SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the fiscal year ended December 31, 2018

Commission File Number 1-15817

OLD NATIONAL BANCORP

(Exact name of the Registrant as specified in its charter)

INDIANA

(State or other jurisdiction of

35-1539838

(I.R.S. Employer

incorporation or organization) Identification No.)

One Main Street

Evansville, Indiana 47708
(Address of principal executive offices) (Zip Code)

(800) 731-2265

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of each exchange on which registered
Common Stock, No Par Value	The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (s232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (s229.405 of this chapter) is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer	Smaller reporting company
Emerging growth company	

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's voting common stock held by non-affiliates on June 30, 2018, was \$2,791,017,355 (based on the closing price on that date of \$18.60). In calculating the market value of securities held by non-affiliates of the registrant, the registrant has treated as securities held by affiliates as of June 30, 2018, voting stock owned of record by its directors and principal executive officers, and voting stock held by the registrant's trust department in a fiduciary capacity for benefit of its directors and principal executive officers. This calculation does not reflect a determination that persons are affiliates for any other purposes.

The number of shares outstanding of the registrant's common stock, as of January 31, 2019, was 175,163,000.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the Annual Meeting of Shareholders to be held May 2, 2019 are incorporated by reference into Part III of this Form 10-K.

2018 ANNUAL REPORT ON FORM 10-K

FORWARD-LOOKING STATEMENTS

In this report, we have made various statements regarding current expectations or forecasts of future events, which speak only as of the date the statements are made. These statements are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are also made from time-to-time in press releases and in oral statements made by the officers of Old National Bancorp (“Old National” or the “Company”). Forward-looking statements can be identified by the use of the words “expect,” “may,” “could,” “intend,” “project,” “estimate,” “believe,” “anticipate,” and other words of similar meaning. Forward-looking statements also include, but are not limited to, statements regarding estimated cost savings, plans and objectives for future operations, the Company’s business and growth strategies, including future acquisitions of banks, regulatory developments, and expectations about performance as well as economic and market conditions and trends.

Such forward-looking statements are based on assumptions and estimates, which although believed to be reasonable, may turn out to be incorrect. Therefore, undue reliance should not be placed upon these estimates and statements. We cannot assure that any of these statements, estimates, or beliefs will be realized and actual results may differ from those contemplated in these “forward-looking statements.” We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise. You are advised to consult further disclosures we may make on related subjects in our filings with the SEC. In addition to other factors discussed in this report, some of the important factors that could cause actual results to differ materially from those discussed in the forward-looking statements include the following:

- economic, market, operational, liquidity, credit, and interest rate risks associated with our business;
- economic conditions generally and in the financial services industry;
- expected cost savings in connection with the consolidation of recent acquisitions may not be fully realized or realized within the expected time frames, and deposit attrition, customer loss, and revenue loss following completed acquisitions may be greater than expected;
- failure to properly understand risk characteristics of newly entered markets;
- increased competition in the financial services industry either nationally or regionally, resulting in, among other things, credit quality deterioration;
- our ability to achieve loan and deposit growth;
- volatility and direction of market interest rates;
- governmental legislation and regulation, including changes in accounting regulation or standards;
- our ability to execute our business plan;
- a weakening of the economy which could materially impact credit quality trends and the ability to generate loans;
- changes in the securities markets; and
- changes in fiscal, monetary, and tax policies.

Investors should consider these risks, uncertainties, and other factors in addition to risk factors included in this filing and our other filings with the SEC.

PART I

ITEM 1. BUSINESS GENERAL

Old National is a financial holding company incorporated in the state of Indiana and maintains its principal executive office in Evansville, Indiana. We, through our wholly-owned banking subsidiary, provide a wide range of services, including commercial and consumer loan and depository services, private banking, brokerage, trust, investment advisory, and other traditional banking services. At December 31, 2018, we employed 2,892 full-time equivalent associates.

COMPANY PROFILE

Old National Bank, our wholly-owned banking subsidiary (“Old National Bank”), was founded in 1834 and is the oldest company in Evansville, Indiana. In 1982, Old National Bancorp was formed; in 2001 we became a financial holding company and we are currently the largest financial holding company headquartered in the state of Indiana with consolidated assets of \$19.7 billion at December 31, 2018.

At December 31, 2018, Old National Bank operated 191 banking centers located primarily in Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. Each of the branches of Old National Bank provide a group of similar community banking services, including such products and services as commercial, real estate and consumer loans, time deposits, checking and savings accounts, cash management, brokerage, trust, and investment advisory services. The individual bank branches located throughout our Midwest footprint have similar operating and economic characteristics.

We earn interest income on loans as well as fee income from the origination of loans. Lending activities include loans to individuals, which primarily consist of home equity lines of credit, residential real estate loans and consumer loans, and loans to commercial clients, which include commercial loans, commercial real estate loans, letters of credit, and lease financing. Residential real estate loans are either kept in our loan portfolio or sold to secondary investors, with gains or losses from the sales being recognized.

We strive to serve individuals and commercial clients by providing depository services that fit their needs at competitive rates. We pay interest on the interest-bearing deposits and receive service fee revenue on various accounts. Deposit accounts include products such as noninterest-bearing demand, interest-bearing checking and NOW, savings and money market, and time deposits. Debit and ATM cards provide clients with access to their accounts 24 hours a day at any ATM location. We also provide 24-hour telephone access and online banking as well as other electronic and mobile banking services.

In addition to the community banking services of lending and providing deposit services, we offer comprehensive wealth management, investment, and foreign currency services. For businesses, we provide treasury management, merchant, health savings, and capital markets services as well as community development lending and equity investment solutions that produce jobs and revitalize our communities.

MARKET AREA

We own the largest Indiana-based bank headquartered in Indiana. Operating from a home base in Evansville, Indiana, we have continued to grow our footprint in Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. Since the beginning of 2011, Old National has transformed its franchise by reducing low-return businesses and low-growth markets and investing in higher-growth markets.

The following table reflects information on the top markets we currently serve, demonstrating that our largest metropolitan statistical areas compare favorably to the national average.

Metropolitan Statistical Area	Percent of Old National Bank Franchise (%)	Deposits Per Branch (\$M)	2010-2019 Population Change (%)	2019-2024 Projected Population Change (%)	2019 Median Household Income (\$)	2019-2024 Projected Household Income Change (%)

ACQUISITION AND DIVESTITURE STRATEGY

Since the formation of Old National in 1982, we have acquired over 50 financial institutions and other financial services businesses. Future acquisitions and divestitures will be driven by a disciplined financial evaluation process and will be consistent with the existing basic banking strategy which focuses on community banking, client relationships, and consistent quality earnings. Targeted geographic markets for acquisitions include mid-size markets with average to above average growth rates.

We anticipate that, as with previous acquisitions, the consideration paid by us in future acquisitions may be in the form of cash, debt, or Old National stock, or a combination thereof. The amount and structure of such consideration is

based on reasonable growth and cost savings assumptions and a thorough analysis of the impact on both long- and short-term financial results.

Effective November 1, 2018, Old National acquired Minnesota-based Klein through a 100% stock merger. Klein was a bank holding company with KleinBank as its wholly-owned subsidiary. Founded in 1907 and headquartered in Chaska, Minnesota with 18 full-service branches, KleinBank was the largest family-owned community bank serving the Twin Cities and its western communities. Pursuant to the merger agreement, each holder of Klein common stock received 7.92 shares of Old National Common Stock per share of Klein common stock such holder owned. The total fair value of consideration for Klein was \$406.5 million, consisting of 22.8 million shares of Old National Common Stock valued at \$406.5 million. See Note 2 to the consolidated financial statements for further details on the Klein acquisition.

6

Prior to 2018, our most recent acquisitions included the following:

• Indiana bank holding company Tower Financial Corporation through a stock and cash merger on April 25, 2014 that added seven full-service branches in the Fort Wayne, Indiana market and strengthened Old National's position as one of the largest deposit holders in Indiana;

• Michigan bank holding company United Bancorp, Inc. through a stock and cash merger on July 31, 2014 that added 18 branches in Ann Arbor, Michigan and the surrounding area, doubling our presence in Michigan;

• LSB Financial Corp. through a stock and cash merger on November 1, 2014 that added five branches in Lafayette, Indiana;

- Michigan-based Founders Financial Corporation through a stock and cash merger on January 1, 2015 that added four branches in the Grand Rapids, Michigan market;

• Anchor Bancorp Wisconsin Inc. through a stock and cash merger on May 1, 2016 that added 46 branches in the Madison, Milwaukee, and Fox Valley triangle markets; and

• Anchor Bank, N.A through a stock and cash merger on November 1, 2017 that added 17 branches in Minnesota.

In regard to future partnerships, we are an active looker and a selective, disciplined buyer in demographically accretive markets. We believe our ability to bring an enhanced product set and a larger balance sheet with better capital allows a potential partner to better serve their clients. As previously disclosed, we do not feel compelled to enter into a partnership.

Divestitures

On August 14, 2015, Old National divested its southern Illinois region (twelve branches) along with four branches in eastern Indiana and one in Ohio. At closing, the purchasers assumed loans of \$193.6 million and deposits of \$555.8 million. Old National recorded a net pre-tax gain of \$15.6 million in connection with the divestitures, which included a deposit premium of \$19.3 million, goodwill allocation of \$3.8 million, and \$0.9 million of other transaction expenses.

On May 31, 2016, the Company sold its insurance operations, ONI. The Company received approximately \$91.8 million in cash resulting in a pre-tax gain of \$41.9 million and an after-tax gain of \$17.6 million. See Note 16 to the consolidated financial statements for further details on the income tax impact of this sale. Goodwill and intangible assets of approximately \$47.5 million were eliminated as part of this transaction. ONI was an ancillary business and did not meet the criteria to be treated as a discontinued operation as defined in Accounting Standards Update 2014-08, *"Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity."*

On October 26, 2018, the Company divested ten branches in Wisconsin to Marine Credit Union of La Crosse, Wisconsin. At closing, the purchasers assumed \$230.6 million in deposits and no loans. Old National recorded a net pre-tax gain of \$14.0 million in connection with the sale, which included a deposit premium of \$15.0 million, goodwill allocation of \$0.6 million, and \$0.4 million of other transaction expenses.

We continue to focus our efforts to optimize our branch network. Since the beginning of 2011, we have consolidated 158 banking centers (including 10 banking centers in 2018). Over the same period, we have more than doubled our assets and have increased our average total deposits per branch from \$34 million to approximately \$75 million, while only increasing our number of branches by 30. We will continue to review our branch system as we adapt to client behavior changes, continue to make technology improvements, and delivery model changes. Accordingly, as a result of our ongoing branch analysis, we expect a continued reduction in our branch network in 2019.

COMPETITION

The banking industry and related financial service providers operate in a highly competitive market. Old National competes with financial service providers such as other commercial banks, savings and loan associations, credit unions, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market mutual funds, and other financial intermediaries. In addition, Financial Technology, or FinTech, start-ups are emerging in key areas of banking.

Many of our nonfinancial institution competitors have fewer regulatory constraints, broader geographic service areas, greater capital, and, in some cases, lower cost structures. In addition, competition for quality customers has

7

intensified as a result of changes in regulation, mergers and acquisitions, advances in technology and product delivery systems, consolidation among financial service providers, bank failures, and the conversion of certain former investment banks to bank holding companies.

SUPERVISION AND REGULATION

Old National is subject to extensive regulation under federal and state laws. The regulatory framework is intended primarily for the protection of depositors, federal deposit insurance funds, and the banking system as a whole and not for the protection of shareholders and creditors.

Significant elements of the laws and regulations applicable to Old National and its subsidiaries are described below. The descriptions are not intended to be complete and are qualified in its entirety by reference to the full text of the statutes, regulations and policies that are described. Also, such statutes, regulations and policies are continually under review by Congress and state legislatures and federal and state regulatory agencies. A change in statutes, regulations, or regulatory policies applicable to Old National and its subsidiaries, for which Old National cannot predict, could have a material effect on the business of the Company.

The Dodd-Frank Act. On July 21, 2010, financial regulatory reform legislation entitled the “Dodd-Frank Wall Street Reform and Consumer Protection Act” (the “Dodd-Frank Act”) was signed into law. The Dodd-Frank Act significantly restructured the financial regulatory environment in the United States. The Dodd-Frank Act contains numerous provisions that affect all bank holding companies and banks, including Old National and Old National Bank, some of which are described in more detail below. The scope and impact of many of the Dodd-Frank Act provisions were determined and issued over time. The impact of the Dodd-Frank Act on Old National has been substantial. Provisions in the legislation that affect the payment of interest on demand deposits and collection of interchange fees increased the costs associated with certain deposits and placed limitations on certain revenues those deposits generate.

The Volcker Rule. Section 619 of the Dodd-Frank Act contains provisions prohibiting proprietary trading and restricting the activities involving private equity and hedge funds (the “Volcker Rule”). Rules implementing the Volcker Rule were adopted in December 2013. Proprietary trading is defined as the trading of securities, derivatives, or futures (or options on any of the foregoing) as principal, where such trading is principally for the purpose of short-term resale, benefiting from actual or expected short-term price movements and realizing short-term arbitrage profits. The rule’s definition of proprietary trading specifically excludes market-making-related activity, certain government issued securities trading and certain risk management activities. Old National and Old National Bank do not engage in any prohibited proprietary trading activities.

The final text of the Volcker Rule contained provisions to the effect that CDOs, including pooled trust preferred securities, would have to be sold prior to July 15, 2015. The practical implication of this rule provision, which was not expected by the industry, was that those instruments could no longer be accorded “held-to-maturity” accounting treatment but would have to be switched to “available-for-sale” accounting, and that all covered CDOs, regardless of the accounting classification, would need to be adjusted to fair value through an other-than-temporary impairment non-cash charge to earnings. On January 14, 2014, federal banking agencies released an interim final rule regarding the Volcker Rule’s impact on trust preferred CDOs, which included a nonexclusive list of CDOs backed by trust preferred securities that depository institutions will be permitted to continue to hold. All of the trust preferred securities owned by Old National are on this list and held as “available-for-sale”. Any unrealized losses associated with these instruments have already impacted our capital. As of December 31, 2018, Old National does not have any securities that will have to be divested as a result of the Volcker Rule.

Bank Holding Company Regulation. Old National is registered as a bank holding company and has elected to be a financial holding company. It is subject to the supervision of, and regulation by, the Board of Governors of the

Federal Reserve System (the “Federal Reserve”) under the Bank Holding Company Act of 1956, as amended (the “BHC Act”). The Federal Reserve has issued regulations under the BHC Act requiring a bank holding company to serve as a source of financial and managerial strength to its subsidiary banks. It is the policy of the Federal Reserve that, pursuant to this requirement, a bank holding company should stand ready to use its resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity. Under this requirement, Old National is expected to commit resources to support Old National Bank, including at times when Old National may not be in a financial position to provide such resources. Any capital loans by a bank holding company to any of its subsidiary banks are subordinate in right of payment to depositors and to certain other indebtedness of such subsidiary banks. In the event of a bank holding company’s bankruptcy, any commitment by the bank holding

company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to priority of payment.

The BHC Act requires the prior approval of the Federal Reserve to acquire more than a 5% voting interest of any bank or bank holding company. Additionally, the BHC Act restricts Old National's non-banking activities to those which are determined by the Federal Reserve to be closely related to banking and a proper incident thereto.

Under the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), a bank holding company is required to guarantee the compliance of any insured depository institution subsidiary that may become "undercapitalized" (as defined in FDICIA) with the terms of any capital restoration plan filed by such subsidiary with its appropriate federal bank regulatory agency.

Capital and Liquidity Requirements. Bank holding companies are required to comply with the Federal Reserve's risk-based capital guidelines. The FDIC and the OCC have adopted risk-based capital ratio guidelines to which depository institutions under their respective supervision, including Old National Bank, are subject. The guidelines establish a systematic analytical framework that makes regulatory capital requirements more sensitive to differences in risk profiles among banking organizations. Risk-based capital ratios are determined by allocating assets and specified off-balance sheet commitments to four risk-weighted categories, with higher levels of capital being required for the categories perceived as representing greater risk. Old National Bank exceeded all risk-based minimum capital requirements of the FDIC and OCC as of December 31, 2018 and 2017. For Old National's regulatory capital ratios and regulatory requirements as of December 31, 2018 and 2017, see Note 25 to the consolidated financial statements.

The federal regulatory authorities' current risk-based capital guidelines are based upon the Basel Committee on Banking Supervision (the "Basel Committee"). The Basel Committee is a committee of international central banks and bank regulators responsible for establishing international supervisory guidelines for use in member jurisdictions to enhance and align bank regulation on a global scale and promote financial stability. In December 2010 and January 2011, the Basel Committee published the final revisions to the international regulatory capital framework generally referred to as "Basel III," as a response to deficiencies in the international regulatory standards identified during the global financial crisis.

Effective July 2, 2013, the Federal Reserve and the OCC approved final rules known as the "Basel III Capital Rules" substantially revising the risk-based capital and leverage capital requirements applicable to bank holding companies and depository institutions, including Old National and Old National Bank. The Basel III Capital Rules address the components of capital and other issues affecting the numerator in banking institutions' regulatory capital ratios. The Basel III Capital Rules also implement the requirements of Section 939A of the Dodd-Frank Act to remove references to credit ratings from the federal banking agencies' rules. Certain of the Basel III Capital Rules came into effect for Old National and Old National Bank on January 1, 2015; subject to a phase-in period ending on December 31, 2018.

The Basel III Capital Rules introduced a new capital measure "Common Equity Tier 1" ("CET1"). The rules specify that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting specified requirements. CET1 capital consists of common stock instruments that meet the eligibility criteria in the final rules, retained earnings, accumulated other comprehensive income, and common equity Tier 1 minority interest. The rules also define CET1 narrowly by requiring that most adjustments to regulatory capital measures be made to CET1, and not to the other components of capital. They also expand the scope of the adjustments as compared to existing regulations.

As of January 1, 2019, the Basel III Capital Rules require banking organizations to maintain:

- a minimum ratio of CET1 to risk-weighted assets of at least 4.5%, plus a 2.5% “capital conservation buffer” (which is added to the 4.5% CET1 ratio as that buffer is phased-in, effectively resulting in a minimum ratio of CET1 to risk-weighted assets of at least 7.0% upon full implementation);
- a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the 2.5% capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased-in, effectively resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation);
- a minimum ratio of total capital (that is, Tier 1 plus Tier 2 capital) to risk-weighted assets of at least 8.0%, plus the 2.5% capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased-in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation); and
- a minimum leverage ratio of 4.0%, calculated as the ratio of Tier 1 capital to adjusted average consolidated assets.

The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the conservation buffer will face limitations on the payment of dividends, common stock repurchases and discretionary cash payments to executive officers based on the amount of the shortfall.

The Basel III Capital Rules provide for a number of deductions from and adjustments to CET1. These include, for example, the requirement that mortgage servicing rights, deferred tax assets dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1. Under current capital standards, the effects of accumulated other comprehensive income items included in capital are excluded for the purposes of determining regulatory capital ratios. Under the Basel III Capital Rules, Old National and Old National Bank are given a one-time election (the “Opt-out Election”) to filter certain AOCI components, comparable to the treatment under the current general risk-based capital rule. The Company chose the Opt-out Election on the March 31, 2015 Call Report and FR Y-9C for Old National Bank and Old National, respectively.

Implementation of the deductions and other adjustments to CET1 began on January 1, 2015 and have been phased-in over a five-year period (20% per year). The implementation of the capital conservation buffer began on January 1, 2016 at the 0.625% level and was phased-in over a four-year period (increasing by that amount on each subsequent January 1, until it reached 2.5% on January 1, 2019).

The Basel III Capital Rules also provide for a “countercyclical capital buffer” that is applicable to only certain covered institutions and is not expected to have any current applicability to Old National or Old National Bank.

In addition, the Basel III Capital Rules revise the rules for calculating risk-weighted assets to enhance their risk sensitivity. They establish a new framework under which mortgage-backed securities and other securitization exposures will be subject to risk-weights ranging from 20% to 1,250%. The rules also establish adjusted risk-weights for credit exposures, including multi-family and commercial real estate exposures that are 90 days or more past due or on non-accrual, which will be subject to a 150% risk-weight, except in situations where qualifying collateral and/or guarantees are in place. The existing treatment of residential mortgage exposures will remain subject to either a 50% risk-weight (for prudently underwritten owner-occupied first liens that are current or less than 90 days past due) or a 100% risk-weight (for all other residential mortgage exposures including 90 days or more past due exposures).

Management believes that, as of December 31, 2018, Old National and Old National Bank would meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis if such requirements were currently effective. Requirements to maintain higher levels of capital or to maintain higher levels of liquid assets could adversely impact the Company’s net income.

The Basel III Capital Rules permit banks with less than \$15 billion in assets to continue to treat trust preferred securities as Tier 1 capital. This treatment is permanently grandfathered as Tier 1 capital for organic growth but not as a result of a merger or acquisition. On November 1, 2017, Old National acquired Anchor (MN) and exceeded \$15 billion in assets. As the result of this acquisition, Tier 1 treatment of trust preferred securities is prohibited and those securities can only be treated as Tier 2 capital. The Basel III Capital Rules also permit banks with less than \$250 billion in assets to choose to continue excluding unrealized gains and losses on certain securities holdings for purposes of calculating regulatory capital. As previously reported, the Old National chose the Opt-out Election in its

March 31, 2015 Call Report. Additionally, the Basel III Capital Rules limit a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a "capital conservation buffer" consisting of a specified amount of CET1 capital in addition to the amount necessary to meet its minimum risk-based capital requirements.

The liquidity framework under the Basel III Capital Rules (the "Basel III liquidity framework") applies a balance sheet perspective to establish quantitative standards designed to ensure that a banking organization is appropriately positioned to satisfy its short- and long-term funding needs. One test to address short-term liquidity risk is referred to as the liquidity coverage ratio ("LCR"), designed to calculate the ratio of a banking entities' ratio of high-quality liquid assets to its total net cashflows over a 30-day time horizon. The other test, referred to as the net stable funding ratio ("NSFR"), is designed to promote more medium- and long-term asset funding by incenting banking entities to increase their holdings of U.S. Treasury securities and other sovereign debt, as well as increase the use of long-term debt as a funding source. The Basel III liquidity framework was implemented as a minimum standard on January 1, 2015, with a phase-in period ending January 1, 2019. However, the federal banking agencies have not proposed rules implementing the Basel III liquidity framework and have not determined to what extent they will apply to U.S. banks that are not large, internationally active banks.

Management believes that, as of December 31, 2018, Old National Bank would meet the LCR requirement under the Basel III liquidity framework on a fully phased-in basis if such requirements were currently effective. Management's evaluation of the impact of the NSFR requirement is ongoing as of December 31, 2018. Requirements to maintain higher levels of liquid assets could adversely impact the Company's net income.

Prompt Corrective Action Regulations. The Federal Deposit Insurance Act (the "FDIA") requires, among other things, federal bank regulatory authorities to take "prompt corrective action" with respect to banks which do not meet minimum capital requirements. Under current prompt corrective action regulations, a bank will be (i) "well capitalized" if the institution has a total risk-based capital ratio of 10.0% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, and a leverage ratio of 5.0% or greater, and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure; (ii) "adequately capitalized" if the institution has a total risk-based capital ratio of 8.0% or greater, a Tier 1 risk-based capital ratio of 4.0% or greater, and a leverage ratio of 4.0% or greater and is not "well capitalized"; (iii) "undercapitalized" if the institution has a total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based capital ratio of less than 4.0% or a leverage ratio of less than 4.0%; (iv) "significantly undercapitalized" if the institution has a total risk-based capital ratio of less than 6.0%, a Tier 1 risk-based capital ratio of less than 3.0% or a leverage ratio of less than 3.0%; and (v) "critically undercapitalized" if the institution's tangible equity is equal to or less than 2.0% of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters. A bank's capital category is determined solely for the purpose of applying prompt corrective action regulations, and the capital category may not constitute an accurate representation of the bank's overall financial condition or prospects for other purposes.

The Basel III Capital Rules revised the "prompt corrective action" regulations pursuant to Section 38 of the FDIA, by:

- introducing a CET1 ratio requirement at each level (other than critically undercapitalized), with the required CET1 ratio being 6.5% for well-capitalized status;
- increasing the minimum Tier 1 capital ratio requirement for each category, with the minimum Tier 1 risk-based capital ratio for well-capitalized status being 8.0% (as compared to the previous 6.0%); and
- eliminating the provision that provides that a bank with a composite supervisory rating of 1 may have a 3.0% leverage ratio and still be well-capitalized.

The FDIA generally prohibits a depository institution from making any capital distributions (including payment of a dividend) or paying any management fee to its parent holding company if the depository institution would thereafter be “undercapitalized.” “Undercapitalized” institutions are subject to growth limitations and are required to submit a capital restoration plan. The agencies may not accept such a plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution’s capital. In addition, for a capital restoration plan to be acceptable, the depository institution’s parent holding company must guarantee that the institution will comply with such capital restoration plan. The bank holding company must also provide appropriate assurances of performance. The aggregate liability of the parent holding company is limited to

the lesser of (i) an amount equal to 5.0% of the depository institution's total assets at the time it became undercapitalized and (ii) the amount which is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it is "significantly undercapitalized."

"Significantly undercapitalized" depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become "adequately capitalized," requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. "Critically undercapitalized" institutions are subject to the appointment of a receiver or conservator.

Management believes that, as of December 31, 2018, Old National Bank was "well capitalized" based on the existing ratios and the ratios as modified by the Basel III Capital Rules.

Deposit Insurance. Substantially all of the deposits of Old National Bank are insured up to applicable limits by the Deposit Insurance Fund ("DIF") of the FDIC and Old National Bank is subject to deposit insurance assessments to maintain the DIF. Deposit insurance assessments are based on average consolidated total assets minus average tangible equity. Under the FDIC's risk-based assessment system, insured institutions with at least \$10 billion in assets, such as Old National Bank, are assessed on the basis of a scoring system that combines the institution's regulatory ratings and certain financial measures. The scoring system assesses risk measures to produce two scores, a performance score and a loss severity score, that will be combined and converted to an initial assessment rate.

The performance score measures an institution's financial performance and its ability to withstand stress. The loss severity score quantifies the relative magnitude of potential losses to the FDIC in the event of an institution's failure. Once the performance and loss severity scores are calculated, these scores will be converted to a total score. An institution with a total score of 30 or less will pay the minimum base assessment rate, and an institution with a total score of 90 or more will pay the maximum initial base assessment rate. For total scores between 30 and 90, initial base assessment rates will rise at an increasing rate as the total score increases. The FDIC has the authority to raise or lower assessment rates, subject to limits, and to impose special additional assessments.

Under the FDIA, the FDIC may terminate deposit insurance upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Safety and Soundness Regulations. In accordance with the FDIA, the federal banking agencies adopted guidelines establishing general standards relating to internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, asset quality, earnings, compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risks and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal shareholder. In addition, regulations adopted by the federal banking agencies authorize the agencies to require that an institution that has been given notice that it is not satisfying any of such safety and soundness standards to submit a compliance plan. If, after being so notified, the institution fails to submit an acceptable compliance plan or fails in any material respect to implement an accepted compliance plan, the agency must issue an order directing corrective actions and may issue an order directing other actions of the types to which an undercapitalized institution is subject under the "prompt corrective action" provisions of FDIA. If the institution fails to comply with such an order, the agency may seek to enforce such order in judicial proceedings and to impose civil money penalties.

Incentive Compensation. The Dodd-Frank Act requires the federal bank regulatory agencies and the SEC to establish joint regulations or guidelines prohibiting incentive-based payment arrangements at specified regulated entities having at least \$1 billion in total assets, such as Old National and Old National Bank, that encourage inappropriate risks by providing an executive officer, employee, director or principal shareholder with excessive compensation, fees, or benefits or that could lead to material financial loss to the entity. In addition, these regulators must establish regulations or guidelines requiring enhanced disclosure to regulators of incentive-based compensation arrangements. The agencies proposed such regulations in April 2011, but the regulations have not been finalized. If the regulations are adopted in the form initially proposed, they will impose limitations on the manner in which Old National may structure compensation for its executives.

In June 2010, the Federal Reserve, OCC, and FDIC issued comprehensive final guidance on incentive compensation policies intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The guidance, which covers all employees who have the ability to materially affect the risk profile of an organization, either individually or as part of a group, is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors. These three principles are incorporated into the proposed joint compensation regulations under the Dodd-Frank Act, discussed above.

