Securities registered pursuant to Section 12(g) of the Act:

Series B Common Stock, \$.01 par value (Title of class)

Edgar Filing: A. H. Belo Corp - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer: Accelerated filer: Non-accelerated filer: Smaller reporting company:
(Do not check if a smaller reporting company)

Emerging growth company:

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's voting stock held by nonaffiliates on June 30, 2017, based on the closing price for the registrant's Series A Common Stock on such date as reported on the New York Stock Exchange, was approximately \$104,562,051.*

Shares of Common Stock outstanding at March 13, 2018: 21,769,458 shares (consisting of 19,299,823 shares of Series A Common Stock and 2,469,635 shares of Series B Common Stock).

* For purposes of this calculation, the market value of a share of Series B Common Stock was assumed to be the same as the share of Series A Common Stock into which it is convertible.

Edgar Filing: A. H. Belo Corp - Form 10-K

Documents incorporated by reference:

Selected designated portions of the registrant's definitive proxy statement, relating to the Annual Meeting of Shareholders to be held on June 6, 2018, are incorporated by reference into Parts II and III of this Annual Report.

PART I

CAUTIONARY STATEMENT CONCERNING FORWARD-LOOKING STATEMENTS

Statements in this Annual Report on Form 10-K concerning A. H. Belo Corporation's business outlook or future economic performance, anticipated profitability, revenues, expenses, dividends, capital expenditures, investments, dispositions, impairments, business initiatives, acquisitions, pension plan contributions and obligations, real estate sales, working capital, future financings and other financial and non-financial items that are not historical facts, are "forward-looking statements" as the term is defined under applicable federal securities laws. Forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those statements. Such risks, trends and uncertainties are, in most instances, beyond the Company's control, and include changes in advertising demand and other economic conditions; consumers' tastes; newsprint prices; program costs; labor relations; technological obsolescence. Forward-looking statements, which are as of the date of this filing, are not updated to reflect events or circumstances after the date of the statement.

All dollar amounts presented herein the Annual Report on Form 10-K, except share and per share amounts, are presented in thousands, unless the context indicates otherwise.

Item 1. Business

A. H. Belo Corporation and subsidiaries are referred to collectively herein as "A. H. Belo" or the "Company." The Company, headquartered in Dallas, Texas, is a leading local news and information publishing company with commercial printing, distribution and direct mail capabilities, as well as expertise in emerging media and digital marketing. With a continued focus on extending the Company's media platform, A. H. Belo delivers news and information in innovative ways to a broad spectrum of audiences with diverse interests and lifestyles.

A. H. Belo Corporation was formed in February 2008 through a spin-off from its former parent company and is registered on the New York Stock Exchange (NYSE trading symbol: AHC). The Company publishes The Dallas Morning News (www.dallasnews.com), Texas' leading newspaper and winner of nine Pulitzer Prizes, and various niche publications targeting specific audiences. Its newspaper operations also provide commercial printing and distribution services to large national and regional newspapers and other businesses in the North Texas region. In December 2017, the Company completed the sale of the Denton Record-Chronicle and the Company no longer owns newspaper operations in Denton, Texas.

The Company also provides digital marketing solutions to businesses. The predominance of these services were developed or acquired within the last five years and are provided through the Company's marketing services division and through its subsidiaries DMV Digital Holdings Company ("DMV Holdings") and Your Speakeasy, LLC ("Speakeasy").

Table of Contents

Business Overview

The Company's goal is to create profitability for investors through the following:

- Be the premier provider of relevant and original local journalism published at scale in North Texas so citizens can make informed choices about their lives and the life of the communities in which they live. This commitment to excellence in journalism published at scale attracts and retains subscribers to both the print edition and digital site and applications.
- Provide customers with the most comprehensive suite of innovative marketing solutions.

Since the Company's spin-off in 2008, the print media industry has encountered continuous declines in revenue primarily due to the secular shift of readers and advertisers to digital platforms. The Company has sought to limit its exposure to these industry risks through greater development and enhancement of digital platforms for delivery of news and advertising, and through diversification of sources of revenue, from both organic growth and acquisitions of marketing services and new products.

On March 2, 2017, the Company acquired the remaining 20 percent voting interest in DMV Holdings. The initial purchase of 80 percent voting interest in DMV Holdings occurred in January 2015. DMV Holdings holds all outstanding ownership interests of three Dallas-based companies, Distribion, Inc. ("Distribion"), Vertical Nerve, Inc. ("Vertical Nerve") and CDFX, LLC ("MarketingFX"). These businesses specialize in local marketing automation, search engine marketing, and direct mail and promotional products, respectively. The Company believes this acquisition complements the product and service offerings currently available to A. H. Belo customers, thereby strengthening the Company's diversified product portfolio and allowing for greater penetration in a competitive advertising market. Additionally, the Company has realized efficiencies through internal fulfillment of work that businesses previously out-sourced to third-party vendors and therefore can provide businesses a more comprehensive suite of marketing solutions. This complements the organic growth realized by Speakeasy and Connect (programmatic advertising), which together offer content development, social media management, and multi-channel marketing solutions through targeted and programmatic exchanges. All of these marketing services have been combined into a single division titled Belo + Company.

The Company has redesigned and expanded its website platforms and mobile apps to provide a better customer experience with its digital news and information reporting. In 2016, the Company completed a multi-phase expansion of dallasnews.com to provide enhanced capabilities on its flagship website and further development of its entertainment brands. In 2015, the Company completed the expansion of its e-commerce functions and extended its interface with social media platforms and mobile devices. Complementing this digital expansion, in 2015, the Company recruited a new editor with the goal of transforming the Company into a more effective digital news

organization. With these investments, and utilizing innovative journalists in other key roles, the Company strengthened the depth of experience to support the broader delivery of news on digital platforms with focus on becoming a digital-first newsroom. In 2017, the Company invested in and moved to a new corporate office in downtown Dallas that provides for a more flexible office space and a contemporary digital newsroom.

In the first quarter of 2017, in conjunction with the promotion of Grant Moise from Senior Vice President Business Development / Niche Products to General Manager of The Dallas Morning News and Executive Vice President of A. H. Belo, the Company reorganized its two reportable segments based on changes in reporting structure and the go-to-market for the Company's service and product offerings. The two reportable segments are Publishing and Marketing Services. Prior to 2015, these operations were reported as a single segment. The results of operations related to the Company's segments are presented in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Company's Publishing segment includes the operations of The Dallas Morning News (www.dallasnews.com), Texas' leading newspaper and winner of nine Pulitzer Prizes and various niche publications targeting specific audiences. These operations generate revenue from sales of advertising within its newspaper and digital platforms, subscription and retail sales of its newspapers, sponsorship advertising for events and commercial printing and distribution services, primarily related to national and regional newspapers. Businesses within the Publishing segment leverage the production facilities, subscriber and advertiser base, and digital news platforms to provide additional contribution margin.

The Marketing Services segment includes marketing services generated by DMV Holdings and its subsidiaries Distribion, Vertical Nerve and MarketingFX. The Marketing Services segment also includes Speakeasy and digital advertising through Connect. The Company operates the portfolio of assets within its Marketing Services segment as separate businesses that sell digital marketing and advertising through different channels, including programmatic advertising and content marketing within the social media environment.

Through the Company's technological, capital and organizational investments, management will continue to focus its attention and initiatives on maximizing the return on its print assets and enhancing its digital publishing capabilities, thereby offering marketers performance-based media and marketing solutions through which they can grow their businesses.

Table of Contents

Publishing Segment

The Dallas Morning News' first edition was published on October 1, 1885 and is one of the leading metropolitan newspapers in the United States. The newspaper is distributed primarily in Dallas County and 10 surrounding counties. This coverage area represents one of the most populous and fastest growing metropolitan areas in the country. The Dallas Morning News has been awarded nine Pulitzer Prizes for news reporting, editorial writing and photography. The Dallas Morning News also publishes Briefing, a newspaper distributed two days per week at no charge to over 200,000 nonsubscribers in select coverage areas; and Al Dia, an award-winning Spanish-language newspaper published on Wednesdays and Sundays and distributed at no charge to over 100,000 households in select coverage areas. Unless otherwise noted, the financial and operating results of all publications are reported as The Dallas Morning News.

Businesses producing and providing services within the print and paper industry have encountered significant declines in revenue as a result of increasing use of the internet for delivery of information. These businesses have been challenged to find alternative solutions to offset the loss of revenue. The majority of revenues within the newspaper industry were historically generated from display and classified advertisements within the newspapers followed by revenues from subscription and retail sales of newspapers. Revenues from subscription and retail sales of newspapers have experienced greater resilience as readers have been willing to pay higher prices for the product, which has substantially offset lower circulation volumes. Since the spin-off from its former parent company in 2008, the Company has faced ongoing revenue declines primarily in advertising within the newspapers.

The following chart presents the revenue trend of the Publishing segment's products since the Company's spin-off in 2008.

Table of Contents

The following describes the various revenue streams within the Publishing segment.

Advertising Revenue - Advertising revenue accounted for approximately 52 percent of total revenue within the Publishing segment for 2017. The Company has a comprehensive portfolio of print and digital advertising products, which include display, classified, preprint and digital advertising. Display revenue results from sales of advertising space within the Company's core newspapers and niche publications to local, regional or national businesses with local operations, affiliates or resellers. Classified revenue, which includes automotive, real estate, employment, obituaries and other, results from sales of advertising space in the classified and other sections of the Company's newspapers. Preprint revenue results from sales of preprinted advertisements or circulars inserted into the Company's core newspapers and niche publications, or distributed by mail or third-party distributors to households in targeted areas in order to provide total market coverage for advertisers. The Company's capabilities allow its advertisers to selectively target preprint distribution at the sub-zip code level in order to optimize coverage for the advertisers' locations. Digital publishing revenue includes the sales of banner, classified and native advertisements on the Company's news and entertainment-related websites and mobile apps. The Company's auto sales division offers targeted advertising to auto dealerships primarily in the North Texas region desiring to advertise their inventory on the cars.com platform. The Company is under contract to sell this advertising through September 2019.

