FROM THE PRESIDENT

Dear Shareholder,

We are pleased to provide this report for AllianceBernstein Global High Income Fund (the Fund). Please review the discussion of Fund performance, the market conditions during the reporting period and the Fund's investment strategy.

As always, AB strives to keep clients ahead of what's next by:

+ Transforming uncommon insights into uncommon knowledge with a global research scope

+ Navigating markets with seasoned investment experience and sophisticated solutions

+ Providing thoughtful investment insights and actionable ideas

Whether you're an individual investor or a multi-billion-dollar institution, we put knowledge and experience to work for you.

AB's global research organization connects and collaborates across platforms and teams to deliver impactful insights and innovative products. Better insights lead to better opportunities anywhere in the world.

For additional information about AB's range of products and shareholder resources, please log on to www.abfunds.com.

Thank you for your investment in the AB Mutual Funds.

Sincerely,

Robert M. Keith

President and Chief Executive Officer, AB Mutual Funds

ANNUAL REPORT

May 10, 2018

This report provides management's discussion of fund performance for AllianceBernstein Global High Income Fund for the annual reporting period ended March 31, 2018. The Fund is a closed-end fund and its shares of common stock trade on the New York Stock Exchange.

The Fund seeks high current income, and secondarily, capital appreciation.

RETURNS AS OF MARCH 31, 2018 (unaudited)

	6 Months	12 Months
ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND (NAV)	-0.27%	4.42%
Primary Benchmark:		
Bloomberg Barclays Global High Yield Index (USD hedged)	-0.02%	4.51%
Blended Benchmark: 33% JPM GBI-EM / 33% JPM EMBI Global / 33% Bloomberg Barclays US Corporate HY 2% Issuer Capped Index	0.98%	6.66%

The Fund's market price per share on March 31, 2018 was \$11.89. The Fund's NAV per share on March 31, 2018 was \$13.56. For additional financial highlights, please see pages 120-121.

INVESTMENT RESULTS

The table above shows the Fund's performance compared with its primary benchmark, the Bloomberg Barclays Global High Yield Index (USD hedged), as well as its blended benchmark for the six- and 12-month periods ended March 31, 2018. The blended benchmark is composed of equal weightings of the JPMorgan Government Bond Index-Emerging Markets (JPM GBI-EM), local currency-denominated), the JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global) and the Bloomberg Barclays US Corporate High Yield (HY) 2% Issuer Capped Index.

During the 12-month period, the Fund underperformed its primary benchmark. Yield-curve positioning detracted from performance relative to the benchmark, primarily because of positioning along the UK yield curve, where an overweight in 10-year maturities detracted. Sector allocation was positive, as gains from the Fund's out-of-benchmark positions in US agency risk-sharing transactions and non-agency mortgages more than offset negative returns from exposures to treasuries and commercial mortgage-backed securities (CMBS). Security selection also contributed, benefiting most from US high-yield corporate selections in the US and to a lesser extent the eurozone. Selections in emerging-market corporate bonds detracted. A long position in the Polish zloty contributed, while a short position in the Singapore dollar was negative.

During the six-month period, the Fund underperformed its primary benchmark. Yield-curve positioning detracted from performance, mostly as a

result of positioning along the US curve; the Fund was overweight the intermediate portion of the curve (two-, five- and 10-year maturities) where yields rose the most. Currency investments were also negative, primarily because of long positions in the Turkish lira, Norwegian krone and Mexican peso. A long position in the Polish zloty was positive. Sector allocation contributed due to the Fund's exposure to US agency risk-sharing transactions and non-agency mortgages. Security selection also added to performance, the result of selections within investment-grade corporates and CMBS, both in the US.

During both periods the Fund utilized currency forwards and currency options, both written and purchased, to hedge currency exposure as well as to manage active currency risk. Credit default swaps, both single name and index, were used to hedge investment-grade and high-yield credit risk through cash bonds, as well as to take active credit risk. Treasury futures and interest rate swaps were used to manage duration, country exposure and yield-curve positioning. Variance swaps and swaptions were used to take active risk in an effort to add alpha (a measure of how the Fund is performing on a risk-adjusted basis versus its benchmark) by capturing risk premiums that are similar to high-yield exposure elsewhere in the Fund, while swaptions were also used to manage Fund performance versus the benchmark. Total return swaps were used to create synthetic high-yield exposure in the Fund.

MARKET REVIEW AND INVESTMENT STRATEGY

Fixed-income markets performed well over the 12-month period. Emerging-market debt rallied over the period, helped by increasing oil prices and an improving global growth story. Global high yield also performed well, followed by emerging-market local-currency government bonds, developed-market treasuries and investment-grade corporates. Within high yield, sector performance was almost uniformly positive. Transportation had the strongest absolute returns, while communications fell furthest. Outside of the eurozone, developed-market treasury yields generally flattened, with shorter maturities rising as long ends fell. Eurozone treasury yields moved in different directions.

After some initial uncertainty regarding the US government's ability to implement meaningful changes, markets reacted with enthusiasm when the Tax Cuts and Jobs Act was passed in December. In Europe, despite some formal progress on Brexit, investor anxiety increased around a bifurcated outlook for the negotiation process. The US Federal Reserve (the Fed) raised interest rates in June, December and March, and began to formally reduce its balance sheet, as universally anticipated by markets. The European Central Bank confirmed that its newly reduced pace of asset purchases would continue through September 2018 and further, if necessary.

At the end of the reporting period, a severe spike in volatility shook a broad swath of capital markets. US yields rose dramatically, with the 10-year Treasury yield reaching a four-year peak. In the US, higher-than-expected wage gains and inflation numbers fueled concerns regarding the risk of the Fed tightening monetary policy faster than anticipated and pushed bond yields higher. Additionally, President Trump's early-March announcement of import tariffs on Chinese steel and aluminum weighed on capital markets worldwide, as investors feared the possible onset of a global trade war. Nervous sentiment from the US reverberated across markets around the globe. Elsewhere, the Bank of England said that it too could increase rates faster than previously expected, depending on the strength of its economy.

INVESTMENT POLICIES

The Fund invests without limit in securities denominated in non-US currencies as well as those denominated in the US dollar. The Fund may also invest, without limit, in sovereign debt securities issued by emerging and developed nations and in debt securities of US and non-US corporate issuers. For more information regarding the Fund's risks, please see [Disclosures and Risks](#) on [pages 7](#) and [Note E Risks Involved in Investing in the Fund](#) of the Notes to Financial Statements on [pages 115-118](#).

DISCLOSURES AND RISKS

AllianceBernstein Global High Income Fund Shareholder Information

Weekly comparative net asset value (NAV) and market price information about the Fund is published each Saturday in *Barron's* and in other newspapers in a table called *Closed End Funds* . Daily NAV and market price information, and additional information regarding the Fund, is available at www.abfunds.com and www.nyse.com. For additional shareholder information regarding this Fund, please see pages 125-126.

Benchmark Disclosure

All indices are unmanaged and do not reflect fees and expenses associated with the active management of a fund portfolio. The Bloomberg Barclays Global High Yield Index (USD hedged) represents non-investment grade fixed-income securities of companies in the US, and developed and emerging markets. The JPM[®] GBI-EM represents the performance of local currency government bonds issued by emerging markets. The JPM[®] EMBI Global (market-capitalization weighted) represents the performance of US dollar-denominated Brady bonds, Eurobonds and trade loans issued by sovereign and quasi-sovereign entities. The Bloomberg Barclays US Corporate HY 2% Issuer Capped Index is the 2% Issuer Capped component of the US Corporate High Yield Index, which represents the performance of fixed-income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million and at least one year to maturity. An investor cannot invest directly in an index, and its results are not indicative of the performance of any specific investment, including the Fund.

A Word About Risk

Market Risk: The value of the Fund's assets will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events that affect large portions of the market.

Interest Rate Risk: Changes in interest rates will affect the value of investments in fixed-income securities. When interest rates rise, the value of investments in fixed-income securities tends to fall and this decrease in value may not be offset by higher income from new investments. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations.

Credit Risk: An issuer or guarantor of a fixed-income security, or the counterparty to a derivatives or other contract, may be unable or unwilling to make timely payments of interest or principal, or to otherwise honor its obligations. The issuer or guarantor may default, causing a loss of the full principal amount of a security. The degree of risk for a particular security

DISCLOSURES AND RISKS (continued)

may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security.

Below Investment Grade Securities: Investments in fixed-income securities with lower ratings (commonly known as junk bonds) tend to have a higher probability that an issuer will default or fail to meet its payment obligations. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of the junk bond market generally and less secondary market liquidity.

Inflation Risk: This is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions. This risk is significantly greater if the Fund invests a significant portion of its assets in fixed-income securities with longer maturities.

Foreign (Non-US) Risk: Investments in securities of non-US issuers may involve more risk than those of US issuers. These securities may fluctuate more widely in price and may be less liquid due to adverse market, economic, political, regulatory or other factors.

Emerging-Market Risk: Investments in emerging-market countries may have more risk because the markets are less developed and less liquid as well as being subject to increased economic, political, regulatory or other uncertainties.

Currency Risk: Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.

Leverage Risk: As a result of the Fund's use of leveraging techniques, its NAV may be more volatile because leverage tends to exaggerate the effect of changes in interest rates and any increase or decrease in the value of the Fund's investments.

Diversification Risk: The Fund may have more risk because it is non-diversified, meaning that it can invest more of its assets in a smaller number of issuers and that adverse changes in the value of one security could have a more significant effect on the Fund's NAV.

Derivatives Risk: Investments in derivatives may be illiquid, difficult to price and leveraged so that small changes may produce disproportionate losses for the Fund, and may be subject to counterparty risk to a greater degree than more traditional investments.

DISCLOSURES AND RISKS (continued)

Management Risk: The Fund is subject to management risk because it is an actively managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. The Fund may invest in mortgage-backed and/or other asset-backed securities, including securities backed by mortgages and assets with an international or emerging-markets origination and securities backed by non-performing loans at the time of investment. Investments in mortgage-backed and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include extension risk, which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and prepayment risk, which is the risk that, in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by nongovernmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.

These risks are fully discussed in the Fund's prospectus. As with all investments, you may lose money by investing in the Fund.

An Important Note About Historical Performance

The performance shown in this report represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

** Principal amount less than 500.

(a) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered restricted, but liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2018, the aggregate market value of these securities amounted to \$437,557,344 or 37.4% of net assets.

(b) Position, or a portion thereof, has been segregated to collateralize reverse repurchase agreements.

(c) Security in which significant unobservable inputs (Level 3) were used in determining fair value.

(d) Fair valued by the Adviser.

(e) Illiquid security.

(f) Pay-In-Kind Payments (PIK). The issuer may pay cash interest and/or interest in additional debt securities. Rates shown are the rates in effect at March 31, 2018.

(g) Defaulted.

(h) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities, which represent 2.01% of net assets as of March 31, 2018, are considered illiquid and restricted. Additional information regarding such securities follows:

NOTES TO FINANCIAL STATEMENTS

March 31, 2018

NOTE A

Significant Accounting Policies

AllianceBernstein Global High Income Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP), which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The Fund is an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors (the Board).

In general, the market values of securities which are readily available and deemed reliable are determined as follows: securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at last traded price from the previous day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed or over the counter (OTC) market put or call options are valued at the mid level between the current bid and ask prices. If either a current bid or current ask price is unavailable, AllianceBernstein L.P. (the Adviser) will have discretion to determine the best valuation (e.g., last trade price in the case of listed options); open futures are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; U.S. Government securities and any other debt instruments having 60 days or less remaining until maturity are generally valued at market by an independent pricing vendor, if a market price is available. If a market price is not available, the securities are valued

NOTES TO FINANCIAL STATEMENTS (continued)

at amortized cost. This methodology is commonly used for short term securities that have an original maturity of 60 days or less, as well as short term securities that had an original term to maturity that exceeded 60 days. In instances when amortized cost is utilized, the Valuation Committee (the Committee) must reasonably conclude that the utilization of amortized cost is approximately the same as the fair value of the security. Such factors the Committee will consider include, but are not limited to, an impairment of the creditworthiness of the issuer or material changes in interest rates. Fixed-income securities, including mortgage-backed and asset-backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker-dealers. In cases where broker-dealer quotes are obtained, the Adviser may establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security. Swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties. Open end mutual funds are valued at the closing net asset value per share, while exchange traded funds are valued at the closing market price per share.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value as deemed appropriate by the Adviser. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities. To account for this, the Fund generally values many of its foreign equity securities using fair value prices based on third party vendor modeling tools to the extent available.

2. Fair Value Measurements

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability (including those valued based on their market values as described in Note A.1 above). Inputs may be observable or unobservable and refer

NOTES TO FINANCIAL STATEMENTS (continued)

broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The fair value of debt instruments, such as bonds, and over-the-counter derivatives is generally based on market price quotations, recently executed market transactions (where observable) or industry recognized modeling techniques and are generally classified as Level 2. Pricing vendor inputs to Level 2 valuations may include quoted prices for similar investments in active markets, interest rate curves, coupon rates, currency rates, yield curves, option adjusted spreads, default rates, credit spreads and other unique security features in order to estimate the relevant cash flows which is then discounted to calculate fair values. If these inputs are unobservable and significant to the fair value, these investments will be classified as Level 3. In addition, non-agency rated investments are classified as Level 3.

Where readily available market prices or relevant bid prices are not available for certain equity investments, such investments may be valued based on similar publicly traded investments, movements in relevant indices since last available prices or based upon underlying company fundamentals and comparable company data (such as multiples to earnings or other multiples to equity). Where an investment is valued using an observable input, such as another publicly traded security, the investment will be classified as Level 2. If management determines that an adjustment is appropriate based on restrictions on resale, illiquidity or uncertainty, and such adjustment is a significant component of the valuation, the investment will be classified as Level 3. An investment will also be classified as Level 3 where management uses company fundamentals and other significant inputs to determine the valuation.

NOTES TO FINANCIAL STATEMENTS (continued)

Options are valued using market-based inputs to models, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency, where such inputs and models are available. Alternatively the values may be obtained through unobservable management determined inputs and/or management's proprietary models. Where models are used, the selection of a particular model to value an option depends upon the contractual terms of, and specific risks inherent in, the option as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, measures of volatility and correlations of such inputs. Exchange-traded options generally will be classified as Level 2. For options that do not trade on exchange but trade in liquid markets, inputs can generally be verified and model selection does not involve significant management judgment. Options are classified within Level 2 on the fair value hierarchy when all of the significant inputs can be corroborated to market evidence. Otherwise such instruments are classified as Level 3.

Valuations of mortgage-backed or other asset-backed securities, by pricing vendors, are based on both proprietary and industry recognized models and discounted cash flow techniques. Significant inputs to the valuation of these instruments are value of the collateral, the rates and timing of delinquencies, the rates and timing of prepayments, and default and loss expectations, which are driven in part by housing prices for residential mortgages. Significant inputs are determined based on relative value analyses, which incorporate comparisons to instruments with similar collateral and risk profiles, including relevant indices. Mortgage and asset-backed securities for which management has collected current observable data through pricing services are generally categorized within Level 2. Those investments for which current observable data has not been provided are classified as Level 3.

Bank loan prices are provided by third party pricing services and consist of a composite of the quotes received by the vendor into a consensus price. Certain bank loans are classified as Level 3, as significant input used in the fair value measurement of these instruments is the market quotes that are received by the vendor and these inputs are not observable.

Other fixed income investments, including non-U.S. government and corporate debt, are generally valued using quoted market prices, if available, which are typically impacted by current interest rates, maturity dates and any perceived credit risk of the issuer. Additionally, in the absence of quoted market prices, these inputs are used by pricing vendors to derive a valuation based upon industry or proprietary models which incorporate issuer specific data with relevant yield/spread comparisons with more widely quoted bonds with similar key characteristics. Those investments

NOTES TO FINANCIAL STATEMENTS (continued)

for which there are observable inputs are classified as Level 2. Where the inputs are not observable, the investments are classified as Level 3.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of March 31, 2018:

Investments in

Securities	Level 1	Level 2	Level 3	Total

Total[^]	\$ (57,814,838)	\$ 1,123,864,308	\$ 85,722,778	\$ 1,151,772,248

The Fund held securities with zero market value at period end.

* Other financial instruments are derivative instruments, such as futures, forwards and swaps, which are valued at the unrealized appreciation/(depreciation) on the instrument. Other financial instruments may also include swaps with upfront premiums, options written and swaptions written which are valued at market value.

Only variation margin receivable/payable at period end is reported within the statement of assets and liabilities. This amount reflects cumulative unrealized appreciation/(depreciation) on futures and centrally cleared swaps as reported in the portfolio of investments. Centrally cleared swaps with upfront premiums are presented here at market value.

[^] There were no transfers between Level 1 and Level 2 during the reporting period.

The Fund recognizes all transfers between levels of the fair value hierarchy assuming the financial instrument was transferred at the beginning of the reporting period.

The Fund held securities with zero market value that were sold/expired/written off during the reporting period.

** The unrealized appreciation/depreciation is included in net change in unrealized appreciation/depreciation on investments and other financial instruments in the accompanying statement of operations.

+ There were de minimis transfers under 1% of net assets during the reporting period.

The following presents information about significant unobservable inputs related to the Fund's Level 3 investments at March 31, 2018. Securities priced (i) by third party vendors or (ii) by brokers are excluded from the following table.

