6. Debt

Amended and Restated 2013 Credit Facility

In August 2013, the Company entered into a credit facility with Sun Trust Bank and other named lenders (the "2013 Credit Facility"). The 2013 Credit Facility provided a revolving line of credit. On March 31, 2014, the Company amended and restated the 2013 Credit Facility (the "Amended and Restated 2013 Credit Facility"). The Amended and Restated 2013 Credit Facility provided a maturing secured term loan in the principal amount of \$50,000, (the "Term Loan"), subject to quarterly amortization payments, and extended the term of the 2013 Credit Facility through March 31, 2019. The proceeds of the Term Loan were used, in part, to fund the acquisition of Sport Truck USA, Inc. ("Sport Truck") and to pay down the revolving line of credit provided under the 2013 Credit Facility. On December 12, 2014, the Company entered into the First Amendment to the Amended and Restated 2013 Credit Facility (the "First Amendment"). The First Amendment increased the Term Loan principal amount by \$30,000 to a total of \$56,750, subject to quarterly amortization payments, and extended the maturity of the Amended and Restated 2013 Credit Facility through December 12, 2019. The additional proceeds of the Term Loan made available through the First Amendment were used to partially fund the acquisition of Race Face Performance Products, Inc. and Easton Cycling (together "Race Face/Easton").

The Amended and Restated 2013 Credit Facility provides for interest at either a rate based on the London Interbank Offered Rate, or LIBOR, plus a margin ranging from 1.50% to 2.50%, or based on the prime rate offered by SunTrust Bank plus a margin ranging from 0.50% to 1.50%. At March 31, 2015, the one month LIBOR and prime rates were 0.18% and 3.25%, respectively. The Amended and Restated 2013 Credit Facility is secured by substantially all of the Company's assets, restricts the Company's ability to make certain payments and engage in certain transactions, and also requires that the Company satisfy customary financial ratios. The Company was in compliance with the covenants as of March 31, 2015.

The following table summarizes the line of credit under the Amended and Restated 2013 Credit Facility:

	As of March 31, 2015
Amount outstanding	\$—
Available borrowing capacity	\$60,000
Maximum borrowing capacity	\$60,000
Interest rate at March 31, 2015	1.93 %
Maturity date	December 12, 2019

As of March 31, 2015, future principal payments for long-term debt, including the current portion, are summarized as follows:

Fiscal Year	
2015 (remaining nine months)	\$2,128
2016	2,837
2017	4,256
2018	4,256
2019	35,813
Total	49,290
Less: current portion	(2,837)
Long-term debt less current portion	\$46,453

7. Commitments and Contingencies

Operating Leases—The Company has operating lease agreements for administrative, research and development, manufacturing and sales and marketing facilities and equipment that expire at various dates. The Company recognizes rent expense on a straight-line basis over the lease term and records the difference between cash rent payments and the recognition of rent expense as a deferred rent liability.

Indemnification Agreements—In the ordinary course of business, the Company may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners, and other parties with respect to certain matters, including, but not limited to, losses arising out of breach of such agreements, services to be provided by the Company or intellectual property infringement claims made by third parties. In addition, the Company has entered into indemnification agreements with directors and certain officers and employees that will require the Company, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors, officers or employees. While the outcome of these matters cannot be predicted with certainty, the Company does not believe that the outcome of any claims under indemnification arrangements will have a material effect on the Company's results of operations, financial position or liquidity.

Other Commitments—In connection with the acquisition of businesses, the Company has agreed to pay up to \$44,700 in additional consideration and acquisition related compensation through 2017, contingent upon the achievement of certain financial performance goals and in some cases continued employment through 2016. A portion of the obligation is denominated in Canadian dollars. See Note 9 - Fair Value Measurements and Note 13 - Acquisitions. No other material contractual obligation has changed since the Company's Annual Report on Form 10-K for the year ended December 31, 2014, as filed with the SEC on March 2, 2015.

8. Stockholders' Equity

Share Repurchase Program

On November 3, 2014, the Company's Board of Directors authorized the repurchase of up to an aggregate of \$40,000 in shares of our common stock under our stock repurchase program. Shares of common stock repurchased under this program are deemed issued but not outstanding. During the three months ended March 31, 2015, the Company repurchased 250 shares for a total of \$3,733. At March 31, 2015, \$35,696 remains available for repurchase under this plan. The repurchase program will expire on December 31, 2015 unless extended by the Board of Directors.

Equity Incentive Plans

During the three months ended March 31, 2015 and 2014, 44 and 265 shares of common stock, respectively, were issued due to the exercise of stock options, resulting in proceeds to the Company of approximately \$117 and \$1,156, respectively. There were no stock options granted or forfeited during the three months ended March 31, 2015 and 2014, respectively.

The following table summarizes the allocation of stock-based compensation in the accompanying consolidated statements of income:

	For the three months ended March 31,	
	2015	2014
Cost of sales	\$11	\$8
Sales and marketing	82	35
Research and development	23	12
General and administrative	936	766

Explanation of Responses:

Total	\$1,052	\$821
-------	---------	-------

There were no restricted stock units granted, vested, or forfeited during the three months ended March 31, 2015 and 2014, respectively.

11

Table of Contents

FOX FACTORY HOLDING CORP.

Notes to Condensed Consolidated Financial Statements - continued

(in thousands, except per share amounts)

(unaudited)

As of March 31, 2015, the Company had approximately \$10,251 of unrecognized stock-based compensation expense related to RSUs, which will be recognized over the remaining weighted-average vesting period of approximately 2.70 years. Additionally, as of March 31, 2015, the Company had approximately \$603 of unrecognized stock-based compensation expense related to stock options, which will be recognized over the remaining weighted-average vesting period of approximately 2.10 years.

9. Fair Value Measurements

The FASB's Accounting Standards Codification 820, "Fair Value Measurements and Disclosures" requires the valuation of assets and liabilities required or permitted to be either recorded or disclosed at fair value based on hierarchy of available inputs as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices for similar assets and liabilities in active markets, quoted prices for identical assets and liabilities in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

As of March 31, 2015, the carrying amount of the principal under the Company's Amended and Restated 2013 Credit Facility approximates fair value because it has a variable interest rate that reflects market changes in interest rates and changes in the Company's net leverage ratio. As of March 31, 2015, the Company used Level 2 inputs to determine the fair value of its Amended and Restated 2013 Credit Facility.

The Company measured its contingent consideration liability arising from the acquisition of Sport Truck using Level 3 unobservable inputs (see Note 13 - Acquisitions). The fair value of the contingent consideration liability associated with the achievement of adjusted EBITDA targets is estimated at each balance sheet date by applying a Black-Scholes model to the Company's most recent financial projection. The unobservable inputs to the valuation model that have the most significant effect on the estimated fair value of the Company's contingent consideration liability are the projected results, the probabilities that actual results will exceed the projection and the volatility surrounding the expected results. The Company estimated the probabilities of actual results exceeding the projection during various years of the earn-out at values ranging from 70% to 75% as of March 31, 2015, compared to an overall estimate of 75% for all annual periods at the acquisition date. Additionally, volatility was measured at 35% as of March 31, 2015, compared to 41% at the acquisition date. The fair value of contingent consideration was estimated at \$21,304 as of March 31, 2015, an increase of \$2,269 from the acquisition date valuation of \$19,035 and an increase of \$52 from the valuation at December 31, 2014. The change in fair value is recorded as a component of fair value adjustment of contingent consideration and acquisition related compensation in the accompanying condensed consolidated statements of income for the three months ended March 31, 2015.

10. Income Taxes

	For the three months ended March 31,		
	2015	2014	
Provision for income taxes	\$454	\$1,728	
Effective tax rates	37.1	% 37.0	%

For the three months ended March 31, 2015, the difference between the Company's effective tax rate and the 35% federal statutory rate resulted primarily from state taxes as well as an increase to our liability for unrecognized tax benefits due to routine interest accruals. The increases were partially offset by a benefit from the domestic production activity deduction.

Table of Contents

FOX FACTORY HOLDING CORP.

Notes to Condensed Consolidated Financial Statements - continued

(in thousands, except per share amounts)

(unaudited)

For the three months ended March 31, 2014, the difference between the Company's effective tax rate and the 35% federal statutory rate resulted primarily from state taxes, partially offset by a benefit for the domestic production activity deduction.

As of March 31, 2015, the Company had \$7,809 of unrecognized tax benefits, of which approximately \$7,028, if recognized, would favorably impact the effective tax rate. The Company regularly engages in discussions and negotiations with tax authorities regarding tax matters in various jurisdictions. The Company believes it is reasonably possible that certain federal, foreign, and state tax matters may be concluded in the next 12 months. Specific positions that may be resolved include issues involving the deductibility of amortization and depreciation deductions which were incurred as a result of the acquisition of the Company in 2008. The Company estimates that it is reasonably possible that the unrecognized tax benefits at March 31, 2015 could be reduced by approximately \$1,323 in the next twelve months.

The Company's federal tax returns for 2011 forward are subject to examination by tax authorities. The Company's 2011 and 2012 state tax returns are currently under examination by the California Franchise Tax Board, and 2010 and 2013 forward California tax returns are subject to future examination.

11. Earnings Per Share

Basic earnings per share ("EPS") amounts are computed by dividing net income for the period by the weighted average number of common shares outstanding during the period. Diluted EPS amounts are computed by dividing net income for the period by the weighted average number of shares of common stock and potentially dilutive common stock outstanding during the period. Potentially dilutive common shares include shares issuable upon the exercise of outstanding stock options and vesting of restricted stock units, which are reflected in diluted earnings per share by application of the treasury stock method.

The following table presents the calculation of basic and diluted earnings per share:

	For the three months ended March 31,	
	2015	2014
Net income	\$770	\$2,941
Weighted average shares used to compute basic earnings per share	37,052	36,419
Dilutive effect of employee stock plans	889	1,147
Weighted average shares used to compute diluted earnings per share	37,941	37,566
Earnings per share:		
Basic	\$0.02	\$0.08
Diluted	\$0.02	\$0.08

The Company did not exclude any potentially dilutive shares from the calculation of diluted earnings per share for the three months ended March 31, 2015 and 2014, as none of these shares would have been antidilutive.

12. Segments

The Company has determined that it has a single operating and reportable segment. The Company considers operating segments to be components of the Company in which separate financial information is available that is evaluated regularly by the Company's chief operating decision maker in deciding how to allocate resources and in assessing performance. The chief operating decision maker for the Company is the Chief Executive Officer. The Chief Executive Officer reviews financial information presented on a consolidated basis for purposes of allocating resources and evaluating financial performance.

Explanation of Responses:

The following table summarizes total sales generated by geographic location of the customer:

	For the three months ended March 31,	
	2015	2014
United States	\$32,793	\$24,033
Asia	12,345	11,331
Europe	15,065	16,192
Rest of the world	7,585	4,552
Total sales	\$67,788	\$56,108

The Company's long-lived assets by geographic location are as follows:

	As of	As of
	March 31, 2015	December 31, 2014
United States	\$17,751	\$16,579
International	2,735	3,180
Total long-lived assets	\$20,486	\$19,759

The following table summarizes total sales by product category:

	For the three months ended March 31,	
	2015	2014
Bikes	\$35,619	\$33,687
Power vehicles	32,169	22,421
Total sales	\$67,788	\$56,108

13. Acquisitions

Sport Truck, USA, Inc.