In addition to daily newspapers, the Company publishes niche publications that provide a vehicle for delivery of display, classified, and preprint advertising, typically to nonsubscribers of the Company's core newspapers and at no charge. These publications target specific demographic groups, geographies and nonsubscriber households. Most niche publications have related websites and mobile applications, allowing digital access by consumers. The niche publications provide unique content and incorporate the news content from the core newspaper while leveraging the Company's printing, distribution and technology infrastructure to print and distribute their publications at lower costs. From time to time, the Company produces magazines or special newspaper editions to promote business, sporting or other events in the North Texas region, such as the Top 100 Places to Work edition. These publications allow the Company to generate revenue through advertising sales in the publications and through increased circulation or fees for the publications.

Circulation Revenue - Circulation revenue includes subscription and single copy sales related to the Company's core newspapers in print and digital formats. A. H. Belo's steadfast commitment to producing superior, unduplicated local journalism enables the Company's newspapers to charge premium subscription rates. The Dallas Morning News' goal is to maximize the amount of recurring revenue from consumers of the Company's print and digital products. The Company continuously assesses the journalism provided to subscribers and their willingness and ability to pay higher rates by geographic area. Each year since 2008, the Company has implemented effective rate increases to select subscribers or retailers. Periodically throughout each year, various special interest magazines, such as Healthy Living or Your Money, are included with Sunday editions as a part of subscribers' home delivery news package. Subscriber and retail rates for these editions reflect a charge for this content. A digital replica version of The Dallas Morning News is offered on dallasnews.com for subscribers to purchase if they prefer to consume news through a digital device in a more traditional format.

The Company's news websites, including dallasnews.com and aldiadallas.com, are the leading English and Spanish news and entertainment digital platforms in the North Texas region. The news websites offer users late-breaking and other up-to-date news coverage, user-generated content, advertising, e-commerce and other services. Readers can access news content across multiple digital platforms and obtain relevant local customized content and advertising. The Company's journalists have expanded their reach and deepened their engagement with audiences by delivering news and content through social media platforms, such as blogs, Facebook and Twitter, which direct traffic to its core websites. With the reorganization of its editorial and newsroom personnel in 2015, the Company has strengthened its focus to provide greater journalistic content on its digital platforms with increased emphasis towards video.

In 2017, the Company continued to invest in its website as it further expanded data collection capabilities for traffic to its websites, allowing support of native application strategies, and greater interface with visitors and advertisers. In 2016, the Company completed a multi-phase expansion of dallasnews.com to provide enhanced capabilities on its flagship website and further development of its entertainment brands. In 2015, the Company completed the expansion of its e-commerce functions and extended its interface with social media platforms and mobile devices. A standalone website was created for guidelive.com, the premier website for entertainment news and events in North Texas. Unique landing pages solely dedicated to the Company's sportsdayDFW.com and sportsdayHS.com branded platforms were developed, and separate websites for these platforms were launched in 2016. These enhancements allow the websites to leverage the identity of their brands to gain greater audience and to quickly respond as technology evolves and new media are introduced, such as wearable devices or hybrid phone or tablet devices. In May 2016, the Company launched a meter on dallasnews.com and sportsdayDFW.com. In 2017, the Company furthered its investment in the meter in order to offer greater localized digital journalism in order to increase conversion of audiences to paid digital subscribers.

Table of Contents

Readership of the Company's newspapers is tracked by Scarborough Research, which estimated the number of individuals reading a newspaper print edition to be approximately 1,121,000 for The Dallas Morning News, as reported in the fourth quarter 2017 Alliance for Audited Media ("AAM") report, which is still subject to audit. This readership volume represents a reach of approximately 21.8 percent of the designated market for this newspaper in the Company's circulation area. The average print and digital volumes associated with A. H. Belo's primary daily newspaper and niche publications are reported and verified by a circulation audit agency, as set forth in the table below.

Newspaper	2017		2016		2015	
	Daily Circulation(a)	Sunday Circulation	Daily Circulation(a)	Sunday Circulation	Daily Circulation(a)	Sunday Circulation
The Dallas Morning News Group						
The Dallas Morning News (b) (c)	214,423	288,059	235,402	317,457	271,546	358,861
Niche publications (c)	68,899	399,079	118,732	399,366	118,126	351,008
Total	283,322	687,138	354,134	716,823	389,672	709,869

(a) Daily circulation is defined as a Monday through Saturday six-day average.

(b) Average circulation data for The Dallas Morning News includes the Denton Record-Chronicle.

(c) Data was obtained from the AAM Quarterly Data Reports. Data for 2017 is still subject to audit.

Printing, Distribution and Other Revenue - Printing, distribution and other revenue accounted for approximately 13 percent of total revenue within the Publishing segment for 2017 and includes commercial printing, distribution, direct mail and event-based services. The Company provides commercial printing and distribution services, leveraging the capacity of its production and distribution assets. The Company believes the incremental revenue from these services allows a greater return on the Company's operating assets.

Commercial printing services are provided for certain national newspapers that require regional printing and for various local and regional newspapers. Newsprint used in the production of large national newspapers is generally provided by the customer. Home delivery and retail outlet distribution services are also provided for other national and regional newspapers delivered into the Company's coverage areas. A direct mail business is operated in Phoenix, Arizona, providing mailed advertisements for its business customers.

CrowdSource was formed in 2013 to provide event marketing services including event activation and promotion for large-scale community events, seminars and festivals. CrowdSource promotes community events, such as One Day University, an educational speaker event; Savor, a premium food, wine and spirits festival in Dallas; and other community-related events.

Table of Contents

Marketing Services Segment

The following describes the various revenue streams within the Marketing Services segment.

Digital marketing services are offered by the Company's sales and marketing divisions. The Company's strategy, with regard to the Marketing Services segment, is to be able to offer businesses a comprehensive marketing solutions package while providing a greater percentage of the marketing fulfillment costs internally that was previously outsourced to third-party providers. The Company has aligned management and the Company's sales teams to provide a cross-functional integrated approach to maximize the development of these businesses. Digital marketing services are provided through the following service offerings:

- Distribion, a DMV Holdings business, offers multi-channel marketing solutions through subscription sales of its cloud-based software, allowing customers to manage and individualize their marketing campaigns. Distribion also provides multi-channel marketing services to customers not having access to its proprietary software.
- Vertical Nerve, a DMV Holdings business, provides marketing analytics, search engine marketing and other marketing related services to businesses across the United States.
- Speakeasy, formed in 2012, provides turnkey social media account management and content marketing services principally for businesses in the North Texas region.
- Connect manages multi-channel advertising campaigns for its customers, allowing customers to target demographic audiences using data analytics and allowing customers to determine the delivery media such as email campaign, banner impressions or video views on third-party websites. Connect is able to design and fulfill customer campaign requirements through acquisition of advertising inventory on programmatic exchanges.

Other marketing services include business marketing products offered through MarketingFX, a DMV Holdings business. These products include promotional products for businesses to supply to employees and customers.

Raw Materials and Distribution

The basic material used in publishing newspapers is newsprint. Currently, most of the Company's newsprint is obtained through a purchasing consortium. Management believes the Company's sources of newsprint, along with

available alternate sources, are adequate for the Company's current needs, though the Company experienced a tightening of supply in the North American newsprint market beginning in the fourth quarter of 2017.

During 2017, Company operations consumed 23,296 metric tons of newsprint at an average cost of \$564 per metric ton. Consumption of newsprint in 2016 was 26,752 metric tons at an average cost of \$532 per metric ton.

The Company's newspapers and other commercial print products are produced at its facility in Plano, Texas. Distribution of printed products to subscribers, retailers and newsstands is made under terms of agreements with third-party distributors. The Company believes a sufficient number of third-party distributors exist to allow uninterrupted distribution of the Company's products.

Table of Contents

Competitive Strengths and Challenges

The Company's strengths are:

- the largest news gathering operation in North Texas
- the opportunity to build valuable first-party data sets about consumers in North Texas due to the millions of unique visitors who come to the Company's websites and mobile applications monthly
- the ability to develop innovative new product and service offerings which leverage the Company's brand equity, existing content, distribution platforms, technologies and relationships
- product or service offerings that allow the Company to offer advertisers a customized and integrated advertising and marketing solution through desired media channels
- sufficient liquidity to allow the Company to opportunistically invest in, or acquire, businesses that complement the Company's advertising or marketing services businesses
- an affluent and educated demographic base in its market
- the ability to market print or digital products and services to large and targeted audiences at low marginal costs
- a large sales force with knowledge of the marketplaces in which the Company conducts its business and relationships with current and potential advertising clients
- the ability to effectively manage operating costs according to market pressures

The Company's challenges are:

- timely growth of revenue and profit margins related to the Company's marketing services businesses and digital subscriptions that would provide for an offset to declines in revenue and profit margins of the Company's print operations
- maintaining and growing advertising and circulation revenues in a competitive environment with increased competition from other media, particularly internet-based media
- effective monetization of locally created online content on the Company's websites while balancing the impact of potential lower traffic volumes with an established metered-based model

In response to the decline in print revenue, the Company has developed or acquired capabilities to offer customers advertising and marketing solutions through multiple media channels. The Company leverages its news content to improve engagement on the Company's digital platforms that results in increased digital subscriptions and associated revenue. The Company also continues to diversify its revenue base by leveraging the available capacity of its existing assets to provide print and distribution services for newspapers and other customers requiring these services by introducing new advertising and marketing services products, by increasing circulation prices and through growth of the Company's event-based business.

As a result of declining print circulation, the Company has developed broad digital strategies designed to provide readers with multiple platforms for obtaining online access to local news. The Company continues to obtain additional key demographic data from readers, which allows the Company to provide content desired by readers and to modify marketing and distribution strategies to target and reach audiences valued by advertisers. The Company has implemented a programmatic digital advertising platform which provides digital ad placement and targeting efficiencies and increases utilization of digital inventory within the Company's and external websites. In addition, the Company's sales teams are implementing initiatives that better utilize pay for performance data and other metrics to generate and return lost advertising dollars to its print business.

Strategy

A. H. Belo is committed to producing positive net income and cash flow and creating value for shareholders over the long-term through stock price appreciation and dividends. The Company continuously evaluates its operations and investments against various economic factors to determine the appropriate holding strategies.

