.

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL (SISTEL)

Plans

TCSPREV (Defined Contribution, Settled Benefit, Defined Benefit)

This defined contribution and settled benefit plan was introduced on February 28, 2000, with the adherence of around 80% of the employees at that time. On December 31, 2001, all the pension plans sponsored by the Company with SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pensions Department - SPC, due to the need for adjustments to the regulations. They were subsequently transformed into defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, Convênio de Administração BrT, and the Termo de Relação Contratual Atípica, the conditions established in the original plans being maintained. In March 2003, this plan was suspended to the employees who want to be included in the supplementary pension plans sponsored by the Company. TCSPREV currently attends to around 61% of the staff.

PBS-A (Defined Benefit)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000.

PAMA - Health Care Plan for Retired Employees (Defined Contribution)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000, and also for the beneficiaries of the PBS-TCS Group, incorporated into the TCSPREV on December 31, 2001. According to a legal/actuarial appraisal, the Company's liability is exclusively limited to future contributions.

PAMEC-BrT (Health-care Plan for Supplementary Pension Beneficiaries)

Medical assistance for retirees and pensioners linked with the PBT-BrT Group, which was incorporated into the TCSPREV on December 31, 2001.

Contributions Established for the Plans

TCSPREV

Contributions to this plan were maintained on the same basis as the original plans incorporated in 2001 for each group of participants, and were established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV. In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the Company, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the Company. In the case of the PBS-TCS group, the sponsor's contribution in the quarter was 12% of the payroll of the participants; whilst the employees' contribution varies according to the age, service time and salary. An entry fee may also be payable depending on the age of entering the plan. The sponsors are responsible for the cost of all administrative expenses and risk benefits. To the quarter, contributions by the sponsor to the TCSPREV group represented on average 6.71% of the payroll of the plan participants. To the employees, the average was 6.05%.

The Company's contributions were R\$7,275 in the quarter (R\$7,268 in 2003).

PBS-A

Contributions may occur in case of accumulated deficit. As of December 31, 2003, the plan presented surplus.

PAMA

This plan is sponsored with contributions of 1.5% on payroll of active participants linked to PBS plans, segregated and sponsored by several SISTEL sponsors. In the case of Brasil Telecom, the PBS-TCS was incorporated into the TCSPREV plan on December 31, 2001, and became an internal group of the plan.

The company's contributions for this plan, that are exclusively the responsibility of the sponsors, were R\$57 in the quarter (R\$61 in 2003).

PAMEC-BrT

Contributions for this plan were fully paid in July 1998 through a single payment. New contributions will be limited to the future necessity to cover expenses, if that occurs.

FUNDAÇÃO BrTPREV

The main purpose of the Company sponsoring BrTPREV is to maintain the supplementary retirement, pension and other provisions in addition to those provided by the official social security system to participants. The actuarial system for determining the plan's cost and contributions is collective capitalization, valued annually by an independent actuary.

With the issue of Administrative Rule nr. 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the existing consolidated amount of R\$7,974 (R\$7,974 in December 31, 2003) is derived from plans sold prior to the issue of the Administrative Rule, the corresponding assets to which are already incorporated in the Company's fixed assets through the Community Telephone Plant - PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.

Brasil Telecom continued the non-paying-lines-detection process, disconnecting lines with no prospects of returning to the active base in the medium term and transferring some of the clients who negotiated their obligations to the hybrid plan (LigMix). As a result, the utilization rate was reduced to 90.1%.

Additionally, Brasil Telecom encouraged the migration of clients from the pre-paid and economical plans to the hybrid plan. **Client base segmentation seeks to match the product to the usage profile of each client and to increase the average ARPU** (net revenue/average LIS/month).

ADSL Brasil Telecom practically doubled its ADSL accesses in service in just a year, reaching 382.5 thousand accesses at the end of 2Q04.