The Federal Reserve will review, as part of the regular, risk-focused examination process, the incentive compensation arrangements of banking organizations, such as Old National, that are not "large, complex banking organizations." These reviews will be tailored to each organization based on the scope and complexity of the organization's activities and the prevalence of incentive compensation arrangements. The findings of the supervisory initiatives will be included in reports of examination. Deficiencies will be incorporated into the organization's supervisory ratings, which can affect the organization's ability to make acquisitions and take other actions.

Enforcement actions may be taken against a banking organization if its incentive compensation arrangements, or related risk-management control or governance processes, pose a risk to the organization's safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

Loans to One Borrower. Old National Bank generally may not make loans or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus. An additional amount may be loaned, up to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate. As of December 31, 2018, Old National Bank was in compliance with the loans-to-one-borrower limitations.

Depositor Preference. The FDIA provides that, in the event of the "liquidation or other resolution" of an insured depository institution, the claims of depositors of the institution, including the claims of the FDIC as subrogee of insured depositors, and certain claims for administrative expenses of the FDIC as a receiver, will have priority over other general unsecured claims against the institution. If an insured depository institution fails, insured and uninsured depositors, along with the FDIC, will have priority in payment ahead of unsecured, non-deposit creditors, including depositors whose deposits are payable only outside of the United States and the parent bank holding company, with respect to any extensions of credit they have made to such insured depository institution.

Community Reinvestment Act. The Community Reinvestment Act of 1977 ("CRA") requires depository institutions to assist in meeting the credit needs of their market areas consistent with safe and sound banking practice. Under the CRA, each depository institution is required to help meet the credit needs of its market areas by, among other things, providing credit to low- and moderate-income individuals and communities. Depository institutions are periodically examined for compliance with the CRA and are assigned ratings that must be publicly disclosed. In order for a financial holding company to commence any new activity permitted by the BHC Act, or to acquire any company engaged in any new activity permitted by the BHC Act, each insured depository institution subsidiary of the financial holding company must have received a rating of at least "satisfactory" in its most recent examination under the CRA. Furthermore, banking regulators take into account CRA ratings when considering approval of certain applications. Old National Bank received a rating of "satisfactory" in its latest CRA examination.

Fair Lending Laws. Fair Lending laws prohibit discrimination in banking services and include the Equal Credit Opportunity Act ("ECOA") and the Fair Housing Act ("FHA"), which prohibit discrimination on the basis of race, gender,

religion, or other prohibited factors in the extension of credit and residential real estate transactions. In May 2018, the U.S. Department of Justice (“DOJ”) and KleinBank entered into a public Settlement Agreement (“Agreement”) regarding alleged violations of the FHA and the ECOA within the Minneapolis, Minnesota market. Old National Bank, as the legal successor in interest to KleinBank, has assumed the ongoing terms and obligations of the Agreement.

Financial Privacy. The federal banking regulators adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about consumers to nonaffiliated third parties. These limitations require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a nonaffiliated third party. These regulations affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors.

Old National Bank is also subject to regulatory guidelines establishing standards for safeguarding customer information. These guidelines describe the federal banking agencies' expectations for the creation, implementation and maintenance of an information security program, which would include administrative, technical and physical safeguards appropriate to the size and complexity of the institution and the nature and scope of its activities. The standards set forth in the guidelines are intended to ensure the security and confidentiality of customer records and information, protect against any anticipated threats or hazards to the security or integrity of such records and protect against unauthorized access to or use of such records or information that could result in substantial harm or inconvenience to any customer.

Anti-Money Laundering and the USA Patriot Act. A major focus of governmental policy on financial institutions in recent years has been aimed at combating money laundering and terrorist financing. The USA Patriot Act of 2001 (the "USA Patriot Act") substantially broadened the scope of United States anti-money laundering laws and regulations by imposing significant new compliance and due diligence obligations on financial institutions, creating new crimes and penalties and expanding the extra-territorial jurisdiction of the United States.

On May 11, 2016, the Financial Crimes Enforcement Network (the "FinCEN") issued new anti-money laundering ("AML") rules governing corporate entities doing business with banks and other financial institutions that are subject to the requirements of the USA Patriot Act. The new rules were effective May 11, 2018 which impose significant due diligence obligations on financial institutions with respect to opening of new accounts and the monitoring of existing accounts. Under the AML rules, a financial institution must identify persons owning or controlling 25% or more of a "legal entity," whenever the legal entity opens a new account at the bank. The financial institution must also identify an individual who has substantial management authority at the legal entity, such as a CEO, CFO, or managing partner.

The AML rules codify within the FinCEN regulations the "pillars" that must be included in a financial institutions AML compliance program. Regulators previously communicated their expectations with respect to four of these pillars: (1) the development of internal policies, procedures, and control; (2) the designation of a compliance officer; (3) the establishment of an ongoing employee training program; and (4) the implementation of an independent audit function to test programs. The new beneficial ownership requirement establishes a fifth pillar. Among other things, this new pillar includes the necessity to monitor and update the beneficial ownership of a legal entity, including the need to subject corporate borrowers to due diligence requests from financial institutions for certifications with respect to their beneficial owners. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing, or to comply with all of the relevant laws or regulations, could have serious legal and reputational consequences for the institution, including causing applicable bank regulatory authorities not to approve merger or acquisition transactions when regulatory approval is required or to prohibit such transactions even if approval is not required.

Office of Foreign Assets Control Regulation. The United States has imposed economic sanctions that affect transactions with designated foreign countries, nationals and others which are administered by the U.S. Treasury Department Office of Foreign Assets Control. Failure to comply with these sanctions could have serious legal and reputational consequences, including causing applicable bank regulatory authorities not to approve merger or acquisition transactions when regulatory approval is required or to prohibit such transactions even if approval is not required.

Transactions with Affiliates. Transactions between Old National Bank and its affiliates are regulated by the Federal Reserve under sections 23A and 23B of the Federal Reserve Act and related regulations. These regulations limit the types and amounts of covered transactions engaged in by Old National Bank and generally require those transactions to be on an arm's-length basis. The term "affiliate" is defined to mean any company that controls or is under common control with Old National Bank and includes Old National and its non-bank subsidiaries. "Covered transactions" include a loan or extension of credit, as well as a purchase of securities issued by an affiliate, a purchase of assets (unless otherwise exempted by the Federal Reserve) from the affiliate, certain derivative transactions that create a credit exposure to an affiliate, the acceptance of securities issued by the affiliate as

collateral for a loan, and the issuance of a guarantee, acceptance or letter of credit on behalf of an affiliate. In general, these regulations require that any such transaction by Old National Bank (or its subsidiaries) with an affiliate must be secured by designated amounts of specified collateral and must be limited to certain thresholds on an individual and aggregate basis.

Federal law also limits Old National Bank's authority to extend credit to its directors, executive officers and 10% shareholders, as well as to entities controlled by such persons. Among other things, extensions of credit to insiders are required to be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons. Also, the terms of such extensions of credit may not involve more than the normal risk of repayment or present other unfavorable features and may not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of Old National Bank's capital.

Federal Home Loan Bank System. Old National Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank System provides a central credit facility primarily for member institutions. As a member of the FHLBI, Old National Bank is required to acquire and hold shares of capital stock of the FHLBI in an amount at least equal to the sum of the membership stock purchase requirement, determined on an annual basis at the end of each calendar year, and the activity-based stock purchase requirement, determined on a daily basis. For Old National Bank, the membership stock purchase requirement is 1.0% of the Mortgage-Related Assets, as defined by the FHLBI, which consists principally of residential mortgage loans and mortgage-backed securities, held by Old National Bank. The activity-based stock purchase requirement is equal to the sum of: (1) a specified percentage ranging from 2.0% to 5.0%, which for Old National Bank is 5.0%, of outstanding borrowings from the FHLBI; (2) a specified percentage ranging from 0.0% to 5.0%, which for Old National Bank is 3.0%, of the outstanding principal balance of Acquired Member Assets, as defined by the FHLBI, and delivery commitments for Acquired Member Assets; (3) a specified dollar amount related to certain off-balance sheet items, which for Old National Bank is inapplicable; and (4) a specified percentage ranging from 0.0% to 5.0% of the carrying value on the FHLBI's balance sheet of derivative contracts between the FHLBI and Old National Bank, which for Old National Bank is inapplicable. The FHLBI can adjust the specified percentages and dollar amount from time to time within the ranges established by the FHLBI capital plan. As of December 31, 2018, Old National Bank was in compliance with the minimum stock ownership requirement.

Federal Reserve System. Federal Reserve regulations require depository institutions to maintain cash reserves against their transaction accounts (primarily NOW and demand deposit accounts). A reserve of 3% is to be maintained against aggregate transaction accounts between \$12.4 million and \$79.5 million (subject to adjustment by the Federal Reserve) plus a reserve of 10% (subject to adjustment by the Federal Reserve between 8% and 14%) against that portion of total transaction accounts in excess of \$79.5 million. The first \$12.4 million of otherwise reservable balances (subject to adjustment by the Federal Reserve) is exempt from the reserve requirements. Old National Bank is in compliance with the foregoing requirements.

Other Regulations. Old National Bank is subject to federal consumer protection statutes and regulations promulgated under those laws, including, but not limited to, the:

- Truth-In-Lending Act and Regulation Z, governing disclosures of credit terms to consumer borrowers;
- Home Mortgage Disclosure Act and Regulation C, requiring financial institutions to provide certain information about home mortgage and refinanced loans;
 - Fair Credit Reporting Act and Regulation V, governing the provision of consumer information to credit reporting agencies and the use of consumer information;
- Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies;
- Truth in Savings Act and Regulation DD, which requires disclosure of deposit terms to consumers;

Regulation CC, which relates to the availability of deposit funds to consumers;
Right to Financial Privacy Act, which imposes a duty to maintain the confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records; and
Electronic Funds Transfer Act, governing automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

15

The Dodd-Frank Act also significantly impacts the various consumer protection laws, rules and regulations applicable to financial institutions. The statute rolls back the federal preemption of state consumer protection laws that was enjoyed by national banks by (1) requiring that a state consumer financial law prevent or significantly interfere with the exercise of a national bank's powers before it can be preempted, (2) mandating that any preemption decision be made on a case by case basis rather than a blanket rule, and (3) ending the applicability of preemption to subsidiaries and affiliates of national banks. As a result, we may now be subject to state consumer protection laws in each state where we do business, and those laws may be interpreted and enforced differently in each state.

The Dodd-Frank Act also created the Consumer Financial Protection Bureau (the "CFPB"), a consumer financial services regulator with supervisory authority over banks and their affiliates with assets of more than \$10 billion, like Old National, to carry out federal consumer protection laws. The CFPB also regulates financial products and services sold to consumers and has rulemaking authority with respect to federal consumer financial laws. Any new regulatory requirements promulgated by the CFPB or modifications in the interpretations of existing regulations could require changes to Old National's consumer-facing businesses. The Dodd-Frank Act also gives the CFPB broad data collecting powers for fair lending for both small business and mortgage loans, as well as extensive authority to prevent unfair, deceptive, and abusive practices.

The rules issued by the CFPB have impacted our mortgage loan origination and servicing activities. Compliance with these rules will likely continue to increase our overall regulatory compliance costs.

Dividend Limitation. Old National Bank is subject to the provisions of the National Bank Act, is supervised, regulated and examined by the OCC, and is subject to the rules and regulations of the OCC, Federal Reserve and the FDIC. A substantial portion of Old National's cash revenue is derived from dividends paid to it by Old National Bank. These dividends are subject to various legal and regulatory restrictions as summarized in Note 25 to the consolidated financial statements.

Legislative and Regulatory Initiatives. From time to time, various legislative and regulatory initiatives are introduced in Congress and state legislatures, as well as by regulatory agencies. Such initiatives may include proposals to expand or contract the powers of bank holding companies and depository institutions or proposals to substantially change the financial institution regulatory system. Such legislation could change banking statutes and the operating environment of Old National in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. Old National cannot predict whether any such legislation will be enacted, and, if enacted, the effect that it, or any implementing regulations, would have on the financial condition or results of operations of Old National. A change in statutes, regulations or regulatory policies applicable to Old National or any of its subsidiaries could have a material effect on Old National's business, financial condition and results of operations.

AVAILABLE INFORMATION

All reports filed electronically by Old National with the SEC, including the annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy and information statements, other information and amendments to those reports filed or furnished (if applicable), are accessible at no cost on Old National's web site at www.oldnational.com as soon as reasonably practicable after electronically submitting such materials to the SEC. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, and Old National's filings are accessible on the SEC's web site at www.sec.gov.

ITEM 1A. RISK FACTORS

There are a number of risks and uncertainties that could adversely affect Old National's business, financial condition, results of operations or cash flows, and access to liquidity. Old National's Enterprise Risk Management program is an enterprise-wide framework for identifying, managing, mitigating, monitoring, aggregating, and reporting risks. The following major risks identified by Old National's Enterprise Risk Management Program are described below: strategic, financial, and reputational; credit; market, interest rate, and liquidity; operational; and legal, regulatory, and compliance.

Strategic, Financial, and Reputational Risks

Economic conditions have affected and could continue to adversely affect our revenues and profits.

Old National's financial performance generally, and in particular the ability of borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services that Old National offers, is highly dependent upon the business environment in the markets where Old National operates and in the United States as a whole. A favorable business environment is generally characterized by, among other factors, economic growth, efficient capital markets, low inflation, low unemployment, high business and investor confidence, and strong business earnings. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity or investor or business confidence; limitations on the availability or increases in the cost of credit and capital; increases in inflation or interest rates; high unemployment, natural disasters, terrorist acts, or a combination of these or other factors.

An economic downturn or sustained, high unemployment levels, and stock market volatility may negatively impact our operating results and have a negative effect on the ability of our borrowers to make timely repayments of their loans increasing the risk of loan defaults and losses.

Changes in economic or political conditions could adversely affect Old National's earnings, as the ability of Old National's borrowers to repay loans, and the value of the collateral securing such loans, decline.

Old National's success depends, to a certain extent, upon economic or political conditions, local and national, as well as governmental monetary policies. Conditions such as recession, unemployment, changes in interest rates, inflation, money supply, and other factors beyond Old National's control may adversely affect its asset quality, deposit levels, and loan demand and, therefore, Old National's earnings. Because Old National has a significant amount of commercial real estate loans, decreases in real estate values could adversely affect the value of property used as collateral. Adverse changes in the economy may also have a negative effect on the ability of Old National's borrowers to make timely repayments of their loans, which would have an adverse impact on Old National's earnings. In addition, substantially all of Old National's loans are to individuals and businesses in Old National's market area. Consequently, any economic decline in Old National's primary market areas, which include Indiana, Kentucky, Michigan, Wisconsin, and Minnesota could have an adverse impact on Old National's earnings.

Acquisitions may not produce revenue enhancements or cost savings at levels or within timeframes originally anticipated and may result in unforeseen integration difficulties and dilution to existing shareholder value.

We have acquired, and expect to continue to acquire, other financial institutions or parts of those institutions in the future, and we may engage in de novo branch expansion. We may also consider and enter into new lines of business or offer new products or services.

We may incur substantial costs to expand, and we can give no assurance such expansion will result in the levels of profits we seek. There can be no assurance that integration efforts for any mergers or acquisitions will be successful. Also, we may issue equity securities in connection with acquisitions, which could cause ownership and economic dilution to our current shareholders. There is no assurance that, following any mergers or acquisitions, our integration efforts will be successful or that, after giving effect to the acquisition, we will achieve profits comparable to, or better than, our historical experience.

Acquisitions and mergers involve a number of expenses and risks, including:

- the time and costs associated with identifying potential new markets, as well as acquisition and merger targets;
- the accuracy of the estimates and judgments used to evaluate credit, operations, management and market risks with respect to the target institution;
- the time and costs of evaluating new markets, hiring experienced local management and opening new offices, and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;
- our ability to finance an acquisition and possible dilution to our existing shareholders;
- the diversion of our management's attention to the negotiation of a transaction, and the integration of the operations and personnel of the combined businesses;
- entry into new markets where we lack experience;
- the introduction of new products and services into our business;
- the incurrence and possible impairment of goodwill associated with an acquisition and possible adverse short-term effects on our results of operations;
- closing delays and increased expenses related to the resolution of lawsuits filed by shareholders of targets; and
- the risk of loss of key employees and customers.

Old National must generally receive federal regulatory approval before it can acquire a bank or bank holding company. Old National cannot be certain when or if, or on what terms and conditions, any required regulatory approvals will be granted. Old National may be required to sell banks or branches as a condition to receiving regulatory approval.

Future acquisitions could be material to Old National and it may issue additional shares of stock to pay for those acquisitions, which would dilute current shareholders' ownership interests.

Our accounting estimates and risk management processes rely on analytical and forecasting models.

The processes that we use to estimate probable loan losses and to measure the fair value of financial instruments, as well as the processes used to estimate the effects of changing interest rates and other market measures on our financial condition and results of operations, depend upon the use of analytical and forecasting models. These models reflect assumptions that may not be accurate, particularly in times of market stress or other unforeseen circumstances. Even if these assumptions are adequate, the models may prove to be inadequate or inaccurate because of other flaws in their design or their implementation. If our models for determining interest rate risk and asset-liability management are inadequate, we may incur increased or unexpected losses upon changes in market interest rates or other market measures. If our models for determining probable loan losses are inadequate, the allowance for loan losses may not be sufficient to support future charge-offs. If our models to measure the fair value of financial instruments are inadequate, the fair value of such financial instruments may fluctuate unexpectedly or may not accurately reflect what we could realize upon sale or settlement of such financial instruments. Any such failure in our analytical or forecasting models could have a material adverse effect on our business, financial condition, and results of operations.

Old National operates in an extremely competitive market, and Old National's business will suffer if Old National is unable to compete effectively.

In our market area, Old National encounters significant competition from other commercial banks, savings and loan associations, credit unions, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market mutual funds, and other financial intermediaries. In addition, FinTech start-ups are emerging in key areas of banking. Our competitors may have substantially greater resources and lending limits than Old National does and may offer services that Old National does not or cannot provide. Many of our nonfinancial institution competitors have fewer regulatory constraints, broader geographic service areas, and, in some cases, lower cost structures. Old National's profitability depends upon Old National's continued ability to compete successfully in Old National's market area.

Our business could suffer if we fail to attract and retain skilled people.

Our success depends, in large part, on our ability to attract and retain key people. Competition for the best people in most activities we engage in can be intense. We may not be able to hire the best people or to keep them. The loss of any of our key personnel or an inability to continue to attract, retain, and motivate key personnel could adversely affect our business.

We may not be able to pay dividends in the future in accordance with past practice.

Old National has traditionally paid a quarterly dividend to common stockholders. The payment of dividends is subject to legal and regulatory restrictions. Any payment of dividends in the future will depend, in large part, on Old National's earnings, capital requirements, financial condition, and other factors considered relevant by Old National's Board of Directors.

Old National is an entity separate and distinct from Old National Bank. Old National Bank conducts most of our operations and Old National depends upon dividends from Old National Bank to service its debt and to pay dividends to Old National's shareholders. The availability of dividends from Old National Bank is limited by various statutes and regulations. It is possible, depending upon the financial condition including liquidity and capital adequacy of Old National Bank and other factors, that the OCC could assert that the payment of dividends or other payments is an unsafe or unsound practice. In addition, the payment of dividends by our other subsidiaries is also subject to the laws of the subsidiary's state of incorporation, and regulatory capital and liquidity requirements applicable to such subsidiaries. At December 31, 2018, Old National Bank could pay dividends of \$92.9 million without prior regulatory approval. In the event that Old National Bank was unable to pay dividends to us, we in turn would likely have to reduce or stop paying dividends on our Common Stock. Our failure to pay dividends on our Common Stock could have a material adverse effect on the market price of our Common Stock. See "Business – Supervision and Regulation – Dividend Limitations" and Note 25 to the consolidated financial statements.

Old National may not realize the expected benefits of its strategic imperatives.

Old National's ability to compete depends on a number of factors, including among others its ability to develop and successfully execute strategic plans and imperatives. Our strategic priorities include consistent quality earnings, enhanced management discipline, and strong risk management; greater confidence in decision making and appropriate levels of risk taking; fewer operational surprises, disruptions and losses; improved operational effectiveness and efficiency; more effective deployment of resources; and increased awareness and involvement in the achievement of strategic goals. Our inability to execute on or achieve the anticipated outcomes of our strategic priorities may affect how the market perceives us and could impede our growth and profitability.

Credit Risk

If Old National's actual loan losses exceed Old National's allowance for loan losses, Old National's net income will decrease.

Old National makes various assumptions and judgments about the collectibility of Old National's loan portfolio, including the creditworthiness of Old National's borrowers and the value of the real estate and other assets serving as collateral for the repayment of Old National's loans. Despite Old National's underwriting and monitoring practices, the effect of a declining economy could negatively impact the ability of Old National's borrowers to repay loans in a timely manner and could also negatively impact collateral values. As a result, Old National may experience significant loan losses that could have a material adverse effect on Old National's operating results. Since Old National must use assumptions regarding individual loans and the economy, Old National's current allowance for loan losses may not be sufficient to cover actual loan losses. Old National's assumptions may not anticipate the severity or duration of the current credit cycle; and Old National may need to significantly increase Old National's provision for losses on loans if one or more of Old National's larger loans or credit relationships becomes delinquent or if Old National expands its commercial real estate and commercial lending. In addition, federal and state regulators periodically review Old National's allowance for loan losses and may require Old National to increase the provision for loan losses or recognize loan charge-offs. Material additions to Old National's allowance would materially decrease Old National's net income. There can be no assurance that Old National's

monitoring procedures and policies will reduce certain lending risks or that Old National's allowance for loan losses will be adequate to cover actual losses.

Old National's loan portfolio includes loans with a higher risk of loss.

Old National Bank originates commercial real estate loans, commercial loans, agricultural real estate loans, agricultural loans, consumer loans, and residential real estate loans primarily within Old National's market areas. Commercial real estate, commercial, consumer, and agricultural real estate and operating loans may expose a lender to greater credit risk than loans secured by residential real estate because the collateral securing these loans may not be sold as easily as residential real estate. These loans also have greater credit risk than residential real estate for the following reasons:

- *Commercial Real Estate Loans.* Repayment is dependent upon income being generated in amounts sufficient to cover operating expenses and debt service.
- *Commercial Loans.* Repayment is dependent upon the successful operation of the borrower's business.
- *Consumer Loans.* Consumer loans (such as personal lines of credit) are collateralized, if at all, with assets that may not provide an adequate source of payment of the loan due to depreciation, damage, or loss.
- *Agricultural Loans.* Repayment is dependent upon the successful operation of the business, which is greatly dependent on many things outside the control of either Old National Bank or the borrowers. These factors include weather, input costs, commodity and land prices, and interest rates.

If Old National forecloses on collateral property, Old National may be subject to the increased costs associated with the ownership of real property, resulting in reduced revenues.

Old National may have to foreclose on collateral property to protect Old National's investment and may thereafter own and operate such property, in which case Old National will be exposed to the risks inherent in the ownership of real estate. The amount that Old National, as a mortgagee, may realize after a default is dependent upon factors outside of Old National's control, including, but not limited to: (i) general or local economic conditions; (ii) neighborhood values; (iii) interest rates; (iv) real estate tax rates; (v) operating expenses of the mortgaged properties; (vi) environmental remediation liabilities; (vii) ability to obtain and maintain adequate occupancy of the properties; (viii) zoning laws; (ix) governmental rules, regulations and fiscal policies; and (x) acts of God. Certain expenditures associated with the ownership of real estate, principally real estate taxes, insurance, and maintenance costs, may adversely affect the income from the real estate. Therefore, the cost of operating real property may exceed the income earned from such property, and Old National may have to advance funds in order to protect Old National's investment, or Old National may be required to dispose of the real property at a loss. The foregoing expenditures and costs could adversely affect Old National's ability to generate revenues, resulting in reduced levels of profitability.

The soundness of other financial institutions could adversely affect Old National.

Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. Old National has exposure to many different industries and counterparties, and Old National and certain of its subsidiaries routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutions. Many of these transactions expose Old National to credit risk in the event of default of its counterparty. In addition, Old National's credit risk may be affected when collateral is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure. These types of losses could materially adversely affect Old National's results of operations or financial condition.

Market, Interest Rate, and Liquidity Risks

The price of Old National's Common Stock may be volatile, which may result in losses for investors.

General market price declines or market volatility in the future could adversely affect the price of Old National's Common Stock. In addition, the following factors may cause the market price for shares of Old National's Common Stock to fluctuate:

- announcements of developments related to Old National's business;
- fluctuations in Old National's results of operations;
- sales or purchases of substantial amounts of Old National's securities in the marketplace;
- general conditions in Old National's banking niche or the worldwide economy;
- a shortfall or excess in revenues or earnings compared to securities analysts' expectations;
- changes in analysts' recommendations or projections; and
- Old National's announcement of new acquisitions or other projects.

Changes in interest rates could adversely affect Old National's results of operations and financial condition.

Old National's earnings depend substantially on Old National's interest rate spread, which is the difference between (i) the rates Old National earns on loans, securities and other earning assets and (ii) the interest rates Old National pays on deposits and other borrowings. These rates are highly sensitive to many factors beyond Old National's control, including general economic conditions and the policies of various governmental and regulatory authorities. If market interest rates rise, Old National will have competitive pressures to increase the rates that Old National pays on deposits, which could result in a decrease of Old National's net interest income. If market interest rates decline, Old National could experience fixed-rate loan prepayments and higher investment portfolio cash flows, resulting in a lower yield on earning assets. Old National's earnings can also be impacted by the spread between short-term and long-term market interest rates. If short-term and long-term market interest rates converge, Old National's interest rate spread could decline and result in a decrease of Old National's net interest income.

Our wholesale funding sources may prove insufficient to replace deposits or support our future growth.

As a part of our liquidity management, we use a number of funding sources in addition to core deposit growth and repayments and maturities of loans and investments. These sources include brokered certificates of deposit, repurchase agreements, and federal funds purchased. Negative operating results or changes in industry conditions could lead to an inability to replace these additional funding sources at maturity. Our financial flexibility could be constrained if we are unable to maintain our access to funding or if adequate financing is not available to accommodate future growth at

acceptable interest rates. Finally, if we are required to rely more heavily on more expensive funding sources to support future growth, our revenues may not increase proportionately to cover our costs. In this case, our results of operations and financial condition would be negatively affected.

A reduction in our credit rating could adversely affect our business and/or the holders of our securities.

The credit rating agencies rating our indebtedness regularly evaluate Old National and Old National Bank, and credit ratings are based on a number of factors, including our financial strength and ability to generate earnings, as well as factors not entirely within our control, including conditions affecting the financial services industry and the economy and changes in rating methodologies. There can be no assurance that we will maintain our current credit ratings. A downgrade of the credit ratings of Old National or Old National Bank could adversely affect our access to liquidity and capital, and could significantly increase our cost of funds, and decrease the number of investors and counterparties willing to lend to us or purchase our securities. This could affect our growth, profitability, and financial condition, including liquidity.

Operational Risks

A failure or breach, including cyber-attacks, of our operational or security systems, could disrupt our business, result in the disclosure of confidential information, damage our reputation, and create significant financial and legal exposure.

Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks, and other technology assets and the confidentiality, integrity, and availability of information belonging to us and our customers, there is no assurance that our security measures will provide absolute security. Further, to access our products and services our customers may use computers and mobile devices that are beyond our security control systems. In fact, many other financial services institutions and companies engaged in data processing have reported breaches in the security of their websites or other systems, some of which have involved sophisticated and targeted attacks intended to obtain unauthorized access to confidential information, destroy data, disable or degrade service, or sabotage systems, often through the introduction of computer viruses or malware, cyberattacks, and other means. Certain financial institutions in the United States have also experienced attacks from technically sophisticated and well-resourced third parties that were intended to disrupt normal business activities by making internet banking systems inaccessible to customers for extended periods. These “denial-of-service” attacks have not breached our data security systems, but require substantial resources to defend, and may affect customer satisfaction and behavior.

Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because security attacks can originate from a wide variety of sources, including persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments. Those parties may also attempt to fraudulently induce employees, customers or other users of our systems to disclose sensitive information in order to gain access to our data or that of our customers or clients. We have implemented employee and customer awareness training around phishing, malware, and other cyber risks. These risks may increase in the future as we continue to increase our mobile payments and other internet-based product offerings and expand our internal usage of web-based products and applications.

