UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT

pursuant to Section 13 or 15(d)

of the Securities Exchange Act of 1934

FOR THE QUARTERLY PERIOD ENDED December 31, 2017

000-15701

(Commission file number)

NATURAL ALTERNATIVES INTERNATIONAL, INC.

(Exact name of registrant as specified in its charter)

Delaware

84-1007839

(State of incorporation)

(IRS Employer Identification No.)

1535 Faraday Drive

(760) 744-7340

Carlsbad, California 92008

(Address of principal executive offices) (Registrant's telephone number)

Indicate by check mark whether Natural Alternatives International, Inc. (NAI) (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that NAI was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether NAI has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that NAI was required to submit and post such files).

Yes No

Indicate by check mark whether NAI is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company.

Large accelerated filer Accelerated filer Emerging Growth Company

Non-accelerated filer Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether NAI is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of February 13, 2018, 7,429,020 shares of NAI's common stock were outstanding, net of 1,052,657 treasury shares.

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

Certain statements in this Quarterly Report, including information incorporated by reference, are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and the Private Securities Litigation Reform Act of 1995. Forward-looking statements reflect current views about future events and financial performance based on certain assumptions. They include opinions, forecasts, intentions, plans, goals, projections, guidance, expectations, beliefs, or other statements that are not statements of historical fact. Words such as “may,” “will,” “should,” “could,” “would,” “expects,” “plans,” “believes,” “anticipates,” “intend,” “approximates,” “predicts,” “forecasts,” or “projects,” or the negative or other variation of such words, and similar expressions may identify a statement as a forward-looking statement. Any statements that refer to projections of our future financial performance, our anticipated growth and trends in our business, our goals, strategies, focus and plans, and other characterizations of future events or circumstances, including statements expressing general optimism about future operating results, are forward-looking statements. Forward-looking statements in this Quarterly Report may include statements about:

- future financial and operating results, including projections of net sales, revenue, income or loss, net income or loss per share, profit margins, expenditures, liquidity, the effect of changes in tax law and other financial items;
- our ability to maintain or increase our patent and trademark licensing revenues;
- our ability to develop market acceptance for and increase sales of new products, develop relationships with new customers and maintain or improve existing customer relationships;
- our ability to protect our intellectual property;
- our ability to improve operating efficiencies, manage costs and business risks and improve or maintain profitability;
- currency exchange rates, their effect on our results of operations, including amounts that may be reclassified as earnings, the availability of foreign exchange facilities, our ability to effectively hedge against foreign exchange risks and the extent to which we may seek to hedge against such risks;
- future levels of our revenue concentration risk;
- the outcome of currently pending litigation, regulatory and tax matters, the costs associated with such matters and the effect of such matters on our business and results of operations
- sources and availability of raw materials, including the limited number of suppliers of beta-alanine and certain other raw materials;
- inventories, including the adequacy of raw material and other inventory levels to meet future customer demand and the adequacy and intended use of our facilities;
- manufacturing and distribution channels, product returns, and potential product recalls;
- current or future customer orders;
- the impact on our business and results of operations from variations in quarterly net sales from seasonal and other factors;
- our ability to operate within the standards set by the U.S. Food and Drug Administration’s (FDA) Good Manufacturing Practices (GMP);
- our ability to successfully expand our operations, including outside the United States (U.S.);
- the adequacy of our reserves and allowances;
- current and future economic and political conditions;
- the sufficiency of our available cash, cash equivalents, and potential cash flows from operations to fund our current working capital needs and capital expenditures through the next 12 months;
- the impact of accounting pronouncements and our adoption of certain accounting guidance; and

• other assumptions described in this report underlying or relating to any forward-looking statements.

The forward-looking statements in this Quarterly Report speak only as of the date of this Quarterly Report and caution should be taken not to place undue reliance on any such forward-looking statements. Forward-looking statements are subject to certain events, risks, and uncertainties that may be outside of our control. When considering forward-looking statements, you should carefully review the risks, uncertainties and other cautionary statements in this Quarterly Report as they identify certain important factors that could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. These factors include, among others, the risks described under Item 1A of Part II and elsewhere in this Quarterly Report, as well as in other reports and documents we file with the United States Securities and Exchange Commission (SEC).

Unless the context requires otherwise, all references in this Quarterly Report to the “Company,” “NAI,” “we,” “our,” and “us” refer to Natural Alternatives International, Inc. and, as applicable, Natural Alternatives International Europe S.A. (NAIE).

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

A. Basis of Presentation and Summary of Significant Accounting Policies

The accompanying interim unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and applicable rules and regulations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations. In management's opinion, all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows have been included and are of a normal, recurring nature. The results of operations for the *three* and *six* months ended *December 31, 2017* are *not* necessarily indicative of the operating results for the full fiscal year or any future periods.

You should read the financial statements and these notes, which are an integral part of the financial statements, together with our audited financial statements included in our Annual Report on Form 10-K for the fiscal year ended *June 30, 2017* ("2017 Annual Report"). The accounting policies used to prepare the financial statements included in this Quarterly Report are the same as those described in the notes to the consolidated financial statements in our 2017 Annual Report unless otherwise noted below.

Recent Accounting Pronouncements

In *March 2016*, the FASB issued Accounting Standards Update *No. 2016-02, Leases (Topic 842) (ASU 2016-02)*, which amends existing standards for leases to increase transparency and comparability among organizations by requiring recognition of lease assets and liabilities on the balance sheet and requiring disclosure of key information about such arrangements. ASU 2016-02 will be effective for us beginning in our *first* quarter of fiscal 2020. Early adoption is permitted. We are currently evaluating the impact of adopting the new standard on our consolidated financial statements and the timing and presentation of our adoption.

In *April 2016*, the FASB issued Accounting Standards Update *No. 2016-10, Revenue from Contracts with Customers (Topic 606)(ASU 2016-10)*, which amends and adds clarity to certain aspects of the guidance set forth in the upcoming revenue standard (ASU 2014-09) related to identifying performance obligations and licensing. In *May 2016*, the FASB issued Accounting Standards Update *No. 2016-11, Revenue Recognition (Topic 605) and Derivatives*

and Hedging (Topic 815) (ASU 2016-11), which amends and rescinds certain revenue recognition guidance previously released within ASU 2014-09. In May 2016 the FASB issued Accounting Standards Update No. 2016-12, Revenue from Contracts with Customers (Topic 606) (ASU 2016-12), which provides narrow scope improvements and practical expedients related to ASU 2014-09. ASU 2014-09 defines a *five* step process to achieve this core principle and, in doing so, it is possible that more judgment and estimates *may* be required within the revenue recognition process than is required under present U.S. GAAP. These *may* include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price, and allocating the transaction price to each separate performance obligation. The new standard also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. All of these new standards will be effective for us concurrently with ASU 2014-09, beginning in our *first* quarter of fiscal 2019. Currently, we do *not* expect our annual revenue to be materially different under Topic 606. The most significant change will be to our quarterly and annual financial statement disclosures. We are continuing to evaluate the impact of adopting the new standard.

In August 2017, the FASB issued ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The ASU is intended to improve and simplify accounting rules around hedge accounting and improve the disclosures of hedging arrangements. We are currently evaluating the impact of adopting the new standard on our consolidated financial statements. ASU 2017-12 will be effective for us beginning in our *first* quarter of fiscal 2020.

On December 22, 2017, the SEC issued guidance under Staff Accounting Bulletin No. 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act (“SAB 118”) directing taxpayers to consider the impact of the U.S. legislation as “provisional” when it does *not* have the necessary information available, prepared or analyzed (including computations) in reasonable detail to complete its accounting for the change in tax law. In accordance with SAB 118, the our estimated income tax is considered provisional and is expected to be finalized by the end of our fiscal year.

