

JACK IN THE BOX INC /NEW/
Form 10-Q
May 17, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended April 15, 2012
Commission File Number: 1-9390

JACK IN THE BOX INC.
(Exact name of registrant as specified in its charter)

DELAWARE 95-2698708
(State of Incorporation) (I.R.S. Employer Identification No.)

9330 BALBOA AVENUE, SAN DIEGO, CA 92123
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code (858) 571-2121

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of the close of business May 11, 2012, 44,219,044 shares of the registrant's common stock were outstanding.

JACK IN THE BOX INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION

Nature of operations — Founded in 1951, Jack in the Box Inc. (the “Company”) operates and franchises Jack in the Box quick-service restaurants and Qdoba Mexican Grill® (“Qdoba”) fast-casual restaurants in 44 states. The following table summarizes the number of restaurants as of the end of each period:

	April 15, 2012	April 17, 2011
Jack in the Box:		
Company-operated	601	848
Franchise	1,641	1,372
Total system	2,242	2,220
Qdoba:		
Company-operated	289	221
Franchise	316	328
Total system	605	549

References to the Company throughout these Notes to Condensed Consolidated Financial Statements are made using the first person notations of “we,” “us” and “our.”

Basis of presentation — The accompanying condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and the rules and regulations of the Securities and Exchange Commission (“SEC”). In our opinion, all adjustments considered necessary for a fair presentation of financial condition and results of operations for these interim periods have been included. Operating results for one interim period are not necessarily indicative of the results for any other interim period or for the full year.

These financial statements should be read in conjunction with the consolidated financial statements and related notes contained in our Annual Report on Form 10-K for the fiscal year ended October 2, 2011. The accounting policies used in preparing these condensed consolidated financial statements are the same as those described in our Form 10-K.

Principles of consolidation — The condensed consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries and the accounts of any variable interest entities where we are deemed the primary beneficiary. All significant intercompany transactions are eliminated. For information related to the variable interest entity included in our condensed consolidated financial statements, refer to Note 11, Variable Interest Entities.

Fiscal year — Our fiscal year is 52 or 53 weeks ending the Sunday closest to September 30. Fiscal years 2012 and 2011 include 52 weeks. Our first quarter includes 16 weeks and all other quarters include 12 weeks. All comparisons between 2012 and 2011 refer to the 12-weeks (“quarter”) and 28-weeks (“year-to-date”) ended April 15, 2012 and April 17, 2011, respectively, unless otherwise indicated.

Use of estimates — In preparing the condensed consolidated financial statements in conformity with U.S. GAAP, management is required to make certain assumptions and estimates that affect reported amounts of assets, liabilities, revenues, expenses and the disclosure of contingencies. In making these assumptions and estimates, management may from time to time seek advice and consider information provided by actuaries and other experts in a particular area. Actual amounts could differ materially from these estimates.

2. SUMMARY OF REFRANCHISINGS, FRANCHISE DEVELOPMENT AND ACQUISITIONS

Refranchisings and franchise development — The following is a summary of the number of Jack in the Box restaurants sold to franchisees, the number of restaurants developed by franchisees and the related gains and fees recognized (dollars in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Restaurants sold to franchisees	37	26	37	114
New restaurants opened by franchisees	9	11	29	28
Initial franchise fees	\$1,770	\$1,640	\$2,490	\$5,879
Proceeds from the sale of company-operated restaurants (1)	\$20,715	\$5,505	\$21,964	\$49,588
Net assets sold (primarily property and equipment)	(5,754)	(4,520)	(5,833)	(19,872)
Goodwill related to the sale of company-operated restaurants	(604)	(107)	(652)	(966)
Other	(279)	—	(279)	—
Gains on the sale of company-operated restaurants (1)	\$14,078	\$878	\$15,200	\$28,750

Amounts in 2012 include additional proceeds and gains of \$0.9 million in the quarter and \$2.1 million year-to-date (1) recognized upon the extension of the underlying franchise and lease agreements related to restaurants sold in a prior year.

Franchise acquisitions — During fiscal 2012 and 2011, we acquired Qdoba franchise restaurants in select markets where we believe there is continued opportunity for restaurant development. We account for the acquisition of franchised restaurants using the purchase method of accounting for business combinations. The purchase price allocations were based on fair value estimates determined using significant unobservable inputs (Level 3). The goodwill recorded primarily relates to the sales growth potential of the markets acquired. The following table provides detail of the combined allocations in each period (dollars in thousands):

	Year-to-Date	
	April 15, 2012	April 17, 2011
Restaurants acquired from franchisees	36	22
Property and equipment	\$9,559	\$3,877
Reacquired franchise rights	461	232
Liabilities assumed	(108)	(71)
Goodwill	29,283	17,439
Total consideration	\$39,195	\$21,477

3. FAIR VALUE MEASUREMENTS

Financial assets and liabilities — The following table presents the financial assets and liabilities measured at fair value on a recurring basis at the end of each period (in thousands):

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1) (3)	Significant Other Observable Inputs (Level 2) (3)	Significant Unobservable Inputs (Level 3)
Fair value measurements as of April 15, 2012:				
Interest rate swaps (Note 4) (1)	\$ (2,604)	\$ —	\$ (2,604)	\$ —
Non-qualified deferred compensation plan (2)	(38,107)	(38,107)	—	—
Total liabilities at fair value	\$ (40,711)	\$ (38,107)	\$ (2,604)	\$ —
Fair value measurements as of October 2, 2011:				
Interest rate swaps (Note 4) (1)	\$ (2,682)	\$ —	\$ (2,682)	\$ —
Non-qualified deferred compensation plan (2)	(34,288)	(34,288)	—	—
Total liabilities at fair value	\$ (36,970)	\$ (34,288)	\$ (2,682)	\$ —

(1) We entered into interest rate swaps to reduce our exposure to rising interest rates on our variable debt. The fair values of our interest rate swaps are based upon Level 2 inputs which include valuation models as reported by our counterparties. The key inputs for the valuation models are quoted market prices, interest rates and forward yield curves.

(2) We maintain an unfunded defined contribution plan for key executives and other members of management excluded from participation in our qualified savings plan. The fair value of this obligation is based on the closing market prices of the participants' elected investments.

(3) We did not have any transfers in or out of Level 1 or Level 2.

The fair values of each of our long-term debt instruments are based on quoted market values, where available, or on the amount of future cash flows associated with each instrument, discounted using our current borrowing rate for similar debt instruments of comparable maturity. The estimated fair values of our term loan and capital lease obligations approximated their carrying values as of April 15, 2012.

Non-financial assets and liabilities — The Company's non-financial instruments, which primarily consist of property and equipment, goodwill and intangible assets, are reported at carrying value and are not required to be measured at fair value on a recurring basis. However, on a periodic basis (at least annually for goodwill and semi-annually for property and equipment) or whenever events or changes in circumstances indicate that their carrying value may not be recoverable, non-financial instruments are assessed for impairment. If applicable, the carrying values of the assets are written down to fair value.