If our security systems were penetrated or circumvented, it could cause serious negative consequences for us, including significant disruption of our operations, misappropriation of our confidential information or that of our customers, or damage our computers or systems and those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and harm to our reputation, all of which could have a material adverse effect on us.

We rely on third party vendors, which could expose Old National to additional cybersecurity risks.

Third party vendors provide key components of our business infrastructure, including certain data processing and information services. On our behalf, third parties may transmit confidential, propriety information. Although we require third party providers to maintain certain levels of information security, such providers may remain vulnerable to breaches, unauthorized access, misuse, computer viruses, or other malicious attacks that could ultimately compromise sensitive information. While we may contractually limit our liability in connection with attacks against third party providers, Old National remains exposed to the risk of loss associated with such vendors. In addition, a number of our vendors are large national entities with dominant market presence in their respective fields. Their services could prove difficult to replace in a timely manner if a failure or other service interruption were to occur. Failures of certain vendors to provide contracted services could adversely affect our ability to deliver products and services to our customers and cause us to incur significant expense.

Failure to keep pace with technological change could adversely affect Old National's results of operations and financial condition.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Old National's future success depends, in part,

upon its ability to address customer needs by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in Old National's operations. Old National may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to its customers. Failure to successfully keep pace with technological change affecting the financial services industry could negatively affect Old National's growth, revenue, and profit.

Changes in consumer use of banks and changes in consumer spending and savings habits could adversely affect Old National's financial results.

Technology and other changes now allow many customers to complete financial transactions without using banks. For example, consumers can pay bills and transfer funds directly without going through a bank. This process of eliminating banks as intermediaries could result in the loss of fee income, as well as the loss of customer deposits and income generated from those deposits. In addition, changes in consumer spending and savings habits could adversely affect Old National's operations, and Old National may be unable to timely develop competitive new products and services in response to these changes.

Old National's controls and procedures may fail or be circumvented, and Old National's methods of reducing risk exposure may not be effective.

Old National regularly reviews and updates its internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Old National also maintains an Enterprise Risk Management program designed to identify, manage, mitigate, monitor, aggregate, and report risks. Any system of controls and any system to reduce risk exposure, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Additionally, instruments, systems, and strategies used to hedge or otherwise manage exposure to various types of market compliance, credit, liquidity, operational, and business risks and enterprise-wide risk could be less effective than anticipated. As a result, Old National may not be able to effectively mitigate its risk exposures in particular market environments or against particular types of risk.

Legal, Regulatory, and Compliance Risks

We have risk related to legal proceedings.

We are involved in judicial, regulatory, and arbitration proceedings concerning matters arising from our business activities and fiduciary responsibilities. We establish reserves for legal claims when payments associated with the

claims become probable and the costs can be reasonably estimated. We may still incur legal costs for a matter even if we have not established a reserve. In addition, the actual cost of resolving a legal claim may be substantially higher than any amounts reserved for that matter. The ultimate resolution of a pending or future legal proceeding, depending on the remedy sought and granted, could materially adversely affect our results of operations and financial condition.

Old National operates in a highly regulated environment, and changes in laws and regulations to which Old National is subject may adversely affect Old National's results of operations.

Old National operates in a highly regulated environment and is subject to extensive regulation, supervision, and examination by, among others, the OCC, the FDIC, the CFPB, the Federal Reserve, and the State of Indiana. Such regulation and supervision of the activities in which an institution may engage is primarily intended for the protection of the depositors and federal deposit insurance funds. In addition, the Treasury has certain supervisory and oversight duties and responsibilities under EESA and the CPP. See "Business – Supervision and Regulation" herein. Applicable laws and regulations may change, and such changes may adversely affect Old National's business. The Dodd-Frank Act, enacted in July 2010, mandated the most wide-ranging overhaul of financial industry regulation in decades. This legislation, among other things, weakened federal preemption of state consumer protection laws and established the CFPB with broad authority to administer and enforce a new federal regulatory framework of consumer financial regulation, including consumer mortgage banking. The scope and impact of many of the Dodd-Frank Act provisions were determined and issued over time. The impact of the Dodd-Frank Act on Old National has been substantial. Provisions in the legislation that affect the payment of interest on demand deposits and collection of interchange fees increased the costs associated with certain deposits and placed

limitations on certain revenues those deposits generate. In addition, the Dodd-Frank Act required Old National to change certain of its business practices, intensified the regulatory supervision of Old National and the financial services industry, increased Old National's capital requirements, and imposed additional assessments and costs on Old National. Requirements to maintain higher levels of capital or liquidity to address potential adverse stress scenarios could adversely impact the Company's net income.

Regulatory authorities also have extensive discretion in connection with their supervisory and enforcement activities, including but not limited to the imposition of restrictions on the operation of an institution, the classification of assets by the institution, the adequacy of an institution's Bank Secrecy Act/Anti Money Laundering program management, and the adequacy of an institution's allowance for loan losses. Any change in such regulation and oversight, whether in the form of restrictions on activities, regulatory policy, regulations, or legislation, including but not limited to changes in the regulations governing institutions, could have a material impact on Old National and its operations.

Changes in accounting policies, standards, and interpretations could materially affect how Old National reports its financial condition and results of operations.

The FASB periodically changes the financial accounting and reporting standards governing the preparation of Old National's financial statements. Additionally, those bodies that establish and/or interpret the financial accounting and reporting standards (such as the FASB, SEC, and banking regulators) may change prior interpretations on how these standards should be applied. These changes can be difficult to predict and can materially affect how Old National records and reports its financial condition and results of operations. In some cases, Old National could be required to retroactively apply a new or revised standard, resulting in changes to previously reported financial results.

If Old National fails to meet regulatory capital requirements which may require heightened capital, we may be forced to raise capital or sell assets.

Old National is subject to regulations that require us to satisfy certain capital ratios, such as the ratio of our Tier 1 capital to our risk-based assets. Both the Dodd-Frank Act, which reformed the regulation of financial institutions in a comprehensive manner, and the Basel III regulatory capital reforms, which increase both the amount and quality of capital that financial institutions must hold, will impact our capital requirements. Specifically, in July 2013, the U.S. federal banking authorities approved the implementation of the Basel III Capital Rules. The Basel III Capital Rules are applicable to all U.S. banks that are subject to minimum capital requirements as well as to bank and saving and loan holding companies, other than "small bank holding companies" (generally bank holding companies with consolidated assets of less than \$500 million). The Basel III Capital Rules not only increase most of the required minimum regulatory capital ratios, they introduce a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Capital Rules also expand the current definition of capital by establishing additional criteria that capital instruments must meet to be considered Additional Tier 1 Capital (i.e., Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that now generally qualify as Tier 1 Capital will not qualify or their qualifications will change when the Basel III Capital Rules are fully implemented. The Basel

III Capital Rules have maintained the general structure of the current prompt corrective action thresholds while incorporating the increased requirements, including the Common Equity Tier 1 Capital ratio. In order to be a “well-capitalized” depository institution under the new regime, an institution must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more, a Tier 1 Capital ratio of 8% or more, a Total Capital ratio of 10% or more, and a leverage ratio of 5% or more. Institutions must also maintain a capital conservation buffer consisting of Common Equity Tier 1 Capital. Financial institutions became subject to the Basel III Capital Rules on January 1, 2015 with a phase-in period through 2019 for many of the changes. If we are unable to satisfy these heightened regulatory capital requirements, due to a decline in the value of our loan portfolio or otherwise, we will be required to improve such capital ratios by either raising additional capital or by disposing of assets. If we choose to dispose of assets, we cannot be certain that we will be able to do so at prices that we believe to be appropriate, and our future operating results could be negatively affected. If we choose to raise additional capital, we may accomplish this by selling additional shares of Common Stock, or securities convertible into or exchangeable for Common Stock, which could significantly dilute the ownership percentage of holders of our Common Stock and cause the market price of our Common Stock to decline. Additionally, events or circumstances in the capital markets generally may increase our capital costs and impair our ability to raise capital at any given time.

Our earnings could be adversely impacted by incidences of fraud and compliance failure.

Financial institutions are inherently exposed to fraud risk. A fraud can be perpetrated by a customer of Old National, an employee, a vendor, or members of the general public. We are most subject to fraud and compliance risk in connection with the origination of loans, ACH transactions, wire transactions, ATM transactions, and checking transactions. Our largest fraud risk, associated with the origination of loans, includes the intentional misstatement of information in property appraisals or other underwriting documentation provided to us by third parties. Compliance risk is the risk that loans are not originated in compliance with applicable laws and regulations and our standards. There can be no assurance that we can prevent or detect acts of fraud or violation of law or our compliance standards by the third parties that we deal with. Repeated incidences of fraud or compliance failures would adversely impact the performance of our loan portfolio.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

As of December 31, 2018, Old National and its affiliates operated a total of 191 banking centers, primarily in the states of Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. Of these facilities, 118 were owned. We lease 73 banking centers from unaffiliated third parties. The terms of these leases range from one years and five months to twenty-five years. See Note 7 to the consolidated financial statements.

Impacting the number of Old National's banking centers in 2018 was the acquisition of Klein (18 banking centers), the sale of 10 banking centers in Wisconsin to Marine Credit Union of La Crosse, Wisconsin, and the consolidation of 10 banking centers throughout the franchise.

Old National also has several administrative offices located throughout its footprint, including the executive offices of Old National which are located at 1 Main Street, Evansville, Indiana. This building, which was previously leased, was purchased in 2016.

ITEM 3. LEGAL PROCEEDINGS

In the normal course of business, Old National and its subsidiaries have been named, from time to time, as defendants in various legal actions. Certain of the actual or threatened legal actions may include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages.

Old National contests liability and/or the amount of damages as appropriate in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, Old National cannot predict with certainty the loss or range of loss, if any, related to such matters, how or if such matters will be resolved, when they will ultimately be resolved, or what the eventual settlement, or other relief, if any, might be. Subject to the foregoing, Old National believes, based on current knowledge and after consultation with counsel, that the outcome of such pending matters will not have a material adverse effect on the consolidated financial condition of Old National, although the outcome of such matters could be material to Old National's operating results and cash flows for a particular future period, depending on, among other things, the level of Old National's revenues or income for such

period. Old National will accrue for a loss contingency if (1) it is probable that a future event will occur and confirm the loss and (2) the amount of the loss can be reasonably estimated.

Old National is not currently involved in any material litigation.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND 5. ISSUER PURCHASES OF EQUITY SECURITIES

Old National's Common Stock is traded on the NASDAQ under the ticker symbol ONB. There were 34,536 shareholders of record as of December 31, 2018.

The following table summarizes the purchases of equity securities made by Old National during the fourth quarter of 2018:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
10/01/18 - 10/31/18	—	\$ —	—	—
11/01/18 - 11/30/18	1,294	18.16	—	—

Total	1,589	\$ 17.75	—	—

The Board of Directors did not authorize a stock repurchase plan for 2018. During the year ended December 31, 2018, Old National repurchased a limited number of shares associated with employee share-based incentive programs.

On January 24, 2019, the Board of Directors declared a quarterly cash dividend of \$0.13 per common share.

EQUITY COMPENSATION PLAN INFORMATION

The following table contains information concerning the Amended and Restated 2008 Incentive Compensation Plan approved by security holders, as of December 31, 2018.

Number of securities to be issued upon exercise of outstanding options, warrants, and rights	Weighted-average exercise price of outstanding options, warrants, and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
---	---	--

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-K

Plan Category	(a)	(b)	(c)
Equity compensation plans			
approved by security holders	1,404,238	\$ 13.88	4,398,631
Equity compensation plans not			
approved by security holders	—	—	—
Total	1,404,238	\$ 13.88	4,398,631

At December 31, 2018, 4.4 million shares remain available for issuance under the Amended and Restated 2008 Incentive Compensation Plan.

The following table compares cumulative five-year total shareholder returns, assuming reinvestment of dividends, for our common stock to cumulative total returns of a broad-based equity market index and two published industry indices. The comparison of shareholder returns (change in December year end stock price plus reinvested dividends) for each of the periods assumes that \$100 was invested on December 31, 2013, in common stock of each of the Company, the S&P Small Cap 600 Index, the NYSE Financial Index and the SNL Bank and Thrift Index with investment weighted on the basis of market capitalization.

(1) Calculated using the federal statutory tax rate in effect of 21% for 2018 and 35% for 2014 - 2017.

(2) Diluted data assumes the exercise of stock options and the vesting of restricted stock.

(3) Cash dividends per share divided by net income per share (basic).

(4) Includes loans held for sale.

(5) Represents a non-GAAP financial measure. Refer to the “Non-GAAP Financial Measures” section of Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for reconciliations to GAAP financial measures.

(6) Excludes loans held for sale.

(7) Includes nonaccrual loans, renegotiated loans, loans 90 days past due still accruing, and other real estate owned. Includes \$12.4 million and \$24.4 million of covered assets in 2015 and 2014, respectively, acquired in an FDIC assisted transaction, which were covered by loss sharing agreements with the FDIC providing for specified loss protection. On June 22, 2016, Old National entered into an early termination agreement with the FDIC that terminated all loss share agreements.

(8) Includes approximately \$20.5 million, \$12.6 million, \$16.7 million, \$15.9 million, and \$41.2 million for 2018, 2017, 2016, 2015, and 2014, respectively, of purchased credit impaired loans that are categorized as nonaccrual because the collection of principal or interest is doubtful. These loans are accounted for under FASB ASC 310-30 and accordingly treated as performing assets.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

	Page
<u>General Overview</u>	30
<u>Corporate Developments in Fiscal 2018</u>	30
<u>Business Outlook</u>	30
<u>Financial Highlights</u>	32
<u>Non-GAAP Financial Measures</u>	32

<u>Critical Accounting Policies and Estimates</u>	58

The following discussion is an analysis of our results of operations for the fiscal years ended December 31, 2018, 2017, and 2016, and financial condition as of December 31, 2018 and 2017. This discussion and analysis should be read in conjunction with our consolidated financial statements and related notes. This discussion contains forward-looking statements concerning our business. Readers are cautioned that, by their nature, forward-looking statements are based on estimates and assumptions and are subject to risks, uncertainties, and other factors. Actual results may differ materially from our expectations that are expressed or implied by any forward-looking statement. The discussion in Item 1A, "Risk Factors," lists some of the factors that could cause our actual results to vary materially from those expressed or implied by any forward-looking statements, and such discussion is incorporated into this discussion by reference.

GENERAL OVERVIEW

Old National is the largest financial holding company incorporated in the state of Indiana and maintains its principal executive offices in Evansville, Indiana. Old National, through Old National Bank, provides a wide range of services, including commercial and consumer loan and depository services, and other traditional banking services. Old National also provides services to supplement the traditional banking business including fiduciary and wealth management services, investment and brokerage services, investment consulting, and other financial services.

Our basic mission is to be THE community bank in the cities and towns we serve. We focus on establishing and maintaining long-term relationships with customers, and are committed to serving the financial needs of the communities in our market area. Old National provides financial services primarily in Indiana, Kentucky, Michigan, Wisconsin, and Minnesota.

CORPORATE DEVELOPMENTS IN FISCAL 2018

In 2018, we increased our presence in Minnesota through our acquisition of Klein. The acquisition provides us not only additional opportunities in the large and rapidly growing Minneapolis-St. Paul market, but also enables greater scale economics across our entire five-state footprint. Other highlights experienced in 2018 include:

- highest loan production year in our history with a strong pipeline that continues to build;
- organic commercial and commercial real estate loan growth of 4% (including loans held for sale) in addition to \$1.049 billion of loans from the Klein partnership;
- cost of total deposits remained well controlled, with an increase of only 13 basis points to 0.32% and a deposit beta of 14.7%;
- strong credit quality metrics including charge-offs to average loans of 0.02%; and
- continued rationalization of our banking center network, resulting in the sale of 10 branches at a gain of \$14.0 million.

During 2018, our net interest income increased substantially to \$537.6 million compared to \$437.2 million in 2017, an increase of 23%. Noninterest income grew from \$183.4 million in 2017 to \$195.3 million in 2018 primarily due to the gain on branch sales. We benefited from higher noninterest income attributable to a full year of Anchor (MN) results in 2018 and the two months of Klein contribution as compared to 2017, which only reflected two months of the Anchor (MN) operations. Offsetting some of the benefit of the Anchor (MN) and Klein results was a decline in gains from sales of investment securities. Our noninterest expenses increased from \$448.8 million in 2017 to \$517.3 million in 2018 reflecting acquisition related expenses and divestiture costs. Net income for 2018 was \$190.8 million compared to \$95.7 million in 2017. Diluted earnings per share were \$1.22 per share in 2018, compared to \$0.69 per

share in 2017. As did other banks and U.S. corporations, our 2018 results benefited from the reduction in the federal corporate tax rate to 21%, which became effective on January 1, 2018. Net income in 2017 reflected a 35% federal tax rate and also included a one-time \$39.3 million tax expense recorded in December 2017 for the revaluation of our deferred income tax asset.

BUSINESS OUTLOOK

The U.S. economy grew by approximately 3% in 2018 as measured by the change in GDP. The strong economic growth was aided by the federal tax cuts and other fiscal measures. Other measures of economic health include the near record low unemployment level of 3.7% despite an increase in the labor force participation rate, increases in personal income of 2.7% year-over-year, increases in home prices, lower household debt burdens, well-controlled inflation, and interest rates that remain low relative to historical levels. It is anticipated that the economy will

continue to achieve healthy growth in 2019 as a result of the stimulus effect of the tax reductions but probably not as robust as experienced in 2018. There are ongoing threats to economic expansion in 2019 and beyond, including the potential impact of the trade dispute with China, a slowdown in new home construction, and the increasing federal and household debt burdens.

We will continue to focus on our core strategic principles of basic banking in 2019, which are loan growth, fee-based income, and expense management.

Organic loan growth is a priority and we expect our strong loan production to continue. We will continue to adhere to our risk profile and disciplined underwriting standards. We have not experienced any specific sector credit related weaknesses, yet we remain particularly diligent in various commercial real estate subsectors such as senior housing, retail, and multifamily.

Our fee-based businesses continue to build up their product sets in all of our markets. We have made investments in these businesses and believe they are well positioned for growth in 2019.

At the same time, we will continue to enhance our technology and operational efficiency to improve the client experience. Since 2010, we have consolidated or closed 201 branches and increased our average branch size from approximately \$34 million to \$75 million in deposits. We will continue to evaluate our franchise for additional consolidation opportunities in 2019.

As we continue our measured growth strategy, our view toward additional partnerships has not changed in this more challenging environment. We remain an active looker in our target markets and a highly selective, disciplined buyer. We continue to believe in our ability to bring a larger balance sheet with better capital and an enhanced product set to a partner that will allow them to better serve their clients.

On May 2, 2019, Bob Jones will retire as CEO and will continue to serve as the Company's Chairman of the Board through January 2020. Our corporate board of directors has appointed Jim Ryan, currently Old National's CFO, to succeed Mr. Jones as CEO and has elected Brendon Falconer to succeed Mr. Ryan as the Company's CFO. Mr. Jones' tenure has further strengthened the bank's culture of transparency, ethics, and character. We believe this succession will continue these attributes that define our bank's culture.

As we look ahead to 2019, we believe our increased scale will allow us to continue our focus on increasing positive operating leverage.

FINANCIAL HIGHLIGHTS

The following table sets forth certain financial highlights of Old National:

(dollars and shares in thousands, except per share data)	Three Months Ended			Years Ended

(3) Represents a non-GAAP financial measure. Refer to the "Non-GAAP Financial Measures" section for reconciliations to GAAP financial measures.

NON-GAAP FINANCIAL MEASURES

Non-GAAP financial measures exclude certain items that are included in the financial results presented in accordance with GAAP. Management believes these non-GAAP financial measures enhance an investor's understanding of the financial results of Old National by providing a meaningful basis for period-to-period comparisons, assisting in operating results analysis, and predicting future performance.

The following table presents GAAP to non-GAAP reconciliations.

(dollars and shares in thousands, except per share data)	Three Months Ended		Years Ended	
	December 31, 2018	2017	December 31, 2018	2017

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although these non-GAAP financial measures are frequently used by investors to evaluate a company, they have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analyses of results as reported under GAAP. These non-GAAP measures are not necessarily comparable to similar measures that may be represented by other companies.

RESULTS OF OPERATIONS

The following table sets forth certain income statement information of Old National for the years ended December 31, 2018, 2017, and 2016:

(dollars in thousands)	Years Ended December 31,			
	2018	2017	2016

Comparison of Fiscal Years 2018 and 2017

Net Interest Income

Net interest income is the most significant component of our earnings, comprising 73% of 2018 revenues. Net interest income and margin are influenced by many factors, primarily the volume and mix of earning assets, funding sources, and interest rate fluctuations. Other factors include the level of accretion income on purchased loans, prepayment risk on mortgage and investment-related assets, and the composition and maturity of earning assets and interest-bearing liabilities.

Short-term interest rates increased 100 basis points in 2018 as the Federal Reserve increased the discount rate 25 basis points at their March, June, September, and December meetings. The rate increases were driven by the Federal Reserve's inflation and wage pressure expectations in conjunction with an expanding economy. The Treasury yield curve flattened as short-term rates rose while long-term interest rates remained flat. Collectively, these factors marginally improved the outlook for our net interest income and margin.

Loans typically generate more interest income than investment securities with similar maturities. Funding from client deposits generally costs less than wholesale funding sources. Factors such as general economic activity, Federal Reserve monetary policy, and price volatility of competing alternative investments, can also exert significant influence on our ability to optimize the mix of assets and funding and the net interest income and margin.

Net interest income is the excess of interest received from earning assets over interest paid on interest-bearing liabilities. For analytical purposes, net interest income is also presented in the table that follows, adjusted to a taxable equivalent basis to reflect what our tax-exempt assets would need to yield in order to achieve the same after-tax yield as a taxable asset. We used the federal statutory tax rate in effect of 21% for 2018 and 35% for 2017 and 2016. This analysis portrays the income tax benefits associated in tax-exempt assets and helps to facilitate a comparison between taxable and tax-exempt assets. Management believes that it is a standard practice in the banking industry to present net interest margin and net interest income on a fully taxable equivalent basis. Therefore, management believes these measures provide useful information for both management and investors by allowing them to make peer comparisons.

(dollars in thousands)	Years Ended December 31,					
	2018	2017	2016			
Net interest income	\$537,602	\$437,168	\$402,703			
Conversion to fully taxable equivalent	11,394	23,091	21,293			
Net interest income - taxable equivalent basis	\$548,996	\$460,259	\$423,996			
Average earning assets	\$15,501,053	\$13,237,906	\$11,840,967			
Net interest margin	3.47	% 3.30	% 3.40	%		
Net interest margin - taxable equivalent basis	3.54	% 3.48	% 3.58	%		

Net interest income was \$537.6 million in 2018, a \$100.4 million increase from \$437.2 million in 2017. Taxable equivalent net interest income was \$549.0 million in 2018, a 19% increase from \$460.3 million in 2017. The net interest margin on a fully taxable equivalent basis was 3.54% in 2018, a 6 basis point increase compared to 3.48% in 2017. The increase in net interest income in 2018 when compared to 2017 was primarily due to higher average earning assets of \$2.263 billion in 2018. Partially offsetting higher average earning assets were higher average interest-bearing liabilities of \$1.585 billion. In addition, interest income in 2018 included lower fully taxable equivalent interest income resulting from the income tax rate decrease to 21% in 2018. Net interest income in both 2018 and 2017 included accretion income (interest income in excess of contractual interest income) associated with acquired loans. Accretion income totaled \$41.1 million in 2018, compared to \$40.8 million in 2017. We expect accretion income to decrease over time, but this may be offset by future acquisitions.

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-K

The following table presents a three-year average balance sheet and for each major asset and liability category, its related interest income and yield, or its expense and rate for the years ended December 31.

The 2018, 2017, and 2016 average balances include \$31.0 million, \$21.2 million, and \$24.8 million, respectively, of required and excess balances held at the Federal Reserve.

- (2) Changes in fair value are reflected in the average balance; however, yield information does not give effect to changes in fair value that are reflected as a component of shareholders' equity.
- (3) Includes U.S. government-sponsored entities and agency mortgage-backed securities at December 31, 2018.
- (4) Interest on state and political subdivision investment securities and commercial loans includes the effect of taxable equivalent adjustments of \$7.1 million and \$4.3 million, respectively, in 2018; \$15.6 million and \$7.5 million, respectively, in 2017; and \$15.2 million and \$6.1 million, respectively, in 2016; using the federal statutory tax rate in effect of 21% in 2018 and 35% in 2017 and 2016.
- (5) Includes principal balances of nonaccrual loans. Interest income relating to nonaccrual loans is included only if received.

36

The yield on average earning assets increased 23 basis points from 3.92% in 2017 to 4.15% in 2018 and the cost of interest-bearing liabilities increased 24 basis points from 0.57% in 2017 to 0.81% in 2018. Average earning assets increased by \$2.263 billion, or 17%. The increase in average earning assets consisted of a \$1.896 billion increase in loans, a \$354.6 million increase in lower yielding investment securities, and a \$12.7 million increase in money market and other interest-earning investments. Average interest-bearing liabilities increased \$1.585 billion, or 16%. The increase in average interest-bearing liabilities consisted of a \$1.316 billion increase in interest-bearing deposits, a \$51.0 million increase in federal funds purchased and interbank borrowings, an \$8.4 million increase in securities sold under agreements to repurchase, a \$184.4 million increase in FHLB advances, and a \$25.0 million increase in other borrowings. Average noninterest-bearing deposits increased by \$545.6 million.

The increase in average earning assets in 2018 compared to 2017 was primarily due to our acquisitions of Anchor (MN) in November 2017 and Klein in November 2018. Including loans held for sale, the loan portfolio, which generally has an average yield higher than the investment portfolio, was approximately 74% of average interest earning assets in 2018 compared to 72% in 2017.

Average loans including loans held for sale increased \$1.896 billion in 2018 compared to 2017 reflecting loans acquired from Anchor (MN) in November 2017 and Klein in November 2018, along with organic loan growth. Loans including loans held for sale attributable to the Anchor (MN) acquisition totaled \$1.595 billion as of the closing date of the acquisition, which was November 1, 2017. Loans including loans held for sale attributable to the Klein acquisition totaled \$1.052 billion as of the closing date of the acquisition, which was November 1, 2018.

The increases in average investments and average deposits also reflected the Anchor (MN) and Klein acquisitions.

Average non-interest-bearing deposits increased \$545.6 million in 2018 compared to 2017 reflecting the Anchor (MN) and Klein acquisitions. Average interest-bearing deposits increased \$1.316 million in 2018 compared to 2017 reflecting the Anchor (MN) and Klein acquisitions.

Average borrowed funds increased \$268.8 million in 2018 compared to 2017 primarily due to increased funding needed as a result of growth in our loan portfolio that outpaced deposit growth.

The following table shows fluctuations in taxable equivalent net interest income attributable to changes in the average balances of assets and liabilities and the yields earned or rates paid for the years ended December 31.

(dollars in thousands)	From 2017 to 2018			From 2016 to 2017

The variance not solely due to rate or volume is allocated equally between the rate and volume variances.

(1) Interest on investment securities and loans includes the effect of taxable equivalent adjustments of \$7.1 million and \$4.3 million, respectively, in 2018; \$15.6 million and \$7.5 million, respectively, in 2017; and \$15.2 million and \$6.1 million, respectively, in 2016; using the federal statutory tax rate in effect of 21% in 2018 and 35% in 2017 and 2016.

Provision for Loan Losses

The provision for loan losses was an expense of \$7.0 million in 2018, compared to an expense of \$3.1 million in 2017. Net charge-offs totaled \$1.9 million in 2018, compared to net charge-offs of \$2.5 million in 2017. The higher provision for loan losses is the result of an increase in specific reserves on loans individually evaluated for impairment and loan growth, partially offset by lower incurred loss rate expectations. Continued loan growth in future periods, a decline in our current level of recoveries, or an increase in charge-offs could result in an increase in provision expense. For additional information about non-performing loans, charge-offs, and additional items impacting the provision, refer to the "Risk Management – Credit Risk" section of Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Noninterest Income

We generate revenues in the form of noninterest income through client fees, sales commissions, and other gains and losses from our core banking franchise and other related businesses, such as wealth management, investment consulting, and investment products. This source of revenue as a percentage of total revenue was 27% in 2018 compared to 30% in 2017.