Table of Contents**Net Income per Common Share**

We compute net income per common share using the weighted average number of common shares outstanding during the period, and diluted net income per common share using the additional dilutive effect of all dilutive securities. The dilutive impact of stock options account for the additional weighted average shares of common stock outstanding for our diluted net income per common share computation. We calculated basic and diluted net income per common share as follows (in thousands, except per share data):

	Three Months Ended December 31, 2017		Six Months Ended December 31, 2016	
Numerator				
Net (loss) income	\$ (1,318)	\$ 2,466	\$ 116	\$ 4,956
Denominator				
Basic weighted average common shares outstanding	6,615	6,567	6,611	6,563
Dilutive effect of stock options	—	116	226	102
Diluted weighted average common shares outstanding	6,615	6,683	6,837	6,665
Basic net (loss) income per common share	\$ (0.20) \$ 0.38		\$ 0.02 \$ 0.76	
Diluted net (loss) income per common share	\$ (0.20) \$ 0.37		\$ 0.02 \$ 0.74	

In periods where we have a net loss, stock options and restricted stock are excluded from our calculation of diluted net income (loss) per common share, as their inclusion would have an antidilutive effect. We excluded shares related to stock options totaling 135,000 and shares related to restricted stock totaling 813,665 for the *three* months ended *December 31, 2017*. No shares related to stock options or restricted stock were excluded for the *six* months ended *December 31, 2017* or the *three* and *six* months ended *December 31, 2016*.

Revenue Recognition

To recognize revenue, *four* basic criteria must be met: 1) there is evidence that an arrangement with a buyer exists; 2) delivery has occurred; 3) the fee is fixed or determinable; and 4) collectability is reasonably assured. Revenue from sales transactions where the buyer has the right to return the product is recognized at the time of sale only if (a) the seller's price to the buyer is substantially fixed or determinable at the date of sale; (b) the buyer has paid the seller, or the buyer is obligated to pay the seller and the obligation is *not* contingent on resale of the product; (c) the buyer's obligation to the seller would *not* be changed in the event of theft or physical destruction or damage of the product; (d) the buyer acquiring the product for resale has economic substance apart from that provided by the seller; (e) the

seller does *not* have significant obligations for future performance to directly bring about resale of the product by the buyer; and (f) the amount of future returns can be reasonably estimated. We recognize revenue upon determination that all criteria for revenue recognition have been met. The criteria are usually met at the time title passes to the customer, which usually occurs upon shipment. Revenue from shipments where title passes upon completion of delivery is deferred until the shipment has been delivered.

Table of Contents

We record reductions to gross revenue for estimated returns of private-label contract manufacturing products and beta-alanine raw material sales. The estimated returns are based on the trailing *six* months of private-label contract manufacturing gross sales and our historical experience for both private-label contract manufacturing and beta-alanine raw material sales returns. However, the estimate for product returns does *not* reflect the impact of a potential large product recall resulting from product nonconformance or other factors as such events are *not* predictable nor is the related economic impact estimable.

On *August 7, 2017*, we entered into *three* agreements (“Agreements”), with The Juice Plus+ Company LLC (“Juice Plus+”). The Agreements are an Exclusive Manufacturing Agreement, a Restricted Stock Award Agreement, and an Irrevocable Proxy. Pursuant to the Exclusive Manufacturing Agreement, Juice Plus+ has granted us exclusive rights to manufacture and supply them with certain of their products within *24* countries where Juice Plus+ currently sells those products. Pursuant to the Restricted Stock Award Agreement, NAI has granted *500,000* shares of NAI common stock to Juice Plus+, (the “Shares”), and Juice Plus+ has agreed the Shares are subject to certain restrictions and risk of forfeiture. Pursuant to the Irrevocable Proxy, Juice Plus+ also has granted to the NAI Board of Directors Juice Plus+’s right to vote the Shares that remain subject to the associated risk of forfeiture. The Agreements each are for a term of *5* years, and each *may* be terminated by either party only upon the occurrence of specified events. The expense associated with the shares granted to Juice Plus+ is recorded as a reduction to revenue. We recorded of *\$245,000* of expense during the *three* months ended *December 31, 2017* and *\$408,000* during the *six* months ended *December 31, 2017*.

We currently own certain U.S. patents and patent applications, and corresponding foreign patents and patent applications. All of these patents and patent rights relate to the ingredient known as beta-alanine and which we market and sell under our CarnoSyn® and SR CarnoSyn® trade names. We recorded beta-alanine raw material sales and royalty and licensing income as a component of revenue in the amount of *\$4.0* million during the *three* months ended *December 31, 2017* and *\$9.8* million during the *six* months ended *December 31, 2017*. We recorded *\$6.7* million during the *three* months ended *December 31, 2016* and *\$13.4* million during the *six* months ended *December 31, 2016*. These royalty income and raw material sale amounts resulted in royalty expense paid to the original patent holders from whom NAI acquired its patents and patent rights. We recognized royalty expense as a component of cost of goods sold in the amount of *\$160,000* during the *three* months ended *December 31, 2017* and *\$444,000* during the *six* months ended *December 31, 2017*. We recognized *\$250,000* during the *three* months ended *December 31, 2016* and *\$566,000* during the *six* months ended *December 31, 2016*.

Notes Receivable

On *September 30, 2017*, we accepted a *12*-month note from Kaged Muscle, LLC (“Kaged Muscle”), *one* of our contract manufacturing customers, in exchange for *\$1.5* million of trade receivables due to us from Kaged Muscle. Kaged Muscle is *one* of our fastest growing sports nutrition customers and we executed this note receivable conversion to assist them with their near term financing needs. The note carries an interest rate of *fifteen* percent (*15%*) per annum

and is an interest only note secured by the assets of Kaged Muscle and a personal guarantee by the co-founder and President of Kaged Muscle. Interest is due quarterly and the note can be paid down at any time without penalty. During the *three* and *six* months ended *December 31, 2017* we recognized \$58,000 in interest income associated with this note from Kaged Muscle.

Stock-Based Compensation

We have an omnibus incentive plan that was approved by our Board of Directors effective as of *October 15, 2009* and approved by our stockholders at the Annual Meeting of Stockholders held on *November 30, 2009*. Under the plan, we *may* grant nonqualified and incentive stock options and other stock-based awards to employees, non-employee directors and consultants.

We estimate the fair value of stock option awards at the date of grant using the Black-Scholes option valuation model. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that have *no* vesting restrictions and are fully transferable. Option valuation models require the input of highly subjective assumptions. Black-Scholes uses assumptions related to volatility, the risk-free interest rate, the dividend yield (which we assume to be zero, as to date we have *not* paid any cash dividends) and employee exercise behavior. Expected volatilities used in the model are based on the historical volatility of our stock price. The risk-free interest rate is derived from the U.S. Treasury yield curve in effect on the date of grant. The expected life of stock option grants is derived from historical experience. The fair value of restricted stock shares granted is based on the market price of our common stock on the date of grant. We amortize the estimated fair value of our stock awards to expense over the related vesting periods.

Table of Contents

We did *not* grant any options during the *three* month or six month periods ended *December 31, 2017* or *2016*. All remaining outstanding stock options are fully vested. *No* options were exercised during the *three* month or *six* month periods ended *December 31, 2017* or *2016*. There were *no* forfeitures during the *three* months ended *December 31, 2017*. During the *six* months ended *December 31, 2017* 5,000 options were forfeited. There were *no* forfeitures during the *three* month or *six* month periods ended *December 31, 2016*.

We did *not* grant any shares to employees during the *three* or *six* months ended *December 31, 2017*, or the *three* months ended *December 31, 2016*. We granted 10,000 restricted shares to a new member of management during the *six* months ended *December 31, 2016*. Our net income included stock based compensation expense of approximately \$302,000 for the *three* months ended *December 31, 2017*, and \$603,000 for the *six* months ended *December 31, 2017*. Our net income included stock based compensation expense of approximately \$256,000 for the *three* months ended *December 31, 2016*, and \$506,000 for the *six* months ended *December 31, 2016*.

Fair Value of Financial Instruments

Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. We use a *three*-level hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs are inputs that reflect our assumptions about the inputs that market participants would use in pricing the asset or liability and are developed based on the best information available under the circumstances.