On March 31, 2014, the Company acquired certain assets and assumed certain liabilities of Sport Truck. The transaction was accounted for as a business combination. The Company paid cash of \$40,770, plus the effective settlement of trade receivables in the amount of \$473. In addition, certain members of Sport Truck's executive management team agreed to refund up to \$1,432 of the proceeds from the sale, on a graduated basis, if they terminate employment prior to March 31, 2017. As a result, such payments have been excluded from the acquisition consideration, and will be recognized as compensation expense over the expected three year service period. In the three months ended March 31, 2015, the Company recognized \$122 of acquisition related compensation expense related to the arrangement, which is recorded as a component of fair value adjustment of contingent consideration and acquisition related compensation in the accompanying condensed consolidated statements of income. As of March 31, 2015, prepaid compensation of \$476 and \$469 is included in prepaids and other current assets and other assets, respectively, in the accompanying condensed consolidated balance sheet.

Table of Contents

FOX FACTORY HOLDING CORP.

Notes to Condensed Consolidated Financial Statements - continued

(in thousands, except per share amounts)

(unaudited)

The Company agreed to contingent consideration of up to \$29,295 upon achievement of adjusted earnings before interest, taxes, depreciation and amortization ("EBITDA") targets of the acquired business through 2016, subject to adjustments defined in the asset purchase agreement. Performance compared to the targets is measured annually over a three year period, and payment of the contingent consideration will be made upon final determination of the adjusted EBITDA for each year. The estimated acquisition date fair value of the contingent consideration was \$19,035, based on a Black-Scholes model, and is included in the computation of total consideration. See Note 9 - Fair Value Measurements.

The Company's allocation of the purchase price to the net tangible and intangible assets acquired and liabilities assumed is as follows:

Fair market values	
Tangible assets acquired and liabilities assumed	\$ 13,046
Intangible assets	35,270
Goodwill	11,962
Total	\$60,278

The values assigned to the identifiable intangible assets were determined by discounting the estimated future cash flows associated with these assets to their present value. The goodwill of \$11,962 reflects the strategic fit of Sport Truck with the Company's operations. Sport Truck is well-aligned with the Company's mission of improving vehicle performance, delivering best in-class service, and entering into strategic and adjacent markets. The Company will amortize the acquired customer relationships asset over its expected useful life of 15 years. Trademarks, brand names and goodwill are expected to have an indefinite life, and will be subject to impairment testing. The goodwill is expected to be deductible for income tax purposes.

The Company incurred \$34 and \$1,025 of transaction costs in conjunction with the Sport Truck acquisition for the three months ended March 31, 2015 and 2014, respectively, which is included in general and administrative expense in the accompanying condensed consolidated statements of income.

Race Face Performance and Easton Cycling Businesses

On December 12, 2014, the Company acquired certain assets and assumed certain liabilities of Race Face/Easton, which was engaged in the design, manufacture, and global distribution of performance mountain and road bike wheels and other performance cycling components including cranks, bars, stems, and seat posts. In connection with the acquisition, the Company paid approximately \$30,168. The acquisition was financed with debt and includes a potential earn-out opportunity of up to a maximum of CAD \$19,500, or approximately \$15,405 US dollars at the exchange rate in effect at March 31, 2015, contingent upon continued employment and the achievement of certain performance-based financial targets through October 2016. In the three months ended March 31, 2015, the Company recognized \$1,890 of acquisition related compensation related to the earn-out opportunity, which is recorded as a component of fair value adjustment of contingent consideration and acquisition related compensation in the accompanying condensed consolidated statements of income. The Company incurred \$405 of acquisition related costs in conjunction with the Race Face/Easton acquisition for the three months ended March 31, 2015, which is included in general and administrative expense in the accompanying consolidated statement of income.

The allocation of the purchase price to the assets acquired and liabilities assumed is preliminary, subject to the completion of the Company's validation of working capital and completion of its intangible valuation procedures, with the assistance of specialists. Goodwill acquired is expected to be deductible for income tax purposes.

14. Related Party Agreement

In September 2014, the Company entered into an agreement with Compass Group Diversified Holdings, LLC ("Compass") to assist with compliance requirements pursuant to the Sarbanes-Oxley Act of 2002, as amended. Compass purchased a controlling interest in the Company in January, 2008, and beneficially owned approximately 41.0% of our outstanding common stock at March 31, 2015. Fees for services provided under this arrangement are estimated to be approximately \$100 annually. The agreement will terminate on March 31, 2016 unless terminated earlier by either party.

Fox Factory, Inc. has a triple-net building lease for its manufacturing and office facilities in Watsonville, California. The building is owned by Robert Fox, a founder and minority stockholder of the Company. The term of the lease ends June 30, 2018, with monthly rental payments, which are adjusted annually for a cost-of-living increase based upon the consumer price index. Payments made under this lease were \$301 and \$293 for the three months ended March 31, 2015 and 2014, respectively.

Table of Contents

ITEM 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our unaudited condensed consolidated financial statements and related notes thereto included elsewhere in this Quarterly Report on Form 10-Q and with our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2014, as filed with the Securities and Exchange Commission ("SEC") on March 2, 2015 and our other reports and registration statements that we file with the SEC from time to time. In addition to historical condensed consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates, and beliefs. Our actual results could differ materially from those discussed below. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this Quarterly Report on Form 10-Q, particularly in the “Risk Factors” section included in Part II, Item 1A.

Unless the context otherwise requires, the terms “FOX,” the “Company,” “we,” “us,” and “our” in this Quarterly Report on Form 10-Q refer to Fox Factory Holding Corp. and its wholly owned operating subsidiaries, on a consolidated basis.

Cautionary Note Regarding Forward-Looking Statements

This quarterly report includes forward-looking statements, which are subject to the “safe harbor” created by section 27A of the Securities Act of 1933, as amended, and section 21E of the Securities Exchange Act of 1934, as amended. We may make forward-looking statements in our SEC filings, press releases, news articles, earnings presentations and when we are speaking on behalf of the Company. Forward-looking statements generally relate to future events or our future financial or operating performance which involve substantial risks and uncertainties. In some cases, you can identify forward-looking statements because they contain words such as “may,” “might,” “will,” “would,” “should,” “expect,” “anticipate,” “could,” “intend,” “target,” “project,” “contemplate,” “believe,” “estimate,” “predict,” “likely,” “potential” or “could be” or the negative of these words or other similar terms or expressions that concern our expectations, strategy, plans or intentions. Forward-looking statements contained in this Quarterly Report on Form 10-Q are subject to numerous risks and uncertainties, including but not limited to risks related to:

- our ability to develop new and innovative products in our current end-markets;
- our ability to leverage our technologies and brand to expand into new categories and end-markets;
- our ability to increase our aftermarket penetration;
- our ability to accelerate international growth;
- our ability to improve operating and supply chain efficiencies;
- our future financial performance, including our sales, cost of sales, gross profit or gross margins, operating expenses, ability to generate positive cash flow and ability to maintain our profitability;
- our ability to maintain our premium brand image and high-performance products;
- our ability to maintain relationships with the professional athletes and race teams we sponsor;
- our transition of the majority of our mountain bike manufacturing operations to Taiwan and our expectations related to such transition;
- our ability to selectively add additional dealers and distributors in certain geographic markets;
- the growth of the markets in which we compete, our expectations regarding consumer preferences and our ability to respond to changes in consumer preferences;
- changes in demand for high-end suspension and ride dynamics products;
- our ability to successfully identify, evaluate and manage potential acquisitions and to benefit from such acquisitions;
- and
- future economic or market conditions.

Table of Contents

You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Quarterly Report on Form 10-Q primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, results of operations, and prospects and the outcomes of any of the events described in any forward-looking statements are subject to risks, uncertainties, and other factors. In addition to the risks, uncertainties and other factors discussed above and elsewhere in this Quarterly Report on Form 10-Q, the risks, uncertainties and other factors expressed or implied discussed in Item 1A, "Risk Factors" of Part I of our 2014 Annual Report on Form 10-K filed with the SEC on March 2, 2015 could cause or contribute to actual results differing materially from those set forth in any forward-looking statement. Moreover, we operate in a very competitive and challenging environment. New risks and uncertainties emerge from time to time, and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Quarterly Report on Form 10-Q. We cannot assure you that the results, events, and circumstances reflected in the forward-looking statements will be achieved or occur. Actual results, events, or circumstances could differ materially from those contemplated by, set forth in, or underlying any forward-looking statements. For all of these forward-looking statements we claim the protection of the safe harbor for forward-looking statements in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

The forward-looking statements made in this Quarterly Report on Form 10-Q relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this Quarterly Report on Form 10-Q to reflect events or circumstances after the date of this Quarterly Report on Form 10-Q or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make.

Critical Accounting Policies and Estimates

Self-Insurance. Beginning in January 2015, the Company is partially self-insured for its U.S. employee health and welfare benefits. The Company's liability for self-insurance is based on claims filed and an estimate of claims incurred but not yet reported. The Company considers a number of factors, including historical claims information, when determining the accrual. Costs related to the administration of the plan and related claims are expensed as incurred. The Company has third-party insurance coverage to limit exposure for individually significant claims. There have been no other material changes to our critical accounting policies and estimates as compared to the critical accounting policies and estimates included in our Annual Report on Form 10-K for the year ended December 31, 2014, as filed with the SEC on March 2, 2015.

Recent Accounting Pronouncements

See Note 1 to the accompanying notes to unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

Seasonality

Our business is seasonal. In each of the last three fiscal years, our quarterly sales have been the lowest in the first quarter and the highest during our third quarter of the year. We believe this seasonality is due to the delivery of new products, including our suspension products related to the new mountain bike season, during the late spring and summer each year.

Table of Contents

Three months ended March 31, 2015 compared to three months ended March 31, 2014

Sales

(in millions)	For the three months ended March 31,				
	2015	2014	Change (\$)	Change (%)	
Bikes	\$35.6	\$33.7	\$1.9	5.7	%
Power Vehicles	32.2	22.4	9.7	43.5	%
Total sales	\$67.8	\$56.1	\$11.7	20.8	%

Sales for the three months ended March 31, 2015 increased approximately \$11.7 million, or 20.8%, compared to the same period in 2014. The sales increase reflects 43.5% growth in powered vehicle products and a 5.7% increase in bike products for the three months ended March 31, 2015 compared to the same prior year period. The increase in sales of powered vehicle products was primarily due to the acquisition of Sport Truck, partially offset by decreases in off-road product sales as a result of model year change-over in the Ford Raptor program. The increase in bike sales was attributable to the inclusion of RaceFace/Easton's sales, which was partially offset by a decrease in mountain bike suspension sales due to various factors including an increased competitive environment in certain bike product categories.

Cost of sales

(in millions)	For the three months ended March 31,				
	2015	2014	Change (\$)	Change (%)	
Cost of sales	\$49.0	\$39.1	\$9.9	25.3	%

Cost of sales for the three months ended March 31, 2015 increased approximately \$9.9 million, or 25.3%, compared to the same period in 2014. The increase in cost of sales was driven primarily by an increase in product sales, as well as certain operational and accounting impacts affecting gross margin which are discussed below.