In 2017, the Company completed the disposition of nonessential real estate assets, all at opportunistic prices. Sales proceeds were used to return money to shareholders and provide additional contributions to the Company's pension plans. The Company continuously seeks to implement measures to control operating expenses as it develops and grows new businesses. These measures include divesting of unprofitable products and services, adjusting the Company's workforce and benefits to align with revenues and market conditions, and

Table of Contents

restructuring operations. Returns on operating and investing assets are evaluated to ensure the appropriate return on investment is achieved and capital is deployed to the benefit of shareholders.

The Company is committed to providing the leading digital and print platforms for delivering news of the highest quality and integrity in the North Texas area, as well as creating and developing innovative print and digital products that address the needs of consumers and advertisers.

The Company seeks to achieve these objectives through the following strategies:

- produce quality local journalism at scale distributed through digital platforms that improves user engagement that results in increased digital subscriptions and customer retention
- develop new ways to optimize advertising dollars on the Company's digital platforms
- grow recurring Marketing Services revenue through a client-first approach and enhanced product offerings
- acquire businesses and products that will enhance the Company's local marketing solution portfolio and assist in achieving a competitive market place advantage
- improve print revenues and increase utilization of operating assets through selling commercial printing and distribution services to third-parties
- continue to align costs with revenue, maintain strong liquidity to support future business and product initiatives and provide flexibility to meet strategic investment opportunities and other cash flow requirements

Competition

The Company's newspapers, niche publications and related websites primarily serve audiences in the North Texas area. The Company competes for advertising revenue for its newspapers and websites with other print and digital media companies. Advertising revenues for the Company's newspapers and websites are responsive to circulation and traffic volumes, demographics of its subscriber base, advertising results, rates and customer service. Advertising on digital platforms is highly competitive and largely dominated by large internet companies. As advertisers reallocate marketing expenditures from print to digital channels, the Company believes its strong local brand, its suite of print and digital advertising and marketing services products and its programmatic digital advertising platform will allow it to offer unique advertising and marketing solutions to local businesses on a competitive scale.

The Dallas Morning News has the highest paid print circulation volumes in the North Texas area while competing with one other metropolitan newspaper in parts of its geographic market. Print circulation revenues are primarily challenged due to free and readily-accessible news, entertainment, advertising and other content available through the internet. This secular shift from print to digital media continues as consumer lifestyles embrace technological advancements, particularly with mobile devices, which provide access to a wide variety of digital news and advertising alternatives, including news and social media websites, online advertising networks and exchanges, online classified services, and direct email advertising. Competition for readers is primarily based on the mode of delivery,

quality of the Company's journalism, price, timeliness of its interaction with audiences and customer service. News and other digital content produced by the Company's newspapers and niche publications are available via its websites, mobile applications and through email. The Company offers competitive technology for accessing digital content on mobile devices and via personal computers. Journalists engage online readers through blogs, Twitter and other social media posts. The Company has modified its websites to provide greater video content and advertising, links to other sites sought by readers, improved layouts, and a better interface with mobile applications.

Seasonality

A. H. Belo's advertising revenues are subject to moderate seasonality, with advertising revenue typically higher in the fourth calendar quarter of each year because of the holiday shopping season. The level of advertising sales in any period may also be affected by advertisers' decisions to increase or decrease their advertising expenditures in response to anticipated consumer demand and general economic conditions.

Employees

As of December 31, 2017, the Company had 1,090 employees.

Available Information

A. H. Belo maintains its corporate website at www.ahbelo.com, which makes available, free of charge, this Annual Report on Form 10-K, its Quarterly Reports on Form 10-Q, its Current Reports on Form 8-K and amendments to those reports, as filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the “Exchange Act”), as amended, as soon as reasonably practicable after the reports are electronically filed with or furnished to the Securities and Exchange Commission (the “SEC”).

Item 1A. Risk Factors

The following risk factors are based on management’s current knowledge and estimates of factors affecting the Company’s operations, both known and unknown. Readers are cautioned not to place undue reliance on such forward-looking information as actual results may differ materially from the possible risks and outcomes discussed herein. In addition, a number of other factors (those identified elsewhere in this document and others, both known and unknown) may cause actual results to differ materially from expectations.

A. H. Belo’s newspapers operate in highly competitive media markets, and the Company’s ability to generate revenue depends on the effectiveness of the Company’s strategy to promote new and existing products.

The Company’s businesses operate in highly competitive media markets. A. H. Belo’s newspapers compete for advertising and circulation revenue with other newspapers, websites, digital applications, magazines, television, radio, direct mail and other media. The continued expansion of digital media and communications, particularly social media, mobile applications and the proliferation of tablet and mobile devices has increased some consumers’ preferences to receive all or part of their news and information digitally. Websites such as craigslist.org, monster.com and cars.com provide a cost efficient platform for reaching wide but targeted audiences for classified advertising. Websites such as Facebook, Twitter, Google and Yahoo! are successful in gathering and making available national and local news and information from multiple sources and attracting a broad readership base.

Historically, newspaper publishing was viewed as a cost-effective method of delivery for various forms of advertising to a large audience. The continued development and deployment of new technologies and greater competition from digital media increases the challenge to the Company to provide competitive offerings to retain its print and digital advertisers and subscribers.

A. H. Belo’s ability to stabilize advertising and circulation revenue through price and volume increases may be affected by competition from other forms of media and other publications available in the Company’s various markets, declining consumer spending on discretionary items such as newspapers, decreasing amounts of free time and declining frequency of regular newspaper buying among certain demographic groups. The Company may also incur higher costs competing for paid circulation. If the Company is not able to compete effectively, revenue may decline and the Company’s financial condition and results of operations may be adversely affected.

Purchasing practices of national advertisers could negatively impact the Company’s pricing and ability to up-sell other products, which could result in lower revenues.

In line with the Company’s overall print advertising revenue trend, national advertisers’ marketing budgets have been significantly reduced. In addition, many national advertisers which place advertising in the Company’s newspapers are centralizing purchasing functions and streamlining the buying and negotiating process. This could result in the commoditization of certain advertising products, which limits the Company’s ability to promote its position in the

market, the customer service value of its relationship with the advertiser, and the benefits of its suite of products, including the Company's ability to up-sell other products. This also may put the Company in competition with other advertising companies that are able to offer lower prices for a larger geographical area than the Company covers. Accordingly, the Company could experience a decline in pricing which could result in lower revenues and profitability.

Decreases in circulation may adversely affect A. H. Belo's advertising and circulation revenue.

A. H. Belo's newspapers, and the newspaper industry as a whole, are challenged to maintain and grow print circulation volume. To the extent circulation volume declines cannot be offset by rate increases, the Company will realize lower circulation revenue. Further, circulation volume declines could also result in lower rates and volumes for advertising revenue.

The expansion of programmatic advertising could result in lower realization of advertising revenue sold by the Company's news and entertainment websites.

Digital marketing services are becoming a significant component to business customers advertising strategies. Barriers to entering this industry are low and many competitors offering advertising services on traditional advertising platforms are seeking to gain market share, particularly through programmatic exchanges. As this industry expands, purchasing and selling of advertisement on exchanges is expected to result in lower costs of advertising which in-turn could be passed on to businesses customers. Such events could result in lower profit realization for digital advertising revenue within the Company's news and entertainment websites as it competes with exchange platforms for advertising dollars.

Table of Contents

The growth and profitability of the Company's marketing services businesses are largely dependent on acceptance by local businesses and the recruitment and retention of key employees.

Marketing services offerings are rapidly evolving as business customers seek quantifiable results to measure the effectiveness of their advertising spending. The Company's marketing services customers primarily represent mid-sized businesses with varying degrees of knowledge and familiarity with online marketing and advertising campaigns. The success of the Company's marketing services offerings is dependent on the education of these customers on the benefits of these services to their businesses. Challenges may include the accuracy or perceived accuracy of metrics provided and the ability of the customer to properly interpret the effectiveness of their advertising campaigns against benchmarks that may not be reliable.

Increasing the Company's client base and achieving broader market acceptance of its suite of cross-channel, interactive marketing solutions will depend on the ability of sales and marketing teams and their capabilities to obtain new clients as well as sell additional products and services to existing clients. Competition is fierce for direct sales professionals with the skills and technical knowledge that is required, and the Company may be unable to hire or retain sufficient numbers of qualified individuals in the future. The ability to achieve significant future revenue growth will depend on the success in recruiting, training and retaining sufficient numbers of direct sales professionals. New and planned hires require significant training and time before sales teams become fully productive, and may not become as productive as quickly as anticipated. The Company's growth prospects could be harmed if efforts to expand, train and retain the direct sales team do not generate a corresponding significant increase in revenue.

Newsprint prices are volatile and may increase in the future, and newsprint supply may become increasingly scarce as paper mills exit the market.

The basic raw material for newspapers is newsprint, the cost of which for the last three years has represented between approximately 5.0 percent and 6.0 percent of A. H. Belo's revenues. The Company's publishing operations depend significantly upon the continuing availability of newsprint and the Publishing segment's results of operations may be impacted significantly by changes in newsprint prices. The price of newsprint historically has been volatile. Consolidation in the North American newsprint industry has reduced the number of suppliers and has led to paper mill closures and conversions to other grades of paper, which in turn has decreased overall newsprint capacity and increased the likelihood of higher prices. Other factors that may increase prices the Company pays for newsprint includes:

- The imposition of tariffs or other restrictions on non-U.S. suppliers of paper
- Increases in supplier operating expenses due to rising raw material or energy costs or other factors
- Decreases in the Company's current consumption levels
- The Company's inability to maintain existing relationships with its newsprint suppliers

In addition, the Company's ability to supply its publishing operation with newsprint has been and may continue to be disrupted by such factors as:

- The Company's suppliers may be unable to deliver newsprint due to labor unrest
- Trucks or other means of transporting newsprint may become unavailable
- Paper mills may close at a faster rate than declines in the demand for paper

A. H. Belo currently purchases most of its newsprint through a purchasing consortium. Significant increases in newsprint costs or the Company's inability to obtain an adequate supply of newsprint in the future could adversely affect its financial condition and results of operations.

The Company's potential inability to successfully execute cost control measures could result in total operating costs that are greater than expected.