38

The following table details the components of noninterest income for the years ended December 31.

(dollars in thousands)	Years Ended December 31,			% Change From Prior Year	
	2018	2017	2016	2018	2017
Wealth management fees	\$36,863	\$37,316	\$34,641	(1.2)%	7.7 %
Service charges on deposit accounts	44,026	41,331	41,578	6.5	(0.6)
Debit card and ATM fees	20,216	17,676	16,769	14.4	5.4
Mortgage banking revenue	17,657	18,449	20,240	(4.3)	(8.8)
Insurance premiums and commissions	399	617	20,527	(35.3)	(97.0)
Investment product fees	20,539	20,977	18,822	(2.1)	11.4
Capital markets income	4,934	6,544	3,227	(24.6)	102.8
Company-owned life insurance	10,584	8,654	8,479	22.3	2.1
Net securities gains (losses)	2,060	9,135	5,848	(77.4)	56.2
Recognition of deferred gain on sale					
leaseback transactions	1,577	2,080	16,057	(24.2)	(87.0)
Net gain on branch divestitures	13,989	—	—	N/M	N/M
Gain on sale of ONB Insurance Group, Inc.	—	—	41,864	N/M	(100.0)
Other income	22,461	20,603	24,778	9.0	(16.8)
Total noninterest income	\$195,305	\$183,382	\$252,830	6.5 %	(27.5)%
Noninterest income to total revenue (1)	26.2 %	28.5 %	37.4 %		

(1) Total revenue includes the effect of a taxable equivalent adjustment of \$11.4 million in 2018, \$23.1 million in 2017, and \$21.3 million in 2016.

The increase in noninterest income in 2018 when compared to 2017 was primarily due to a \$14.0 million gain on the sale of 10 Wisconsin branches and higher noninterest income attributable to the Anchor (MN) and Klein partnerships. This increase was partially offset by lower net securities gains and 2017 recoveries on loans originated by AnchorBank (WI) that had been fully charged-off prior to the acquisition totaling \$4.0 million.

Service charges and overdraft fees increased \$2.7 million in 2018 compared to 2017 primarily due to higher service charges and overdraft fees attributable to the Anchor (MN) and Klein partnerships, partially offset by lower overdraft charges.

Debit card and ATM fees increased \$2.5 million in 2018 compared to 2017 primarily due to higher interchange income attributable to the Anchor (MN) and Klein partnerships.

Capital markets income is comprised of customer interest rate swap fees, debt placement fees, foreign currency exchange fees, and net gains (losses) on foreign currency adjustments. Capital markets income decreased \$1.6 million in 2018 compared to 2017 primarily due to lower customer interest rate swap fees.

Company-owned life insurance income increased \$1.9 million in 2018 compared to 2017 primarily due to higher settlements in 2018.

Net securities gains decreased \$7.1 million in 2018 compared to 2017 primarily due to lower realized gains on sales of available-for-sale securities in 2018.

In 2018, we recorded a net gain of \$14.0 million in connection with the October 2018 divestiture of 10 Wisconsin branches, which included a deposit premium of \$15.0 million, goodwill allocation of \$0.6 million, and \$0.4 million of other transaction expenses.

Other income increased \$1.9 million in 2018 when compared to 2017 reflecting a \$2.2 million gain on the sale of our student loan portfolio in the second quarter of 2018 and higher other income attributable to the Anchor (MN) and Klein partnerships, partially offset by 2017 recoveries on loans originated by AnchorBank (WI) that had been fully charged-off prior to the acquisition totaling \$4.0 million.

Noninterest Expense

The following table details the components of noninterest expense for the years ended December 31.

(dollars in thousands)	Years Ended December 31,			% Change From	
	2018	2017	2016	2018	2017
Salaries and employee benefits	\$281,275	\$246,738	\$252,892	14.0	% (2.4)%
Occupancy	51,941	46,511	50,947	11.7	(8.7)
Equipment	14,861	13,560	13,448	9.6	0.8
Marketing	15,847	13,172	14,620	20.3	(9.9)
Data processing	36,170	32,306	32,002	12.0	0.9
Communication	10,846	9,284	9,959	16.8	(6.8)
Professional fees	14,503	16,840	15,705	(13.9)	7.2
Loan expense	7,028	6,596	7,632	6.5	(13.6)
Supplies	3,037	2,406	2,865	26.2	(16.0)
FDIC assessment	10,638	9,480	8,681	12.2	9.2
Other real estate owned expense	878	3,376	4,195	(74.0)	(19.5)
Amortization of intangibles	14,442	11,841	12,486	22.0	(5.2)
Amortization of tax credit investments	22,949	11,733	—	95.6	N/M
Other expense	32,846	24,993	28,715	31.4	(13.0)
Total noninterest expense	\$517,261	\$448,836	\$454,147	15.2	% (1.2)%

Noninterest expense increased \$68.4 million in 2018 when compared to 2017 primarily due to higher operating expenses and acquisition and integration costs associated with Anchor (MN) and Klein. Also contributing to the increase in noninterest expense was higher amortization of tax credit investments in 2018 reflecting the completion of investment tax credit projects, higher salaries and benefits, and higher charitable contributions.

Salaries and benefits is the largest component of noninterest expense. Salaries and benefits increased \$34.5 million in 2018 compared to 2017. Impacting salaries and benefits expense were the acquisitions of Anchor (MN) and Klein. Also contributing to the increase in salaries and benefits were higher incentive compensation expenses, hospitalization expenses, and profit sharing expenses. The increase in profit sharing expenses reflected Old National's increase in its 401(k) match to 75% of employee compensation deferral contributions of the first 4% of compensation, and 50% of the next 4% of compensation during the second quarter of 2018. The change was retroactive for all of 2018. For 2017, we matched 50% of employee compensation deferral contributions, up to 6% of compensation.

Occupancy expenses increased \$5.4 million in 2018 compared to 2017 primarily due to higher occupancy expenses attributable to the Anchor (MN) and Klein partnerships and higher real estate taxes.

Marketing expense increased \$2.7 million in 2018 compared to 2017 primarily due to additional expenses associated with the Anchor (MN) and Klein partnerships and higher public relations expense.

Data processing increased \$3.9 million in 2018 compared to 2017 primarily due to integration expenses associated with the Anchor (MN) and Klein partnerships and higher software expenses.

Professional fees decreased \$2.3 million in 2018 compared to 2017 primarily due to \$3.5 million in pre-tax expenses recorded in 2017 related to an initiative to improve how we serve our clients and increase efficiency, partially offset by professional fees associated with the Klein partnership.

Amortization of tax credit investments was \$22.9 million in 2018 compared to \$11.7 million in 2017. The recognition of tax credit amortization expense is contingent upon the successful rehabilitation of a historic building or completion of a solar project within the reporting period. Many factors including weather, labor availability, building regulations, inspections, and other unexpected construction delays related to a rehabilitation project can cause a project to exceed its estimated completion date. Amortization of tax credit investments is expected to be de minimis in 2019. See Note 10 to the consolidated financial statements for additional information on our tax credit investments.

Other expense increased \$7.9 million in 2018 compared to 2017 primarily due to higher charitable contributions of \$6.3 million and higher other expense associated with the Anchor (MN) and Klein partnerships.

Provision for Income Taxes

We record a provision for income taxes currently payable and for income taxes payable or benefits to be received in the future, which arise due to timing differences in the recognition of certain items for financial statement and income tax purposes. The major difference between the effective tax rate applied to our financial statement income and the federal statutory tax rate is caused by a tax benefit from our tax credit investments and interest on tax-exempt securities and loans. The effective tax rate was 8.6% in 2018 compared to 43.3% in 2017. The lower effective tax rate in 2018 when compared to 2017 is the result of \$39.3 million of additional tax expense recorded in 2017 for the revaluation of deferred tax assets due to the lowering of the federal corporate tax rate to 21% and an increase in federal tax credits available. See Note 16 to the consolidated financial statements for additional details on Old National's income tax provision.

Comparison of Fiscal Years 2017 and 2016

In 2017, we generated net income of \$95.7 million and diluted net income per share of \$0.69 compared to \$134.3 million and diluted net income per share of \$1.05, respectively, in 2016. The 2017 earnings included a \$69.4 million decrease in noninterest income, a \$6.7 million increase in income tax expense, and a \$2.1 million increase in provision for loan losses. These decreases to net income were partially offset by a \$34.5 million increase in net interest income and a \$5.3 million decrease in noninterest expense. The successful conversion and integration of our acquisition of Anchor (MN) in 2017, strong commercial and commercial real estate loan growth, consistently low credit metrics, and well-controlled noninterest expenses all contributed to positive 2017 performance when compared to 2016.

Net interest income was \$437.2 million in 2017, a \$34.5 million increase from \$402.7 million in 2016. Taxable equivalent net interest income was \$460.3 million in 2017, a 9% increase from \$424.0 million in 2016. The net interest margin on a fully taxable equivalent basis was 3.48% in 2017, a 10 basis point decrease compared to 3.58% in 2016. Average earning assets increased by \$1.397 billion during 2017 and the yield on average earning assets decreased 4 basis points from 3.96% in 2016 to 3.92% in 2017. Average interest-bearing liabilities increased \$1.160 billion and the cost of interest-bearing liabilities increased 7 basis points from 0.50% in 2016 to 0.57% in 2017.

The provision for loan losses was an expense of \$3.1 million in 2017, compared to an expense of \$1.0 million in 2016. Charge-offs remained low during 2017 and we continued to see positive trends in credit quality.

Noninterest income decreased to \$183.4 million in 2017 from \$252.8 million in 2016 primarily due to a \$41.9 million gain and lower insurance premiums and commissions in 2016 resulting from the sale of ONI in May 2016, partially offset by higher wealth management fees, investment product fees, and capital markets income in 2017.

Noninterest expense decreased \$5.3 million to \$448.8 million in 2017 from \$454.1 million in 2016 primarily due to the reduction of costs associated with the divestiture of ONI in May 2016. Offsetting these decreases was \$11.7 million of amortization of tax credit investments in 2017. In addition, noninterest expense in 2017 included \$12.3 million of acquisition and integration costs associated with Anchor (MN), compared to \$15.9 million in 2016 of acquisition and integration costs associated with Anchor (WI).

The provision for income taxes was \$72.9 million in 2017 compared to \$66.2 million in 2016. Old National's effective tax rate was 43.3% in 2017 compared to 33.0% in 2016. The higher effective tax rate in 2017 when compared to 2016 is the result of \$39.3 million of additional tax expense to estimate the revaluation of deferred tax assets due to the lowering of the federal corporate tax rate to 21%, partially offset by an increase in federal tax credits available.

FINANCIAL CONDITION

Overview

At December 31, 2018, our assets were \$19.728 billion, a 13% increase compared to \$17.518 billion at December 31, 2017. The increase was primarily due to the acquisition of Klein in November 2018, which had \$2.157 billion in

41

assets as of the closing date of the acquisition, including goodwill of \$208.0 million. Organic growth in our commercial loan portfolios also contributed to the increase in assets.

Earning Assets

Our earning assets are comprised of investment securities, portfolio loans, loans held for sale, money market investments, interest earning accounts with the Federal Reserve, and equity securities. Earning assets were \$17.070 billion at December 31, 2018, an increase of 12% compared to \$15.209 billion at December 31, 2017.

Investment Securities

We classify the majority of our investment securities as available-for-sale to give management the flexibility to sell the securities prior to maturity if needed, based on fluctuating interest rates or changes in our funding requirements. However, we also have \$74.0 million of U.S. government-sponsored entities and agencies securities, \$127.1 million of fixed-rate mortgage-backed securities, and \$305.2 million of state and political subdivision securities in our held-to-maturity investment portfolio at December 31, 2018.

Equity securities, which consist of mutual funds held in trusts associated with deferred compensation plans for former directors and executives, are recorded at fair value and totaled \$5.6 million at December 31, 2018 and December 31, 2017.

At December 31, 2018, the investment securities portfolio, including equity securities, was \$4.778 billion compared to \$4.006 billion at December 31, 2017, an increase of \$772.8 million, or 19%. Investment securities attributable to the Klein acquisition totaled \$700.6 million as of the closing date of the acquisition. Investment securities represented 28% of earning assets at December 31, 2018, compared to 26% at December 31, 2017. Stronger commercial loan demand in the future and management's decision to deleverage the balance sheet could result in a reduction in the securities portfolio. As of December 31, 2018, management does not intend to sell any securities in an unrealized loss position and does not believe we will be required to sell such securities.

The investment securities available-for-sale portfolio had net unrealized losses of \$49.2 million at December 31, 2018, compared to net unrealized losses of \$56.4 million at December 31, 2017. Net unrealized losses decreased from December 31, 2017 to December 31, 2018 reflecting higher net unrealized gains on state and political subdivision securities.

The investment portfolio had an effective duration of 4.00 at December 31, 2018, compared 4.15 at December 31, 2017. Effective duration measures the percentage change in value of the portfolio in response to a change in interest rates. Generally, there is more uncertainty in interest rates over a longer average maturity, resulting in a higher duration percentage. The weighted average yields on available-for-sale investment securities were 2.89% in 2018 and 2.43% in 2017. The average yields on the held-to-maturity portfolio were 3.75% in 2018 and 5.44% in 2017.

At December 31, 2018, Old National had a concentration of investment securities issued by certain states and their political subdivisions with the following aggregate market values: \$344.4 million by Indiana, which represented 12.8% of shareholders' equity, and \$176.0 million by Texas, which represented 6.5% of shareholders' equity. Of the Indiana municipal bonds, 99% are rated "A" or better, and the remaining 1% generally represent non-rated local interest bonds where Old National has a market presence. All of the Texas municipal bonds are rated "A" or better, and the majority of issues are backed by the "AAA" rated State of Texas Permanent School Fund Guarantee Program.

Loan Portfolio

We lend primarily to consumers and small to medium-sized commercial and commercial real estate clients in various industries including manufacturing, agribusiness, transportation, mining, wholesaling, and retailing. Our policy is to concentrate our lending activity in the geographic market areas we serve, primarily Indiana, Kentucky, Michigan, Wisconsin, and Minnesota.

The following table presents the composition of the loan portfolio at December 31.

(dollars in thousands)	2018	2017	2016	2015	2014	Four- Year Growth Rate	
Commercial	\$3,232,970	\$2,717,269	\$1,917,099	\$1,814,940	\$1,646,767	18.4	%
Commercial real estate	4,958,851	4,354,552	3,130,853	1,868,972	1,751,907	29.7	
Consumer	1,803,667	1,879,247	1,875,030	1,603,158	1,379,117	6.9	
Total loans excluding residential							
real estate	9,995,488	8,951,068	6,922,982	5,287,070	4,777,791	20.3	
Residential real estate	2,248,404	2,167,053	2,087,530	1,661,335	1,540,410	9.9	
Total loans	12,243,892	11,118,121	9,010,512	6,948,405	6,318,201	18.0	%
Less: Allowance for loan losses	55,461	50,381	49,808	52,233	47,849		
Net loans	\$12,188,431	\$11,067,740	\$8,960,704	\$6,896,172	\$6,270,352		

Commercial and Commercial Real Estate Loans

At December 31, 2018, commercial and commercial real estate loans were \$8.192 billion, an increase of \$1.120 billion, or 16%, compared to December 31, 2017. Commercial and commercial real estate loans attributable to the Klein acquisition totaled \$836.8 million as of the closing date of the acquisition. Excluding these acquired loans, commercial and commercial real estate loans grew 4% in 2018.

The following table presents the maturity distribution and rate sensitivity of commercial loans at December 31, 2018 and an analysis of these loans that have predetermined and floating interest rates.

(dollars in thousands)	Within 1 Year	1 - 5 Years	Beyond 5 Years	Total	% of Total	
Interest rates:						
Predetermined	\$183,669	\$866,138	\$619,329	\$1,669,136	52	%
Floating	771,332	506,598	285,904	1,563,834	48	
Total	\$955,001	\$1,372,736	\$905,233	\$3,232,970	100	%

Residential Real Estate Loans

Residential real estate loans, primarily 1-4 family properties, increased \$81.4 million, or 4%, at December 31, 2018 compared to December 31, 2017. Residential real estate loans attributable to the Klein acquisition totaled \$77.7 million as of the closing date of the acquisition. Future increases in interest rates could result in a decline in the level of refinancings and new originations of residential real estate loans.

Consumer Loans

Consumer loans, including automobile loans, personal and home equity loans and lines of credit, and student loans, decreased \$75.6 million at December 31, 2018 compared to December 31, 2017. Old National assumed student loans in the acquisition of Anchor (WI) in May 2016. Student loans are guaranteed by the government from 97% to 100% and totaled \$68.2 million at December 31, 2017. Old National sold the remaining student loan portfolio totaling \$64.9 million during the second quarter of 2018, resulting in a \$2.2 million gain that is included in other income on the income statement. Consumer loans attributable to the Klein acquisition totaled \$134.6 million as of the closing date of the acquisition. We continue to see runoff in our less profitable indirect consumer loan portfolio.

Allowance for Loan Losses

To provide for the risk of loss inherent in extending credit, we maintain an allowance for loan losses. The allowance for loan losses is maintained at a level believed adequate by management to absorb probable losses incurred in the consolidated loan portfolio. Management's evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, assessments of the impact of current and anticipated economic conditions on the portfolio, and historical loss experience. Additional information about our Allowance for Loan Losses is included in the "Risk Management – Credit Risk" section of Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Notes 1 and 5 to the consolidated financial statements.

At December 31, 2018, the allowance for loan losses was \$55.5 million, an increase of \$5.1 million compared to \$50.4 million at December 31, 2017. Continued loan growth in future periods, a decline in our current level of recoveries, or an increase in charge-offs could result in an increase in provision expense. As a percentage of total loans excluding loans held for sale, the allowance was 0.45% at December 31, 2018 and December 31, 2017. The Klein acquisition added \$1.049 billion of loans. In accordance with ASC 805, no allowance for loan losses is recorded at the date of acquisition and a reserve is only established to absorb any subsequent credit deterioration or adverse changes in expected cash flows. The provision for loan losses was an expense of \$7.0 million in 2018 compared to an expense of \$3.1 million in 2017.

For commercial loans, the allowance for loan losses increased by \$2.5 million at December 31, 2018 compared to December 31, 2017. The allowance for loan losses as a percentage of the commercial loan portfolio decreased to 0.67% at December 31, 2018, from 0.71% at December 31, 2017.

For commercial real estate loans, the allowance for loan losses increased by \$2.0 million at December 31, 2018 compared to December 31, 2017. The allowance for loan losses as a percentage of the commercial real estate loan portfolio decreased to 0.47% at December 31, 2018, from 0.49% at December 31, 2017.

The allowance for loan losses for residential real estate loans as a percentage of that portfolio increased to 0.10% at December 31, 2018, from 0.08% at December 31, 2017. The allowance for loan losses for consumer loans as a percentage of that portfolio increased to 0.44% at December 31, 2018, from 0.42% at December 31, 2017.

Allowance for Losses on Unfunded Commitments

We maintain an allowance for losses on unfunded commercial lending commitments and letters of credit to provide for the risk of loss inherent in these arrangements. The allowance is computed using a methodology similar to that used to determine the allowance for loan losses, modified to take into account the probability of a drawdown on the commitment. This allowance is classified as a liability on the balance sheet within accrued expenses and other liabilities, while the corresponding provision for these loan losses is recorded as a component of other expense. The allowance for losses on unfunded commitments was \$2.5 million at December 31, 2018, compared to \$3.1 million at December 31, 2017.

Loans Held for Sale

Mortgage loans held for immediate sale in the secondary market were \$14.9 million at December 31, 2018, compared to \$17.9 million at December 31, 2017. Certain mortgage loans are committed for sale at or prior to origination at a contracted price to an outside investor. Other mortgage loans held for immediate sale are hedged with TBA forward agreements and committed for sale when they are ready for delivery and remain on the Company's balance sheet for a short period of time (typically 30 to 60 days). These loans are sold without recourse, beyond customary representations and warranties, and Old National has not experienced material losses arising from these sales. Mortgage originations are subject to volatility due to interest rates and home sales, among other factors.

We have elected the fair value option under FASB ASC 825-10 prospectively for residential loans held for sale. The aggregate fair value exceeded the unpaid principal balance by \$0.5 million as of December 31, 2018 and December 31, 2017.

Goodwill and Other Intangible Assets

Goodwill and other intangible assets at December 31, 2018 totaled \$1.113 billion, an increase of \$232.1 million compared to \$881.1 million at December 31, 2017. During 2018, we recorded \$247.1 million of goodwill and other

intangible assets associated with the acquisition of Klein.

Net Deferred Tax Assets

Net deferred tax assets decreased \$23.8 million since December 31, 2017 primarily due to a decrease in alternative minimum tax credit deferred tax assets. Old National reclassified \$21.5 million from deferred tax assets related to alternative minimum tax credits to accrued income taxes in 2018 as a result of the enactment of the Tax Cuts and Jobs Act. Future changes in the corporate tax rate could result in a change in value of Old National's deferred tax assets and future income tax expense. See Note 16 to the consolidated financial statements for additional information.

Other Assets

Other assets increased \$23.6 million, or 15%, since December 31, 2017 primarily due to higher accrued income taxes. Old National reclassified \$21.5 million from deferred tax assets related to alternative minimum tax credits to accrued income taxes in 2018 as a result of the enactment of the Tax Cuts and Jobs Act. See Note 16 to the consolidated financial statements for additional information.

Funding

Total funding, comprised of deposits and wholesale borrowings, was \$16.844 billion at December 31, 2018, an increase of \$1.660 billion from \$15.184 billion at December 31, 2017. Total deposits were \$14.350 billion, including \$12.326 billion in transaction accounts and \$2.024 billion in time deposits at December 31, 2018. Total deposits increased \$1.744 billion, or 14%, compared to December 31, 2017. Deposits attributable to the Klein acquisition totaled \$1.713 billion as of the closing date of the acquisition. Noninterest-bearing demand deposits increased \$284.6 million from December 31, 2017 to December 31, 2018. Interest-bearing checking and NOW deposits increased \$672.5 million from December 31, 2017 to December 31, 2018, while savings deposits decreased \$91.5 million. Money market deposits increased \$488.8 million from December 31, 2017 to December 31, 2018, while time deposits increased \$389.8 million.

We use wholesale funding to augment deposit funding and to help maintain our desired interest rate risk position. At December 31, 2018, wholesale borrowings, including federal funds purchased and interbank borrowings, securities sold under agreements to repurchase, FHLB advances, and other borrowings, totaled \$2.494 billion, a decrease of \$84.4 million, or 3%, from December 31, 2017. The decrease in wholesale funding from December 31, 2017 to December 31, 2018 was primarily due to a decrease in federal funds purchased and interbank borrowings and securities sold under agreements to repurchase. Wholesale funding as a percentage of total funding was 15% at December 31, 2018, compared to 17% at December 31, 2017. See Notes 12, 13, and 14 to the consolidated financial statements for additional details on our financing activities.

The following table details the average balances of all funding sources for the years ended December 31.

(dollars in thousands)	2018	2017	2016	% Change From Prior Year	
				2018	2017
Demand deposits	\$3,657,234	\$3,111,672	\$2,776,140	17.5 %	12.1 %
Interest-bearing checking and NOW deposits	3,146,309	2,676,760	2,389,143	17.5	12.0
Savings deposits	2,995,484	2,964,875	2,595,622	1.0	14.2
Money market deposits	1,225,220	762,540	763,909	60.7	(0.2)
Time deposits	1,839,974	1,487,077	1,361,647	23.7	9.2
Total deposits	12,864,221	11,002,924	9,886,461	16.9	11.3
Federal funds purchased and interbank borrowings	238,408	187,426	137,997	27.2	35.8
Securities sold under agreements to repurchase	344,964	336,539	368,757	2.5	(8.7)
Federal Home Loan Bank advances	1,665,689	1,481,314	1,121,413	12.4	32.1
Other borrowings	249,832	224,793	222,708	11.1	0.9
Total funding sources	\$15,363,114	\$13,232,996	\$11,737,336	16.1 %	12.7 %

The following table presents a maturity distribution for certificates of deposit with denominations of \$100,000 or more at December 31.

(dollars in thousands)	Year-End Balance	Maturity Distribution			
		1-90 Days	91-180 Days	181-365 Days	Beyond 1 Year
2018	\$1,133,130	\$397,990	\$265,232	\$280,402	\$189,506
2017	727,496	265,872	109,584	171,877	180,163
2016	544,803	142,806	91,704	115,151	195,142

Accrued Expenses and Other Liabilities

Accrued expenses and other liabilities increased \$15.2 million, or 8%, from December 31, 2017 primarily due an increase in accrued expenses attributable to the Klein acquisition.

Capital

Shareholders' equity totaled \$2.690 billion, or 14% of total assets, at December 31, 2018 and \$2.154 billion, or 12% of total assets, at December 31, 2017. Shareholders' equity at December 31, 2018 included \$406.5 million from the 22.8 million shares of Common Stock that were issued in conjunction with the acquisition of Klein. We paid cash dividends of \$0.52 per share in 2018, which reduced equity by \$82.2 million. Old National's Common Stock is traded on the NASDAQ under the symbol "ONB" with 34,536 shareholders of record at December 31, 2018.

Capital Adequacy

Old National and the banking industry are subject to various regulatory capital requirements administered by the federal banking agencies. Management routinely analyzes Old National's capital to ensure an optimized capital structure. Accordingly, such evaluations may result in Old National taking a capital action. For additional information on capital adequacy see Note 25 to the consolidated financial statements.

RISK MANAGEMENT

Overview

Old National has adopted a Risk Appetite Statement to enable the Board of Directors, Executive Leadership Group, and Senior Management to better assess, understand, and mitigate the risks of Old National. The Risk Appetite Statement addresses the following major risks: strategic, market, liquidity, credit, operational/technology/cyber, regulatory/compliance/legal, reputational, and human resources. Our Chief Risk Officer is independent of management and reports directly to the Chair of the Board's Enterprise Risk Management Committee. The following discussion addresses these major risks: credit, market, liquidity, operational/technology/cyber, and regulatory/compliance/legal.

Credit Risk

Credit risk represents the risk of loss arising from an obligor's inability or failure to meet contractual payment or performance terms. Our primary credit risks result from our investment and lending activities.

Investment Activities

We carry a higher exposure to loss in our pooled trust preferred securities, which are collateralized debt obligations, due to illiquidity in that market and the performance of the underlying collateral. At December 31, 2018, we had pooled trust preferred securities with a fair value of \$8.5 million, or less than 1% of the available-for-sale securities portfolio. These securities remained classified as available-for-sale and at December 31, 2018, the unrealized loss on our pooled trust preferred securities was approximately \$5.4 million. The fair value of these securities should improve as we get closer to maturity, but not in all cases. During the first quarter of 2018, Old National sold a pooled trust security for proceeds of \$1.8 million, which resulted in a loss of \$0.9 million. There was no OTTI recorded in 2018 or 2017.

All of our mortgage-backed securities are backed by U.S. government-sponsored or federal agencies. Municipal bonds, corporate bonds, and other debt securities are evaluated by reviewing the credit-worthiness of the issuer and general market conditions. See Note 3 to the consolidated financial statements for additional details about our investment security portfolio.

Counterparty Exposure

Counterparty exposure is the risk that the other party in a financial transaction will not fulfill its obligation. We define counterparty exposure as nonperformance risk in transactions involving federal funds sold and purchased, repurchase agreements, correspondent bank relationships, and derivative contracts with companies in the financial services industry. Old National manages exposure to counterparty risk in connection with its derivatives transactions by generally engaging in transactions with counterparties having ratings of at least A by Standard & Poor's Rating Service or A2 by Moody's Investors Service. Total credit exposure is monitored by counterparty and managed within limits that management believes to be prudent. Old National's net counterparty exposure was an asset of \$396.4 million at December 31, 2018.

Lending Activities

Commercial

Commercial and industrial loans are made primarily for the purpose of financing equipment acquisition, expansion, working capital, and other general business purposes. Lease financing consists of direct financing leases and are used by commercial customers to finance capital purchases ranging from computer equipment to transportation equipment. The credit decisions for these transactions are based upon an assessment of the overall financial capacity of the applicant. A determination is made as to the applicant's ability to repay in accordance with the proposed terms as well as an overall assessment of the risks involved. In addition to an evaluation of the applicant's financial condition, a determination is made of the probable adequacy of the primary and secondary sources of repayment, such as additional collateral or personal guarantees, to be relied upon in the transaction. Credit agency reports of the applicant's credit history supplement the analysis of the applicant's creditworthiness.