The fair value hierarchy is broken down into *three* levels based on the source of inputs. In general, fair values determined by Level 1 inputs use quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access. We classify cash, cash equivalents, and marketable securities balances as Level 1 assets. Fair values determined by Level 2 inputs are based on quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are *not* active and models for which all significant inputs are observable or can be corroborated, either directly or indirectly by observable market data. Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. These include certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

As of *December 31, 2017* and *June 30, 2017*, we did *not* have any financial assets or liabilities classified as Level 1 except for cash and cash equivalents, and assets related to our pension plan. We classify derivative forward exchange contracts as Level 2 assets. The fair value of our forward exchange contracts as of *December 31, 2017* was a net liability of \$2.7 million. The fair value of our forward exchange contracts as of *June 30, 2017* was a net liability of

\$521,000. As of *December 31, 2017* and *June 30, 2017* we did *not* have any financial assets or liabilities classified as Level 3. We did *not* transfer any assets or liabilities between Levels during fiscal 2017 or the six months ended *December 31, 2017*.

Concentrations of Credit Risk

Financial instruments that subject us to concentrations of credit risk consist primarily of cash and cash equivalents and accounts receivable. We place our cash and cash equivalents with highly rated financial institutions. Credit risk with respect to receivables is concentrated with our *three* largest customers, whose receivable balances collectively represented 76.1% of gross accounts receivable at *December 31, 2017* and 65.6% at *June 30, 2017*. Additionally, amounts due related to our beta-alanine raw material sales were 15.6% of gross accounts receivable at *December 31, 2017*, and 21.3% of gross accounts receivable at *June 30, 2017*. Concentrations of credit risk related to the remaining accounts receivable balances are limited due to the number of customers comprising our remaining customer base.

B. Inventories, net

Inventories, net consisted of the following (in thousands):

	December 31, 2017	June 30, 2017

Table of Contents

E. Debt

We have a Credit Agreement with Wells Fargo Bank, N.A. The Credit Agreement provides us with a credit line of up to \$10.0 million and matures on *February 1, 2020*. The line of credit *may* be used to finance working capital requirements. On *September 29, 2017*, we executed an amendment to the Credit Agreement, which now allows us to make loans or advances to *third parties not* exceeding \$1.5 million. We executed this amendment in order to issue a note receivable of \$1.5 million to a customer. There is *no* commitment fee under this agreement. There are *no* amounts currently drawn under the line of credit.

Under the terms of the Credit Agreement, borrowings are subject to eligibility requirements including maintaining (i) a ratio of total liabilities to tangible net worth of *not* greater than 1.25 to 1.0 at any time; and (ii) a ratio of total current assets to total current liabilities of *not* less than 1.75 to 1.0 at each fiscal quarter end. Any amounts outstanding under the line of credit will bear interest at a fixed or fluctuating interest rate as elected by NAI from time to time; provided, however, that if the outstanding principal amount is less than \$100,000 such amount shall bear interest at the then applicable fluctuating rate of interest. If elected, the fluctuating rate per annum would be equal to 1.25% above the daily *one* month LIBOR rate as in effect from time to time. If a fixed rate is elected, it would equal a per annum rate of 1.25% above the LIBOR rate in effect on the *first* day of the applicable fixed rate term. Any amounts outstanding under the line of credit must be paid in full on or before the maturity date. Amounts outstanding that are subject to a fluctuating interest rate *may* be prepaid at any time without penalty. Amounts outstanding that are subject to a fixed interest rate *may* be prepaid at any time in minimum amounts of \$100,000, subject to a prepayment fee equal to the sum of the discounted monthly differences for each month from the month of prepayment through the month in which the then applicable fixed rate term matures.

Our obligations under the Credit Agreement are secured by our accounts receivable and other rights to payment, general intangibles, inventory, equipment and fixtures.

On *December 31, 2017*, we were in compliance with all of the financial and other covenants required under the Credit Agreement.

We also have a foreign exchange facility with Wells Fargo Bank, N.A. in effect until *January 31, 2019*, and with Bank of America, N.A. in effect until *August 15, 2019*.

We did *not* use our working capital line of credit nor did we have any long-term debt outstanding during the six months ended *December 31, 2017*. As of *December 31, 2017*, we had \$10.0 million available under our credit facilities.

F. Economic Dependency

We had substantial net sales to certain customers during the periods shown in the following table. The loss of any of these customers, or a significant decline in sales to these customers, the growth rate of sales to these customers, or in these customers' ability to make payments when due, could have a material adverse impact on our net sales and net income. Net sales to any *one* customer representing *10%* or more of the respective period's consolidated net sales were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	December 31, 2017	2016	December 31, 2017	2016
Customer 1	\$19,134	\$15,074	\$32,292	\$32,152
Customer 2	4,079	(a)	7,239	(a)
	\$23,213	\$15,074	\$39,531	\$32,152

(a) Sales were less than *10%* of the respective period's total revenues.

Table of Contents

We buy certain products, including beta-alanine, from a limited number of raw material suppliers. The loss of any of these suppliers could have a material adverse impact on our net sales and net income. Raw material purchases from any *one* supplier representing *10%* or more of the respective period's total raw material purchases were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	December 31,		December 31,	
	2017	2016	2017	2016
Supplier 1	\$(a)	(a)	\$2,992	(a)
Supplier 2	1,684	(a)	2,911	(a)
Supplier 3	1,718	(a)	(a)	(a)
	\$3,402	—	\$5,903	—

(a) Purchases were less than *10%* of the respective period's total raw material purchases.

G. Segment Information

Our business consists of *two* segments for financial reporting purposes, identified as (i) private label contract manufacturing, which primarily relates to the provision of private label contract manufacturing services to companies that market and distribute nutritional supplements and other health care products; and (ii) patent and trademark licensing, which primarily includes direct raw material sales and royalty income from our license and supply agreements associated with the sale and use of beta-alanine under our CarnoSyn® and SR CarnoSyn® trade names.

We evaluate performance based on a number of factors. The primary performance measures for each segment are net sales and income or loss from operations before corporate allocations. Operating income or loss for each segment does *not* include corporate general and administrative expenses, interest expense and other miscellaneous income and expense items. Corporate general and administrative expenses, which are *not* allocated to any segment, include, but are *not* limited to: human resources, corporate legal, finance, information technology, and other corporate level related expenses. The accounting policies of our segments are the same as those described in Note A above and in the consolidated financial statements included in our *2017* Annual Report.

Our operating results by business segment were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	December 31, 2017	2016	December 31, 2017	2016
Net Sales				
Private label contract manufacturing	\$29,355	\$23,864	\$51,577	\$51,243
Patent and trademark licensing	3,980	6,695	9,832	13,383
Total Net Sales	\$33,335	\$30,559	\$61,409	\$64,626

	Three Months Ended		Six Months Ended	
	December 31, 2017	2016	December 31, 2017	2016

Private label contract manufacturing	\$ 72,115	\$60,489
Patent and Trademark Licensing	12,472	12,122
Total	\$ 84,587	\$72,611

Table of Contents

Our private label contract manufacturing products are sold both in the U.S. and in markets outside the U.S., including Europe, Australia and Asia, as well as Canada, Mexico and South Africa. Our primary market outside the U.S. is Europe. Our patent and trademark licensing activities are primarily based in the U.S.

Net sales by geographic region, based on the customers' location, were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	December 31, 2017	December 31, 2016	December 31, 2017	December 31, 2016
United States	\$16,426	\$13,654	\$31,620	\$28,879
Markets outside of the United States	16,909	16,905	29,789	35,747
Total	\$33,335	\$30,559	\$61,409	\$64,626

Products manufactured by NAIE accounted for 81% of net sales in markets outside the U.S. for the *three* months ended *December 31, 2017*, and 79% for the *six* months ended *December 31, 2017*. Products manufactured by NAIE accounted for 60% of net sales in markets outside the U.S. for the *three* months ended *December 31, 2016*, and 53% for the *six* months ended *December 31, 2016*. No products manufactured by NAIE were sold in the U.S. during the *three* month or *six* month periods ended *December 31, 2017* and *2016*.