For the three months ended March 31, 2015 our gross margin was 27.7% compared to 30.3% for the same period in 2014. The 2.6% decrease in our gross profit margin was attributable primarily to \$1.1 million in amortization of acquired inventory step up related to RaceFace/Easton which represents 1.6% of the decline, with the balance attributable to inefficiencies caused by the West Coast port slowdown including higher logistics costs and lower labor efficiency.

Operating expenses

(in millions)	For the three months ended March 31,				
	2015	2014	Change (\$)	Change (%)	
Operating expenses:					
Sales and marketing	\$5.3	\$3.8	\$1.5	39.5	%
Research and development	3.4	3.1	0.3	9.7	%
General and administrative	4.6	3.9	0.7	17.9	%
Amortization of purchased intangibles	1.8	1.4	0.4	28.6	%
Fair value adjustment of contingent consideration and acquisition related compensation	2.1	—	2.1	—	%
Total operating expenses	\$17.2	\$12.2	\$5.0	41.0	%

Table of Contents

Total operating expenses for the three months ended March 31, 2015 increased approximately \$5.0 million, or 41.0%, over the same period in 2014. When expressed as a percentage of sales, operating expenses increased to 25.3% of sales for the three months ended March 31, 2015 compared to 21.9% of sales in the same period in 2014. The increase was due primarily to the inclusion of Sport Truck's and RaceFace/Easton's (our "recently acquired entities") operating expenses, including fair value adjustments, within our consolidated results for the three months ended March 31, 2015.

Within operating expenses, our sales and marketing expense increases were primarily due to additional personnel, promotional activities and outside services related to promoting our company and brand, building our global infrastructure, and the inclusion of \$1.2 million of our recently acquired entities' sales and marketing expense in our results. Our research and development expense increased in the three months ended March 31, 2015 due to \$0.4 million of expense incurred at our recently acquired entities, offset by slight decreases in various other research and development activities. Our general and administrative expense increased in the three months ended March 31, 2015 compared to the three months ended March 31, 2014 due to \$0.9 million of expense incurred at Sport Truck and RaceFace/Easton and a \$0.2 million expense related to a shelf offering filed in March 2015, offset by reductions in acquisition costs and various other general and administrative expenses.

Amortization of purchased intangible assets in the three months ended March 31, 2015 increased by approximately \$0.5 million, primarily as a result of our recent acquisitions.

During the three months ended March 31, 2015, we incurred \$2.1 million in acquisition related compensation in connection with the recent acquisitions, primarily resulting from management earn-out expenses.

Income from operations

(in millions)	For the three months ended			
	March 31,			
	2015	2014	Change (\$)	Change (%)
Income from operations	\$1.5	\$4.7	\$(3.2)	(68.1)%

As a result of the factors discussed above, income from operations for the three months ended March 31, 2015 decreased approximately \$3.2 million, or 68.1%, compared to income from operations in the same period in 2014.

Other expense, net

(in millions)	For the three months ended			
	March 31,			
	2015	2014	Change (\$)	Change (%)
Other expense, net:				
Interest expense	0.3	0.1	\$0.2	200.0%
Other income, net	—	—	—	—%
Other expense, net	\$0.3	\$0.1	\$0.2	200.0%

Other expense, net for the three months ended March 31, 2015 increased by approximately \$0.2 million to \$0.3 million in the three months ended March 31, 2015, compared to \$0.1 million in the same period in 2014. Interest expense increased in the three months ended March 31, 2015 by \$0.2 million due to additional borrowings used to fund acquisitions.

Income taxes

(in millions)	For the three months ended			
	March 31,			
	2015	2014	Change (\$)	Change (%)
Income tax expenses	\$0.5	\$1.7	\$(1.2)	(70.6)%

The effective tax rates were 37.1% and 37.0% for the three months ended March 31, 2015 and 2014, respectively. For the three months ended March 31, 2015, the difference between our effective rate and the 35% federal statutory rate was due to state taxes as well as increases to our liability for unrecognized tax benefits due to routine interest accruals. The increases were partially

Table of Contents

offset by a benefit from the the domestic production activity deduction. For the three months ended March 31, 2014, the difference between the Company's effective tax rate and the 35% federal statutory rate resulted primarily from state taxes, partially offset by a benefit for the domestic production activity deduction.

Net income

(in millions)	For the three months ended March 31,			
	2015	2014	Change (\$)	Change (%)
Net income	\$0.8	\$2.9	\$(2.1)	(72.4)%

As a result of the factors described above, our net income decreased \$2.1 million, or 72.4%, to \$0.8 million in the three months ended March 31, 2015 from \$2.9 million for the same period in 2014.

Liquidity and Capital Resources

Our primary cash needs are to support working capital, debt payments, and capital expenditures. We have generally financed our historical liquidity needs with operating cash flows and borrowings under our credit facilities. These sources of liquidity may be impacted by various factors, including demand for our products, investments made by us in acquired businesses, our plant and equipment and other capital expenditures, and expenditures on general infrastructure and information technology. A summary of our operating, investing and financing activities are shown in the following table:

(in thousands)	For the three months ended March 31,	
	2015	2014
Net cash provided by (used in) operating activities	\$9,599	\$(396)
Net cash used in investing activities	(2,307)	(43,230)
Net cash (used in) provided by financing activities	(4,137)	43,939
Effect of exchange rate changes on cash	(163)	6
Increase in cash and cash equivalents	\$2,992	\$319

Operating activities

Cash provided by (used in) operating activities consists of net income, adjusted for certain non-cash items primarily, depreciation and amortization, stock-based compensation including related excess tax benefits, changes in fair value of contingent consideration, and deferred income taxes, offset by net cash invested in working capital.

In the three months ended March 31, 2015, cash provided by operating activities was \$9.6 million and consisted of net income of \$0.8 million plus non-cash items totaling \$4.7 million plus changes in operating assets and liabilities and other adjustments totaling \$4.1 million. Non-cash items and other adjustments consisted primarily of depreciation and amortization of \$2.9 million and stock-based compensation of \$1.1 million, offset by a \$0.2 million change in deferred taxes and an excess tax benefit from the exercise of stock options of \$0.2 million. Cash generated by changes in operating assets and liabilities is a result of a decrease in accounts receivable of \$7.9 million and an increase in accounts payable of \$10.4 million, partially offset by increases in inventory and prepaid and other assets of \$12.4 million and \$0.8 million, respectively, as well as an increase in income taxes payable of \$0.5 million. The increase in inventory and corresponding increase in accounts payable are due to seasonal impacts as we prepare for the Spring selling season. The reduction in accounts receivable is also attributable to seasonality as the first quarter of each year is typically our lowest of the year. Additionally, the increase in prepaid expenses and other current assets resulted primarily from annual contracts being renewed in the first quarter.

Table of Contents

In the three months ended March 31, 2014, cash used in operating activities was \$0.4 million. Net income of \$2.9 million plus non-cash items totaling \$1.3 million were offset by changes in operating assets and liabilities totaling \$4.7 million. Non-cash items and other adjustments consisted primarily of depreciation and amortization of \$2.0 million and stock-based compensation of \$0.8 million, offset by an excess tax benefit from the exercise of stock options of \$1.1 million and a \$0.5 million change in deferred taxes. Cash used related to operating assets and liabilities consisted primarily of an increase in inventory of \$7.0 million, and a decrease in accrued expenses of \$3.4 million, partially offset by a decrease in accounts receivable of \$5.1 million and an increase in accounts payable of \$2.4 million, primarily driven by normal growth of our business, seasonal impacts in anticipation of the Spring selling season, and expenses incurred related to the Sport Truck acquisition. Additionally, there was an increase in prepaid expenses and other assets of \$2.7 million, resulting primarily from prepaid compensation expense related to amounts paid for Sport Truck and reoccurring payments made under our corporate insurance programs, offset by an increase in income tax payable of approximately \$1.1 million.

Investing activities

Cash used in investing activities relates to strategic acquisitions of businesses and investments in our manufacturing and general infrastructure through the procurement of property and equipment.

In the three months ended March 31, 2015, cash used in investing activities was \$2.3 million which consisted of \$1.5 million in purchases of property and equipment and well as \$0.8 million in consideration paid for our acquisition of a supplier to our Sport Truck subsidiary.

In the three months ended March 31, 2014, cash used in investing activities was \$43.2 million, which included \$40.9 million paid for the asset acquisition of Sport Truck and \$1.4 million in consideration paid for other assets.

Additionally, we invested \$0.9 million in property and equipment.

Financing activities

Cash (used in) provided by financing activities primarily relates to changes in our capital structure, including the various forms of debt and equity instruments used to finance our business.

In the three months ended March 31, 2015, net cash used in financing activities was \$4.1 million, which consisted primarily of \$3.7 million paid to repurchase our common stock under the buyback program authorized in 2014. We also made net repayments of \$0.7 million of term debt under the 2013 Amended and Restated Credit Facility, partially offset by \$0.3 million provided by the exercise of stock options.

In the three months ended March 31, 2014, net cash provided by financing activities was \$43.9 million, which consisted primarily of proceeds from issuance of debt of \$49.7 million net of origination fees, and net repayments of \$8.0 million, all under the 2013 Amended and Restated Credit Facility, and \$2.2 million from the exercise of stock options.

Amended and Restated 2013 Credit Facility

In August 2013, we entered into the 2013 Credit Facility with Sun Trust Bank and other named lenders. The 2013 Credit Facility provided a revolving line of credit. On March 31, 2014, in connection with our asset purchase of Sport Truck, we amended and restated the 2013 Credit Facility. The Amended and Restated 2013 Credit Facility provided a maturing secured Term Loan in the principal amount of \$50.0 million, subject to quarterly amortization payments, and extended the term of the 2013 Credit Facility through March 31, 2019. The proceeds of the Term Loan were used, in part, to fund the acquisition of Sport Truck and to pay down the revolving line of credit provided under the 2013 Credit Facility. On December 12, 2014, we amended the existing Amended and Restated 2013 Credit Facility. The First Amendment increased the Term Loan principal amount by \$30.0 million to a total of \$56.8 million, subject to quarterly amortization payments, and extend the maturity of the Amended and Restated 2013 Credit Facility through December 12, 2019. The additional proceeds of the Term Loan made available through the First Amendment were used to partially fund the acquisition of Race Face/Easton.

The Amended and Restated 2013 Credit Facility is secured by substantially all of our assets, restricts our ability to make certain payments and engage in certain transactions, and also requires that we satisfy customary financial ratios, including a fixed charge coverage ratio of not less than 1.5:1.0 and a leverage ratio of not greater than 2.75:1.0, both ratios calculated as defined in the Amended and Restated 2013 Credit Facility. We were in compliance with the

covenants as of March 31, 2015.

Other Commitments

No material contractual obligation has changed since the Company's Annual Report on Form 10-K for the year ended December 31, 2014, as filed with the SEC on March 2, 2015.

23

Table of Contents

Off-Balance Sheet Arrangements

We have no material off-balance sheet arrangements.