The primary costs of the Company's operations include employee compensation and benefits, followed by distribution costs, newsprint and other production materials and technology costs. The Company has taken steps to lower costs through selling or discontinuing production of unprofitable operations and products, reducing personnel and restructuring employee benefits and implementing general cost control measures. Although the Company continues its cost control efforts, the Company may be unable to match revenue declines with offsetting cost reductions.

Certain operating costs may not fluctuate directly with changes in revenue, which could result in lower margins if advertising and circulation volumes decline. The Company could also experience inflationary pressures from newsprint and other suppliers and be

Table of Contents

unable to generate additional revenue or additional cost reductions to offset these inflationary pressures. The Company utilizes outside service providers to distribute its newspapers, and certain preprint advertising is distributed through the mail. Higher fuel costs or higher

postage rates could result in higher direct costs incurred by the Company to distribute its products.

Increasing cost of healthcare benefits offered to employees requires the Company to evaluate the scope of benefits offered and the method in which health care benefits are delivered. Competition for qualified personnel may require the Company to spend more on compensation costs, including employee benefits, to attract and retain its workforce.

The Company may not be able to pass on to customers these potential cost increases given the significant competition for advertising dollars and the ability of customers to obtain their news from other media at a low cost. If the Company does not achieve expected savings or if operating costs increase due to the creation and development of new products or otherwise, total operating costs may be greater than anticipated.

The Company believes appropriate steps are being taken to control costs. However, if the Company is not successful in matching revenue declines with corresponding cost reductions, the Company's ability to generate future profits could be affected.

The sufficiency of the Company's liquidity is dependent upon meeting future financial goals.

Although the Company's cash holdings are sufficient to meet foreseeable operating needs, the Company must achieve expected financial goals. Unplanned events such as significant required pension plan contributions, tax obligations, significant loss of revenue, unprofitable operations or deterioration of collections of receivables, could accelerate the use of the Company's cash balances. The Company's ability to raise financial capital in the future may be hindered due to uncertainty regarding the newspaper industry's prospective performance. If adequate funds are not available or are not available on acceptable terms, if and when needed, the Company may be forced to sell assets at below-market prices to sustain its operations.

There can be no assurance that the Company's product and service initiatives will be successful.

The Company has introduced new product and service initiatives designed to grow advertising and market services revenue and to respond to the challenges of maintaining revenue in existing markets. These initiatives may not be

successful, may not be marketable or profitable and could result in declines in financial performance.

Significant turnover of key employees could expose the Company to loss.

A. H. Belo relies on the efforts of its senior executive officers and other members of management. The Company is located in a strong economic region of the United States with low unemployment and strong competition for senior management personnel. The success of the Company's businesses depends heavily on its ability to successfully execute the required responsibilities of these roles as well as the Company's ability to retain current management and to attract and retain qualified personnel in the future. The loss of key personnel results in additional recruiting and training costs to the Company. Further, the exposure for loss to the Company and the potential delay of operations is elevated until the employee has sufficient knowledge commensurate with their assigned duties.

Market conditions could increase the funding requirements associated with the Company's pension plans.

The Company is the sole sponsor of A. H. Belo Pension Plans I and II (collectively, the "A. H. Belo Pension Plans" or the "Pension Plans") and is required to meet certain pension funding requirements as established under the Employment Retirement Income Security Act ("ERISA"). Instability in global and domestic capital markets may result in low returns on the assets contributed to the A. H. Belo Pension Plans. Additionally, low yields on corporate bonds may decrease the discount rate, resulting in a higher funding obligation. Although legislation was enacted into law in 2012, which provided limited funding relief, market conditions could materially increase the funding requirements associated with the A. H. Belo Pension Plans, which could have an adverse impact on the Company's liquidity and financial condition.

Adverse results from new litigation or governmental proceedings or investigations could adversely affect A. H. Belo's business, financial condition and results of operations.

From time to time, A. H. Belo and its subsidiaries are subject to litigation, governmental proceedings and investigations. Adverse determinations in any such matters could require A. H. Belo to make monetary payments or result in other sanctions or findings that could affect adversely the Company's business, financial condition and results of operations.

A. H. Belo's directors and executive officers have significant combined voting power and significant influence over its management and affairs.

Table of Contents

A. H. Belo directors and executive officers hold approximately 50 percent of the voting power of the Company's outstanding voting stock as of December 31, 2017. A. H. Belo's Series A common stock has one vote per share and Series B common stock has 10 votes per share. Except for certain significant corporate transactions, generally all matters to be voted on by A. H. Belo's shareholders must be approved by a majority of the voting power of the Company's outstanding voting stock, voting as a single class. Certain corporate transactions, such as a merger, consolidation, sale of all or substantially all of the Company's assets, dissolution of the Company, the alteration, amendment, or repeal of A. H. Belo's bylaws by shareholders and certain amendments to A. H. Belo's certificate of incorporation, require the affirmative vote of the holders of at least two-thirds of the voting power of the outstanding voting stock, voting as a single class. Accordingly, A. H. Belo's directors and executive officers will have significant influence over the Company's management and affairs and over all matters requiring shareholder approval, including the election of directors and significant corporate transactions. This ownership may limit other shareholders' ability to influence corporate matters and, as a result, A. H. Belo may take actions that some shareholders do not view as beneficial.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Operations	Ownership	Location
Corporate and The Dallas Morning News	Leased	Dallas, Texas
Printing facilities	Owned	Plano, Texas
AHC Dallas Properties, LLC	Leased	Denton, Texas
DMV Digital Holdings Company	Leased	Dallas, Texas
Your Speakeasy, LLC	Leased	Dallas, Texas
Direct mail office and warehouse	Leased	Phoenix, Arizona

In addition to the properties above, the Company has various leased locations it uses for news reporting and the distribution of the Company's publications and it holds real estate assets in Dallas, Texas that were previously used as the corporate headquarters.

Item 3. Legal Proceedings

A number of legal proceedings are pending against A. H. Belo. In the opinion of management, liabilities, if any, arising from these legal proceedings would not have a material adverse effect on A. H. Belo's results of operations, liquidity or financial condition.

Item 4. Mine Safety Disclosures

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company's authorized common equity consists of 125,000,000 shares of common stock, par value \$.01 per share. The Company has two series of common stock outstanding, Series A and Series B. Shares of the two series are identical in all respects except as noted herein. Shares of Series B common stock are entitled to 10 votes per share on all matters submitted to a vote of shareholders, and shares of Series A common stock are entitled to one vote per share. Transferability of the Series B common stock is limited to family members and affiliated entities of the holder. Shares of Series B common stock are convertible at any time on a one-for-one basis into shares of Series A common stock and upon a transfer, other than as described above, shares of Series B common stock automatically convert into Series A common stock. Shares of the Company's Series A common stock are traded on the New York Stock Exchange (NYSE trading symbol: AHC) and began trading on February 11, 2008. There is no established public trading market for shares of Series B common stock.

The declaration of dividends is subject to the discretion of A. H. Belo's board of directors. The determination as to the amount declared and its timing depends on, among other things, A. H. Belo's results of operations and financial condition, capital requirements, other contractual restrictions, prospects, applicable law, general economic and business conditions and other future factors that are deemed relevant. The board of directors generally declares dividends during the quarter preceding its stated measurement and payment dates. A. H. Belo cannot provide any assurance that future dividends will be declared and paid due to the factors discussed in "Item 1A. Risk Factors" and elsewhere in this Annual Report on Form 10-K. The table below sets forth the high and low sales prices reported on the New York Stock Exchange for a share of the Company's common stock and the recorded cash dividends per share declared for the past two years.

	Stock Price			Dividends
	High	Low	Close	Declared
2017				
Fourth quarter	\$ 5.25	\$ 4.35	\$ 4.80	\$ 0.22
Third quarter	5.60	4.40	4.60	0.08
Second quarter	6.40	5.20	5.50	0.08
First quarter	6.65	5.90	6.15	0.08

2016

Fourth quarter	\$ 7.46	\$ 5.35	\$ 6.35	\$ 0.08
Third quarter	7.95	4.87	7.35	0.08
Second quarter	5.25	4.75	5.00	0.08
First quarter	6.26	4.79	4.81	0.08

The closing price of the Company’s Series A common stock as reported on the New York Stock Exchange on March 13, 2018, was \$5.20. The approximate number of shareholders of record of the Company’s Series A and Series B common stock at the close of business on March 13, 2018, was 406 and 165, respectively.

Equity Compensation Plan Information

The information set forth under the heading “Equity Compensation Plan Information” contained in the definitive Proxy Statement for the Company’s Annual Meeting of Shareholders, to be held on June 6, 2018, is incorporated herein by reference.

Issuer Purchases of Equity Securities

The Company repurchased shares of its common stock pursuant to a publicly announced share repurchase program authorized by the Company’s board of directors. A total of 2,500,000 shares were authorized under the program. In December 2015, the Company discontinued share repurchases. In the fourth quarter of 2017, the Company resumed open market stock repurchases under its prior board-authorized repurchase authority and purchased 14,080 shares of its Series A common stock at a total cost of \$69. All purchases were made through open market transactions and were recorded as treasury stock.

Table of Contents

The following table contains information for shares repurchased during the fourth quarter of 2017. None of the shares in this table were repurchased directly from any of the Company's officers or directors.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
October 2017	—	\$ —	1,416,881	1,083,119
November 2017	—	—	1,416,881	1,083,119
December 2017	14,080	4.87	1,430,961	1,069,039

Sales of Unregistered Securities

During 2017, 2016 and 2015, shares of the Company's Series B common stock in the amounts of 2,925, 755 and 728, respectively, were converted, on a one-for-one basis, into shares of Series A common stock. The Company did not register the issuance of these securities under the Securities Act of 1933 (the "Securities Act") in reliance upon the exemption under Section 3(a)(9) of the Securities Act.