Quantitative Information about Level 3 Fair Value Measurements

	Fair Value at 3/31/18	Valuation Technique	Unobservable Input	Range/ Weighted Average
Corporates Non- Investment Grade	\$ 535,781	Qualitative Assessment	Par Value	\$100.00 / N/A
	\$ 381,853	Recovery Analysis	Collateral Value	\$100.00 / NA
	\$ 1,092	Projected Cash Flow	Terms of Escrow	\$1.80 per \$1,000 Principal
	\$ 918,726			

NOTES TO FINANCIAL STATEMENTS (continued)

	Fair Value at 3/31/18	Valuation Technique	Unobservable Input	Range/ Weighted Average
Common Stocks	\$ 2,972,158	Market Approach	NAV Equivalent	\$1,006.49 / N/A
	\$ 2,324,105	Recovery Analysis	Liquidation Value	\$202.56 / N/A
	\$ 1,637,741	Market Approach	EBITDA* Projection	\$113.4 mm / N/A
			EBITDA* Multiples	7.0X-9.0X /8.0X
	\$ 525,967	Market Approach	Market Neutral Price	\$0.57 / N/A
	\$ 359,676	Market Approach	EBITDA* Projection	\$40.1 mm / N/A
			EBITDA* Multiples	4.3X-6.3X /5.3X
	\$ 314,453	Market Approach	EBITDA* Projection	\$40.9 mm / N/A
			EBITDA* Multiples	5.3X-7.3X /6.3X
	\$ 293,092	Qualitative Assessment	Cost of Corporate Action	\$3.94 / N/A
	\$ 97,302	Market Approach	EBITDA* Projection	\$369.7 mm / N/A
			EBITDA* Multiples	15.3X/ N/A
	\$ 75,447	Market Approach	EBITDA* Projection	\$99 mm / N/A
		EBITDA* Multiples	4.8X / N/A

	\$ 8,599,941			
Preferred Stocks	\$ 1,498,286	Market Approach	EBITDA* Projection	\$113.4 mm / N/A
			EBITDA* Multiples	7.0X-9.0X /8.0X
Whole Loan Trusts	\$ 1,197,360	Market Approach	Underlying NAV of the Collateral	\$66.10 / N/A
	\$ 768,660	Recovery Analysis	Cumulative Loss	<20% / N/A
	\$ 160,999	Discounted Cash Flow	Level Yield	44.37% / N/A
	\$ 100,600	Discounted Cash Flow	Level Yield	36.56% / N/A
	\$ 81,794	Discounted Cash Flow	Level Yield	53.69% / N/A
	\$ 2,309,413			

* Earnings Before Interest, Taxes, Depreciation and Amortization.

Generally, a change in the assumptions used in any input in isolation may be accompanied by a change in another input. Significant changes in any of the unobservable inputs may significantly impact the fair value measurement. Significant increases (decreases) in Underlying NAV of the Collateral, NAV Equivalent, Liquidation Value, Market Neutral Price, EBITDA projections and EBITDA Multiple in isolation would be expected to result in a significantly higher (lower) fair value measurement. A significant increase (decrease) in Level Yield and Cumulative Loss in isolation would be expected to result in a significant lower (higher) fair value measurement.

NOTES TO FINANCIAL STATEMENTS (continued)

The Adviser established the Committee to oversee the pricing and valuation of all securities held in the Fund. The Committee operates under pricing and valuation policies and procedures established by the Adviser and approved by the Board, including pricing policies which set forth the mechanisms and processes to be employed on a daily basis to implement these policies and procedures. In particular, the pricing policies describe how to determine market quotations for securities and other instruments. The Committee's responsibilities include: 1) fair value and liquidity determinations (and oversight of any third parties to whom any responsibility for fair value and liquidity determinations is delegated), and 2) regular monitoring of the Adviser's pricing and valuation policies and procedures and modification or enhancement of these policies and procedures (or recommendation of the modification of these policies and procedures) as the Committee believes appropriate.

The Committee is also responsible for monitoring the implementation of the pricing policies by the Adviser's Pricing Group (the Pricing Group) and any third party which performs certain pricing functions in accordance with the pricing policies. The Pricing Group is responsible for the oversight of the third party on a day-to-day basis. The Committee and the Pricing Group perform a series of activities to provide reasonable assurance of the accuracy of prices including: 1) periodic vendor due diligence meetings, review of methodologies, new developments, and process at vendors, 2) daily comparisons of security valuation versus prior day for all securities that exceeded established thresholds, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by senior management and the Committee.

In addition, several processes outside of the pricing process are used to monitor valuation issues including: 1) performance and performance attribution reports are monitored for anomalous impacts based upon benchmark performance, and 2) portfolio managers review all portfolios for performance and analytics (which are generated using the Adviser's prices).

3. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and ask prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at the rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed

NOTES TO FINANCIAL STATEMENTS (continued)

income investments, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation and depreciation of foreign currency denominated assets and liabilities.

4. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund's tax positions taken or expected to be taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Fund's financial statements.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

6. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. GAAP. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTES TO FINANCIAL STATEMENTS (continued)

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement, the Fund pays the Adviser an advisory fee at an annual rate of .90% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

For the year ended March 31, 2017, the Adviser reimbursed the Fund \$6,016 for trading losses incurred due to trade entry errors.

Pursuant to the amended administration agreement, the Fund may reimburse the Adviser for certain legal and accounting services provided to the Fund by the Adviser, provided, however, that the reimbursement may not exceed .15% annualized of average weekly net assets. For the year ended March 31, 2018, the reimbursement for such services amounted to \$79,199.

Under the terms of a Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the year ended March 31, 2018, there was no such reimbursement paid to ABIS.

The Fund may invest in AB Government Money Market Portfolio (the Government Money Market Portfolio) which has a contractual annual advisory fee rate of .20% of the portfolio's average daily net assets and bears its own expenses. In connection with the investment by the Fund in the Government Money Market Portfolio, the Adviser has contractually agreed to waive its advisory fee from the Fund in an amount equal to the Fund's pro rata share of the effective advisory fees of Government Money Market Portfolio, as borne indirectly by the Fund as an acquired fund fee and expense. For the year ended March 31, 2018, such waiver amounted to \$34,946.

A summary of the Fund's transactions in AB mutual funds for the year ended March 31, 2018 is as follows:

Fund	Market			Market	
	Value 03/31/17 (000)	Purchases at Cost (000)	Sales Proceeds (000)	Value 03/31/18 (000)	Dividend Income (000)
Government Money Market Portfolio	\$ 36,558	\$ 290,193	\$ 310,433	\$ 16,318	\$ 136

The Fund may purchase securities from, or sell securities to, an affiliated fund provided the affiliation is due solely to having a common investment adviser, common officers, or common directors. For the year ended

NOTES TO FINANCIAL STATEMENTS (continued)

March 31, 2018, the purchase and sale transactions with an affiliated fund in compliance with Rule 17a-7 under the 1940 Act were \$122,801 and \$0, respectively.

Brokerage commissions paid on investment transactions for the year ended March 31, 2018 amounted to \$72,884, of which \$0 and \$0, respectively, was paid to Sanford C. Bernstein & Co., LLC or Sanford C. Bernstein Limited, affiliates of the Adviser.

NOTE C**Investment Transactions**

Purchases and sales of investment securities (excluding short-term investments) for the year ended March 31, 2018 were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 418,940,878	\$ 382,889,200
U.S. government securities	0	41,446,246

The cost of investments for federal income tax purposes, gross unrealized appreciation and unrealized depreciation are as follows:

Cost	\$ 1,232,728,847
Gross unrealized appreciation	\$ 93,763,833
Gross unrealized depreciation	(81,094,921)
Net unrealized appreciation	\$ 12,668,912

1. Derivative Financial Instruments

The Fund may use derivatives in an effort to earn income and enhance returns, to replace more traditional direct investments, to obtain exposure to otherwise inaccessible markets (collectively, investment purposes), or to hedge or adjust the risk profile of its portfolio.

The principal types of derivatives utilized by the Fund, as well as the methods in which they may be used are:

Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sales commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions.

A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate.

NOTES TO FINANCIAL STATEMENTS (continued)

The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on forward currency exchange contracts. Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and/or depreciation by the Fund. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

During the year ended March 31, 2018, the Fund held forward currency exchange contracts for hedging and non-hedging purposes.

Futures

The Fund may buy or sell futures for investment purposes or for the purpose of hedging its portfolio against adverse effects of potential movements in the market. The Fund bears the market risk that arises from changes in the value of these instruments and the imperfect correlation between movements in the price of the futures and movements in the price of the assets, reference rates or indices which they are designed to track. Among other things, the Fund may purchase or sell futures for foreign currencies or options thereon for non-hedging purposes as a means of making direct investment in foreign currencies, as described below under **Currency Transactions** .

At the time the Fund enters into a future, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Such amount is shown as cash collateral due from broker on the statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. The credit/counterparty risk for exchange-traded futures is generally less than privately negotiated futures, since the clearinghouse, which is the issuer or counterparty to each exchange-traded future, has robust risk mitigation standards, including the requirement to provide initial and variation margin. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Use of long futures subjects the Fund to risk of loss in excess of the amounts shown on the statement of assets and liabilities, up to the notional value of the futures. Use of short futures subjects the Fund to

NOTES TO FINANCIAL STATEMENTS (continued)

unlimited risk of loss. Under some circumstances, futures exchanges may establish daily limits on the amount that the price of a future can vary from the previous day's settlement price, which could effectively prevent liquidation of unfavorable positions.

During the year ended March 31, 2018, the Fund held futures for hedging and non-hedging purposes.

Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. Among other things, the Fund may use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions** and may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, for hedging and investment purposes.

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. If a put or call option purchased by the Fund were permitted to expire without being sold or exercised, its premium would represent a loss to the Fund. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. At March 31, 2018 the maximum payment for written put options amounted to \$53,974,031. In certain circumstances maximum payout amounts may be partially offset by recovery values of the respective referenced assets and upfront premium received upon entering into the contract. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerages, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in

NOTES TO FINANCIAL STATEMENTS (continued)

determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

The Fund may also invest in options on swaps, also called swaptions. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium. A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties. At March 31, 2018 the maximum payment for written put swaptions amounted to \$10,700,000. In certain circumstances maximum payout amounts may be partially offset by recovery values of the respective referenced assets and upfront premium received upon entering into the contract.

During the year ended March 31, 2018, the Fund held purchased options for hedging and non-hedging purposes.

During the year ended March 31, 2018, the Fund held written options for hedging and non-hedging purposes.

During the year ended March 31, 2018, the Fund held purchased swaptions for hedging and non-hedging purposes.

During the year ended March 31, 2018, the Fund held written swaptions for hedging and non-hedging purposes.

Swaps

The Fund may enter into swaps to hedge its exposure to interest rates, credit risk, or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of gaining market exposures including by making direct investments in foreign currencies, as described below under Currency Transactions. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other. In addition, collateral may be pledged or received by the Fund in

NOTES TO FINANCIAL STATEMENTS (continued)

accordance with the terms of the respective swaps to provide value and recourse to the Fund or its counterparties in the event of default, bankruptcy or insolvency by one of the parties to the swap.

Risks may arise as a result of the failure of the counterparty to the swap to comply with the terms of the swap. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap in evaluating potential counterparty risk. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities. The Fund accrues for the interim payments on swaps on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swaps on the statement of assets and liabilities, where applicable. Once the interim payments are settled in cash, the net amount is recorded as realized gain/(loss) on swaps on the statement of operations, in addition to any realized gain/(loss) recorded upon the termination of swaps. Upfront premiums paid or received are recognized as cost or proceeds on the statement of assets and liabilities and are amortized on a straight line basis over the life of the contract. Amortized upfront premiums are included in net realized gain/(loss) from swaps on the statement of operations. Fluctuations in the value of swaps are recorded as a component of net change in unrealized appreciation/depreciation of swaps on the statement of operations.

Certain standardized swaps, including certain interest rate swaps and credit default swaps, are (or soon will be) subject to mandatory central clearing. Cleared swaps are transacted through futures commission merchants (FCMs) that are members of central clearinghouses, with the clearinghouse serving as central counterparty, similar to transactions in futures contracts. Centralized clearing will be required for additional categories of swaps on a phased-in basis based on requirements published by the Securities and Exchange Commission and Commodity Futures Trading Commission.

At the time the Fund enters into a centrally cleared swap, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the clearinghouse on which the transaction is effected. Such amount is shown as cash collateral due from broker on the statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal

NOTES TO FINANCIAL STATEMENTS (continued)

to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. The credit/counterparty risk for centrally cleared swaps is generally less than non-centrally cleared swaps, since the clearinghouse, which is the issuer or counterparty to each centrally cleared swap, has robust risk mitigation standards, including the requirement to provide initial and variation margin. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Interest Rate Swaps:

The Fund is subject to interest rate risk exposure in the normal course of pursuing its investment objectives. Because the Fund holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at prevailing market rates, the Fund may enter into interest rate swaps. Interest rate swaps are agreements between two parties to exchange cash flows based on a notional amount. The Fund may elect to pay a fixed rate and receive a floating rate, or, receive a fixed rate and pay a floating rate on a notional amount.

In addition, the Fund may also enter into interest rate swap transactions to preserve a return or spread on a particular investment or portion of its portfolio, or protecting against an increase in the price of securities the Fund anticipates purchasing at a later date. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments) computed based on a contractually-based principal (or notional) amount. Interest rate swaps are entered into on a net basis (i.e., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments).

During the year ended March 31, 2018, the Fund held interest rate swaps for hedging and non-hedging purposes.

Credit Default Swaps:

The Fund may enter into credit default swaps, including to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults by corporate and sovereign issuers held by the Fund, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. The Fund may purchase credit protection (Buy Contract) or provide credit protection (Sale Contract) on the referenced obligation of the credit default swap.

NOTES TO FINANCIAL STATEMENTS (continued)

During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon rate applied to the notional amount. If the Fund is a buyer/(seller) of protection and a credit event occurs, as defined under the terms of the swap agreement, the Fund will either (i) receive from the seller/(pay to the buyer) of protection an amount equal to the notional amount of the swap (the Maximum Payout Amount) and deliver/(take delivery of) the referenced obligation or (ii) receive/(pay) a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

In certain circumstances, Maximum Payout Amounts may be partially offset by recovery values of the respective referenced obligations, upfront premium received upon entering into the agreement, or net amounts received from settlement of buy protection credit default swaps entered into by the Fund for the same reference obligation with the same counterparty. As of March 31, 2018, the Fund had Buy Contracts outstanding with respect to the same referenced obligation and counterparty as certain Sale Contracts which may partially offset the Maximum Payout Amount in the amount of \$1,100,000.

Credit default swaps may involve greater risks than if the Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer of protection and no credit event occurs, it will lose its investment. If the Fund is a seller of protection and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

Implied credit spreads over Treasuries of comparable maturity utilized in determining the market value of credit default swaps on issuers as of period end are disclosed in the portfolio of investments. The implied spreads serve as an indicator of the current status of the payment/performance risk and typically reflect the market's assessment of the likelihood of default by the issuer of the referenced obligation. The implied credit spread of a particular reference entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Widening credit spreads typically represent a deterioration of the referenced entity's credit soundness and greater likelihood of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as Defaulted indicates a credit event has occurred for the referenced entity or obligation.

NOTES TO FINANCIAL STATEMENTS (continued)

During the year ended March 31, 2018, the Fund held credit default swaps for hedging and non-hedging purposes.

Total Return Swaps:

The Fund may enter into total return swaps in order to take a long or short position with respect to an underlying referenced asset. The Fund is subject to market price volatility of the underlying referenced asset. A total return swap involves commitments to pay interest in exchange for a market linked return based on a notional amount. To the extent that the total return of the security, group of securities or index underlying the transaction exceeds or falls short of the offsetting interest obligation, the Fund will receive a payment from or make a payment to the counterparty.

During the year ended March 31, 2018, the Fund held total return swaps for non-hedging purposes.

Variance Swaps:

The Fund may enter into variance swaps to hedge equity market risk or adjust exposure to the equity markets. Variance swaps are contracts in which two parties agree to exchange cash payments based on the difference between the stated level of variance and the actual variance realized on underlying asset(s) or index(es). Actual variance as used here is defined as the sum of the square of the returns on the reference asset(s) or index(es) (which in effect is a measure of its volatility) over the length of the contract term. So the parties to a variance swap can be said to exchange actual volatility for a contractually stated rate of volatility.

During the year ended March 31, 2018, the Fund held variance swaps for non-hedging purposes.

The Fund typically enters into International Swaps and Derivatives Association, Inc. Master Agreements (ISDA Master Agreement) with its OTC derivative contract counterparties in order to, among other things, reduce its credit risk to OTC counterparties. ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Fund typically may offset with the OTC counterparty certain derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default or termination. In the event of a default by an OTC counterparty, the return of collateral with market value in excess of the Fund's net liability, held by the defaulting party, may be delayed or denied.

NOTES TO FINANCIAL STATEMENTS (continued)

The Fund's ISDA Master Agreements may contain provisions for early termination of OTC derivative transactions in the event the net assets of the Fund decline below specific levels (net asset contingent features). If these levels are triggered, the Fund's OTC counterparty has the right to terminate such transaction and require the Fund to pay or receive a settlement amount in connection with the terminated transaction. For additional details, please refer to netting arrangements by OTC counterparty table below.

