The exact stock prices and effective dates may not be set forth in the table above, in which case:

If the stock price is between two stock prices in the table or the effective date or date of redemption notice, as the case may be, is between two specified dates in the table, the number of additional shares by which the conversion rate will be increased will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later specified dates, as applicable, based on a 365-day year.

If the stock price is greater than \$65.00 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), no additional shares will be added to the conversion rate.

If the stock price is less than \$9.70 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), no additional shares will be added to the conversion rate.

Notwithstanding the foregoing, the conversion rate will not be increased to more than 103.0927 shares per \$1,000 principal amount of Notes, subject to adjustment in the same manner as the conversion rate as set forth under “Description of Notes— Conversion Rights—Conversion Rate Adjustments” in the preliminary prospectus supplement for the Notes.