Assets and capital expenditures by geographic region, based on the location of the company or subsidiary at which they were located or made, were as follows (in thousands):

	Long-Lived Assets		Total Assets		Capital Expenditures Six Months Ended	
	December 31, 2017	June 30, 2017	December 31, 2017	June 30, 2017	December 31, 2017	December 31, 2016
United States	\$10,461	\$10,753	\$53,353	\$47,777	\$426	\$1,812
Europe	8,272	7,383	31,234	24,834	1,669	1,550
	\$18,733	\$18,136	\$84,587	\$72,611	\$2,095	\$3,362

H. Income Taxes

The Tax Cuts and Jobs Act (the “Act”) was enacted on *December 22, 2017*. Among other things, the Act reduces the U.S. federal corporate tax rate to *21%* and requires companies to pay a *one-time* deemed repatriation transition tax on earnings of U.S.-owned foreign subsidiaries that were previously tax deferred. At *December 31, 2017*, we had *not* completed our accounting for the tax effects of the Act; however, in certain cases, as described below and in accordance with SAB *118*, we made a reasonable estimate of the effects on our existing deferred tax balances and the *one-time* transition tax. In other cases, we were *not* able to make a reasonable estimate and continue to account for those items based on our existing accounting under ASC *740*, Income Taxes. For the items for which we did determine a reasonable estimate, we recognized a provisional amount as a discrete component of our provision for income taxes. The impact of the Tax Legislation *may* differ from these estimates, possibly materially, during the *one-year* measurement period ending *December 22, 2018* due to, among other things, further refinement of our calculations, changes in interpretations and assumptions we made, guidance that *may* be issued and actions we *may* take as a result of the Act.

To determine our quarterly provision for income taxes, we use an estimated annual effective tax rate that is based on expected annual income, statutory tax rates and tax planning opportunities available in the various jurisdictions to which we are subject. Certain significant or unusual items are separately recognized as discrete items in the quarter in which they occur and can be a source of variability in the effective tax rate from quarter to quarter. We recognize interest and penalties related to uncertain tax positions, if any, as an income tax expense.

The effective tax rate for the *three* months ended *December 31, 2017* was *153.1%* and the effective tax rate for the *six* months ended *December 31, 2017* was *97.31%*. In comparison, the effective tax rate for the *three* months ended *December 31, 2016* was *29.6 %* and the effective tax rate for the *six* months ended *December 31, 2016* was *30.1%*. The effective tax rates for the *three* and *six* months ended *December 31, 2017* differ from the estimated U.S. federal statutory rate of *28.06%* primarily due to the impact of the Act's required *one-time* transition tax and the reevaluation of our deferred taxes, offset by the favorable impact of foreign earnings taxed at less than the U.S. statutory rate. As a fiscal taxpayer, our U.S. federal statutory rate for the year ending *June 30, 2018* is estimated to be *28.06%* and is a blended rate of the historic *35%* statutory rate and the newly enacted *21%* rate. We expect our U.S. federal statutory rate to be *21%* for fiscal years beginning after *June 30, 2018*.

Table of Contents

As part of the Act, we are required to recognize a *one*-time deemed repatriation transition tax based on our total post-1986 earnings and profits (E&P) from our Swiss subsidiary NAIE. This accumulated E&P amount has historically been considered permanently reinvested thereby allowing us to defer recognizing any U.S. income tax on the amount. As a result of the Act we recorded a provisional amount for our *one*-time transition tax liability resulting in an increase in income tax expense during the *three* and *six* months ended *December 31, 2017* of \$1,815,966, which was treated as a discrete expense. In accordance with the provisions of the Act, we will elect to pay this tax over an *eight*-year period. Further, the transition tax is based in part on the amount of those earnings held in cash and other specified assets. This amount *may* change when we finalize the calculation at the conclusion of fiscal 2018. As of *December 31, 2017*, we *no* longer consider undistributed foreign earnings from NAIE as indefinitely reinvested. As a result, we have recorded \$775,000 in estimated foreign withholding taxes on the amounts deemed repatriated under the Act, which was also treated as a discrete expense during the period.

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are measured using enacted tax rates for each of the jurisdictions in which we operate, and the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. As of *December 31, 2017*, we remeasured certain deferred tax assets and liabilities based on the tax rates expected to apply in the future. For deferred tax asset and liability balances we expect to reverse during fiscal 2018 we used the blended U.S. statutory rate of 28.06% and for amounts expected to reverse in future periods we used the newly enacted 21% tax rate. However, we are still analyzing certain aspects of the Act and refining our calculations accordingly. This analysis and refinement could potentially affect the measurement of these balances or give rise to new deferred tax amounts. The provisional amount we recorded from our remeasurement of our deferred tax balance was \$664,000 and was treated as a discrete expense for the *three* and *six* months ended *December 31, 2017*.

We record valuation allowances to reduce our deferred tax assets to an amount that we believe is more likely than *not* to be realized. In assessing the realizability of deferred tax assets, management considers whether it is more likely than *not* that some portion or all of the deferred tax assets will ultimately be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. During the *three* and *six* months ended *December 31, 2017*, there was *no* change to our valuation allowance.

We are subject to taxation in the U.S., Switzerland and various U.S. state jurisdictions. Our tax returns for the fiscal years ended *June 30, 2014* and forward are subject to examination by U.S. tax authorities and for fiscal years ended *June 30, 2007* and forward are subject to examination by state tax authorities. Our tax filings for the fiscal year ended *June 30, 2015* and forward are subject to examination by Swiss tax authorities.

It is our policy to establish reserves based on management's assessment of exposure for certain positions taken in previously filed tax returns that *may* become payable upon audit by tax authorities. Our tax reserves are analyzed quarterly and adjustments are made as events occur that we believe warrant adjustments to the reserves. There were *no*

adjustments to these reserves in the *three* and *six* months ended *December 31, 2017*.

I. Treasury Stock

On *June 2, 2011*, the Board of Directors authorized the repurchase of up to *\$2.0* million of our common stock. On *February 6, 2015*, the Board of Directors authorized a *\$1.0* million increase to our stock repurchase plan bringing the total authorized repurchase amount to *\$3.0* million. On *May 11, 2015*, the Board of Directors authorized a *\$2.0* million increase to our stock repurchase plan bringing the total authorized repurchase amount to *\$5.0* million. On *March 28, 2017*, the Board of Directors authorized a *\$2.0* million increase to our stock repurchase plan bringing the total authorized repurchase amount to *\$7.0* million. Under the repurchase plan, we *may*, from time to time, purchase shares of our common stock, depending upon market conditions. When we do so we *may* purchase the shares in open market or privately negotiated transactions.

During the *three* and *six* months ended *December 31, 2017* and *December 31, 2016*, we did *not* repurchase any shares under this repurchase plan.

During the *three* months ended *December 31, 2017*, we acquired *7,264* shares in connection with restricted stock shares that vested during that year at a weighted average cost of *\$10.80* per share and a total cost of *\$78,000*. During the *six* months ended *December 31, 2017*, we acquired *7,998* shares in connection with restricted stock shares that vested during that period at a weighted average cost of *\$10.79* per share and a total cost of *\$86,000*. During the *three* months ended *December 31, 2016*, we acquired *367* shares from employees in connection with restricted stock shares that vested during the period at a weighted average cost of *\$12.30* per share and a total cost of *\$5,000*. During the *six* months ended *December 31, 2016*, we acquired *6,404* shares from employees in connection with restricted stock shares that vested during the period at a weighted average cost of *\$13.09* per share and a total cost of *\$84,000*.

Table of Contents

These shares were returned to NAI by the related employees and in return NAI paid each employee's required tax withholding required as a result of the vesting of the restricted shares. The valuation of the shares acquired and thereby the number of shares returned to NAI was calculated based on the closing share price on the date the restricted shares vested.

J. Derivatives and Hedging

We are exposed to gains and losses resulting from fluctuations in foreign currency exchange rates relating to forecasted product sales and transactions of NAIE, our foreign subsidiary denominated in foreign currencies. As part of our overall strategy to manage the level of exposure to the risk of fluctuations in foreign currency exchange rates, we *sometimes* use foreign exchange contracts in the form of forward contracts. To the extent we enter into such contracts, there can be *no* guarantee any such contracts will be effective hedges against our foreign currency exchange risk.