During the year ended March 31, 2018 the Fund had entered into the following derivatives:

Derivative Type	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Interest rate contracts	Receivable/Payable for variation margin on futures	\$ 543,883*		
Interest rate contracts	Receivable/Payable for variation margin on centrally cleared swaps	1,491,899*	Receivable/Payable for variation margin on centrally cleared swaps	\$ 1,554,698*
Interest rate contracts	Unrealized appreciation on total return swaps	819	Unrealized depreciation on total return swaps	175,280
Foreign currency contracts	Unrealized appreciation on variance swaps	252	Unrealized depreciation on variance swaps	483
Foreign currency contracts	Unrealized appreciation on forward currency exchange contracts	8,822,909	Unrealized depreciation on forward currency exchange contracts	7,071,231
Foreign currency contracts	Investments in securities, at value	206,405		
Foreign currency contracts			Options written, at value	1,998,895
Credit contracts	Unrealized appreciation on credit default swaps	371,087	Unrealized depreciation on credit default swaps	7,709,673

NOTES TO FINANCIAL STATEMENTS (continued)

Derivative Type	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Credit contracts	Receivable/Payable for variation margin on centrally cleared swaps	\$ 397,443*	Receivable/Payable for variation margin on centrally cleared swaps	\$ 499,376*
Credit contracts			Swaptions written, at value	39,360
Equity contracts			Receivable/Payable for variation margin on futures	178,435*
Total		\$ 11,834,697		\$ 19,227,431

*Only variation margin receivable/payable at period end is reported within the statement of assets and liabilities. This amount reflects cumulative unrealized appreciation/depreciation on futures and centrally cleared swaps as reported in the portfolio of investments.

Derivative Type	Location of Gain or (Loss) on Derivatives Within Statement of Operations	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
Interest rate contracts	Net realized gain/(loss) on swaps; Net change in unrealized appreciation/depreciation on swaps	\$ 2,011,400	\$ (184,531)

(b) Positions were open for eight months during the reporting period.

(c) Positions were open for eleven months during the reporting period.

(d) Positions were open for five months during the reporting period.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the statement of assets and liabilities.

All OTC derivatives held at year end were subject to netting arrangements. The following table presents the Fund's derivative assets and liabilities by OTC counterparty net of amounts available for offset under ISDA Master Agreements and net of the related collateral received/pledged by the Fund as of March 31, 2018. Exchange-traded derivatives and centrally cleared swaps are not subject to netting arrangements and as such are excluded from the table.

Counterparty	Derivative Assets Subject to a MA	Derivatives Available for Offset	Cash Collateral Received*	Security Collateral Received*	Net Amount of Derivatives Assets

*The actual collateral received/pledged may be more than the amount reported due to overcollateralization.

[^]Net amount represents the net receivable/payable that would be due from/to the counterparty in the event of default or termination. The net amount from OTC financial derivative instruments can only be netted across transactions governed under the same master agreement with the same counterparty.

See Note C.3 for additional disclosure of netting arrangements regarding reverse repurchase agreements.

2. Currency Transactions

The Fund may invest in non-U.S. Dollar-denominated securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and other options. The Fund may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

3. Reverse Repurchase Agreements

The Fund may enter into reverse repurchase transactions (RVP) in accordance with the terms of a Master Repurchase Agreement (MRA), under which the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value comparable to the repurchase price. Under the MRA and other Master Agreements, the Fund is permitted to offset payables and/or receivables with collateral held and/or posted to the counterparty and create one single net payment due to or from the Fund in the event of a default. In the event of a default by a MRA counterparty, the Fund may be considered an unsecured creditor with respect to any excess collateral (collateral with a market value in excess of the repurchase price) held by and/or posted to the counterparty, and as such the return of such excess collateral may be delayed or denied. For the year ended March 31, 2018, the average amount of reverse

NOTES TO FINANCIAL STATEMENTS (continued)

repurchase agreements outstanding was \$74,053,792 and the daily weighted average interest rate was 0.68%. At March 31, 2018, the Fund had reverse repurchase agreements outstanding in the amount of \$85,780,890 as reported in the statement of assets and liabilities.

The following table presents the Fund's RVP liabilities by counterparty net of the related collateral pledged by the Fund as of March 31, 2018:

Counterparty	RVP Liabilities Subject to a MRA	Securities Collateral Pledged*	Net Amount of RVP Liabilities
Barclays Capital, Inc.	\$ 14,585,439	\$ (14,568,280)	\$ 17,159
Credit Suisse Securities (USA) LLC	13,643,008	(13,599,040)	43,968
Deutsche Bank Securities Inc.	3,297,602	(3,145,162)	152,440
JPMorgan Chase Bank, NA	40,520,391	(40,520,391)	0
RBC Capital Markets	13,734,450	(13,330,679)	403,771
	\$ 85,780,890	\$ (85,163,552)	\$ 617,338

Including accrued interest.

*The actual collateral pledged may be more than the amount reported due to overcollateralization.

4. Loan Participations and Assignments

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated (Participations) or by buying an interest in the loan in the secondary market from a financial institution or institutional investor (Assignments). A loan is often administered by a bank or other financial institution (the Lender) that acts as agent for all holders. The agent administers the terms of the loan as specified in the loan agreement. When investing in Participations, the Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. In addition, when investing in Participations, the Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender and only upon receipt of payments by the Lender from the borrower. As a result, the Fund may be subject to the credit risk of both the borrower and the Lender. When the Fund purchases Assignments from Lenders, it will typically acquire direct rights against the borrower on the loan. These loans may include participations in bridge loans , which are loans taken out by borrowers for a short period (typically less than six months) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high-yield bonds issued for the purpose of acquisitions. The Fund may also participate in unfunded loan commitments, which are contractual obligations for investing in future Participations, and may receive a commitment fee based on the amount of the commitment. Under these arrangements, the Fund may receive a fixed rate commitment fee and, if and to the extent the borrower borrows under the facility, the Fund may receive an additional funding fee.

NOTES TO FINANCIAL STATEMENTS (continued)

Unfunded loan commitments and funded loans are marked to market daily.

As of March 31, 2018, the Fund had no unfunded loan commitments outstanding.

As of March 31, 2018, the Fund had no bridge loan commitments outstanding.

During the year ended March 31, 2018, the Fund received commitment fees or additional funding fees in the amount of \$2,402.

NOTE D

Capital Stock

During the year ended March 31, 2018 and the year ended March 31, 2017 the Fund issued no shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as "junk bonds") have speculative elements or are predominantly speculative risks.

Duration Risk Duration is a measure that relates the expected price volatility of a fixed-income security to changes in interest rates. The duration of a fixed-income security may be shorter than or equal to full maturity of a fixed-income security. Fixed-income securities with longer durations have more risk and will decrease in price as interest rates rise. For example, a fixed-income security with a duration of three years will decrease in value by approximately 3% if interest rates increase by 1%.

Inflation Risk This is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions. This risk is significantly greater if the Fund invests a significant portion of its assets in fixed-income securities with longer maturities.

NOTES TO FINANCIAL STATEMENTS (continued)

Liquidity Risk Liquidity risk exists when particular investments are difficult to purchase or sell, possibly preventing the Fund from selling out of these illiquid or relatively less liquid securities at an advantageous price. Causes of liquidity risk may include low trading volume, lack of a market maker, a large position, or legal restrictions that limit or prevent a Fund from selling securities or closing derivative positions at desirable prices or opportune times. Over recent years, the capacity of dealers to make markets in fixed income securities has been outpaced by the growth in the size of the fixed income markets. Liquidity risk may be magnified in a rising interest rate environment, where the value and liquidity of fixed income securities generally go down. Derivatives and securities involving substantial market and credit risk tend to involve greater liquidity risk. Illiquid securities and relatively less liquid securities may also be difficult to value.

Mortgage-Backed and/or Other Asset-Backed Securities Risk Investments in mortgage-backed and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include **extension risk**, which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and **prepayment risk**, which is the risk that in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by non-governmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.

Foreign (Non-U.S.) Risk Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be less liquid due to adverse market, economic, political, regulatory or other factors. Risks relating to investments in securities of non-U.S. issuers may be heightened with respect to investments in emerging-market countries, where there may be: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed. Foreign investment in the securities markets of certain foreign countries is restricted or controlled to varying degrees. These restrictions or controls may at times limit or preclude investment in certain securities and may increase the costs and expenses of the Fund.

NOTES TO FINANCIAL STATEMENTS (continued)

Currency Risk Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.

Derivatives Risk The Fund may enter into derivative transactions such as forwards, options, futures and swaps. Derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and subject to counterparty risk to a greater degree than more traditional investments. Derivatives may result in significant losses, including losses that are far greater than the value of the derivatives reflected in the statement of assets and liabilities.

Leverage Risk When the Fund borrows money or otherwise leverages its investments, its performance may be volatile because leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund's investments. The Fund may create leverage through the use of reverse repurchase arrangements, forward currency exchange contracts, forward commitments, dollar rolls or futures or by borrowing money. The use of other types of derivative instruments by the Fund, such as options and swaps, may also result in a form of leverage. Leverage may result in higher returns to the Fund than if the Fund were not leveraged, but may also adversely affect returns, particularly if the market is declining.

Leverage may result in higher returns to the Fund than if the Fund were not leveraged, but may also adversely affect returns, particularly if the market is declining. The risks of leverage also include potentially a higher volatility of the NAV of the common stock, potentially more volatility in the market value of the common stock and the relatively greater effect on the NAV of the common stock caused by the favorable or adverse changes in portfolio security values or currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of common stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be

NOTES TO FINANCIAL STATEMENTS (continued)

disadvantageous to do so. The use of derivative instruments by the Fund, such as forwards, futures, options and swaps, may result in a form of leverage.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote. Therefore, the Fund has not accrued any liability in connection with these indemnification provisions.

NOTE F

Distributions to Shareholders

The tax character of distributions paid during the fiscal years ended March 31, 2018 and March 31, 2017 were as follows:

	2018	2017
Distributions paid from:		
Ordinary income	\$ 71,764,491	\$ 81,900,947
Total taxable distributions paid	71,764,491	81,900,947
Tax return of capital	564,962	0
Total distributions paid	\$ 72,329,453	\$ 81,900,947

As of March 31, 2018, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Accumulated capital losses	\$ (23,231,175) ^(a)
Other losses	(10,802,515) ^(b)
Unrealized appreciation/(depreciation)	11,627,888 ^(c)
Total accumulated earnings/(deficit)	\$ (22,405,802) ^(d)

(a) As of March 31, 2018, the Fund had a net capital loss carryforward of \$23,231,175.

(b) As of March 31, 2018, the Fund had a qualified late-year ordinary loss deferral of \$10,802,515. This loss is deemed to arise on April 1, 2018.

(c) The differences between book-basis and tax-basis unrealized appreciation/(depreciation) are attributable primarily to the tax deferral of losses on wash sales, the tax treatment of swaps, the tax treatment of passive foreign investment companies (PFICs), the tax treatment of partnership investments, and the recognition for tax purposes of unrealized gains/losses on certain derivative instruments.

(d) The difference between book-basis and tax-basis components of accumulated earnings/(deficit) is attributable primarily to the tax treatment of defaulted securities.

For tax purposes, net realized capital losses may be carried over to offset future capital gains, if any. Funds are permitted to carry forward capital losses for an indefinite period, and such losses will retain their character as either short-term or long-term capital losses. As of March 31, 2018, the Fund had a net short-term capital loss carryforward of \$5,015,415 and a net long-term capital loss carryforward of \$18,215,760, which may be carried forward for an indefinite period.

NOTES TO FINANCIAL STATEMENTS (continued)

During the current fiscal year, permanent differences primarily due to the tax treatment of swaps, the tax treatment of partnership investments, the tax treatment of proceeds from the sale of defaulted securities, foreign currency reclassifications, paydown gain/loss reclassifications, and reclassifications of foreign capital gains tax resulted in a net increase in distributions in excess of net investment income and a net decrease in accumulated net realized loss on investment and foreign currency transactions. These reclassifications had no effect on net assets.

NOTE G

Recent Accounting Pronouncements

In March 2017, the Financial Accounting Standards Board issued an Accounting Standards Update, ASU 2017-08, Receivables – Nonrefundable Fees and Other Costs (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities (the ASU) which amends the amortization period for certain purchased callable debt securities held at a premium, shortening such period to the earliest call date. The ASU does not require any accounting change for debt securities held at a discount; the discount continues to be amortized to maturity. The ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. At this time, management is evaluating the implications of these changes on the financial statements.

NOTE H

Subsequent Events

Management has evaluated subsequent events for possible recognition or disclosure in the financial statements through the date the financial statements are issued. Management has determined that there are no material events that would require disclosure in the Fund's financial statements through this date.

See footnote summary on page 121.

FINANCIAL HIGHLIGHTS (continued)

Selected Data For A Share of Capital Stock Outstanding Throughout Each Period

(a) Based on average shares outstanding.

(b) Amount is less than \$0.005.

(c) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, Total investment return based on net asset value will be higher than total investment return based on market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.

(d) The expense ratios presented below exclude interest expense:

	2018	Year Ended March 31,			
		2017	2016	2015	2014
Net of waivers/reimbursements	.99%	.99%	.98%	1.00%	.97%
Before waivers/reimbursements	.99%	.99%	.98%	1.00%	.97%
See notes to financial statements.					

REPORT OF INDEPENDENT REGISTERED

PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of

AllianceBernstein Global High Income Fund, Inc.:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of AllianceBernstein Global High Income Fund, Inc. (the Fund), including the portfolio of investments, as of March 31, 2018, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of AllianceBernstein Global High Income Fund, Inc. at March 31, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Fund s management. Our responsibility is to express an opinion on the Fund s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of the Fund s internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and

REPORT OF INDEPENDENT REGISTERED

PUBLIC ACCOUNTING FIRM (continued)

disclosures in the financial statements. Our procedures included confirmation of securities owned as of March 31, 2018, by correspondence with the custodian and others or by other appropriate auditing procedures where replies from others were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the auditor of one or more of the AB investment companies since 1968.

New York, New York

May 29, 2018

2018 FEDERAL TAX INFORMATION

(unaudited)

For Federal income tax purposes, the following information is furnished with respect to the distributions paid by the Fund during the taxable year ended March 31, 2018. For corporate shareholders, 0.30% of dividends paid qualify for the dividends received deduction. For foreign shareholders, 53.12% of ordinary dividends paid may be considered to be qualifying to be taxed as interest-related dividends. For individual shareholders, the Fund designates 0.30% of dividends paid as qualified dividend income.

Shareholders should not use the above information to prepare their income tax returns. The information necessary to complete your income tax returns will be included with your Form 1099-DIV which will be sent to you separately in January 2019.

ADDITIONAL INFORMATION

(unaudited)

AllianceBernstein Global High Income Fund

Shareholders whose shares are registered in their own names will automatically be participants in the Dividend Reinvestment Plan (the Plan), pursuant to which distributions to shareholders will be paid in or reinvested in additional shares of the Fund, unless they elect to receive cash. Computershare Trust Company N.A. (the Agent) will act as agent for participants under the Plan. Shareholders whose shares are held in the name of a broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan.

If the Board declares a distribution payable either in shares or in cash, as holders of the Common Stock may have elected, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in shares of Common Stock of the Fund valued as follows:

- (i) If the shares of Common Stock are trading at net asset value or at a premium above net asset value at the time of valuation, the Fund will issue new shares at the greater of net asset value or 95% of the then current market price.
- (ii) If the shares of Common Stock are trading at a discount from net asset value at the time of valuation, the Agent will receive the distribution in cash and apply it to the purchase of the Fund's shares of Common Stock in the open market on the New York Stock Exchange or elsewhere, for the participants' accounts. Such purchases will be made on or shortly after the payment date for such distribution and in no event more than 30 days after such date except where temporary curtailment or suspension of purchase is necessary to comply with Federal securities laws. If, before the Agent has completed its purchases, the market price exceeds the net asset value of a share of Common Stock, the average purchase price per share paid by the Agent may exceed the net asset value of the Fund's shares of Common Stock, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund.

The Agent will maintain all shareholders' accounts in the Plan and furnish written confirmation of all transactions in the account, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Agent in non-certificate form in the name of the participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan.

ADDITIONAL INFORMATION (continued)

There will be no charges with respect to shares issued directly by the Fund to satisfy the dividend reinvestment requirements. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Agent's open market purchases of shares.

The automatic reinvestment of distributions will not relieve participants of any income taxes that may be payable (or required to be withheld) on distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to participants in the Plan at least 90 days before the record date for such dividend or distribution. The Plan may also be amended or terminated by the Agent on at least 90 days written notice to participants in the Plan. All correspondence concerning the Plan should be directed to the Agent at Computershare Trust Company N.A., P.O. Box 30170 College Point, TX 77842-3170.

*The address for each of the Fund's Officers is 1345 Avenue of the Americas, New York, NY 10105.

**The Adviser, ABI and ABIS are affiliates of the Fund.

Information Regarding the Review and Approval of the Fund's Advisory and Administration Agreements

The disinterested directors (the directors) of AllianceBernstein Global High Income Fund, Inc. (the Fund) unanimously approved the continuance of the Fund's Advisory Agreement with the Adviser and the continuance of the Fund's Administration Agreement with the Adviser (in such capacity, the Administrator) at a meeting held on October 31-November 2, 2017 (the Meeting).

Prior to approval of the continuance of the Advisory Agreement and the Administration Agreement, the directors had requested from the Adviser, and received and evaluated, extensive materials. They reviewed the proposed continuance of the Advisory Agreement and Administration Agreement with the Adviser and with experienced counsel who are independent of the Adviser, who advised on the relevant legal standards. The directors also discussed the proposed continuances in private sessions with counsel and the Fund's Senior Officer (who is also the Fund's Independent Compliance Officer).

