PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Form 20-F

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

In this annual report, the terms "Bradesco," the "Company," the "Bank," the "Bradesco Group," "we," the "Organization," "our" and "us" refer to Banco Bradesco S.A. *sociedade anônima* organized under the laws of Brazil and, unless otherwise indicated, its consolidated subsidiaries.

All references herein to "real," "reais" or "R\$" refer to the Brazilian Real, the official currency of Brazil. References herein to "U.S. dollars," "dollar" and "US\$" refer to United States dollars, the official currency of the United States of America ("USA").

Our audited consolidated financial statements as of and for the years ended December 31, 2018 and 2017 and for the years ended December 31, 2018, 2017 and 2016 and the corresponding notes, which are included under "Item 18. Financial Statements" of this annual report, were prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

We use accounting practices adopted in Brazil for financial institutions authorized to operate by the Central Bank of Brazil (*Banco Central do Brasil*, or the "Central Bank") for certain purposes, such as performance assessment, decision-making, preparation of reports for Brazilian shareholders, filings with the Brazilian Securities and Exchange Commission ("CVM"), attendance and observation of limits and requirements of local regulators and determining dividend and federal income tax payments.

Some data related to economic sectors presented in this annual report was obtained from the following sources: B3 (*Brasil, Bolsa, Balcão*) or ("B3"); Brazilian Association of Credit Card Companies and Services (*Associação Brasileira das Empresas de Cartão de Crédito e Serviços*), or ("ABECS"); Brazilian Association of Leasing Companies (*Associação Brasileira de Empresas de Leasing*), or ("ABEL"); Brazilian Association of Financial and Capital Markets Entities (*Associação Brasileira das Entidades dos Mercados Financeiros e de Capitais*), or ("ANBIMA"); Brazilian Health Insurance Authority (*Agência Nacional de Saúde Suplementar*), or ("ANS"); Central Bank; Brazilian Bank of Economic and Social Development (*Banco Nacional de Desenvolvimento Econômico e Social*), or ("BNDES"); National Association of Private Pension Plans and Life (*Federação Nacional de Previdência Privada e Vida*), or ("FENAPREVI"); Getulio Vargas Foundation (*Fundação Getulio Vargas*), or ("FGV"); and Private Insurance Superintendence (*Superintendência de Seguros Privados*), or ("SUSEP").

Certain figures included in this annual report have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be an arithmetic aggregation of the figures that precede them.

References in this annual report to the "common shares" and "preferred shares" are to our common shares and preferred shares, respectively, and together our "shares." References to "preferred share ADSs" in this annual report are to preferred share American Depositary Shares, each representing one preferred share. The preferred share ADSs are evidenced by preferred share American Depositary Receipts, or preferred

share ADRs, issued pursuant to an Amended and Restated Deposit Agreement, dated as of December 11, 2015, by and among us, The Bank of New York Mellon, as depositary, and the holders and beneficial owners of preferred share ADSs evidenced by preferred share ADRs issued thereunder (the "Preferred Share ADS Deposit Agreement").

References to "common share ADSs" in this annual report are related to common share American Depositary Shares, with each common share ADS representing one common share. The common share ADSs are evidenced by common share American Depositary Receipts, or common share ADRs, issued pursuant to an Amended and Restated Deposit Agreement dated as of December 11, 2015, by and among us, The Bank of New York Mellon, as depositary, and the holders and beneficial owners of common share ADSs evidenced by common share ADRs issued thereunder (the "Common Share ADS Deposit Agreement" and, together with the "Preferred Share ADS Deposit Agreement," the "Deposit Agreements").

References throughout this annual report to "ADSs" are to our preferred share ADSs and common share ADSs, together.

Throughout this annual report, we may indicate that certain information is available at different websites operated by us. None of the information on the websites referred to or mentioned in this annual report is part of or is incorporated by reference herein.

Form 20-F

FORWARD LOOKING STATEMENTS

This annual report contains forward looking statements as defined in Section 27A of the Securities Act of 1933, as amended, or the "Securities Act," and Section 21E of the Securities Exchange Act of 1934, as amended, or the "Exchange Act." These statements are based mainly on our current expectations and projections of future events and financial trends that affect or might affect our business. In addition to the items discussed in other sections of this annual report, there are many significant factors that could cause our financial condition and results of operations to differ materially from those set out in our forward-looking statements, including, but not limited to, the following:

- the current instability in Brazilian macroeconomic conditions, together with political, economic and business uncertainties, as well as instabilities in global markets
- risks of lending, credit, investments and other activities;
- our level of capitalization;
- cost and availability of funds;
- higher levels of delinquency by borrowers, credit delinquency and other delinquency events leading to higher impairment of loans and advances;
- loss of customers or other sources of income;
- our ability to execute our investment strategies, capital expenditure plans and to maintain and improve our operating performance;
- our revenues from new products and businesses;
- adverse claims, legal or regulatory disputes or proceedings;
- inflation, fluctuations in the value of the *real* and/or interest rates, which could adversely affect our margins;
- competitive conditions in the banking, financial services, credit card, asset management, insurance sectors and related industries;
- any failures in, or breaches of, our operational, security or technology systems;
- the market value of securities, particularly Brazilian government securities; and
- changes by the Central Bank and others in laws and regulations, applicable to us and our activities, including, but not limited to, those affecting tax matters.

Words such as "believe," "expect," "continue," "understand," "estimate," "will," "may," "anticipate," "should," "intend," and other similar expressions identify forward looking statements. These statements refer only to the date on which they were made, and we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or any other event.

In light of these risks and uncertainties, the forward looking statements, events and circumstances discussed in this annual report may not be accurate, and our actual results and performance could differ materially from those anticipated in our forward-looking statements. Investors should not make investment decisions based solely on the forward-looking statements in this annual report.

6 Form 20-F – December 2018

PART I
Form 20-F

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT, AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

3.A. Selected Financial Data

We present below our selected financial data derived from our consolidated financial statements as of and for the years ended December 31, 2018, 2017, 2016, 2015 and 2014, which have been prepared in accordance with IFRS as issued by the IASB and audited by KPMG Auditores Independentes, an independent registered public accounting firm. The data as of and for the years ended December 31, 2018 and 2017 is derived from our consolidated financial statements included in this annual report. The data for the years ended December 31, 2016, 2015 and 2014 is derived from our consolidated financial statements, which are not included herein.

In 2018, we adopted IFRS 9 – Financial instruments, which replaced IAS 39, which established a new approach for the classification and measurement of financial assets and liabilities, impairment, which replaces incurred losses with expected losses and hedge accounting. This adoption had its effects applied as of January 1, 2018, as a result, certain tables containing financial data in this annual report are not comparable with previous periods, as noted in relation to each such applicable table in this annual report. For more details on the transition process from IAS 39 to IFRS 9, see Note 47 of our Financial Statements in "Item 18. Financial Statements."

The following selected financial data should be read together with the "Presentation of Financial and Other Information" and "Item 5. Operating and Financial Review and Prospects."

Form 20-F

3.D. Risk Factors

Macroeconomic risks

The current weakness in Brazilian macroeconomic conditions and the market perception of certain economic and political risks alongside uncertainties relating to Brazil, including high-profile anti-corruption investigations, may have a material adverse effect on our financial condition and on the results of operations.

The vast majority of our operations are conducted in Brazil and, accordingly, our results are significantly impacted by macroeconomic conditions in Brazil. The reorientation of the Brazilian economic policy, initiated in 2016, enabled the advancement of measures aimed at minimizing imbalances. Some of these actions included: (i) the imposition of a ceiling on public spending; (ii) a change in the management of state-owned enterprises, including financial institutions; (iii) the creation of the Long-term Rate (TLP - *Taxa de Longo Prazo*); (iv) recovery of the credibility of monetary and fiscal policies; (v) a reduction in the information asymmetry in the credit market, with the approval of the compliant debtors; (vi) the strengthening of guarantees, with the passing of the dissolution law (*Lei do Distrato*) and regulation of the Covered Bonds (LIG - *Letras Imobiliárias Garantidas*); and (vii) the labor reform. The anchoring of inflation expectations allowed the Central Bank to reduce the basic interest rate to the lowest level in history, maintaining it at 6.5% over most of 2018. From a fiscal perspective, despite the advances mentioned above and the recovery of revenues, there is still concern regarding the sustainability of Brazil's national debt remained present, especially in light of the lack of progress in relation to the pension reform.

The executive branch of the Brazilian government (the "Federal Government") sought a vote on the pension reform by Congress during the first half of 2018. However, due to the presidential, governors, senators and Congressman elections in October 2018 and the federal intervention in the area of public security in the State of Rio de Janeiro, the pension reform was not voted by the Brazilian Congress.

In October 2018, the then candidate Jair Messias Bolsonaro, a retired military officer and former congressman, was elected President of the Federative Republic of Brazil .

In February 2019, the current government's economic team presented to the National Congress a proposal for a constitutional amendment relative to the pension reform, expecting vote in the first half of 2019. Potential significant changes in economic policy may affect our operating results negatively or positively as well as the market value of our shares, preferred share ADSs and common share ADSs, in addition to the Brazilian economy in general.

In 2014, the Brazilian Federal Police and the Prosecution Office commenced a series of anti-corruption investigations called "Operation Car Wash" ("*Operação Lava Jato*") in which, among other matters, certain officers and employees of *Petróleo Brasileiro S.A. ("Petrobras")*, a Brazilian state-controlled company, were accused of accepting illegal payments in order to wrongly influence commercial decisions of Petrobras. During the course of 2014, 2015 and 2016, these anti-corruption investigations have expanded and have given rise to various criminal proceedings involving not only senior officers and employees of Petrobras but also senior officers of companies in Brazil, notably in the construction sector and some politicians. In the U.S., the SEC and the Department of Justice are also conducting their own investigations into a number of these allegations. The high-profile nature of these investigations may have momentarily harmed the reputation of Brazil, which could reduce investor confidence, making it more difficult for companies located in Brazil to obtain funding. We cannot predict how long the anti-corruption investigations will continue, or how significant the effects of the anti-corruption investigations may be for the Brazilian economy. If uncertainty surrounding the Brazilian economy continues, or if there is a material reduction in investor confidence as a result of these investigations, the results of our operations may be adversely affected.

In addition, our subsidiary Banco Bradesco BBI S.A. ("Bradesco BBI") is a party to certain legal and administrative proceedings filed against Petrobras and other defendants, due to its role as underwriter in a note offering of Petrobras. The settlement agreement was authorized by the judge. However, appeals were presented on the merits of the case, which are awaiting trial. We or our subsidiaries may become a party to other legal and/or administrative proceedings against Petrobras or other companies which have not yet been filed. A negative outcome of these ongoing legal proceedings or any new legal proceedings may harm our reputation and may adversely affect our financial condition and our results of operations.

10 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

The progress of the "Lava Jato" investigation and the unfolding events and the possibility of new accusations may significantly change the Brazilian political and economic climate.

The continuation of any of, or combination of, these factors may lead to a further slowdown in GDP growth, which may have an adverse effect on our financial condition and our results of operations.

The government exercises influence over the Brazilian economy, and Brazilian political and economic conditions have a direct impact on our business.

Our financial condition and results of operations are substantially dependent on Brazil's economy, which in the past has been characterized by frequent and occasionally drastic intervention by the government and volatile economic cycles.

In the past, the Brazilian government has often changed monetary, fiscal, taxation and other policies to influence the course of Brazil's economy. We have no control over, and cannot predict, what measures or policies the government may take in response to the current or future Brazilian economic situation or how government intervention and government policies will affect the Brazilian economy and our operations and revenues.

Our operations, financial condition and the market price of our shares, preferred share ADSs and common share ADSs may be adversely affected by changes in certain policies related to exchange controls, tax and other matters, as well as factors such as:

- exchange rate fluctuations;
- base interest rate fluctuations;
- domestic economic growth;
- political, social or economic instability;
- monetary policies;
- tax policy and changes in tax regimes;
- exchange controls policies;
- liquidity of domestic financial, capital and credit markets;
- our customers' capacity to meet their other obligations with us;
- decreases in wage and income levels;

- increases in unemployment rates;
- macroprudential measures;
- inflation;
- allegations of corruption against political parties, public officials, including allegations made in relation to the "Operation Car Wash" investigation, among others; and
- other political, diplomatic, social and economic developments within and outside of Brazil that affect the country.

Changes in, or uncertainties regarding, the implementation of the policies listed above could contribute to economic uncertainty in Brazil, thereby increasing the volatility of the Brazilian securities market and reducing the value of Brazilian securities traded internally or abroad.

Historically, the country's political scenario has influenced the performance of the Brazilian economy and political crises have affected the confidence of investors and the general public, which resulted in economic deceleration and heightened volatility in the securities issued abroad by companies based in Brazil.

The current government is expected to conduct an economic agenda with actions to reduce government expenditure and stimulate growth. The macroeconomic priorities are: (i) the adoption of measures to reduce the public deficit; (ii) the Pension Reform; (iii) the opening of the economy; and (iv) the generation of more jobs. We cannot guarantee that the current government will maintain the same economic policies adopted by the prior government.

If the current Brazilian government decides to make significant changes to economic policy as of 2019, these changes may adversely affect our operating results and the market value of our shares, preferred shares ADSs and common shares ADSs, as well as the Brazilian economy in general.

11 Bradesco

Form 20-F

In addition, uncertainties about the current government can influence the perception of risk of investing in Brazil among foreign investors, which in turn may adversely affect the market value of our shares, preferred shares ADSs and common shares ADSs. For example, the market value of Brazilian companies became more volatile during the recent presidential elections.

Currency exchange variations may have an adverse effect on the Brazilian economy and on our results and financial condition.

Fluctuations in the value of the *real* may impact our business. After an extended period of appreciation, interrupted only in late 2008 as a result of the global crisis, the Brazilian *real* started to weaken in mid-2011. This trend accelerated during the following four years and was interrupted in 2016. Weaker currency periods make certain local manufacturers (particularly exporters) more competitive, but also make managing economic policy, particularly inflation, increasingly difficult, even with a slowdown in growth. A weaker *real* also adversely impacts companies based in Brazil with U.S. dollar indexed to and/or denominated debt.

As of December 31, 2018, the net exposure in relation to our assets and liabilities denominated in, or indexed to, foreign currencies (primarily U.S. dollars) was 38.6% of our net asset. If the Brazilian currency devaluates or depreciates, we risk losses on our liabilities denominated in, or indexed to, foreign currencies, such as our U.S. dollar denominated long-term debt and foreign currency loans, and experience gains on our monetary assets denominated in or indexed to foreign currencies, as the liabilities and assets are translated into *reais*. Accordingly, if our liabilities denominated in, or indexed to, foreign currencies significantly exceed our monetary assets denominated in, or indexed to, foreign currencies, including any financial instruments entered into for hedging purposes, a large devaluation or depreciation of the Brazilian currency could materially and adversely affect our financial results and the market price of our shares, preferred share ADSs and common share ADSs, even if the value of the liabilities has not changed in their originated currency. In addition, our lending transactions depend significantly on our capacity to match the cost of funds indexed to the U.S. dollar with the rates charged to our customers. A significant devaluation or depreciation of the U.S. dollar may affect our ability to attract customers on such terms or to charge rates indexed to the U.S. dollar.

Conversely, when the Brazilian currency appreciates, we may incur losses on our monetary assets denominated in, or indexed to, foreign currencies, mainly, the U.S. dollar, and we may experience decreases in our liabilities denominated in, or indexed to, foreign currencies, as the liabilities and assets are translated into *reais*. Therefore, if our monetary assets denominated in, or indexed to, foreign currencies significantly exceed our liabilities denominated in, or indexed to, foreign currencies, including any financial instruments entered into for hedging purposes, a large appreciation of the Brazilian currency could materially and adversely affect our financial results even if the value of the monetary assets has not changed in their originated currency.

If Brazil experiences substantial inflation in the future, our revenues and our ability to access foreign financial markets may be reduced.

Brazil has, in the past, experienced extremely high rates of inflation. Inflation and governmental measures to combat inflation had significant negative effects on the Brazilian economy and contributed to increased economic uncertainty in Brazil and heightened volatility in the Brazilian securities markets, which may have an adverse effect on us.

The memory of, and the potential for inflation, is still present, despite the monetary stability achieved in the mid-1990s, which intensified after 1999 as a result of the adoption of inflation targeting norms. There are still concerns that inflation levels might rise again in the future. Current economic policy in Brazil is premised on a monetary regime which the Central Bank oversees in order to assure that the effective rate of inflation keeps in line with a predetermined and previously announced target. Brazil's rates of inflation reached 3.8% in 2018, 3.0% in 2017 and 6.3% in 2016, as measured by the Extended Consumer Price Index - "IPCA" (*Índice Nacional de Preços ao Consumidor Amplo*).

The recent government measures to combat inflation include maintaining an expansive monetary policy to reduce the interest rates in order to increase the availability of credit and drive the economic growth. Decreases in the base interest rate ("SELIC") set by the Committee of the Central Bank (*Comitê de Política Monetária* – "COPOM") may have an adverse effect on us by reducing the interest income we receive from our interest-earning assets and lowering our revenues and margins. Increases in SELIC rate may also have an adverse effect on us by reducing the demand for our credit, and increasing our cost of funds, domestic debt expense and the risk of customer default.

12 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

Future government actions, including the imposition of taxes, intervention in the foreign exchange market and actions to adjust or fix the value of the *real*, as well as any GDP growth different from expected levels may trigger increases in inflation. If Brazil experiences fluctuations in rates of inflation in the future, our costs and net margins may be affected and, if investor confidence lags, the price of our securities may fall. Inflationary pressures may also affect our ability to access foreign financial and capital markets and may lead to counter-inflationary policies that may have an adverse effect on our business, financial condition, results of operations and the market value of our shares, preferred share ADSs and common share ADSs.

Changes in base interest rate by the Central Bank may materially adversely affect our margins and results of operations.

The stabilization of inflation allowed the Central Bank to reduce the basic interest rate to the lowest level in history. The base interest rate (SELIC) was 6.5%, 7.0% and 13.75% *per annum* (“*p.a.*”) as of December 31, 2018, 2017 and 2016, respectively. Changes in the base interest rate may affect our results of operations as we have assets and liabilities indexed to the SELIC. At the same time, high base interest rates may increase the likelihood of customer delinquency, due to the deceleration in the economic activity. Similarly, low base interest rates may increase the leverage of borrowers, generating additional risk to financial system.

The COPOM adjusts the SELIC rate in order to keep inflation within the range of targets set by the National Monetary Council (CMN) to manage the Brazilian economy. We have no control over the SELIC rate or how often such a rate is adjusted.

Developments and the perception of risk in Brazil and other countries, especially emerging market countries, may adversely affect the market price of Brazilian securities, including our shares, preferred share ADSs and common share ADSs.

The market value of securities of Brazilian companies is affected to varying degrees by economic and market conditions in other countries, including other Latin American and emerging market countries. Although economic conditions in these countries may differ significantly from economic conditions in Brazil, investors' reactions to developments in these other countries may have an adverse effect on the market value of securities of issuers based in Brazil. Crises in other emerging market countries may diminish investor interest in securities of issuers based in Brazil, including ours, which could adversely affect the market price of our shares, preferred share ADSs and common share ADSs.

The exit of the United Kingdom (the “U.K.”) from the European Union could adversely impact global economic or market conditions.

On June 23, 2016, the U.K. electorate voted in a general referendum in favor of the U.K.'s exit from the European Union (so-called “Brexit”). On March 29, 2017, the U.K. gave formal notice under Article 50 of the Treaty on European Union of its intention to leave the European Union. The announcement of Brexit caused significant volatility in global stock markets and currency exchange rate fluctuations. The ongoing process of negotiations between the U.K. and the European Union will determine the future terms of the

U.K.'s relationship with the European Union, including access to European Union markets, either during a transitional period or more permanently. Brexit could lead to potentially divergent laws and regulations as the U.K. determines which European Union laws to replace or replicate. Uncertainty regarding the terms of Brexit, and its eventual effects once implemented, could adversely affect European or global economic or market conditions and investor confidence. This could, in turn, adversely affect our business and/or the market value of our shares, preferred share ADSs and common share ADSs.

Our investments in debts issued by the Brazilian government expose us to additional risks associated with Brazil.

We invest in debt securities issued by the Brazilian government. The trading price of these securities is affected by, among other things, market conditions in Brazil, the perception of Brazil and the related perception of the Brazilian government's ability to repay principal and/or make interest payments. Accordingly, adverse developments or trends in any of these areas could have a knock-on adverse effect on the value of our securities portfolio, thereby affecting our financial condition and results of operations, which may affect the market value of our shares, preferred share ADSs and common share ADSs.

Form 20-F

Risks relating to us and the Brazilian banking industry***We may be subject to negative consequences of the judicial process arising from Operation Zelotes, including the filing of a class-action lawsuit.***

On May 31, 2016, three members of our Board of Executive Officers have been charged by the Brazilian Federal Police under the so-called Operation Zelotes or "*Operação Zelotes*", which investigates the alleged improper performance of members of CARF - Administrative Council of Tax Appeals. On July 28, 2016, the Public Prosecutor's Office filed charges against three members of our Board of Executive Officers, and a former member of our Board of Directors, which was received by the Federal District Judiciary Section's 10th Federal Court Judge. Currently, only two members of Bradesco's Board of Executive Officers remain in the process. The business executives presented their responses in the criminal case, pointing out facts and evidence demonstrating their innocence. The investigation phase of the process was already completed, and is currently waiting for the decision of the first degree court.

The Company's Management conducted a careful internal evaluation of records and documents related to the matter and found no evidence of any illegal conduct practiced by its representatives. We provide all of the information requested to the competent regulatory bodies, both in Brazil and abroad.

As a result of the news of *Operação Zelotes*, a Class Action was filed against Bradesco and three members of its Board of Executive Officers before the District Court of New York, on June 3, 2016, based on Section 10 (b) and 20 (a) of the Securities Exchange Act of 1934. The action is based on the allegation that investors who purchased our preferred American Depositary Shares between April 30, 2012 and July 27, 2016 had suffered losses caused by alleged violation regarding the American laws of capital markets. On September 29, 2017, the Court limited the proposed class to investors who purchased preferred ADS Bradesco between August 8, 2014 and July 27, 2016, and excluding one of the executives of the action. The Class Action is in the phase of Pre-trial Discovery, and is awaiting a decision regarding the petition of Class Certification by the Lead Plaintiff, which we have already contested.

Also as a result of the news about *Operação Zelotes*, we were summoned by the Corregedoria Geral do Ministério da Fazenda for the opening of an administrative investigation to verify the need to file an Administrative Accountability Process ("PAR"). The Administrative Accountability Process may imply the application of fine against us and/or be mentioned in public lists that may eventually bring restrictions on business with public entities.

Financial institutions can be legally involved in lawsuits originating from actions related to anti-corruption and money laundering to terrorism financing ("PLD/FT").

The anti-corruption agenda of the country, including the prevention of money laundering and the financing of terrorism ("PLD/FT"), may result in new operations and actions on the theme. Financial institutions, including Bradesco, could be involved in legal actions resulting from the actions perpetrated by individuals or legal entities related to inappropriate uses of the financial system for various purposes or unlawful acts, despite Bradesco being in compliance with the current obligations. Involvement in these actions may result

in negative publicity for us, and adverse conclusions may negatively affect our financial condition, our results of operations and the market value of our shares, preferred shares ADSs and common shares ADSs.

14 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

We may experience increases in our level of past due loans as our loans and advances portfolio becomes more seasoned.

Historically, our loans and advances to customer portfolios registered an increase, interrupted in 2017 due to recession in the Brazilian economy experienced during the year, and resuming growth in 2018. Any corresponding rise in our level of non-performing loans and advances may lag behind the rate of loan growth, as loans typically do not have due payments for a short period of time after their origination. Levels of past due loans are normally higher among our individual clients than our corporate clients.

Our delinquency ratios, calculated based on information prepared in accordance with accounting practices adopted in Brazil (“BR GAAP”), which is defined as the total loans overdue for over ninety days in relation to the total portfolio of loans and advances decreased to 3.5% in 2018, compared to 4.7% in 2017 and 5.5% in 2016.

Rapid loan growth may also reduce our ratio of non-performing loans to total loans until growth slows or the portfolio becomes more seasoned. Adverse economic conditions and a slower growth rate for our loans and advances to customers may result in increases in our impairment of loans and advances and our ratio of non-performing loans and advances to total loans and advances, which may have an adverse effect on our business, financial condition and results of operations.

Adverse conditions in the credit and capital markets, just like the value and/or perception of value of Brazilian government securities, may adversely affect our ability to access funding in a cost effective and/or timely manner.

Volatility as well as uncertainties in the credit and capital markets have generally decreased liquidity, with increased costs of funding for financial institutions and corporations. These conditions may impact our ability to replace, in a cost effective and/or timely manner, maturing liabilities and/or access funding to execute our growth strategy.

Part of our funding originates from repurchase agreements, which are largely guaranteed by Brazilian government securities. These types of transaction are generally short-term and volatile in terms of volume, as they are directly impacted by market liquidity. As these transactions are typically guaranteed by Brazilian government securities, the value and/or perception of value of the Brazilian government securities may be significant for the availability of funds. For example, if the quality of the Brazilian government securities used as collateral is adversely affected, due to the worsening credit risk, the cost of these transactions could increase, making this source of funding inefficient for us. For further information about obligations for repurchase agreements, see “Item 4.B. Business Overview – Other funding sources.”

If the market shrinks, which could cause a reduction in volume, or if there is increased collateral credit risk and we are forced to take and/or pay unattractive interest rates, our financial condition and the results of our operations may be adversely affected.

The increasingly competitive environment in the Brazilian banking and insurance segments may have a negative impact on our business prospects.

The markets for financial, banking and insurance services in Brazil are highly competitive. We face significant competition in all of our main areas of operation from other large banks and insurance companies, both public and private based in Brazil and abroad, in addition to new players, such as fintechs and startups that begin to operate with a differentiated level of regulation.

This competitive environment combined with the accelerated process of digital innovation in the institutions could result in a lack of specialized labor with an impact on the growth capacity or extraordinary costs for new business models, which may negatively affect our financial condition, the result of our operations and the market value of our shares, preferred share ADSs and common share ADSs.

15 Bradesco

Form 20-F

Losses in our investments in financial assets at fair value through profit or loss and at fair value through other comprehensive income may have a significant impact on our results of operations and are not predictable.

The fair value of certain investments in financial assets may decline significantly and may fluctuate over short periods of time. As of December 31, 2018, the investments classified at “fair value through profit or loss” and at “fair value through other comprehensive income” represented 32.5% of our assets, and realized and unrealized gains and losses originating from these investments have had and may continue to have a significant impact on the results of our operations. Despite impacting our investment policies, asset liability management (ALM) and risks, the models adopted may not prevent certain more abrupt oscillations in the movements of the market, so that the profitability of the operations is feasible, in certain moments, from effects that negatively affect its contribution in our profit and shareholders’ equity.

We may incur losses associated with counterparty exposures.

We face the possibility that a counterparty will be unable to honor its contractual obligations. These counterparties may default on their obligations due to bankruptcy, lack of liquidity, operational failure or other reasons. This risk may arise, for example, as a result of entering into swap or other derivative contracts under which counterparties have obligations to make payments to us, executing currency or other trades that fail to settle at the required time due to non-delivery by the counterparty or systems failure by clearing agents, exchanges, clearing houses or other financial intermediaries. Such counterparty risk is more acute in complex markets where the risk of failure of counterparties is higher.

Our trading activities and derivatives transactions may produce material losses.

We engage in the trading of securities, buying debt and equity securities principally to sell them in the near term with the objective of generating profits on short-term differences in price. These investments could expose us to the possibility of material financial losses in the future, as securities are subject to fluctuations in value. In addition, we enter into derivatives transactions, mainly, to manage our exposure to interest rate and exchange rate risk. Such derivatives transactions are designed to protect us against increases or decreases in exchange rates or interest rates.

The government regulates the operations of Brazilian financial institutions and insurance companies. Changes in existing laws and regulations or the imposition of new laws and regulations may negatively affect our operations and revenues.

Brazilian banks and insurance companies are subject to extensive and continuous regulatory review by the government. We have no control over government regulations, which govern all facets of our operations, including the imposition of:

- minimum capital requirements;
- compulsory deposit/reserve requirements;

- investment limitations in fixed assets;
- lending limits and other credit restrictions;
- earmarked credit transactions, such as housing loans and rural loans;
- accounting and statistical requirements;
- minimum coverage;
- mandatory provisioning policies;
- limits and other restrictions on rates; and
- limits on the amount of interest that banks can charge and the period for which they can capitalize on interest.

The regulatory structure governing banks and insurance companies based in Brazil is continuously evolving. Existing laws and regulations could be amended, the manner in which laws and regulations are enforced or interpreted could change, and new laws or regulations could be adopted. Such changes could materially adversely affect our operations and our revenues.

In particular, the government has historically enacted regulations affecting financial institutions in an effort to implement its economic policies. These regulations are intended to control the availability of credit and reduce or increase consumption in Brazil. These changes may adversely affect us because our returns on compulsory deposits are lower than those we obtain on our other investments. Regulations issued by the Central Bank are not subject to a legislative process. Therefore, those regulations can be enacted and implemented in a very short period of time, thereby affecting our activities in sudden and unexpected ways.

16 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

A majority of our common shares are held, directly and indirectly, by one shareholder and none of our Board members are independent; accordingly, their interests may conflict with those of our other investors.

As of December 31, 2018, Fundação Bradesco directly and indirectly held 59.1% of our common shares. As a result, Fundação Bradesco has the power, among other things, to prevent a change in control of our company, even if a transaction of that nature would be beneficial to our other shareholders, as well as to approve related party transactions or corporate reorganizations. Under the terms of Fundação Bradesco's bylaws, members of our *Diretoria Executiva*, that have been working with us for more than ten years serve as members of the Board of Trustees of Fundação Bradesco. The Board of Trustees has no other members.

Our Board of Directors has eight members, none of whom are considered independent in accordance with the criteria included of Law No. 6,404/76, which states that only individuals may be appointed to a company's Board of Directors. Accordingly, there is no legal or statutory provision requiring us to have independent directors. As a result, the interests of our Board of Directors may not always be aligned with the interests of part of our other shareholders and these holders do not have the same protections they would have if most of the directors were independent. Furthermore, our directors are associated with Fundação Bradesco and circumstances may arise in which the interests of Fundação Bradesco, and its associates, conflict with our other investors' interests.

Fundação Bradesco and our Board of Directors could make decisions in relation to our policy towards acquisitions, divestitures, financings or other transactions, which may be contrary to the interests of our shareholders of common shares and have a negative impact on the interests of those shareholders. For more information on our shareholders, see "Item 7.A. Major Shareholders."

Changes in regulations regarding reserve and compulsory deposit requirements may reduce operating margins.

The Central Bank has periodically changed the level of compulsory deposits that financial institutions in Brazil are required to abide by.

Compulsory deposits generally yield lower returns than our other investments and deposits because:

- a portion of our compulsory deposits with the Central Bank do not bear interest; and
- a portion of our compulsory deposits must finance a federal housing program, the Brazilian rural sector, low income customers and small enterprises under a program referred to as a "microcredit program."

Rules related to compulsory deposits have been changed from time to time by the Central Bank, as described in "Item 4.B. Business Overview – Deposit-taking activities."

As of December 31, 2018, our compulsory deposits in connection with demand, savings and time deposits and additional compulsory deposits were R\$87.6 billion. Reserve requirements have been used by the Central Bank to control liquidity as part of monetary policy in the past, and we have no control over their imposition. Any increase in the compulsory deposit requirements may reduce our ability to lend funds and to make other investments and, as a result, may adversely affect us. For further information on compulsory deposits, see "Item 4.B. Business Overview – Deposit-taking activities."

Changes in taxes and other fiscal assessments may adversely affect us.

The government regularly enacts reforms to the tax and other assessment regimes to which we and our customers are subject. Such reforms include changes in the rate of assessments and, occasionally, enactment of temporary taxes, the proceeds of which are earmarked for designated governmental purposes. The effects of these changes and any other changes that result from enactment of additional tax reforms have not been, and cannot be, quantified. There can be no assurance that these reforms will not, once implemented, have an adverse effect upon our business. Furthermore, such changes may produce uncertainty in the financial system, increasing the cost of borrowing and contributing to the increase in our non-performing portfolio of loans and advances.

17 Bradesco

Form 20-F

The Brazilian Constitution used to establish a ceiling on loan interest rates and if the government enacts new legislation with a similar effect in the future, our results of operations may be adversely affected.

Article 192 of the Brazilian Constitution, enacted in 1988, established a 12.0% *p.a.* ceiling on bank loan interest rates. However, since the enactment of the Brazilian Constitution, this rate had not been enforced, as the regulation regarding the ceiling was pending. The understanding that this ceiling is not yet in force has been confirmed by *Súmula Vinculante* No. 7, a final binding decision enacted in 2008 by the STF, in accordance with such Court's prior understanding on this matter. Since 1988, several attempts were made to regulate the limitation on loan interest, and especially bank loan interest rates, but none of them were implemented nor have been confirmed by Brazilian superior courts.

On May 29, 2003, Constitutional Amendment No. 40 ("EC 40/03") was enacted and revoked all subsections and paragraphs of Article 192 of the Brazilian Constitution. This amendment allows the Brazilian Financial System, to be regulated by specific laws for each sector of the system rather than by a single law relating to the system as a whole.

With the enactment of Law No. 10,406/02 (or the "Civil Code"), unless the parties to a loan have agreed to use a different rate, in principle the interest rate ceiling has been pegged to the base rate charged by the National Treasury Office (*Tesouro Nacional*). There is currently an uncertainty as to whether such base rate which is referred to in the Civil Code is: (i) the Special Clearing and Settlement System (*Sistema Especial de Liquidação e Custódia*) rate, which we call the SELIC rate, the base interest rate established by COPOM, which was 6.5% *p.a.* as of December 31, 2018 and 7.0% *p.a.* as of December 31, 2017; or (ii) the 12.0% *p.a.* rate established in Article 161, paragraph 1, of Law No. 5,172/66, as amended ("Brazilian Tax Code"), which is the default interest rate due when taxes are not paid on time.

Any substantial increase or decrease in the interest rate ceiling could have a material effect on the financial condition, results of operations or prospects of financial institutions based in Brazil, including us.

Additionally, certain Brazilian courts have issued decisions in the past limiting interest rates on consumer financing transactions that are considered abusive or excessively onerous in comparison with market practice. Brazilian courts' future decisions as well as changes in legislation and regulations restricting interest rates charged by financial institutions could have an adverse effect on our business.

Our losses in connection with insurance claims may vary from time to time. Differences between the losses from actual claims, underwriting and reserving assumptions and the related provisions may have an adverse effect on us.

The results of our operations depend significantly upon the extent to which our actual claims are consistent with the assumptions we used to assess our potential future policy and claim liabilities and to price our insurance products. We seek to limit our responsibility and price our insurance products based on the expected payout of benefits, calculated using several factors, such as assumptions for investment returns, mortality and morbidity rates, expenses, persistency, and certain macroeconomic factors, such as inflation and interest rates. These assumptions may deviate from our prior experience, due to factors beyond our

control such as natural disasters (floods, explosions and fires), man-made disasters (riots, gang or terrorist attacks) or changes in mortality and morbidity rates as a result of advances in medical technology and longevity, among others. Therefore, we cannot determine precisely the amounts that we will ultimately pay to settle these liabilities, when these payments will need to be made, or whether the assets supporting our policy liabilities, together with future premiums and contributions, will be sufficient for payment of these liabilities. These amounts may vary from the estimated amounts, particularly when those payments do not occur until well in the future, which is the case with certain of our life insurance products. Accordingly, the establishment of the related provisions is inherently uncertain and our actual losses usually deviate, sometimes substantially, from such estimated amounts. To the extent that actual claims are less favorable than the underlying assumptions used in establishing such liabilities, we may be required to increase our provisions, which may have an adverse effect on our financial condition and results of operations.

We are liable for claims of our customers if our reinsurers fail to meet their obligations under the reinsurance contracts.

The purchase of reinsurance does not hold us harmless against our liability towards our clients if the reinsurer fails to meet its obligations under the reinsurance contracts. As a result, reinsurers' insolvency or failure to make timely payments under these contracts could have an adverse effect on us, given that we remain liable to our policyholders.

18 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

A failure in, or breach of, our operational, security or technology systems could temporarily interrupt our businesses, increasing our costs and causing losses.

We constantly invest in the improvement and evolution of the safety controls, resilience, continuity and management of our information technology systems and as a result have created an environment with a high capacity to process data for our operating systems and our financial and accounting systems.

Our information technology systems could suffer shortages or become unavailable for a given period of time due to external factors, including events which are wholly or partially beyond our control, such as: cyber events, protests which could prevent individuals from entering our buildings, changes to the regulatory framework, electrical or telecommunications outages, systems failures, resulting from human error or not, or other events involving third parties and suppliers.

Due to the nature of our operations as well as the global context, where there is an ever-increasing integration among platforms, dependency on technology and on the internet, the higher exposure to viruses, malicious software and malicious events is a business reality, which may unexpectedly impair the operations and integrity of our systems that manage and store sensitive and/or confidential information for our business and operations.

We and other financial institutions, including governmental entities, have already experienced cyber security events in relation to our information technology systems. Due to the controls, we have in place, we have not experienced any material loss of data from these attacks to date, neither from hardware nor from a data information loss perspective. However, considering the use of new technologies, the increasing dependency on the internet and the changing and sophisticated nature of cyber security events, it is not possible to predict all the means that will be used by individuals or organizations with harmful intent, which could impact our capacity to effectively foresee and/or avoid all security events in the future.

As a result, all the risks mentioned above could result in customer attrition, regulatory fines, penalties and/or intervention, reimbursement or other administrative penalties.

We may incur penalties in case of non-compliance with data protection laws.

In August 2018, Law No. 13,709/18 – General Data Protection Law (“LGPD”, in Portuguese) was enacted, which creates a set of rules for the use, protection and transfer of personal data in Brazil, in the private and public spheres, and establishes responsibilities and penalties in the civil sphere. In addition to including existing rules on the subject, the LGPD followed the global trend of strengthening the protection of personal data, restricting its unjustified use, and guaranteeing a series of rights to holders of data, as well as imposing important obligations on so-called “treatment agents.” In particular, the LGPD was inspired by recent European legislation on the subject, reproducing central points of the Directive No. 95/46/EC and of the General Data Protection Regulation (“GDPR”).

The impact of the law will be significant as any processing of personal data will be subject to the new rules, whether physical or digital, by any entity established in Brazil, any entity who has collected personal data in

Brazil, any individual located in Brazil – even if not residents – or any entity that offers goods and services to Brazilian consumers. In short, the adaptation to the LGPD will require structural changes in virtually all internal areas of Brazilian companies. The LGPD has been in force since December 28, 2018 as regards the creation of the National Data Protection Authority (*Autoridade Nacional de Proteção de Dados* or “ANPD”), with the remaining aspects of the law coming into force from August 2020.

We operate in a preventive, detective and corrective manner in order to protect our own and our clients’ information. As a result, we have evolved our security framework in light of the new digital environment, with a focus on cyber security being key and pillar of our processes to establish data protection for our clients, resiliency, and structure to identify threats, detection, and response and recovery procedures in cases of cyber-attacks.

However, possible failures or attacks on our systems and processes of prevention and/or detection and/or correction may lead to non-compliance with applicable legislation, which may in turn negatively affect our reputation, our financial condition, the result of our operations and the market value of our shares, preferred shares ADSs and common shares ADSs. See “— A failure in, or breach of, our operational, security or technology systems could temporarily interrupt our businesses, increasing our costs and causing losses.”

19 Bradesco

Form 20-F

The Brazilian Supreme Court is currently deciding cases relating to the application of inflation adjustments which may increase our costs and cause losses.

The STF, which is the highest court in Brazil and is responsible for judging constitutional matters, is currently deciding whether savings account holders have the right to obtain adjustments for inflation related to their deposits due to the economic plans *Bresser*, part of *Verão*, *Collor I* and *Collor II*, implemented in the 1980s and 1990s, before the *Plano Real*, in 1994. The trial began in November 2013 but was interrupted without any pronouncement on the merits of the subject under discussion by its Members. According to the institutions representing the account holders, banks misapplied the monetary adjustments when those economic plans were implemented, and should be required to indemnify the account holders for the non-adjustment of those amounts.

The STF gave a ruling on an individual case, in the sense that the sentences on class actions proposed by associations questioning inflationary purges only benefit consumers who: (i) were associated with the associations at the time of filing of the class action; and (ii) had authorized the filing of the class action. This reduced the number of beneficiaries in class actions because, until then, it was understood that these decisions should benefit all consumers affected by the practices (i.e., all consumers that are current account holders and that had suffered losses related to inflationary purges, were or were not associated with the association, plaintiff of the class action).

In addition, in connection with a related sentence, the Brazilian Supreme Court Justice ("STJ") decided, in May 2014, that the starting date for counting default interest for compensating savings account holders must be the date of summons of the related lawsuit (rather than the date of settlement of the judgment), therefore increasing the amount of possible losses for the affected banks in the event of an unfavorable decision by the STF.

In December 2017, with the mediation of the Executive branch's attorney (*Advocacia Geral da União*), or ("AGU") and the intervention of the Central Bank, the representatives of the banks and the savings account holders entered into an agreement related to the economic plans aiming to finalize the claims and established a timeline and conditions for the savings account holders to accede to such agreement. The STF affirmed the agreement on March 1, 2018. This approval determined the suspension of legal actions in progress for the duration of the collective bargaining agreement (24 months). As this is a voluntary settlement, we are unable to predict how many savings account holders will accede to it.

Our risk management structure may not be fully effective.

We fully incorporate the risk management process into all of our activities, developing and implementing methodologies, models and other tools for the measurement and control of risks, looking to continuously improve them in order to mitigate the risks that we identify. However, there may be limitations to this risk management framework in foreseeing and mitigating all the risks to which we are subject, or may in the future become, subject. If our risk management structure is not completely effective in adequately preventing or mitigating risks, we could suffer material unexpected losses, adversely affecting our financial condition and results of operations. For more information on our risk management structure, see "Item 4.B.

- Business Overview – Risk management."

We may face significant challenges in possessing and realizing value from collateral with respect to loans in default.

If we are unable to recover sums owed to us under secured loans in default through extrajudicial measures such as restructurings, our last recourse with respect to such loans may be to enforce the collateral secured in our favor by the applicable borrower. Depending on the type of collateral granted, we either have to enforce such collateral through the courts or through extrajudicial measures. However, even where the enforcement mechanism is duly established by the law, Brazilian law allows borrowers to challenge the enforcement in the courts, even if such challenge is unfounded, which can delay the realization of value from the collateral. In addition, our secured claims under Brazilian law will in certain cases rank below those of preferred creditors such as employees and tax authorities. As a result, we may not be able to realize value from the collateral, or may only be able to do so to a limited extent or after a significant amount of time, thereby potentially adversely affecting our financial condition and results of operations.

20 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

Eventual dependence on services rendered by outsourced companies and suppliers/partners may negatively impact our business performance.

Due to the complexity of some services, we may be dependent on or have difficulty replacing some outsourced companies or suppliers/partners. We are also subject to operational risks that are beyond our control and may impact negatively our operations, as well cause difficulty in our delivery of products and services to our customers. Possible interruptions in the services and difficulties to replace some suppliers may adversely affect the result of our operations and the market value of our shares, preferred share ADSs and common share ADSs.

We may incur losses due to impairments on goodwill from acquired businesses.

We record goodwill from acquisitions of investments whose value is based on estimates of future profitability pertaining to business plans and budgets prepared by us. Annually, we assess the basis and estimates of profitability of the Cash-Generating Units (“*Unidades Geradoras de Caixa*” “UGC”) in respect of which the premiums are allocated. These evaluations are made through cash flow projections based on growth rates and discount rates, with those projections then being compared to the value of the premiums in order to conclude whether there is a basis to record impairments in relation to these assets. However, given the inherent uncertainty in relation to predictions of future cash flow projections, we cannot provide assurances that our evaluations of premiums will not require impairments to be recorded in future, which may negatively affect, the result of our operations, our financial condition and the market value of our shares, preferred shares ADSs and common shares ADSs.

Social and Environmental Risks

The social and environmental risk is represented by the potential damage that an economic activity can cause to society and to the environment. The social and environmental risks associated with financial institutions are mostly indirect and stem from business relationships, including those with the supply chain and with customers, through financing and investment activities, observing the principles of relevance and proportionality of the Organization’s activities.

We may incur financial loss and damage to our reputation due to the associated socioenvironmental risks originating from our investments and loan and financing activities.

We have a minority shareholding, through preferred shares and, also, loan and financing operations in companies whose operational activities and sectors of activity are subject to significant risks, which include, but are not limited to: fire, explosions, leaking of toxic gases, spillage of polluting substances or other dangerous materials, landslides, dam ruptures, failure of other operational structures, among other accidents. In this context, eventual accidents could affect our reputation negatively, significantly reducing the fair value of these assets, which could adversely affect our financial condition, the result of our operations and the market value of our shares, preferred share ADSs and common share ADSs.

Funding for large projects carried out by clients can generate socioenvironmental impacts that could affect the results and the reputation of the Organization negatively.

We promote credit and financing operations, acting in several sectors, which may significantly affect an entire ecosystem, involving communities and the local flora and fauna. If a client, in the development of their activities, causes environmental impacts, such as the contamination of soil and water pollution above the legally acceptable limit and/or environmental disasters, it has a direct obligation to repair the damage caused financially. Consequently, depending on the magnitude of the socioenvironmental impact, this client can have their economic-financial structure compromised, which could adversely affect our financial status, the result of our operations and the market value of our shares, preferred share ADSs and common share ADSs.

21 Bradesco

Form 20-F

Risks relating to our shares, preferred share ADSs and common share ADSs.

The Deposit Agreements governing the preferred share ADSs and common share ADSs provide that holders of such ADSs will only receive voting instructions if we authorize the depositary bank to contact those holders to obtain voting instructions; and there are also practical limitations on any ability to vote we may give such holders.

The voting rights of preferred share ADS holders and common share ADS holders are governed by the Deposit Agreements. Those Deposit Agreements provide that the depositary bank shall mail voting instructions to holders only if we authorize and direct the depositary bank to do so. If we do not provide that authorization and direction to the depositary bank, holders of preferred share ADSs and common share ADSs will not be able to vote at our meetings, unless they surrender their preferred share ADSs or common share ADSs and receive the underlying preferred shares or common shares, as applicable, in accordance with the terms of the applicable Deposit Agreement.

In addition, there are practical limits on the ability of preferred share ADS and common share ADS holders to exercise any vote due to the additional procedural steps involved in communicating with such holders. For example, our shareholders will either be notified directly or through notification published in Brazilian newspapers and will be able to exercise their voting rights by either attending the meeting in person or voting by proxy. In contrast, preferred share ADS holders and common share ADS holders will not receive notice directly from us and cannot vote in person at the meeting. Instead, in accordance with the Deposit Agreements, the depositary bank will, if authorized and directed by us, send any notice of meetings of holders received by it from us to holders of preferred share ADSs and common share ADSs, together with a statement as to the manner in which voting instructions may be given by holders. To exercise any such ability to vote, preferred share ADS and common share ADS holders must then instruct the depositary bank how to vote with the shares represented by their preferred share ADSs or common share ADSs. Because of this extra step involving the depositary bank, if and when we authorize and direct the depositary bank to mail voting information to preferred share ADS holders and common share ADS holders, the process for voting will take longer for preferred share ADS and common share ADS holders than for holders of our shares. Preferred share ADSs and common share ADSs for which the depositary bank does not receive voting instructions in good time will not be able to vote at a meeting.

Under Brazilian Corporate Law, holders of preferred shares have limited voting rights, accordingly, holders of preferred share ADSs will have similar limitations on their ability to vote.

Under the Brazilian Corporate Law (Law No. 6,404/76, as amended by Law No. 9,457/97 and Law No. 10,303/01, which we refer to collectively as "Brazilian Corporate Law") and our Bylaws, holders of our preferred shares are not entitled to vote at our shareholders' meetings, except in limited circumstances (see "Item 10.B. Memorandum and Articles of Association – Organization – Voting Rights," for further information on voting rights of our shares). As such, in contrast to holders of common shares, holders of preferred shares are not entitled to vote on corporate transactions, including any proposed merger or consolidation with other companies, among other things.

As discussed above under "*The Deposit Agreements governing the preferred share ADSs and common share ADSs provide that holders of such ADSs will only receive voting instructions if we authorize the depositary bank to contact those holders to obtain voting instructions; and there are also practical limitations on any ability to vote we may give such holders,*" preferred share ADS holders will only be able to vote if we authorize and direct the depositary bank accordingly. As a result of the fact that holders of preferred shares have limited voting rights, any ability to vote that we may extend to holders of preferred share ADSs corresponding to preferred shares pursuant to the applicable Deposit Agreement would be similarly limited.

The relative volatility and illiquidity of the Brazilian securities markets may substantially limit your ability to sell shares underlying the preferred share ADSs and common share ADSs at the price and time you desire.

Investing in securities that trade in emerging markets, such as Brazil, often involves greater risk than investing in securities of issuers in more developed countries, and these investments are generally considered more speculative in nature. The Brazilian securities market is substantially smaller and less liquid than major securities markets, such as the United States, and may be more volatile. Although you are entitled to withdraw our shares, underlying the preferred share ADSs and common share ADSs from the depositary bank at any time, your ability to sell our shares underlying the preferred share ADSs and common share ADSs at a price and time acceptable to you may be substantially limited. There is also significantly greater concentration in the Brazilian securities market than in major securities markets such as the United States or other countries. The ten largest companies in terms of market capitalization, according to B3, accounted for 60.4% of the aggregate market capitalization in December 2018.

22 Form 20-F – December 2018

3.B. Risk Factors

Form 20-F

Our shares, preferred share ADSs and common share ADSs are not entitled to a fixed or minimum dividend.

Holders of our shares and, consequently, our preferred share ADSs and common share ADSs are not entitled to a fixed or minimum dividend. Pursuant to the Deposit Agreements, if the depository (as holder of the common shares and preferred shares underlying the common share ADSs and preferred share ADSs) receives any cash dividend or distribution from us, it shall distribute a corresponding U.S. dollar amount, net of depository fees and certain withholding tax adjustments as described in the Deposit Agreements, to holders of our common share ADSs and preferred share ADSs as promptly as practicable. However, if we do not pay dividends to holders of our common shares or preferred shares then there will be no payment of dividends to holders of our common share ADSs or preferred share ADSs.

Pursuant to our Bylaws, our preferred shares are entitled to dividends 10.0% higher than those of our common shares. Although under our current Bylaws we are obligated to pay our shareholders at least 30.0% of our annual adjusted net income, the shareholders attending our Annual Shareholders' Meeting may decide to suspend this mandatory distribution of dividends if the Board of Directors advises that payment of the dividend is not compatible with our financial condition. Neither our Bylaws nor Brazilian law specify the circumstances in which a distribution would not be compatible with our financial condition, and our controlling shareholders have never suspended the mandatory distribution of dividends. However, Brazilian law provides that a company need not pay dividends if such payment would endanger the existence of the company or harm its normal course of operations.

In March 2013, CMN Resolution No. 4,193/13 was issued in an effort to further implement the Basel III Accord in Brazil. Pursuant to such rule, a restriction of dividend and interest payments on equity may be imposed by the Central Bank in the event of non-compliance with the additional capital requirements established by the Central Bank, as further described in "Item 5.B. Liquidity and Capital Resources – Capital adequacy and leverage."

As a holder of preferred share ADSs and common share ADSs you will have fewer and less well defined shareholders' rights than in the United States and certain other jurisdictions.

Our corporate affairs are governed by our Bylaws and Brazilian Corporate Law, which may differ from the legal principles that would apply if we were incorporated in a jurisdiction in the United States or in certain other jurisdictions outside Brazil. Under Brazilian Corporate Law, you and the holders of our shares may have fewer and less well defined rights to protect your interests relative to actions taken by our Board of Directors or the holders of our common shares than under the laws of other jurisdictions outside Brazil.

Although Brazilian Corporate Law imposes restrictions on insider trading and price manipulation, the Brazilian securities markets are not as highly regulated and supervised as the U.S. securities markets or markets in certain other jurisdictions. In addition, self dealing and the preservation of shareholder interests may be less heavily regulated and what regulations are in place may not be as strictly enforced in Brazil as in the United States, which could potentially disadvantage you as a holder of our shares underlying preferred share ADSs and common share ADSs. For example, compared to Delaware general corporation

law, Brazilian Corporate Law and practices have less detailed and well established rules and judicial precedents relating to review of Management decisions under duty of care and duty of loyalty standards in the context of corporate restructurings, transactions with related parties, and sale-of-business transactions. In addition, shareholders in Delaware companies must hold 5.0% of the outstanding share capital of a corporation to have valid standing to bring shareholder derivative suits, while shareholders in companies based in Brazil do not normally have valid standing to bring a class action.

It may be difficult to bring civil liability causes against us or our directors and executive officers.

We are organized under the laws of Brazil, and all of our directors and executive officers reside outside the United States. In addition, a substantial portion of our assets and most or all of the assets of our directors and executive officers are located in Brazil. As a result, it may be difficult for investors to effect service of process within the United States or other jurisdictions outside of Brazil on such persons or to enforce judgments against them, including any based on civil liabilities under the U.S. federal securities laws.

If we issue new shares or our shareholders sell shares in the future, the market price of your preferred share ADSs and common share ADSs may be reduced.

Sales of a substantial number of shares, or the belief that this may occur, could decrease the market price of our shares, preferred share ADSs and common share ADSs, by diluting their value. If we issue new shares or our existing shareholders sell the shares they hold, the market price of our shares and therefore the market price of our preferred share ADSs and common share ADSs, may decrease significantly.

23 Bradesco

Form 20-F

The payments on the preferred share ADSs and common share ADSs may be subject to U.S. withholding under the Foreign Account Tax Compliance Act ("FATCA").

The United States has enacted rules, commonly referred to as FATCA, that generally impose a reporting and withholding regime with respect to certain U.S. source payments (including interest and dividends), gross proceeds from the disposition of property that can produce U.S. source interest and dividends and certain payments made by entities that are classified as financial institutions under FATCA. The United States has entered into an Intergovernmental Agreement regarding the implementation of FATCA with Brazil (the "IGA"). Under the current terms and conditions of the IGA, we do not expect payments made on or with respect to the preferred share ADSs or common share ADSs to be subject to withholding under FATCA. However, significant aspects of when and how FATCA will apply remain unclear, and no assurance can be given that withholding under FATCA will not become relevant with respect to payments made on or with respect to the preferred share ADSs or common share ADSs in the future. Similar to the FATCA, the Common Reporting Standard ("CRS") is the instrument developed by the Convention on Mutual Assistance in Tax Matters of the Organization for Economic Cooperation and Development ("OECD") and the Multilateral Competent Authority Agreement, applicable to the countries signatory to the norm. The financial institutions and entities subject to it should ensure the identification, investigation and reporting of information to the competent bodies. Prospective investors should consult their own tax advisors regarding the potential impact of FATCA and CRS. For more information about FATCA and CRS, see "Item 4.B. Business Overview – Regulation and Supervision."

You may be unable to exercise preemptive rights relating to our shares.

You will not be able to exercise preemptive rights relating to our shares underlying your preferred share ADSs and common share ADSs unless a registration statement under the Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. Similarly, we may from time to time distribute rights to our shareholders. The depositary bank will not offer rights to you as a holder of the preferred share ADSs and common share ADSs unless the rights are either registered under the Securities Act or are subject to an exemption from the registration requirements. We are not obligated to file a registration statement with respect to the shares or other securities relating to these rights, and we cannot assure you that we will file any such registration statement. Accordingly, you may receive only the net proceeds from the sale by the depositary bank of the rights received in respect of the shares represented by your preferred share ADSs and common share ADSs or, if the preemptive rights cannot be sold, they will be allowed to lapse. You may also be unable to participate in rights offerings by us, and your holdings may be diluted as a result.

If you exchange your preferred share ADSs or common share ADSs for their underlying shares, you risk losing Brazilian tax advantages and the ability to remit foreign currency abroad.

Brazilian law requires that parties obtain registration with the Central Bank in order to remit foreign currencies, including U.S. dollars, abroad. The Brazilian custodian for the shares must obtain the necessary registration with the Central Bank for payment of dividends or other cash distributions relating to the shares or after disposal of the shares. If you exchange your preferred share ADSs or common share ADSs for the underlying shares, however, you may only rely on the custodian's certificate for five business days from the date of exchange. Thereafter, you must obtain your own registration in accordance with the rules of the

Central Bank and the CVM, in order to obtain and remit U.S. dollars abroad after the disposal of the shares or the receipt of distributions relating to the shares. If you do not obtain a certificate of registration, you may not be able to remit U.S. dollars or other currencies abroad and may be subject to less favorable tax treatment on gains with respect to the shares. For more information, see "Item 10.D. Exchange Controls."

If you attempt to obtain your own registration, you may incur expenses or suffer delays in the application process, which could delay your receipt of dividends or distributions relating to the shares or the return of your capital in a timely manner. The custodian's registration and any certificate of foreign capital registration you may obtain may be affected by future legislative changes. Additional restrictions applicable to you, to the disposal of the underlying shares or to the repatriation of the proceeds from disposal may be imposed in the future.

ITEM 4. INFORMATION ON THE COMPANY

Form 20-F

ITEM 4. INFORMATION ON THE COMPANY

4.A. History and Development of the Company

We are a *sociedade anônima* organized under the laws of Brazil. Our headquarters are in Cidade de Deus, Vila Yara, 06029 900, Osasco, São Paulo, Brazil, and our telephone number is (55-11) 3684-4011. Our investor relations website is located at bradesco.com.br. Our New York Branch is located at 450 Park Avenue, 32nd and 33rd floors, New York 10022.

We were founded in 1943 as a commercial bank under the name "Banco Brasileiro de Descontos S.A." In 1948, we began a period of aggressive expansion, which led to our becoming the largest private sector (non government controlled) commercial bank in Brazil by the end of the 1960s. We expanded our activities nationwide during the 1970s and became well established in both urban and rural markets in Brazil. In 1988, we merged with our real estate finance, investment bank and consumer credit subsidiaries to become a multiple service bank and changed our name to "Banco Bradesco S.A."

Since 2009, we operate in all Brazilian municipalities, and our large banking network enables us to be closer to our customers, thereby enabling our managers to develop knowledge as to economically active regions and other important conditions for our business. This knowledge helps us assess and mitigate risks in credit transactions, among other risks, as well as to meet the specific needs of our customers.

Currently, we are one of the largest banks in Brazil in terms of total assets. We offer a wide range of banking and financial products and services in Brazil and abroad to individuals, large, mid sized, small and micro enterprises and major local and international corporations and institutions. Our products and services comprise of banking operations such as loans and advances and deposit taking, credit card issuance, purchasing consortiums, insurance, leasing, payment collection and processing, pension plans, asset management and brokerage services.

As of December 31, 2018, we had, on a consolidated basis:

- R\$1.3 trillion in total assets;
- R\$411.5 billion in total loans and advances to customers;
- R\$340.7 billion in deposits from customers;
- R\$124.6 billion in shareholders' equity, including non-controlling interest;
- R\$251.6 billion in technical reserves for our insurance and pension plan business;

- R\$58.6 billion in foreign trading financing;
- 46.5 million insurance policyholders;
- 28.3 million checking account holders;
- 63.5 million savings accounts;
- 38.4 million non-account holders;
- 2.7 million capitalization bonds holders;
- 3.0 million pension plan holders;
- an average of 52.0 million daily transactions, including 1.2 million in our physical branches, 1.4 in our Bradesco Expresso and 49.4 million through Digital Channels, such as Bradesco Celular, Internet, Automatic Teller Machines, or ATMs, and telephone (*Fone Fácil*);
- a nationwide network consisting of 4,617 physical branches and 4,731 service centers and electronic in-company service centers, located on the premises of selected corporate customers, 34,997 active ATMs. In addition, our customers can use 23,102 ATMs available under the Banco24Horas network for cash withdrawals, account balance information, obtaining statements and, taking out loans, performing collections, transfers between Bradesco accounts, DOC/TED (types of bank transfer), pre-paid card and "proof of life" for INSS (physical proof of the existence of the old age pensioner or survivor to maintain the right to social benefit);
- 98,605 employees. For more information on our employees, see "Item 6.D. Employees;" and

25 Bradesco

Form 20-F

- a total of three branches, nine subsidiaries located in New York, London, the Cayman Islands, Buenos Aires, Luxembourg, Hong Kong and Mexico and a representative office located in Miami.

Recent acquisitions and other strategic alliances

In July 2016, we announced to the market the acquisition of 100% of the share capital of HSBC Brasil.

In July 2015, we signed a purchase contract for the acquisition of 100% of the share capital of HSBC Brasil. The acquisition was approved by the Central Bank in December 2015 and by the Administrative Council for Economic Defense (“CADE”) in June 2016, subject to an Agreement on Concentration Control, and therefore approved by all relevant regulatory bodies. The purchase was completed in July 2016, for R\$16 billion. In October 2016, a Shareholders’ Meeting approved the spin-off of HSBC Brasil and the integration of its staff and operational and technological platforms, resulting in the replacement of the HSBC brand in then-existing service network and providing greater synergy in its operations. With the acquisition, we took over operations of HSBC in Brazil, including retail, insurance and asset management, as well as all branches and clients. The acquisition allowed us to grow in scale and optimize our platforms, while increasing national coverage, consolidating our leadership in a number of branches in several states, and strengthening our presence in the high-income segment. The acquisition also enabled us to expand our operations, increasing the range of products offered in Brazil, especially in the insurance, credit card and asset management segments.

In July 2017, we announced that Bradesco Seguros S.A. (“Bradesco Seguros”) and Swiss Re Corporate Solutions Ltd. (“Swiss Re Corso”) completed the transaction announced in October 2016, by signing a shareholders’ agreement pursuant to which: (i) Swiss Re Corporate Solutions Brasil Seguros S/A (“Swiss Re Corporate Solutions Brasil”) assumed part of the insurance operations of Bradesco Seguros, the property and casualty (P&C) and the transport (together “Large Risk Insurance”), having exclusive access to Bradesco clients to market Large Risk Insurance solutions; and (ii) Bradesco Seguros became the holder of 40.0% of Swiss Re Corporate Solutions Brasil’s shares and the other 60% remained with its controller Swiss Re Corso. The transaction was approved by the SUSEP, by the CADE and by the Central Bank.

In May 2017, Bradesco, together with the other shareholders of IRB Brasil RE (“IRB”), authorized IRB to request to the CVM: (i) registration as a publicly-traded company and authorization to conduct the Initial Public Offer (IPO) of IRB, in accordance with CVM Instructions No. 400/03 and No. 480/09; and (ii) registration to perform a secondary offering of common shares, in accordance with CVM Instruction No. 400/03. In July 2017, the book building procedure of the offer ended and Bradesco sold part of its shares. Bradesco Seguros now holds 15.23% stake in the share capital of IRB (stake calculated excluding shares held in treasury).

In June 2017, Bradesco entered into agreements with Banco do Brasil S.A., Banco Santander (Brasil) S.A., Caixa Econômica Federal and Itaú Unibanco S.A. to create a company to manage credit intelligence (“GIC”). The company will develop a database to add, reconcile and handle the profile and credit information of individuals and legal entities who authorize their inclusion in the database, as required by the applicable rules. The control of the company will be shared between the banks and each of them will hold 20% of its share capital.

On December 31, 2018, Bradesco and the Fidelity Group terminated their joint venture in Fidelity Processadora S.A. ("Processing Company"). As a result, Bradesco will become the sole shareholder of the Processing Company, whose shareholders' equity is composed exclusively of the assets and liabilities relating to the provision of credit card processing services for the Bradesco Organization. The operation (a) aims to reduce the costs of processing and increase the efficiency of the credit card business; (b) will not have any impact on the activities and clients of Bradesco; and (c) did not involve any financial values. The parties, Bradesco and Fidelity Group, will also maintain their association in Fidelity Serviços S.A., a company that provides call center services, collection, fraud prevention, support and other related services.

In October 2018, we formalized a strategic partnership with RCB Investimentos S.A. ("RCB"), one of the principal credit management and recovery companies in Brazil, and with its controlling company PRA Group Brazil Investimentos e Participações, a company of the PRA Group Inc. ("PRA Group"), a global leader in the acquisition and management of non-performed credits. The operation encompasses: (i) our acquisition of 65% of the shares issued by RCB, in which the founding members will remain as partners and directors RCB, together with us; and (ii) the constitution of two FDICs (Investment Funds in Credit Rights) for the acquisition of non-performing credit portfolios, where the management of the recovery of these credits remains with RCB. The FIDCs will continue to be held by the PRA Group and its the founders, with our minority participation. The transaction was approved by the CADE and by the Central Bank.

26 Form 20-F – December 2018

4.A. History and Development of the Company

Form 20-F

BRAM has developed important alliances as part of its internationalization strategy. Through personal management and investment advisory agreements, we offer Brazilian investors the opportunity to invest in global equity funds, with a focus on the U.S., Europe and Asia, besides the global funds. In Europe, BRAM offers to overseas investors funds domiciled in Luxemburg with different strategies under the Bradesco Global Funds family, launched in 2009. In Japan, Mitsubishi Kosukai UFJ Asset Management (“MUKAM”), our partner, offers fixed income funds and equity funds managed by BRAM since 2008 to retail investors wishing to invest in the Brazilian market.

Business strategy

The key elements of our strategy are: (i) consolidating and expanding our position as one of the leading financial institutions and insurance providers in Brazil; (ii) maximizing shareholder value; and (iii) maintaining high corporate responsibility and sustainability standards.

We intend to pursue the following strategies to reach these goals:

Consolidate and build upon our service network and brand as one of the leading financial institutions and insurance providers in Brazil, which offers a complete portfolio of products and services to all levels of society.

We believe that our position as one of the leading financial institutions in Brazil, with a presence in all Brazilian regions through a broad network of distribution channels and with exposure to individuals of all income levels as well as large, mid sized and small businesses, will allow us to maintain the organic growth strategy. We will also continue to expand the insurance, pension and capitalization bonds business segment, in order to consolidate our leadership in this sector. As part of this strategy, we intend to increase the sales of our traditional banking, insurance, pension and capitalization bonds products through our wide branch network, our internet distribution services and other distribution channels. We are committed to investing significantly in our IT platform to support such growth. In addition, we intend to continue to leverage our relationships with corporate clients and high-income individuals to further develop our investment banking, private banking and asset management operations through Bradesco BBI, Banco Bradesco Europa, Bradesco Securities and other subsidiaries in Brazil and other key financial centers such as London, New York and Hong Kong.

Maintain asset quality and operational risk levels.

We are focused on sustainable growth to ensure our standards in relation to our asset quality and risk levels. We intend to maintain the quality of our loan portfolio by continuously improving our delinquency risk models, ensuring better results in credit granting and appropriate provisions for incurred losses. Our strategy involves maintaining our existing policy for our insurance business of careful evaluation of risk spreads through robust actuarial analysis, while entering into reinsurance agreements with well-known reinsurers to reduce exposure to large risks.

With respect to risk management, we intend to continue our integrated approach that utilizes a centralized method for identifying, measuring, controlling, monitoring and mitigating credit, market, liquidity and

operational risks. We intend to continue to use specialized risk management committees in relation to the adoption of institutional policies, operational guidelines and the establishment of limits for risk exposure in accordance with best international practices, with the aim of maintaining operational risk levels within adequate boundaries.

Complement organic growth with strategic alliances and pursue selective acquisitions.

To complement our organic growth strategy, we constantly seek opportunities for strategic alliances and selective acquisitions to consolidate our position as one of the leading financial institutions in Brazil and to expand our presence in growth markets such as consumer financing, investment banking, broker dealing and insurance. The acquisition of HSBC Brasil was the largest ever in our history and we expect an expansion of our operations, in particular, of profitable businesses and with low capital needs. In addition, we believe our strategic partnership with Banco do Brasil and Caixa in relation to credit, debit and pre-paid cards for checking account holders and non-account holders is an example of such a growth opportunity. Similarly, our merger with Odontoprev S.A. has increased our presence in the segment of dental care plans enabling us to consolidate our leadership position in the insurance market. We will continue to focus on asset quality, potential operating synergies, sale and acquisition of know-how to maximize return for our shareholders.

27 Bradesco

Form 20-F

Focus on corporate responsibility and sustainability as core principles of our business.

We believe that corporate responsibility and sustainability are fundamental to our operations and have incorporated the following three principles into our overall strategy: a sustainable financial position, responsible management and investments in social and environmental projects. We are always seeking to develop and incorporate sustainable finance concepts into the process of designing and managing our products and services and in our relationships with clients and suppliers. We believe our admission to the sustainability indexes of both the New York Stock Exchange and B3 represents strong recognition of our success in implementing sustainability principles. As part of this strategy, we will continue to apply social-environmental risk analysis in financing and investment activities in accordance with international practices, including the Equator Principles which we signed up to in 2004. Corporate responsibility has always been one of our core principles as evidenced by the significant investments we have made in education since 1956 through Fundação Bradesco, which is present in every state in Brazil and the Federal District, with [40] schools primarily located in regions of high socioeconomic deprivation. Fundação Bradesco offers quality formal education, free of charge, to children and young people from early childhood to high school as well as professional high school education for young people and adults, as well as initial and continuing education for employment and income.

4.B. Business Overview

We operate and manage our business through two segments: (i) the banking segment; and (ii) the insurance, pension plans and capitalization bond segment.

The data for these segments was compiled from reports prepared for Management to assess performance and make decisions on allocating funds for investments and other purposes. Our Management uses various data, including financial data in conformity with BR GAAP and non-financial metrics compiled on different bases. For further information on differences between the results on a consolidated basis and by segment, see "Item 5.A. Operating Results – Results of operations for the year ended December 31, 2018 compared with the year ended December 31, 2017" and "Item 5.A. Operating Results – Results of operations for the year ended December 31, 2017 compared with the year ended December 31, 2016."

As of December 31, 2018, according to the sources cited in parentheses below, we were:

- one of the leading banks in terms of savings deposits, with R\$111.1 billion, accounting for 13.8% of Brazil's total savings deposits (Central Bank);
- the leader in BNDES onlendings, with R\$6.3 billion in disbursements (BNDES);
- one of the leaders in automobile financing loans, with a market share of 13.8% (Central Bank);
- the leading bank in payments for over 11.1 million benefits to INSS retirees and beneficiaries, accounting for 31.6% of the total number of payments made by the INSS;

- one of the leaders in leasing transactions in Brazil, with an outstanding amount of R\$2.1 billion; through our subsidiary Bradesco Leasing S.A. Arrendamento Mercantil, or “Bradesco Leasing” (ABEL);
- one of Brazil’s largest private fund and investment managers, through our subsidiary BRAM, with R\$667.6 billion in assets under management (ANBIMA), taking into account managed portfolios;
- one of the leaders in the third-party asset management business, with R\$1.4 trillion in assets, of which R\$429.9 billion are managed through our subsidiary and BEM DTVM (ANBIMA);
- the leader in number of outstanding purchasing consortium quotas, through our subsidiary Bradesco Administradora de Consórcios Ltda., or “Bradesco Consórcios,” with 1,503,817 quotas in three segments, including: (i) automobiles and motorcycles, with 1,190,115 quotas; (ii) real estate, with 256,898 quotas; and (iii) trucks, with 56,804 quotas (Central Bank);
- the leading position amongst the banks that operate in the exchange market (Central Bank);
- the leader in the export, import and consolidated primary market ranking (Central Bank), additionally, leader in “foreign trade – trade finance”; and

28 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

- the largest company operating in the Brazilian insurance market, operating in all lines of this segment, with a 24.5% market share (SUSEP/ANS), through Grupo Bradesco Seguros, which mainly comprises: Bradesco Seguros S.A., or “Bradesco Seguros” and its subsidiaries: (i) Bradesco Vida e Previdência S.A., or “Bradesco Vida e Previdência;” (ii) Bradesco Capitalização S.A., or “Bradesco Capitalização;” (iii) Bradesco Auto/RE Companhia de Seguros S.A., or “Bradesco Auto/RE;” and (iv) Bradesco Saúde S.A., or “Bradesco Saúde.” The Group’s total revenues were R\$72.6 billion in insurance premiums, pension plan contributions and capitalization bond income.

29 Bradesco

Form 20-F

The main awards and acknowledgments that we received in 2018 are as follows:

Among the best

- Bradesco was elected the best bank in Brazil by the English magazine The Banker. The magazine highlighted the profit growth and the efficiency of the Organization in 2018;
- Another institution that referenced Bradesco as the best bank in the Country was the North American Latin Finance. The choice is based on the evaluation of indicators such as performance, profitability, growth, presence and pioneering spirit, among others;
- Bradesco led the Latin America Best Managed Banks 2018 Brazil, a survey conducted by the Euromoney magazine, which lists the best managed banks in Latin America;
- The share of Bradesco (BBDC4) is among the ten most recommended for investment in 2019 by *Guia Exame Onde Investir* (Where to Invest). In the same survey, BRAM was singled out as the Best Management Company of Variable-Income Funds and the Best Retail Manager;
- Bradesco is the leading private bank in the survey Top of Mind 2018, of the *Folha de S. Paulo* newspaper, in the categories of bank and savings. We are also the most recognized brand on the market in the Bank App category. Bradesco Seguros featured in the Insurance category;
- Bradesco BBI is elected, for the fourth time – and third consecutive – as the Best Investment Bank in Brazil and, for the first time as the Best Bank of M&A in Latin America in 2018, in the nineteenth edition of the Best Investment Bank Awards in the Global Finance magazine;
- BRAM - Bradesco Asset Management was classified with the highest rating of quality investment management, receiving the highest score by the agency Fitch Ratings;
- Best & Largest Yearbook, of the *Exame* magazine: first of the 200 Largest Groups and integrates the list of 50 Largest Banks by Assets and the Largest Banks by Profit;
- The Best of *Dinheiro* 2018, of the *IstoÉ Dinheiro* magazine: Best company in Corporate Governance; best Bank in people management policy; and leader of the ranking of banks by revenue in the 1,000 largest. The Insurance Group was the best company in the segment;
- Global Finance's 25th Annual Best Bank Awards, of the Global Finance magazine: Best Brazilian Bank, Best Investment Bank in Brazil and Best Bank of Mergers and Acquisitions in Latin America; and
- Bradesco BBI was elected for the third consecutive time, as the Most Innovative Investment Bank in Latin America by The Banker magazine.

Digital transformation

- Next received one of the most relevant recognitions in the world for the financial industry, with the International Award of Global Finance for Best Consumer Digital Bank in Brazil. Also by Global Finance, the Next case was elected as the Best Digital Bank of Brazil in 2018 in the nineteenth Annual Digital World Awards;
- Bradesco Seguros was elected as the most digital insurer in Brazil by consultancy firm DOM Strategy Partners; and
- Bradesco received the award for Connected Bank from the Brazilian Association of Companies and Professionals of Communication and Infrastructure/IT Engineering – Aberimest.

Human Resources

- Best Companies to Work for in Brazil, of the *Época* magazine and Great Place to Work;
- For the twentieth time, the Organization also integrates the list of 150 Best Companies to Work for by the *Você S/A* magazine;
- UniBrad was featured in the international award for Best Corporate Universities – Cubic Awards 2018. The recognition is granted by the Corporate University Best in Class (Cubic), of the United States;

30 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

- Elected as the Company of the Year in corporate citizenship, in a study conducted by *Grupo Gestão RH* (HR Management Group); and
- Learning & Performance Award Brazil 2018, by MicroPower: Recognition for the protagonism of Bradesco in the 20 years of the program of Training and Employability of People with Visual Impairment.

Revenues per business segment

The following table summarizes our main gross revenues by segment for the periods indicated:

Years Ended December 31,	R\$ in thousands		
	2018	2017	2016
Banking			
Interest and similar income from loans and advances ⁽¹⁾	70,965,137	69,157,397	77,141,672
Fees and commissions	25,496,171	24,143,561	20,696,785
Insurance and pension plans			
Premiums retained from insurance and pension plans	66,270,095	70,046,635	65,027,122

⁽¹⁾ Includes industrial loans, financing under credit cards, overdraft loans, trade financing and foreign loans. For further details of our segments, see Note 5 of our consolidated financial statements in "Item 18. Financial Statements."

We do not break down our revenues by geographic regions within Brazil, and less than 4.0% of our revenues come from international operations. For more information on our international operations, see "International banking services."

Complete Investment Platform

We operate a complete investment platform with a value proposition supported by three pillars: broad portfolio of products, investment portfolios and specialized consultancy, whose role is to generate value to the client through a complete offer of products and investment solutions, as well as meet the needs of our investor clients, account holders and non-account holders, according to their age, equity and profile, through different service channels.

The investment management platform, in addition to using the services of the branch network managers, also comprises a specialist team providing advice on the demands of banking products, investment funds, capital market products, broker and private pension. The clients also benefit from suggested portfolios, that combine a diversity of financial products and are established monthly, based on national and international

market perspectives. For more information on pension products, see “Item 4.B. Business Overview – Insurance, pension plans and capitalization bonds.”

31 Bradesco

Form 20-F

Banking

In our banking segment, we offer a range of banking products and services to our clients including deposit-taking, granting of loans and advance payments, debit and credit card services and capital market solutions, through our extensive distribution network.

We have a diverse customer base that includes individuals and small, midsized and large companies in Brazil. Historically, we have cultivated a strong presence among the broadest segment of the Brazilian market, middle- and low-income individuals.

The following table shows selected financial data for our banking segment for the periods indicated.

(1) For additional information, see "Item 5.A. Operational Results".

Products and banking services

In order to meet the needs of each client, we offer the following range of banking products and services:

- deposit accounts, including checking accounts, savings accounts and time deposits;
- loans and advances (individuals and companies, housing loans, microcredit, onlending BNDES/Finame, rural loans, leasing, among others);
- credit cards, debit cards and pre-paid cards;
- cash management solutions;

32 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

- public authority solutions;
- asset management;
- services related to capital markets and investment banking activities;
- intermediation and trading services;
- capital markets solutions;
- international banking services;
- import and export financing; and
- consortiums.

Deposit accounts

We offer a variety of deposit accounts to our customers, including:

- checking accounts, such as:
 - **Easy Account** (*Conta Fácil*) – Target market: Individuals and companies that have a checking account and a savings account under the same bank account number, using the same card for both accounts;
 - **Click Account** (*Click Conta*) – Target market: checking accounts for young people from 11 to 17 years of age, with exclusive website and debit card, automatic pocket money service and free online courses, among other benefits; and
 - **Academic Account** (*Conta Universitária*) – Target market: low fee checking account for college students, with subsidized credit conditions, exclusive website and free online courses, among other benefits.
- traditional savings accounts, which currently earn the Brazilian reference rate, or *taxa referencial*, known as the "TR," plus 6.2% annual interest in the case the SELIC rate is higher than 8.5% *p.a.* or TR plus 70.0% of the SELIC rate if the SELIC rate is lower than 8.5% *p.a.*; and
- time deposits, which are represented by Bank Deposit Certificates (*certificados de depósito bancário* – or "CDBs"), and earn interest at a fixed or floating rate.

As of December 31, 2018, we had 28.3 million checking account holders, 26.7 million of which were of individuals and 1.6 million of which were of legal entities. As of the same date, we had 63.5 million savings accounts.

The following table shows a breakdown of our deposits from customers by type of product on the dates indicated:

Total	411,492,655	373,813,665	392,083,873

The following table summarizes concentration for our outstanding loans and advances to customers by borrower on the dates shown:

	December 31, 2018	2017	2016
Borrower size			
Largest borrower	2.2%	2.5%	2.3%
10 largest borrowers	9.1%	8.2%	8.5%
20 largest borrowers	12.9%	12.2%	12.6%
50 largest borrowers	18.6%	17.8%	18.5%
100 largest borrowers	22.9%	22.2%	23.0%

Other loans and advances to individuals

Our significant volume of individual loans enables us to avoid concentration on any individual loans on the performance of our portfolio and helps build customer loyalty. They consist primarily of:

- personal loans with pre-approved overdraft facilities to be obtained through our branches, ATM network, call center, mobile and internet banking, with average repayment terms of five months and an average interest rate of 8.6% per month as of December 31, 2018. It also includes payroll-deductible loans to Social Security National Service (INSS) pension plan beneficiaries and retirees and public servants and private sector employees; and

- special overdraft limit (revolving credit limit) linked to a current account with automatic renewal, which allows our customers to perform various financial transactions, such as transfers and withdrawals even when there is no balance available, at interest rates varying from 2.9% to 13.3% per month as of December 31, 2018.

As of December 31, 2018, we had outstanding personal loans, and overdraft loans totaling R\$72.9 billion or 17.7% of our portfolio of loans and advances to customers.

Banco Bradesco Financiamentos ("Bradesco Financiamentos") offers payroll-deductible loans to INSS retirees and pensioners and public-sector employees (federal, state and municipal) through companies specialized in payroll-deductible loans.

Housing loans

As of December 31, 2018, we had 192.6 thousand active financing contracts under mortgage or fiduciary disposal of real estate. The aggregate outstanding amount of our housing loans amounted to R\$60.6 billion, representing 14.7% of our portfolio of loans and advances to customers.

Housing loans are carried out for the purpose of: (i) acquisition of residential and commercial real estate, and urban plots; and (ii) construction of residential and commercial developments.

Financing for the acquisition of residential real estate has a maximum term of up to 30 years and annual interest rates of 8.9% to 12.0% *per annum*, plus TR, while commercial real estate has a maximum term of up to ten years and annual interest rates of 13.0% to 15.0% *p.a.* plus TR.

34 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

Financing for construction, also known as the Businessman Plan, has a construction term of up to 36 months and interest rate of 12.0% to 16.0% *per annum*, plus TR, and a six-month grace period for the realization of transfers to borrowers.

Central Bank regulations require us to provide at least 65.0% of the balance of savings accounts in the form of housing loans; 20.0% in compulsory deposit requirement and the remaining resources, in financial and other transactions according to the law and regulations in force.

Vehicle financings

We are acting, including through partnerships, in the consumer financing of the purchase of new and used vehicles for individuals and corporations in the chain, which comprises assembler, dealers and consumers. In addition to offering these services through our extensive branches network, Bradesco Financiamentos also offers lines of loans and leasing for the acquisition of vehicles.

As of December 31, 2018, we had vehicle financing totaling R\$ 31.1 billion, or 7.6% of our portfolio of loans and advances to customers.

BNDES onlending/Finame

The Brazilian Bank of Economic and Social Development – BNDES (*Banco Nacional de Desenvolvimento Econômico e Social*) is the main instrument of the Federal Government to support entrepreneurs of all sizes, including individuals, in carrying out their plans for modernization, expansion and implementation of new business, always with the potential of generating jobs, income and social inclusion in Brazil, its portfolio has certain products and programs to provide government-funded long-term loans with below-market or subsidized interest rates, focusing on economic development. We are one of the structuring agents of BNDES funds, to borrowers in several sectors of the economy. We determine the margin of return on the loans based on the borrowers' credit. Although we bear the risk for these BNDES and Finame onlending transactions, these transactions are always secured.

According to BNDES, in 2018, we disbursed R\$6.3 billion, 87.0% of which were loaned to micro, small and medium-sized companies. Our BNDES onlending portfolio totaled R\$25.1 billion as of December 31, 2018, and accounted for 6.1% of our portfolio of loans and advances to customers at that date.

Other corporate loans and advances

We provide traditional loans for the ongoing needs of our corporate customers. As of December 31, 2018, we had R\$112.1 billion of other outstanding loans to corporate clients, accounting for 27.3% of our portfolio of loans and advances to customers. We offer a range of loans to our corporate customers based in Brazil, including:

- short-term loans of 29 days or less;
- working capital loans to cover our customers' cash needs;
- guaranteed checking accounts and corporate overdraft loans;
- discounting trade receivables, promissory notes, checks, credit card and supplier receivables, etc.;
- financing for purchase and sale of goods and services; and
- investment lines for acquisition of assets and machinery.

These lending products generally bear interest at a rate of 1.1% to 13.9% per month.

In addition to these loans, we also offer guarantees, which are a contractual commitment, in which we guarantee the fulfilment of the obligations of our customers (debtors) before third parties (beneficiaries).

35 Bradesco

Form 20-F

Rural loans

We extend loans to the agricultural sector by compulsory deposits, or the Amount Subject to Compulsory Deposit Requirement (“VSR”), BNDES onlending operations and our own funds, in accordance with Central Bank regulations. As of December 31, 2018, excluding BNDES onlending operations, we had R\$13.3 billion in outstanding rural loans, representing 3.2% of our portfolio of loans and advances to customers. In accordance with Central Bank regulations, loans arising from compulsory deposits are paid a fixed rate. The annual fixed rate was 7.0%, on average, as of December 31, 2018. Repayment of these loans generally coincides with agricultural harvest and principal is due when a crop is sold. For BNDES onlending for rural investment the term is no more than ten years with repayments on a semi-annual or annual basis. The security for such loans, we generally obtain a mortgage or chattel mortgage on the land where the agricultural activities being financed are conducted.

Central Bank regulations require us to use at least 30.0% of the annual average of the VSR of the previous harvest to provide loans to the agricultural sector.

Leasing

According to ABEL, as of December 31, 2018, our leasing companies were among the sector leaders, with a 19.9% market share. According to this source, the aggregate discounted present value of the leasing portfolios in Brazil as of December 31, 2018 was R\$10.4 billion.

As of December 31, 2018, we had 8,451 outstanding leasing agreements totaling R\$2.1 billion, representing 0.5% of our portfolio of loans and advances to customers.

The Brazilian leasing market is dominated by financial institutions, including companies affiliated with Brazilian and foreign manufacturers. Brazilian lease contracts generally relate to motor vehicles, computers, industrial machinery and other equipment.

Most of our leasing transactions are financial (as opposed to operational). Our leasing transactions primarily involve the leasing of trucks, cranes, aircraft, ships and heavy machinery. As of December 31, 2018, 45.9% of our outstanding leasing transactions were for vehicles.

We conduct our leasing transactions through our primary leasing subsidiary, Bradesco Leasing and also through Bradesco Financiamentos.

We obtain funding for our leasing transactions primarily by issuing debentures and other securities in the domestic market.

As of December 31, 2018, Bradesco Leasing had R\$8.9 billion of debentures outstanding in the domestic market. These debentures will mature in 2028 and bear monthly interests at the interbank interest rate (“CDI

rate”).

Terms of leasing agreements

Financial leases represent a source of medium and long-term financing for Brazilian customers. Under Brazilian law, the minimum term of financial leasing contracts is 24 months for transactions relating to products whose average useful life of five years or less, and 36 months for transactions for those with an average useful life of five years or more. There is no legal maximum term for leasing contracts. As of December 31, 2018, the remaining average maturity of contracts in our lease portfolio was approximately 56 months.

36 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

Targeted Production Microcredit

We offer a product named “targeted production microcredit” (*microcrédito produtivo orientado*) to formal and informal entrepreneurs, in accordance with Central Bank regulations requiring banks to use 2.0% of their cash deposits to provide microcredit loans. As of December 31, 2018, we had 42,818 microcredit loans outstanding, totaling a portfolio of R\$114.0 million.

