1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, joint ventures, joint operations and associates are collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN is listed on the São Paulo Stock Exchange (BM&F BOVESPA) and on the New York Stock Exchange (NYSE). Accordingly, the Company reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

• **Steel:**

The Company’s main industrial facility is the Presidente Vargas steelworks (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany, all of them are in line with the plan to achieve new markets and perform excellent services for final consumers. Its steel has been used in home appliances, civil construction and automobile industries.

• **Mining:**

The production of iron ore is developed in the city of Congonhas, State of Minas Gerais.

Iron ore is sold basically in the international market, especially in Europe and Asia. The prices charged in these markets are historically cyclical and subject to significant fluctuations over short periods of time, driven by several factors related to global demand, strategies adopted by the major steel producers, and the foreign exchange rate. All these factors are beyond the Company's control. The ore transportation is accomplished by Terminal de Carvão e Minérios do Porto de Itaguaí - TECAR, a solid bulk terminal, one of the four terminals that compose the Port of Itaguaí, located in Rio de Janeiro. Imports of coal and coke are held through this terminal and directed to the steel industry of CSN.

From November 30, 2015 the Company has transferred its mining assets, together with its logistical infrastructure, which includes the mine Casa de Pedra and the right to operate the terminal TECAR, to its subsidiary Congonhas Minérios S.A. In the new structure Congonhas Minérios S.A. has taken control over Nacional Minérios S.A. (NAMISA) through a business combination transaction.

The Company's mining activities also comprises tin exploitation, which is based in the State of Rondônia, this facility is engaged to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties.

• **Cement:**

CSN entered in the cement market boosted by the synergy between this new activity and its existing businesses. Next to the Presidente Vargas Steelworks (UPV) in Volta Redonda (RJ), it is installed a new business unit: CSN Cimentos, which produces CP-III type of cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arcos unit, located in the State of Minas Gerais, to satisfy the needs of UPV as of the cement plant.

III - Financial risk management

As of June 30, 2016, there were no changes in the financial risk management policies in relation to those disclosed in the Company's financial statements for the year ended December 31, 2015.

12.a) Foreign exchange and interest rate risks**• Exchange rate risk**

The exchange rate risk arises from the existence of assets and liabilities generated in US dollars or Euros is called natural currency exposure. Net exposure is the result of offsetting the natural currency exposure by hedging instruments adopted by CSN.

The consolidated net exposure as of June 30, 2016 is as follows:

Foreign Exchange Exposure	(Amounts in US\$'000)	06/30/2016 (Amounts in €'000)
Cash and cash equivalents overseas	802,027	56,126
Trade receivables	306,844	9,423
Other assets	9,740	15,840
Total assets	1,118,611	81,389
Borrowings and financing	(4,437,097)	(97,581)
Trade payables	(5,988)	(8,840)
Other liabilities	(7,216)	(81,329)
Total liabilities	(4,450,301)	(187,750)
Foreing exchange exposure	(3,331,690)	(106,361)
Cash flow hedge accounting	1,541,000	
Net Investment hedge accounting		96,000
Net foreign exchange exposure	(1,790,690)	(10,361)
Bonds Perpetual	1,000,000	
Net currency exposure of the Perpetual Notes	(790,690)	(10,361)

During the second quarter of 2016 CSN initiated a process of reviewing its foreign exchange hedging strategy that resulted in the liquidation of the future dollar derivatives portfolio. Consequently, the net

foreign exchange exposure on our consolidated balance sheet as of June 30, 2016 was US\$1,790,690 thousand, as shown in the table above. It is important to mention that included in the net foreign exchange exposure there is a liability of US\$ 1 billion, classified as loans and financing, related to perpetual bonds; which will not require a disbursement to settle its principal in the foreseeable future considering the corresponding nature. The company began to focus its hedging strategy to preserve its cash flow and is analyzing the replacement of the exposure generated by the settlement of derivatives with new designations of hedge accounting, capturing existing natural relations, and may also utilize other derivative instruments with the objective of protecting future cash flows.

- **Interest rate risk**

Risk arises from short and long term liabilities with fixed or post fixed interest rates and inflation rates.

12.b) CSN uses several instruments for protection of foreign currency risk and interest rate risk, as shown in the following topics:

Hedge accounting – cash flow

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to protect highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on its profit, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising on translating the designated liabilities shall be temporarily recognized in shareholders' equity and allocated to profit or loss when such exports are carried out, which will allow recognizing the US dollar impact on liabilities and exports concurrently.

The table below shows a summary of the hedging relationships as of June 30, 2016:

(*) The effect on the financial result was recorded in net foreign exchange rates.

(1) During the designation on August 2015, we reviewed the future export projections and identified that the amount of US\$ 9 million designated previously were not highly probable due to Platt's quotation reduction. Therefore, the hedge relationship was discontinued from August 2015. The exchange rate of the effective period remains recorded in Stockholders' Equity until the time of debt settlement.

In the hedging relationships described above, the amounts of the debt instruments were fully designated for equivalent iron ore export portions.

The movements in the hedge accounting amounts recognized in shareholders' equity as of June 30, 2016 are as follows:

	12/31/2015	Movement	Realiza
Cash flow hedge accounting	1,520,090	(1,072,884)	(20,5

Cash flow hedge accounting	1,361,210	(1,066,054)	(13,5

As of June 30, 2016 the hedging relationships established by the Company were effective, according to the prospective tests conducted. Thus, no reversal for hedge accounting ineffectiveness was recognized.