The directors considered their knowledge of the nature and quality of the services provided by the Adviser to the Fund gained from their experience as directors or trustees of most of the registered investment companies advised by the Adviser, their overall confidence in the Adviser's integrity and competence they have gained from that experience, the Adviser's initiative in identifying and raising potential issues with the directors and its responsiveness, frankness and attention to concerns raised by the directors in the past, including the Adviser's willingness to consider and implement organizational and operational changes designed to improve investment results and the services provided to the AB Funds. The directors noted that they have four regular meetings each year, at each of which they review extensive materials and information from the Adviser, including information on the investment performance of the Fund.

The directors also considered all factors they believed relevant, including the specific matters discussed below. During the course of their deliberations, the directors evaluated, among other things, the reasonableness of the advisory fee. The directors did not identify any particular information that was all-important or controlling, and different directors may have attributed different weights to the various factors. The directors determined that the selection of the Adviser to manage the Fund and the Administrator to provide administrative services to the Fund and the overall arrangements (i) between the Fund and the Adviser, as provided in the Advisory Agreement, including the advisory fee and (ii) between the Fund and the Administrator, as provided in the Administration Agreement, including the administration fee, were fair and reasonable in light of the services performed, expenses incurred and such other matters as the directors considered relevant in the exercise of their business judgment. The

material factors and conclusions that formed the basis for the directors' determinations included the following:

Nature, Extent and Quality of Services Provided

The directors considered the scope and quality of services provided by the Adviser under the Advisory Agreement and by the Administrator under the Administration Agreement, including the quality of the investment research capabilities of the Adviser and the other resources it has dedicated to performing services for the Fund and the resources the Administrator has devoted to providing services to the Fund. The directors noted that the Adviser from time to time reviews the Fund's investment strategies and from time to time proposes changes intended to improve the Fund's relative or absolute performance for the directors' consideration. They also noted the professional experience and qualifications of the Fund's portfolio management team and other senior personnel of the Adviser. The quality of administrative and other services, including the Adviser's role in coordinating the activities of the Fund's other service providers, also was considered. The directors concluded that, overall, they were satisfied with the nature, extent and quality of services provided to the Fund under the Advisory Agreement and the Administration Agreement.

Costs of Services Provided and Profitability

The directors reviewed a schedule of the revenues and expenses and related notes indicating the profitability of the Fund to the Adviser (including in its capacity as Administrator) for calendar years 2015 and 2016 that had been prepared with an expense allocation methodology arrived at in consultation with an independent consultant retained by the Fund's Senior Officer. The directors noted the assumptions and methods of allocation used by the Adviser in preparing fund-specific profitability data and understood that there are a number of potentially acceptable allocation methodologies for information of this type. The directors noted that the profitability information reflected all revenues and expenses of the Adviser's relationship with the Fund, including those relating to its subsidiary that provides shareholder services to the Fund. The directors recognized that it is difficult to make comparisons of the profitability of the Advisory Agreement with the profitability of fund advisory contracts for unaffiliated funds because comparative information is not generally publicly available and is affected by numerous factors. The directors focused on the profitability of the Adviser's relationship with the Fund before taxes. The directors concluded that the Adviser's level of profitability from its relationship with the Fund was not unreasonable.

Fall-Out Benefits

The directors considered the other benefits to the Adviser and its affiliates from their relationships with the Fund, including, but not limited to, benefits relating to shareholder servicing fees paid by the Fund to a wholly owned subsidiary of the Adviser. The directors recognized that the Adviser's

profitability would be somewhat lower without these benefits. The directors understood that the Adviser also might derive reputational and other benefits from its association with the Fund.

Investment Results

In addition to the information reviewed by the directors in connection with the Meeting, the directors receive detailed performance information for the Fund at each regular Board meeting during the year.

At the Meeting, the directors reviewed performance information prepared by an analytical service that is not affiliated with the Adviser (the 15(c) service provider), showing the Fund's performance against a group of similar funds (peer group) and a larger group of similar funds (peer universe), each selected by the 15(c) service provider, and information prepared by the Adviser showing the Fund's performance against a broad-based securities market index, in each case for the 1-, 3-, 5- and 10-year periods ended July 31, 2017. Based on their review, the directors concluded that the Fund's investment performance was acceptable.

Advisory Fees and Other Expenses

The directors considered the latest fiscal year actual management fee rate paid by the Fund (combined advisory fee paid to the Adviser and administration fee paid to the Administrator) and information prepared by the 15(c) service provider concerning advisory fee rates paid by other funds in the same category as the Fund. They compared the combined advisory and administration fees paid by the Fund to the advisory fees of other funds where there is no separate administrator. The directors recognized that it is difficult to make comparisons of advisory fees because there are variations in the services that are included in the fees paid by other funds. The directors compared the Fund's latest fiscal year total management fee rate (combined advisory fee paid to the Adviser plus the administration fee paid to the Administrator) with a peer group median. The directors noted that the total management fee rate was expressed as a percentage of net assets and would have been lower if expressed as a percentage of average total assets (*i.e.*, net assets plus assets supported by leverage).

The directors also compared the Fund's contractual advisory fee rate with the fee rate charged by the Adviser for advising an open-end high income fund that also invested globally, and noted historical differences in their fee structures.

The Adviser informed the directors that there were no institutional products managed by it that have a substantially similar investment style.

The directors also considered the total expense ratio of the Fund in comparison to a peer group selected by the 15(c) service provider. The expense ratio of the Fund was based on the Fund's latest fiscal year. The

directors noted that it was likely that the expense ratios of some of the other funds in the Fund's category were lowered by waivers or reimbursements by those funds' investment advisers, which in some cases might be voluntary or temporary. The directors view expense ratio information as relevant to their evaluation of the Adviser's services because the Adviser is responsible for coordinating services provided to the Fund by others. Based on their review, the directors concluded that the Fund's expense ratio was acceptable.

Economies of Scale

The advisory fee schedule for the Fund does not contain breakpoints that reduce the fee rates on assets above specified levels. The directors considered that the Fund is a closed-end fixed-income fund and that it was not expected to have meaningful asset growth (absent a rights offering or an acquisition). In such circumstances, the directors did not view the potential for realization of economies of scale as the Fund's assets grow to be a material factor in their deliberations. They noted that, if the Fund's net assets were to increase materially, they would review whether potential economies of scale were being realized.

We also offer Government Money Market Portfolio¹, which serves as the money market fund exchange vehicle for the AB mutual funds. An investment in Government Money Market Portfolio is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Fund.

Investors should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. For copies of our prospectus or summary prospectus, which contain this and other information, visit us online at www.abfunds.com or contact your AB representative. Please read the prospectus and/or summary prospectus carefully before investing.

¹ Prior to November 10, 2017, Government Money Market Portfolio was named Government Exchange Reserves; prior to January 8, 2018, Sustainable International Thematic Fund was named International Growth Fund; prior to February 23, 2018, FlexFee High Yield Portfolio was named High Yield Portfolio.

Privacy Policy Statement

AllianceBernstein and its affiliates (collectively "AllianceBernstein") understand the importance of maintaining the confidentiality of their clients' nonpublic personal information. Nonpublic personal information is personally identifiable financial information about our clients who are natural persons. To provide financial products and services to our clients, we may collect information about clients from a variety of sources, including: (1) account documentation, including applications or other forms, which may include information such as a client's name, address, phone number, social security number, assets, income and other household information, (2) client transactions with us and others, such as account balances and transactions history, and (3) information from visitors to our websites provided through online forms, site visitorship data and online information-collecting devices known as "cookies".

It is our policy not to disclose nonpublic personal information about our clients or former clients (collectively "clients"), except to our affiliates, or to others as permitted or required by law. From time to time, we may disclose nonpublic personal information that we collect about our clients to non-affiliated third parties, including those that perform transaction processing or servicing functions, those that provide marketing services for us or on our behalf pursuant to a joint marketing agreement or those that provide professional services to us under a professional services agreement, all of which require the third party provider to adhere to our privacy policy. We have policies and procedures to safeguard nonpublic personal information about our clients that include restricting access to nonpublic personal information and maintaining physical, electronic and procedural safeguards which comply with applicable standards.

It is also our policy to prohibit the sharing of our clients' personal information among our affiliated group of investment, brokerage, service and insurance companies for the purpose of marketing their products or services to clients, except as permitted by law. This information includes, but is not limited to, a client's income and account history.

We have policies and procedures to ensure that certain conditions are met before an AllianceBernstein affiliated company may use information obtained from another affiliate to solicit clients for marketing purposes.

ITEM 2. CODE OF ETHICS.

(a) The registrant has adopted a code of ethics that applies to its principal executive officer, principal financial officer and principal accounting officer. A copy of the registrant's code of ethics is filed herewith as Exhibit 12(a)(1).

(b) During the period covered by this report, no material amendments were made to the provisions of the code of ethics adopted in 2(a) above.

(c) During the period covered by this report, no implicit or explicit waivers to the provisions of the code of ethics adopted in 2(a) above were granted.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Directors has determined that independent directors William H. Foulk, Jr., Garry L. Moody and Marshall C. Turner, Jr. qualify as audit committee financial experts.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

(a) - (c) The following table sets forth the aggregate fees billed by the independent auditor Ernst & Young LLP, for the Fund's last two fiscal years for professional services rendered for: (i) the audit of the Fund's annual financial statements included in the Fund's annual report to stockholders; (ii) assurance and related services that are reasonably related to the performance of the audit of the Fund's financial statements and are not reported under (i), which include advice and education related to accounting and auditing issues and quarterly press release review (for those Funds that issue quarterly press releases), and preferred stock maintenance testing (for those Funds that issue preferred stock); and (iii) tax compliance, tax advice and tax return preparation.

		Audit Fees	Audit-Related Fees	Tax Fees
AB Global High Income Fund	2017	\$ 154,767	\$ 2,056	\$ 30,637
	2018	\$ 154,767	\$ 8,000	\$ 29,601

(d) Not applicable.

(e) (1) Beginning with audit and non-audit service contracts entered into on or after May 6, 2003, the Fund's Audit Committee policies and procedures require the pre-approval of all audit and non-audit services provided to the Fund by the Fund's independent registered public accounting firm. The Fund's Audit Committee policies and procedures also require pre-approval of all audit and non-audit services provided to the Adviser and Service Affiliates to the extent that these services are directly related to the operations or financial reporting of the Fund.

(e) (2) All of the amounts for Audit Fees, Audit-Related Fees and Tax Fees in the table under Item 4 (a) - (c) are for services pre-approved by the Fund's Audit Committee.

(f) Not applicable.

(g) The following table sets forth the aggregate non-audit services provided to the Fund, the Fund's Adviser and entities that control, are controlled by or under common control with the Adviser that provide ongoing services to the Fund:

		All Fees for Non-Audit Services Provided to the Portfolio, the Adviser and Service Affiliates	Pre-approved by the Audit Committee (Portion Comprised of Audit Related Fees) (Portion Comprised of Tax Fees)
AB Global High Income Fund	2017	\$ 710,983	\$ 32,693
			\$ (2,056)
			\$ (30,637)
	2018	\$ 778,016	\$ 37,601
			\$ (8,000)
			\$ (29,601)

(h) The Audit Committee of the Fund has considered whether the provision of any non-audit services not pre-approved by the Audit Committee provided by the Fund's independent registered public accounting firm to the Adviser and Service Affiliates is compatible with maintaining the auditor's independence.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

The registrant has a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The audit committee members are as follows:

Michael J. Downey
William H. Foulk, Jr.
Nancy P. Jacklin

Gary. L. Moody
Marshall C. Turner, Jr.
Earl D. Weiner

ITEM 6. SCHEDULE OF INVESTMENTS.

Please see Schedule of Investments contained in the Report to Shareholders included under Item 1 of this Form N-CSR.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Statement of Policies and Procedures for

Proxy Voting

1. INTRODUCTION

As an investment adviser, we are shareholder advocates and have a fiduciary duty to make investment decisions that are in our clients' best interests by maximizing the value of their shares. Proxy voting is an integral part of this process, through which we support strong corporate governance structures, shareholder rights, and transparency.

We have an obligation to vote proxies in a timely manner and we apply the principles in this policy to our proxy decisions. We believe a company's environmental, social and governance (**ESG**) practices may have a significant effect on the value of the company, and we take these factors into consideration when voting. For additional information regarding our ESG policies and practices, please refer to our firm's Statement of Policy Regarding Responsible Investment (**RI Policy**).

This Proxy Voting and Governance Policy (**Proxy Voting and Governance Policy** or **Policy**), which outlines our policies for proxy voting and includes a wide range of issues that often appear on proxies, applies to all of AB's investment management subsidiaries and investment services groups investing on behalf of clients globally. It is intended for use by those involved in the proxy voting decision-making process and those responsible for the administration of proxy voting (**Proxy Managers**), in order to ensure that our proxy voting policies and procedures are implemented consistently.

We sometimes manage accounts where proxy voting is directed by clients or newly-acquired subsidiary companies. In these cases, voting decisions may deviate from this Policy.

2. RESEARCH UNDERPINS DECISION MAKING

As a research-driven firm, we approach our proxy voting responsibilities with the same commitment to rigorous research and engagement that we apply to all of our investment activities. The different investment philosophies utilized by our investment teams may occasionally result in different conclusions being drawn regarding certain proposals and, in turn, may result in the Proxy Manager making different voting decisions on the same proposal. Nevertheless, the Proxy Manager votes proxies with the goal of maximizing the value of the securities in client portfolios.

In addition to our firm-wide proxy voting policies, we have a Proxy Voting and Governance Committee (**Proxy Voting and Governance Committee** or **Committee**), which provides oversight and includes senior investment professionals from Equities, Legal personnel and Operations personnel. It is the responsibility of the Committee to evaluate and maintain proxy voting procedures and guidelines, to evaluate proposals and issues not covered by these guidelines, to consider changes in policy, and to review the Policy no less frequently than annually. In addition, the Committee meets at least three times a year and as necessary to address special situations.

RESEARCH SERVICES

We subscribe to the corporate governance and proxy research services of Institutional Shareholder Services Inc. (**ISS**). All our investment professionals can access these materials via the Proxy Manager and/or the Committee.

ENGAGEMENT

In evaluating proxy issues and determining our votes, we welcome and seek out the points of view of various parties. Internally, the Proxy Manager may consult the Committee, Chief Investment Officers, Portfolio Managers, and/or Research Analysts across our equities platforms, and Portfolio Managers in whose managed accounts a stock is held. Externally, we may engage with companies in advance of their Annual General Meeting, and throughout the year. We believe engagement provides the opportunity to share our philosophy, our corporate governance values, and more importantly, affect positive change. Also, these meetings often are joint efforts between the investment professionals, who are best positioned to comment on company-specific details, and the Proxy Manager(s), who offer a more holistic view of governance practices and relevant trends. In addition, we engage with shareholder proposal proponents and other stakeholders to understand different viewpoints and objectives.

3. PROXY VOTING GUIDELINES

Our proxy voting guidelines are both principles-based and rules-based. We adhere to a core set of principles that are described in this Policy. We assess each proxy proposal in light of these principles. Our proxy voting litmus test will

always be what we view as most likely to maximize long-term shareholder value. We believe that authority and accountability for setting and executing corporate policies, goals and compensation generally should rest with the board of directors and senior management. In return, we support strong investor rights that allow shareholders to hold directors and management accountable if they fail to act in the best interests of shareholders.

With this as a backdrop, our proxy voting guidelines pertaining to specific issues are set forth below. We generally vote proposals in accordance with these guidelines but, consistent with our principles-based approach to proxy voting, we may deviate from the guidelines if warranted by the specific facts and circumstances of the situation (i.e., if, under the circumstances, we believe that deviating from our stated policy is necessary to help maximize long-term shareholder value). In addition, these guidelines are not intended to address all issues that may appear on all proxy ballots. We will evaluate on a case-by-case basis any proposal not specifically addressed by these guidelines, whether submitted by management or shareholders, always keeping in mind our fiduciary duty to make voting decisions that, by maximizing long-term shareholder value, are in our clients' best interests.

3.1 BOARD AND DIRECTOR PROPOSALS

1. Board Diversity (SHP)

CASE-BY-CASE

Board diversity is increasingly an important topic. In a number of European countries, legislation requires a quota of female directors. Other European countries have a comply-or-explain policy. We believe boards should develop, as a part of their refreshment and refreshment process, a framework for identifying diverse candidates. We believe diversity is broader than gender and should also take into consideration factors such as business experience, background, ethnicity, tenure and nationality. We evaluate these proposals on a case-by-case basis while examining a board's current diversity profile and approach, and if there are other general governance concerns.

2. Establish New Board Committees and Elect Board Members with Specific Expertise (SHP)

CASE-BY-CASE

We believe that establishing committees should be the prerogative of a well-functioning board of directors. However, we may support shareholder proposals to establish additional board committees to address specific shareholder issues, including ESG issues. We consider on a case-by-case basis proposals that require the addition of a board member with a specific area of expertise.

3. Changes in Board Structure and Amending the Articles of Incorporation

FOR

Companies may propose various provisions with respect to the structure of the board of directors, including changing the manner in which board vacancies are filled, directors are nominated and the number of directors. Such proposals may require amending the charter or by-laws or may otherwise require shareholder approval. When these proposals are not controversial or meant as an anti-takeover device, which is generally the case, we vote in their favor. However, if we believe a proposal is intended as an anti-takeover device and diminishes shareholder rights, we generally vote against.

We may vote against directors for amending by-laws without seeking shareholder approval and/or restricting or diminishing shareholder rights.