In connection with our property and equipment impairment reviews during the 28-weeks ended April 15, 2012, six Jack in the Box restaurants determined to be underperforming or which we intend to close having a carrying amount of \$2.1 million were written down to their implied fair value of \$0.3 million, resulting in an impairment charge of \$1.8 million. To determine fair value, we used the income approach, which assumes that the future cash flows reflect current market expectations. The future cash flows are generally based on the assumption that the highest and best use of the asset is to sell the store to a franchisee (market participant). These fair value measurements require significant judgment using Level 3 inputs, such as discounted cash flows, which are not observable from the market, directly or indirectly. Refer to Note 5, Impairment, Disposition of Property and Equipment, and Restaurant Closing Costs, for additional information regarding impairment charges.

4. DERIVATIVE INSTRUMENTS

Objectives and strategies — We are exposed to interest rate volatility with regard to our variable rate debt. To reduce our exposure to rising interest rates, in August 2010, we entered into two interest rate swap agreements that effectively convert \$100.0 million of our variable rate term loan borrowings to a fixed-rate basis from September 2011 through September 2014.

Financial position — The following derivative instruments were outstanding as of the end of each period (in thousands):

	April 15, 2012		October 2, 2011	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments:				
Interest rate swaps (Note 3)	Accrued liabilities	\$(2,604)	Accrued liabilities	\$(2,682)
Total derivatives		\$(2,604)		\$(2,682)

Financial performance — The following is a summary of the accumulated other comprehensive income (“OCI”) gain or loss activity related to our interest rate swap derivative instruments (in thousands):

	Location of Loss in Income	Quarter		Year-to-Date	
		April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Gain/(loss) recognized in OCI (Note 9)	N/A	\$(214)	\$(247)	\$(619)	\$1,190
Loss reclassified from accumulated OCI into income (Note 9)	Interest expense, net	\$299	\$—	\$697	\$—

Amounts reclassified from accumulated OCI into interest expense represent payments made to the counterparty for the effective portions of the interest rate swaps. During the periods presented, our interest rate swaps had no hedge ineffectiveness.

5. IMPAIRMENT, DISPOSITION OF PROPERTY AND EQUIPMENT, AND RESTAURANT CLOSING COSTS

Impairment — When events and circumstances indicate that our long-lived assets might be impaired and their carrying amount is greater than the undiscounted cash flows we expect to generate from such assets, we recognize an impairment loss as the amount by which the carrying value exceeds the fair value of the assets. We typically estimate fair value based on the estimated discounted cash flows of the related asset using marketplace participant assumptions. Impairment charges in 2012 primarily represent charges to write down the carrying value of three underperforming Jack in the Box restaurants and three Jack in the Box restaurants we intend to or have closed.

Disposition of property and equipment — We also recognize accelerated depreciation and other costs on the disposition of property and equipment. When we decide to dispose of a long-lived asset, depreciable lives are adjusted based on the estimated disposal date, and accelerated depreciation is recorded. Other disposal costs primarily relate to charges from our ongoing re-image and logo program and normal capital maintenance activities.

The following impairment and disposal costs are included in impairment and other charges, net in the accompanying condensed consolidated statements of earnings (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Impairment charges	\$910	\$878	\$2,109	\$1,167
Losses on the disposition of property and equipment, net	\$1,775	\$2,628	\$2,858	\$5,424

Restaurant closing costs consist of future lease commitments, net of anticipated sublease rentals and expected ancillary costs, and are included in impairment and other charges, net in the accompanying condensed consolidated statements of earnings. Total accrued restaurant closing costs, included in accrued liabilities and other long-term liabilities, changed as follows (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Balance at beginning of period	\$21,228	\$23,938	\$21,657	\$25,020
Additions and adjustments	666	(21)	1,912	784
Cash payments	(1,727)	(1,754)	(3,402)	(3,641)
Balance at end of quarter	\$20,167	\$22,163	\$20,167	\$22,163

Additions and adjustments in all periods primarily relate to revisions to certain sublease and cost assumptions.

6. INCOME TAXES

The income tax provisions reflect year-to-date effective tax rates of 34.2% in 2012 and 34.8% in 2011. The final annual tax rate cannot be determined until the end of the fiscal year; therefore, the actual 2012 rate could differ from our current estimates.

At April 15, 2012, our gross unrecognized tax benefits associated with uncertain income tax positions were \$0.9 million, which if recognized would favorably impact the effective income tax rate. The gross unrecognized tax benefits increased by \$0.3 million from the end of fiscal year 2011 based on a preliminary assessment of a state income tax audit. It is reasonably possible that changes to the gross unrecognized tax benefits will be required within the next twelve months due to the possible settlement of state tax audits.

The major jurisdictions in which the Company files income tax returns include the United States and states in which we operate that impose an income tax. The federal statutes of limitations have not expired for fiscal years 2008 and forward. The statutes of limitations for California and Texas, which constitute the Company's major state tax jurisdictions, have not expired for fiscal years 2001 and 2007, respectively, and forward. Generally, the statutes of limitations for the other state jurisdictions have not expired for fiscal years 2008 and forward.

7. RETIREMENT PLANS

Defined benefit pension plans — We sponsor a defined benefit pension plan covering substantially all full-time employees which will no longer accrue benefits effective December 31, 2015, and was closed to new participants effective January 1, 2011. We also sponsor an unfunded supplemental executive retirement plan which provides certain employees additional pension benefits and which was closed to new participants effective January 1, 2007. Benefits under both plans are based on the employees' years of service and compensation over defined periods of employment.

Postretirement healthcare plans — We sponsor healthcare plans that provide postretirement medical benefits to certain employees who meet minimum age and service requirements. The plans are contributory, with retiree contributions adjusted annually, and contain other cost-sharing features such as deductibles and coinsurance.

Net periodic benefit cost — The components of net periodic benefit cost were as follows in each period (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Defined benefit pension plans:				
Service cost	\$2,175	\$2,490	\$5,075	\$5,809
Interest cost	5,225	4,980	12,191	11,620
Expected return on plan assets	(4,612)	(4,784)	(10,761)	(11,163)
Actuarial loss	2,864	2,266	6,683	5,289
Amortization of unrecognized prior service cost	100	113	233	263
Net periodic benefit cost	\$5,752	\$5,065	\$13,421	\$11,818
Postretirement healthcare plans:				
Service cost	\$14	\$18	\$33	\$42
Interest cost	373	366	870	854
Actuarial loss	21	47	48	109
Amortization of unrecognized prior service cost	—	7	—	17

Net periodic benefit cost	\$408	\$438	\$951	\$1,022
---------------------------	-------	-------	-------	---------

10

Future cash flows — Our policy is to fund our plans at or above the minimum required by law. As of the date of our last actuarial funding valuation, there was no minimum requirement. Details regarding 2012 contributions are as follows (in thousands):

	Defined Benefit Pension Plans	Postretirement Healthcare Plans
Net year-to-date contributions	\$ 6,626	\$ 801
Remaining estimated net contributions during fiscal 2012	\$ 6,800	\$ 600

We will continue to evaluate contributions to our funded defined benefit pension plan based on changes in pension assets as a result of asset performance in the current market and economic environment.