- (a) In 2017, the Company recorded a charge to pension expense of \$5,911 to reflect the amortization of losses associated with liquidated pension obligations resulting from the Company's de-risking efforts. In 2016, the Company recorded a noncash goodwill impairment charge of \$22,682 related to its Publishing reporting unit. In 2015 and 2014, the Company recorded a charge to pension expense of \$14,964 and \$7,648, respectively, related to the recognition of prior year actuarial losses associated with liquidated pension obligations resulting from the Company's de-risking efforts.
- (b) In 2017, the Company sold various real estate assets and recorded a gain of approximately \$12,500. In 2014, Classified Ventures, LLC ("Classified Ventures") an equity-method investee, sold its apartments.com business unit and the Company recorded a gain of \$18,479 related to the sale. In October 2014, the Company completed a transaction with Gannett Co. Inc. and other unit holders of Classified Ventures whereby Gannett acquired all membership interests from the unit holders for Classified Ventures' remaining business, which primarily consists of cars.com. The Company recorded a gain of \$77,092 related to the transaction. Other income of \$3,540 was recorded for the receipt of an economic parity payment from the former parent company in conjunction with the dissolution of the jointly-owned partnership holding the Company's investment in Classified Ventures.
- (c) In 2014, the Company sold the operations of The Providence Journal and in 2013, the Company sold the operations of The Press-Enterprise, both of which are reported as discontinued operations for the periods presented above.
- (d) The Company acquired an 80 percent interest in DMV Digital Holdings Company in 2015 and a 70 percent interest in Your Speakeasy, LLC, in 2012. The Company consolidated the results of operations related to these investments and recorded the interests of other owners as noncontrolling interests. In 2017, the Company purchased the remaining voting interests in DMV Holdings and Speakeasy, which eliminated noncontrolling interests.
- (e) A special dividend of \$0.14 per share was declared and paid in 2017, returning \$3,106 to shareholders. Special dividends totaling \$3.75 per share were declared in 2014, returning to shareholders excess cash generated from the sale of newspaper operations, investments and nonessential real estate.
- (f) A minority owner of DMV Holdings held an option to sell the Company up to 50 percent of its interest, which was valued at \$2,670 as of December 31, 2016. As a result of the purchase of the remaining 20 percent voting interest in DMV Holdings, the shareholder agreement was terminated and the redeemable noncontrolling interest was eliminated as of March 31, 2017.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

With a continued focus on extending the Company's media platform, A. H. Belo delivers news and information in innovative ways to a broad spectrum of audiences with diverse interests and lifestyles.

The Company's Publishing segment includes the operations of The Dallas Morning News (www.dallasnews.com), Texas' leading newspaper and winner of nine Pulitzer Prizes, and various niche publications targeting specific audiences. Its newspaper operations also provide commercial printing and distribution services to large national and regional newspapers and other businesses in Texas. In addition, the segment includes event activation and promotion services provided by CrowdSource and sales of online automotive classifieds on the cars.com platform.

All other operations are reported within the Company's Marketing Services segment. These operations primarily include DMV Holdings and its subsidiaries Distribion, Vertical Nerve and MarketingFX. The segment also includes Speakeasy and targeted display advertising generated by Connect.

Overview of Significant Transactions from Continuing Operations

Operating results for 2017, 2016 and 2015 reflect continued challenges in print advertising revenue trends, primarily due to volume and rate declines, partially offset by increases in the Company's paid digital subscriptions, digital advertising and marketing services revenues. The Company continues its efforts to diversify revenues through leveraging its brand, its personnel and its infrastructure in both organic new product development and in pursuit of acquisitions of related advertising and marketing services companies.

On March 2, 2017, the Company acquired the remaining 20 percent voting interest in DMV Holdings. The initial purchase of 80 percent voting interest in DMV Holdings occurred in January 2015. DMV Holdings holds all outstanding ownership interests of three Dallas-based businesses, Distribion, Inc., Vertical Nerve, Inc. and CDFX, LLC. These businesses specialize in local marketing automation, search engine marketing, and direct mail and promotional products, respectively. The Company believes this acquisition complements the product and service offerings currently available to A. H. Belo customers, thereby strengthening the Company's diversified product portfolio and allowing for greater penetration in a competitive marketing environment. The remaining 20 percent voting interest in DMV Holdings was acquired for a cash purchase price of \$7,120. Results of operations related to the companies acquired are presented within this Annual Report on Form 10-K on a prospective basis from the date of the initial acquisition in January 2015.

As a result of the first quarter 2017 segment reorganization, certain goodwill and intangible assets previously reported in the Marketing Services segment were moved to the Publishing segment, which was fully impaired as of December 31, 2016. Therefore, the Company recorded a noncash goodwill impairment charge of \$228 in the first quarter of 2017. The Company tested the Marketing Services segment's goodwill for impairment as of December 31, 2017, and it was determined the Marketing Services reporting unit's fair value exceeded its carrying value by approximately 93 percent. Accordingly, no impairment was warranted. In 2016, the Company recorded a noncash goodwill impairment charge of \$22,682, fully impairing the Publishing reporting unit's goodwill.

In the third quarter of 2017, in an effort to de-risk the Pension Plans, the Company made a voluntary contribution of \$20,000 to the Pension Plans and using the contribution, in addition to liquidating \$23,391 of plan assets, transferred \$43,391 of pension liabilities to an insurance company. As a result of this de-risking action, the Company reduced the number of participants in the Company's Pension Plans by 796, or 36 percent. This transaction resulted in a favorable settlement of the pension obligation of \$3,648 and a noncash charge to pension expense of \$5,911 for amortization of losses in accumulated other comprehensive loss. In 2015, lump-sum payments totaling \$100,877 were made to participants through the Pension Plans' master trust. These payments allowed favorable settlement of the pension obligation of approximately \$5,000 and resulted in a noncash charge to pension expense of \$14,964 for amortization of losses in accumulated other comprehensive loss.

In 2017, the Company sold three parcels of land in downtown Dallas, TX resulting in total cash proceeds of \$21,300, generating a gain of approximately \$12,500. On December 31, 2017, the Company completed the sale of the Denton Record-Chronicle and the Company no longer owns newspaper operations in Denton, Texas; see Note 12 – Sales of Assets and Other Dispositions.

Proceeds generated from the sales of real estate resulted in the declaration of a special dividend of \$0.14 per share in 2017, returning \$3,106 to shareholders of record and holders of restricted stock units ("RSUs"). Quarterly dividends of \$0.08 per share returned \$7,008, \$7,029 and \$7,052 to shareholders in 2017, 2016 and 2015, respectively. On December 7, 2017, the Company's board of directors declared an \$0.08 per share dividend to shareholders of record and holders of RSUs as of the close of business on February 9, 2018, payable on March 2, 2018.

Additional capital was returned to shareholders through the share repurchase program. In the fourth quarter of 2017, the Company resumed open market stock repurchases under its prior board-authorized repurchase authority and purchased 14,080 shares of its

Table of Contents

Series A common stock at a total cost of \$69. In 2015, the Company purchased 472,245 of its Series A common shares through open market transactions for \$3,146. These purchases are recorded as treasury stock.

Traditionally, the Company's primary revenues have been generated from advertising within its core newspapers, niche publications and related websites and from subscription and single copy sales of its printed newspapers. As a result of competitive and economic conditions, the newspaper industry has faced significant revenue declines for more than a decade. Therefore, the Company has sought to diversify its revenues through development and investment in new product offerings, increased circulation rates and leveraging of its existing assets to offer cost efficient commercial printing and distribution services to its local markets. The Company continually evaluates the overall performance of its core products to ensure existing assets are deployed adequately to maximize return.

In 2017, 2016 and 2015, the Company's advertising revenue from its core newspapers continues to be adversely affected by the shift of advertiser spending to other forms of media and the increased accessibility of free online news content, as well as news content from other sources, which resulted in declines in print advertising and paid print circulation volumes and revenue. The most significant decline in advertising revenue has been attributable to print display and classified categories. These categories, which represented 24.0 percent of consolidated revenue in 2015, have declined to 18.9 percent of consolidated revenue in 2017, and further declines are likely in future periods. Decreases in print display and classified categories are indicative of continuing trends by advertisers towards digital platforms, which are widely available from many sources. In the current environment, companies are allocating more of their advertising spending towards programmatic channels that provide digital advertising on multiple platforms with enhanced technology for targeted delivery and measurement. As a result of the continued declines the Publishing segment experienced, and expects to continue to experience, in advertising and print circulation revenues, the Publishing reporting unit's goodwill was determined to be fully impaired as of December 31, 2016. The Company recorded a goodwill impairment charge of \$22,682 in the fourth quarter of 2016. Certain goodwill and intangible assets previously reported in the Marketing Services segment were moved to the Publishing segment as a result of the first quarter 2017 segment reorganization. Therefore, the Company recorded a noncash goodwill impairment charge of \$228 in the first quarter of 2017.

The Company has responded to these challenges by expanding programmatic channels through which it works to meet customer demand for digital advertisement opportunities in display, mobile, video and social media categories. By utilizing advertising exchanges to apply marketing insight, the Company believes it offers greater value to customers through focused targeting of advertising to potential customers. In May 2016, the Company installed a meter on its website and began to build a base of paid digital subscribers.

Table of Contents

The Company's expanded digital and marketing services product offerings leverage the Company's existing resources and relationships to offer additional value to existing and new advertising customers. Solutions provided by DMV Holdings include development of mobile websites, search engine marketing and optimization, video, mobile advertising, email marketing, advertising analytics and online reputation management services. Through Speakeasy, the Company is able to target middle-market business customers and provide turnkey social media account management and content development services.

Advertising and marketing services revenue

Advertising and marketing services revenue was 57.6 percent, 57.8 percent and 57.6 percent of total revenue for 2017, 2016 and 2015, respectively.