Commercial mortgages and construction loans are offered to real estate investors, developers, and builders primarily domiciled in the geographic market areas we serve: Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. These loans are secured by first mortgages on real estate at LTV margins deemed appropriate for the property type, quality, location, and sponsorship. Generally, these LTV ratios do not exceed 80%. The commercial properties are predominantly non-residential properties such as retail centers, apartments, industrial properties and, to a lesser extent, more specialized properties. Substantially all of our commercial real estate loans are secured by properties located in our primary market area.

In the underwriting of our commercial real estate loans, we obtain appraisals for the underlying properties. Decisions to lend are based on the economic viability of the property and the creditworthiness of the borrower. In evaluating a proposed commercial real estate loan, we primarily emphasize the ratio of the property's projected net cash flows to the loan's debt service requirement. The debt service coverage ratio normally is not less than 120% and it is computed after deduction for a vacancy factor and property expenses as appropriate. In addition, a personal guarantee of the loan or a portion thereof is often required from the principal(s) of the borrower. In most cases, we require title insurance insuring the priority of our lien, fire, and extended coverage casualty insurance, and flood insurance, if appropriate, in order to protect our security interest in the underlying property. In addition, business interruption insurance or other insurance may be required.

Construction loans are underwritten against projected cash flows derived from rental income, business income from an owner-occupant, or the sale of the property to an end-user. We may mitigate the risks associated with these types of loans by requiring fixed-price construction contracts, performance and payment bonding, controlled disbursements, and pre-sale contracts or pre-lease agreements.

Consumer

We offer a variety of first mortgage and junior lien loans to consumers within our markets, with residential home mortgages comprising our largest consumer loan category. These loans are secured by a primary residence and are underwritten using traditional underwriting systems to assess the credit risks of the consumer. Decisions are primarily based on LTV ratios, DTI ratios, liquidity, and credit scores. A maximum LTV ratio of 80% is generally required, although higher levels are permitted with mortgage insurance or other mitigating factors. We offer fixed rate mortgages and variable rate mortgages with interest rates that are subject to change every year after the first, third, fifth, or seventh year, depending on the product and are based on fully-indexed rates such as LIBOR. We do not offer payment-option facilities, sub-prime loans, or any product with negative amortization.

Home equity loans are secured primarily by second mortgages on residential property of the borrower. The underwriting terms for the home equity product generally permits borrowing availability, in the aggregate, up to 90% of the appraised value of the collateral property at the time of origination. We offer fixed and variable rate home equity loans, with variable rate loans underwritten at fully-indexed rates. Decisions are primarily based on LTV ratios, DTI ratios, and credit scores. We do not offer home equity loan products with reduced documentation.

Automobile loans include loans and leases secured by new or used automobiles. We originate automobile loans and leases primarily on an indirect basis through selected dealerships. We require borrowers to maintain collision insurance on automobiles securing consumer loans, with us listed as loss payee. Our procedures for underwriting automobile loans include an assessment of an applicant's overall financial capacity, including credit history and the ability to meet existing obligations and payments on the proposed loan. Although an applicant's creditworthiness is

the primary consideration, the underwriting process also includes a comparison of the value of the collateral security to the proposed loan amount.

Old National assumed student loans in the acquisition of Anchor (WI) in May 2016. Student loans are guaranteed by the government from 97% to 100% and totaled \$68.2 million at December 31, 2017. Old National sold the remaining student loan portfolio totaling \$64.9 million during the second quarter of 2018, resulting in a \$2.2 million gain that is included in other income on the income statement.

Asset Quality

Community-based lending personnel, along with region-based independent underwriting and analytic support staff, extend credit under guidelines established and administered by our Enterprise Risk Committee. This committee, which meets quarterly, is made up of outside directors. The committee monitors credit quality through its review of information such as delinquencies, credit exposures, peer comparisons, problem loans, and charge-offs. In addition, the committee reviews and approves recommended loan policy changes to assure it remains appropriate for the current lending environment.

We lend to commercial and commercial real estate clients in various industries including manufacturing, agribusiness, transportation, mining, wholesaling, and retailing. Old National manages concentrations of credit exposure by industry, product, geography, customer relationship, and loan size. At December 31, 2018, our average commercial loan size was under \$400,000 and our average commercial real estate loan size was under \$600,000. In addition, while loans to lessors of both residential and non-residential real estate exceed 10% of total loans, no individual sub-segment category within those broader categories reaches the 10% threshold. At December 31, 2018, we had minimal exposure to foreign borrowers and no sovereign debt. Our policy is to concentrate our lending activity in the geographic market areas we serve, primarily Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. We are experiencing a slow and gradual improvement in the economy of our principal markets. Management expects that trends in under-performing, criticized, and classified loans will be influenced by the degree to which the economy strengthens or weakens.

On November 1, 2018, Old National closed on its acquisition of Klein. As of the closing date of the acquisition, loans totaled \$1.049 billion and other real estate owned totaled \$1.0 million. In accordance with accounting for business combinations, there was no allowance brought forward on any of the acquired loans, as the credit losses evident in the loans were included in the determination of the fair value of the loans at the acquisition date. Old National reviewed the acquired loans and determined that as of December 31, 2018, \$46.3 million met the definition of criticized and \$56.6 million were considered classified (of which \$14.6 million are reported with nonaccrual loans). Our current preference would be to work these loans and avoid foreclosure actions unless additional credit deterioration becomes apparent. These acquired impaired loans are included in our summary of under-performing, criticized, and classified assets found below.

Summary of under-performing, criticized, and classified assets at December 31:

(dollars in thousands)	2018	2017	2016	2015	2014	
Nonaccrual loans:						
Commercial	\$38,648	\$27,202	\$56,585	\$57,536	\$38,460	
Commercial real estate	86,601	62,425	44,026	47,350	67,402	
Residential real estate	24,954	22,171	17,674	14,953	13,968	
Consumer	7,281	13,129	13,122	5,198	5,903	
Covered loans (1)	—	—	—	7,336	15,124	
Total nonaccrual loans (2)	157,484	124,927	131,407	132,373	140,857	
Renegotiated loans not on nonaccrual:						
Noncovered loans	17,356	19,589	14,376	14,147	12,710	
Covered loans (1)	—	—	—	138	148	
Past due loans (90 days or more and still accruing):						
Commercial	52	144	23	565	33	
Commercial real estate	40	—	—	—	138	
Residential real estate	258	—	2	114	1	
Consumer	1,003	750	303	227	286	
Covered loans (1)	—	—	—	10	—	
Total past due loans	1,353	894	328	916	458	
Other real estate owned	3,232	8,810	18,546	7,594	7,241	
Other real estate owned, covered (1)	—	—	—	4,904	9,121	
Total under-performing assets	\$179,425	\$154,220	\$164,657	\$160,072	\$170,535	
Classified loans (includes nonaccrual, renegotiated, past due 90 days, and other problem loans)	\$334,785	\$226,583	\$220,429	\$204,710	\$233,486	
Classified loans, covered (1)	—	—	—	8,584	17,413	
Other classified assets (3)	2,820	4,556	7,063	6,857	14,752	
Criticized loans	238,752	188,085	95,462	132,898	194,809	
Criticized loans, covered (1)	—	—	—	1,449	4,525	
Total criticized and classified assets	\$576,357	\$419,224	\$322,954	\$354,498	\$464,985	
Asset Quality Ratios including covered assets:						
Non-performing loans/total loans (4) (5)	1.43	% 1.30	% 1.62	% 2.11	% 2.43	%
Under-performing assets/total loans and other real estate owned (4)	1.47	1.39	1.82	2.30	2.69	
Under-performing assets/total assets	0.91	0.88	1.11	1.33	1.46	
Allowance for loan losses/under-performing assets (6)	30.91	32.67	30.25	32.63	28.06	
Allowance for loan losses/nonaccrual loans (2)	35.22	40.33	37.90	39.46	33.97	

(1) Old National entered into separate loss sharing agreements with the FDIC providing for specified credit loss protection for substantially all acquired single family residential loans, commercial loans, and other real estate owned. On June 22, 2016, Old National entered into an early termination agreement with the FDIC that terminated all loss share agreements. Old National reclassified all covered assets to noncovered assets effective June 22, 2016.

- (2) Includes approximately \$20.5 million, \$12.6 million, \$16.7 million, \$15.9 million, and \$41.2 million for 2018, 2017, 2016, 2015, and 2014, respectively, of purchased credit impaired loans that are categorized as nonaccrual for credit analysis purposes because the collection of principal or interest is doubtful. However, these loans are accounted for under FASB ASC 310-30 and accordingly treated as performing assets.
- (3) Includes 1 pooled trust preferred securities and 1 insurance policy at December 31, 2018.
- (4) Loans exclude loans held for sale.
- (5) Non-performing loans include nonaccrual and renegotiated loans.
- (6) Because the acquired loans were recorded at fair value in accordance with ASC 805 at the date of acquisition, the credit risk is incorporated in the fair value recorded. No allowance for loan losses is recorded on the acquisition date.

Under-performing assets totaled \$179.4 million at December 31, 2018, compared to \$154.2 million at December 31, 2017. Under-performing assets as a percentage of total loans and other real estate owned at December 31, 2018 were 1.47%, an 8 basis point increase from 1.39% at December 31, 2017.

Nonaccrual loans increased \$32.6 million from December 31, 2017 to December 31, 2018 primarily due to an increase in nonaccrual commercial and commercial real estate loans. Nonaccrual loans at December 31, 2018 include \$14.6 million of loans related to the Klein acquisition. As a percentage of nonaccrual loans, the allowance for loan losses was 35.22% at December 31, 2018, compared to 40.33% at December 31, 2017. PCI loans that were included in the nonaccrual category because the collection of principal or interest is doubtful totaled \$20.5 million at December 31, 2018, compared to \$12.6 million at December 31, 2017. However, they are accounted for under FASB ASC 310-30 and accordingly treated as performing assets.

Interest income of approximately \$5.6 million and \$6.7 million would have been recorded on nonaccrual and renegotiated loans outstanding at December 31, 2018 and 2017, respectively, if such loans had been accruing interest throughout the year in accordance with their original terms. Excluding PCI loans accounted for under ASC 310-30, the amount of interest income actually recorded on nonaccrual and renegotiated loans was \$2.8 million in 2018 and \$1.6 million in 2017. We had \$26.3 million of renegotiated loans which are included in nonaccrual loans at December 31, 2018, compared to \$34.0 million at December 31, 2017.

Total criticized and classified assets were \$576.4 million at December 31, 2018, an increase of \$157.1 million from December 31, 2017. Other classified assets include investment securities that fell below investment grade rating totaling \$2.8 million at December 31, 2018, compared to \$4.6 million at December 31, 2017.

Old National may choose to restructure the contractual terms of certain loans. The decision to restructure a loan, versus aggressively enforcing the collection of the loan, may benefit Old National by increasing the ultimate probability of collection.

Any loans that are modified are reviewed by Old National to identify if a TDR has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, Old National Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status. The modification of the terms of such loans include one or a combination of the following: a reduction of the stated interest rate of the loan, an extension of the maturity date at a stated rate of interest lower than the current market rate of new debt with similar risk, or a permanent reduction of the recorded investment of the loan.

Loans modified in a TDR are typically placed on nonaccrual status until we determine the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrate a period of performance according to the restructured terms for six months.

If we are unable to resolve a nonperforming loan issue, the credit will be charged off when it is apparent there will be a loss. For large commercial type loans, each relationship is individually analyzed for evidence of apparent loss based on quantitative benchmarks or subjectively based upon certain events or particular circumstances. Generally, Old National charges off small commercial loans scored through our small business credit center with contractual balances under \$250,000 that are 90 days or more delinquent and do not have adequate collateral support. For residential and consumer loans, a charge off is recorded at the time foreclosure is initiated or when the loan becomes 120 to 180 days past due, whichever is earlier.

For commercial TDRs, an allocated reserve is established within the allowance for loan losses for the difference between the carrying value of the loan and its computed value. To determine the value of the loan, one of the following methods is selected: (1) the present value of expected cash flows discounted at the loan's original effective interest rate, (2) the loan's observable market price, or (3) the fair value of the collateral value, if the loan is collateral dependent. The allocated reserve is established as the difference between the carrying value of the loan and the collectable value. If there are significant changes in the amount or timing of the loan's expected future cash flows, impairment is recalculated and the valuation allowance is adjusted accordingly.

When a residential or consumer loan is identified as a TDR, the loan is typically written down to its collateral value less selling costs.

At December 31, 2018, our TDRs consisted of \$10.3 million of commercial loans, \$27.6 million of commercial real estate loans, \$3.4 million of residential loans, and \$2.4 million of consumer loans totaling \$43.7 million. Approximately \$26.3 million of the TDRs at December 31, 2018 were included with nonaccrual loans. At

December 31, 2017, our TDRs consisted of \$12.1 million of commercial loans, \$34.7 million of commercial real estate loans, \$3.3 million of residential loans, and \$3.9 million of consumer loans totaling \$54.0 million. Approximately \$34.0 million of the TDRs at December 31, 2017 were included with nonaccrual loans.

Old National has allocated specific reserves to customers whose loan terms have been modified in TDRs totaling \$3.0 million at December 31, 2018 and \$5.7 million at December 31, 2017. As of December 31, 2018, Old National had committed to lend an additional \$4.4 million to customers with outstanding loans that are classified as TDRs.

The terms of certain other loans were modified during 2018 that did not meet the definition of a TDR. It is our process to review all classified and criticized loans that, during the period, have been renewed, have entered into a

forbearance agreement, have gone from principal and interest to interest only, or have extended the maturity date. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on its debt in the foreseeable future without the modification. The evaluation is performed under our internal underwriting policy. We also evaluate whether a concession has been granted or if we were adequately compensated through a market interest rate, additional collateral, or a bona fide guarantee. We also consider whether the modification was insignificant relative to the other terms of the agreement or the delay in a payment.

PCI loans are not considered impaired until after the point at which there has been a degradation of cash flows below our expected cash flows at acquisition. If a PCI loan is subsequently modified, and meets the definition of a TDR, it will be removed from PCI accounting and accounted for as a TDR only if the PCI loan was being accounted for individually. If the PCI loan is being accounted for as part of a pool, it will not be removed from the pool. At December 31, 2018, it has not been necessary to remove any loans from PCI accounting.

In general, once a modified loan is considered a TDR, the loan will always be considered a TDR, and therefore impaired, until it is paid in full, otherwise settled, sold, or charged off. However, guidance also permits for loans to be removed from TDR status when subsequently restructured under these circumstances: (1) at the time of the subsequent restructuring, the borrower is not experiencing financial difficulties, and this is documented by a current credit evaluation at the time of the restructuring, (2) under the terms of the subsequent restructuring agreement, the institution has granted no concession to the borrower; and (3) the subsequent restructuring agreement includes market terms that are no less favorable than those that would be offered for a comparable new loan. For loans subsequently restructured that have cumulative principal forgiveness, the loan should continue to be measured in accordance with ASC 310-10, Receivables – Overall. However, consistent with ASC 310-40-50-2, Troubled Debt Restructurings by Creditors, Creditor Disclosure of Troubled Debt Restructurings, the loan would not be required to be reported in the years following the restructuring if the subsequent restructuring meets both of these criteria: (1) has an interest rate at the time of the subsequent restructuring that is not less than a market interest rate; and (2) is performing in compliance with its modified terms after the subsequent restructuring.

To provide for the risk of loss inherent in extending credit, we maintain an allowance for loan losses. The allowance for loan losses is maintained at a level believed adequate by management to absorb probable losses incurred in the consolidated loan portfolio. Management's evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, assessments of the impact of current and anticipated economic conditions on the portfolio, and historical loss experience.

The activity in our allowance for loan losses was as follows:

(dollars in thousands)	2018	2017	2016	2015	2014
Balance at beginning of period	\$50,381	\$49,808	\$52,233	\$47,849	\$47,145
Loans charged-off:					
Commercial	3,087	1,108	5,047	3,513	3,535
Commercial real estate	879	3,700	2,632	1,921	3,647
Residential real estate	1,100	985	800	1,039	793
Consumer credit	7,903	6,924	6,131	6,404	4,675
Total charge-offs	12,969	12,717	14,610	12,877	12,650
Recoveries on charged-off loans:					
Commercial	1,519	2,281	3,102	5,218	3,125
Commercial real estate	2,740	3,777	4,763	4,685	3,871

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-K

Residential real estate	2,118	255	174	354	205	
Consumer credit	4,706	3,927	3,186	4,081	3,056	
Total recoveries	11,083	10,240	11,225	14,338	10,257	
Net charge-offs (recoveries)	1,886	2,477	3,385	(1,461)	2,393	
Provision for loan losses	6,966	3,050	960	2,923	3,097	
Balance at end of period	\$55,461	\$50,381	\$49,808	\$52,233	\$47,849	
Average loans for the year (1)	\$11,422,967	\$9,525,888	\$8,265,169	\$6,756,135	\$5,703,294	
Asset Quality Ratios:						
Allowance/year-end loans (1)	0.45	% 0.45	% 0.55	% 0.75	% 0.76	%
Allowance/average loans (1)	0.49	0.53	0.60	0.77	0.84	
Net charge-offs (recoveries)/average loans (2)	0.02	0.03	0.04	(0.02)	0.04	

(1) Loans exclude loans held for sale.

(2) Net charge-offs include write-downs on loans transferred to held for sale.

The allowance for loan losses increased \$5.1 million from December 31, 2017 to December 31, 2018. Net charge-offs totaled \$1.9 million in 2018 compared to net charge-offs of \$2.5 million in 2017. There were no industry segments representing a significant share of total net charge-offs. Net charge-offs (recoveries) to average loans was 0.02% in 2018 compared to 0.03% in 2017. Over the last twelve months, net charge-offs have remained low. Continued loan growth in future periods, a decline in our current level of recoveries, or an increase in charge-offs could result in an increase in provision expense.

As a percentage of total loans, the allowance ranged from 0.45% to 0.76% for the last five years, and was 0.45% at December 31, 2018. Our ratio of allowance for loan losses to total loans remained the same as of December 31, 2018 compared to December 31, 2017. The addition of Klein added \$1.049 billion to the loan portfolio. In accordance with ASC 805, no allowance for loan losses is recorded at the date of acquisition and a reserve is only established to absorb any subsequent credit deterioration or adverse changes in expected cash flows.

The following table provides additional details of the components of the allowance for loan losses, including ASC 450, *Contingencies*, for loans collectively evaluated for impairment, ASC 310-10, *Receivables*, for loans individually evaluated for impairment, and ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, for loans acquired with deteriorated credit quality:

(dollars in thousands)	Collectively Evaluated for Impairment	Individually Evaluated for Impairment	Acquired with Deteriorated Credit Quality	Total
Originated loans	\$8,805,227	\$ 87,219	\$ —	\$8,892,446
Acquired loans	3,369,245	35,013	68,452	3,472,710
Total loans	\$12,174,472	\$ 122,232	\$ 68,452	\$12,365,156
Remaining purchase discount	(93,487)	(3,718)	(24,059)	(121,264)
Loans, net of discount	\$12,080,985	\$ 118,514	\$ 44,393	\$12,243,892
Allowance, January 1, 2018	\$40,137	\$ 10,078	\$ 166	\$50,381
Charge-offs	(8,979)	(3,927)	(63)	(12,969)
Recoveries	6,736	4,045	302	11,083
Provision expense	2,748	4,145	73	6,966
Allowance, December 31, 2018	\$40,642	\$ 14,341	\$ 478	\$55,461

We maintain an allowance for losses on unfunded commercial lending commitments and letters of credit to provide for the risk of loss inherent in these arrangements. The allowance is computed using a methodology similar to that used to determine the allowance for loan losses, modified to take into account the probability of a drawdown on the commitment. The reserve for unfunded loan commitments is classified as a liability account on the balance sheet and totaled \$2.5 million at December 31, 2018, compared to \$3.1 million at December 31, 2017.

The following table details the allowance for loan losses by loan category and the percent of loans in each category compared to total loans at December 31.

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-K

Market Risk

Market risk is the risk that the estimated fair value of our assets, liabilities, and derivative financial instruments will decline as a result of changes in interest rates or financial market volatility, or that our net income will be significantly reduced by interest rate changes.

The objective of our interest rate management process is to maximize net interest income while operating within acceptable limits established for interest rate risk and maintaining adequate levels of funding and liquidity.

Potential cash flows, sales, or replacement value of many of our assets and liabilities, especially those that earn or pay interest, are sensitive to changes in the general level of interest rates. This interest rate risk arises primarily from our normal business activities of gathering deposits and extending loans. Many factors affect our exposure to changes in interest rates, such as general economic and financial conditions, customer preferences, historical pricing relationships, and re-pricing characteristics of financial instruments. Our earnings can also be affected by the monetary and fiscal policies of the U.S. Government and its agencies, particularly the Federal Reserve.

In managing interest rate risk, we, through the Funds Management Committee, a committee of the Board of Directors, establish guidelines, for asset and liability management, including measurement of short and long-term sensitivities to changes in interest rates. Based on the results of our analysis, we may use different techniques to manage changing trends in interest rates including:

- adjusting balance sheet mix or altering interest rate characteristics of assets and liabilities;
- changing product pricing strategies;
- modifying characteristics of the investment securities portfolio; or
- using derivative financial instruments, to a limited degree.

A key element in our ongoing process is to measure and monitor interest rate risk using a model to quantify the impact of changing interest rates on Old National. The model quantifies the effects of various possible interest rate scenarios on projected net interest income. The model measures the impact on net interest income relative to a base case scenario. The base case scenario assumes that the balance sheet and interest rates are held at current levels. The model shows our projected net interest income sensitivity based on interest rate changes only and does not consider other forecast assumptions.

The following table illustrates our projected net interest income sensitivity over a two-year cumulative horizon based on the asset/liability model as of December 31, 2018 and 2017:

(dollars in thousands)	Immediate Rate Decrease -50		Immediate Rate Increase		
	Basis Points	Base	+100 Basis Points	+200 Basis Points	+300 Basis Points
December 31, 2018					
Projected interest income:

Net interest income	\$ 964,328	\$986,775	\$ 1,003,037	\$ 1,016,953	\$ 1,031,347
Change from base	\$ (22,447)		\$ 16,262	\$ 30,178	\$ 44,572
% change from base	-2.27 %		1.65 %	3.06 %	4.52 %

Our asset sensitivity decreased year over year primarily due to changes in our balance sheet mix, investment duration, and prepayment speed behavior.

A key element in the measurement and modeling of interest rate risk is the re-pricing assumptions of our transaction deposit accounts, which have no contractual maturity dates. We assume this deposit base is comprised of both core and more volatile balances and consists of both noninterest-bearing and interest-bearing accounts. Core deposit balances are assumed to be less interest rate sensitive and provide longer term funding. Volatile balances are assumed to be more interest rate sensitive and shorter in term. As part of our semi-static balance sheet modeling, we assume interest rates paid on the volatile deposits move in conjunction with changes in interest rates, in order to retain these

deposits. This may include current noninterest-bearing accounts.

Because the models are driven by expected behavior in various interest rate scenarios and many factors besides market interest rates affect our net interest income, we recognize that model outputs are not guarantees of actual results. For this reason, we model many different combinations of interest rates and balance sheet assumptions to understand our overall sensitivity to market interest rate changes, including shocks, yield curve flattening, yield curve steepening, as well as forecasts of likely interest rate scenarios. At December 31, 2018, our projected net interest income sensitivity based on the asset/liability models we utilize was within the limits of our interest rate risk policy for the scenarios tested.

We use derivative instruments, primarily interest rate swaps, to mitigate interest rate risk, including certain cash flow hedges on variable-rate debt with a notional amount of \$725 million at December 31, 2018. Our derivatives had an estimated fair value gain of \$16.5 million at December 31, 2018, compared to an estimated fair value loss of

\$2.2 million at December 31, 2017. See Note 21 to the consolidated financial statements for further discussion of derivative financial instruments.

Liquidity Risk

Liquidity risk arises from the possibility that we may not be able to satisfy current or future financial commitments, or may become unduly reliant on alternative funding sources. The Funds Management Committee of the Board of Directors establishes liquidity risk guidelines and, along with the Balance Sheet Management Committee, monitors liquidity risk. The objective of liquidity management is to ensure we have the ability to fund balance sheet growth and meet deposit and debt obligations in a timely and cost-effective manner. Management monitors liquidity through a regular review of asset and liability maturities, funding sources, and loan and deposit forecasts. We maintain strategic and contingency liquidity plans to ensure sufficient available funding to satisfy requirements for balance sheet growth, properly manage capital markets' funding sources and to address unexpected liquidity requirements.

Loan repayments and maturing investment securities are a relatively predictable source of funds. However, deposit flows, calls of investment securities and prepayments of loans and mortgage-related securities are strongly influenced by interest rates, the housing market, general and local economic conditions, and competition in the marketplace. We continually monitor marketplace trends to identify patterns that might improve the predictability of the timing of deposit flows or asset prepayments.

A time deposit maturity schedule for Old National Bank is shown in the following table at December 31, 2018.

(dollars in thousands)

Maturity Bucket	Amount	Rate
2019	\$1,505,694	1.68 %
2020	277,142	1.45
2021	109,890	1.43
2022	52,697	1.47
2023	54,637	1.73
2024 and beyond	24,196	1.79
Total	\$2,024,256	1.64 %

Our ability to acquire funding at competitive prices is influenced by rating agencies' views of our credit quality, liquidity, capital, and earnings. Moody's Investor Service places us in an investment grade that indicates a low risk of default. For both Old National and Old National Bank:

• Moody's Investor Service affirmed the Long-Term Rating of A3 of Old National's senior unsecured/issuer rating on February 2, 2018.

• Moody's Investor Service affirmed Old National Bank's long-term deposit rating of Aa3 on February 2, 2018. The bank's short-term deposit rating was affirmed at P-1 and the bank's issuer rating was affirmed at A3. The rating outlook from Moody's Investor Service is negative. Moody's Investor Service concluded a rating review of Old National Bank on February 2, 2018.

The credit ratings of Old National and Old National Bank at December 31, 2018 are shown in the following table.

Moody's Investor
Service

Long-term Short-term

Old National A3 N/A

Old National Bank Aa3 P-1

Old National Bank maintains relationships in capital markets with brokers and dealers to issue certificates of deposit and short-term and medium-term bank notes as well. At December 31, 2018, Old National and its subsidiaries had the following availability of liquid funds and borrowings:

(dollars in thousands)	Parent Company	Subsidiaries
Available liquid funds:		
Cash and due from banks	\$ 94,122	\$ 223,043
Unencumbered government-issued debt securities	—	1,551,735
Unencumbered investment grade municipal securities	—	532,240
Unencumbered corporate securities	—	137,539
Availability of borrowings:		
Amount available from Federal Reserve discount window*	—	477,108
Amount available from Federal Home Loan Bank Indianapolis*	—	660,052
Total available funds	\$ 94,122	\$ 3,581,717

* Based on collateral pledged

Old National Bancorp has routine funding requirements consisting primarily of operating expenses, dividends to shareholders, debt service, net derivative cash flows, and funds used for acquisitions. Old National Bancorp can obtain funding to meet its obligations from dividends and management fees collected from its subsidiaries, operating line of credit, and through the issuance of debt securities. Additionally, Old National Bancorp has a shelf registration in place with the SEC permitting ready access to the public debt and equity markets. At December 31, 2018, Old National Bancorp's other borrowings outstanding were \$231.4 million.

Federal banking laws regulate the amount of dividends that may be paid by banking subsidiaries without prior approval. Prior regulatory approval is required if dividends to be declared in any year would exceed net earnings of the current year plus retained net profits for the preceding two years. Prior regulatory approval to pay dividends was not required in 2017 or 2018 and is not currently required.

Operational/Technology/Cyber Risk

Operational/technology/cyber risk is the potential that inadequate information systems, operational problems, breaches in internal controls, information security breaches, fraud, or unforeseen catastrophes will result in unexpected losses. We maintain frameworks, programs, and internal controls to prevent or minimize financial loss from failure of systems, people, or processes. This includes specific programs and frameworks intended to prevent or limit the effects of cyber risks including cyber-attacks or other information security breaches that might allow unauthorized transactions or unauthorized access to customer, associate, or company sensitive information. Metrics and measurements are used by Executive Leaders in the management of day-to-day operations to ensure effective customer service, minimization of service disruptions, and oversight of operational and cyber risk. We continually monitor and report on operational, technology, and cyber risks related to clients, products, and business practices; external and internal fraud; business disruptions and systems failures; cyber-attacks, information security or data breaches; damage to physical assets; and execution, delivery, and process management.