4. Classified Boards

AGAINST

A classified board typically is divided into three separate classes. Each class holds office for a term of two or three years. Only a portion of the board can be elected or replaced each year. Because this type of proposal has fundamental anti- takeover implications, we generally oppose the adoption of classified boards unless there is a justifiable financial reason or an adequate sunset provision exists. However, where a classified board already exists, we will not oppose directors who sit on such boards for that reason. We may also vote against directors that fail to implement shareholder approved proposals to declassify boards that we previously supported.

5. Director Liability and Indemnification

CASE-BY-CASE

Some companies argue that increased indemnification and decreased liability for directors are important to ensure the continued availability of competent directors. However, others argue that the risk of such personal liability minimizes the propensity for corruption and recklessness.

We generally support indemnification provisions that are consistent with the local jurisdiction in which the company has been formed. We vote in favor of proposals adopting indemnification for directors with respect to acts conducted in the normal course of business. We also vote in favor of proposals that expand coverage for directors and officers where, despite an unsuccessful legal defense, we believe the director or officer acted in good faith and in the best interests of the company. We oppose indemnification for gross negligence.

6. Disclose CEO Succession Plan (SHP)**FOR**

Proposals like these are often suggested by shareholders of companies with long-tenured CEOs and/or high employee turnover rates. Even though some markets might not require the disclosure of a CEO succession plan, we do think it is good business practice and will support these proposals.

7. Election of Directors**FOR**

The election of directors is an important vote. We expect directors to represent shareholder interests at the company and maximize shareholder value. We generally vote in favor of the management-proposed slate of directors while considering a number of factors, including local market best practice. We believe companies should have a majority of independent directors and independent key committees. However, we will incorporate local market regulation and corporate governance codes into our decision making. We may support more progressive requirements than those implemented in a local market if we believe more progressive requirements may improve corporate governance practices. We will generally regard a director as independent if the director satisfies the criteria for independence (i) espoused by the primary exchange on which the company's shares are traded, or (ii) set forth in the code we determine to be best practice in the country where the subject company is domiciled and may take into account affiliations, related-party transactions and prior service to the company. We consider the election of directors who are bundled on a single slate to be a poor governance practice and vote on a case-by-case basis considering the amount of information available and an assessment of the group's qualifications.

In addition:

- + We believe that directors have a duty to respond to shareholder actions that have received significant shareholder support. We may vote against directors (or withhold votes for directors if plurality voting applies) who fail to act on key issues. We oppose directors who fail to attend at least 75% of board meetings within a given year without a reasonable excuse.
- + We may consider the number of boards on which a director sits and/or their length of service on a particular board.
- + We may abstain or vote against (depending on a company's history of disclosure in this regard) directors of issuers where there is insufficient information about the nominees disclosed in the proxy statement.
- + We may vote against directors for poor compensation, audit or governance practices including the lack of a formal key committee.
- + We may vote against directors for unilateral bylaw amendments that diminish shareholder rights.

We also may consider engaging company management (by phone, in writing and in person), until any issues have been satisfactorily resolved.

a. Controlled Company Exemption**CASE-BY-CASE**

In certain markets, a different standard for director independence may be applicable for controlled companies, which are companies where more than 50% of the voting power is held by an individual, group or another company, or as otherwise defined by local market standards. We may take these local standards into consideration when determining the appropriate level of independence required for the board and key committees.

Exchanges in certain jurisdictions do not have a controlled company exemption (or something similar). In such a jurisdiction, if a company has a majority shareholder or group of related majority shareholders with a majority economic interest, we generally will not oppose that company's directors simply because the board does not include a majority of independent members, although we may take local standards into consideration when determining the appropriate level of independence required for the board and key committees. We will, however, consider these directors in a negative light if the company has a history of violating the rights of minority shareholders.

b. Voting for Director Nominees in a Contested Election

CASE-BY-CASE

Votes in a contested election of directors are evaluated on a case-by-case basis with the goal of maximizing shareholder value.

8. Independent Lead Director (SHP)

FOR

We support shareholder proposals that request a company to amend its by-laws to establish an independent lead director, if the position of chairman is non-independent. We view the existence of a strong independent lead director, whose role is robust and includes clearly defined duties and responsibilities, such as the authority to call meetings and approve agendas, as a good example of the sufficient counter-balancing governance. If a company has such an independent lead director in place, we will generally oppose a proposal to require an independent board chairman, barring any additional board leadership concerns.

9. Limit Term of Directorship (SHP)

CASE-BY-CASE

These proposals seek to limit the term during which a director may serve on a board to a set number of years.

Accounting for local market practice, we generally consider a number of factors, such as overall level of board independence, director qualifications, tenure, board diversity and board effectiveness in representing our interests as shareholders, in assessing whether limiting directorship terms is in shareholders' best interests. Accordingly, we evaluate these items case-by-case.

10. Majority of Independent Directors (SHP)

FOR

Each company's board of directors has a duty to act in the best interest of the company's shareholders at all times. We believe that these interests are best served by having directors who bring objectivity to the company and are free from potential conflicts of interests. Accordingly, we support proposals seeking a majority of independent directors on the board while taking into consideration local market regulation and corporate governance codes.

11. Majority of Independent Directors on Key Committees (SHP)

FOR

In order to ensure that those who evaluate management's performance, recruit directors and set management's compensation are free from conflicts of interests, we believe that the audit, nominating/governance, and compensation committees should be composed of a majority of independent directors while taking into consideration local market regulation, corporate governance codes, and controlled company status.

12. Majority Votes for Directors (SHP)

FOR

We believe that good corporate governance requires shareholders to have a meaningful voice in the affairs of the company. This objective is strengthened if directors are elected by a majority of votes cast at an annual meeting rather than by the plurality method commonly used. With plurality voting a director could be elected by a single affirmative vote even if the rest of the votes were withheld.

We further believe that majority voting provisions will lead to greater director accountability. Therefore, we support shareholder proposals that companies amend their by-laws to provide that director nominees be elected by an affirmative vote of a majority of the votes cast, provided the proposal includes a carve-out to provide for plurality voting in contested elections where the number of nominees exceeds the number of directors to be elected.

13. Removal of Directors Without Cause (SHP)

FOR

Company by-laws sometimes define cause very narrowly, including only conditions of criminal indictment, final adverse adjudication that fiduciary duties were breached or incapacitation, while also providing shareholders with the right to remove directors only upon cause.

We believe that the circumstances under which shareholders have the right to remove directors should not be limited to those traditionally defined by companies as cause. We also believe that shareholders should have the right to conduct a vote to remove directors who fail to perform in a manner consistent with their fiduciary duties or representative of shareholders' best interests. And, while we would prefer shareholder proposals that seek to broaden the definition of cause to include situations like these, we generally support proposals that would provide shareholders with the right to remove directors without cause.

14. Require Independent Board Chairman (SHP)

CASE-BY-CASE

We believe there can be benefits to an executive chairman and to having the positions of chairman and CEO combined as well as split. When the chair is non-independent the company must have sufficient counter-balancing governance in place, generally through a strong independent lead director. Also, for companies with smaller market capitalizations, separate chairman and CEO positions may not be practical.

3.2 COMPENSATION PROPOSALS

15. Pro Rata Vesting of Equity Compensation Awards-Change in Control (SHP)

CASE-BY-CASE

We examine proposals on the treatment of equity awards in the event of a change in control on a case-by-case basis. If a change in control is accompanied by termination of employment, often referred to as a double-trigger, we generally support accelerated vesting of equity awards. If, however, there is no termination agreement in connection with a change in control, often referred to as a single-trigger, we generally prefer pro rata vesting of outstanding equity awards.

16. Adopt Policies to Prohibit any Death Benefits to Senior Executives (SHP) AGAINST

We view these bundled proposals as too restrictive and conclude that blanket restrictions on any and all such benefits, including the payment of life insurance premiums for senior executives, could put a company at a competitive disadvantage.

17. Advisory Vote to Ratify Directors Compensation (SHP) FOR

Similar to advisory votes on executive compensation, shareholders may request a non-binding advisory vote to approve compensation given to board members. We generally support this item.

18. Amend Executive Compensation Plan Tied to Performance (Bonus Banking) (SHP) AGAINST

These proposals seek to force a company to amend executive compensation plans such that compensation awards tied to performance are deferred for shareholder specified and extended periods of time. As a result, awards may be adjusted downward if performance goals achieved during the vesting period are not sustained during the added deferral period.

We believe that most companies have adequate vesting schedules and clawbacks in place. Under such circumstances, we will oppose these proposals. However, if a company does not have what we believe to be adequate vesting and/or clawback requirements, we decide these proposals on a case-by-case basis.

19. Approve Remuneration for Directors and Auditors CASE-BY-CASE

We will vote on a case-by-case basis where we are asked to approve remuneration for directors or auditors. We will generally oppose performance-based remuneration for non-executive directors as this may compromise independent oversight. However, where disclosure relating to the details of such remuneration is inadequate or provided without sufficient time for us to consider our vote, we may abstain or vote against, depending on the adequacy of the company's prior disclosures in this regard and the local market practice.

20. Approve Retirement Bonuses for Directors (Japan and South Korea) CASE-BY-CASE

Retirement bonuses are customary in Japan and South Korea. Companies seek approval to give the board authority to grant retirement bonuses for directors and/or auditors and to leave the exact amount of bonuses to the board's discretion. We will analyze such proposals on a case-by-case basis, considering management's commitment to maximizing long-term shareholder value. However, when the details of the retirement bonus are inadequate or undisclosed, we may abstain or vote against.

21. Approve Special Payments to Continuing Directors and Auditors (Japan) CASE-BY-CASE

In conjunction with the abolition of a company's retirement allowance system, we will generally support special payment allowances for continuing directors and auditors if there is no evidence of their independence becoming impaired. However, when the details of the special payments are inadequate or undisclosed, we may abstain or vote against.

22. Disclose Executive and Director Pay (SHP)

CASE-BY-CASE

The United States Securities and Exchange Commissions (SEC) has adopted rules requiring increased and/or enhanced compensation-related and corporate governance-related disclosure in proxy statements and Forms 10-K. Similar steps have been taken by regulators in foreign jurisdictions. We believe the rules enacted by the SEC and various foreign regulators generally ensure more complete and transparent disclosure. Therefore, while we will consider them on a case-by-case basis (analyzing whether there are any relevant disclosure concerns), we generally vote against shareholder proposals seeking additional disclosure of executive and director compensation, including proposals that seek to specify the measurement of performance-based compensation, if the company is subject to SEC rules or similar rules espoused by a regulator in a foreign jurisdiction. Similarly, we generally support proposals seeking additional disclosure of executive and director compensation if the company is not subject to any such rules.

- ¹ For purposes of this Policy, generally, we will consider a director independent if the director satisfies the independence definition set forth in the listing standards of the exchange on which the common stock is listed. However, we may deem local independence classification criteria insufficient.
- ² Pursuant to the SEC rules, adopted pursuant to the Sarbanes-Oxley Act of 2002, as of October 31, 2004, each U.S. listed issuer must have a fully independent audit committee.

23. Executive and Employee Compensation Plans, Policies and Reports

CASE-BY-CASE

Compensation plans (**Compensation Plans**) usually are complex and are a major corporate expense, so we evaluate them carefully and on a case-by-case basis. In all cases, however, we assess each proposed Compensation Plan within the framework of four guiding principles, each of which ensures a company's Compensation Plan helps to align the long-term interests of management with shareholders:

- + Valid measures of business performance tied to the firm's strategy and shareholder value creation, which are clearly articulated and incorporate appropriate time periods, should be utilized;
- + Compensation costs should be managed in the same way as any other expense;
- + Compensation should reflect management's handling, or failure to handle, any recent social, environmental, governance, ethical or legal issue that had a significant adverse financial or reputational effect on the company; and
- + In granting compensatory awards, management should exhibit a history of integrity and decision-making based on logic and well thought out processes.

We may oppose plans which include, and directors who establish, compensation plan provisions deemed to be poor practice such as automatic acceleration of equity, or single-triggered, in the event of a change in control.

Although votes on compensation plans are by nature only broad indications of shareholder views, they do lead to more compensation-related dialogue between management and shareholders and help ensure that management and shareholders meet their common objective: maximizing shareholder value.

In markets where votes on compensation plans are not required for all companies, we will support shareholder proposals asking the board to adopt such a vote on an advisory basis.

Where disclosure relating to the details of Compensation Plans is inadequate or provided without sufficient time for us to consider our vote, we may abstain or vote against, depending on the adequacy of the company's prior disclosures in this regard. Where appropriate, we may raise the issue with the company directly or take other steps.

24. Limit Executive Pay (SHP)

CASE-BY-CASE

We believe that management and directors, within reason, should be given latitude in determining the mix and types of awards offered to executive officers. We vote against shareholder proposals seeking to limit executive pay if we deem them too restrictive. Depending on our analysis of the specific circumstances, we are generally against requiring a company to adopt a policy prohibiting tax gross up payments to senior executives.

25. Mandatory Holding Periods (SHP)

AGAINST

We generally vote against shareholder proposals asking companies to require a company's executives to hold stock for a specified period of time after acquiring that stock by exercising company-issued stock options (i.e., precluding cashless option exercises), unless we believe implementing a mandatory holding period is necessary to help resolve underlying problems at a company that have hurt, and may continue to hurt, shareholder value. We are generally in favor of reasonable stock ownership guidelines for executives.

26. Performance-Based Stock Option Plans (SHP)

CASE-BY-CASE

These shareholder proposals require a company to adopt a policy that all or a portion of future stock options granted to executives be performance-based. Performance-based options usually take the form of indexed options (where the option sale price is linked to the company's stock performance versus an industry index), premium priced options (where the strike price is significantly above the market price at the time of the grant) or performance vesting options (where options vest when the company's stock price exceeds a specific target). Proponents argue that performance-based options provide an incentive for executives to outperform the market as a whole and prevent management from being rewarded for average performance. We believe that management, within reason, should be given latitude in determining the mix and types of awards it offers. However, we recognize the benefit of linking a portion of executive compensation to certain types of performance benchmarks. While we will not support proposals that require all options to be performance-based, we will generally support proposals that require a portion of options granted to senior executives be performance-based. However, because performance-based options can also result in unfavorable tax treatment and the company may already have in place an option plan that sufficiently ties executive stock option plans to the company's performance, we will consider such proposals on a case-by-case basis.

27. Prohibit Relocation Benefits to Senior Executives (SHP)

AGAINST

We do not consider such perquisites to be problematic pay practices as long as they are properly disclosed. Therefore we will vote against shareholder proposals asking to prohibit relocation benefits.

28. Recovery of Performance-Based Compensation (SHP)

FOR

We generally support shareholder proposals requiring the board to seek recovery of performance-based compensation awards to senior management and directors in the event of a fraud or other reasons that resulted in the detriment to shareholder value and/or company reputation due to gross ethical lapses. In deciding how to vote, we consider the adequacy of existing company clawback policy, if any.

29. Submit Golden Parachutes/Severance Plans to a Shareholder Vote (SHP)

FOR

Golden Parachutes assure key officers of a company lucrative compensation packages if the company is acquired and/or if the new owners terminate such officers. We recognize that offering generous compensation packages that are triggered by a change in control may help attract qualified officers. However, such compensation packages cannot be so excessive that they are unfair to shareholders or make the company unattractive to potential bidders, thereby serving as a constructive anti-takeover mechanism. Accordingly, we support proposals to submit severance plans (including supplemental retirement plans), to a shareholder vote, and we review proposals to ratify or redeem such plans retrospectively on a case-by-case basis.

30. Submit Golden Parachutes/Severance Plans to a Shareholder Vote Prior to Their Being Negotiated by Management (SHP)

CASE-BY-CASE

We believe that in order to attract qualified employees, companies must be free to negotiate compensation packages without shareholder interference. However, shareholders must be given an opportunity to analyze a compensation plan's final, material terms in order to ensure it is within acceptable limits. Accordingly, we evaluate proposals that require submitting severance plans and/or employment contracts for a shareholder vote prior to being negotiated by management on a case-by-case basis.

31. Submit Survivor Benefit Compensation Plan to Shareholder Vote (SHP)

FOR

Survivor benefit compensation plans, or "golden coffins", can require a company to make substantial payments or awards to a senior executive's beneficiaries following the death of the senior executive. The compensation can take the form of unearned salary or bonuses, accelerated vesting or the continuation in force of unvested equity grants, perquisites and other payments or awards. This compensation would not include compensation that the senior executive chooses to defer during his or her lifetime.

We recognize that offering generous compensation packages that are triggered by the passing of senior executives may help attract qualified officers. However, such compensation packages cannot be so excessive that they are unfair to shareholders or make the company unattractive to potential bidders, thereby serving as a constructive anti-takeover mechanism.

3.3 CAPITAL CHANGES AND ANTI-TAKEOVER PROPOSALS

32. Amend Exclusive Forum Bylaw (SHP)

AGAINST

We will generally oppose proposals that ask the board to repeal the company's exclusive forum bylaw. Such bylaws require certain legal action against the company to take place in the state of the company's incorporation. The courts within the state of incorporation are considered best suited to interpret that state's laws.

33. Amend Net Operating Loss (NOL) Rights Plans

FOR

NOL Rights Plans are established to protect a company's net operating loss carry forwards and tax credits, which can be used to offset future income. We believe this is a reasonable strategy for a company to employ. Accordingly, we will vote in favor of NOL Rights Plans unless we believe the terms of the NOL Rights Plan may provide for a long-term anti- takeover device.