In accordance with Central Bank regulations, consumer microcredit transactions are charged up to a maximum effective interest rate of 2.0% per month. However, microcredit loans for certain types of business or specific products (“targeted production microcredit”) have a maximum effective interest rate of up to 4.0% per month. The CMN requires that the maximum amount loaned to a borrower be limited to (i) R\$2,000 for low income individuals in general (consumer microcredit); (ii) R\$5,000 for individuals or legal entities engaged in a productive activity of professional, commercial or industrial nature, provided that the sum of the value of the transaction and the balance of other credit transactions does not exceed R\$40,000; and (iii) R\$15,000 for our targeted production microcredit transactions. In addition, microcredit loans may not be for less than 120 days, and the origination fee must be up to 2.0% of the loan value for individuals and up to 3.0% for micro entrepreneurs. The Federal Government updated some rules of the National Program of Targeted Productive Microcredit (PNMPO) through Provisional Measure No. 802/17, subsequently converted into Law No. 13,636/18 providing special conditions for concession of credit to individuals and legal entities that are entrepreneurs of urban and rural productive activities and have income and annual gross revenues under R\$200,000.00.

In March 2019, CMN issued the Resolution No. 4,713/19, which will come into force on June 30, 2019, with the new guidelines about the microcredit operations, which includes targeted production microcredit and the direction of resources for those operations.

Credit cards

We offer a range of credit cards to our clients including Elo, American Express, Visa, MasterCard brands and private label cards, which stand out due to the extent of benefits and convenience offered to associates.

We earn revenues from our credit card operations through:

- fees on purchases carried out in commercial establishments;
- issuance fees and annual fees;
- interest on credit card balances;
- interest and fees on cash withdrawals through ATMs; and

- fees on cash advances to cover future payments owed to establishments that accept credit cards.

We offer our customers a complete line of credit cards and related services, including:

- cards issued for use restricted to Brazil;
- credit cards accepted nationwide and internationally;
- credit cards directed toward high net worth customers, such as Gold, Platinum, Infinite/Black and Nanquim from Elo, Visa, American Express and MasterCard brands;

37 Bradesco

Form 20-F

- multiple cards that combine credit and debit features in a single card, which may be used for traditional banking transactions and shopping;
- co-branded credit cards, which we offer through partnerships with companies;
- "affinity" credit cards, which we offer through associations, such as sporting clubs and non-governmental organizations; and
- private label credit cards, which we only offer to customers of retailers, designed to increase business and build customer loyalty for the corresponding retailer, which may or may not have a restriction on making purchases elsewhere, among others.

We hold 50.01% of the shares of Elopár, an investment holding company which investments include Alelo (benefit cards, pre-paid and money card), Liveló (coalition loyalty program), Stelo (digital portfolio for online purchases), as well as participations in Elo Serviços (brand) and Banco CBSS (credit card issuance and other financial products). We hold 30.06% of the shares of Cielo S.A.

We also have a card business unit abroad, Bradescard Mexico, one of the highlights of which is a partnership with C&A.

We initiated a partnership with Apple in 2018 for the use of Bradesco cards in the Apple Pay App for payments in commercial establishments.

We also launched another product in 2018, called the Pre-paid Bradesco DIN card. It can be used to pay for purchases in Brazil and abroad, to make transfers to another Bradesco DIN, to receive money from Bradesco account holders and to make withdrawals in the Bradesco self-service network, Banco24Horas and Bradesco Expresso.

As of December 31, 2018, we had several partners with whom we offered co-branded, affinity and private label/hybrid credit cards. These relationships have allowed us to integrate our relationships with our customers and offer our credit card customers banking products, such as financing and insurance.

38 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

The following table shows our volume of transactions and total number of transactions of credit cards for the years indicated:

	In millions		
	2018	2017	2016
Volume traded - R\$	189,155.0	176,893.5	159,172.5
Number of transactions	2,104.8	1,991.0	1,784.0

With the mission of providing security solutions aligned to our business and creating, implementing, and maintaining preventive rules, processes and technologies, we have a department to prevent credit card fraud. This department acts strategically in the security of the use and service channels, systems and processes of the product, assessing, treating, and suggesting improvements. The department also issues technical opinions in connection with strategic security issues and implementation of products, services or processes.

Among the main "Corporate Security Global Vision" responsibilities, we highlight the following:

- the strategy area to prevent credit card fraud has the mission of identifying and mitigating risks of financial losses and negative impacts to the image of the Bank. It develops prevention strategies to documental and transactional fraud, monitoring and alerting in real time the onboarding of the product as well as all transactions made through the customer service and use channels. The actions are based on behavioral analyses of fraud, supported by statistical methodologies and predictive models of fraud, in order to ensure controls aligned to the business. The area also works on the diagnosis of losses to identify systemic and operational weaknesses, recommending preventive actions and the alignment with the current strategy when necessary;
- the projects and processes area establishes controls for the identified risks and is responsible for evaluating the risk of fraud and issuing recommendations on new projects, processes and products. The area proposes to the managers of the business and technical areas solutions that aim to balance the use and the security of the products and access to service channels, as well as corporate and strategic actions, which envisage the best practices of the market focused on preventive actions; and
- the portfolio analysis area is responsible for managing and providing information from the fraud prevention area to the other areas of the organization.

Import and Export Financing

For information on Import and Export Financing, see "Item 4.B. Business Overview – Foreign branches and subsidiaries."

Cash Management Solutions

Management of accounts payable and receivable – In order to meet the cash management needs of our customers in both public and private sectors, we offer many solutions for managing accounts payable and receivable, supported by our network of branches, bank correspondents and electronic channels, all of which aim to improve speed and security for customer data and transactions. The solutions provided include: (i) receipt and payment services; and (ii) resource management, enabling our customers to pay suppliers, salaries, and taxes and other levies to governmental or public entities. These solutions, which can also be customized, facilitate our customers' day-to-day tasks and help to generate more business. We also earn revenues from fees and investments related to collection and payment processing services, and by funds in transit received up to its availability to the related recipients.

Solutions for receipts and payments – In 2018, we settled 1.0 billion invoices through the services of *Cobrança Bradesco* and 579 million of receipts by the tax collection systems and utility bills (such as water, electricity, telephone and gas), checks custody service, identified deposits and credit orders. The legal entity systems processed 1.1 billion documents related to payments to suppliers, salaries and taxes.

Global Cash Management – Global Cash Management aims at structuring solutions to foreign companies operating in the Brazilian market and Brazilian companies making business in the international market. By way of customized solutions, partnerships with international banks and access to the Society for Worldwide Interbank Financial Telecommunication (SWIFT) network, we offer products and services for carrying out the cash management of these companies.

Niche Markets – We operate in various niche markets, such as education, health, condominiums, country clubs, Individual Micro Entrepreneur (MEI), expeditors and driving schools, transportation, franchising, and religion, among others, where our clients have the support of a specialized team with the mission of structuring custom solutions that add value to their business.

Form 20-F

As an example, the Franchising & Business niche has a team of franchising specialists that, through their relationship with franchising companies, identify opportunities for financing and providing services to all franchisees and their employees. The partnership with the franchise networks occurs through structured commercial activities in synergy with the managing departments, commercial segments, and affiliated companies. The focus on the peculiarities of this sector creates a competitive and sustainable position by structuring appropriate solutions and, in particular, through the strategy of providing differentiated and specialized service. We have approximately 450 agreements in place with franchising companies, generating numerous opportunities to open new current accounts and leveraging business with the respective franchisees.

Another important feature in this area is the support we provide towards the development of Local Production Arrangements (“APLs”), by providing service to businesses and assistance to these clients. Participating in an APL strengthens the companies, because together they can form an articulated and important group for local development, allowing for greater competitive and sustainable advantages for micro and small businesses. Currently, we service 423 APLs throughout the country.

Public authority solutions

We have a specific area dedicated to serving public administration, which offers specialized services aimed at identifying business opportunities and structuring customized solutions to entities and bodies of the Executive, Legislative and Judiciary branches at federal, state and municipal levels, in addition to independent governmental agencies, public foundations, state-owned and mixed companies, the armed forces (army, navy and air force) and the auxiliary forces (federal and state police forces).

Our exclusive website developed for our customers offers corporate solutions for federal, state and municipal governments for payments, receipts, human resources and treasury services. The website also features exclusive facilities for public employees and the military, showing all of our products and services for our customers.

Our relationships with such public authorities are developed and maintained by specialized business managers located in distribution platforms throughout the country, which can be identified on our website. We have six specialized platforms to assist governments, capitals, courts, class councils, chambers, prosecutors, public defenders and 100 largest municipalities according to the Brazilian GDP.

In 2018, we took part and were successful in bidding processes sponsored by the Brazilian government. Furthermore, according to INSS, we continue to be leaders in payments of INSS benefits, with more than 11.0 million retirees and pensioners.

Management and administration of third-party funds

BRAM manages third-party funds through:

- mutual funds;

Focus on corporate responsibility and sustainability as core principles of our business.

- managed portfolios;
- exclusive funds; and
- receivable funds (FIDCs –*Fundos de Investimento em Direitos Creditórios*) and FIIs (Real Estate Investment Funds).

Management of funds and portfolios – On December 31, 2018, BRAM managed 1,230 funds and 300 portfolios, providing services to 3.4 million investors. Among its biggest customers are all the main segments of Bradesco, like Prime, Corporate One, Corporate, Large Corporate, Private and *Varejo* (Retail) (for more information on our segmentation, see “Segmentation of clients”) and Grupo Bradesco Seguros, in addition to institutional investors in Brazil and abroad. These funds comprise a wide group of fixed-income, non-fixed income, investments abroad and multimarket funds, among others.

41 Bradesco

Form 20-F

Services related to capital markets and investment banking activities

As our investment bank, “Bradesco BBI” is responsible for (i) originating and executing project financing operations; (ii) originating and executing mergers and acquisitions; (iii) originating, structuring, syndicating and distributing fixed income transactions of securities in Brazil and abroad; and (iv) originating, structuring, syndicating and distributing issuances of securities of equity in Brazil and abroad.

In 2018, Bradesco BBI received the following top awards: “Best Investment Bank in Brazil” by Global Finance, “Most Innovative Investment Bank from Latin America” by The Banker and “LatAm M&A Firm of the Year and Brazil M&A Firm of the Year” by Global M&A Network.

In 2018, Bradesco BBI advised customers in a total of 190 transactions across a range of investment banking products, totaling approximately R\$162.9 billion.

Project finance – Bradesco BBI is the advisor and structuring agent in the areas of “Project” and “Corporate Finance,” seeking to optimize financing solutions for projects across various industries through both credit and capital markets operations. In 2018, Bradesco BBI successfully participated in the launching of 19 projects, totaling R\$8.4 billion in investments.

Mergers and acquisitions – Bradesco BBI provides advisory services in merger and acquisition and corporate sale transactions, including the sale of companies and assets, private placements, creation of joint ventures, financial and corporate restructuring, and privatizations. In 2018, Bradesco BBI advised on 25 disclosed transactions that amounted to R\$60.8 billion. Bradesco BBI ended the year as number one in the ranking of volume in mergers and acquisitions in Brazil according to Merger Market.

Structured operations – Bradesco BBI structures customized financial solutions for its customers in terms of their needs such as: investments, acquisitions, corporate reorganization, share repurchase, improved financial ratios, capital structure streamlining, and assets and risk segregation, by offering a number of funding tools to companies. Additionally, Bradesco BBI has a strong presence in the acquisition finance segment.

Fixed income – Bradesco BBI coordinates public offerings of securities of fixed income in local and international capital markets and international debt. In 2018, Bradesco BBI coordinated 127 local capital markets debt offerings that amounted to more than R\$46.1 billion. In the same period, Bradesco BBI coordinated 13 international capital markets debt offerings that amounted to more than US\$8.7 billion. Bradesco BBI ended the year in first position in the rankings of volume and number of international capital market transactions, and in second position in the rankings of origination and distribution of fixed income locally, according to data published by ANBIMA.

Equity – Bradesco BBI coordinates public offerings of shares in the national and international markets. In 2018, Bradesco BBI coordinated 4 local capital markets equity offerings that amounted to more than R\$7.3 billion. In the same period, Bradesco BBI coordinated 2 international capital markets equity offerings that amounted to more than R\$8.5 billion.

Intermediation and trading services

Bradesco Corretora

Bradesco S.A. CTVM, or "Bradesco Corretora," operates in the financial market, and has as its objective the mediation of the purchase and sale of shares, commodities futures contracts, financial assets, indexes, options, share rental, and forward contracts, in the primary and secondary market. It also offers a wide range of products such as Investment Clubs, government securities through *Tesouro Direto* (Treasury Direct), and is admitted to negotiations in B3 and in the organized over-the-counter market, which are tailored to the needs of high net-worth individuals, major corporations and institutional investors.

In 2018, Bradesco Corretora traded R\$353.6 billion in the B3 equities market and ranked fifth in Brazil in terms of total trading volume.

In addition, in the same period, Bradesco Corretora traded 56.3 million futures, forwards, swaps and options totaling R\$6.2 trillion on the B3. In 2018, Bradesco Corretora ranked tenth in the Brazilian market, in relation to the number of futures contracts, terms, swaps and options executed.

Bradesco Corretora was awarded by B3, within the Operational Qualifying Program (PQO), five excellence seals (Agro Broker, Carrying Broker, Execution Broker, Retail Broker and Nonresident Investor Broker), indicating the high quality of its future market transactions. Bradesco Corretora is also certified by CETIP (Clearing House for the Custody and Financial Settlement of Securities, currently "B3").

Bradesco Corretora offers its clients the possibility to trade securities on the Internet through its "Home Broker" service. In 2018, "Home Broker" trading totaled R\$14.4 billion.

42 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

Bradesco Corretora has a full range of services in investment analysis with coverage of the main sectors and companies of the Brazilian market. With a team composed of 50 sector specialists who fairly disclose their opinions to the customers by way of follow-up reports and instruction guides, with a wide range of projections and comparison multiples. Bradesco Corretora also has a team of its own economists dedicated to the customers' specific demands, focused on the stock market. Over 500 reports, in English and Portuguese, are forwarded on a monthly basis to the most important investors domiciled in Brazil, the United States, Europe and Asia.

Ágora Investimentos

Ágora CTVM S.A., or "Ágora Investimentos," as well as Bradesco Corretora, operates in the financial market, and has as its objective the mediation of the purchase and sale of shares, commodities futures contracts, financial assets, indexes, options, share rental, and forward contracts, in the primary and secondary market traded on the B3 and in the organized over-the-counter market, including both our checking account holders and non-account holders. It also offers a wide range of products such as Fixed Income, Investment Funds, Investment Clubs, government securities through *Tesouro Direto* (Treasury Direct), all of which render advisory services that are segmented and aligned to the customer's profile.

In 2018, Ágora Investimentos traded R\$43.2 billion in the B3 equities market and ranked fifth in Brazil in terms of total trading volume.

In addition, in the same period, Ágora Investimentos traded 56.3 million futures, forwards, swaps and options totaling R\$6.2 trillion on the B3 to individuals. Ágora Investimentos offers its clients the possibility to trade securities on the Internet through its "Home Broker" service. In 2018, "Home Broker" trading totaled R\$38.7 billion.

Ágora Investimentos was awarded by B3, within the Operational Qualifying Program (PQO), three excellence seals (Carrying Broker, Execution Broker and Retail Broker), indicating the high quality of the operational services rendered the market and customers investors. Ágora Investimentos also has the seal Certifies propitiating safety and transparency in the investments registered in B3.

Ágora Investimentos has a full range of services in investment analysis with coverage of the main sectors and companies of the Brazilian market. With a team composed of sector specialists who fairly disclose their opinions to the customers by way of follow-up reports and instruction guides, with a wide range of projections and comparison multiples.

Capital market solutions

In 2018, we were one of the main providers of capital markets services and we maintained our leadership position in the domestic and global market according to the ANBIMA's ranking of custody of assets.

Among the main services we offer in this segment, we highlight: qualified custody of securities for investors and issuers, administrators of investment funds, clubs and managed portfolios; bookkeeping of securities

Focus on corporate responsibility and sustainability as core principles of our business.

(shares, BDRs - Brazilian Depositary Receipts, quotas of investment funds, CRIs and debentures); custody of shares backed by DR - Depositary Receipts, loan of shares, liquidating bank, depositary (Escrow Account - Trustee), clearing agent, tax and legal representation for non-resident investors, and fiduciary administration for investment funds.

We have Quality Management System ISO 9001:2015 certifications and GoodPriv@cy certifications. We also hold an ISAE 3402 (International Standard on Assurance Engagements) certification, which comprises assurance reports on controls at a service organization under international standards. These certifications expand our structures of controls, increasing the level of effectiveness and quality of processes.

As of December 31, 2018, the set of the services provided by us, which we call “Bradesco Custódia” was composed of:

- custody and controllership services for investment funds and managed portfolios involving:
 - R\$1.6 trillion in assets under custody;
 - R\$2.3 trillion in assets under controllership; and
 - R\$127.6 billion in market value, related to 25 ADR (American Depositary Receipts) programs and 4 GDR (Global Depositary Receipts) programs.
- fiduciary administration for funds:

43 Bradesco

Form 20-F

- R\$429.9 billion total shareholders' equity of investment funds under fiduciary administration by BEM.
- securities bookkeeping:
 - 239 member companies of the Bradesco Book-entry Stock System, with 5.0 million shareholders;
 - 391 companies with 613 issues in the Bradesco's Book-Entry debentures system, with a market value of R\$437.7 billion;
 - 924 investment funds in the Bradesco Book-Entry Quotas System (value of R\$95.1 billion); and
 - 36 BDR (Brazilian Depositary Receipts) programs managed, with a market value of R\$704.8 million.
- depositary (Escrow Account - Trustee):
 - 19,253 contracts, with a financial volume of R\$17.8 billion.

International banking services

As a private commercial bank, we offer a wide range of international services, such as foreign trade finance and foreign currency loans, foreign exchange operations and international sureties, lines of credit and banking. As of December 31, 2018, our international banking services included:

Branches:

- one in New York City;
- one in the Cayman Islands; and
- one in London.

Subsidiaries:

- one in London: Bradesco Securities U.K., named "Bradesco Securities U.K.;"
- one in the Cayman Islands: Cidade Capital Markets Ltd., or "Cidade Capital Markets;"
- one in Argentina: Banco Bradesco Argentina S.A., or "Bradesco Argentina;"

- one in Mexico: Bradescard México, Sociedad de Responsabilidad Limitada, or "Bradescard México;"

- two in Hong Kong: (i) Bradesco Trade Services Ltd. or "Bradesco Trade;" and (ii) Bradesco Securities Hong Kong or "Bradesco Hong Kong;" and
- two in New York: (i) Bradesco Securities Inc. or "Bradesco Securities U.S." and (ii) Bradesco North America LLC or "Bradesco North America."

Representative office:

- one in the city of Miami.

Our International and Exchange Area in Brazil coordinates our international transactions with support from twelve operational units specialized in foreign exchange and 18 points of service which are part of the Bradesco Corporate Segment (*Segmento Bradesco Corporate*). This structure is located at major exporting and importing areas nationwide.

44 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

Revenues from Brazilian and foreign operations

The table below breaks down revenues (interest and similar income, and fee and commission income) from our Brazilian and foreign operations for the periods shown:

For the years ended December 31,	2018		2017		2016	
	R\$ in thousands	%	R\$ in thousands	%	R\$ in thousands	%
Brazilian operations	141,319,794	96.9%	146,014,854	98.0%	164,975,062	98.2%
Overseas operations	4,564,935	3.1%	2,966,302	2.0%	3,066,400	1.8%
Total	145,884,729	100.0%	148,981,156	100.0%	168,041,462	100.0%

Foreign branches and subsidiaries

Our foreign branches and subsidiaries principally provide financing in foreign currency (particularly foreign trade finance operations) to Brazilian and non-Brazilian customers. Total assets of the foreign branches, considering the elimination of intra-group transactions, were R\$50.9 billion, as of December 31, 2018, denominated in currencies other than the *real*.

Funding required for financing of Brazilian foreign trade is primarily obtained from the international financial community, through credit lines granted by correspondent banks abroad. We issued debt securities in international capital markets as an additional source of funding, which amounted to R\$7.3 billion (US\$1.9 billion) during 2018.

The following is a brief description of our subsidiaries abroad:

Bradesco Europa – Through its unit in Luxembourg and its branch in London, it is also dedicated to providing additional services to clients of the private banking segment.

Bradesco Argentina – It was set up with the purpose of granting financing, largely to companies based in Brazil with local establishments and, to a lesser extent, to companies based in Argentina doing business with Brazil.

Cidade Capital Markets – In February 2002, Bradesco acquired Cidade Capital Markets in Grand Cayman, through to the acquisition of its parent company in Brazil, Banco Cidade.

Bradesco Securities (U.S., U.K. and H.K.) - Bradesco Securities, our wholly owned subsidiary, is a broker dealer in the United States, England and Hong Kong:

- Bradesco Securities U.S. focuses on facilitating the purchase and sale of shares, primarily in the form of ADRs and common shares. It is also an authorized dealer in bonds, commercial paper and deposit certificates, among other securities, and may provide investment advisory services;

- Bradesco Securities U.K. focuses on the intermediation of equities and fixed income operations for Brazilian companies with global institutional investors; short-term fund-raising activities for Banco Bradesco S.A. in Euro Certificate of Deposit (Euro CD) and Medium-Term Note (MTN) programs; and sale of research reports and services of corporate access by subscriptions to institutional investors in Europe; and
- Bradesco Securities H.K. focuses on the trading of ADRs and public and private securities issued by Brazilian companies to global institutional investors.

Bradesco North America LLC – It serves as a holding company for our investments in non-bank businesses in the United States.

Bradesco Trade Services – A non-financial institution and a subsidiary of our branch in the Cayman Islands, which we incorporated in Hong Kong in January 2007, in partnership with the local Standard Chartered Bank.

Bradescard Mexico – The business unit of credit cards issuance.

Banking operations in the United States

In January 2004, the United States Federal Reserve Bank authorized us to operate as a financial holding company in the United States. As a result, we may do business in the United States directly or through a subsidiary and, among other activities, may sell insurance products and certificates of deposit, provide underwriting services, act as advisors on private placements, provide portfolio management and merchant banking services and manage mutual fund portfolios.

Form 20-F

Import and export financing

Our Brazilian foreign-trade related business consists of giving finance services to our clients in their export and import activities.

In import financing/refinancing, we directly transfer funds in foreign currency to foreign exporters, fixing the payment in local currency for Brazilian importers. In export finance, exporters obtain advances in *reais* on closing an export forex contract for future receipt of foreign currency on the contract due date. Export finance arrangements prior to shipment of goods/performance of services are known locally as Advances on Exchange Contracts or "ACCs," and the sums advanced are used to manufacture goods or provide services for export. If advances are paid after goods/performance of services have been delivered, they are referred to as Advances on Export Contracts, or "ACEs."

There are other forms of export financing, such as Export Prepayments, onlendings from BNDES-EXIM funds, Export Credit Notes and Bills (referred to locally as "NCEs" and "CCEs"), and Export Financing Program with rate equalization – "PROEX."

Our foreign trade portfolio is funded primarily by credit lines from correspondent banks. We maintain relations with various American, European, Asian and Latin American financial institutions for this purpose, using our network of approximately 1,303 correspondent banks abroad, 44 of which extended credit/guarantee lines as of December 31, 2018.

As of December 31, 2018, our international unit had a balance of R\$49.1 billion in export financing and R\$7.2 billion and R\$2.4 billion in import financing and international guarantees. The volume of our foreign exchange contracts for exports reached US\$55.0 billion in 2018. In the same period, the volume of our foreign exchange contracts for imports reached US\$42.8 billion. In 2018, based on Central Bank data, we reached a 24.1% market share of trade finance for Brazilian exports and 24.4% for imports.

The following table shows the composition of our foreign trade asset portfolio as of December 31, 2018. This portfolio includes transactions with credit features and off-balance sheet transactions (import credit opened and international guarantees):

2018	R\$ in thousands
Export financing	
Advance on foreign exchange contracts – undelivered bills	15,146,180
Advance on foreign exchange contracts – delivered bills	582,961
Export prepayment	10,975,694
Onlending of funds borrowed from BNDES/EXIM	236,711
Proex - Rate Equalization Program	32,783
NCE/CCE (Exports Credit Note/Exports Credit Certificates)	22,077,273

International banking services

85

Total export financing	49,051,602
Import financing	
Import financing – foreign currency	3,200,932
Exchange discounted in advance for import credit	3,599,264
Import credit opened	361,593
Total import financing	7,161,789

4.B. Business Overview

Form 20-F

- cross border money transfers;
- advance payment for exports;
- accounts abroad in foreign currency;
- domestic currency account for foreign domiciled customers;
- cash holding in other countries;
- structured foreign currency transactions: through our overseas units;
- service agreements – receiving funds from individuals abroad via money orders;
- prepaid cards with foreign currency (individual and legal entities);
- purchasing and selling of foreign currency paper Money;
- cashing checks denominated in foreign currency; and
- clearance certificate (international financial capacity certificate).

Consortia

In Brazil, persons or entities that wish to acquire certain goods may set up a group known as a "consortium." Consortia in Brazil are made up of pooled funds for the purpose of financing an acquisition. Consortia that are formed for the purchase of real estate, vehicles, motorcycles and trucks have a fixed term and quota, both previously determined by its members and are run by an administrator.

Bradesco Administradora de Consórcios manages groups of consortia and, as of December 31, 2018, registered total sales of 1,503,817 outstanding quotas; net income of R\$1.3 billion; and fees from consortiums of R\$1.7 billion. The company also administers a total volume of transactions of over R\$73.5 billion.

Form 20-F

Insurance, pension plans and capitalization bonds

We offer a range of products and services to our clients, including life, health, accident and vehicles and property insurance, both to individuals and companies; supplementary pension plans, individual and legal entities, as well as the capitalization securities, through our extensive distribution network.

The following table shows selected financial data for our insurance, pension plans and capitalization bonds segment for the periods indicated.

As of and for the year ended December 31,	Insurance, pension plans and capitalization bonds - R\$ in thousands

(1) For additional information, see "Item 5.A. Operational Results".

Insurance products and services, pension plans and capitalization bonds

We offer insurance products, pension plans and capitalization bonds through different legal entities, which we refer to collectively as "Grupo Bradesco Seguros." Grupo Bradesco Seguros is leader in the Brazilian insurance market. The insurance products, pension plans and capitalization bonds offered in our service channels are:

- life and personal accident insurance;
- health insurance;
- automobiles, property/casualty and liability insurance;
- reinsurance;
- pension plans; and
- capitalization bonds.

Life and personal accident insurance

We offer life and personal accident insurance, as well as insurance against miscellaneous events, such as job loss, through our subsidiary Bradesco Vida e Previdência. As of December 31, 2018, there were 32.6 million life insurance policyholders.

4.B. Business Overview

Form 20-F

Health insurance

The health insurance policies cover medical/hospital expenses. We offer health insurance policies through Bradesco Saúde and its subsidiaries for small, medium or large companies wishing to provide benefits for their employees.

On December 31, 2018, Bradesco Saúde and its subsidiary Mediservice Administradora de Planos de Saúde S.A. (Mediservice) had more than 3.6 million beneficiaries covered by company plans and individual/family plans. Approximately 139 thousand companies in Brazil pay into plans provided by Bradesco Saúde and its subsidiaries, including 38 of the top 100 largest companies in the country.

Bradesco Saúde currently has one of the largest networks of providers of health services in Brazil. As of December 31, 2018, it included 10,703 laboratories, 16,438 specialized clinics, 14,798 physicians and 2,045 hospitals located throughout the country.

Automobiles and property/casualty insurance

We provide automobile and property/casualty insurance through our subsidiary Bradesco Auto/RE.

The automobile insurance covers losses arising from damage caused to the insured vehicle in cases of collision, larceny, theft and fire, in addition to damages to passengers and third parties. In automobile insurance, intended for individuals, "Bradesco Seguro Auto Correntista" is featured for being a product that offers discounts, benefits and exclusive coverage to account holders of Banco Bradesco.

Retail property/casualty insurance is for individuals, particularly those with residential and/or equipment related risks and small- and medium-sized companies whose assets are covered by multi-risk business insurance. Of the various property/casualty lines for individuals, our residential policy (*Bilhete Residencial*) is a relatively affordable and highly profitable product. For legal entities, Bradesco Auto/RE offers Bradesco Seguro Empresarial (business insurance), which is adapted to meet our customers' and business needs, according to their industry sector.

As of December 31, 2018, Bradesco Auto/RE had 1.4 million insured automobiles and 1.3 million property/casualty policies and notes, making it one of Brazil's main insurers.

Supplementary Pension plans

We have managed individual and corporate pension plans since 1981 through our wholly-owned subsidiary Bradesco Vida e Previdência, which is now one of the leading pension plan manager in Brazil, as measured by investment portfolio and technical provision criteria, based on information published by FENAPREVI and SUSEP.

Bradesco Vida e Previdência offers and manages a range of individual and group pension plans. Our largest individual plans in terms of contributions known as VGBL and PGBL are exempted from paying

taxes on income generated by the fund portfolio.

As of December 31, 2018, Bradesco Vida e Previdência accounted for 25.2% of the pension plan and VGBL market in terms of contributions, according to SUSEP. On December 31, 2018, Bradesco Vida e Previdência accounted for 26.7% of all supplementary pension plan assets under management, 25.6% of VGBL, 24.6% of PGBL and 44.9% of traditional pension plans, according to FENAPREVI.

Brazilian law currently permits the existence of both "open" and "closed" private pension entities. "Open" private pension entities are those available to all individuals and legal entities wishing to join a benefit plan by making regular contributions. "Closed" supplementary pension plan entities are those available to discrete groups of people such as employees of a specific company or a group of companies in the same sector, professionals in the same field, or members of a union. Private pension entities grant benefits on the basis of periodic contributions from their members, or their employers, or both.

We manage pension and VGBL plans covering 3.0 million participants, 63.4% of whom have individual plans, and the remainder of whom are covered by company plans. The company plans account for 26.2% of technical reserves.

Under VGBL and PGBL plans, participants are allowed to make contributions either in installments or in lump-sum payments. Participants in pension plans may deduct the amounts contributed to PGBL up to 12.0% of the participant's taxable income when making their annual tax declaration. Under current legislation, redemptions and benefits are subject to withholding tax. VGBL plan participants may not deduct their contributions when declaring income tax. At the time of redemption, or when benefits are paid out, tax will be levied on the income accrued, pursuant to current legislation.

VGBL and PGBL plans may be acquired by companies in Brazil for the benefit of their employees. In December 2018, Bradesco Vida e Previdência managed R\$166.2 billion in VGBL and R\$36.8 billion in PGBL plans. Bradesco Vida e Previdência also managed R\$24.5 billion in pension plans.

49 Bradesco

Form 20-F

Bradesco Vida e Previdência also offers pension plans for corporate customers that are in most cases negotiated and adapted to the specific needs for this type of customer.

Bradesco Vida e Previdência earns revenues primarily from:

- pension and PGBL plan contributions, life insurance and personal accidents premiums and VGBL premiums;
- revenues from management fees charged to participants in accordance with mathematical provisions; and
- interest income.

Capitalization bonds

Bradesco Capitalização is the leader among private sector capitalization bond companies, according to SUSEP and offers its customers capitalization bonds with the option of a lump-sum or monthly contributions. Plans vary in value (from R\$20 to R\$50,000), form of payment, contribution period, and periodicity of draws for cash prizes of up to R\$1.4 million (net premiums). Plans are adjusted based on the Reference Rate (TR) plus interest over the value of the mathematical provision, which may be redeemed by the shareholder at the end of the grace period. As of December 31, 2018, we had around 7.2 million "traditional" capitalization bonds and around 16.0 million incentive capitalization bonds. Given that the purpose of the incentive capitalization bonds is to add value to the products of a partner company or even to provide an incentive for its customer to avoid delinquency, the plans are for short-terms and grace periods with low unit sales value. At the end of 2018, Bradesco Capitalização had approximately 23.2 million capitalization bonds and 2.7 million customers.

The investment grade rating of Bradesco Capitalização on a domestic scale is "brAA-/Stable/--," assigned by S&P Global rating agency.

Distribution channels of insurance products, pension plans and capitalization bonds

We sell our insurance products, pension plans and capitalization bonds through our website, through exclusive brokers based in our network of bank branches, and non-exclusive brokers throughout Brazil, all of whom are compensated on a commission basis. Our capitalization bonds are offered through our branches, the Internet, our call center, ATMs and external distribution channels.

The following table shows the distribution of sales of these products through our branches and outside our branches:

% of total sales, per product

	2018	2017	2016
Insurance products			
Sales through the branches	38.0%	38.5%	38.3%
Sales outside the branches	62.0%	61.5%	61.7%
Pension plans products			
Sales through the branches	87.1%	88.1%	89.2%
Sales outside the branches	12.9%	11.9%	10.8%
Capitalization bonds			
Sales through the branches	85.7%	86.1%	92.7%
Sales outside the branches	14.3%	13.9%	7.3%

Form 20-F

Distribution channels

The following table shows our main distribution channels as of the dates indicated below:

Distribution Channels ⁽¹⁾ - Units	2018	2017	2016
Service Stations	76,173	73,474	72,604
- Branches	4,617	4,749	5,314
- PAs - Service Points	3,824	3,899	3,821
- PAEs - ATMs located on a company's premises	907	928	1,013
- External ATM Network - Bradesco ⁽²⁾ ⁽³⁾	43	63	186
- Banco24Horas Network ⁽²⁾	12,697	11,050	10,972
- Bradesco Espresso (Banking Correspondents)	39,100	38,708	38,430
- Bradesco Financiamentos ⁽⁴⁾	14,912	14,002	12,791
- Losango Customer Service Points	60	63	63
- Branches/Subsidiaries abroad	13	12	14
ATMs	58,099	56,849	56,110
- Bradesco Network	34,997	35,590	36,119
- Banco24horas Network	23,102	21,259	19,991

⁽¹⁾ We offer products and services also through digital channels such as: (i) contact center; (ii) mobile app; and (iii) internet banking;

⁽²⁾ Including overlapping ATMs within Bradesco's own network and Banco24Horas network; and

⁽³⁾ This decrease is related to the sharing of external network ATMs by the Banco24Horas network ATMs.

⁽⁴⁾ As from 2017, we started to consider service posts for payroll-deductible loans and dealers/resellers for vehicle financing. For better comparability, the previous periods were adjusted.

Partnerships with retail companies – Bradesco Espresso

“Bradesco Espresso” enables us to expand our share of the correspondent bank segment through partnerships with supermarkets, drugstores, grocery stores, department stores and other retail chains. These companies provide basic banking services like the receipt of utility bills, payment vouchers, withdrawals from current and savings accounts and social security benefits, and deposits, among others. The services are provided by employees at the relevant establishments, while decisions regarding granting of credit or opening of accounts are made by us.

The main services we offer through Bradesco Espresso are:

- receipt and submission of account application form;
- receipt and submission of loans, financing and credit card application form;
- withdrawals from checking accounts and savings accounts;

- Social Security National Service (INSS) benefit payments;
- checking accounts, savings accounts and INSS balance statements;
- receipt of utility bills, bank charges and taxes; and
- prepaid mobile recharge.

As of December 31, 2018, the Bradesco Expresso network totaled 39,100 service stations, of which 6,611 were new service stations, with an average of 42.1 million monthly transactions or 2.0 million transactions per business day.

Digital Channels

The Digital Channels offer mobility and autonomy to customers so that they may use the Bank from wherever they are and expand their businesses with us.

Mobile phones and tablets have become part of people's day-to-day lives, which reinforces our role of creating new features adapted to the user and, thus, engage our clients to make easier and more secure transactions.

In addition to traditional and consolidated service channels, such as Automatic Teller Machines (ATMs), telephone service, and Internet Banking, clients have access to an extensive portfolio of products and services through Bradesco Celular, available from the simplest to the most sophisticated devices.

Form 20-F

Below is a brief description of our digital channels:

Social Networks – Since 2004, we have had a strong presence on Social Networks, monitoring our brand and our products and services, providing service to clients and non-clients 24 hours a day, seven days a week, with a 5-minute response time and a dedicated team, specialized in social media.

We maintain relationship with digital content creators in Brazil, such as bloggers, vloggers, and other publishers 2.0. The goal of this activity is to open a direct dialogue with them and their audiences, significantly expanding the dissemination of products, services, and channels, and above all, to encourage the production of digital content in Brazil, strengthening this ecosystem and enhancing our profile in these networks.

BIA – Bradesco Artificial Intelligence (*BradescoInteligência Artificial*) interacts with the user, answers questions about products and services and assists with transactions. In 2018, BIA, which recorded 73.2 million interactions, started assisting via WhatsApp. It is integrated with Google Wizard and already answers questions on more than 83 products and services of the bank. It is available for employees and clients, and provides faster, practical and autonomous services. We were a pioneer in Brazil in the use of IBM's cognitive computing platform, Watson.

Bradesco Celular – Our presence on mobile phones has been growing exponentially. Through apps for individuals and legal entities, we make payment transactions, transfers, balance inquiries, loans, and many other conveniences available. Clients that access their accounts through their mobile phone are not charged by their data package due to an agreement made with Brazil's major mobile network operators.

Products and services available through Bradesco Celular include:

- **Opening Accounts:** available in the Bradesco Applications (Classic), it allows new clients to open an account through their mobile phone, without going to the branch, including the sending of documents by mobile phone;
- **Sharing Proof of Payment:** the client is able to share the proof of payment by e-mail or instant message applications, to save and even print it, in a practical manner through the client's smartphone;
- **Real Estate Credit Simulator:** the client can request a quote for a real state financing through the application and receive it within one hour;
- **Check Deposit via Mobile:** revolutionary in Brazil, this service allows customers to deposit checks in a simple and innovative manner, through the capture of images by their smartphone cameras;
- **Security Key (M-Token) integrated with the mobile device:** is a security device store inside the phone that generates random combinations for the validation of transactions made through our digital channels;

- **Payment with a barcode reader:** to pay a bill, the client points the camera at the barcode, automatically accessing relevant payment information;
- **Touch ID and Fingerprint:** this allows the client to associate their digital finger-print to the four-digit password and to the security key, enabling faster and more practical access to the account using these apps;
- **Bradesco Net Empresa Celular (Bradesco Net Company Mobile Banking):** allows legal entities to manage their corporate banking at anytime and anywhere;
- **DDA Authorization via SMS:** service that enables paying or scheduling payments registered in the DDA by simply replying to an SMS;
- **SMS Pay Bradesco:** clients can pay or schedule utility bills of affiliated networks by replying via SMS;
- **InfoCelular:** sending alerts via SMS with information on current and savings accounts, as chosen by the client; and
- **SMS Banking:** through interactive messages, enables the client to make balance enquiries, check latest entries, credit limits, and refill prepaid mobile phones.

52 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

Internet –We were the first financial institution in Brazil to have an electronic address on the internet and provide financial services to our clients through this channel, transforming our websites into business tools and important sources of information for clients and non-clients.

This structure has two main areas of access and dissemination of content:

- **Bradesco Institutional Website:** simplified content and language adapted for digital media which provides clients and the public at large a wide range of information on various financial products and services. Currently, we have 40 institutional websites, where the public has access to content, can clarify doubts and have access to information about how to open a checking account, services available in our branch network and remote channels, guidance on security, disclosure of social and environmental actions, specific investor publications, content on financial education, simulators, and responsible credit, among others; and
- **Bradesco Internet Banking for Financial Services:** our web portal includes 16 operational sites that enable banking transactions for our account holders, in a “secure access” environment that enables the execution of services and financial transactions. We provide various products and services that enable our clients to conveniently, quickly, and securely conduct transactions such as the payment of bills, transfers between accounts, payment of taxes and obtaining personal credit and a homebroker for the purchase, sale and management of assets.

Currently, we use the “banco.bradesco,” top-level domain or generic top-level domain (“gTLDs”), an initiative of the Internet Corporation for Assigned and Numbers (“ICANN”), a body responsible for internet protocols and which regulates addresses on the worldwide internet. Our new website addresses make the access to our content more practical and intuitive.

Self-service – Our self-service channel provides convenience to clients, giving access to transactions outside the branch’s internal environment and enabling the marketing of our products with the challenge of consolidation as a business channel.

Our Self-service Network has 34,997 machines, of which 10,000 are ATMs 3.0 that have a customizable screen, very similar to the application interface of a mobile phone, facilitating the operation by the user. We also have a further 2,300 machines with immediate deposit with the recycling of bank notes and a further 153 that allow for withdrawals in U.S. dollar and Euro. In addition to 23,102 ATMs available under the Banco24Horas network to make withdrawals, check balances, obtain statements, contract loans, pay bills, make transfers between Bradesco accounts and use DOC/TED (types of bank transfers), Prepaid Card, and “proof of life” for INSS.

Our ATMs have highly advanced security technology: biometric reading that identifies customers and authenticates ATM transactions works through a sensor/invisible light beam that captures the image of the vascular pattern of the palm of the hand.

The biometric reading enables our customers to, for example, carry out transactions without a card, by simply using the palm of their hand and their six-digit password, providing convenience and speed without compromising security. In our own network it is possible to carry out all transactions without a card, while the Banco24Horas network allows clients to make withdrawals, check balances, make transfers, contract loans, obtain proof of payment and make other inquiries.

This security and speed resulted in a partnership with the INSS, allowing our retirees and pensioners to carry out the “Proof of Life” (*Prova de Vida*) automatically through the use of biometrics on ATM machines belonging to our network and to the Banco24Horas network, without the need to present a document to a teller, thus speeding up the process. Biometrics is available in 100% of ATM machines belonging to our own network and those of the Banco24Horas network.

Telephone services - *Fone Fácil* (Contact Center) –*Fone Fácil* Bradesco allows clients to bank by telephone, which can be accessed by choosing electronic service or personalized service.

In the electronic service, we provide a sophisticated service system powered by voice command, which provides clients the experience of doing what they want to do through simple voice commands, without the need for listening to various service options and having to choose them by typing the option on the telephone. The client can request the desired service directly.

In the personalized service, on the other hand, clients can rely on our financial specialists and digital convergence agents 24 hours a day, seven days a week, specializing in relations and business.

53 Bradesco

Table of Contents

Form 20-F

Through this channel we offer our main financial services, such as payments, transfers between Bradesco accounts, DOC/TED, investments, credit contracting, support and registration of the security device in the mobile phone, among others.

By calling *Fone Fácil*, clients can access other relationship centers, such as for credit cards, private pensions, capitalization, credit, private and internet banking, among others.

In 2018, 95.9% of our banking transactions were performed through digital channels. The tables below show the number of transactions carried out through digital channels, the credit authorized through these channels and the quantity of current accountholders:

Year ended December 31,	In millions of transactions		% Change
	2018	2017	
Internet Individuals + Companies - with WebTA ⁽¹⁾	5,670	5,449	4.1%
ATMs	1,939	2,052	(5.5)%
Mobile Banking (Bradesco Celular)	10,259	7,783	31.8%
Telephone Banking (Fone Fácil)	156	195	(20.0)%
Total	18,024	15,479	16.4%

⁽¹⁾ WebTA is an internet file transmission service, to the Bank, carried out by corporate customers using Net Empresa.

In the Digital Channels, authorized credit grew in 2018 as a result of the implementation of new functionality including the option to receive the "13th month" salary in advance, and to conduct transactions relating to Income Tax, working capital and deduction of receivables. The base of digital clients has shown continuous growth, reaching 15.3 million clients as of December 31, 2018.

Year ended December 31,	2018	2017	2016
Loans authorized in the Digital Channels - In R\$ billion			
Individuals	15.5	11.5	10.3
Companies	21.6	16.8	13.9
Total	37.1	28.3	24.2
Digital Account Holders - In million			
Individuals	14.1	12.6	11.2
Companies	1.2	1.1	1.0
Total	15.3	13.7	12.2
Next			

On October 30, 2017, we officially launched Next, to complement the ecosystem of solutions of the Bradesco Organization. It was developed as a 100% digital platform and is accessed by the client through an app for iOS and Android. Our goal is for Next to cater to a new range of clients between 18-35 years old.

Next interacts with the user based on his or her behavior using interactive and innovative tools (Analytics platform), offering the best experience of use and relationship with the client.

For the year ended December 31, 2018, Next ended with an average of 5 thousand accounts open per day and 18.4 million transactions, totaling 500,000 accounts. Almost 77% of these clients were not current accountholders of Bradesco, proving the potential of the attractiveness of a new profile of client.

inovabra

The Ecosistema inovabra was set up with the aim to promote innovation inside and outside the Organization through programs based on collaborative work between the Organization, companies, startups, investors and mentors in order to solve challenges, meet the needs of our clients and ensure the sustainability of the business in the long term.

The platform provides favorable conditions to share future visions for business, collaborate on the innovation for the financial market, foster partnerships and accelerate the search for disruptive solutions. When you combine all of this in a single formula, inovabra quickly consolidates itself as a powerful strategic driver of the Organization's efforts concerning innovation, accelerating advances and further extending the range of benefits to the participants of this ecosystem. It is comprised of eight programs:

54 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

- **inovabra centers:** an internal innovation program, which encourages our employees to practice creativity and entrepreneurship, spreading the culture of innovation inside the Organization. The innovation projects are prioritized, structured and conducted from the stage of conception, passing through the whole process of construction and validation of the business model, until they are launched in the market;
- **inovabra startups:** the program is an open innovation program, intended to enable strategic partnerships between us and startups that have applicable solutions or with the possibility of adaptation to financial and non-financial services that may be offered or used by us;
- **inovabra ventures:** it is a proprietary capital fund, currently with a capital of R\$200 million. It is managed by the area of Private Equity area and is intend to invest in startups with technology and/or innovative business models, contributing to the growth of the valuation of these startups and to expand the entrepreneurial environment;
- **inovabra artificial intelligence:** it is a program responsible for the strategy and application of artificial intelligence at the Organization, coordinated by the Center of Excellence Bradesco Artificial Intelligence, with a dedicated multidisciplinary team of data scientists and specialists in natural language;
- **inovabra hub:** a collaborative digital platform that connects participants of the ecosystem of entrepreneurship and innovation in Brazil. Companies, startups and entrepreneurs have access to content, exchange experiences and do business. There are more than 5 thousand users, of which 1.2 thousand are startups;
- **inovabra lab:** is an environment which centralizes 16 laboratories in the areas of technology, designed to operate in a model of collaborative work with large technology partners, residents in this environment. This model provides gains in operating efficiency with the optimization and acceleration of the processes of evaluation and certification of new technologies (hardware and software), prototyping, testing, proof of concept, launches and solutions to new challenges. In addition, it provides favorable conditions for connecting the business areas with the areas of IT and technology partners;
- **inovabra international:** the program is structured in an environment of innovation based in New York and connections in London, with the radar on the global ecosystem of innovation and entrepreneurship of startups. A dedicated team works in a collaborative space in partnership with a specialized company, aiming to identify solutions that add value to the business of the Organization, and to monitor technological trends and behavioral disorders; and
- **inovabra habitat:** a building with more than 22 thousand square meters, located on the large economic innovation and cultural center of São Paulo, where large companies, startups, investors and mentors work collaboratively to innovate and generate business. In one year, it already counts on more than 190 startups and 70 large companies, resident in the environment, with approximately 1.5 thousand people working collaboratively to innovate. In addition to fostering the world of entrepreneurship in Brazil and the culture of innovation in organizations, the habitat tends to contribute with the country in the search for a position of greater prominence in the global innovation.

Form 20-F

Segmentation of Clients

We operate a model of client segmentation, which groups certain clients of the same profile together, thus furthering our ability to provide a personalized service to our clients, in accordance with their needs.

Our segments offer a range of products and differentiated services that are tailored to individuals, legal entities and non-account holders. We present below our segmentation of clients:

Client Segmentation**Corporations**

Bradesco Large Corporate - Large companies, with annual revenues of more than R\$4 billion.

Bradesco Corporate - Large companies, with annual revenues between R\$500 million and R\$4 billion.

Bradesco Corporate One - Companies with annual revenue between R\$30 million and R\$500 million (Corporate Branches) and as from R\$15 million (Corporate Spaces).

Bradesco Varejo (Companies and Businesses) - Companies with annual revenues of up to R\$30 million.

Individuals

Bradesco Private Bank - Clients with availability for investments from R\$5.0 million

Bradesco Prime - individuals with monthly income from R\$10 thousand or availability of investment from R\$100 thousand

Varejo Exclusive - Clients with a monthly income between R\$4 thousand and R\$9,999.99, or availability of investment from R\$40 thousand.

Varejo Classic - Clients with a monthly income of up to R\$ 3,999.99 or availability of investment of less than R\$40 thousand.

Non-Account Holders

Non-Account Holders - Individual clients or corporate clients consumers products of Bradesco organization that do not have a bank account.

Bradesco Corporate

The Corporate segment is responsible for serving business groups and focused on both large and medium-sized corporations. Its offices are located in the main financial centers and with a value proposal based on physical proximity and relationship with clients, offers customized services with a global reach and counts on a highly skilled team to fulfill customers' needs through a wide portfolio of products, structured solutions and financial services.

To anticipate the solutions, it is important to strengthen the relationship with clients and to deliver a robust value proposal, Corporate is highly segmented by sectors, markets, sizes, nature of the companies, among other criteria, and these segments are combined into three large areas:

- **Corporate One:** Focused mainly on the middle market it also has a team focused on providing services to large companies. Its main target are companies with a sales revenue between R\$30 million and R\$500 million. The area has national presence and a regionalized structure, composed of 70 Units located in main cities and capitals distributed in 15 regional sectors and another 98 Corporate Spaces present throughout Brazil;
- **Corporate:** Has a structure of specialized services by market sector and a physical structure in various cities in Brazil and abroad and its main target are corporate groups with a sales revenue between R\$500 million and R\$4 billion; and
- **Large Corporate:** Focused on corporate groups with a sales revenue of over R\$4 billion. It has a highly qualified team, offering customized consultancy to serve clients in Brazil and worldwide.

Bradesco Private Bank

The sole purpose of Bradesco Private Bank is to advise high net-worth individuals, family-owned holding companies and investment companies with a high net availability for investments.

Through its open architecture model, it offers tailored products and services, including banking, advisory services, local and international asset allocation and portfolio management, as well as advice on choosing the best vehicles and investment structures for the perpetuation of the family's estate. In addition, the client can access our entire structure, including credit, investment banking, brokerage, insurance, and pensions, among others.

56 Form 20-F – December 2018

4.B. Business Overview

Form 20-F

Currently, Bradesco Private Bank has 15 offices located in: São Paulo, Rio de Janeiro, Belo Horizonte, Blumenau, Brasília, Campinas, Cuiabá, Curitiba, Fortaleza, Goiânia, Manaus, Porto Alegre, Recife, Ribeirão Preto and Salvador, thus ensuring nation-wide presence, in addition to the support of the units abroad located in Cayman, New York and Luxembourg.

Bradesco Varejo

The focus of Bradesco Varejo are individuals with a monthly income of up to R\$10 thousand and legal entities with annual revenues of up to R\$30 million. Individual customers with monthly incomes up to R\$3,999.99 or amounts available for investments below R\$40 thousand are classified as being part of the "Classic" customer designation and individual customers with monthly incomes from R\$4 thousand to R\$10 thousand or amounts available for investments from R\$40 thousand are classified as being part of the "Exclusive" customer designation. Companies with annual revenues of up to R\$30 million are classified as being part of the "Empresas e Negócios" designation. The retail area provides customized services with adequate financial solutions for each profile.

The Bradesco Varejo service network comprises 4,280 branches, 3,824 service stations (PAs), 907 electronic service stations (PAEs) and 39,100 Bradesco Expresso units, in addition to thousands of ATMs.

The broad customer service network executes the important task of financial inclusion, offering products and services in remote places, of difficult access and also in regions with large concentrations of people with lower purchasing power.

Bradesco Prime

Bradesco Prime operates in the segment of high-income individuals and is present in all Brazilian capitals. It has a service network of 243 exclusive branches and 1,012 "Bradesco Prime Spaces." The clients count on a full relationship model that fits the profile and needs of each client, providing effective financial planning, with customized solutions, evaluated by qualified professionals, to assist our clients with their asset management.

Using Bradesco Prime the clients have the following benefits:

- **program of benefits:** grant of up to 100% exemption on the value of the Tariff Basket and exemption on annuity of our credit cards, in accordance with the volume of investments and/or concentration of the client's spending, plus up to twelve days without interest in the Special Overdraft in accordance with the volume of investments;
- **Viva|Prime program:** provides Bradesco Prime clients with unique experiences in the form of benefits and discounts in stores, restaurants and partner brands;
- **recommended investment portfolios:** recommended based on the analysis of the investor's profile (API) that seeks to diversify the best ratio between risk and return;

- **capillarity:** wide network of branches and Bradesco Prime Spaces throughout the country;
- **relationship manager:** qualified professionals who support the client in managing their resources, considering their needs and moment of life; and
- **Exclusive Spaces in whole country:** network of exclusive branches and "Bradesco Prime Spaces" offering convenience and total privacy so clients can tend to their business affairs.

Bradesco Prime has been, throughout its existence, investing in technology, in the improvement of the relationship with clients and in the training of its professionals and has as one of its main assets to provide the best experience to its clients. It established a prominent position in the Brazilian market of banking services for high-income clients and has consolidated its position as one of the largest banks in the segment.

Non-Account Holders

In July 2018, we created an area dedicated to individual and legal entity clients, consumers of our products, with the aim of increasing the relationship with this target audience.

57 Bradesco

Form 20-F

Main subsidiaries

The following is a simplified chart containing our main subsidiaries in the activities of financial and insurance services and our voting interest as of December 31, 2018. With the exception of Bradesco Argentina, Bradesco Europa, Bradesco Grand Cayman Branch, Bradesco New York Branch and Bradescard Mexico, the other significant subsidiaries are Brazilian entities. For more information in relation to the consolidation of our significant subsidiaries, see Note 2a to our consolidated financial statements in "Item 18. Financial Statements."

58 Form 20-F – December 2018

Form 20-F

Corporate risk management process

Risk management is of great strategic importance to us due to the increasing complexity of services and products and the globalization of our business. In August 2017, CMN Resolution No. 4,595/17 was edited, including provisions for compliance policies. Under this Resolution, financial institutions authorized to operate by the Central Bank should implement and maintain the compliance policies compatible with the nature, size, complexity, structure, risk profile and business model of the institution, in order to ensure the effective management of its compliance risk. The compliance risk must be managed in an integrated manner with all other risks incurred by the institution, in accordance with the specific rules. The rule also permits the drafting of a single compliance policy per conglomerate.

We exercise control over risks in an integrated and independent manner, preserving and valuing collective decision-making, devising and implementing methodologies, models, measurement and control tools. We also promote improvement among employees at all levels, from the business areas to the Board of Directors.

Our risk management process ensures that risks are proactively identified, measured, mitigated, monitored and reported, as required for the complexity of our financial products and services and the profile of our activities.

Risk and Capital Management Structure

The structure of our risk and capital management function consists of committees, responsible for assisting our Board of Directors and our *Diretoria Executiva* in making strategic decisions.

The Integrated Risks Management and Capital Allocation Committee (“COGIRAC”), is responsible for assuring the fulfilment of the Organization’s risk management processes and policies.

The committee is assisted by the Capital Management Executive Committee and the Executive Committees for Risk Management of: (i) Credit; (ii) Market and Liquidity; (iii) Operational and Socioenvironmental; and (iv) Grupo Bradesco Seguros and BSP Empreendimentos Imobiliários. There are also the Executive Products and Services Committee, and executive committees for our business units, whose tasks include suggesting limits for exposure to their related risks and devising mitigation plans to be submitted to COGIRAC and the Board of Directors.

In compliance with CMN Resolution No. 4,557/17, we created a Risk Committee whose main purpose is to assess the structure of the Organization’s risk management and occasionally propose improvements to the Board of Directors, as well as the formalization of the role of Chief Risk Officer (CRO) position, which is responsible for, among other duties, supervising the development, implementation, performance and improvement of the risk management structure. The CRO reports to the Risk Committee, to the CEO and to the Board of Directors.

Credit risk

Credit risk is the possibility of losses associated with a borrower's or counterparty's failure to comply with their respective financial obligations under agreed terms, as well as the depreciation of loan agreements resulting from deterioration in the borrower's risk rating, the reduction in gains or remunerations, including benefits granted in renegotiations, recovery costs and other amounts related to the counterparty's non-compliance with financial obligations.

Credit risk management is a continuous and evolving process of mapping, development, assessment and diagnosis through the use of models, instruments and procedures that require a high degree of discipline and control during the analysis of operations in order to preserve the integrity and independence of the processes.

We seek to control our exposure to credit risk, which mainly results from loans, securities and derivative financial instruments. Credit risk also stems from financial obligations related to loan commitments and financial guarantees.

In order not to compromise the quality expected from the portfolio, committees monitor all relevant aspects of the process of lending, concentration, collateral requirements, maturities, and other aspects.

We continually outline all the activities that can potentially generate exposure to credit risk, with the respective classifications regarding probability and size, as well as identifying managers, measurement and mitigation plans for those activities.

Form 20-F

Credit Risk Management Process

Credit risk management process is conducted in a centralized manner for the institution as a whole. This process engages several particular areas, which ensure an efficient framework to provide for independent and centralized credit risk measurement and control.

Our Credit Risk monitoring area is actively engaged in improving the customer risk rating models, following up large risks by periodically monitoring major delinquencies and the provisioning levels due to expected and unexpected losses.

This area continuously reviews the internal processes, including the roles and responsibilities, information technology training and requirements and periodic review of risk assessment, in order to incorporate new practices and methodologies.

Corporate control and monitoring of our credit risk take place in the credit risk unit of the Integrated Risk Control Department (DCIR). The department assists the Credit Risk Management Executive Committee on discussions and implementation of the methodologies to measure the credit risk. Relevant issues discussed by this committee are reported to COGIRAC, which reports to the Board of Directors.

In addition to the committee meetings, the business area holds monthly meetings with officers and heads of products and segments to ensure they are informed about the evolution of the portfolio of loans, delinquency, adequacy of the provision for non-performing loans, credit recovery, gross and net losses, portfolio limits and concentrations, allocation of economic and regulatory capital and other items. This information is also monthly reported to the Audit Committee.

The business area also tracks each internal or external event that may significantly impact credit risk such as mergers, bankruptcies or crop failures and monitors sectors of economic activity in which we have the most representative exposures.

Both the governance process and limits are validated by COGIRAC, submitted for approval by the Board of Directors, and reviewed at least once a year.

Market Risk

Market risk is the possibility of a loss of income due to fluctuations in prices and market interest rate of the financial instruments retained by the Organization resulting from mismatched amounts, currencies and indexes of our asset and liability operations.

This risk is identified, measured, mitigated, controlled and reported. Our profile of exposure to market risk is in line with guidelines established by the governance process, with limits that are monitored on a timely and independent basis from the business areas.

All transactions exposing us to market risk are mapped, measured and classified according to probability and magnitude, with the whole process approved by the governance structure.

Our risk management process involves the participation of all levels, from business units to the Board of Directors.

In line with the best practices of corporate governance and in order to preserve and strengthen our management of market and liquidity risks, as well as to meet the requirements of CMN Resolution No. 4,557/17, the Board of Directors approved the Market Risk Management Policy, which is reviewed at least annually by the relevant committees and the Board of Directors itself, providing the main operational guidelines for accepting, controlling and managing market risk.

In addition to this policy, we have several specific rules that regulate the market risk management process, including:

- classification of operations;
- reclassification of operations;
- trading in government or private securities;
- use of derivatives; and
- hedge.

Market Risk Management Process

Our market risk management process is run on a corporate wide basis, ranging from business areas to the Board of Directors. This process involves several areas, with specific attributions, and ensures an efficient structure, with the measurement and control of market risk being performed centrally and independently. This process allowed us to be the first financial institution in the country authorized by the Central Bank to use, since January 2013, in-house models of market risk to check the need of regulatory capital. The management process, approved by the Board of Directors, is also reassessed at least annually by the relevant committees and the Board of Directors itself.

Form 20-F

Definition of limits

Proposed market risk limits are validated by specific committees for approval by COGIRAC, to be submitted to the Board of Directors depending on the characteristics of business, which are separated into the following portfolios:

Trading portfolio: comprises all operations involving financial instruments, including derivatives, held-for-trading or used to hedge other instruments in our own portfolio, which have no trading restrictions. Held-for-trading operations are those destined for resale, to obtain benefits from actual or expected price variations, or for arbitrage.

The trading portfolio is monitored by limits of:

- Value at Risk (VaR);
- stress;
- results; and
- financial exposure/concentration.

Banking portfolio: comprises transactions not qualifying for our trading portfolio, deriving from our other businesses and their respective hedges.

The banking portfolio is monitored by limits related to the interest rate risk.

Market risk is controlled and monitored by an independent business unit, the Integrated Risk Control Department, which calculates risk of outstanding positions on a daily basis, consolidates results and reports as required by the existing governance process.

In addition to daily reports, the positions of the trading portfolio are discussed every 15 days by the Treasury Executive Committee and the positions of the banking portfolio and liquidity reports are handled by the Treasury Executive Committee for the Management of Assets and Liabilities. In both forums, the results and the risks are evaluated and the strategies are discussed. Both the governance process and the existing limits are validated by COGIRAC and submitted for approval by the Board of Directors, which are reviewed at least once a year.

In case of any risk limit breach monitored by the Integrated Risk Control Department, the head of the business unit in charge is informed of the limit usage and, in a timely manner, COGIRAC is called in order to make a decision. If the committee chooses to increase the limit and/or change or maintain the positions, the Board of Directors is called to approve a new limit or to review our strategy with regard to this particular risk.

For more information on how we evaluate and monitor market risk, see "Item 11. Quantitative and Qualitative Disclosures about Market Risk."

Liquidity risk

Liquidity risk is represented by the possibility of the institution failing to effectively comply with its obligations, without affecting its daily operations and incurring significant losses, as well as the possibility of the institution to fail to trade a position at market price, due to its larger size as compared to the volume usually traded or in view of any market interruption.

Understanding and monitoring this risk is crucial, especially for us to be able to settle transactions in a timely and secure manner.

Liquidity Risk Management Process

We manage our liquidity risk process on a group-wide basis. This process involves a number of areas with specific responsibilities, and the liquidity risk is measured and controlled on a centralized and independent basis, with daily monitoring of available funds and compliance with liquidity levels, according to the risk appetite established by the Board of Directors, as well as the contingency and recovery plan for potential high-stress situations.

Form 20-F

Our Policy for Liquidity and Risk Management, approved by the Board of Directors, is mainly aimed at ensuring the existence of standards, criteria and procedures to guarantee the development of the Short-Term Liquidity Ratios (LCR), in compliance with Resolution No. 4,401/15, and Long-Term Net Stable Funding Ratio (NSFR), in compliance with Resolution No. 4,416/17, as well as the strategy and action plans for liquidity crisis situations. The policy and controls we established fully comply with CMN Resolution No. 4,557/17.

We also have rules for the daily monitoring of liquidity levels through a warning flag that triggers the submission of reports and the actions to be taken given the risk presented.

Our liquidity risk is managed by the Treasury Department, based on the positions provided by the back-office controls positions, which provides liquidity information to our Management and monitors compliance with established limits. The Integrated Risk Control Department is responsible for the methodology of measurement, control over limits established by type of currency and company (including for non-financial companies), reviewing policies, standards, criteria and procedures, and drafting reports for new recommendations.

Since October 2017 we use the Short-Term Liquidity Ratio (LCR) as a standard for the internal management, as provided in the CMN Resolution No. 4,401/15 and the Central Bank's Circular No. 3,749/15.

In the third quarter of 2018 we started monitoring structural long-term liquidity risk, through the NSFR, pursuant to CMN Resolution No. 4,616/17 and Central Bank's Circular No. 3,869/17.

The liquidity risk is monitored daily by business and control areas and at meetings of the Treasury Executive Committee for Asset Liability Management, which controls the liquidity levels. Additionally, monitoring activity is also conducted by COGIRAC and by the Board of Directors. The reports, on which the monitoring is made, are shared with the Risk Committee.

Operational Risk

Operational risk is represented by the possibility of incurring losses arising from failures, deficiencies or the inadequacy of internal processes, people, systems and external events. This includes legal risk, associated with the activities we carry out.

Operational Risk Management Process

We carry out operational risk process throughout the organization. This involves a number of areas, with specific responsibilities, thus ensuring an efficient structure, and operational risk is measured and controlled on a centralized and independent basis. Accordingly, the following procedures are carried out:

- identifying, assessing, and monitoring the operational risks inherent in our activities, as well as those related to new products/services and their adequacy to procedures and controls;

- mapping and addressing records of operational losses to make up an internal data base;
- ensuring the integrity of data from losses collected and provide analyses that offer quality information to branches, aimed at improving operational risk management;
- measuring, controlling and reporting increased operational losses by way of assessing the effectiveness of the mitigating measures of branches;
- evaluating, together with managers, the indicators, scenarios, and external data from operating losses in order to incorporate/adjust any processes and controls, as well as to quantify the impact on economic capital;
- assessing and calculating capital needs in connection with the operational risk in regulatory capital and economic visions; and
- preparing reports on the operational risk for submission to the Committees, to the *Diretoria Executiva* and related areas.

These procedures are supported by a number of internal controls, validated on an independent basis in relation to their effectiveness and operations, to ensure acceptable risk levels in our processes.

Operational risk is primarily controlled and followed up by an independent area, Integrated Risk Control Department is supported by a number of areas that integrate the management process of this risk.

The Integrated Risk Control Department is responsible for the coordination of the Internal Control and Operational Risk Commission (“CIRO”), which reports to the Executive Committee of the Operational and Socio-environmental Risk Management (“CEROS”). This commission analyzes the behavior of the operational losses of the business areas/branches, the efficiency and effectiveness of the processes and controls adopted, the provision methodologies and their impact on the management of operational risk and evaluate indicators, scenarios, and external data from operating losses in order to incorporate/adjust eventually, processes and controls.

Form 20-F

The Integrated Risk Control Department is the advisory unit of CEROS, whose objective is to advise the *Diretoria Executiva* on the performance of their duties relating to the management of operating risk, business continuity and socioenvironmental risks. The relevant issues debated in this instance are reported to COGIRAC, which reports to the Board of Directors.

The governance process is approved by the Board of Directors and reviewed at least once a year.

Internal controls

The efficacy of our internal controls is supported by trained professionals, well-defined and implemented processes as well as technology compatible with business needs according to CMN Resolution No. 2,554/98.

The internal control methodology is based in the criteria established in the Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organization of the Treadway Commission (“COSO”), and is also in line with the guidelines established by the Information Systems Audit and Control Association (“ISACA”) through the Control Objectives for Information and Related Technology (“COBIT 5”), and with the procedures described by the Public Company Accounting Oversight Board (“PCAOB”) for analysis of the Entity Level Controls (“ELC”).

The existence, enforcement and efficacy of controls that ensure acceptable risk levels in our processes are certified by the area responsible for the execution of the tests of adherence of the controls, the results of which are conveyed to the Internal Controls and Compliance Audit Committees, as well as to the Board of Directors, with the purpose of providing reasonable assurance with regard to appropriately carrying out business transactions and achieving defined objectives, in accordance with external laws and regulations, internal policies, rules and procedures, as well as applicable codes of conduct and self-regulation.

Management and Processes in Cybersecurity

We consider cyber and information security at the highest strategic level and we manage this subject in order to protect our technological infrastructure against intrusion attempts, unauthorized access and malicious codes. We operate in a preventive, detective and corrective manner in order to protect the information of the organization and of our clients.

In this sense, we have evolved our security framework considering the new digital context, where the focus on cybersecurity is a key aspect and one of the pillars of technology and processes, establishing data protection for our clients, resiliency, and structure to identify threats, detection, and response and recovery procedures in cases of cyber-attacks.

Regarding the technical aspects, to prepare against and anticipate IT security and cybernetic threats, the IT area promotes continuous investments like the reformulation of the critical updates of servers and workstations, process of inspection of source code in the development cycle, establishment of a lab for security tests and use of technologies/tools.

We have systems to prevent against attacks from external connections and the internet, systems for the analysis of fraudulent behavior, unauthorized access, malicious codes, analysis of network behavior, protection against invasion (intrusion detector), firewall, antivirus and antispam systems, all to provide protection to our IT environment. We continuously upgrade the security over our software and hardware, digital certification in WEB servers and the encryption equipment, in addition to performing frequent resilience tests.

We implement continuous monitoring mechanisms, such as security operational centers (SOCs), focusing on the identification of potential vulnerabilities and establishing an active defense with the use of cognitive intelligence.

Additionally, we have a cyber intelligence team working to identify threats and check the necessary corrective measures.

We adopt strict procedures to ensure the security of client information. The interactions and synergies between management and technical areas aim to create solutions to provide secure access to service channels, in order to minimize exposures and vulnerabilities. We have a range of security devices and technologies, including biometrics, chip cards, 2D digital validation/QRcode and OTP devices (physical and cell phone token, etc.), which are used to prevent fraud and unauthorized access. Educating clients on cyber risks is a key component of our strategy in this regard. In this sense, we develop awareness campaigns through the channels used by clients and on social media. On the website "seguranca.bradesco" there are several guidelines to the public, including videos of the web series "Protect Yourself" with prevention tips on current key scams/fraud, aiming to improve the security barriers with its users, since the risk of protection breach during access occurs precisely in the elements of the process that are out of reach by the management of Bradesco: the behavior and equipment of clients.

Form 20-F

In conjunction with technical actions, the preparation and engagement of people is another crucial issue. The culture of security is a fundamental basis for the mechanisms, processes and technologies to be effective. For this reason, we invest in training and awareness of employees, associates and customers so they are aware of the issue and prepared and updated in relation to the inherent risks and threats.

We also have continuous programs of training and awareness on the aspects of security and an executive committee dedicated to the issue, defining strategies and ensuring the development and effectiveness of actions with activities focused on the timely protection of technological infrastructure against intrusive attempts, unauthorized access, theft of information and insertion of malicious codes.

With the aim of enhancing cyber security and data storage, the CMN edited Resolution No. 4,658/18 and Circular No. 3,909/18, which established principles and guidelines that seek to ensure the confidentiality, integrity and availability of data and information systems, through the implementation of policies for cyber security, in addition to the requirements for hiring of processing and data storage services. We comply with the provisions of these rules.

In August 2018, Law No. 13,709/18 General Data Protection Law (“LGPD”) was enacted, which creates a set of rules for the use, protection and transfer of personal data in Brazil, in the private and public spheres, and establishes responsibilities and penalties in the civil sphere. In addition to including existing rules on the subject, the LGPD observed the global trend to strengthen the protection of personal data, restricting its unjustified use, and guaranteeing a series of rights to holders of data, as well as imposing important obligations on the so-called “treatment agents.” The Brazilian Law was inspired specifically by the European legislation on the subject, reproducing central points of the Directive No. 95/46/EC and of the General Data Protection Regulation (“GDPR”).

The impact of the law will be significant as any processing of personal data will be subject to the new rules, whether physical or digital, by any entity established in Brazil, or who has collected personal data in Brazil, or individuals located in Brazil – albeit not residents – or, even, that offer goods and services to the Brazilian consumer. In short, the adaptation to the LGPD will require structural changes in virtually all internal areas of Brazilian companies. The LGPD has been in force since December 28, 2018 as regards the creation of the National Authority for Data Protection (“ANPD”) and will be in force from August 2020 in relation to its other aspects.

Bradesco Integrity Program

Our main corporate commitments to integrity are:

- to conduct our business and develop our various relationships based on ethics, integrity and transparency, concepts that permeate our organizational culture, whose values and principles are ratified by the Corporate and Sector-based Codes of Ethical Conduct and supported by Senior Management; and
- to prevent and combat all forms of corruption, especially bribery.

Such commitments are permanently sustained through the Bradesco Integrity Program, which corresponds to a set of mechanisms and measures made up by the Code of Ethical Conduct, by Corporate Anticorruption Policies and Standards, and other standards, as well as procedures, processes, and control established therein, aimed at preventing, detecting, and remedying any harmful acts of corruption and bribery, including fraud against the Government.

The program, supported by the Integrity and Ethical Conduct Committee and by the Board of Directors, determines the guidelines, responsibilities, procedures, and controls regarding gifts, freebies and entertainment, sponsorship, third parties and due diligence, bids with the Brazilian Government, political contributions, relationships with public agents, denunciations and non-retaliation against whistleblowers acting in good faith, in accordance with laws and regulations applicable in Brazil and in countries where we have business units.

64 Form 20-F – December 2018

Form 20-F

The Integrity Program covers our managers, employees, suppliers, service providers, banking correspondents and business partners, controlled companies and companies that are members of the Bradesco Organization in its interactions and daily decisions, highlighting our principles of high standards of conduct and ethics. We continuously evaluate the Program to align its governance with the best national and international anti-corruption practices.

We always promote the culture of ethics and integrity based on the code of ethical conduct, from its disclosure and communication, from its internalization through programs and training events and awareness with the participation of the employees and the service providers. In this sense, in 2018 the Policies, Rules, Standards, Integrity Program, Manuals, Training and Systems were reinforced.

We also intensified the communication with suppliers, service providers, and correspondents in the country and with business partners. We gave anti-corruption training in person to the Senior Management, to employees in areas with higher exposure to risk, and to third parties. We also made Corporate Anticorruption Policy documents as well as the Bradesco Integrity Program available at new websites.

We established in each Department or Associated Companies a Focal Point of Integrity, and in October 2018, we promoted the 1st Meeting – “Integration Event,” with lectures with the participation of the Board of Executive Officers and an external lecturer. In addition, in December 2018, in reference to the International Day of the Fight against Corruption, we promoted Bradesco Integrity Week, which featured external lecturers, in addition to panels with the participation of members of our Board of Executive Officers.

Independent Validation of Management and Measurement Models of Risk and Capital

We employ regulatory models as well as internal models developed based on statistical, economic, financial, and mathematical theories and the expertise by specialists in the Management of Risks and Provisions and in the measurement of Capital, aiming to synthesize processes or complex issues and large quantities of information and providing standardization, objectivity and efficiency to the decisions.

All models have inherent risks that can be translated by potential adverse consequences arising from decisions based on incorrect or obsolete estimates, improper calibration of parameters or inappropriate use. In order to detect, mitigate and control these risks, there is the process of independent validation, which carefully evaluates various aspects, challenging the development process (which includes the assumptions adopted, the methodology and the results) and the use of models (including the quality of the input data, adherence to the regulatory requirements and the robustness environment in which they are implanted). The results are reported to the managers, Internal Audit, the Risk Committee, the Compliance and Internal Control Committee ("CCIC") and to the COGIRAC.

Treasury activities

The Treasury Department main objective is maximizing results with available resources and managing risks, by complying with the limits set forth by our Senior Management and the guidelines issued by our integrated risk control unit.

The main activities are as follows:

- planning and managing our local and foreign currency cash flows;
- proposing and observing our asset and liability management strategy;
- managing maturity, rate and liquidity gaps arising from our activities;
- calculating costs of operations from both the assets and liabilities sides;
- getting price estimates and managing our commercial operations that involve risks such as: market, interest rate, foreign exchange, commodities and price index risks;
- performing proprietary trading operations aimed at taking opportunities found in the range of our prospective scenario and market prices; and
- taking part of analysis and decisions regarding directed credit and capital management.

Corporate security

The Corporate Security Department's mission is to promote security solutions in line with our business by creating, implementing, and maintaining rules, processes, and technologies.

65 Bradesco

Form 20-F

To achieve its objectives, it acts strategically and corporately in cyber security, access management, electronic fraud-prevention, debit card products and document fraud, security of electronic channels and systems and information to assess, treat, and propose improvements. In addition, it is a focal point for Technical Opinions, in connection with strategic security issues, implementation of products, services or processes and prevention of money laundering and the financing of terrorism (“PLD/FT”).

We highlighted the main activities:

- the Information Security area's mission is to establish the Information Security Corporate Policy and Rules related to the topic; identify and evaluate the risks of Information Security; ensuring good governance and generating the Asymmetric Cryptographic Keys; maintain the Registration Authority (“RA”) for the issuance of Digital Certificates related to the Brazilian Public Key Infrastructure (“ICP Brasil”), in accordance with the standards established by the Institute of Information Technology (“ITI”). Establishes criteria for the assessment of compliance of Information Security and data protection, sustains the Program of Awareness and Education in Information Security, giving lectures in-company to employees and at external events;
- we moved forward regarding the process to be registered as a Time Stamp Authority in the context of the ICP Brazil, which will support our digital and document digitalization processes. These actions aim to protect both the clients and the Organization's information, whose critical matters are approved by a Multidisciplinary Information Security Committee and decided by the Corporate Security Executive Committee;
- the area of Governance of Cyber Security and Incidents develops, monitors and controls the maturity and mapping of risks to information security. It is aligned with the strategic guidelines of the Organization, new business models, risks and cyber threats and regulatory bodies. It also acts in the management of the Operational Model of Information Security (“MOSI”), in Preventing Data Leakage via Data Loss Prevention (DLP) and Incidents, with the overview of information security in the Bradesco Organization;
- it is responsible for the implementation of the Security Transformation Program (“PTS”) intended to raise the maturity on the subject;
- the areas of Electronic Fraud-Prevention (Bradesco Celular, internet banking, Net Empresa, *Fone Fácil* and Debit Card Product), Document Fraud Prevention (opening of accounts, Bradesco App, Next, Consigned Credit, Financing of Vehicles and Consortium) manage security processes and projects to detect and mitigate risks of any financial losses or image crisis. They operate by monitoring the transactions of Electronic Service Channels and carrying out preventive and reactive analysis of documents, in addition to performing strategic and corporate actions. They are supported by the Area of Data Analysis and Modeling with analytical solutions and statistics methodologies, in order to propose solutions to Managers of technical and business areas that aim at the balance between use and security for Electronic Channels Access and for Debit Card Product;
- the area of Identification Management and Access is responsible for the strategy and operational direction of the identification process and access to corporate applications. This area aims to protect the

system resources and information against unwanted access, honoring the principles of segregation of duties and definition of automated controls;

- the area of Security Devices assesses the need for systems, service channels, business managers and users, managing and monitoring projects, assisting in the acquisition and performing the control and logistics of Biometrics, M-Token, Token and TAN Code;
- the area of Security for Access to Information by Third Parties defines security rules and principles applied to the outsourced services, ensuring the evaluation, centralized and appropriate processes and governance for the protection of information of the Organization; and
- the area of prevention of money laundering and the financing of terrorism (“PLD/FT”) is responsible for policies, standards, procedures and specific systems, which establish guidelines to prevent and detect the misuse of our structure and/or products and services. This Program is supported by the PLD/FT Executive Committee, which evaluates the work according to its effectiveness as well as the need to align procedures and controls with the regulations and with the best national and international practices. The suspicious or atypical cases identified are forwarded to the Commission for the Evaluation of Suspicious Transactions for analysis, which is composed by Departments and Related Companies alike, to be able to assess the need to report to the Regulatory Bodies in compliance with the legal requirements.

66 Form 20-F – December 2018

Form 20-F

Credit policy

Our credit policy is focused on:

- ensuring the safety, quality, liquidity and diversification of asset allocation;
- pursuing flexibility and profitability in business; and
- minimizing risks inherent to loans and advances.

Our credit policy defines criteria for lending and setting operational limits. Credit decisions are made at the branch level and, if necessary, higher levels of authority including our Board of Directors depending on the rules in our internal policy. In reviewing loan applications, our *Diretoria Executiva* also approves the models for assessment and credit processes used by our branches and departments for each type of loan.

Our transactions are diversified and target individuals and companies that show ability to pay and stay in good standing. In all cases, we aim to have them secured by appropriate collateral for risks involved, from the point of view of uses of funds and repayment periods, as well as risk ratings. The Central Bank's risk rating system has nine categories ranging from "excellent" to "very poor." In line with our commitment to the ongoing development of our methodologies, the credit risk rating for our clients/economic groups is based on a range of 18 levels, of which 14 represent accrual loans. This ensures greater adherence to the requirements set forth in the Basel Accords. For more details, see "Item 4.B. Business Overview – Regulation and Supervision – Banking Regulations – Treatment of Loans and Advances."

The lending limits set for our branches reflect size and collateral provided for loans. However, branches have no authorization to approve an application for credit from any borrower who:

- is rated less than "acceptable" under our internal credit risk classification system (score and rating);
- has an outdated record; and
- has any relevant credit restrictions.

We have credit limits for each type of loan. We pre-approve credit limits for our individual and legal entities and presently extend credits to the public sector only under very limited circumstances. In all cases, funds are only granted once the appropriate body has approved the credit line.

We review the credit limits of our large corporate customers every 180 days. Credits extended to other customers, including individuals, small and mid-sized corporations, are reviewed every 90 days.

Our maximum exposure per client (e.g. individuals, companies or other economic groups) is determined by client rating and the aggregate maximum exposure is limited to 15.0% of our Reference Equity.

Any cases in which the maximum level of exposure per client exceeds the thresholds as set out in the table below or in which the total exposure equals or exceeds R\$3.0 billion are required to be submitted to the Board of Directors for approval.

Form 20-F

Client Rating	As a % of Shareholders' Equity
AA1	15
AA2	12.5
AA3	11
A1	9.5
A2	8.5
A3	7
B1	5.5
B2	4.5
B3	3
C1	1.5
C2	0.9
C3	0.7
C4	0.5
D	0.4

68 Form 20-F – December 2018

Form 20-F

Our credit policy is continuously developing and as part of our risk management process, we continue to improve our credit granting procedures, including procedures to gather data on borrowers, calculate potential losses and assess applicable classifications. Additionally, we assess our institutional credit risk management in view of the recommendations by the Basel Accords, including:

- restructuring our methodology to calculate possible losses;
- identifying and implementing changes in our reporting processes to improve our loan portfolio management;
- restructuring our information control structure; and
- assessing the organizational structure of our loan assessment practices, including analyzing the demand for technology and addressing new issues.

Loans and advances to individual customers

For individual customers, depending on the proposed collateral, the size of the branch and suitable credit parameters, branches may authorize loans of up to R\$50,000. If value and type of collateral are not within the limits established for approval at the branch level, an application is submitted to the Credit Department and, if necessary, higher levels of authority.

The following table shows individual loan limits for approval by branch managers, depending on the value and type of collateral offered:

Total Risk Amount	R\$ in thousands	
	Loan with no collateral	Loan with collateral
Decision-making authority		
Manager of very small branch ⁽¹⁾	up to 5	up to 10
Manager of small branch ⁽²⁾	up to 10	up to 20
Manager of average branch ⁽³⁾	up to 15	up to 30
Manager of large branch ⁽⁴⁾	up to 20	up to 50

⁽¹⁾ Branch with total deposits equal to or below R\$1,999,999;

⁽²⁾ Branch with total deposits equal to or between R\$2,000,000 and R\$5,999,999;

⁽³⁾ Branch with total deposits equal to or between R\$6,000,000 and R\$14,999,999; and

⁽⁴⁾ Branch with total deposits equal to or above R\$15,000,000.

We use a specialized Credit Scoring evaluation system to analyze these loans, allowing us to build a level of flexibility and accountability, besides standardizing the procedures in the process of analyzing and deferring loans. All models are constantly monitored and revised whenever necessary. Our Credit Department has a dedicated team developing models and working on the continuous improvement of these tools.

We provide our branches with tools that allow them to analyze loans and advances for individual clients in a rapid, efficient and standardized manner and to produce the corresponding loan contracts automatically. With these tools, our branches can respond quickly to clients, keep costs low, and control the risks inherent to consumer credit in the Brazilian market.

Table of Contents

Form 20-F

The following table shows limits established for approval of loans to individuals outside the discretion of our branches:

Total Risk Amount	R\$ in thousands
Decision-making authority	
Credit department	up to 20,000
Credit director	up to 25,000
Decision Credit Meeting	up to 40,000
Executive credit committee (Daily Meeting)	up to 150,000
Executive credit committee (Plenary Meeting)	up to 3,000,000
Board of Directors	over 3,000,000

Loans and advances to legal entities

For corporate customers, depending on the collateral proposed, the size of the branch and suitability in terms of credit parameters, loans of up to R\$400,000.00 may be approved at the branch level. If the collateral offered is not within the limits for approval at the branch level, the loan is submitted to the Credit Department and, if necessary, higher levels.

The following table shows limits within which branch managers may approve business loans, depending on the amount and type of credit support offered:

Total Risk Amount	R\$ in thousands	
	Loan with no collateral	Loan with collateral
Decision-making authority		
Manager of very small branch ⁽¹⁾	up to 10	up to 60
Manager of small branch ⁽²⁾	up to 20	up to 120
Manager of average branch ⁽³⁾	up to 30	up to 240
Manager of large branch ⁽⁴⁾	up to 50	up to 400
Manager of Bradesco Empresas branch ⁽⁵⁾	up to 100	up to 400

⁽¹⁾ Branch with total deposits equal to or below R\$1,999,999;

⁽²⁾ Branch with total deposits equal to or between R\$2,000,000 and R\$5,999,999;

⁽³⁾ Branch with total deposits equal to or between R\$6,000,000 and R\$14,999,999;

⁽⁴⁾ Branch with total deposits equal to or above R\$15,000,000; and

⁽⁵⁾ Branch with exclusive middle market companies.

The following table shows limits established for approval of loans to corporate customers outside the discretion of our branches:

Total Risk Amount

Partnerships with retail companies – Bradesco Expresso

	R\$ in thousands
Decision-making authority	
Credit department	up to 20,000
Credit director	up to 25,000
Decision Credit Meeting	up to 40,000
Executive credit committee (Daily Meeting)	up to 150,000
Executive credit committee (Plenary Meeting)	up to 3,000,000
Board of Directors	over 3,000,000

70 Form 20-F – December 2018

Form 20-F

In order to serve customers' needs as soon as possible and securely, the Credit Department uses segmented analyses with different methodologies and instruments for credit analysis in each segment, in particular:

- in the "Varejo," "Prime" and "Private – Individuals" segments, we consider the individual's reputation and credit worthiness, profession, monthly income, assets (goods and real property, any liabilities or interests in companies), the bank indebtedness and history of their relationship with us, checking loans and advances for repayment dates and rates as well as and the guarantees involved;
- in the "Varejo (Empresas e Negócios)" segment, in addition to the points above, we focus on the owners of the relevant company, as well as considering the period in business and the monthly revenues;
- in the "Corporate One," "Corporate" and "Large Corporate" segments, management capability, the company/group's positioning in the market, its size, the economic-financial evolution, cash flow capability, and business perspectives, our analysis always includes the proponent, its parent company/subsidiaries, and the type of business; and
- this also includes analyses of social and environmental risk for projects that require customers to show compliance with social and environmental regulations and the Equator Principles, consisting of socioenvironmental criteria required as conditions for loans, which was introduced in 2002 by the International Finance Corporation (IFC), the World Bank's financial arm.