The Enterprise Risk Management Committee of the Board of Directors is responsible for the oversight, guidance, and monitoring of risks, including operational/technology/cyber risks, being taken by the Company. The monitoring is

accomplished through on-going review of management reports, data on risks, policy limits and discussion on enterprise risk management strategies, policies, and risk assessments.

Regulatory/Compliance/Legal Risk

Regulatory/compliance/legal risk is the risk that the Company violated or was not in compliance with applicable laws, regulations or practices, industry standards, or ethical standards. The legal portion assesses the risk that unenforceable contracts, lawsuits, or adverse judgments can disrupt or otherwise negatively impact the Company. The Board of Directors expects we will perform business in a manner compliant with applicable laws and/or regulations and expects issues to be identified, analyzed, and remediated in a timely and complete manner.

OFF-BALANCE SHEET ARRANGEMENTS

Off-balance sheet arrangements include commitments to extend credit and financial guarantees. Commitments to extend credit and financial guarantees are used to meet the financial needs of our customers. Our banking affiliates have entered into various agreements to extend credit, including loan commitments of \$3.566 billion and standby letters of credit of \$319.0 million at December 31, 2018. At December 31, 2018, approximately \$3.348 billion of the loan commitments had fixed rates and \$218.1 million had floating rates, with the floating interest rates ranging from 1% to 16%. At December 31, 2017, loan commitments were \$3.144 billion and standby letters of credit of \$68.7 million. The term of these off-balance sheet arrangements is typically one year or less.

Old National is a party in risk participation transactions of interest rate swaps, which had total notional amount of \$38.7 million at December 31, 2018.

CONTRACTUAL OBLIGATIONS, COMMITMENTS, AND CONTINGENT LIABILITIES

The following table presents our significant fixed and determinable contractual obligations and significant commitments at December 31, 2018. Further discussion of each obligation or commitment is included in the referenced note to the consolidated financial statements.

(dollars in thousands)	Note Reference	Payments Due In				Total
		One Year or Less	One to Three Years	Three to Five Years	Over Five Years	
Deposits without stated maturity IRAs, consumer, and brokered		\$12,325,693	\$ —	\$ —	\$ —	\$12,325,693
certificates of deposit	11	1,505,694	387,032	107,334	24,196	2,024,256
Federal funds purchased and interbank borrowings		270,135	—	—	—	270,135
Securities sold under agreements to repurchase	12	362,294	—	—	—	362,294
Federal Home Loan Bank advances	13	326,474	120,000	57,169	1,109,838	1,613,481
Other borrowings	14	137	307	368	247,071	247,883
Fixed interest payments (1)		44,894	82,780	78,248	122,218	328,140
Operating leases	7	19,480	35,816	24,866	65,612	145,774
Other long-term liabilities (2)		32,593	5,879	28	48	38,548

(1) Our senior notes, subordinated notes, certain trust preferred securities, and certain FHLB advances have fixed rates ranging from 1.50% to 6.08%. All of our other long-term debt is at LIBOR based variable rates at December 31, 2018. The projected variable interest assumes no increase in LIBOR rates from December 31, 2018.

(2) Includes unfunded commitments on qualified affordable housing projects and other tax credit investments.

We rent certain premises and equipment under operating leases. See Note 7 to the consolidated financial statements for additional information on long-term lease arrangements.

We are party to various derivative contracts as a means to manage the balance sheet and our related exposure to changes in interest rates, to manage our residential real estate loan origination and sale activity, and to provide derivative contracts to our clients. Since the derivative liabilities recorded on the balance sheet change frequently and do not represent the amounts that may ultimately be paid under these contracts, these liabilities are not included in the table of contractual obligations presented above. Further discussion of derivative instruments is included in Note 21 to the consolidated financial statements.

In the normal course of business, various legal actions and proceedings are pending against us and our affiliates which are incidental to the business in which they are engaged. Further discussion of contingent liabilities is included in Note 22 to the consolidated financial statements.

In addition, liabilities recorded under FASB ASC 740-10 (FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109*) are not included in the table because the amount and timing of any cash payments cannot be reasonably estimated. Further discussion of income taxes and liabilities recorded under FASB ASC 740-10 is included in Note 16 to the consolidated financial statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our accounting policies are described in Note 1 to the consolidated financial statements. Certain accounting policies require management to use significant judgment and estimates, which can have a material impact on the carrying value of certain assets and liabilities. We consider these policies to be critical accounting policies. The judgment and assumptions made are based upon historical experience or other factors that management believes to be reasonable under the circumstances. Because of the nature of the judgment and assumptions, actual results could differ from estimates, which could have a material effect on our financial condition and results of operations.

The following accounting policies materially affect our reported earnings and financial condition and require significant judgments and estimates. Management has reviewed these critical accounting estimates and related disclosures with our Audit Committee.

Goodwill

Description. For acquisitions, we are required to record the assets acquired, including identified intangible assets, and the liabilities assumed at their fair value. These often involve estimates based on third party valuations, such as appraisals, or internal valuations based on discounted cash flow analyses or other valuation techniques that may include estimates of attrition, inflation, asset growth rates, or other relevant factors. Under FASB ASC 350, *Intangibles – Goodwill and Other*, goodwill recorded must be reviewed for impairment on an annual basis, as well as on an interim basis if events or changes indicate that the asset might be impaired. An impairment loss must be recognized for any excess of carrying value over fair value of the goodwill.

Judgments and Uncertainties. The determination of fair values is based on valuations using management's assumptions of future growth rates, future attrition, discount rates, multiples of earnings or other relevant factors.

Effect if Actual Results Differ From Assumptions. Changes in these factors, as well as downturns in economic or business conditions, could have a significant adverse impact on the carrying value of goodwill and could result in impairment losses affecting our financials as a whole and our banking subsidiary in which the goodwill resides.

Allowance for Loan Losses

Description. The allowance for loan losses is maintained at a level believed adequate by management to absorb probable incurred losses in the consolidated loan portfolio. Management's evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, assessments of the impact of current and anticipated economic conditions on the portfolio, and historical loss experience. The allowance represents management's best estimate, but significant downturns in circumstances relating to loan quality and economic conditions could result in a requirement for additional allowance. Likewise, an upturn in loan quality and improved economic conditions may allow a reduction in the required allowance. In either instance, unanticipated changes could have a significant impact on results of operations.

The allowance is increased through a provision charged to operating expense. Uncollectible loans are charged-off through the allowance. Recoveries of loans previously charged-off are added to the allowance. A loan is considered impaired when it is probable that contractual interest and principal payments will not be collected either for the amounts or by the dates as scheduled in the loan agreement. Our policy for recognizing income on impaired loans is to accrue interest unless a loan is placed on nonaccrual status. A loan is generally placed on nonaccrual status when principal or interest becomes 90 days past due unless it is well secured and in the process of collection, or earlier when concern exists as to the ultimate collectibility of principal or interest. We monitor the quality of our loan portfolio on

an on-going basis and use a combination of detailed credit assessments by relationship managers and credit officers, historic loss trends, and economic and business environment factors in determining the allowance for loan losses. We

58

record provisions for loan losses based on current loans outstanding, grade changes, mix of loans, and expected losses. A detailed loan loss evaluation on an individual loan basis for our highest risk loans is performed quarterly. Management follows the progress of the economy and how it might affect our borrowers in both the near and the intermediate term. We have a formalized and disciplined independent loan review program to evaluate loan administration, credit quality, and compliance with corporate loan standards. This program includes periodic, regular reviews of problem loan reports, delinquencies and charge-offs.

Judgments and Uncertainties. We utilize a PD/LGD model as a tool to determine the adequacy of the allowance for loan losses for performing commercial and commercial real estate loans. The PD is forecast using a transition matrix to determine the likelihood of a customer's AQR migrating from its current AQR to any other status within the time horizon. Transition rates are measured using Old National's own historical experience. The model assumes that recent historical transition rates will continue into the future. The LGD is defined as credit loss incurred when an obligor of the bank defaults. The sum of all net charge-offs for a particular portfolio segment are divided by all loans that have defaulted over a given period of time. The expected loss derived from the model considers the PD, LGD, and exposure at default. Additionally, qualitative factors, such as changes in lending policies or procedures, and economic business conditions are also considered.

We use historic loss ratios adjusted for economic conditions to determine the appropriate level of allowance for residential real estate and consumer loans.

Effect if Actual Results Differ From Assumptions. The allowance represents management's best estimate, but significant downturns in circumstances relating to loan quality and economic conditions could result in a requirement for additional allowance. Likewise, an upturn in loan quality and improved economic conditions may allow a reduction in the required allowance. In either instance, unanticipated changes could have a significant impact on results of operations.

Management's analysis of probable losses in the portfolio at December 31, 2018 resulted in a range for allowance for loan losses of \$16.2 million. The range pertains to general (FASB ASC 450, *Contingencies*) reserves for both retail and performing commercial loans. Specific (FASB ASC 310, *Receivables*) reserves do not have a range of probable loss. Due to the risks and uncertainty associated with the economy and our projection of loss rates inherent in the portfolio, we establish a range of probable outcomes (a high-end estimate and a low-end estimate) and evaluate our position within this range. The potential effect to net income based on our position in the range relative to the high and low endpoints is a decrease of \$1.8 million and an increase of \$10.5 million, respectively, after taking into account the tax effects. These sensitivities are hypothetical and may not represent actual results.

Derivative Financial Instruments

Description. As part of our overall interest rate risk management, we use derivative instruments to reduce exposure to changes in interest rates and market prices for financial instruments. The application of the hedge accounting policy requires judgment in the assessment of hedge effectiveness, identification of similar hedged item groupings and measurement of changes in the fair value of derivative financial instruments and hedged items. To the extent hedging relationships are found to be effective, as determined by FASB ASC 815, *Derivatives and Hedging* ("ASC Topic 815"), changes in fair value of the derivatives are offset by changes in the fair value of the related hedged item or recorded to other comprehensive income. Management believes hedge effectiveness is evaluated properly in preparation of the financial statements. All of the derivative financial instruments we use have an active market and indications of fair value can be readily obtained. We are not using the "short-cut" method of accounting for any fair value derivatives.

Judgments and Uncertainties. The application of the hedge accounting policy requires judgment in the assessment of hedge effectiveness, identification of similar hedged item groupings and measurement of changes in the fair value of derivative financial instruments and hedged items.

-

Effect if Actual Results Differ From Assumptions. To the extent hedging relationships are found to be effective, as determined by ASC Topic 815, changes in fair value of the derivatives are offset by changes in the fair value of the related hedged item or recorded to other comprehensive income. However, if in the future the derivative financial instruments used by us no longer qualify for hedge accounting treatment, all

59

changes in fair value of the derivative would flow through the consolidated statements of income in other noninterest income, resulting in greater volatility in our earnings.

Income Taxes

Description. We are subject to the income tax laws of the U.S., its states, and the municipalities in which we operate. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant government taxing authorities. We review income tax expense and the carrying value of deferred tax assets quarterly; and as new information becomes available, the balances are adjusted as appropriate. FASB ASC 740-10 (FIN 48) prescribes a recognition threshold of more-likely-than-not, and a measurement attribute for all tax positions taken or expected to be taken on a tax return, in order for those tax positions to be recognized in the financial statements. See Note 16 to the consolidated financial statements for a further description of our provision and related income tax assets and liabilities.

Judgments and Uncertainties. In establishing a provision for income tax expense, we must make judgments and interpretations about the application of these inherently complex tax laws. We must also make estimates about when in the future certain items will affect taxable income in the various tax jurisdictions. Disputes over interpretations of the tax laws may be subject to review/adjudication by the court systems of the various tax jurisdictions or may be settled with the taxing authority upon examination or audit.

Effect if Actual Results Differ From Assumptions. Although management believes that the judgments and estimates used are reasonable, actual results could differ and we may be exposed to losses or gains that could be material. To the extent we prevail in matters for which reserves have been established, or are required to pay amounts in excess of our reserves, our effective income tax rate in a given financial statement period could be materially affected. An unfavorable tax settlement would result in an increase in our effective income tax rate in the period of resolution. A favorable tax settlement would result in a reduction in our effective income tax rate in the period of resolution.

Management has discussed the development and selection of these critical accounting estimates with the Audit Committee and the Audit Committee has reviewed our disclosure relating to it in this “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

REPORT OF MANAGEMENT

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

Management is responsible for the preparation of the financial statements and related financial information appearing in this annual report on Form 10-K. The financial statements and notes have been prepared in conformity with accounting principles generally accepted in the United States and include some amounts which are estimates based upon currently available information and management's judgment of current conditions and circumstances. Financial information throughout this annual report on Form 10-K is consistent with that in the financial statements.

Management maintains a system of internal accounting controls which is believed to provide, in all material respects, reasonable assurance that assets are safeguarded against loss from unauthorized use or disposition, transactions are properly authorized and recorded, and the financial records are reliable for preparing financial statements and maintaining accountability for assets. In addition, Old National has a Code of Business Conduct and Ethics, a Senior Financial and Executive Officer Code of Ethics and Corporate Governance Guidelines that outline high levels of ethical business standards. Old National has also appointed a Chief Ethics Officer and had a third party perform an independent validation of our ethics program. All systems of internal accounting controls are based on management's judgment that the cost of controls should not exceed the benefits to be achieved and that no system can provide absolute assurance that control objectives are achieved. Management believes Old National's system provides the appropriate balance between cost of controls and the related benefits.

In order to monitor compliance with this system of controls, Old National maintains an extensive internal audit program. Internal audit reports are issued to appropriate officers and significant audit exceptions, if any, are reviewed with management and the Audit Committee.

The Board of Directors, through an Audit Committee comprised solely of independent outside directors, oversees management's discharge of its financial reporting responsibilities. The Audit Committee meets regularly with Old National's independent registered public accounting firm, Crowe LLP, and the managers of financial reporting, internal audit, and risk. During these meetings, the committee meets privately with the independent registered public accounting firm as well as with financial reporting and internal audit personnel to review accounting, auditing, and financial reporting matters. The appointment of the independent registered public accounting firm is made by the Audit Committee.

The consolidated financial statements in this annual report on Form 10-K have been audited by Crowe LLP, for the purpose of determining that the consolidated financial statements are presented fairly, in all material respects in conformity with accounting principles generally accepted in the United States. Crowe LLP's report on the financial statements follows.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Old National is responsible for establishing and maintaining adequate internal control over financial reporting. A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Old National's management assessed the effectiveness of Old National's internal control over financial reporting as of December 31, 2018. In making this assessment, management used the criteria established in 2013 by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control - Integrated Framework*. As permitted, Old National has excluded the operations of Klein Financial, Inc. acquired November 1, 2018, which is described in Note 2 to the consolidated financial statements. The assets acquired in this acquisition and excluded from management's assessment on internal control over financial reporting comprised approximately 5.8% of total consolidated assets at December 31, 2018. Based on that assessment Old National has concluded that, as of December 31, 2018, Old National's internal control over financial reporting is effective. Old National's independent registered public accounting firm has audited the effectiveness of Old National's internal control over financial reporting as of December 31, 2018 as stated in their report which follows.

Crowe LLP

Independent Member Crowe Global

Report of Independent Registered Public Accounting Firm

Shareholders and the Board of Directors of Old National Bancorp

Evansville, Indiana

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Old National Bancorp (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2018, and the related notes (collectively referred to as the "financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control – Integrated Framework: (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control – Integrated Framework: (2013) issued by COSO.

Basis for Opinions

The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting,

included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements.

Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. As permitted, the Company has excluded the operations of Klein Financial, Inc. acquired during 2018, which is described in Note 2 of the consolidated financial statements, from the scope of management's report on internal control over financial reporting. As such, it has also been excluded from the scope of our audit of internal control over financial reporting. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Crowe LLP

We have served as the Company's auditor since 2005, which is the year the engagement letter was signed for the audit of the 2006 financial statements.

OLD NATIONAL BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NATURE OF OPERATIONS

Old National Bancorp, a financial holding company headquartered in Evansville, Indiana, operates primarily in Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. Its principal subsidiary is Old National Bank. Through its bank and non-bank affiliates, Old National Bancorp provides to its clients an array of financial services including loan, deposit, wealth management, investment consulting, and investment products.

NOTE 1 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements include the accounts of Old National Bancorp and its wholly-owned affiliates (hereinafter collectively referred to as “Old National”) and have been prepared in conformity with accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. Such principles require management to make estimates and assumptions that affect the reported amounts of assets, liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements and amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

All significant intercompany transactions and balances have been eliminated. Certain prior year amounts have been reclassified to conform to the 2018 presentation. Such reclassifications had no effect on net income or shareholders' equity and were insignificant amounts.

Equity Securities

Equity securities consist of mutual funds held in trusts associated with deferred compensation plans for former directors and executives. These mutual funds are recorded as equity securities at fair value. Gains and losses are included in net securities gains.

Investment Securities

Old National classifies debt investment securities as available-for-sale or held-to-maturity on the date of purchase. Debt securities classified as available-for-sale are recorded at fair value with the unrealized gains and losses, net of tax effect, recorded in other comprehensive income. Realized gains and losses affect income and the prior fair value adjustments are reclassified within shareholders' equity. Debt securities classified as held-to-maturity, which management has the intent and ability to hold to maturity, are reported at amortized cost. Premiums and discounts are amortized on the level-yield method. Anticipated prepayments are considered when amortizing premiums and discounts on mortgage backed securities. Gains and losses on the sale of available-for-sale debt securities are determined using the specific-identification method. Equity investments are measured at fair value with changes in fair value recognized in net income.

Other-Than-Temporary Impairment – Management evaluates debt securities for OTTI at least on a quarterly basis, and more frequently when economic or market conditions warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer including an evaluation of credit ratings, (3) whether the market decline was affected by

macroeconomic conditions, (4) the intent of Old National to sell a debt security, and (5) whether it is more likely than not Old National will have to sell the debt security before recovery of its cost basis. If Old National intends to sell an impaired debt security, Old National records an other-than-temporary loss in an amount equal to the entire difference between fair value and amortized cost. If a debt security is determined to be other-than-temporarily impaired, but Old National does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security, only the credit portion of the estimated loss is recognized in earnings, with the other portion of the loss recognized in other comprehensive income. See Note 3 to the consolidated financial statements for a detailed description of the quarterly evaluation process.

Federal Home Loan Bank Stock

Old National is a member of the FHLB system. Members are required to own a certain amount of stock based on the level of borrowings and other factors and may invest in additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

Loans Held for Sale

Loans that Old National has originated with an intent to sell are classified as loans held for sale and are recorded in accordance with FASB ASC 825-10 at fair value, determined individually, as of the balance sheet date. The loan's fair value includes the servicing value of the loans as well as any accrued interest.

Loans

Loans that Old National intends to hold for investment purposes are classified as portfolio loans. Portfolio loans are carried at the principal balance outstanding, net of earned interest, purchase premiums or discounts, deferred loan fees and costs, and an allowance for loan losses. Interest income is accrued on the principal balances of loans outstanding. For all loan classes, a loan is generally placed on nonaccrual status when principal or interest becomes 90 days past due unless it is well secured and in the process of collection, or earlier when concern exists as to the ultimate collectibility of principal or interest. Interest accrued during the current year on such loans is reversed against earnings. Interest accrued in the prior year, if any, is charged to the allowance for loan losses. Cash interest received on these loans is applied to the principal balance until the principal is recovered or until the loan returns to accrual status. Loans may be returned to accrual status when all the principal and interest amounts contractually due are brought current, remain current for a prescribed period, and future payments are reasonably assured.

Purchased loans acquired in a business combination are recorded at estimated fair value on their purchase date with no carryover of the related allowance for loan and lease losses. In determining the estimated fair value of purchased loans, management considers a number of factors including, among others, the remaining life of the acquired loans, estimated prepayments, estimated loss ratios, estimated value of the underlying collateral, and net present value of cash flows expected to be received. Purchased loans are accounted for in accordance with guidance for certain loans acquired in a transfer (ASC 310-30), when the loans have evidence of credit deterioration since origination and it is probable at the date of acquisition that the acquirer will not collect all contractually required principal and interest payments. The difference between contractually required payments and the cash flows expected to be collected at acquisition is referred to as the non-accretable difference. Subsequent decreases to the expected cash flows will generally result in a provision for loan and lease losses. Subsequent increases in expected cash flows will result in a reversal of the provision for loan losses to the extent of prior charges and then an adjustment to accretable yield, which would have a positive impact on interest income.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level believed adequate by management to absorb probable losses incurred in the consolidated loan portfolio. Management's evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, assessments of the impact of current and anticipated economic conditions on the portfolio, and historical loss experience. The allowance is increased through a provision charged to operating expense. Loans deemed to be uncollectible are charged to the allowance. Recoveries of loans previously charged-off are added to the allowance.

For all loan classes, a loan is considered impaired when it is probable that contractual interest and principal payments will not be collected either for the amounts or by the dates as scheduled in the loan agreement. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported net, at the present value of estimated cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Old National's policy, for all but PCI loans, is to recognize interest income on impaired loans unless the loan is placed on nonaccrual status.

Acquired loans accounted for under ASC Topic 310-30 accrue interest, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period loan loss provision or prospective yield adjustments.

Old National charges off small commercial loans scored through our small business credit center with contractual balances under \$250,000 that are 90 days or more delinquent and do not have adequate collateral support.

For all portfolio segments, the general component covers non-impaired loans and is based on historical loss experience adjusted for current factors. This actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: levels of and trends in delinquencies and impaired loans; levels of and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of any changes in risk selection and underwriting standards; other changes in lending policies, procedures, and practices; experience, ability, and depth of lending management and other relevant staff; national and local economic trends and conditions; industry conditions; and effects of changes in credit concentrations.

Further information regarding Old National's policies and methodology used to estimate the allowance for loan losses is presented in Note 5.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation. Land is stated at cost. Depreciation is charged to operating expense over the useful lives of the assets, principally on the straight-line method. Useful lives for premises and equipment are as follows: buildings and building improvements – 15 to 39 years; and furniture and equipment – 3 to 7 years. Leasehold improvements are depreciated over the lesser of their useful lives or the term of the lease. Maintenance and repairs are expensed as incurred while major additions and improvements are capitalized. Interest costs on construction of qualifying assets are capitalized.

Premises and equipment are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, the assets are adjusted to fair value. Such impairments are included in other expense.

Goodwill and Other Intangible Assets

The excess of the cost of acquired entities over the fair value of identifiable assets acquired less liabilities assumed is recorded as goodwill. In accordance with FASB ASC 350, *Intangibles – Goodwill and Other*, amortization of goodwill and indefinite-lived assets is not recorded. However, the recoverability of goodwill and other intangible assets are annually tested for impairment. Other intangible assets, including core deposits and customer business relationships, are amortized primarily on an accelerated basis over their estimated useful lives, generally over a period of 5 to 15 years.

Company-Owned Life Insurance

Old National has purchased, as well as obtained through acquisitions, life insurance policies on certain key executives. Old National records company-owned life insurance at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Loan Servicing Rights

When loans are sold with servicing retained, servicing rights are initially recorded at fair value with the income statement effect recorded in gain on sales of loans. Fair value is based on market prices for comparable servicing contracts, when available or alternatively, is based on a valuation model that calculates the present value of estimated

future net servicing income. All classes of servicing assets are subsequently measured using the amortization method which requires servicing rights to be amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying loans.

Loan servicing rights are evaluated for impairment based upon the fair value of the rights as compared to carrying amount. Impairment is determined by stratifying rights into groupings based on predominant risk characteristics, such as interest rate, loan type, term, and investor type. Impairment is recognized through a valuation allowance for an individual grouping, to the extent that fair value is less than the carrying amount. If Old National later determines that all or a portion of the impairment no longer exists for a particular grouping, a reduction of the allowance may be recorded as an increase to income. Changes in valuation allowances are reported with mortgage banking revenue on the income statement. The fair values of servicing rights are subject to significant fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses.

Servicing fee income, which is reported on the income statement as mortgage banking revenue, is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal, or a fixed amount per loan and are recorded as income when earned.

Derivative Financial Instruments

As part of Old National's overall interest rate risk management, Old National uses derivative instruments, including TBA forward agreements and interest rate swaps, collars, caps, and floors. All derivative instruments are recognized on the balance sheet at their fair value in accordance with ASC 815, as amended. At the inception of the derivative contract, Old National will designate the derivative as (1) a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment ("fair value hedge"), (2) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow hedge"), or (3) an instrument with no hedging designation ("stand-alone derivative"). For derivatives that are designated and qualify as a fair value hedge, the change in value of the derivative, as well as the offsetting change in value of the hedged item attributable to the hedged risk, are recognized in current earnings during the period of the change in fair values. For derivatives that are designated and qualify as a cash flow hedge, the effective portion of the change in value on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. For all hedging relationships, changes in fair value of derivatives that are not effective in hedging the changes in fair value or expected cash flows of the hedged item are recognized immediately in current earnings during the period of the change. Similarly, the changes in the fair value of derivatives that do not qualify for hedge accounting under ASC Topic 815 are also reported currently in earnings, in noninterest income.

The accrued net settlements on derivatives that qualify for hedge accounting are recorded in interest income or interest expense, consistent with the item being hedged.

Old National formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivative instruments that are designated as fair-value or cash-flow hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. Old National also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative instruments that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. Old National discontinues hedge accounting prospectively when it is determined that (1) the derivative is no longer effective in offsetting changes in the fair value or cash flows of the hedged item; (2) the derivative expires, is sold, or terminated; (3) the derivative instrument is de-designated as a hedge because the forecasted transaction is no longer probable of occurring; (4) a hedged firm commitment no longer meets the definition of a firm commitment; (5) or management otherwise determines that designation of the derivative as a hedging instrument is no longer appropriate.

When hedge accounting is discontinued, the future changes in fair value of the derivative are recorded as noninterest income. When a fair value hedge is discontinued, the hedged asset or liability is no longer adjusted for changes in fair value and the existing basis adjustment is amortized or accreted over the remaining life of the asset or liability. When a cash flow hedge is discontinued but the hedged cash flows or forecasted transaction is still expected to occur, changes in value that were accumulated in other comprehensive income are amortized or accreted into earnings over the same periods which the hedged transactions will affect earnings.

Old National enters into various stand-alone mortgage-banking derivatives in order to hedge the risk associated with the fluctuation of interest rates. Changes in fair value are recorded as mortgage banking revenue. Old National also enters into various stand-alone derivative contracts to provide derivative products to customers which are carried at fair value with changes in fair value recorded as other noninterest income.

Old National is exposed to losses if a counterparty fails to make its payments under a contract in which Old National is in the net receiving position. Old National anticipates that the counterparties will be able to fully satisfy their obligations under the agreements. In addition, Old National obtains collateral above certain thresholds of the fair value of its hedges for each counterparty based upon their credit standing. All of the contracts to which Old National is a party settle monthly, quarterly, or semiannually. Further, Old National has netting agreements with the dealers with which it does business.

Credit-Related Financial Instruments

In the ordinary course of business, Old National's affiliate bank has entered into credit-related financial instruments consisting of commitments to extend credit, commercial letters of credit, and standby letters of credit. The notional amount of these commitments is not reflected in the consolidated financial statements until they are funded.

Reposessed Collateral

Other real estate owned and reposessed personal property are initially recorded at the fair value of the property less estimated cost to sell. Physical possession of residential real estate property collateralizing a consumer mortgage loan occurs when legal title is obtained upon completion of foreclosure or when the borrower conveys all interest in the property to satisfy the loan through the completion of a deed in lieu of foreclosure or through a similar legal agreement. Any excess recorded investment over the fair value of the property received is charged to the allowance for loan losses. Any subsequent write-downs are recorded in noninterest expense, as are the costs of operating the properties. Gains or losses resulting from the sale of collateral are recognized in noninterest expense at the date of sale.

Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase

We purchase certain securities, generally U.S. government-sponsored entity and agency securities, under agreements to resell. The amounts advanced under these agreements represent short-term secured loans and are reflected as assets in the accompanying consolidated balance sheets. We also sell certain securities under agreements to repurchase. These agreements are treated as collateralized financing transactions. These secured borrowings are reflected as liabilities in the accompanying consolidated balance sheets and are recorded at the amount of cash received in connection with the transaction. Short-term securities sold under agreements to repurchase generally mature within one to four days from the transaction date. Securities, generally U.S. government and federal agency securities, pledged as collateral under these financing arrangements can be repledged by the secured party. Additional collateral may be required based on the fair value of the underlying securities.

Net Income per Share

Basic and diluted net income per share are calculated using the two-class method. Net income is divided by the weighted-average number of common shares outstanding during the period. Adjustments to the weighted average number of common shares outstanding are made only when such adjustments will dilute net income per common share. Net income is then divided by the weighted-average number of common shares and common share equivalents during the period.

The following table reconciles basic and diluted net income per share for the years ended December 31.

(dollars and shares in thousands, except per share data)	Years Ended December 31,		
	2018	2017	2016
Basic Net Income Per Share			
Net income	\$ 190,830	\$ 95,725	\$ 134,264
Weighted average common shares outstanding	155,675	137,821	127,705
Basic Net Income Per Share	\$ 1.23	\$ 0.69	\$ 1.05
Diluted Net Income Per Share			
Net income	\$ 190,830	\$ 95,725	\$ 134,264
Weighted average common shares outstanding	155,675	137,821	127,705
Effect of dilutive securities:			
Restricted stock	796	599	543
Stock options (1)	68	93	53
Weighted average shares outstanding	156,539	138,513	128,301
Diluted Earnings Per Share	\$ 1.22	\$ 0.69	\$ 1.05

(1) Options to purchase 14 thousand shares, 0.1 million shares, and 0.5 million shares outstanding at December 31, 2018, 2017, and 2016, respectively, were not included in the computation of net income per diluted share because the exercise price of these options was greater than the average market price of the common shares and, therefore, the effect would be antidilutive.

Share-Based Compensation

Compensation cost is recognized for stock options and restricted stock awards and units issued to employees based on the fair value of these awards at the date of grant. A Black-Scholes model is utilized to estimate the fair value of stock options, while the market price of our Common Stock at the date of grant is used for restricted stock awards. A third party provider is used to value certain restricted stock units where the performance measure is based on total shareholder return. Compensation expense is recognized over the requisite service period. Forfeitures are recognized as they occur.

Income Taxes

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

We recognize a tax position as a benefit only if it is “more likely than not” that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the “more likely than not” test, no tax benefit is recorded.

We recognize interest and/or penalties related to income tax matters in income tax expense.

Old National is a limited partner in several tax-advantaged limited partnerships whose purpose is to invest in approved qualified affordable housing, renewable energy, or other renovation or community revitalization projects. These investments are included in other assets on the balance sheet, with any unfunded commitments included with other liabilities. Certain of these assets qualify for the proportional amortization method and are amortized over the period that Old National expects to receive the tax credits, with the expense included within income tax expense on the consolidated statements of income. The other investments are accounted for under the equity method, with the expense included within pre-tax income on the consolidated statements of income. All of our tax credit investments are evaluated for impairment at the end of each reporting period.

75

Loss Contingencies

Loss contingencies, including claims and legal actions arising in the normal course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. See Note 22 to the consolidated financial statements for further disclosure.

Cash Equivalents and Cash Flows

For the purpose of presentation in the accompanying consolidated statement of cash flows, cash and cash equivalents are defined as cash, due from banks, federal funds sold and resell agreements, and money market investments, which have maturities less than 90 days. Cash flows from loans, either originated or acquired, are classified at that time according to management's intent to either sell or hold the loan for the foreseeable future. When management's intent is to sell the loan, the cash flows of that loan are presented as operating cash flows. When management's intent is to hold the loan for the foreseeable future, the cash flows of that loan are presented as investing cash flows.

The following table summarizes the supplemental cash flow information for the years ended December 31:

(dollars in thousands)	Years Ended December 31,		
	2018	2017	2016
Cash payments:			
Interest	\$91,813	\$56,682	\$43,698
Income taxes (net of refunds)	(2,505)	4,326	23,636
Noncash Investing and Financing Activities:			
Securities transferred from held-to-maturity to available-for-sale	447,026	—	—
Securities transferred from available-for-sale to held-to-maturity	323,990	—	—
Transfer of premises and equipment to assets held for sale	9,634	16,617	4,620

The following table summarizes the common shares issued and resultant value of total shareholders' equity associated with acquisitions for the years ended December 31:

(dollars and shares in thousands)	Shares of Common Stock	Total Shareholders' Equity
2018		
Acquisition of Klein	22,772	\$ 406,474
2017		
Acquisition of Anchor (MN)	16,527	\$ 300,828
2016		

Acquisition of Anchor (WI)	20,415	\$ 273,565
----------------------------	--------	------------

Business Combinations

Old National accounts for business combinations using the acquisition method of accounting. The accounts of an acquired entity are included as of the date of acquisition, and any excess of purchase price over the fair value of the net assets acquired is capitalized as goodwill. Old National typically issues common stock and/or pays cash for an acquisition, depending on the terms of the acquisition agreement. The value of common shares issued is determined based on the market price of the stock as of the closing of the acquisition.

Impact of Accounting Changes

Accounting Guidance Adopted in 2018

FASB ASC 606 – On January 1, 2018, Old National adopted ASU 2014-09, Revenue from Contracts with Customers and all subsequent amendments to the ASU (collectively, “Topic 606”), which creates a single framework for recognizing revenue from contracts with customers that fall within its scope. A significant majority of Old National’s revenues come from interest income and other sources, including loans, leases, securities and derivatives, that are not subject to Topic 606. Services within the scope of Topic 606 include wealth management fees, service charges on deposit accounts, debit card and ATM fees, and investment product fees, all of which are presented within noninterest income. Old National enters into various contracts with customers to provide these traditional banking services on a routine basis. Old National’s performance obligations are generally service-related and provided on a daily, monthly, or quarterly basis. The performance obligations are generally satisfied as services are rendered and the fees are collected at such time, or shortly thereafter. It is not typical for contracts to require significant judgment to determine the transaction price. See Note 24 for additional information.

Old National adopted Topic 606 using the modified retrospective method applied to all contracts not completed as of January 1, 2018. Results for reporting periods beginning after adoption are presented under Topic 606. As allowed under the update, results for prior periods continue to be reported under the accounting standards in effect for those periods. The adoption of this update did not have a material impact on the measurement, timing, or recognition of revenue. Accordingly, no cumulative effect adjustment to opening retained earnings was deemed necessary.

FASB ASC 825 – In January 2016, the FASB issued an update (ASU No. 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities). The amendments in this update impact public business entities as follows: (1) require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (2) simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; and when a qualitative assessment indicates that impairment exists, an entity is required to measure the investment at fair value; (3) eliminate the requirement to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; (4) require entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (5) require an entity to present separately in other comprehensive income the portion of the total change in fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; (6) require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements; and (7) clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity’s other deferred tax assets. The amendments in this update became effective for annual periods and interim periods within those annual periods beginning after December 15, 2017 and did not have a material impact on the consolidated financial statements.

In February 2018, the FASB issued an update (ASU No. 2018-03, *Technical Corrections and Improvements to Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*). The amendments in this update clarified the guidance in ASU No. 2016-01 specifically for equity securities without a readily determinable fair value and financial liabilities for which the fair value option is elected. The amendments in this update became effective for annual periods beginning after December 15, 2017 and interim periods within those fiscal years beginning after June 15, 2018 and did not have a material impact on the consolidated financial statements.

FASB ASC 740 – In October 2016, the FASB issued ASU No. 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*. Current guidance prohibits the recognition of current and deferred income taxes for an intra-entity asset transfer until the asset has been sold to an outside party. This prohibition on recognition is an exception to the principle of comprehensive recognition of current and deferred income taxes in generally accepted accounting principles. The exception has led to diversity in practice and is a source of complexity in financial reporting. FASB decided that an entity should recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. Consequently, the amendments in this

update eliminate the exception for an intra-entity transfer of an asset other than inventory. The amendments in this update do not include new disclosure requirements; however, existing disclosure requirements might be applicable when accounting for the current and deferred income taxes for an intra-entity transfer of an asset other than inventory. The amendments in this update became effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods. The amendments in this update were applied on a modified retrospective basis through a cumulative-effect reduction of \$1.0 million directly to retained earnings as of the beginning of 2018.

FASB ASC 805 – In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business. The amendments in this update provide a more robust framework to use in determining when a set of assets and activities is a business. Because the current definition of a business is interpreted broadly and can be difficult to apply, stakeholders indicated that analyzing transactions is inefficient and costly and that the definition does not permit the use of reasonable judgment. The amendments provide more consistency in applying the guidance, reduce the costs of application, and make the definition of a business more operable. The amendments in this update became effective for annual periods and interim periods within those annual periods beginning after December 15, 2017. Old National has completed its evaluation of adopting the new guidance on the consolidated financial statements and there is no impact.

FASB ASC 610 – In February 2017, the FASB issued ASU No. 2017-05, Other Income – Gains and Losses from the Derecognition of Nonfinancial Assets (Topic 610): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets. Subtopic 610-20 was originally issued as part of ASU No. 2014-09 to provide guidance for recognizing gains and losses from the transfer of nonfinancial assets in contracts with noncustomers. This update was issued to help clarify uncertainties and complexities of ASU 2014-09. The amendments in this update define the term in substance nonfinancial asset, in part, as a financial asset promised to a counterparty in a contract if substantially all of its fair value of the assets (recognized and unrecognized) that are promised to the counterparty in the contract is concentrated in nonfinancial assets. If substantially all of the fair value of the assets that are promised to the counterparty in a contract is concentrated in nonfinancial assets, then all of the financial assets promised to the counterparty are in substance nonfinancial assets. The amendments in this update also clarify that nonfinancial assets within the scope of Subtopic 610-20 may include nonfinancial assets transferred within a legal entity to a counterparty. The amendments in this update require an entity to derecognize a distinct nonfinancial asset or distinct in substance nonfinancial asset in a partial sale transaction when it (1) does not have (or ceases to have) a controlling financial interest in the legal entity that holds the asset in accordance with Topic 810 and (2) transfers control of the asset in accordance with Topic 606. Once an entity transfers control of a distinct nonfinancial asset or distinct in substance nonfinancial asset, it is required to measure any noncontrolling interest it receives (or retains) at fair value. The amendments were effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period and did not have a material impact on the consolidated financial statements.

FASB ASC 715 – In March 2017, the FASB issued ASU No. 2017-07, Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The amendments in this update require that an employer disaggregate the service cost component from the other components of net benefit cost. The amendments also provide explicit guidance on how to present the service cost component and the other components of net benefit cost in the income statement and allow only the service cost

component of net benefit cost to be eligible for capitalization. The amendments in this update improve the consistency, transparency, and usefulness of financial information to users that have communicated that the service cost component generally is analyzed differently from the other components of net benefit cost. The amendments in this update became effective for annual periods and interim periods within those annual periods beginning after December 15, 2017 and did not have a material impact on the consolidated financial statements.

FASB ASC 718 – In May 2017, the FASB issued ASU No. 2017-09, Compensation – Stock Compensation (Topic 718): Scope of Modification Accounting. The amendments in this update provide guidance about which changes to the terms and conditions of a share-based payment award require an entity to apply modification accounting. An entity should account for the effect of a modification unless all the following are met: (1) the fair value of the modified award is the same as the fair value of the original award immediately before the original award is modified – if the modification does not affect any of the inputs to the valuation technique that the entity uses to value the award, the entity is not required to estimate the value immediately before and after the modification; (2) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the

original award is modified; (3) the classification of the modified award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the original award is modified. The amendments in this update became effective for annual periods and interim periods within those annual periods beginning after December 15, 2017 and did not have a material impact on the consolidated financial statements.

FASB ASC 815 – In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The amendments in the update make certain targeted improvements to simplify the application of the hedge accounting guidance in GAAP. The amendments in this update better align an entity’s risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. To meet that objective, the amendments expand and refine hedge accounting for both nonfinancial and financial risk components and align the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. This update addresses several limitations that GAAP placed on the risk components, how an entity can designate the hedged item in a fair value hedge of interest rate risk, and how an entity can measure changes in fair value of the hedged item attributable to interest rate risk. In addition to the amendments to the designation and measurement guidance for qualifying hedging relationships, the amendments in this update also align the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements to increase the understandability of the results of an entity’s intended hedging strategies. The amendments in this update require an entity to present the earnings effect of the hedging instrument in the same income statement line item in which the earnings effect of the hedged item is reported. Prior to the issuance of this update, GAAP provided special hedge accounting only for the portion of the hedge deemed to be “highly effective” and required an entity to separately reflect the amount by which the hedging instrument did not offset the hedged item, which is referred to as the “ineffective” amount. However, the concept and reporting of hedge ineffectiveness were difficult for financial statement users to understand and, at times, for preparers to explain. The FASB decided on an approach that no longer separately measures and reports hedge ineffectiveness. This update also includes certain targeted improvements to ease the application of current guidance related to the assessment of hedge effectiveness. Prior to the issuance of this update, GAAP contained specific requirements for initial and ongoing quantitative hedge effectiveness testing and strict requirements for specialized effectiveness testing methods that allowed an entity to forgo quantitative hedge effectiveness assessments for qualifying relationships. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2018. Early adoption is permitted in any interim period. Management elected to early adopt this update effective January 1, 2018 using the modified retrospective method. The impact of the adoption resulted in a reduction to Old National’s opening retained earnings of \$3.2 million. In addition, as permitted by the amendments in the update, Old National reclassified \$447.0 million in state and political subdivision securities with unrealized holding gains of \$26.1 million from the held-to-maturity portfolio to the available-for-sale portfolio.

FASB ASC 220 – In February 2018, the FASB issued ASU No. 2018-02, Income Statement – Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. The amendments in this ASU help organizations address certain stranded income tax effects in AOCI resulting from the Tax Cuts and Jobs Act. The ASU provides financial statement preparers with an option to reclassify stranded tax effects within AOCI to retained earnings in each period in which the effect of the change in the U.S. federal corporate income tax rate in the Tax Cuts and Jobs Act (or portion thereof) is recorded. The amendments are effective for all organizations for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. Management has elected to early adopt this update effective January 1, 2018, which resulted in

a reclassification that decreased beginning accumulated other comprehensive income and increased beginning retained earnings by \$10.8 million.

Accounting Guidance Issued But Not Yet Adopted in 2018

FASB ASC 842 – In February 2016, the FASB issued its new lease accounting guidance in ASU No. 2016-02, Leases (Topic 842). Under the new guidance, lessees will be required to recognize the following for all leases, with the exception of short-term leases, at the commencement date: (1) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged.

In July 2018, the FASB issued ASU No. 2018-10, *Codification Improvements to Topic 842, Leases* and ASU No. 2018-11, *Leases (Topic 842): Targeted Improvements*. ASU No. 2018-10 provides improvements related to ASU No. 2016-02 to increase stakeholders' awareness of the amendments and to expedite the improvements. The amendments affect narrow aspects of the guidance issued in ASU No. 2016-02. ASU No. 2018-11 allows entities adopting ASU No. 2016-02 to choose an additional (and optional) transition method, under which an entity initially applies the new leases standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. ASU No. 2018-11 also allows lessors to not separate non-lease components from the associated lease component if certain conditions are met. The amendments in these updates become effective for annual periods and interim periods within those annual periods beginning after December 15, 2018.

Old National elected the optional transition method permitted by ASU No. 2018-11. Under this method, an entity shall recognize and measure leases that exist at the application date and prior comparative periods are not adjusted. In addition, Old National elected the package of practical expedients to leases that commenced before the effective date:

1. An entity need not reassess whether any expired or existing contracts contain leases.
2. An entity need not reassess the lease classification for any expired or existing leases.
3. An entity need not reassess initial direct costs for any existing leases.

Old National also elected the practical expedient, which must be applied consistently to all leases, to use hindsight in determining the lease term and in assessing impairment of our right-of-use assets. We also elected a practical expedient to not assess whether existing or expired land easements that were not previously accounted for as leases under Topic 840 contain a lease under this Topic. Both of these practical expedients may be elected separately or in conjunction with each other or the package noted above.

Based on leases outstanding at December 31, 2018, the impact of adoption on January 1, 2019 was recording a lease liability of approximately \$123 million, a right-of-use asset of approximately \$119 million, and a cumulative-effect adjustment to retained earnings of approximately \$6 million.

FASB ASC 326 – In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments (“CECL”)*. The main objective of this amendment is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. The amendment requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to enhance their credit loss estimates. The amendment requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. In addition, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2019. Early adoption will be permitted beginning after December 15, 2018.

As previously disclosed, Old National formed a cross functional committee to oversee the adoption of the ASU at the effective date. A working group was also formed and has developed a project plan focused on understanding the ASU, researching issues, identifying data needs for modeling inputs, technology requirements, modeling considerations, and ensuring overarching governance has been achieved for each objective and milestone. The project plan is targeting data and model validation completion during the first half of 2019, with parallel processing of our existing allowance for loan losses model with the CECL for 2 – 3 quarters prior to implementation, depending on how model completion and validation occurs. Currently, the working group has identified seven distinct loan portfolios for which a model has been or is in the process of being developed. For five of the seven loan portfolios, the data sets have been identified, populated, and internally validated. During 2019, Old National is focused on the completion of its remaining models, refining assumptions, and continued review and challenge of its models. Concurrent with this, Old National is also focused on researching and resolving interpretive accounting issues in the ASU, contemplating various related accounting policies, developing processes and related controls, and considering various reporting disclosures.

As of the beginning of the first reporting period in which the new standard is effective, Old National expects to recognize a one-time cumulative effect adjustment increasing the allowance for loan losses, since the ASU covers credit losses over the expected life of a loan as well as considering future changes in macroeconomic conditions. The magnitude of any such one-time adjustment or the overall impact of the new guidance on the consolidated financial statements cannot yet be reasonably estimated, however, we expect to identify a range in our Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2019.

In December 2018, the OCC, the Board of Governors of the Federal Reserve System, and the FDIC approved a final rule to address changes to credit loss accounting under GAAP, including banking organizations' implementation of CECL. The final rule provides banking organizations the option to phase in over a three-year period the day-one adverse effects on regulatory capital that may result from the adoption of the new accounting standard.

FASB ASC 350 – In January 2017, the FASB issued ASU No. 2017-04, Intangibles: Goodwill and Other: Simplifying the Test for Goodwill Impairment. To simplify the subsequent measurement of goodwill, the amendments eliminate Step 2 from the goodwill impairment test. The annual, or interim, goodwill impairment test is performed by comparing the fair value of a reporting unit with its carrying amount. An impairment charge should be recognized for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. In addition, the income tax effects of tax deductible goodwill on the carrying amount of the reporting unit should be considered when measuring the goodwill impairment loss, if applicable. The amendments also eliminate the requirements for any reporting unit with a zero or negative carrying amount to perform Step 2 of the goodwill impairment test. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the qualitative impairment test is necessary. The amendments should be applied on a prospective basis. The nature of and reason for the change in accounting principle should be disclosed upon transition. The amendments in this update should be adopted for annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted on testing dates after January 1, 2017. Old National is currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 310 – In March 2017, the FASB issued ASU No. 2017-08, Receivables – Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities. This update amends the amortization period for certain purchased callable debt securities held at a premium. FASB is shortening the amortization period for the premium to the earliest call date. Under current GAAP, entities generally amortize the premium as an adjustment of yield over the contractual life of the instrument. Concerns were raised that current GAAP excludes certain callable debt securities from consideration of early repayment of principal even if the holder is certain that the call will be exercised. As a result, upon the exercise of a call on a callable debt security held at a premium, the unamortized premium is recorded as a loss in earnings. There is diversity in practice (1) in the amortization period for premiums of callable debt securities and (2) in how the potential for exercise of a call is factored into current impairment assessments. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2018. Old National completed the evaluation of adopting the new guidance on the consolidated financial statements and the impact was immaterial.

FASB ASC 718 – In June 2018, the FASB issued ASU No. 2018-07, Compensation – Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting. The amendments in this update expand the scope of Topic 718, Compensation—Stock Compensation (which currently only includes share-based payments to employees) to include share-based payments issued to nonemployees for goods or services. Consequently, the accounting for share-based payments to nonemployees and employees will be substantially aligned. The ASU supersedes Subtopic 505-50, Equity—Equity-Based Payments to Non-Employees. The amendments in this update become effective for annual periods beginning after December 15, 2018, including interim periods within that fiscal year and will not have a material impact on the consolidated financial statements.

FASB ASC 958 – In June 2018, the FASB issued ASU No. 2018-08, Not-for-Profit Entities (Topic 958): Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made. The amendments in this update clarify and improve the scope and accounting guidance around contributions of cash and other assets received and made by not-for-profit organizations and business enterprises. The ASU clarifies and improves current guidance about whether a transfer of assets, or the reduction, settlement, or cancellation of liabilities, is a contribution or an exchange transaction. It provides criteria for determining whether the resource provider is receiving commensurate value in return for the resources transferred which, depending on the outcome, determines

whether the organization follows contribution guidance or exchange transaction guidance in the revenue recognition and other applicable standards. It also provides a more robust framework for determining whether a contribution is conditional or unconditional, and for distinguishing a donor-imposed condition from a donor-imposed restriction. This is important because such classification affects the timing of contribution revenue and expense recognition. The new ASU does not apply to transfers of assets from governments to businesses. The amendments in this update become effective for a public business entity for transactions in which the entity serves as a resource recipient to annual periods beginning after June 15, 2018, including interim periods within those annual periods. The amendments in this update become effective for a public business entity for transactions in which the entity serves as a resource provider to annual periods beginning after December 15, 2018, including interim periods within those annual periods. Early adoption is permitted. Old National completed the evaluation of adopting the new guidance on the consolidated financial statements and there is no impact.

In July 2018, the FASB issued an update (ASU No. 2018-09, *Codification Improvements*). The amendments in this update affect a wide variety of topics in the Codification and are intended to clarify the Codification or correct the unintended application of guidance that is not expected to have a significant effect on current accounting practice. The transition and effective date guidance is based on the facts and circumstances of each amendment. Old National completed the evaluation of adopting the new guidance on the consolidated financial statements and there is no impact.

FASB ASC 820 – In August 2018, the FASB issued ASU No. 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement. The updated guidance improves the disclosure requirements on fair value measurements. The ASU removes certain disclosures required by Topic 820 related to transfers between Level 1 and Level 2 of the fair value hierarchy; the policy for timing of transfers between levels; the valuation processes for Level 3 fair value measurements; and for nonpublic entities, the changes in unrealized gains and losses for the period included in earnings for recurring Level 3 fair value measurements held at the end of the reporting period. The ASU modifies certain disclosures required by Topic 820 related to disclosure of transfers into and out of Level 3 of the fair value hierarchy and purchases and issues of Level 3 assets and liabilities for nonpublic entities; the requirement to disclose the timing of liquidation of an investee's assets and the date when restrictions from redemption might lapse only if the investee has communicated the timing to the entity or announced the timing publicly for investments in certain entities that calculate net asset value; and clarification that the measurement uncertainty disclosure is to communicate information about the uncertainty in measurement as of the reporting date. The ASU adds certain disclosure requirements related to changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period and the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. For certain unobservable inputs, an entity may disclose other quantitative information in lieu of the weighted average if the entity determines that other quantitative information would be a more reasonable and rational method to reflect the distribution of unobservable inputs used to develop Level 3 fair value measurements. The amendments in this update become effective for fiscal years, and interim periods within those fiscal years beginning after December 15, 2019. Early adoption is permitted. Old National is currently evaluating the impact of adopting the new guidance on the consolidated financial statements, but it is not expected to have a material impact.

FASB ASC 715 – In August 2018, the FASB issued ASU No. 2018-14, Compensation – Retirement Benefits – Defined Benefit Plans – General (Subtopic 715-20): Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans. The amendments in this update modify the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. The amendments in this update become effective for fiscal years ending after December 15, 2020 and will not have a material impact on the consolidated financial statements.

FASB ASC 350 – In August 2018, the FASB issued ASU No. 2018-15, Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract. The amendments in this update align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The amendments in this update become effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted. Old National is currently evaluating the impact of adopting the new guidance on the consolidated financial statements.

FASB ASC 815 – In October 2018, the FASB issued ASU No. 2018-16, Derivatives and Hedging (Topic 815): Inclusion of the Secured Overnight Financing Rate (SOFR) Overnight Index Swap (OIS) Rate as a Benchmark Interest Rate for Hedge Accounting. In the United States, eligible benchmark interest rates under Topic 815 are interest rates on direct Treasury obligations of the U.S. government (“UST”), the London Interbank Offered Rate (“LIBOR”) swap rate, and the Overnight Index Swap (“OIS”) Rate based on the Fed Funds Effective Rate. When the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities, in August 2017, it introduced the Securities Industry and Financial Markets Association (“SIFMA”) Municipal Swap Rate as the fourth permissible U.S. benchmark rate.

The new ASU adds the OIS rate based on SOFR as a U.S. benchmark interest rate to facilitate the LIBOR to SOFR transition and provide sufficient lead time for entities to prepare for changes to interest rate risk hedging strategies for both risk management and hedge accounting purposes. The amendments in this update become effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Old National is currently evaluating the impact of adopting the new guidance on the consolidated financial statements and the financial statement impact immediately upon adoption is immaterial. The future financial statement impact will depend on any new contracts entered into using new benchmark rates, as well as any existing contracts that get migrated from LIBOR to new benchmark interest rates. The Company has formed a working group who is developing a transition plan for all exposed contracts migrating from LIBOR to SOFR. Additionally, the working group is monitoring industry specific transition guidance around a LIBOR contract’s “fallback” language with the industry goal to minimize or eliminate value transfers resulting from the transition.

NOTE 2 – ACQUISITION AND DIVESTITURE ACTIVITY

Acquisitions

Anchor Bancorp, Inc.

Effective November 1, 2017, Old National completed the acquisition of St. Paul, Minnesota-based Anchor (MN) through a stock and cash merger. Anchor (MN) was a bank holding company with Anchor Bank (MN) as its wholly-owned subsidiary. Founded in 1967 and with 17 total branches, Anchor Bank (MN) was one of the largest community banks headquartered in the Twin Cities, and also served Mankato, Minnesota. Anchor Bank (MN) has no affiliation with the former AnchorBank (WI) in Madison, Wisconsin, which Old National acquired in 2016. Old National achieved cost savings by integrating the two companies and combining accounting, data processing, retail and lending support, and other administrative functions, which enabled Old National to achieve economies of scale in these areas.

Pursuant to the merger agreement, each holder of Anchor (MN) common stock received \$2.625 in cash and 1.350 shares of Old National Common Stock per share of Anchor (MN) common stock such holder owned. The total fair value of consideration for Anchor (MN) was \$332.8 million, consisting of \$31.9 million of cash and the issuance of 16.5 million shares of Old National Common Stock valued at \$300.8 million. Through December 31, 2018, transaction and integration costs of \$19.2 million associated with this acquisition have been expensed and remaining integration costs will be expensed in future periods as incurred. We do not anticipate additional expenses related to this acquisition.

As of June 30, 2018, Old National finalized its valuation of all assets acquired and liabilities assumed, resulting in immaterial changes to acquisition accounting adjustments. A summary of the fair values of the acquired assets, liabilities assumed, and resulting goodwill follows (in thousands):

Cash and cash equivalents	\$34,501
Investment securities	302,195
FHLB/Federal Reserve Bank stock	6,585
Loans held for sale	1,407
Loans	1,593,991
Premises and equipment	33,433
Accrued interest receivable	5,872
Other real estate owned	1,058
Company-owned life insurance	44,490
Other assets	30,036
Deposits	(1,777,588)
Federal funds purchased and interbank borrowings	(45,600)
Securities sold under agreements to repurchase	(22,965)
Other borrowings	(49,257)
Accrued expenses and other liabilities	(25,784)
Net tangible assets acquired	132,374
Definite-lived intangible assets acquired	26,606
Goodwill	173,785
Total consideration	\$332,765

Goodwill related to this acquisition will not be deductible for tax purposes.

The estimated fair value of the core deposit intangible was \$26.6 million and is being amortized over an estimated useful life of 10 years.