DLD Minutes/Average LIS/Month	55.9	52.2	7.0
Fixed-Mobile Minutes/Average LIS/Month	35.6	35.3	0.9

Exceeding Local Pulses **The traffic of exceeding local pulses increased by 5.0% compared to the 1Q04, reaching 2.7 billion.**

DLD Traffic In the 2Q04, long distance traffic increased by 5.9% in comparison to the previous quarter, due to **Brasil Telecom's presence in the new long distance segments (inter-regional and international), which in turn leveraged the intra-regional traffic (+6.5%).**

LD Market Share **At the end of 2Q04, the first full quarter in which it was possible to use the CSC 14 in all long distance calls, Brasil Telecom reached a 38.0% market share in the inter-regional segment and a 19.6% share in international segment.**

Leveraged by the success of the campaigns developed for the launch of the CSC 14 use outside of the Region, the **DLD market share of Brasil Telecom increased by 2.4 p.p. in the intra-region segment and 0.9 p.p. in the intra-sector segment.** The market share in the intra-sector and intra-region segments reached 91.0% and 81.1%, respectively.

Traffic
Inter-Networks **Inter-network traffic remained stable in the 2Q04,** due to a reduction of 1.1% in the VC-1 traffic and 5.1% in the VC-2 traffic, partially offset by the increase of 42.3% in the VC-3 traffic.

Of the total inter-network traffic, 83.9% corresponds to VC-1 calls, 11.5% to VC-2 calls and 4.6% to VC-3 calls. **There was a significant increase in the VC-3 traffic as a percentage of total traffic, which represented 3.2% of the inter-network traffic in the 1Q04, explained by the increase in long distance calls using the CSC 14.**

Tariffs

Tariff Adjustments **Brasil Telecom was authorized by ANATEL to adjust the tariffs for the Local and Domestic Long Distance Services Basic Plans. The authorized average adjustments for the local and domestic long distance baskets were of 6.89% and 3.20%, respectively.** The TU-RL (Local Network Usage Rate) was adjusted by -10.47% and the TU-RIU (Long Distance Network Usage Rate) was adjusted by 3.20%.

Subsidiaries

Brasil Telecom GSM **14 Brasil Telecom Celular S.A. officially launched its trademark, Brasil Telecom GSM, on May 10, 2004.** On May 11, 2004, its brand was presented in the most prominent newspapers of the country, alongside the brands of its main partners.

Brasil Telecom GSM entered into a contract to purchase the infrastructure equipment to build its mobile network throughout the 2Q04. The contract was entered into with two international suppliers, Ericsson and Alcatel. The network is being implanted rapidly so as to obtain wide coverage in the 3Q04, when the full commercial launch is expected.

The investments expected to expand coverage in 2005 were brought forward to 2004. As a result, **Brasil Telecom GSM expects to reach the largest GSM coverage in Region II**, providing its customers with a high quality service, highlighting mobility features.

By bringing forward investments, Brasil Telecom GSM should invest approximately US\$350 million, covering about 544 localities in its operational area.

In the 2Q04, R\$200.7 million were invested in the operation, amounting to R\$364.3 million since the start of the project.

The project *Our Mobile* - where employees, their relatives and friends, residing in all states of Region II, bought mobile phones in special financing conditions - has already exceeded the mark of 18 thousand subscribers. Besides voice services, customers of *Our Mobile* are also offered a new voice mail box and a *Missed Call* service, where an SMS - Short Message Service - is sent whenever a call is made to a Brasil Telecom GSM terminal, which is either turned off or out of coverage area.

The main platforms that will be used in the mobile operations (pre-paid service, voice mail box, SMS, multimedia messages - MMS, other platforms for data services - WAP, OTA, Middleware - and anti-fraud) have already been implemented and are at the final test and improvement stage.

For its launch, Brasil Telecom GSM will have over 1,200 points of sales, including the main retail chains in Region II, authorized exclusive and non-exclusive agents, and Brasil Telecom GSM stores and kiosks.

It is worth noting that the 16 stores and 40 stands of Brasil Telecom GSM, the majority of which are located at the largest and best shopping centers of the Region, will serve not only the mobile operator customers, but also all other customers of Brasil Telecom S.A.'s wide range of products, including fixed line, ADSL, internet provider, among others.

This kind of initiative clearly illustrates that Brasil Telecom is adopting a full convergence model, involving commercial aspects, people, infrastructure, equipment, and systems.