8. SHARE-BASED COMPENSATION

We offer share-based compensation plans to attract, retain and motivate key officers, employees and non-employee directors to work toward the financial success of the Company. In fiscal 2012, we granted the following share-based compensation awards in connection with our annual award grants in November:

	Shares
Stock options	485,057
Performance-vested stock awards	234,258
Nonvested stock units	83,552

The components of share-based compensation expense recognized in each period are as follows (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Stock options	\$785	\$1,174	\$1,975	\$2,686
Performance-vested stock awards	172	471	502	1,209
Nonvested stock awards	135	140	315	326
Nonvested stock units	293	348	615	578
Deferred compensation for non-mangement directors	155	173	155	173
Total share-based compensation expense	\$1,540	\$2,306	\$3,562	\$4,972

9. STOCKHOLDERS' EQUITY

Repurchases of common stock — In May 2011, the Board of Directors approved a program to repurchase up to \$100.0 million in shares of our common stock expiring November 2012. During the first quarter, we repurchased approximately 0.3 million shares at an aggregate cost of \$6.4 million, completing the May 2011 authorization. In November 2011, the Board of Directors approved a new program to repurchase \$100.0 million in shares of our common stock expiring November 2013. As of the end of the second quarter, \$100.0 million remains available under this authorization.

Comprehensive income — Our total comprehensive income, net of taxes, was as follows (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Net earnings	\$21,632	\$6,802	\$33,582	\$39,203
Cash flow hedges:				
Net change in fair value of derivatives	(214)	(247)	(619)	1,190
Net loss reclassified to earnings	299	—	697	—
Total	85	(247)	78	1,190
Tax effect	(33)	95	(31)	(454)
	52	(152)	47	736
Unrecognized periodic benefit costs:				
Actuarial losses and prior service cost reclassified to earnings	2,985	2,433	6,964	5,678
Tax effect	(1,146)	(929)	(2,673)	(2,168)
	1,839	1,504	4,291	3,510
Total comprehensive income	\$23,523	\$8,154	\$37,920	\$43,449

Accumulated other comprehensive loss — The components of accumulated other comprehensive loss, net of taxes, were as follows at the end of each period (in thousands):

	April 15, 2012	October 2, 2011
Unrecognized periodic benefit costs, net of tax benefits of \$56,070 and \$58,743, respectively	\$(89,997)	\$(94,288)
Net unrealized losses related to cash flow hedges, net of tax benefits of \$999 and \$1,030, respectively	(1,605)	(1,652)
Accumulated other comprehensive loss, net	\$(91,602)	\$(95,940)

10. AVERAGE SHARES OUTSTANDING

Our basic earnings per share calculation is computed based on the weighted-average number of common shares outstanding. Our diluted earnings per share calculation is computed based on the weighted-average number of common shares outstanding adjusted by the number of additional shares that would have been outstanding had the potentially dilutive common shares been issued. Potentially dilutive common shares include stock options, nonvested stock awards and units, non-management director stock equivalents and shares issuable under our employee stock purchase plan. Performance-vested stock awards are included in the weighted-average diluted shares outstanding each period if the performance criteria have been met at the end of the respective periods.

The following table reconciles basic weighted-average shares outstanding to diluted weighted-average shares outstanding (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Weighted-average shares outstanding – basic	43,937	50,183	43,896	51,265
Effect of potentially dilutive securities:				
Stock options	470	456	403	460
Nonvested stock awards and units	264	214	261	210
Performance-vested stock awards	240	131	215	134
Weighted-average shares outstanding – diluted	44,911	50,984	44,775	52,069
Excluded from diluted weighted-average shares outstanding:				
Antidilutive	3,092	3,054	2,975	2,968
Performance conditions not satisfied at the end of the period	351	366	351	366

11. VARIABLE INTEREST ENTITIES (“VIEs”)

We formed Jack in the Box Franchise Finance, LLC (“FFE”) for the purpose of operating a franchisee lending program

12

which may provide up to \$100.0 million to assist Jack in the Box franchisees in re-imaging their restaurants. We are the sole equity investor in FFE. The \$100.0 million lending program is comprised of a \$20.0 million commitment from the Company in the form of a capital note and an \$80.0 million Senior Secured Revolving Securitization Facility (“FFE Facility”) entered into with a third party. The FFE Facility is a revolving loan and security agreement bearing a variable interest rate. The revolving period has been extended and is set to expire in June 2012. We may make additional contributions to FFE and FFE may incur additional borrowings under its credit facility during the extended lending period.

We have determined that FFE is a VIE and that the Company is its primary beneficiary. We considered a variety of factors in identifying the primary beneficiary of FFE including, but not limited to, who holds the power to direct matters that most significantly impact FFE’s economic performance (such as determining the underwriting standards and credit management policies), as well as what party has the obligation to absorb the losses of FFE. Based on these considerations, we have determined that the Company is the primary beneficiary and have reflected the entity in the accompanying condensed consolidated financial statements.

FFE’s assets consolidated by the Company represent assets that can be used only to settle obligations of the consolidated VIE. Likewise, FFE’s liabilities consolidated by the Company do not represent additional claims on the Company’s general assets; rather they represent claims against the specific assets of FFE. The impacts of FFE’s results were not material to the Company’s condensed consolidated statements of earnings or cash flows. The FFE’s balance sheet consisted of the following at the end of each period (in thousands):

	April 15, 2012	October 2, 2011
Cash	\$ 165	\$ 531
Other current assets (1)	2,330	2,086
Other assets, net (1)	13,077	12,292
Total assets	\$ 15,572	\$ 14,909
Current liabilities	\$ 470	\$ 140
Revolving credit facility	—	1,160
Other long-term liabilities (2)	15,608	14,046
Retained earnings	(506) (437
Total liabilities and stockholders’ equity	\$ 15,572	\$ 14,909

(1) Consists primarily of amounts due from franchisees.

(2) Consists primarily of the capital note contributions from Jack in the Box which are eliminated in consolidation. The Company’s maximum exposure to loss is equal to its outstanding contributions that are expected to range from \$15.0-\$17.0 million and represents estimated losses that would be incurred should all franchisees default on their loans without any consideration of recovery. To offset the credit risk associated with the Company’s variable interest in FFE, the Company holds a security interest in the assets of FFE subordinate and junior to all other obligations of FFE.

12. LEGAL MATTERS

The Company is subject to normal and routine litigation brought by former, current or prospective employees, customers, franchisees, vendors, landlords, shareholders or others. The Company assesses contingencies to determine the degree of probability and range of possible loss for potential accrual in its financial statements. An estimated loss contingency is accrued in the financial statements if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because litigation is inherently unpredictable, assessing contingencies is highly subjective and requires judgments about future events. The Company regularly reviews contingencies to determine the adequacy of the accruals and related disclosures. The ultimate amount of loss may differ from these estimates. Although the Company currently believes that the ultimate outcome of these matters will not have a material adverse effect on the results of operations, liquidity or financial position of the Company, it is possible that the results of operations, liquidity or financial position of the Company could be materially affected in any particular

future reporting period by the unfavorable resolution of one or more of these matters or contingencies.

13. SEGMENT REPORTING

Reflecting the information currently being used in managing the Company as a two-branded restaurant operations business, our segments comprise results related to system restaurant operations for our Jack in the Box and Qdoba brands. This segment reporting structure reflects the Company's current management structure, internal reporting method and financial information used in deciding how to allocate Company resources. Based upon certain quantitative thresholds, both

13

operating segments are considered reportable segments.