	Years Ended December 31,						
	2017	Percentage Change		2016 (Recast)	Percentage Change		2015 (Recast)
Publishing							
Advertising revenue	\$ 111,968	(8.0)	%	\$ 121,703	(12.3)	%	\$ 138,729
Marketing Services							
Digital services	26,489	6.2	%	24,946	58.8	%	15,706
Other services	4,790	30.7	%	3,666	55.7	%	2,355
Advertising and Marketing Services	\$ 143,247	(4.7)	%	\$ 150,315	(4.1)	%	\$ 156,790

Publishing

Advertising revenue – The Company has a comprehensive portfolio of print and digital advertising products, which include display, classified, preprint and digital advertising. Display and classified revenue primarily represents sales of advertising space within the Company's core and niche newspapers. As advertisers continue to diversify marketing budgets to incorporate more and varied avenues of reaching consumers, traditional display advertising continues to decline. Display revenue decreased in 2017 primarily due to lower retail advertising. In retail, the department store, food and beverage, furniture, electronics, automotive and other retail categories experienced the greatest declines with a combined revenue decrease of approximately \$4,020 driven by a volume decline of 18.5 percent and a decrease in rates for most of these categories. In 2016, display revenue decreased due to lower retail and general advertising in

substantially all categories except sporting goods. In retail, the department store, food and beverage, furniture, electronics and entertainment categories experienced the greatest declines with a combined revenue decrease of approximately \$4,301 driven by a volume decline of 23.3 percent and varying rate declines across most categories. The decline in classified advertising in 2017 was primarily due to volume declines in all classified categories, except a slight increase in employment, partially offset by varying rate increases across most categories. In 2016, overall classified revenue decreased due to lower volumes in employment and obituaries. This decline was partially offset by an increase in automotive.

Preprint revenue primarily reflects preprinted advertisements inserted into the Company's core newspapers and niche publications, or distributed to non-subscribers through the mail. Revenue decreased in 2017 and 2016 due to a decline in the rate and volume of preprint newspaper inserts, consistent with the decline in circulation volumes discussed below.

Digital Publishing revenue is primarily comprised of banner and real estate classified advertising on The Dallas Morning News' website dallasnews.com, online employment and obituary classified advertising on third-party websites sold under a print/digital bundle package and sales of online automotive classifieds on the cars.com platform. Revenue increased in 2017, primarily due to a higher volume of online banner advertisements on dallasnews.com.

Table of Contents

Marketing Services

Digital services – Digital marketing revenue includes targeted and multi-channel advertising placed on third-party websites, content development, social media management, search optimization and other consulting. The 2015 acquisition of DMV Holdings provided a significant portion of the growth in digital marketing revenue. For 2017, DMV Holdings revenue increased 31.3 percent, or \$5,250. The DMV Holdings revenue increase offset approximately 53 percent of the core print advertising revenue decline during 2017.

In 2016, DMV Holdings revenue increased 97.6 percent, or \$6,486, and organic growth from Speakeasy resulted in increased revenue of \$2,068. These revenue increases offset approximately 55 percent of the core print advertising revenue decline during 2016.

Other services – Other services revenue increased \$1,124, or 30.7 percent, due to the sale of promotional merchandise by MarketingFX, acquired in 2015.

Circulation revenue

Circulation revenue was 30.9 percent, 30.6 percent and 30.7 percent of total revenue for 2017, 2016 and 2015, respectively.

	Years Ended December 31,				
	2017	Percentage Change	2016	Percentage Change	2015
Publishing					
Circulation	\$ 76,884	(3.4) %	\$ 79,619	(4.7) %	\$ 83,581

Revenue decreased in 2017 primarily due to a decline in home delivery volume of 8.3 percent, partially offset by home delivery rate increases applied throughout the year. Single copy revenue also decreased compared to prior year, driven by a decline in single copy paid print circulation volume of 19.3 percent. The single copy volume decline was partially offset by an increase in the daily single copy rate, which was put in place in November 2016. In addition, the digital-only subscription revenue increased \$1,167, or 75.2 percent. In 2016, revenue decreased due to a decline in home delivery and single copy paid print circulation volumes of 8.7 percent and 13.7 percent, respectively. These

volume declines were partially offset by a rate increase of 5.6 percent for home delivery.

Volume declines in circulation revenue have been more pronounced with single copy sales. Price increases and supplemental editions are critical to maintaining the revenue base to support this product. In 2017, the Company generated \$922 of incremental circulation revenue through the distribution of specialty magazines to its core subscribers.

Printing, distribution and other revenue

Printing, distribution and other revenue was 11.5 percent, 11.6 percent and 11.7 percent of total revenue for 2017, 2016 and 2015, respectively.

	Years Ended December 31,				
	2017	Percentage Change	2016 (Recast)	Percentage Change	2015 (Recast)
Publishing					
Printing, Distribution and Other	\$ 28,495	(5.2) %	\$ 30,050	(5.3) %	\$ 31,737

The Company aggressively markets the capacity of its printing and distribution assets to other newspapers that would benefit from cost sharing arrangements. Revenue generated from commercial printing decreased in 2017, primarily due to a decline in volumes associated with certain national newspapers. Additionally, the Company's event activation, promotion and marketing services provider, CrowdSource, historically worked closely with cities and other corporate sponsors to bring large entertainment events to local communities in 2015; however, starting in the second half of 2016, the Company no longer hosted as many events as in prior years.

Table of Contents

Operating Costs and Expense

The table below sets forth the components of the Company's operating costs and expense by segment.

	Years Ended December 31,						
	2017	Percentage Change		2016 (Recast)	Percentage Change		2015 (Recast)
Publishing

Total Operating Costs and Expense	\$ 258,679	(8.8)	%	\$ 283,730	(2.3)	%	\$ 290,403

Publishing

Employee compensation and benefits – The Company continues to implement measures to optimize its workforce and reduce risk associated with future obligations towards employee benefit plans. Employee compensation and benefits increased slightly in 2017 due to higher pension expense of \$5,947, partially offset by a decrease of \$4,916 related to

headcount reductions within the Company that were effected in the latter half of 2016. The increase in pension expense was primarily due to a noncash pension settlement charge of \$5,911 recorded to reflect the amortization of losses in accumulated other comprehensive loss associated with liquidated pension obligations in 2017. In 2016, employee compensation and benefits decreased \$20,356 due to a decrease in pension expense of \$13,793 and a decrease of \$6,563 due to headcount reductions within the Company that were effected in the second half of 2015.

Other production, distribution and operating costs – Expense decreased in 2017, reflecting savings as the Company continues to manage discretionary spending. Savings were generated by reductions in temporary services, consulting, promotional spending, travel and other outside service expenses. In 2016, expense decreased due to reductions in temporary and personnel recruiting services, promotional spending, travel and other outside service expenses.

Newsprint, ink and other supplies – Expense decreased in 2017 and 2016 due to reduced newsprint costs associated with lower circulation volumes from the Company and certain third-party newspapers and the discontinuation of unprofitable product lines in 2016. Newsprint consumption approximated 23,296, 26,752 and 31,141 metric tons in 2017, 2016 and 2015, respectively, at an average cost per metric ton of \$564, \$532 and \$550, respectively. The average purchase price for newsprint was \$566, \$538 and \$534 per metric ton in 2017, 2016 and 2015, respectively.

Depreciation – Expense decreased in 2017 and 2016 due to a lower depreciable asset base as a higher level of in-service assets were fully depreciated. Capital spending is primarily directed towards digital platforms, production systems and technology investments. The Company is committed to investing the appropriate levels of capital to sustain existing operations and develop new operations having an appropriate return on the investment. Capital spending is expected to be approximately \$5,000 in 2018.

Amortization – All definite-lived intangible assets are fully amortized.

Asset impairments – In 2017, the Company impaired \$3,116 of assets related to the property previously used as the corporate headquarters, as these assets are no longer in use. Additionally, as a result of the first quarter 2017 segment reorganization, certain goodwill and intangible assets previously reported in the Marketing Services segment were moved to the Publishing segment, which was fully impaired as of December 31, 2016. Therefore, the Company recorded a noncash goodwill impairment charge of \$228 in the first quarter of 2017. In 2016, the Company recorded a noncash goodwill impairment charge of \$22,682, fully impairing the Publishing reporting unit's goodwill.

Table of Contents

Marketing Services

Employee compensation and benefits – Expense increased in 2017 by \$1,290, primarily related to headcount growth of 16, or 19.5 percent, in DMV Holdings.

Other production, distribution and operating costs – Expenses increased in 2017 by \$853, primarily attributed to an increase in sales related expenses driven by the growth in DMV Holdings.

Newsprint, ink and other supplies – Expense increased in 2017 primarily due to an increase in promotional material printing costs associated with MarketingFX.

Depreciation – Marketing and event services’ cost structure is primarily labor driven. Capital purchases are required to support technology investments. Capital assets are primarily depreciated over a life of three years. Capital spending is expected to be approximately \$200 in 2018.

Amortization – Expense is primarily related to customer lists associated with DMV Holdings.

Other

The table below sets forth the other components of the Company’s results of operations.

	Years Ended December 31,				2015
	2017	Percentage Change	2016	Percentage Change	
Other Income (Expense):					
Loss from equity method investments, net	\$ —	N/A	\$ —	100.0 %	\$ (1,065)
Other income (expense), net	13,954	508.3 %	2,294	667.8 %	(404)

Edgar Filing: A. H. Belo Corp - Form 10-K

Total other income (expense), net	\$ 13,954	508.3	%	\$ 2,294	256.2	%	\$ (1,469)
Income Tax Benefit	\$ (6,260)	(175.5)	%	\$ (2,272)	(44.7)	%	\$ (1,570)

Other Income (Expense) – Other income (expense) is primarily comprised of gain (loss) on disposal of fixed assets and gain (loss) from investments.

On September 22, 2017, the Company completed the sale of one parcel of land and received net cash proceeds of \$8,252, generating a gain of approximately \$5,000. On October 19, 2017, the Company completed the sale of two parcels of land and received net cash proceeds of \$13,048, generating a gain of approximately \$7,500.

On December 31, 2017, the Company completed the sale of the outstanding capital stock of the Denton Publishing Company, owner of the Denton Record-Chronicle, to Denton Media Company, Inc., generating a loss of \$260. The business did not meet the requirements of a discontinued operation; therefore, all financial results are included in continuing operations. Prior to the disposition, the Denton Record-Chronicle was included in the Publishing segment results. In connection with the sale, the Company entered into a sublease with Denton Publishing Company for a term ending on July 30, 2023. Since the Company is no longer the tenant, the Company recorded a loss of \$589, included in other income (expense), net, for the Company’s remaining obligation after the term of the sublease ends.

In December 2016, the Company completed the sale of land in Providence, Rhode Island, and received net cash proceeds of \$921 and a \$1,000 three-year note receivable upon closing of the transaction, generating a loss of \$216. Additionally, the Company completed the sale of a parking lot located in downtown Dallas, Texas. The Company received net cash proceeds of \$4,458, generating a gain of \$1,842.