As of *December 31, 2017*, we had forward contracts designated as cash flow hedges primarily to protect against the foreign exchange risks inherent in our forecasted sales of products at prices denominated in currencies other than the U.S. Dollar. These contracts are expected to be settled through *August 2019*. For derivative instruments that are designated and qualify as cash flow hedges, we record the effective portion of the gain or loss on the derivative in other comprehensive income (loss) as a separate component of stockholders' equity and subsequently reclassify these amounts into earnings in the period during which the hedged transaction is recognized in earnings.

For foreign currency contracts designated as cash flow hedges, hedge effectiveness is measured using the spot rate. Changes in the spot-forward differential are excluded from the test of hedge effectiveness and are recorded currently in earnings as interest expense or income. We measure effectiveness by comparing the cumulative change in the hedge contract with the cumulative change in the hedged item. We did *not* have any losses or gains related to the ineffective portion of our hedging instruments during the *three* and *six* months ended *December 31, 2017*. During the *three* and *six* months ended *December 31, 2016*, we recorded a *\$92,000* gain related to the ineffective portion of our hedging instruments to other income. *None* of our foreign currency forward contracts were terminated as a result of ineffective hedging or forecasted transactions *no* longer probable of occurring for foreign currency forward contracts. We monitor the probability of forecasted transactions as part of our hedge effectiveness testing on a quarterly basis.

As of *December 31, 2017*, the notional amounts of our foreign exchange contracts designated as cash flow hedges were approximately *\$52.6* million (EUR *45.3* million). As of *December 31, 2017*, a net loss of approximately *\$2.7* million related to derivative instruments designated as cash flow hedges was recorded in OCI. It is expected that *\$2.0* million will be reclassified into earnings in the next *12* months along with the earnings effects of the related forecasted

transactions.

As of *December 31, 2017*, the fair value of our cash flow hedges was a liability of \$2.7 million, of which \$2.1 million was classified as a current liability, and \$609,000 was classified in other noncurrent liabilities in our Consolidated Balance Sheets. During the *three months ended December 31, 2017*, we recognized \$731,000 of net losses in OCI and reclassified \$428,000 of losses from OCI to revenue. During the *six months ended December 31, 2017*, we recognized \$2.9 million of net losses in OCI and reclassified \$850,000 of losses from OCI to revenue. As of *June 30, 2017*, \$422,000 of the fair value of our cash flow hedges was classified in accrued liabilities, and \$99,000 was classified in other noncurrent liabilities in our Consolidated Balance Sheets. During the *three months ended December 31, 2016*, we recognized \$2.3 million of net gains in OCI and reclassified \$213,000 of gains from OCI to revenue. During the *six months ended December 31, 2016*, we recognized \$1.8 million of net gains in OCI and reclassified \$271,000 of gains from OCI to revenue.

K. Contingencies

From time to time, we become involved in various investigations, claims and legal proceedings that arise in the ordinary course of our business. These matters *may* relate to product liability, employment, intellectual property, tax, regulation, contract or other matters. The resolution of these matters as they arise will be subject to various uncertainties and, even if such claims are without merit, could result in the expenditure of significant financial and managerial resources. While unfavorable outcomes are possible, based on available information, we generally do *not* believe the resolution of these matters will result in a material adverse effect on our business, consolidated financial condition, or results of operations. However, a settlement payment or unfavorable outcome could adversely impact our results of operations. Our evaluation of the likely impact of these actions could change in the future and we could have unfavorable outcomes we do *not* expect.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to help you understand our financial condition and results of operations for the three and six months ended December 31, 2017. You should read the following discussion and analysis together with our unaudited condensed consolidated financial statements and the notes to the condensed consolidated financial statements included under Item 1 in this Quarterly Report, as well as the risk factors and other information included in our 2017 Annual Report and other reports and documents we file with the SEC. Our future financial condition and results of operations will vary from our historical financial condition and results of operations described below based on a variety of factors.

Executive Overview

The following overview does not address all of the matters covered in the other sections of this Item 2 or other items in this Quarterly Report or contain all of the information that may be important to our stockholders or the investing public. You should read this overview in conjunction with the other sections of this Item 2 and this Quarterly Report.

Our primary business activity is providing private label contract manufacturing services to companies that market and distribute vitamins, minerals, herbs and other nutritional supplements, as well as other health care products, to consumers both within and outside the U.S. Historically, our revenue has been largely dependent on sales to two or three private label contract manufacturing customers, and thus sensitive to variations in the timing of such customers' orders, which variations in turn have been impacted by such customers' internal marketing programs, supply chain management, entry into new markets, new product introductions, the demand for such customers' products, and general industry and economic conditions. Our revenue also includes raw material sales and royalty and licensing revenue generated from our patent estate pursuant to license and supply agreements with third parties for the distribution and use of the ingredient known as beta-alanine sold under our CarnoSyn® and SR CarnoSyn® trademarks.

A cornerstone of our business strategy is to achieve long-term growth and profitability and to diversify our sales base. We have sought and expect to continue to seek to diversify our sales by developing relationships with additional, quality-oriented, private label contract manufacturing customers, and commercializing our patent estate through sales of beta-alanine under our CarnoSyn® and SR CarnoSyn® trade names, royalties from license agreements, and potentially additional contract manufacturing opportunities with these licensees.

During the first six months of fiscal 2018, our net sales were 5% lower than in the first six months of fiscal 2017. Private label contract manufacturing sales increased 1% due primarily to the sale of new products to existing customers and higher volumes of current products to existing customers, partially offset by the timing and shipment of orders of current products to existing customers and discontinued customer relationships. Our first quarter fiscal 2018 contract manufacturing sales declined 19% as compared to the same period in the prior year primarily from reduced orders from our largest customer for specific products associated with an inventory reduction program. During our second quarter of fiscal 2018, our contract manufacturing sales increased 23% as compared to the comparable prior year period primarily due to an increase in sales to our largest customer to historical levels and shipment of new products under our previously announced expanded relationship. Revenue concentration risk for our largest private label contract manufacturing customer as a percentage of our total net sales increased to 53% for the six months ended December 31, 2017 compared to 50% in the first six months of fiscal 2017. We expect our annualized fiscal 2018 revenue concentration for this customer to be higher than fiscal 2017.

During the first six months of fiscal 2018, CarnoSyn® beta-alanine revenue decreased 27% to \$9.8 million as compared to \$13.4 million for the first six months of fiscal 2017. The decrease in beta-alanine revenue was primarily due to decreased material shipments as a result of market and seasonal factors and lower average material sales prices. During the quarter ended December 31, 2017, the sports nutrition retail market conditions declined most notably in the standard “brick and mortar” sales channels as products transitioned to higher levels of internet based sales. This transition resulted in excess inventory in certain channels and delayed the re-order rates for many of our customer brands. Additionally, while we still have active patents covering instant release CarnoSyn® beta-alanine, we experienced increased competition from companies selling generic beta-alanine during the current quarter resulting in certain customers discontinuing the use of our CarnoSyn® beta-alanine. In addition to legal actions we have prosecuted and others we may institute, to offset this decline, we have increased our sales and marketing activities to consumers, customers, potential customers, and brand owners on multiple platforms to promote and reinforce the features and benefits of utilizing CarnoSyn® beta-alanine. As we enter our third quarter ending March 31, 2018, our re-order rates have improved for many of our customer brands suggesting improved sports nutrition retail market conditions. Additionally, our SR CarnoSyn® raw material sales continued to rise during the current quarter as more brands adopted product offerings of this effective delivery system. There can be no assurance that our sales and marketing efforts or the recent apparent improvement in retail market conditions will reverse or decelerate potential future declines of our CarnoSyn® beta-alanine sales.