• **Net investment hedge in foreign subsidiaries**

CSN has foreign exchange exposure in Euros arising from a loan made by a foreign subsidiary with functional currency in Reais, for the acquisition of investments abroad whose functional currency is Euro. Such exposure arises from converting the balance sheets of these subsidiaries for consolidation in CSN, and the exchange rate of the loans affected the income statement in the financial result item and the exchange variation of the net assets of the foreign operation directly affected the equity in other comprehensive income.

As from September 1st, 2015 CSN began to adopt hedge of net investment to eliminate exposure in order to cover future fluctuations of the Euro on such loans. Non-derivative financial liabilities have been designated represented by loan agreements with financial institutions in the amount of € 120 million. The carrying amounts on June 30, 2016 are:

Designation Date	Hedging Instrument	Hedged item	Type of hedged risk	Exchange rate on designation	Designated amounts (EUR'000)	06/30/2016 Impact on shareholders' equity
9/1/2015	Non-derivative financial liabilities in EUR – Debt contract	Investments in subsidiaries which EUR is the functional currency	Foreign exchange - R\$ vs. EUR spot rate	4.0825	120,000	47,916

(1) In January 2016 it was settled the portion of debt designated as a hedge instrument.

(*) The Company taxes the foreign exchange differences on a cash basis to calculate income tax and social contribution.

The Company has foreign subsidiaries in its corporate structure, for which profits are taxed at income tax in the countries where they are domiciled by lower rates than those prevailing in Brazil. From 2012 up to the 2nd quarter of 2016 such foreign subsidiaries generated profits amounting to R\$1,706,873. If for some reason tax authorities understand that these profits are subject to additional taxation in Brazil in respect of income tax and social contribution, which if due, would total R\$459.628.

The Company, based on its legal counsel's opinion, assessed the likelihood of loss in a potential claiming by tax authorities which resulted in a possible risk of loss and, therefore, no provision was recognized in the financial statements.

Adjusted EBITDA is the measurement based on which the chief operating decision maker assesses the segment performance and the capacity to generate recurring operating cash, consisting of profit for the year less net finance income (costs), income tax and social contribution, depreciation and amortization, equity in results of affiliated companies, and other operating income (expenses), plus the proportionate EBITDA of joint ventures.

Even though it is an indicator used in segment performance measurement, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, it does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices:

26. INSURANCE

Aiming to properly mitigate risk and in view of the nature of its operations, the Company and its subsidiaries have taken out several different types of insurance policies. Such policies are contracted in line with the CSN Risk Management policy and are similar to the insurance taken out by other companies operating in the same lines of business as CSN and its subsidiaries. The risks covered under such policies include the following: Domestic Transportation, International Transportation, Life and Casualty, Health Coverage, Fleet Vehicles, D&O (Civil Liability Insurance for Directors and Officers), General Civil Liability, Engineering Risks, naming Risks, Export Credit, warranty and Port Operator's Civil Liability.

In 2015, after negotiation with insurers and reinsurers in Brazil and abroad, an insurance policy was issued for the contracting of a policy of Operational Risk of Property Damages and Loss of Profits, with effect from September 30, 2015 to September 30, 2016. Under the insurance policy, the LMI (Maximum Limit of Indemnity) is US\$600 million and covers the following units and subsidiaries of the Company: Presidente Vargas steelworks, Congonhas Minérios, Sepetiba Tecon, and CSN Mining. CSN takes responsibility for a range of retention of US\$375 million in excess of the deductibles for property damages and loss of profits.

In view of their nature, the risk assumptions adopted are not part of the scope of an audit of the financial statements and, accordingly, were not audited by our independent auditors.

Companhia Siderúrgica Nacional

São Paulo – SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Companhia Siderúrgica Nacional (the “Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the six-month period ended June 30, 2016, which comprises the balance sheet as of June 30, 2016 and the related statements of income and comprehensive income for the three and six-month period then ended, and statement of changes in equity and cash flows for the six-month period ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) Interim Financial Information and international standard IAS 34 Interim Financial Reporting, issued by the International Accounting Standards Board IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of the Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the interim financial information referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the CVM.

Emphasis of Matter

Restatement of interim financial information

We have issued our review report on August 15, 2016 without modifications on the Company's individual and consolidated interim financial information, which are being restated. As described in note 2.e) to the interim financial information, the interim financial information were adjusted and are being restated to reflect a change in interpretation in respect to the application of CPC15 (R1) / IFRS 3 – “Business Combination”, as part of the business combination of the subsidiary Congonhas Minérios S.A. Our conclusion is not qualified in respect of this matter.

Restatement of amounts from prior year

The individual and consolidated corresponding values, related to the cash flow statement for the six-month period ended June 30, 2015 are being restated accordingly to the matter described at note 2.d).

Other Matters

We have also reviewed the individual and consolidated statements of value added (DVA) for the six-month period ended June 30, 2016, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR) and considered as supplemental information for International Financial Reporting Standards IFRSs, which do not require the presentation of DVA. These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.

The accompanying individual and consolidated interim financial information has been translated into English for the convenience of readers outside Brazil.