Inflation

Historically, inflation has not had a material effect on our results of operations. However, significant increases in inflation, particularly those related to wages and increases in the cost of raw materials could have an adverse impact on our business, financial condition and results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the disclosures discussed in the section “Quantitative and Qualitative Disclosures About Market Risk” in Part II, Item 7A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 and filed with the SEC on March 2, 2015.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, under the direction and with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2015. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Based on the evaluation of our disclosure controls and procedures, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2015.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, our management does not expect that our disclosure controls and procedures or our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include, but are not limited to, the realities that judgments in decision making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time we are involved in legal proceedings incidental to our business, in particular intellectual property related disputes, product liability claims, as well as other litigation of a non-material nature in the ordinary course of business. In accordance with ASC 450, "Contingencies", we have not accrued for material loss contingencies relating to any legal proceedings because we believe that, although unfavorable outcomes in proceedings may be possible, they are not considered by our management to be probable and reasonably estimable. We believe that the outcome of any such pending matters, either individually or in the aggregate, will not have a material impact on our business or financial condition.

ITEM 1A. RISK FACTORS

Our business, financial condition, operating results and prospects could be materially and adversely affected by various risks and uncertainties. In addition to the risks and uncertainties discussed elsewhere, you should carefully consider the risks and uncertainties described below. If any of the risks actually occur, our business, financial condition, operating results and prospects could be materially and adversely affected. In that event, the trading price of our common stock could decline.

Risks related to our business

If we are unable to continue to enhance existing products and develop and market new products that respond to consumer needs and preferences and achieve market acceptance, we may experience a decrease in demand for our products, and our business and financial results could suffer.

Our growth strategy involves the continuous development of innovative performance products. We may not be able to compete as effectively with our competitors, and ultimately satisfy the needs and preferences of our customers and the end users of our products, unless we can continue to enhance existing products and develop new, innovative products in the global markets in which we compete. In addition, we must continuously compete not only for end users who purchase our products through the dealers and distributors who are our customers, but also for the OEMs, which incorporate our products into their bikes and powered vehicles. These OEMs regularly evaluate our products against those of our competitors to determine if they are allowing the OEMs to achieve higher sales and market share on a cost-effective basis. Should one or more of our OEM customers determine that they could achieve overall better financial results by incorporating a competitor's new or existing product, they would likely do so, which could harm our business, financial condition or results of operations.

Product development requires significant financial, technological and other resources. While we expended approximately \$13.6 million, \$10.4 million and \$9.7 million for our research and development efforts in 2014, 2013 and 2012, respectively, there can be no assurance that this level of investment in research and development will be sufficient in the future to maintain our competitive advantage in product innovation, which could cause our business, financial condition or results of operations to suffer.

Product improvements and new product introductions require significant planning, design, development and testing at the technological, product and manufacturing process levels, and we may experience unanticipated delays in our introduction of product improvements or new products. Our competitors' new products may beat our products to market, be more effective and/or less expensive than our products, obtain better market acceptance or render our products obsolete. Any new products that we develop may not receive market acceptance or otherwise generate any meaningful sales or profits for us relative to our expectations. In addition, one of our competitors could develop an unforeseen and entirely new product or technology that renders our products less desirable or obsolete, which could negatively affect our business, financial condition or results of operations.

We face intense competition in all product lines, including from some competitors that may have greater financial and marketing resources. Failure to compete effectively against competitors would negatively impact our business and operating results.

The ride dynamics industry is highly competitive. We compete with a number of other manufacturers that produce and sell ride dynamics products to OEMs and aftermarket dealers and distributors, including OEMs that produce their own lines of products for their own use. Our continued success depends on our ability to continue to compete effectively against our competitors, some of which have significantly greater financial, marketing and other resources than we

have. Also, several of our competitors offer broader product lines to OEMs, which they may sell in connection with suspension products as part of a package offering. In the future, our competitors may be able to maintain and grow brand strength and market share more effectively or quickly than we do by anticipating the course of market developments more accurately than we do, developing products that are superior to our products, creating manufacturing or distribution capabilities that are superior to ours, producing similar products at a lower cost than we can or adapting more quickly than we do to new technologies or evolving regulatory, industry or customer requirements, among other possibilities. In addition, we may encounter increased competition if our current competitors broaden their product offerings by beginning to produce additional types of ride dynamics products or through competitor consolidations. We could also face competition from well-capitalized entrants into the performance suspension and ride dynamics product market, as well as aggressive pricing tactics by other manufacturers trying to gain market share. As a result, our products may not be able to compete successfully with our competitors' products, which could negatively affect our business, financial condition or results of operations.

25

Table of Contents

Our business is sensitive to economic conditions that impact consumer spending. Our suspension and ride dynamics products, and the bike and powered vehicles into which they are incorporated, are discretionary purchases and may be adversely impacted by changes in the economy.

Our business depends substantially on global economic and market conditions. In particular, we believe that currently a significant majority of the end users of our products live in the United States and countries in Europe. These areas are either in the process of recovering from recession or, in some cases, are still struggling with recession, disruption in banking and/or financial systems, economic weakness and uncertainty. In addition, our products are recreational in nature and are generally discretionary purchases by consumers. Consumers are usually more willing to make discretionary purchases during periods of favorable general economic conditions and high consumer confidence. Discretionary spending may also be affected by many other factors, including interest rates, the availability of consumer credit, taxes and consumer confidence in future economic conditions. During periods of unfavorable economic conditions, or periods when other negative market factors exist, consumer discretionary spending is typically reduced, which in turn could reduce our product sales and have a negative effect on our business, financial condition or results of operations.

There could also be a number of secondary effects resulting from an economic downturn, such as insolvency of our suppliers resulting in product delays, an inability of our OEM and distributor and dealer customers to obtain credit to finance purchases of our products, customers delaying payment to us for the purchase of our products due to financial hardship or an increase in bad debt expense. Any of these effects could negatively affect our business, financial condition or results of operations.

If we are unable to maintain our premium brand image, our business may suffer.

Our products are selected by both OEMs and dealers and distributors in part because of the premium brand reputation we hold with them and our end users. Therefore, our success depends on our ability to maintain and build the image of our brands. We have focused on building our brands through producing products or acquiring businesses that produce products that we believe are innovative, high in performance and highly reliable. In addition, our brands benefit from our strong relationships with our OEM customers and dealers and distributors and through marketing programs aimed at bike and powered vehicle enthusiasts in various media and other channels. For example, we sponsor a number of professional athletes and professional race teams. In order to continue to enhance our brand image, we will need to maintain our position in the suspension and ride dynamics products industry and continue to provide high quality products and services. Also, we will need to continue to invest in sponsorships, marketing and public relations. There can be no assurance, however, that we will be able to maintain or enhance the strength of our brands in the future. Our brands could be adversely impacted by, among other things:

- failure to develop new products that are innovative, high-performance and reliable;
- internal product quality control issues;
- product quality issues on the bikes and powered vehicles on which our products are installed;
- product recalls;
- high profile component failures (such as a component failure during a race on a mountain bike ridden by an athlete that we sponsor);
- negative publicity regarding our sponsored athletes;
- high profile injury or death to one of our sponsored athletes;
- inconsistent uses of our brand and our other intellectual property assets, as well as failure to protect our intellectual property; and
- changes in consumer trends and perceptions.

Any adverse impact on our brand could in turn negatively affect our business, financial condition or results of operations.

Table of Contents

A significant portion of our sales are highly dependent on the demand for high-end bikes and their suspension components and a material decline in the demand for these bikes or their suspension components could have a material adverse effect on our business or results of operations.

During 2014, approximately 58% of our sales were generated from the sale of suspension products for high-end bikes. Part of our success has been attributable to the growth in the high-end bike industry, including increases in average retail sales prices, as better-performing product designs and technologies have been incorporated into these products. If the popularity of high-end or premium-priced bikes does not increase or declines, the number of bike enthusiasts seeking such bikes or premium priced suspension products, wheels, cranks and other specialty components for their bikes does not increase or declines, or the average price point of these bikes declines, we may fail to achieve future growth or our sales could decrease, and our business, financial condition or results of operations could be negatively affected. In addition, if current bike enthusiasts stop purchasing our products due to changes in preferences, we may fail to achieve future growth or our sales could be decreased, and our business, financial condition or results of operations could be negatively affected.

Our growth in the powered vehicle category is dependent upon our continued ability to expand our product sales into powered vehicles that require performance suspension and the continued expansion of the market for these powered vehicles.

Our growth in the powered vehicle category is in part attributable to the expansion of the market for powered vehicles that require performance suspension products. Such market growth includes the creation of new classes of vehicles that need our products, such as Side-by-Sides, and our ability to create products for these vehicles. In the event these markets stopped expanding or contracted, or we are unsuccessful in creating new products for these markets or other competitors successfully enter into these markets, we may fail to achieve future growth or our sales could decrease, and our business, financial condition or results of operations could be negatively affected.

A disruption in the operations of our manufacturing facilities, including any disruption in connection with moving a majority of the manufacturing of our bike suspension component products to our facility in Taiwan, could have a negative effect on our business, financial condition or results of operations.

We are in the process of transitioning the majority of our bike suspension component product manufacturing operations to our bike suspension component facility in Taichung, Taiwan. We contemplate that this transition will continue through 2015, at which time we anticipate that the majority of the manufacturing of our bike suspension component products will be completed in Taiwan. During our transition process, we will incur some duplication of facilities, equipment and personnel, the amount of which could vary materially from our projections. Also, the transition process could cause manufacturing problems and give rise to execution risks, including disruptions to employees, negative impact on employee morale and retention, delays in recognizing efficiencies or increased costs of manufacturing, and adverse impacts on our product quality and delivery times. In addition, we could encounter unforeseen difficulties resulting from the distance and time zone differences between our main operations in California and our Taiwan manufacturing facilities.

Equipment failures, delays in deliveries or catastrophic loss at any of our facilities could lead to production or service disruptions, curtailments or shutdowns. In the event of a stoppage in production or a slowdown in production due to high employee turnover or a labor dispute at any of our facilities, even if only temporary, or if we experience delays as a result of events that are beyond our control, delivery times to our customers could be severely affected. If there was a manufacturing disruption in any of our manufacturing facilities, we might be unable to meet product delivery requirements and our business, financial condition or results of operations could be negatively affected, even if the disruption was covered in whole or in part by our business interruption insurance. Any significant delay in deliveries to our customers could lead to increased returns or cancellations, expose us to damage claims from our customers or damage our brand and, in turn, negatively affect our business, financial condition or results of operations.

Work stoppages or other disruptions at seaports could adversely affect our operating results.

A significant portion of our goods move through ports on the Western Coast of the United States. We have a global supply chain and we import products from our third party vendors as well as our Fox Taiwan facility into the U.S. largely through ports on the West Coast. Freight arriving at West Coast ports must be offloaded from ships by longshoremen, none of whom are our employees. We do not control the activities of these employees or seaports and

we could suffer supply chain disruptions due to any disputes, capacity shortages, slowdowns or shutdowns which may occur as was experienced on the weekend of February 7-8, 2015, where West Coast ports were shut down as a result of a labor dispute. The ongoing labor dispute then led to an additional port shutdown for four days between February 12, 2015 and February 16, 2015. While the West Coast ports labor dispute ended with a five year agreement, it lasted longer than we forecasted and negatively affected our operating results. Any similarly occurring labor dispute could potentially have a negative effect on both our current period and future period operating results.

27

Table of Contents

Our business depends substantially on the continuing efforts of our senior management, and our business may be severely disrupted if we lose their services.