To protect our CarnoSyn® business and its underlying patent estate, we incurred litigation and patent compliance expenses of approximately \$1.7 million during the first six months of fiscal 2018 and \$2.0 million during the comparable period in fiscal 2017. We describe our efforts to protect our patent estate in more detail under Item 1 of Part II of our 2017 Annual Report. Our ability to maintain or further increase our beta-alanine royalty and licensing revenue will depend in large part on our ability to develop a market for our sustained release form of beta-alanine marketed under our SR Carnosyn® tradename, maintenance of our patent rights, the availability of the raw material beta-alanine when and in the amounts needed, the ability to expand distribution of beta-alanine to new and existing customers, the ability to further commercialize our existing patents, and the continued compliance by third parties with our license agreements and patent and trademark rights.

Table of Contents

During the remainder of fiscal 2018, we plan to continue our focus on:

Leveraging our state-of-the-art, certified facilities to increase the value of the goods and services we provide to our highly valued private-label contract manufacturing customers, and develop relationships with additional quality oriented customers;

Expanding the commercialization of our beta-alanine patent estate through raw material sales, developing a market for our sustained release form of beta-alanine marketed under our SR Carnosyn® tradename, new contract manufacturing opportunities, license agreements and protecting our proprietary rights;

Improving operational efficiencies and managing costs and business risks to improve profitability.

Critical Accounting Policies and Estimates

The preparation of our financial statements requires that we make estimates and assumptions that affect the amounts reported in our financial statements and their accompanying notes. We have identified certain policies we believe are important to the portrayal of our financial condition and results of operations. These policies require the application of significant judgment by our management. We base our estimates on our historical experience, industry standards, and various other assumptions we believe are reasonable under the circumstances. Actual results could differ from these estimates under different assumptions or conditions. An adverse effect on our financial condition, changes in financial condition, and results of operations could occur if circumstances change that alter the various assumptions or conditions used in such estimates and assumptions.

Our critical accounting policies are discussed under Item 7 of our 2017 Annual Report and recent accounting pronouncements are discussed under Item A to our Notes to Condensed Consolidated Financial Statements contained in this Quarterly Report. There have been no significant changes to these policies or pronouncements during the six months ended December 31, 2017.

Results of Operations

The results of our operations for the three and six months ended December 31 were as follows (in thousands):

Three Months Ended

Six Months Ended

	December 31,			December 31,				
	2017	2016	% Change	2017	2016	% Change		
Private label contract manufacturing	\$29,355	\$23,864	23	\$51,577	\$51,243	1	%	
Patent and trademark licensing	3,980	6,695	(41)	9,832	13,383	(27))%	
Total net sales	33,335	30,559	9	61,409	64,626	(5))%	
Cost of goods sold	26,713	24,064	11	48,417	50,462	(4))%	
Gross profit	6,622	6,495	(2)	12,992	14,164	(8))%	
Gross profit %	19.9	21.3	%	21.2	21.9	%		
Selling, general and administrative expenses	4,341	3,382	28	8,828	7,515	17	%	
% of net sales	13.0	11.1	%	14.4	11.6	%		
Income from operations	2,281	3,113	(27)	4,164	6,649	(37))	
% of net sales	6.8	10.2	%	6.8	10.3	%		
Total other income	202	387	(48)	310	437	(29))%	
Income before income taxes	2,483	3,500	(29)	4,474	7,086	(37))%	
% of net sales	7.4	11.5	%	7.3	11.0	%		
Provision for income taxes	3,801	1,034	268	4,358	2,130	105	%	
Net (loss) income	\$(1,318)	\$2,466	(153)	\$116	\$4,956	(98))%	
% of net sales	(4.0)	8.1	%	0.2	7.7	%		

Private-label contract manufacturing net sales increased 23% during the three months ended December 31, 2017 and 1% during the six months ended December 31, 2017, when compared to the same periods in the prior year. These increases were due primarily to the sale of new products to existing customers and higher volumes of current products to existing customers partially offset by the timing and shipment of orders of current products to existing customers and discontinued customer relationships. Net sales to our largest customer represented a majority of the increase in our private label contract manufacturing sales during the three months ended December 31, 2017 and were primarily the result of increased orders of current products and orders of new products.

Table of Contents

Net sales from our patent and trademark licensing segment decreased 41% during the three months ended December 31, 2017 and decreased 27% during the six months ended December 31, 2017, when compared to the same periods in the prior year. The decrease in beta-alanine raw material sales was primarily due to decreased shipments of beta alanine as a result of market and seasonal factors and lower average sales prices for the material.

The change in gross profit margin between the three and six month periods ended December 31, 2017 was as follows:

	Three Months Ended		Six Months Ended	
Contract manufacturing ⁽¹⁾	3.2	%	0.8	%
Patent and trademark licensing ⁽²⁾	(4.6)	(1.6)
Total change in gross profit margin	(1.4	%)	(0.8	%)

¹Private label contract manufacturing gross profit margin as a percentage of consolidated net sales increased 3.2 percentage points during the three months ended December 31, 2017 and increased 0.8 percentage points during the six months ended December 31, 2017 when compared to the comparable prior year periods. These increases were primarily due to increased sales and favorable product sales mix.

²Patent and trademark licensing gross profit margin as a percentage of consolidated net sales decreased 4.6 percentage points during the three months ended December 31, 2017 and decreased 1.6 percentage points during the six months ended December 31, 2017 when compared to the comparable prior year periods. These decreases were primarily due to decreased raw material sales and decreased royalty income as a percentage of total consolidated net sales partially offset by favorable raw material costs.

Selling, general and administrative expenses increased \$1.0 million, or 28%, during the three months ended December 31, 2017 and increased \$1.3 million, or 17%, during the six months ended December 31, 2017, as compared to the comparable prior year periods. These increases were primarily due to increased marketing, advertising and research and development costs supporting our CarnoSyn® and SR CarnoSyn® brands and increased compensation costs partially offset by lower litigation costs.

Other income, net decreased \$0.2 million during the three months ended December 31, 2017 and decreased \$0.1 million during the six months ended December 31, 2017, when compared to the comparable prior year periods. These decreases were primarily due to foreign exchange fluctuations.

Our income tax expense increased \$2.8 million, or 268%, during the three months ended December 31, 2017 and increased \$2.2 million, or 105%, during the six months ended December 31, 2017, as compared to the comparable prior year periods. The increases were primarily due to the discrete income tax expense amounts recorded as a result of the Tax Cuts and Jobs Act enacted on December 22, 2017. Among other things, the Act reduces the U.S. federal corporate tax rate to 21% and requires companies to pay a one-time deemed repatriation transition tax on earnings of U.S.-owned foreign subsidiaries that were previously tax deferred. At December 31, 2017, we have not completed our accounting for all of the tax effects of the Act; however, in certain cases, as described below and in accordance with SAB 118, we have made a reasonable estimate of the effects on our existing deferred tax balances and the one-time transition tax. In other cases, we have not been able to make a reasonable estimate and continue to account for those items based on our existing accounting under ASC 740, Income Taxes. For the items for which we were able to determine a reasonable estimate, we recognized a provisional amount as a discrete component of our provision for income taxes. The impact of the Act may differ from these estimates, possibly materially, during the one-year measurement period ending December 22, 2018 due to, among other things, further refinement of our calculations, changes in the interpretations and assumptions we made, guidance that may be issued and actions we may take as a result of the Act.

Included in our tax expense for the three and six months ended December 31, 2017 is \$3.3 million of discrete tax items related to the Act. The discrete tax items include:

\$1.8 million associated with a one-time transition tax that is calculated based on our total post-1986 earnings and profits (E&P) from our Swiss subsidiary NAIE. This accumulated E&P amount has historically been considered permanently reinvested thereby allowing us to defer recognizing any U.S. income taxes on the amount of such E&P. However, under the Act we are required to pay this tax based on a deemed repatriation into the U.S. of such E&P. In accordance with the provisions of the Act, we will elect to pay this tax over an eight-year period.

Table of Contents

As of December 31, 2017, we no longer consider undistributed foreign earnings from NAIE as indefinitely reinvested. As a result, we have recorded \$775,000 in estimated foreign withholding taxes on the amounts deemed repatriated under the Act, which was also treated as a discrete expense during the period.