Collection and Loan Recovery

We have a department that focuses on the collection and recovery of loans, seeking to reduce the rates of delinquency and losses, as well as to maintain the relationship with clients. By using our own statistical models, updated periodically, which separate debtors according to levels of risk and likelihood of payment, the collection strategies become more assertive and efficient.

Collection occurs sequentially through the Network of Branches, Call Centers, Digital Channels, and Friendly and Judicial Collection Offices. In addition, regional specialized teams tailor their operations and most significant cases are submitted to the collective authority limits in the Commission or Executive Committee for Collection and Credit Recovery, respecting the governance of the established authority level.

Deposit-taking activities

Our principal source of funding is deposits from Brazilian individuals and businesses. As of December 31, 2018, our total deposits were R\$342.3 billion, representing 29.0% of our total liabilities.

We provide the following types of deposit and registration accounts:

- checking accounts;

- savings accounts;
- time deposits;
- interbank deposits from financial institutions; and
- accounts for salary purposes.

The following table shows total customers' and bank's deposits by type and source, as of the dates indicated:

As of December 31,	% of total deposits	R\$ in thousands		
		2018	2017	2016
From customers				
Demand deposits	10.0%	34,178,563	33,058,324	32,521,234
Savings deposits	32.5%	111,170,912	103,332,697	97,088,828
Time deposits	57.1%	195,398,721	125,617,424	103,137,867
Deposits from banks				
Demand deposits	0.3%	1,139,729	1,030,292	898,877
Interbank deposits	0.1%	410,975	2,168,625	588,872
Total	100.0%	342,298,900	265,207,362	234,235,678
				71 Bradesco

Form 20-F

According to the Central Bank's rules, we must place a percentage of the demand deposits, savings deposits and time deposits we receive from our customers and deposits from leasing companies with the Central Bank as compulsory deposits, as follows:

Time deposits: we are required to deposit in an account with the Central Bank 33.0% of the average amounts recorded under time deposits and others transactions, deducting R\$30.0 million. The amount required is deposited with the Central Bank in cash and we earn remuneration on the amount deposited at the SELIC rate.

In December 2018, the Central Bank revoked Circular No. 3,569/11 by publishing Circular No. 3,916/18, which determined: (i) a change in the rates from 34.0% to 33.0%; (ii) an increase in the limit of deduction for financial institutions with a Reference Equity (PR) below R\$15 billion; and (iii) the cancellation of the value of the deduction that would be used until December 2019.

Time deposits are represented by bank deposit certificates – CDBs and pay either a fixed or a floating rate, which is typically a percentage of the interbank interest rate. The breakdown between CDBs at pre-fixed rates and floating rates varies from time to time, depending on the market's interest rate expectations.

Demand deposits – we are required to deposit 21.0% of the average daily balance of demand deposits, collection of receivables, payment of taxes, third party funds in transit and obligations for the provision of payment services, deducting R\$500 million, pursuant the provisions of Circular No. 3,917/18.

In December 2018, the Central Bank revoked Circular No. 3,632/13 by publishing Circular No. 3,917/18, which determined: (i) the amendment of the reducer from R\$200 million to R\$500 million; (ii) the amendment of the rate from 25.0% to 21.0%; and (iii) cancellation of the value of deduction that would be used until December 2019.

Savings deposits – each week we are required to deposit in an account with the Central Bank an amount equivalent to 20.0% of the total average balance of our savings account deposits. The account bears interest annually at “TR” plus interest of 6.2% or Reference Rate (“TR”) plus 70.0% of the SELIC rate for funding carried out from May 2012, when the SELIC rate is lower than 8.5% *p.a.*

In February 2013, the Central Bank defined rules for financial cost collection on non-compliance with compulsory deposit, reserve or compulsory assignment requirements. The financial cost charged to institutions that failed to comply with these requirements was adjusted to the SELIC rate plus 4.0% *p.a.*

Additionally, present Central Bank regulations require that we:

- allocate a minimum of 30.0% of cash deposits to providing rural loans;
- allocate 2.0% of demand deposits received to low income segments of the population and micro entrepreneurs; and

- allocate a minimum of 65.0% of the total amount of deposits in savings accounts to finance residential real estate or housing construction. Amounts that can be used to satisfy this requirement include direct residential housing loans, mortgage notes, charged-off residential real estate or housing construction loans and certain other financings, all as specified in guidance issued by the Central Bank.

72 Form 20-F – December 2018

Form 20-F

Other funding sources

Our other funding sources include capital markets, obligations for repurchase agreements, import/export transactions and onlending.

The following table sets forth the source and amount of our other funding sources as of the dates indicated:

As of December 31,	R\$ in thousands		
	2018	2017	2016
Funding Sources			
Obligations for repurchase agreements	190,911,877	233,467,544	241,978,931
Financial notes	104,005,236	93,570,141	108,512,908
Onlendings	25,170,058	30,769,294	36,030,587
Subordinated debt	53,643,444	50,179,401	52,611,064
Borrowings	29,681,340	18,521,713	22,165,415
Real estate credit notes	25,381,719	27,020,911	26,955,574
Letter of credit property guaranteed	476,332	-	-
Agribusiness notes	13,108,595	10,973,682	9,116,292
<i>Euronotes</i>	1,270,409	634,549	2,785,654
Securities issued through securitization of payment orders	3,130,111	2,606,322	3,286,342
Structured Operations Certificates	656,616	368,485	445,168
Total	447,435,737	468,112,042	503,887,935

Our capital markets operations act as a source of funding to us through our transactions with financial institutions, mutual funds, fixed income and equity investment funds and foreign investment funds.

As of December 31, 2018, 2017 and 2016, obligations for repurchase agreements (which consist of financial assets sold subject to repurchase agreements) accounted for 42.7%, 49.9% and 48.0%, respectively of our other funding sources. The majority of these financial assets subject to repurchase agreements are guaranteed by Brazilian government securities. This type of transactions is generally short-term (normally intraday or overnight) and are volatile in terms of volume once directly impacted by market liquidity. We believe that the risks associated with these transactions are low, given the quality of the collateral assets. In addition, repurchase transactions are subject to operating limits of capital based on the equity of the financial institution, adjusted in accordance with Central Bank regulations. A financial institution may only make repurchase transactions at a value of up to 30 times its Capital, a limit we always comply with. The limits on repurchase transactions involve securities issued by Brazilian government authorities and vary according to the type of security involved in the transaction, and the perceived risk of the issuer as established by the Central Bank.

We issued financial notes, a product that was introduced to the market at the beginning of 2010, designed to meet demand for long-term financing. Longer repayment terms contribute to the desired lengthening of

the repayment schedule for the banking system's liabilities, since average repayment periods have also become longer due to the growing share of housing finance and investments of the total loan portfolio.

We conduct onlending transactions where we act as the transfer agent for development agency funds, granting credits to third parties, which are in turn funded by development organizations. BNDES, the International Bank for Reconstruction and Development or IBRD and the Inter-American Development Bank or IDB are the principal providers of these funds. The lending criteria, the decision to lend and the credit risk are our responsibility and subject to certain limitations set by the bodies supplying the funds. For more information on our onlending transactions, see "Loans and Advances to customers."

We have conducted operations with letter of credit guaranteed by real estate, nominative, transferable and freely negotiable title, guaranteed by the portfolio of assets subject to the fiduciary system, in order to inject resources into the real estate market. Our operations comply with all the requirements determined by CMN Resolution No. 4,598/17.

Data processing

We have available an up-to-date technological environment supported by a Data Center (CTI –*Centro de Tecnologia da Informação*) located in Cidade de Deus, Osasco, SP, with 11,900 square meters in area, especially built to harbor information technology (IT) infrastructure and contains protections designed to ensure availability of services offered by us.

Form 20-F

Data is continually replicated in a processing center (secondary site) located at Alphaville, in the city of Barueri - SP, featuring equipment with enough capacity to take over the main system's activities in case of a problem at our Technology Center (CTI). All service channels have telecommunications services that work with either of the two processing centers.

We hold annual exercises simulating situations in which our IT center is rendered out of service in order to ensure that we have effective contingency structures, processes and procedures in place. All these exercises are monitored by our business managers. In addition to all backup copies of electronic files stored and maintained at our IT center, second copies are saved and maintained in the Alphaville processing center, where all the activities related to the development of systems application are located. We regularly test the media in force and its disposal process is made in compliance with the environmental regulations. The process of data protection aims to ensure the confidentiality, integrity and availability of information in accordance with its level of criticality.

If the public energy supply is interrupted, both centers have sufficient capacity to operate independently for 72 hours non-stop. After this period, Technology Centers can operate continuously, depending only on the fuel that feeds the generators that supply electric energy.

Our infrastructure has systems to prevent against attacks from external connections and the internet, systems for the analysis of fraudulent behavior, unauthorized access, malicious codes, analysis of network behavior, protection against invasion (intrusion detector), firewall, antivirus and antispam systems, all to provide protection to our IT environment. We continuously upgrade the security over our software and hardware, digital certification in WEB servers and the encryption equipment.

We have a Security Operations Center (SOC) in the area of IT Security that treats and responds to security incidents, monitors the environment (24/7) and develops prevention measures through sources of intelligence information.

Our safety tools monitor software, hardware and share information from stations and servers. In addition, we have a system of prevention against loss of Information Data, the DLP, designed to ensure the protection of company data. Annually, a "Penetration Test" is performed by an independent audit firm and the IT security processes are certified by the ISO 27000 – Information Security.

Our internet systems have a separate infrastructure, enabling different customer segments (individuals, corporate, staff) to use resources independently in order to provide better service, and due to the critical nature of such services.

The IT structure is also backed by processes implemented in light of the ITIL (IT Infrastructure Library) and COBIT (Control Objectives for Information and related Technology). It applies recognized practices for IT service management and is certified by the ISO 20000 – Service Management.

As to the physical security of the data center, its entrance has a baffle gate and a double contention door that isolates the entrant between the doors. Video cameras monitor the entrance and internal areas of the

datacenter, and the access is restricted and authorized through the authentication of passes and vascular biometrics (restricted environments).

Seasonality

We generally have some seasonality in certain parts of our business. There is certain seasonality in our consumer financing business (including our credit card business, financing of goods and others), with increased levels of credit card transactions and financing of goods at the end of the year and a subsequent decrease of these levels at the beginning of the year. We also have certain seasonality in our collection fees at the beginning of the year, which is when taxes and other fiscal contributions are generally paid in Brazil. In our PGBL and VGBL business, seasonality happens at the end of the year, when the Christmas bonuses and profit sharing are usually paid.

Competition

We face significant competition in all of our principal areas of operation, since the Brazilian financial and banking services markets are highly competitive and have undergone an intensive consolidation process in the past few years.

As of December 31, 2018, state-owned financial institutions held 41.9% of the National Financial System's ("SFN") assets, followed by domestic private financial institutions (taking into consideration financial conglomerates) with a 42.5% share and foreign-controlled financial institutions, with a 15.6% share.

Public-sector financial institutions play an important role in the banking sector in Brazil. Essentially, they operate within the same legal and regulatory framework as private-sector financial institutions, except that certain banking transactions involving public entities must be made exclusively through public-sector financial institutions (including, but not limited to, depositing federal government funds or judicial deposits).

Table of Contents

Form 20-F

In April 2012, Circular No. 3,590/12 was issued, determining that the following transactions should be analyzed by the Central Bank with respect to their effects on competition, notwithstanding the review related to the stability of the financial system:

- transfers of ownership control;
- takeovers;
- mergers;
- business transfers; and
- other means of business concentration.

In August 2012, the CMN set out new requirements and procedures for incorporation, authorization for operations, cancellation of authorization, changes of control, corporate restructurings and conditions for exercising positions in statutory or contractual bodies.

In April 2018, the CMN edited Resolution No. 4,656/18, regulating the establishment and operation of the direct loan companies and loan companies between people and loan operations and financing between people using the electronic platforms. In summary, the Loan Companies between People ("APR"), have to be constituted in the form of joint stock companies and may not perform operations with own resources, mainly acting as intermediary between creditors and debtors, in addition to the provision of other services established in the Resolution.

In this scenario, the fintechs that are already in expansion in the Brazilian market, may act as a loan company between people, which will stimulate the competition between financial institutions and will, consequently, adversely affect the Bank.

Loans and advances

Competition in loans and advances has been increasing in recent years. Our main competitors are Itaú Unibanco, Banco do Brasil and Santander Brasil. In December 2018, our total market share was 11.5% and, among private banks, it was 23.4%, according to the Central Bank.

Credit cards

The credit card market in Brazil is highly competitive. Our primary competitors are Banco do Brasil, Itaú Unibanco, and Santander Brasil. Management believes that the primary competitive factors in this area are card distribution network, the services and benefits offered.

Consortia

Partnerships with retail companies – Bradesco Expresso

In December 2018, according to Central Bank, the consortia market included 150 administrators, divided between the bank, manufacturer and independent administrators.

Our main competitors are Porto Seguro and Caixa Econômica Federal in the real estate segment; Banco do Brasil and Itaú in the automobile segment; and Randon and Conseg in the trucks segment.

One of our competitive differentials is the credibility of the Bradesco brand and our extensive distribution network, with the largest service network in the entire whole of Brazil, achieving a market share of 28.6% in real estate and 32.4% in vehicles.

Investment Bank

The investment bank market in Brazil is very competitive, involving the participation of national and international financial institutions. Among the main players are Itaú BBA, BTG Pactual, Santander and other international institutions. Bradesco BBI has nonetheless achieved significant success in this market. For more information on our Investment Bank, see "Item 4.B. Business Overview – Services related to capital markets and investment banking activities.

Leasing

In general, our main competitors in the Brazilian leasing market are Santander Leasing, Banco IBM, HP Financial Service and Safra Leasing. We currently enjoy certain competitive advantages, as we have a larger service network than any of our private sector competitors.

Form 20-F

Fund management

On December 31, 2018, the fund management industry in Brazil managed funds worth R\$4.6 trillion in shareholders' equity according to ANBIMA's investment funds management ranking. BRAM held a portion of R\$606.8 billion, representing a decrease of 1.1% as compared to the twelve previous months or 13.1% of market share. We are one of the leading institutions as measured by the number of investment fund quotaholders with 3.4 million. Our main competitors are BB DTVM and Itaú Unibanco.

Insurance, pension plans and capitalization bonds

Insurance sector

As leader of the Brazilian insurance market, with a 24.5% market share according to SUSEP, in 2018, Grupo Bradesco Seguros faces growing competition from several domestic and multinational companies in all branches of this sector.

Our principal competitors are BB Seguridade, Itaú Unibanco Seguros S.A., SulAmérica Seguros, Porto Seguro, Caixa Seguros and Zurich/Santander, which account for a combined total of approximately 52.5% of all premiums generated in the market, as reported by SUSEP, in 2018.

In recent years, there has been a change in the insurance sector in Brazil, as foreign companies have begun to form associations with national insurers. In this respect, the main competitive factors are price, financial stability, and recognition of the name and services provided by companies. With respect to services, competition primarily involves the ability to serve the branches that market such services, including the level of claims handling automation, and development of long-term relationships with customers.

We believe that the penetration of our service network, present in all municipalities in Brazil, gives Grupo Bradesco Seguros a significant competitive edge over most insurance companies, thereby promoting cost savings and marketing synergies.

Regarding the healthcare sector, although most insurance activities are carried out by companies with nationwide operations, there is also competition from companies that operate locally or regionally.

Pension plan sector

The Brazilian government's monetary stabilization policies stimulated the pension plan sector and attracted new international players.

With 25.2% of total contributions in the sector ("SUSEP"), Bradesco Vida e Previdência's main competitive advantages are the "Bradesco" brand, our extensive branch network, our strategy and our record of being in the forefront of product innovation.

Our main competitors are BB Seguridade, Itaú Unibanco Seguros, Caixa Seguros and Zurich/Santander.

Partnerships with retail companies – Bradesco Expresso

Capitalization bonds sector

According to SUSEP, Bradesco Capitalização holds a 29.5% market share in capitalization bonds income and 27.8% in terms of technical provisions. Our competitive strengths in this sector include our offering of low-cost products with a higher number of prize drawings, security, financial stability, and brand recognition.

Our main competitors are BB Seguridade, Itaú Unibanco Seguros, Santander, Caixa Seguros, Icatu and Sul América, which together represent approximately 58.1% of the total capitalization revenue generated in the market, according to information provided by SUSEP in 2018.

76 Form 20-F – December 2018

Form 20-F

REGULATION AND SUPERVISION

The basic institutional framework of the Brazilian Financial System was established in 1964 by Law No. 4,595/64, known as the "Banking Reform Law." The Banking Reform Law dealt with monetary, banking and credit policies and institutions, and created the CMN.

Principal financial institutions

As of December 31, 2018, nine financial conglomerates operated in Brazil, consisting of public-sector commercial and multiple-service banks controlled by federal and state governments (including Caixa Econômica Federal) and 144 financial conglomerates, consisting of private-sector commercial and multiple-service banks. For Brazilian regulatory purposes, insurance companies, private pension plans and capitalization bonds providers are not considered financial institutions.

Principal regulatory agencies***CMN***

CMN is responsible for overall supervision of monetary, credit, budgetary, fiscal and public debt policies. CMN has the following functions:

- regulating loans and advances granted by Brazilian financial institutions;
- regulating Brazilian currency issue;
- supervising Brazil's reserves of gold and foreign exchange;
- determining saving, foreign exchange and investment policies in Brazil; and
- regulating capital markets in Brazil.

In December 2006, CMN asked the CVM to devise a new Risk-Based Supervision System ("SBR") through Resolution No. 3,427/06 (amended by Resolution No. 3,513/07), and regulated by CVM Resolution No. 757/16, in order to: (i) identify risks to which the market is exposed; (ii) rank these risks in order of severity; (iii) establish mechanisms for mitigating these risks and the losses they might cause; and (iv) control and monitor the occurrence of risk events. Among other effects, this system allows for a fast-track reviewing process for the issuance of securities.

Central Bank

The Central Bank was created by Law No. 4,595/64 and is the primary executor of the guidelines of the CMN, responsible for ensuring the purchasing power of the national currency, including responsibility for:

- implementing currency and credit policies established by the CMN;

- regulating and supervising public and private sector Brazilian financial institutions;
- controlling and monitoring the flow of foreign currency to and from Brazil; and
- overseeing the Brazilian financial markets.

The Central Bank's chairperson is appointed by the President of Brazil for an indefinite term of office, subject to approval by the Brazilian senate.

The Central Bank supervises financial institutions by:

- setting minimum capital requirements, compulsory deposit requirements and operational limits;
- authorizing corporate documents, capital increases, acquisition of interest in new companies and the establishment or transfer of principal places of business or branches (in Brazil or abroad);
- authorizing changes in shareholder control of financial institutions;
- requiring the submission of annual and semiannual audited financial statements, quarterly revised financial statements and monthly unaudited financial information; and
- requiring full disclosure of loans and advances and foreign exchange transactions, import and export transactions and other directly related economic activities.

Form 20-F
CVM

The CVM is responsible for regulating the Brazilian securities markets in accordance with securities and capital-market policies established by CMN.

Banking regulations

Principal limitations and restrictions on activities of financial institutions

Under applicable laws and regulations, a financial institution operating in Brazil:

- may not operate without the prior approval of the Central Bank and in the case of foreign banks, authorization by presidential decree;
- may not invest in the equity of any other company beyond regulatory limits;
- may not conduct credit and leasing transactions or provide guarantees of more than 25.0% of their PR to a single person or group;
- may not own real estate, except for its own use; and
- according to Law No. 4,595/64 and CMN Resolution No. 4,693/18, financial institutions are prohibited from conducting credit operations with related parties. Exempted from the prohibition are loan operations with related parties that comply with all of the following conditions:
 - the loan operations with related parties, except for the cases provided for in the legislation or in specific regulations, may only be carried out under conditions compatible with the market, including the limits, interest rates, grace period, terms, guarantees required and criteria for risk classification for purposes of constitution of a provision for probable losses and write-off as loss, without additional benefits or differentiated as compared to operations accepted to other clients with the same profile as the respective institutions. The parameters adopted by the institution in credit operations of the same type for policyholders with the same profile and credit risk are considered compatible with the conditions of the market; and
 - the sum of the balances of loan operations contracted, directly or indirectly, between the related parties must not be greater than 10% of the value related to the shareholders' equity adjusted by the accumulated revenues and expenses deducting the value of stake in institutions authorized to operate by the Central Bank and in financial institutions abroad, observing the following individual caps: (i) 1% for hiring an individual; and (ii) 5% for hiring a legal entity, safeguarding the exceptions established in the Resolution.
- The following loan operations are also exempt from the prohibition provisioned in Law No. 4,595/64, respecting the limits and conditions established in the regulations:

- the operations with companies controlled by the Government, in the case of federal public financial institutions;
- the loan operations that have as counterpart a financial institution of the same prudential conglomerate, as long as certain conditions established in the legislation and the law are respected;
- the interbank deposits regulated in the form of section XXXII of the caput of article 4 of Law No. 4,595/64;
- the obligations assumed between related parties as a result of the responsibility imposed on clearance members and other participants of chambers or providers of clearance and settlement systems authorized by the Central Bank or by the CVM and their counterparts in operations conducted in the scope of these chambers or service providers; and
- the remaining cases authorized by the National Monetary Council.
- For the purposes of CMN Resolution No. 4,693/18, the following are considered as related parties:
 - its controllers (individuals or legal entities), pursuant to Article 116 of Law No. 6,404/76;
 - its officers and members of statutory or contractual bodies;

78 Form 20-F – December 2018

Form 20-F

- spouses, partners and blood relatives up to the second degree of individuals specified in items I and II;
- individuals with qualified equity interest; and
- legal entities:
 - a) with qualified equity interest;
 - b) in which capital, directly or indirectly, is qualified equity interest;
 - c) in which there is effective operational control or relevance in the deliberations, regardless of equity interest; and
 - d) that have an officer or member of the Board of Directors in common.
- CMN Resolution No. 4,693/18 also brought a definition of qualified shareholding, which is considered a direct or indirect stake, owned by individuals or legal entities in the capital of financial institutions and of leasing companies or of these institutions in the capital of legal entities, equivalent to fifteen percent (15%) or more of the respective shares or quotas representing the capital stock.

The restrictions with respect to the concentration limit to a single person or group do not apply to interbank deposits entered into by financial institutions subject to consolidation of their financial statements.

Punitive instruments applicable to Financial Institutions

Law No. 13,506/17, which regulates the administrative sanctioning process in the sphere of activity of the Central Bank and CVM and, significantly amended the punitive instruments in the context of banking supervision, of the capital market, of the Brazilian Payment System, Payment Institutions and Consortium, in combination with the Central Bank's Circular No. 3,857/17. We can highlight, among other things: (i) the caps of the fines provisioned by the Central Bank and CVM has maximum levels established, respectively, at R\$2 billion (or 0.5% of revenues from services and financial products calculated in the year preceding the violation) and R\$50 million; (ii) forecast for the imposition of coercive or precautionary measures, with the possibility of applying a punitive fine capped at R\$100 thousand per day, limited to a maximum period of 30 days; (iii) the legal provision was re-established for purposes of typification of the violation involving prohibited operations, added to two pieces of news henceforth: (a) list, in an unprecedented manner, exceptions, or caveats regarding their characterization; and (b) restrict the range of crimes White Collar Law, to prohibit operations where the parties are under common control; (iv) prediction of the possibility for the proposition and conclusion of the Term of Commitment for those administrative violations related to the prevention of money laundering in the context of the Central Bank; (v) the non-necessity of confession of guilt for the conclusion of the Term of Commitment was re-established, both in the context of the Central Bank and CVM; (vi) adaptation was made to the original forecast of expiry of leniency to the possibility of concluding the "Agreement In the Process of Administrative Supervision," without, however, making provision for any exemption from prosecution; (vii) have changed the caps on fines to be applied to any

infractions on FX operations; and (viii) the types of criminal conduct involving the practice of insider trading and market manipulation were also changed.

Capital adequacy and leverage

Financial institutions based in Brazil are subject to capital measurement and standards based on a weighted risk-asset ratio, according to CMN Resolutions No. 4,192/13 and No. 4,193/13. The parameters of this methodology resemble the international framework for minimum capital measurements adopted for the Basel Accord. For further information on Basel III, see “Item 5.B – Liquidity and Capital Resources – Capital Compliance – Basel III.”

According to CMN Resolution No. 4,280/13, amended by Resolution No. 4,517/16, financial institutions, except for credit cooperatives, must keep consolidated accounting records (for calculating their capital requirements) of their investments in companies whenever they hold, directly or indirectly, individually or together with partners, a controlling interest in the investee companies. If their interest does not result in control of a company, financial institutions may choose to recognize the interest as equity in the earnings of unconsolidated companies instead of consolidating such interests.

Under certain conditions and within certain limits, financial institutions may include eligible instruments when determining their capital requirements in order to calculate their operational limits, provided that this instrument complies with the requirements of regulation in force.

79 Bradesco

Form 20-F

Since January 2015, financial institutions based in Brazil are required to calculate their capital requirements on a consolidated basis with institutions that are part of their prudential conglomerate.

The CMN Resolution No. 4,280/13 defines that the following entities located in Brazil or abroad shall be considered in the prudential conglomerate of its direct or indirect controllers: (i) financial institutions and other institutions authorized to operate by the Central Bank; (ii) consortium administrators; (iii) payment institutions; (iv) organizations that acquire credit transactions, including real estate and credit rights; and (v) other legal entities headquartered in Brazil that are solely engaged in holding interests in the entities set out above.

In December 2014, the CMN changed the scope of the rules for the management of credit, market, operational and liquidity risks and capital management in order to apply such rules at the prudential conglomerate level which is now required as the basis for calculation of the capital requirements of financial institutions. The CMN Resolution No. 4,388/14 sets forth that risk management may be carried out by a single unit responsible for the prudential conglomerate and its respective affiliates (this applies only to market risk management). Further, this resolution also updates the application of the relevant thresholds for any calculations subject to foreign exchanges.

Risk Weighting

Pursuant to Circular No. 3,644/13, amended by Circular No. 3,809/16, the Central Bank consolidated the risk weighting factors applied to different exposures in order to calculate capital requirement through a standardized approach. According to such rule, as amended, the risk weight factors vary from 0.0% to 1,250.0% and should be applied to credit risks, depending on the nature and characteristics of the exposure. Risk-weight factors applicable to different exposures are often changed by the Central Bank.

In addition, there are specific standards of the Central Bank to determine procedures to calculate the portion of risk-weighted assets related to other exposures.

In October 2015, the Central Bank changed the procedures for calculating the portion of risk-weight assets, in connection with the calculation of the capital required for the operational risk by way of a standardized approach. Under the present model, this is calculated based on the risk of financial institutions and its direct and indirect controlled entities, based on the gross revenue for the past three years. The prudential conglomerate concept, however, does not have a retroactive data base to supply such information. In order to overcome this obstacle, a transitional model for the calculation of operational risk was adopted in January 2015.

In December 2018, the Central Bank edited Circular No. 3,920/18 providing mitigation instruments of the tranche of the risk-weighted assets (RWA) related to the exposure to credit risk subject to the calculation of capital requirements through a standardized approach (RWAcpad).

In parallel to the issue of Circular No. 3,920/18, the Central Bank edited Circular No. 3,921/18 anticipating the new criterion for the application of the Risk Weighting Factor (FPR).

The total consolidated exposure of a financial institution in foreign currencies and gold cannot exceed 30.0% of its Reference Equity. In addition, if its exposure is greater than 5.0% of its Reference Equity, the financial institution must hold additional capital at least equivalent to 100% of its exposure. Since July 2007, the amount internationally offset in opposite exposures (purchases and sales) in Brazil and abroad by institutions of the same conglomerate is required to be added to the respective conglomerate's net consolidated exposure.

For more information on our capital ratios, see "Item 5.B - Liquidity and Capital Resources - Capital Compliance - Basel III."

Compulsory Deposits

The Central Bank periodically sets compulsory deposit and related requirements for financial institutions based in Brazil. The Central Bank uses reserve requirements as a mechanism to control liquidity in the SFN.

Standards on compulsory deposits and additional reserve requirements are periodically altered by the Central Bank. For a summary of current requirements, see "Item 4.B. Business Overview – Deposit Funding."

Asset composition requirements

According to the Resolution No. 2,844/01, as amended, financial institutions based in Brazil may not allocate more than 25.0% of their Reference Equity to loans and advances (including guarantees) to the same customer (including customer's parent, affiliates and subsidiaries) or to securities from any issuer. They also may not act as underwriters (excluding best efforts underwriting) of securities issued by any one issuer representing more than 25.0% of their Reference Equity.

Form 20-F

According to the Resolution No. 2,283/96, permanent assets (defined as property and equipment other than commercial leasing transactions, unconsolidated investments and deferred assets) of Brazilian financial institutions may not exceed 50.0% of their Reference Equity.

From October 2017, with the enactment of Resolution No. 4,607/17, the following transactions are excluded from the calculation of the limits mentioned above: (i) transactions of credit and leasing of responsibility of the Government; (ii) credits arising from transactions with derivatives of responsibility of the Government; and (iii) installments of credit transactions guaranteed by the government. Under the terms of Resolution No. 4,589/17, the amount of credit transactions with organizations and entities of the public sector is limited to 45% of the Reference Equity, according to the regulations in force.

Repurchase transactions

Repurchase transactions are subject to operational capital limits based on the financial institution's equity, as adjusted in accordance with Central Bank regulations. A financial institution may only hold repurchase transactions in an amount up to 30 times its Reference Equity. Within that limit, repurchase transactions involving private securities may not exceed five times the amount of the financial institution's Capital. Limits on repurchase transactions involving securities issued by Brazilian governmental authorities vary in accordance with the type of security involved in the transaction and the perceived risk of the issuer as established by the Central Bank.

In September 2016, the Central Bank prohibited the execution, extension or renewal of repurchase transactions with securities issued or accepted from associated institutions, or institutions that are members of the same prudential conglomerate. However, the execution, extension or renewal of repurchase transactions based on securities issued or accepted up until September 29, 2016 will be accepted until December 31, 2017, provided that the following are observed: (i) the maximum term of twelve months; and (ii) the maintenance of the accounting balance related to the total of transactions in an amount equal to or less than 110.0% of the total accounting balance calculated on the base date of August 31, 2016, whereby from May 1, 2017, the amount will be 50.0% of the total accounting balance calculated for the same base date.

Onlending of funds borrowed abroad

Financial institutions and leasing companies are permitted to borrow foreign currency-denominated funds in the international markets (through direct loans or the issuance of debt securities) in order to on-lend such funds in Brazil. These onlendings take the form of loans denominated in *reais* but indexed to the U.S. dollar. The terms of the onlending transaction must reflect the terms of the original transaction. The interest rate charged on the underlying foreign loan must also conform to international market practices. In addition to the original cost of the transaction, the financial institution may charge onlending commission only.

Furthermore, the amount of any loan in foreign currency should be limited to the sum of foreign transactions undertaken by the financial institution to which loan funds are to be directed. Lastly, pursuant to the Central Bank's Circular No. 3,434/09, the total of loans and advances made against these funds must be delivered to the Central Bank as collateral, as a condition for the release of the amount to the

financial institution.

Foreign currency position

Transactions in Brazil involving the sale and purchase of foreign currency may be conducted only by institutions authorized by the Central Bank to operate in the foreign exchange market.

Beginning in 1999, the Central Bank adopted a foreign exchange free float system, which gave rise to increased volatility. Since mid-2011 the Brazilian *real* has depreciated against the U.S. dollar and the Central Bank has intervened in the foreign exchange market to control the foreign rate volatility.

The Central Bank does not impose limits on long positions in foreign exchange operations (i.e., in which the aggregate amount of foreign currency purchases exceeds sales) and short positions in foreign exchange operations (i.e., in which the aggregate amount of foreign currency purchases is less than sales) for banks authorized to operate in the foreign exchange market.

Standards that address foreign exchange markets are frequently changed by CMN and the Central Bank.

81 Bradesco

Form 20-F

Registration of cross-border derivatives and hedging transactions and information on derivatives

In December 2009, the Central Bank issued specific rules that became effective in February 2010, requiring Brazilian financial institutions to register their cross-border derivative transactions with a clearing house regulated by the Central Bank and by the CVM. Specifically, cross-border derivative transactions must (i) be registered within two business days; and (ii) cover details of underlying assets, values, currencies involved, terms, counterparties, means of settlement and parameters used.

In January 2010, registration rules were extended to cover hedging transactions in foreign OTC markets or exchanges.

In November 2010, to facilitate management of derivatives-related risk incurred by financial institutions, the CVM stipulated that market participants should create mechanisms in order to share information on derivatives contracts traded or registered in their systems, subject to banking confidentiality rules.

Treatment of loans and advances

Financial institutions are required to classify their loans and advances into nine categories, ranging from AA to H, based on their risk. These credit risk classifications are determined in accordance with Central Bank criteria relating to:

- the conditions of the debtor and the guarantor, such as their economic and financial situation, level of indebtedness, capacity for generating profits, cash flow, delay in payments, contingencies and credit limits; and
- the conditions of the transaction, such as its nature and purpose, the type, the level of liquidity, the sufficiency of the collateral and the total amount of the credit.

In the case of corporate borrowers, the nine categories that we use are as follows:

82 Form 20-F – December 2018

Form 20-F

Rating	Our Classification	Bradesco Concept
AA	Excellent	First tier large company or group, with a long track record, market leadership and excellent economic and financial concept and positioning.
A	Very Good	Large company or group with sound economic and financial position that is active in markets with good prospects and/or potential for expansion.
B	Good	Company or group, regardless of size, with good economic and financial positioning.
C	Acceptable	Company or group with a satisfactory economic and financial situation but with performance subject to economic variations.
D	Fair	Company or group with economic and financial positioning in decline or unsatisfactory accounting information, under risk management.

A loan and advance transaction may be upgraded if it has credit support or downgraded if in default.

Doubtful loans are classified according to the loss perspective, as per E-H ratings as follows:

Rating	Bradesco Classification
E	Deficient
F	Bad
G	Critical
H	Uncollectible

A similar nine-category ranking system exists for transactions with individuals. We grade credit based on data including the individual's income, net worth and credit history, as well as other personal data.

For regulatory purposes, financial institutions are required to classify the level of risk of their loan transactions according to Central Bank criteria, taking into consideration both the borrower and guarantors' characteristics and the nature and value of the transaction, among others, in order to identify potential loan losses. For more information, see "Expected losses of loans and advances."

This risk evaluation must be reviewed at least every six months for loans extended to a single customer or economic group whose aggregate loan amount exceeds 5.0% of the financial institution's Capital, and once every twelve months for all loan transactions, with certain exceptions.

Form 20-F

Past due loans and advances must be reviewed monthly. For this type of loan, regulatory provisions set the following maximum risk classifications:

Number of Days Past Due ⁽¹⁾	Maximum Classification
15 to 30 days	B
31 to 60 days	C
61 to 90 days	D
91 to 120 days	E
121 to 150 days	F
151 to 180 days	G
More than 180 days	H

⁽¹⁾ These time periods are doubled in the case of loans with maturities in excess of 36 months.

Financial institutions are required to determine, whether any loans must be reclassified as a result of these maximum classifications. If so, they must adjust their regulated accounting provisions accordingly.

The regulations specify a minimum provision for each category of loan (local GAAP), which is measured as a percentage of the total amount of the loan and advance transaction, as follows:

Classification of Loan	Minimum Provision %
AA	-
A	0.5
B	1.0
C	3.0
D	10.0
E	30.0
F	50.0
G	70.0
H ⁽¹⁾	100.0

⁽¹⁾ Financial institutions must write off any loan six months after its initial classification as an H loan.

Loans and advances of up to R\$50,000 may be classified by the method used by the financial institution itself or the arrears criteria, described above. Classifications should be at least level A, according to the Central Bank.

Financial institutions must make their lending and loan classification policies available to the Central Bank and to their independent accountants. They are also required to submit information relating to their loan portfolio to the Central Bank, together with their financial statements. This information must include:

- a breakdown of the business activities and nature of borrowers;

- maturities of their loans; and
- amounts of rescheduled, written-off and recovered loans.

The Central Bank requires authorized financial institutions to compile and submit their loans and advances portfolio data.

84 Form 20-F – December 2018

Form 20-F

Exclusivity in loans and advances to customers

In January 2011, the Central Bank's Circular No. 3,522/11 prohibited financial institutions that provide services and loan transactions from entering into agreements, contracts or other arrangements that prevent or restrict the ability of their customers to access loans and advances offered by other institutions, including payroll-deductible loans. The purpose of this rule is to increase competition among credit providers and prevent exclusivity agreements between state-owned banks and government bodies with respect to payroll-deductible loans. While there is some uncertainty as to whether the new rules affect existing contracts, all new contracts are covered by the new regulations, allowing market competition and enabling employees in the public and private sectors to obtain payroll-deductible loans from any authorized financial institution.

Regulation of the debit balance of the credit card bill

Through CMN Resolution No. 4,549/17, which came into force in April 2017, the Central Bank started regulating the financing of the debit balance of the credit card invoice and other post-paid instruments, not settled in full at maturity.

According to the new standard, the credit card companies will no longer be able to finance the balance due from customers through the revolving credit for more than a month. Therefore, after the maturity of the bill in the following month, if there is still a debit balance due on the amount that is the object of the revolving credit, this can be financed by a line of credit in installments, to be offered by the financial institution, with better conditions or settled in full by the client.

In April 2018, the CMN issued Resolution No. 4,655/18 through which the charges that may be levied if there is a delay in payment or settlement of obligations related to invoices of cards were listed, which are: (i) compensatory interest, per day of delinquency, on the instalment in arrears; (ii) fines; and (iii) interest on arrears. In addition, it establishes that the form of levying such charges shall be included in the contract signed with the client.

Overdraft Regulations

In April 2018, the Self-Regulation Council of the FEBRABAN -*Federação Brasileira de Bancos* (Brazilian Federation of Banks), published the Regulatory Standard No. 19/18 (Regulatory Standard on the Conscious Use of Overdraft), which came into force on July 1, 2018, with new guidelines to promote and stimulate the proper use of overdraft facilities.

Among the Regulatory Standard No. 19/18 main guidelines, we highlight that: (i) financial institutions which have signed the regulatory standard shall, at any time, provide more advantageous conditions to the

consumer to settle his overdraft balance, including the possibility of instalment payments; (ii) if the consumer uses more than 15% of the overdraft limit available during 30 consecutive days, and as long as the value is above R\$200.00 (two hundred *reais*), the financial institution shall proactively offer to the consumer alternatives for the settlement of the balance; and (iii) financial institutions shall promote financial guidance related to the overdraft, especially with respect to its use in emergency situations and on a temporary basis.

Brazilian Clearing System – (Sistema de Pagamentos Brasileiro, or “SPB”)

The SPB was regulated and restructured under legislation enacted in 2001. These regulations are intended to streamline the system by adopting multilateral clearing and boost security and solidity by reducing systemic default risk and financial institutions' credit and liquidity risks.

The subsystems in the SPB are responsible for maintaining security mechanisms and rules for controlling risks and contingencies, loss sharing among market participants and direct execution of custody positions of contracts and collateral by participants. In addition, clearing houses and settlement service providers, as important components to the system, set aside a portion of their assets as an additional guarantee for settlement of transactions.

Currently, responsibility for settlement of a transaction has been assigned to the clearinghouses or service providers responsible for it. Once a financial transaction has been submitted for clearing and settlement, it generally becomes the obligation of the relevant clearinghouse and/or settlement service provider to clear and settle, and it is no longer subject to the risk of bankruptcy or insolvency on the part of the market participant that submitted it for clearing and settlement.

Financial institutions and other institutions authorized by the Central Bank are also required under the rules to create mechanisms to identify and avoid liquidity risks, in accordance with certain procedures established by the Central Bank. Under these rules, institutions are required to maintain, at least:

Form 20-F

- liquidity risk management policies and strategies, which are clearly evidenced and set operational limits and procedures aimed at exposure to liquidity risk at a level required by the Management;
- processes to identify, assess, monitor and control liquidity risk exposure during different time frames, including intraday and comprising at least a daily assessment of transactions with settlement terms below 90 days;
- an assessment, at least annually, of the processes described in the previous item;
- funding policies and strategies that provide for adequate diversification of fund sources and maturity terms;
- liquidity contingency plan, which is updated on a regular basis and sets responsibilities and procedures to face liquidity stress scenarios;
- regular stress tests with short and long-term idiosyncratic and systemic scenarios, whose results should be considered when designing or revising policies, strategies, limits and the liquidity contingency plan; and
- liquidity risk assessment as part of the process of approving new products, as well as an assessment of how compatible these products are with existing procedures and controls.

Payments are processed in real time, and since March 2013, the amounts over R\$1,000 are being processed by electronic transfers between institutions with immediately available funds. If a transaction is made using checks, an additional bank fee will be charged.

The Central Bank and CVM have the power to regulate and supervise the SPB.

In October 2013, Law No. 12,865/13 was enacted providing for payment arrangements and payment institutions that are part of SPB. In November 2013, in order to regulate this law: (i) the CMN established guidelines for the regulation, surveillance and supervision of payment institutions and payment arrangements that are part of SPB; and (ii) the Central Bank: (a) defined requirements and procedures to authorize the establishment and operation, cancellation of authorization, control changes, structure of management positions, name and head office location, corporate reorganizations, conditions to hold management positions in payment institutions and authorization for financial institutions to provide payment services; (b) created a regulation to govern, among others, provision of payment services in the ambit of payment arrangements that are part of SPB, and established criteria according to which payment arrangements will not be part of SPB, among others; and (c) established rules on risk management, minimum capital requirements, governance of payment institutions, preservation of value and liquidity of payment account balances.

In April 2014, the Central Bank changed the rules regarding any payment institutions and any related arrangements. The main changes were as follows: (i) it determined that the payment institutions shall deposit with the Central Bank the amounts corresponding to the electronic balance of any payment accounts, plus the electronic balance of any amounts being transferred between payment accounts within

the same payment institution. To ensure the viability of the Brazilian Payment System (SPB), such deposit should be affected gradually; starting with 20.0% in 2014 and increasing to 100% in 2019; and (ii) it reviewed the definition of arrangements that may be considered an integral part of the SPB.

In September 2015, the Central Bank issued Circular No. 3,765/15 amending Circular No. 3,682/13 and bringing significant changes in the rules applicable to payment agreements that are part of the SPB. The main changes are: (i) centralized compulsory clearing and settlement of credit or debit electronic orders through a clearing and settlement system authorized by the Central Bank; (ii) new requirements for interchangeably operating arrangements, the introduction of “home institution” concept, the change of criteria to maintain closed payment arrangements; and (iii) the change of terms to decrease minimum operating volumes applicable to payment arrangements that are not part of the SPB.

In July 2017, the Central Bank issued Circular No. 3,842/17, which amends Circular No. 3,682/13. The main changes are: (i) the obligation to have a centralized clearing and settlement system, regardless of the Central Bank's authorization; and (ii) the new deadlines to comply with the previous requirement.

In August 2017, the Central Bank issued Circular No. 3,843/17 establishing October 30, 2017 as the deadline to implement the centralized settlement. In October 2017, the Central Bank issued Circular No. 3,854/17, amending Circular No. 3,682/13 and the most relevant changes were: (i) the amendment of the date defined by Circular No. 3,843/17; (ii) the requirement to perform integrated tests before November 10, 2017 to ensure a secure access to the clearing and settlement system; and (iii) to ensure that the internal processes are suitable to work with the system.

86 Form 20-F – December 2018

Form 20-F

In March 2018, the Central Bank issued Circular No. 3,887/18, which established the following maximum limits for the exchange rate in domestic payment arrangements, purchases and demand deposit account: (i) 0.5% for the average exchange rate, weighted by the value of the transactions calculated on a quarterly basis; and (ii) 0.8% as the maximum value to be applied in any transaction. The maximum limits mentioned by Circular No. 3,887/18 do not apply to exchange rates of transactions not made personally and transactions with corporate cards. It is expected that the reduction of the rate be transmitted from the accrediting company to the commercial establishment and then to the consumer, with the aim of promoting an increase in the competition between cards.

In December 2018, the Central Bank edited Resolution No. 4,707/18, which established the conditions and procedures for the implementation by financial institutions, of loan operations tied to receivables from payment arrangements. The Resolution determined: (i) the necessary specifications for the loan agreements for loans with assignment of receivables; (ii) with limitations, the free movement of financial resources to the end user recipient of operations of anticipation of receivables; (iii) the information that financial institutions should provide to the accrediting companies and sub-accrediting companies; and (iv) the information that must be provided to the end user. In January 2019, the CMN Resolution No. 4,710/19 was published to change the effective date of the Resolution No. 4,707/18, therefore, the Resolution No. 4,707/18 came into force on April 8, 2019.

Also, in December 2018, the CMN edited Circular No. 3,925/18, amending the Regulation Annex to Circular No. 3,682/13, which regulates the provision of payment services in the context of arrangements within the framework of the SPB, establishing: (i) the characteristics that the settler of the arrangement must possess such as technical-operational capabilities, organizational, administrative in addition to financial mechanisms for effective and transparent governance so as to contemplate, including the interests of participants and end users; (ii) the regulation of payment arrangement should allow the linking of the modalities of participation sub-accrediting and home institution; and (iii) the settler open payment arrangement should allow payment arrangements closed interoperate with him through bilateral agreements.

Special Temporary Administrative, Intervention and Extrajudicial Liquidation Regimes - Under Law No. 6,024/74

Intervention

The Central Bank will intervene in the operations and management of any financial institution not controlled by the Federal Government if the institution:

- suffers losses due to mismanagement, putting creditors at risk;
- repeatedly violates banking regulations; or
- is insolvent.

Intervention may also be ordered upon the request of a financial institution's management and may not exceed twelve months. During the intervention period, the institution's liabilities are suspended in relation to

overdue obligations, maturity dates for pending obligations contracted prior to intervention, and liabilities for deposits in the institution existing on the date intervention was ordered.

Administrative liquidation

The Central Bank will liquidate a financial institution if:

- the institution's economic or financial situation is at risk, particularly when the institution ceases to meet its obligations as they fall due, or upon the occurrence of an event that could indicate a state of bankruptcy;
- management commits a material violation of banking laws, regulations or rulings;
- the institution suffers a loss which subjects its unsecured creditors to severe risk; or
- upon revocation of the authorization to operate, the institution does not initiate ordinary liquidation proceedings within 90 days, or, if initiated, the Central Bank determines that the pace of the liquidation may impair the institution's creditors.

Form 20-F

As a consequence of administrative liquidation:

- lawsuits pleading claims on the assets of the institution are suspended;
- the institution's obligations are accelerated;
- the institution may not comply with any liquidated damage clause contained in unilateral contracts;
- interest does not accrue against the institution until its liabilities are paid in full; and
- the limitation period of the institution's obligations is suspended.

The Central Bank may end the extrajudicial settlement of a financial institution, in the following cases:

- full payment of unsecured creditors;
- change of the institution's scope to an economic activity that is not part of the SFN;
- transfer of the institution's control;
- conversion into ordinary settlement; and
- sale/loss of the institution's assets, upon its completion and the distribution of the proceeds among the creditors, even if the debts are not fully paid; or
- absence of liquidity or difficult completion of the institution's remaining assets, as recognized by the Central Bank.

Temporary Special Administration Regime

The Temporary Special Administration Regime, known as "RAET," is a less severe form of Central Bank intervention in financial institutions, which allows institutions to continue to operate normally. RAET may be ordered in the case of an institution that:

- repeatedly makes transactions contravening economic or financial policies under federal law;
- faces a shortage of assets;
- fails to comply with compulsory deposit rules;
- has reckless or fraudulent management; or
- has operations or circumstances requiring an intervention.

Payment of creditors in liquidation

In the case of liquidation of a financial institution, employees' wages, indemnities and tax claims have the highest priority among claims against the bankrupt institution. In November 1995, the Central Bank created the *Fundo Garantidor de Créditos* - FGC to guarantee the payment of funds deposited with financial institutions in case of intervention, administrative liquidation, bankruptcy, or other state of insolvency. Members of the FGC are financial institutions that accept demand, time and savings deposits as well as savings and loans associations. The FGC is funded principally by mandatory contributions from all financial institutions based in Brazil accepting deposits from customers.

The FGC is a deposit insurance system that guarantees a certain maximum amount of deposits and certain credit instruments held by the same customer against a financial institution (or against member financial institutions of the same financial group). The liability of the participating institutions is limited to the amount of their contributions to the FGC, with the exception that in limited circumstances, if FGC payments are insufficient to cover insured losses, the participating institutions may be asked for extraordinary contributions and advances. The payment of unsecured credit and customer deposits not payable under the FGC is subject to the prior payment of all secured credits and other credits to which specific laws may grant special privileges.

In December 2010, the CMN increased the maximum amount of the guarantee provided by the FGC from R\$60,000 to R\$70,000. In May 2013, this amount was raised again to R\$250,000 and has been kept by the Central Bank at this level since then. In 2006, it reduced the ordinary monthly FGC contribution from 0.025% to 0.0125% of the balance held in bank accounts covered by FGC insurance. In February 2016, the percentage of the contribution on instruments listed in Article 2, paragraphs I to X from Appendix II of Resolution No. 4,222/13 was changed to 0.0125%, even if correspondent credits are unsecured. In April 2018, CMN Resolution No. 4,653/18 reduced the ordinary monthly contribution from 0.0125% to 0.01%.

88 Form 20-F – December 2018

Form 20-F

CMN Resolution No. 4,653/18 was also responsible for instituting an additional monthly contribution to be collected when the Reference Value is 4 times higher than the Adjusted Shareholders' Equity and 75% of the Reference Fundraising of the associated institution, established in the previous month.

Central Bank edited Circular No. 3,915/18 establishing the obligation of providing information to the FGC by financial institutions and other institutions authorized to operate by the Central Bank, whereby these institutions should have systems and controls that can produce and supply such information in up to two working days in an electronic file with various data listed in the Circular. Circular No. 3,915/18 should be in force on December 1, 2019.

According to CMN rules, the maximum value of the balance of such deposits is limited (with a maximum aggregate of R\$5.0 billion by December 2014 or R\$3.0 billion as of January 2015) to: (i) for the balance of the deposits originally made without fiduciary assignment, the highest of the following amounts: (a) the equivalent of twice the regulatory Tier I capital, calculated yearly on the base date June earning interest monthly at the SELIC rate; (b) the equivalent of twice the regulatory Tier I capital, calculated as of December 2008, earning interest monthly at the SELIC rate as of May 2009; and (c) the equivalent of the sum of balances in time deposits plus balances of bills of exchange held in the bank in June 2008, earning interest monthly at the SELIC rate as of May 2009; and (ii) for the balance of the deposits made with fiduciary assignment, the following factors over the regulatory Tier I capital, calculated as of December of the previous year, adjusted by the SELIC rate: (a) 1.6 as of June 2013; and (b) 2.0 as of January 2014.

Furthermore, the limit on taking time deposits with special FGC guarantees without fiduciary assignment has been reduced, in accordance with the following schedule:

- 40.0% from January 1, 2013;
- 60.0% from January 1, 2014;
- 80.0% from January 1, 2015; and
- 100.0% from January 1, 2016.

In May 2013, Resolution No. 4,222/13 was issued, amending and consolidating the rules addressing the FGC bylaws and regulation. In addition to increasing the maximum amount of the guarantee provided by the FGC to R\$250,000, agribusiness notes ("LCA") were included in credits guaranteed by FGC. In August 2013, the Central Bank amended and consolidated the provisions related to the calculation basis and payment of common contributions by the FGC-associated institutions. The rules governing the FGC are changed on a periodic basis.

In September 2018, the CMN Resolution No. 4,688/18 was edited, amending and consolidating the FGC bylaws and regulation. We highlight the following changes in the Bylaws of the FGC: (i) changes in the limits of the operations of assistance and financial support and operations of liquidity with related institutions, in addition to sending information by the FGC to the Central Bank on these operations; (ii)

establishes new parameters to qualify the institutions associated with the FGC; (iii) inclusion of assumptions on which the Board of Directors may exclude the entity from the members associated with the FGC; and (iv) adds the duty of provision of information to the FGC.

With respect to the new regulation of the FGC, we highlight the following changes: (i) the real estate bonds cease to be the object of ordinary warranty; (ii) changes in objects that are not covered by the ordinary warranty; and (iii) additional information that must be provided to the FGC.

In February 2019, Central Bank issued Circular No. 3,929/19, determining the calculation basis and collection of contributions from institutions associated with the FGC. This Circular established: (i) the amounts of the ordinary and special contributions should be calculated based on the balances of the last day of each month, the accounts and the instruments corresponding to the collateral obligations registered by the financial institutions associated with the FGC according to the Accounting Plan of the SFN; (ii) the amounts of the additional contributions shall be calculated based on the balance sheets of the institutions associated with the FGC, in the information referred to in Central Bank Circular No. 3,915/18 and in the balances, of the last day of each month, of the accounts and of the instruments corresponding to the funding of the associated institutions registered in the titles and sub-titles of Cosif; (iii) the obligation to send information necessary to calculate the ordinary, special and additional contributions related to Adjusted Shareholders' Equity and the Reference Value and the values corresponding to the sum of the respective balances of the last day of each month of the titles and subtitles of Cosif, which serve as the basis for calculating the contributions due for the immediately preceding month; (iv) mandatory collection of the ordinary, special and additional contributions by the FGC associated institutions in a financial institution accredited by them until the first working day of the month following the date of receipt of the information regarding the amount of the total contribution accrued by the FGC; and (v) established a fine of 2% (the value plus inflation) due to the delay in the collection of the contributions. Central Bank Circular No. 3,929/19 will enter into force on January 1st, 2020.

Form 20-F

Internal compliance procedures

All financial institutions must have in place internal policies and procedures to control:

- their activities;
- their financial, operational and management information systems; and
- their compliance with all applicable regulations.

The board of executive officers of a financial institution is responsible for implementing an effective structure for internal controls by defining responsibilities and control procedures and establishing corresponding goals and procedures at all levels of the institution. The board of executive officers is also responsible for verifying compliance with all internal procedures.

Restrictions on foreign investment

The Brazilian Constitution allows foreign individuals or companies to invest in the voting shares of financial institutions based in Brazil only if they have specific authorization from the Brazilian government, pursuant to article 52, of the Act of Transitional Constitutional Provisions (“ADCT”). However, foreign investors without specific authorization may acquire publicly traded non-voting shares of financial institutions based in Brazil or depositary receipts representing non-voting shares offered abroad. Any investment in common shares would depend on government authorization. In January 2012, the Central Bank authorized us to create an ADR program for our common shares in the U.S. market. Foreign interest in our capital stock is currently limited to 30.0%.

Anti-money laundering regulations, banking secrecy and financial transactions linked to terrorism

Under Brazilian anti-money laundering rules, which the Central Bank consolidated in July 2009 through Central Bank’s Circular No. 3,461/09, as amended, financial institutions must:

- keep up-to-date records regarding their customers;
- maintain internal controls and records;
- record transactions involving Brazilian and foreign currency, securities, metals or any other asset which may be converted into money;
- keep records of transactions that exceed R\$10,000 in a calendar month or reveal a pattern of activity that suggests a scheme to avoid identification;
- keep records of all check transactions; and

- keep records and inform the Central Bank of any cash deposits or cash withdrawals in amounts above R\$50,000.

The financial institution must review transactions or proposals whose characteristics may indicate the existence of a crime and inform the Central Bank of the proposed or executed transaction. Records of transactions involving currency or any asset convertible to money, records of transactions that exceed R\$10,000 in a calendar month, and records of check transactions must be kept for at least ten years, unless the bank is notified that a CVM investigation is underway, in which case the ten-year obligation may be extended. Pursuant to Circular No. 3,461/09, amended by Circulars No. 3,517/10, No. 3,583/12 and No. 3,654/13, financial institutions must implement control policies and internal procedures. The Circular No. 3,858/17 increased the penalties resulting from non-compliance with the obligations described above.

The CVM directed special attention to politically exposed individuals through Instruction No. 463/08 and consolidated in Central Bank's Circular No. 3,461/09, which refer to individuals politically exposed who hold or held prominent public positions in Brazil or abroad during the past five years and their relatives and representatives, heads of state and government, senior politicians and civil servants, judges or high-ranking military officers, and leaders of state controlled enterprises companies or political parties, among others. Central Bank's Circular No. 3,654/13 expanded such list to include other members of the Judiciary, Legislative and Executive powers, as well as individuals who held or still hold relevant positions in foreign governments. Financial institutions are required to adopt certain mechanisms in order to: (i) identify the final beneficiaries of each transaction; (ii) identify whether these politically exposed individuals are involved; (iii) monitor financial transactions involving politically exposed individuals; and (iv) pay special attention to people from countries with which Brazil maintains a high number of business and financial transactions, shared borders or ethnic, linguistic or political relations.

90 Form 20-F – December 2018

Form 20-F

In October 2008, the Central Bank broadened the reach of its rules for controlling financial transactions related to terrorism, so that operations carried out on behalf of, services provided to, or access to funds, other financial assets or economic resources belonging to or directly or indirectly controlled by, the following individuals or entities were required to be immediately reported to the Central Bank: (i) members of the Al-Qaeda organization, members of the Taliban and other individuals, groups, companies or entities connected with them; (ii) the former government of Iraq or its agencies or companies located outside of Iraq, as well as funds or other financial assets that might have been withdrawn from Iraq or acquired by Saddam Hussein or by other former Iraqi government senior officials or by the closest members of their families, including companies owned by, or directly or indirectly controlled by them or by individuals under their management; and (iii) individuals perpetrating or attempting to perpetrate terrorist actions or who take part in or facilitate such acts, entities owned or directly or indirectly controlled by such individuals, as well as by individuals and entities acting on their behalf or under their command.

In July 2012, Law No. 12,683/12 came into force, amending Law No. 9,613/98, and toughened the rules on money laundering offenses. According to the new law, any offense or misdemeanor – and not only serious offenses, such as drug traffic and terrorism – may be deemed as a precedent to the money laundering offense. Additionally, the law expands, to a great extent, the list of individuals and legal entities subject to the control mechanisms of suspicious transactions, which need to notify the Controlling Council of Financial Activities ("COAF"), including, among them, companies providing advisory or consulting services to operations in the financial and capital markets, under the penalty of fines of up to R\$20 million.

In June 2013, the CVM enacted an instruction that conformed regulation of this government agency to Law No. 12,638/12, establishing the obligation to send to the regulatory or inspection agency information regarding the non-existence of suspect financial transactions and other situations that generate the need for communications.

In October 2014, the CVM issued Instruction No. 553/14 which, among other issues, (i) firmly states that any business relationship may only be initiated or kept after the arrangements related to the registration process and the "*Conheça seu Cliente*" (Know your Customer) Policy are adhered to; and (ii) requires a statement on the purpose and nature of the business relationship with the institution, making it clear that said statement may be obtained upon the update of registration data of already-existing customers.

In November 2014, the Central Bank changed the procedures related to the Regulation of Anti-Money Laundering and Counter-Terrorism Financing (AML/CTF) to be adhered to by the payment institutions. Accordingly, in addition to the AML/CTF procedures already required, payment institutions must also: (i) adopt procedures and controls to confirm information on customer's identification, which may, among others, match the information provided by the end users against information available in public or private data bases; and (ii) implement AML/CTF risk management systems to provide for the identification and assessment of such risk, as well as carry out mitigation measures proportionate to the risks identified, particularly for high risk cases. These changes were made to meet international requirements set forth under the scope of the Financial Action Task Force ("FATF"), which is the body responsible for establishing AML/CTF standards to be adhered to by the countries of the G20, such as Brazil. Although rules applicable to payment institutions were expanded, a more flexible approach was applied to prepaid accounts, as the

limit for simplified identification was changed from R\$1,500 to R\$5,000 and the range of information to be kept for payment accounts opened by individuals was reduced.

Further, in November 2014, SUSEP established the Permanent Committee on Anti-Money Laundering and Counter-Terrorism Financing in the Insurance, Reinsurance, Capitalization and Private Pension Plan Markets (“CPLD”). The CPLD is a permanent governing body acting to prevent money laundering and curtail the financing of terrorism, both in connection with SUSEP and the insurance, reinsurance, capitalization and private pension plan markets.

In October 2015, Law No. 13,170/15 was enacted, which deals with the lawsuit for the freezing of assets, values and rights of possession or ownership and all other rights, real or personal, of ownership, directly or indirectly, of individuals or entities subject to this type of sanction by the resolutions of the United Nations Security Council – CSNU. This standard was issued to establish a faster procedure to block the assets located in Brazil, seeking to prevent the use of the assets in question in the practice of crimes against humanity.

Form 20-F

This law was regulated by means of Circular No. 3,780/16, which provides the procedures to be adopted by financial institutions and other institutions authorized to operate by the Central Bank to meet that standard, including with respect to communications with the competent authorities in the case of a freezing of assets.

92 Form 20-F – December 2018

Form 20-F

Anticorruption Law

In August 2013, Law No. 12,846/13 was enacted to regulate civil and administrative liability of legal entities for performing acts against public management, either domestic or foreign. Based on this legal provision, legal entities shall be strictly liable, in both the administrative and civil spheres, for the practice of harmful acts in their exclusive or non-exclusive interest or benefit.

The Decree No. 8,420/15 regulates the application of Law No. 12,846/13. Among others, it establishes the guidelines with respect to the calculation of the fines to be imposed in cases involving corruption scandals. The calculation base of the fine will be the company's revenues, which may have "minimum" 0.1% and "maximum" 20%. Articles 17, 18, 19 and 20 of the Decree concern the "mid-term" of the fine, predicting "mitigating factors" and "aggravating factors." In the first case, there are provisions on the non-consummation of the infraction, compensation for damages, level of cooperation, spontaneous communication, preparation of the program of governance and internal structure of compliance; in the second, as "aggravating factors," it provides for the continuity of the conduct during the relevant period, any tolerance by the Board of the company, suspension of construction or public service and positive economic situation. If it is not possible to use the revenue as a parameter for the calculation of the fine, the values to be applied may be between R\$6 thousand, minimum, and R\$60 million, maximum. An additional 5% fine will be levied if within five years of the "corrupt" conduct such "corrupt" conduct is repeated.

Social and environmental responsibility

In compliance with CMN Resolution No. 4,327/14, which introduces guidelines for the Social and Environmental Responsibility Policy ("PRSA") by financial institutions, Bradesco has a set of internal rules, as well as a governance structure responsible for ensuring the implementation of such policy.

The PRSA guides our socio environmental actions related to our business and activities, as well as the relationship with stakeholders, helping the management of risks and opportunities. The Sustainability and Diversity Committee oversees Bradesco's compliance with its normative framework and voluntary commitments and ratifies the improvement plans proposed by the Sustainability Commission.

Climate Change

In the short and long term, climate change will create major impacts on the world's economy. Changes in the environment, such as the extension of periods of drought and the rising of sea levels, along with extreme weather events, such as tornadoes and hurricanes, are expected with greater intensity and frequency.

In addition, governments and markets have adopted policies to achieve an economy with lower levels of greenhouse gas emissions, which include initiatives related to pricing and the commercialization of emissions, as well as fostering energy efficiency and the use of renewable energies.

This new scenario of physical changes and transition presents risks and opportunities for the financial sector with direct and indirect repercussions.

Direct risks

We maintain controls and targets to improve our environmental performance, including the use of natural resources and the control of greenhouse gas emissions, in order to minimize negative impacts. Our inventory of emissions is published annually and the direct emissions are compensated. Additionally, we have contingency plans in place with the aim of reducing our exposure and being less impacted in cases of extreme events, which includes those originated by the weather.

Indirect risks

In our credit management, we have a socio environmental risk analysis that seeks to reduce the socio environmental impacts of the operations we finance. In the financings subject to the Equator Principles, we require that the projects with the goal to issue more than 25 thousand tons of carbon equivalent emissions *per annum* conduct prior studies of feasible alternatives of reduction or compensation and compute the volume of emissions in their operations phase. Our work in the area of investments also considers environmental, social and governance factors, which cover the subject of climate change. Since 2008, we raise the awareness of our suppliers in relation to risks and opportunities arising from climate change through the CDP Supply Chain Leadership Collaboration ("SCLC").

Though our investments arm (BRAM), we are one of the organizations that supports the Task Force on Climate-Related Financial Disclosures ("TCFD"). The TCFD outlines the exposure of companies to the financial risks and opportunities arising from climate change. The recommendations of the TCFD are influencing the market and guiding alignment initiatives both in financial and non-financial companies. In 2018, we participated in a pilot project with UNEP FI (United Nations Environment Programme Finance Initiative) to develop Climate Risk Management methods in the banking loan portfolio – the results of this initiative are available on UNEP FI website.

Form 20-F

We became the only financial institution in Brazil to participate in the group that is developing the Principles for Banking Responsibility with UNEP FI. The purpose of the initiative is to create guidelines that strengthen the responsibility of the banks in funding a sustainable future. The final version of the Principles will be published in the second half of 2019.

Our 2018 Integrated Report, available on our investor relations website, provides more information on the socioenvironmental management of the Organization.

Audit partner rotation requirements

Under Brazilian regulations, all financial institutions must:

- be audited by an independent accounting firm; and
- have the specialist in charge, officer, manager or audit team supervisor periodically replaced without the need to change the independent auditor firm itself. Rotation must take place after five fiscal years at most and replaced professionals may be reintegrated three years later. Terms of responsible specialists, officers, managers or audit team supervisors begin on the day the team begins work on the audit.

Each independent accounting firm must immediately inform the Central Bank of any event that may materially adversely affect the relevant financial institution's status.

For the entities regulated by SUSEP, the applicable standards determine the replacement of the members responsible for the independent accounting audit, every five fiscal years. According to article 121, X, of CNSP Resolution No. 321/15, members responsible for the independent accounting audit is the technical responsible, director, management, supervisor ou any other member in a management function. According to the applicable standards, the first mandatory replacement is expected to take place after the fiscal year ended December 31, 2019. For the entities regulated by ANS, the applicable standards in effect since 2016 determine that the professional responsible for signing the opinion should change at least every five fiscal years, requiring a minimum interval of three years from its replacement.

The members of the Board of Directors, elected in the form of article 141, paragraph 4 of the Brazilian Corporate Law, will have veto rights, provided that it is in a substantiated manner, the appointment or removal of our independent accounting firm.

For additional information on the auditors of the consolidated financial statements included in this annual report see "Item 16.C. Principal Accountant Fees and Services."

Auditing requirements

Because we are a financial institution and registered with the local stock exchange, we are required to have our financial statements audited every six months in accordance with BR GAAP, applicable to institutions authorized to operate by the Central Bank. Quarterly financial information filed with the CVM is also subject to review by independent auditors. Additionally, as required by CMN Resolution No. 3,786/09, we are

required to publish annual consolidated financial statements prepared in accordance with IFRS, accompanied by the independent auditors' report.

In January 2003, the CVM enacted regulations requiring audited entities to disclose information relating to their independent accounting firm's non-auditing services provided to the entity whenever such services accounted for more than 5.0% of the amount paid to the external auditors.

The independent auditors must also declare to the audited company's management that their provision of these services does not affect the independence and objectivity required for external auditing services.

In May 2004, the CMN enacted new auditing regulations applicable to all financial institutions based in Brazil, which were later revised. Under these regulations, we are required to appoint a member of our Management to be responsible for monitoring and supervising compliance with the accounting and auditing requirements set forth in the legislation.

Pursuant to this regulation, financial institutions having Capital of more than R\$1.0 billion, managing third party assets of at least R\$1.0 billion or having an aggregate amount of third-party deposits of over R\$5.0 billion are also required to create an Audit Committee consisting of independent members. According to the regulation, the number of members, their appointment and removal criteria, their term of office and their responsibilities must be specified in the institutions' Bylaws. The Audit Committee is responsible for recommending to the Board of Directors which independent accounting firm to engage, reviewing the company's financial statements, including the notes thereto, and the auditors' opinion prior to public release, evaluating the effectiveness of the auditing services provided and internal compliance procedures, assessing management's compliance with the recommendations made by the independent accounting firm, among other matters. Our Bylaws were revised in December 2003 to stipulate the existence of an audit committee. In May 2004, our Board of Directors approved the internal regulations for the Audit Committee and appointed its first members. Our Audit Committee has been fully operational since July 2004. In October 2006, the CMN amended the Resolution No. 3,198/04, changing the minimum requirements to be observed by the financial institutions when electing members for the Audit Committee. In April 2014, the CMN changed certain rules related to audit committees in order to improve the composition and operational of such committees. These rules provided that up to one third of its members may exercise another single consecutive term of office, granting more independence to the Audit Committees of privately-held institutions. See "Item 16.D. Exemptions from the listing standards for Audit Committees."

Form 20-F

We are required to publish a semi-annual summary of the Audit Committee report together with our financial statements.

Regulation of operations in other jurisdictions

We have branches and subsidiaries in several other jurisdictions, such as New York, London, Buenos Aires, the Cayman Islands, Hong Kong, Mexico and Luxembourg. The Central Bank supervises Brazilian financial institutions' foreign branches, subsidiaries and corporate properties, and prior approval from the Central Bank is necessary to establish any new branch, subsidiary or representative office or to acquire or increase any interest in any company abroad. In any case, the subsidiaries activities should be complementary or related to our own principal activities. In most cases, we have had to obtain governmental approvals from local central banks and monetary authorities in foreign jurisdictions before commencing business. In each jurisdiction in which we operate, we are subject to supervision by local authorities.

Asset management regulation

Asset management is regulated by the CMN and the CVM.

In August 2004, the CVM issued Instruction No. 409/04, which became effective in November 2004, and has been amended a number of times since then, consolidating all previous regulations applicable to fixed-income asset funds and equity mutual funds. Prior to this ruling, fixed-income asset funds were regulated by the Central Bank, and equity mutual funds were regulated by the CVM.

In December 2014, the CVM enacted Instruction No. 555/14, which replaced Instruction No. 409/04, in order to improve electronic communications, rationalize the volume, content and manner of disclosing information, and to make investment limits less rigid for certain financial assets, particularly foreign financial assets. Additionally, CVM Instruction No. 555/14 addresses the following issues: (i) the framework for setting up funds without the need for executing an adherence contract and the checking of the adequacy for investment in the fund to the customer's profile in connection with funds investing over 95.0% of its equity in federal public debt bonds or equivalent risky securities; (ii) barring interest-bearing compensation that would jeopardize the independence of the fund management; (iii) providing more transparency to the distribution policy; (iv) improving performance fee regulation; and (v) providing safer rules for investments in foreign assets. CVM Instruction No. 555/14 became effective in October 2015.

Pursuant to CVM limits and our Bylaws, our investment funds must keep their assets invested in securities and types of trades available in the financial and capital markets.

Securities, as well as other financial assets which are an integral part of the investment fund portfolio, should be duly registered in the registration system with a custodian or central depository, authorized by the Central Bank or the CVM to carry out such activities.

In addition to the limitations specified in each financial investment fund's bylaws, they may not:

- invest more than 10.0% of their net assets in securities of a single issuer, if that issuer is: (i) a publicly-held institution; or (ii) another investment fund;
- invest more than 20.0% of their net assets in securities issued by the same financial institution authorized to operate by the Central Bank (including the fund administrator);

Form 20-F

- invest more than 5.0% of their net assets if the issuer is an individual or corporate entity that is not a publicly-held company or financial institution authorized to operate by the Central Bank; and
- be directly exposed to crypto assets. The CVM recommends avoiding also indirect exposure until the regulator issues a final rule on the matter.

There are no limits when the issuer is the government. For the purposes of these limits, the same issuer means the parent company, companies directly or indirectly controlled by the parent and its affiliates, or companies under common control with the issuer.

Under the previous regulation (CVM Instruction No. 409/04), the qualified investor funds required a minimum investment of R\$1.0 million per investor and were subject to concentration limitations per issuer or per type of asset as long as this is stated in their bylaws. Under the current regulation (CVM Instruction No. 555/14), this privilege is eligible only for funds for professional investors.

In addition, CVM Instruction No. 409/04 stated that funds could hold financial assets traded abroad in their portfolios as follows: (i) for foreign-debt funds and qualified investor funds that stipulated this possibility, there is no limit; (ii) for multimarket funds, up to 20.0% of net assets; and (iii) for other funds, up to 10.0% of net assets. CVM Instruction No. 555/14 changed these limits to: (i) no limits, for funds classified as “Fixed Income – Foreign Debt,” funds exclusively intended for professional investors that include in their denomination the suffix “Foreign Investment,” and certain funds exclusively intended for qualified investors; (ii) up to 40.0% of its net equity for funds exclusively intended for qualified investors that do not follow certain provisions set forth in this Instruction; and (iii) up to 20.0% of its net equity for general public funds.

Also in December 2014, the CVM established a new concept for qualified and professional investors. Legal entities and individuals are to be deemed professional investors if they hold financial investments above R\$10.0 million, and are deemed to be qualified investors if they hold financial investments above R\$1.0 million. These definitions became effective in October 2015.

Regulation of brokers and dealers

Broker and dealer firms are part of the SFN and are subject to CMN, Central Bank and CVM regulation and supervision. Brokerage and distribution firms must be authorized by the Central Bank and are the only institutions in Brazil authorized to trade on Brazil's stock exchanges and commodities and futures exchanges. Both brokers and dealers may act as underwriters for public placement of securities and engage in the brokerage of foreign currency in any exchange market.

Brokers must observe B3 rules of conduct previously approved by the CVM, and must designate an executive officer responsible for observance of these rules.

Broker and dealer firms may not:

- with few exceptions, execute transactions that may be characterized as the granting loans to their customers, including the assignment of rights;

- collect commissions from their customers related to transactions of securities during the primary distribution; or
- acquire assets, including real estate properties, which are not for their own utilization, with certain exceptions.

Broker and dealer firms' employees, managers, partners, controlling and controlled entities may trade securities on their own account only through the broker they are related to.

Regulation of Internet brokerage services

The CVM approved regulations on Internet brokerage activities, which may be carried out only by registered companies. Brokers' web pages must contain details of their systems, fees, security and procedures for executing orders. They must also contain information about how the market functions generally and the risks involved with each type of investment offered.

Brokers that carry out transactions over the Internet must guarantee the security and operability of their systems, which must be audited at least twice a year.

Form 20-F

Leasing regulation

The basic legal framework governing leasing transactions is established by Law No. 6,099/74, as amended (the "Leasing Law") and related regulations issued periodically by the CMN. The Leasing Law provides general guidelines for the incorporation of leasing companies and the business activities they may undertake. The CMN, as regulator of the Financial System, is responsible for issuing Leasing Law related regulations and overseeing transactions made by leasing companies. Laws and regulations issued by the Central Bank for financial institutions in general, such as reporting requirements, capital adequacy and leverage regulations asset composition limits and treatment of doubtful loans, are also applicable to leasing companies.

Insurance regulation

The Brazilian insurance business is regulated by Decree Law No. 73/66, as amended, which created two regulatory agencies, the CNSP and SUSEP. SUSEP is responsible for implementing and overseeing CNSP's policies and ensuring compliance with such policies by insurance companies, insurance brokers and insured individuals. Insurance companies require government approval to operate, as well as specific approval from SUSEP to offer each of their products. Insurance companies may underwrite policies both directly to consumers and through qualified brokers (article 13 and paragraph 2 of Law No. 4,594/64).

Insurance companies must set aside reserves in accordance with CNSP criteria. Investments covering these reserves must be diversified and meet certain liquidity criteria, rules for which were consolidated by CNSP Resolution No. 321/15, as amended, solvency and security criteria. Insurance companies may invest a substantial portion of their assets in securities. As a result, insurance companies are major investors in the Brazilian financial markets and are subject to CMN rules and conditions for their investments and coverage of technical reserves.

Insurance companies may not, among other activities:

- act as financial institutions by lending or providing guarantees;
- trade in securities (subject to exceptions); or
- invest outside of Brazil without specific permission from the authorities.

Insurance companies must operate within certain retention limits approved by SUSEP pursuant to CNSP rules. These rules reflect the economic and financial situation of insurance companies and the conditions of their portfolios. Insurers must also meet certain capital requirements as provided by SUSEP regulations.

Under Complementary Law No. 126/07, the ceding party (local insurer or reinsurer) must offer local reinsurers preference when contracting reinsurance or retrocession in the percentage of 40% of risks ceded.

The Complementary Law also places more severe restrictions on ceding risk to foreign reinsurance companies and contracting of insurance abroad. Insurance companies must reinsure amounts exceeding their retention limits.

Since CNSP Resolution No. 168/07 was amended by CNSP Resolution No. 353/17, it does not require the insurance company to hire a minimum number of local reinsurers. However, in accordance with Article 15 of the CNSP Resolution No. 168/07, the insurance company must give preference to local reinsurers in at least 40% of the assignment of reinsurance agreements to each automatic or optional contract. In addition, as per CNSP Resolution No. 168/07 as amendment by CNSP Resolution No. 353/17, there are no more limits on the transference of risks by insurers to companies that belong to its financial conglomerate as long as the operations of reinsurance and retrocession ensure the effective transfer of risk between the parties, and are executed at arms-length.

In 2013, CNSP issued Resolution No. 302/13 which regulates the minimum capital requirement and to solvency regularization plans for insurance companies, capitalization bond entities, EAPCs, and local reinsurance companies. The main changes in such regulation were the following:

97 Bradesco

Form 20-F

- consolidation of the correction plans and the plans of solvency recovery into a single plan, as the solvency regularization plan (“PRS”);
- establishment of a liquidity minimum ratio (20.0%) over the minimum capital requirement (“CMR”), so that the companies can promptly react to unexpected losses incurred by their capital;
- changes to the base capital for EAPCs constituted as business corporations; and
- exclusion of all references to solvency margin, once all risk portions were already established in the capital requirement rules.

The CNSP Resolution No. 302/13 was revoked by CNSP Resolution No. 316/14, which maintained a large part of the prior rules. The main change was the definition of the capital installment amounts applicable to Supplementary Pension Plan Open Entities (EAPC), which are now applicable to insurance companies. In December 2014, the CNSP issued Resolution No. 317/14, addressing criteria for calculating risk capital based on the market risk of local insurance companies, EAPC, capitalization companies and reinsurance companies. The CNSP Resolutions No. 316/14 and No. 317/14 were revoked by Resolution No. 321/15, which went into effect in August 2015, having suffered changes in 2016, 2017 and 2018, and began regulating technical provisions, assets which reduce the need for coverage of technical provisions, risk capital based on the underwriting, operating and market credit risks, adjusted shareholders’ equity, criteria for investments, accounting standards, accounting audit and independent actuarial audit and Audit Committee relating to insurance companies, EAPCs, capitalization companies and reinsurers.

Insurance companies are exempt from ordinary financial liquidation procedures in case of bankruptcy, and instead follow the special procedure administered by SUSEP. Financial liquidation may be either voluntary or compulsory.

As was already the case in relation to entities subject to CMN, SUSEP issued rules in December 2008 with specific internal controls for preventing and fighting money laundering crimes. These rules include a series of provisions on notifying proposed transactions with politically exposed individuals and suppression of terrorist financing activities. These rules were amended and consolidated by Circular No. 445/12.

There is currently no restriction on foreign investment in insurance companies.

Health insurance

Private health insurance and health plans are regulated by Law No. 9,656/98, as amended, which we refer to as the "Health Insurance Law," containing general provisions applicable to health insurance companies and the general terms and conditions of agreements entered into between health insurance companies and their customers.

The ANS is responsible for regulating and supervising supplemental health services provided by health insurance companies pursuant to directives set forth by the Supplemental Health Council (*Conselho de Saúde Suplementar*).

Until 2002, SUSEP had authority over insurance companies, which were authorized to offer private health plans. Since 2002, pursuant to ANS regulations and supervision, only operators of private health plans may offer such plans. We created Bradesco Saúde in 1999 to fulfill this requirement.

Private pension plans

Open pension plans are subject, for purposes of inspection and control, to the authority of the CNSP and the SUSEP, which are under the regulatory authority of the Ministry of Finance. The CMN, CVM and Central Bank may also issue regulations pertaining to private pension plans, particularly related to assets guaranteeing technical reserves.

Private pension entities must set aside reserves and technical provisions as collateral for their liabilities.

EAPCs and insurance companies have been allowed to create, trade and operate investment funds with segregated assets since January 2006. Notwithstanding the above, certain provisions of Law No. 11,196/05 will only become effective when SUSEP and CVM issue regulatory texts. In September 2007, CVM issued Instruction No. 459/07, which addresses the setup, management, operation and disclosure of information on investment funds exclusively related to supplementary pension fund plans. In January 2013, the CMN determined new rules to govern the application of reserves, provisions and funds of insurance companies, capitalization companies and EAPCs.

Currently, Resolution CNSP No. 349/17 and SUSEP Circular SUSEP No. 563/17, in addition to the Supplementary Law No. 109/01, regulate the Pension Plan activity.

98 Form 20-F – December 2018

Form 20-F
Reinsurance

Insurance companies must operate with reinsurers registered with SUSEP. In 2007, Brazil's Congress enacted Supplementary Law No. 126/07, which abolished IRB-Brasil Re's monopoly and allowed three types of reinsurers referred to as "local," "admitted" and "occasional," thus opening up Brazil's reinsurance market for competition. Reinsurers classified as admitted and eventual, with their head office abroad, must meet specific minimum requirements, as provided for in legislation in force.

Under the same supplementary law, IRB-Brasil RE was recognized as a local reinsurer and authorized to continue its operations and make any required adjustments in due course.

As of the end of 2007, National Council of Private Insurance (CNSP - *Conselho Nacional de Seguros Privados*) and SUSEP issued a number of normative instructions containing rules for reinsurance, retrocession and intermediation business, based mainly on CNSP Resolution No. 168/07.

Through Decree No. 6,499/08, the set maximum limits for the ceding of premiums to reinsurance companies in each calendar year. For local insurers, such maximum limit was 10.0% of premiums, and for local reinsurers, 50.0% of premiums. In the case of local insurers, CNSP Resolution No. 203/09 raised the limit for local insurers from 10.0% to 25.0% in the case of guarantees for public obligations and oil risks and CNSP Resolution No.194/08, to up to 100%, in the case of nuclear risks. Also pursuant to article 16, paragraph 1 of CNSP Resolution No. 168/07, the export credit insurance, rural insurance and internal credit insurance are also not subject to this limitation. SUSEP, in turn, is authorized to issue additional standards providing for limits for other lines or types of insurance for which the limit mentioned above does not apply (article 16, paragraph 3 of CNSP Resolution No. 168/07).

Further, whenever the transferor concentrates its reinsurance or retrocession operations with a single admitted or eventual reinsurer, in percentages higher than those established in the legislation, they must inform SUSEP (article 14, paragraph 3 of the CNSP Resolution No. 168/07).

And, despite the greater flexibility of the standard, the reinsurance operations relating to life insurance for survival and supplementary pensions may only be provided by local reinsurers, in accordance with CNSP Resolution No. 168/07.

CNSP Resolution No. 241/11 was introduced to enable the transfer of certain risks associated with reinsurance or retrocession operations to reinsurers not authorized by SUSEP when the lack of capacity of the local, permitted and eventual reinsurers is proved, regardless of the price and conditions offered by these reinsurers.

In December 2017, CNSP Resolution No. 353/17 modified CNSP Resolution No. 168/07 to eliminate the minimum requirement of contracting local reinsurers. However, Article 15 of CNSP Resolution No. 168/07 requires the insurance company to give preference to local reinsurers in at least 40% of its reinsurance assignments related to automatic or optional contracts.

CNSP Resolution No. 168/07 also eliminated the limitation on the transfer of risks from insurers or reinsurers domiciled in Brazil to related companies or to companies headquartered abroad associated with its economic conglomerate. Since its amendment by CNSP Resolution No. 353/17, revoking article 14, paragraph 4, of CNSP Resolution No. 168/07, it establishes only that those reinsurance and retrocession operations within one and the same economic conglomerate must "ensure the effective transfer of risk between the parties" and "be conducted on arm's length conditions." Such operations must also be notified to SUSEP (article 14, paragraph 1 of Resolution No. 168/07).

SUSEP will have access to all reinsurance and retrocession contracts, including those concluded abroad, under penalty of disregarding, for all purposes and intents, the existence of the reinsurance and retrocession contract.

On December 31, 2018, there were 122 reinsurers authorized to operate in the Brazilian market, including IRB-Brasil RE and Lloyd's of London, and 24 reinsurance brokerage firms had the required authorization to intermediate reinsurance and retrocession operations.

In 2018, the Bradesco Auto/RE paid R\$78.0 million in reinsurance premiums. Almost all property and casualty lines, except for the automobile line, have reinsurance protection and the majority of them feature proportional and non-proportional plans per risk and/or event.

Form 20-F

Senior Management is responsible for the reinsurance purchase policy and the approval of reinsurers with whom agreements are entered into. In addition to minimum legal and regulatory requirements, Senior Management considers certain other key parameters when choosing such partners, thus minimizing the credit risks inherent in the operation, such as: minimum rating A- (or equivalent) from rating agencies, except for local reinsurers and shareholders' equity consistent with the amounts ceded. Accordingly, our reinsurance purchase policy is designed to operate within its automatic contractual capabilities, therefore preventing the frequent purchases of optional agreements and higher exposures to the credit risk.

A significant portion of automatic and optional agreements (proportional and non-proportional) is transferred to IRB - Brasil RE. Certain admitted reinsurers participate with a lower individual percentage, but all of them hold capital and a rating higher than those minimums set forth by applicable Brazilian legislation.

Taxes on our main transactions***Taxes on financial transactions ("IOF") on loan transactions***

IOF levied on loan transactions has as its taxable event the delivery of the obligation amount or value, or the event of making it available to the interested party.

Rate applicable to loan and advances of any type, including credit opening is 0.0041% per day to legal entity borrowers and since January 2015, 0.0082% to individual borrowers.

This IOF rate will be charged on principal available to borrowers regarding the loans and advances, but for cases in which the amount of principal is not predetermined, in addition to the IOF levied on principal, there will be additional IOF at the same rate levied on interest and other charges, so that the calculation base will comprise the sum of daily outstanding debt balances calculated on the last day of each month.

Since January 2008, besides IOF on the transactions mentioned above, loans and advances have been subject to IOF additional rate of 0.38% irrespective of the repayment period or whether the borrower is an individual or a legal entity. For legal entities, IOF rate calculation base is not the sum of outstanding debt balances, IOF shall not exceed 1.8765% and for individuals, it will not exceed a 3.373% rate, which corresponds to the result of applying the daily rate to each amount of principal stipulated for the transaction, multiplied by 365 days, plus an additional rate of 0.38% even if the loan is to be repaid by installment.

IOF on loan transactions is levied on transactions between individuals and legal entities domiciled in Brazil, as well as on transactions whose creditor resides in Brazil, even if the debtor is located abroad. However, the IOF is not levied on loan transactions where the lender is located abroad and the borrower is in Brazil.

IOF on insurance transactions

IOF levied on insurance transactions has as its taxable event the receipt of premium. Applicable rates are as follows:

- 0.0% on: (i) reinsurance transactions; (ii) transactions related to mandatory insurance, linked to residential housing loans granted by an agent of the national housing system (SFH); (iii) insurance transactions for export credits and international merchandise transportation; (iv) aeronautical insurance and civil liability of airlines; (v) premiums intended to finance life insurance plans with survival coverage; and (vi) guarantee insurance;
- 0.38% of premiums paid, in the case of life insurance and similar policies, for personal or workplace accidents, including mandatory insurance for personal injuries caused by vehicles or ships or cargo to persons transported or others;
- 2.38% private health insurance business; and
- 7.38% for all other insurance transactions.