We are heavily dependent upon the contributions, talent and leadership of our senior management team, particularly our Chief Executive Officer, Larry L. Enterline. We do not have a "key person" life insurance policy on Mr. Enterline or any other key employees. We believe that the top twelve members of our senior management team are key to establishing our focus and executing our corporate strategies as they have extensive knowledge of our systems and processes. Given our senior management team's knowledge of the suspension products industry and the limited number of direct competitors in the industry, we believe that it could be difficult to find replacements should any of the members of our senior management team leave. Our inability to find suitable replacements for any of the members of our senior management team could negatively affect our business, financial condition or results of operations. We depend on skilled engineers to develop and create our products, and the failure to attract and retain such individuals could adversely affect our business.

We rely on skilled and well-trained engineers for the design and production of our products, as well as in our research and development functions. Competition for such individuals is intense, particularly in Silicon Valley near where our headquarters are located. Our inability to attract or retain qualified employees in our design, production or research and development functions or elsewhere in our company could result in diminished quality of our products and delinquent production schedules, impede our ability to develop new products and harm our business, financial condition or results of operations.

We may not be able to sustain our past growth or successfully implement our growth strategy, which may have a negative effect on our business, financial condition or results of operations.

We grew our sales from approximately \$272.7 million in 2013 to approximately \$306.7 million in 2014. This growth rate may be unsustainable. Our future growth will depend upon various factors, including the strength of the image of our brands, our ability to continue to produce innovative suspension and ride dynamics products, consumer acceptance of our products, competitive conditions in the marketplace, the growth in emerging markets for products requiring high-end suspension products and, in general, the continued growth of the high-end bike and powered vehicle markets into which we sell our products. Our beliefs regarding the future growth of markets for high-end suspension products are based largely on qualitative judgments and limited sources and may not be reliable. If we are unable to sustain our past growth or successfully implement our growth strategy, our business, financial condition or results of operations could be negatively affected.

The professional athletes and race teams who use our products are an important aspect of the image of our brands. The loss of the support of professional athletes for our products or the inability to attract new professional athletes may harm our business.

If our products are not used by current or future professional athletes and race teams, our brands could lose value and our sales could decline. While our sponsorship agreements typically restrict our sponsored athletes and race teams from promoting, endorsing or using competitors' products that compete directly within our product categories during the term of the sponsorship agreements, we do not typically have long-term contracts with any of the athletes or race teams whom we sponsor.

If we are unable to maintain our current relationships with these professional athletes and race teams, if these professional athletes and race teams are no longer popular, if our sponsored athletes and race teams fail to have success or if we are unable to continue to attract the endorsement of new professional athletes and race teams in the future, the value of our brands and our sales could decline.

We depend on our relationships with dealers and distributors and their ability to sell and service our products. Any disruption in these relationships could harm our sales.

We sell our aftermarket products to dealers and distributors, and we depend on their willingness and ability to market and sell our products to consumers and provide customer and product service as needed. We also rely on our dealers and distributors to be knowledgeable about our products and their features. If we are not able to educate our dealers and distributors so that they may effectively sell our products as part of a positive buying experience, or if they fail to implement effective retail sales initiatives, focus selling efforts on our competitors' products, reduce the quantity of our products that they sell or reduce their operations due to financial difficulties or otherwise, our brand and business

could suffer.

28

Table of Contents

We do not control our dealers or distributors and many of our contracts allow these entities to offer our competitors' products. Our competitors may incentivize our dealers and distributors to favor their products. In addition, we do not have long-term contracts with a majority of our dealers and distributors, and our dealers and distributors are not obligated to purchase specified amounts of our products. In fact, the majority of our dealers and distributors buy from us on a purchase order basis. Consequently, with little or no notice, many of these dealers and distributors may terminate their relationships with us or materially reduce their purchases of our products. If we were to lose one or more of our dealers or distributors, we would need to obtain a new dealer or distributor to cover the particular location or product line, which may not be possible on favorable terms or at all. Alternatively, we could use our own sales force to replace such a dealer or distributor, but expanding our sales force into new locations takes a significant amount of time and resources and may not be successful. Further, many of our international distribution contracts contain exclusivity arrangements, which may prevent us from replacing or supplementing our current distributors under certain circumstances.

We are a supplier in the high-end bike and powered vehicles markets, and our business is dependent in large part on the orders we receive from our OEM customers and from their success.

As a supplier to OEM customers, we are dependent in large part on the success of the business of our OEM customers. Model year changes by our OEM customers may adversely impact our sales or cause our sales to vary from quarter to quarter. In addition, losses in market share individually or a decline in the overall market of our OEM customers or the discontinuance by our OEM customers of their products which incorporate our products could negatively impact our business, financial condition or results of operations. For example, if our bike producing OEM customers reduce production of their high-end bikes, their orders to us for our products would in turn be reduced, which could negatively affect our business, financial condition or results of operations.

A relatively small number of customers account for a substantial portion of our sales. The loss of all or a substantial portion of our sales to any of these customers, whether through the temporary or permanent discontinuation of their products which incorporate our products or otherwise, or the loss of market share by these customers could have a material adverse impact on us and our results of operations.

Sales attributable to our five largest OEM customers, which can vary from year to year, collectively accounted for approximately 34%, 42% and 40% of our sales in 2014, 2013 and 2012, respectively. The loss of all or a substantial portion of our sales to any of these OEM customers, whether through the temporary or permanent discontinuation of their products which incorporate our products or otherwise, or the loss of market share by these customers could have a material adverse impact on our business, financial condition or results of operations.

We refer to the branded bike OEMs that use our products throughout this document as "our customers," "our OEM customers" or "our bike OEM customers,". Branded bike OEMs often use contract manufacturers to manufacture and assemble their bikes. As a result, even though we typically negotiate price and volume requirements directly with our bike OEM customers, it is the contract manufacturers that frequently place the purchase orders with us and are responsible for paying us (rather than the branded bike OEMs). Giant is an OEM and contract manufacturer used by certain of our bike OEM customers. Sales to Giant accounted for approximately 14%, 17% and 13% of our sales in 2014, 2013 and 2012, respectively. In the event Giant were to experience manufacturing or other problems, or were to fail to pay us, it could have a material adverse impact on our business, financial condition or results of operations.

Currency exchange rate fluctuations could impact gross margins and expenses, in particular, potential acquisition related expenses related to the Race Face/Easton acquisition.

Foreign currency fluctuations could in the future have an adverse effect on our business, financial condition or results of operations. We sell our products inside and outside of the United States primarily in U.S. Dollars. However, some of the OEMs purchasing products from us sell their products in Europe and other foreign markets using the Euro and other foreign currencies. As a result, as the U.S. Dollar appreciates against these foreign currencies, our products will become relatively more expensive for these OEMs. Accordingly, competitive products that our OEM customers can purchase in other currencies may become more attractive and we could lose sales as these OEMs seek to replace our products with cheaper alternatives. In addition, should the U.S. Dollar depreciate significantly, this could have the effect of decreasing our gross margins and adversely impact our business, financial condition or results of operations.

With a majority of our manufacturing operations for our bike products occurring in Taiwan, a percentage of our sales and expenses are denominated in the New Taiwan Dollar. Should the New Taiwan Dollar appreciate against the U.S. Dollar, this could have the effect of decreasing our sales, increasing our expenses, and decreasing our profitability.

Additionally, with the acquisition of Race Face/Easton, certain of our operations take place in Canada and a percentage of our sales and expenses are denominated in Canadian dollars. The acquisition also included approximately \$15.4 million of earn-out compensation contingently payable, denominated in Canadian Dollars. Our operating profitability could be negatively impacted as a result of changes in the exchange rate between the U.S. Dollar and the Canadian Dollar.

Table of Contents

Our international operations are exposed to risks associated with conducting business globally.

As a result of our international presence, we are exposed to increased risks inherent in conducting business outside of the United States. In addition to foreign currency risks, these risks include:

- difficulty in transporting materials internationally, including labor disputes at West Coast ports, which handle a large amount of our products;
- increased difficulty in protecting our intellectual property rights and trade secrets;
- changes in tax laws and the interpretation of those laws;
- exposure to local economic conditions;
- unexpected government action or changes in legal or regulatory requirements;
- geopolitical regional conflicts, terrorist activity, political unrest, civil strife, acts of war and other political uncertainty;
- changes in tariffs, quotas, trade barriers and other similar restrictions on sales;
- the effects of any anti-American sentiments on our brands or sales of our products;
- increased difficulty in ensuring compliance by employees, agents and contractors with our policies as well as with the laws of multiple jurisdictions, including but not limited to the U.S. Foreign Corrupt Practices Act, local international environmental, health and safety laws, and increasingly complex regulations relating to the conduct of international commerce;
- increased difficulty in controlling and monitoring foreign operations from the United States, including increased difficulty in identifying and recruiting qualified personnel for our foreign operations; and
- increased difficulty in staffing and managing foreign operations or international sales.

An adverse change in any of these conditions could have a negative effect upon our business, financial condition or results of operations.

Our sales could be adversely impacted by the disruption or cessation of sales by other bike component manufacturers or if other bike component manufacturers enter into the specialty bike component market.

Most of the bikes incorporating our suspension products also utilize products and components manufactured by other bike component manufacturers. If such component manufacturers were to cease selling their products and components on a stand-alone basis, their sales are disrupted, or their competitive market position or reputation is diminished, customers could migrate to competitors that sell complementary bike products which we do not sell. Moreover, such bike component manufacturers could begin manufacturing bike suspension products, wheels, or cranks, or bundle their bike components with suspension products, wheels or cranks manufactured by competitors. If any of the foregoing were to occur, our sales could decrease and our business, financial condition or results of operations could suffer.

We have been and may become subject to intellectual property disputes that could cause us to incur significant costs or pay significant damages or that could prohibit us from selling our products.

As we develop new products or attempt to utilize our brands in connection with new products, we seek to avoid infringing the valid patents and other intellectual property rights of our competitors. However, from time to time, third parties have alleged, or may allege in the future, that our products and/or trademarks infringe upon their proprietary rights. We will evaluate any such claims and, where appropriate, may obtain or seek to obtain licenses or other business arrangements. To date, there have been no significant interruptions in our business as a result of any claims of infringement, and we do not hold patent infringement insurance. Any claim, regardless of its merit, could be expensive, time consuming to defend and distract management from our business. Moreover, if our products or brands are found to infringe third-party intellectual property rights, we may be unable to obtain a license to use such technology or associated intellectual property rights on acceptable terms. A court determination that our brands, products or manufacturing processes infringe the intellectual property rights of others could result in significant liability and/or require us to make material changes to our products and/or manufacturing processes or preclude our ability to use certain brands. In most circumstances, we are not indemnified for our use of a licensor's intellectual property, if such intellectual property is found to be infringing. Any of the foregoing results could cause us to, and we could incur substantial costs to, redesign our products or defend legal actions, and such costs could negatively affect our business, financial condition or results of operations.