As of December 31, 2017, we remeasured certain deferred tax assets and liabilities based on the rates at which they are expected to reverse in the future. For balances we expect to reverse during fiscal 2018 we used the blended U.S. statutory rate of 28.06% and for amounts expected to reverse in future periods we used the newly enacted 21% tax rate. However, we are still analyzing certain aspects of the Act and refining our calculations, which could potentially affect the measurement of these balances or potentially give rise to new deferred tax amounts. The provisional amount recorded from the remeasurement of our deferred tax balance was \$664,000.

Our effective tax rate, excluding the impact of the above noted discrete items, for the three months ended December 31, 2017 was 21.9% as compared to an effective tax rate of 29.6% for the three months ended December 31, 2016. As a fiscal taxpayer, our U.S. federal statutory rate for the year ended June 30, 2018 is estimated to be 28.06% and is a blended rate of the historic 35% statutory rate and the newly enacted 21% rate. The year over year improvement in our second fiscal quarter effective tax rate is primarily due to the reduction of the U.S. federal tax rate used in our estimated tax calculation, which reduced to a blended rate of 28.06% as compared to 34.0% used in the same period in the prior year. In addition, as this rate reduction was applied on a year to date basis the second quarter of 2018 tax expense received a benefit from the application of the lower rate to the first quarter of fiscal 2018 pre-tax income, thus further reducing the effective tax rate for the quarter. Our effective tax rate, for the six months ended December 31, 2017 excluding the impact of the above noted discrete items, was 24.6% as compared to an effective tax rate of 30.1% for the six months ended December 31, 2017. The improvement in our year to date fiscal 2018 effective tax rate as compared to the same period in the prior year is primarily due to the reduction of the U.S. federal tax rate used in our estimated tax calculation, which reduced to a blended rate of 28.06% as compared to 34.0% used in effective tax rate calculation the same period in the prior year.

We expect our U.S. federal statutory rate to be 21% for fiscal years beginning after June 30, 2018, which should further reduce our effective tax rate on an annualized basis.

Liquidity and Capital Resources

Our primary sources of liquidity and capital resources are cash flows provided by operating activities and the availability of borrowings under our credit facility. Net cash provided by operating activities was \$4.7 million during the six months ended December 31, 2017 as compared to net cash provided by operating activities of \$5.0 million during the comparable period in the prior fiscal year.

During the six months ended December 31, 2017, changes in accounts receivable used \$4.5 million in cash compared to having provided \$3.4 million of cash during the comparable six month period in the prior year. The decrease in cash provided by accounts receivable during the six month period ended December 31, 2017 primarily resulted from timing of sales and the related collections. Days sales outstanding was 32 days during the six months ended December 31, 2017 and 33 days during the six months ended December 31, 2016.

During the six months ended December 31, 2017, changes in inventory used \$4.2 million in cash compared to having provided \$3.7 million in the comparable prior year period. The increase in cash provided by inventory during the period ended December 31, 2017 was primarily related to inventory purchased to support increased sales to our largest private label contract manufacturing customer and timing of orders and shipments. Changes in accounts payable and accrued liabilities provided \$6.9 million in cash during the six months ended December 31, 2017 compared to having used \$6.7 million during the six months ended December 31, 2016. The change in cash flow activity related to accounts payable and accrued liabilities is primarily due to inventory associated with increased sales associated with our largest customer and timing of inventory receipts and payments.

During the six months ended December 31, 2017, NAIE's operations provided \$2.1 million of our operating cash flow primarily due to the timing of inventory receipts, payments and sales.

Cash used in investing activities during the six months ended December 31, 2017 was \$3.6 million compared to \$3.3 million during the comparable six month period last year. The primary reason for the change is the conversion of \$1.5 million of accounts receivable into a note receivable during the first quarter of fiscal 2018. This reduction was partially offset by lower capital equipment purchases of \$2.1 million during the first half of fiscal 2018 as compared to \$3.3 million during the same six month period of fiscal 2017. Capital expenditures for both years were primarily for manufacturing equipment used in our Vista, California and Manno, Switzerland facilities.

Table of Contents

Cash used in financing activities during the six months ended December 31, 2017 primarily related to treasury shares returned to NAI by employees whose restricted stock vested during the quarter. In return NAI paid each employee's required tax withholding.

We did not have any consolidated debt as of December 31, 2017 or June 30, 2017.

We have a Credit Agreement with Wells Fargo Bank, N.A. The Credit Agreement provides us with a credit line of up to \$10.0 million and matures on February 1, 2020. The line of credit may be used to finance working capital requirements. On September 29, 2017, we executed an amendment to the Credit Agreement, that now allows us to make loans or advances to third parties in amounts not exceeding \$1.5 million. We executed this amendment in order to issue a note receivable of \$1.5 million to a customer. There is no commitment fee under this agreement. There are no amounts currently drawn under the line of credit.

Under the terms of the Credit Agreement, borrowings are subject to eligibility requirements including maintaining (i) a ratio of total liabilities to tangible net worth of not greater than 1.25 to 1.0 at any time; and (ii) a ratio of total current assets to total current liabilities of not less than 1.75 to 1.0 at each fiscal quarter end. Any amounts outstanding under the line of credit will bear interest at a fixed or fluctuating interest rate as elected by NAI from time to time; provided, however, that if the outstanding principal amount is less than \$100,000 such amount shall bear interest at the then applicable fluctuating rate of interest. If elected, the fluctuating interest rate per annum would be equal to 1.25% above the daily one month LIBOR rate as in effect from time to time during the period loan amounts are outstanding. If a fixed interest rate is elected, the interest rate would equal a per annum rate of 1.25% above the LIBOR rate in effect on the first day of the term for which the fixed rate is elected. Any amounts outstanding under the line of credit must be paid in full on or before the maturity date. Amounts outstanding that are subject to a fluctuating interest rate may be prepaid at any time without penalty. Amounts outstanding that are subject to a fixed interest rate may be prepaid at any time in minimum amounts of \$100,000, subject to a prepayment fee equal to the sum of the discounted monthly differences (calculated by comparing the fixed rate to the variable rate that would have been applied, had it been elected) for each month from the month of prepayment through the month in which the then applicable fixed rate term matures.

Our obligations under the Credit Agreement are secured by our accounts receivable and other rights to payment, general intangibles, inventory, equipment and fixtures. We also have a foreign exchange facility with Wells Fargo Bank, N.A. that is in effect until January 31, 2019, and a similar facility with Bank of America, N.A. that is in effect until August 15, 2019.

On December 31, 2017, we were in compliance with all of the financial and other covenants required under the Credit Agreement.

As of December 31, 2017, we had \$28.8 million in cash and cash equivalents and \$10.0 million available under our credit facilities. We believe our available working capital, cash and cash equivalents and potential cash flows from operations will be sufficient to fund our current working capital needs and capital expenditures through at least the next 12 months.

Off-Balance Sheet Arrangements

As of December 31, 2017, we did not have any off-balance sheet debt nor did we have any transactions, arrangements, obligations (including contingent obligations) or other relationships with any unconsolidated entities or other persons that have or are reasonably likely to have a material current or future adverse effect on our financial condition, changes in financial condition, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenue or expenses that are or could be material to investors.

Recent Accounting Pronouncements

Recent accounting pronouncements are discussed in the notes to our consolidated financial statements included under Item 1 of this Quarterly Report. Other than those pronouncements, we are not aware of any other pronouncements that materially affect our financial position or results of operations.

ITEM 4. CONTROLS AND PROCEDURES

We maintain certain disclosure controls and procedures that are prescribed under the Securities Exchange Act of 1934. These controls and procedures are designed to help ensure that material information is: (1) gathered and communicated to our management, including our principal executive and financial officers, in a manner that allows for timely decisions regarding required disclosures; and (2) recorded, processed, summarized, reported and filed with the SEC as required under the Securities Exchange Act of 1934 and within the time periods specified by the SEC.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer (principal financial and accounting officer), evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2017. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of December 31, 2017 our disclosure controls and procedures were effective for their intended purpose described above.