In 2015, the Company completed the sale of land and a building, which served as the headquarters of The Providence Journal. The Company received net proceeds of \$6,119 upon closing of the transaction, generating a loss of \$265, which was offset by \$328 of returned escrow received in 2016. The Company demolished existing structures on an additional property in Providence, Rhode Island, at a cost of \$251.

In the fourth quarter of 2015, the Company’s ownership interest in Wanderful Media, LLC (“Wanderful”) decreased to less than 20 percent of the outstanding membership interests of Wanderful and the Company no longer exerted significant influence over Wanderful. Accordingly, the Company discontinued the use of the equity method of accounting for the investment in Wanderful, and began accounting for the investment under the cost method. In the fourth quarter of 2016, the Company abandoned its remaining ownership interest in Wanderful.

Table of Contents

Tax provision – A tax benefit of \$6,260 was recorded in 2017. The benefit was primarily due to deductions associated with the voluntary pension contribution of \$20,000, partial release of the valuation allowance and a capital loss on the sale of the Denton Record-Chronicle, of which a portion will be carried back to 2014 for federal income tax purposes. These deductions offset taxable income that resulted from the sale of the Company’s three properties in downtown Dallas, Texas. Additionally, the Company’s deferred tax assets and liabilities were remeasured to reflect the reduction in the U.S. corporate income tax rate from 35 percent to 21 percent, resulting in a \$3,570 decrease in income tax benefit for the year ended December 31, 2017.

A tax benefit of \$2,272 was recorded in 2016. The benefit was primarily due to deductions associated with capital losses on the sale of certain investments, which were carried back to 2014 for federal income tax purposes.

Legal proceedings – From time to time, the Company is involved in a variety of claims, lawsuits and other disputes arising in the ordinary course of business. Management routinely assesses the likelihood of adverse judgments or outcomes in these matters, as well as the ranges of probable losses to the extent losses are reasonably estimable. Accruals for contingencies are recorded when, in the judgment of management, adverse judgments or outcomes are probable and the financial impact, should an adverse outcome occur, is reasonably estimable. The determination of likely outcomes of litigation matters relates to factors that include, but are not limited to, past experience and other evidence, interpretation of relevant laws or regulations and the specifics and status of each matter. Predicting the outcome of claims and litigation and estimating related costs and financial exposure involves substantial uncertainties that could cause actual results to vary materially from estimates and accruals. In the opinion of management, liabilities, if any, arising from other currently existing claims against the Company would not have a material adverse effect on A. H. Belo’s results of operations, liquidity or financial condition.

Critical Accounting Policies and Estimates

A. H. Belo’s consolidated financial statements reflect the application of accounting policies that require management to make significant estimates and assumptions. The Company believes that the following are the critical accounting policies, estimates and assumptions currently affecting A. H. Belo’s financial position and results of operations. See the Notes to the Consolidated Financial Statements, Note 1 – Significant Accounting Policies and Recently Issued Accounting Standards, for additional information concerning significant accounting policies.

Revenue Recognition. The Company’s principal sources of revenue are the advertising space in published issues of its newspapers and on the Company’s and third-party websites, the sale of newspapers to distributors and individual subscribers, as well as amounts charged to customers for commercial printing, distribution and direct mail. Advertising revenue is recorded net of agency commission at the time the advertisements are published in the newspaper and ratably over the period of time the advertisement is placed on the websites. Marketing Services revenue is recognized at the time the services are rendered. Proceeds from subscriptions are deferred and included in

revenue ratably over the term of the subscriptions. Subscription revenue under buy-sell arrangements with distributors is recorded based on the net amount received from the distributor, whereas subscription revenue under fee-based delivery arrangements with distributors is recorded based on the amount received from the subscriber. Commercial printing and direct mail revenue is recorded when the product is distributed or shipped.

Goodwill. Goodwill is recorded at the reporting unit level based on the excess fair value of prior business acquisitions over the fair value of the assets and liabilities acquired. Reporting units of the Company are based on its internal reporting structure and represent a reporting level below an operating segment. Unless qualitative factors allow the Company to conclude it is more-likely-than-not that the fair value of the reporting unit exceeds its carrying value, goodwill is tested for impairment by estimating the fair value of the reporting unit. If the fair value of the reporting unit is less than its carrying value, the fair value for the reporting unit's underlying assets and liabilities is determined and goodwill is adjusted accordingly. In determining the fair value for a reporting unit, the Company considers recent stock and sales transaction prices of peer group companies as well as the present value of expected future cash flows of the reporting unit. Significant assumptions include sales and expense growth rates, discount rates, capital expenditures and the impact of current market conditions. These estimates could be materially impacted by changes in market conditions. The Company performs the goodwill impairment test as of December 31 each fiscal year or when changes in circumstances indicate an impairment event may have occurred. Impairment charges represent noncash charges and do not affect the Company's liquidity, cash flows from operating activities or have any effect on future operations.

The Company tested the Marketing Services segment's goodwill for impairment as of December 31, 2017, using a discounted cash flow methodology with a peer-based, risk-adjusted weighted average cost of capital, combined with a market approach using peer-based earnings multiples. The Company believes the use of a discounted cash flow approach, combined with the market approach, is the most reliable indicator of the estimated fair value of the business. Upon completion of the annual test, it was determined the Marketing Services reporting unit's fair value exceeded its carrying value by approximately 93 percent. Accordingly, no impairment was warranted.

Pension. The Company follows accounting guidance for single-employer defined benefit plans. Plan assets and the projected benefits obligation are measured each December 31, and the Company records as an asset or liability for the net funded position of the plans. Certain changes in actuarial valuations related to returns on plan assets and projected benefit obligations are recorded to accumulated

Table of Contents

other comprehensive income (loss) and are amortized to net periodic pension expense over the weighted average remaining life of plan participants, to the extent the cumulative balance in accumulated other comprehensive income (loss) exceeds 10 percent of the greater of the respective plan's (a) projected benefit obligation or (b) the market-related value of the plan's assets. Net periodic pension expense is recognized each period by accruing interest expense on the projected benefit obligation and accruing a return on assets associated with the plan assets. Participation in and accrual of new benefits to participants has been frozen since 2007 and, accordingly, on-going service costs are not a component of net periodic pension expense. From time to time, the Company-sponsored plans may settle pension obligations with certain plan participants through the plans' master trust as part of its de-risking strategies. The gains or losses associated with settlements of plan obligations to participants are recognized to earnings if such settlements exceed the interest component of net periodic pension cost for the year. Otherwise, such amounts are included in actuarial gains (losses) in accumulated other comprehensive income (loss). Re-measurement of plan assets and liabilities upon a significant settlement or curtailment event is performed based on the values of the month-end closest to the event.

The projected benefit obligations of the A. H. Belo Pension Plans are estimated using the Citigroup Pension Yield Curve, which is based upon a portfolio of high quality corporate debt securities with maturities that correlate to the timing of benefit payments to the plans' participants. Future benefit payments are discounted to their present value at the appropriate yield curve discount rate to determine the projected benefit obligation outstanding at each year end. The yield curve discount rates as of December 31, 2017 and 2016, were 3.4 percent and 3.8 percent, respectively.

Interest expense included in net periodic pension expense (benefit) is based on the Citigroup Pension Yield Curve established at the beginning of the fiscal year. The beginning of year yield curve discount rate for 2017 was 3.8 percent. Due to the 2017 de-risking action, a settlement charge was triggered as of September 30, 2017. Net periodic benefit cost for the fourth quarter of 2017 and the settlement charge were determined using a yield curve discount rate of 3.5 percent. Interest expense for 2016 and 2015 was determined using beginning of year yield curve discount rate of 4.0 percent.

The Company assumed a 6.5 percent long-term rate of return on the plans' assets in 2017, 2016 and 2015. This return is based upon historical returns of similar investment pools having asset allocations consistent with the expected allocations of the A. H. Belo Pension Plans. Investment strategies for the plans' assets are based upon factors such as the remaining life expectancy of participants and market risks. The Company currently targets the plans' assets invested in equity securities and fixed income securities to approximate 50 percent and 50 percent, respectively.

Income Taxes. The Company uses the asset and liability method of accounting for income taxes and recognizes deferred tax assets and liabilities based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates. The Company establishes a valuation allowance if it is more-likely-than-not that the deferred tax assets will not be realized. The factors used to assess the likelihood of realization of the deferred tax assets include reversal of future deferred tax liabilities, available tax planning strategies, future taxable income and taxable income in prior carryback years.

The Company evaluates any uncertain tax positions each reporting period by tax jurisdiction to determine if it is more-likely-than-not that the tax position will not be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the financial statements for such positions are measured based on the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement. If a net operating loss or other tax credit carry forward exists, the Company records the unrecognized tax benefits for such tax positions as a reduction to a deferred tax asset. Otherwise, the unrecognized tax benefits are recorded as a liability. The Company records a liability for uncertain tax positions taken or expected to be taken in a tax return. Any change in judgment related to the expected ultimate resolution of uncertain tax positions is recognized in earnings in the period in which such change occurs. Interest and penalties, if any, related to unrecognized tax benefits are recorded in interest expense.

Recent Accounting Standards

See the Notes to the Consolidated Financial Statements, Note 1 - Significant Accounting Policies and Recently Issued Accounting Standards, regarding the impact of certain recent accounting pronouncements.

Table of Contents

Liquidity and Capital Resources

The Company's cash balances as of December 31, 2017 and 2016, were \$57,660 and \$80,071, respectively. The decrease in the cash balance during 2017 is primarily due to capital expenditures, a pension contribution, a return of capital to shareholders through dividends and lower display, preprint and classified advertising revenues. These cash outflows were partially offset by an increase in cash from real estate sales. In 2016, the cash balance increased primarily due to asset sales and expense management, partially offset by return of capital to shareholders, capital expenditures and lower display, preprint and classified advertising revenues.