We measure and evaluate our segments based on segment earnings from operations. Summarized financial information concerning our reportable segments is shown in the following tables (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Revenues by segment:				
Jack in the Box restaurant operations segment	\$299,418	\$335,318	\$682,076	\$797,649
Qdoba restaurant operations segment	67,066	48,455	142,329	104,155
Distribution operations	140,146	121,362	334,940	268,049
Consolidated revenues	\$506,630	\$505,135	\$1,159,345	\$1,169,853
Earnings from operations by segment:				
Jack in the Box restaurant operations segment	\$33,510	\$12,973	\$55,647	\$67,175
Qdoba restaurant operations segment	3,869	1,795	6,043	2,884
Distribution operations	—	(527)	—	(1,182)
FFE operations	(44)	(172)	(100)	(172)
Consolidated earnings from operations	\$37,335	\$14,069	\$61,590	\$68,705
Total depreciation expense by segment:				
Jack in the Box restaurant operations segment	\$18,035	\$19,005	\$42,328	\$44,667
Qdoba restaurant operations segment	3,970	2,932	8,752	6,462
Distribution operations	155	160	398	390
Consolidated depreciation expense	\$22,160	\$22,097	\$51,478	\$51,519

Interest income and expense, income taxes and total assets are not reported for our segments, in accordance with our method of internal reporting.

	April 15, 2012	October 2, 2011
Goodwill by segment:		
Jack in the Box	\$48,529	\$49,181
Qdoba	85,974	56,691
Consolidated goodwill	\$134,503	\$105,872

Refer to Note 2, Summary of Refranchisings, Franchise Development and Acquisitions, for information regarding the segment changes in goodwill during 2012.

Other	148,903	145,863
	\$293,642	\$290,723

16. SUBSEQUENT EVENT

During fiscal 2012, the Company has been engaged in a comprehensive review of its overhead structure, including evaluating opportunities for outsourcing, restructuring of certain functions and workforce reductions. On April 23, 2012, the Company offered a voluntary early retirement program to eligible employees. The impact of the early retirement program on our condensed consolidated financial statements will depend on the number of employees that accept the early retirement offer.

17. NEW ACCOUNTING PRINCIPLES

In May 2011, the Financial Accounting Standards Board (“FASB”) issued ASU 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS, which was issued to update the language used in existing guidance to better align U.S. GAAP and IFRS fair value measurement guidance. This update also requires increased disclosure of quantitative and qualitative information about unobservable inputs used in a fair value measurement that is categorized within Level 3 of the fair value hierarchy. Other than requiring additional disclosures, adoption of this new guidance in the second quarter did not have a significant impact on our consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, Presentation of Comprehensive Income, which was issued to enhance comparability between entities that report under U.S. GAAP and IFRS, and to provide a more consistent method of presenting non-owner transactions that affect an entity’s equity. ASU 2011-05 eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders’ equity and requires an entity to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement or in two separate but consecutive statements. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption of the new guidance is permitted, and full retrospective application is required.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS

GENERAL

All comparisons between 2012 and 2011 refer to the 12-weeks ("quarter") and 28-weeks ("year-to-date") ended April 15, 2012 and April 17, 2011, respectively, unless otherwise indicated.

For an understanding of the significant factors that influenced our performance during the quarterly periods ended April 15, 2012 and April 17, 2011, our Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with the Condensed Consolidated Financial Statements and related Notes included in this Quarterly Report and our Annual Report on Form 10-K for the fiscal year ended October 2, 2011.

Our MD&A consists of the following sections:

• Overview — a general description of our business and fiscal 2012 highlights.

• Results of operations — an analysis of our consolidated statements of earnings for the periods presented in our condensed consolidated financial statements.

• Liquidity and capital resources — an analysis of our cash flows including capital expenditures, share repurchase activity, known trends that may impact liquidity and the impact of inflation.

• Discussion of critical accounting estimates — a discussion of accounting policies that require critical judgments and estimates.

• New accounting pronouncements — a discussion of new accounting pronouncements, dates of implementation and the impact on our consolidated financial position or results of operations, if any.

• Cautionary statements regarding forward-looking statements — a discussion of the risks and uncertainties that may cause our actual results to differ materially from any forward-looking statements made by management.

OVERVIEW

As of April 15, 2012, we operated and franchised 2,242 Jack in the Box quick-service restaurants, primarily in the western and southern United States, and 605 Qdoba Mexican Grill ("Qdoba") fast-casual restaurants throughout the United States.

Our primary source of revenue is from retail sales at Jack in the Box and Qdoba company-operated restaurants. We also derive revenue from Jack in the Box and Qdoba franchise restaurants, including royalties (based upon a percent of sales), rents, franchise fees and distribution sales of food and packaging commodities. In addition, we recognize gains from the sale of company-operated restaurants to franchisees, which are presented as a reduction of operating costs and expenses, net in the accompanying condensed consolidated statements of earnings.

The following summarizes the most significant events occurring in fiscal 2012 and certain trends compared to a year ago:

• Restaurant Sales — Sales at restaurants open more than one year ("same-store sales") increased (decreased) as follows:

	Quarter		Year-to-Date		
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011	
Jack in the Box:					
Company	5.6	% 0.8	% 5.5	% 1.2	%
Franchise	3.6	% (0.3))% 3.1	% 0.4	%
System	4.2	% 0.1	% 3.8	% 0.7	%
Qdoba:					
Company	3.8	% 5.1	% 3.7	% 5.5	%
Franchise	2.2	% 6.4	% 3.2	% 6.5	%
System	3.0	% 6.0	% 3.4	% 6.2	%

Commodity Costs — Commodity costs increased approximately 1.8% and 6.7%, at our Jack in the Box and Qdoba restaurants, respectively, in the quarter and 4.7% and 10.2%, respectively, year-to-date compared to a year ago. We expect our overall commodity costs to increase approximately 3%-4% in fiscal 2012.

New Unit Development — We continued to grow our brands with the opening of new company-operated and franchise-operated restaurants. Year-to-date, we opened 23 Jack in the Box locations and 23 Qdoba locations system-wide.

Franchising Program — Qdoba and Jack in the Box franchisees opened a total of 29 restaurants year-to-date. Our Jack in the Box system was approximately 73% franchised at the end of the second quarter and we plan to further increase franchise ownership to approximately 80% over the next couple of years.

RESULTS OF OPERATIONS

The following table presents certain income and expense items included in our condensed consolidated statements of earnings as a percentage of total revenues, unless otherwise indicated. Percentages may not add due to rounding.

Total system	890	1,957	2,847	1,069	1,700	2,769				
% of system	31	% 69	% 100	% 39	% 61	% 100				
Revenues										

As we continue to execute our refranchising strategy, which includes the sale of restaurants to franchisees, we expect the number of Jack in the Box company-operated restaurants and the related sales to decrease while revenues from franchise restaurants increase. As such, company restaurant sales decreased \$30.4 million, or 9.5%, in the quarter and \$103.2 million, or 13.6%, year-to-date. This decrease is due primarily to a decrease in the average number of Jack in the Box company-operated restaurants, partially offset by an increase in the number of Qdoba company-operated restaurants and increases in per-store average sales ("PSA") at our Jack in the Box and Qdoba company-operated restaurants.

