Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2014.

This Form SD of Compass Group Diversified Holdings LLC and Compass Diversified Holdings (NYSE: CODI) (collectively, "CODI" or the "Company") is filed pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended, for the reporting period from January 1, 2014 through December 31, 2014.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

Reasonable Country of Origin Inquiry

The Company conducted an analysis of its subsidiaries' products and found that small quantities of conflict minerals (cassiterite, columbite-tantalite, gold, wolframite or their derivatives, which are limited to tin, tantalum, and tungsten) are contained in some of its subsidiaries' products (the "Covered Products"). Therefore, for the reporting period from January 1, 2014 to December 31, 2014, the Company conducted a good faith reasonable country of origin inquiry ("RCOI") which was reasonably designed to determine whether any of the necessary conflict minerals contained in its subsidiaries' products originated in a Covered Country or came from recycled or scrap sources. "Necessary conflict minerals" are conflict minerals that are necessary to the functionality or production of products that the Company's subsidiaries manufacture or that the Company's subsidiaries contract with others to manufacture for us. A "Covered Country" is the Democratic Republic of the Congo or an adjoining country.

To conduct our RCOI, the Company engaged with its subsidiaries' suppliers of necessary conflict minerals and made inquiries to those suppliers about the source of those necessary conflict minerals and about the smelters or refiners used to process those conflict minerals. In the Company's supplier engagement, it used Conflict Minerals Reporting Template ("CMRT") developed by the Conflict-Free Sourcing Initiative to request information from its subsidiaries' suppliers about their supply chain and to gather information about the country of origin of our necessary conflict minerals. The Company and its subsidiaries do not have direct relationships with smelters or refiners in their supply chains, therefore it asked its subsidiaries' suppliers to engage with their own respective suppliers to gather the requested information.

Conclusions

The Company has determined in good faith that during 2014 that certain of the Company's subsidiaries have manufactured and/or contracted to manufacture products as to which conflict minerals are necessary to the functionality or production of their products. However, due to a lack of information from its suppliers for each of the products that contain conflict minerals which are necessary to the functionality of production of its products, the Company does not have sufficient information to conclusively determine the countries of origin of the Conflict Minerals contained in the Covered Products or whether the Conflict Minerals in the Covered Products are from recycled or scrap sources.

Based on our RCOI, we do not have sufficient information to determine whether our products manufactured or contracted for manufacture during the reporting period contain necessary conflict minerals that originated, or may have originated, in the Covered Countries. Accordingly, and out of an abundance of caution, we performed due diligence in an effort to determine the source and chain of custody of these necessary conflict minerals.