The Company intends to hold existing cash for purposes of future investment opportunities, potential return of capital to shareholders and for contingency purposes. Although revenue from Publishing operations is expected to continue to decline in future periods, operating contributions expected from the Company's Marketing Services businesses and other cost cutting measures, are expected to be sufficient to fund operating activities and capital spending of approximately \$5,200 over the next 12-month period.

The future payment of dividends is dependent upon available cash after considering future operating and investing requirements and cannot be guaranteed. The Company resumed open market stock repurchases in the fourth quarter of 2017 under its prior board-authorized repurchase authority. Current holdings of treasury stock could be used to satisfy its obligations related to share-based awards issued to employees and directors, or can be sold on the open market.

The following discusses the changes in cash flows by operating, investing and financing activities in 2017, 2016 and 2015.

Operating Cash Flows

Net cash provided by (used for) continuing operations was \$(12,095), \$7,616 and \$(4,779) in 2017, 2016 and 2015, respectively.

Cash flows from continuing operating activities decreased in 2017, primarily due to the voluntary contribution of \$20,000 to the A. H. Belo Pension Plans, which offset taxable income that resulted from the sale of the Company's three properties in downtown Dallas, Texas.

Cash flows from continuing operating activities improved by \$12,395 in 2016 compared to 2015, primarily due to changes in working capital and other operating assets and liabilities of \$8,372.

Cash flows from continuing operating activities increased in 2015 compared to 2014, primarily due to reduced pension contributions of \$29,927. No pension contributions were required in 2015. Net cash used for operating activities of discontinued operations was \$24 in 2015.

Investing Cash Flows

Net cash provided by (used for) investing activities was \$9,277, \$(1,211) and \$(15,270) in 2017, 2016 and 2015, respectively.

Cash flows from investing activities improved in 2017, primarily due to cash proceeds of \$21,300 received during 2017 related to the sale of three properties in downtown Dallas, Texas. Capital expenditures of \$12,005, which included approximately \$7,000 for the Company's new headquarters, partially offset the proceeds received from the real estate sales.

Cash flows from investing activities increased in 2016 compared to 2015, primarily due to the 2015 acquisition of DMV Holdings for a purchase price of \$14,110. Cash flows used for investing activities in 2016 included capital expenditures of \$6,597.

Cash flows from investing activities decreased in 2015, primarily due to the acquisition of DMV Holdings. Capital expenditures of \$7,572 were offset by \$6,119 of proceeds received in 2015 from the sale of the land and building, which previously served as the headquarters of The Providence Journal.

Financing Cash Flows

Net cash used for financing activities was \$19,593, \$4,714 and \$59,718 in 2017, 2016 and 2015, respectively.

Cash flows used for financing activities increased in 2017 compared to 2016, due to the first quarter 2017 acquisitions of the remaining interests in DMV Holdings and Speakeasy for a purchase price of \$7,120 and \$2,111, respectively. Cash used for financing activities included total dividends paid of \$10,114, \$7,029 and \$57,200 in 2017, 2016 and 2015, respectively. Dividends paid in 2017 included a special dividend of \$0.14 per share, returning \$3,106 to shareholders and holders of RSUs. Dividends paid in 2015 included a special dividend of \$2.25 per share, declared and recorded in 2014, returning \$50,148 to shareholders and holders of RSUs.

Table of Contents

In the fourth quarter of 2017, the Company resumed open market stock repurchases under its prior board-authorized repurchase authority and purchased 14,080 shares of its Series A common stock at a total cost of \$69. In 2015, the Company purchased 472,245 shares of its Series A common stock at a total cost of \$3,146.

Financing Arrangements

None.

Contractual Obligations

The table below sets forth the summarized commitments of the Company as of December 31, 2017. See the Notes to the Consolidated Financial Statements, Note 10 - Commitments and Contingencies.

	Total	2018	2019	2020	2021	2022	Thereafter
Operating lease commitments	\$ 42,995	\$ 3,190	\$ 4,421	\$ 3,589	\$ 3,436	\$ 3,342	\$ 25,017
Capital commitments	155	155	—	—	—	—	—
Total commitments	\$ 43,150	\$ 3,345	\$ 4,421	\$ 3,589	\$ 3,436	\$ 3,342	\$ 25,017

In December 2017, AHC Dallas Properties, LLC, a wholly-owned subsidiary of the Company, assumed a 12-year lease agreement for office space that serves as the headquarters of the Denton Record-Chronicle. In connection with the sale of Denton Publishing Company, owner of the Denton Record-Chronicle, to Denton Media Company, Inc., the Company entered into a sublease with Denton Publishing Company for a term ending on July 30, 2023; see Note 12 – Sales of Assets and Other Dispositions.

In December 2016, the Dallas Morning News, Inc., a wholly-owned subsidiary of the Company, entered into a 16-year lease agreement for office space for the Company's new corporate headquarters. The Company recognizes rent expense on a straight-line basis. Per the amended lease agreement, rent payments will begin in November 2018.

Based on the applicable tax and labor laws governing pension plan funding, the Company expects to make no required contributions to the A. H. Belo Pension Plans in 2018.

On December 7, 2017, the Company's board of directors declared an \$0.08 per share dividend to shareholders of record and holders of RSUs as of the close of business on February 9, 2018, payable on March 2, 2018.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

A. H. Belo has exposure to changes in the price of newsprint. The Company does not engage in the purchase of derivative contracts to hedge against price fluctuations that may occur. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion of this risk.

The investment assets and actuarial liabilities associated with the A. H. Belo Pension Plans are impacted by market factors such as interest rates, inflation and the overall economic environment. Changes in these risk factors could have a direct and material impact on the funded status of the A. H. Belo Pension Plans and the level of funding the Company is required to meet each year.

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements, together with the Report of Independent Registered Public Accounting Firm, are included herein starting on page 38 of this Annual Report on Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act), that are designed to ensure that information required to be disclosed by the Company in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed is accumulated and communicated to management, including the Company's Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management, under the supervision and with the participation of the Company's Principal Executive Officer and Principal Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, the Company's Principal Executive Officer and Principal Financial Officer have concluded that as of December 31, 2017, the Company's disclosure controls and procedures were not effective due to material weaknesses in its internal control over financial reporting described below.

Notwithstanding the material weaknesses, management believes the consolidated financial statements included in this Annual Report on Form 10-K present fairly, in all material respects, the Company's financial condition, results of operations and cash flows at and for the periods presented in accordance with U.S. generally accepted accounting principles.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the Company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the consolidated financial statements

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

Table of Contents

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2017, using the criteria in the Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this evaluation, the Company's management determined the following control deficiencies existed as of December 31, 2017:

- The Company did not have effective monitoring activities over the operation of a process-level reconciliation control to assess the existence and accuracy of the single copy sales returns.
- The Company did not adequately train personnel to operate the process-level control over the accuracy of digital advertising revenue transactions.
- The Company did not have an effective risk assessment process to design certain process-level control activities, specifically an appropriate control over the integrity of tax-basis fixed asset balances transferred from one information system to another and appropriate controls over the completeness, existence, and accuracy of Speakeasy revenue.

Certain of the control deficiencies described above resulted in an immaterial misstatement in Speakeasy revenue in the preliminary consolidated financial statements as of and for the fiscal year ended December 31, 2017, that was corrected prior to issuance. These control deficiencies create a reasonable possibility that a material misstatement to the consolidated financial statements would not be prevented or detected on a timely basis, and therefore we concluded that the deficiencies represent material weaknesses in the Company's internal control over financial reporting and the Company's internal control over financial reporting was not effective as of December 31, 2017.

KPMG LLP, an independent registered public accounting firm, has issued an adverse report on the operating effectiveness of the Company's internal control over financial reporting as of December 31, 2017, and its report is included on [page 39](#) of this Annual Report on Form 10-K.

Remediation Plans

The Company's management, with oversight from the Audit Committee of the Board of Directors of the Company, is actively engaged in remediation efforts to address the material weaknesses identified above. Management has taken, and will take, a number of actions to remediate the 2017 material weaknesses including the following:

- Develop and deliver Internal Controls training to individuals associated with these control deficiencies and enhance training provided to all personnel who have financial reporting or internal control responsibilities to learn from these deficiencies. The training will include a review of individual roles and responsibilities related to internal controls and reemphasize the importance of completing the control procedures on a timely basis.
- Improve monitoring and risk assessment activities to address these control deficiencies.

These improvements are targeted at strengthening the Company's internal control over financial reporting and remediating the 2017 material weaknesses. The Company remains committed to an effective internal control environment and management believes that these actions, and the improvements management expects to achieve as a result, will effectively remediate the 2017 material weaknesses. However, the material weaknesses in the Company's internal control over financial reporting will not be considered remediated until the controls operate for a sufficient period of time and management has concluded, through testing that these controls operate effectively. The Company plans to have its enhanced review procedures and documentation standards in place and operating in the first quarter 2018, and expects that the remediation of the 2017 material weaknesses will be completed by December 31, 2018.

Changes in Internal Control Over Financial Reporting

Except as related to the material weaknesses described above, there have been no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the fourth fiscal quarter ended December 31, 2017, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

A. H. Belo Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of A. H. Belo Corporation and subsidiaries (the Company) as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive income(loss), shareholders' equity, and cash flows for each of the years in the three year period ended December 31, 2017, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 16, 2018 expressed an adverse opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the Company's auditor since 2009.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

A. H. Belo Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited A. H. Belo Corporation and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission". In our opinion, because of the effect of the material weakness, described below, on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive income(loss), shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively, the consolidated financial statements), and our report dated March 16, 2018 expressed an unqualified opinion on those consolidated financial statements.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. Material weaknesses related to the ineffective monitoring activities over the operation of a process-level reconciliation control to assess the existence and accuracy of the single copy sales returns; inadequate training of personnel to operate the process-level control over the accuracy of digital advertising revenue transactions; and ineffective risk assessment over the design of process-level controls over the integrity of tax-basis fixed asset balances transferred from one information system to another and the completeness, existence, and accuracy of Speakeasy revenue, have been identified and included in management's assessment.

The material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2017 consolidated financial statements, and this report does not affect our report on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Disclaimer on Additional Information in Management's Report

We do not express an opinion or any other form of assurance on management's statements, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting, referring to corrective actions taken after December 31, 2017, relative to the aforementioned material weakness in internal control over financial reporting.