Table of Contents

If we are unable to enforce our intellectual property rights, our reputation and sales could be adversely affected. Intellectual property is an important component of our business. We patent our proprietary technologies related to vehicle suspension and other products in the U.S. and various foreign patent offices. Additionally, we have registered or have applied for trademarks and service marks with the United States Patent and Trademark Office and a number of foreign countries, including the marks FOX®, FOX RACING SHOX®, RACE FACE® and REDEFINE YOUR LIMITS®, to be utilized with certain goods and services. When appropriate, we may from time to time assert our rights against those who infringe on our patents, trademarks, trade dress, or other intellectual property. We may not, however, be successful in enforcing our patents or asserting trademark, trade name or trade dress protection with respect to our brand names and our product designs, and third parties may seek to oppose or challenge our patents or trademark registrations. Further, these legal efforts may not be successful in reducing sales of suspension products by those infringing. In addition, our pending patent applications may not result in the issuance of patents, and even issued patents may be contested, circumvented or invalidated and may not provide us with proprietary protection or competitive advantages. If our efforts to develop and enforce our intellectual property are unsuccessful, or if a third party misappropriates our rights, this may adversely affect our business, financial condition or results of operations. Additionally, intellectual property protection may be unavailable or limited in some foreign countries where laws or law enforcement practices may not protect our proprietary rights as fully as in the United States, and it may be more difficult for us to successfully challenge the use of our proprietary rights by other parties in these countries.

Furthermore, other competitors may be able to successfully produce products which imitate certain of our products without infringing upon any of our patents, trademarks or trade dress. The failure to prevent or limit infringements and imitations, could have a permanent negative impact on the pricing of our products or reduce our product sales and product margins, even if we are ultimately successful in limiting the distribution of a product that infringes our rights, which in turn may affect our business, financial condition or results of operations.

Although we enter into non-disclosure agreements with employees, OEMs, distributors and others to protect our confidential information and trade secrets, we may be unable to prevent such parties from breaching these agreements with us and using our intellectual property in an unauthorized manner. If our efforts to protect our intellectual property are unsuccessful, or if a third party misappropriates our rights this may adversely affect our business. Defending our intellectual property rights can be very expensive and time consuming, and there is no assurance that we will be successful.

If we inaccurately forecast demand for our products, we may manufacture insufficient or excess quantities or our manufacturing costs could increase, which could adversely affect our business.

We plan our manufacturing capacity based upon the forecasted demand for our products. In the OEM channel, our forecasts are based in large part on the number of our product specifications for new bikes and powered vehicles and on projections from our OEM customers. In the aftermarket channel, our forecasts are based partially on discussions with our dealers and distributors as well as our own assessment of markets. If we incorrectly forecast demand we may incur capacity issues in our manufacturing plant and supply chain, increased material costs, increased freight costs and additional overtime, all of which in turn adversely impact our cost of sales and our gross margin. Economic weakness and uncertainty in the United States, Europe and other countries may make accurate forecasting particularly challenging.

In the future, if actual demand for our products exceeds forecasted demand, the margins on our incremental sales in excess of anticipated sales may be lower due to temporary higher costs, which could result in a decrease in our overall margins. While we generally manufacture our products upon receipt of customer orders, if actual demand is less than the forecasted demand for our products and we have already manufactured the products or committed to purchase materials in support of forecasted demand, we could be forced to hold excess inventories. In short, either excess or insufficient production due to inaccurate forecasting could have a negative effect on our business, financial condition or results of operations.

Product recalls, and significant product repair and/or replacement due to product warranty costs and claims have had, and in the future could have, a material adverse impact on our business.

Unless otherwise required by law, we generally provide a limited warranty for our products for a one or two year period beginning on: (i) in the case of OEM sales, the date the bike or powered vehicle is purchased from an authorized OEM where our product is incorporated as original equipment on the purchased bike or powered vehicle; or (ii) in the case of aftermarket sales, the date the product is originally purchased from an authorized dealer. From time to time, our customers may negotiate for longer or different warranty coverage. In the ordinary course of business, we incur warranty costs and reserve against such costs in our financial statements. However, there is a risk that we could experience higher than expected warranty costs if we become aware of an underperforming product. For example, in 2012 we increased our reserve and included additional costs of approximately \$1.8 million to reflect the costs of repairing or replacing certain dampers in our suspension products and experienced other related costs of approximately \$1.0 million. We may in the future encounter similar situations and be forced to make other adjustments to our warranty reserves or incur costs in excess of these reserves which could adversely affect our results of operations.

Table of Contents

We may also be required to or voluntarily participate in recalls involving our products or components if any prove to be defective. For example, during calendar year 2013, we initiated a voluntary recall of certain model year 2013 32 and 34 Evolution Series suspension forks having 120 mm - 160 mm of travel with certain dampers manufactured by us between March 1, 2012 and November 30, 2012. In addition to the direct costs related to this or other recalls we may be forced to undertake in the future, such events could adversely affect our brand image and have a negative effect on our relationships with our OEMs, sponsored athletes and race teams, or otherwise have a negative effect on our business, financial condition and results of operations

An adverse determination in any material product liability claim against us could adversely affect our operating results or financial condition.

The use of our products by consumers, often under extreme conditions, exposes us to risks associated with product liability claims. If our products are defective or used incorrectly by our customers, bodily injury, property damage or other injury, including death, may result and could give rise to product liability claims against us, which could adversely affect our brand image or reputation. We have encountered product liability claims in the past and carry product liability insurance to help protect us against the costs of such claims, although our insurance may not be sufficient to cover all losses. Any losses that we may suffer from any liability claims, and the effect that any product liability litigation may have upon the reputation and marketability of our products, may have a negative impact on our business, financial condition or results of operations.

Our Amended and Restated 2013 Credit Facility places operating restrictions on us and creates default risks.

The Amended and Restated 2013 Credit Facility contains covenants that place restrictions on our operating activities.

These covenants, among other things, limit our ability to:

- pay dividends or make distributions to our stockholders or redeem our stock;
- incur additional indebtedness or permit additional encumbrances on our assets; and
- make acquisitions or complete mergers or sales of assets, or engage in new businesses.

These restrictions may interfere with our ability to obtain financing or to engage in other business activities, which may have a material adverse effect on our business, financial condition or results of operations.

If we are unable to comply with the covenants contained in our Amended and Restated 2013 Credit Facility, it could constitute an event of default and our lenders could declare all borrowings outstanding, together with accrued and unpaid interest, to be immediately due and payable. If we are unable to repay or otherwise refinance these borrowings when due, our lenders could sell the collateral securing our credit facilities, which constitutes substantially all of our assets.

Our outstanding indebtedness under our secured credit facility bears interest at a variable rate, which makes us more vulnerable to increases in interest rates and could cause our interest expense to increase and decrease cash available for operations and other purposes.

In connection with our purchase of the business of Sport Truck in March 2014, we entered into the Amended and Restated 2013 Credit Facility, which provided a maturing secured Term Loan in the principal amount of \$50.0 million. On December 12, 2014, in connection with the acquisition of RaceFace/Easton, the Company entered into the First Amendment to the Amended and Restated 2013 Credit Facility. The First Amendment increased the Term Loan by the principal amount of \$30.0 million to a total of \$56.8 million, subject to quarterly amortization payments, and extended the maturity of the Amended and Restated Credit Facility through December 12, 2019. Borrowings under our Amended and Restated 2013 Credit Facility bear interest on a variable rate which increases and decreases based upon changes in the underlying interest rate and/or our leverage ratio. Any such increases in the interest rate or increases of our borrowings under the Amended and Restated 2013 Credit Facility will increase our interest expense. As of March 31, 2015, we had \$49.3 of indebtedness, bearing interest at a variable rate, outstanding under the Amended and Restated 2013 Credit Facility. Recent interest rates in the United States have been at historically low levels, and any increase in these rates would increase our interest expense and reduce our funds available for operations and other purposes. Although from time to time we may enter into agreements to hedge a portion of our interest rate exposure, these agreements may be costly and may not protect against all interest rate fluctuations. Accordingly, we may experience material increases in our interest expense as a result of increases in interest rate levels generally. Based on the \$49.3 million of variable interest rate indebtedness that was outstanding as of March 31,

2015, a hypothetical 100 basis point increase or decrease in the interest rate would have resulted in an approximately \$0.1 million change to our interest expense for the three months ended March 31, 2015.

32

Table of Contents

We are subject to certain risks in our manufacturing and in the testing of our products.

As of March 31, 2015, we employed approximately 1,000 full-time employees worldwide, a large percentage of which work at our manufacturing facilities. Our business involves complex manufacturing processes that can be inherently dangerous. Although we employ safety procedures in the design and operation of our facilities, there is a risk that an accident or death could occur in one of our facilities. Also, prior to the introduction of new products, our employees test the products under rigorous conditions, which involve the risk of injury or death. Any accident could result in manufacturing or product delays, which could negatively affect our business, financial condition or results of operations. The outcome of litigation is difficult to assess or quantify and the cost to defend litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, could have a negative effect on our business, financial condition or results of operations.

We are subject to extensive United States federal and state, foreign and international safety, environmental, employment practices and other government regulations that may require us to incur expenses or modify product offerings in order to maintain compliance with such regulation, which could have a negative effect on our business and results of operations.

We are subject to extensive laws and regulations relating to safety, environmental, and other laws and regulations promulgated by the United States federal and state governments, as well as foreign and international regulatory authorities. Although we believe that our products, policies and processes comply with applicable safety, environmental, and other standards and related regulations, future regulations may require additional safety standards that would require additional expenses and/or modification of product offerings in order to maintain such compliance. Failure to comply with applicable regulations could result in fines, increased expenses to modify our products and harm to our reputation, all of which could have an adverse effect on our business, financial condition or results of operations.

Moreover, certain of our customer contracts require us to comply with the standards of voluntary standard-setting organizations, such as the United States Consumer Product Safety Commission, the National Highway Safety Administration, and European Committee for Standardization (CEN). Failure to comply with the voluntary requirements of such organizations could result in the loss of certain customer contracts, which could have an adverse effect on our business, financial condition or results of operations.

We are subject to employment practice laws and regulations and as such are exposed to litigation risks.

We are subject to extensive laws and regulations relating employment practices, including wage and hour, wrongful termination and discrimination. Complying with such laws and regulations, and defending against allegations of our failure to comply (including meritless allegations), can be expensive and time consuming. We believe that our policies and processes comply with applicable employment standards and related regulations, however, we are subject to risks of litigation by employees and others which might involve allegations of illegal, unfair or inconsistent employment practices, including wage and hour violations and employment discrimination, misclassification of independent contractors as employees, wrongful termination and other concerns, which could require additional expenditures.

We are subject to environmental laws and regulation and potential exposure for environmental costs and liabilities. Our operations, facilities and properties are subject to a variety of foreign, federal, state and local laws and regulations relating to health, safety and the protection of the environment. These environmental laws and regulations include those relating to the use, generation, storage, handling, transportation, treatment and disposal of solid and hazardous materials and wastes, emissions to air, discharges to waters and the investigation and remediation of contamination. Many of these laws impose strict, retroactive, joint and several liability upon owners and operators of properties, including with respect to environmental matters that occurred prior to the time the party became an owner or operator. In addition, we may have liability with respect to third party sites to which we send waste for disposal. Failure to comply with such laws and regulations can result in significant fines, penalties, costs, liabilities or restrictions on operations that could negatively affect our business, financial condition or results of operations. From time to time, we have been involved in administrative or legal proceedings relating to environmental, health or safety matters and have in the past incurred expenditures relating to such matters.

We believe that our operations are in substantial compliance with applicable environmental laws and regulations. However, additional environmental issues relating to presently known or unknown matters could give rise to currently unanticipated investigation, assessment or expenditures. Compliance with more stringent laws or regulations, as well as different interpretations of existing laws, more vigorous enforcement by regulators or unanticipated events, could require additional expenditures that may materially affect our business, financial condition or results of operations.