Income and social contribution taxes on income

Federal taxes on company income include two components, income tax known as "IRPJ" and tax on net profits, known as "Social Contribution" or "CSLL." Income tax charges are calculated based on a rate of 15.0% plus a surcharge of 10.0% on taxable income exceeding R\$240 thousand *per annum*. Considering the above, the IRPJ is assessed at a combined rate of 25.0% of adjusted net income. Social contribution tax payable by financial institutions is calculated based on a rate of 20.0% from September 2015 through December 2018, and a rate of 15.0% as from January 2019. For further information on our income tax expense, see Note 18 to our consolidated financial statements in "Item 18. Financial Statements."

100 Form 20-F – December 2018

Form 20-F

Due to taxation on universal bases, companies based in Brazil are taxed based on their global income rather than income produced exclusively in Brazil. As a result, profits, capital gains and other income obtained abroad by Brazilian entities are computed in the determination of their taxable profits on an annual basis.

With respect to affiliates, by the general rule of Law No. 12,973/14, affiliates abroad will have their dividends (and not the corporate profit) taxed at the time of effective distribution, nevertheless, with two exceptions: (i) cases in which they are domiciled in a tax haven; or (ii) that adopt a sub-taxation scheme, or in which they are treated as subsidiary. With regard to the rules applicable to the subsidiaries, the new discipline introduced by Law No. 12,973/14 foresees that the legal entities in Brazil with a stake in a subsidiary abroad must: (i) record in sub accounts the investment account, in proportion to the stake held, the share of the adjustment of the investment value equivalent to corporate profits (those calculated before local income tax), earned by the subsidiaries, directly and indirectly, in Brazil or abroad, concerning the calendar year in which they were calculated in the balance sheet; and (ii) compute these values in their calculation of actual income and from the calculation base of the Social Contribution.

In June 2010, legislation in Brazil introduced thin capitalization rules, and limited deduction for interest paid or credited by a company based in Brazil to: (i) an addressee domiciled abroad, whether or not holding equity interest in the company paying; and (ii) an addressee resident, domiciled or incorporated in a tax haven or locality with a low or privileged tax regime.

In cases where the creditor is a related party domiciled abroad and holds an equity interest in the company based in Brazil making a payment, debt may not exceed the equivalent to twice such shareholders' interest in the total equity of the company based in Brazil. In case of a related party with no shareholding interest, the limit will be equivalent to twice the total equity of the company resident in Brazil. If there is more than one creditor, total debt owed foreign companies may not exceed the equivalent of twice the total value of the interests of all the related parties in the equity of the company resident in Brazil. If the creditor is domiciled in a low tax jurisdiction the debt amount may not exceed 30.0% of the equity of the company based in Brazil. Any amounts exceeding the limits above such limit may not be deducted for purposes of withholding income and social contributions taxes.

Also beginning in June 2010, tax deductions for any payment to a beneficiary resident or domiciled in a country considered a tax haven became subject to the following requirements in addition to others already stipulated in the legislation: (i) identification of the actual beneficiary of the person domiciled abroad; (ii) proof of the ability of the person located abroad to complete the transaction; and (iii) documented proof of payment of the respective price and of receipt of the assets, rights, or utilization of service.

In November 2010, the Brazilian tax authorities issued a normative instruction altering the tax treatment applicable to variation in the monetary value of taxpayers' credit rights and obligations due to varying exchange rates. Under this new instrument, as of the 2011 calendar year, the election of tax regime for taxation of exchange-rate variations may only be exercised in January of each calendar year and may only be altered during the fiscal year if there is "material variation in the exchange rate," as published by a Finance Ministry Directive.

PIS and Cofins

Two federal taxes are imposed on the gross revenues of corporate entities: PIS and Cofins. Nonetheless, many revenues, such as: dividends, equity earnings from unconsolidated companies, revenues from the sale of non-current assets (investments, fixed assets and intangible assets) and, as a general rule, export revenues paid in foreign currency are not included in the calculation base for PIS and Cofins. Revenues earned by corporations domiciled in Brazil are subject to PIS and Cofins taxes corresponding to interest on equity.

Brazilian legislation authorizes certain adjustments to the calculation base of those taxes depending on the business segment and on other aspects.

Between 2002 (PIS) and 2003 (Cofins), the government implemented a non-cumulative collection system of PIS and Cofins taxes, allowing taxpayers to deduct from their calculation basis credits originating from certain transactions. In order to offset these credits, the rates of both PIS and Cofins were substantially increased. Subsequent to the changes made to PIS and Cofins, as of May 2004, both taxes are applicable on imports of goods and services when the taxpayer is the importing company domiciled in Brazil.

Since August 2004, the PIS and Cofins rates due on financial revenues were of 0.0%, including those arising from operations carried out for purposes of hedge, earned by legal entities subject to the system of non-accrual of these contributions. In April 2015, Decree No. 8,426/15 establishes that from July 2015, the rates shall be reestablished to 0.65% and 4.0%, respectively, including with respect to the revenue arising from hedge operations. However, even before the production of the effects of Decree No. 8,426/15, the normative was changed with the promulgation of Decree No. 8,451/15, which reassured the maintenance of the zero rate for contributions to PIS and Cofins, specifically in relation to financial revenues arising from: (i) monetary variation, depending on the exchange rate, of export operations of goods and services, as well as obligations incurred by the legal entity, including loans and financing; and (ii) of hedge operations carried out on the stock exchange, of commodities and of futures, or in the organized OTC market.

Form 20-F

Certain economic activities are expressly excluded from the procedures of the non-accrual collection of the PIS and Cofins. This is the case of financial institutions, which shall remain subject to PIS and Cofins by the "accrued" procedures, which does not permit the discount of any credits, as provided by Article 10, paragraph I, of Law No. 10,833/03. In spite of this impossibility of accrual of credits, the legislation in force enables the exclusion of certain expenditure in the calculation by such entities of the bases of calculation of the PIS and Cofins (as is the case, for example, of the expenses incurred by the banks in financial mediation operations and expenditure on severance payments corresponding to accidents occurring in the case of private insurance companies). In such cases, the income received by the financial institutions is subject to Contribution to the PIS and Cofins at the rates of 0.65% and 4.0%, respectively.

In July 2010, the Brazilian tax authorities introduced digital tax records for PIS and Cofins taxes. Under this rule, financial and similar institutions must keep digital records for PIS and Cofins taxes relating to taxable events occurring as of January 2012.

Foreign Account Tax Compliance Act (FATCA)***Compliance with the Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standard (CRS) (Tax Compliance Laws for Foreign Accounts)***

Our Organization observes the laws and regulations applicable to its business, whether at national or international level. In this sense, it complies with the FATCA and CRS provisions, which aim to enhance the transparency of fiscal information and to fight against tax evasion, practices of money laundering and the financing of terrorism, through the establishment of Compliance rules that require financial institutions to provide registration and financial data of people with fiscal residence in other participating countries.

FATCA is an American law that defines procedures and obligations applicable to foreign entities in order to identify financial resources of North American taxpayers (US Person) located abroad.

The Decree Law No. 8,506/15, signed and ratified the agreement between the Government of the Federative Republic of Brazil and the Government of the United States of America for the improvement of international tax compliance and implementation of the FATCA.

The CRS is the derivative instrument of the Convention on Mutual Assistance in Tax Matters, OECD and of the Multilateral Competent Authority Agreement, with goals aligned to the guidelines of the FATCA.

The Brazilian Federal Revenue ("RFB") Normative Instruction No. 1,680/16, features on the identification of financial accounts in accordance with the CRS and regulates the procedures for identification, diligence and reporting to be made by financial institutions and entities subject to the norm.

The financial institutions and entities subject should address this information to the RFB, through e-Financeira, following the obligations of Normative Instruction No. 1,571/16.

Form 20-F

Centralized Registration and Deposit of Financial Assets and Securities

In August 2017, the Brazilian Congress converted MP No. 775/17, issued by the President of Brazil in April 2017, into the Law No. 13,476/17. The new law consolidates the provisions on creation of liens over financial assets and securities. On the same day, the CMN issued Resolution No. 4,593/17 to regulate the provisions set by Law No. 13,476/17 and consolidate the regulation on centralized deposits and registry of financial assets and securities issued or owned by financial institutions and other institutions authorized to operate by the Central Bank. The CMN has established a deadline of 180 days for this rule to become effective. Resolution No. 4,593/17 presents a clearer definition of financial assets which includes, in addition to traditional financial instruments such as certificates and bank deposit receipts, credit securities subject to discount and credit card receivables. In addition, the rule establishes that the record of financial assets and securities is applicable to bilateral operations (meaning operations directly with clients), with some exemptions in certain situations; and the centralized deposit is applicable to credit securities with payment obligations and securities issued by financial institutions or other institutions authorized to operate by the Central Bank as a condition for engaging in certain negotiations and in assumption of custody. The Central Bank will issue regulations governing the implementation of such rules, including the creation of an electronic system for constitution of liens and encumbrances.

4.B. Business Overview

Form 20-F

Changes in interest and similar income and interest and similar expense – volume and rate analysis

In 2018, we adopted IFRS 9, which replaces the guidelines contained in IAS 39 – Financial Instruments, with a new treatment for the classification and measurement of assets, in which the entity should focus on the business model that reflects the asset management of the Organization. As a result, information for the year ended December 31, 2018 is not comparable with previous periods and for this reason, the following table does not include the effects of the variations of interest and similar income and interest and similar expense of 2018 compared to 2017.

The following table shows the effects of changes in our interest income and expense arising from changes in average volumes and average yield/rates for the periods presented. Data related to the average balance of our interest-earning assets, interest-bearing liabilities and other assets and liabilities have been calculated based upon the average of the month-end balances during the relevant period. Likewise, information related to the interest income and expenses generated from our assets and liabilities and the average return rate for each of the periods indicated have been calculated based on income and expenses for the period, divided by the average balances calculated as indicated above. We allocated the net change from the combined effects of volume and rate proportionately to the average volume and rate, in absolute terms, without considering positive and negative effects. For 2017 and 2016, we applied IAS 39 (financial assets held for trading, available for sale and held to maturity). For more information about the treatment of our assets, see notes 21, 24 and 28 of our consolidated financial statements included in “Item 18. Financial Statements.”

For the year ended December 31,	R\$ in thousands 2017/2016		
	Increase/(decrease) due to changes in Average volume	Average yield/rate	Net change

⁽¹⁾ Including payroll-deductible loans.

Bellow, a description of loans and advances to clients presented above:

- **working capital** – this line of credit is used to meet company cash requirements, finance operational cycle and honor commitments such as purchases of raw materials, goods, and other items;
- **personal credit** – this credit is for account holders (individuals) who need financial resources without the need to specify the purpose;
- **BNDES/Finame onlending** – BNDES financing programs are intended for financing the implementation, expansion and modernization of production activities and infrastructure. Finame operations consist of financing of machinery and equipment;

- **vehicle financing** -this is a direct consumer credit (CDC) line linked with financing of new and used vehicles up to twelve years for individuals and legal entities;
- **housing loans** – lines of credit for individuals or legal entities aimed to the acquisition of real estate, newly built or existing, residential or commercial, urban lots or the completion of construction works. Also destined for construction and incorporation companies that build residential or commercial property, or allocate resources to finance units to purchasers of the venture built by the company itself;
- **export financing** -these are advances on exchange contracts to customers exporting goods or services, individuals and companies, exporting through exchange contracts that are normally short- and medium-term loans, onlending of funds from BNDES-EXIM, export credit notes and bonds, pre-payment for export and operations structured by our units abroad;
- **credit card** – this credit line is based on previously approved limits for acquisition of goods or services;
- **rural loans** - this line of credit provides farmers and agricultural cooperatives with funds to cover current costs, investment and marketing of agricultural products according to the terms established by the Central Bank;
- **guaranteed account** -this is a revolving credit line to be used by clients to meet their emergency financial needs;
- **import financing** -this is a foreign currency financing/refinancing line intended for paying for the acquisition of goods and services made abroad;

4.B. Business Overview

Form 20-F

- **leasing** – leasing contracts consist of leases of equipment and automobiles to both corporate and individual borrowers;
- **receivable insurance premiums** – refers to the sum to be paid by the insured to the insurer to assume the risk to which the insured person is exposed; and
- **overdraft limit** – pre-approved credit limit available in the checking account, to be used in cases when there is no available balance.

For more information on our loans and advances to customers, see " Other loans and advances to individuals" and " Other corporate loans and advances".

Expected losses of loans and advances

On January 1, 2018, we adopted IFRS 9 that, among other changes, alters the form of calculating the estimate of loss of operations subject to the credit risk from a model of "incurred losses" to a model of "expected losses." Due to this change, we revised and changed our internal policies and methodologies of calculation of losses of operations subject to credit risk. The new methodologies require, due to their nature, the use of judgments and premises on our part, which includes the analysis of the external factors and the general economic conditions and projections, as to the internal factors, such as the history of payments and renegotiations, risk assessments of the counterparts and guarantees.

For previous periods, we used the criterion of impairment of loans and advances that, in line with IAS 39, represent our estimates of incurred losses in our portfolio of loans and advances. The assessment of this estimate is based on frequent revisions of individual loans and loans collectively assessed for impairment.

For further information on the methodology of calculating the expected losses, see Note 3.1 to our consolidated financial statements in "Item 18. Financial Statements."

Write-offs

The whole or part of a financial asset is written off against the respective credit loss expected when there is no reasonable expectation of recovery. Such loans are written off after all the necessary collection procedures have been completed and the amount of the loss has been determined. Subsequent recovery of amounts previously written-off is credited on the income statement.

For previous periods, loans and advances were charged-off against the impairment when the loan is considered uncollectible or is considered permanently impaired. Loans and advances were charged off usually when they were between 180 and 360 days overdue. However, longer-term loans and advances, that had original terms greater than 36 months, were charged off when they were between 360 and 540 days overdue.

Indexation

The majority of our portfolio of loans and advances is denominated in *reais*. However, a portion of our portfolio of loans and advances is indexed or denominated in foreign currencies, predominantly the U.S. dollar. Our loans and advances indexed to and denominated in foreign currency consist of onlending of Eurobonds and export and import financing, and represented 8.1% in 2018, 8.1% in 2017 and 10.3% in 2016 of our portfolio of loans and advances. In many cases, our customers hold derivative instruments to minimize exchange rate variation risk.

Outstanding foreign loans

The majority of our outstanding cross-border commercial loans that are denominated in foreign currencies are denominated in U.S. dollars and made to subsidiaries of Brazilian companies through our Cayman branch. These loans represented, on average, 2.7% of our total assets over the last three years (this percentage is calculated as the average of the year-end balances for the last three years of loans and advances to customers, divided by the average of the last three years of the total assets). We believe that there are no significant cross-border risks on these transactions, since a substantial part of the related credit risk is guaranteed by the parent company in Brazil. The remainder of our outstanding cross-border transactions mainly includes investments in securities, which represented, on average, 1.2% of our total assets over the last three years (this percentage is calculated as the average of the year-end balances for the last three years of outstanding cross-border transactions, divided by the average of the last three years of the total assets).

Loans and advances to customers by economic activity

(1) Consider expected losses on loans, commitments to be released and financial guarantees provided.

For more information about our loans and advances and expected credit losses, see note 27 of our consolidated financial statements in "Item 18. Financial Statements."

Form 20-F

Expected losses of loans and advances by category

The following tables set forth the expected losses of our loans and advances by category. The expected losses amount and the loans and advances category are stated as a percentage of total loans and advances. Due to the implementation of IFRS 9, which occurred in 2018, we will demonstrate the tables of the previous periods based on incurred losses:

IFRS 9 – Expected Losses:

December 31, 2018	R\$ in thousands, except %		
	Expected credit losses for loans and advances	Expected credit losses of loans and advances as a percentage of total loans and advances to customers	Loan and advances category as a percentage of total loans and advances ⁽¹⁾

Loans and advances to banks

The following tables summarize our outstanding loans and advances to banks by type, and changes in expected losses for the periods shown. It is important to note that as per January 1, 2018, we applied IFRS 9, which includes new models for the classification and measurement of financial instruments and for this reason, in 2018, includes repurchase agreements where the underlying assets have been repledged which, in prior years, were presented in the line item "Financial assets pledged as collateral":

December 31,	R\$ in thousands		
	2018	2017	2016

4.C. Organizational Structure

We are a publicly-held company controlled by Cidade de Deus Participações, a holding company owned by the Aguiar Family, Fundação Bradesco and another holding company, Nova Cidade de Deus Participações S.A., or "Nova Cidade de Deus." Nova Cidade de Deus is owned by Fundação Bradesco and by BBD Participações. For further information about our shareholding structure, see "Item 7.A. Major Shareholders." For further information about our significant subsidiaries as of December 31, 2018, see Exhibit 8.1 to this annual report.

4.D. Property, Plants and Equipment

As of December 31, 2018, we owned 892 properties and leased 3,787 properties throughout Brazil and eight leased properties abroad, all of which we used for the operation of our network of branches and our business. We own the buildings where our headquarters are located in Cidade de Deus, Osasco, São Paulo metropolitan region, State of São Paulo. Rental agreements have an average duration of five years.

ITEM 4.A. UNRESOLVED STAFF COMMENTS

None.

Form 20-F

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

5.A. Operating Results

This discussion should be read in conjunction with our audited consolidated financial statements, the notes thereto and other financial information included elsewhere in this annual report.

Overview

Our results of operations are affected by, among others, the following factors:

Brazilian Economic Conditions

Our results of operations are directly affected by economic conditions in Brazil. Such economic conditions directly impact our customers' ability to pay their financial obligations on time, which affects our impairment of loans and advances and our balance of outstanding loans and advances. In addition, the impact of economic conditions on the exchange rate affects our net interest income, since part of our financial assets and liabilities are denominated in or indexed to foreign currencies, primarily U.S. dollars.

In 2016, GDP retracted by 3.3% compared to the previous year. The *real* appreciated to R\$3.2591 against the U.S. dollar on December 31, 2016, compared with R\$3.9048 per U.S. dollar on December 31, 2015. The COPOM decreased the basic interest rate from 14.25% on December 31, 2015 to 13.75% on December 31, 2016. The inflation, measured by the IPCA, was 6.3% for the year ended December 31, 2016.

In 2017, GDP increased by 1.1% compared to the previous year. The *real* depreciated to R\$3.3080 against the U.S. dollar on December 31, 2017, compared with R\$3.2591 per U.S. dollar on December 31, 2016. The COPOM decreased the basic interest rate from 13.75% on December 31, 2016 to 7.00% on December 31, 2017. The inflation, measured by the IPCA, was 3.0% for the year ended December 31, 2017.

In 2018, GDP increased by 1.1% compared to the previous year. The *real* depreciated to R\$3.8748 against the U.S. dollar on December 31, 2018, compared with R\$3.3080 per U.S. dollar on December 31, 2017. The COPOM decreased the basic interest rate from 7.00% on December 31, 2017 to 6.50% on December 31, 2018. The inflation, measured by the IPCA, was 3.8% for the year ended December 31, 2018.

The following table shows Brazilian inflation measured by IPCA, the appreciation/(depreciation) of the *real* against the U.S. dollar, the exchange rate at the end of each year and the average exchange rate for the

periods indicated:

	2018	In R\$, except % 2017	2016
Inflation (IPCA)	3.8%	3.0%	6.3%
Appreciation/(depreciation) of the real against the U.S. dollar	(17.1)%	(1.5)%	16.5%
Period-end exchange rate-US\$1.00	3.8748	3.3080	3.2591
Average exchange rate US\$1.00 ⁽¹⁾	3.6745	3.2074	3.4849

(1) Average exchange rate considering the closing exchange rates at the end of each month starting December of the previous year.

Sources: FGV and the Central Bank.

The following table shows GDP variation in *real* terms and average interbank interest rates for the periods indicated:

	2018	2017	2016
Change in <i>real</i> GDP ⁽¹⁾	1.1%	1.0%	(3.6)%
Average base interest rates ⁽²⁾	6.4%	10.0%	14.0%
Average interbank interest rates ⁽³⁾	6.4%	9.9%	14.0%

Form 20-F

Effects of the global financial markets on our financial condition and results of operations

The global economic environment was favorable at the beginning of 2018 and changed throughout the year. The main reason were the trade tensions between the United States and China. Restrictions on trade imposed by the United States mainly to China, and led to a response by China, which began to generate negative impacts on the flow of goods and services worldwide. Secondary impacts of these tensions, such as the reduction in confidence by economic agents in several other regions, have led to the estimates of economic expansion in 2019 to levels lower than initially foreseen.

For 2019, we expect a moderate deceleration of the global economy and the uncertainties associated with the projections have been extended, which was captured in the prices of various international financial assets at the end of 2018. Factors such as the dissipation of tax incentives in the USA, the exit of the United Kingdom from the European Union (Brexit) and geopolitical issues are added to the perspective of continuity of the trade tensions, in an environment in which the main central banks should continue normalizing monetary policy, even if at the global pace. The recent sharp fall in oil prices reflects many of these uncertainties about the evolution of global demand. We estimate that the overall GDP grew by 3.7% in 2018 and is expected to grow by 3.5% in 2019.

The Chinese economy has shown clear signs of trade restrictions. However, the local authorities have room for maneuver to adopt countercyclical policies that minimize the risks. Even so, there is a tendency from moderate deceleration to an expansion of 6.0%.

In the USA, the Federal Reserve Bank continues the process of normalization of the monetary policy, at a gradual and well-signaled pace. Despite the down-side correction that marked the closing of 2018 in key markets, the North American central bank has signaled a high interest in a magnitude smaller than expected initially, but has not shown to be sensitive to the movements of asset prices, even in an environment of deceleration already evident in some indicators of local activity and reduction of the momentum in the generation of jobs.

In Europe, several business confidence indicators and of economic agents have retreated. The major source of uncertainty is related to the Brexit, which is scheduled to take place by March 29, 2019. There are reasonable doubts regarding the future of growth of the British economy. In addition, there are also political instability factors associated with economic issues, which should be present throughout the year.

Effects of interest rates and devaluation/appreciation on net interest income

During periods of high interest rates, our interest income increases due to increasing interest rates on our interest-earning assets. At the same time, our interest expense increases as interest rates on our interest-bearing liabilities also increase. Changes in the volumes of our interest-earning assets and interest-bearing liabilities also affect our interest income and interest expense. For example, an increase in our interest income attributable to an increase in interest rates may be offset by a decrease in the volume of our outstanding loans.

In addition, when the *real* depreciates, we incur: (i) losses on our liabilities denominated in, or indexed to, foreign currencies, such as our U.S. dollar-denominated long-term debt and foreign currency loans, as the cost in *reais* of the related interest expense increases; and (ii) gains in our assets denominated in, or indexed to, foreign currencies, such as our dollar-indexed securities and loans and advances, as the income from such assets as measured in *reais* increases. Conversely, when the *real* appreciates, as was the case, for example, in 2010 and 2016, we incurred: (i) losses on our assets denominated in, or indexed to, foreign currencies; and (ii) gains in our liabilities denominated in, or indexed to, foreign currencies.

In 2017, our net interest income decreased by 10.6% in relation to 2016, from R\$56,663 million in 2016 to R\$50,643 million in 2017. This decrease is mainly related to changes in average interest rates, impacting our results by R\$8,572 million as a result of the decrease in the average net interest margin, from 5.7% in 2016 to 4.9% in 2017. This decrease was partially offset by the increase in the volume of business, which contributed with R\$2,552 million to our net interest income.

In 2018, our net interest income increased by 31.9% in relation to 2017, from R\$50,643 million in 2017 to R\$66,808 million in 2018. This increase was mainly due to changes in average net interest rates, from 4.9% in 2017 to 6.2% in 2018, mainly due to the decrease of the average interest rate paid on our interest-bearing liabilities, increasing our result by R\$11,087 million. In addition, It is important to highlight that the increase in the average business volume, which contributed with R\$5,078 million to the income.

Net exposure (a-b)	(48,177,491)	(46,889,711)	(51,293,631)

We use swaps, futures contracts and other hedging instruments in order to minimize the potential impact of currency changes on our operations. For more information on our use of derivatives for hedging purposes, see Notes 2(d) (iii) and 23 to our consolidated financial statements in "Item 18. Financial Statements."

Form 20-F

Our net exposure in relation to our net asset amounted to 38.6% as of December 31, 2018, 39.8% as of December 31, 2017 and 48.6% as of December 31, 2016.

Taxes

Our income tax expenses comprise IRPJ, which is levied at a rate of 15.0% on our adjusted net income, plus an additional 10.0% and the Social Contribution Tax, which is levied at a rate of 15.0% on our adjusted net income, both are federal taxes.

In January 2008, the government increased the social contribution tax rate for the financial sector from 9.0% to 15.0%. From May 2008 to August 2015, financial institutions incurred the social contribution tax on adjusted net income at a 15.0% rate. The legality of this increase is being challenged in actions brought before the STF. If the STF decides that this increase is not legal, we will be entitled to recover any amount we have paid under the 15.0% tax rate regime in excess of what we would have incurred for the social contribution tax under the 9.0% regime. For the period between September 2015 and December 2018, the rate applicable for financial institutions and for the insurance industry was changed to 20.0%, pursuant to Law No. 13,169/15. The rate will return to 15.0% beginning in January 2019. For the other companies, the social contribution is calculated considering a rate of 9.0%.

Corporations based in Brazil may pay shareholders interest on equity as an alternative form of making a portion of dividend distributions, which are deductible from taxable income. We intend to maximize the amount of dividends we pay in the form of interest on equity. For further information on our tax expenses, see "Item 4.B. Business Overview – Regulation and Supervision – Taxes related to our activities – Income Tax and social contribution on profits;" "Item 10.B. Memorandum and Articles of Association – Organization – Allocation of net income and distribution of dividends;" and "Item 10.E. Taxation – Brazilian tax considerations – Interest on equity."

Impact of material acquisitions and strategic alliances on our future financial performance

We believe that the acquisitions and strategic alliances conducted in the last years will contribute to increase our future results. The amount of these increases is uncertain, and we therefore cannot estimate their impact on our future financial performance. For more information, see "Item 4.A. History and Development of the Company – Recent acquisitions" and "Item 4.A. History and Development of the Company – Other strategic Alliances."

Critical accounting policies

Our significant accounting policies are described in Note 2 to our audited consolidated financial statements in "Item 18. Financial Statements." The following section describes the areas that require the most judgment or involve a higher degree of complexity in the application of the accounting policies that currently affect our financial condition and results of operations. The accounting estimates we make in these contexts involve making assumptions about highly uncertain matters. In each case, other estimates or changes in the estimates between periods could cause a material impact on our financial condition and results of operations, as shown in our financial statements.

Assets and Liabilities

Financial assets

In 2018, we began to apply IFRS 9, which changes the approach to classification and measurement of financial assets, where the entity is based on the business model for the management of financial assets, as well as the characteristics of contractual cash flow of the financial asset. This new approach replaces the categories of financial assets foreseen in IAS 39: (i) measured at fair value through profit or loss; (ii) investments held to maturity; (iii) loans and receivables; and (iv) securities available for sale.

IFRS 9 classifies financial assets into three categories: (i) measured at amortized cost; (ii) measured at fair value through other comprehensive income (FVOCI – Shareholders' Equity); and (iii) measured at fair value through profit or loss ("FVTPL").

Business model: it relates to the way in which the entity manages its financial assets to generate cash flows. The objective of the Management for a particular business model, is: (i) to maintain the assets to receive contractual cash flows; (ii) to maintain the assets to receive the contractual cash flows and sales; or (iii) any other model. When the financial assets conform to the business models (i) and (ii), the SPPI test (Solely Payment of Principal and Interest) should be applied.

SPPI Test: the purpose of this test is to assess the contractual terms of financial instruments to determine if they give rise to cash flows at specific dates that conform only to the payment of the principal and interest on the principal amount.

128 Form 20-F – December 2018

Form 20-F

In this sense, the principal refers to the fair value of the financial asset in the initial recognition and interest refers to the consideration for time value of money, the credit risk associated with the principal amount outstanding during the period of specific time and to other risks and basic costs of loans. The financial instruments that were not adapted to the concept above are measured at FVTPL, including derivatives.

- **Measured at fair value through profit or loss – FVTPL**

All financial assets that do not meet the criteria of measurement at amortized cost or at FVOCI are classified as measured at FVTPL, in addition to those assets that in the initial recognition are irrevocably designated at FVTPL, if this eliminates or significantly reduces asset-liability mismatches.

The financial assets measured at FVTPL are recorded and evaluated initially at fair value, in which the subsequent changes in fair value are recognized immediately in the income statement.

These include assets that we hold in order to negotiate them in the short-term or keep them as part of a portfolio managed jointly to obtain profit in the short-term or to assume positions, or possibly, those assets that do not meet the SPPI test. Derivative instruments are also classified at FVTPL.

Financial assets are initially recognized and valued at fair value on the balance sheet and the transaction costs are recorded directly in the income statement for the period.

Gains and losses realized and unrealized arising from changes in the fair value of non-derivative assets are recognized directly in the statement of income. The interest income from financial assets measured at FVTPL are recognized in the line item "Interest and Similar Income."

- **Measured at fair value through other comprehensive income – FVOCI**

These are financial assets that meet the criterion of the SPPI test, whose objective is both to maintain the assets to receive the contractual cash flows as well as potentially make them available for sale.

They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or their issuance and are, subsequently, measured at fair value with gains and losses recognized in "Other comprehensive income," with the exception of expected credit losses and foreign exchange gains and losses, until the financial asset ceases to be recognized. The expected credit losses are recorded in the statement of income in contrast to "Other comprehensive income," having no impact on the gross carrying amount of the asset.

The interest income is recognized in the result using the effective interest rate method. The dividend income is recognized in the consolidated statement of income when we have the right to receive a dividend. The gains or losses, arising out of exchange variations on investments of debt securities classified as FVOCI, are recognized in the consolidated statement of income. For more details on the treatment of expected credit losses, see Note 2(d) (viii) to our Financial Statement "Item 18. Financial Statements."

- **Measured at amortized cost**

These are financial assets that meet the criterion of the SPPI test, whose goal is to maintain the assets to receive the contractual cash flows.

The financial assets measured at amortized cost are initially recognized at fair value including direct and incremental costs, and accounted for, subsequently, at amortized cost, using the effective interest rate method.

The interest is recognized in the consolidated statement of income as "Interest Income and Similar." In the case of credit loss expected, a deduction of the accounting value of the financial asset is recognized and it is recognized in the consolidated statement of income.

Financial Liabilities

We classify our financial liabilities as subsequently measured at amortized cost, except for the following financial instruments.

- **Measured at fair value through profit or loss**

These are recorded and valued at fair value, in which their changes in fair value are recognized immediately in the income statement. These liabilities can be subdivided into two distinct classifications: financial liabilities designated at fair value through profit or loss and financial liabilities for trading.

- **Financial liabilities designated at FVTPL on initial recognition**

These are assets that on initial recognition are irrevocably designated at FVTPL, if this eliminates or significantly reduces asset-liability mismatches.

129 Bradesco

Form 20-F

We do not have any financial liabilities designated at fair value through profit or loss.

- **Liabilities for trading**

Financial liabilities for trading are recognized as derivative instruments.

- **Financial guarantees contracts and loan commitments**

Financial guarantees are contracts requiring us to make specific payments to the holder of the financial guarantee for a loss it incurred when a specific debtor fails to make the payment under the terms of the debt instrument.

Financial guarantees are initially recognized in the financial statements at fair value on the date on which the guarantee was given. After initial recognition, our responsibilities on such guarantees are measured by the higher value between (i) the value of the provision for expected losses and (ii) the value initially recognized, minus, if appropriate, the accumulated value of the revenue from the service fee. Revenues from the financial service fee are recognized in the linear mode during the term of guarantee. Any increase in liabilities relating to guarantees is recognized in the statement of income, under the heading "Other operating income/(expenses)."

Loan commitments are recognized as the amount of expected credit loss calculated as described in Note 3.1. to our consolidated financial statement in "Item 18. Financial Statements."

- **Financial liabilities at amortized cost**

They are initially recorded at fair value and subsequently measured at amortized cost, using the effective interest rate method. They include, among others, resources from financial institutions and clients, resources from the issuance of debt securities and subordinated debt securities.

Expected credit losses

At the end of each reporting period, we review the expected losses in prospective bases for financial instruments measured at amortized cost, at FVOCI (with the exception of investments in equity instruments), financial guarantees and loan commitments.

Financial instruments are at their expected credit loss, as follows:

Financial assets: at the present value of the difference between contractual cash flows and the cash flows that we hope to recover minus the effective interest rate of the operation;

Financial guarantees: at the present value of the difference between the expected payments to reimburse the holder of the guarantee and the values that we expect to recover; and

Loan commitments: at the present value of the difference between the contractual cash flows that would be due if the commitment was used and the cash flows that we expect to recover.

Any expected credit losses will be measured in one of the following scenarios:

Expected credit losses for twelve months, i.e., credit losses as a result of possible events of delinquency within twelve months after the date of the report; and

Expected credit losses for the whole of lifecycle, i.e., credit losses that result from all possible events of delinquency throughout the expected lifecycle of a financial instrument.

The measurement of expected losses for the whole lifecycle is applied when the credit risk of a financial asset, on the date of the report, has increased significantly since its initial recognition and the measurement of credit loss of twelve months is applied when the credit risk has not increased significantly since its initial recognition. We may determine that the credit risk of a financial asset has not increased significantly when the asset has a low credit risk on the date of the report.

With respect to Government securities, we have internally developed a study to assess the credit risk of these securities, which does not expect any loss for the next twelve months, that is, no provision is required for credit losses.

We evaluate if the credit risk increased significantly for both individual assets and assets at collective level. For the purposes of a collective evaluation, financial assets are grouped based on similar characteristics of credit risk (that is, on the basis of our rating process that considers the type of product, market segment, geographical location, collateral type, past-due status and other related factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

130 Form 20-F – December 2018

Table of Contents

Form 20-F

The amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original interest rate. The carrying amount of the asset is reduced through provisions and the amount of the loss is recognized in the income statement.

The calculation of the present value of estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from the foreclosure less costs for obtaining and selling the collateral.

The methodology and assumptions used for estimating future cash flows are reviewed regularly to mitigate any differences between loss estimates and actual loss experience.

After the recognition of credit loss expected, interest income is recognized using the effective interest rate method, which was used to discount the future cash flows, on the accounting value gross of provision, except for assets with problem of credit recovery, where, the rate stated is applied to the net book value of the provision.

The whole or part of a financial asset is written off against the respective expected credit loss when there is no reasonable expectation of recovery. Such loans are written off after all the necessary collection procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the income statement.

The measurement of the provision for expected losses on loans for financial assets measured at amortized cost and FVOCI requires the use of complex models and significant assumptions about future economic conditions and loan behaviour.

The explanation of assumptions and estimation techniques used in the measurement of expected loan loss is further detailed in Note 3.1 of our consolidated financial statements in "Item 18. Financial Statements."

Several significant judgments are also required to apply the accounting requirements for the measurement of the credit loss expected, such as:

- determining the criteria for the significant increase of credit risk;
- choosing the models and assumptions suitable for the measurement of credit loss expected;
- establishing the number and weighting factors on the prospective scenarios, for each type of product and market, related to the credit loss expected; and
- establishing a group of similar financial assets for purposes of measuring the credit loss expected.

The process of determining the level of expected credit losses requires the use of estimates and judgment. Actual losses in the period as shown in subsequent periods may differ from initial calculations based on current estimates and assumptions.

Fair value of financial instruments

The financial instruments recorded at fair value in our consolidated financial statements consist primarily of financial assets measured at FVTPL, including derivatives and financial assets measured at FVOCI. The fair value of a financial instrument is the amount for which it could be traded in an arm's length transaction between willing parties, without any forced sale and settlement.

These financial instruments are categorized in a ranking based on the lowest level of information significant for measuring fair value. For instruments classified as Level 3, we have to use a significant amount of our own judgment to measure fair market value. We base our judgment on our knowledge and observations of the relevant markets for individual assets and liabilities and these judgments may vary based on market conditions. In applying our judgment, we analyze a series of third-party prices and transaction volumes to understand and assess the extent of available market benchmarks and the judgment or modelling required in processes with third parties. Based on these factors, we determine whether fair values are observable in active markets or if markets are inactive.

The fair values of financial assets measured at FVTPL and at FVOCI are primarily based on actively traded markets where prices are sustained on direct market quotes, observed transactions or market prices for similar assets. Liquidity is a significant factor in the determination of the fair value of financial assets measured at FVTPL and at FVOCI. Situations of illiquidity generally are triggered by the market's perception of credit uncertainty regarding a single company or a specific market sector. In these instances, the financial assets are classified within Level 3 of the valuation hierarchy once the fair value is determined, based on unobservable inputs that are supported by limited available market information and that are significant to the fair value of the assets, as well as other factors which require Management to exercise significant judgment or estimation. As of December 31, 2018, R\$4.0 million, or 1.0% of financial assets measured at FVTPL, at FVOCI and net derivatives were classified as Level 3.

131 Bradesco

Form 20-F

Exchange-traded derivatives valued using quoted prices are classified within Level 1 of the valuation hierarchy. However, few classes of derivatives contracts are listed on the exchange. Therefore, the majority of our derivative positions are classified as Level 2 of the valuation hierarchy and are determined using quantitative models that require the use of multiple inputs including interest rates, prices and indices to generate continuous yield or pricing curves and volatility factors, including the period to maturity. These inputs are used to value the position. Most market inputs are observable and can be obtained mainly from B3 and the secondary market.

The imprecise nature of estimating non-observable market data may impact amounts of revenue or loss posted for a particular position. In addition, although we believe our valuation methods are appropriate and consistent with those of other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments may result in a different estimate of fair value on reporting date. For a detailed discussion of the determination of fair value of financial instruments, see Note 3.4 to our consolidated financial statements in "Item 18. Financial Statements."

Impairment of goodwill

At least every year, we have to determine if the current carrying value of goodwill has been impaired. The first step in the process is identifying independent cash generating units and their allocations of goodwill. A unit's carrying amount, including allocated goodwill, is then compared to value in use to see whether there is impairment. If a cash-generating unit's value in use is less than carrying amount, goodwill is impaired. Detailed calculations to reflect changes in the market in which a business operates may be required (e.g. competition and regulatory change). Calculations are based on discounted cash flows before tax at an interest rate adjusted by appropriate risk for the operational unit; in both cases determining these values requires the use of judgment. Although predictions are compared to current performance and external economic data, expected cash flows reflect our outlook for future performance.

Income tax

The determination of our income tax liability (including social contribution) is a complex task that is related to our analysis of deferred tax assets and liabilities and income tax payable. In general, our assessment requires us to estimate future amounts of current and deferred income tax. Our assessment of the possibility of realizing deferred tax is subjective and involves assessments and assumptions that are inherently uncertain. Realization of deferred tax assets is subject to changes in future interest rates and developments of our strategies. Support for our assessments and assumptions may change over time because of unanticipated events or circumstances that affect the determination of our tax liability.

Significant judgment is required to determine whether an income tax position will be sustained upon examination, even after the outcome of any administrative or judicial proceeding based on the technical merits. Judgment is also required to determine the value of a benefit eligible for recognition in our consolidated financial statements.

Additionally, we monitor interpretation of tax legislation and decisions made by tax authorities and courts, in order to adjust any previous judgment as to accrued income tax. This monitoring may also arise from our

income tax planning and or settlement of income tax disputes and may be significant for our operating income in any given period. For further information on our income tax, see Note 18 to our consolidated financial statements in "Item 18. Financial Statements."

For additional information regarding our income tax, see "Item 4.B. Business Overview – Regulation and Supervision – Taxes on our main transactions – Income and social contribution taxes on profits."

Insurance technical provisions and pension plans

Our insurance technical provisions and pension plans are liabilities for amounts we estimate will be due to our policyholders and plan participants at a certain point in the future. These values represent the future claims/benefits stated in contracts, such as retirement payments, pensions, individual and group life insurance, health insurance and damage insurance, among other items.

Benefits and claims stated in contracts also include provisions for claims incurred but not reported relating to health, property and life insurance. We recognize claims in the period in which the service was provided to our policyholders. However, claim costs incurred in a particular period are not known with certainty until we receive the reports, process them, and pay out the claims. We determine the amount of such provision using actuarial methods based on historical warnings/payments of claims to determine our estimates of claim liabilities. Methods used to determine these estimates and to make technical provisions are regularly reviewed and updated. For additional information, see Note 2(l) to our consolidated financial statements in "Item 18. Financial Statements."

132 Form 20-F – December 2018

Form 20-F

In long-term health insurance contracts, the establishment of Other Technical Provisions can also be used to cover any resulting differences between the expected value of the future claims and future related expenses and the expected value of future premiums.

In long-term pension plans and funds contracts, the participants go through two distinct phases as part of the contract: first accumulating assets, then enjoying benefits. During the accumulation phase, technical provisions increase as contributions are received and interest is credited (based on contractual arrangements) and decrease by redemptions paid. If it is necessary to complement the technical provisions, the Complementary Reserve for Coverage (PCC) will be established, which value is calculated in accordance with the Liability Adequacy Test (TAP). The TAP is prepared with statistical and actuarial methods based on realistic assumptions, taking into account the biometric table BR-EMS of both genders, adjusted by the criteria of longevity compatible with the latest versions disclosed (improvement) and interest rate curves (ETTJ) free from risk, as authorized by SUSEP. Improvement is a technique that updates the biometric table automatically, considering the expected increase in future life.

The technical provisions are computed using assumptions of mortality, disability, cancellation, interest rates, inflation and costs, which are based on our experience and are periodically reassessed in relation to the sector patterns.

For sensitivity analysis purposes, regarding life and damage, except for individual life insurance, the impact assessed by a 1 percentage point increase in claims in the last twelve months, with the base date of calculation on December 31, 2018, would represent a decrease of R\$168.2 million, in the income and in the shareholders' equity, after taxes and contributions.

In relation to life insurance with living benefits, individual life insurance and pension plans, we assessed the impact of decreasing interest rates, increasing beneficiary longevity and increase in the income-conversion option on income and shareholders' equity after taxes and contributions. In this assessment, a decrease of 5.0% in interest rates would lead to a R\$135.7 million decrease in income and shareholders' equity after taxes and contributions. An increase of 0.2 percentage points in the longevity of the beneficiaries would result in a negative impact of R\$48.2 million on income and shareholders' equity, after taxes and contributions, while an increase of 5 percentage points in the conversion of income would represent a negative impact of R\$32.2 million on income and shareholders' equity, after taxes and contributions.

Use of estimates and judgments

Upon issuance of the financial statements, we also make estimates and assumptions concerning useful lives of certain non-financial assets and possible impairment of a specific asset or group of assets. Estimates are by nature based on judgment and available information. Therefore, actual results may differ from these estimates. For further information on the use of estimates and judgments, see Note 4 to our consolidated financial statements in "Item 18. Financial Statements."

Commitments and contingencies

We have contractual obligations to make certain payments to third parties, in accordance with the amounts presented in the following table:

133 Bradesco

Form 20-F

Contractual Obligations	R\$ in thousands				Total
	Payments due as of December 31, 2018				
	Less than 1 year ⁽¹⁾	1 to 3 years	3 to 5 years	More than 5 years

⁽¹⁾ Based on our historical experience, we expect that most of our obligations that are contractually due within one year will be rolled over.

Form 20-F

Off-balance sheet arrangements

In addition to our loans and advances, we have credit-related transactions with our customers for attending to their financing needs. In accordance with IFRS, these transactions are not recorded on our balance sheet. The following table summarizes these transactions as of December 31, 2018:

Contractual Obligations	R\$ in thousands				Total
	Payments due as of December 31, 2018				
	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	
Financial guarantees	23,980,321	17,868,772	5,425,175	25,596,696	72,870,964
Letters of credit	361,593	-	-	-	361,593
Total	24,341,914	17,868,772	5,425,175	25,596,696	73,232,557

We guarantee our customers' performance in obligations with third parties. We have the right to seek reimbursement from our customers for any amounts paid under these guarantees. Additionally, we may hold cash or other collateral with high liquidity to guarantee these obligations. These agreements are subject to the same credit evaluation as other loans granted.

Letters of credit are conditional commitments issued by us to guarantee the performance of a customer's obligations with third parties. We issue commercial letters of credit to facilitate foreign trade transactions and to support public and private borrowing agreements, including commercial papers, bond financing and similar transactions. These instruments are short-term commitments to pay a third-party beneficiary under certain contractual conditions, for the shipment of products. Contracts are subject to the same credit evaluations as other loans granted.

We expect many of these guarantees to expire without the need to advance any cash. Therefore, in the ordinary course of business, we expect that these transactions will have virtually no impact on our liquidity.

Results by operational segment

We operate and manage our business through two segments: (i) the banking segment; and (ii) the insurance, pension plans and capitalization bonds segment.

The following data about different segments were prepared based on reports made for Management to assess performance and make decisions on allocating funds for investments and other purposes. Our Management uses various data, including financial data prepared under accounting practices adopted in Brazil and non-financial metrics compiled on different bases. Our consolidated financial statements and consolidated financial data included in this analysis are prepared in accordance with IFRS, when results by segments significantly differ to results derived from our consolidated financial statements, such differences will be explained in conjunction with the explanations of the results that precede them. See Note 5 to our consolidated financial statements in "Item 18. Financial Statements."

For a description of our operational segment's operations, see "Item 4.B. Business Overview."

Interest and similar expenses	(13,365,526)	(18,174,550)	(26.5)%
Net interest income	12,291,357	1,857,926	561.6%

136 Form 20-F – December 2018

Form 20-F

We present, by segment, how much of the increase in our net interest income was attributable to changes in the average volume of interest-earning assets and interest-bearing liabilities, how much was attributable to changes in average interest rates and how much was attributable to variation to the effects of the appreciation/(depreciation) of the *real* for 2018 and 2017, respectively, as follows:

	R\$ in thousands	
	Banking	Insurance, Pension Plans and Capitalization Bonds
	2018/2017	
	Increase/(decrease)	
Due to changes in average volume of interest earning assets and interest bearing liabilities	2,619,175	(70,014)
Due to changes in average interest rates	3,879,339	10,503,446
Due to Brazilian real appreciation/depreciation	87,031	(1)
Net change	6,585,545	10,433,431

Banking

Our net interest income increased by 14.0% going from R\$46,997 million in 2017 to R\$53,583 million in 2018. This growth was due to changes in the average interest rates, which contributed positively to the increase of R\$3,966 million in our income, mainly due to lower interest and similar expenses with obligations for repurchase agreements and resources from issuing securities and subordinated debt, offsetting the decrease of the average balance from interest-bearing transactions, in addition to the increase in the average volume of business, which contributed R\$2,619 million to the income as a result of a 2.1% increase in the average balance of interest-earning assets featuring the loans and advances to customers and operations with financial assets held to maturity.

Insurance, pension plans and capitalization bonds

The increase of R\$10,433 million in our net interest income in the period, from R\$1,858 million in 2017 to R\$12,291 million in 2018 is mainly due to changes in the average interest rate paid, which leads to lower expenses from technical provisions of insurance, pension and capitalization in the amount of R\$6,187 million and to higher average rates earned with interest-bearing assets in the amount of R\$4,316 million.

Interest and similar income

The following tables show, on a consolidated basis and by segment, the average balance of the principal components of our interest-earning assets and the average interest rates earned in 2018 and 2017:

Consolidated

Due to Brazilian real appreciation/depreciation	165,494	(1)
Net change	(9,869,199)	5,624,407

Banking

Interest and similar income decreased by 9.1%, from R\$108,302 million in 2017 to R\$98,433 million in 2018. This decrease was mainly due to changes in the average interest rates, from 13.5% in 2017 to 12.0% in 2018, impacting our interest and similar income in the amount of R\$12,079 million. The revenues most

impacted by such changes in interest rates were: (a) loans and advances to customers; (b) financial assets pledged as collateral; (c) financial assets available for sale; and (d) compulsory deposits to the Central Bank. The interest fee impact was partially offset by the increase in the average volume of interest-earning assets, increasing the income in the amount of R\$2,210 million, in view of the rise of 2.1% in the average balance of interest-earning assets, in particular: (a) loans and advances to customers; (b) financial assets, mainly held to maturity; and (c) compulsory deposits to the Central Bank.

Interest and similar income originating from loans and advances to customers decreased by 4.2%, from R\$64,084 million in 2017 to R\$61,418 million in 2018. This decrease is related to decrease of the average interest rate, impacting income by R\$4,343 million, due to changes in interest rates, with the SELIC rates varying from 7.0% by the end of 2017 to 6.5% by the end of 2018. This effect was partially offset by a 2.7% increase in the average volume of these assets, increasing our income by R\$1,677 million.

Interest and similar income originating from loans and advances to banks decreased by 33.3%, from R\$5,073 million in 2017 to R\$3,382 million in 2018. This decrease was due to a drop of 41.2% in the average balance of these assets, from R\$55,316 million in 2017 to R\$32,540 million in 2018, impacting our interest and similar income by R\$2,299 million.

Interest and similar income originating from financial assets held for trading decreased by 22.8%, from R\$2,456 million in 2017 to R\$1,895 million in 2018. This decrease was largely due to changes in the average interest rates earned, from 8.2% in 2017 to 5.6% in 2018, which impacted our income in the amount of R\$836 million. The decreases in average rates earned reflect the decrease in the average of interbank interest rates, which decrease from 9.9% in 2017 to 6.4% in 2018.

Interest and similar income originating from financial assets pledged as collateral decreased by 20.3% or R\$4,307 million, from R\$21,269 million in 2017 to R\$16,962 million in 2018. This variation was due to a decrease in the average interest rate, from 11.0% in 2017 to 8.8% in 2018, due to the decrease in the average interbank interest rates, from 9.9% in 2017 to 6.4% in 2018, impacting our revenues by R\$4,338 million.

138 Form 20-F – December 2018

Form 20-F

Interest and similar income originating from compulsory deposits with the Central Bank decreased by 19.8%, from R\$4,881 million in 2017 to R\$3,916 million in 2018. This decrease was due to changes in the average interest rates, from 8.3% in 2017 to 5.7% in 2018, impacting the interest and similar income by R\$1,659 million. This effect was partially offset by the increase in the average volume of these assets, from R\$58,876 million in 2017 to R\$68,226 million in 2018, increasing our interest and similar income in the amount of R\$694 million.

Interest and similar income originating from financial assets available for sale decreased by 13.6%, from R\$9,223 million in 2017 to R\$7,966 million in 2018. This decrease was due changes in the average interest rate, from 10.6% in 2017 to 8.5% in 2018, impacting our revenues by R\$1,895 million. This effect was partially offset by a 7.3% increase in the average volume of these assets, increasing our interest and similar income in the amount of R\$638 million.

Interest and similar income originating from investments held to maturity went from R\$1,248 million in 2017 to R\$2,830 million in 2018. This variation was due to the increase in the average volume of these assets, from R\$12,396 million in 2017 to R\$22,043 million in 2018, increasing our interest and similar income in the amount of R\$1,169 million.

Insurance, pension plans and capitalization bonds

Our interest and similar income increased 28.1%, from R\$20,032 million in 2017 to R\$25,656 million in 2018, due to the increase in: (a) the average interest rates, from 7.7% in 2017 to 9.2% in 2018, increasing our income by R\$4,316 million; and (ii) the average volume of the operations, which went from R\$258,939 million in 2017 to R\$277,518 million in 2018, increasing our interest and similar income in the amount of R\$1,307 million. It is important to highlight that the movements in the average interest rate are influenced by IPCA and IGP-M performance, which evolved in comparison to 2017.

Interest and similar expenses

The tables below show, on a consolidated basis and by segment, the average balance of the main components of our interest-bearing liabilities and the average interest rates paid on them in 2018 and 2017:

Consolidated	R\$ in thousands, except %		
	For the year ended December 31,

Form 20-F

For further information on average interest rates by type of liability, see "Item 4.B. Business Overview – Selected Statistical Information – Average balance sheet and interest rate data."

The following table shows, by segment, how much of the increase in our interest and similar expenses was attributable to changes in the average volume of interest-bearing liabilities, how much was attributable to changes in average interest rates and how much was attributable to variation in the effects of the appreciation/(depreciation) of the real against the U.S. dollar rate, in each case comparing 2018 to 2017:

	R\$ in thousands	
	Banking	Insurance, Pension Plans and Capitalization Bonds
	2018/2017	
	Increase/(decrease)	
Due to changes in average volume of interest bearing liabilities	(409,391)	1,377,596
Due to changes in average interest rates	(16,227,528)	(6,186,620)
Due to Brazilian real appreciation/depreciation	182,175	-
Net change	(16,454,744)	(4,809,024)

Banking

Our interest and similar expenses decreased by 26.8% from R\$61,305 million in 2017 to R\$44,850 million in 2018. This decrease was largely due to a decrease of the average interest rate paid, from 8.4% in 2017 to 6.1% in 2018, positively impacting the expenses by R\$16,228 million. The variation of the average balance of the obligations on which interests apply decreased our expenses by R\$409 million, highlighting the lower expenses with: (i) securities sold under agreements to repurchase in the amount of R\$2,606 million; (ii) borrowing and on-lending, in the amount of R\$401 million; and (iii) subordinated debt, in the amount of R\$397 million. These decreases were partially offset by the increase in the average balance of: (i) time deposits, impacting the result by R\$1,877 million; (ii) savings deposits, impacting the income by R\$406 million; and (iii) funds from issuance of securities, which increased our expenses by R\$733 million.

Insurance, pension plans and capitalization bonds

Our interest and similar expenses decreased by 26.5%, from R\$18,175 million in 2017 to R\$13,366 million in 2018. This decrease reflects the decrease of the average interest rate for insurance and pension plan technical provisions, from 8.0% in 2017 to 5.5% in 2018, decreasing our expenses by R\$6,187 million. This effect was partially offset by the increase of 8.1% in the average volume of technical provisions, impacting our expenses by R\$1,378 million.

Form 20-F

Expenses with impairment and expected loss on loans and advances to customers

On January 1, 2018, we adopted IFRS 9 that, among other changes, changes the model of calculating the estimate of loss of operations subject to the credit risk from a model of “incurred losses” (IAS 39) to a model of “expected losses” (IFRS 9). In view of conceptual differences between net impairment losses on loans and advances to customers under BR GAAP and IFRS, we present below a reconciliation of those accounting practice differences, as well as the related analysis of the variations of the expenses under IFRS.

	R\$ in thousands, except %		
	2018	2017	% Change
Banking - BR GAAP	(11,078,383)	(17,895,929)	(38.1)%
Accounting Practices Differences (IFRS x BR GAAP)	(3,398,306)	1,035,094	-
Net Impairment losses on loans and advances	-	(16,860,835)	-
Expected loss on loans and advances ⁽¹⁾	(14,476,689)	-	-

⁽¹⁾ It does not consider expected losses from commitments to released and financial guarantees provided in the amount of R\$615 million.

Difference between accounting practices for impairment of loans and advances

In 2018, the IFRS 9 adoption brings a prospective model of expected losses in replacement to IAS 39 model of incurred losses. Under BR GAAP, the measurement of credit risk is based on expected losses according to CMN Resolution No. 2,682/99, which includes a minimum provision for each loan category. For further information, see “Item 4.B. Business Overview – Regulation and Supervision – Banking Regulations – Treatment of loans and advances” and Note 3.1 to our consolidated financial statements in “Item 18. Financial Statements.”

141 Bradesco

Form 20-F

The following table shows changes in our losses of loans and advances, expenses with losses of loans and advances, operations recovered and charge-offs for the years ended 2018 and 2017, as well as our ratio of expenses with losses related to the average balances of loans and advances to customers (shown as a percentage of the average balance of our loans and advances to customers), in all cases based on consolidated financial information prepared in accordance with IFRS (2018 – IFRS9 and 2017 – IAS39):

	R\$ in thousands, except %		
	2018	2017	% Change

Impacts of the application of IFRS 9	1,173,870	-	-
Adjusted balance in the beginning of the period	28,229,436	-	-
Net impairment losses on loans and advances	-	16,860,835	-
Expected credit loss for loans and advances	14,476,689	-	-
Expected credit loss on renegotiated loans	7,147,095	7,034,857	1.6%
Loan charge offs	(18,747,641)	(21,620,965)	(13.3)%
Impairment provision of loans and advances at the end of the year	-	27,055,566	-
Expected credit losses for loans and advances at the end of the year	31,105,579	-	-
Ratio of net impairment losses on loans and advances to average loans and advances to customers	-	4.4%	-
Ratio of expected credit losses for loans and advances to average loans and advances to customers	3.9%	-	-

The balance of the losses of loans and advances increased by 15.0%, from R\$27,056 million in 2017 to R\$31,106 million in 2018, accounting for 7.6% of loans and advances to customers. This increase was primarily due to the adoption of the IFRS 9 (expected losses) to replace the IAS 39 (incurred losses), which, in addition to the effect of the initial adoption, totaling R\$1,174 million, required a higher provision for the operations during 2018.

Despite the model for expected losses requiring a higher level of provisioning in relation to the previous model, the expenses with losses in loans reduced 14.1%, going from R\$16,861 million in 2017 to R\$14,477 million in 2018. This reduction is related to the improvement of the quality of our credit portfolio, whose level of delinquent loans and advances to customers for more than 60 days reduced by 16.3%, going from R\$20,783 million in 2017 to R\$17,403 million in 2018, representing 4.2% of the total of the credit portfolio (2017 – 5.6%). We also highlight that our net charge-off ratio, defined as the amount of net charge-offs compared to the average balance of loans and advances to customers, decreased from 3.8% in 2017 to 3.1% in 2018.

Our loans and advances to customer portfolio increased by 10.1% from R\$373,814 million in 2017 to R\$411,493 million in 2018. We highlight the increases of: (i) 15.8% in the individual consigned credit operations; (ii) 13.6% in real estate financing for individuals; (iii) 25.6% in vehicle financing; (iv) 25.3% in

export/import operations; and (v) 6.1% in working capital for legal entities.

We believe that our expected losses of loans and advances is sufficient to cover futures losses regarding our portfolio, which can be evidenced, among other indicators, by our coverage ratio, measured by the total expected loss as a percentage of non-performing loans and advances to customers, which, by the end of 2018 was 178.7%.

142 Form 20-F – December 2018

Table of Contents

Form 20-F

Non-interest income

The following tables show, on a consolidated basis and by segment, the principal components of our non-interest income for 2018 and 2017:

Consolidated	R\$ in thousands, except %		
	For the year ended December 31, 2018	2017	% Change
Net fee and commission income	23,831,590	22,748,828	4.8%
Net gains/(losses) on financial instruments at fair value through profit or loss	(11,676,573)	-	-
Net gains/(losses) on financial assets and liabilities held for trading	-	9,623,108	-
Net gains/(losses) on financial instruments at fair value through other comprehensive income	1,073,563	-	-
Net gains/(losses) on financial assets available for sale	-	570,358	-
Premiums retained from insurance and pension plans	66,270,095	70,046,635	(5.4)%
Equity in the earnings of associates and joint ventures	1,680,375	1,718,411	(2.2)%
Other non-interest income	13,935,842	18,498,598	(24.7)%
Total	95,114,892	123,205,938	(22.8)%

Segment	R\$ in thousands, except %					
	Banking			Insurance, Pension Plan Capitalization Bond		
	2018	2017	% Change	2018	2017	C
Net fee and commission income	25,496,171	24,143,561	5.6%	600,510	787,014	
Net gains/(losses) on financial assets and liabilities held for trading	(6,217,370)	6,011,351		-(5,459,203)	3,641,626	
Net gains/(losses) on financial assets available for sale	625,159	(685,560)	-	738,063	713,425

Equity in the earnings of associates and joint ventures	1,410,004	1,497,268	(5.8)%	206,272	217,035	
Other non-interest income	7,591,307	9,845,829	(22.9)%	8,019,666	8,484,581	
Total	28,905,271	40,812,449	(29.2)%	70,375,403	83,890,316	

Banking

Our non-interest income decreased by 29.2%, from R\$40,812 million in 2017 to R\$28,905 million in 2018.

This decrease was mainly due to net gain/losses of financial assets and liabilities classified as held for trading, from gains of R\$6,011 million in 2017 to a loss of R\$6,217 million in 2018, reflecting on the result

obtained in the derivative financial instruments related to results deriving from: future contracts (which include the gain (loss) and the respective adjustment to the market capitalization of the hedge for protection of the assets and liabilities, designated and/or indexed in foreign currency, primarily those from foreign investments).

This decrease was partially offset by the increase: (i) of 5.6% in the net fee and commission income, from R\$24,144 million in 2017 to R\$25,496 million in 2018, due to the increase of: (a) 7.7% of revenues of current accounts due to the improvement in the management of the portfolio of services rendered, expansion of the variety of products, which are offered to clients according to their segmentation; (b) 10.3% in revenues from the management of consortiums, due to the actions taken to optimize the results, we highlight the review of the portfolio for a more customized offer, with differentiated terms and rates for each segment; (c) 21.3% in income from custody and brokerage services, mainly due to the greater volume of negotiations held at B3; and (d) 4.2% in fund management revenue, mainly due to the increased volume of funds and managed portfolios; and (ii) of gains/(losses) net financial assets/liabilities available-for-sale, from a decrease of R\$686 million in 2017 to an increase of R\$625 million in 2018, partially offset by the recognition of impairment of financial assets (mostly debentures).

Insurance, pension plans and capitalization bonds

Our non-interest income decreased by 16.1%, from R\$83,890 million in 2017 to R\$70,375 million in 2018. This performance was due mainly to: (i) the gains/losses from trading financial assets and liabilities which increased from R\$3,641 million in 2017 to an expense of R\$5,459 million in 2018, due to operations with derivatives; and (ii) a decrease in retained insurance premiums and pension plans income, from R\$70,047 million in 2017, to R\$66,270 million in 2018, mainly resulting from the lower income in VGBL/PGBL, which had a lower performance when compared to the same period in the previous year.

Form 20-F

Main difference between balances by segment and consolidated balances

In addition to the above explanations, we highlight below the main difference between our non-interest income by segment (according to BR GAAP) and our consolidated non-interest income (according to IFRS) for the year ended December 31, 2018:

- **Net fee and commission income:** the difference of R\$2,265 million refers to: (i) the effective interest rate method in the amount of R\$1,388 million; and (ii) the elimination and adjustments for other operations in the amount of R\$877 million.

Non-interest expense

The following tables show, on a consolidated basis and by segment, the principal components of our non-interest expense for 2018 and 2017:

Consolidated	R\$ in thousands, except %		
	2018	2017	% Change
Personnel expenses	(18,871,462)	(20,723,265)	(8.9)%

Total	(57,168,948)	(59,751,778)	(4.3)%
Banking			

Our non-interest expenses decreased 4.3% going from R\$59,752 million in 2017 to R\$57,169 million in 2018. This decrease reflects the good performance of all the lines, highlighting the lower expenses in (i) personnel expenses, even considering the effects of the collective bargaining of 2017/2018 (readjustment of 5%) and the higher expenses with labor lawsuits and Profit Sharing (PLR), which showed a decreased of 9.8%, from R\$19,262 million in 2017 to R\$17,370 million in 2018. It is worth highlighting that, in 2017, expenses were impacted by the Special Voluntary Dismissal Program (PDVE); and (ii) the administrative expenses, which, even considering the inflation for the period, decreased 5.2%, going from R\$17,175 million in 2017 to R\$16,290 million in 2018, reflecting the gains of synergy from the incorporation of HSBC Brasil, the strategy of optimization of the points of service, as well as the efficiency in the channeling of expenses.

Insurance, pension plans and capitalization bonds

Our non-interest expenses decreased by 6.1%, from R\$76,554 million in 2017 to R\$71,895 million in 2018.

This reduction was mainly due to the decrease of 15.5% in expenses from variation of insurance and pension plan technical provisions from R\$34,806 million in 2017 to R\$29,409 million in 2018. It is worth noting that, in 2018, a complementary reserve for coverage ("PCC") in the amount of R\$523 million was fully reversed, in compliance with SUSEP Circular Letter No. 517/15.

145 Bradesco

Form 20-F

Income tax and social contribution

We prepare the information about segments so that Management can assess the performance and make decisions regarding the allocation of resources for investments and other purposes. The calculation of the income tax and social contribution, as required by the current Brazilian laws and regulations, is performed for each legal entity and disclosed on a consolidated basis. Consequently, there is no direct relationship with the presentation per segment. Management's decisions for tax purposes are based on analysis by individual legal entities and on a consolidated basis; consequently, Management includes consolidated data, which were discussed and analyzed, as a relevant disclosure in relation to the decision-making process.

The following table shows, on a consolidated basis, the breakdown of our income tax and social contribution charges:

Consolidated	R\$ in thousands, except %	
	2018	2017
Income before income tax and social contribution	19,442,015	23,743,559
Total income tax and social contribution charges at current rates ⁽¹⁾	(8,748,907)	(10,684,602)
Effect of additions and exclusions in the tax calculation:		
Equity in the earnings of associates and joint ventures	756,169	773,285
Interest on equity (paid and payable)	3,284,368	3,241,955
Other ⁽²⁾	2,014,794	240,406
Income tax and social contribution for the period	(2,693,576)	(6,428,956)
Effective rate	13.9%	27.1%

⁽¹⁾ Current rates: (i) 25% for income tax; (ii) 20% for the social contribution to financial and equated companies, and the insurance industry, and 9% for the other companies (Note 2t); and

⁽²⁾ Primarily, includes: (i) the exchange rate variation of assets and liabilities, derived from investments abroad; (ii) the equalization of the effective rate in relation to the rate of 45%, shown; and (iii) the deduction incentives.

Our income tax and social contribution expenses decreased by R\$3,735 million in 2018 compared to 2017. This decrease was primarily due to: (i) a decrease of R\$4,302 million in income before tax; and (ii) the effects in the line of other values, which went from R\$240 million in 2017 to R\$2,015 million in 2018, mainly due to the exchange rate variation of assets and liabilities, deriving from investments abroad, which is not taxable/deductible. This was primarily due to the 17.1% depreciation of the *real* against the U.S. dollar in 2018, in which, in 2017, the devaluation of the *real* against the dollar was of 1.5%. For more information on income tax and social contribution, see Note 18 to our consolidated financial statements in "Item 18. Financial Statements."

Net Income

As a result of this, our net income attributable to controlling shareholders decreased by 3.0%, from R\$17,089 million in 2017 to R\$16,584 million in 2018. Our net income for the year decreased by 3.3%, going from R\$17,315 million in 2017 to R\$16,748 million in 2018.

147 Bradesco

Form 20-F

The following table shows, on a consolidated basis and by segment, how much of the increase in our net interest income was attributable to changes in the average volume of interest-earning assets and interest-bearing liabilities, how much was attributable to changes in average interest rates and how much was attributable to variation to the effects of the appreciation/(depreciation) of the real for 2017 and 2016, respectively:

	R\$ in thousands		
	Consolidated	Banking	Insurance, Pension Plans and Capitalization Bonds
	2017/2016 Increase/(decrease)		
Due to changes in average volume of interest earning assets and interest bearing liabilities	2,552,116	1,348,099	1,134,326
Due to changes in average interest rates	(8,648,291)	(3,582,978)	(4,650,628)
Due to Brazilian real appreciation/depreciation	76,099	76,097	(1)
Net change	(6,020,076)	(2,158,782)	(3,516,303)

Banking

Our net interest income decreased by 4.4% from R\$49,156 million in 2016 to R\$46,997 million in 2017. This decrease was mainly due to changes in the average interest rates, which had a negative impact in our revenues by R\$3,583 million, partially offset by the increase in the average volume of business contributing R\$1,348 million to the result, as a result of a 1.3% increase in the average balance of interest-earning assets, increasing our revenues by R\$1,237 million, partly as a result of the increase of: (a) 28.3% in the average balance of assets pledged as collateral; and (b) 5.4% of compulsory deposits to the Central Bank. The impact on our net interest income, due to the appreciation/(depreciation) of the real, was R\$76 million.

Insurance, pension plans and capitalization bonds

Our net interest income decreased by 65.4%, from R\$5,374 million in 2016 to R\$1,858 million in 2017. This reduction was mainly due to changes in average interest rates, negatively impacting our results by R\$4,651 million, as a result of the decrease in the average rate on interest-earning assets, from 12.2% in 2016 to 7.7% in 2017, partially offset by the average interest rate paid on our interest-bearing liabilities, from 10.8% in 2016 to 8.0% in 2017. This reduction was partially offset by an increase in the average volume of business, contributing R\$1,134 million to our result, mainly influenced by the increase of 18.3% in the average volume of interest-earning assets.

Interest and similar income

The following tables show, on a consolidated basis and by segment, the average balance of the principal components of our interest-earning assets and the average interest rates earned in 2017 and 2016:

Consolidated	R\$ in thousands, except %		
	For the year ended December 31,

-------------------	---------------------	---------------------	--------------------

Banking

Interest and similar income decreased by 8.7%, from R\$118,585 million in 2016 to R\$108,302 million in 2017. This decrease was mainly due to changes in the average interest rates, from 15.0% in 2016 to 13.5% in 2017, impacting our interest and similar income in the amount of R\$11,770 million, mainly, through transactions with: (a) loans and advances to customers; (b) loans and advances to banks; (c) financial assets held for trading; (d) financial assets assigned as collateral; (e) compulsory deposits to the Central Bank; (f) investments held to maturity, partially offset by the increase in the average rate of transactions with: (i) financial assets available for sale; (ii) by the increase in the average volume of interest-earning assets, with a positive impact of R\$1,237 million; and (iii) appreciation/(depreciation) of real, which represented income of R\$251 million.

Interest and similar income from loans and advances to customers decreased by 6.4%, from R\$68,452 million in 2016 to R\$64,084 million in 2017. This decrease is related to: (i) a decrease of the average interest rate, impacting income by R\$2,663 million, due to changes in Brazilian interest rates, with the SELIC rates varying from 13.7% in 2016 to 7.0% in 2017, (ii) 2.5% in the average balance of our portfolio of loans and advances to customers, from R\$373,113 million in 2016 to R\$363,674 million in 2017, impacting our interest and similar income by R\$1,705 million. The transactions that contributed the most with the reduction of the volume were the BNDES/Finame transfers, other corporate loans and advances and import and export financings, partially offset by the growth of loans and advances to individuals.

Interest and similar income originating from loans and advances to banks decreased by 41.6%, from R\$8,689 million in 2016 to R\$5,073 million in 2017. This decrease was due to: (i) changes in the average interest rates, impacting the results by R\$2,178 million, due to the decrease in the average interbank interest rates, from 14.0% in 2016 to 9.9% in 2017; and (ii) the 18.6% decrease in the average balance of these assets, from R\$67,988 million in 2016 to R\$55,316 million in 2017, impacting our interest and similar income by R\$1,438 million.

Interest and similar income originating from financial assets held for trading decreased by 37.1%, from R\$3,906 million in 2016 to R\$2,456 million in 2017. This decrease was largely due to changes in the average interest rates earned, from 12.8% in 2016 to 8.2% in 2017, which impacted our income in the amount of R\$1,385 million. The decreases in average rates earned reflect the decrease in the average of interbank interest rates, which decrease from 14.0% in 2016 to 9.9% in 2017, as well as other economic indicators, such as the IPCA, which decrease from 6.3% in 2016 to 3.0% in 2017, and the IGP-M, which in 2016 registered a positive variation of 7.2%, and in 2017 a negative variation of 0.5%.

149 Bradesco

Form 20-F

Interest and similar income originating from financial assets pledged as collateral decreased by 2.2% or R\$470 million, from R\$21,739 million in 2016 to R\$21,269 million in 2017. This variation was mainly due to a decrease in the average interest rate, from 14.4% in 2016 to 11.0% in 2017, due to the decrease in the average interbank interest rates, from 14.0% in 2016 to 9.9% in 2017, impacting our revenues by R\$5,834 million, partially offset by the increase of 28.3% in average balance of these assets, from R\$150,545 million in 2016 to R\$193,203 million in 2017, with a positive impact in our interest and similar income in the amount of R\$5,364 million.

Interest and similar income originating from compulsory deposits with the Central Bank decreased by 13.9%, from R\$5,668 million in 2016 to R\$4,881 million in 2017. This decrease was due to changes in the average interest rates, from 10.1% in 2016 to 8.3% in 2017, impacting the interest and similar income by R\$1,081 million. This effect was partially offset by the increase in the average volume of these assets, from R\$55,848 million in 2016 to R\$58,876 million in 2017, increasing our interest and similar income in the amount of R\$294 million.

Interest and similar income originating from financial assets available for sale increased by 7.2%, from R\$8,600 million in 2016 to R\$9,223 million in 2017. This increase is related to an increase in the average interest rate, from 8.6% in 2016 to 10.6% in 2017, contributing R\$1,838 million to our revenues. This increase was impacted by the decrease in the average balance of these transactions, from R\$100,437 million in 2016 to R\$87,338 million in 2017, decreasing our revenues by R\$1,215 million.

Interest and similar income originating from investments held to maturity decreased by 14.8% from R\$1,465 million in 2016 to R\$1,248 million in 2017. This decrease was mainly due to changes in the average interest rates, from 11.7% in 2016 to 10.1% in 2017, impacting our interest and similar income by R\$207 million.

Insurance, pension plans and capitalization bonds

Our interest and similar income decreased by 25.2%, from R\$26,770 million in 2016 to R\$20,032 million in 2017. This decrease was due to: (i) changes in the average interest rates, from 12.2% in 2016 to 7.7% in 2017, impacting our revenues by R\$10,673 million. This decrease was partially offset by the average volume of transactions, contributing R\$3,936 million to our revenues. The reductions in average rates earned reflect the fall in the average of interbank interest rates, which fell from 14.0% in 2016 to 9.9% in 2017, as well as other economic indicators, such as for example the IPCA, which went from 6.3% in 2016 to 3.0% in 2017, and the IGP-M, which in 2016 registered a positive variation of 7.2%, and in 2017 a negative variation of 0.5%.

Interest and similar expenses

The tables below show, on a consolidated basis and by segment, the average balance of the main components of our interest-bearing liabilities and the average interest rates paid on them in 2017 and 2016:

Consolidated	R\$ in thousands, except %		
	2017	2016	% Change

Average balance of interest bearing liabilities

Interbank deposits	1,397,862	1,205,451	16.0%

For further information on average interest rates by type of liability, see "Item 4.B. Business Overview – Selected Statistical Information – Average balance sheet and interest rate data."

The following table shows, on a consolidated basis and by segment, how much of the increase in our interest and similar expenses was attributable to changes in the average volume of interest-bearing liabilities, how much was attributable to changes in average interest rates and how much was attributable to variation in the effects of the appreciation/(depreciation) of the real against the U.S. dollar rate, in each case comparing 2017 and 2016:

	R\$ in thousands		
	Consolidated	Banking	Insurance, Pension Plans and Capitalization Bonds
	2017/2016 Increase/(reduction)		
Due to changes in average volume of interest bearing liabilities	2,641,193	(111,507)	2,801,238

Due to changes in average interest rates	(18,263,600)	(8,187,105)	(6,022,238)
Due to Brazilian real appreciation/depreciation	174,436	174,436	-
Net change	(15,447,971)	(8,124,176)	(3,221,000)

Banking

Our interest and similar expenses decreased by 11.7% from R\$69,429 million in 2016 to R\$61,305 million in 2017. This decrease was largely due to a decrease of the average interest rate paid, from 9.5% in 2016 to 8.4% in 2017, positively impacting the expenses by R\$8,187 million. The variation of the average balance of the obligations on which interests apply decreased our expenses by R\$112 million, highlighting: (i) funds from issuance of securities, in the amount of R\$1,206 million; and (ii) borrowing and on-lending, in the amount of R\$391 million. These decreases were partially offset by the increase in the average balance of: (i) time deposits, impacting the result by R\$842 million; (ii) obligations for repurchase agreements, increase of expenses in the amount of R\$452 million; and (iii) savings deposits, increase of expenses by R\$203 million.

Insurance, pension plans and capitalization bonds

Our interest and similar expenses decreased by 15.1%, from R\$21,396 million in 2016 to R\$18,175 million in 2017. This decrease reflects the decrease of the average interest rate for insurance and pension plan technical provisions, from 10.8% in 2016 to 8.0% in 2017, decreasing our expenses by R\$6,022 million. This effect was partially offset by the increase of 14.4% in the average volume of technical provisions, impacting our expenses by R\$2,801 million.

Net impairment losses on loans and advances to customers

In view of conceptual differences between net impairment losses on loans and advances to customers under BR GAAP and IFRS, and to provide a better understanding of the information presented, we present below a reconciliation of those accounting practice differences, as well as the related analysis of the net impairment losses on loans and advances to customers under IFRS:

151 Bradesco

Form 20-F

	R\$ in thousands, except %		
	2017	2016	% Change
Net Impairment losses on loans and advances			
Banking - BR GAAP	(17,895,929)	(18,829,460)	(5.0)%
Accounting Practices Differences (IFRS x BR GAAP)	1,035,094	3,479,182	(70.2)%
Consolidated - IFRS	(16,860,835)	(15,350,278)	9.8%

Main difference between accounting practices for net impairment losses on loans and advances

The main difference of the accounting practice between BR GAAP (CMN Resolution No. 2,682/99), and IFRS (IAS 39), is the form of recognition and measurement of impairment losses on loans and advances. While the practice adopted by the Central Bank is provisioning based on a mix of future expected losses and incurred losses, under IFRS the recognition and measurement of impairment losses is based on actual losses incurred. For further information, see "Item 4.B. Business Overview – Regulation and Supervision – Banking Regulations – Treatment of loans and advances" and Note 3.1 to our consolidated financial statements in "Item 18. Financial Statements."

The following table shows changes in our impairment on loans and advances, net impairment losses on loans and advances, loans recovered and loan charge-offs for the years ended 2017 and 2016, as well as our ratio of net impairment losses on loans and advances to loans and advances to customers (shown as a percentage of the average balance of our loans and advances to customers) in all cases based on consolidated financial information prepared in accordance with IFRS:

	R\$ in thousands, except %		
	2017	2016	% Change
Impairment provision of loans and advances at the beginning of the year	24,780,839	25,455,204	(2.6)%
Net impairment losses on loans and advances	16,860,835	15,350,278	9.8%
Loan recoveries	7,034,857	5,507,507	27.7%
Loan charge offs	(21,620,965)	(21,532,150)	0.4%
Impairment provision of loans and advances at the end of the year	27,055,566	24,780,839	9.2%
Ratio of net impairment losses on loans and advances to average loans and advances to customers	4.4%	3.9%	

The balance of our impairment of loans and advances to customers increased by 9.2%, from R\$24,781 million in 2016 to R\$27,056 million in 2017. This increase was primarily due to the increase of: (i) 9.8% in net impairment losses on loans and advances, from R\$15,350 million in 2016 to R\$16,861 million in 2017; and (ii) 27.7% in the loans recovered, from R\$5,508 million in 2016 to R\$7,035 million in 2017.

The balance of loans and advances to customers classified as past due but not impaired decreased by 4.7%, from R\$337,337 million in 2016 to R\$321,596 million in 2017. Of this total, 96.2% of loans were rated "low risk." The impairment of loans and advances as a percentage of total loans and advances to customers changed from 6.3% in 2016 to 7.2% in 2017, highlighting the bigger loss allocated to the transactions of real estate financing, working capital and credit card.

Calculations of impairment of loans and advances include an individual analysis of impaired loans and advances to customers, and an analysis of losses on loans and advances to individually non-significant customers, as follows:

As of December 31,	R\$ in thousands, except %		
	2017	2016	% Change
Impairment provision of loans and advances to customers individually relevant	7,208,200	6,575,000	9.6%
Impairment provision of loans and advances to customers not individually relevant	19,847,366	18,205,839	9.0%
Total	27,055,566	24,780,839	9.2%

The total of related losses on loans and advances to individually non-significant customers increased 9.0% or R\$1,642 million, highlighting losses allocated to real estate financing transactions, from R\$839 million in 2016 to R\$1,779 million in 2017, and credit card transactions, from R\$4,739 million in 2016 to R\$5,244 million in 2017.

Our level of loan losses, defined as the amount of net charge-offs compared to the average balance of loans and advances to customers, including overdue loans, decreased from 4.1% in 2016 to 3.8% in 2017.

152 Form 20-F – December 2018

Table of Contents

Form 20-F

Our loans and advances to customer portfolio decreased by 4.7% from R\$392,084 million in 2016 to R\$373,814 million in 2017. We highlight: (i) the decrease of 9.7% in loans and advances to legal entities, from R\$221,158 million in 2016 to R\$199,825 million in 2017, particularly in the following products: (i) working capital, export financing and onlending BNDES/Finame; and (ii) growth of 1.8% in loans and advances to individuals, particularly with regard to real estate financing transactions and payroll-deductible loans and vehicles.

We believe that our impairment of loans and advances is sufficient to cover losses incurred regarding our portfolio, which can be evidenced, among other indicators, by our coverage ratio, measured by the total loss by impairment of loans and advances as a percentage of non-performing loans and advances to customers, which increased from 106.0% in 2016 to 130.2% in 2017.

Non-interest income

The following tables show, on a consolidated basis and by segment, the principal components of our non-interest income for 2017 and 2016:

Consolidated	R\$ in thousands, except % For the year ended December 31,		
	2017	2016	% Change
Net fee and commission income	22,748,828	20,341,051	11.8%
Net gains/(losses) on financial assets and liabilities held for trading	9,623,108	16,402,770	(41.3)%
Net gains/(losses) on financial assets available for sale	570,358	(1,341,400)	(142.5)%
Premiums retained from insurance and pension plans	70,046,635	65,027,122	7.7%
Equity in the earnings of associates and joint ventures	1,718,411	1,699,725	1.1%
Other non-interest income	18,498,598	13,042,223	41.8%
Total	123,205,938	115,171,491	7.0%

Segment	R\$ in thousands, except %

Total	40,812,449	41,414,563	(1.5)%	83,890,316	75,664,123	10.9%

Banking

Our non-interest income decreased by 1.5%, from R\$41,415 million in 2016 to R\$40,812 million in 2017. This decrease was mainly due to: (i) net gain/losses of financial assets and liabilities classified as held for trading, from gains of R\$14,919 million in 2016 to gains of R\$6,011 million in 2017, primarily reflecting on the result obtained in the derivative financial instruments in 2016, mainly due to results deriving from futures contracts (which include the hedge for investments abroad, which effect of exchange variation is recorded in other financial expenses - net gains/losses on foreign currency transactions); (ii) the decrease of 2.7% or R\$41 million in the result from investment in affiliated companies and joint ventures, from R\$1,538 million in 2016 to R\$1,497 million in 2017, partially offset by: (iii) an increase of 16.7% in the net fee and commission income, from R\$20,697 million in 2016 to R\$24,144 million in 2017, due to the increase of: (a) 10.3% of revenues related to checking accounts mainly due to the expansion of the portfolio of services rendered and an increase in volume of business; and (b) 9.5% in revenues from credit cards, mainly due to an increase in the financial volume traded and an increased amount of transactions carried out in the period; (c) 35.5% in fees from fund management, mainly due to the increased volume of funds raised and managed; (d) 19.4% in revenues from the management of consortiums, mainly due to the greater volume of bids received; the elevation of the average ticket; and the increase in billing on sales, which active quotas went from 1,334 thousand in 2016 to 1,411 thousand in 2017; and (e) 10.6% in the revenues from collections, mainly due to the greater volume of processed documents; (iv) the net loss of available-for-sale financial assets, from R\$1,418 million in 2016 to R\$686 million in 2017, due to greater gains with fixed income securities, partially offset by the recognition of impairment on debentures; and (v) largely due to the provision for guarantees provided, comprising sureties, letters of credit and standby letter of credit in compliance with the CMN Resolution No. 4,512/16.

153 Bradesco

Form 20-F

Insurance, pension plans and capitalization bonds

Our non-interest income increased by 10.9%, from R\$75,664 million in 2016 to R\$83,890 million in 2017. This performance was due mainly to: (i) an increase of 7.7% in retained insurance premiums and pension plans income, from R\$65,027 million in 2016 to R\$70,047 million in 2017, resulting basically from: (a) increase of income from insurance premiums issued, which went from R\$62,471 million in 2016 to R\$65,865 million in 2017; and (b) an increase in pension plan contributions, from R\$3,680 million in 2016 to R\$5,090 million in 2017; and (ii) the net gains/losses on financial assets and liabilities held for trading, which went from a gain of R\$1,251 million in 2016 to a gain of R\$3,642 million in 2017, related to fixed income securities.

154 Form 20-F – December 2018

Form 20-F

Main difference between balances by segment and consolidated balances

In addition to the above explanations, we highlight below the main difference between our non-interest income by segment (according to BR GAAP) and our consolidated non-interest income (according to IFRS) for the year ended December 31, 2017:

- **Net fee and commission income:** the difference of R\$2,182 million refers to: (i) the effective interest rate method in the amount of R\$1,279 million; and (ii) the elimination and adjustments for other operations in the amount of R\$903 million.

Non-interest expense

The following tables show, on a consolidated basis and by segment, the principal components of our non-interest expense for 2017 and 2016:

Consolidated	R\$ in thousands, except % For the year ended December 31,		
	2017	2016	% Change
Personnel expenses	(20,723,265)	(17,003,783)	21.9%

Banking

Our non-interest expenses increased by 9.7%, from R\$54,449 million in 2016 to R\$59,752 million in 2017. This increase was mainly due to the increase of: (i) 22.4% in personnel expenses from R\$15,734 million in 2016 to R\$19,262 million in 2017, due to an increase in expenses from salaries, payroll charges and benefits as a result of: (a) an increase in salaries, in accordance with the respective 2016 and 2017 collective bargaining agreements; and (b) the effect of the consolidation of HSBC Brasil; (ii) 14.7% in administrative expenses, mainly due to: (a) the increased volume of business and services in the period, partially impacted by the effect of the consolidation of HSBC Brasil; and (b) contract adjustments; (iii) 46.7% in depreciation and amortization expenses, due to, principally, the amortization of goodwill related to the acquisition of HSBC Brasil in 2016; and partially offset by (iv) a 4.6% decrease in other non-financial expenses, partly as a result of our launch of a Special Voluntary Severance Program Scheme (PDVE) in 2017 which provided voluntary severance to employees meeting certain eligibility requirements.

Insurance, pension plans and capitalization bonds

Our non-interest expenses increased by 7.1%, from R\$71,474 million in 2016 to R\$76,554 million in 2017. This increase was mainly due to the increase of: (i) 6.2% in our expenses from variation of insurance and pension plan technical provisions from R\$32,782 million in 2016 to R\$34,806 million in 2017; and (ii) 4.3% in retained claims, from R\$24,542 million in 2016 to R\$25,595 in 2017, driven by the health insurance segment.