34. Authorize Share Repurchase

FOR

We generally support share repurchase proposals that are part of a well-articulated and well-conceived capital strategy. We assess proposals to give the board unlimited authorization to repurchase shares on a case-by-case basis. Furthermore, we would generally support the use of derivative instruments (e.g., put options and call options) as part of a share repurchase plan absent a compelling reason to the contrary. Also, absent a specific concern at the company, we will generally support a repurchase plan that could be continued during a takeover period.

35. Blank Check Preferred Stock

AGAINST

Blank check preferred stock proposals authorize the issuance of certain preferred stock at some future point in time and allow the board to establish voting, dividend, conversion and other rights at the time of issuance. While blank check preferred stock can provide a corporation with the flexibility needed to meet changing financial conditions, it also may be used as the vehicle for implementing a poison pill defense or some other entrenchment device.

We are concerned that, once this stock has been authorized, shareholders have no further power to determine how or when it will be allocated. Accordingly, we generally oppose this type of proposal.

36. Corporate Restructurings, Merger Proposals and Spin-Offs

CASE-BY-CASE

Proposals requesting shareholder approval of corporate restructurings, merger proposals and spin-offs are determined on a case-by-case basis. In evaluating these proposals and determining our votes, we are singularly focused on meeting our goal of maximizing long-term shareholder value.

37. Elimination of Preemptive Rights

CASE-BY-CASE

Preemptive rights allow the shareholders of the company to buy newly-issued shares before they are offered to the public in order to maintain their percentage ownership. We believe that, because preemptive rights are an important shareholder right, careful scrutiny must be given to management's attempts to eliminate them. However, because preemptive rights can be prohibitively expensive to widely-held companies, the benefit of such rights will be weighed against the economic effect of maintaining them.

38. Expensing Stock Options (SHP)

FOR

US generally-accepted accounting principles require companies to expense stock options, as do the accounting rules in many other jurisdictions (including those jurisdictions that have adopted IFRS international financial reporting standards). If a company is domiciled in a jurisdiction where the accounting rules do not already require the expensing of stock options, we will support shareholder proposals requiring this practice and disclosing information about it.

39. Fair Price Provisions

CASE-BY-CASE

A fair price provision in the company's charter or by laws is designed to ensure that each shareholder's securities will be purchased at the same price if the corporation is acquired under a plan not agreed to by the board. In most instances, the provision requires that any tender offer made by a third party must be made to all shareholders at the same price.

Fair pricing provisions attempt to prevent the two-tiered front-loaded offer where the acquirer of a company initially offers a premium for a sufficient percentage of shares of the company to gain control and subsequently makes an offer for the remaining shares at a much lower price. The remaining shareholders have no choice but to accept the offer. The two-tiered approach is coercive as it compels a shareholder to sell his or her shares immediately in order to receive the higher price per share. This type of tactic has caused many states to adopt fair price provision statutes to restrict this practice.

We consider fair price provisions on a case-by-case basis. We oppose any provision where there is evidence that management intends to use the provision as an anti-takeover device as well as any provision where the shareholder

vote requirement is greater than a majority of disinterested shares (i.e., shares beneficially owned by individuals other than the acquiring party).

40. Increase Authorized Common Stock

CASE-BY-CASE

In general we regard increases in authorized common stock as serving a legitimate corporate purpose when used to: implement a stock split, aid in a recapitalization or acquisition, raise needed capital for the firm, or provide for employee savings plans, stock option plans or executive compensation plans. That said, we may oppose a particular proposed increase if we consider the authorization likely to lower the share price (this would happen, for example, if the firm were proposing to use the proceeds to overpay for an acquisition, to invest in a project unlikely to earn the firm's cost of capital, or to compensate employees well above market rates). We oppose increases in authorized common stock where there is evidence that the shares are to be used to implement a poison pill or another form of anti-takeover device, or if the issuance of new shares would, in our judgment, excessively dilute the value of the outstanding shares upon issuance. In addition, a satisfactory explanation of a company's intentions going beyond the standard general corporate purposes must be disclosed in the proxy statement for proposals requesting an increase of greater than 100% of the shares outstanding. We view the use of derivatives, particularly warrants, as legitimate capital-raising instruments and apply these same principles to their use as we do to the authorization of common stock. Under certain circumstances where we believe it is important for shareholders to have an opportunity to maintain their proportional ownership, we may oppose proposals requesting shareholders approve the issuance of additional shares if those shares do not include preemptive rights.

In Hong Kong, it is common for companies to request board authority to issue new shares up to 20% of outstanding share capital. The authority typically lapses after one year. We may vote against plans that do not prohibit issuing shares at a discount, taking into account whether a company has a history of doing so.

41. Issuance of Equity Without Preemptive Rights

FOR

We are generally in favor of issuances of equity without preemptive rights of up to 30% of a company's outstanding shares unless there is concern that the issuance will be used in a manner that could hurt shareholder value (e.g., issuing the equity at a discount from the current market price or using the equity to help create a "poison pill" mechanism).

42. Issuance of Stock with Unequal Voting Rights

CASE-BY-CASE

Unequal voting rights plans are designed to reduce the voting power of existing shareholders and concentrate a significant amount of voting power in the hands of management. In the majority of instances, they serve as an effective deterrent to takeover attempts. These structures, however, may be beneficial, allowing management to focus on longer-term value creation, which benefits all shareholders. We evaluate these proposals on a case-by-case basis and take into consideration the alignment of management incentives with appropriate performance, metrics, and the effectiveness of the company's strategy.

43. Net Long Position Requirement

FOR

We support proposals that require the ownership level needed to call a special meeting to be based on the net long position of a shareholder or shareholder group. This standard ensures that a significant economic interest accompanies the voting power.

44. Reincorporation

CASE-BY-CASE

There are many valid business reasons a corporation may choose to reincorporate in another jurisdiction. We perform a case-by-case review of such proposals, taking into consideration management's stated reasons for the proposed move.

Careful scrutiny also will be given to proposals that seek approval to reincorporate in countries that serve as tax havens. When evaluating such proposals, we consider factors such as the location of the company's business, the statutory protections available in the country to enforce shareholder rights and the tax consequences of the reincorporation to shareholders.

45. Reincorporation to Another Jurisdiction to Permit Majority Voting or Other Changes in

Corporate Governance (SHP)

If a shareholder proposes that a company move to a jurisdiction where majority voting (among other shareholder-friendly conditions) is permitted, we will generally oppose the move notwithstanding the fact that we favor majority voting for directors. Our rationale is that the legal costs, taxes, other expenses and other factors, such as business disruption, in almost all cases would be material and outweigh the benefit of majority voting. If, however, we

should find that these costs are not material and/or do not outweigh the benefit of majority voting, we may vote in favor of this kind of proposal. We will evaluate similarly proposals that would require reincorporation in another state to accomplish other changes in corporate governance.

46. Stock Splits

FOR

Stock splits are intended to increase the liquidity of a company's common stock by lowering the price, thereby making the stock seem more attractive to small investors. We generally vote in favor of stock split proposals.

47. Submit Company's Shareholder Rights Plan to Shareholder Vote (SHP)

FOR

Most shareholder rights plans (also known as **poison pills**) permit the shareholders of a target company involved in a hostile takeover to acquire shares of the target company, the acquiring company, or both, at a substantial discount once a **triggering event** occurs. A triggering event is usually a hostile tender offer or the acquisition by an outside party of a certain percentage of the target company's stock. Because most plans exclude the hostile bidder from the purchase, the effect in most instances is to dilute the equity interest and the voting rights of the potential acquirer once the plan is triggered. A shareholder rights plan is designed to discourage potential acquirers from acquiring shares to make a bid for the issuer. We believe that measures that impede takeovers or entrench management not only infringe on the rights of shareholders but also may have a detrimental effect on the value of the company.

We support shareholder proposals that seek to require the company to submit a shareholder rights plan to a shareholder vote. We evaluate on a case-by-case basis proposals to implement or eliminate a shareholder rights plan.

48. Transferrable Stock Options**CASE-BY-CASE**

In cases where a compensation plan includes a transferable stock option program, we will consider the plan on a case-by-case basis.

These programs allow stock options to be transferred to third parties in exchange for cash or stock. In effect, management becomes insulated from the downside risk of holding a stock option, while the ordinary shareholder remains exposed to downside risk. This insulation may unacceptably remove management's exposure to downside risk, which significantly misaligns management and shareholder interests. Accordingly, we generally vote against these programs if the transfer can be executed without shareholder approval, is available to executive officers or non-employee directors, or we consider the available disclosure relating to the mechanics and structure of the program to be insufficient to determine the costs, benefits and key terms of the program.

3.4 AUDITOR PROPOSALS**49. Appointment of Auditors****FOR**

We believe that the company is in the best position to choose its accounting firm, and we generally support management's recommendation.

We recognize that there may be inherent conflicts when a company's independent auditors perform substantial non-audit related services for the company. Therefore, in reviewing a proposed auditor, we will consider the amount of fees paid for non-audit related services performed compared to the total audit fees paid by the company to the auditing firm, and whether there are any other reasons for us to question the independence or performance of the firm's auditor such as, for example, tenure. We generally will deem as excessive the non-audit fees paid by a company to its auditor if those fees account for 50% or more of total fees paid. In the UK market, which utilizes a different calculation, we adhere to a non-audit fee cap of 100% of audit fees. Under these circumstances, we generally vote against the auditor and the directors, in particular the members of the company's audit committee. In addition, we generally vote against authorizing the audit committee to set the remuneration of such auditors. We exclude from this analysis non-audit fees related to IPOs, bankruptcy emergence, and spin-offs and other extraordinary events. We may vote against or abstain due to a lack of disclosure of the name of the auditor while taking into account local market practice.

50. Approval of Financial Statements**FOR**

In some markets, companies are required to submit their financial statements for shareholder approval. This is generally a routine item and, as such, we will vote for the approval of financial statements unless there are appropriate reasons to vote otherwise. We may vote against if the information is not available in advance of the meeting.

51. Approval of Internal Statutory Auditors**FOR**

Some markets (e.g., Japan) require the annual election of internal statutory auditors. Internal statutory auditors have a number of duties, including supervising management, ensuring compliance with the articles of association and reporting to a company's board on certain financial issues. In most cases, the election of internal statutory auditors is a routine item and we will support management's nominee provided that the nominee meets the regulatory requirements for serving as internal statutory auditors. However, we may vote against nominees who are designated independent statutory auditors who serve as executives of a subsidiary or affiliate of the issuer or if there are other reasons to

question the independence of the nominees.

52. Limitation of Liability of External Statutory Auditors (Japan)

CASE-BY-CASE

In Japan, companies may limit the liability of external statutory auditors in the event of a shareholder lawsuit through any of three mechanisms: (i) submitting the proposed limits to shareholder vote; (ii) setting limits by modifying the company's articles of incorporation; and (iii) setting limits in contracts with outside directors, outside statutory auditors and external audit firms (requires a modification to the company's articles of incorporation). A vote by 3% or more of shareholders can nullify a limit set through the second mechanism. The third mechanism has historically been the most prevalent.

We review proposals to set limits on auditor liability on a case-by-case basis, considering whether such a provision is necessary to secure appointment and whether it helps to maximize long-term shareholder value.

53. Separating Auditors and Consultants (SHP)

CASE-BY-CASE

We believe that a company serves its shareholders' interests by avoiding potential conflicts of interest that might interfere with an auditor's independent judgment. SEC rules adopted as a result of the Sarbanes-Oxley Act of 2002 attempted to address these concerns by prohibiting certain services by a company's independent auditors and requiring additional disclosure of others services.

We evaluate on a case-by-case basis proposals that go beyond the SEC rules or other local market standards by prohibiting auditors from performing other non-audit services or calling for the board to adopt a policy to ensure auditor independence.

We take into consideration the policies and procedures the company already has in place to ensure auditor independence and non-audit fees as a percentage of total fees paid to the auditor are not excessive.

3.5 SHAREHOLDER ACCESS AND VOTING PROPOSALS

54. A Shareholder's Right to Call Special Meetings (SHP)

FOR

Most state corporation statutes (though not Delaware, where many US issuers are domiciled) allow shareholders to call a special meeting when they want to take action on certain matters that arise between regularly-scheduled annual meetings. This right may apply only if a shareholder, or a group of shareholders, owns a specified percentage, often 10% of the outstanding shares.

We recognize the importance of the right of shareholders to remove poorly-performing directors, respond to takeover offers and take other actions without having to wait for the next annual meeting. However, we also believe it is important to protect companies and shareholders from nuisance proposals. We further believe that striking a balance between these competing interests will maximize shareholder value. We believe that encouraging active share ownership among shareholders generally is beneficial to shareholders and helps maximize shareholder value. Accordingly, we will generally support a proposal to call a special meeting if the proposing shareholder owns, or the proposing shareholders as a group own, 5% or more of the outstanding voting equity of the company.

55. Adopt Cumulative Voting (SHP)

CASE-BY-CASE

Cumulative voting is a method of electing directors that enables each shareholder to multiply the number of his or her shares by the number of directors being considered. A shareholder may then cast the total votes for any one director or a selected group of directors. For example, a holder of 10 shares normally casts 10 votes for each of 12 nominees to the board thus giving the shareholder 120 (10 × 12) votes. Under cumulative voting, the shareholder may cast all 120 votes for a single nominee, 60 for two, 40 for three, or any other combination that the shareholder may choose.

We believe that encouraging activism among shareholders generally is beneficial to shareholders and helps maximize shareholder value. Cumulative voting supports the interests of minority shareholders in contested elections by enabling them to concentrate their votes and dramatically increase their chances of electing a dissident director to a board. Accordingly, we generally will support shareholder proposals to restore or provide for cumulative voting and we generally will oppose management proposals to eliminate cumulative voting. However, we may oppose cumulative voting if a company has in place both proxy access, which allows shareholders to nominate directors to the company's ballot, and majority voting (with a carve-out for plurality voting in situations where there are more nominees than seats), which requires each director to receive the affirmative vote of a majority of votes cast and, we believe, leads to greater director accountability to shareholders.

Also, we support cumulative voting at controlled companies regardless of any other shareholder protections that may be in place.

56. Adopt Cumulative Voting in Dual Shareholder Class Structures (SHP)

FOR

In dual class structures (such as A&B shares) where the shareholders with a majority economic interest have a minority voting interest, we generally vote in favor of cumulative voting for those shareholders.

57. Early Disclosure of Voting Results (SHP)

AGAINST

These proposals seek to require a company to disclose votes sooner than is required by the local market. In the US, the SEC requires disclosure in the first periodic report filed after the company's annual meeting which we believe is reasonable. We do not support requests that require disclosure earlier than the time required by the local regulator.

58. Limiting a Shareholder's Right to Call Special Meetings

AGAINST

Companies contend that limitations on shareholders' rights to call special meetings are needed to prevent minority

shareholders from taking control of the company's agenda. However, such limits also have anti-takeover implications because they prevent a shareholder or a group of shareholders who have acquired a significant stake in the company from forcing management to address urgent issues, such as the potential sale of the company. Because most states prohibit shareholders from abusing this right, we see no justifiable reason for management to eliminate this fundamental shareholder right. Accordingly, we generally will vote against such proposals.

In addition, if the board of directors, without shareholder consent, raises the ownership threshold a shareholder must reach before the shareholder can call a special meeting, we will vote against those directors.

59. Permit a Shareholder's Right to Act by Written Consent (SHP)

FOR

Action by written consent enables a large shareholder or group of shareholders to initiate votes on corporate matters prior to the annual meeting. We believe this is a fundamental shareholder right and, accordingly, will support shareholder proposals seeking to restore this right. However, in cases where a company has a majority shareholder or group of related majority shareholders with majority economic interest, we will oppose proposals seeking to restore this right as there is a potential risk of abuse by the majority shareholder or group of majority shareholders.

60. Proxy Access for Annual Meetings (SHP) (Management)

FOR

These proposals allow qualified shareholders to nominate directors. We generally vote in favor of management and shareholder proposals for proxy access that employ guidelines reflecting the SEC framework for proxy access (adopted by the SEC in 2010, but vacated by the DC Circuit Court of Appeals in 2011), which would have allowed a single shareholder, or group of shareholders, who hold at least 3% of the voting power for at least three years continuously to nominate up to 25% of the current board seats, or two directors, for inclusion in the subject company's annual proxy statement alongside management nominees.

We may vote against proposals that use requirements that are stricter than the SEC's framework including implementation restrictions and against individual board members, or entire boards, who exclude from their ballot properly submitted shareholder proxy access proposals or compete against shareholder proxy access proposals with stricter management proposals on the same ballot. We will generally vote in favor of proposals that seek to amend an existing right to more closely align with the SEC framework.

We will evaluate on a case-by-case basis proposals with less stringent requirements than the vacated SEC framework.

From time to time we may receive requests to join with other shareholders to support a shareholder action. We may, for example, receive requests to join a voting block for purposes of influencing management. If the third parties requesting our participation are not affiliated with us and have no business relationships with us, we will consider the request on a case-by-case basis. However, where the requesting party has a business relationship with us (e.g., the requesting party is a client or a significant service provider), agreeing to such a request may pose a potential conflict of interest. As a fiduciary we have an obligation to vote proxies in the best interest of our clients (without regard to our own interests in generating and maintaining business with our other clients) and given our desire to avoid even the appearance of a conflict, we will generally decline such a request.

61. Reduce Meeting Notification from 21 Days to 14 Days (UK)

FOR

Companies in the United Kingdom may, with shareholder approval, reduce the notice period for extraordinary general meetings from 21 days to 14 days. A reduced notice period expedites the process of obtaining shareholder approval of additional financing needs and other important matters. Accordingly, we support these proposals.