There were no changes to our internal controls over financial reporting during the quarterly period ended December 31, 2017 that have materially affected, or that are reasonably likely to materially affect, our internal control over

financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we become involved in various investigations, claims and legal proceedings that arise in the ordinary course of our business. These matters may relate to intellectual property, product liability, employment, tax, regulation, contract or other matters. The resolution of these matters as they arise will be subject to various uncertainties and, even if such claims are without merit, could result in the expenditure of significant financial and managerial resources by us. While unfavorable outcomes are possible, based on available information, we generally do not believe the resolution of these matters will result in a material adverse effect on our business, consolidated financial condition, or results of operations. However, a settlement payment or unfavorable outcome could adversely impact our results of operations. Our evaluation of the likely impact of these actions could change in the future and we could have unfavorable outcomes we do not expect.

As of February 13, 2018, except as described below, neither NAI nor its subsidiary were a party to any material pending legal proceeding, nor was any of our property the subject of a material pending legal proceeding. We are currently involved in several legal matters in the ordinary course of our business, each of which is related to enforcing our intellectual property rights. Some of these matters are summarized below.

In 2011, NAI filed a lawsuit against Woodbolt Distribution, LLC, also known as Cellucor (“Woodbolt”), and both NAI and Woodbolt filed additional lawsuits and countersuits against each other. NAI and Woodbolt subsequently settled all of the lawsuits between them, but not before the United States Patent and Trademark Office (“USPTO”) at Woodbolt’s request rejected the claims of two NAI patents. The rulings rejecting the claims of two NAI patents were subsequently confirmed by the Patent Trial and Appeal Board (PTAB) at the USPTO. NAI filed Notices of Appeal with the U.S. Court of Appeals for the Federal Circuit requesting that certain findings of the PTAB’s be reversed. No hearing date has been set by the Court. Both NAI patents rejected by the USPTO expired in August 2017.

On September 18, 2015, NAI filed a complaint against Creative Compounds, LLC, alleging various claims including (1) violation of Section 43 of the Lanham Act, (2) violation of California’s Unfair Competition Law, (3) violation of California’s False Advertising Law, (4) Trade Libel and Business Disparagement and (5) Intentional Interference with Prospective Economic Advantage. Subsequently, NAI and defendant resolved their disputes and entered into settlement and the case was dismissed.

On August 24, 2016, NAI filed a separate complaint against Creative Compounds, LLC, alleging infringement of U.S. patent 7,825,084. On October 5, 2016, Creative filed its answer and counterclaims. On January 19, 2017, NAI filed a Motion to Amend the Complaint, to add allegations of infringement of U.S. patents 5,965,596, 7,504,376, 8,993,610 and 8,470,865, and adding the following additional parties: Core Supplement Technology, Inc., Honey Badger LLC, and Myopharma, Inc. The Court granted NAI's motion. On May 2, 2017, the Court issued a revised scheduling order and set a trial date for July 31, 2018. On July 19, 2017, Creative filed a motion for judgment on the pleadings to dismiss the patent infringement claims with prejudice. On September 5, 2017, the Court granted Creative's motion, which was a non-final decision and subject to later appeal to the U.S. Court of Appeals for the Federal Circuit. NAI has stated it will appeal the District Court rulings. The remaining non-patent claims pending against other defendants were not affected. On October 16, 2017, defendant Core Supplement Technology, Inc., filed a Notification of Bankruptcy with the Court. On October 17, 2017, NAI and defendant Honey Badger LLC filed a voluntary stipulation of dismissal, which the Court granted on October 20, 2017. On October 31, 2017, NAI and defendant Myopharma, Inc. filed a voluntary stipulation of dismissal, which the Court granted on November 6, 2017. On November 9, 2017, NAI and Creative Compounds filed a joint motion to dismiss, which the Court granted on November 20, 2017. On November 21, 2017, NAI and Core Supplement Technology, Inc. filed a joint motion to dismiss, which the Court granted on November 27, 2017. On December 8, 2017, NAI filed a Notice of Appeal to the U.S. Court of Appeals for the Federal Circuit regarding the patents asserted against the defendants. NAI's deadline to submit its opening brief to the Federal Circuit is currently April 13, 2018. No hearing date has been set.

On July 6, 2016, NAI filed a complaint against Allmax Nutrition, Inc. in U.S. District Court for the Southern District of California, alleging (1) infringement of U.S. patents 5,965,596, 6,172,098, 7,825,084 and RE 45,947, (2) violation of Section 32 of the Lanham Act, and (3) copyright infringement. On October 19, 2016, NAI filed an amended complaint adding HBS International Corp., Allmax's exclusive distributor, as a co-defendant and to add a civil conspiracy claim. On May 2, 2017, the Court issued a scheduling order setting a trial date for July 31, 2018. On April 25, 2017, defendants filed a motion for judgment on the pleadings and a motion to dismiss as to NAI's trademark and patent infringement and civil conspiracy claims. On June 26, 2017, the Court granted Defendants' motions, dismissing NAI's patent infringement claim with prejudice and dismissing the trademark and civil conspiracy claims without prejudice. NAI filed a Second Amended Complaint on July 10, 2017. On August 29, 2017, the Court denied NAI's motion to partially reconsider the dismissal of the patent infringement claim, which is a non-final decision and subject to later appeal to the U.S. Court of Appeals for the Federal Circuit. NAI has stated it will appeal the District Court rulings. On August 30, 2017, the Court denied Defendants' motion to dismiss NAI's trademark and conspiracy claims. On September 29, 2017, both defendants filed their amended answers. Defendant HBS International Corp. also asserted a counterclaim for tortious interference with contract. NAI filed its response to the asserted counterclaim on November 10, 2017. The parties subsequently engaged in settlement discussions. On December 22, 2017, NAI and defendants filed a joint stipulation of dismissal of the remaining claims, which the Court granted on January 2, 2018.

Table of Contents

On September 16, 2016, NAI filed a complaint against Hi-Tech Pharmaceuticals, Inc. d/b/a ALR Industries, APS Nutrition, Innovative Laboratories, Formutech Nutrition, LG Sciences and Sports 1 in U.S. District Court for the Southern District of California, alleging (1) infringement of U.S. patents 5,965,596, 7,825,084, 8,993,610 and RE 45,947, (2) violation of Section 32 of the Lanham Act and (3) breach of contract. On May 2, 2017, the Court issued a scheduling order setting a trial date for July 31, 2018. On July 10, 2017, Defendants filed a motion for judgment on the pleadings to dismiss the patent infringement claims with prejudice. On September 5, 2017, the Court granted Defendants' motion, which is a non-final decision and subject to later appeal to the U.S. Court of Appeals for the Federal Circuit. NAI has stated it will appeal the District Court rulings. The remaining non-patent claims pending against the Defendants were not affected. On September 28, 2017, in a separate matter not involving NAI, the United States of America filed a First Superseding Criminal Indictment against defendants Hi-Tech Pharmaceuticals, Inc and its Chief Executive Officer, Jared Wheat. *United States v. Hi-Tech Pharmaceuticals, et al.*, No.1:17-CR-0229 (N.D. Ga. 2017). On or about October 4, 2017, items in the possession of Hi-Tech were seized pursuant to a search warrant, including the documentation relevant to this case. In light of this development, the parties moved the Court on November 3, 2017, seeking an order staying all proceedings in the pending action until disposition of *United States v. Hi-Tech Pharmaceuticals, et al.*, 1:17-CR-00229 (N.D. Ga 2017), or at a minimum, until the documents relevant to this case can be retrieved by the defendants. The Court granted the parties' motion to stay on November 9, 2017. The case remains stayed as of this date.

Although we believe our claims in the above litigation matters are valid, there is no assurance we will prevail in these litigation matters or in proceedings we may initiate or that our litigation expenses will not be greater than anticipated.

ITEM 1A. RISK FACTORS

When evaluating our business and future prospects you should carefully consider the risks described under Item 1A of our 2017 Annual Report, as well as the other information in our 2017 Annual Report, this Quarterly Report and other reports and documents we file with the SEC. If any of the identified risks actually occur, our business, financial condition and results of operations could be materially adversely affected. In that event, the market price of our common stock could decline and you could lose all or a portion of the value of your investment in our common stock.