The following table represents the approximate impact of these increases (decreases) on company restaurant sales (in thousands):

	Quarter	Year-to-Date
Reduction in the average number of Jack in the Box restaurants	\$(83,500)	\$(225,400)
Jack in the Box PSA sales increase	34,400	83,500
Increase in the average number of Qdoba restaurants	15,400	32,800
Qdoba PSA sales increase	3,300	5,900
Total decrease in company restaurant sales	\$(30,400)	\$(103,200)

Same-store sales at Jack in the Box company-operated restaurants increased 5.6% in the quarter and 5.5% year-to-date driven by a combination of price increases and transaction growth. Same-store sales at Qdoba company-operated restaurants increased 3.8% in the quarter and 3.7% year-to-date primarily driven by price increases. The following table summarizes the change in company-operated same-store sales:

	Quarter	Year-to-Date
Jack in the Box transactions	3.1 %	3.0 %
Jack in the Box average check (1)	2.5 %	2.5 %
Jack in the Box change in same-store sales	5.6 %	5.5 %
Qdoba change in same-store sales (2)	3.8 %	3.7 %

(1)Includes price increases of approximately 3.5% and 3.4% in the quarter and year-to-date, respectively.

(2)Includes price increases of approximately 4.2% and 4.1% in the quarter and year-to-date, respectively.

Distribution sales to Jack in the Box and Qdoba franchisees grew \$18.8 million in the quarter and \$66.9 million year-to-date from a year ago. This growth primarily reflects an increase in the number of Jack in the Box franchise restaurants that purchase ingredients and supplies from our distribution centers, which contributed additional sales of approximately \$19.5 million and \$55.2 million, respectively. Increases in PSA volumes and higher commodity prices year-to-date also contributed to the increase in distribution sales. During the second quarter, Qdoba restaurants ceased using our distribution services. Distribution sales to Qdoba franchisees were not material to our results of operations for any period presented.

Franchise revenues increased \$13.2 million, or 21.0%, in the quarter and \$25.8 million, or 18.0%, year-to-date due primarily to an increase in the average number of Jack in the Box franchise restaurants, which contributed additional royalties and rents of approximately \$10.9 million and \$29.4 million, respectively. Year-to-date, this increase was partially offset by an increase in re-image contributions to franchisees, which are recorded as a reduction of franchise revenues, and a decrease in revenues from franchise fees and other driven primarily by a decline in the number of restaurants sold to franchisees. The following table reflects the detail of our franchise revenues in each period and other information we believe is useful in analyzing the change in franchise revenues (dollars in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Royalties	\$29,382	\$25,120	\$67,511	\$56,345
Rents	44,427	36,643	104,094	82,726
Re-image contributions to franchisees	(827)	(1,435)	(6,535)	(2,715)
Franchise fees and other	2,699	2,203	4,430	7,296
Franchise revenues	\$75,681	\$62,531	\$169,500	\$143,652
% increase	21.0 %		18.0 %	
Average number of franchise restaurants	1,929	1,690	1,933	1,648
% increase	14.1 %		17.3 %	
Increase (decrease) in franchise-operated same-store sales:				
Jack in the Box	3.6 %	(0.3)%	3.1 %	0.4 %
Qdoba	2.2 %	6.4 %	3.2 %	6.5 %

Royalties as a percentage of estimated franchise
restaurant sales:

Jack in the Box	5.3	% 5.3	% 5.2	% 5.3	%
Qdoba	5.0	% 5.0	% 5.0	% 5.0	%

Operating Costs and Expenses

Food and packaging costs decreased to 32.6% of company restaurant sales in the quarter and increased to 33.1% year-to-date compared with 33.4% and 32.9%, respectively, a year ago. In 2012, higher commodity costs were more than offset in the quarter and partially offset year-to-date by the benefit of selling price increases, favorable product mix and a greater proportion of Qdoba company restaurants. Commodity costs increased as follows compared with the prior year:

	Quarter	Year-to-Date
Jack in the Box	1.8	4.7
Qdoba	6.7	10.2

Commodity cost increases were driven by higher costs for most commodities other than produce and poultry. We expect overall commodity costs for fiscal 2012 to increase approximately 3%-4%. Beef represents the largest portion, or approximately 21%, of the Company's overall commodity spend, and we typically do not enter into fixed price contracts for our beef needs. For the full year, we currently expect beef costs to increase approximately 5%-6%, and most other major commodities to be higher in 2012 compared with last year.

Payroll and employee benefit costs decreased to 29.3% of company restaurant sales in the quarter and 29.5% year-to-date, compared to 30.5% and 30.7%, respectively, in 2011, reflecting the leverage from same-store sales increases and the benefits of refranchising. These decreases were offset in part by higher levels of incentive compensation.

Occupancy and other costs decreased to 22.5% of company restaurant sales in the quarter and 23.0% year-to-date compared with 23.8% and 24.0%, respectively, last year. The lower percentage in 2012 is due primarily to the leverage from same-store sales increases, the benefits of refranchising, and lower repair and maintenance costs. These benefits were partially offset by higher fees associated with debit card transactions, PSA depreciation expense related to the Jack in the Box re-image program and PSA rent expense resulting from a greater proportion of company-operated Qdoba restaurants compared with last year.

Distribution costs increased \$18.3 million in the quarter and \$65.8 million year-to-date, primarily reflecting an increase in the related sales. The 2012 supply chain agreement provides that any profits or losses related to our distribution operations are shared by all company and franchise restaurants who utilize our distribution services. Franchise costs, principally rents and depreciation on properties we lease to Jack in the Box franchisees, increased \$6.7 million to 50.2% of the related revenues in the quarter and \$18.2 million to 51.8% year-to-date, from 50.1% and 48.5%, respectively, a year ago. The increase as a percent of revenues is primarily due to higher rent and depreciation expense resulting from an increase in the percentage of locations that we lease to franchisees. Year-to-date, an increase in re-image contributions to franchisees and lower franchise fee revenue also contributed to the percent of revenues increase.

The following table presents the change in selling, general and administrative ("SG&A") expenses compared with the prior year (in thousands):

	Increase / (Decrease)	
	Quarter	Year-to-Date
Advertising	\$(2,533)	\$(7,685)
Refranchising strategy	(1,216)	(2,376)
Incentive compensation	1,869	1,690
Cash surrender value of COLI policies, net	163	81
Pension and postretirement benefits	657	1,532
Pre-opening costs	398	1,149
Qdoba general and administrative	1,200	2,075
Other	1,340	4,244
	\$1,878	\$710

Our refranchising strategy has resulted in a decrease in the number of Jack in the Box company-operated restaurants and the related overhead expenses to manage and support those restaurants, including advertising costs, which are primarily contributions to our marketing fund determined as a percentage of restaurant sales. The higher levels of incentive compensation reflect an improvement in the Company's results compared with performance goals. The cash

surrender value of our company-owned life insurance (“COLI”) policies, net of changes in our non-qualified deferred compensation obligation supported by these policies, are subject to market fluctuations. The changes in market values had a positive impact of \$1.1 million in the quarter and \$4.3 million year to date compared to \$1.3 million and \$4.4 million, respectively, a year ago. The increase in pension and

postretirement benefits expense principally relates to a decrease in the discount rate as compared with a year ago. The increase in pre-opening costs primarily relates to higher expenses associated with restaurant openings in new Jack in the Box markets. Qdoba general and administrative costs increased primarily due to higher overhead to support our growing number of company-operated restaurants.