The civil constructions are at an advanced stage. Nine out of the 16 stores have already been built and are now receiving the equipment for assembly. The information systems will also be tested soon. The remaining stores will be ready for the full commercial launch scheduled for the 3Q04.

As of the end of July, 758 employees worked at Brasil Telecom GSM, out of which 303 worked at Brasil Telecom GSM stores. Our business plan anticipates a workforce of about 1,000 employees for the commercial launch. During the quarter, the training programs of all employees in different existing systems, as well as selling and service techniques, was initiated.

Gross revenue from activation fee totaled R\$9.3 million in the 2Q04, 2.3% higher than in the 1Q04. This performance is a result of the 417.8 thousand lines activated in the 2Q04, against 404.8 thousand activated in the 1Q04.

Gross revenue from basic subscription reached R\$732.5 million in the quarter, a reduction of 1.6% compared to R\$744.7 million in the 1Q04. This difference is explained by the increase of promotional plans as a percentage of total plans in the mix of lines in service.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Gross revenue from measured service totaled R\$349.5 million in the 2Q04, an increase of 3.9% compared to the 1Q04, explained by the 5.0% increase in local traffic.

Public Telephony **Gross revenue from public telephony reached R\$119.1 million in the 2Q04, an increase of 10.1% in comparison with the 1Q04, due to selling efforts and the campaign to encourage public telephony usage.**

Inter- Network **Gross revenue from inter-network calls reached R\$738.1 million in the 2Q04, a 5.1% increase compared to 1Q04, reflecting the relative increase of VC-3 traffic - when compared to VC-1 and VC-2 - in the inter-network call mix and the tariff adjustment effective since February.**

The usage of the CSC 14 in calls originated from mobile phones contributed with revenues of R\$108.0 million in the 2Q04, against R\$78.5 million in the 1Q04.

Interconnection **Gross revenue from interconnection in the 2Q04 decreased by 6.2% compared to the 1Q04, explained by the increase in Brasil Telecom's market share in the long distance segments.**

Lease of Facilities **In the 2Q04, revenues from lease of facilities were R\$63.5 million, 15.2% greater than the R\$55.1 million reported in the 1Q04.**

Data Communication **In the 2Q04, data communications revenues reached R\$255.3 million, an increase of 15.8% compared to the previous quarter, mainly due to the 17.7% growth in ADSL accesses in service and to MetroRED's consolidation.**

- In the 2Q03, gross revenue from data communication represented 6.7% of total revenue, while in the 2Q04 this segment represented 8.4% of total gross revenue.

As of June 2004, there were 6.2 million activated intelligent services, against 6.0 million in March 2004.

Other Revenues **Other revenues reached R\$43.9 million in the 2Q04, a growth of 218.8% compared to 2Q03, mainly due to the services offered by iBest, Globenet, VANT and MetroRED.**

Gross Revenue Deductions **Gross revenue deductions reached R\$874.8 million in the 2Q04, representing 28.8% of the gross revenue for the quarter, against 28.7% in the 1Q04.**

Net Operating Revenue/Average LIS/month **Net operating revenue/Average LIS/month in the 2Q04 was of R\$744, against R\$66.0 in the 2Q03, a 12.7% increase.**

Costs and Expenses

Costs and Operating Expenses **Operating costs and expenses totaled R\$1,840.8 million in the 2Q04, against R\$1,775.1 million in the previous quarter.**