Form 20-F

Income tax and social contribution

We prepare the information about segments so that management can assess the performance and make decisions regarding the allocation of resources for investments and other purposes. The calculation of the income tax and social contribution, as required by the current Brazilian laws and regulations, is performed for each legal entity and disclosed on a consolidated basis. Consequently, there is no direct relationship with the presentation per segment. Management's decisions for tax purposes are based on analysis by individual legal entities and on a consolidated basis; consequently, Management includes consolidated data, which were discussed and analyzed, as a relevant disclosure in relation to the decision-making process.

The following table shows, on a consolidated basis, the breakdown of our income tax and social contribution charges:

Consolidated	R\$ in thousands, except %	
	2017	2016
Income before income tax and social contribution	23,743,559	31,905,456
Total income tax and social contribution charges at current rates ⁽¹⁾	(10,684,602)	(14,357,455)
Effect of additions and exclusions in the tax calculation:		
Equity in the earnings of associates and joint ventures	773,285	764,876
Interest on equity (paid and payable)	3,241,955	3,139,102
Other ⁽²⁾	240,406	(3,459,253)
Income tax and social contribution for the period	(6,428,956)	(13,912,730)
Effective rate	27.1%	43.6%

⁽¹⁾ Current rates: (i) 25.0% for income tax; (ii) of 15.0% for the social contribution to financial and similar companies, and of the insurance industry, and of 20.0%, from September 2015 to December 2018, in accordance with Law n° 13,169/15; and (iii) of 9.0% for the other companies;

⁽²⁾ Basically, includes: (i) the exchange rate variation of assets and liabilities, derived from investments abroad; (ii) the equalization of the effective rate of social contribution in relation to the rate (45%) as shown; and (iii) the deduction incentives.

Our income tax and social contribution expenses decreased by R\$7,484 million in 2017 compared to 2016. This decrease was primarily due to: (i) a decrease of R\$8,162 million in income before tax; and (ii) the effects of additions and deductions on the calculation of taxes, as follows: (a) change in other amounts, which went from an addition in the income tax and social contribution of R\$3,459 million in 2016 to an exclusion of R\$240 million in 2017, primarily due to exchange rate variation of assets and liabilities, deriving from investments abroad, which is non-taxable/deductible. This was mainly due to the 1.5% depreciation of the *real* against the U.S. dollar in 2017, as compared to 2016, there was a 16.5% appreciation of the *real* against the U.S. dollar; and (c) the increase in the effect of interest on own capital, in the amount of R\$103 million. For more information on income tax and social contribution, see Note 18 to our consolidated financial statements in "Item 18. Financial Statements."

Net Income

As a result of the above, our net income attributable to controlling shareholders decreased by 4.5%, from R\$17,894 million in 2016 to R\$17,089 million in 2017. Our net income for the year also decreased by 3.8%, from R\$17,992 million in 2016 to R\$17,315 million in 2017.

5.B. Liquidity and Capital Resources

Asset and liability management

Our general policy on asset and liability management is to manage interest rate, liquidity, foreign exchange and maturity risks in order to maximize our net interest income and our return on assets and equity, in light of our internal risk management policies, and maintain adequate levels of liquidity and capital.

As part of our asset and liability management, we seek to avoid material mismatches between assets and liabilities by matching, to the extent possible, the maturity, currency and interest rate structure of loans we make with terms of the transactions under which we fund these loans. Subject to our policy constraints and the limits established by our Board of Directors, we occasionally take mismatched positions in relation to interest rates, maturities and, in more limited circumstances, foreign currencies, when we believe such positions are justified in view of market conditions and prospects.

We monitor our asset and liability positions in accordance with Central Bank requirements and guidelines. Our Treasury Executive Committee for Asset and Liability Management meets on a weekly basis to:

- evaluate action strategies relating to asset and liability management, within the limits established, based on an analysis of the political-economic scenarios, at national and international level;

156 Form 20-F – December 2018

Form 20-F

- monitor and countersign the pricing strategies of asset, liability and derivative operations with our clients;
- define internal prices of transfer of resources (Funds Transfer Price - FTP) of liabilities and assets in local and foreign currency;
- approve the proposal on the limit of tolerance for exposure to risks to be submitted to the approval of the COGIRAC and the Board of Directors; and
- monitor and countersign results, strategies, behaviors and risks of mismatch and indexes maintained by us and managed by our Treasury Department.

In making such decisions, we evaluate not only our exposure limits for each market segment and product, but also market volatility levels and the extent to which we are exposed to market risk through interest, maturity, liquidity and currency mismatches. We also consider other potential risks, as well as market liquidity, our institutional needs and perceived opportunities for gains. Our Treasury Executive Committee for Asset and Liability Management holds extraordinary meetings as required in response to unexpected macroeconomic changes.

In addition, we receive daily reports on our mismatched and open positions, while our Treasury Executive Committee for the Asset and Liability Management assesses our risk position every two weeks.

Liquidity and funding

We have policies, procedures, metrics and limits in place aimed at controlling liquidity risks. The components of our Short-Term and our Long-Term Liquidity Ratios ("LCR" and "NSFR") are in line with best market practices as well as Basel III requirements.

Our Treasury Department acts as a support center for our different business segments by managing our funding and liquidity positions, and executing our investment objectives in accordance with our asset and liability management policies. We are also responsible for setting rates for our different products, including exchange and interbank transactions. Our Treasury Department covers any funding shortfall by borrowing in the interbank market. It seeks to maximize efficient use of our deposit base by investing any surpluses in liquid instruments in the interbank market.

We have used our excess liquidity to invest in Brazilian government securities and expect to continue doing so, subject to regulatory requirements and investment considerations. Our principal sources of funding are:

- demand, savings, and time deposits, as well as interbank deposits; and
- obligations for repurchase agreements, borrowings and onlendings, funds from securities issued and subordinated debt, part of which is denominated in foreign currencies.

The following table shows the average balance and average real interest rates of our sources of funding (interest-bearing, as well as non-interest-bearing) for the periods indicated measured using month-end balances:

R\$ in thousands, except %	2018			2017			2016	
	Average balance	% of total	Average rate	Average balance	% of total	Average rate	% of total	Average rate
Interest bearing liabilities								
Interbank deposits	1,212,828	0.1%	11.3%	1,397,862	0.1%	10.9%	1,205,451	0.1%
Savings deposits	103,764,844	9.1%	4.5%	96,511,751	8.7%	5.9%	93,598,769	8.6%
Time deposits	157,184,020	13.8%	4.0%	122,959,605	11.1%	6.1%	111,471,035	10.3%
Obligations for repurchase agreements	211,937,370	18.6%	7.1%	238,407,697	21.6%	9.5%	232,718,923	21.5%
Borrowings and onlendings	51,448,829	4.5%	6.2%	58,617,611	5.3%	5.2%	65,927,057	6.1%
Funds from securities issued	146,183,351	12.8%	6.2%	138,281,213	12.5%	9.6%	151,629,726	14.0%
Subordinated debt	47,741,687	4.2%	7.4%	52,065,114	4.7%	9.8%	52,348,349	4.8%
Insurance technical provisions and pension plans	245,141,522	21.5%	5.5%	226,765,103	20.5%	8.0%	198,174,725	18.3%
Total interest bearing liabilities	964,614,451	84.6%	5.7%	935,005,956	84.6%	8.1%	907,074,035	83.7%
Non interest bearing liabilities								
Demand deposits	32,720,748	2.9%	-	31,014,556	2.8%	-	32,645,961	3.0%
Other non interest bearing liabilities	142,565,235	12.5%	-	138,586,108	12.5%	-	143,993,002	13.3%
Total non interest bearing liabilities	175,285,983	15.4%	-	169,600,664	15.4%	-	176,638,963	16.3%
Total liabilities	1,139,900,434	100.0%	4.8%	1,104,606,620	100.0%	6.8%	1,083,712,998	100.0%

Deposits are our most important source of funding, accounting for 25.9% of average total liabilities in 2018, compared to 22.8% in 2017 and 22.0% in 2016. Our deposits balance over these years progressed in the following manner:

- in 2017, the average balance of our deposits increased by 5.4% in comparison to 2016, mainly due to the increase of 10.3% in the average balance of our time deposits; and

Form 20-F

- in 2018, the average balance of our deposits increased by 17.1% in comparison to 2017, mainly due to the increase of 27.8% in the average balance of our time deposits.

Obligations for repurchase agreements, borrowings and onlendings and funds from securities issued represent an important sources of funding, accounting for 34.5% of total average liabilities in 2018, compared to 39.4% in 2017 and 41.5% in 2016.

The following table shows, as of the dates indicated, our sources of funding and liquidity, as well as other non-interest-bearing liabilities:

As of December 31,	R\$ in thousands		
	2018	2017	2016
Interbank deposits	410,975	2,168,625	588,872
Savings deposits	111,170,912	103,332,697	97,088,828
Time deposits	195,398,721	125,617,424	103,137,867
Obligations for repurchase agreements	190,911,877	233,467,544	241,978,931
Borrowings and onlendings	54,851,398	49,291,007	58,196,002
Funds from securities issued	148,029,018	135,174,090	151,101,938
Subordinated debt	53,643,444	50,179,401	52,611,064
Insurance technical provisions and pension plans	251,578,287	239,089,590	215,840,000
Total interest-bearing liabilities	1,005,994,632	938,320,378	920,543,502
Demand deposits	35,318,292	34,088,616	33,420,111
Other non interest bearing liabilities	139,554,670	134,250,742	132,586,836
Total non interest bearing liabilities	174,872,962	168,339,358	166,006,947
Total liabilities	1,180,867,594	1,106,659,736	1,086,550,449

Deposits

Deposits accounted for 29.0% of total liabilities as of December 31, 2018. Our deposits consist of *real*-denominated, interest-bearing time and savings deposits and *real*-denominated, non-interest-bearing demand deposits. For additional information regarding our deposits, see "Item 4.B. Business Overview – Selected Statistical Information – Average deposit balances and interest rates."

Obligations for repurchase agreements

Obligations for repurchase agreements consist mainly of fundings we obtained from banks in the market by selling securities with agreements to repurchase. As of December 31, 2018, we had obligations for repurchase agreements in the amount of R\$190,912 million, a decrease of R\$42,556 million compared to the balance on December 31, 2017, which was R\$233,468 million.

It is important to note the effects of adapting to Resolution No. 4,527/16, which altered the form of using the securities issued by institutions associated to the conglomerate, like the collateral in repurchase agreements, impacting, mainly the balance of debentures.

Borrowings and onlendings

Borrowings consist primarily of funding from lines obtained from banking correspondents for import and export financings. Our access to this source of resources has been continuous, and funding occurs with rates and terms according to market conditions.

Onlendings consist of funds borrowed for local onlending, in which we borrow from Brazilian governmental agencies and entities to make loans to Brazilian entities for investments in facilities, equipment and farming, among others.

As of December 31, 2017, the balance of our borrowings and onlendings totaled R\$49,291 million, a decrease of R\$8,905 million compared to December 31, 2016. The decrease was due to: (i) a decrease of R\$3,639 million in borrowings and onlendings denominated in, or indexed to, foreign currencies, which balance was from R\$22,158 million in 2016 to R\$18,519 million in 2017; (ii) the decrease in the funds raised via borrowings and onlendings in the country, mainly through Finame and BNDES operations.

As of December 31, 2018, the balance of our borrowings and onlendings totaled R\$54,851 million, an increase of R\$5,560 million compared to December 31, 2017. The increase resulted primarily from the increase of R\$11,162 million in borrowings and onlendings abroad of R\$18,519 million in 2017 to R\$29,681 million in 2018.

158 Form 20-F – December 2018

Form 20-F

Funds from securities issued

Funds from securities issued consist of: (i) financial notes (*letras financeiras*); (ii) real estate credit notes; (iii) agribusiness notes (*letras de agronegócio*); (iv) euronotes; and (v) securities issued through securitization.

As of December 31, 2017, our funds from securities issued totaled R\$135,174 million, a decrease of R\$15,928 million compared to December 31, 2016. The decrease in our funds from securities issued was influenced by: (i) the decrease of R\$14,943 million in funds from the issuance of financial notes; (ii) the decrease of R\$2,831 million of operations abroad; and partially offset by: (iii) the increase of R\$1,857 million in agribusiness notes.

As of December 31, 2018, our funds from securities issued totaled R\$148,029 million, an increase of R\$12,855 million compared to December 31, 2017. The increase in our funds from securities issued was influenced by: (i) the increase of R\$10,435 million in funds from the issuance of financial notes; and (ii) the increase of R\$2,135 million in agribusiness notes. It is important to note that in 2018 we captured guaranteed real estate bonds, which are notes guaranteed by a portfolio of real estate loans, according to the requirements determined by Resolution No. 4,598/17 of Central Bank.

Subordinated debt

The subordinated debts totaled R\$50,179 million in December 2017, a 4.6% decrease, or R\$2,432 million compared to 2016, due to the maturity of subordinated debts in the period.

The subordinated debts totaled R\$53,643 million in December 2018, a 6.9% increase, or R\$3,464 million compared to 2017, due to the issuance of new subordinated debts in the period.

Sources of additional liquidity

From the implementation of the New Brazilian Payment System in April 2002, the Central Bank has offered a credit line from the portfolio of government securities issued by the National Treasury to provide liquidity to financial institutions, which is defined as re-discount (or "*Redesconto*"). This line can be used in the "intra-day" condition, or for a longer term negotiated with the Central Bank, which discloses the differentiated prices for the acceptance of these securities as collateral.

There is also a traditional re-discount line, where financial institutions offer assets represented by credit transactions or illiquid securities. In this case, the institution will open formal proceedings with the Central Bank, presenting the reasons for the request, projected cash flow, liquidity recovery plan, as well as detailing the assets to be re-discounted and the proposed payment flow to the Central Bank.

The Central Bank, upon analysis, will decide whether or not to release the liquidity line, costs, and other measures deemed necessary.

Bradesco has never used these liquidity resources.

Cash flow

In 2018, 2017 and 2016, our cash flow was affected by our business strategy and alterations in the Brazilian economic environment. The following table shows the principal variations in cash flows during the periods indicated:

For the year ended December 31,	R\$ in thousands		
	2018	2017	2016
Net cash provided by (used in) operating activities	(6,497,318)	35,551,788	53,959,218
Net cash provided by (used in) investing activities	(34,485,022)	(18,229,963)	9,152,341
Net cash provided by (used in) financing activities	(5,598,241)	(43,304,122)	(23,524,819)
Net increase (decrease) in cash and cash equivalents	(46,580,581)	(25,982,297)	39,586,740

159 Bradesco

Form 20-F
2018

In 2018, we had a net decrease of R\$46,581 million in cash and cash equivalents due to net cash used in investing activities, in the amount of R\$34,485 million, in operating activities, in the amount of R\$6,497 million and in financing activities, in the amount of R\$5,598 million.

In 2018, cash used in our operating activities, in the amount of R\$6,497 million, is related: (i) to our income before tax, in the amount of R\$19,442 million; and (ii) to adjustments of reconciliation, in the amount of R\$52,627 million, which were fully offset by: the net negative variations in assets and liabilities, in the amount of R\$78,566 million, among which we highlight: (a) the increase of loans and advances to clients, in the amount of R\$112,862 million; (b) the growth of R\$30,302 million of other assets; (c) the increase of R\$20,883 million in Central Bank compulsory deposits, which were partially offset by: (d) a net increase of R\$88,660 million in the deposits from customers; and (e) by the amount of R\$33,847 million, related to collected interest, net of the paid interest.

In 2018, cash used in our investing activities, resulted from (i) the acquisition, net of maturities, of financial assets at amortized cost, in the amount of R\$48,960 million; and (ii) the acquisition, net of disposals, of property, equipment and intangible assets, in the amount of R\$5,081 million, which were partially offset: (i) by the receipt of interest and dividends, in the amount of R\$18,897 million and (ii) by the receipts from disposal, net of the acquisitions, of financial assets at fair value through other comprehensive income, in the amount of R\$465 million.

In 2018, cash used in our financing activities is a result of interest paid and interest on capital and dividends payment, in the amount of R\$23,526 million, which were partially offset: (i) by the issuance of securities, net of security issuance payments, in the amount of R\$16,216 million; and (ii) by the issuance of subordinated debt net of payments of subordinated debt, in the amount of R\$1,709 million.

2017

In 2017, we had a net decrease of R\$25,982 million in cash and cash equivalents due to net cash used in financing activities, in the amount of R\$43,304 million; and investing activities, in the amount of R\$18,230 million. These decreases were partially offset by the net increase in cash provided by our operating activities, in the amount of R\$35,552 million.

In 2017, cash provided by our operating activities, in the amount of R\$35,552 million, is related to: (i) our income before tax, in the amount of R\$23,744 million and adjustments of reconciliation, in the amount of R\$56,901 million, totaling R\$80,645 million, partially offset; and (ii) variations in asset and liability, in the amount of R\$45,093 million, highlighting: (a) the increase, in the amount of R\$59,579 million, of loans and advances to clients; (b) growth of financial assets for trading, in the amount of R\$23,089 million; (c) the decrease, in the amount of R\$11,556 million, in technical reserves from insurance and pension plans; (d) an increase in Central Bank compulsory deposits, in the amount of R\$8,678 million; and (e) income tax and social contribution paid, in the amount of R\$8,575 million; partially offset by interest received/paid, in the amount of R\$34,489 million and increase of deposits from clients, in the amount of R\$36,854 million.

In 2017, cash provided by our investing activities, resulted from (i) the net acquisition/disposal of financial assets available for sale, in the amount of R\$31,427 million; (ii) acquisition/disposal of property, equipment and intangible assets, in the amount of R\$5,197 million, partially offset by: (iii) cash resulting from the maturity, and investments held to maturity, in the amount of R\$4,219 million; and (vi) the receipt of interest and dividends, in the amount of R\$12,819 million.

In 2017, cash used in our financing activities is a result of: (i) interest paid and interest on capital and dividends payment, in the amount of R\$30,978 million; (ii) costs associated with the issuance of securities, net of payment, in the amount of R\$10,257 million; and (iii) the payment of subordinated debt, in the amount of R\$8,666 million, partially offset by the issuance of subordinated debt, in the amount of R\$6,595 million.

2016

In 2016, we had a net increase of R\$39,587 million in cash and cash equivalents due to net cash provided by operating activities, in the amount of R\$53,959 million; and investing activities, in the amount of R\$9,152 million. These increases were partially offset by the net decrease in cash used in our financing activities, in the amount of R\$23,525 million.

In 2016, cash provided by our operating activities, including adjustments to income, resulted primarily from (i) interest paid/received, in the amount of R\$25,777 million; (ii) lower compulsory deposits with the Central Bank in the amount of R\$11,651 million; (iii) a reduction in loans and advances to financial institutions, in the amount of R\$10,368 million; (iv) a decrease in financial assets held for trading, in the amount of R\$9,700 million; and (v) variation in insurance technical provisions and pension plans, in the amount of R\$32,782 million. These events were partially offset by an increase: (i) in loans and advances to customers, in the amount of R\$49,649 million; and (ii) in financial assets held for trading, in the amount of R\$40,248 million.

Form 20-F

Cash provided by our investing activities, resulted from (i) interest received in the amount of R\$12,668 million; and (ii) the net acquisition/disposal of financial assets available for sale, in the amount of R\$7,428 million. These events were partially offset by: (i) the acquisition of subsidiaries, net of cash and cash equivalents paid/received, in the amount of R\$7,189 million; and (ii) the acquisition of fixed assets used, equipment and intangible assets in the amount of R\$5,123 million.

Cash used in our financing activities is a result of interest paid and interest on capital and dividends payment, in the amount of R\$26,116 million; partially offset by the issuance of subordinated debt, in the amount of R\$3,787 million.

Capital compliance - Basel III

The G20's December 2010 conference voted to institute a package of measures (known as "Basel III") that had been proposed by the Basel Committee on Banking Supervision to remedy deficiencies revealed by the 2008 economic crisis. The purpose of this reform is to enhance capital and liquidity management rules for financial institutions, thus strengthening the banking sector and dampening the impact of financial crises and their consequences for the real economy.

The first measure requires financial institutions to strengthen their capital levels. Common equity primarily comprises share capital (non-redeemable non-cumulative common and preferred shares), plus retained earnings, less amounts related to regulatory adjustments (tax credits, goodwill paid on acquisition of investments and deferred fixed assets, among others). After allowing for all deductions, Basel III will require banks to hold: (i) a common equity ratio of at least 4.5%; (ii) a Tier I capital ratio of at least 6.0%; and (iii) a minimum total capital ratio of 8.0%.

In January 2011, the Basel Committee on Banking Supervision ("BCBS") published a document known as the "January 13 Annex" in which it extended Basel III rules with additional requirements applicable to Tier I and II Capital. Under the January 13 Annex rules, a capital instrument issued by a bank must include a provision enabling the competent regulatory body to either cancel this instrument, or convert it to common shares on the occurrence of a "trigger event." A "trigger event" is whichever of the following occurs first: (i) a decision that a cancellation is necessary, without which the bank would become insolvent; and (ii) the decision to make a public capital injection, or equivalent subsidy, without which the bank would become insolvent. These additional requirements will apply to all instruments issued after January 2013; otherwise, any qualified instruments issued before that date and which do not meet the additional requirements (although meeting other requirements as of the date of the issuance) will be gradually deducted from capital measurement for a period of ten years as of 2013.

In June 2011, the BCBS released the report "Basel III: A global regulatory framework for more resilient banks and banking systems – revised." The revised version of Basel III regulations aims at improving the quality and quantity of financial institutions capital, with the purpose of making the financial system more resilient and reducing risks and costs. This Accord reflects a continuing change towards the improvement of the prudential structure applicable to financial institutions, with the main elements being the regulatory capital and the amount of allocated capital.

Basel III recommendations stipulate altered capital requirements for counterparty credit risk, both for the standard approach and for internal risk rating based approaches (“IRBs”), in order to ensure inclusion of material risks in capital structure.

The Basel III Accord recommends implementation of a leverage ratio as a supplementary capital measure. This ratio, together with the Basel Ratio, aims to limit a financial institutions’ risk exposure. It also assesses leverage through the ratio between Tier I capital and book value assets plus off-balance exposure (overdraft facilities, sureties, guarantees and derivatives).

Furthermore, in order to determine minimum requirements for quantitative liquidity of financial institutions, Basel III proposes two liquidity ratios: a short-term (LCR) and a long-term one (NSFR).

The purpose of the short-term liquidity ratio (Liquidity Coverage Ratio, or “LCR”) is to show that institutions maintain sufficient high-liquidity funds to withstand a one-month financial stress scenario. The purpose of the long-term liquidity ratio (Net Stable Funding Ratio, or “NSFR”) is to encourage institutions to finance their activities from more stable sources of funding. Basel III has set forth the requirement of a ratio of more than 100% for the LCR, with a minimum value of 60% in 2015 and an increase of 10 percentage points *per annum* until it reaches the minimum of 100% from January 2019 and the NSFR from January 2018.

Form 20-F

In December 2017, the BCBS approved the final reforms of Basel III: Finalizing post – crisis reforms – BIS. The reforms had two stages, the first one contemplated: (i) improving the quality of the regulatory capital; (ii) raise levels of capital; (iii) improvement of the measurement and weight of risks, including global standards of market risk, counterparty credit risk and securitization; (iv) aggregation of macro-prudential elements, such as capital buffers in the regulatory framework; (v) restriction for the excessive leverage of banks; and (vi) introduction of the indicators of control of liquidity risk. The second step complemented the overall regulatory improvements, aiming to restore credibility in the calculation of risk-weighted assets (RWA) and allow greater comparability between financial institutions by means of: (i) increase of the sensitivity to the risk of standardized approaches for credit risk, credit valuation adjustment (CVA) and operational risk; (ii) restriction for the use of the internal model, with limits on certain parameters used to calculate the capital requirements for credit risk and removal of the use of approaches of the internal model for the risk of CVA and operational risk; (iii) introduction of a leverage ratio buffer for important global banks (G-SIBs); and (iv) replacement of the existing standard in Basel II with standard more sensitive to risk.

Brazil has been a member of the BCBS since late 2009 and has adopted Basel III proposals. The Central Bank issued Notice No. 20,615/11 on preliminary guidelines and schedules for implementing recommendations on capital structure and liquidity requirements. According to this communication, the regulator intended to bring forward the implementation of several measures.

In June 2011, CMN published Resolution No. 3,988/11, which states that the Brazilian financial institutions should implement a capital management structure compatible with the nature of their operations, the complexity of the products and services offered and their risk exposure. This Resolution was revoked by CMN Resolution No. 4,557/17, which established a series of rules on the subject and that details the operation of the structure of continuous and integrated management of risks and structure for the ongoing management of capital. According to the rule, the management structures must be: (i) compatible with the business model, with the nature of the operations and with the complexity of the products, services, processes and activities of the institution; (ii) proportional to the size and relevance of exposure to risks, according to the criteria defined by the institution; (iii) appropriate to the risk profile and systemic importance of the institution; and (iv) capable of assessing the risks arising from macroeconomic conditions and markets in which the institution operates. Capital management is defined as a continuous process of (i) monitoring and controlling the financial institution's capital; (ii) calculating the capital need in view of the risks to which the financial institution is exposed to; and (iii) planning goals and capital requirements considering the strategic objectives of the institution. Financial institutions shall disclose to the general public a report describing its capital management structure at least on an annual basis.

Under the Central Bank's preliminary rules, Brazil would follow the international schedule for gradually adopting capital requirements and definitions over the coming years. The original schedule proposed by the Central Bank was planned to begin in January 2013. However, it was postponed to March 2013 and the final term for the implementation of the referred rules is January 2019.

Provisional Measure No. 608/13, enacted in February 2013, sets forth the regulatory measures that Brazil has been adopting to adhere to the recommendations of Basel III, which was converted into Law No. 12,838/13. This rule changes the provision for capital to be recognized by financial institutions, addressing presumed credit and credit securities and instruments issued by financial institutions to comprise their Capital. It also states that the distribution of dividends to shareholders of financial institutions is subject to

compliance with the prudential rules established by CMN.

In March 2013, the Central Bank published four Resolutions and 15 Circulars, by way of which it implemented the recommendations from the BCBS. In line with international recommendations and current practice, the minimum capital level was determined as a percentage of risk-weighted assets.

In accordance with the rules set forth by the CMN Resolution No. 4,192/13, the Capital of a financial institution consists of Tier I Capital plus Tier II Capital and is used when setting its operating limits.

Tier I Capital is aimed at helping the bank remain solvent, that is, remain a going concern. Tier II Capital is contingent capital, subject to conversion into equity in case of insolvency. When Basel III rules came into effect, Tier I Capital was broken down into two categories: Common Equity, comprising by shares and reserves; and Additional Capital, comprising instruments that are analogous to hybrid capital and debt instruments.

CMN Regulations that introduced Basel III rules in Brazil are stricter and more comprehensive when defining instruments eligible for inclusion in each capital category and set forth the deductions of some items, from Common Equity, Additional Capital and Tier II Capital.

Following the recommendations of Basel III, the CMN Resolution No. 4,193/13 introduced the Additional Common Equity, comprised by the Common Equity Conservation Buffer, Common Equity Countercyclical Buffer ("ACCPBrasil"), and Common Equity Systemically Importance Buffer. Under this Resolution, the value of the Common Equity Conservation Buffer and the ACCPBrasil will gradually increase, starting from 0.625% as from January 2016 and reaching up to 2.5% as from January 2019. The Common Equity Systemically Importance Buffer will gradually increase from 0.5% as from January 2017 to up to 2.0% as from January 2019. Moreover, the Central Bank is to determine the calculation methodology for the ACCPBrasil and the Common Equity Systemically Importance Buffer. The Central Bank's Circular No. 3,768/15 established the methodology for calculating the Additional Portion of Systemic Importance of the Principal Capital, which corresponds to the multiplication between the assets weighted by risk and the annual factor of systemic importance ("FIS"). The value of the FIS, in turn, is defined based on the ratio between the value of the total exposure and the value of the GDP, considering the following gradation: (i) if the reason for total exposure/GDP is less than 10.0%, the value of the FIS is zero; (ii) if the reason for total exposure/GDP is equal to or greater than 10.0% and less than 50.0%, the FIS will vary from 0.25% from January to December 2017, and 1.0% from January 2019; and (iii) if the reason for total exposure/GDP is greater than 50.0%, the FIS will vary from 0.5% from January to December 2017, and 2.0% from January 2019. Now according to the Central Bank's Circular No. 3,769/15, the amount of the ACCPBrasil must not exceed 1.25% of risk-weighted assets, in the period between January and December 2017. In addition, Article 3 of this same circular, established that the value of ACCPBrasil is equal to 0%, thus remaining subject to subsequent revaluations of the regulator.

162 Form 20-F – December 2018

Form 20-F

Under normal market conditions, financial institutions must hold excess capital in relation to the minimum requirements in an amount greater than additional Common Equity, as defined. Failure to comply with additional Common Equity rules will lead to restrictions affecting distribution of dividends, bonuses, earnings, profit sharing and incentive compensation geared to the performance of institutions' managements.

In October 2015, the CMN Resolution No. 4,401/15 came into effect. It defines the Leverage Ratio ("LCR"), which should be monitored on a daily basis, as the ratio between the high liquidity assets and the total cash outflows foreseen for a 30-day period under stress conditions. The main purpose of the LCR is to ensure the existence of a minimum number of net assets in normal market conditions to be used in periods of higher shortage or necessary liquidity in order to maintain the business ongoing and insure the stability of the financial system.

In relation to liquidity risk, the CMN and the Central Bank published the Resolution No. 4,616/17 and the Circular No. 3,869/17 about the index of Long-Term Liquidity Risk (NSFR) which establish, respectively, the minimum limit/compliance conditions and the methodology for calculation and disclosure of information to the market. Both rules will be in effect from on October 1, 2018. From January, 1st, 2020, Central Bank Circular No. 3,930/19, will come into force revoking part of the Circular No. 3,869/17 changing the standards on disclosure of NSFR ratio.

Under the rule currently in effect, CMN Resolution No. 4,193/13, Brazilian financial institutions must hold a capital base (Regulatory Capital - "RC") of 8.625% or more of total RWA (Basel ratio) from January 2018 to December 2018 and since January 2019, the mandatory RC shall be equal to or higher than 8%, and calculated using specific criteria determined by the Central Bank. The calculation of the RC is subject to various deductions, including weighting factors that vary according to the nature of the asset. As of December 31, 2018, our Basel ratio was 17.8% of total RWA, which is higher than the 11.0% level required by the Central Bank until December 2018.

In December 2018, CMN Resolution No. 4,703/18 that increase the instruments that should be deducted from the Common Equity, the Additional Capital or Tier II Capital as applicable. In addition to, this Resolution included limits to this deduction and established the value that exceeds its share of Capital should be deducted from: (i) both the Additional Capital and Common Equity or from the Common Equity, in this order, instruments eligible for Tier II or others financial instruments approved to Tier I or Tier II; (ii) Common Equity, in the case of instruments eligible for Additional Capital.

The following table shows our capital positions as a percentage of total risk-weighted assets:

Form 20-F

As of December 31,	In % Basel III Prudential Consolidated		
	2018	2017	2016
Tier I Capital	13.7%	13.1%	12.0%
Common Equity	12.3%	12.3%	11.2%
Additional Capital	1.4%	0.8%	0.8%
Total Ratio	17.8%	17.1%	15.4%

164 Form 20-F – December 2018

Form 20-F

Capital Management

The Capital Management structure aims to provide conditions to the follow-up and control of our capital, thus contributing to the achievement of the strategic goals established, through the accurate planning of the capital sufficiency. In addition to the Executive Committees and a Non-Statutory Committee, which support our Board of Directors and our *Diretoria Executiva* in the decision-making process, we have an area responsible for Capital Management reporting to the Planning, Budget and Control Department, and which operates together with the Integrated Risk Control Department, affiliated companies, business areas and our various support areas.

The capital plan, which comprehends a prospective vision of at least three years, is prepared on an annual basis, and is approved by our *Diretoria Executiva* and our Board of Directors, continually monitored and controlled by the capital management area. Any threats and opportunities, growth and market share targets, as well as projected capital needs, are included in the preparation of the plan to cover risks, as well as the capital held by us. In addition, the internal capital adequacy assessment process (ICAAP) provides conditions for the assessment of sufficiency of capital, taking into account different scenarios (baseline and stress) and allows for the anticipation of capital and contingency activities to be adopted for the respective scenarios.

Recovery Plan for Systematically Relevant Financial Institutions

In the context of the ongoing process of adoption in Brazil of the international regulatory best practices, on June 30, 2016, CMN Resolution No. 4,502/16 was published, as amended by CMN Resolution No. 4,704/18, establishing the minimum requirements to be observed in the preparation and execution of recovery plans by financial institutions and other institutions authorized to operate by the Central Bank. The main objective of CMN Resolution No. 4,502/16 is to restore adequate levels of capital and liquidity and preserve the feasibility of such institutions, thereby ensuring the robustness, stability and smooth operation of the National Financial System.

Interest rate sensitivity

Management of interest rate sensitivity is a key component of our asset and liability policy. Interest rate sensitivity is the relationship between market interest rates and net interest income due to the maturity or re-pricing characteristics of interest-earning assets and interest-bearing liabilities. For any given period, the pricing structure is considered balanced when an equal amount of these assets or liabilities matures or re-prices in that period. Any mismatch of interest-earning assets and interest-bearing liabilities is known as a gap position. A negative gap denotes loss sensitivity and normally means that a decline in interest rates would have a negative effect on net interest income. Conversely, a positive gap denotes gain sensitivity and normally means that a decline in interest rates would have a positive effect on net interest income. These relationships can change significantly from day to day as a result of both market forces and Management decisions.

Our interest rate sensitivity strategy takes into account:

Interest rate sensitivity

- rates of return;
- the underlying degree of risk; and
- liquidity requirements, including minimum regulatory banking reserves, mandatory liquidity ratios, withdrawal and maturity of deposits, capital costs and additional demand for funds.

We monitor our maturity mismatches and positions and manage them within established limits. The positions are analyzed and reconsidered every second and fourth Friday of each month in our Treasury Executive Committee for Asset and Liability Management.

165 Bradesco

Form 20-F

The following table shows the maturities of our interest-earning assets and interest-bearing liabilities as of December 31, 2018 and may not reflect interest rate gap positions at other times. In addition, variations in interest rate sensitivity may exist within the re-pricing periods presented due to differing re-pricing dates. Variations may also arise among the different currencies in which interest rate positions are held.

(2) including: obligations for repurchase agreements, borrowings, onlendings and interbank deposits; and

(3) Savings deposits and insurance technical provisions and pension plans are classified as up to 30 days, without average historical turnover.

Exchange rate sensitivity

Most of our operations are denominated in *reais*. Our policy is to avoid material exchange rate mismatches. However, at any given time, we generally have outstanding long-term debt denominated in and indexed to foreign currencies, principally the U.S. dollar. As of December 31, 2018, our net foreign currency liability exposure, considering derivative financial instruments, was R\$48,177 million, or 38.6% of shareholders' equity. Consolidated net foreign currency exposure is the difference between total foreign currency-indexed or -denominated assets and total foreign currency-indexed or -denominated liabilities, including derivative financial instruments.

Our foreign currency position arises mainly through our purchases and sales of foreign currencies (mainly U.S. dollars) from Brazilian exporters and importers, from other financial institutions on the interbank market, and on the spot and forward currency markets. The Central Bank regulates our maximum outstanding long and short foreign currency positions.

Table of Contents

Form 20-F

As of December 31, 2018, the composition of our assets, liabilities and equity by currency and term was as set out in the table below. Our foreign currency assets are largely denominated in *reais* but are indexed to foreign currencies, principally the U.S. dollar. Most of our foreign currency liabilities are denominated in foreign currencies, principally the U.S. dollar.

Capital expenditures

In the past three years, we have made, and expect to continue to make moving forward, significant capital expenditures related to improvements and innovations in technology and the Internet designed to maintain and expand our technology infrastructure in order to increase our productivity, accessibility, cost efficiency and our reputation as a leader in technological innovation in the financial services sector. We have made significant capital expenditures for systems development, data processing equipment and other technology designed to further these goals. These expenditures are for systems and technology for use both in our own operations and by customers.

169 Bradesco

Form 20-F

The following table shows our capital expenditures accounted for as fixed assets in the periods shown:

	R\$ in thousands		
	2018	2017	2016
Infrastructure			
Land and buildings	426,911	140,356	95,401
Installations, properties and equipment for use	1,311,526	680,829	1,086,811
Security and communications systems	39,006	31,874	27,100
Transportation systems	2,799	4,228	3,473
SubTotal	1,780,242	857,287	1,212,785
Information Technology			
Data processing systems	1,791,316	1,936,656	2,405,093
Financial leasing of data processing systems	607,177	655,407	633,680
SubTotal	2,398,493	2,592,063	3,038,773
Total	4,178,735	3,449,350	4,251,558

During 2018, we made investments in the amount of R\$4,179 million, R\$1,780 million of which were related to infrastructure and R\$2,399 million related to information technology.

We believe that capital expenditures in 2019 and 2020 will not be substantially greater than historical expenditure levels and anticipate that in accordance with our practice during recent years, our capital expenditures in 2019 and 2020 will be funded from our own resources. No assurance can be given, however, that the capital expenditures will be made and, if made, that such expenditures will be made in the amounts currently expected.

5.G. Safe Harbor

Not applicable.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

6.A. Board of Directors and Board of Executive Officers

We are managed by our Board of Directors and our Board of Executive Officers. The Board of Directors establishes our corporate strategy and policies and supervises and monitors the Board of Executive Officers. In turn, the Board of Executive Officers implements the strategy and policies set by the Board of Directors and is responsible for our day-to-day management.

Our Board of Executive Officers currently comprises (i) the *Diretoria Executiva* and (ii) our Officers, Department Officers and Regional Officers. The *Diretoria Executiva* consists of one Chief Executive Officer, four Vice-Presidents, seven Managing Officers and seven Deputy Officers.

Our eight-member Board of Directors meets six times during the year and on an extraordinary basis whenever necessary. It is responsible for:

170 Form 20-F – December 2018

Form 20-F

- establishing our corporate strategy;
- reviewing our business plans and policies; and
- supervising and monitoring the activities of our Board of Executive Officers.

Our Audit Committee, among other designations, is in charge of approving the engagement of our independent auditors for audit and non-audit services provided to our subsidiaries or to us.

The *Diretoria Executiva* meets weekly and is responsible for:

- implementing the strategy and policies established by our Board of Directors; and
- managing our day-to-day business.

Several members of our Board of Directors and the *Diretoria Executiva* also perform senior management functions at our subsidiaries, including BRAM, Bradesco Financiamentos, Bradesco Consórcios, Bradesco BBI, Bradesco Leasing, BEM DTVM, Bradesco Cartões, Bradesco Seguros and subsidiaries. Each of these subsidiaries has an independent management structure.

Pursuant to Brazilian law, the election of all members of our Board of Directors and Board of Executive Officers are subject to approval by the Central Bank.

We present below biographies of the current members of our Board of Directors and *Diretoria Executiva*:

6.B. Compensation

The maximum global compensation of our members of the Board of Directors and Board of Executive Officers are established at the Shareholders' Meetings. These bodies comprise our Executive Officers, Department Officers, Officers, Regional Officers and Officers of our subsidiaries for the ensuing year. In 2018, our shareholders set the global compensation for our Board of Directors and our Board of Executive Officers and our subsidiaries at R\$530.7 million.

In 2018, our Directors, our Board of Executive Officers and our subsidiaries received aggregate compensation of R\$485.9 million for their services. Regarding the Management's compensation, part of it was paid as variable compensation. The current compensation policy mandates that 50.0% of the net variable compensation amount is meant for the acquisition of BBD Participações S.A. preferred shares ("PNB BBD shares") and/or of our preferred shares issued by Bradesco ("PN Bradesco shares") to be paid in three annual sequential installments. The first installment is due a year after the payment date. This policy complies with CMN Resolution No. 3,921/10, which regulates compensation policies for senior management of financial institutions.

Our Directors, our Board of Executive Officers and our subsidiaries have the right to participate in the same pension plans available to all our employees. In 2018, we contributed R\$474.4 million to pension plans on behalf of our Directors, members of our Board of Executive Officers and of our subsidiaries.

6.C. Board Practices

Our shareholders elect the members of our Board of Directors at the Annual Shareholders' Meeting for two-year terms and members may be re-elected for consecutive terms. The Board of Directors appoints the members of our Board of Executive Officers for two-year terms, which can also be extended for consecutive terms.

In addition to this requirement, another condition, included in our Bylaws, remains in force to become a member of our *Diretoria Executiva*, a person must have worked for us or our affiliates for a minimum of 10 consecutive years. The Board of Executive Officers, besides the Executive Officers, consists of 34 Department Officers, 21 Officers and 19 Regional Officers. Department Officers, Officers and Regional Officers direct the business of each of our various divisions and branches and report to the *Diretoria Executiva*. To become a Department Officer, Officer or Regional Officer, a person must be an employee or manager at our staff or one of the affiliates. Our Board of Directors may, for up to 25.0% of the members of our Board of Executive Officers, waive the fulfillment of certain requirements for their appointment, as follows:

- Executive Officers – the Board of Directors can waive the requirement pursuant to which the person should be an employee of our staff or any of the affiliates for at least 10 years. Notwithstanding the above, such requirement cannot be waived for persons to be appointed as Chief Executive Officers or Vice-Presidents; and
- Department Officers, Officers and Regional Officers – the Board of Directors can waive the requirement pursuant to which the person should be an employee or member of the management of our staff or any of the affiliates.

The members of our Board of Directors are required to work exclusively for us, unless an exception is granted by the Board of Directors. Notwithstanding the above, the members of our Board of Directors are not required to be or to have been our employees, and service as a member of our Board of Directors does not constitute employment with us.

Form 20-F

Fiscal Council

Under Brazilian law, corporations may have a "*Conselho Fiscal*," or Fiscal Council, an independent corporate body with general monitoring and supervision powers and shall have from three to five effective members and the same number for alternates. As from the Special Shareholders' Meeting held in March 2015, our Bylaws require our Fiscal Council to be a permanent corporate body.

Our Fiscal Council has five full members (Ariovaldo Pereira, Domingos Aparecido Maia, José Maria Soares Nunes, Walter Luis Bernardes Albertoni and Ivanyra Maura de Medeiros Correia) and four alternates members (João Batista de Moraes, Nilson Pinhal, Renaud Roberto Teixeira and Reginaldo Ferreira Alexandre), since on March 3, 2019, Mr. Cezar Manoel de Medeiros resigned from the his position, all of whom were elected on March 11, 2019, for a one-year term that will expire in March 2020. In accordance with Brazilian Corporate Law, our Fiscal Council has the right and obligation to, among other things:

- supervise, through any of its members, the actions of our managers and to verify their fulfillment of their duties;
- review and issue opinions regarding our financial statements prior to their disclosure, including the Notes to the financial statements, the independent auditor's report and any Management reports;
- opine on any management proposals to be submitted to the shareholders' meeting related to:
 - changes in our social capital;
 - issuance of subscription warrants;
 - investment plans and capital expenditure budgets;
 - distributions of dividends; and
- transformation of our corporate form and corporate restructuring, such as takeovers, mergers and spin-offs.
- inform our Management of any error, fraud, or misdemeanor detected and suggest measures management should take in order to protect our main interests. If our Management fails to take the measures required to protect the company's interests, they are required to inform the shareholders' meeting of these facts; and
- call shareholders' meetings if Management delays the general shareholders' meeting for more than one month and call special shareholders' meetings in case of material or important matters.

Board Advisory Committees

Our shareholders approved, at the Special Shareholders' Meeting held in December 2003, the creation of the Audit Committee, the Compliance and Internal Control Committee and the Compensation Committee. At the Special Shareholders' Meeting held in March 2006, our shareholders approved the transformation of the Ethical Conduct Committee into a statutory committee. At the special shareholders' meeting held in March 2008, our shareholders approved the creation of the COGIRAC. At the Special Shareholders' Meeting held in March 2013, the shareholders resolved to exclude from the Bylaws Articles 22, 24 and 25, which dealt, respectively, with organizational components of the Internal Controls and Compliance Committee, the Ethical Conduct Committee and COGIRAC, reflecting the proposal presented by the Executive Committee of Corporate Governance, assessed by the Board of Directors, to maintain in the Bylaws only those committees whose characterization as statutory is required by legal norms, giving greater speed to the process of managing the committees subordinated to the Board of Directors. Thus, only the Audit Committee and the Compensation Committee remain as statutory roles, which should not be construed as a weakening of the corporate governance structure, as the Board of Directors will maintain these committees under its structure, which removal from the Bylaws was approved.

Statutory Committees

Audit Committee – Pursuant to our Bylaws and to Central Bank regulations since April 2004, we established the Audit Committee, comprised of three to five members, one of which is appointed coordinator, all of them appointed and subject to replacement by the Board of Directors. Appointments to our Audit Committee are for a term of two years. The former members of the Audit Committee may only rejoin the body, after at least three years have passed since the last permitted reappointment. Up to one third of the Audit Committee's members may be re-elected for a single consecutive term, waiving this period.

182 Form 20-F – December 2018

Form 20-F

The current members of the Audit Committee are Milton Matsumoto (coordinator), Paulo Roberto Simões da Cunha (financial expert), Wilson Antonio Salmeron Gutierrez, Paulo Ricardo Satvro Bianchini and José Luis Elias, members with no specific designation. Milton Matsumoto is also a member of the Board of Directors.

The responsibilities of the Audit Committee include:

- establishing its own rules of operation;
- recommending to the Board of Directors the outside firm which should be hired to provide independent audit services, the amount of compensation such firm should receive and providing recommendations as to substitute auditors;
- previously analyzing and authorize hiring, in exceptional cases, our independent auditor for services other than auditing financial statements, from the point of view of compliance with rules on independent status;
- reviewing financial statements prior to their disclosure, including the notes to the financial statements, the independent auditor's report and Management reports;
- establishing and disclosing procedures for responding to any reports or allegations of a failure to comply with applicable legal requirements or internal codes and regulations, including procedures to ensure the confidentiality and protection of any persons providing information regarding such failures;
- evaluating the effectiveness of the work of both the internal and the independent auditors, including their compliance with applicable legal obligations and internal regulations and codes;
- meeting with our Senior Management and both the independent and the internal auditors at least quarterly;
- assessing the Senior Management's responsiveness to any recommendations made by both the independent and internal auditors;
- advising our Board of Directors regarding any conflicts between the independent auditors and the Board of Executive Officers;
- recommending to our Senior Management, the correction or improvement of policies, practices and procedures identified when performing their activities; and
- following up by occasion of its meetings, on its recommendations and requests for information, including the planning of the respective auditing works in order to turn into minutes the content of such meetings.

Compensation Committee – The Compensation Committee has three to seven members, all of whom are members of our Board of Directors with terms of office of one year, and according to the provisions set forth in CMN Resolution No. 3,921/10, should have at least one non-management member. Members are appointed by and may be replaced by the Board of Directors. The committee's primary responsibility is to advise the Board of Directors in the coordination of the Management compensation policy.

Non-Statutory Committees

Compliance and Internal Control Committee – the Compliance and Internal Control Committee is comprised of at least five members. All members are formally appointed and may be replaced by the Board of Directors, including its Coordinator. The Committee's primary responsibility is to assist the Board of Directors with the performance of its duties related to the adoption of strategies, policies and measures governing internal controls, mitigation of risks, and compliance with the rules applicable to us.

Integrity and Ethical Conduct Committee – the Integrity and Ethical Conduct Committee is composed of at least five members. All members are formally appointed and may be replaced by the Board of Directors, including its Coordinator. The Committee's primary responsibility is to propose actions to ensure the enforcement of our Corporate and Sector Codes of Ethical Conduct, and of the rules of conduct related to issues of anticorruption and competition, so that they remain effective.

183 Bradesco

Form 20-F

Integrated Risk Management and Capital Allocation Committee - COGIRAC – The Integrated Risk Management and Capital Allocation Committee is composed of at least five members, all formally nominated and may be replaced by the Board of Directors, including its Coordinator. This Committee's primary responsibility is to advise the Board of Directors in the performance of its duties in the management and control of risks and capital in the sense of the consolidated economic financial entity.

184 Form 20-F – December 2018

Form 20-F

Sustainability and Diversity Committee – the Sustainability and Diversity Committee is composed of at least five members, all formally nominated and may be replaced by the Board of Directors, including its Coordinator. The Committee's purpose is to advise the Board of Directors in the performance its tasks related to fostering sustainability strategies, including the establishment of corporate guidelines and actions and reconciling economic development issues with those of socioenvironmental responsibility.

Succession Planning and Nomination Committee – made up of at least five members, all formally appointed and dismissible by the Board of Directors, including its Coordinator. The purpose of the Committee is to advise the Board of Directors and in the process of nomination of Qualified Employees, within the scope of the Bradesco Organization.

Risks Committee – composed by at least three and at most five members, all formally appointed and dismissed by the Board of Directors, including its Coordinator. The purpose of the Committee is to advise the Board of Directors in the performance of its duties related to risk and capital management.

Ombudsman

At the Special Shareholders' Meeting held in August 2007, our shareholders formalized the creation of the Ombudsman. Previously we had an informal Ombudsman. The Ombudsman works on behalf of all our institutions, authorized to operate by the Central Bank. There is one Ombudsman, with a two-year term. The Ombudsman is appointed and may be dismissed by the Board of Directors.

The Ombudsman is responsible for:

- checking strict compliance with legal and regulatory rules related to consumer's rights and acting as a communication channel among us and our institutions authorized to operate by the Central Bank, and our customers and users of its products and services, including mediating conflicts;
- receiving, registering, instructing, analyzing and formally and properly dealing with complaints from customers and users of products and services of the abovementioned institutions, not resolved by the usual services offered by the branches or by any other service station;
- giving necessary clarifications and replying to claimants regarding the status of complaints and the solutions offered;
- informing claimants of the waiting time for a final answer, which should not exceed ten business days, and may be extended, exceptionally and in a justified manner, only once, for an equal period limiting the number of extensions to 10.0% of total claims in the month, and the claimant must be informed of the reasons for the extension;
- sending a conclusive answer to the claimant's demand until expiration of the above waiting time;

- proposing to the Board of Directors corrective or improvement measures to procedures and routines based on the analysis of the complaints received; and
- preparing and sending to the Board of Directors, the Audit Committee and the Internal Audit, at the end of each semester, a qualitative report regarding the Ombudsman's performance, comprising the proposals addressed in the prior item, if any.

185 Bradesco

Form 20-F

According to our Bylaws and in order to comply with the rules of the Central Bank, in March 2018, Nairo José Martinelli Vidal Júnior was appointed by the Board of Directors as an Ombudsman, until the first Extraordinary Meeting of the Board of Directors to be held after the Annual Shareholders' Meeting of 2020.

The Ombudsman may be dismissed by our Board of Directors at any time, during the term of his mandate, in cases of noncompliance with the obligations inherent to his position or if his performance is below expectation.

Legal Advice

In pursuance of the best practices of Corporate Governance and for the dealing of specific legal affairs, the Board of Directors and the Board of Executive Officers established, in February 2019, the Legal Advice Department.

The Department will have as duties the provision of legal advice to the Board of Directors and to the Board of Executive Officers in issues of strategic interest, in the shareholding, contractual, and regulatory fields, as well as to follow up legal and administrative actions of high complexity for the Organization.

Form 20-F

Internal Audit

Our internal audit area is directly subordinated to the Board of Directors and independently assesses business and information technology processes, contributing to the mitigation of risks, the sufficiency and effectiveness of internal controls, and compliance with internal and external policies, rules, standards, procedures, and regulations. The methodology and execution of the work are certified by the Brazilian Institute of Independent Auditors, which takes into account the technical recommendations of the Institute of Internal Auditors (“IIA”) in its assumptions.

6.D. Employees

As of December 31, 2018, we had 98,605 employees, of which 85,815 were employed by us and 12,790 were employed by our subsidiaries, compared to 98,808 employees as of December 31, 2017 and compared to 108,793 employees as of December 31, 2016.

The following table sets forth the number of our employees and a breakdown of employees by main category of activity and geographic location as of the dates indicated:

December 31,	2018	2017	2016
Total number of employees	98,605	98,808	108,793
Number by category of activity			
Bradesco	87.1%	87.2%	87.2%
Insurance activities	6.8%	6.4%	6.2%
Pension plan activity	0.6%	0.5%	0.4%
Other categories	5.5%	5.9%	6.2%
Number by geographic location			
Cidade de Deus, Osasco	10.8%	10.3%	10.5%
Alphaville, Barueri	4.1%	3.8%	2.2%
São Paulo	15.8%	16.2%	16.5%
Other locations in Brazil	69.0%	69.4%	70.5%
International	0.3%	0.3%	0.3%

Our part-time employees work six hours a day, while our full-time employees work eight hours a day, both in a five-day workweek. 24% of the employees worked part-time and 76% as full-time employees as of December 31, 2018, compared to 25% of the part-time employees and 75% of the full-time employees as of December 31, 2017 compared to 26% of the part-time employees and 74% of the full-time employees as of December 31, 2016.

We generally hire our employees at the entry level, and encourage them to remain with us throughout their careers. All employees are entitled, through internal hiring process, to fill new positions, including those in Middle Management, senior and managerial positions.

As of December 31, 2018, approximately 50.1% of our employees were associated with one of the labor unions that represent bank or insurance employees in Brazil. We maintain good relations with our employees as well as with their respective labor unions, which we believe is owing mostly to our policy of appreciating staff and having transparent relationships. We are party to two collective bargaining agreements: (i) one relating to our banking employees; and (ii) the other to our insurance sector employees.

We offer our employees benefits which include our health and dental plans enabling beneficiaries to choose their doctors, hospitals and dentists anywhere in Brazil, retirement and pension plans, and life and accident insurance with varying coverages. We also have an employee support program – called “Lig Viva Bem,” offering 24-hour support and making available 100% confidential free-of-charge telephone calls. The team is composed of psychologists, social workers and other specialized professionals guiding and supporting employees and their dependents in relation to personal, professional, familiar, legal, nutritional and affective issues. These benefits are available regardless of an employee's position. Currently, 53.6% of our employees participate in our pension plan Bradesco Vida e Previdência. In accordance with our collective bargaining agreement, we also offer our employees profit-sharing compensation plans.

Through *Universidade Corporativa Bradesco - UniBrad* (Bradesco Corporate University), whose mission is to provide professional education and social mobility, we offer development solutions and training to our employees. In 2018, we invested R\$166.9 million in professional training with a total of more than 793.4 thousand participations.

187 Bradesco

Form 20-F

6.E. Share Ownership

As of March 11, 2019, the members of our Board of Directors and Board of Executive Officers indirectly held 2.9% of our voting capital and 1.5% of our total capital stock, in aggregate, through a company called BBD Participações S.A., or "BBD." In addition, some of our directors and executive officers directly hold shares of our capital stock. However, as of March 11, 2019, none of our directors and executive officers individually owned, directly or indirectly, more than 1.0% of any class of our shares.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

7.A. Major Shareholders

As of March 11, 2019, our capital stock was composed of 3,359,929,223 common shares (5,535,803 treasury shares) and 3,359,928,872 preferred shares (20,741,320 treasury shares), with no par value.

For information on shareholders' rights and our dividend distributions, see "Item 8.A. Consolidated Statements and Other Financial Information – Policy on dividend distributions" and "Item 10.B. Memorandum and Articles of Association – Organization – Allocation of net income and distribution of dividends."

The following chart illustrates our capital ownership structure as of March 11, 2019:

188 Form 20-F – December 2018

Table of Contents

Form 20-F

The following table shows the direct ownership of our outstanding common and preferred shares as of March 11, 2019, Cidade de Deus, Fundação Bradesco and NCF directly hold 5.0% or more of our securities with voting rights:

Shareholder	Number of shares, except %				
	Number of common shares	Common shares as a percentage of outstanding shares	Number of preferred shares	Preferred shares as a percentage of outstanding shares	Total Number of shares

(1) Also indirectly owns, through its interest in Cidade de Deus Participações and Nova Cidade de Deus, and NCF F 41.8% of our common shares and 21.9% of our total shares.

(*) None of the members of our Board of Directors, Board of Executive Officers or other administrative, supervisory management bodies directly or beneficially holds 1.0% or more of any of our classes of shares, and their individual ownership has not been previously disclosed to our shareholders or otherwise made public. For more information, see "Share Ownership".

The following is a description of our principal beneficial shareholders as of March 11, 2019. None of the principal beneficial shareholders have voting rights that differ from those of the other holders of our common shares.

Cidade de Deus Companhia Comercial de Participações

Cidade de Deus Companhia Comercial de Participações is a holding company, which we refer to as "Cidade de Deus Participações". It directly holds 45.6% of our voting capital and 22.9% of our total capital. Its shareholders are: (i) Nova Cidade de Deus, with 47.9% of its common and total shares; (ii) Fundação Bradesco, with 35.4% of its common and total shares; and (iii) the Aguiar Family, with 16.7% of its common and total shares as of March 11, 2019. The company's capital stock is made up of common, nominative book-entry shares, with no par value.

Nova Cidade de Deus Participações

Nova Cidade de Deus Participações is a holding company which we refer to as "Nova Cidade de Deus". It holds investments in other companies, mainly those that, directly or indirectly, own our voting capital. As of March 11, 2019, the company owned, through its participation in Cidade de Deus Participações, 23.5% of our common shares and 12.0% of our total shares.

The capital stock of Nova Cidade de Deus is divided in class A and class B common shares and one class of preferred shares. Ownership of the class B common shares is limited to:

189 Bradesco

Form 20-F

- members of our *Diretoria Executiva*;
- members of our Board of Directors who have been officers of Banco Bradesco or its controlled entities; and
- commercial or civil associations in which the majority of the voting interest is owned by the individuals above.

Ownership of Nova Cidade de Deus' class A common shares is limited to the persons entitled to own class B common shares and any civil associations and private foundations managed by them or their appointed representatives. Only the class A and class B common shareholders in Nova Cidade de Deus have voting rights.

The Aguiar Family

As of March 11, 2019, the members of the Aguiar Family indirectly owned, by way of their participation in Cidade de Deus Participações, 8.2% of our common shares and 4.2% of our total shares. In addition, the same parties directly held a total of 3.6% of our common shares, 3.9% of our preferred shares, which correspond to 3.8% of our total shares. None of the members of the Aguiar Family individually or directly holds more than 5.0% of our voting shares.

Fundação Bradesco

As of March 11, 2019, Fundação Bradesco owned 58.8% of our common shares, 2.0% of our preferred shares and 30.5% of our total shares, directly and indirectly, through its participation in Cidade de Deus Participações, Nova Cidade de Deus, NCD Participações and NCF.

Under the terms of Fundação Bradesco's bylaws, all of our directors, members of the *Diretoria Executiva* and department officers, as well as directors and officers of Cidade de Deus Participações, serve as members of the board of trustees of Fundação Bradesco, known as the "Board of Trustees." They receive no compensation for their service on the Board of Trustees.

Fundação Bradesco is one of the largest private socio-educational programs in Brazil, it is an innovative social investment initiative which reaches every state in Brazil and the Federal District, and its 40 schools are primarily located in regions of accentuated educational deprivation.

In 2018, a total of 94,256 students attended Fundação Bradesco schools from early childhood through to secondary school, and secondary-level vocational or technical education, as well as courses for young people and adults and initial and continuing education for employment and income. In addition to quality formal education free of charge, approximately 42,000 elementary school students are also provided with school uniforms, classroom stationery, meals, and medical and dental care.

Our "Escola Virtual" (Virtual School) e-learning portal's distance learning programs ("EaD"), benefited more than 780,000 students who completed at least one of more than 90 courses offered, and another 9,035 students were involved in projects and partnership initiatives such as our "Educate - Act" (*Educa+Ação*)

Program as well as educational courses and talks on information technology.

The IT for the Visually Handicapped Program has benefited and trained 12,687 students and fostered social inclusion for thousands of people.

Fundação Bradesco's 2018 budget totaled R\$606.9 million. Over the last 10 years, Fundação Bradesco has invested a total of R\$6.9 billion (at current values) in the foundation.

BBD

BBD indirectly owned 6.1% of our common shares and 3.1% of our total shares as of March 11, 2019, through its participation in Nova Cidade de Deus. BBD is a holding company that was organized to hold interests in our capital and in the capital of our indirect and direct shareholders. In 1999, BBD acquired from several shareholders an indirect interest of 5.5% of our voting capital. Only members of the Board of Directors and of the Board of Executive Officers, as well as our skilled employees, of Bradespar, or of our subsidiaries and national not-for-profit legal entities or national companies controlled by them that have as managers only our employees and/or managers, may hold BBD shares. However, only the members of the Board of Directors and Executive Officers may own voting shares. Most of our Board members and Executive Officers own shares in BBD.

NCF

NCF is a holding company controlled by Cidade de Deus Participações and by Fundação Bradesco. As of March 11, 2019, NCF held 8.4% of our common shares and 5.3% of our total shares.

Form 20-F

Market

Direct market holdings represented 28.9% of our voting capital as of March 11, 2019 and 97.7% of our preferred shares. Common and preferred shares held by the market accounted for 63.2% of our share capital.

As of December 31, 2018, 1,356 foreign investors with a stake in our share capital in the amount of: (i) 57.7% of preferred shares; and (ii) 10.2% of common shares. Of the reported percentages, the GDRs (Global Depositary Receipts) accounted for 0.01% of preferred shares and the ADRs (American Depositary Receipts) accounted for 22.7% of preferred shares and 0.04% of common shares.

7.B. Related Party Transactions

Transactions with controllers, joint control and related parties, and key management personnel are conducted on arms' length terms as demonstrated below:

December 31,	R\$ in thousands

CMN Resolution No. 4,693/18 contains provisions conditions and limits for the application of credit transactions with related parties through financial institutions and through leasing companies, pursuant to Article 34 of Laws No. 4,595/64 and No. 7,492/86.

Under this resolution, the following are considered related-parties of an institution:

- its controllers (individuals or legal entities), pursuant to Article 116 of Law No. 6,404/76, as well as their spouses, partners and blood relatives up to the second degree;

- officers and members of statutory or contractual bodies, as well as their spouses, partners and blood relatives up to the second degree;
- individuals with qualified equity interest; and
- legal entities with qualified equity interest (equivalent to 15% of the Capital) (i) in which they have a direct or indirect stake; (ii) in which there is effective operational control or relevance in the deliberations, regardless of equity interest; and (iii) that have an officer or member of the board of directors in common.

Conditions for the execution of loan operations with related parties

The institutions can only perform loan operations with related parties under conditions compatible with the market, using the parameters adopted in loan operations of the same type for borrowers with the same profile and credit risk.

191 Bradesco

Form 20-F

Limits to operate

The loan operations with related parties must not be higher than 10% of the value of the adjusted shareholders' equity of the financial institution granting the credit, observing the following individual caps; (i) 1% for contracts with an individual; and (ii) 5% for contracts with a legal entity.

The limits referred to in this article shall be established on the date of concession of the loan operation, based on the accounting document concerning the month preceding the base date of reference.

Registration Log

Financial institutions must keep specific and updated records of the names of legal entities, individuals and their direct relatives, collateral or by affinity up to the second degree, which are classified as related parties. For further details on restrictions on the operations of financial institutions, see "Item 4.B. Business Overview – Regulation and Supervision – Bank regulations – Principal limitations and restrictions on activities of financial institutions."

For further information on related party transactions, see Note 45 to our consolidated financial statements in "Item 18. Financial Statements."

7.C. Interests of Experts and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

8.A. Consolidated Statements and other Financial Information

See "Item 18. Financial Statements," which contains our audited consolidated financial statements prepared in accordance with IFRS.

Legal proceedings

We are a party to civil, tax and labor administrative proceedings and lawsuits that have arisen during the normal course of our business, which main matters refers to:

Labor matters – The labor matters in which we were involved during the year ended December 31, 2018 are mainly claims brought by former employees and outsourced employees seeking indemnifications, especially for unpaid overtime, according to Article 224 of the Consolidation of Labor Laws (CLT). In

proceedings in which a judicial deposit is used to guarantee the execution of the judgment, the labor provision is made considering the estimated loss of these deposits. For proceedings with similar characteristics, the provision is recorded based on the average calculated value of payments made for labor complaints settled in the past twelve months; and proceedings originating from acquired banks, with unique characteristics, the calculation and assessment of the required balance is conducted periodically, based on the updated recent loss history. Overtime is monitored by using electronic time cards and paid regularly during the employment contract and, accordingly, the claims filed by our former employees do not represent significant amounts.

Tax-related matters – We are also a party to a number of judicial lawsuits and administrative proceedings, mainly involving issues related to constitutionality and fair interpretation of some tax requirements. Some claims relate to the non-payment of taxes which we are contesting; others stem from collections (notifications) of supervisory agencies of the Ministry of Finance and others aim at recovering taxes we understand have already been paid or unduly paid. The amounts we have not paid in view of these claims have in general been provisioned in conformity with applicable accounting rules and are restated based on criteria established by tax legislation. On the other hand, those taxes to be refunded are only recorded when the prospect of realizing these assets is practically certain. See Note 18 to our consolidated financial statements for a description of our most relevant tax claims.

Civil matters – We are a party to various civil lawsuits, although none of them are material. Lawsuits consist mainly of claims for indemnification for presumed damages caused during the ordinary course of business activities and cases where inflation indices were not applied to the adjustment of saving accounts as a result of economic plans, although we complied with the law in force at the time. For more information on lawsuits in relation to economic plans, see “Item 3.D. Risk Factors – Risks relating to us and the Brazilian banking industry – The Brazilian Supreme Court is currently deciding cases relating to the application of inflation adjustments which may increase our costs and cause losses”. Probable risk cases are all provisioned, and do not incur in a material adverse effect on our results of operations or financial position; and

192 Form 20-F – December 2018

Form 20-F

Other matters – We are currently not subject to any significant disputed processes with the Central Bank, CVM, ANS or SUSEP. We comply with all regulations applicable to the business, issued by the aforementioned regulatory bodies.

In this context, there is no individually significant or litigation matters of material importance or risk that deserves to be highlighted, as well as pending or imminent lawsuits that if decided against us would have a material adverse effect on our business, financial condition, properties, prospects or results of operations.

As of December 31, 2018, 41.4% of the total amount of R\$19,802 million, related to our provisions, relates to tax and social security issues, mainly related to IRPJ and CSLL, PIS, COFINS and INSS .

Labor matters correspond to 30.2%, while civil liability represent 28.4% of the same amount, which we believe is adequate to cover any potential exposure arising from the issues presented above.

Among the remaining litigation, where the probability of loss is considered as possible, we highlight those related to tax and social security matters, which main lawsuits amount to R\$20,673 million as of December 31, 2018. (R\$18,852 million as of December 31, 2017).

For additional information, see Note 42 to our consolidated financial statements in "Item 18. Financial Statements".

Policy on dividend distributions

Our Bylaws require our Board of Directors to recommend, at each annual shareholders' meeting, that our net income for the fiscal year (in accordance with BR GAAP) be allocated as follows:

- 5.0% for the legal reserve, not exceeding 20.0% of the paid-up capital in each fiscal year. This requirement shall not be applicable in fiscal years when the legal reserve, added to our other capital reserves, exceeds 30.0% of our paid-up capital;
- an amount (to be determined by our shareholders based on probable potential losses) to a contingency reserve against future losses;
- at least 30.0% (after the deductions for the legal reserves and contingencies) for mandatory distribution to our shareholders; and
- any outstanding balance to a statutory profit reserve for the maintenance of an operating margin that is compatible with our credit businesses, up to a limit of 95.0% of our paid-up capital.

Our Bylaws also authorize our shareholders to allocate an amount to a reserve for realizable revenue. Our shareholders have never allocated amounts to such reserve.

A minimum of 30.0% of our net income must be distributed as annual dividends and must be paid out within 60 days following the Annual Shareholders' Meeting. However, Brazilian Corporate Law permits us to suspend payment of the mandatory dividends if our Board of Directors reports, at the shareholders' meeting, that the distribution would be incompatible with our financial condition, and our shareholders approve the suspension by a simple majority vote. Under the Brazilian Corporate Law, the Board of Directors shall file a report with the CVM, justifying the suspension, within five days after the Annual Shareholders' Meeting. The income not distributed as dividends due to suspension must be allocated to a special reserve. If it is not absorbed by subsequent losses, the amount in the reserve shall be paid as dividends as soon as our financial situation allows us to.

Preferred shareholders are entitled to receive dividends per share in an amount 10.0% greater than the dividends per share paid to common shareholders.

Our *Diretoria Executiva*, subject to approval by the Board of Directors, may distribute dividends based on the profits reported in interim financial statements. The amount of distributed interim dividends shall not exceed the amount of the additional paid-in capital. Our *Diretoria Executiva* bases the amount of the interim dividends to be distributed on previously accumulated profits or retained earnings.

Since 1970, we have been distributing interim dividends on a monthly basis. Today we maintain an automatic system for the monthly payment of interest on equity.

Consistent with Brazilian law, our Bylaws allow our *Diretoria Executiva*, upon approval by the Board of Directors, to make distributions in the form of interest on equity instead of dividends. Payments of interest on equity may be included as part of any mandatory dividends. Since July 1997, we have made monthly payments of interest on equity at an amount approved by our Board of Directors before the statement of dividends at the end of each fiscal year. The amounts paid as interest on equity, net of income tax, are discounted from the amount of dividends declared.

Form 20-F

Pursuant to Brazilian law, a shareholder who does not receive a dividend payment may start a proceeding for the collection of these payments within three years following the dividends statement date. After this period, unclaimed dividends return to the company.

Our policy relating to dividend distributions and/or interest on equity is to maximize the amount of distributions, in accordance with our tax management strategy. For additional information, see "Item 5.A. Operating Results – Overview – Taxes."

8.B. Significant Changes

See "Item 4.A. History and Development of the Company – Recent Acquisitions."

ITEM 9. THE OFFER AND LISTING

9.A. Offer and Listing Details

Our ADSs are traded on the New York Stock Exchange ("NYSE"), under the symbols "BBD" (preferred share ADSs) and "BBDO" (common share ADSs).

Our preferred share ADSs were first listed on the NYSE in 2001. Each preferred share ADS corresponds to one preferred share.

An increase to our capital stock by R\$8,000,000 thousand was decided at the Special Shareholders' Meeting held on March 11, 2019 and was approved by the Central Bank on March 19, 2019, increasing the capital stock from R\$67,100,000 thousand to R\$75,100,000 thousand, with a bonus of 20% in shares, through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve," in compliance with the provisions in Article 169 of Law No. 6,476/76, issuing 1,343,971,619 new nominative-book entry shares, with no nominal value, whereby 671,985,845 are common and 671,985,774 are preferred shares, which will be attributed free-of-charge to the shareholders as bonus, to the ratio of 2 new shares for every 10 shares of the same type, the shareholders registered with us on March 29, 2019.

Our shares are listed in Brazil's main stock indexes, including the indexes that measure the total return of a theoretical portfolio composed of 50 and 100 shares, IBrX-50 and IBrX-100, respectively, selected from among the most traded shares on B3; the IBrA (Broad Brazil Index); the IFNC (Financial Index, composed of banks, insurance companies and financial institutions); the ISE (Corporate Sustainability Index); the IGCX (Special Corporate Governance Stock Index); the IGCT (Corporate Governance Trade Index); the ITAG (Special Tag-Along Stock Index), the index composed of shares of companies listed in the IBrX-50 index and that accepted taking part in this initiative by adopting transparent greenhouse gas emission practices (ICO2); and the Mid-Large Cap Index – MLCX (which measures the return of a portfolio composed of the highest capitalization companies listed). Abroad, our shares are listed on the Dow Jones

Sustainability World Index, in the Dow Jones Sustainability Emerging Markets portfolio of the NYSE, and on the FTSE Latibex Brazil Index of the Madrid Stock Exchange.

In January 2012, the Central Bank authorized our creation of an ADR program for our common shares in the USA market. As part of this authorization, and after government had affirmed it as being in its interest, the Central Bank increased the limit of foreign interest in our capital stock from 14.0% to 30.0%. The increase in the limit of foreign interest in our common shares did not alter our ownership or control structure. In March 2012, our common share ADSs became listed on the NYSE under the symbol "BBDO." Each common share ADS corresponds to one common share.

Our shares are registered in book-entry form and we perform all the services of safe-keeping and transfer of shares. Our shareholders may choose to hold their shares registered at the Stock Exchange of B3 (former Brazilian Clearing and Depository Corporation - *Companhia Brasileira de Liquidação e Custódia* – CBLC). Under Brazilian law, non-Brazilian holders of our shares may be subject to certain adverse tax consequences due to their ownership and any transfer of our shares. For further discussion of the restrictions on the transfer of preferred shares, see "Item 10.B. Memorandum and Articles of Association – Organization – Form and transfer" and "Item 10.D. Exchange Controls."

Our preferred share ADSs and common share ADSs are represented by preferred share ADRs and common share ADRs. Our preferred share ADSs and common share ADSs may be held in registered form with the depository – The Bank of New York Mellon – or in book entry form through financial institutions that are members of the "Depository Trust Company" or DTC. The depository bank, as registrar, performs the services of transfer of the preferred share ADRs and common share ADRs. Title to a preferred share ADR or common share ADR (and to each preferred share ADS or common share ADS evidenced thereby), when properly endorsed or accompanied by proper instruments of transfer, is transferable by delivery with the same effect as in the case of a certificated security under the laws of the State of New York. Holders of the preferred share ADRs and common share ADRs who transfer their preferred share ADRs and common share ADRs may be required to:

194 Form 20-F – December 2018

Form 20-F

- reimburse the depositary bank for any taxes, governmental charges or fees the depositary bank has paid;
- pay any transfer fees as required by the deposit agreements;
- produce satisfactory proof of identity and genuineness of their signatures or any other documents required by the deposit agreements;
- comply with any United States, Brazilian or other applicable laws or governmental regulations; and
- comply with such reasonable regulations, if any, as we and the depositary bank may establish consistent with the deposit agreements.

All of our outstanding shares are fully paid and non-assessable.

The rights of holders of our preferred shares are limited in comparison with those of the holders of common shares in several material ways:

- each common share entitles the holder to one vote at shareholders' meetings, while holders of preferred shares are only entitled to a vote in the limited circumstances described in "Item 10.B. Memorandum and Articles of Association – Organization – Voting rights;" and
- the nature of preferred shareholders' preemptive rights to subscribe for shares or convertible securities depends on the proportion of capital that would be represented by preferred shares after the capital increase, as described under "Item 10.B. Memorandum and Articles of Association – Organization – Preemptive rights."

The holders of the preferred share ADSs and common share ADSs have the rights corresponding to the underlying shares, subject to the Deposit Agreements. Owners of the preferred share ADSs and common share ADSs are parties to the Deposit Agreements and therefore are bound to its terms and to the terms of the preferred share ADRs and common share ADRs that represent the preferred share ADSs and common share ADSs.

9.B. Plan of Distribution

Not applicable.

9.C. Markets

Trading on the B3

B3 is a publicly traded corporation. Beginning in April 2000, the Brazilian stock exchanges were reorganized through the execution of protocols of intention by the Brazilian stock exchanges. Until April 2004, all shares underlying securities were traded only on the B3, with the exception of privatization auctions, which occurred on the Rio de Janeiro Stock Exchange. In May 2004, the Rio de Janeiro Stock Exchange reopened for the trading of certain Brazilian government securities.

If you were to trade in our shares on the B3, your trade would settle in three business days after the trade date. The seller is ordinarily required to deliver the shares to the exchange on the third business day following the trade date. Delivery of and payment for shares are made through the facilities of the Central Depository of B3.

The B3 is less liquid than the NYSE or other major exchanges in the world. As of December 31, 2018, the aggregate market capitalization of the 336 companies listed on the B3, was equivalent to US\$820.7 billion and the 10 largest companies listed on the B3 represented 60.4% of the total market capitalization. Although any of the outstanding shares of a listed company may trade on a Brazilian stock exchange, in most cases fewer than half of the listed shares are actually available for trading by the public, the remainder being held by a small group of controlling persons, by governmental entities or by one principal shareholder. As of December 31, 2018, we accounted for 8.5% of the market capitalization of all listed companies on the B3.

195 Bradesco

Form 20-F

Trading on Brazilian stock exchanges by a holder not deemed to be domiciled in Brazil for Brazilian tax and regulatory purposes (a "non-Brazilian holder") is subject to certain limitations under Brazilian foreign investment legislation. With limited exceptions, non-Brazilian holders may only trade on Brazilian stock exchanges in accordance with the CMN requirements. Investments made by foreigners on stock exchanges were traditionally regulated by Resolution No. 2,689/00, which required that securities held by non-Brazilian holders were maintained in the custody of or in deposit accounts with financial institutions duly authorized by the Central Bank and the CVM. In addition, Resolution No. 2,689/00 required non-Brazilian holders to restrict their securities trading to transactions on Brazilian stock exchanges or qualified over-the-counter markets. With limited exceptions, according to Resolution No. 2,689/00, non-Brazilian holders should not transfer to other non-Brazilian holders the ownership of investments.

In September 2014, the CMN issued Resolution No. 4,373/14, amending and improving the provisions for (i) foreign investments through a depositary receipt mechanism; and (ii) investments made by non-resident investors in the financial and capital markets in Brazil. The main changes were: (a) increasing the number of instruments that may be issued through depositary receipts; (b) making it possible for non-resident investors to invest in financial and capital markets without having previously entered into foreign exchange operations; (c) clarifying the criteria for simultaneous foreign exchange operations; and (d) increasing the responsibility of the non-resident investor's representative. CMN Resolution No. 4,373/14 became effective in March 2015.

See "Item 10.D. Exchange Controls" for further information about CMN Resolution No. 4,373/14, and "Item 10.E. Taxation – Brazilian tax considerations – Taxation of gains" for a description of certain tax benefits extended to non-Brazilian holders who qualify under CMN Resolution No. 4,373/14.

Corporate governance practices of B3

In 2000, B3 introduced three special listing segments known as "Levels 1 and 2 of Differentiated Corporate Governance Practices and *Novo Mercado*" with the purpose of stimulating the secondary market of securities issued by Brazilian companies listed on B3, encouraging these companies to follow good corporate governance practices. B3 subsequently introduced two new segments called "*Bovespa Mais*" and "*Bovespa Mais Nível 2*," specifically for small- and medium-scale companies. The listing segments were designed for the trading of shares issued by companies that voluntarily commit themselves to follow corporate governance practices and disclosure requirements beyond those required by Brazilian legislation. These rules generally increase shareholders' rights and increase the quality of the information made available to shareholders. Newly amended rules for "Levels 1 and 2 of Differentiated Corporate Governance Practices" came into effect in May 2011.

To become a "Level 1" company, the issuer must agree to the following requirements, in addition to those imposed by applicable law: (i) ensure that the shares that represent at least 25.0% of its total capital are actually available for trading; (ii) adopt offering procedures that favor the widespread ownership of the shares whenever a public offer is made; (iii) comply with minimum standards for quarterly disclosure; (iv) follow stricter disclosure policies for transactions done by its controlling shareholders, members of its Board of Directors and executives that involve securities issued by the issuer; (v) submit any existing shareholders' agreement and stock option plans to B3; and (vi) prepare a schedule of corporate events and make it available to the shareholders.

To become a "Level 2" company, the issuer must agree to the following requirements, in addition to those imposed by applicable law: (i) comply with all Level 1 listing requirements; (ii) grant tag-along rights to all shareholders in case the company's control is transferred, offering to common shareholders the same price paid per share for the controlling block of common and preferred shares; (iii) give holders of preferred shares voting rights for decisions on certain corporate restructurings and related-party transactions, such as: (a) conversions, acquisitions, mergers or splits; (b) approval of any transactions between the company and its controlling shareholder, if such decisions are within the competence of the general meeting; (c) valuation of assets to be used for payment of a share capital increase; (d) selecting an institution or specialized company to determine the economic value of the company; and (e) any alterations to these voting rights that will prevail as long as the agreement to adhere to the B3's "Level 2" segment is in force; (iv) the Board of Directors made up of at least five members of which at least a minimum of 20.0% shall be independent members with a term of office limited to two years, and re-election is permitted; (v) prepare financial statements in English, including the statement of cash flows, according to international accounting standards such as U.S. GAAP or IFRS; (vi) effect a tender offer by the company's controlling shareholder (the minimum price of the shares to be offered shall be determined by an assessment process), if the controlling shareholder decides on the delisting from the "Level 2" segment; and (vii) exclusively adopt the B3 "Arbitration Board" rules for resolving any conflicts between the company and its investors.

196 Form 20-F – December 2018

Form 20-F

To join B3's "*Novo Mercado*" segment, an issuer must meet the "*Novo Mercado*" rules related to the governance structure and the shareholders' rights: (i) the capital must be composed exclusively of common shares with voting rights; (ii) in the case of transfer of control, all shareholders have the right to sell their shares at the same price (tag along of 100%) attributed to the shares held by the controller; (iii) of the area of Internal Audit, role of Compliance and Audit Committee (statutory or non-statutory); (iv) in the event of the company leaving the *Novo Mercado*, conducting a public offer for acquisition of shares ("OPA") at fair value, in which, at least 1/3 of the holders of shares in circulation must accept the OPA or agree with the exit from the segment; (v) the board of directors has to include, at least, 2 or 20% of independent directors, whichever is higher, with a unified term of up to two years; (vi) the company undertakes to maintain at least 25% of the shares in circulation (free float), or 15%, in the event of ADTV (average daily trading volume) of more than R\$25 million; (vii) structuring and dissemination of the evaluation process of the board of directors, of its committees and the board; (viii) drafting and dissemination of policies (a) compensation; (b) nomination of members to the board of directors, its advisory committees and board of executive officers; (c) risk management; (d) transactions with related parties; and (e) trading of securities with minimum content (except for the compensation policy); (ix) simultaneous disclosure, in English and Portuguese, of relevant facts, information about earnings and press releases of income statements; and (x) monthly release of negotiations with securities issued by the company and shareholders.

In June 2001, we executed an agreement with B3 to list our shares in the "Level 1" segment, effective immediately after the disclosure of the offer's opening date in Brazil. We agreed to comply with and continue to comply with all of the "Level 1" listing requirements.

9.D. Selling Shareholders

Not applicable.

9.E. Dilution

Not applicable.

9.F. Expenses of the Issue

Not applicable.

ITEM 10. ADDITIONAL INFORMATION

10.A. Share Capital

For more information on our capital stock, see Note 44 to our consolidated financial statements in "Item 18. Financial Statements."

10.B. Memorandum and Articles of Association

We are a publicly traded company duly registered with the CVM under No. 00090-6. Article 5 of our Bylaws establishes our purpose as carrying out banking transactions in general, including foreign exchange activities.

Organization

Qualification of directors

Since the promulgation of Law No. 12,431/11, which amended Law No. 6,404/76, members of the Board of Directors are no longer required to be shareholders of the companies in which they occupy these positions. Neither do they have to meet residency requirements to be eligible for Board member positions.

Allocation of net income and distribution of dividends

Our Bylaws, in conformity with the Brazilian Corporate Law, require the Board of Directors to recommend, at each Annual Shareholders' Meeting, the allocation of net income for the fiscal year as follows:

197 Bradesco

Form 20-F

- 5.0% of net income determined in accordance with BR GAAP to a legal reserve, during each fiscal year, not to exceed 20.0% in the aggregate of our paid-in capital. This requirement shall not be applicable in fiscal years when the legal reserve, added to our other additional paid-in capital, exceeds 30.0% of our paid-in capital;
- upon proposal by our Management, an amount to a contingency reserve against future losses, which amount is determined by our shareholders on the basis of what potential losses they consider probable. Historically, our shareholders never allocated profits to this reserve;
- at least 30.0% of net income according to BR GAAP (adjusted by the deductions under the preceding items) for mandatory distribution to our shareholders; and
- any balance to revenue reserves for the maintenance of an operational margin that is compatible with the conduct of our lending business, up to a limit of 95.0% of our paid-in capital.

Our Bylaws also authorize our shareholders to allocate an amount to a reserve for realizable revenue. Historically, our shareholders have not allocated amounts to such reserve.

The minimum of 30.0% of our adjusted net income according to BR GAAP must be distributed as annual dividends and paid out within 60 days of the General Shareholders' Meeting in which the distribution is approved. However, Brazilian Corporate Law permits us to suspend payment of the mandatory distribution if our Board of Directors reports to the shareholders' meeting that the distribution would be incompatible with our financial condition, in which case the suspension is subject to approval by the shareholders' meeting. Under Brazilian Corporate Law, the Fiscal Council shall prepare a report on this matter and the Board of Directors is obligated to present a justification for the suspension with the CVM within five days of the shareholders' meeting. The income not distributed due to the suspension must be allocated to a special reserve. If not absorbed by subsequent losses, the amounts in the reserve shall be paid as dividends as soon as our financial situation permits.

Preferred shareholders are entitled to receive dividends per share in an amount 10.0% greater than the dividends per share paid to the common shareholders.

Under Brazilian law, we must prepare financial statements according to BR GAAP on a quarterly and annual basis and according to IFRS on an annual basis. Our *Diretoria Executiva*, with approval of the Board of Directors, may distribute dividends based on the profits reported in interim financial statements. Our Bylaws provide for the payment of interim dividends, which cannot exceed the amount of our retained earnings or our profit reserves contained in our last, annual or bi-annual financial statements. Our *Diretoria Executiva* bases the amount of the interim dividends on previously accrued or retained earnings.

Between March and October 2013, the Central Bank issued several rules related to the implementation of the Basel III Accord requirements in Brazilian banks. Pursuant to Article 9 of Resolution No. 4,193/13, a financial institution in breach of the additional capital requirements will be subject to restrictions by the Central Bank, including the distribution of dividends and payment of extraordinary amounts to the institution's officers and executives. Such restriction can be applied proportionally to the difference between the required additional capital and the actual additional capital, as follows: (i) if the actual capital is less

than 25.0% of the required capital, restriction of up to 100% on distributions; (ii) if the actual capital is 25.0% or higher and below 50.0% of the required capital, restriction of up to 80.0% on distributions; (iii) if the actual capital is 50.0% or higher and below 75.0% of the required capital, restriction of up to 60.0% on distributions; and (iv) if the actual capital is 75.0% or higher and below 100% of the required capital, restriction of up to 40.0% on distributions. We are currently in compliance with all capital requirements.

Shareholders' meetings

Our shareholders have the power to decide any matters related to our corporate purpose and to approve any resolutions they deem necessary for our protection and development, through voting at a general shareholders' meeting.

As from the Annual Shareholders' Meeting of 2013, shareholders resolved that our meetings shall be convened by the publication of call notices in the *Diário Oficial do Estado de São Paulo* (Official Gazette of the State of São Paulo) and the *Valor Econômico* newspaper, all in the State of São Paulo. The notice must be published three times, beginning at least 30 calendar days prior to the scheduled meeting date. The notice must contain the meeting's agenda and, in the case of a proposed amendment to our Bylaws, an indication of the subject matter.

The Board of Directors or, in some specific situations set forth in the Brazilian Corporate Law, the shareholders, may call our shareholders' meetings. A shareholder may be represented at a shareholders' meeting by an attorney-in-fact so long as the attorney-in-fact was appointed within less than a year of the meeting. The attorney-in-fact must be a shareholder, a member of our Management, a lawyer or a financial institution and for investment funds, the fund manager is responsible for representing quota holders. Shareholders that are legal entities may also be represented by their own legal representatives. The power of attorney given to the attorney-in-fact must comply with certain formalities set forth by Brazilian law.