Impairment and other charges, net is comprised of the following (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Impairment charges	\$910	\$878	\$2,109	\$1,167
Losses on the disposition of property and equipment, net	1,775	2,628	2,858	5,424
Costs of closed restaurants (primarily lease obligations) and other	864	988	2,933	1,499
Restructuring costs	1,525	—	1,525	—
	\$5,074	\$4,494	\$9,425	\$8,090

Impairment and other charges, net increased \$0.6 million in the quarter and \$1.3 million year-to-date compared to a year ago. These increases include severance costs of \$1.5 million recorded in the second quarter of fiscal 2012 related to our restructuring activities. The year-to-date increase also includes higher costs associated with restaurants and facilities we have closed or plan to close and impairment charges related to under-performing Jack in the Box restaurants. These increases were partially offset by a decrease in costs in both periods related to our re-image and new logo program which was substantially completed during the first quarter of fiscal 2012.

Gains on the sale of company-operated restaurants to franchisees, net are detailed in the following table (dollars in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Number of restaurants sold to franchisees	37	26	37	114
Gains on the sale of company-operated restaurants	\$14,078	\$878	\$15,200	\$28,750
Average gain on restaurants sold	\$380	\$34	\$411	\$252

In 2012, gains on the sale of company-operated restaurants include additional gains of \$0.9 million in the quarter and \$2.1 million year-to-date recognized upon the extension of the underlying franchise and lease agreements related to restaurants sold in a prior year. The lower average gains in the prior year relate to the sale of a market with lower than average sales volumes and cash flows in the second quarter.

Interest Expense, Net

Interest expense, net is comprised of the following (in thousands):

	Quarter		Year-to-Date	
	April 15, 2012	April 17, 2011	April 15, 2012	April 17, 2011
Interest expense	\$5,152	\$4,204	\$11,756	\$9,151
Interest income	(618)	(259)	(1,165)	(595)
Interest expense, net	\$4,534	\$3,945	\$10,591	\$8,556

Interest expense, net increased \$0.6 million in the quarter and \$2.0 million year-to-date compared with a year ago primarily due to higher average borrowings.

Income Taxes

The tax rate in 2012 was 34.1% in the quarter and 34.2% year-to-date, compared with 32.8% and 34.8%, respectively, in the prior year. The changes in rates were impacted by the market performance of insurance investment products used to fund certain non-qualified retirement plans and estimated earnings. Changes in the cash value of the insurance products are not included in taxable income. We expect the fiscal year tax rate to be 35%-36%. The annual tax rate cannot be determined until the end of the fiscal year; therefore, the actual rate could differ from our current estimates.

Net Earnings

Net earnings were \$21.6 million, or \$0.48 per diluted share, in the quarter compared with \$6.8 million, or \$0.13 per diluted share, a year ago. Year-to-date net earnings were \$33.6 million, or \$0.75 per diluted share, compared with \$39.2 million or \$0.75 per diluted share, a year ago.

LIQUIDITY AND CAPITAL RESOURCES

General

Our primary sources of short-term and long-term liquidity are expected to be cash flows from operations, the revolving bank credit facility, the sale and leaseback of certain restaurant properties and the sale of Jack in the Box company-operated restaurants to franchisees.

We generally reinvest available cash flows from operations to improve our restaurant facilities and develop new restaurants, to reduce debt and to repurchase shares of our common stock. Our cash requirements consist principally of:

- working capital;
- capital expenditures for new restaurant construction and restaurant renovations;
- income tax payments;
- debt service requirements; and
- obligations related to our benefit plans.

Based upon current levels of operations and anticipated growth, we expect that cash flows from operations, combined with other financing alternatives in place or available, will be sufficient to meet our capital expenditure, working capital and debt service requirements for the foreseeable future.

As is common in the restaurant industry, we maintain relatively low levels of accounts receivable and inventories, and our vendors grant trade credit for purchases such as food and supplies. We also continually invest in our business through the addition of new units and refurbishment of existing units, which are reflected as long-term assets and not as part of working capital. As a result, we typically maintain current liabilities in excess of current assets, which results in a working capital deficit.

Cash Flows

The table below summarizes our cash flows from operating, investing and financing activities (in thousands):

	Year-to-Date	
	April 15, 2012	April 17, 2011
Total cash provided by (used in):		
Operating activities	\$69,588	\$81,844
Investing activities	(64,592)	(26,905)
Financing activities	(5,112)	(50,834)
Net increase (decrease) in cash and cash equivalents	\$(116)	\$4,105

Operating Activities. Operating cash flows decreased \$12.3 million compared with a year ago due primarily to increases in payments as follows: \$9.5 million related to fluctuations in the timing of October rent payments; \$4.3 million for bonuses; \$4.1 million in pension contributions; and \$4.0 million for interest expense. The impact of these higher payments were partially offset by an \$8.4 million increase in net income adjusted for non-cash items.

Investing Activities. Cash used in investing activities increased \$37.7 million compared with a year ago due primarily to decreases in (1) proceeds from the sale of restaurants to franchisees, (2) proceeds from the sale and leaseback of restaurant properties and (3) collections of notes receivable related to prior years' franchising activities, as well as an increase in cash used to acquire Qdoba franchise-operated restaurants. The impact of these decreases in cash flows were partially offset by a decrease in capital expenditures.

Capital Expenditures — The composition of capital expenditures in each period follows (in thousands):

	Year-to-Date	
	April 15, 2012	April 17, 2011
Jack in the Box:		
New restaurants	\$7,527	\$3,905
Restaurant facility improvements	16,748	51,734
Other, including corporate	7,408	5,868
Qdoba	8,926	12,622
Total capital expenditures	\$40,609	\$74,129

Our capital expenditure program includes, among other things, investments in new locations, restaurant remodeling, new equipment and information technology enhancements. Capital expenditures decreased compared to a year ago due primarily to a decrease in spending related to our Jack in the Box restaurant re-image and new logo program. We expect fiscal 2012 capital expenditures to be approximately \$85-\$95 million. We plan to open approximately 15 Jack in the Box and 25-30 Qdoba company-operated restaurants in 2012.

Sale of Company-Operated Restaurants — The following table details proceeds received in connection with our franchising activities in each period (dollars in thousands):

	Year-to-Date	
	April 15, 2012	April 17, 2011
Number of restaurants sold to franchisees	37	114
Total proceeds	\$21,964	\$49,588
Average proceeds	\$594	\$435

We expect total proceeds of \$40-\$50 million from the sale of 80-120 Jack in the Box restaurants in 2012. In certain instances, we may provide financing to facilitate the closing of certain transactions. As of April 15, 2012, notes receivable related to prior year franchisings were \$6.3 million.

Assets Held for Sale and Leaseback — We use sale and leaseback financing to lower the initial cash investment in our Jack in the Box restaurants to the cost of the equipment, whenever possible. The following table summarizes the cash flow activity related to sale and leaseback transactions in each period (dollars in thousands):

	Year-to-Date	
	April 15, 2012	April 17, 2011
Number of restaurants sold and leased back	5	12
Proceeds from sale of assets	\$9,312	\$21,811
Spending to acquire/purchase assets	(22,000)	(15,142)
Net cash flows related to assets held for sale and leaseback	\$(12,688)	\$6,669

As of April 15, 2012, we had investments of \$62.5 million in approximately 44 operating or under construction restaurant properties that we expect to sell and leaseback during the next 12 months.