62. Shareholder Proponent Engagement Process (SHP)

FOR

We believe that proper corporate governance requires that proposals receiving support from a majority of shareholders be considered and implemented by the company. Accordingly, we support establishing an engagement process between shareholders and management to ensure proponents of majority-supported proposals, have an established means of communicating with management.

63. Supermajority Vote Requirements

AGAINST

A supermajority vote requirement is a charter or by-law requirement that, when implemented, raises the percentage (higher than the customary simple majority) of shareholder votes needed to approve certain proposals, such as mergers, changes of control, or proposals to amend or repeal a portion of the Articles of Incorporation.

In most instances, we oppose these proposals and support shareholder proposals that seek to reinstate the simple majority vote requirement. However we may support supermajority vote requirements at controlled companies as a protection to minority shareholders from unilateral action of the controlling shareholder.

3.6 ENVIRONMENTAL, SOCIAL AND DISCLOSURE PROPOSALS

64. Animal Welfare (SHP)

CASE-BY-CASE

These proposals may include reporting requests or policy adoption on items such as pig gestation crates and animal welfare in the supply chain.

For proposals requesting companies to adopt a policy, we will carefully consider existing policies and the company's incorporation of national standards and best practices. In addition, we will evaluate the potential enactment of new regulations, as well as any investment risk related to the specific issue.

We generally support shareholder proposals calling for reports and disclosure while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

65. Climate Change (SHP)

FOR

Proposals addressing climate change concerns are plentiful and their scope varies. Climate change increasingly receives investor attention as a potentially critical and material risk to the sustainability of a wide range of business-specific activities. These proposals may include emissions standards or reduction targets, quantitative goals, and impact assessments. We generally support these proposals, while taking into account the materiality of the issue and whether the proposed information is of added benefit to shareholders.

For proposals requesting companies to adopt a policy, we will carefully consider existing policies and the company's incorporation of national standards and best practices. In addition, we will evaluate the potential enactment of new regulations, as well as any investment risk related to the specific issue.

We generally support shareholder proposals calling for reports and disclosure while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

66. Charitable Contributions (SHP) (MGMT)

CASE-BY-CASE

Proposals relating to charitable contributions may be sponsored by either management or shareholders. Management proposals may ask to approve the amount for charitable contributions.

We generally support shareholder proposals calling for reports and disclosure while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

67. Environmental Proposals (SHP)

CASE-BY-CASE

These proposals can include reporting and policy adoption requests in a wide variety of areas, including, but not limited to, (nuclear) waste, deforestation, packaging and recycling, renewable energy, toxic material, palm oil and water.

For proposals requesting companies to adopt a policy, we will carefully consider existing policies and the company's incorporation of national standards and best practices. In addition, we will evaluate the potential enactment of new regulations, as well as any investment risk related to the specific issue.

We generally support shareholder proposals calling for reports while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

68. Genetically Altered or Engineered Food and Pesticides (SHP)

CASE-BY-CASE

These proposals may include reporting requests on pesticides monitoring/use and Genetically Modified Organism (GMO) as well as GMO labeling.

For proposals requesting companies to adopt a policy, we will carefully consider existing policies and the company's incorporation of national standards and best practices. In addition, we will evaluate the potential enactment of new regulations, as well as any investment risk related to the specific issue.

We generally support shareholder proposals calling for reports while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

69. Health Proposals (SHP)

CASE-BY-CASE

These proposals may include reports on pharmaceutical pricing, antibiotic use in the meat supply, and tobacco products. We generally support shareholder proposals calling for reports while taking into account the current reporting policies of the company and whether the proposed information is of added benefit to shareholders.

For proposals requesting companies to adopt a policy, we will carefully consider existing policies and the company's incorporation of national standards and best practices. In addition, we will evaluate the potential enactment of new regulations, as well as any investment risk related to the specific issue. We generally support shareholder proposals calling for reports and disclosure while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

70. Human Rights Policies and Reports (SHP)

CASE-BY-CASE

These proposals may include reporting requests on human rights risk assessment, humanitarian engagement and mediation policies, working conditions, adopting policies on supply chain worker fees and expanding existing policies in these areas. We recognize that many companies have complex supply chains which have led to increased awareness of supply chain issues as an investment risk.

For proposals requesting companies to adopt a policy, we will carefully consider existing policies and the company's incorporation of national standards and best practices. In addition, we will evaluate the potential enactment of new regulations, as well as any investment risk related to the specific issue.

We generally support shareholder proposals calling for reports and disclosure while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

71. Include Sustainability as a Performance Measure (SHP)

CASE-BY-CASE

We believe management and directors should be given latitude in determining appropriate performance measurements. While doing so, consideration should be given to how long-term sustainability issues might affect future company performance. Therefore, we will evaluate on a case-by-case basis proposals requesting companies to consider incorporating specific, measurable, practical goals consisting of sustainability principles and environmental impacts as metrics for incentive compensation and how they are linked with our objectives as long-term shareholders.

72. Lobbying and Political Spending (SHP)

FOR

We generally vote in favor of proposals requesting increased disclosure of political contributions and lobbying expenses, including those paid to trade organizations and political action committees, whether at the federal, state, or local level.

These proposals may increase transparency.

73. Other Business

AGAINST

In certain jurisdictions, these proposals allow management to act on issues that shareholders may raise at the annual meeting. Because it is impossible to know what issues may be raised, we will vote against these proposals.

74. Reimbursement of Shareholder Expenses (SHP)

AGAINST

These shareholder proposals would require companies to reimburse the expenses of shareholders who submit proposals that receive a majority of votes cast or the cost of proxy contest expenses. We generally vote against these proposals, unless reimbursement occurs only in cases where management fails to implement a majority passed shareholder proposal, in which case we may vote in favor.

75. Sustainability Report (SHP)

FOR

We generally support shareholder proposals calling for reports and disclosure while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

76. Work Place: Diversity (SHP)

FOR

We generally support shareholder proposals calling for reports and disclosure surrounding workplace diversity while taking into account existing policies and procedures of the company and whether the proposed information is of added benefit to shareholders.

We generally support proposals requiring a company to amend its Equal Employment Opportunity policies to prohibit workplace discrimination based on sexual orientation and gender ID.

77. Work Place: Pay Disparity (SHP)

CASE-BY-CASE

A report on pay disparity compares the total compensation of a company's executive officers with that of the company's lowest paid workers and/or between genders, including statistics and rationale pertaining to changes in the size of the gap, recommended actions, information on whether executive compensation is excessive, and information on whether greater oversight is needed over certain aspects of the company's compensation policies.

The SEC requires US issuers with fiscal years ending on or after January 1, 2017, to contrast CEO pay with median employee pay. This requirement, however, does not address all of the issues addressed by pay disparity reports.

Accordingly, we will continue to evaluate these proposals on a case-by-case basis, taking into account the specific metrics and scope of the information requested and whether the SEC's requirement renders the proposal unnecessary.

4. CONFLICTS OF INTEREST

4.1 INTRODUCTION

As a fiduciary, we always must act in our clients' best interests. We strive to avoid even the appearance of a conflict that may compromise the trust our clients have placed in us, and we insist on strict adherence to fiduciary standards and compliance with all applicable federal and state securities laws. We have adopted a comprehensive Code of Business Conduct and Ethics (**Code**) to help us meet these obligations. As part of this responsibility and as expressed throughout the Code, we place the interests of our clients first and attempt to avoid any perceived or actual conflicts of interest.

AllianceBernstein L.P. (**AB**) recognizes that there may be a potential material conflict of interest when we vote a proxy solicited by an issuer that sponsors a retirement plan we manage (or administer), that distributes AB-sponsored mutual funds, or with which AB or one or more of our employees have another business or personal relationship that may affect how we vote on the issuer's proxy. Similarly, we may have a potential material conflict of interest when deciding how to vote on a proposal sponsored or supported by a shareholder group that is a client. In order to avoid any perceived or actual conflict of interest, the procedures set forth below in sections 4.2 through 4.8 have been established for use when we encounter a potential conflict to ensure that our voting decisions are based on our clients' best interests and are not the product of a conflict.

4.2 ADHERENCE TO STATED PROXY VOTING POLICIES

Votes generally are cast in accordance with this policy³. In situations where our policy is case-by-case, this Manual often provides criteria that will guide our decision. In situations where our policy on a particular issue is case-by-case and the

vote cannot be clearly decided by an application of our stated policy, a member of the Committee or his/her designee will make the voting decision in accordance with the basic principle of our policy to vote proxies with the intention of maximizing the value of the securities in our client accounts. In these situations, the voting rationale must be documented either on the voting platform of ISS, by retaining relevant emails or another appropriate method. Where appropriate, the views of investment professionals are considered. All votes cast contrary to our stated voting policy on specific issues must be documented. On an annual basis, the Committee will receive a report of all such votes so as to confirm adherence of the policy.

4.3 DISCLOSURE OF CONFLICTS

When considering a proxy proposal, members of the Committee or investment professionals involved in the decision-making process must disclose to the Committee any potential conflict (including personal relationships) of which they are aware and any substantive contact that they have had with any interested outside party (including the issuer or shareholder group sponsoring a proposal) regarding the proposal. Any previously unknown conflict will be recorded on the Potential Conflicts List (discussed below). If a member of the Committee has a conflict of interest, he or she must also remove himself or herself from the decision-making process.

4.4 POTENTIAL CONFLICTS LIST

No less frequently than annually, a list of companies and organizations whose proxies may pose potential conflicts of interest is compiled by the Legal and Compliance Department (the **Potential Conflicts List**). The Potential Conflicts List includes:

- + Publicly-traded Clients from the Russell 3000 Index, the Morgan Stanley Capital International (**MSCI**) Europe Australia Far East Index (MSCI EAFE), the MSCI Canada Index and the MSCI Emerging Markets Index;
- + Publicly-traded companies that distribute AB mutual funds;
- + Bernstein private clients who are directors, officers or 10% shareholders of publicly traded companies;
- + Clients who sponsor, publicly support or have material interest in a proposal upon which we will be eligible to vote;
- + Publicly-traded affiliated companies;
- + Companies where an employee of AB or AXA Financial, Inc., a parent company of AB, has identified an interest;

+ Any other conflict of which a Committee member becomes aware⁴.

We determine our votes for all meetings of companies on the Potential Conflicts List by applying the tests described in Section 4.5 below. We document all instances when the independent compliance officer determines our vote.

4.5 DETERMINE EXISTENCE OF CONFLICT OF INTEREST

When we encounter a potential conflict of interest, we review our proposed vote using the following analysis to ensure our voting decision does not generate a conflict of interest:

+ If our proposed vote is consistent with our Proxy Voting Policy, no further review is necessary.

+ If our proposed vote is contrary to our Proxy Voting Policy and our client's position on the proposal, no further review is necessary.

+ If our proposed vote is contrary to our Proxy Voting Policy or is not covered herein, is consistent with our client's position, and is also consistent with the views of ISS, no further review is necessary.

+ If our proposed vote is contrary to our Proxy Voting Policy or is not covered herein, is consistent with our client's position and is contrary to the views of ISS, the vote will be presented to an independent compliance officer (**ICO**). The ICO will determine whether the proposed vote is reasonable. If the ICO cannot determine that the proposed vote is reasonable, the ICO may instruct AB to refer the votes back to the client(s) or take other actions as the ICO deems appropriate. The ICO's review will be documented using a Proxy Voting Conflict of Interest Form (a copy of which is attached hereto).

4.6 REVIEW OF THIRD PARTY RESEARCH SERVICE CONFLICTS OF INTEREST

We consider the research of ISS, so the Committee takes reasonable steps to verify that ISS is, in fact, independent based on all of the relevant facts and circumstances. This includes reviewing ISS's conflict management procedures on an annual basis. When reviewing these conflict management procedures, we will consider, among other things, whether ISS (i) has the capacity and competency to adequately analyze proxy issues; and (ii) can offer research in an impartial manner and in the best interests of our clients.

4.7 CONFIDENTIAL VOTING

It is AB's policy to support confidentiality before the actual vote has been cast. Employees are prohibited from revealing how we intend to vote except to (i) members of the Committee; (ii) Portfolio Managers who hold the security in their managed accounts; (iii) the Research Analyst(s) who cover(s) the security; (iv) clients, upon request, for the securities held in their portfolios; and (v) clients who do not hold the security or for whom AB does not have proxy voting authority, but who provide AB with a signed a Non-Disclosure Agreement. Once the votes have been cast, they are made public in accordance with mutual fund proxy vote disclosures required by the SEC, and we generally post all votes to our public website the quarter after the vote has been cast.

We may participate in proxy surveys conducted by shareholder groups or consultants so long as such participation does not compromise our confidential voting policy. Specifically, prior to our required SEC disclosures each year, we may respond to surveys asking about our proxy voting policies, but not any specific votes. After our mutual fund proxy vote disclosures required by the SEC each year have been made public and/or votes have been posted to our

public website, we may respond to surveys that cover specific votes in addition to our voting policies.

On occasion, clients for whom we do not have proxy voting authority may ask us for advice on proxy votes that they cast. A member of the Committee or a Proxy Manager may offer such advice subject to an understanding with the client that the advice shall remain confidential.

Any substantive contact regarding proxy issues from the issuer, the issuer's agent or a shareholder group sponsoring a proposal must be reported to the Committee if such contact was material to a decision to vote contrary to this Policy. Routine administrative inquiries from proxy solicitors need not be reported.

- ³ From time to time a client may request that we vote their proxies consistent with AFL-CIO guidelines or the policy of the National Association of Pension Funds. In those situations, AB reserves the right to depart from those policies if we believe it to be in the client's best interests.
- ⁴ The Committee must notify the Legal and Compliance Department promptly of any previously unknown conflict.

4.8 A NOTE REGARDING AB'S STRUCTURE

AB and AllianceBernstein Holding L.P. (**AB Holding**) are Delaware limited partnerships. As limited partnerships, neither company is required to produce an annual proxy statement or hold an annual shareholder meeting. In addition, the general partner of AB and AB Holding, AllianceBernstein Corporation is a wholly-owned subsidiary of AXA, a French holding company for an international group of insurance and related financial services companies.

As a result, most of the positions we express in this Proxy Voting Policy are inapplicable to our business. For example, although units in AB Holding are publicly traded on the New York Stock Exchange (**NYSE**), the NYSE Listed Company Manual exempts limited partnerships and controlled companies from compliance with various listing requirements, including the requirement that our board have a majority of independent directors.

5. VOTING TRANSPARENCY

We publish our voting records on our website quarterly, 30 days after the end of the previous quarter. Many clients have requested that we provide them with periodic reports on how we voted their proxies. Clients may obtain information about how we voted proxies on their behalf by contacting their Advisor. Alternatively, clients may make a written request to the Chief Compliance Officer.

6. RECORDKEEPING

All of the records referenced below will be kept in an easily accessible place for at least the length of time required by local regulation and custom, and, if such local regulation requires that records are kept for less than five years from the end of the fiscal year during which the last entry was made on such record, we will follow the US rule of five years. We maintain the vast majority of these records electronically. We will keep paper records, if any, in one of our offices for at least two years.

6.1 PROXY VOTING AND GOVERNANCE POLICY

The Proxy Voting and Governance Policy shall be maintained in the Legal and Compliance Department and posted on our company intranet and the AB website (<https://www.abglobal.com>).

6.2 PROXY STATEMENTS RECEIVED REGARDING CLIENT SECURITIES

For US Securities⁵, AB relies on the SEC to maintain copies of each proxy statement we receive regarding client securities. For Non-US Securities, we rely on ISS, our proxy voting agent, to retain such proxy statements.

6.3 RECORDS OF VOTES CAST ON BEHALF OF CLIENTS

Records of votes cast by AB are retained electronically by our proxy voting agent, ISS.

6.4 RECORDS OF CLIENTS REQUESTS FOR PROXY VOTING INFORMATION

Copies of written requests from clients for information on how AB voted their proxies shall be maintained by the Legal and Compliance Department. Responses to written and oral requests for information on how we voted clients

proxies will be kept in the Client Group.

6.5 DOCUMENTS PREPARED BY AB THAT ARE MATERIAL TO VOTING DECISIONS

The Committee is responsible for maintaining documents prepared by the Committee or any AB employee that were material to a voting decision. Therefore, where an investment professional's opinion is essential to the voting decision, the recommendation from investment professionals must be made in writing to the Proxy Manager.

7. PROXY VOTING PROCEDURES

7.1 VOTE ADMINISTRATION

In an effort to increase the efficiency of voting proxies, AB uses ISS to act as its voting agent for our clients' holdings globally.

Issuers initially send proxy information to the custodians of our client accounts. We instruct these custodian banks to direct proxy related materials to ISS's offices. ISS provides us with research related to each resolution. A Proxy Manager reviews the ballots via ISS's web platform, ProxyExchange. Using ProxyExchange, the Proxy Manager submits our voting decision. ISS then returns the proxy ballot forms to the designated returnee for tabulation. Clients may request that, when voting their proxies, we utilize an ISS recommendation or ISS's Taft-Hartley Voting Policy.

If necessary, any paper ballots we receive will be voted online using ProxyVote or via mail or fax.

⁵ US securities are defined as securities of issuers required to make reports pursuant to §12 of the Securities Exchange Act of 1934, as amended. Non-US securities are defined as all other securities.

7.2 SHARE BLOCKING

Proxy voting in certain countries requires share blocking. Shareholders wishing to vote their proxies must deposit their shares shortly before the date of the meeting (usually one week) with a designated depository. During this blocking period, shares that will be voted at the meeting cannot be sold until the meeting has taken place and the shares are returned to the clients' custodian banks. We may determine that the value of exercising the vote is outweighed by the detriment of not being able to sell the shares during this period. In cases where we want to retain the ability to trade shares, we may abstain from voting those shares.