198 Form 20-F – December 2018

Form 20-F

In order for a shareholders' meeting to validly take any action, shareholders representing at least one quarter of our issued and outstanding common shares must be present at the meeting. However, in the case of a shareholders' meeting to amend our Bylaws, shareholders representing at least two-thirds of our issued and outstanding common shares must be present. If no such quorum is verified, the Board of Directors may call a second meeting by notice given at least eight calendar days prior to the scheduled meeting and otherwise in accordance with the rules of publication described above. The quorum requirements will not apply to a second general meeting, subject to the quorum requirements applicable to the first one.

In March 2017, we adopted a remote voting system at our Shareholder's Meetings, in accordance with Article 21-A of CVM Instruction No. 481/09, as amended.

Voting rights

Each common share entitles its holder to the right of one vote at our shareholders' meetings. Except as otherwise provided by law, the decisions of a shareholders' meeting are passed by a vote by holders of a simple majority of our common shares, while abstentions are not taken into account.

In March 2002, the Brazilian Corporate Law was amended to, among other issues, grant more protection to minority shareholders and ensure them the right to appoint one member and an alternate to our Board of Directors. To qualify for the exercise of such right, the minority shareholder must have held, for at least the prior three months either: (i) preferred shares representing the minimum of 10.0% of our capital stock; or (ii) common shares representing at least 15.0% of our voting shares. If no shareholders meet the thresholds, shareholders representing at least 10.0% of our capital stock may be able to combine their holdings to appoint one member and an alternate member to our Board of Directors. We highlight that, in our case, we have no alternate members for the Board of Directors.

The Brazilian Corporate Law provides that non-voting preferred shares acquire voting rights when a company has failed for the term provided for in its bylaws (for more than three fiscal years) to pay any fixed or minimum dividend to which such shares are entitled. Such voting rights remain effective until payment of the cumulative dividends is made.

Shareholders

Pursuant to Brazilian law, the approval of the holders of a majority of the outstanding adversely affected preferred shares as well as shareholders representing at least one-half of the issued and outstanding common shares is required for the following actions:

- creating or increasing an existing class of preferred shares without preserving the proportions of any other class of the existing shares;
- changing a preference, privilege or condition of redemption or amortization of any class of preferred shares; and

- creating a new class of preferred shares that has preference, privilege or condition of redemption or amortization superior to the existing classes of preferred shares.

These actions are put to the vote of the holders of the adversely affected preferred shares at a special meeting, where each preferred share entitles the shareholder to one vote. Preferred shareholders have the right to vote on any change to our legal form and obtain the right to vote if we enter into a liquidation process.

The approval of holders of at least one-half of the issued common shares is required for the following actions:

- reducing the mandatory distribution of dividends;
- approving a takeover, merger or spin-off;
- approving our participation in a "*grupo de sociedades*" (a group of companies whose management is coordinated through contractual relationships and equity ownerships), as defined under the Brazilian Corporate Law;
- changing our corporate purpose;
- ceasing our state of liquidation; and

Form 20-F

- approving our dissolution.

Pursuant to Brazilian Corporate Law, holders of common shares, voting at a Shareholders' Meeting, have the exclusive power to:

- amend our Bylaws, including changes to the rights of the holders of the common shares;
- elect or dismiss members of our Board of Directors;
- receive the yearly accounts prepared by our Management and accept or reject management's financial statements, including the allocation of net profits for payment of the mandatory dividend and allocation to the various reserve accounts;
- suspend the rights of a shareholder who has not fulfilled the obligations imposed by law or by our Bylaws;
- accept or reject the valuation of assets contributed by a shareholder in consideration for issuance of capital stock; and
- approve corporate restructurings, such as takeovers, mergers and spin-offs; dissolve or liquidate, elect or dismiss our liquidators or examine their accounts.

Preemptive rights

Each of our shareholders has a general preemptive right to subscribe for shares or convertible securities in any capital increase in proportion to its holding. Shareholders must be granted at least a 30 day period following the publication of notice of the issuance of shares or convertible securities to exercise their preemptive rights.

As described under "Regulations of and Restrictions on Foreign Investors," under the Brazilian Constitution the increase of foreign investors' participation in the voting capital (common shares) of financial institutions is subject to prior authorization by the government. However, foreign investors without specific authorization may acquire publicly traded non-voting shares of Brazilian financial institutions or depositary receipts representing non-voting shares offered abroad. In January 2012, the Central Bank authorized us to create an ADR program for our common shares in the U.S. market. As part of this authorization, and after the government had affirmed it as being in its own interest, the Central Bank increased the limit of foreign interest in our capital stock from 14.0% to 30.0%.

In the event of a capital increase maintaining the existing proportion between common and preferred shares, each shareholder shall have the right to subscribe to newly issued shares of the same class it currently holds. If the capital increase changes the proportion between common and preferred shares, shareholders shall have the right to subscribe newly issued shares of the same class they currently hold, only extending to shares of a different class so as to maintain the same proportion in the capital stock as held prior to such increase. In any case, all new increases are subject to the foreign interest limit set forth by the Central Bank, which means that holders of common shares could be prevented from exercising their

preemptive rights in relation to newly issued common shares if the 30.0% limit is reached. Under Brazilian Corporate Law, shareholders are permitted to transfer or sell their preemptive rights.

You may not be able to exercise the preemptive rights relating to the shares underlying your ADSs unless a registration statement under the Securities Act of 1933 is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. The contractual arrangements governing the ADSs provide that the custodian of the shares underlying the ADSs may, if possible, transfer or dispose of the preemptive rights. Such contractual arrangements related to the ADSs, provide for the custodian to remit the consideration received to the depository bank that holds the ADSs. Its distribution by the depository bank to holders of preferred or common share ADSs is net of any fees due to the custodian and the depository bank. For more details, see "Item 3.D. Risk Factors – Risks relating to our shares, preferred share ADSs and common share ADSs."

Right of withdrawal

Brazilian Law provides that under certain circumstances a shareholder has the right to withdraw his or her equity interest from a company and to receive a payment for the portion of equity attributable to his or her equity interest.

This right of withdrawal may be exercised:

200 Form 20-F – December 2018

Form 20-F

- by the dissenting or non-voting holders of the adversely affected class of shares (including any holder of preferred shares) in the event that a Shareholders' Meeting resolves to:
 - create preferred shares or increase an existing class of preferred shares relative to the other class or classes of preferred shares;
 - modify a preference, privilege or condition of redemption or amortization conferred on one or more classes of preferred shares;
 - create a new class of preferred shares with greater privileges than the existing class of preferred shares; or
- by the dissenting or non-voting shareholders (including any holder of preferred shares) in the event that a general shareholders' meeting resolves to:
 - reduce the mandatory distribution of dividends;
 - change our corporate purpose;
 - transfer all of our shares to another company, making us a wholly owned subsidiary of such company, known as an "*incorporação de ações*;" or
- by the dissenting or non-voting holder of common shares, in the event that a Shareholders' Meeting resolves to:
 - acquire control of another company at a price exceeding certain limits set forth in Brazilian Law;
 - merge or consolidate a company, *provided that* its shares do not have liquidity and are widely held by the market;
 - participate in a "*grupo de sociedades*" as defined under the Brazilian Law, provided that its shares do not have liquidity and are widely held by the market; or
 - spin off a company or companies resulting in, among other things, a reduction of the mandatory annual dividend, participation in a group of companies, or a change of corporate purpose.

Our dissenting or non-voting shareholders also have a right of withdrawal in the event that the entity resulting from our merger, merger of our shares or spin-off does not become a listed company within 120 days of the shareholders' meeting at which the relevant decision was taken. The dissenting or non-voting shareholders only have a withdrawal right if they owned the shares, which have been adversely affected at the time of the first call for the shareholders' meeting in which the relevant decision was made. If a public announcement of the action taken or to be taken was made prior to the call for the shareholders' meeting, the shareholders' ownership of shares is based on the date of announcement.

The right of withdrawal lapses 30 days after publication of the minutes of the shareholders' meeting at which the action is taken, except when the resolution is subject to confirmation by the preferred shareholders (which must be made at a special meeting to be held within one year). In that case, the 30-day term is counted from the date the minutes of the special meeting are published. We would be entitled to reconsider any action giving rise to redemption rights within ten days following the maturity of such rights if the redemption of shares of dissenting shareholders would jeopardize our financial stability.

In all the situations described above, our shares would be redeemable at their book value, determined on the basis of the last balance sheet approved by our shareholders. If the shareholders' meeting giving rise to withdrawal rights occurs 60 days after the date of the last approved balance sheet, a shareholder may demand that its shares be valued on the basis of a new balance sheet of a date within 60 days preceding such shareholders' meeting.

Liquidation

In the event of our liquidation, our preferred shareholders would be entitled to priority over common shareholders in the return of capital. The amount to which they would be entitled is based on the portion of the Capital Stock represented by the preferred shares, adjusted from time to time to reflect any capital increases or reductions. After all our creditors had been paid, our residual assets would be used to return the amount of capital represented by the preferred shares to the preferred shareholders. Once the preferred shareholders had been fully reimbursed, the common shareholders would be reimbursed on the portion of the Capital Stock represented by the common shares. All our shareholders would participate equally and ratably in any remaining residual assets.

201 Bradesco

Form 20-F
Redemption

Our Bylaws provide that our shares are not redeemable. However, Brazilian Law authorizes us to redeem minority shareholders' shares if, after a public tender offer for our delisting, our controlling shareholder increases to more than 95.0% its participation in our total capital stock.

Conversion rights

Our Bylaws provide that our common shares cannot be converted into preferred shares or our preferred shares into common shares.

Liability of our shareholders for further capital calls

Neither Brazilian law nor our Bylaws provide for capital calls. Our shareholders' liability is limited to the payment of the issue price of the shares subscribed or acquired.

Form and transfer

Our shares are registered in book-entry form and we perform all the services of safekeeping and transfer of shares. To make the transfer we make an entry in the register, debit the share account of the transferor and credit the share account of the transferee.

Transfers of shares by a foreign investor are made in the same way and executed by the investor's local agent on the investor's behalf. However, if the original investment was registered with the Central Bank pursuant to a foreign investment mechanism regulated by the CMN Resolution No. 4,373/14 as described under "Item 10.D. Exchange Controls," the foreign investor must declare the transfer in its electronic registration.

Our shareholders may opt to hold their shares through B3. Shares are added to the B3 system through Brazilian institutions, which have clearing accounts with B3. Our shareholder registry indicates which shares are listed on the B3 system. Each participating shareholder is in turn registered in a register of beneficial shareholders maintained by the B3 and is treated in the same manner as our registered shareholders.

Brazilian rules related to information disclosure

In January 2002, through CVM Instruction No. 358/02, as amended, the CVM issued regulations regarding the disclosure of information to the market. These regulations include provisions which:

- determine what information must be filed with the CVM in the form of a notice to the shareholders or a material fact ("*fato relevante*"). The "*fato relevante*" includes any controlling shareholder decisions that could influence the price of our securities and any controlling shareholder decision to trade, cease to trade, or exercise any rights under our securities;
- expand the list of events which may be considered material, including, among others:

- execution of an agreement for the transfer of the shareholding control of the company, even under a suspensive or resolutive condition;
- change in the control of the company, including through the signing, amendment or termination of the shareholders' agreement;
- the signature, amendment or termination of shareholders' agreements to which the company is a party, or which have been registered in our records;
- the entry or withdrawal of shareholders that have a financial, operational, technological or management collaboration agreement with us;
- any authorization to trade our securities in any market, national or abroad;
- a decision upon deregistration of a publicly-held company;
- the merger, consolidation or spin-off of a company or its affiliates;
- change or dissolution of the company
- the change in the composition of a company's capital stock;
- the change in accounting criteria;
- debt renegotiation;

202 Form 20-F – December 2018

Form 20-F

- approval of a stock option plan to purchase shares;
- the change in rights and advantages attached to the securities of a company;
- split or reverse split of shares or attribution of bonus;
- the acquisition of a company's shares to keep in treasury or cancellation, and their sale;
- the company's profit or loss and the allocation of its cash dividends;
- the execution or termination of an agreement, or failure on its implementation, when the expectation of its accomplishment is public's knowledge;
- the approval, change or abandonment of a project or delay in its implementation;
- inception, resumption or stoppage of the manufacturing or commercialization of product or the provision of service;
- discovery, change or development of technology or resources of the company;
- change of projections disclosed by the company; and
- agreement with creditors, request or confession of bankruptcy or filing of a legal action that might affect the economic and financial situation of the company.
- extend, in the event our executive officer in charge of investor relations does not make required disclosure, the responsibility to make the required disclosure to our controlling shareholders, our Management, the members of our Fiscal Council and to any member of a technical or consulting body created by our Bylaws;
- extend confidentiality obligations related to undisclosed information to, in addition to our Management and controlling shareholders, the members of any technical or consulting bodies created by our Bylaws and our employees in charge of the issues considered relevant matters;
- forcing the Investor Relations Officer to provide clarifications on the disclosure of material act or fact by request of the CVM or the stock market, at any moment;
- disclose the information contained in material facts in all markets where our securities are traded;
- disclose any intention to delist the company within the period of one year if we acquire a controlling participation in a company that has its securities traded on a market;

- fulfill disclosure requirements related to the acquisition and sale of relevant shareholder participations, or the acquisition and sale of our securities by our managing shareholders, members of our Fiscal Council or any member of a technical or consulting body created by our Bylaws; and
- before a material fact is publicly disclosed, prohibit the trading of our securities by our direct and indirect controlling shareholders, officers, members of our Board of Directors, Fiscal Council and any technical or advisory committees or whomever by virtue of their position has knowledge of information related to the material fact.

In February 2014, the CVM provided publicly-held companies with the option of disclosing material facts by way of a news portal on the internet, in addition to the disclosure carried out through large circulation newspapers (as previously made).

Under CVM rules, we are also required to disclose a series of additional details to the market if a shareholders' meeting is called to decide on an absorption, merger, or split.

On April 27, 2017, the CMN issued the Resolution No. 4,567/17 requiring that that financial institutions and other entities authorized to operate by the Central Bank inform to the CMN any situation that may affect the reputation of its: (i) controlling shareholders; (ii) shareholders holding more than 15% of the capital of the entity; (iii) Directors; and (iv) Officers.

In accordance with the existing regulations, the Central Bank considers the following situations to compromise the reputation of such people: (i) criminal investigations or criminal proceedings against the person or any company controlled or managed by this person at the time of occurrence; (ii) administrative or judicial proceedings related to the SFN; and/or (iii) other similar situations that the Central Bank may consider relevant.

Form 20-F

According to such rule, the Brazilian financial institution has 10 working days from the date it becomes aware of the situation to communicate the fact to the Central Bank.

204 Form 20-F – December 2018

Form 20-F

Disclosure of periodic information

In December 2009, the CVM issued Instruction No. 480/09 that addresses, among other topics, the issuance of securities and periodic disclosure of information by companies that have their securities traded on the Brazilian market. As a result of this rule, Brazilian issuers must file a "Reference Form" with the CVM every year, a document similar to a "Form 20-F," providing several detailed aspects of the company's operations and administration. Furthermore, the rules related to financial statements and information disclosure were improved and the management's responsibility for the information provided was increased. As a result, the quantity and quality of information provided to the Brazilian market and to CVM has increased considerably, reinforcing the transparency of our activities for the local investor. In addition, new issuances for companies already listed were made easier. Instruction No. 480/09 is periodically changed by CVM.

Disclosure of operating information to the public

CMN rules determine that financial institutions should establish a formal policy approved by its board of directors or, in its absence, by its board of executive officers, for disclosure of information referring to risk management, determination of amount of risk-weighted assets and adequacy of RC. In October 2013, pursuant to Circular No. 3,678/13, the Central Bank established the current standards on disclosure of this information to the public. In February 2019, Central Bank issued the Circular No. 3,930/19, which will come into force on January 1st, 2020, revoking Circular No. 3,678/13. Central Bank Circular No. 3,930/19 establishing the current standards on disclosure of Pilar 3 report, which is available in our Investor Relations website.

Regulations and restrictions on non-Brazilian holders

The Brazilian Constitution bars any increase in foreign interest in the share capital of financial institutions headquartered in Brazil. However, because we are a publicly-traded financial institution, non-Brazilian holders of our preferred shares benefit from an exception to this provision. Accordingly, foreign holders face no legal restrictions on the ownership of our preferred shares or of preferred share ADSs, and are entitled to all the rights and preferences of such preferred shares. Furthermore, in accordance with the Central Bank authorization for the ADR program for common shares in the U.S. market, foreigners can hold up to 30.0% of our total common shares.

The ability to convert dividend payments and proceeds from the sale of our shares or preemptive rights into foreign currency and to remit such amounts abroad from Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, that the relevant investment be registered with the Central Bank. Nonetheless, any non-Brazilian holder who registers with the CVM in accordance with CMN Resolution No. 4,373/14 may buy and sell securities on Brazilian stock exchanges without obtaining a separate certificate of registration for each transaction. These rules are applicable both to common and preferred shares.

Our ADR program is duly registered with the Central Bank.

Our Bylaws do not restrict the rights of Brazilian residents or non-residents to hold our shares and exercise related rights.

Rights of the holders of our ADSs

Holders of our ADSs are not treated as our shareholders and do not have the same rights that our shareholders have. The depositary bank will hold the preferred shares and common shares that underlie the preferred share ADSs and common share ADSs through a custodian in accordance with the provisions of the Deposit Agreements. The rights of our ADSs holders are governed by the Deposit Agreements, which are New York law governed contracts. In contrast, the rights of our shareholders are provided for by Brazilian law.

Holders of our ADSs will receive notifications and voting instructions in relation to any meetings only if we authorize and direct the depositary bank to distribute such information to the holders. If we do not provide that authorization and direction to the depositary bank, holders of ADSs will not be able to vote at our meetings, or otherwise, unless they surrender their preferred share ADSs or common share ADSs and receive the underlying preferred shares or common shares, as applicable, in accordance with the terms of the applicable Deposit Agreement. If we authorize and direct the depositary bank to distribute voting instructions to our ADS holders, such holders may guide the depositary bank to vote in accordance with the number of shares represented by their ADSs. See "Item 3.D – Risk Factors – Risks relating to our shares and ADSs – The Deposit Agreements governing the ADSs provide that holders of such ADSs will only receive voting instructions if we authorize the depositary bank to contact those holders to obtain voting instructions; there are also practical limitations on any ability to vote we may give such holders."

205 Bradesco

Form 20-F

Transfer of control

Our Bylaws do not contain any provision that would have the effect of delaying, deferring or preventing a change in our control or that would operate only with respect to a merger, acquisition or corporate restructuring involving ourselves or any of our subsidiaries. However, Brazilian banking regulations require that any transfer of control of a financial institution be previously approved by the Central Bank.

Additionally, Brazilian law stipulates that acquisition of control of a publicly held company is contingent on tender offers for all outstanding common shares at a price equivalent to at least 80.0% of the price per share paid for the controlling block. In December 2003, we amended our Bylaws to ensure that in the event of a change in our control, the acquirer will be required to pay our shareholders an amount equal to (a) for our non-controlling common shareholders, 100% of the price per share paid to our controlling shareholders and (b) for our preferred shareholders, 80.0% of the price per share paid for our controlling shareholders.

In the event of our liquidation, our preferred shareholders would have priority over our common shareholders when returning capital. See "Organization – Liquidation" for more information. In addition, in the event of a transfer of control, our shareholders have the right of withdrawal under certain circumstances. See "Organization – Right of withdrawal" for more information.

Brazilian law also obliges our controlling shareholder to make a tender offer for our shares if it increases its interest in our share capital to a level that materially and negatively affects the liquidity of our shares.

Disclosure of shareholder ownership

Brazilian regulations require that any person or group of persons representing the same interest that has directly or indirectly acquired an interest corresponding to 5.0% of any type or class of shares of a publicly traded company must disclose its share ownership to the CVM and to Brazilian stock exchanges. In addition, a statement containing the required information must be published in the newspapers. Any subsequent increase or decrease of 5.0% or more in ownership of any type or class of shares must be similarly disclosed.

B3's differentiated corporate governance practices

In 2001, we voluntarily adhered to B3's Level 1 Corporate Governance which establishes special requirements for the Company's listing and rules for its directors and shareholders, including its controlling shareholders. Companies listed on Level 1 must adopt practices favoring transparency and the disclosure, in addition to legal requirements, of more comprehensive financial reporting data, details of trading by directors, officers, executives and controlling shareholders and related party transactions, among others – in all cases focusing on providing access to information for shareholders, investors and other stakeholders. Note that companies listed in this segment must also maintain a minimum free float of 25.0%.

10.C. Material contracts

None.

10.D. Exchange controls

The Central Bank may place temporary restrictions on the remittance of foreign capital abroad, including payments of principal, interests or dividends, and on the repatriation of capital if there is a significant imbalance in Brazil's balance of payments, or one is expected. The last occurrence of restrictions on the remittance of foreign capital was in 1989, when for approximately six months in 1989 and early 1990, the government suspended all remittances abroad of dividends and invested capital. The Central Bank subsequently released these amounts for remittance abroad in accordance with specific guidelines. The government may take similar measures in the future.

Under Brazilian tax laws, non-Brazilian holders of securities enjoy favorable tax treatment if they are qualified in terms of CMN Resolution No. 4,373/14. To qualify under this Resolution, a non-Brazilian holder must:

- appoint a representative in Brazil with power to undertake acts relating to the investment;
- register as a foreign investor with the CVM; and
- register its investment with the Central Bank.

206 Form 20-F – December 2018

Form 20-F

See "Item 10.E. Taxation – Brazilian tax considerations – Taxation of gains" for a description of tax benefits extended to non-Brazilian holders of securities who qualify under CMN Resolution No. 4,373/14.

Under CMN Resolution No. 4,373/14, securities held by non-Brazilian holders must be maintained under the custody of, or in deposit accounts held in, financial institutions duly authorized by the Central Bank and the CVM. In addition, securities trading is restricted under CMN Resolution No. 4,373/14 to transactions on Brazilian stock exchanges or qualified over-the-counter markets.

Registered non-Brazilian holders are allowed to invest in any type of investment available to Brazilian citizens in the financial and securities markets, with the exception that the Brazilian Constitution limits the ability of non-Brazilian holders to acquire capital of financial institutions, as mentioned above under "Regulation of and Restrictions on Non-Brazilian holders." Registration allows investors to remit foreign currency abroad when the funds are distributions on registered shares or proceeds from the disposition of such shares. The funds are converted into foreign currency at the forex market rate.

The registered capital for each share purchased in Brazil and deposited with the custodian is equal to its purchase price (informed in U.S. dollars). If ADS holder chooses to cancel ADSs in exchange for the underlying shares, the investment in the shares may be registered with the Central Bank. This registration is necessary for the holder to receive dividends or proceeds from the sale of the shares outside of Brazil.

When a holder of ADSs exchanges ADSs for the underlying shares, the holder is entitled to either:

- sell the shares on the stock exchange and remit the proceeds abroad within five business days; or
- freely convert the investment in the underlying shares to either an investment under CMN Resolution No. 4,373/14 (subject to satisfaction of the legal requirements described above) or a direct foreign investment in Brazil (in accordance with applicable rules).

Holders that do not comply with the rules previously described may still register their investment, but the registration process will be subject to detailed procedures established by the Central Bank. Holders that do not comply with these rules may also be subject to monetary penalties.

10.E. Taxation

The following summary contains a description of the principal Brazilian and U.S. federal income tax consequences of the acquisition, ownership and disposition of our shares and ADSs. However, it does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase our shares and/or ADSs. Accordingly, prospective purchasers of our shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of our shares and/or ADSs.

This summary is based upon the tax laws of Brazil and the United States in effect on the date hereof, which are subject to change.

Currently, there is no income tax treaty for double taxation between Brazil and the United States. However, due to the reciprocity of treatment in the United States, the Brazilian tax authority assures to residents in Brazil the right to deduct, from the income tax due, the amount of tax levied on income that has already been paid in the United States. Although the tax authorities of the two countries have had discussions that may culminate in such a treaty, no assurance can be provided regarding the possibility of a treaty of this kind or how it will affect the U.S. holders of our shares or ADSs. Accordingly, prospective holders of our shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of shares or ADSs in their particular circumstances.

Brazilian tax considerations

The following discussion summarizes the principal Brazilian tax consequences of the acquisition, ownership and disposition of our shares or ADSs by a holder not residing in Brazil.

Taxation of dividends

Dividends paid to the holders of ADSs or to investor non-resident in Brazil related to our shares are not subject to Brazilian withholding income tax, provided that these dividends are paid from the profits generated as of January 1, 1996. Dividends paid from profits before January 1, 1996 may be withheld at the variable rates, according to the legislation applicable at the time.

In this context, Law No. 11,638/07 significantly changed the Brazilian Corporate Law, with the objective of more closely aligning BR GAAP with IFRS. The changes promoted by Law No. 11,638/07 produced effects from January 1, 2008, already predicting that the new accounting rules could conflict with the provisions of the tax law, Law No. 11,941/09, the Transition Tax System ("RTT") was instituted. In general, under the implementation of the RTT, the changes promoted by the IFRS to modify the criterion of recognition of revenues, costs and expenses, would have no tax effects.

207 Bradesco

Form 20-F

In this sense, profits recorded in line with the rules laid down by Law No. 11,638/07 ("IFRS Profits") may be different for profits calculated following the accounting methods and criteria in force on December 31, 2007 ("2007 Profits").

Although market practice is for the distribution of dividends calculated using the IFRS Profits to be exempt from taxes, the Brazilian tax authorities, through Normative Instruction No. 1,397/13, understand that companies should consider the 2007 Profits as the basis for determining the amount of profit exempt from taxes that could be distributed to the beneficiaries.

Surplus paid on 2007 Profits ("Surplus Dividends") should, in the opinion of the tax authorities and in the specific case of non-resident beneficiaries in Brazil, be subject to taxation as follows: (i) Withholding Income Tax at Source ("IRRF") at a rate of 15.0% in the case of non-resident beneficiaries in Brazil, but which were not domiciled in a tax haven; or (ii) IRRF at a rate of 25.0% in the case of non-residents in Brazil, domiciled in the tax haven.

As way to mitigate that issue, Law No. 12,973/14, in addition to revoking the RTT, made significant changes to federal tax law, including with relation to Excess Dividends. Following the changes introduced by Law No. 12,973/14, it was confirmed that Excess Dividends would be exempt with respect to profits made between 2008 and 2013. After 2015, this discussion is no longer relevant, as the differences relating to the previous accounting treatment have become irrelevant. Potential discussions remain, however, with regard to dividends paid from profits ascertained in the calendar year 2014, unless the company has voluntarily opted for the application of the provisions laid down in Law No. 12,973/14, since January 1, 2014.

Taxation of gains

In accordance with Law No. 10,833/03, the gains earned as a result of the divestiture of assets located in Brazil with investor non-resident in Brazil are subject to taxation in Brazil, regardless of the fact that the divestiture is performed to another non-resident or to a resident in Brazil.

In this sense, in the case of divestiture of our shares, which are regarded as Brazilian assets, the investor non-resident in Brazil shall be subject to the income tax on the capital gain ascertained in accordance with the rules described in the following paragraphs, regardless of the operation being, or not, carried out in Brazil or abroad, or with a resident or non-resident in Brazil.

In relation to the ADSs, despite the theme not being pacified in Brazil, it is possible to argue that gains recorded by an investor non-resident in Brazil in the divestiture of these assets to another non-resident, should not be subject to taxation in Brazil. Such arguments would be based on the understanding that the ADSs do not represent Brazilian assets for purposes of the application of Law No. 10,833/03, because they represent securities issued and traded on stock exchanges abroad.

It is important to emphasize that, for purposes of the Brazilian legislation, the rules applicable to gains earned as a result of the divestiture of shares or ADSs may vary according to the domicile of the investor non-resident in Brazil, in accordance with the form through which he has recorded his investment before the Central Bank and/or in accordance with the way that the divestiture is structured and performed.

The deposit of our shares in exchange for ADSs may necessitate taxation by income tax at a rate of 15.0% or 25.0%, in the event of any capital gain ascertained by an investor non-resident in Brazil located in a tax haven, if the cost of acquisition of our shares is less than: (i) the average price per share, quoted on the Brazilian stock exchange in which the highest number of these shares has been sold on the day of deposit; or (ii) if no share is sold on that day, the average price quoted on the Brazilian stock exchange in which the highest number of shares has been sold in the last 15 trading sessions immediately prior to the deposit. In this case, the difference between the average price of our shares, as calculated above, and the corresponding acquisition cost, can be considered as capital gain. The withdrawal of ADSs in exchange for shares, should not, in principle, be understood as an operation liable to result in capital gain subject to income tax, provided that the regulatory rules in relation to the registration of the investment before the Central Bank are appropriately observed.

The gains earned in the divestiture of shares on the Brazilian stock exchange (that include the transactions carried out in the OTC market) are:

- exempt from income tax when earned by an investor non-resident in Brazil that: (i) is an Investor 4,373; and (ii) is not resident in a location considered as a tax haven; or

208 Form 20-F – December 2018

Form 20-F

- subject to income tax at a rate of 15.0% in the case of the gains earned by a foreign investor that: is not an Investor 4,373 and is not resident or domiciled in a location considered as a tax haven; or is an Investor 4,373 resident or domiciled in a location considered as a tax haven; or
- subject to a rate of 25% if the foreign investor is not an investor 4,373 resident or domiciled in a location considered as a tax haven.

In the case in which the non-resident investor is subject to the payment of the IR (Income Tax) on the capital gain earned with the sale on the stock exchange, the income tax withheld at source at the rate of 0.005%, on the value of the divestiture, will be applicable and may subsequently be compensated, with possible income tax on the capital gain.

Other gains earned in the divestiture of shares that are not carried out in Brazilian stock exchanges are subject to income tax at progressive rates that varies from 15.0% to 22.5% as detailed below, except for residents in locations considered as a tax haven, which, in this case, are subject to taxation by income tax at a rate of 25.0%. If the gains arising out of transactions carried out in the non-organized Brazilian over-the-counter market with mediation, the withholding of 0.005% on the value of the sale will be applicable and can be compensated with possible income tax due on the capital gain.

In September 2015, the government issued Provisional Measure No. 692/15, converted into Law No. 13,259/16, which introduced a regime based on the application of progressive tax rates for income tax on capital gains recognized by Brazilian individuals in the disposal of assets in general. In accordance with Law No. 13,259/16, in force as of January 1, 2017, the income tax rates on capital gains recognized by Brazilian individuals, which are also applicable to foreign investors, would be: (i) 15.0% for the part of the gain that does not exceed R\$5 million, (ii) 17.5% for the part of the gain that exceeds R\$5 million, but does not exceed R\$10 million, (iii) 20.0% for the part of the gain that exceeds R\$10 million but does not exceed R\$30 million, and (iv) 22.5% for the part of the gain that exceeds R\$30 million.

In the event of redemption of shares or reduction of capital by a Brazilian company, the positive difference between the amount actually received by an investor non-resident in Brazil and the acquisition cost of the shares redeemed will be considered as capital gain resulting from an operation not made on the stock exchange, therefore, it will be subject to taxation by income tax at progressive rates varying between 15.0% and 22.5%, except for residents of locations considered as JTF, which, in this case, are subject to taxation by income tax at a rate of 25.0%.

As a general rule, the regime of increased tax on capital gains should apply to transactions made outside the Brazilian stock exchange or organized over-the-counter market. Also, as a general rule, a foreign investor that is resident or domiciled in a location considered as a tax haven would be subject to income tax at a rate of 25.0%, as mentioned above. In addition, as a rule, gains recognized by a foreign investor in transactions made on the Brazilian stock exchange are not subject to increased taxation on capital gains, in accordance with Law No. 13,259/16.

As a general rule, the gains recorded as a result of the divestiture of shares or ADSs are equivalent to the positive difference between the sale value of the shares or ADSs and the respective costs.

The exercise of any preemptive right related to shares or ADSs will not be subject to taxation on income in accordance with the Brazilian legislation currently in force. Any gain on the sale or exercise of rights of preference related to shares or ADSs by an investor non-resident in Brazil will be subject to taxation in accordance with the same rules applied in the case of divestiture of those shares.

Interest on equity (“JCP”)

The Brazilian legislation allows a Brazilian company, instead of distributing dividends, to perform a distribution of interest on equity to its own shareholders, treating such values as deductible in calculating the actual profit and in the calculation base of the Social Contribution. For taxation purposes, the interest on equity is limited to the daily variation pro rata of the Long-term Interest Rate (“TJLP”), as the subsequent determinations of the Central Bank and may not exceed the value equivalent to:

- 50% of the net income (after deduction of the Social Contribution, however before considering the provision related to the Corporate Income Tax and the amount attributable to the shareholders as JCP) established in the period in which the payment is carried out; and
- 50% of accumulated profits and profit reserves established on the date of commencement of the period in which the payment is made.

Specifically, in relation to the payment of JCP for non-resident shareholders, such consignments are subject to IRRF at a rate of 15.0%, or 25.0%, where the recipient of the income is domiciled in a tax haven.

209 Bradesco

Form 20-F

The values paid as JCP are subject to deduction in the calculation of the IRPJ and CSLL, which taxes are due on the profit, observing the limits detailed above.

Tax haven (“JTF”)

According to Law No. 9,430/96 and subsequent amendments, a tax haven is a country or location that (i) does not tax income; (ii) taxes income at an effective rate lower than 20.0% (or 17.0% in specific cases as detailed below); or (iii) imposes restrictions on the disclosure of the corporate structure of legal entities or their ownership.

The Brazilian tax authorities published NI No. 1,037/10, listing: (i) countries or jurisdictions considered as tax haven or whose internal legislation opposes confidentiality related to the corporate composition of legal entities or their ownership; and (ii) tax schemes considered as privileged, whose definition is brought by Law No.11,727/08.

In December 2014, the Brazilian Federal Revenue Office (“RFB”) published the Decree No. 488/14, reducing the tax haven concept to localities that tax income at a maximum rate of less than 17.0% for countries or regimes in line with international fiscal transparency standards as established by Brazilian tax authorities. However, note that Decree No. 488/14 is not applicable to foreign investors whose investments in Brazil are in agreement with CMN Resolution No. 4,373/14.

Despite our understanding that a better interpretation of the legislation currently in force, leads to the conclusion that the concept of the privileged tax scheme, mentioned above, would be applicable only for purposes of Brazilian rules of transfer and undercapitalized pricing, we cannot ensure that further legislation, or even interpretations of the tax authorities determine the application of the concept of the privileged tax scheme, established in Law No. 11,727/08 will also apply to investor non-resident in Brazil in the payment of JCP.

This way, it is recommended that private tax advisors are consulted regarding the consequences of the rules laid down in Law No. 11,727/08, NI No. 1,037/10 and Decree No. 488/14, if the tax authorities determine the application of the concept of the privileged tax regime.

Tax on Foreign Exchange Transactions

In accordance with Decree No. 6,306/07, the conversion of foreign currency into Brazilian currency or *vice-versa*, shall be subject to tax on foreign exchange operations. The rate of the current tax on foreign exchange operations, applicable to most of the foreign exchange operations, is 0.38%. However, foreign exchange operations carried out for inflows of resources in Brazil by an Investor 4,373 are subject to tax on foreign exchange operations at a rate of 0%: (i) in the case of variable income operations carried out on the Brazilian stock exchange, as well as acquisitions of shares of publicly held Brazilian companies or subscription of shares related to capital contributions, provided that the issuing company has registered its shares to be traded on the stock exchange; and (ii) for the transfer of resources from Brazil, related to this type of investment, including payments of dividends and JCP and the repatriation of resources invested in

the Brazilian market. Additionally, the tax on foreign exchange operations is currently charged at a rate of 0% on the cancellation of ADSs in the exchange for shares.

In any case, the tax rate on foreign exchange operations can be increased at any time by an act of the Federal Executive Branch, up to the percentage of 25.0%, in relation to the transactions that occurred after this possible amendment.

210 Form 20-F – December 2018

Form 20-F

Tax on the transaction with securities

In accordance with Decree No. 6,306/07, the tax on the transaction with securities may be charged on all transactions involving securities, even though the transactions are conducted on Brazilian stock exchanges. The tax rate on transactions with securities applicable to transactions involving our shares is currently 0%. In particular, the tax on the transaction with securities is also of 0% due on the deposit of shares traded on Brazilian stock exchanges with the purpose of issuing certificates of deposit to be marketed abroad. The government can increase the tax rate on transactions with securities at any moment by up to 1.5% per day, but only with respect to future transactions.

Other federal Brazilian taxes

There are no federal Brazilian taxes on inheritance, gift or succession applicable to the ownership, transfer or disposition of preferred shares or ADSs by an investor non-resident in Brazil. Gift and inheritance taxes, however, can be levied by some states in Brazil on inheritances bestowed or gifts made by investor non-resident in Brazil to individuals or entities residing or domiciled within such states in Brazil. There are no Brazilian taxes on stamps, issue, registration or similar by investors holding our shares or ADSs.

211 Bradesco

Form 20-F

Registered capital

Amounts invested in securities by a holder not residing in Brazil who: (i) qualifies for benefits under CMN Resolution No. 4,373/14 and who registers with the CVM; or (ii) holds ADSs and is represented by the depositary bank's registration, are eligible for registration with the Central Bank. In the case of ADSs, since the shareholder of record is the depositary bank, the depositary bank is responsible for obtaining the registration. The registration allows the remittance outside Brazil of foreign currency, converted at the Exchange Market rate, acquired with the proceeds of distributions on, or dispositions of, underlying shares.

U.S. federal income tax considerations

The statements regarding U.S. tax law set forth below are based on U.S. law as in force on the date of this annual report and changes to such law subsequent to the date of this annual report may affect the tax consequences described herein. This summary describes the principal tax consequences of the ownership and disposition of the shares and ADSs, but it does not purport to be a comprehensive description of all of the tax consequences that may be relevant to a decision to hold or dispose of the shares and ADSs. This summary applies only to purchasers of the shares and ADSs who will hold the shares and ADSs as capital assets and does not apply to special classes of holders such as dealers in securities or currencies, holders whose functional currency is not the U.S. dollar, holders of 10.0% or more of our shares (taking into account shares held directly, through depositary arrangements or through attribution), tax-exempt organizations, financial institutions, holders liable for the alternative minimum tax, securities traders who elect to account for their investment in the shares or ADSs on a mark-to-market basis, and persons holding the shares or ADSs in a hedging transaction or as part of a straddle or conversion transaction. Accordingly, each holder should consult such holder's own tax advisor concerning the overall tax consequences to it, including the consequences under laws other than U.S. federal income tax laws, of an investment in the shares or ADSs.

In this discussion, references to a "U.S. holder" are to a holder of a share or ADS that: (i) is a citizen or resident of the United States; (ii) is a corporation organized under the laws of the United States of America or any state thereof; or (iii) is otherwise subject to U.S. federal income taxation on a net basis with respect to the shares and ADSs.

The shares will be treated as equity for U.S. federal income tax purposes. For purposes of the U.S. Internal Revenue Code of 1986, as amended, or the "Code," holders of ADSs generally will be treated as owners of the shares represented by such ADSs.

Taxation of distributions

A U.S. holder will recognize dividend income for U.S. federal income tax purposes in an amount equal to the amount of any cash and the value of any property distributed by us as a dividend to the extent that such distribution is paid out of our current or accumulated earnings and profits, as determined for U.S. federal income tax purposes, when such distribution is received by the custodian (or by the U.S. holder in the case of a holder of preferred shares). The amount of any distribution will include the amount of Brazilian tax withheld on the amount distributed, and the amount of a distribution paid in *reais* will be measured by reference to the exchange rate for converting *reais* into U.S. dollars in effect on the date the distribution is

received by the custodian (or by a U.S. holder in the case of a holder of preferred shares). If this custodian (or U.S. holder in the case of a holder of preferred shares) does not convert such *reais* into U.S. dollars on the date it receives them, it is possible that the U.S. holder will recognize foreign currency loss or gain, which would be ordinary loss or gain, when the *reais* are converted into U.S. dollars. Dividends paid by us will not be eligible for the dividends received deduction allowed to corporations under the Code.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual with respect to the ADSs will be subject to taxation at reduced rates if the dividends are "qualified dividends." Dividends paid on the ADSs will be treated as qualified dividends if: (i) the ADSs are readily tradable on an established securities market in the United States; and (ii) we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, a passive foreign investment company ("PFIC"). The ADSs are listed on the New York Stock Exchange, and will qualify as readily tradable on an established securities market in the United States so long as they are so listed. Based on existing guidance, it is not clear whether dividends received with respect to the shares will be treated as qualified dividends, because the shares themselves are not listed on a U.S. exchange. In addition, the U.S. Treasury has announced its intention to promulgate rules pursuant to which holders of the shares or ADSs, and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to treat dividends as qualified for tax reporting purposes. Because such procedures have not yet been issued, it is not clear whether we will be able to comply with them. Holders of ADSs and the shares should consult their own tax advisers regarding the availability of the reduced dividend tax rate in light of the considerations discussed above and their own particular circumstances.

212 Form 20-F – December 2018

Form 20-F

Based on our audited financial statements and relevant market data, we believe that we were not treated as a PFIC for U.S. federal income tax purposes with respect to our 2009 to 2016 taxable years. In addition, based on our audited financial statements and our current expectations regarding the value and nature of our assets, the sources and nature of our income, and relevant market and shareholder data, we do not anticipate becoming a PFIC for the 2017 taxable year. Our belief that we are not, and will not in the future be, a PFIC is based on certain Proposed Treasury Regulations dealing with non-U.S. banks. Such regulations are not final and are subject to modification, in which case our determination regarding PFIC status may be different.

Distributions out of earnings and profits with respect to the shares and ADSs generally will be treated as dividend income from sources outside of the United States and generally will be treated separately with other items of "passive" (or, in the case of certain U.S. holders, "financial services") income for the purposes of determining the credit for foreign income taxes allowed under the Code. Subject to certain limitations, Brazilian income tax withheld in connection with any distribution with respect to the shares or ADSs may be claimed as a credit against the U.S. federal income tax liability of a U.S. holder if such holder elects for that year to credit all foreign income taxes. Alternatively, such Brazilian withholding tax may be taken as a deduction against taxable income. Foreign tax credits will not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions in securities and may not be allowed in respect of arrangements in which a U.S. holder's expected economic profit is not substantial. U.S. holders should consult their own tax advisors concerning the implications of these rules in light of their particular circumstances.

Distributions of additional shares to holders with respect to their shares or ADSs that are made as part of a *pro rata* distribution to all our shareholders generally will not be subject to U.S. federal income tax.

Holders of shares or ADSs that are foreign corporations or non-resident alien individuals, or "non-U.S. holders," generally will not be subject to U.S. federal income tax or withholding tax on distributions with respect to shares or ADSs that are treated as dividend income for U.S. federal income tax purposes unless such dividends are effectively connected with the conduct by the holder of a trade or business in the United States.

Taxation of capital gains

Upon the sale or other disposition of a share or ADS, a U.S. holder generally will recognize gain or loss for U.S. federal income tax purposes. The amount of the gain or loss will be equal to the difference between the amount realized in consideration for the disposition of the shares or ADSs and the U.S. holder's tax basis in the shares or ADSs. Such gain or loss generally will be subject to U.S. federal income tax as capital gain or loss and will be long-term capital gain or loss if held for more than one year. Capital losses may be deducted from taxable income, subject to certain limitations. Gain realized by a U.S. holder on a sale or disposition of shares or ADSs generally will be treated as U.S. source income. Consequently, if Brazilian tax is imposed on such gain, the U.S. holder will not be able to use the corresponding foreign tax credit, unless the holder has other foreign source income of the appropriate type in respect of which the credit may be used.

A non-U.S. holder will not be subject to U.S. federal income tax or withholding tax on gain realized on the sale or other disposition of a share or ADS unless: (i) such gain is effectively connected with the conduct by the holder of a trade or business in the United States; or (ii) such holder is an individual who is present in the United States for 183 days or more in the taxable year of the sale and certain other conditions are met.

Backup withholding and information reporting

Dividends paid on income for the year, and proceeds from the sale or other disposition of the ADSs or the shares to a U.S. holder, generally may be subject to the information reporting requirements of the Code and to backup withholding unless the U.S. holder: (i) establishes, if required to do so, it is an exempt recipient; or (ii) in the case of backup withholding, provides an accurate taxpayer identification number and certifies that no loss of exemption from backup withholding has occurred. The amount of any backup withholding collected from a payment to a U.S. holder will be allowed as a credit against the holder's U.S. federal income tax liability and may entitle the U.S. holder to a refund, provided that certain required information is furnished to the U.S. Internal Revenue Service.

A non-U.S. holder generally will be exempt from these information reporting requirements and backup withholding tax, but may be required to comply with certain certification and identification procedures in order to establish its eligibility for such exemption.

Certain U.S. holders may be subject to additional reporting requirements. The penalty for failing to comply with these reporting requirements can be significant. U.S. holders should consult their own tax advisors concerning any U.S. reporting requirements that may arise out of the ownership or disposition of the shares or ADSs in light of their particular circumstances.

10.F. Dividends and Paying Agents

Not applicable.

10.G. Statement by Experts

Not applicable.

10.H. Documents on Display

We file reports, including annual reports on Form 20-F, and other information with the SEC pursuant to the rules and regulations of the SEC that apply to foreign private issuers. You may read and copy any materials filed with the SEC at its Public Reference Room at 100F Street, N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. You may also inspect our reports and other information at the offices of the NYSE, 11 Wall Street, New York, New York 10005, on which our ADSs are listed. Our SEC filings are also available to the public from the SEC's website at <http://www.sec.gov>. For further information about obtaining copies of our public filings at the New York Stock Exchange, call (212) 656-5060.

We also file financial statements and other periodic reports with the CVM.

10.I. Subsidiary Information

For information on subsidiaries, see "Item 4.B. Business Overview – Main Subsidiaries" and Note 2(a) of our consolidated financial statements in "Item 18. Financial Statements."

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk

Market risk is represented by the possibility of financial losses due to the variation of prices and interest rates of our financial assets, since its active and liability portfolios may have mismatches of amounts, periods, currencies and indexes. We are exposed to market risk, both in our trading and banking portfolios. The main market risks of our portfolios are interest rate risk and foreign exchange risk.

We use stress methodologies such as sensitivity analysis Economic Value of Equity (EVE) and Value at Risk (VaR), among others, for evaluating our market risk.

Interest rate risk

Interest rate risk arises as a result of timing differences on the re-pricing of assets and liabilities, unexpected changes in the slope and shape of yield curves, base risk and changes in correlation of interest rates between different financial instruments/indexes. We are exposed to the risk of interest rate movements when there is a mismatch between fixed rates and market interest rates. For a discussion of our management of interest rate sensitivity, see "Item 5.B. Liquidity and Capital Resource – Interest rate sensitivity."

Exchange risk

Exchange risk arises as a result of our having assets, liabilities and off-balance sheet items that are denominated in, or indexed to, currencies other than *reais*, either as a result of trading or in the normal course of banking activities. We control exposure to exchange rate movements by ensuring that mismatches are managed and monitored, and our policy is to avoid material exchange rate mismatches. For a discussion of our management of exchange rate sensitivity, see "Item 5.B. Liquidity and Capital Resource – Exchange rate sensitivity."

Market risk of trading activities

We enter into derivatives transactions to manage our exposure to interest rate and exchange rate risk. As a result, our exposure to the potential losses described below is generally reduced by these transactions. These derivatives do not qualify as hedges under IFRS. Accordingly, we classify derivatives as financial assets at fair value through profit or loss.

214 Form 20-F – December 2018

Form 20-F

Sensitivity analysis

Below, a sensitivity analysis for our financial exposure in trading and banking portfolios, based on three scenarios applied to market rates and prices. We considered 25.0% and 50.0% shocks in prices and rates that would adversely affect our positions, and a scenario reflecting an impact of 1 basis point on rates and 1.0% on market prices. These scenarios comply with CVM Instruction No. 475/08.

These figures represent the impact for each scenario in a static portfolio position. Due to the market and portfolios dynamism these positions change continuously and do not necessarily reflect the position shown here. In addition, the Bank has a process of ongoing management of the market risk, which seeks constantly, through the dynamism of the market, manners to mitigate the associated risks, according to the strategy defined by the Senior Management. Thus, in cases where there is evidence of deterioration of a certain position, proactive actions are taken to minimize the possible negative impacts, in order to maximize the risk/return ratio.

Risk Factor	Market as of December 31, 2018	Scenarios		
		1 base point shock for interest rate and 1% variation for prices	25% shock for prices and rates	50% shock for prices and rates
Foreign exchange rate R\$/USD	3.87	3.91	4.84	5.81
1-year fixed rate in <i>reais</i>	6.55%	6.56%	8.18%	9.82%

Shocks were also applied to other risk factors and terms of the interest curves. It is important to note that, in the fourth quarter of 2018, the maximum depreciation of the real against the U.S. dollar was 8.14% (from R\$3.6368 as of October, 29, 2018 to R\$3.9330 as of December, 27, 2018 per U.S. dollar), which is below the 25% and 50% shock scenarios.

The impacts of these scenarios on our positions would be as follows:

Trading and banking portfolios Risk Factors	On December 31, 2018 Definition	R\$ in thousands Scenarios ⁽¹⁾		
		1	2	3

216 Form 20-F – December 2018

Form 20-F
Value at Risk ("VaR")

The Trading portfolio's risk is measured using the Delta-Normal VaR methodology with a 99.0% confidence level, and the time horizon applied includes the number of days required to undo the existing exposures. Additionally, for the measurement of all risk factors of the options portfolio, the historic simulation models and Delta-Gama-Vega are applied, whichever is the most conservative of the two, whereby this risk of options is added to the *VaR* of the portfolio.

For the calculation of volatilities, correlations, and historic returns, a minimum window of 252 business days is adopted. The methodology applied and the existing statistical models are assessed on a permanent basis using backtesting techniques, which compare the VaR with holding periods of one day and hypothetical results, obtained with the same positions used in the VaR calculation, and effectively considering also the transactions of the day for which the VaR was estimated.

The main purpose is to monitor, validate and evaluate the VaR model's adherence and the number of breaks occurred should be in line with the number of breaks accepted by the statistical tests carried out for the required level of confidence (99.0%). Another purpose is to improve the models used by us, by way of analyses carried out for different VaR observation periods and confidence levels, both for Total VaR and by risk factors.

In 2018 the daily results, both hypothetical and effective point of view, exceeded the respective VaR with a confidence level of 99.0% four times. In accordance with the paper published by the Basel Committee on Banking Supervision (Supervisory Framework for the use "Backtesting" in Conjunction with the Internal Models Approach to Market Risk Capital Requirements of January 1996), any deviations would be classified as "either bad luck or the markets moved in a fashion unanticipated by the model," that is, the volatility was significantly higher than expected and/or the correlations differed from those forecast by the model.

In 2018, VaR of the trading portfolio, at one-day horizon and net of tax effects, presented maximum and minimum values of R\$76.9 million in the 2Q18 and R\$4.3 million in the 4Q18, respectively. The tables below show the value at risk, according to the methodology of the VaR.

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES

Financial responsibility, disclosure controls and procedures, and report on internal control over financial reporting.

(a) Disclosure controls and procedures

As of December 31, 2018, evaluations of the effectiveness of our disclosure controls and procedures (as defined in Articles 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 of the SEC) were carried out under the supervision of our Management, including our Chief Executive Officer and Chief Financial Officer. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, and it may not prevent or identify deficiencies. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based upon the evaluation referred to above, our Chief Executive Officer and Chief Financial Officer concluded, subject to the limitations noted above, that for the period covered by this annual report, our disclosure controls and procedures were adequate and effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act of the SEC is recorded, processed, summarized and disclosed within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our Management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

219 Bradesco

Form 20-F

(b) Management's annual report on internal control over financial reporting

Our Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Articles 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934 of the SEC. Our internal control was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting practices.

Our Management made an assessment of the effectiveness of our internal controls over consolidated financial reporting as of December 31, 2018 based upon the 2013 framework "Integrated Internal Control Structure" established by the Committee of Sponsoring Organizations of the Treadway Commission – COSO" and has concluded that our internal controls related to the financial statements do not present material weaknesses that could impact the integrity of the accounting records.

The effectiveness of our internal control over financial reporting, as of December 31, 2018, has been audited by KPMG Auditores Independentes, a PCAOB – registered independent accounting firm, as stated in their report beginning on page F-3 of "Item 18. Financial Statements."

(c) Attestation report of the independent registered public accounting firm

For the report of KPMG Auditores Independentes, our PCAOB – registered independent accounting firm, dated April 30, 2019, on the effectiveness of the internal control over financial reporting as of December 31, 2018, see "Item 18. Financial Statements."

(d) Changes in internal control over financial reporting

Except for those relating to the implementation of IFRS 9 in 2018, there have been no changes in our internal control over financial reporting (as such term is defined in Articles 13a-15(f) and 15d-15(f) under the "Securities Exchange Act of 1934" of the SEC), that occurred during the fiscal year ended December 31, 2018 that have materially affected, our internal control over financial reporting. We adopted IFRS 9 on 1 January 2018, we have updated certain controls over financial reporting, embedding them into the existing control environment.

ITEM 16. [RESERVED]

16.A. Audit Committee Financial Expert

Our Board of Directors has reviewed the qualifications and backgrounds of the members of the Audit Committee and designated Paulo Roberto Simões da Cunha as "Audit Committee financial expert," within

the meaning of Item 16.A, and as independent member. For more information regarding our Audit Committee, see "Item 6.C. Board Practices – Board Advisory Committees – Audit Committee."

16.B. Code of Ethics

We have adopted a Code of Ethical Conduct and Sectorial Codes of Ethical Conduct under the Securities Exchange Act of 1934, as amended. Our Codes of Ethical Conduct apply to our Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer and persons performing similar functions, to our directors, officers and other executives, employees, business partners, suppliers and service providers. Our Codes of Ethical Conduct are available on our investor relations website.

If we amend the provisions of our Codes of Ethical Conduct, or if we grant any waiver of such provisions, we will disclose such amendment or waiver on our website at the same address.

220 Form 20-F – December 2018

Form 20-F

16.C. Principal Accountant Fees and Services

Audit and non-audit fees

The following table sets forth the fees billed to us by our independent accounting firm during the fiscal years ended as of December 31, 2018 and 2017:

	Year ended December 31,	R\$ in thousands	
		2018	2017
Audit fees		39,695	40,604
Audit-related fees		737	775
Other fees		4,083	2,321
Total fees		44,515	43,700

The fees for the years 2018 and 2017 correspond to those paid to our auditor for those years (KPMG Auditores Independentes).

Our independent accounting firm audits our annual financial statements in accordance with IFRS and BR GAAP, the annual financial statements of our investee companies, as well as the quarterly review of our interim financial statements.

Audit-related fees in the above table are the aggregate fees billed by the independent auditors for accounting attestation reports requested by our Management and the issue of comfort letters for placement of bonds abroad.

Other fees in the above table are fees billed by the independent auditors related to procedures, reviews of information (prize drawings), assurances, agreed upon procedures, training of IFRS, tax-related services and due diligence.

Audit Committee pre-approval policies and procedures

The Audit Committee recommends to the Board of Directors for approval, the entity to be hired to provide us and our subsidiaries independent audit services, and their compensation, as well as its replacement. The engagement of an independent auditor for non-audit services is not subject to the Board of Directors. However, it must be previously reviewed by the Audit Committee in respect to compliance with independence rules. For more information regarding our Board of Directors and Audit Committee, see "Item 6.C. Board of Directors Practices."

16.D. Exemptions from the listing standards for Audit Committees

Under the NYSE and the SEC listed-company audit committee rules effective July 31, 2006, we must comply with Exchange Act Rule 10A-3, which requires us to either establish an Audit Committee composed of members of the Board of Directors that meets specified requirements or designate and empower a Fiscal Council or similar body to perform the role of an Audit Committee based on the exemption in Exchange Act Rule 10A-3(c)(3).

Pursuant to Central Bank regulations, we have established a body denominated Audit Committee, which performs nearly all of the functions of an Audit Committee of a U.S. company. Of the three members of our Audit Committee, one member is also a member of our Board of Directors. Under Brazilian law, the function of hiring independent auditors is a power reserved for the Board of Directors. As a result, our Board of Directors acts as our Audit Committee, as specified in Section 3(a)(58) of the Exchange Act, for purposes of approving the engagement of our independent auditors for audit. Except in these respects, our Audit Committee is comparable to and performs the functions of an audit committee of the Board of Directors of a U.S. company. Since our Audit Committee is not a committee of our Board of Directors, but a separate body, as required under Brazilian law, we believe that our Audit Committee satisfies the requirements of Exchange Act Rule 10(a)(3). However, based on the exemption set forth in Exchange Act Rule 10A-3(c)(3) the Audit Committee is a separate body from our Board of Directors and in accordance with Central Bank regulations, we believe that our Audit Committee is able to act independently in performing the responsibilities of an Audit Committee under the Sarbanes-Oxley Act and to satisfy the other requirements of Exchange Act Rule 10A-3.

221 Bradesco

Form 20-F

16.E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The purpose of the program of acquisition of shares to be held in treasury and to be subsequently disposed of or canceled, without capital reduction, is the application of funds available for investments from the "Earnings Reserve – Statutory Reserve" account. This program authorizes the acquisition of up to 15,000,000 nominative book-keeping shares, with no par value, whereby 7,500,000 are common shares and 7,500,000 are preferred shares; and it is effective from June 27, 2018 until June 26, 2019.

In 2018, no class of shares were acquired to be held in treasury.

16.F. Change in Registrant's Certifying Accountant

Not applicable.

16.G. Corporate Governance

In May 2006, our Board of Directors approved our Corporate Governance Policy. This policy is available on our investor relations website.

Comparison of our corporate governance practices with NYSE rules applicable to North American companies

Under the NYSE's corporate governance rules approved by the SEC, foreign private issuers are subject to a more limited set of corporate governance requirements than U.S. domestic issuers. As a foreign private issuer, we must comply with three rules imposed by the NYSE:

- SEC requirements concerning audit committees;
- our CEO must promptly notify the SEC in writing as soon as an executive officer becomes aware of any non-compliance with any of the applicable NYSE corporate governance rules; and
- we must provide a brief description disclosing any significant ways in which our corporate governance practices differ from those followed by U.S. companies under NYSE listing standards.

The chart below provides a brief description of the significant differences between our corporate governance practices and those followed by U.S. companies under NYSE listing standards.

Article	NYSE corporate governance rules for US issuers	Our corporate governance practices
---------	--	------------------------------------

- Independent directors must comprise a majority of the members of the Board of Directors of a listed company on NYSE.
- 303A.01** Brazilian law provides that only individuals may be appointed to a company's Board of Directors. Accordingly, there is no legal or statutory provision requiring us to have independent directors.
- Listed companies must have a nomination/ corporate governance committee composed entirely of independent directors, with a written charter that addresses specific minimum requirements.
- 303A.04** We have an Executive Committee of Corporate Governance subordinate to the *Diretoria Executiva*, and the Succession Planning and Nomination Committee, which reports to the Board of Directors. Both committees are composed of members of our Management, and have a charter that addresses its minimum requirements.
- Listed companies must have a compensation committee composed entirely of independent directors, with a written charter that addresses specific minimum requirements.
- 303A.05** We have a Compensation Committee of three to seven members chosen among the members of the Board of Directors, except for one who is not a senior manager, each with a two-year term of office. The Committee's primary responsibility is to assist the Board of Directors with conducting policies related to the compensation of our executive managers, according to legislation in force. None of the members of the Compensation Committee are independent directors. The Compensation Committee has a written charter that states the responsibilities of the committee.
- Listed companies must have an Audit Committee, composed of a minimum of three members who satisfy the requirements of Rule 10A-3 under the Exchange Act, with a written charter that addresses specific minimum requirements.
- 303A.06** Pursuant to our Bylaws and to Central Bank regulations since December 2003, we have appointed an Audit Committee. Our Audit Committee comprises three to five members, each of whom serves for a term of two years, and is appointed by, and may be replaced by, the Board of Directors. We currently have five members on our Audit Committee, one of them is also a Director. Under Brazilian law, the function of hiring independent auditors is reserved for the Board of Directors of a company. As a result, our Board of Directors acts as our Audit Committee, as specified in Section 3(a)(58) of the Exchange Act, for purposes of approving the engagement of our independent auditors for audit. In these respects, our Audit Committee is comparable to and performs the functions of audit committees of U.S. companies. Since our Audit Committee is a separate body from our Board of Directors, pursuant to Central Bank regulations, we have relied on the exemption set forth in Exchange Act Rule 10A-3(c)(3) in this regard. For more information on their main tasks, see "Item 6.C. Board Practices – Board Advisory Committees – Board Committees."
- 303A.07**
- Listed companies must be given the opportunity to vote on equity-compensation plans and material revisions thereto,
- 303A.08** We also have a Fiscal Council, which currently has five members and five alternates. The Fiscal Council is an independent corporate body.
- For more information about the rights and obligations of our Fiscal Council, see "Item 6.C. Board Practices – Fiscal Council." Under the Brazilian Corporate Law, shareholder approval is required for the adoption of any stock option compensation plans. We currently do not have any stock option based on compensation plan.

- with limited exemptions set forth in the NYSE rules.
Listed companies must adopt and disclose corporate governance guidelines addressing specific minimum requirements.
- 303A.09** Our corporate governance guidelines and practices are available on our investor relations website, in the corporate governance section.
- Listed companies must adopt and disclose a Code of Ethical Conduct for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers.
- 303A.10** We have adopted a Code of Ethical Conduct, which applies to our Senior Management, employees, business partners, suppliers and service providers, parent companies, subsidiaries and companies under common control, directly or indirectly and, when applicable, to non-profit entities managed by members of Senior Management or employees appointed or transferred by our member companies. We have an Integrity and Ethical Conduct Committee, appointed by the Board of Directors, which is responsible for dissemination and fulfillment of the Codes of Ethical Conduct, as well as ensuring its effectiveness.
- We will post any modifications or waivers to either Codes of Ethical Conduct on our website.
- The CEO of a listed company must promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any non-compliance with any applicable provisions of Section 303A.
- 303A.12** Our CEO shall promptly notify the NYSE in writing, should any executive officer become aware of any non-compliance with any applicable provision of the NYSE Corporate Governance rules.

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Banco Bradesco S.A.

Opinions on the Consolidated Financial Statements and Internal Control Over Financial Reporting

We have audited the accompanying consolidated statements of financial position of Banco Bradesco S.A. and subsidiaries ("Bradesco") as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, changes in equity and cash flows for each of the years in the three-year period ended December 31, 2018 and the related notes. We also have audited Bradesco's internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Bradesco as of December 31, 2018 and 2017, the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2018, in conformity with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Also in our opinion, Bradesco maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, Bradesco has changed its method of accounting for financial instruments in 2018 due to the adoption of IFRS 9 "*Financial instruments*".

Basis for Opinions

Bradesco's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on Bradesco's consolidated financial statements and an opinion on Bradesco's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to Bradesco in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Independent Auditors' Report

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

KPMG Auditores Independentes

We have served as Bradesco's auditor since 2011.

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

1) General information

Banco Bradesco S.A. (“Bradesco”, the “Bank”, the “Company” or the “Organization”) is a publicly-traded company established according to the laws of the Federative Republic of Brazil with headquarters in the city of Osasco, state of São Paulo, Brazil.

Bradesco is a bank that provides multiple services within two segments: banking and insurance. The Bank complies with Brazilian banking regulations and operates throughout all of Brazil. The banking segment includes a range of banking activities, serving individual and corporate customers in the following operations: investment banking, national and international banking operations, asset management operations and consortium administration. The insurance segment covers auto, health, life, accident and property insurance and pension plans, real estate ventures and capitalization bonds.

The retail banking products include demand deposits, savings deposits, time deposits, mutual funds, foreign exchange services and a range of loans and advances, including overdrafts, credit cards and loans with repayments in installments. The services provided to corporate entities include fund management and treasury services, foreign exchange operations, corporate finance and investment banking services, hedge and finance operations including working capital financing, lease and loans with repayments in installments. These services are provided, mainly, in domestic markets, but also include international services on a smaller scale.

The Organization was originally listed on the São Paulo Stock Exchange (“B3”) and then subsequently on the New York Stock Exchange (“NYSE”).

The consolidated financial statements, in accordance with the IFRS, were approved by the Board of Directors on March 06, 2019.

2) Significant accounting practices

These consolidated financial statements of the Organization were prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The consolidated financial statements include the consolidated statements of financial position, consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows as well as the notes to the consolidated financial statements.

These consolidated financial statements have been prepared based on historical cost, except for the following material items in the balance sheet: financial assets at fair value through other comprehensive income, assets and liabilities at fair value through profit or loss and financial instruments designated at fair value through profit or loss, and defined-benefit liabilities that are recognized at the present value of the defined benefit obligation.

The Organization has classified its expenses according to their nature.

The consolidated statement of cash flows shows the changes in cash and cash equivalents during the year arising from operating, investing and financing activities. Cash and cash equivalents include highly liquid investments. Note 20 details the accounts of the consolidated statement of financial position that comprise cash and cash equivalents. The consolidated statement of cash flows is prepared using the indirect method. Accordingly, the income before taxes was adjusted by non-cash items such as provisions, depreciation, amortization and Impairment losses on loans and advances. The interest and dividend received and paid are classified as operating, financing or investment cash flows according to the nature of the corresponding assets and liabilities.

The preparation of the consolidated financial statements requires the use of estimates and assumptions which affect the reported amounts of assets and liabilities, as well as the disclosure of contingent assets and liabilities at the date of the financial statements, and the profit and loss amounts for the year. The consolidated financial statements also reflect various estimates and assumptions, including, but not limited to: adjustments to the provision for expected losses of assets and financial liabilities; estimates of the fair value of financial instruments; depreciation and amortization rates; impairment losses on assets; the useful life of intangible assets; evaluation of the realization of tax assets; assumptions for the calculation of technical provisions for insurance, supplemental pension plans and capitalization bonds; provisions for contingencies and provisions for potential losses arising from fiscal and tax uncertainties. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In 2018, the Organization adopted IFRS 9 – Financial instruments, which replaced IAS 39. For more details on the transition process to the new standard, classification and measurement of financial assets, impairment and hedge accounting, see Note 47.

The accounting policies listed below were used in all the periods presented and by all the companies of the Organization.

a) Consolidation

The consolidated financial statements include the financial statements of Bradesco and those of its direct and indirect subsidiaries, including exclusive mutual funds and special purpose entities.

The main subsidiaries included in the consolidated financial statements are as follows:

- (11) Company merged in October 2018, by the company Nova Paiol Participações Ltda.;
- (12) Company merged in November 2018, by the company Nova Paiol Participações Ltda.; and
- (13) The investment funds in which Bradesco assumes or substantially retains the risks and benefits were consolidated.

i. Subsidiaries

Subsidiaries are all of the companies over which the Organization, has control. The Organization has control over an investee if it is exposed to, or has rights to, variable returns from its involvement with the

investee and has the ability to affect those returns through its power over the investee. The subsidiaries are fully consolidated from the date at which the Organization obtains control over its activities until the date this control ceases.

For acquisitions meeting the definition of a business combination, the acquisition method of accounting is used. The cost of an acquisition is measured as the fair value of the consideration, including assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the consideration given over the fair value of the Organization's share of the identifiable net assets and non-controlling interest acquired is recorded as goodwill. Any goodwill arising from business combinations is tested for impairment at least once a year and whenever events or changes in circumstances may indicate the need for an impairment write-down. If the cost of acquisition is less than the fair value of the Organization's share of the net assets acquired, the difference is recognized directly in the consolidated statement of income.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

For acquisitions not meeting the definition of a business combination, the Organization allocates the cost between the individual identifiable assets and liabilities. The cost of acquired assets and liabilities is determined by (a) recognizing financial assets and liabilities at their fair value at the acquisition date; and (b) allocating the remaining balance of the cost of purchasing assets and assuming liabilities to individual assets and liabilities, other than financial instruments, based on their relative fair values of these instruments at the acquisition date.

ii. Associates

Companies are classified as associates if the Organization has significant influence, but not control, over the operating and financial management policy decisions. Normally significant influence is presumed when the Organization holds in excess of 20%, but no more than 50%, of the voting rights. Even if less than 20% of the voting rights are held, the Organization could still have significant influence through its participation in the management of the investee or representations on its Board of Directors, providing it has executive power; i.e. voting power.

Investments in associates are recorded in the Organization's consolidated financial statements using the equity method and are initially recognized at cost. The investments in associates include goodwill (net of any impairment losses) identified at the time of acquisition.

iii. Joint ventures

The Organization has contractual agreements in which two or more parties undertake activities subject to joint control. Joint control is the contractual sharing of control over an activity and it exists only if strategic, financial and operating decisions are made on a unanimous basis by the parties. A joint venture is an arrangement in which the Group has joint control, whereby the Group has rights to the arrangement, rather than rights to its assets and obligations for its liabilities. Investments in joint ventures are recorded in the consolidated financial statements of the Organization using the equity method.

iv. Structured entities

A structured entity is an entity that has been designed such that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

Structured entities normally have some or all of the following features or characteristics:

- restricted activities;
- a narrow and well-defined objective, such as, to effect a specific structure like a tax efficient lease, to perform research and development activities, or to provide a source of capital or funding to an entity or to provide investment opportunities for investors by passing risks and rewards associated with the assets of the structured entity to investors;
- thin capitalization, that is, the proportion of 'real' equity is too small to support the structured entity's overall activities without subordinated financial support; and
- financing in the form of multiple contractually linked instruments to investors that create concentrations of credit risk or other risks (tranches).

___ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

v. Transactions with and interests of non-controlling shareholders

The Organization applies a policy of treating transactions with non-controlling interests as transactions with equity owners of the Bank. For purchases of equity from non-controlling interests, the difference between any consideration paid and the share of the carrying value of net assets of the subsidiary acquired is recorded in equity. Gains or losses on sales to non-controlling shareholders are also recorded in equity.

Profits or losses attributable to non-controlling interests are presented in the consolidated statements of income under this title.

vi. Balances and transactions eliminated in the consolidation

Intra-group transactions and balances (except for foreign currency transaction gains and losses) are eliminated in the consolidation process, including any unrealized profits or losses resulting from operations between the companies except when unrealized losses indicate an impairment loss of the asset transferred which should be recognized in the consolidated financial statements. Consistent accounting policies as well as similar valuation methods for similar transactions, events and circumstances are used throughout the Organization for the purposes of consolidation.

b) Foreign currency translation

i. Functional and presentation currency

Items included in the financial statements of each of the Organization's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The

consolidated financial statements are presented in Brazilian *Reais* (R\$), which is the Organization's presentation currency. The domestic and foreign subsidiaries use the *Real* as their functional currency, with the exception of the subsidiary in Mexico, which uses the Mexican Peso as its functional currency.

ii. Transactions and balances

Foreign currency transactions, which are denominated or settled in a foreign currency, are translated into the functional currency using the exchange rates prevailing on the dates of the transactions.

Monetary items denominated in foreign currency are translated at the closing exchange rate as at the reporting date. Non-monetary items measured at historical cost denominated in a foreign currency are translated at the exchange rate on the date of initial recognition; non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates on the date when the fair value was determined.

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at each period exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of income as "Net gains/(losses) of foreign currency transactions".

In the case of changes in the fair value of monetary assets denominated in foreign currency classified as financial assets at fair value through other comprehensive income, a distinction is made between translation differences resulting from changes in amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortized cost are recognized in the consolidated statement of income, and other changes in the carrying amount, except impairment, are recognized in equity.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

iii. Foreign operations

The results and financial position of all foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each consolidated statement of financial position presented are translated at the closing rate at the reporting date;
- Income and expenses for each consolidated statement of income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rate prevailing on the transaction dates, in which case income and expenses are translated at the rates in effect on the dates of the transactions); and
- All resulting exchange differences are recognized in other comprehensive income.

Exchange differences arising from the above process are reported in equity as “Foreign currency translation adjustment”.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to “Other comprehensive income”. If the operation is a non-wholly owned subsidiary, then the relevant proportion of the transaction difference is allocated to the non-controlling interest. When a foreign operation is partially sold or disposed, such exchange differences, which were recognized in equity, are recognized in the consolidated statement of income as part of the gain or loss on sale.

c) Cash and cash equivalents

Cash and cash equivalents include: cash, bank deposits, unrestricted balances held with the Central Bank of Brazil and other highly liquid short-term investments, with original maturities of three months or less and which are subject to insignificant risk of changes in fair value, used by the Organization to manage its short-term commitments. See Note 20(b) – “Cash and cash equivalents”.

d) Financial assets and liabilities

Accounting Practices adopted as of January 1, 2018.

i. Financial assets

In 2018, we began to apply IFRS 9, which contains a new approach for classification and measurement of financial assets, where the entity is based on the business model for the management of financial assets, as well as the characteristics of contractual cash flow of the financial asset. This new approach replaced the financial assets categories foreseen in IAS 39: (i) measured at fair value through profit or loss; (ii) investments held to maturity; (iii) loans and receivables; and (iv) available for sale.

IFRS 9 classifies financial assets into three categories: (i) measured at amortized cost; (ii) measured at fair value through other comprehensive income (FVOCI – Shareholders’ Equity); and (iii) measured at fair value through profit or loss (FVTPL).

- Business model: it relates to the way in which the entity manages its financial assets to generate cash flows. The objective of the Management for a particular business model, is: (i) to maintain the assets to receive contractual cash flows; (ii) to maintain the assets to receive the contractual cash flows and sales; or (iii) any other model. When the financial assets conform to the business models (i) and (ii) the SPPI test (Solely Payment of Principal and Interest) should be applied.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- **SPPI Test:** the purpose of this test is to assess the contractual terms of the financial instruments to determine if they give rise to cash flows at specific dates that conform only to the payment of the principal and interest on the principal amount.

In this sense, the principal refers to the fair value of the financial asset at the initial recognition and interest refers to the consideration for the time value of money, the credit risk associated with the principal amount outstanding for a specific period of time and other risks and borrowing costs. Financial instruments that do not fall under the aforementioned concept are measured at FVTPL, such as derivatives.

- **Measured at fair value through profit or loss**

All financial assets that do not meet the criteria of measurement at amortized cost or at FVOCI are classified as measured at FVTPL, in addition to those assets that in the initial recognition are irrevocably designated at FVTPL, if this eliminates or significantly reduces asset-liability mismatches.

Financial assets measured at FVTPL are initially recorded at fair value with subsequent changes to the fair value recognized immediately in profit or loss.

They are held for trading if it is acquired by Organization for the purpose of selling it in the short-term or if it is part of a portfolio of identified financial instruments that are managed together for short-term profit or position taking, or, eventually, assets that do not meet the SPPI test. Derivative financial instruments are also categorized as FVTPL.

Financial assets are initially recognized in the consolidated statement of financial position at fair value and the transaction costs are recorded directly in the consolidated statement of income.

Realized and unrealized gains and losses arising from changes in fair value of non-derivative assets are recognized directly in the consolidated statement of income under "Net gains/(losses) on financial assets and liabilities at fair value through profit or loss". Interest income on financial assets measured at FVTPL is included in "Interest and similar income". For the treatment of derivative assets see Note 2(d)(iii).

- **Measured at fair value through other comprehensive income**

They are financial assets that meet the criterion of the SPPI test, which are held in a business model whose objective is both to maintain the assets to receive the contractual cash flows as well as for sale.

Financial assets are initially recognized at fair value, plus any transaction costs that are directly attributable to their acquisition or their issuance and are, subsequently, measured at fair value with gains and losses being recognized in other comprehensive income, except for impairment losses and foreign exchange gains and losses on debt securities, until the financial asset is derecognized. The expected credit losses are recorded in the consolidated statement of income in contrast to "Other comprehensive income", having no impact on the gross carrying amount of the asset.

Interest income is recognized in the consolidated statement of income using the effective interest method. Dividends on equity instruments are recognized in the consolidated statement of income in 'Dividend income', within "Net Gains/(losses) on financial assets at fair value through other comprehensive income" when the Organization's right to receive payment is established. Gains or losses arising out of exchange variation on investments in debt securities classified as FVOCI are recognized in the consolidated statement of income. See Note 2(d)(viii) for more details of the treatment of the expected credit losses.

- **Measured at amortized cost**

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Financial assets that meet the criterion of the SPPI test, which are held in a business model whose objective is to maintain the assets to receive the contractual cash flows.

Financial assets measured at amortized cost are recognized initially at fair value including direct and incremental costs, and are subsequently recorded at amortized cost, using the effective interest rate method.

Interest are recognized in the consolidated statement of income and reported as “Interest and similar income”. In the case of expected credit loss, it is reported a deduction from the carrying value of the financial asset and is recognized in the consolidated statement of income.

ii. Financial liabilities

The Organization classifies its financial liabilities as subsequently measured at amortized cost, using the effective interest rate method, except for the following financial instruments.

- **Measured at fair value through profit and loss**

These financial liabilities are recorded and measured at fair value and the respective changes in fair value are immediately recognized in the income statement. These liabilities can be subdivided into two different classifications upon initial recognition: financial liabilities designated at fair value through profit and loss and financial liabilities held for trading.

- **Financial liabilities designated at FVTPL on initial recognition**

These are liabilities that on initial recognition are irrevocably designated at FVTPL, if this eliminates or significantly reduces asset-liability mismatches.

The Organization does not have any financial liability designated at fair value through profit and loss in income.

- **Financial liabilities held for trading**

Financial liabilities held for trading recognized by the Organization are derivative financial instruments. For the treatment of derivatives see Note 2(d)(iii).

• **Financial guarantee contracts and loan commitments**

Financial guarantees are contracts that require the Organization to make specific payments under the guarantee for a loss incurred when a specific debtor fails to make a payment when due in accordance with the terms of the debt instrument.

Financial guarantees are initially recognized in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Organization's obligations under such guarantees are measured by the higher value between (i) the value of the provision for expected losses and (ii) the value initially recognized, minus, if appropriate, the accumulated value of the revenue from the service fee. The fee income earned is recognized on a straight-line basis over the life of the guarantee. Any increase in the liability relating to guarantees is reported in the consolidated statement of income within "Other operating income/ (expenses)".

Loan commitments are recognized as the amount of expected credit loss calculated as described in Note 3.1.

iii. Derivative financial instruments and hedge transactions

Derivatives are initially recognized at fair value on the date the derivative contract is signed and are, subsequently, re-measured at their fair values with the changes recognized in the income statement under "Net gains or losses on financial assets at fair value through profit or loss".

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Fair values are obtained from quoted market prices in active markets (for example, for exchange-traded options), including recent market transactions, and valuation techniques (for example for swaps and foreign currency transactions), such as discounted cash-flow models and options-pricing models, as appropriate. The calculation of fair value, the counterparty's and the entity's own credit risk are considered.

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not recorded at fair value through profit or loss. These embedded derivatives are separately accounted for at fair value, with changes in fair value recognized in the consolidated statement of income.

The Organization has structures of cash flow hedges, whose objective is to protect the exposure to variability in cash flows attributable to a specific risk associated with all the assets or liabilities recognized, or a component of it. The details of these structures have been presented in Note 3.2 – Market risk.

iv. Recognition

Initially, the Organization recognizes deposits, securities issued and subordinated debts and other financial assets and liabilities on the trade date, in accordance with the contractual provisions of the instrument.

v. Derecognition

Financial assets are derecognized when there is no reasonable expectation of recovery, when the contractual rights to receive the cash flows from these assets have ceased to exist or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred. Financial liabilities are derecognized when they have been discharged, paid, redeemed, cancelled or expired. If a renegotiation or modification of terms of an existing financial asset is such that the cash flows of the modified asset are substantially different from those of the original unmodified asset, then the original

financial asset is derecognized and the modified financial asset is recognized as a new financial asset and initially measured at fair value.

vi. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when, the Organization has the intention and the legal enforceable right to offset the recognized amounts on a net basis or realize the asset and settle the liability simultaneously.

vii. Determination of fair value

The determination of the fair values for the majority of financial assets and liabilities is based on the market price or quotes of security dealers for financial instruments traded in an active market. The fair value for other instruments is determined using valuation techniques. The valuation techniques which include use of recent market transactions, discounted cash flow method, comparison with other instruments similar to those for which there are observable market prices and valuation models.

For more common other instruments the Organization uses widely accepted valuation models that consider observable market data in order to determine the fair value of financial instruments.

For more complex instruments, the Organization uses its own models that are usually developed from standard valuation models. Some of the information included in the models may not be observable in the market and is derived from market prices or rates or may be estimated on the basis of assumptions.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The value produced by a model or by a valuation technique is adjusted to reflect various factors, since the valuation techniques do not necessarily reflect all of the factors that market participants take into account during a transaction.

The valuations are adjusted to consider the risks of the models, differences between the buy and sell price, credit and liquidity risks, as well as other factors. Management believes that such valuation adjustments are necessary and appropriate for the correct evaluation of the fair value of the financial instruments recorded in the consolidated statement of financial position.

More details on the calculation of the fair value of financial instruments are available in Note 3.4.

viii. Expected credit losses

The Organization calculates the expected losses in prospective bases for financial instruments measured at amortized cost, at FVOCI (with the exception of investments in equity instruments), financial guarantees and loan commitments.

Expected credit losses on financial instruments are measured as follows:

Financial assets: it is the present value of the difference between contractual cash flows and the cash flows that the Organization hopes to recover discounted at the effective interest rate of the operation;

Financial guarantees: it is the present value of the difference between the expected payments to reimburse the holder of the guarantee and the values that the Organization expects to recover discounted at a rate that reflects the market conditions; and

Loan commitments: is the present value of the difference between the contractual cash flows that would be due if the commitment was used and the cash flows that the Organization expects to recover discounted at a rate that reflects the market conditions.

Expected losses will be measured on one of the following basis:

- Credit losses expected for 12 months, i.e., credit losses as a result of possible events of delinquency within 12 months after the reporting date; and
- Credit Losses expected for the whole of lifecycle, i.e., credit losses that result from all possible events of delinquency throughout the expected lifecycle of a financial instrument.

The measurement of expected losses for the whole lifecycle is applied when the credit risk of a financial asset, on the date of the report, has increased significantly since its initial recognition and the measurement of credit loss of 12 months is applied when the credit risk has not increased significantly since its initial recognition. The Organization may determine that the credit risk of a financial asset has not increased significantly when the asset has a low credit risk on the date of the report.

With respect to Brazilian government bonds, the Organization has internally developed a study to assess the credit risk of these securities, which does not expect any loss for the next 12 months, that is, no provision is required for credit losses.

The Organization evaluates if the credit risk increased significantly for both individual assets and assets at collective level. For the purposes of a collective evaluation, financial assets are grouped on the basis of similar credit-risk characteristics (that is, on the basis of the Organization's rating process that considers product type, market segment, geographical location, collateral type, past-due status and other related factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The asset's carrying amount is reduced through provisions and the amount of the loss is recognized in the consolidated statement of income.

The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral.

The methodology and assumptions used for estimating future cash flows are reviewed regularly to mitigate any differences between loss estimates and actual loss experience.

Following the recognition of expected credit loss, interest income is recognized using the effective rate of interest which was used to discount the future cash flows, on the accounting value gross of provision, except for assets with problem of credit recovery, in which, the rate stated is applied at the net book value of the provision.

The whole or part of a financial asset is written off against the related credit loss expected when there is no reasonable expectation of recovery. Such loans are written off after all the relevant collection procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the consolidated statement of income.

The criteria used to calculate the expected credit loss are detailed in Note 3.1.

Accounting Practices adopted until December 31, 2017.

The Organization opted for the exemption provided by the Standard not to restate comparative information from prior periods arising from the changes arising from IFRS 9, therefore we present below the accounting policies applied to Financial Instruments up to December 31, 2017:

i. Sale and repurchase agreements

Securities sold subject to repurchase agreements are presented in the consolidated financial statements in “Financial assets pledged as collateral”. The counterparty liability is included in “Deposits from Banks”. Securities purchased under agreements to resell are recorded in “Loans and advances to banks” or “Loans and advances to customers”, as appropriate. The difference between sale and repurchase price is treated as interest in the consolidated statement of income and recognized over the life of the agreements using the effective interest rate method.

ii. Financial assets

The Organization classifies its financial assets into the following categories: measured at fair value through profit or loss, available-for-sale, held-to-maturity and loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets on initial recognition.

- **Measured at fair value through profit or loss**

Financial assets are recorded and initially measured at fair value, with subsequent subsequent changes in fair value recognized immediately in profit or loss. These assets can be subdivided into two distinct classifications: financial assets designated at fair value through profit or loss; and financial assets for trading (upon initial recognition).

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- Financial assets designated at fair value through profit or loss

The Organization does not have any financial assets designated at fair value through profit or loss.

- Financial assets for trading (except Derivatives)

Financial assets for trading are assets held by the Organization for the purpose of trading them in the short term or maintaining them as part of a managed portfolio in order to obtain short-term profit or to take positions. Derivative financial instruments are also classified as held for trading.

Financial assets held for trading are initially recognized and measured at fair value on the balance sheet, and transaction costs are recorded directly in the statement of income for the period.

Realized and unrealized gains and losses arising from changes in the fair value of non-derivative financial assets are recognized directly in the income statement under "Gains and losses net of financial assets for trading". Interest income on financial assets held for trading is recognized in "Net interest income".

• **Available-for-sale financial assets**

Available-for-sale financial assets are non-derivative financial assets, for which it is intended to be held for an indefinite period of time, and which may be sold in response to changes in interest rates, foreign exchange rates, prices of equity securities or liquidity needs or that are not classified as held-to-maturity, loans and receivables or at fair value through profit or loss.

They are initially recognized at fair value, which corresponds to the amount paid including transaction costs and is subsequently measured at fair value with gains and losses recognized in equity, other comprehensive income, except for impairment losses recoverable from exchange gains and losses until the financial asset is no longer recognized. If an available-for-sale financial asset presents a loss due to impairment, the accumulated loss recorded in other comprehensive income is recognized in the statement of income.

Interest income is recognized in the income statement using the effective interest rate method. Dividend income is recognized in the consolidated statement of income when the Organization becomes entitled to the dividend. Foreign exchange gains and losses on investments in debt securities classified as available for sale are recognized in the consolidated statement of income.

- **Held-to-maturity investments**

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that the Organization has the intention and ability to hold to maturity and which are not designated at the initial recognition as at fair value through profit or loss, or as available for sale and that do not meet the definition of loans and receivables.

They are initially recognized at fair value including direct and incremental costs and are subsequently accounted for at amortized cost using the effective interest rate method.

Interest on investments held to maturity is included in the consolidated statement of income as "Interest and similar income". In the event of impairment, the impairment loss is recognized as a deduction from the carrying amount of the investment and is recognized in the consolidated statement of income.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- **Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market that have not been designated as "available for sale" or "at fair value through profit or loss" and that the Organization does not intend to sell immediately or in the short term.

They are initially measured at fair value plus direct transaction costs and subsequently measured at amortized cost using the effective interest rate method.