Acquisition of Franchise-Operated Restaurants — During 2012, we acquired Qdoba franchise restaurants in select markets where we believe there is continued opportunity for restaurant development. The following table details franchise-operated restaurant acquisition activity (dollars in thousands):

	Year-to-Date	
	April 15, 2012	April 17, 2011
Number of restaurants acquired from franchisees	36	22
Cash used to acquire franchise-operated restaurants	\$39,195	\$21,477

The purchase prices were primarily allocated to property and equipment, goodwill and reacquired franchise rights. For additional information, refer to Note 2, Summary of Refranchisings, Franchise Development and Acquisitions.

Financing Activities. Cash flows used in financing activities decreased \$45.7 million compared with a year ago primarily attributable to a decrease in cash used to repurchase shares of our common stock, partially offset by a decrease in borrowings under our credit facility.

Credit Facility — Our credit facility is comprised of (i) a \$400.0 million revolving credit facility and (ii) a \$200.0 million term loan maturing on June 29, 2015, both bearing interest at London Interbank Offered Rate (“LIBOR”) plus 2.75%, as of April 15, 2012. As part of the credit agreement, we may also request the issuance of up to \$75.0 million in letters of credit, the outstanding amount of which reduces the net borrowing capacity under the agreement. The credit facility requires the payment of an annual commitment fee based on the unused portion of the credit facility. The credit facility’s interest rates and the annual commitment rate are based on a financial leverage ratio, as defined in the credit agreement. We may make voluntary prepayments of the loans under the revolving credit facility and term loan at any time without premium or penalty. Specific events, such as asset sales, certain issuances of debt, and insurance and condemnation recoveries, may trigger a mandatory prepayment.

We are subject to a number of customary covenants under our credit facility, including limitations on additional borrowings, acquisitions, loans to franchisees, capital expenditures, lease commitments, stock repurchases, dividend payments and requirements to maintain certain financial ratios. We were in compliance with all covenants as of April 15, 2012. Effective February 16, 2012, to provide additional financial flexibility due to the timing of refranchising transactions and the \$33.0 million acquisition of Qdoba franchised restaurants completed in the second quarter of fiscal 2012, we amended our credit facility to temporarily increase the maximum financial leverage ratio to 2.50 to 1.00 from 2.25 to 1.00 through the third quarter of fiscal 2012.

At April 15, 2012, we had \$175.0 million outstanding under the term loan, borrowings under the revolving credit facility of \$300.0 million and letters of credit outstanding of \$38.9 million.

FFE Credit Facility — FFE entered into an \$80.0 million Senior Secured Revolving Securitization Facility (“FFE Facility”) with a third party to assist in funding our franchisee lending program. The FFE Facility is a revolving loan and security agreement bearing a variable interest rate. The revolving period has been extended and is set to expire in June 2012. As of April 15, 2012, FFE had borrowings outstanding of \$0.9 million against this facility.

Interest Rate Swaps — To reduce our exposure to rising interest rates under our credit facility, we consider interest rate swaps. In August 2010, we entered into two forward-looking swaps that effectively convert \$100.0 million of our variable rate term loan to a fixed-rate basis from September 2011 through September 2014. Based on the term loan’s applicable margin of 2.75% as of April 15, 2012, these agreements would have an average pay rate of 1.54%, yielding an “all-in” fixed rate of 4.29%. For additional information related to our interest rate swaps, refer to Note 4, Derivative Instruments, of the notes to the condensed consolidated financial statements.

Repurchases of Common Stock — In May 2011, the Board of Directors approved a program to repurchase up to \$100.0 million in shares of our common stock expiring November 2012. During the first quarter, we repurchased approximately 0.3 million shares at an aggregate cost of \$6.4 million, completing the May 2011 authorization. In November 2011, the Board of Directors approved a new program to repurchase \$100.0 million in shares of our common stock expiring November 2013. As of the end of the second quarter, \$100.0 million remains available under this authorization.

Off-Balance Sheet Arrangements

We are not a party to any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, changes in financial condition, results of operations, liquidity, capital expenditures or capital resources.

DISCUSSION OF CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those the Company believes are most important for the portrayal of the Company’s financial condition and results and that require management’s most subjective and complex judgments. Judgments and uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. There have been no material changes to the critical accounting estimates previously disclosed in the Company’s Annual Report on Form 10-K for the fiscal year ended October 2, 2011.

NEW ACCOUNTING PRONOUNCEMENTS

In June 2011, the FASB issued ASU 2011-05, Presentation of Comprehensive Income, which was issued to enhance comparability between entities that report under U.S. GAAP and IFRS, and to provide a more consistent method of presenting non-owner transactions that affect an entity's equity. ASU 2011-05 eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders' equity and requires an entity to present the total of comprehensive

income, the components of net income and the components of other comprehensive income either in a single continuous statement or in two separate but consecutive statements. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption of the new guidance is permitted, and full retrospective application is required. This pronouncement is not expected to have a material impact on our consolidated financial statements upon adoption.

Other accounting standards that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the federal securities laws. Any statements contained herein that are not historical facts may be deemed to be forward-looking statements. Forward-looking statements may be identified by words such as “anticipate,” “assume,” “believe,” “estimate,” “expect,” “forecast,” “goals,” “guidance,” “intend,” “plan,” “project,” “may,” “will,” “would” and similar expressions. These statements are based on management’s current expectations, estimates, forecasts and projections about our business and the industry in which we operate. These estimates and assumptions involve known and unknown risks, uncertainties, and other factors that are in some cases beyond our control. Factors that may cause our actual results to differ materially from any forward-looking statements include, but are not limited to, the important factors described in the “Discussion of Critical Accounting Estimates,” and in other sections in this Form 10-Q and in our most recent Annual Report on Form 10-K and other Securities and Exchange Commission filings, including:

Food service businesses such as ours may be materially and adversely affected by changes in consumer tastes or eating habits, and economic, political and socioeconomic conditions. Adverse economic conditions such as unemployment (particularly in California and Texas where our Jack in the Box restaurants are concentrated) may result in reduced restaurant traffic and sales and impose practical limits on pricing.

Our profitability depends in part on our ability to anticipate and react to changes in food costs and availability, fuel costs and other supply and distribution costs. As discussed in our MD&A under the caption “Operating Costs and Expenses,” commodity costs have increased significantly in the past year. While prices appear to be moderating, the risks of increased costs and continued volatility remain, which factors could negatively impact our margins as well as franchisee margins.

Multi-unit food service businesses such as ours can be materially and adversely affected by widespread negative publicity of any type, particularly regarding food quality or public health issues. Negative publicity regarding our brands or the restaurant industry in general could cause a decline in system restaurant sales and could have a material adverse effect on our financial condition and results of operations.

Food service businesses such as ours are subject to the risk that shortages or interruptions in supply could adversely affect the availability, quality and cost of ingredients.

Our business can be materially and adversely affected by severe weather conditions, which can result in lost restaurant sales and increased costs.

New restaurant development, which is critical to our long-term success, involves substantial risks, including availability of acceptable financing, cost overruns and the inability to secure suitable sites on acceptable terms.

Our growth strategy includes opening restaurants in new markets where we cannot assure that we will be able to successfully expand, attract customers or otherwise operate profitably.

The restaurant industry is highly competitive with respect to price, service, location, brand identification and the quality of food. We cannot assure that we will be able to effectively respond to aggressive competitors (including competitors with significantly greater financial resources); that our facility improvements will yield the desired return on investment; or that our new products, service initiatives or our overall strategies will be successful.