33

Table of Contents

Federal, state, local, foreign and international laws and regulations relating to land-use, noise and air pollution may have a negative impact on our future sales and results of operations.

The products in our powered vehicles line are used in vehicles which are subject to numerous federal, state, local, foreign and international laws and regulations relating to noise and air-pollution. Powered vehicles, and even bikes, have become subject to laws and regulations prohibiting their use on certain lands and trails. For example, in San Mateo County, California, mountain bikes are not allowed on county trails, and ATV and Side-by-Side riding is not allowed in Zion National Park, among many other national and state parks. In addition, recreational snowmobiling has been restricted in some national parks and federal lands in Canada, the United States and other countries. If more of these laws and regulations are passed and the users of our products lose convenient locations to ride their mountain bikes and powered vehicles, our sales could decrease and our business, financial condition or results of operations could suffer.

Fuel shortages, or high prices for fuel, could have a negative effect on the use of powered vehicles that use our products.

Gasoline or diesel fuel is required for the operation of the powered vehicles that use our products. There can be no assurance that the supply of these fuels will continue uninterrupted, that rationing will not be imposed or that the price of or tax on these petroleum products will not significantly increase in the future. Shortages of gasoline and diesel fuel and substantial increases in the price of fuel could have a material adverse effect on our powered vehicle product category in the future, which could have a negative effect on our business, financial condition or results of operations. We do not control our suppliers or OEMs, or require them to comply with a formal code of conduct, and actions that they might take could harm our reputation and sales.

We do not control our suppliers or OEMs or their labor, environmental or other practices. A violation of labor, environmental, intellectual property or other laws by our suppliers or OEMs, or a failure of these parties to follow generally accepted ethical business practices, could create negative publicity and harm our reputation. In addition, we may be required to seek alternative suppliers or OEMs if these violations or failures were to occur. We do not inspect or audit compliance by our suppliers or OEMs with these laws or practices, and we do not require our suppliers or OEMs or licensees to comply with a formal code of conduct. Any conduct or actions that our suppliers could take could reduce demand for our products, harm our ability to meet demand or harm our reputation, brand image, business, financial condition or results of operations.

We depend on a limited number of suppliers for our materials and component parts for some of our products, and the loss of any of these suppliers or an increase in cost of raw materials could harm our business.

We depend on a limited number of suppliers for certain components. If our current suppliers, in particular the minority of those which are "single-source" suppliers, are unable to timely fulfill orders, or if we are required to transition to other suppliers, we could experience significant production delays or disruption to our business. We define a single-source supplier as a supplier from which we purchase all of a particular raw material or input used in our manufacturing operations, although other suppliers are available from which to purchase the same raw material or input or an equivalent substitute. We do not maintain long term supply contracts with any of our suppliers and instead purchase these components on a purchase order basis. As a result, we cannot force any supplier to sell us the necessary components we use in creating our products and we could face significant supply disruptions should they refuse to do so. As the majority of our bike component manufacturing occurs in Taiwan, we could experience difficulties locating qualified suppliers geographically located closer to these facilities. Furthermore, such suppliers could experience difficulties in providing us with some or all of the materials we require, which could result in disruptions in our manufacturing operations. If we experience difficulties with our suppliers or manufacturing delays caused by our suppliers, whether in connection with our manufacturing operations in the United States or in Taiwan, our business, financial condition and results of operations could be materially and adversely impacted.

In addition, we purchase various raw materials in order to manufacture our products. The main commodity items purchased for production include aluminum, magnesium, steel and carbon. Historically, price fluctuations for these components and raw materials have not had a material impact on our business. In the future, however, if we experience material increases in the price of components or raw materials and are unable to pass on those increases to

our customers, or there are shortages in the availability of such component parts or raw materials, it could negatively affect our business, financial condition or results of operations.

34

Table of Contents

In addition to our various single-source suppliers, we also rely on one "sole-source" supplier, Miyaki Corporation, or Miyaki. We define a sole-source supplier as a supplier of a raw material or input for which there is no other supplier of the same product or an equivalent substitute. Miyaki is the exclusive producer of the Kashima coating for our suspension component tubes. As part of our agreement with Miyaki, we have been granted the exclusive right to use the trademark "KASHIMACOAT" on products comprising the aluminum finished parts for suspension components (e.g., tubes) and on related sales and marketing material worldwide, subject to certain exclusions. Although we believe we could obtain other coatings of comparable utility from other sources if necessary, we could no longer obtain this specific Kashima coating or use the trademark "KASHIMACOAT" if Miyaki were to stop supplying us with this coating. The need to replace the Kashima coating could temporarily disrupt our business and harm our business, financial condition or results of operations.

New regulations related to conflict minerals may force us to incur additional expenses and otherwise adversely impact our business.

The U.S. Securities and Exchange Commission, or the SEC, has promulgated final rules mandated by the Dodd-Frank Act regarding disclosure of the use of tin, tantalum, tungsten and gold, known as conflict minerals, in products manufactured by public companies. These new rules require ongoing due diligence to determine whether such minerals originated from the Democratic Republic of Congo, or the DRC, or an adjoining country and whether such minerals helped finance the armed conflict in the DRC. Reporting obligations for the rule started on May 31, 2014 and are required annually thereafter. We are required to comply with the reporting obligations beginning with our current fiscal year ended December 31, 2015. There will be costs associated with complying with these disclosure requirements, including costs to determine the origin of conflict minerals in our products. The implementation of these rules and their effect on customer, supplier and/or consumer behavior could adversely affect the sourcing, supply and pricing of materials used in our products. As a result, we may also incur costs with respect to potential changes to products, processes or sources of supply. We may face disqualification as a supplier for customers and reputational challenges if the due diligence procedures we implement do not enable us to verify the origins for all conflict minerals used in our products or to determine if such conflict minerals are conflict-free. Accordingly, the implementation of these rules could have a material adverse effect on our business, results of operations and/or financial condition. The transition of a majority of the manufacturing of our bike suspension component products to our facility in Taiwan may negatively impact our brand image and consumer loyalty, which in turn could have a material adverse impact on our business and results of operations.

As we transition the majority of the manufacturing of our bike suspension component products to our facility in Taiwan, no assurances can be given that consumers may not be adversely influenced by the fact that such products will no longer be manufactured in the United States or that consumers and OEM customers may not otherwise perceive that the quality of our products is lowered as a result of the fact that they will be manufactured overseas. Such perceptions could adversely impact our business, financial condition or results of operations.

We may incur higher employee costs in the future.

We maintain a self-insured healthcare plan for our US based employees. We have insurance coverage in place for individual claims above a specified amount in any year. Inflation in healthcare costs, as well as additional costs we may incur as a result of current or future federal or state healthcare legislation and regulations, could significantly increase our employee healthcare costs in the future. Continued increases in our healthcare costs could adversely affect our earnings, financial condition and liquidity.

We rely on increasingly complex information systems for management of our manufacturing, distribution, sales and other functions. If our information systems fail to perform these functions adequately or if we experience an interruption in our operations, our business could suffer.

All of our major operations, including manufacturing, distribution, sales and accounting, are dependent upon our complex information systems. Our information systems are vulnerable to damage or interruption from, among other things:

- earthquake, fire, flood, hurricane and other natural disasters;
- power loss, computer systems failure, internet and telecommunications or data network failure; and

- hackers, computer viruses, software bugs or glitches.

Any damage or significant disruption in the operation of such systems or the failure of our information systems to perform as expected could disrupt our operations, reduce our efficiency, delay our fulfillment of customer orders or require significant unanticipated expenditures to correct, and thereby have a negative effect on our business, financial condition or results of operations.

35

Table of Contents

We could be negatively impacted by cybersecurity attacks.

We use a variety of information technology systems in the ordinary course of business, which are potentially vulnerable to unauthorized access, computer viruses and cyber attacks, including cyber attacks to our information technology infrastructure and attempts by others to gain access to our propriety or sensitive information, and ranging from individual attempts to advanced persistent threats. The procedures and controls we use to monitor these threats and mitigate our exposure may not be sufficient to prevent cyber security incidents. The results of these incidents could include misstated financial data, theft of trade secrets or other intellectual property, liability for disclosure of confidential customer, supplier or employee information, increased costs arising from the implementation of additional security protective measures, litigation and reputational damage, which could materially adversely affect our financial condition, business and results of operations. Any remedial costs or other liabilities related to cybersecurity incidents may not be fully insured or indemnified by other means.

Our operations may be impaired if our information technology systems fail to perform adequately or if they are the subject of a data breach or cyber attack.

Information technology systems are critically important to operating our business. We rely on information technology systems to manage business data, communications, supply chain, order entry and fulfillment, and other business processes. The failure of any of the information technology systems to perform as anticipated could disrupt our business and could result in transaction errors, processing inefficiencies and the loss of sales and customers, which could materially adversely affect our financial condition, business and results of operations.

We have grown and may continue to grow in the future through acquisitions. Growth by acquisitions involves risks and we may not be able to effectively integrate businesses we acquire or we may not be able to identify or consummate any future acquisitions on favorable terms, or at all.

In 2014 we acquired certain assets of Sport Truck, a full service distributor of aftermarket suspension solutions and certain assets of Race Face/Easton, a designer, manufacturer, and distributor of performance mountain and road bike wheels, cranks, and other performance cycling components. We intend to selectively evaluate additional acquisitions in the future. Any acquisitions that we might make are subject to various risks and uncertainties and could have a negative impact on our business, financial condition or results of operations. These risks include the inability to integrate effectively the operations, products, technologies and personnel of the acquired companies (some of which may be spread out in different geographic regions), the inability to achieve anticipated cost savings or operating synergies, the earn-outs we may contractually obligate ourselves to pay, and the risk we may not be able to effectively manage our operations at an increased scale of operations resulting from such acquisitions. In the event we do complete acquisitions in the future, such acquisitions could affect our cash flows and net income as we expend funds, increase indebtedness and incur additional expenses in connection with pursuing acquisitions. We may also issue shares of our common stock or other securities from time to time as consideration for future acquisitions and investments. We may not be able to identify or consummate any future acquisitions on favorable terms, or at all. We have significant earn-out payment obligations relating to the acquisitions of the businesses of Sport Truck and Race Face/Easton, which may adversely affect our liquidity and financial condition and results of operations.

In March 2014, we acquired the business of Sport Truck for approximately \$40.8 million. Under the terms of the asset purchase agreement for the acquisition, we will be obligated to make additional earn-out payments up to an aggregate of approximately \$29.3 million if the EBITDA of the acquired business for the years ending December 31, 2014, 2015 and 2016 exceeds approximately \$8.4 million, \$10.8 million and \$13.5 million, respectively, subject to a maximum payment of approximately \$8.1 million, \$9.9 million and \$11.3 million for each respective year. In accounting for the acquisition of Sport Truck, we established a contingent consideration liability of \$19.0 million at the acquisition date. As of March 31, 2015, the recorded fair value contingent consideration liability was \$21.3 million, based on the application of the Black-Scholes model to management's financial projections.

If, in the future, management's estimation techniques indicate an increase to the contingent consideration liability or if higher EBITDA (as defined in the acquisition agreement) for any period is actually achieved, we will need to accrue and pay additional amounts. Such additional accrual along with the payment of the contingent consideration could adversely impact our liquidity, financial condition and results of operations.