We seek to vote all proxies for securities held in client accounts for which we have proxy voting authority. However, in some markets administrative issues beyond our control may sometimes prevent us from voting such proxies. For example, we may receive meeting notices after the cut-off date for voting or without enough time to fully consider the proxy. Similarly, proxy materials for some issuers may not contain disclosure sufficient to arrive at a voting decision, in which cases we may abstain from voting. Some markets outside the US require periodic renewals of powers of attorney that local agents must have from our clients prior to implementing our voting instructions.

7.3 LOANED SECURITIES

Many of our clients have entered into securities lending arrangements with agent lenders to generate additional revenue. We will not be able to vote securities that are on loan under these types of arrangements. However, under rare circumstances, for voting issues that may have a significant impact on the investment, we may request that clients or custodians recall securities that are on loan if we determine that the benefit of voting outweighs the costs and lost revenue to the client or fund and the administrative burden of retrieving the securities.

EXHIBIT

PROXY VOTING AND GOVERNANCE COMMITTEE MEMBERS

The members of the Committee establish general proxy policies for AB and consider specific proxy voting matters as necessary. Members include senior investment personnel and representatives of the Legal and Compliance Department and the Operations Department. The Proxy Committee is chaired by Linda Giuliano, Senior Vice President, Chief Administrative Officer-Equities, and Head of Responsible Investment. If you have questions or desire additional information about this Policy, please contact the Proxy Team at: ProxyTeam@ABGlobal.com.

Please return this completed form and all supporting documentation to the Conflicts Officer in the Legal and Compliance Department and keep a copy for your records.

STATEMENT OF POLICY REGARDING RESPONSIBLE INVESTMENT**PRINCIPLES FOR RESPONSIBLE INVESTMENT, ESG AND SOCIALLY RESPONSIBLE INVESTMENT****1. Introduction**

AllianceBernstein L.P. (**AB** or **we**) is appointed by our clients as an investment manager with a fiduciary responsibility to help them achieve their investment objectives over the long term. Generally, our clients' objective is to maximize the financial return of their portfolios within appropriate risk parameters. AB has long recognized that environmental, social and governance (**ESG**) issues can impact the performance of investment portfolios. Accordingly, we have sought to integrate ESG factors into our investment process to the extent that the integration of such factors is consistent with our fiduciary duty to help our clients achieve their investment objectives and protect their economic interests.

Our policy draws a distinction between how the Principles for Responsible Investment (**PRI** or **Principles**), and Socially Responsible Investing (**SRI**) incorporate ESG factors. PRI is based on the premise that, because ESG issues can affect investment performance, appropriate consideration of ESG issues and engagement regarding them is firmly within the bounds of a mainstream investment manager's fiduciary duties to its clients. Furthermore, PRI is intended to be applied only in ways that are consistent with those mainstream fiduciary duties.

SRI, which refers to a spectrum of investment strategies that seek to integrate ethical, moral, sustainability and other non-financial factors into the investment process, generally involves exclusion and/or divestment, as well as investment guidelines that restrict investments. AB may accept such guideline restrictions upon client request.

2. Approach to ESG

Our long-standing policy has been to include ESG factors in our extensive fundamental research and consider them carefully when we believe they are material to our forecasts and investment decisions. If we determine that these aspects of an issuer's past, current or anticipated behavior are material to its future expected returns, we address these concerns in our forecasts, research reviews, investment decisions and engagement. In addition, we have well-developed proxy voting policies that incorporate ESG issues and engagement.

3. Commitment to the PRI

In recent years, we have gained greater clarity on how the PRI initiative, based on information from PRI Advisory Council members and from other signatories, provides a framework for incorporating ESG factors into investment research and decision-making. Furthermore, our industry has become, over time, more aware of the importance of ESG factors. We acknowledge these developments and seek to refine what has been our process in this area.

After careful consideration, we determined that becoming a PRI signatory would enhance our current ESG practices and align with our fiduciary duties to our clients as a mainstream investment manager. Accordingly, we became a signatory, effective November 1, 2011.

In signing the PRI, AB as an investment manager publicly commits to adopt and implement all six Principles, where consistent with our fiduciary responsibilities, and to make progress over time on implementation of the Principles.

The six Principles are:

1. We will incorporate ESG issues into investment research and decision-making processes.

AB Examples: ESG issues are included in the research analysis process. In some cases, external service providers of ESG-related tools are utilized; we have conducted proxy voting training and will have continued and expanded training for investment professionals to incorporate ESG issues into investment analysis and decision-making processes across our firm.

2. We will be active owners and incorporate ESG issues into our ownership policies and practices.

AB Examples: We are active owners through our proxy voting process (for additional information, please refer to our *Statement of Policies and Procedures for Proxy Voting Manual*); we engage issuers on ESG matters in our investment research process (we define engagement as discussions with management about ESG issues when they are, or we believe they are reasonably likely to become, material).

3. We will seek appropriate disclosure on ESG issues by the entities in which we invest.

AB Examples: Generally, we support transparency regarding ESG issues when we conclude the disclosure is reasonable. Similarly, in proxy voting, we will support shareholder initiatives and resolutions promoting ESG disclosure when we conclude the disclosure is reasonable.

4. We will promote acceptance and implementation of the Principles within the investment industry.

AB Examples: By signing the PRI, we have taken an important first step in promoting acceptance and implementation of the six Principles within our industry.

5. We will work together to enhance our effectiveness in implementing the Principles.

AB Examples: We will engage with clients and participate in forums with other PRI signatories to better understand how the PRI are applied in our respective businesses. As a PRI signatory, we have access to information, tools and other signatories to help ensure that we are effective in our endeavors to implement the PRI.

6. We will report on our activities and progress towards implementing the Principles.

AB Examples: We will respond to the 2012 PRI questionnaire and disclose PRI scores from the questionnaire in response to inquiries from clients and in requests for proposals; we will provide examples as requested concerning active ownership activities (voting, engagement or policy dialogue).

4. RI Committee

Our firm's RI Committee provides AB stakeholders, including employees, clients, prospects, consultants and service providers alike, with a resource within our firm on which they can rely for information regarding our approach to ESG issues and how those issues are incorporated in different ways by the PRI and SRI. Additionally, the RI Committee is responsible for assisting AB personnel to further implement our firm's RI policies and practices, and, over time, to make progress on implementing all six Principles.

The RI Committee has a diverse membership, including senior representatives from investments, distribution/sales and legal. The Committee is chaired by Linda Giuliano, Senior Vice President and Chief Administrative Officer-Equities.

If you have questions or desire additional information about this Policy, we encourage you to contact the RI Committee at **RIinquiries@alliancebernstein.com**.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

(a) (1) The management of, and investment decisions for, the Fund's portfolio are made by the Global Fixed Income: Emerging Markets Investment Team.

The following table lists the five members of the team with the most significant responsibility for the day-to-day management of the Fund's portfolio, the length of time that each person has been involved in the management of the Fund, and each person's principal occupation during the past five years:

Employee; Year; Title	Principal Occupation During the Past Five (5) Years
Paul DeNoon; since August 2002; Senior Vice President of AllianceBernstein L.P. (AB) and Director of Emerging Market Debt	Senior Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since prior to 2006, and Director of Emerging Market Debt.
Douglas J. Peebles; since August 2002; Senior Vice President of AB, Chief Investment Officer and Co-Head of Fixed Income	Senior Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since prior to 2006, and Chief Investment Officer and Co-Head of Fixed Income.
Matthew S. Sheridan; since October 2005; Vice President of AB	Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since prior to 2006,

(a) (2) The following tables provide information regarding registered investment companies other than the Fund, other pooled investment vehicles and other accounts over which the Fund's portfolio managers also have day-to-day management responsibilities. The tables provide the numbers of such accounts, the total assets in such accounts and the number of accounts and total assets whose fees are based on performance. The information is provided as of the Fund's fiscal year ended March 31, 2018.

REGISTERED INVESTMENT COMPANIES

(excluding the Fund)

Portfolio	Total Number of Registered Investment Companies Managed	Total Assets of Registered Investment Companies Managed	Number of Registered Investment Companies Managed with Performance-based Fees	Total Assets of Registered Investment Companies Managed with Performance-based Fees
Manager				
Paul DeNoon	17	\$ 10,484,000,000	None	None
Douglas J. Peebles	31	\$ 16,041,000,000	None	None
Matthew S. Sheridan	37	\$ 19,311,000,000	None	None

POOLED INVESTMENT VEHICLES

Portfolio	Total Number of Pooled Investment Vehicles Managed	Total Assets of Pooled Investment Vehicles Managed	Number of Pooled Investment Vehicles Managed with Performance-based Fees	Total Assets of Pooled Investment Vehicles Managed with Performance-based Fees
Manager				
Paul DeNoon	60	\$ 41,746,000,000	None	None
Douglas J. Peebles	72	\$ 7,580,000,000	None	None
Matthew S. Sheridan	87	\$ 39,262,000,000	None	None

OTHER ACCOUNTS

Portfolio Manager	Total Number of Other Accounts Managed	Total Assets of Other Accounts Managed	Number of Other Accounts Managed with Performance- based Fees	Total Assets of Other Accounts with Performance- based Fees
Paul DeNoon	17	\$ 8,828,000,000	2	\$ 538,000,000
Douglas J. Peebles	74	\$ 26,514,000,000	2	\$ 1,752,000,000
Matthew S. Sheridan	40	\$ 20,725,000,000	2	\$ 1,752,000,000

Investment Professional Conflict of Interest Disclosure

As an investment adviser and fiduciary, the Adviser owes its clients and shareholders an undivided duty of loyalty. The Adviser recognizes that conflicts of interest are inherent in its business and accordingly has developed policies and procedures (including oversight monitoring) reasonably designed to detect, manage and mitigate the effects of actual or potential conflicts of interest in the area of employee personal trading, managing multiple accounts for multiple clients, including AB Mutual Funds, and allocating investment opportunities. Investment professionals, including portfolio managers and research analysts, are subject to the above-mentioned policies and oversight monitoring to ensure that all clients are treated equitably. The Adviser places the interests of its clients first and expects all of its employees to meet their fiduciary duties.

Employee Personal Trading

The Adviser has adopted a Code of Business Conduct and Ethics that is designed to detect and prevent conflicts of interest when investment professionals and other personnel of the Adviser own, buy or sell securities which may be owned by, or bought or sold for, clients. Personal securities transactions by an employee may raise a potential conflict of interest when an employee owns or trades in a security that is owned or considered for purchase or sale by a client, or recommended for purchase or sale by an employee to a client. Subject to the reporting requirements and other limitations of its Code of Business Conduct and Ethics, the Adviser permits its employees to engage in personal securities transactions, and also allows them to acquire investments in certain funds managed by the Adviser. The Adviser's Code of Business Conduct and Ethics requires disclosure of all personal accounts and maintenance of brokerage accounts with designated broker-dealers approved by the Adviser. The Code of Business Conduct and Ethics also requires preclearance of all securities transactions (except transactions in U.S. Treasuries and open-end mutual funds) and imposes a 60-day holding period for securities purchased by employees to discourage short-term trading.

Managing Multiple Accounts for Multiple Clients

The Adviser has compliance policies and oversight monitoring in place to address conflicts of interest relating to the management of multiple accounts for multiple clients. Conflicts of interest may arise when an investment professional has responsibilities for the investments of more than one account because the investment professional may be unable to devote equal time and attention to each account. The investment professional or investment professional teams for each client may have responsibilities for managing all or a portion of the investments of multiple accounts with a common investment strategy, including other registered investment companies, unregistered investment vehicles, such as hedge funds, pension plans, separate accounts, collective trusts and charitable foundations. Among other things, the Adviser's policies and procedures provide for the prompt dissemination to investment professionals of initial or changed investment recommendations by analysts so that investment professionals are better able to develop investment strategies for all accounts they manage. In addition, investment decisions by investment professionals are reviewed for the purpose of maintaining uniformity among similar accounts and ensuring that accounts are treated equitably. Investment professional compensation reflects a broad contribution in multiple dimensions to long-term investment success for clients of the Adviser and is generally not tied specifically to the performance of any particular client's account, nor is it generally tied directly to the level or change in level of assets under management.

Allocating Investment Opportunities

The investment professionals at the Adviser routinely are required to select and allocate investment opportunities among accounts. The Adviser has adopted policies and procedures intended to address conflicts of interest relating to the allocation of investment opportunities. These policies and procedures are designed to ensure that information relevant to investment decisions is disseminated promptly within its portfolio management teams and investment opportunities are allocated equitably among different clients.

The policies and procedures require, among other things, objective allocation for limited investment opportunities (e.g., on a rotational basis), and documentation and review of justifications for any decisions to make investments only for select accounts or in a manner disproportionate to the size of the account. Portfolio holdings, position sizes, and industry and sector exposures tend to be similar across similar accounts, which minimizes the potential for conflicts of interest relating to the allocation of investment opportunities. Nevertheless, access to portfolio funds or other investment opportunities may be allocated differently among accounts due to the particular characteristics of an account, such as size of the account, cash position, tax status, risk tolerance and investment restrictions or for other reasons.

The Adviser's procedures are also designed to address potential conflicts of interest that may arise when the Adviser has a particular financial incentive, such as a performance-

based management fee, relating to an account. An investment professional may perceive that he or she has an incentive to devote more time to developing and analyzing investment strategies and opportunities or allocating securities preferentially to accounts for which the Adviser could share in investment gains.

Portfolio Manager Compensation

The Adviser's compensation program for portfolio managers is designed to align with clients' interests, emphasizing each portfolio manager's ability to generate long-term investment success for the Adviser's clients, including the Funds. The Adviser also strives to ensure that compensation is competitive and effective in attracting and retaining the highest caliber employees.

Portfolio managers receive a base salary, incentive compensation and contributions to AllianceBernstein's 401(k) plan. Part of the annual incentive compensation is generally paid in the form of a cash bonus, and part through an award under the firm's Incentive Compensation Award Plan (ICAP). The ICAP awards vest over a four-year period. Deferred awards are paid in the form of restricted grants of the firm's Master Limited Partnership Units, and award recipients have the ability to receive a portion of their awards in deferred cash. The amount of contributions to the 401(k) plan is determined at the sole discretion of the Adviser. On an annual basis, the Adviser endeavors to combine all of the foregoing elements into a total compensation package that considers industry compensation trends and is designed to retain its best talent.

The incentive portion of total compensation is determined by quantitative and qualitative factors. Quantitative factors, which are weighted more heavily, are driven by investment performance. Qualitative factors are driven by contributions to the investment process and client success.

The quantitative component includes measures of absolute, relative and risk-adjusted investment performance. Relative and risk-adjusted returns are determined based on the benchmark in the Fund's prospectus and versus peers over one-, three- and five-year calendar periods, with more weight given to longer-time periods. Peer groups are chosen by Chief Investment Officers, who consult with the product management team to identify products most similar to our investment style and most relevant within the asset class. Portfolio managers of the Funds do not receive any direct compensation based upon the investment returns of any individual client account, and compensation is not tied directly to the level or change in level of assets under management.

Among the qualitative components considered, the most important include thought leadership, collaboration with other investment colleagues, contributions to risk-adjusted returns of other portfolios in the firm, efforts in mentoring and building a strong talent pool and being a good corporate citizen. Other factors can play a role in determining portfolio managers' compensation, such as the complexity of investment strategies managed, volume of assets managed and experience.

The Adviser emphasizes four behavioral competencies – relentlessness, ingenuity, team orientation and accountability – that support its mission to be the most trusted advisor to its clients. Assessments of investment professionals are formalized in a year-end review process that includes 360-degree feedback from other professionals from across the investment teams and the Adviser.

Asset-Based and Performance-Based Compensation: With respect to the Select US Equity and Select US Long/Short, Mr. Feuerman and members of the investment team he leads (the Investment Team) were hired by the Adviser in 2011. At that time, the Adviser entered into an employment agreement with Mr. Feuerman under which a compensation pool for Mr. Feuerman and members of the Investment Team is created based on specified percentages of the fees (both asset-based and performance-based fees) received by the Adviser from the accounts managed by the Investment Team. Performance fees are not assessed on the Fund or the assets of the Fund. In general, a larger percentage of the fees received by the Adviser is allocated to the compensation pool with respect to assets that were managed by Mr. Feuerman at his prior employer and that followed Mr. Feuerman to the Adviser than with respect to assets, such as the Fund, that were obtained or created after Mr. Feuerman joined the Adviser. The compensation pool is allocated among the members of the Investment Team based on the recommendations of Mr. Feuerman subject to approval by the Adviser's Compensation Committee. This compensation represents a portion of the overall compensation received by members of the Investment Team.

(a) (4) The dollar range of the Fund's equity securities owned directly or beneficially by the Fund's portfolio managers as of the Fund's fiscal year ended March 31, 2018 is set forth below:

	DOLLAR RANGE OF EQUITY SECURITIES IN THE FUND
Paul DeNoon	\$740,000 - \$783,455
Douglas J. Peebles	\$500,000 - \$475,600
Matthew S. Sheridan	None

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

There have been no purchases of equity securities by the Fund or by affiliated parties for the reporting period.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Fund's Board of Directors since the Fund last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-2(c) under the Investment Company Act of 1940, as amended) are effective at the reasonable assurance level based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.

(b) There were no changes in the registrant's internal controls over financial reporting that occurred during the second fiscal quarter of the period that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