Operating costs and expenses excluding depreciation, amortization, provisions and losses were of R\$1,106.1 million in the 2Q04, against R\$1,066.0 million in the 1Q04, an increase of 3.8% compared to the previous quarter.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Number of Employees	<p>At the end of the 2Q04, Brasil Telecom's fixed telephony operation had 5,386 employees, against 5,206 in the previous quarter. This increase is a result of the 339 admissions (of which 158 relate to the consolidation of MetroRED) and 159 dismissals that occurred in the period.</p> <p>As of June 2004, Brasil Telecom GSM had 758 employees, against 265 in the 1Q04, reflecting the structuring process for the product's launch.</p>
Personnel	<p>Personnel costs and expenses reached R\$100.3 million, an increase of 6.6% compared to the previous quarter, influenced by the consolidation of MetroRED and VANT.</p>
Subcontracted Services	<p>Costs and expenses with subcontracted services, excluding interconnection and advertising & marketing, totaled R\$358.5 million in the 2Q04, a 0.8% reduction in relation to the previous quarter.</p> <p>The subcontracted services costs and expenses to net revenues ratio has been falling since the 4Q03. The ratio was 17.5% in the 4Q03, 17.4% in the 1Q04 and reached 16.6% in the 2Q04. This reduction results from the cost and expense control policy adopted by Brasil Telecom, focusing on the optimization of its administrative and maintenance cost structure.</p>
Interconnection	<p>Interconnection costs totaled R\$545.3 million in the 2Q04, a 9.9% increase compared to the previous quarter. This increase is associated with the relative increase of VC-3 traffic - when compared to VC-1 and VC-2 - in the inter-network traffic mix, the increase of long distance calls terminating outside Region II, the usage of CSC 14 in calls originated from mobile phones, and the mobile interconnection tariff adjustment effected in February.</p>
Advertisement and Marketing	<p>Expenses with advertising & marketing totaled R\$24.5 million in the 2Q04, an increase of 1.9% from the previous period.</p>
Losses with Accounts Receivable/Gross Revenue Ratio	<p>The losses with accounts receivable to gross revenue ratio was of 3.1% in the 2Q04, stable in relation to the 1Q04. Losses with accounts receivable totaled R\$95.3 million in the 2Q04.</p>
Accounts Receivable	<p>In the 2Q04, the gross accounts receivable to gross revenue ratio dropped from 72.2% to 70.7%, meaning that the increase in gross revenues was higher than the increase in accounts receivable in the period.</p> <p>Gross accounts receivable in the 2Q04 increased as a result of the CSC 14 operation in the inter-regional and international segments and by the usage of the CSC 14 in calls originated from mobile phones. Co-billing with other mobile operators results in a bad debt percentage above the average percentage of the other segments in which we operate.</p> <p>Deducting for the provision for doubtful accounts in the amount of R\$185.4 million, Brasil Telecom's net accounts receivable totaled R\$1,960.6 million at the end of the 2Q04.</p>
Provisions for Contingencies	<p>In the 2Q04, provisions for contingencies totaled R\$39.7 million, an increase of 76.5% compared to the previous quarter.</p>
<u>EBITDA</u>	
EBITDA of R\$921.4 million	<p>Brasil Telecom's EBITDA was of R\$921.4 million in the 2Q04, R\$22.3 million above the 1Q04's EBITDA, or a 2.5% increase quarter-on-quarter.</p>
EBITDA Margin	<p>In the 2Q04, Brasil Telecom's EBITDA margin reached 42.6%. It is important to mention Brasil Telecom's operation in the long distance segments, where the margin is pressured by competition. Provision for labor contingencies also affected the margin in this quarter.</p> <p>Not accounting for non-recurring items evidenced in the quarter in provisions for contingencies, EBITDA would have reached R\$947.4 million, which represents a margin of 43.8%.</p>

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Indebtness

Total Debt As of June 2004, Brasil Telecom's consolidated total debt was of R\$5.2 billion, 1.9% higher than the amount reported in the 1Q04. This increase is a result of the strategy adopted by the Company throughout the year to increase the debt maturity while seeking cheaper financing options. Accordingly, in April, Brasil Telecom raised 21.5 billion of yens (approximately R\$577 million) from JBIC - Japan Bank for International Cooperation, which coincided with the payment of the first issuance of public debentures issued in May 2002, in an amount of R\$500 million.

Net Debt Net debt totaled R\$3,184.3 million, a 17.2% increase compared to March 2004. Not accounting for inter-company debt and the private debenture with the holding company, the net debt as of June was of R\$1,709.0 million.

The increase in net debt is explained by the cash reduction in the 2Q04, due to acquisitions, investments and dividend payments related to 2003.

Average Cost of Debt Brasil Telecom's consolidated debt had an accumulated average cost of 15.2% in the year.

Financial Leverage As of June 30, 2004, Brasil Telecom's financial leverage, represented by the ratio of its net debt (excluding the debt with the holding company) to shareholders' equity, was equal to 25.9%, against 19.8% in March.
