June 30, 2016 (Unaudited)

To Our Shareholders:

The first half of 2016 was the one of the best six-month stretches for below investment grade products in years, but the stellar returns belie the dramatic swing that began in February. During the first six weeks of the year, credit markets continued the freefall that began during the second half of 2015. The high yield market's option-adjusted spread ("OAS") widened to 839bp and the senior loan market's average price fell below \$90 by the middle of February. Both represented some of the cheapest valuations since 2011 as investors digested the December Fed rate hike and began to question the strength of the U.S. economy. Ultimately, the market reversed when the Fed abruptly turned dovish and reduced the number of rate hikes it expected to execute in 2016 and beyond. In particular, the Fed's shift helped halt the dollar's rally, support the price of oil and stabilize the flow of capital across countries. In summary, the divergence in monetary policy between the U.S. and its major global counterparts the market expected in 2016 has not materialized and risky assets have rallied as a result.

The Barclays High Yield Index surged 9.06% through June, the best start to a year since 2009, marking a 15% recovery off the mid-February nadir. The S&P/LSTA Leveraged Loan Index produced a more modest 4.51% return though senior loans didn't fall to the same depths as high yield bonds in 2015. Performance was also very strong in investment grade assets as fixed income profited from the impressive Treasury bull-flattening. Investors can be forgiven for forgetting that the 10-year Treasury yield began the year at 2.27%, 80bp above where it closed June. Given the rate backdrop, investment grade corporates soared 7.68%. Interestingly, equities failed to fully capitalize on the credit and fixed income rally as large cap equities returned a respectable, yet restrained, 3.84% including dividends.

Within the senior loan and high yield bond markets, two notable trends were apparent. First, the rebound in commodity prices boosted the beaten-down energy and metals & mining sectors. The high yield energy sector, which represents 14% of the market, advanced 21.61%, while energy loans climbed 15.77%. Metals & mining staged an even more remarkable stretch, gaining 29.70% in high yield. Second, low-quality paper outperformed after an extended stretch of high-quality outperformance. Triple-C rated bonds returned 16.03%, well above the 7.60% return recorded by double-B rated bonds. Triple-C rated loans also outpaced double-B rated loans by a 9.74% to 3.57% margin. Besides those two trends, high yield benefited from the rates rally as well. Removing the rates component of high yield's return reduces it to 5.03% versus 9.06%.

Default rates accelerated during the first half of 2016 as the high yield rate climbed to 3.6% at the end of June from 1.8% at year end and the loan rate rose to 2.2% from 1.7%, as per JP Morgan. Excluding commodities, the rates remain low, however. Removing energy and metals & mining defaults lowers the high yield and loan default rates to 0.5% and 0.9%, respectively. JP Morgan forecasts a 6% default rate in 2016 for high yield and 3% for senior loans. Adjusting for commodities lowers their projections to 2% for both asset classes, well below the 3.5% long-term average.

The first half closed with the surprising result of the UK referendum but the market was not derailed. We interpret the resilience following Brexit as investors expressing confidence that global central bank policy will be effective in supporting asset prices. That has certainly been the case in the sovereign debt market where rising valuations have resulted in over \$11 trillion of paper yielding less than 0%, up from \$4 trillion at the start of the year. Much of the negative-yielding universe is denominated in euros and yen and, as a result, the U.S. credit markets have received substantial interest from investors in those regions.

The technical backdrop has been particularly strong as supply of new issuance in the high yield and loan markets is not matching the incremental demand for these products. A combination of regulations and market volatility is

limiting the acquisition activity that typically drives much of the market's growth and we do not think the meager net supply is likely to change any time soon. For example, the forward loan pipeline slumped to \$29 billion at the end of June, half of the pipeline at the beginning of 2016 (\$57.6 billion).

We believe the current environment is supportive for credit products. An average of sell-side economist forecasts indicates that the U.S. economy is expected to grow at 2% in 2016. Easy monetary policies from the Fed and its global counterparts will continue to encourage investors to seek yield in credit products. Of course we continue to monitor many potential market pitfalls such as a sudden reversal of those policies, upcoming elections in the U.S. this year and Europe next year, international capital flows, etc.

June 30, 2016 (Unaudited)

### Fund Overview

Blackstone / GSO Senior Floating Rate Term Fund (“BSL” or herein, the “Fund”) is a closed-end term fund that trades on the New York Stock Exchange under the symbol “BSL”. BSL’s primary investment objective is to seek high current income, with a secondary objective to seek preservation of capital, consistent with its primary goal of high current income. Under normal market conditions, the fund invests at least 80% of its total assets in senior, secured floating rate loans (“Senior Loans”). BSL may also invest in second-lien loans and high yield bonds and employs financial leverage, which may increase risk to the Fund. The Fund has a limited term, and absent shareholder approval to extend the life of the Fund, the Fund will dissolve on or about May 31, 2020.

### Portfolio Management Commentary

#### Fund Performance

BSL outperformed its key benchmark, the S&P LSTA Leveraged Loan Index (“S&P LLI”), on a Net Asset Value (“NAV”) per share basis for the periods of six months and the life of the Fund since inception, and underperformed for the periods of one year, three years, and five years. On a share price basis, the Fund outperformed its benchmark for the period of six months, and underperformed its benchmark for the periods of one year, three years, five years, and since inception. The shares of the Fund traded at an average discount to NAV of 6.1% for the six months ended June 30, compared to its peer group average discount of 10.2% over the same time.<sup>1</sup>

#### NAV Performance Factors<sup>2</sup>

The Fund’s outperformance relative to its benchmark was attributable to its under-allocation to higher-rated (BB- or above) assets (11.6% vs. 47.5% for the benchmark), which underperformed during the period. By sector, the Fund’s credit selection in energy, utilities, and IT were the strongest contributors to outperformance, while the Fund’s modest allocation to bonds (3.4%) also contributed positively. By issuer, the largest detractors from performance relative to the benchmark were Nine West, Fairway and Crossmark, which were partially offset by strong positive contributions from Smile Brands, Aspect and Cunningham Lindsey.

#### Portfolio Activity and Positioning

Over the six months, BSL’s industry exposure remained generally unchanged. The Fund maintained a low cash balance throughout the period, increased its allocation in high yield bonds, and reduced its second lien loan allocation, effectively reducing its triple-C rated assets. The Portfolio average loan spread decreased 10 basis points from the end of 2015. BSL increased its monthly distribution from \$0.09 to \$0.097, as declared on February 25<sup>th</sup> of this year – an 8% increase.

As of June 30, 2016, the Fund held approximately 92% of its Managed Assets in bank loans and 5% in high yield bonds. BSL’s investments represented the obligations of 177 companies diversified across 28 distinct industries, with an average position size representing 0.47% of Managed Assets and the top five industry groups representing 46% of total holdings of the Fund.