Loans and receivables are recognized in the balance sheet as loans and advances to financial institutions or to customers. Interest on loans is included in the income statement as "Interest and similar income". In the event of impairment, the impairment loss is reported as a reduction in the book value of loans and advances and is recognized in the statement of income as "Impairment losses on loans and advances".

iii. Financial liabilities

The Organization classifies its financial liabilities in the following categories: measured at fair value through profit or loss and at amortized cost.

- **Measured at fair value through profit or loss**

They are recorded and valued at fair value, and the respective changes in fair value are recognized immediately in profit or loss. These liabilities can be subdivided into two distinct classifications: financial liabilities designated at fair value through profit or loss and financial liabilities for trading.

- Financial liabilities at fair value through profit or loss

The Organization does not have any financial liabilities designated at fair value through profit or loss.

- Financial liabilities for trading

The financial liabilities for trading recognized by the Organization are derivative financial instruments.

- **Financial liabilities at amortized cost**

These are financial liabilities that are not measured at fair value through profit or loss. They are initially recorded at fair value and subsequently measured at amortized cost. They include, among others, resources from financial and client institutions, debt securities issuance and subordinated debt securities.

iv. Deposits, securities issued and subordinated liabilities

Deposits, securities issued and subordinated liabilities are the main funding sources used by the Organization to finance its operations.

They are initially measured at fair value plus transaction costs and subsequently measured at amortized cost using the effective interest rate method.

v. Derivative financial instruments and hedge operations

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair values with the changes being recognized in the statement of income under "Gains and losses on financial assets held for trading".

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Fair values are derived from quoted market prices in active markets (for example, exchange traded options), including recent market transactions and valuation techniques (eg, swaps and currency transactions), discounted cash and option pricing models, as appropriate. In determining the fair value, the credit risk of the counterparty and the entity itself is considered.

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those in the main contract and the contract is not accounted for at fair value through profit or loss. These embedded derivatives are recorded separately at fair values, with changes in fair values being included in the consolidated income statement.

vi. Impairment of financial assets

a) Financial assets recognized at amortized cost

At each balance sheet date, the Organization assesses whether there is objective evidence that the carrying amount of the financial assets is impaired. Impairment losses are only recognized if there is objective evidence that a loss occurs after the initial recognition of the financial asset and that the loss has an impact on the future cash flows of the financial asset or group of financial assets, which can be estimated reliably.

The criteria that the Organization uses to determine whether there is objective evidence of a impairment loss include:

- Relevant financial difficulty of the issuer or borrower;
- A breach of contract, such as default or delays in the payment of interest or principal;

2) Significant accounting practices

- Economic or legal reasons related to the financial difficulty of the borrower, guarantees to the borrower a concession that the creditor would not consider;
- When it becomes probable that the policyholder declares bankruptcy or other financial reorganization;
- The disappearance of an active market for that financial asset due to financial difficulties; or
- Observable data indicating that there is a measurable reduction in estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the loss event can not yet be identified at the level of the individual financial assets in the portfolio, including:
 - (i) adverse changes in the payment situation of the borrowers of the assessed group; and
 - (ii) national or local economic conditions that correlate with default on assets.

The Organization considers evidence of impairment for both individually significant assets and for assets at the collective level. All significant financial assets are valued for specific losses.

All significant assets that the evaluation indicates are not specifically impaired are evaluated collectively to detect any impairment losses incurred but not yet identified. Financial assets, accounted for at amortized cost, which are not individually significant, are evaluated collectively to detect impairment losses, grouping them according to similar risk characteristics. Financial assets, which are individually assessed for impairment and a loss is recognized, are not included in the collective assessment of impairment.

The amount of the loss is measured as the difference between the book value of the assets and the present value of the estimated future cash flows (excluding future credit losses that were not incurred) discounted at the original interest rate of the financial assets. The book value of the asset is reduced through provisions and the amount of the loss is recognized in the statement of income.

The calculation of the present value of the estimated future cash flows of a guaranteed financial asset reflects the cash flows, which may result from the asset's execution, less the costs of obtaining and selling the guarantee.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

For the purposes of a collective assessment of impairment, financial assets are grouped based on similar credit risk characteristics (ie, based on the process, the Organization classifies the type of product, business segments, location geographical, type of guarantee, maturity and other related factors). These characteristics are relevant for estimating future cash flows for groups of such assets as they are indicative of the borrower's ability to pay all amounts owed in accordance with the contractual terms of the assets to be valued.

Future cash flows in a group of financial assets, tested together to determine if there is any impairment, are estimated based on the contracted cash flows of a group of assets and the history of losses for assets with risk characteristics similar to those of the group of assets. Loss history is adjusted according to current observable data to reflect the effects of current conditions that did not affect the period in which the loss history is based and to disregard the effects of the conditions existing in the historical period that do not currently exist.

The methodology and assumptions used to estimate future cash flows are reviewed regularly to reduce any differences between the loss estimates and the actual loss.

After the impairment loss, financial income is recognized using the effective interest rate, which was used to discount future cash flows in order to measure the impairment loss.

When it is not possible to receive a credit, it is written off against the respective provision for impairment. These credits are written off after the completion of all necessary recovery procedures for the determination of the loss amount. Subsequent recoveries of amounts previously written off are credited to the income statement.

b) Financial assets classified as available for sale

The Organization shall assess, at the end of each reporting period, whether there is objective evidence that a financial asset or group of financial assets is deteriorating. For debt instruments, the Organization uses

the criteria mentioned in item (a) above in order to identify a loss event.

In the case of equity instruments classified as available for sale, a material or prolonged decline in the fair value of the security below its cost is considered as evidence that impairment losses have been incurred.

If any such evidence exists for available for sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and the current fair value less any impairment loss on the previously recognized financial asset - is written off recognized in the statement of income.

If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event that occurred after the impairment loss was recognized, the reduction is reversed from the income statement. Impairment losses on capital instruments recognized in the statement of income are not reversed. Increase in fair value of equity instruments after impairment is recognized directly in equity in other comprehensive income.

e) Non-current assets held for sale

Under certain circumstances, property is repossessed following foreclosure of loans that are in default. Repossessed properties are measured at the lower of their carrying amount and fair value less the costs to sell – whichever is the lowest – and are included within “Non-current assets held for sale”.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

f) Property and equipment

i. Recognition and valuation

Property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses (see Note 2(i) below), if any. The cost includes expenses directly attributable to the acquisition of an asset.

The cost of assets internally produced includes the cost of materials and direct labor, as well as any other costs that can be directly allocated and that are necessary for them to function. Software acquired for the operation of the related equipment is recorded as part of the equipment.

When parts of an item have different useful lives, and separate control is practical, they are recorded as separate items (main components) comprising the property and equipment.

Useful lives and residual values are reassessed at each reporting date and adjusted, if appropriate.

Gains and losses from the sale of property and equipment are determined by comparing proceeds received with the carrying amount of the asset and are recorded in the consolidated income statement under the heading "Other operating income/(expenses)".

ii. Subsequent costs

Expenditure on maintenance and repairs of property and equipment items is recognized as an asset when it is probable that future economic benefits associated with the items will flow to the Organization for more

than one year and the cost can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance costs are charged to the consolidated statement of income during the reporting period in which they are incurred.

iii. **Depreciation**

Depreciation is recognized in the consolidated statement of income using the straight-line basis and taking into consideration the estimated useful economic life of the assets. The depreciable amount is the gross-carrying amount, less the estimated residual value at the end of the useful economic life. Land is not depreciated. Useful lives and residual values are reassessed at each reporting date and adjusted, if appropriate.

g) **Intangible assets**

Intangible assets comprise separately identifiable non-monetary items, without physical substance due to business combinations, such as goodwill and other purchased intangible assets, computer software and other such intangible assets. Intangible assets are recognized at cost. The cost of an intangible asset, acquired in a business combination, is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortized over their estimated useful economic life. Intangible assets with an indefinite useful life are not amortized.

Generally, the identified intangible assets of the Organization have a definite useful life. At each reporting date, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits – see Note 2(i) below.

i. **Goodwill**

Goodwill (or bargain purchase gain) arises on the acquisition of subsidiaries, associates and joint ventures.

Goodwill reflects the excess of the cost of acquisition in relation to the Organization's share of the fair value of net identifiable assets or liabilities of an acquired subsidiary, associate or joint venture on the date of acquisition. Goodwill originated from the acquisition of subsidiaries is recognized as "Intangible Assets", and the goodwill from acquisition of associates and joint ventures is included in the carrying amount of the investment. When the difference between the cost of acquisition and the Organization's share of the fair value of net identifiable assets or liabilities is negative (bargain purchase gain), it is immediately recognized

in the consolidated statement of income as a gain on the acquisition date.

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Goodwill is tested annually, as well as whenever a trigger event has been observed, for impairment (see Note 2(i) below). Gains and losses realized in the sale of an entity include consideration of the carrying amount of goodwill relating to the entity sold.

ii. **Software**

Software acquired by the Organization is recorded at cost, less accumulated amortization and accumulated impairment losses, if any.

Internal software-development expenses are recognized as assets when the Organization can demonstrate its intention and ability to complete the development, and use the software in order to generate future economic benefits. The capitalized costs of internally developed software include all costs directly attributable to development and are amortized over their useful lives. Internally developed software is recorded at its capitalized cost less amortization and impairment losses (see Note 2(i) below).

Subsequent software expenses are capitalized only when they increase the future economic benefits incorporated in the specific asset to which it relates. All other expenses are recorded as expenses as incurred.

Amortization is recognized in the consolidated statement of income using the straight-line method over the estimated useful life of the software, beginning on the date that it becomes available for use. The estimated useful life of software is from two to five years. Useful life and residual values are reviewed at each reporting date and adjusted, if necessary.

iii. Other intangible assets

Other intangible assets refer basically to the customer portfolio and acquisition of banking service rights. They are recorded at cost less amortization and impairment losses, if any, and are amortized for the period in which the asset is expected to contribute, directly or indirectly, to the future cash flows.

These intangible assets are reviewed annually, or whenever events or changes in circumstances occur which could indicate that the carrying amount of the assets cannot be recovered. If necessary, the write-off or impairment (see Note 2(i) below) is immediately recognized in the consolidated statement of income.

h) Leasing

The Organization has both operating and finance leases and operates as a lessee and a lessor.

Leases in which a significant part of the risks and benefits of the asset is borne by the lessor are classified as operating leases. For leases in which a significant part of the risks and benefits of the asset is borne by the lessee, the leases are classified as financial lease.

Leases under the terms of which the Organization assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

As a lessee, the Organization classifies its leasing operations mainly as operating leases, and the monthly payments are recognized in the financial statements using the straight-line method over the term of the lease. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease.

When an operating lease is terminated before the contract expires, any payment that may be made to the lessor in the form of a penalty is recognized as an expense for the period.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

As a lessor, the Organization has substantial finance lease contracts, in value and total number of contracts.

i. Finance Leases

Finance lease assets in the consolidated statement of financial position are initially recognized in the "loans and advances to customers" account at an amount equal to the net investment in the lease.

The initial direct costs generally incurred by the Organization are included in the initial measurement of the lease receivable and recognized as part of the effective interest rate of the contract, decreasing the amount of income recognized over the lease term. These initial costs include amounts for commissions, legal fees and internal costs. The costs incurred in relation to the negotiation, structuring and sales of leases are

excluded from the definition of initial direct costs and therefore are recognized as expenses at the beginning of the lease term.

Recognition of financial revenue reflects a constant rate of return on the net investment made by the Organization.

The estimated non-guaranteed residual values used in the calculation of the gross investment of the lessor in the lease are reviewed at least annually. If there is a decrease in the estimated non-guaranteed residual value, the income allocated over the period of the lease is also reviewed periodically and any decrease in relation to the accumulated values is immediately recognized in the consolidated statement of income.

The lease receivables are subject to the requirements of Write-off and credit Losses expected, described in the topic above, financial assets and liabilities, items v and viii, respectively.

ii. Operating leases

The assets leased under operating leases, where the Organization acts as lessor, are recognized in the consolidated statement of financial position as property and equipment according to the nature of the item leased.

The initial direct costs incurred by the Organization are added to the carrying amount of the leased asset and are recognized as expenses over the period of the lease and on the same basis as the income recognition.

Revenue from lease is recognized using the straight-line method over the term of the lease, even if the payments are not made on the same basis. Costs, including depreciation and maintenance, incurred in the generation of income are recognized as expenses.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The depreciation policy for leased assets is the same as the depreciation policy used by the Organization for similar assets.

i) Impairment losses on non-financial assets (except for deferred tax assets)

Assets that have an indefinite useful life such as goodwill are not subject to amortization and are tested, at least, annually at the same date to verify the existence of impairment.

Assets, which are subject to amortization or depreciation, are reviewed to verify impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized based on the excess the carrying amount of the asset or the cash generating unit (CGU) over its estimated recoverable amount. The recoverable amount of an asset or CGU is the greater of its fair value, less costs to sell, and its value in use.

For the purpose of impairment testing, the assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Subject to a ceiling of the operating segments, for the purpose of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to CGU or groups of CGUs that are expected to benefit from the synergies of the combination.

When assessing the value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects the current market conditions of the time value of money and the specific risks of the asset or CGU.

The Organization's corporate assets do not generate separate cash inflows and are utilized by more than one CGU. Corporate assets are allocated to CGUs on a reasonable and consistent basis and tested for impairment as part of the testing of the CGU to which the corporate asset is allocated.

Impairment losses are recognized in the consolidated Statement of Income. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the CGU (or group of CGUs) and then to reduce the carrying amount of the other assets in the CGU (or group of CGUs) on a pro rata basis.

An impairment of goodwill cannot be reversed. With regard to other assets, an impairment loss recognized in previous periods is reassessed at each reporting date for any indications that the impairment has decreased or no longer exists. An impairment loss will be reversed if there has been a change in the estimates used to determine the recoverable amount or to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment had been recognized.

j) Provisions, contingent assets and liabilities and legal obligations

A provision is recognized when, as a result of a past event, the Organization has a present legal or constructive obligation that can be reliably estimated and it is probable that an outflow of resources will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions were established by Management whenever it considers that there is a probable loss taking into account the opinion of their legal advisors; the nature of the actions; the similarity to previous suits; the complexity and the positioning of the Courts.

Contingent liabilities are not recognized, since their existence will only be confirmed by the occurrence or not of one or more future and uncertain events that are not totally under the control of the Management. Contingent liabilities do not meet the criteria for recognition, since they are considered as possible losses and should only be disclosed in explanatory notes, when relevant. Obligations classified as remote are neither provisioned nor disclosed.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Contingent assets are recognized only when there are actual guarantees or definitive favorable court rulings, over which there are no more resources, characterizing the gain as practically certain. Contingent assets, whose expectation of success is probable, are only disclosed in the financial statements, when relevant.

Legal obligations arise from legal proceedings, the object of which is its legality or constitutionality, which, independently of the assessment of the likelihood of success, have their amounts fully recognized in the financial statements.

k) Classification of insurance contracts and investments

An insurance contract is a contract in which the Organization accepts a significant insurance risk from the policy holder by agreeing to compensate the policyholder if a specific, uncertain, future event adversely affects the policy holder. Reinsurance contracts are also treated as insurance contracts because they transfer significant insurance risk. Contracts in the Insurance segment classified as investment contracts are related to our capitalization bonds, which do not transfer significant insurance risk and are accounted for as financial liabilities in accordance with IFRS 9 – Financial Instruments.

l) Insurance and pension plan technical provisions

i. Property damage

The Provision for Unearned Premiums (PPNG) is calculated on a daily pro-rata basis using premiums net of coinsurance premiums, including amounts ceded through reinsurance operations, and the value registered in the consolidated statement of financial position corresponds to the unexpired risk period of the insurance contracts less initial contracting costs. The portion of these reserves corresponding to the estimate for risks in effect but not yet issued is designated PPNG-RVNE.

The Provision for Claims Incurred But Not Reported (IBNR) is constituted based on the claims incurred and not yet paid (IBNP), subtracting the balance of the Provision for Claims to be settled (PSL) at the base date of calculation. To calculate the IBNP, the final estimate of claims that have not yet been paid based on semiannual run-off triangles, which consider the historical development of the claims paid in the last 10 semesters for the branches of damages and the last 11 quarters for the extended guarantee business, in order to establish a future projection by period of occurrence and also considers the estimate of Claims Incurred But Not Enough Reported (IBNER), reflecting the expectation of alteration of the provisioned amount throughout the regulation process.

The Provision for Claims to be Settled (PSL) is determined based on the indemnity payment estimates, considering all administrative and judicial claims existing at the reporting date, restated monetarily, net of salvage and payments expected to be received.

The Provision for Related Expenses (PDR) is recorded on a monthly basis to cover expenses related to estimated claims and benefits. It covers both costs that can be individually allocated to each claim as well as claims costs not discriminated, meaning those incurred at the portfolio level.

The Complementary Provision for Coverage (PCC) shall be established when there is insufficiency of the technical provisions required under the legislation, as determined in the Liability Adequacy Test (see Note 2(l)(vi) below). At the reporting date management did not identify the need for PCC on property damage contracts.

Other Technical Provisions (OPT) correspond to the Provision for Administrative Expenses (PDA) arising on the Mandatory Insurance For Personal Injury Caused by Motor Vehicles (DPVAT) insurance operations.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

ii. Life insurance, excluding life insurance with survival coverage (VGBL product)

The Provision for Unearned Premiums (PPNG) is calculated on a daily pro-rata basis using premiums net of coinsurance premiums, but including amounts ceded through reinsurance operations, and the value registered in the consolidated statement of financial position corresponds to the unexpired risk period of the insurance contracts. The portion of these reserves corresponding to the estimate for risks in effect but not yet issued is designated PPNG-RVNE.

The Mathematical Provision for Benefits to be Granted (PMBaC) is calculated by the difference between the present value of the future benefits and the present value of the future contributions to be received for these benefits.

The Provision for Redemptions and other Amounts to be Settled (PVR) comprises amounts related to redemptions to settle, premium refunds owed and portability (transfer-outs) requested but not yet transferred to the recipient insurer.

The Provision for Claims Incurred But Not Reported (IBNR) is calculated based on semiannual run-off triangles, which consider the historical development of claims paid and outstanding in the last 10 semesters, to establish a future projection per period of occurrence. A residual cauda study is carried out to forecast the claims reported after 10 semesters of the date of occurrence.

The Provision for Claims to be Settled (PSL) considers the expected amounts to be settled from all claim notifications received up to the end of the reporting period. The provision covers administrative and judicial claims indexed to inflation and with interest in the event of judicial claims.

The Complementary Provision for Coverage (PCC) refers to the amount necessary to complement technical reserves, as calculated through the liability adequacy test (TAP). TAP is prepared using statistical and actuarial methods based on realistic considerations, taking into account the biometric table BR-EMS of both genders, adjusted by longevity development criteria compatible with the latest published versions

(improvement), claims, administrative and operating expenses and using a risk free forward interest rate structures (ETTJ) which was approved by SUSEP. The improvement rate is calculated from automatic updates of the biometric table, considering the expected increase in future life expectancy.

The Technical Surplus Provision (PET) corresponds to the difference between the value of the expected cost and the actual cost of claims that occurred during the period for contracts of individual life insurance with rights to participate in technical surplus.

The Provision of Related Expenses (PDR) is recorded to cover expenses related to estimated claims and benefits. For products structured in self-funding and partially regimes, the reserve covers claims incurred. For products structured under a capitalization regime, the reserve covers the expected expenses related to incurred claims and also claims expected to be incurred in the future.

iii. Health and Dental Insurance

The Provision for Claims Incurred But Not Reported (IBNR) is calculated from the final estimate of claims already incurred and still not reported, based on monthly run-off triangles that consider the historical development of claims reported in the last 12 months for health insurance and 18 months for dental insurance, to establish a future projection per period of occurrence

The Provision for Claims to be Settled (PSL) is based on claims received up to the reporting date, including judicial claims and related costs adjusted for inflation.

The Mathematical Provision for Benefits to be Granted (PMBaC) whose calculation methodology considers, in addition to the discount rate of 4% per year (4.5% in 2017), the difference between the present value of the future benefits and the present value of the future contributions, corresponding to the assumed obligations.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The mathematical reserve for vested benefits relates to the individual health care plan portfolio and accounts for the risk related to the cover of the holder's dependents for five years following the death of the holder. It is calculated using: a 4% annual discount rate (4.51% in 2017); the period over which holders are expected to remain in the plan up to their death; and the projected costs of the five-year-period cover in which no premiums will be received.

The Mathematical Provision for Benefits Granted (PMBC-GBS) is constituted by the obligations arising from the contractual clauses of remission of installments in cash, regarding the coverage of health assistance and by the premiums through payment of insured persons participating in the Bradesco Saúde insurance – "GBS Plan", and considering a discount rate of 4% *per annum* (4.5% in 2017).

The Unearned Premium or Contribution Provision (PPCNG) is calculated on the currently effective contracts on a daily pro-rata basis based on the portion of health insurance premiums corresponding to the remaining period of coverage.

The other technical provisions for the individual health portfolio are constituted to cover differences between the expected present value of claims and related future costs and the expected present value of future premiums, considering a discount rate of 4% per year (4.5% in 2017).

iv. Operations with DPVAT Insurance

Revenues from DPVAT premiums and the related technical reserves are recorded gross, based on reports received from Seguradora dos Consórcios do Seguro DPVAT S.A. (Seguradora Líder) in proportion to the percentage of Bradesco's stake in the consortium. It is the function of the Seguradora Líder to collect the premiums, coordinate policy issuance, settle claims and manage the administrative costs within the consortium, in accordance with the CNSP Resolution No. 332/15. As defined in the regulations of the consortium, 50% of the monthly net income is distributed to the consortium's members in the following month. The remaining 50% of the monthly income is retained by the lead insurer over the year and transferred to the members of the consortium at the start of the following year.

v. Open pension plans and life insurance with survival coverage (VGBL product)

The Provision for Unearned Premiums (PPNG) is calculated on a daily pro-rata basis, using net premiums and is comprised of the portion corresponding to the remaining period of coverage. The portion of these reserves corresponding to the estimate for risks in effect but not yet issued is designated PPNG-RVNE.

The Mathematical Provision for Benefits to be Granted (PMBaC) is constituted to the participants who have not yet received any benefit. In defined benefit pension plans, the provision represents the difference between the present value of future benefits and the present value of future contributions, corresponding to obligations assumed in the form of retirement, disability, pension and annuity plans. The provision is calculated using methodologies and assumptions set forth in the actuarial technical notes.

The Mathematical Provision for Benefits to be Granted (PMBaC) related to life insurance with survival coverage and unrestricted benefit pension plans (VGBL and PGBL), and defined contribution plans, includes the contributions, received from participants, net of costs and other contractual charges, plus the financial return generated through the investment of these amounts in units of specially constituted investment funds (FIE).

The Provision for Redemptions and other Amounts to be Settled (PVR) comprises amounts related to redemptions to settle, premium refunds owed and portability (transfer-outs) requested but not yet transferred to the recipient insurer.

The Mathematical Provision for Benefits Granted (PMBC) is recognized for participants already receiving benefits and corresponds to the present value of future obligations related to the payment of those on-going benefits.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The Complementary Provision for Coverage (PCC) refers to the amount necessary to complement technical reserves, as calculated through the Liability Adequacy Test (see Note 2(l)(vi)). TAP is prepared using statistical and actuarial methods based on realistic considerations, taking into account the biometric table BR-EMS of both genders, adjusted by longevity development criteria compatible with the latest published versions (improvement), claims, administrative and operating expenses and using a risk free forward interest rate structures (ETTJ) which was approved by SUSEP. The improvement rate is calculated from automatic updates of the biometric table, considering the expected increase in future life expectancy.

The Provision of Related Expenses (PDR) is recorded to cover expenses related to estimated claims and benefits. For products structured in self-funding and partially regimes, the provision covers claims incurred. For plans structured under a capitalization regime, the provision is made to cover the expected expenses related to incurred claims and also claims expected to be incurred in the future. The projections are performed through the passive adequacy test (TAP).

The Financial Surplus Provision (PEF) corresponds to the financial result, which exceeds the guaranteed minimum profitability of contracts with a financial surplus participation clause.

The Provision for IBNR is calculated based on semiannual run-off triangles, which consider the historical development of claims paid and outstanding in the last 16 semesters to establish a future projection by period of occurrence.

The Provision for Claims to be Settled (PSL) considers the expected amounts to be settled from all claim notifications received up to the end of the reporting period. The provision covers administrative and judicial claims indexed to inflation and with interest in the event of judicial claims.

The provision "Other technical provisions (OPT)" comprises the mathematical provisions of benefits to be granted and benefits granted to this accounting line, as required by SUSEP. This amount refers to the difference between the calculation of mathematical provisions, carried out with realistic premises at the time, approved by the autarchy in 2004, and the calculation with the technical bases defined in the

technical notes of the product.

The financial charges credited to technical provisions, and the recording and/or reversal of the financial surplus, are classified as financial expenses, and are presented under “Net income from insurance and pension plans”.

vi. Liability Adequacy Test (TAP)

The Organization conducted the liability adequacy test for all the contracts that meet the definition of an insurance contract according to IFRS 4 and which are in force on the date of execution of the test. This test is conducted every six months and the liability of insurance contracts, gross of reinsurance, is calculated as the sum of the carrying amount, deducting the deferred acquisition costs and the related intangibles. This is compared to the expected cash flows arising from the obligations under commercialized contracts and certificates.

The test considers projections of claims and benefits that have occurred and are to occur, administrative expenses, allocable expenses related to the claims, intrinsic options and financial surpluses, salvage and recoveries and other income and expense directly related to the insurance contracts.

To calculate the present value of projected cash flows, the Organization used the risk free forward (ETTJ) rate which was approved by SUSEP.

The test was segmented between life insurance and pension products and property coverage, and liabilities related to DPVAT insurance were not included in the adequacy test.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- **Life and pension products**

For private pension products and Life Insurance with Coverage for Survival, the contracts are grouped based on similar risks or when the insurance risk is managed jointly by the Management.

The projected average loss ratio was 44.6% for individual and collective individuals segments, obtained from analysis based on triangles for the development of Company claims generated with information from January 2007.

The result of the liability adequacy test for life insurance was fully recognized in the income statement.

- **Property Coverage**

The expected present value of cash flows relating to claims incurred – primarily claims costs and salvage recoveries – was compared to the technical provisions for claims incurred – PSL and IBNR.

The expected present value of cash flows relating to claims to be incurred on the policies in force, plus any administrative expenses and other expenses relating to products in run-off, was compared to the sum of the related technical provisions – PPNG and PPNG-RVNE.

The projected average loss ratio was 10.10% for the Extended Guarantee segment and 52.8% for the elementary lines, including in this calculation the estimate of the future premium of the housing insurance portfolio, which is characterized by low loss ratio and long terms, since it accompanies the period of financing of the property.

The average reinsurance projected in the study, calculated on the basis of reported claims was 5.66%.

The result of the liability adequacy test, for property coverage, did not present insufficiency and, consequently, no additional PCC provisions were recorded.

m) Reinsurance contracts

Reinsurance contracts are used in the normal course of operations with the purpose of limiting potential losses, by spreading risks. Liabilities relating to contracts that have been reinsured are presented gross of their respective recoveries, which are booked as assets since the existence of the reinsurance contract does not nullify the Organization's obligations with the insured parties.

As required by the regulators, reinsurance companies with headquarters abroad must have a minimum rating, assessed by a credit rating agency, to operate in the country, whereby all other reinsurance operations must be performed with local reinsurers. This is how Management understands that the impairment risks are reduced. If there are indications that the amounts recorded will not be realized by its carrying amount, these assets will be adjusted for impairment.

n) Deferred acquisition costs

These comprise deferred acquisition costs including commissions and brokers' fees related to the sale of insurance policies. Deferred commissions are recognized in the consolidated statement of income over the life of the respective policies and pension plan contracts or over an average period of 12 months. Expenses relating to insurance agency operations relating to the sale of health plans are amortized over a 24 month period and life assurance costs are appropriated within 12 months.

o) Employee benefits

Bradesco recognizes (in accordance with IAS 19), prospectively the surplus or deficit of its defined benefit plans and post-retirement plans as an asset or an obligation in its consolidated statement of financial position, and must recognize the changes in the financial condition during the year in which the changes occurred, in profit or loss.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

i. Defined contribution plan

Bradesco and its subsidiaries sponsor pension plans for their employees and Management. Contribution obligations for defined contribution pension plans are recognized as expenses in profit or loss as incurred. Once the contributions are paid, Bradesco, in the capacity of employer, has no obligation to make any additional payment.

ii. Defined benefit plans

The Organization's net obligation, in relation to the defined benefit plans, refers exclusively to institutions acquired and is calculated separately for each plan, estimating the future defined benefit that the employees will be entitled to after leaving the Organization or at the time of retirement.

Bradesco's net obligation for defined benefit plans is calculated on the basis of an estimate of the value of future benefits that employees receive in return for services rendered in the current and prior periods. This value is discounted at its current value and is presented net of the fair value of any plan assets.

The calculation of the obligation of the defined benefit plan is performed annually by a qualified actuary, using the projected unit credit method, as required by accounting rule.

Remeasurement of the net obligation, which include: actuarial gains and losses, the return of the assets of the plan other than the expectation (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income.

Net interest and other expenses related to defined benefit plans are recognized in the income statement.

iii. Termination benefits

Severance benefits are required to be paid when the employment relationship is terminated by the Organization before the employee's normal date of retirement or whenever the employee accepts voluntary redundancy in return for such benefits.

Benefits which are payable 12 months or more after the reporting date are discounted to their present value.

iv. Short-term benefits

Benefits such as wages, salaries, social security contributions, paid annual leave and paid sick leave, profit sharing and bonuses (if payable within 12 months of the reporting date) and non-monetary benefits such as health care, etc. are recorded as expenses in the consolidated statement of income, without any discount to present value, if the Organization has a present legal or constructive obligation to pay the amount as a result of past service provided by the employee and the obligation can be reliably estimated.

p) Capitalization bonds

The liability for capitalization bonds is registered in the line "Other liabilities". Financial liabilities and revenues from capitalization bonds are recognized at the time bonds are issued.

Bonds are issued according to the types of payments, monthly or single payment. Each bond bears a nominal value and the deposit portion of each payment is remunerated at the referential rate (TR) plus 0.5% per month, which is used to determine the liability.

Capitalization bond beneficiaries are eligible for a prize draw. At the end of a certain period that is determined at the time the capitalization bond is issued, a beneficiary may redeem the nominal value paid plus the referential rate (TR), even if they have not won in the draw. These products are regulated by the insurance regulator in Brazil; however, they do not meet the definition of an insurance contract in accordance with IFRS 4 and, therefore, are classified as financial liabilities in accordance with IFRS 9.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Unclaimed amounts from “capitalization plans” are derecognized when the obligation legally expires, in accordance with IFRS 9 as it relates to the derecognition of a financial liability.

Expenses for placement of “capitalization plans”, are recognized as they are incurred.

q) Interest

Income from financial assets measured at amortized cost and at FVOCI, except instruments of equity and interest costs from liabilities classified at amortized cost are recognized on an accrual basis in the consolidated statement of income using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments and receipts throughout the expected life of the financial asset or liability (or, when appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective rate, the Organization estimates future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

The calculation of the effective interest rate includes all commissions, transaction costs, discounts or bonuses which are an integral part of such rate. Transaction costs are incremental costs directly attributable to the acquisition, issuance or disposal of a financial asset or liability.

r) Fees and commissions

Fees and commission income and expense which are part of and are directly allocable to the effective interest rate on a financial asset or liability are included in the calculation of the effective interest rate.

Other fee and commission income, substantially composed by account service fees, asset management fees, credit card annual charges, and collection and consortium fees are recognized, according to the requirements of IFRS 15, to the extent that the obligations of performance are fulfilled. The price is allocated to the provision of the monthly service, and the revenue is recognized in the result in the same manner. When a loan commitment is not expected to result in the drawdown of a loan, the related commitment fees are recognized on a straight-line basis over the commitment period. Other fees and commissions expense relate mainly to transaction as the services are received.

s) Net insurance income

Insurance and coinsurance premiums, net of premiums transferred through coinsurance and reinsurance and related commissions, are recognized as income upon issuance of the respective policies/ certificates/ endorsements and invoices, or at the beginning of the risk period for cases in which the cover begins before issue date, and accounted for on a straight-line basis, over the duration of the policies, through the upfront recognition and subsequent reversal of the provision for unearned premiums and the deferred acquisition costs. Income from premiums and the acquisition costs related to risks already assumed whose respective policies have not yet been issued are recognized in the consolidated statement of income at the start of the risk coverage period on an estimated basis.

The health insurance premiums are recorded in the premium account (result) or Unearned Premium or Contribution Provision (PPCNG), according to the coverage period of the contracts in effect at the balance sheet date.

Revenues and expenses related to “DPVAT” insurance operations are recorded on the basis of information received from the Seguradora Líder dos Consórcios do Seguro DPVAT S.A.

Accepted co-insurance contracts and retrocession operations are recorded on the basis of information received from the lead co-insurer and IRB - Brasil Resseguros S.A. (IRB), respectively.

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Reinsurance operations are recorded based on the provision of accounts, which are subject to review by reinsurers. The deferral of these operations is carried out in a manner consistent with the related insurance premium and/or reinsurance contract.

The receipts from insurance agency operations are deferred and recognized in income linearly, for a period of 24 months in health insurance operations and by the term of 12 months in the other operations.

Contributions to pension plans and life insurance premiums with survivor coverage are recognized in income upon their effective receipt.

The management fee income is appropriated to the income on an accrual basis, according to contractually established rates.

t) Income tax and social contribution

Income tax and social contribution deferred tax assets, calculated on income tax losses, social contribution losses and temporary differences, are recorded in "Assets - Deferred Taxes" and the deferred tax liabilities on tax differences in lease depreciation (applicable only for income tax), mark-to-market adjustments on securities, restatement of judicial deposits, among others, are recorded in "Liabilities - Deferred Taxes".

Deferred tax assets on temporary differences are realized when the difference between the accounting treatment and the income tax treatment reverses. Deferred tax assets on income tax and social contribution losses are realizable when taxable income is generated, up to the 30% limit of the taxable profit for the period. Deferred tax assets are recorded based on current expectations of realization considering technical studies and analyses carried out by Management.

The provision for income tax is calculated at 15% of taxable income plus a 10% surcharge. For financial companies, financial company equivalent and of the insurance industry, the social contribution on the profit was calculated until August 2015, considering the rate of 15%. For the period between September 2015 and December 2018, the rate was changed to 20%, according to Law No. 13,169/15, and returned at the rate of 15% as from January 2019. For the other companies, the social contribution is calculated considering the rate of 9%.

Tax expense comprises current and deferred tax. Current and deferred tax are recorded in the consolidated statement of income except when the result of a transaction is recognized directly in equity, in which case the related tax effect is also recorded in equity or in other comprehensive income.

Current tax assets are amounts of taxes to be recovered through restitution or offset with taxes due from excess of taxes paid in relation to the current and/or previous period.

Current tax expenses are the expected amounts payable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Current tax payable also includes any tax liability arising from the declaration of dividends.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and amount used for taxation purposes. Deferred tax is not recognized for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries, associates and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future; and

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

In determining the amount of current and deferred tax the Organization takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Organization believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of various factors, including interpretations of tax law and prior experience. This assessment relies on estimates and assumptions and may involve judgments about future events. New information may become available that causes the Organization to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact the tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Additional taxes that arise from the distribution of dividends by the Bank are recognized at the same time as the liability to pay the related dividend is recognized.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

u) Segment reporting

2) Significant accounting practices

Information for operating segments is consistent with the internal reports provided to the Executive Officers (being the Chief Operating Decision Makers), which are comprised by the Chief Executive Officer, Executive Vice-Presidents, Managing Officers and Deputy Officers. The Organization operates mainly in the banking and insurance segments. The banking operations include operations in retail, middle market and corporate activities, lease, international bank operations, investment banking and private banking. The Organization's banking activities are performed through its own branches located throughout the country, in branches abroad and through subsidiaries, as well as by means of our shareholding interest in other companies. The insurance segment consists of insurance operations, supplementary pension plans and capitalization plans which are undertaken through a subsidiary, Bradesco Seguros S.A., and its subsidiaries.

v) Shareholders' Equity

Preferred shares have no voting rights, but have priority over common shares in reimbursement of capital, in the event of liquidation, up to the amount of the capital represented by such preferred shares, and the right to receive a minimum dividend per share that is ten percent (10%) higher than the dividend distributed per share to the holders of common shares.

i. Share issue costs

Incremental costs directly attributable to the issuance of shares are shown net of taxes in shareholders' equity, thus reducing the initial share value.

ii. Earnings per share

The Organization presents basic and diluted earnings per share data. Basic earnings per share is calculated by allocating the net income attributable to shareholders between that attributable to common shareholders and that attributable to preferred shareholders and dividing this by the weighted average number of common and preferred shares, respectively, outstanding during the year, excluding the average number of shares purchased by the Organization and held as treasury shares. Diluted earnings per share are the same as basic earnings per share, as there are no potentially dilutive instruments.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

iii. Dividends payable

Dividends on shares are paid and provisioned during the year. In the Shareholders' Meeting are destined at least the equivalent of 30% of the annual adjusted net income, in accordance with the Company's Bylaws. Dividends approved and declared after the reporting date of the financial statements, are disclosed in the notes as subsequent events.

iv. Capital transactions

Capital transactions are transactions between partners qualified as owners of investment. These transactions modify the equity held by the controlling shareholder in a subsidiary. Since there is no loss of control, the difference between the amount paid and the fair value of the transaction is recognized directly in the shareholders' equity.

3) Risk Management

Risk management structure

The risk and capital management structure is made up of committees, which assist the Board of Directors, the CEO and the Board of Executive Officers in their strategic decision-making process.

The Organization has a committee known as the Integrated Risk Management and Capital Allocation Committee (COGIRAC), whose duty is to assure the fulfillment of the Organization's risk management processes and policies and advise the Board of Directors in performing its duties in risk management, capital and control.

This committee is assisted by the Capital Management Executive Committee, and Risk Management Executive Committees in managing a) Credit risk, b) Market and Liquidity risk, c) Operational and Social and Environmental risk and d) Grupo Bradesco Seguros and BSP Empreendimentos Imobiliários. In addition, it also has the support of the Products and Services Executive Committee and the Executive Committees in business areas, which, among other duties, suggest exposure thresholds to their respective risks and prepare mitigation plans to be submitted to the Integrated Risk Management and Capital Allocation Committee and the Board of Directors.

To comply with Resolution No. 4,557/17 of February 23, 2017, of the National Monetary Council (CMN), the Risk Committee was implemented in order to represent an advisory forum to the Board of Directors for the performance of its assignments related to risk and capital management, and the position of Chief Risk Officer (CRO) was formalized, which, among other responsibilities, exercises the supervision of the development, implementation and performance of the risk management structure, including its improvement, on independent basis and reporting to the Risk Committee, CEO and Board of Directors.

The Integrated Risk Control Department (DCIR), whose mission is to promote and to implementing risk control and capital allocation through robust practices and certification of existence, execution and effectiveness of controls which assure acceptable risk levels in the Organization's processes, independently, consistently, on a transparent and integrated manner. This Department is also responsible for complying with the Central Bank of Brazil rules for risk management activities.

Risk appetite

The risk appetite refers to the types and levels of risks that the Organization is willing to accept in the conduct of its business and purposes. The Risk Appetite Statement – RAS is an important instrument that summarizes the risk culture of the Organization, and guides the strategic and business plans, driving the budget planning and allowing Senior Management to optimize the allocation of capital at acceptable risk levels and types, considering the markets and the regulatory environment in which it operates.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

At the same time, RAS emphasizes the existence of an efficient process of assignments in the operational risk management and in the performance of control functions, as well as for mitigation and disciplinary actions and processes of scheduling and reporting to Senior Management upon breach of the risk limits or control processes established.

The Risk Appetite Statement is reviewed on annual basis, or whenever necessary, by the Board of Directors and permanently monitored by forums of the Senior Management and business and control areas.

RAS reinforces the dissemination of the risk culture by disclosing the main aspects of risk appetite of the Organization to all its members.

For the many types of risks, whether measurable or not, the Organization established control approaches, observing the main global dimensions:

- **Capital:** to maintain a proper capital level, even on prospective basis, to cover unexpected losses, situations of stress and business opportunities, in compliance with regulatory requirements, thus ensuring the soundness of the Organization;
- **Profitability:** to remunerate its capital on sustainable basis, seeking to cover the remuneration expectation of its shareholders in relation to the risks assumed in their business;
- **Liquidity:** to maintain diversified and low cost sources of funding through interconnected network and dynamic and proper segmentation to provide a cash structure compatible with the size of its obligations; thus, ensuring survival even in adverse scenarios;

- Loan: to focus on domestic clients, on diversified and dispersed manner, in terms of products and segments, aiming at the security and quality of the portfolio, with guarantees consistent with the risks assumed, considering the amounts, purposes and terms of loans granted and maintaining proper levels of provisions and low levels of concentrations;
- Market: to align the exposures to the strategic guidelines, with specific limits established on independent basis and with risks mapped, measured and classified as to the probability and magnitude; and
- Operational: to provide assurance with regard to appropriately carrying out the Organization's business in accordance with laws regulations and policies, ensuring that processes are covered by controls that mitigate operational risks.

Stress Test Program

The risk management structure has a stress test program defined as a coordinated set of processes and routines, containing own methodologies, documentation and governance, whose principal purpose is to identify potential vulnerabilities of the institution. Stress tests are exercises of prospective evaluation of the potential impacts of adverse events and circumstances on capital, on liquidity or on the value of a portfolio of the Organization.

In the Program of Stress Tests, the scenarios are designed by the Department of Research and Economic Studies – DEPEC and discussed with the Business areas, Integrated Risk Control Department – DCIR, Department of Planning, Budgeting and Control – DPOC, among other areas. Both scenarios and results are discussed and approved by a specific Collegiate Body. Subsequently, they are submitted to the Executive Committee and Board of Directors, that, in addition to the scenarios and results of stress tests are also responsible for the approval of the program and guidelines to be followed.

Stress tests are used as a tool for managing risks: in its identification, measurement, evaluation, monitoring, control and mitigation of risks of the institution. The results of stress tests are used for evaluation of capital and liquidity levels of the institution, for preparation of the respective contingency plans, for evaluation of the capital adequacy and for the recovery plan. Similarly, the results are considered in the decisions related to strategic guidelines, definition of the levels and limits of risk appetite applied to the management of risks and capital, as well as in the definition of governance actions aimed at mitigation of risks identified by aligning them to the risk appetite of the Organization.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

3.1. Credit risk

Credit risk refers to the possibility of losses associated with the borrower's or counterparty's failure to comply with their financial obligations under the terms agreed, as well as the fall in value of loan agreements resulting from deterioration in the borrower's risk rating, the reduction in gains or remunerations, benefits granted to borrowers in renegotiations, recovery costs and other costs related to the counterparty's noncompliance with the financial obligations.

Credit risk management in the Organization is a continuous and evolving process of mapping, development, assessment and diagnosis through the use of models, instruments and procedures that require a high degree of discipline and control during the analysis of transactions in order to preserve the integrity and autonomy of the processes.

The Organization controls the exposure to credit risk which comprises mainly loans and advances, securities and derivatives. There is also the credit risk in financial obligations relating to commitments on loan or financial guarantees.

With the objective of not compromising the quality of the portfolio, all aspects inherent to credit concession, concentration, guarantee requirements and terms, among others, are observed.

The Organization continuously maps all the activities that could possibly generate exposure to credit risk, classifying them by their probability and magnitude, identifying their managers and mitigation plans.

Counterparty Credit Risk

The counterparty credit risk to which the Organization is exposed includes the possibility of losses due to the non-compliance by counterparties with their obligations relating to the settlement of financial asset trades, including the settlement of derivative financial instruments. Counterparty credit risk also includes the risk related to a downgrade in the counterparty's credit standing.

The Organization exercises complete control over its net position (the difference between purchase and sale agreements) and potential future exposures from operations where there is counterparty risk. Each counterparty's exposure to risk is treated in the same way and is part of general credit limits granted by the Organization's to its customers.

The Counterparty Credit Risk management covers the modeling and monitoring (i) of the consumption of the credit limit of the counterparties, (ii) of the portion of the adjustment at fair value of the portfolio of credit derivatives (CTF – Credit Value Adjustment) and (iii) of the respective regulatory and economic capital. The methodology adopted by the Organization establishes that the credit exposure of the portfolio to certain counterparty can be calculated based on the Replacement Cost (RC) of its operations in different scenarios of the financial market, which is possible through the Monte Carlo simulation process.

Regarding the forms of mitigating the Counterparty credit risk that the Organization is exposed to, the most usual is the composition of guarantees as margin deposits and disposal of public securities, which are made by the counterparty with the Organization or with other trustees, whose counterparty's risks are also appropriately evaluated.

Credit Concession

Under the responsibility of the Credit Department, lending procedures are based on the Organization's credit policy emphasizing the security, quality and liquidity of the lending. The process is guided by the risk management governance and complies with the rules of the Central Bank of Brazil.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The methodologies adopted value business agility and profitability, with targeted and appropriate procedures oriented to the granting of credit transactions and establishment of operating limits.

In the evaluation and classification of customers or economic groups, the quantitative (economic and financial indicators) and qualitative (personal data and behaviors) aspects associated with the customers capacity to honor their obligations are considered.

All business proposals are subject to operational limits, which are included in the Loan Guidelines and Procedures. At branches, the delegation of power to grant a loan depends on its size, the total exposure to the Organization, the guarantees offered, the level of restriction and their credit risk score/rating. Business proposals with risks beyond these limits are subject to technical analysis and approval of by the Credit Department.

In its turn, the Executive Credit Committee was created to decide, within its authority, on queries about the granting of limits or loans proposed by business areas, previously analyzed and with opinion from the Credit Department. According to the size of the operations/limits proposed, this Committee, may then submit the proposal for approval by the Board of Directors.

Loan proposals pass through an automated system with parameters set to provide important information for the analysis, granting and subsequent monitoring of loans, minimizing the risks inherent in the operations.

There are exclusive Credit and Behavior Scoring systems for the assignment of high volume, low principal loans in the Retail segment, meant to provide speed and reliability, while standardizing the procedures for loan analysis and approval.

Business is diversified wide-spread and aimed at individuals and companies with a proven payment capacity and solvency, seeking to support them with guarantees that are adequate to the risk assumed, considering the amounts, objectives and the maturities of loan granted.

Credit Risk Rating

The credit risk assessment methodology, in addition to providing data to establish the minimum parameters for lending and risk management, also enables the definition of Special Credit Rules and Procedures according to customer characteristics and size. Thus, the methodology provides the basis not only for the correct pricing of operations, but also for defining the appropriate guarantees.

The methodology used also follows the requirements established by CMN Resolution No. 4,327/14 and includes analysis of social and environmental risk in projects, aimed at evaluating customers' compliance with related laws and the Equator Principles, a set of rules that establish the minimum social and environmental criteria which must be met for lending.

In accordance with its commitment to the continuous improvement of methodologies, the credit risk rating of the Organization's economic groups/customers uses an eighteen-level scale, in which fourteen levels represent performing loan operations.

Risk ratings for economic groups (legal entities) are based on standardized statistical and judgmental procedures, and on quantitative and qualitative information. Classifications are carried out in a corporate manner and periodically monitored in order to preserve the quality of the credit portfolio.

For individuals, in general, credit ratings are based on personal data variables, such as income, assets, restrictions and indebtedness, in addition to the history of their relationship with the Organization, and statistical credit evaluation models.

The criteria regulated by Resolution No. 2,682 of the National Monetary Council are maintained for the constitution of the applicable provisions, according to the equivalence of the *ratings* shown in the table above.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The risk classification adopted on the basis of the customers' capacity of honoring their commitments is shown below:

	Internal Rating	Organization classification
1	AA1	
2	AA2	
3	AA3	
4	A1	
5	A2	Low risk
6	A3	
7	B1	
8	B2	
9	B3	
10	C1	
11	C2	
12	C3	
13	C4	Medium risk
14	D	
15	E	
16	F	High risk
17	G	
18	H	

Credit-Risk Management Process

The credit risk management process is conducted in a corporation-wide manner. This process involves several areas with specific duties, ensuring an efficient structure. Credit risk measurement and control are conducted in a centralized and independent manner.

The credit risk monitoring area actively participates in improving the customer risk rating models, following up large risks by periodically monitoring major delinquencies and the provisioning levels for expected and unexpected losses.

This area continuously reviews the internal processes, including the roles and responsibilities and its training and requirements, as well as conducts periodical reviews of risk evaluation processes to incorporate new practices and methodologies.

Control and Monitoring

The credit risk of the Organization has its control and corporate follow-up performed in the credit risk area of the Integrated Risk Control Department –DCIR. The Department advises the Executive Committee on Credit Risk Management, where methodologies for measuring credit risk are discussed and formalized. Significant issues discussed in this committee are reported to the COGIRAC, which is subordinate to the Board of Directors.

In addition to committee meetings, the area holds monthly meetings with all product and segment executives and officers, with a view to inform them about the evolution of the loan portfolio, delinquency, credit recoveries, gross and net losses, limits and concentrations of portfolios, allocation of economic and regulatory capital, among others. This information is also reported to the Audit Committee on a monthly basis.

The area also monitors any internal or external event that may cause a significant impact on the Organization's credit risk, such as spin-offs, bankruptcies and crop failures, in addition to monitoring economic activity in the sectors to which the company has significant risk exposures.

Both the governance process and existing limits are sanctioned by the Integrated Risk Management and Capital Allocation Committee, which are submitted for the approval of the Board of Directors, being reviewed at least once a year.

Internal Report

Credit risk is monitored on a daily basis in order to maintain the risk levels within the limits established by the Organization. Managerial reports on risk control are provided to all levels of business, from branches to Senior Management.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

With the objective of highlighting the risk situations that could result in the customers' inability to honor its obligations as contracted, the credit risk monitoring area provides daily reports, to the branches, business segments, as well as the lending and loan recovery areas. This system provides timely information about the loan portfolios and credit bureau information of customers, in addition to enabling comparison of past and current information, highlighting points requiring a more in-depth analysis by managers.

The Organization also has an electronic corporate system of credit risk indicators to provide the lending and loan recovery areas, business areas, regional managers and branches with information on assets by segment, product, region, risk classification, delinquency and expected and unexpected losses, among others. This electronic system provides both a macro-level and detailed view of the information, and also enables a specific loan operation to be viewed.

The information is viewed and delivered via dashboards, allowing queries at several levels such as business segment, divisions, managers, regions, products, employees and customers, and under several aspects (asset, delinquency, provision, write-off, restriction levels, guarantees, portfolio quality by rating, among others).

Measurement of credit risk

Periodically, the Organization evaluates the expected losses of the exposures subject to credit risk by means of statistical models and internal processes, considering the historical loss experience, which comprises approximately 8 years, as well as the current quality and characteristics of clients and operations, including their guarantees. Macroeconomic Information is also used in the measurement by means of econometric models that incorporate the current and prospective effects of economic variables in the estimates of expected loss. The main macroeconomic variables used in this process are tied to interest

rates, inflation rates and internal and external economic activity indexes.

The Organization uses different indicators for classification in stages, according to the profile of the client and the operation. Below we present the breakdown of segments, according with stages and indicators.

Retail Segment:

- Stage 1: up-to-date exposure or 30 days in arrears;
- Stage 2: exposure between 31 and 90 days in arrears, except for residential real estate financing that is between 31 and 180 days, or classification to internal ratings framed as medium or high risk;
- Stage 3 (Default or "impaired"): exposure due over 90 days, except for residential real estate financing that is above 180 days.

Wholesale Segment:

- Stage 1: up-to-date exposure or 30 days in arrears;
- Stage 2: exposure due between 31 and 90 days, except for residential real estate financing that is between 31 and 180 days, or classification to internal ratings framed as medium or high risk;
- Stage 3 (Default or "impaired"): material exposure due beyond 90 days, except for financing residential real estate, which is due over 180 days and/or that showed signs that they would not be honored in the agreed conditions without the execution of guarantees, such as: bankruptcy events, judicial recovery and restructuring of debts.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The expected losses are based on the multiplication of credit risk parameters: Probability of default (PD), Loss due to default (LGD) and Exposure to noncompliance (EAD).

The PD parameter refers to the probability of noncompliance perceived by the Organization regarding the client, according to the internal models of evaluation, which, in retail, use statistical methodologies based on the characteristics of the client, such as the internal rating and segment, and the operation, such as product and guarantee and, in the case of wholesale, they use specialist models based on financial information and qualitative analyses.

The LGD refers to the percentage of loss in relation to exposure in case of noncompliance, considering all the efforts of recovery, according to the internal model of evaluation that uses statistical methodologies based on the characteristics of the operation, such as product and guarantee. Clients with significant exposure have estimates based on individual analyses, which are based on the structure of the operation and expert knowledge, aiming to capture the complexity and the particularities of each operation.

EAD refers to the exposure (book value) of the client in relation to the Organization at the time of estimation of the expected loss. In the case of commitments or financial guarantees provided, the EAD will have the addition of the expected value of the commitments or financial guarantees provided that they will be converted into credit in case of noncompliance of the client.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Credit Risk Exposure

We present below the credit risk exposure of the financial instruments:

	R\$ thousand		
	On December 31, 2018		
	Gross value	Expected loss	Book value
Financial assets			
Cash and balances with banks (Note 20)	107,209,743	-	107,209,743
Financial assets at fair value through profit or loss (Note 21)	246,161,150	-	246,161,150
Financial assets at fair value through other comprehensive income (Note 24)	178,050,536	(337,506)	178,050,536
Loans and advances to banks (Note 26)	105,250,928	(1,978)	105,248,950
Loans and advances to customers (Note 27)	411,492,655	(31,105,579)	380,387,076
Securities at amortized cost (Note 28)	143,626,776	(3,022,038)	140,604,738
Other financial assets (Note 35)	43,893,309	-	43,893,309
Provision for Expected Loss			
Loan Commitments (Note 27)	-	(2,551,676)	(2,551,676)
Financial guarantees (Note 27)	-	(719,216)	(719,216)
Items not recorded in the balance sheet (Note 46)	301,345,624	-	301,345,625
Total risk exposure	1,537,030,721	(37,737,993)	1,499,630,235

The Organization's maximum credit risk exposure was R\$1,499,630,235 thousand in 2018, which was an increase of 8.4% compared to 2017.

Of this exposure, R\$107,209,743 thousand, or 7.1% is related to cash and bank deposits composed mainly of funds deposited with the Central Bank of Brazil that are assessed to have low credit risk.

Financial assets at fair value through profit or loss (16.4% of total exposure) are mostly low credit risk, composed mainly of Brazilian government securities at fair value and also include derivative financial instruments.

Financial assets at fair value through other comprehensive income amounted to R\$178,050,536 thousand (11.9% of total exposure), are recorded at fair value with changes in ECL recognized in profit or loss and are represented mostly by Brazilian government securities, for details of these assets , see note 24.

Loans and advances to financial institutions, which are 7.0% of the total, consist basically of repurchase agreements which have a low credit risk.

Loans and advances to customers represent 25.4% of the total exposure, for details of these assets and the expected loss, see note 27 for details.

Financial assets at amortized cost represent 9.4% of the total, for details of these assets, see note 28.

Operations classified as "Other financial assets" represent 2.9% of the total and are basically comprised of foreign exchange operations and escrow deposits.

In 2018, items not recorded in the consolidated balance sheet (recorded in clearing accounts) totaled R\$301,345,625 thousand, representing 20.1% of total exposure.

Impairment of loans and advances	(31,105,579)		(27,055,566)	
Total of net loans and advances to customers	380,387,076		346,758,099	

Credit Risk Mitigation

Potential credit losses are mitigated by the use of a variety of types of collateral formally stipulated through legal instruments, such as conditional sales, liens and mortgages, by guarantees such as third-party sureties or guarantees, and also by financial instruments such as credit derivatives. The efficiency of these instruments is evaluated considering the time to recover and realize an asset given as collateral, its market value, the guarantors' counterparty risk and the legal safety of the agreements. The main types of collaterals include: term deposits; financial investments and securities; residential and commercial properties; movable properties such as vehicles, aircraft. Additionally, collateral may include commercial bonds such as invoices, checks and credit card bills. Sureties and guarantees may also include bank guarantees.

The table below shows the financial effect of the guarantee on credit and financial lease transactions.

Total	411,492,655	198,479,563

(1) Of the total balance of credit operations, R\$284,373,526 thousand refers to operations without guarantees.

3.2. Market risk

Market risk is represented by the possibility of financial loss due to fluctuating prices and interest rates of the Organization's financial instruments, such as its asset and liability transactions that may have mismatched maturities, currencies and indexes.

Market risk is identified, measured, mitigated, controlled and reported. The Organization's exposure to market risk profile is in line with the guidelines established by the governance process, with limits monitored on a timely basis independently of the business areas.

All transactions that expose the Organization to market risk are mapped, measured and classified according to probability and magnitude, and the whole process is approved by the governance structure.

The risk management process relies on the participation of all levels of the Organization, from the business areas to the Board of Directors.

In compliance with the best Corporate Governance practices, to preserve and strengthen the management of market risk in the Organization, as well as to meet the requirements of Resolution No. 4,557/17, of CMN, the Board of Directors approved the Market and Liquidity Risk Management Policy, which is reviewed at least annually by the relevant Committees and by the Board of Directors itself, and provides the main guidelines for acceptance, control and management of market risk.

In addition to the policy, the Organization has specific rules to regulate the market risk management process, as follows:

- Classification of Operations;
- Reclassification of Operations;
- Trading of Public or Private Securities;
- Use of Derivatives; and
- Hedging.

Market Risk Management Process

The market risk management process is a corporation wide process, comprising from business areas to the Board of Directors; it involves various areas, each with specific duties in the process, thereby ensuring an efficient structure. The measurement and control of market risk is conducted in a centralized and independent manner. This process permits that the Organization be the first financial institution in the country authorized by the Central Bank of Brazil to use its internal market risk models to calculate regulatory capital requirements since January 2013. This process, is also revised at least once a year by the Committees and approved the Board itself.

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Determination of Limits

Proposed market-risk limits are validated by specific Committees and submitted for approval by the Integrated Risk Management and Capital Allocation Committee, and then for approval by the Board of Directors. Based on the business' characteristics, they are segregated into the following Portfolios:

Trading Portfolio: it comprises all operations involving financial instruments, held-for-trading, including derivatives, or used to hedge other instruments in the Trading Portfolio, which have no trading restrictions. Held-for-trading operations are those intended for resale, to obtain benefits from actual or expected price variations, or for arbitrage.

The Trading Portfolio is monitored with the following limits:

- Value at Risk (VaR);
- Stress;
- Income;
- Financial Exposure / Concentration.

Banking Portfolio: it comprises operations not classified in the Trading Portfolio, arising from Organization's other businesses and their respective hedges.

The Banking Portfolio is monitored with the following limits:

- Interest rate risk limit.

Market-Risk Measurement Models

Market risk is measured and controlled using Stress, Value at Risk (VaR), Economic Value Equity (EVE) and Sensitivity Analysis methodologies, as well as limits for the Management of Results and Financial Exposure. Using several methodologies to measure and evaluate risks is of great importance, because they can complement each other and their combination allows for analysis of different scenarios and situations.

Trading and Regulatory Portfolio

Trading Portfolio risks are controlled by the Stress and VaR methodologies. The Stress methodology quantifies the negative impact of economic shocks and events that are financially unfavorable to the Organization's positions. The analysis uses stress scenarios prepared by the Market Risk area and the Organization's economists based on historical and prospective data for the risk factors in which the Organization portfolio.

The methodology adopted to calculate VaR is the Delta-Normal, with a confidence level of 99% and considering the number of days necessary to unwind the existing exposures. The methodology is applied to the Trading and Regulatory Portfolio (Trading Portfolio positions plus Banking Portfolio foreign currency and commodities exposures). It should be noted that for the measurement of all the risk factors of the portfolio of options are applied the historical simulation models and Delta-Gama-Vega, prevailing the most conservative between the two. A minimum 252-business-day period is adopted to calculate volatilities, correlations and historical returns.

For regulatory purposes, the capital requirements relating to shares held in the Banking Portfolio of Prudential Conglomerate (includes, in its consolidation basis, entities located in the country and abroad, financial institutions, similar to financial institutions over which the institution has direct or indirect control, in addition to investment funds pursuant to CMN Resolution No. 4,280/13) are determined on a credit risk basis, as per Central Bank of Brazil resolution, i.e., are not included in the market risk calculation.

Risk of Interest Rate in the Banking Portfolio

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The measurement and control of the interest-rate risk in the Banking Portfolio area is based on the Economic Value of Equity (EVE) methodology, which measures the economic impact on the positions, according to scenarios prepared by the Organization's economists. These scenarios determine the positive and negative movements of interest rate curves that may affect Organization's investments and capital-raising.

The EVE methodology consists of repricing the portfolio exposed to interest rate risk, taking into account the scenarios of increases or decreases of rates, by calculating the impact on present value and total term of assets and liabilities. The economic value of the portfolio is estimated on the basis of market interest rates on the analysis date and of scenarios projected. The difference between the values obtained for the portfolio will be EVE, that is, the interest-rate risk applicable to the Banking Portfolio.

To measure the Banking Portfolio interest rate risk, the premise of prepayment of loans is not used. For demand and savings deposits with undetermined maturity, their historical behaviors and the possibility of maintaining them are studied. After all the deductions related to demand and savings deposits, for example, the required compulsory deposits held at Central Bank of Brazil, the remaining balance (free funds) is allocated in accordance with the maturity flows of fixed-rate lending operations, and in the case of savings, the risk factor considered for its mapping is the TR coupon.

Financial Instrument Pricing

To adopt the best market prices related to the assessment of financial instruments' market value, the Market and Liquidity Risk Management Executive Committee (CEGRIMEL) established the Mark-to-Market Commission (CMM), which is responsible for approving or submitting mark-to-market models to GEGRIMEL. CMM is composed of business, back-office and risk representatives. The risk area is responsible for the coordination of the Commission and for the submission the matters to the CEGRIMEL for reporting or approval, whichever is the case.

Whenever possible, the Bank uses prices and quotes from by the securities, commodities and futures exchange and the secondary markets. Failing to find such market references, prices made available by other sources (such as Bloomberg, Reuters and Brokerage Firms) are used. As a last resort, proprietary models are used to price the instruments, which also follow the same CMM approval procedure and are submitted to the Organization's validation and assessment processes.

Mark-to-market criteria are periodically reviewed, according to the governance process, and may vary due to changes in market conditions, creation of new classes of instruments, establishment of new sources of data or development of models considered more appropriate.

The financial instruments to be included in the Trading Portfolio must be approved by the Treasury Executive Committee or the Product and Service Executive Committee and their pricing criteria must be defined by the CMM.

The following principles for the mark-to-market process are adopted by the Organization:

- **Commitment:** the Organization is committed to ensuring that the prices used reflect the market value of the operations. Should information not be found, the Organization uses its best efforts to estimate the market value of the financial instruments;
- **Frequency:** the formalized mark-to-market criteria are applied on a daily basis;
- **Formality:** the CMM is responsible for ensuring the methodological quality and the formalization of the mark-to-market criteria;
- **Consistency:** the process to gather and apply prices should be carried out consistently, to guarantee equal prices for the same instrument within the Organization; and
- **Transparency:** the methodology must be accessible by the Internal and External Audit, Independent Model Validation Areas - AVIM and by Regulatory Agencies.

In December 2014, the National Monetary Council published Resolution No. 4,389/14, which amended Resolution No. 4,277. These resolutions set forth the basic procedures that entities must follow in pricing financial instruments valued at market value and guidelines for the application of prudential adjustments for such instruments. The Organization aligned with these resolutions' guidelines, including applying due prudential adjustments required by the regulation.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Control and Follow-Up

Market risk is controlled and monitored by an independent area, the DCIR, which, on a daily basis, measures the risk of outstanding positions, consolidates results and prepares reports required by the existing governance process.

In addition to daily reports, Trading Portfolio positions are discussed once every fifteen days by the Treasury Executive Committee, while Banking Portfolio positions and liquidity reports are examined by the Asset and Liability Management Treasury Executive Committee.

At both meetings, results and risks are assessed and strategies are discussed. Both the governance process and the existing thresholds are ratified by the Integrated Risk Management and Capital Allocation Committee and submitted to approval of the Board of Directors, and they are revised at least once a year.

Should any threshold controlled by the Integrated Risk Control Department –DCIR be exceeded, the head of the business area responsible for the position is informed that threshold was reached, and the Integrated Risk Management and Capital Allocation Committee is called in timely fashion to make a decision. If the Committee decides to raise the threshold and/or maintain the positions, the Board of Directors is called to approve the new threshold or revise the position strategy.

Internal Communication

The market risk department provides daily managerial control reports on the positions to the business areas and Senior Management, in addition to weekly reports and periodic presentations to the Board of Directors.

Reporting is conducted through an alert system, which determines the addressees of risk reports as previously determined risk threshold percentage is reached; therefore, the higher the risk threshold consumption, more Senior Management members receive the reports.

Hedging and Use of Derivatives

In order to standardize the use of financial instruments as hedges of transactions and the use of derivatives by the Treasury Department, the Organization created specific rules that were approved by the competent Committees.

The hedge transactions executed by Bradesco's Treasury Department must necessarily cancel or mitigate risks related to unmatched quantities, terms, currencies or indexes of the positions in the Treasury books, and must use assets and derivatives authorized to be traded in each of their books to:

- control and classify the transactions, respecting the exposure and risk limits in effect;
- alter, modify or revert positions due to changes in the market and to operational strategies; and
- reduce or mitigate exposures to transactions in inactive markets, in conditions of stress or of low liquidity.

For derivatives classified in the "hedge accounting" category, there is a monitoring of their effectiveness, as well as their accounting implications.

Cash flow Hedge

On December 31, 2018, Bradesco maintained cash flow hedges. See more details in Note 23.

Standardized and "Continuous Use" Derivatives

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Organization's Treasury Department may use standardized (traded on an exchange) and "continuous use" (traded over-the-counter) derivatives for the purpose of obtaining income or as hedges. The derivatives classified as "continuous use" are those habitually traded over-the-counter, such as vanilla swaps (interest rates, currencies, CDS – Credit Default Swap, among others), forward operations (currencies, for example) and vanilla options (currency, Bovespa Index), among others. Non-standardized derivatives that are not classified as "continuous use" or structured operations cannot be traded without the authorization of the applicable Committee.

Evolution of Exposures

In this section are presented the evolution of financial exposure, the VaR calculated using the internal model and its backtesting and the Stress Analysis.

Financial Exposure – Trading Portfolio (Fair value)

Risk factors	R\$ thousand			
	On December 31			
	2018		2017	
	Assets	Liabilities	Assets	Liabilities
Fixed rates	8,131,939	6,081,794	11,614,849	6,184,099
IGP-M (General Index of market pricing) / IPCA (Consumer price index)	249,922	191,486	1,053,893	532,957
Exchange coupon	1,090,277	785,578	1,808,598	1,658,084
Foreign Currency	1,471,956	1,611,049	1,808,598	2,103,715
Equities	776,376	776,735	461,957	468,911
Sovereign/Eurobonds and Treasuries	3,805,259	1,099,612	560,619	360,252
Other	685,724	31,729	257,537	98,517
Total	16,211,453	10,577,983	17,566,051	11,406,535

VaR Internal Model – Trading Portfolio

The 1-day VaR of Trading Portfolio net of tax effects in end of 2018 was R\$5,776 thousand, with the interest rate risk Sovereign/Eurobonds and Treasuries as the largest participation of the portfolio.

Risk factors	R\$ thousand	
	On December 31 2018	2017
Fixed rates	850	8,956
IGPM/IPCA	264	2,751
Exchange coupon	142	48
Foreign Currency	712	2,925
Sovereign/Eurobonds and Treasuries	3,770	826
Equities	655	289
Other	1,597	1
Correlation/diversification effect	(2,214)	(1,379)
VaR at the end of the year	5,776	14,417
Average VaR in the year	21,624	24,024
Minimum VaR in the year	4,316	5,499
Maximum VaR in the year	76,935	100,640

VaR Internal Model – Regulatory Portfolio

The capital is calculated by the normal delta VaR model based in Regulatory Portfolio, composed by Trading Portfolio and the Foreign Exchange Exposures and the Commodities Exposure of the Banking Portfolio. In addition, the historical simulation and the Delta–Gama–Vega models of risk are applied to measure all risk factors to an options portfolio, whichever is the most conservative, whereby this risk of options is added to the VaR of the portfolio. In this model, risk value is extrapolated to the regulatory horizon⁽¹⁾ (the highest between 10 days and the horizon of the portfolio) by the ‘square root of time’ method. VaR and Stressed VaR shown below refer to a ten-day horizon and are net of tax effects.

____ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Risk factors	On December 31				R\$ thousand
	2018		2017		
	VaR	Stressed	VaR	Stressed	
Interest rate	8,131	47,851	37,659	48,400	
Exchange rate	5,666	20,959	7,715	17,300	
Commodity price (Commodities)	8,194	14,704	1,110	200	
Equities	3,355	4,844	2,065	7,400	
Correlation/diversification effect	(7,569)	33,180	36,429	240	
VaR at the end of the year	17,777	121,538	84,978	73,540	
Average VaR in the year	69,852	117,946	87,358	107,059	
Minimum VaR in the year	17,777	57,523	24,945	26,803	
Maximum VaR in the year	252,797	231,080	369,342	236,895	

Note: Ten-day horizon VaR net of tax effects.

To calculate regulatory capital requirement according to the internal model, it is necessary to take into consideration the rules described by Central Bank Circular Letters No. 3,646/13 and No. 3,674/13, such as the use of VaR and Stressed VaR net of tax effects, the average in the last 60 days and its multiplier.

VaR Internal Model – Backtesting

The risk methodology applied is continuously assessed using backtesting techniques, which compare the one-day period VaR with the hypothetical P&L, obtained from the same positions used in the VaR calculation, and with the effective P&L, also considering the intraday operations for which VaR was estimated.

The main purpose of backtesting is to monitor, validate and assess the adherence of the VaR model, and the number of exceptions that occurred must be compatible with the number of exception accepted by the statistical tests conducted and the confidence level established. Another objective is to improve the models used by the Organization, through analyses carried out with different observation periods and confidence

levels, both for Total VaR and for each risk factor.

Daily hypothetical and effective P&L over the last 250 business days surpassed their respective VaR four times, with a confidence level of 99%.

According to the document published by the Basel Committee on Banking Supervision⁽²⁾, exceptions are classified as being due to “either bad luck or the markets did not behave as expected by the model”, i.e. volatility was significantly higher than expected and, in certain situations, the correlations differed from those forecast by the model.

Stress Analysis – Trading Portfolio

The Organization also assesses on a daily basis, the possible impacts on positions in stress scenarios for the next 20 business days, with limits established in the governance process. Thus, considering the effect of diversification between the risk factors and the tax effects, the average of the possible loss estimates in a stress situation would be R\$185,192 thousand in 2018 (2017 -R\$168,751 thousand), and the maximum estimated loss in the year of 2018 would be R\$419,677 thousand (2017 – R\$387,884thousand).

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

	R\$ thousand	
	On December 31	
	2018	2017
At the end of the year	59,489	103,949
Average in the year	185,192	168,751
Minimum in the year	52,716	53,426
Maximum in the year	419,677	387,884

Note: Values net of tax effects.

Sensitivity Analysis

The Trading Portfolio is also monitored daily by sensitivity analyses that measure the effect of movements of market and price curves on our positions. Furthermore, a sensitivity analysis of the Organization's financial exposures (Trading and Banking Portfolios) is performed on a quarterly basis, in compliance with CVM Rule No. 475/08.

The sensitivity analyses were carried out based on the scenarios prepared for the respective dates, always taking into consideration market inputs available at the time and scenarios that would adversely impact our positions, in accordance with the scenarios below:

Scenario 1: Based on market information (B3, Anbima, etc.), stresses were applied for 1 basis point on the interest rate and 1.0% variation on prices. For example: for a Real/US dollar exchange rate of R\$3.87 a scenario of R\$3.91 was used, while for a 1-year fixed interest rate of 6.55%, a scenario of 6.56% was applied;

Scenario 2: 25.0% stresses were determined based on market information. For example: for a Real/US dollar exchange rate of R\$3.87 a scenario of R\$4.84 was used, while for a 1-year fixed interest rate of 6.55%, a 8.18% scenario was applied. The scenarios for other risk factors also accounted for 25% stresses in the respective curves or prices; and

Scenario 3: 50.0% stresses were determined based on market information. For example: for a Real/US dollar quote of R\$3.87 a scenario of R\$5.81 was used, while for a 1-year fixed interest rate of 6.55%, a 9.82% scenario was applied. The scenarios for other risk factors also account for 50.0% stresses in the respective curves or prices.

The results show the impact for each scenario on a static portfolio position. The dynamism of the market and portfolios means that these positions change continuously and do not necessarily reflect the position demonstrated here. In addition, the Organization has a continuous market risk management process, which is always searching for ways to mitigate the associated risks, according to the strategy determined by Management. Therefore, in cases of deterioration indicators in a certain position, proactive measures are taken to minimize any potential negative impact, aimed at maximizing the risk/return ratio for the Organization.

⁽²⁾ Supervisory Framework for the use “Backtesting” in Conjunction with the Internal Models Approach to Market Risk Capital Requirements (January 1996).

___ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

3.3. Liquidity risk

The Liquidity Risk is represented by the possibility of the institution not being able to efficiently meet its obligations, without affecting its daily operations and incurring significant losses, as well as the possibility of the institution to fail to trade a position at market price, due to its larger size as compared to the volume usually traded or in view of any market interruption.

The understanding and monitoring of this risk are crucial to enable the Organization to settle operations in a timely manner.

Management Process for Liquidity Risk

The management of liquidity risk is a group-wide process. This process involves several areas with specific responsibilities. The measurement and control of liquidity risk are conducted in a centralized and independent manner, including the daily monitoring of available funds, the compliance with the liquidity level according to the risk appetite defined by the board, as well as the contingency plan and recovery for possible stress situations.

The Organization has a Liquidity Risk Management Policy approved by the Board of Directors, which has as one of its objectives to ensure the existence of norms, criteria and procedures for the correct monitoring of this type of risk, as well as the existence of a strategy and of action plans for liquidity crisis situations. The policy and controls established fully comply with the provisions of CMN Resolution No. 4,557/17.

Control and Monitoring

Liquidity risk management is carried out by the Treasury Department, based on the positions available, by independent area. The DCIR is responsible for the measurement methodology, control of the limits established by type of currency and company (including non-financial), review of policies, standards, criteria and procedures and studies for new recommendations.

Liquidity risk is monitored daily by the business and control areas and at the meetings of the Asset and Liability Management Treasury Executive Committee, which manages liquidity reserves, with term and currency mismatches. Monitoring is also handled by the Risk Committee and the Integrated Risk Management and Capital Allocation Committee and the Board of Directors.

Since October 2017, the Organization adopted as metric also for internal management, Short-Term Liquidity indicator (liquidity coverage ratio), as provided by CMN Resolution No. 4,401/15 of Central Bank Circular Letter No. 3,749/15.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

LCR - Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) is designed to ensure that the Organization maintains a sufficient level of liquid assets to cover liquidity needs in an eventual stress scenario. The LCR is the ratio between the stock of High Quality Liquid Assets (HQLA) and total net cash outflow, calculated based on a generic stress scenario. The formula shows the main components of the indicator as follows:

In accordance with the LCR implantation schedule, the level of the ratio between HQLA and total net cash outflows must comply with the following schedule:

Year	2016	2017	2018	As of 2019
% Required	70%	80%	90%	100%

The stress scenarios parameterization was conducted by the Regulator to capture idiosyncratic and market shocks, considering the period of 30 days. The items below show some of the shocks included in the methodology:

- the partial loss of retail and uncollateralized wholesale funding, as well as short-term funding capacity;
- the additional outflow of funds, contractually foreseen, due to the downgrading of the institution's credit rating by up to three levels, including eventual additional collateral requirements;
- an increase in the volatility of factors that impact collateral quality or the potential future exposure of derivative positions, resulting in the application of larger collateral discounts or a call for additional collateral or in other liquidity requirements;
- withdrawals of higher than expected amounts from credit/liquidity lines granted; and

- the potential need to repurchase debt or honor non-contractual obligations in order to mitigate reputational risk.

High Quality Liquid Assets (HQLA)

HQLA are assets that maintain their market liquidity in periods of stress and that meet the minimum requirements established by the Central Bank of Brazil, such as, among others, being free of any legal impediment or restriction; suffering little or no loss in market value when converted into cash; having a low credit risk; easy and accurate pricing; and being traded in an active and important market, with little difference between the purchase and sale price, high traded volume and a large number of participants. These assets are subject to weighting factors which may reduce their value, for example, in accordance with the risk rating of their issuer or the historic variation in their market price, among other requirements.

Cash Outflows and Inflows

Cash outflows are the result of a reduction in deposits and funding; the maturity of securities issued; scheduled contractual obligations for the next 30 days; margin adjustments and calls in derivative operations; the utilization/withdrawal of credit and liquidity lines granted by the Bank; and contingent cash outflows.

Cash inflows for the next 30 days correspond to the expected receipt of loans and financings; deposits; securities; and margin adjustments and easing in derivative operations.

23	LCR (%) (5)		171.8%		156.2%

(1) Calculated based on the simple daily average of the months that compose the quarter (61 observations);

(2) Calculated based on the simple average of the closing of the months that compose the quarter (3 observations);

(3) Corresponds to the total balance related to the item of cash inflows or outflows;

(4) Corresponds to the value after application of the weighting factors; and

(5) Corresponds to the calculated value after the application of weighting factors and limits.

The amount of net assets (HQLA) consists, in addition to the compulsory returns and reserves at the Central Bank of Brazil, mainly of federal government securities. These net assets resulted in R\$140,377,668 thousand, the average of the fourth quarter of 2018.

Related to the cash outflows, based on the regulatory stress scenario (line 16), about 56.0% are redemptions and non-renewals retail and wholesale funding without collateral (unsecured), as shown on the lines 2 and 5 of the table.

Another relevant group refers to the item "Other contractual obligations" (line 14), which mainly includes the output streams of onlending operations, credit cards and trade finance.

Regarding cash inflows, corresponding to R\$47,462,820 thousand in the average of the fourth quarter of 2018, stand out the receipts of loans operations (partial renewal), the inflows of Trade Finance operations, cash and cash equivalents and redemptions of securities in addition to the inflow of transfer and credit card operations.

Net Stable Funding

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The Net Stable Funding (NSFR) aims to assess if the Organization is financing its activities (assets) from more stable sources of funding (liabilities). The NSFR corresponds to the ratio between the Available Stable Funding (ASF) and the Required Stable Funding (RSF), which are defined according to the structures of assets and liabilities of the institution that are weighted according to the definitions of the Regulator.

The following figure shows the main components of the indicator:

Available Stable Funding (ASF)

The available stable funding is represented by the Liabilities and Shareholders' Equity, which are weighted according to their stability, in which the resources considered as more stable are determined mainly by behavioral aspects of the clients, also considering their relationship with the institution, legal aspects and other variables implied.

Required Stable Funding (RSF)

The required stable funding shall be determined according to the assets in the balance sheet and other financial instruments, for example, credit limits provided and guarantees given, which are weighted by aspects related to the type of operation, maturity, and counterparty, among others.

The following table shows the NSFR of December of the Prudential Conglomerate:

R\$ thousand

____ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The NSFR long term indicator presented a volume weighted for available stable funding resources much higher to that of required stable funding resources, with a surplus weighted balance of approximately R\$126 billion, resulting in an indicator of 126.1%.

The amount of available stable funding (ASF) is formed largely by the funding of clients considering the level of stability as the main factor for the contribution of the ASF. The calculation of December 2018 for the ASF presented a participation of 38% from the funding of Retail and 34% from the funding of Wholesale.

The values of required stable funding (RSF) are constituted by the Asset items and by items not recognized on the balance sheet. These balance sheet items are weighted according to their respective liquidity profile, therefore, the items related to loans and other assets, with low or no liquidity, feature prominently in the RSF (high weighting factors), while highly liquid assets, such as, for example unpledged federal public securities, receive low weighting factors. For the month of December 2018 the loan operations (item 20) accounted for 41% of the total RSF, while other assets (item 31) participated in 35% of the RSF.

Internal Communication

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In the process of liquidity risk management, reports are distributed daily to the areas involved in management and control, as well as to Management. This process includes the use of several analysis instruments to monitor liquidity, such as:

- Daily distribution of liquidity control instruments;
- Automatic intra-day update of the liquidity reports for appropriate management by the Treasury Department;
- Preparation of reports with past behavior and future simulations based on scenarios;
- Daily verification of compliance with minimum liquidity levels;
- Elaboration of complementary reports where the concentrations of funding by type of product, term and counterparty are presented; and
- Weekly reports to the Senior Management, showing the behavior and expectations related to the liquidity situation.

The liquidity risk management process also has an alert system that selects the appropriate reporting level according to the percentage of the established limit utilized. Thus, the lower the liquidity ratios, the higher the number and echelon of Senior Management members who receive the reports.

Undiscounted cash flows of financial liabilities

The table below presents the cash flows payable for non-derivative financial liabilities, covering the remaining contractual period to maturity as from the date of the consolidated statement of financial position. The values disclosed in this table represent the undiscounted contractual cash flows.

(1) Include, mainly, credit card transactions, foreign exchange transactions, negotiation and intermediation of securities, finance lease and capitalization bonds.

The assets available to meet all the obligations and cover the outstanding commitments include cash and cash equivalents, financial assets, loans and advances. Management may also cover unexpected cash outflows by selling securities and by having access to sources of additional funds, such as asset-backed-markets.

The previous table shows the undiscounted contractual cash flows of the financial liabilities of the Organization. The cash flows that the Organization estimates for these instruments may vary significantly from those presented. For example, it is expected that demand deposits of customers will maintain a stable or increasing balance, and it is not expected that these deposits will be withdrawn immediately.

The gross cash outflows presented in the previous table refer to the undiscounted contractual cash flow related to the financial liability.

In the Organization, liquidity-risk management involves a series of controls, mainly related to the establishment of technical limits, with the ongoing evaluation of the positions assumed and the financial instruments used.

Undiscounted cash flows for derivatives

All the derivatives of the Organization are settled at net value, and include:

- Foreign currency derivatives – over-the-counter currency options, currency futures, and currency options traded on an exchange; and
- Interest rate derivatives – interest rate swaps, forward rate contracts, interest rate options, other interest rate contracts, interest rate futures traded on an exchange and interest rate options traded on an exchange.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

3.4. Fair value of financial assets and liabilities

The Organization applies IFRS 13 for financial instruments measured in the consolidated statement of financial position at fair value, which requires disclosure of fair-value measurements according to the following fair-value hierarchy of fair value measurement:

- Level 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active market, as well as Brazilian government securities that are highly liquid and are actively traded in over-the-counter markets.

- Level 2

Valuation uses observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data, including but not limited to yield curves, interest rates, volatilities, equity or debt prices and foreign exchange rates.

- Level 3

Valuation uses unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities normally include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant Management judgment or estimation. This category generally includes certain corporate and bank debt securities and certain derivative contracts.

To fair value securities which have no consistent, regulatory updated, public price source, Bradesco uses models defined by the mark-to-market Commission and documented in the mark-to-mark manual for each security type. Through the use of methods and both mathematical and financial models which capture the effects and variations in the prices of marked-to-market assets, or similar instruments, Bradesco is able to ascertain in a clear and consistent manner the determination of fair value of its Level 3 assets and liabilities.

Derivative Assets and Liabilities

The Organization's derivative positions are determined using quantitative models that require the use of multiple inputs including interest rates, prices and indices to generate continuous yield or pricing curves and volatility factors. The majority of market inputs are observable and can be obtained, from B3 (principal source) and the secondary market. Exchange traded derivatives valued using quoted prices are classified within Level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange; those are classified as Level 2 or Level 3.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The yield curves are used to determine the fair value by the method of discounted cash flow, for currency swaps and swaps based on other risk factors. The fair value of futures and forward contracts is also determined based on quoted markets prices on the exchanges for exchanges-traded derivatives or using similar methodologies to those described for swaps. The fair value of options is determined using external quoted prices or mathematical models, such as Black-Scholes, using yield curves, implied volatilities and the fair value of the underlying asset. Current market prices are used to determine the implied volatilities. The majority of these models do not contain a high level of subjectivity as the methodologies used in the models do not require significant judgment and inputs to the model are readily observable from active quoted markets. Such instruments are generally classified within Level 2 of the valuation hierarchy. The fair values of derivative assets and liabilities also include adjustments for market liquidity, counterparty credit quality and other specific factors, where appropriate.

Derivatives that are valued based on mainly unobservable market parameters and that are not actively traded are classified within Level 3 of the valuation hierarchy. Level 3 derivatives include credit default swaps which have corporate debt securities as underlyings.

The table below presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the years 2018 and 2017:

	Financial assets at fair value through profit or loss	Financial assets at fair value through other comprehensive income	Derivatives	R\$ thousand Total
Balance on December 31, 2016	287,224	5,013,353	(8,617)	5,291,960
Included in the statement of income and other comprehensive income	15,868	(735,002)	-	(719,134)
Acquisitions	74,908	4,019,844	3,714	4,098,466
Write-offs	(25,554)	(1,406,907)	-	(1,432,461)
Balance on December 31, 2017	352,446	6,891,288	(4,903)	7,238,831
Included in the statement of income and other comprehensive income	24,142	(374,664)	-	(350,522)
Acquisitions	150,950	91,668	17,597	260,215

Write-offs	(22,262)	(939)	-	(23,201)
Transfer with categories (1)	-	(3,419,149)	-	(3,419,149)
Transfer levels	(86,715)	320,342	-	233,627
Balance on December 31, 2018	418,561	3,508,546	12,694	3,939,801

(1) With the adoption of IFRS 9, a significant portion of the debentures that were in the category of available for sale are now measured at amortized cost.

The tables below show the gains/(losses) due to changes in fair value, including the realized and unrealized gains and losses, recorded in the consolidated statement of income for Level 3 assets and liabilities during the years 2018, 2017 and 2016:

	R\$ thousand		
	Year ended December 31, 2018

The sensitivity analyses were carried out based on the scenarios prepared for the dates shown, always taking into consideration market inputs available at the time and scenarios that would adversely impact our positions, in accordance with the scenarios below:

Scenario 1: Based on market information (B3, Anbima, etc.), stresses were applied for 1 basis point on the interest rate and 1.0% variation on prices. For example: for a Real/US dollar exchange rate of R\$3.87 a scenario of R\$3.91 was used, while for a 1-year fixed interest rate of 6.55%, a 6.56% scenario was applied;

Scenario 2: 25.0% stresses were determined based on market information. For example: for a Real/US dollar exchange rate of R\$3.87 a scenario of R\$4.84 was used, while for a 1-year fixed interest rate of 6.55%, a 8.18% scenario was applied. The scenarios for other risk factors also had 25.0% stresses in the respective curves or prices; and

Scenario 3: 50.0% stresses were determined based on market information. For example: for a Real/US dollar quote of R\$3.87 a scenario of R\$5.81 was used, while for a 1-year fixed interest rate of 6.55%, a 9.82% scenario was applied. The scenarios for other risk factors also had 50.0% stresses in the respective curves or prices.