On December 12, 2014, we acquired the businesses of Race Face/Easton for approximately \$30.2 million. The terms of the asset purchase agreement include a potential earn-out opportunity of up to a maximum of \$15.4 million, contingent upon continued employment and the achievement of certain performance-based financial targets through October 2016. In accounting for the acquisition of Race Face/Easton, the earn-out payments have been excluded from the consideration paid. We will recognize the estimated value of the earn-out liability on a ratable basis as services are performed under the employment obligation. Our recognition of the earn-out liability and the payment of amounts due could adversely impact our liquidity, financial condition and results of operations.

Table of Contents

Our operating results are subject to quarterly variations in our sales, which could make our operating results difficult to predict and could adversely affect the price of our common stock.

We have experienced, and expect to continue to experience, substantial quarterly variations in our sales and net income. Our quarterly results of operations fluctuate, in some cases significantly, as a result of a variety of other factors, including, among other things:

- the timing of new product releases or other significant announcements by us or our competitors;
- new advertising initiatives;
- fluctuations in raw materials and component costs; and
- changes in our practices with respect to building inventory.

As a result of these quarterly fluctuations, comparisons of our operating results between different quarters within a single year are not necessarily meaningful and may not be accurate indicators of our future performance. Any quarterly fluctuations that we report in the future may differ from the expectations of market analysts and investors, which could cause the price of our common stock to fluctuate significantly. We also believe that the seasonal nature of our business may have been overshadowed over each of the past few years due to the rapid growth in sales we have experienced during the same period.

Our beliefs regarding the future growth of the performance suspension and ride dynamics product market are supported by qualitative data and limited sources and may not be reliable. A reduction or lack of continued growth in the popularity of high-end bikes, bikes or powered vehicles or in the number of consumers who are willing to pay premium prices for well-designed performance-oriented equipment in the markets in which we sell our products could adversely affect our product sales and profits, financial condition or results of operations.

We generate virtually all of our revenues from sales of performance suspension and ride dynamics products. Our beliefs regarding the outlook of the performance suspension product market come from qualitative data and limited sources, which may not be reliable. If our beliefs regarding the opportunities in the market for our products are incorrect or the number of consumers who we believe are willing to pay premium prices for well-designed performance-oriented equipment in the markets in which we sell our products does not increase, or declines, we may fail to achieve future growth and our business, financial condition or results of operations could be negatively affected.

Risks related to ownership of our common stock

The trading price of our common stock may be volatile, and you might not be able to sell your shares at or above the price you pay for the shares.

The trading price of our common stock could be volatile, and you could lose all or part of your investment in our common stock. Since our IPO in 2013, our stock price has fluctuated between \$20.75 and \$13.35 per share and such volatility may continue in the future. Factors affecting the trading price of our common stock could include:

- variations in our operating results or those of our competitors;
- new product or other significant announcements by us or our competitors;
- changes in our product mix;
- changes in consumer preferences;
- fluctuations in currency exchange rates;
- the gain or loss of significant customers;
- recruitment or departure of key personnel;
- changes in the estimates of our operating results or changes in recommendations by any securities analysts that elect to follow our common stock;
- changes in general economic conditions as well as conditions affecting our industry in particular; and
- sales of our common stock by us, our significant stockholders or our directors or executive officers.

In addition, in recent years, the stock market has experienced significant price fluctuations. Fluctuations in the stock market generally or with respect to companies in our industry could cause the trading price of our common stock to fluctuate for reasons unrelated to our business, operating results or financial condition. Some companies that have had volatile market prices for their securities have had securities class actions filed against them. A suit filed against us, regardless of its merits or outcome, could cause us to incur substantial costs and could divert management's attention.

Table of Contents

Future sales of our shares, or the perception that such sales may occur, could cause our stock price to decline.

If our existing stockholders sell substantial amounts of our common stock in the public market, or are perceived by the public market as intending to sell, the trading price of our common stock could decline. As of March 31, 2015, we had 36,871,531 shares of common stock outstanding of which 17,827,417 are freely tradable in the public market. As of March 31, 2015, 19,044,114 shares of common stock outstanding were held by directors, executive officers and other affiliates and are subject to volume and manner of sale limitations under Rule 144 under the Securities Act.

After our IPO, we filed a registration statement under the Securities Act to register shares of our common stock that we may issue under our equity plans. As a result, all such shares can be freely sold in the public market upon issuance, subject to any vesting or contractual lock-up agreements.

In addition, our Amended and Restated Certificate of Incorporation authorizes us to issue 90,000,000 shares of common stock, of which 36,871,531 shares were outstanding as of March 31, 2015. In the future, we may issue additional shares of common stock or other equity or debt securities convertible into common stock in connection with a financing, acquisition or otherwise. If any of these additional shares described are sold, or if it is perceived that they will be sold, in the public market, the trading price of our common stock could decline.

We are an "emerging growth company," and the reduced disclosure requirements applicable to emerging growth companies could make our common stock less attractive to investors.

We are an "emerging growth company," as defined in the JOBS Act. For as long as we are an emerging growth company, we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not emerging growth companies, including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act of 2002, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements and exemptions from the requirements of holding advisory "say-on-pay" and "say-when-on-pay" votes on executive compensation and shareholder advisory votes on golden parachute compensation. We will remain an emerging growth company until the earliest of (i) the last day of the fiscal year during which we have total annual gross revenues of \$1 billion or more; (ii) the last day of the fiscal year following the fifth anniversary of the completion of our IPO; (iii) the date on which we have, during the previous three-year period, issued more than \$1 billion in non-convertible debt; or (iv) the date on which we are deemed to be a "large accelerated filer" under the Exchange Act.

We cannot predict if investors will find our common stock less attractive to the extent we rely on these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile.

If securities or industry analysts do not publish research or publish unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. If one or more of the analysts who covers us downgrades our stock or publishes unfavorable research about our business or our industry, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price and trading volume to decline.

Compass and our directors and officers and insiders have substantial control over us and will be able to influence corporate matters.

As of March 31, 2015, Compass beneficially owns approximately 41.0% of our outstanding common stock. Compass, our directors and executive officers, and their affiliates beneficially own, in the aggregate, approximately 51.6% of our outstanding common stock. As a result, these stockholders are able to exercise significant influence over all matters requiring stockholder approval, including the election of directors, amendment of our Amended and Restated Certificate of Incorporation, and approval of any merger, consolidation, or sale of all, or substantially all, of our assets or other significant corporate transactions. In addition, Compass continues to have input on all matters before our board of directors because our director Elias Sabo is affiliated with Compass. Compass may also delay or prevent a change of control or otherwise discourage a potential acquirer from attempting to obtain control of us, even if such a change of control would benefit our other stockholders. So long as Compass or any of its affiliates continue to indirectly own a significant amount of our outstanding common stock, they will continue to be able to significantly

influence our decisions.

In addition, Compass is in the business of making investments in companies and may from time to time acquire and hold interests in businesses that may compete directly or indirectly with us. Compass may also pursue acquisition opportunities that are complementary to our business and, as a result, those acquisition opportunities may not be available to us.

38

Table of Contents

Anti-takeover provisions in our charter documents and Delaware law could discourage, delay or prevent a change in control of our company.

Our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws, or our Charter Documents, as well as Delaware law, contain provisions that may discourage, delay or prevent a change in our management or control over us that stockholders may consider favorable. Among other things, these provisions:

- authorize the issuance of "blank check" preferred stock that could be issued by our board of directors to discourage a takeover attempt;
- establish a classified board of directors, as a result of which the successors to the directors whose terms have expired will be elected to serve from the time of election and qualification until the third annual meeting following their election;
- require that directors be removed from office only for cause;
- provide that vacancies on our board of directors, including newly created directorships, may be filled only by a majority vote of directors then in office;
- from and after the date that Compass and its affiliates no longer collectively beneficially own (as determined pursuant to Rule 13d-3 under the Exchange Act), directly or indirectly, at least a majority of the voting power of all then outstanding shares of our capital stock entitled to vote generally in the election of directors, or the Trigger Date, prohibit stockholder action by written consent, requiring all actions to be taken at a meeting of the stockholders;
- provide that special meetings of our stockholders may be called only by our board of directors, our Chairperson of the board of directors, our Lead Director (if we do not have a Chairperson or the Chairperson is disabled), our Chief Executive Officer or our President (in the absence of a Chief Executive Officer) or, until the Trigger Date, Compass;
- from and after the Trigger Date, require supermajority stockholder voting for our stockholders to effect certain amendments to our Charter Documents; and
- establish advance notice requirements for nominations for elections to our board of directors or for proposing other matters that can be acted upon by stockholders at stockholder meetings.

In addition, we are subject to Section 203 of the General Corporation Law of the State of Delaware, or DGCL, which generally prohibits a Delaware corporation from engaging in any broad range of business combinations with a stockholder owning 15% or more of such corporation's outstanding voting stock for a period of three years following the date on which such stockholder became an "interested" stockholder. In order for us to consummate a business combination with an interested stockholder within three years of the date on which the stockholder became interested, either (i) the business combination or the transaction that resulted in the stockholder becoming interested must be approved by our board of directors prior to the date the stockholder became interested, (ii) the interested stockholder must own at least 85% of our outstanding voting stock at the time the transaction commences (excluding voting stock owned by directors who are also officers and certain employee stock plans) or (iii) the business combination must be approved by our board of directors and authorized by at least two-thirds of our stockholders (excluding the interested stockholder) at a special or annual meeting (not by written consent). This provision could have the effect of delaying or preventing a change in control, whether or not it is desired by or beneficial to our stockholders. Any delay or prevention of a change in control transaction or changes in our board of directors and management could deter potential acquirers or prevent the completion of a transaction in which our stockholders could receive a substantial premium over the then-current market price for their shares of our common stock.

Our Amended and Restated Certificate of Incorporation designates the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or other employees.

Our Amended and Restated Certificate of Incorporation provides that, with certain limited exceptions, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will be the sole and exclusive forum for (i) any derivative action or proceeding brought on our behalf, (ii) any action asserting a claim of breach of fiduciary duty owed by any director, officer or other employee of our company owed to us or our stockholders, (iii) any action asserting a claim against us arising pursuant to any provision of the DGCL or our Charter Documents, (iv) any action to interpret, apply, enforce or determine the validity of our Charter Documents, or (v) any

action asserting a claim governed by the internal affairs doctrine. Any person or entity purchasing or otherwise acquiring any interest in shares of our capital stock is deemed to have received notice of and consented to the foregoing provisions. This choice of forum provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and employees. Alternatively, if a court were to find this choice of forum provision inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business, financial condition or results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table contains the details related to the repurchase of common stock based on the date of trade during the quarter ended March 31, 2015:

Period	Total Number of Shares Purchased	Weighted Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased under the Plans or Programs (1)
1/1 - 1/31	—	\$—	—	\$39,429,194
2/1 - 2/28	16,684	\$ 14.95	16,684	\$39,179,720
3/1 - 3/31	233,587	\$ 14.91	233,587	\$35,695,902
Total	250,271	\$ 14.92	250,271	\$35,695,902

(1) On November 3, 2014, the Company's Board of Directors authorized a share repurchase program for up to \$40 million of the Company's common shares outstanding. The repurchase program expires on December 31, 2015.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.