The cost of compliance with labor and other regulations could negatively affect our results of operations and financial condition. The increasing amount and complexity of federal, state and local governmental regulations applicable to our industry may increase both our costs of compliance and our exposure to regulatory claims.

Should our advertising and promotion be less effective than our competitors, there could be a material adverse effect on our results of operations and financial condition.

We may not be able to achieve or maintain the ownership mix of franchisee to company-operated restaurants that we desire. Additionally, our ability to reduce operating costs through increased franchise ownership is subject to risks and uncertainties.

We cannot assure that franchisees and developers planning the opening of franchisee restaurants will have the ability or resources to open restaurants or be effective operators, remain aligned with our operations, promotional and capital-intensive initiatives, or successfully operate restaurants in a manner consistent with our standards. In addition, a

franchisee's unrelated business obligations could adversely affect a franchisee's ability to make timely payments to us or adhere to our standards and project an image consistent with our brands.

• The loss of key personnel could have a material adverse effect on our business.

• A material failure or interruption of service or a breach in security of our computer systems could cause reduced efficiency in operations, loss of data or business interruptions.

• Failure to comply with environmental laws could result in the imposition of severe penalties or restrictions on operations by governmental agencies or courts of law, which could adversely affect operations.

Our ability to repay expected borrowings under our credit facility and to meet our other debt or contractual obligations will depend upon our future performance and our cash flows from operations, both of which are subject to prevailing economic conditions and financial, business and other known and unknown risks and uncertainties, certain of which are beyond our control.

• Changes in accounting standards, policies or related interpretations by accountants or regulatory entities may negatively impact our results.

• We are subject to litigation which is inherently unpredictable and can result in unfavorable resolutions where the amount of ultimate loss may differ from our estimated loss contingencies, or impose other costs in defense of claims. Potential investors are urged to consider these factors carefully in evaluating any forward-looking statements, and are cautioned not to place undue reliance on the forward-looking statements. All forward-looking statements are made only as of the date issued, and we do not undertake any obligation to update any forward-looking statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary exposure to risks relating to financial instruments is changes in interest rates. Our credit facility, which is comprised of a revolving credit facility and a term loan, bears interest at an annual rate equal to the prime rate or LIBOR plus an applicable margin based on a financial leverage ratio. As of April 15, 2012, the applicable margin for the LIBOR-based revolving loans and term loan was set at 2.75%.

We use interest rate swap agreements to reduce exposure to interest rate fluctuations. In August 2010, we entered into two interest rate swap agreements that will effectively convert \$100.0 million of our variable rate term loan borrowings to a fixed-rate basis beginning September 2011 through September 2014. Based on the term loan's applicable margin of 2.75% as of April 15, 2012, these agreements would have an average pay rate of 1.54%, yielding an "all-in" fixed rate of 4.29%.

A hypothetical 100 basis point increase in short-term interest rates, based on the outstanding balance of our revolving credit facility and term loan at April 15, 2012, would result in an estimated increase of \$3.8 million in annual interest expense.

We are also exposed to the impact of commodity and utility price fluctuations related to unpredictable factors such as weather and various other market conditions outside our control. Our ability to recover increased costs through higher prices is limited by the competitive environment in which we operate. From time to time, we enter into futures and option contracts to manage these fluctuations. At April 15, 2012, we had no such contracts in place.

ITEM 4. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Based on an evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a - 15 and 15d - 15 of the Securities Exchange Act of 1934, as amended), as of the end of the Company's quarter ended April 15, 2012, the Company's Chief Executive Officer and Chief Financial Officer (its principal executive officer and principal financial officer, respectively) have concluded that the Company's disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the Company's fiscal quarter ended April 15, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

There is no information required to be reported for any items under Part II, except as follows:

ITEM 1. LEGAL PROCEEDINGS

The Company is subject to normal and routine litigation brought by former, current or prospective employees, customers, franchisees, vendors, landlords, shareholders or others. The Company assesses contingencies to determine the degree of probability and range of possible loss for potential accrual in its financial statements. An estimated loss contingency is accrued in the financial statements if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because litigation is inherently unpredictable, assessing contingencies is highly subjective and requires judgments about future events. The Company regularly reviews contingencies to determine the adequacy of the accruals and related disclosures. The ultimate amount of loss may differ from these estimates. Although the Company currently believes that the ultimate outcome of these matters will not have a material adverse effect on the results of operations, liquidity or financial position of the Company, it is possible that the results of operations, liquidity, or financial position of the Company could be materially affected in any particular future reporting period by the unfavorable resolution of one or more of these matters or contingencies.

ITEM 1A. RISK FACTORS

You should consider the risks and uncertainties described under Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended October 2, 2011, which we filed with the SEC on November 23, 2011, together with the risks and uncertainties discussed under the heading “Cautionary Statements Regarding Forward-Looking Statements” in Item 2 of this Quarterly Report on Form 10-Q when evaluating our business and our prospects. There have been no material changes from the risk factors as previously disclosed in our Annual Report on Form 10-K for the fiscal year ended October 2, 2011. These risks and uncertainties are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently consider immaterial may also impair our business operations. If any of the risks or uncertainties actually occurs, our business and financial results could be harmed. In that case, the market price of our common stock could decline. You should also refer to the other information set forth in this Quarterly Report and in our Annual Report on Form 10-K for the fiscal year ended October 2, 2011, including our financial statements and the related notes.

ITEM 5. OTHER INFORMATION

Item 5.02(e) Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

The Compensation Committee (the “Committee”) of the Company’s Board of Directors has approved an amendment to the Company’s form of Revised Compensation and Benefits Assurance Agreement (the “Amended CIC Agreement”). The Committee had previously approved the Revised Compensation and Benefits Assurance Agreement in November 2009 (the “Prior CIC Agreement”), and had authorized the Company to enter into the Prior CIC Agreement with three of its executive officers, including Leonard A. Comma, President and Chief Operating Officer; Philip H. Rudolph, Executive Vice President, General Counsel and Secretary; and Mark H. Blankenship, Senior Vice President and Chief Administrative Officer. In connection with approving the form of Amended CIC Agreement, the Committee has authorized the Company to enter into the Amended CIC Agreement with Messrs. Comma, Rudolph and Blankenship, effective as of May 15, 2012.

Similar to the Prior CIC Agreement, the Amended CIC Agreement provides for compensation to the executive in the form of a lump sum payment and other benefits in the event of a qualifying termination of the executive within 24 months of the effective date of a “change in control” of the Company, as that term is defined in the agreement. The Amended CIC Agreement has a term of two years, which automatically renews for an additional two years unless either party to the agreement gives notice of an intent not to renew the agreement.

The Prior CIC Agreement provided that any payments to the executive that constituted “parachute payments” within the meaning of Section 280G of the Internal Revenue Code (the “Code”) would be aggregated and reduced, if necessary, to the maximum amount of payments that could be paid to executive without giving rise to excise tax payments under Section 4999 of the Code (the “Excise Tax”). Under the Amended CIC Agreement, the executive will automatically

receive the greater of (i) the aggregate parachute payments reduced to the maximum amount that would not subject the executive to the Excise Tax or (ii) the aggregate parachute payments, with the executive paying the Excise Tax and such other applicable federal, state and local income and employment taxes.

This summary of the Amended CIC Agreement is qualified in its entirety by reference to the form of Amended CIC Agreement attached as Exhibit 10.2.1 to this report.