(1) Amounts of loans and receivables are presented net of the provision for impairment losses.

Below we list the methodologies used to determine the fair values presented above:

Loans and receivables

Fair values were estimated for groups of similar loans based upon type of loan, credit quality and maturity. Fair value for fixed-rate transactions was determined by discounted cash flow estimates using interest rates approximately equivalent to our rates for new transactions based on similar contracts. Where credit deterioration has occurred, estimated cash flows for fixed and floating-rate loans have been reduced to reflect estimated losses.

The fair values for performing loans are calculated by discounting scheduled principal and interest cash flows through maturity using market discount rates and yield curves that reflect the credit and interest rate risk inherent to the loan type at each reporting date.

The fair values for impaired loans are based on discounting cash flows or the value of underlying collateral.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The non-performing loans were allocated into each loan category for purposes of calculating the fair-value disclosure. Assumptions regarding cash flows and discount rates are based on available market information and specific borrower information.

Bonds and securities at amortized cost

Financial assets are carried at amortized cost. Fair values are estimated according to the assumptions described in Note 2(d). See Note 28 and 29 for further details regarding the amortized cost and fair values of held-to-maturity securities.

Deposits from banks and customers

The fair value of fixed-rate deposits with stated maturities was calculated using the contractual cash flows discounted with current market rates for instruments with similar maturities and terms. For floating-rate deposits, the carrying amount was considered to approximate fair value.

Funds from securities issued

The carrying values of funds from securities issued approximate the fair values of these instruments.

Subordinated debt

Fair values for subordinated debts were estimated using a discounted cash flow calculation that applies interest rates available in the market for similar maturities and terms.

3.5. Independent Model Validation

The main purpose of the Independent Model Validation Area – AVIM is to verify if the models operate according to the objectives envisaged, as well as if its results are suitable for the uses for which they are intended.

The Independent Model Validation adopts a methodology that includes quantitative and qualitative dimensions, assessing the adequacy of processes of governance, construction of models and their assumptions, and use and monitoring of the models, which are:

Qualitatives

- **Scope of the Model:** scope or coverage of the model, which encompasses the purpose for which it is intended, the type of risk involved, the companies exposed to this risk, the portfolios, products, segments, channels, etc.;
- **Application of the Model:** aspects relating to the use of the model, which includes the definition of the model, the reasonableness in the use of the factors of the model, and the flow and timeliness of information for decision making; and
- **Technological Environment and Consistency of Data:** structure of systems and controls involved in the calculations performed by the model and the process in which the model is inserted. It also encompasses the consistency of data, considering the features of version control and access, backup, traceability, changes of parameters, quality of data, contingency of systems and automated controls.

Quantitatives

- **Measuring System:** challenge to the procedures for measurement of risk, both basis and stress, encompassing the definition, implementation and validation of the method, consisting of the methodology, assumptions, parameters, calculation routine, input data and results; and
- **Backtesting:** statistical procedure used to assess the adherence of the model by comparing the values estimated by the model and the values observed over a period of time, previously defined. It includes methodological aspects of formalization and use for the improvement of the model.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

For the implementation of its activities, the AVIM may use structures already deployed and ingrained in the Organization with the aim of avoiding the overlap of functions. Its results are reported to the managers and to the Integrated Risk Management and Capital Allocation Committee.

3.6. Capital management

Capital Management Corporate Process

The Capital Management provides the conditions required to meet the Organization's strategic goals to support the risks inherent to its activities. It includes the preparation of the capital plan, identifying the contingency actions to be considered in stress scenarios.

In line with the strategic guidelines, the Organization manages capital, involving the control and business areas, in accordance with the guidelines of the Board of Executive Officers and Board of Directors.

The governance structure for the capital management and the Internal Capital Adequacy Assessment Process (ICAAP) is composed by Committees and its highest level body is the Board of Directors. The most important is the Planning, Budget and Control Department – DPOC, whose mission is to provide the efficient and effective management of the business through strategic management and planning. The DPOC supports the Senior Management by providing analyses and projections of capital requirements and availability, identifying threats and opportunities that help plan the sufficiency and optimization of capital levels. The Department is responsible for complying with the provisions of Central Bank of Brazil regarding capital management activities.

Capital Adequacy

The RC adequacy is verified daily to ensure that the Organization maintains a solid capital base in normal situations or in extreme market conditions and complying with regulatory requirements.

The determination of the Central Bank of Brazil is that the financial institutions permanently maintain capital and additional Common Equity Tier I (Conservation, Countercyclical and Systemic) compatible with the risks from their activities. The risks are represented by Risk-Weighted Asset (RWA), which is calculated based on, at least, the sum of Credit, market and operational risk components.

Additionally, the Organization must maintain enough capital to meet the interest rate risk from operations not included in the trading portfolio (Banking Portfolio's interest rate risk), calculated using the EVE (Economic Value Equity) method.

Analysis of Reference Equity (PR)

Following is the detailed information on the Organization's Capital, in compliance with the Prudential Conglomerate:

Calculation basis - Basel Ratio	Basel III	
	On December 31	
	2018	2017
		R\$ thousand
		Prudential
Tier I capital	90,322,147	80,084,744
Common equity	81,090,060	75,079,777
Shareholders' equity	121,120,869	110,457,476

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

(1) For purposes of calculation of the market risk, Circular Letters No. 3,848 (DLO accounts 535,01 and 530,22) and No. 3,849 (DLO accounts 530,22) of Central Bank of Brazil were used;

(2) For purposes of calculation of the market risk, the capital requirement will be the maximum between the internal model and 80% of the standard model, pursuant to Circular Letters No. 3,646 and 3,674 of the Central Bank of Brazil; and

(3) In 2018, the value of the conservation ACP represents 1.875% of the amount of RWA. The systemic ACP represents 0.50% of the amount of RWA Systemic Relevance Factor determined according to Circular Letter No. 3,768 of the Central Bank of Brazil - Total Exposure and GDP of the year before last in relation to the base date: R\$1.1 trillion and R\$6.3 trillion, respectively. The contracyclical ACP remained at 0% of the amount of RWA, pursuant to Communication No. 32,139 of Central Bank of Brazil, where the RWA of the loan risk to the non-banking private sector (RWACPrNB) is R\$528.3 billion in Brazil.

Capital Sufficiency

The capital management process is aligned with the strategic planning and is forward looking, anticipating any changes in the economic and commercial environment conditions in which we operate.

The Organization's capital management aims at permanently ensuring a sound capital composition to support the development of its activities and to ensure adequate coverage of risks incurred. The Organization maintains a managerial capital margin (buffer), which is added to the minimum regulatory requirements.

The management buffer is defined according to the leading practices and regulatory requirements, observing aspects such as additional impacts generated by stress scenarios, qualitative risks and risks not captured by the regulatory model.

The Organization considers it comfortable to maintain a Tier I Capital margin of at least 25% in relation to the minimum capital requirements in the medium and long term, pursuant to the schedule established by the Central Bank of Brazil for the full adoption of Basel III guidelines.

The Organization's regulatory capital sufficiency can be seen by calculating the capital adequacy ratio which in this period was 17.8%, of which 13.7% and 12.3% was Tier I Capital and Common Equity respectively. In terms of margin, the amount totaled R\$34,911,835 thousand, which would allow for an increase of up to R\$557,737,318 thousand in loan operations (considering the current composition of the portfolio).

It is important to highlight that since January 2015, according to the CMN Resolution No. 4,192/13 which deals with the methodology for calculating the ratios of Common Equity, Tier 1 and Reference Equity, the regulatory scope became the Prudential Conglomerate.

___ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Capital Forecast

The capital management area is responsible for making simulations and projections of the Organization's capital, in accordance with the strategic guidelines, the impacts arising from variations and trends of the economic and business environment as well as regulatory changes. The results from the projections are submitted to the Senior Management, pursuant to the governance established.

The projections for the next three years present adequate levels of Capital indices, considering the incorporation of net profits and increase of regulatory requirements according to the timeline defined by CMN Resolution 4,193 for subsequent periods, also contemplating the additional common equity.

3.7. Insurance risk/subscription risk

Insurance risk is the risk related to a possible loss event that may occur in the future and for which there is uncertainty over the amount of damages that result from it. A component of insurance risk is underwriting risk, which arises from an adverse economic situation not matching the Organization's expectations at the time of drafting its underwriting policy and calculating insurance premiums. In short, it refers to the risk of the frequency or severity of loss events or benefits exceeding the Organization's estimates.

Underwriting risk is managed by the Technical Department. Underwriting and risk acceptance policies are periodically evaluated by working groups. In addition, one of the main tasks of the Board of Risk Management, Internal Controls and Compliance, an integral part of the structure of risk management, is the calculation of regulatory capital for these businesses and certifies studies on the pricing of new products.

The management process seeks to diversify insurance operations, aiming to excel at balancing the portfolio, and is based on the grouping of risks with similar characteristics in order to reduce the impact of individual risks.

Uncertainties over estimated future claim payments

Claims are due as they occur. The Organization must indemnify all covered events that occurred during the policy period, even if a loss is discovered after coverage ends. As a result, claims are reported over a period and a significant portion are accounted for in the Provisions for Claims Incurred but Not Reported (IBNR). The estimated cost of claims includes direct expenses to be incurred when settling them.

Giving the uncertainties inherent to the process for estimating claims provisions, the final settlement may be different than the original provision.

Asset and liability management (ALM)

The Organization periodically analyzes future cash flows on assets and liabilities held in portfolio (ALM - Asset Liability Management). The method used for ALM analysis is to observe the sufficiency or insufficiency of the present value of the stream of assets in relation to the present value of the stream of liabilities, and the duration of assets in relation to that of liabilities. The aim is to verify that the situation of the portfolio of assets and liabilities is balanced in order to honor the Organization's future commitments to its participants and insured persons.

The actuarial assumptions used to generate the flow of liabilities are in line with actuarial practices and also with the characteristics of the Organization's product portfolio.

Risk management by product

Monitoring the insurance contract portfolio enables us to track and adjust premiums practiced, as well as assess the need for alterations. Other monitoring tools in use include: (i) sensitivity analysis, and (ii) algorithmic checks and corporate system notifications (underwriting, issuance and claims).

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The main risks associated with property insurance

- Oscillations in the incidence, frequency and severity of the claims and the indemnifications of claims in relation to the expectations;
- Unpredictable claims arising from an isolated risk;
- Inaccurate pricing or inadequate underwriting of risks;
- Inadequate reinsurance policies or risk transfer techniques; and
- Insufficient or excessive technical provisions.

Generally the property insurance underwritten is of short duration.

The underwriting strategies and goals are adjusted by management and informed through internal guidelines and practice and procedure manuals.

The risks inherent to the main property insurance business lines are summarized as follows:

- Auto insurance includes, among other things, physical damage to the vehicle, loss of the insured vehicle, third-party liability insurance for vehicles and personal accident for passengers; and
- Business, home and miscellaneous insurance includes, among other things, fire risks (e.g. fire, explosion and business interruption), natural disasters (earthquakes, storms and floods), engineering lines (explosion of boilers, breakdown of machinery and construction) and marine (cargo and hull) as well as liability insurance.

Property insurance risk management

The Organization monitors and evaluates risk exposure and undertakes the development, implementation and revision of guidelines related to underwriting, treatment of claims, reinsurance and constitution of technical provisions. The implementation of these guidelines and the management of these risks are supported by the technical departments of each risk area.

The Technical Department has developed mechanisms, e.g. risk grouping by CPF, CNPJ (Individual and Corporate Taxpayer's ID) and risky addresses, that identify, quantify and manage accumulated exposures in order to keep them within the limits defined in the internal guidelines.

The main risks associated with life insurance and private pension plans

Life insurance and private pension plans are long-term in nature and, accordingly, various actuarial assumptions are used to manage and estimate the risks involved, such as: assumptions about returns on investments, longevity, mortality and persistence rates in relation to each business unit. Estimates are based on historical experience and on actuarial expectations.

The risks associated with life insurance and private pension plans include:

- Biometric risks, which includes mortality experience, adverse morbidity, longevity and disability. The mortality risk may refer to policyholders living longer than expected (longevity) or passing away before expected. This is because some products pay a lump sum if the person dies, and others pay regular amounts while the policyholder is alive;
- Policyholder's behavior risks, which includes persistence rate experience. Low persistence rates for certain products may result in less policies/private pension plan agreements remaining contracted to help cover fixed expenses and may reduce future positive cash flows of the underwritten business. A low persistence rate may affect liquidity of products which carry a redemption benefit;
- Group life-insurance risk results from exposure to mortality and morbidity rates and to operational experience worse than expected on factors such as persistence levels and administrative expenses; and

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- Some Life and Pension Plan products have pre-defined yield guarantees, and thereby face risk from changes in financial markets, returns on investments and interest rates that are managed as a part of market risk.

Life insurance and private pension plan risk management

- The Organization monitors and assesses risk exposure and is responsible for developing, implementing and reviewing policies relating to underwriting, processing claims, and technical reserves for insurance purposes. Implementation of these policies and management of these risks are supported by the Technical Department;
- The Technical Department has developed mechanisms, such as statistical reports and performance by type that identify, quantify and manage accumulated exposures to keep them within limits defined by internal policies;
- Longevity risks are carefully monitored in relation to the most recent data and to the trends in the environments in which the Organization operates. Management monitors exposure to this risk and the capital implications of it in order to manage the possible impacts, as well as to ensure that business has the capital that it may require. The Management adopts improvement assumptions in its calculation of technical provisions in order to predict and thus be covered for possible impacts generated by the improvement in life expectancy of the insured/assisted population;
- Mortality and morbidity risks are partially mitigated through reinsurance contracts for catastrophes;
- Persistency risk is managed through frequent monitoring of the Organization's experience. Management has also defined rules on the management and monitoring of persistence and the implementation of specific initiatives to improve the renewal of policies that expire; and
- The risk of a high level of expenses is primarily monitored through the evaluation of the profitability of the business units and the frequent monitoring of expense levels.

The main risks associated with health insurance

- Variations in cause, frequency and severity of indemnities of claims compared to expectations;
- Unforeseen claims resulting from isolated risk;
- Incorrect pricing or inadequate subscription of risks; and
- Insufficient or overvalued technical provisions.

For individual health insurance, for which certain provisions are calculated based on expected future cash flows (difference between expected future claims and expected future premiums), there are a number of risks, in addition to those cited above, such as biometric risk, including mortality and longevity experience and the insured's behavioral risk, which covers persistency experience, as well as interest-rate risk that is managed as a part of market risk.

Management of health insurance risk

- The Organization monitors and evaluates risk exposure and is responsible for the development, implementation and review of policies that cover subscription, treatment of claims and technical insurance provisions. The implementation of these policies and management of risks are supported by the Superintendent of Actuary and Statistics;
- The Superintendent of Actuary and Statistics has developed mechanisms, such as statistical reports and performance by type that identify, quantify and manage accumulated exposure in order to keep it within the limits defined by internal policies;
- Longevity risk is carefully monitored using the most recent data and tendencies of the environment in which the Organization operates. Management monitors exposure to this risk and its capital implications in order to manage possible impacts, as well as the funding that the future business needs;
- Persistency risk is managed through the frequent management of the Organization's experience. Management has also established guidelines for the management of persistency in order to monitor and implement specific initiatives, when necessary, to improve retention of policies; and

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- The risk of elevated expenses is primarily monitored through the evaluation of the profitability of business units and the frequent monitoring of expense levels.

Results of sensitivity analysis - Property, Life and Health Insurance and Life with Survival and Welfare Coverage and Individual Life Insurance

Some test results are shown below. For each sensibility scenario the impact is shown in the income and shareholders' equity after taxes and contributions, in a reasonable and possible change in just a single factor. We emphasize that the insurance operations are not exposed to significant currency risk.

Sensitivity factor	Description of sensitivity factor applied
Interest rate	Effect of lowering the risk free forward yield curve rate
Loss events	Impact on the business of increased loss events and claims
Longevity (improvement)	Impact of an improved survival estimates on annuity contracts
Conversion to income	Impact on annuity contracts of a higher rate of conversion to income

The sensitivity test for Life Insurance with Survival, Welfare Coverage and Individual Life Insurance was made considering the same bases and groupings of the TAP test with variation in the assumptions listed below:

	R\$ thousand		
	On December 31, 2018		
	Interest rate	Longevity	Conversion to income
Percentage adjustment to each assumption:	Variation of	0.2%	+ 5 b.p.
	-5%		
Traditional plans (contributing period)	(2,306)	(263)	(4,882)
PGBL and VGBL (contributing period)	(7,502)	(1,166)	(27,316)
All plans(retirement benefit period)	(125,864)	(46,742)	-
Total	(135,672)	(48,171)	(32,198)

For property, life and health insurance, except individual life, the table below shows increase in the events/claims were to rise 1 percentage point over the 12 months from the calculation base date.

	R\$ thousand			
	Gross of reinsurance		Net of reinsurance	
	On December 31		On December 31	
	2018	2017	2018	2017
Auto	(21,721)	(22,347)	(21,721)	(22,347)
RE (Elementary branch)	(8,366)	(9,940)	(7,980)	(8,893)
Life	(29,633)	(28,146)	(29,541)	(28,050)
Dental	(3,941)	(3,495)	(3,941)	(3,495)
Health	(104,574)	(97,923)	(104,574)	(97,923)

Limitations of sensitivity analysis

Sensitivity analyses show the effect of a change in an important premise while other premises remain unchanged. In real situations, premises and other factors may be correlated. It should also be noted that these sensitivities are not linear and therefore greater or lesser impacts should not be interpolated or extrapolated from these results.

Sensitivity analyses do not take account of the fact that assets and liabilities are managed and controlled. Additionally, the Organization's financial position may vary with any movement occurring in the market. For example, the risk management strategy aims to manage exposure to fluctuations in the market. As investment markets move through various levels, management initiatives may include sales of investments, altered portfolio allocations, and other protective measures.

___ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Other limitations of the sensitivity analyses include the use of hypothetical market movements to show the potential risk, which only represents Management's view of possible market changes in the near future, which cannot be foreseen with certainty, and they also assume that all interest rates move in the same manner.

Risk concentration

Potential exposures are monitored, analyzing certain concentrations in some type of insurance. The table below shows risk concentration by type of insurance (except health and dental), based on net premiums, net of reinsurance:

Premium issued by branch, net of cancellation	R\$ thousand	
	On December 31 2018	2017
Auto	3,987,645	4,086,705
RE (Elementary branch)	1,485,537	1,525,848
Traditional plans	1,892,855	1,788,420
Life insurance	7,041,906	6,904,576
VGBL	23,492,119	28,650,153
PGBL	2,461,808	3,301,623

Credit risk of insurance

Credit risk consists of the possible incurrence of losses associated with non-performance, by the borrower or counterparty, of its financial obligations according to agreed terms, as well as the fall in value of any credit agreement as a result of deterioration in the risk classification of the borrower, and other losses related to any non-performance of financial obligations by the counterparty.

Reinsurance policy

No matter how conservative and selective insurers are in the choice of their partners, the purchase of reinsurance presents, naturally embedded in its operation, a credit risk. However, in Brazil this risk has relatively decreased due to current legal laws and regulations, once insurers should operate with reinsurers registered with SUSEP, that are classified as local, admitted or occasional. Reinsurers classified as admitted and occasional, headquartered abroad, must meet specific minimum requirements set forth in current legislation.

The Bradesco Organization's policy for purchasing reinsurance and approval of reinsurers are the responsibility of the Board of Executive Officers, observing to the minimum legal requirements and regulations, some of them aimed at minimizing the credit risk intrinsic to the operation, and considering the shareholders' equity consistent with amounts transferred.

Another important aspect of managing reinsurance operations is the fact that the Organization aims to work within its contractual capacity, thereby avoiding the frequent purchases of coverages in optional agreements and higher exposures to the credit risk.

Practically, all property damage portfolios, except automotive, are hedged by reinsurance which, in most cases, is a combination of proportional and non-proportional plans by risk and/or by event.

Currently, part of the reinsurance contracts (proportional and non-proportional) are transferred to IRB Brasil Resseguros S.A. Some admitted reinsurers participate with lower individual percentages, but all have minimum capital and rating higher than the minimum established by the Brazilian legislation, which, in Management's judgment, reduces the credit risk.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Credit risk management

Credit risk management in the Organization is a continuous and evolving process including the mapping, development, evaluation and diagnosis of existing models, instruments and procedures that requires a high level of discipline and control in the analysis of operations to preserve the integrity and independence of processes.

As noted above, credit risk is managed at the corporate level using structured, independent internal procedures based on proprietary documentation and reports, duly assessed by the risk management structures of Organization, and based on the gradual deployment of internal models for the determination, measurement and calculation of capital.

Exposure to insurance credit risk

Management believes that maximum exposure to credit risk arising from premiums to be paid by insured parties is low, since, in some cases, coverage of claims may be canceled (under Brazilian regulations), if premiums are not paid by the due date. Exposure to credit risk for premium receivables differs between risks yet to be incurred and risks incurred, since there is higher exposure on incurred-risk lines for which coverage is provided in advance of payment of the insurance premium.

The Organization is exposed to concentrations of risk with individual reinsurance companies, due to the nature of the reinsurance market and strict layer of reinsurance companies with acceptable loan ratings. The Organization manages the exposures of its reinsurance counterparties, limiting the reinsurance companies that may be used, and regularly assessing the default impact of the reinsurance companies.

4) Estimates and judgments

The Organization makes estimates and judgments that can affect the reported amount of assets and liabilities within the next financial year. All estimates and judgments required in conformity with IFRS are best estimates undertaken in accordance with the applicable standard. Such estimates and judgments are continually evaluated and based in our historical experience and a number of other factors including future event expectations, regarded as reasonable, under the current circumstances.

The estimates and judgments that have a significant risk and might have a relevant impact on the amounts of assets and liabilities within the next financial year are disclosed below. The actual results may be different from those established by these estimates and premises.

Fair value of financial instruments

Financial instruments recognized at fair value in our consolidated financial statements consist primarily of financial assets measured at fair value through profit or loss, including derivatives and financial assets classified as measured at fair value through other comprehensive income. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participant at the management date.

These financial instruments are categorized within a hierarchy based on the lowest level of input that is significant to the fair value measurement. For instruments classified as level 3, we have to apply a significant amount of our own judgment in arriving at the fair value measurement. We base our judgment decisions on our knowledge and observations of the markets relevant to the individual assets and liabilities, and those judgments may vary based on market conditions. In applying our judgment, we look at a range of third-party prices and transaction volumes to understand and assess the extent of market benchmarks available and the judgments or modeling required in third-party processes. Based on these factors, we determine whether the fair values are observable in active markets or whether the markets are inactive.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Imprecision in estimating unobservable market inputs can impact the amount of revenue or loss recorded for a particular position. Furthermore, while we believe our valuation methods are appropriate and consistent with those of other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value on the reporting date. For a detailed discussion of the determination of fair value of financial instruments, see Note 3.4.

Expected credit loss

The measurement of the provision for losses on loans expected for financial assets measured at amortized cost and FVOCI requires the use of complex models and significant assumptions about future economic conditions and loan behavior.

The explanation of assumptions and estimation techniques used in the measurement of expected loan loss is further detailed in Note 3.1.

Several significant judgments are also required to apply the accounting requirements for the measurement of the credit loss expected, such as:

- Determine the criteria for the significant increase of credit risk;
- Choice of models and assumptions suitable for the measurement of expected credit loss;
- Establish the number and weighting factors on the prospective scenarios, for each type of product and market, related to the credit loss expected; and
- Establish a group of similar financial assets for purposes of measuring the expected credit loss.

The process to determine the level of provision for expected credit loss requires estimates and the use of judgment; it is possible that actual losses presented in subsequent periods will differ from those calculated according to current estimates and assumptions.

Impairment of goodwill

The Organization analyzes, at least annually, whether the current carrying value of goodwill is impaired. The first step of the process requires the identification of independent Cash-Generating Units and the allocation of goodwill to these units. The carrying amount of the CGU, including the allocated goodwill, is compared to its recoverable amount to determine whether any impairment exists. If the value in use of a cash-generating unit is less than its carrying value, goodwill will be impaired. Detailed calculations may need to be carried out taking into consideration changes in the market in which a business operates (e.g. competitive activity, regulatory change). The value in use is based upon discounting expected pre-tax cash flows at a risk-adjusted interest rate appropriate to the operating unit, the determination of both requires one to exercise one's judgment. While forecasts are compared with actual performance and external economic data, expected cash flows naturally reflect the Organization's view of future performance.

Income tax

The determination of the amount of our income tax liability is complex, and our assessment is related to our analysis of our deferred tax assets and liabilities and income tax payable. In general, our evaluation requires that we estimate future amounts of current and deferred taxes. Our assessment of the possibility that deferred tax assets are realized is subjective and involves assessments and assumptions that are inherently uncertain in nature. The realization of deferred tax assets is subject to changes in future tax rates and developments in our strategies. The underlying support for our assessments and assumptions could change over time as a result of unforeseen events or circumstances, affecting our determination of the amount of our tax liability.

Significant judgment is required in determining whether it is more likely than not that an income tax position will be sustained upon examination, even after the outcome of any related administrative or judicial proceedings based on technical merits. Further judgment is then required to determine the amount of benefit eligible for recognition in our consolidated financial statements.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In addition, we have monitored the interpretation of tax laws by, and decisions of, the tax authorities and Courts so that we can adjust any prior judgment of accrued income taxes. These adjustments may also result from our own income tax planning or resolution of income tax controversies, and may be material to our operating results for any given period. For additional information about income tax, see Note 18.

Technical insurance provisions

Insurance technical provisions (reserves) are liabilities representing estimates of the amounts that will become due at a future date, to or on behalf of our policyholders – see Note 2(l). Expectations of loss ratio, mortality, longevity, length of stay and interest rate are used. These assumptions are based on our experience and are periodically reviewed against industry standards to ensure actuarial credibility.

Contingent liabilities

The Provisions are regularly reviewed and constituted, where the loss is deemed probable, based on the opinion of the legal counsel, the nature of the lawsuit, similarity to previous lawsuits, complexity and the courts standing. Contingencies classified as Probable Loss are recorded in the Consolidated Statements of Financial Position under "Other Provisions".

5) Operating segments

The Organization operates mainly in the banking and insurance segments. Our banking operations include operations in the retail, middle-market and corporate sectors, lease, international bank operations, investment bank operations and as a private bank. The Organization also conducts banking segment

operations through its branches located throughout the country, in branches abroad and through subsidiaries as well as by means of shareholding interests in other companies. Additionally we are engaged in insurance, supplemental pension plans and capitalization bonds through our subsidiary, Bradesco Seguros S.A. and its subsidiaries.

The following segment information was prepared based on reports made available to Management to evaluate performance and make decisions regarding the allocation of resources for investments and other purposes. Our Management uses a variety of accounting information, which includes the proportional consolidation of associates and joint ventures. Accordingly, the information of the segments shown in the following tables was prepared in accordance with the specific procedures and other provisions of the Financial Institutions Accounting Plan and the total amounts, which correspond to the consolidated information, were prepared in accordance with IFRS, issued by the IASB .

The main assumptions for the segmentation of income and expenses include (i) surplus cash invested by the entities operating in insurance, supplemental pension and capitalization bonds are included in this segment, resulting in an increase in net interest income; (ii) salaries and benefits and administrative costs included in the insurance, supplemental pension and capitalization bonds segment consist only of cost directly related to these operations, and (iii) costs incurred in the banking operations segment related to the infrastructure of the branch network and other general indirect expenses have not been allocated between segments.

Information by operating segment, reviewed by the Organization and corresponding to the years 2018, 2017 and 2016, is shown below:

(1) Other operation represents less than 1% of total assets/liabilities and the net income for the year. The main adjustments from the information disclosed in segments columns are related to the difference between the IFRS and the Segment Report Information as impairment for loans and advance, effective interest rate and proportional consolidation.

Our operations are substantially conducted in Brazil. Additionally, as of December 31, 2018, we have one branch in New York, one branch in Grand Cayman, and one branch in London, mainly to complement our banking services and assist in import and export operations for Brazilian customers. Moreover we also have subsidiaries abroad, namely: Banco Bradesco Argentina S.A.U. (Buenos Aires), Banco Bradesco Europe S.A. (Luxembourg), Bradesco North America LLC (New York), Bradesco Securities, Inc. (New York), Bradesco Securities UK Limited (London), Cidade Capital Markets Ltd. (Grand Cayman), Bradesco Securities Hong Kong Limited (Hong Kong), Bradesco Trade Services Limited (Hong Kong) and Bradescard Mexico, Sociedad de Responsabilidad Limitada (Mexico).

No income from transactions with a single customer or counterparty abroad represented 10% of the Organization's income in the period of 2018, 2017 and 2016.

All transactions between operating segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated in "Other operations, adjustments and eliminations". Income and expenses directly associated with each segment are included in determining business-segment performance.

Notes to the Consolidated Financial Statements

19) Earnings per share

a) Basic earnings per share

The basic earnings per share was calculated based on the weighted average number of common and preferred shares outstanding, as shown in the calculations below:

	Years ended December 31		
	2018	2017 (1)	2016 (1)
Net earnings attributable to the Organization's common shareholders (R\$ thousand)	7,916,635	8,157,920	8,542,147
Net earnings attributable to the Organization's preferred shareholders (R\$ thousand)	8,667,280	8,931,444	9,352,102
Weighted average number of common shares outstanding (thousands)	3,354,990	3,354,990	3,354,990
Weighted average number of preferred shares outstanding (thousands)	3,339,188	3,339,188	3,339,188
Basic earnings per share attributable to common shareholders of the Organization (in Reais)	2.36	2.43	2.55
Basic earnings per share attributable to preferred shareholders of the Organization (in Reais)	2.60	2.67	2.80

(1) All share amounts presented for prior periods have been adjusted to reflect the stock split approved at the Special Shareholders' Meeting held on March 12, 2018, in the proportion of one new share for every 10 shares held.

b) Diluted earnings per share

Diluted earnings per share are the same as basic earnings per share since there are no potentially dilutive instruments.

20) Cash, balances with banks and cash equivalents

a) Cash and balances with banks

	R\$ thousand	
	On December 31	
	2018	2017
Cash and due from banks in domestic currency	14,734,228	12,939,852
Cash and due from banks in foreign currency	4,877,776	2,088,498
Compulsory deposits with the Central Bank (1)	87,596,916	66,714,226
Investments in gold	823	375
Total	107,209,743	81,742,951

(1) Compulsory deposits with the Central Bank of Brazil refer to a minimum balance that financial institutions must maintain at the Central Bank of Brazil based on a percentage of deposits received from third parties.

____ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

23) Derivative financial instruments

The Organization enters into transactions involving derivative financial instruments with a number of customers for the purpose of mitigating their overall risk exposure as well as managing risk exposure. The derivative financial instruments most often used are highly-liquid instruments traded on the futures market (B3).

(i) Swap contracts

Foreign currency and interest rate swaps are agreements to exchange one set of cash flows for another and result in an economic exchange of foreign currencies or interest rates (for example fixed or variable) or in combinations (i.e. foreign currency and interest rate swaps). There is no exchange of the principal except in certain foreign currency swaps. The Organization's foreign currency risk reflects the potential cost of replacing swap contracts and whether the counterparties fail to comply with their obligations. This risk is continually monitored in relation to the current fair value, the proportion of the notional value of the contracts and the market liquidity. The Organization, to control the level of credit risk assumed, evaluates the counterparties of the contracts using the same techniques used in its loan operations.

(ii) Foreign exchange options

Foreign exchange options are contracts according to which the seller (option issuer) gives to the buyer (option holder) the right, but not the obligation, to buy (call option) or sell (put option) on a certain date or during a certain period, a specific value in foreign currency. The seller receives from the buyer a premium for assuming the exchange or interest-rate risk. The options can be arranged between the Organization

and a customer. The Organization is exposed to credit risk only on purchased options and only for the carrying amount, which is the fair market value.

(iii) Foreign currency and interest rate futures

Foreign currency and interest rate futures are contractual obligations for the payment or receipt of a net amount based on changes in foreign exchange and interest rates or the purchase or sale of a financial instrument on a future date at a specific price, established by an organized financial market. The credit risk is minimal, since the future contracts are guaranteed in cash or securities and changes in the value of the contracts are settled on a daily basis. Contracts with a forward rate are interest-rate futures operations traded individually which require settlement of the difference between the contracted rate and the current market rate over the value of the principal to be paid in cash at a future date.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

(iv) Forward transactions

A forward operation is a contract of purchase or sale, at a fixed price, for settlement on a certain date. Because it is a futures market, in which the purchase of the share will only be made on the date of maturity, a margin deposit is necessary to guarantee the contract. This margin can be in cash or in securities. The value of the margin varies during the contract according to the variation of the share involved in the operation, to the changes of volatility and liquidity, besides the possible additional margins that the broker could request.

The breakdown of the notional and/or contractual values and the fair value of derivatives held for trading by the Organization is as follows:

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Swaps are contracts of interest rates, foreign currency and cross currency and interest rates in which payments of interest or the principal or in one or two different currencies are exchanged for a contractual period. The risks of swap contracts refer to the potential inability or unwillingness of the counterparties to comply with the contractual terms and the risk associated with changes in market conditions due to changes in the interest rates and the currency exchange rates.

The interest rate and currency futures and the forward contracts of interest rates call for subsequent delivery of an instrument at a specific price or specific profitability. The reference values constitute a nominal value of the respective instrument whose variations in price are settled daily. The credit risk associated with futures contracts is minimized due to these daily settlements. Futures contracts are also subject to risk of changes in interest rates or in the value of the respective instruments.

Credit Default Swap – CDS

In general, these represent a bilateral contract in which one of the counterparties buys protection against a credit risk of a particular financial instrument (its risk is transferred). The counterparty that sells the protection receives a remuneration that is usually paid linearly over the life of the operation.

In the event of a default, the counterparty who purchased the protection will receive a payment, the purpose of which is to compensate for the loss of value in the financial instrument. In this case, the counterparty that sells the protection normally will receive the underlying asset in exchange for said payment.

	On December 31 - R\$ thousand	
	2018	2017
Risk received in credit Swaps:	3,330,639	584,987

The contracts related to credit derivatives transactions described above are due in 2025. There were no credit events, as defined in the agreements, during the period.

The Organization has the following economic hedging transactions:

Fair-value hedge of interest rate risk

The Organization uses interest rate swaps to protect its exposure to changes in the fair value of its fixed income issuances and certain loans and advances. The interest rate swaps are matched with specific issuances or fixed income loans.

Cash Flow Hedge

The financial instruments classified in this category, aims to reduce exposure to future changes in interest rates, which impact the operating results of the Organization. The effective portion of the valuations or devaluations of these instruments is recognized in a separate account of shareholders' equity, net of tax effects and is only transferred to income in two situations: (i) in case of ineffectiveness of the hedge; or (ii) the realization of the hedge object. The ineffective portion of the respective hedge is recognized directly in the income statement.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Strategy	Hedge instrument nominal value	Hedge object accounting value	On December 31 - R\$ thousand	
			Fair Value Accumulated Adjustments in shareholders' equity (gross of tax effects)	Fair Value Accumulated Adjustments in shareholders' equity (net of tax effects)
Hedge of interest receipts from investments in securities (1)	9,784,183	8,048,943	-	-
Hedge of interest payments on funding (2)	8,285,152	8,054,345	(140,745)	(84,447)
Total in 2018	18,069,335	16,103,288	(140,745)	(84,447)

Hedge of interest receipts from investments in securities (1)	16,030,487	14,708,544	40,060	24,036
Hedge of interest payments on funding (2)	6,769,979	6,671,048	(84,044)	(50,426)
Total in 2017	22,800,466	21,379,592	(43,984)	(26,390)

(1) Referring to the DI interest rate risk, using DI Futures contracts in B3, with the maturity in 2019, making the cash flow fixed; and

(2) Referring to the DI interest rate risk, using DI Futures contracts in B3, with maturity dates in 2020, making the cash flow fixed.

The effectiveness of the hedge portfolio is in accordance with accounting standards.

For the next 12 months, the gains/(losses) related to the cash flow hedge, which we expect to recognize in the income statement, amount to R\$(33,690) thousand.

The gains/(losses) related to the cash flow hedge recorded in the income statements in the year ended on December 31, 2018 were R\$22,970 thousand (2017 – R\$13,944 thousand).

Market risk hedge

The gains and losses, realized or not, of the financial instruments classified in this category, are recorded in the Statement of Income.

Hedge of investments abroad

The financial instruments classified in this category, have the objective of reducing the exposure to foreign exchange variation of investments abroad, whose functional currency is different from the national currency, which impacts the result of the Organization. The effective portion of the valuations or devaluations of these instruments is recognized in a separate account of shareholders' equity, net of tax effects and is only transferred to income in two situations: (i) hedge ineffectiveness; or (ii) in the disposal or partial sale of the foreign operation. The ineffective portion of the respective hedge is recognized directly in the income statement.

Strategy	Hedge instrument nominal value	Hedge object accounting value	On December 31 - R\$ thousand	
			Fair Value Accumulated Adjustments in shareholders' equity (gross of tax effects)	Fair Value Accumulated Adjustments in shareholders' equity (net of tax effects)
Hedge of exchange variation on future cash flows (1)	1,375,232	755,611	(269,039)	(161,423)
Total in 2018	1,375,232	755,611	(269,039)	(161,423)
Hedge of exchange variation on future cash flows (1)	1,110,888	582,567	(59,739)	(35,843)
Total in 2017	1,110,888	582,567	(59,739)	(35,843)

(1) Whose functional currency is different from the *Real*, using Forward contracts, with the object of hedging the foreign investment referenced to MXN (Mexican Peso).

The effectiveness of the hedge portfolio is in accordance with accounting standards .

For the next 12 months, the gains/(losses) related to the hedge of investments abroad, which we expect to recognize in the result, amount to R\$4,775 thousand.

Gains/(losses) related to the hedge of investments abroad recorded in income accounts in the year ended on December 31, 2018 were R\$(7,943) thousand (2017 – R\$(359) thousand).

Other derivatives designated as hedges

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The Organization uses this category of instruments to manage its exposure to currency, interest rate, equity market and credit risks. Instruments used include interest-rate swaps, interest-rate swaps in foreign currency, forward contracts, futures, options, credit swaps and stock swaps.

Unobservable gains on initial recognition

When the valuation depends on unobservable data any initial gain or loss on financial instruments is deferred over the life of the contract or until the instrument is redeemed, transferred, sold or the fair value becomes observable. All derivatives which are part of the hedge relationships are valued on the basis of observable market data.

The nominal values do not reflect the actual risk assumed by the Organization, since the net position of these financial instruments arises from compensation and/or combination thereof. The net position is used by the Organization especially to protect interest rates, the price of the underlying assets or exchange risk. The result of these financial instruments are recognized in “Net gains and losses of financial assets held for trading”, in the consolidated statement of income.

Offsetting of financial assets and liabilities

In accordance with IFRS 7, Bradesco must present the amounts related to financial instruments subject to master clearing agreements or similar agreements. In accordance with IAS 32, a financial asset and a financial liability are offset and their net value presented in the Consolidated Balance Sheet when, and only when, there is a legally enforceable right to offset the amounts recognized and the Bank intends to settle them in a liquid basis, or to realize the asset and settle the liability simultaneously.

The table below presents financial assets and liabilities subject to compensation:

	R\$ thousand		
	On December 31, 2018		
	Amount of financial assets, gross	Related amount offset in the Balance Sheet	Net amount
Interbank investments	60,443,537	-	60,443,537
Derivative financial instruments	14,770,594	-	14,770,594

	R\$ thousand		
	On December 31, 2018		
	Amount of financial liabilities, gross	Related amount offset in the Balance Sheet	Net amount
Securities sold under agreements to repurchase	190,911,877	-	190,911,877
Derivative financial instruments	16,152,087	-	16,152,087

	R\$ thousand		
	On December 31, 2017		
	Amount of financial assets, gross	Related amount offset in the Balance Sheet	Net amount
Interbank investments	123,691,195	-	123,691,195
Derivative financial instruments	13,866,885	-	13,866,885

	R\$ thousand		
	On December 31, 2017		
	Amount of financial liabilities, gross	Related amount offset in the Balance Sheet	Net amount
Securities sold under agreements to repurchase	233,467,544	-	233,467,544
Derivative financial instruments	14,274,999	-	14,274,999

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

On December 31, 2018 and 2017, Bradesco does not have financial instruments in its balance sheet as a result of failing to meet the IAS 32 compensation criteria, or because it has no intention to liquidate them on a net basis, or to realize the assets and settle the liabilities simultaneously.

24) Financial assets at fair value through other comprehensive income

a) Financial assets at fair value through other comprehensive income

				R\$ thousand
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Brazilian government securities	146,656,888	4,251,206	(89,339)	150,818,755
Corporate debt securities	5,932,857	187,874	(145,537)	5,975,194
Bank debt securities	6,371,576	117,435	(567,935)	5,921,076
Brazilian sovereign bonds	1,573,965	28,832	(38,130)	1,564,667
Mutual funds	2,856,590	1,742	(16,971)	2,841,361
Marketable equity securities and other stocks	11,685,525	682,783	(1,438,825)	10,929,483
Balance on December 31, 2018 (1)	175,077,401	5,269,872	(2,296,737)	178,050,536

(1) In June 2018, the Management decided to reclassify the Securities measured at fair value through other comprehensive income to be measured at amortized cost, in the amount of R\$17,022,922 thousand. This reclassification was the result of the alignment of risk and capital management. Without considering this reclassification of the securities it would have been recognized in other comprehensive income fair value changes, a gain in the amount of R\$581,991 thousand.

b) Maturity

	R\$ thousand	
	On December 31, 2018	
	Amortized cost	Fair value
Due within one year	75,814,113	75,763,826
From 1 to 5 years	65,896,910	67,290,177
From 5 to 10 years	6,189,446	6,441,750
Over 10 years	15,491,407	17,625,300
No stated maturity	11,685,525	10,929,483
Total	175,077,401	178,050,536

The financial instruments pledged as collateral, classified as Financial assets at fair value through other comprehensive income, totalled R\$88,969,378 thousand in 2018, being composed mostly of Brazilian government bonds.

The Organization maintained a total of R\$2,099,991 thousand in financial assets at fair value through other comprehensive income pledged as collateral for liabilities in 2018.

c) Investments in equity instruments designated at fair value through other comprehensive income

	R\$ thousand		
	Cost	Adjustments to Fair Value	Fair Value
Marketable equity securities and other stocks	11,685,525	(756,042)	10,929,483
Total	11,685,525	(756,042)	10,929,483

The Organization adopted the option of designating equity instruments at fair value through other comprehensive income due to the particularities of a given market.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

d) Reconciliation of expected losses of financial assets at FVOCI:

	Stage 1	Stage 2	Stage 3	R\$ thousand Total (1)
Expected loss of financial assets at FVOCI on January 1, 2018	21,370	44,482	55,714	121,566
Transferred to Stage 3	(748)	-	-	(748)
Out of Stage 1	-	-	748	748
Assets constituted/reversed	(5,910)	117,579	104,271	215,940
Expected loss of financial assets at FVOCI as of December 31, 2018	14,712	162,061	160,733	337,506

(1) The expected loss is recorded as "Expected Loss on Other Financial Assets" in the Consolidated Statement of Income.

25) Financial assets available for sale

a) Available for sale

	Amortized cost	Gross unrealized gains	Gross unrealized losses	R\$ thousand Fair value
Brazilian government securities	101,822,760	1,881,077	(422,079)	103,281,758
Corporate debt securities	40,875,928	836,715	(1,734,013)	39,978,630
Bank debt securities	1,251,066	169,142	(236,355)	1,183,853
Brazilian sovereign bonds	719,494	27,326	(18,693)	728,127

Receivable insurance premiums	4,427,560	4,301,472
Overdraft for individuals	4,764,293	3,582,020
<i>Leases</i>	2,089,862	2,249,859
Other	44,736,320	33,659,520
Total portfolio	411,492,655	373,813,665
Impairment of loans and advances	(31,105,579)	(27,055,566)
Total of net loans and advances to customers	380,387,076	346,758,099

(1) It included, in 2018, R\$51,284,334 thousand related to consigned credit (2017 – R\$43,968,511 thousand).

Financial Leases Receivables

Loans and advances to customers include the following financial lease receivables.

R\$ thousand

	On December 31	
	2018	2017
Gross investments in financial leases receivable:		
Up to one year	929,858	1,118,286
From one to five years	1,128,477	1,082,149
Over five years	31,527	49,424
Impairment loss on finance leases	(128,564)	(146,812)
Net investment	1,961,298	2,103,047
Net investments in finance leases:		
Up to one year	884,853	1,034,188
From one to five years	1,045,773	1,021,089
Over five years	30,672	47,770
Total	1,961,298	2,103,047

Loans and advances to customers with expected loss

The total balance of “Loans and advances to customers with expected loss” includes renegotiated loans and advances to customers. Such loans contemplate extension of loan payment terms, grace periods, reductions in interest rates, and/or, in some cases, the forgiveness (write-off) of part of the loan principal amount.

Renegotiations may occur after debts are past due or when the Company has information about a significant deterioration in the client’s creditworthiness. The purpose of such renegotiations is to adapt the loan to reflect the client’s actual payment capacity.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The following table shows changes made and our analysis of our portfolio of renegotiated loans and advances to customers:

	R\$ thousand	
	On December 31	
	2018	2017
Opening balance	17,183,869	17,501,423
Additional renegotiated amounts, including interest	15,193,567	16,185,863
Payments received	(9,472,888)	(10,108,040)
Write-offs	(5,761,336)	(6,395,377)
Closing balance	17,143,212	17,183,869
Expected loss on loans and advances	(7,015,820)	-
Impairment of loans and advances	-	(10,853,777)
Total renegotiated loans and advances to customers, net of impairment at the end of the year	10,127,392	6,330,092
Impairment on renegotiated loans and advances as a percentage of the renegotiated portfolio	40.9%	63.2%
Total renegotiated loans and advances as a percentage of the total loan portfolio	4.2%	4.6%
Total renegotiated loans and advances as a percentage of the total loan portfolio, net of impairment	2.7%	1.8%

At the time a loan is modified, Management considers the new loan's conditions and renegotiated maturity and it is no longer considered past due. From the date of modification, renegotiated interest begins to accrue, using the effective interest rate method, taking into consideration the customer's capacity to pay the loan based on the analysis made by Management. If the customer fails to maintain the new negotiated terms, management considers ceasing accrual from that point.

Additionally, any balances related to renegotiated loans and advances to customers that have already been written off and recorded in off-balance sheet accounts, as well as any gains from renegotiations, are recognized only when received.

Reconciliation of the gross book value of loans and advances to clients

	Stage 1	Stage 2	Stage 3	R\$ thousand Total

Financial leases of data processing systems	20%	3,431,868	(2,231,143)	1,200,725
Balance on December 31, 2017		16,405,492	(7,973,017)	8,432,475

Depreciation charges in 2018 amounted to R\$1,460,013 thousand (2017 – R\$1,237,328 thousand).

We enter into finance lease agreements as a lessee for data processing equipment, which are recorded as leased equipment in property and equipment. According to this accounting method, both the asset and the obligation are recognized in the consolidated financial statements and the depreciation of the asset is calculated based on the same depreciation policy as for similar assets. See Note 43 for disclosure of the obligation.

(1) Rate of amortization: acquisition of banking rights – in accordance with contract agreement; software – 20%; Customer portfolio – up to 20%; and others – 20%; and

(2) Impairment losses were recognized in the consolidated statement of income, within “Other operating income/(expenses)”.

____ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

b) Composition of goodwill by segment

	R\$ thousand	
	On December 31	
	2018	2017
Banking	5,083,686	4,651,347
Insurance	492,382	293,966
Total	5,576,068	4,945,313

The Cash Generation Units allocated to the banking segment and the insurance, pension and capitalization bonds segment are tested annually for impairment of goodwill. We did not incur any goodwill impairment losses in 2018, 2017 and 2016.

The recoverable amount from the Banking Segment has been determined based on a value-in-use calculation. The calculation uses cash-flow predictions based on financial budgets approved by Management, with a terminal growth rate of 6.9% p.a. (7.1% p.a. in 2017). The forecast cash flows have been discounted at a rate of 12.0% p.a. (13.6% p.a. in 2017).

The key assumptions described above may change as economic and market conditions change. The Organization estimates that reasonably possible changes in these assumptions within the current economic environment are not expected to cause the recoverable amount of either unit to decline below the carrying amount.

35) Other assets

	R\$ thousand	
	On December 31	
	2018	2017
Financial assets (4) (5)	43,893,309	41,719,483

(1) Funding is secured by the Real Estate Credit Portfolio, for the amount of R\$549,665 thousand, which meets all Central Bank (BACEN) Resolution No. 4,598/17 requirements: 115.38% sufficiency (including fiduciary agent remuneration), liquidity; the asset portfolio's weighted average tenor being 309 months, issuing LIGs (secured real estate notes or 'covered bonds') with tenor 35 months, none due within 180 days, receivables corresponding to 0.05% of total assets and 61.46% of the properties' guarantee amount. The credit portfolio's guarantor assets are mostly rated AA and A (66% and 23% respectively). In addition, the LIG Issue and the asset portfolio management policy, as required by Article 11 of BACEN Resolution No. 4,598/17, are located at the following address <https://banco.bradesco/html/prime/produtos-servicos/investimentos/letra-imobiliaria-garantida.shtm>; and

(2) Issuance of securities in the foreign market to fund customers' foreign exchange operations, export pre-financing, import financing and working capital financing, substantially in the medium and long terms.

____ IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

b) Securities issued through securitization

Since 2003, the Organization uses certain arrangements to optimize its activities of funding and liquidity management by means of an Specific Purpose Entity (SPE). This SPE, which is called International Diversified Payment Rights Company, is financed with long-term bonds which are settled with the future cash flow of the corresponding assets, basically comprising current and future flow of payment orders sent by individuals and legal entities abroad to beneficiaries in Brazil for whom Bradesco acts as payer.

The long-term instruments issued by the SPE and sold to investors will be settled with funds from the payment orders flows. The Organization is required to redeem the instruments in specific cases of default or upon closing of the operations of the SPE.

The funds deriving from the sale of current and future payment orders flows, received by the SPE, must be maintained in a specific bank account until they reach a given minimum level.

We show below the amounts of the securities issued by the SPE, which appear in the "Funding from issuance of securities" line item:

				R\$ thousand

At the end of the year	176,324	219,214

(1) In 2017, includes sale of the large risk portfolio.

h) Claim information

The purpose of the table below is to show the inherent insurance risk, comparing the insurance claims paid with their provisions. Starting from the year in which the claim was reported, the upper part of the table shows the changes in the provision over the years. The provision varies as more precise information concerning the frequency and severity of the claims is obtained. The lower part of the table shows the reconciliation of the amounts with the amounts presented in the financial statements.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

41) Supplemental pension plans

Bradesco and its subsidiaries sponsor a private defined contribution pension for employees and directors, that allows financial resources to be accumulated by participants throughout their careers by means of employee and employer contributions and invested in an Exclusive Investment Fund (FIE). The Plan is managed by Bradesco Vida e Previdência S.A. and BRAM – Bradesco Asset Management S.A. DTVM is responsible for the financial management of the FIEs funds.

The Supplementary Pension Plan counts on contributions from employees and Management of Bradesco and its subsidiaries equivalent to at least 4% of their salary and, from the company, 5% of the salary, plus the percentage allocated to covers of risk benefits (invalidity and death). Actuarial obligations of the defined contribution plan are fully covered by the plan assets of the corresponding FIE. In addition to the plan, in 2001, participants who chose to migrate from the defined benefit plan are guaranteed a proportional deferred benefit, corresponding to their accumulated rights in that plan. For the active participants, retirees and pensioners of the defined benefit plan, now closed to new members, in run-off, the present value of the actuarial obligations of the plan is completely covered by collateral assets.

Banco Alvorada S.A. (successor from the spin-off of Banco Baneb S.A.) maintains defined contribution and variable benefit retirement plans, to the former employees of Baneb, through Fundação Baneb de Seguridade Social – Bases.

Bradesco sponsors both defined benefit and variable contribution retirement plans, through Caixa de Assistência e Aposentadoria dos Funcionários do Banco do Estado do Maranhão (Capof), to employees originating from Banco BEM S.A.

Bradesco sponsors a defined benefit plan through Caixa de Previdência Privada Bec – Cabec, for former employees of Banco do Estado do Ceará S.A.

Kirton Bank Brasil S.A., Kirton Capitalização S.A., Kirton Corretora de Seguros S.A., Bradesco-Kirton Corretora de Câmbio S.A. and Kirton Seguros S.A. sponsor a defined benefit plan called APABA to employees originating from Banco Bamerindus do Brasil S.A., and Kirton Administração de Serviços para Fundos de Pensão Ltda. sponsors to its employees a defined contribution plan, known as the Kirton Prev Benefits Plan (*Plano de Benefícios Kirton Prev*), both managed by MultiBRA – Pension Fund.

Banco Losango S.A., Kirton Bank Brasil S.A. and Credival – Participações, Administração e Assessoria Ltda. sponsor three pension plans for its employees, which are Losango I Benefits Plan – Basic Part, in the defined benefit mode, Losango I – Supplementary Part and PREVMAIS Losango Plan, the last two in the form of contribution variable, all managed by MultiBRA – Settlor – Multiple Fund.

Bradesco took on the obligations of Kirton Bank S.A. – Banco Múltiplo with regard to Life Insurance, Health Insurance Plans, and Retirement Compensation for employees coming from Banco Bamerindus do Brasil S.A.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In 2019, contributions to defined-benefit plans are expected to total R\$18,282 thousand.

The long-term rate of return on plan assets is based on the following:

- Medium- to long-term expectations of the asset managers; and
- Public and private securities, with short to long-term maturities which represent a significant portion of the investment portfolios of our subsidiaries, the return on which is higher than inflation plus interest.

The assets of pension plans are invested in compliance with the applicable legislation (government securities and private securities, listed company shares and real estate properties) and the weighted-average allocation of the pension plan's assets by category is as follows:

Asset categories	Assets of the Alvorada Plan		Assets of the Bradesco Plan		Assets of the Kirton Plan		On December 31 Assets of the Losango Plan	
	2018	2017	2018	2017	2018	2017	2018	2017
Equities			7.9%	4.7%			17.7%	17.3%
Fixed income	93.3%	92.7%	87.5%	90.6%	100.0%	100.0%	82.3%	82.7%
Real estate	5.4%	5.7%	2.5%	2.6%				
Other	1.3%	1.6%	2.1%	2.1%				
Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

Below is the sensitivity analysis of the benefits plan obligations, showing the impact on the actuarial exposure (8.5% - 10.0% p.a.) assuming a 1 b.p. change in the discount rate:

Rate	Discount rate/Medical inflation rate	Sensitivity Analysis	Effect on actuarial liabilities	Effect on the present value of the obligations
Discount rate	9.80% - 10.31%	Increase of 1 b.p.	reduction	(185,803)
Discount rate	7.80% - 8.31%	Decrease of 1 b.p.	increase	491,193
Medical Inflation	9.16% - 10.72%	Increase of 1 b.p.	increase	74,081
Medical Inflation	7.16% - 8.72%	Decrease of 1 b.p.	reduction	(62,077)

Total expenses related to contributions made during the year ended on December 31, 2018 totalled R\$942,427 thousand (2017 – R\$988,905 thousand).

In addition to this benefit, Bradesco and its subsidiaries offer other benefits to their employees and Management, including health insurance, dental care, life and personal accident insurance, and professional training. These expenses, including the aforementioned contributions, totaled, in December 31, 2018, R\$4,550,580 thousand (2017 – R\$5,594,368 thousand).

42) Provisions, Contingents Assets and Liabilities and Legal Obligations – Tax and Social Security

a) Contingent assets

Contingent assets are not recognized in the financial statements. However, there are ongoing proceedings where the chance of success is considered probable, such as: a) Social Integration Program (PIS), Bradesco has made a claim to offset PIS against Gross Operating Income, paid under Decree-Laws No. 2,445/88 and No. 2,449/88, regarding the payment that exceeded the amount due under Supplementary Law No. 07/70 (PIS Repique); and b) other taxes, the legality and/or constitutionality of which is being challenged, where the decision may lead to reimbursement of amounts paid.

b) Provisions classified as probable losses and legal obligations – tax and social security

The Organization is a party to a number of labor, civil and tax lawsuits, arising from the normal course of business.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Management recorded provisions based on their opinion and that of their legal counsel, the nature of the lawsuit, similarity to previous lawsuits, complexity and the courts standing, where the loss is deemed probable.

Management considers that the provision is sufficient to cover losses generated by the respective lawsuits.

Liability related to litigation is held until the conclusion to the lawsuit, represented by judicial decisions, with no further appeals or due to the statute of limitation.

I - Labor claims

These are claims brought by former employees and outsourced employees seeking indemnifications, most significantly for unpaid “overtime”, pursuant to Article 224 of the Consolidation of Labor Laws (CLT). In proceedings in which a judicial deposit is used to guarantee the execution of the judgment, the labor provision is made considering the estimated loss of these deposits. For proceedings with similar characteristics and for which there has been no official court decision, the provision is recorded based on the average calculated value of payments made for labor complaints settled in the past 12 months and for proceedings originating from acquired banks, with unique characteristics, the calculation and assessment of the required balance is conducted periodically, based on the updated recent loss history.

Overtime is monitored by using electronic time cards and paid regularly during the employment contract and, accordingly, the claims filed by former employees do not represent significant amounts.

II - Civil proceedings

These are claims for pain and suffering and property damages, mainly relating to protests, returned checks, the inclusion of information about debtors in the credit restriction registry and the replacement of inflation adjustments excluded as a result of government economic plans. These lawsuits are individually controlled using a computer-based system and provisioned whenever the loss is deemed as probable, considering

the opinion of Management and their legal counsel, the nature of the lawsuits, similarity with previous lawsuits, complexity and positioning of the courts.

Most of these lawsuits are brought to the Special Civil Court (JEC), in which the claims are limited to 40 times the minimum wage and do not have a significant impact on the Organization's financial position.

In relation to the legal claims pleading alleged differences in adjustment for inflation on savings account balances due to the implementation of economic plans that were part of the federal government's economic policy to reduce inflation in the '80s and '90s, although Bradesco complied with the law and regulation in force at the time, has provisioned these lawsuits, taking into consideration the claims where Bradesco is the defendant and the perspective of loss of each demand, in view of the decisions and subjects still under analysis in the Superior Court of Justice (STJ), such as, for example, the application of default interest in executions arising from Public Civil Actions, interest payments and succession.

In December 2017, with the mediation of the Attorney's General Office (AGU), the entities representing the bank and the savings accounts, entered into an agreement related to litigation of economic plans, with the purpose of closing these claims, in which conditions and schedule were established for savings accounts holders may to accede the agreement. This agreement was approved by the Federal Supreme Court (STF) on March 1, 2018, the period of adhesion was approved by the Federal Supreme Court (STF) on March 1, 2018, the period of adhesion for interested parties is for two (02) years from this date. As this is a voluntary agreement, Bradesco is unable to predict how many savings account holders will choose to accept the settlement offer. It is important to note that Bradesco understands that the provisioning was made to cover the eligible proceedings to the related agreement. The proceedings that are not in the context of the agreement, including those related to incorporated banks are evaluated individually based on the procedural stage they are in.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

Note that, regarding disputes relating to economic plans, the Federal Supreme Court (STF) suspended the prosecution of all lawsuits on cognizance stage, until the Court issues a final decision on the right under litigation.

III - Provision for tax risks

The Organization is disputing the legality and constitutionality of certain taxes and contributions in court, for which provisions have been recorded in full, although there is good chance of a favorable outcome, based on the opinion of the legal counsel. The processing of these legal obligations and the provisions for cases for which the risk of loss is deemed as probable is regularly monitored. During or after the conclusion of each case, a favorable outcome may arise for the Organization, resulting in the reversal of the related provisions.

The main cases are:

- PIS and COFINS – R\$2,562,453 thousand (2017 – R\$2,489,247 thousand): a request for authorization to calculate and pay PIS and COFINS based on effective billing, as set forth in Article 2 of Supplementary Law No. 70/91, removing from the calculation base the unconstitutional inclusion of other revenues other than those billed;
- Pension Contributions – R\$1,729,211 thousand (2017 – R\$1,466,469 thousand): official notifications related to the pension contributions on financial contributions in private pension plans, considered by the authorities to be compensatory sums subject to the incidence of pension contributions and to an isolated fine for not withholding IRRF on the financial contributions;
- IRPJ/CSLL on losses of credits – R\$1,461,621 thousand (2017 – R\$1,614,663 thousand): we are requesting to deduct from income tax and social contributions payable (IRPJ and CSLL, respectively) amounts of actual and definite loan losses related to unconditional discounts granted during collections, regardless of compliance with the terms and conditions provided for in Articles 9 to 14 of Law No. 9,430/96 that only apply to temporary losses;
- IRPJ/CSLL on MTM – R\$607,258 thousand: IRPJ and CSLL deficiency note related to the exclusions of revenues from marking Securities at fair value in 2007;

- INSS of Autonomous – R\$470,237 thousand (2017 – R\$643,655 thousand): the Bradesco Organization is questioning the charging of social security contribution on remunerations paid to third-party service providers, established by Supplementary Law No. 84/96 and subsequent regulations/amendments, at 20.0% with an additional of 2.5%, on the grounds that services are not provided to insurance companies but to policyholders, thus being outside the scope of such a contribution as provided for in item I, Article 22 of Law No. 8,212/91, as new wording in Law No. 9,876/99; and

- INSS – Contribution to SAT – R\$417,442 thousand (2017 – R\$401,018 thousand): in an ordinary lawsuit filed by the Brazilian Federation of Banks – Febraban, since April 2007, on behalf of its members, is questioning the classification of banks at the highest level of risk, with respect to Work Accident Risk – RAT, which eventually raised the rate of the respective contribution from 1% to 3%, in accordance with Decree No. 6,042/07.

In general, the provisions relating to lawsuits are classified as long-term, due to the unpredictability of the duration of the proceedings in the Brazilian justice system. For this reason, the estimate has not been disclosed with relation to the specific year in which these lawsuits will be closed.

IV - Changes in other provision

	Labor	Civil	R\$ thousand Tax (1)
Balance on December 31, 2017	5,554,796	5,346,563	7,589,368
Adjustment for inflation	677,970	508,399	386,671
Provisions, net of reversals and write-offs	1,289,664	912,287	531,052
Payments	(1,538,827)	(1,152,887)	(302,885)
Balance on December 31, 2018	5,983,603	5,614,362	8,204,206
Balance on December 31, 2016	5,101,732	5,003,440	8,187,237
Adjustment for inflation	637,263	484,447	500,719
Provisions, net of reversals and write-offs	1,002,559	830,642	(984,342)
Payments	(1,186,758)	(971,966)	(114,246)
Balance on December 31, 2017	5,554,796	5,346,563	7,589,368

(1) In 2017, there were reversals of provisions related to: (i) the PIS process, related to the remuneration of amounts unduly paid, in the amount of R\$268,729 thousand; (ii) IRPJ/CSLL on credit losses, in the amount of R\$408,730 thousand; and (iii) favorable decision in the process of social security contribution on the remuneration paid to accredited dentists (INSS of Autonomous), in the amount of R\$348,820 thousand.

c) Contingent liabilities classified as possible losses

The Organization maintains a system to monitor all administrative and judicial proceedings in which the institution is plaintiff or defendant and, based on the opinion of legal counsel, classifies the lawsuits according to the expectation of loss. Case law trends are periodically analyzed and, if necessary, the related risk is reclassified. In this respect, contingent lawsuits deemed to have a possible risk of loss are not recorded as a liability in the financial statements. The main proceedings in this category are the following:

- IRPJ and CSLL – 2006 to 2013 – R\$6,863,623 thousand (2017 – R\$6,264,741 thousand), relating to goodwill amortization being disallowed on the acquisition of investments;

- COFINS – R\$5,070,337 thousand (2017 – R\$4,902,151 thousand): fines and disallowances of Cofins loan compensations, released after a favorable decision in a judicial proceeding, where the unconstitutionality of the expansion of the intended calculation base was discussed for revenues other than those from billing (Law No. 9,718/98);

- Leasing companies' Tax on Services of any Nature (ISSQN) – R\$2,478,296 thousand (2017 – R\$2,394,087 thousand) which relates to the municipal tax demands from municipalities other than those in which the company is located and where, under law, tax is collected;

- IRPJ and CSLL deficiency note – 2004 to 2012 – R\$1,759,431 thousand (2017 – R\$2,431,844 thousand): relating to disallowance of exclusions and expenses, differences in depreciation expenses, insufficient depreciation expenses, expenses with depreciation of leased assets, operating expenses and income and disallowance of tax loss compensation;

- IRPJ and CSLL deficiency note – 2012 and 2013 – R\$1,689,160 thousand: due to the disallowance of operating expenses (CDI), related to resources that were capitalized between the companies of the Organization;

- PIS and COFINS notifications and disallowances of compensations – R\$1,445,126 thousand (2017 – R\$1,399,506 thousand): related to the unconstitutional extension of the basis of calculation intended for other income other than the billing (Law No. 9,718/98), from acquired companies;

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- IRPJ and CSLL deficiency note – R\$859,049 thousand (2017 – R\$969,713 thousand): relating to disallowance of exclusions with losses in collections; and
- IRPJ and CSLL deficiency note – 2008 and 2009 – R\$508,180 thousand (2017 – R\$489,687 thousand): relating to profit of subsidiaries based overseas.

43) Other liabilities

	R\$ thousand

Total outstanding shares	6,693,580,972	6,693,580,972

ii. Changes in capital stock, in number of shares

	Common	Preferred	Total
Number of shares outstanding on December 31, 2016	3,354,393,420	3,339,187,552	6,693,580,972
(1)			
Number of shares outstanding on December 31, 2017	3,354,393,420	3,339,187,552	6,693,580,972
(1)			
Number of shares outstanding on December 31, 2018	3,354,393,420	3,339,187,552	6,693,580,972

(1) All share amounts presented for prior periods have been adjusted to reflect the stock split approved at the Special Shareholders' Meeting held on March 12, 2018 in proportion of one new share for every 10 shares held.

In the Special Shareholders' Meeting held on March 10, 2017, the approval was proposed by the Board of Directors to increase the capital stock by R\$8,000,000 thousand, increasing it from R\$51,100,000 thousand to R\$59,100,000 thousand, with a bonus in shares, through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve", in compliance with the provisions in Article 169 of Law No. 6,404/76, by issuing 555,360,173 new nominative-book entry shares, with no nominal value, whereby 277,680,101 are common shares and 277,680,072 are preferred shares, attributed free-of-charge to the shareholders as bonus, to the ratio of 1 new share for every 10 shares of the same type that they own on the base date.

In the Special Shareholders' Meeting held on March 12, 2018, the approval was proposed by the Board of Directors to increase the capital stock by R\$8,000,000 thousand, increasing it from R\$59,100,000 thousand to R\$67,100,000 thousand, with a bonus in shares, through the capitalization of part of the balance of the account "Profit Reserves - Statutory Reserve", in compliance with the provisions in Article 169 of Law No. 6,404/76, by issuing 610,896,190 new nominative-book entry shares, with no nominal value, whereby 305,448,111 are common shares and 305,448,079 are preferred shares, attributed free-of-charge to the shareholders as bonus, to the ratio of 1 new share for every 10 shares of the same type that they own on the base date.

All of the shareholders are entitled to receive, in total, a mandatory dividend of at least 30% of Bradesco's annual net income, as shown in the statutory accounting records, adjusted by transfers to reserves. The Organization has no obligation that is exchangeable for or convertible into shares of capital. As a result, its diluted earnings per share is the same as the basic earnings per share.

In occurring any operation that changes the number of shares, simultaneously with the transaction in the Brazilian Market, and with the same timeframes, an identical procedure is adopted in the International Market, for the ADRs/GDRs traded in New York, USA, and Madrid, Spain.

Treasury shares are recorded at cost, which is approximately equivalent to the market prices on the date they are acquired. Cancellation of treasury shares is recorded as a reduction of unappropriated retained earnings. Treasury shares are acquired for subsequent sale or cancellation.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

b) Reserves

Capital reserves

The capital reserve consists mainly of premiums paid by the shareholders upon subscription of shares. The capital reserve is used for (i) absorption of any losses in excess of accumulated losses and revenue reserves, (ii) redemption, reimbursement of purchase of shares, (iii) redemption of founders' shares, (iv) transfer to share capital, and (v) payment of dividends to preferred shares, when this privilege is granted to them.

Revenue reserves

In accordance with Corporate Legislation, Bradesco and its Brazilian subsidiaries must allocate 5% of their annual statutory net income, after absorption of accumulated losses, to a legal reserve, the distribution of which is subject to certain limitations. The reserve can be used to increase capital or to absorb losses, but cannot be distributed in the form of dividends.

The Statutory Reserve aims to maintain an operating margin that is compatible with the development of the Organization's active operations and may be formed by up to 100% of net income remaining after statutory allocations if proposed by the Board of Executive Officers, approved by the Board of Directors and ratified at the Shareholders' Meeting, with the accumulated value limited to 95% of the Organization's paid-in capital share amount.

c) Interest on own equity / Dividends

Interest on own equity are calculated on the net income as determined in the financial statements prepared in accordance with Brazilian generally accepted accounting principles (BR GAAP) applicable to financial institutions authorized to operate by the Central Bank of Brazil. The dividends are paid in *Reais* and can be converted into US dollars and remitted to shareholders abroad, provided that the equity participation of the non-resident shareholder is registered with the Central Bank of Brazil. Brazilian companies may pay interest on equity to shareholders based on the shareholders' equity and treat these payments as deductible expenses in the Brazilian income tax and social contribution calculations. The interest cost is treated for accounting purposes as a deduction from shareholders' equity in a manner similar to dividends. Withholding income tax is levied and paid at the time that the interest on own equity is paid to the shareholders.

In 2018, the Organization distributed interest on own equity of R\$7,298,596 thousand, being attributed to the shareholders, the gross amount per share of R\$1.04 for common shares and R\$1.14 for preferred shares (2017 – R\$7,204,344 thousand, R\$1.03 for common shares and R\$1.13 for preferred shares).

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

a) Remuneration of key management personnel

The following is established each year at the Annual Shareholders' Meeting:

- The annual grand total amount of management compensation, set forth at the Board of Directors' Meeting, to be paid to Board members and members of the Board of Executive Officers, as determined by the Company's Bylaws; and
- The amount allocated to finance Management pension plans, within the Employee and Management pension plan of the Bradesco Organization.

For 2018, the maximum amount of R\$530,689 thousand was set for Management compensation and R\$534,780 thousand to finance defined contribution pension plans.

The current policy on Management compensation sets forth that 50% of net variable compensation, if any, must be allocated to the acquisition of PNB shares issued by BBD Participações S.A. and/or PN shares issued by Banco Bradesco S.A., which vest in three equal, annual and successive installments, the first of which is in the year following the payment date. This procedure complies with CMN Resolution No. 3,921/10, which sets forth a Management compensation policy for financial institutions.

Defined contribution supplementary pension plans	474,378	473,663	251,250	
Total	474,378	473,663	251,250	

The Organization has no long-term benefits or for the termination of employment contracts or for remuneration based on shares for its key Management personnel.

Other information**a) Under current law, financial institutions are not allowed to grant loans or advances to:**

(i) Officers and members of the advisory, administrative, fiscal or similar councils, as well as to their respective spouses and family members up to the second degree;

(ii) Individuals or corporations that own more than 10% of their capital; and

(iii) Corporations in which the financial institution itself, any officers or Management of the institution, as well as their spouses and respective family members up to the second degree own more than 10% of equity.

Therefore, no loans or advances are granted by the financial institutions to any subsidiary, members of the Board of Directors or the Board of Executive Officers and their relatives.

IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

b) Equity participation

Together directly, members of the Board of Directors and the Board of the Executive Officers had the following shareholding in Bradesco:

	On December 31	
	2018	2017
Common shares	0.5%	0.5%
Preferred shares	1.1%	1.0%
Total shares (1)	0.8%	0.8%

(1) On December 31, 2018, direct and indirect shareholding of the members of the Board of Directors and the Board of Executive Officers in Bradesco totaled 2.6% of common shares, 1.1% of preferred shares and 1.9% of all shares (2017 – 2.3% of common shares, 1.1% of preferred shares and 1.7% of all shares).

46) Off-balance sheet commitments

The table below summarizes the total risk represented by off-balance sheet commitments:

	On December 31	
	2018	2017
		R\$ thousand
Commitments to extend credit (1)	228,113,067	203,927,816
Financial guarantees (2)	72,870,964	78,867,348
Letters of credit for imports	361,593	294,229
Total	301,345,624	283,089,393

(1) Includes available lines of credit, limits for credit cards, personal loans, housing loans and overdrafts; and

(2) Refers to guarantees mostly provided for Corporate customers.

Financial guarantees are conditional commitments for loans issued to ensure the performance of a customer in an obligation to a third party. There is usually the right of recourse against the customer to recover any amount paid under these guarantees. Moreover, we can retain cash or other highly-liquid funds to counter-guarantee these commitments.

The contracts are subject to the same credit evaluations as other loans and advances . Standby letters of credit are issued mainly to endorse public and private debt issue agreements including commercial paper, securities financing and similar transactions. The standby letters of credit are subject to customer credit evaluation by the Management.

We issue letters of credit in connection with foreign trade transactions to guarantee the performance of a customer with a third party. These instruments are short-term commitments to pay the third-party beneficiary under certain contractual terms for the shipment of products. The contracts are subject to the same credit evaluation as other loans and advances.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

47) New standards and amendments and interpretations of existing standards

Standards, amendments and interpretations of existing standards for the year ended December 31, 2018

Transition to IFRS 9

- IFRS 9 replaced the guidance in IAS 39 - Financial Instruments: Recognition and Measurement. IFRS 9 is applied for financial instruments and was adopted on the effective date of the standard on January 1, 2018. IFRS 9 includes: (i) new models for the classification and measurement of financial instruments; (ii) measurement of expected credit losses for financial assets; and (iii) new requirements on hedge accounting. The new standard maintains the principal existing guidance on the recognition and derecognition of financial instruments in IAS 39.

(i) Classification and Measurement – Financial assets

IFRS 9 contains a new approach for classification and measurement of financial assets, where the Organization is based on the business model for the management of financial assets, in order to generate cash flow, as well as the SPPI Test, which will assess the characteristic of the cash flow and guide the classification of financial assets.

Financial assets are classified into three categories, as shown below:

- Amortized cost: Financial assets that are held for collection of contractual cash flows, which represent only the payment of the principal and interest. These assets are adjusted by any expectation of credit loss.
- FVOCI: Financial assets that are held for collection of contractual cash flows, which represent only the payment of the principal and interest, and also for sale. Changes in the fair value of these assets are recorded in other comprehensive income, except for the recognition of impairment, interest income, dividends and exchange rate variations that are recognized directly in the income statement for the fiscal year.
- FVTPL: Financial assets that do not meet the criteria to be measured at amortize cost or at FVOCI.

On December 31, 2017, the Organization had equity investments classified as available for sale with fair value of R\$11,038 million which are held for long-term strategic purposes. Pursuant to IFRS 9, the Organization, on current best estimates, designated these instruments as FVOCI. Thus, all fair value gains and losses should be recorded in other comprehensive income, with no impairment losses recognized in the income (loss) and no gain or loss is recycled to the income (loss) upon realization.

(ii) Impairment – Financial Assets

IFRS 9 replaced the model of “incurred losses” of IAS 39 with a prospective model of “expected losses”. This requires relevant judgment as to how changes in economic factors affect expected credit losses, which will be determined based on weighted probabilities.

The new model of expected losses applies to the financial instruments measured at amortized cost or FVOCI (except for investments in equity instruments).

Expected loan losses were calculated based on experience of actual loan losses in the past years. The Organization calculated the rates of expected loan losses based on the features of each portfolio, that is, it used quantitative models for loans assessed in a group and a combination of quantitative and qualitative models for large companies.

The experience of actual loan losses was adjusted to reflect the differences between economic conditions during the period in which the historical data were collected, current conditions and the Organization’s view of future economic conditions.

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

In the prospective model of expected losses, financial assets are divided into three stages:

Stage 1: Financial instruments that do not present significant deterioration in credit quality;

Stage 2: Financial instruments that present significant deterioration in credit quality; and

Stage 3: Financial instruments that indicate that the obligation will not be fully honored.

The new model of calculation of credit losses expected based on the prospective parameter for loans and advances, commitments to loans, financial guarantees given and Private Debt Securities resulted in an increase in the provision for credit losses.

(iii) Classification – Financial liabilities

IFRS 9 maintains most part of the requirements of IAS 39 regarding the classification of financial liabilities.

But, pursuant to IAS 39, the fair value variations of liabilities designated as FVTPL are recognized in the income (loss), whereas pursuant to IFRS 9, these changes of fair value should be presented as follows:

- the fair value variation that is attributable to changes in the loan risk of financial liabilities should be presented in Other Comprehensive Income (OCI); and
- the remaining value of the fair value variation should be presented in the income (loss).

(iv) Hedge Accounting

Upon the first adoption, the Organization opted to continue to apply the requirements of IAS 39 for hedge accounting, as permitted by IFRS 9 until the conclusion by the IASB of the macro-hedge project and the finalization of the hedge accounting section.

IFRS 9 requires that the Organization ensures that the hedge accounting relations are aligned with its risk management purposes and strategies and that the Organization adopt a more qualitative and prospective approach to assess hedge effectiveness. IFRS 9 also introduces new requirements for re-balance of hedge relations and prohibits the voluntary discontinuance of the hedge accounting if inconsistent with the risk management strategies of the entity.

(v) Transition

Changes in accounting policies resulting from the adoption of IFRS 9 were applied retrospectively on the date of initial application.

– The Organization opted for the exemption under the Standard of not restating comparative information from prior periods derived from changes in the classification and measurement of financial instruments (including expected loan). The differences in the accounting balances of financial assets and liabilities resulting from the adoption of IFRS 9 were recognized in Retained Earnings on January 1, 2018.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- IFRS 15 – Revenue from Contracts with Customers – requires that revenue is recognized so as to reflect the transfer of goods or services to the client for an amount that represents the company's expectation of having rights to these goods or services by way of consideration. IFRS 15 replaced IAS 18, IAS 11, and related interpretations (IFRICs 13, 15 and 18), and was be applicable from January 2018. A study on the recognition of revenue from customer contracts was conducted and the conclusion was that there was no significant impact on the Organization.

Standards, amendments and interpretations of standards applicable to future periods

- IFRS 16 – Leases. IFRS 16, issued in January 2016 in replacement to the standards IAS 17 Leasing Operations, IFRIC 4, SIC 15 and SIC 27 Complementary Aspects of Leasing Operations, establishes that the lessees account for all the leases according to a single model, similar to the accounting entry for finance leases according to IAS 17. IFRS 16 is mandatory for the fiscal years as per January 1, 2019.

At the beginning of a lease, the lessee should recognize a liability to make payments (a lease liability) and an asset representing the right to use object asset during the term of the lease (a right of use asset). The expenses with interest on the lease liability and expenses of depreciation of the right of use asset should be recognized separately.

The potential impact that the initial application of the new standard will have on the Consolidated Financial Statements of the Organization was evaluated, as described below. The actual impacts regarding the adoption may change due to certain assumptions still subject to refinement, which are:

- Use of the real or nominal discount rate; and
- Exclusion of certain taxes of the payment flows of the lease contracts.

1. Leases in which Banco Bradesco is a lessee

The Organization will recognize new assets and liabilities for its operating leases, mainly related to real estate and infrastructures in general. The nature of the expenditure related to such leases will change because the Organization will recognize a cost of depreciation of right of use assets and expense of interest on lease obligations, which were previously recognized as a linear expense of operating lease during the term of the lease.

Based on the information currently available, the Organization estimates that the impacts on the balance sheet opening on January 1, 2019 would lead to the recognition of right of use assets and lease liabilities between R\$3,984,117 and R\$4,518,042.

2. Leases in which Banco Bradesco is a lessor

There is no substantial change in the accounting for lessors based on IFRS 16 in relation to the current accounting in accordance with IAS 17. Thus, no significant impact is expected for leases in which the Organization is a lessor.

3. Transition

Banco Bradesco will adopt IFRS 16 on January 1, 2019, using the simplified and modified retrospective approach, which does not require the disclosure of comparative information.

The new standard will be adopted for contracts that were previously identified as leases that use IAS 17 and IFRIC 4 – Complementary Aspects of Leasing Operations. Therefore, the Organization does not apply the standard to contracts that have not previously been identified as contracts containing a lease under the terms of IAS 17 and IFRIC 4.

- IFRS 17 - Insurance Contracts. Establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the Standard. The purpose of IFRS 17 is to ensure that an entity provides relevant information that faithfully represents those contracts. The general model of IFRS 17 requires insurers and reinsurers to measure their insurance contracts at the initial time by the estimated total cash flow, adjusted for the time value of money and the explicit risk related to non-financial risk, in addition to of the contractual margin of the service. This estimated value is then remeasured at each base date. The unrealized profit (corresponding to "the contractual margin of the

service) is recognized over the term of the contracted coverage. Apart from this general model, IFRS 17 provides, as a way of simplifying the process, the award allocation approach. This simplified model is applicable to certain insurance contracts, including those with coverage of up to one year. "This information provides a basis for accounting firm users to evaluate the effect that insurance contracts have on the financial position, financial performance and the Company's cash flows. IFRS 17 is effective for annual periods beginning on or after January 1, 2022. The Company is in the process of evaluating the new standard in the diagnostic phase.

— IFRS – International Financial Reporting Standards – 2018

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

- IFRIC 23 - Applies to any situation where there is uncertainty as to whether an income tax treatment is acceptable under tax law. The scope of the Interpretation includes all taxes covered by IAS 12, that is, both current and deferred tax. However, it does not apply to uncertainty regarding taxes covered by other standards. IFRIC 23 becomes operative for financial periods beginning on or after January 1, 2019. A study was carried out on the effects of this standard and it was concluded that there were no impacts on the Organization.

48) Other information

1. On October 2, 2018, Bradesco formalized a strategic partnership with RCB Investimentos S.A. ("RCB"), one of the main credit management and recovery companies in Brazil, after the acquisition of 65% of its shares. Bradesco expects to add more efficiency to its credit recovery process, as well as actively participate in the credit acquisition market for recovery.

2. Unconsolidated structured entities are unconsolidated entities that the Organization does not control, but which have a contractual and non-contractual involvement, and provide variability of returns arising from the performance. The Organization has an involvement with structured entities through management of investment funds and portfolios making management fees and consortium management.

The main unconsolidated structured entities are: (i) the investment funds managed by Organization, whose nature and involvement, generating management fees and investment in units for funds, the assets of managed funds and non-consolidated in 2018 were R\$369,063,713 thousand (2017 – R\$338,846,142 thousand) and revenues earned in 2018 were R\$1,525,280 thousand (2017 – R\$1,463,469 thousand) and (ii) the consortium which nature and involvement is related to generation management fees of consortium quotas, represented by groups of quotaholders formed to acquire specific goods, whose assets in 2018 were R\$76,893,786 thousand (2017 – R\$74,323,031 thousand) and the revenues were in 2018 R\$1,683,942 thousand (2017 – R\$1,526,660 thousand).

3. On May 31, 2016, a lawsuit was filed against three members of its Bradesco's Executive Board of Directors by the Federal Police, in the scope of the so-called "Operation Zealots", which investigates the alleged improper performance of members of the CARF – Federal Administrative Tax Court. On July 28, 2016, the Federal Public Prosecution filed an accusation against all three members of the Board of Executive Officers and a former member of its Board of Directors, which was received by the Judge of the 10th Federal Court of Judicial Section of the Federal District. At present, two of the three members of our Organization remain defendants in the proceeding. The executives of Bradesco have already submitted their respective answers to the prosecution, pointing out the facts and evidence demonstrating their innocence.

The Company's Management conducted a thorough internal evaluation of the records and documents related to the indictment and found no evidence of any unlawful conduct committed by its representatives. Bradesco provided all the information requested to the competent regulatory bodies, in Brazil and abroad.

Bradesco

Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS)

Notes to the Consolidated Financial Statements

The process has already had its investigation phase closed, now await the final allegations and sentence of the first degree trial.

Following news reports of the "Operation Zealots", a class action was filed against Bradesco and three members of its Board of Executive Officers in the District Court of New York, on June 3, 2016, asserting claims under Sections 10(b) and 20(a) of the U.S. Securities Exchange Act of 1934. The lawsuit alleges that investors who purchased preferred American Depositary Shares ("ADS") of Bradesco between April 30, 2012 and July 27, 2016 suffered losses due to a supposed violation regarding the American law of capital markets. On September 29, 2017, the Court limited the proposed class to investors who purchased ADS preferred shares of Bradesco between August 8, 2014 and July 27, 2016, as well as excluding one of the executives. The Class Action is currently, in the phase of pre-trial Discovery and class certification. On September 14, 2018, the plaintiff presented a formal request to include another class representative that has already been objected by Bradesco, which is currently being analyzed by the judge.

Considering the stage that the demand is at, it is not possible to set the exposure of Bradesco's business and there are insufficient elements to carry out a risk assessment.

Bradesco also was summoned by the General's Office of the Ministry of Finance on the filing of an Administrative Proceeding ("PAR"). This process may entail the possibility of application of a fine and/or mention on public lists, which may eventually lead to restrictions on business with public agencies.

4. On July 20, 2018, Odontoprev, a subsidiary of Bradesco Saúde S.A., informed the Market about the proposed acquisition of 100% of the share capital of Odonto System Planos Odontológicos Ltda., a company with head offices in Fortaleza/ Ceará, for the amount of R\$201,637 thousand, in addition to this amount, the acquisition foresees a variable price for the future, related the achievement of the future targets of growth of the EBITDA for Odonto System of 2018 and 2019. This transaction was approved, with no restrictions, by the Agência Nacional de Saúde Suplementar – ANS (National Supplementary Health Agency), the Central Bank of Brazil – BACEN and the Administrative Council for Economic Defense – CADE. The transaction was approved by the shareholders of the Company, in the Shareholders' Meeting held on August 6, 2018.

5. On December 31, 2018, Bradesco and the Fidelity Group concluded the termination of its joint venture in Fidelity Processadora S.A. ("Processing Company"), whereby Bradesco will be the sole shareholder of

the Processing Company, whose shareholders' equity is composed exclusively of the assets and liabilities relating to the provision of credit card processing services to the Bradesco Organization. The operation (a) aims to reduce the costs of processing and the increase in the efficiency of the credit card business; (b) will not have any impact on the activities and clients of Bradesco; and (c) did not involve any financial values. The parties, Bradesco and Fidelity Group, will also maintain their association in Fidelity Serviços S.A., a company that provides call center services, collection, fraud prevention, support and other related services.