Acquired loan data for Anchor (MN) can be found in the table below:

	Fair Value	Gross Contractual	Best Estimate at
(in thousands)	of Acquired Loans	Amounts Receivable	Acquisition Date of
Acquired receivables subject	at Acquisition Date	at Acquisition Date	Contractual Cash
			Flows Not Expected
			to be Collected
to ASC 310-30	\$ 10,555	\$ 16,898	\$ 4,787
Acquired receivables not subject	\$ 1,583,436	\$ 1,879,449	\$ 87,767

to ASC 310-30

Klein Financial, Inc.

Effective November 1, 2018, Old National completed the acquisition of Minnesota-based Klein through a 100% stock merger. Klein was a bank holding company with KleinBank as its wholly-owned subsidiary. Founded in 1907 and headquartered in Chaska, Minnesota with 18 full-service branches, KleinBank was the largest family-owned community bank serving the Twin Cities and its western communities. Old National believes that it will be able to achieve cost savings by integrating the two companies and combining accounting, data processing, retail and lending support, and other administrative functions, which will enable Old National to achieve economies of scale in these areas.

Pursuant to the merger agreement, each holder of Klein common stock received 7.92 shares of Old National Common Stock per share of Klein common stock such holder owned. The total fair value of consideration for Klein was \$406.5 million, consisting of 22.8 million shares of Old National Common Stock valued at \$406.5 million. Through December 31, 2018, transaction and integration costs of \$14.3 million associated with this acquisition have been expensed and remaining integration costs will be expensed in future periods as incurred.

The following table reflects management's preliminary valuation of the assets acquired and liabilities assumed (in thousands):

Cash and cash equivalents	\$60,759
Investment securities	697,951
FHLB/Federal Reserve Bank stock	2,637
Loans held for sale	3,371
Loans	1,049,073
Premises and equipment	33,391
Accrued interest receivable	7,896
Company-owned life insurance	36,380
Net deferred tax assets	6,500
Other real estate owned	954
Other assets	10,299
Deposits	(1,713,086)
Securities sold under agreements to repurchase	(19,481)
Accrued expenses and other liabilities	(17,506)
Net tangible assets acquired	159,138
Definite-lived intangible assets acquired	39,017
Loan servicing rights	285
Goodwill	208,034
Total consideration	\$406,474

Old National is in the process of finalizing Klein's 2018 short-period tax return; thus, provisional measurements of goodwill, deferred income tax assets, and contingent consideration are subject to change during the measurement period. In addition, certain loan, intangible assets, and premises and equipment measurements have not been finalized and are subject to change. As Old National receives the information related to facts and circumstances that existed as of the acquisition date, we will finalize the provisional measurements recorded as of December 31, 2018. Such adjustments will be included in the allocation in the reporting period in which the final amounts are determined, not to exceed one year from the acquisition date.

Goodwill related to this acquisition will not be deductible for tax purposes.

The estimated fair value of the core deposit intangible was \$39.0 million and is being amortized over an estimated useful life of 12 years.

Acquired loan data for Klein can be found in the table below:

	Fair Value	Gross Contractual	Best Estimate at Acquisition Date of Contractual Cash
(in thousands)	of Acquired Loans	Amounts Receivable	Flows Not Expected
Acquired receivables subject	at Acquisition Date	at Acquisition Date	to be Collected
to ASC 310-30	\$ 11,663	\$ 18,568	\$ 4,521
Acquired receivables not subject			
to ASC 310-30	\$ 1,037,410	\$ 1,252,954	\$ 76,534

Summary of Unaudited Pro-Forma Information

The unaudited pro-forma information below for 2018 and 2017 gives effect to the Klein acquisition as if it had occurred on January 1, 2017. The pro-forma financial information is not necessarily indicative of the results of operations if the acquisition had been effective as of this date.

(dollars in thousands)	2018	2017
Revenue (1)	\$819,777	\$708,422
Income before income taxes	\$273,125	\$183,494

(1) Net interest income plus noninterest income.

Supplemental pro-forma earnings for 2018 were adjusted to exclude \$14.3 million of acquisition-related costs incurred during 2018. Supplemental pro-forma earnings for 2017 were adjusted to include these charges.

Divestitures

On October 26, 2018, Old National divested ten branches in Wisconsin to Marine Credit Union of La Crosse, Wisconsin. At closing, the purchasers assumed \$230.6 million in deposits and no loans. Old National recorded a net pre-tax gain of \$14.0 million in the fourth quarter of 2018, which included a deposit premium of \$15.0 million, goodwill allocation of \$0.6 million, and \$0.4 million of other transaction expenses.

Based on an ongoing assessment of our service and delivery network, Old National consolidated 5 branches during 2016, 29 in 2017, and an additional 10 branches in 2018.

NOTE 3 – INVESTMENT SECURITIES

The following table summarizes the amortized cost and fair value of the available-for-sale and held-to-maturity investment securities portfolio at December 31 and the corresponding amounts of unrealized gains and losses therein:

(dollars in thousands)	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
December 31, 2018				
Available-for-Sale				
U.S. Treasury	\$5,332	\$ —	\$ (31)	\$5,301
U.S. government-sponsored entities and agencies	639,458	35	(11,342)	628,151
Mortgage-backed securities - Agency	2,243,774	9,738	(44,217)	2,209,295
States and political subdivisions	932,757	11,113	(3,441)	940,429
Pooled trust preferred securities	13,861	—	(5,366)	8,495
Other securities	337,435	486	(6,176)	331,745
Total available-for-sale securities	\$4,172,617	\$ 21,372	\$ (70,573)	\$4,123,416
Held-to-Maturity				
U.S. government-sponsored entities and agencies	\$73,986	\$ —	\$ (1,627)	\$72,359
Mortgage-backed securities - Agency	127,120	39	(2,750)	124,409
States and political subdivisions	305,228	6,208	(2,101)	309,335
Total held-to-maturity securities	\$506,334	\$ 6,247	\$ (6,478)	\$506,103
December 31, 2017				
Available-for-Sale				
U.S. Treasury	\$5,473	\$ 83	\$ (5)	\$5,551

Mortgage-backed securities - Agency	1,704,014	1,600	(37,932)	1,667,682
States and political subdivisions	529,835	5,085	(4,727)	530,193
Pooled trust preferred securities	16,605	—	(8,157)	8,448
Other securities	321,016	1,172	(2,141)	320,047
Total available-for-sale securities	\$3,252,586	\$ 7,943	\$ (64,322)	\$3,196,207
Held-to-Maturity				

Edgar Filing: OLD NATIONAL BANCORP /IN/ - Form 10-K

Mortgage-backed securities - Agency	\$6,903	\$ 153	\$ —	\$7,056
States and political subdivisions	677,160	43,495	(8)	720,647
Total held-to-maturity securities	\$684,063	\$ 43,648	\$ (8)	\$727,703

As previously disclosed in Note 1, upon the early adoption of ASU No. 2017-12 on January 1, 2018, Old National reclassified \$447.0 million in state and political subdivision securities from the held-to-maturity portfolio to the available-for-sale portfolio. Separately, on January 1, 2018, U.S. government-sponsored entities and agencies, agency mortgage-backed securities, and state and political subdivision securities with a fair value of \$324.0 million were transferred from the available-for-sale portfolio to the held-to-maturity portfolio. The \$10.8 million unrealized holding loss, net of tax, at the date of transfer shall continue to be reported as a separate component of shareholders'

equity and is being amortized over the remaining term of the securities as an adjustment to yield. The corresponding discount on these securities will offset this adjustment to yield as it is amortized.

Proceeds from sales or calls of available-for-sale investment securities, the resulting realized gains and realized losses, and other securities gains or losses were as follows for the years ended December 31:

(dollars in thousands)	Years Ended December 31,		
	2018	2017	2016
Proceeds from sales of available-for-sale securities	\$139,364	\$342,233	\$243,312
Proceeds from calls of available-for-sale securities	32,437	88,233	635,624
Total	\$171,801	\$430,466	\$878,936
Realized gains on sales of available-for-sale securities	\$3,259	\$8,710	\$5,423
Realized gains on calls of available-for-sale securities	283	29	922
Realized losses on sales of available-for-sale securities	(1,469)	(263)	(450)
Realized losses on calls of available-for-sale securities	(63)	(8)	(147)
Other securities gains (losses) (1)	50	667	100
Net securities gains	\$2,060	\$9,135	\$5,848

(1) Other securities gains (losses) includes net realized and unrealized gains or losses associated with equity securities and mutual funds.

Investment securities pledged to secure public and other funds had a carrying value of \$2.4 billion at December 31, 2018 and \$1.8 billion at December 31, 2017.

Equity securities, which consist of mutual funds held in trusts associated with deferred compensation plans for former directors and executives, are recorded at fair value and totaled \$5.6 million at December 31, 2018 and December 31, 2017.

At December 31, 2018, Old National had a concentration of investment securities issued by certain states and their political subdivisions with the following aggregate market values: \$344.4 million by Indiana, which represented 12.8% of shareholders' equity, and \$176.0 million by Texas, which represented 6.5% of shareholders' equity. Of the Indiana municipal bonds, 99% are rated "A" or better, and the remaining 1% generally represent non-rated local interest bonds where Old National has a market presence. All of the Texas municipal bonds are rated "A" or better, and the majority of issues are backed by the "AAA" rated State of Texas Permanent School Fund Guarantee Program.

All of the mortgage-backed securities in the investment portfolio are residential mortgage-backed securities. The amortized cost and fair value of the investment securities portfolio are shown by expected maturity. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Weighted average yield is based on amortized cost.

At December 31, 2018			
(dollars in thousands)	Amortized Cost	Fair Value	Weighted Average Yield
Available-for-Sale			
Within one year	\$ 101,077	\$ 101,138	2.58 %
One to five years	532,706	527,283	2.39
Five to ten years	483,510	482,231	3.22
Beyond ten years	3,055,324	3,012,764	2.94
Total	\$4,172,617	\$4,123,416	2.89 %
Held-to-Maturity			
Within one year	\$ 30,188	\$ 30,352	3.96 %
One to five years	34,511	35,246	3.93
Five to ten years	72,442	74,199	4.44
Beyond ten years	369,193	366,306	3.58
Total	\$506,334	\$506,103	3.75 %

The following table summarizes the available-for-sale investment securities with unrealized losses at December 31 by aggregated major security type and length of time in a continuous unrealized loss position:

(dollars in thousands)	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

Total held-to-maturity	\$2,309	\$ (8) \$—	\$ —	\$2,309	\$ (8

The unrecognized losses on held-to-maturity investment securities presented in the table above include unrecognized losses on securities that were transferred from available-for-sale to held-to-maturity totaling \$10.7 million at December 31, 2018. There were no unrecognized losses on securities that were transferred from available-for-sale to held-to-maturity at December 31, 2017.

Management evaluates debt securities for OTTI at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. Management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

When OTTI occurs, the amount of the OTTI recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the OTTI shall be recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. Otherwise, the OTTI shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total OTTI related to other factors shall be recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the OTTI recognized in earnings shall become the new amortized cost basis of the investment.

We did not record OTTI in 2018, 2017, or 2016.

As of December 31, 2018, Old National's securities portfolio consisted of 2,100 securities, 791 of which were in an unrealized loss position. The unrealized losses attributable to our U.S. Treasury, U.S. government-sponsored entities

and agencies, agency mortgage-backed securities, states and political subdivisions, and other securities are the result of fluctuations in interest rates. Our pooled trust preferred securities are discussed below. At December 31, 2018, we had no intent to sell any securities that were in an unrealized loss position nor is it expected that we would be required to sell any securities.

Pooled Trust Preferred Securities

At December 31, 2018, our securities portfolio contained two pooled trust preferred securities with a fair value of \$8.5 million and unrealized losses of \$5.4 million. These securities are not subject to FASB ASC 325-10 and are evaluated using collateral-specific assumptions to estimate the expected future interest and principal cash flows. For the years ended December 31, 2018 and 2017, our analysis indicated no OTTI on these securities.

During the first quarter of 2018, Old National sold a pooled trust security that fell within the scope of FASB ASC 325-10 (EITF 99-20). Proceeds from the sale were \$1.8 million, which resulted in a loss of \$0.9 million. Although Old National typically does not sell securities in an unrealized loss position, this security was sold because the final liquidation value was significantly higher than our assessment of value for this position.

The table below summarizes the relevant characteristics of our pooled trust preferred securities as well as our single issuer trust preferred securities that are included in the “other securities” category in this footnote. Each of the pooled trust preferred securities support a more senior tranche of security holders. Both pooled trust preferred securities have experienced credit defaults. However, these securities have excess subordination and are not other-than-temporarily impaired as a result of their class hierarchy, which provides more loss protection.

Trust preferred securities								Actual	Expected	Excess

(1)Lowest rating for the security provided by any nationally recognized credit rating agency.

NOTE 4 – LOANS HELD FOR SALE

Mortgage loans held for immediate sale in the secondary market were \$14.9 million at December 31, 2018, compared to \$17.9 million at December 31, 2017. Residential loans that Old National has originated with the intent to sell are recorded at fair value in accordance with FASB ASC 825-10, *Financial Instruments*. Conventional mortgage production is sold on a servicing retained basis. Certain loans, such as government guaranteed mortgage loans are sold on servicing released basis.

NOTE 5 – LOANS AND ALLOWANCE FOR LOAN LOSSES

Old National's loans consist primarily of loans made to consumers and commercial clients in various industries including manufacturing, agribusiness, transportation, mining, wholesaling, and retailing. Most of Old National's lending activity occurs within our principal geographic markets of Indiana, Kentucky, Michigan, Wisconsin, and Minnesota. Old National manages concentrations of credit exposure by industry, product, geography, customer relationship, and loan size. While loans to lessors of both residential and non-residential real estate exceed 10% of total loans, no individual sub-segment category within those broader categories reaches the 10% threshold.

The composition of loans at December 31 by lending classification was as follows:

(dollars in thousands)	December 31,	
	2018	2017
Commercial (1)	\$3,232,970	\$2,717,269
Commercial real estate:		
Construction	504,625	374,306
Other	4,454,226	3,980,246
Residential real estate	2,248,404	2,167,053
Consumer credit:		
Home equity	589,322	507,507
Auto	1,059,633	1,148,672
Other	154,712	223,068
Total loans	12,243,892	11,118,121
Allowance for loan losses	(55,461)	(50,381)
Net loans	\$12,188,431	\$11,067,740

(1) Includes direct finance leases of \$60.0 million at December 31, 2018 and \$29.5 million at December 31, 2017.

The risk characteristics of each loan portfolio segment are as follows:

Commercial

Commercial loans are primarily based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may incorporate a personal guarantee; however, some loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial Real Estate

These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves higher loan principal amounts, and the repayment of these loans is generally dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. The properties securing Old National's commercial real estate portfolio are diverse in terms of type and geographic location. Management monitors and evaluates commercial real estate loans based on collateral, geography and risk grade criteria. In addition, management tracks the level of owner-occupied commercial real estate loans versus non-owner occupied loans.

Included with commercial real estate are construction loans, which are underwritten utilizing independent appraisal reviews, sensitivity analysis of absorption and lease rates, financial analysis of the developers and property owners, and feasibility studies, if available. Construction loans are generally based on estimates of costs and value associated with the complete project. These estimates may be inaccurate. Construction loans often involve the disbursement of substantial funds with repayment substantially dependent on the success of the ultimate project. Sources of repayment

for these types of loans may be pre-committed permanent loans from approved long-term lenders (including Old National), sales of developed property, or an interim loan commitment from Old National until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, governmental regulation of real property, general economic conditions, and the availability of long-term financing.

The acquisition of Klein on November 1, 2018 added \$559.5 million of commercial real estate loans to our portfolio. At 198%, Old National Bank's commercial real estate loans as a percentage of its risk-based capital remained well below the regulatory guideline limit of 300% at December 31, 2018.

Residential

With respect to residential loans that are secured by 1-4 family residences and are generally owner occupied, Old National typically establishes a maximum loan-to-value ratio and generally requires private mortgage insurance if that ratio is exceeded. Repayment of these loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions in their market areas such as unemployment levels. Repayment can also be impacted by changes in residential property values. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

Consumer

Home equity loans are typically secured by a subordinate interest in 1-4 family residences, and consumer loans are secured by consumer assets such as automobiles or recreational vehicles. Some consumer loans are unsecured such as small installment loans and certain lines of credit. Repayment of these loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions in their market areas such as unemployment levels. Repayment can also be impacted by changes in residential property or other collateral values. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers. Old National assumed student loans in the acquisition of Anchor (WI) in May 2016. Student loans are guaranteed by the government from 97% to 100% and totaled \$68.2 million at December 31, 2017. Old National sold the remaining student loan portfolio totaling \$64.9 million during the second quarter of 2018, resulting in a \$2.2 million gain that is included in other income on the income statement.

Related Party Loans

In the ordinary course of business, Old National grants loans to certain executive officers, directors, and significant subsidiaries (collectively referred to as “related parties”).

Activity in related party loans during 2018 is presented in the following table:

	Year Ended December 31, 2018
(dollars in thousands)	
Balance at beginning of period	\$ 9,481
New loans	9,152
Repayments	(8,721)
Officer and director changes	(602)
Balance at end of period	\$ 9,310

Allowance for Loan Losses

The allowance for loan losses is maintained at a level believed adequate by management to absorb probable losses incurred in the consolidated loan portfolio. Management’s evaluation of the adequacy of the allowance is an estimate based on reviews of individual loans, pools of homogeneous loans, assessments of the impact of current and anticipated economic conditions on the portfolio, and historical loss experience. The allowance is increased through a provision charged to operating expense. Loans deemed to be uncollectible are charged to the allowance. Recoveries of loans previously charged-off are added to the allowance.

We utilize a PD and LGD model as a tool to determine the adequacy of the allowance for loan losses for performing commercial and commercial real estate loans. The PD is forecast using a transition matrix to determine the likelihood of a customer's AQR migrating from its current AQR to any other status within the time horizon. Transition rates are measured using Old National's own historical experience. The model assumes that recent historical transition rates will continue into the future. The LGD is defined as credit loss incurred when an obligor of the bank defaults. The sum of all net charge-offs for a particular portfolio segment are divided by all loans that have defaulted over a given period of time. The expected loss derived from the model considers the PD, LGD, and exposure at default. Additionally, qualitative factors, such as changes in lending policies or procedures, and economic business conditions are also considered.

We use historic loss ratios adjusted for economic conditions to determine the appropriate level of allowance for residential real estate and consumer loans.

No allowance was brought forward on any of the acquired loans as any credit deterioration evident in the loans was included in the determination of the fair value of the loans at the acquisition date. An allowance for loan losses will be established for any subsequent credit deterioration or adverse changes in expected cash flows.

Old National's activity in the allowance for loan losses for the years ended December 31, 2018, 2017, and 2016 was as follows:

(dollars in thousands)	Commercial				Total
	Commercial	Real Estate	Residential	Consumer	
2018

Credit Quality

Old National's management monitors the credit quality of its loans in an on-going manner. Internally, management assigns an AQR to each non-homogeneous commercial and commercial real estate loan in the portfolio, with the exception of certain FICO-scored small business loans. The primary determinants of the AQR are based upon the reliability of the primary source of repayment and the past, present, and projected financial condition of the borrower. The AQR will also consider current industry conditions. Major factors used in determining the AQR can vary based on the nature of the loan, but commonly include factors such as debt service coverage, internal cash flow, liquidity, leverage, operating performance, debt burden, FICO scores, occupancy, interest rate sensitivity, and expense

burden. Old National uses the following definitions for risk ratings:

Criticized. Special mention loans that have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Classified – Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Classified – Nonaccrual. Loans classified as nonaccrual have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection in full, on the basis of currently existing facts, conditions, and values, in doubt.

Classified – Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as nonaccrual, with the added characteristic that the weaknesses make collection in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Pass rated loans are those loans that are other than criticized, classified – substandard, classified – nonaccrual, or classified – doubtful.

The risk category of commercial and commercial real estate loans by class of loans at December 31, 2018 and 2017 was as follows:

(dollars in thousands)		Commercial		Commercial Real Estate - Construction		Commercial Real Estate - Other		
Credit Risk Profile by Internally Assigned Grade:	Commercial	Commercial	Commercial Real Estate - Construction	Commercial Real Estate - Construction	Commercial Real Estate - Other	Commercial Real Estate - Other	Commercial Real Estate - Other	
	2018	2017	2018	2017	2018	2017	2018	2017
Pass	\$3,029,130	\$2,577,824	\$460,158	\$357,438	\$4,167,902	\$3,762,896

Total	\$3,232,970	\$2,717,269	\$504,625	\$374,306	\$4,454,226	\$3,980,246		

Old National considers the performance of the loan portfolio and its impact on the allowance for loan losses. For residential and consumer loan classes, Old National also evaluates credit quality based on the aging status of the loan and by payment activity. The following table presents the recorded investment in residential and consumer loans based on payment activity at December 31, 2018 and 2017:

(dollars in thousands)		Consumer			
	Residential	Home Equity	Auto	Other	
December 31, 2018					
Performing	\$2,223,450	\$586,235	\$1,057,038	\$153,113	
Nonperforming	24,954	3,087	2,595	1,599	
Total	\$2,248,404	\$589,322	\$1,059,633	\$154,712	
December 31, 2017					
Performing	\$2,144,882	\$502,322	\$1,145,977	\$217,819	
Nonperforming	22,171	5,185	2,695	5,249	
Total	\$2,167,053	\$507,507	\$1,148,672	\$223,068	

Impaired Loans

Large commercial credits are subject to individual evaluation for impairment. Retail credits and other small balance credits that are part of a homogeneous group are not tested for individual impairment unless they are modified as a TDR. A loan is considered impaired when it is probable that contractual interest and principal payments will not be

collected either for the amounts or by the dates as scheduled in the loan agreement. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported net, at the present value of estimated cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Old National's policy, for all but PCI loans, is to recognize interest income on impaired loans unless the loan is placed on nonaccrual status.

The following table shows Old National's impaired loans at December 31, 2018 and 2017, respectively. Only purchased loans that have experienced subsequent impairment since the date acquired (excluding loans acquired with deteriorated credit quality) are included in the table below.

(dollars in thousands)	Recorded Investment	Unpaid Principal Balance	Related Allowance

Total	\$111,359	\$100,772	\$106,638

Old National does not record interest on nonaccrual loans until principal is recovered. Interest income recognized on impaired loans during 2018, 2017, and 2016 was immaterial.

For all loan classes, a loan is generally placed on nonaccrual status when principal or interest becomes 90 days past due unless it is well secured and in the process of collection, or earlier when concern exists as to the ultimate collectibility of principal or interest. Interest accrued during the current year on such loans is reversed against interest income. Interest accrued in the prior year, if any, is charged to the allowance for loan losses. Cash interest received on these loans is applied to the principal balance until the principal is recovered or until the loan returns to accrual status. Loans may be returned to accrual status when all the principal and interest amounts contractually due are brought current, remain current for a prescribed period, and future payments are reasonably assured.

Loans accounted for under FASB ASC Topic 310-30 accrue interest, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period loan loss provision or prospective yield adjustments.

Old National's past due loans as of December 31 were as follows:

(dollars in thousands)	30-59 Days	60-89 Days	Past Due 90 Days or More and	Nonaccrual (1)	Total	
	Past Due	Past Due	Accruing		Past Due	Current
December 31, 2018

Total	\$ 34,102	\$ 7,011	\$ 894	\$ 124,927	\$166,934	\$10,951,187

(1) Includes purchased credit impaired loans of \$20.5 million at December 31, 2018 and \$12.6 million at December 31, 2017 that are categorized as nonaccrual for credit analysis purposes because the collection of principal or interest is doubtful. However, these loans are accounted for under FASB ASC 310-30 and accordingly treated as performing assets.

Loan Participations

Old National has loan participations, which qualify as participating interests, with other financial institutions. At December 31, 2018, these loans totaled \$924.8 million, of which \$461.7 million had been sold to other financial institutions and \$463.1 million was retained by Old National. The loan participations convey proportionate ownership rights with equal priority to each participating interest holder; involve no recourse (other than ordinary representations and warranties) to, or subordination by, any participating interest holder; all cash flows are divided among the participating interest holders in proportion to each holder's share of ownership; and no holder has the right to pledge the entire financial asset unless all participating interest holders agree.

Troubled Debt Restructurings

Old National may choose to restructure the contractual terms of certain loans. The decision to restructure a loan, versus aggressively enforcing the collection of the loan, may benefit Old National by increasing the ultimate probability of collection.

Any loans that are modified are reviewed by Old National to identify if a TDR has occurred, which is when for economic or legal reasons related to a borrower's financial difficulties, Old National Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status. The modification of the terms of such loans include one or a combination of the following: a reduction of the stated interest rate of the loan, an extension of the maturity date at a stated rate of interest lower than the current market rate of new debt with similar risk, or a permanent reduction of the recorded investment of the loan.

Loans modified in a TDR are typically placed on nonaccrual status until we determine the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrate a period of performance according to the restructured terms for six months.

If we are unable to resolve a nonperforming loan issue, the credit will be charged off when it is apparent there will be a loss. For large commercial type loans, each relationship is individually analyzed for evidence of apparent loss based on quantitative benchmarks or subjectively based upon certain events or particular circumstances. Generally, Old National charges off small commercial loans scored through our small business credit center with contractual balances under \$250,000 that are 90 days or more delinquent and do not have adequate collateral support. For residential and consumer loans, a charge off is recorded at the time foreclosure is initiated or when the loan becomes 120 to 180 days past due, whichever is earlier.

For commercial TDRs, an allocated reserve is established within the allowance for loan losses for the difference between the carrying value of the loan and its computed value. To determine the value of the loan, one of the following methods is selected: (1) the present value of expected cash flows discounted at the loan's original effective interest rate, (2) the loan's observable market price, or (3) the fair value of the collateral value, if the loan is collateral dependent. The allocated reserve is established as the difference between the carrying value of the loan and the collectable value. If there are significant changes in the amount or timing of the loan's expected future cash flows, impairment is recalculated and the valuation allowance is adjusted accordingly.

When a residential or consumer loan is identified as a TDR, the loan is typically written down to its collateral value less selling costs.

The following table presents activity in TDRs for the years ended December 31, 2018, 2017, and 2016:

(dollars in thousands)	Commercial				Total
	Commercial	Real Estate	Residential	Consumer	
2018					
Balance at beginning of period	\$ 12,088	\$ 34,705	\$ 3,315	\$ 3,895	\$54,003

Balance at end of period	\$ 16,802	\$ 18,327	\$ 2,985	\$ 2,602	\$40,716

Approximately \$26.3 million of the TDRs at December 31, 2018 were included with nonaccrual loans, compared to \$34.0 million at December 31, 2017. Old National has allocated specific reserves to customers whose loan terms have been modified in TDRs totaling \$3.0 million at December 31, 2018 and \$5.7 million at December 31, 2017. As of December 31, 2018, Old National had committed to lend an additional \$4.4 million to customers with outstanding loans that are classified as TDRs.

The pre-modification and post-modification outstanding recorded investments of loans modified as TDRs during the years ended December 31, 2018, 2017, and 2016 are the same except for when the loan modifications involve the forgiveness of principal. The following table presents loans by class modified as TDRs that occurred during the years ended December 31, 2018, 2017, and 2016:

(dollars in thousands)	Number	Pre-modification Outstanding	Post-modification Outstanding
	of Loans	Recorded Investment	Recorded Investment
2018			
Troubled Debt Restructuring:			
Commercial	6	\$ 3,544	\$ 3,544
Commercial Real Estate - Other	2	1,213	1,213

Total	10	\$ 5,691	\$ 5,691
2017			
Troubled Debt Restructuring:			
Commercial	11	\$ 13,388	\$ 13,388
Commercial Real Estate - Other	12	27,749	27,749
Residential	6	938	938
Consumer	7	2,568	2,568
Total	36	\$ 44,643	\$ 44,643
2016			
Troubled Debt Restructuring:			
Commercial	20	\$ 14,996	\$ 14,996
Commercial Real Estate - Other	10	11,130	11,130
Residential	6	761	761
Consumer	8	385	385
Total	44	\$ 27,272	\$ 27,272

The TDRs that occurred during 2018 did not have a material impact on the allowance for loan losses and resulted in no charge-offs during 2018. The TDRs that occurred during 2017 increased the allowance for loan losses by \$2.7 million and resulted in \$0.2 million of charge-offs during 2017. The TDRs that occurred during 2016 decreased the allowance for loan losses by \$2.3 million due to a change in collateral position on a large commercial loan and resulted in \$0.8 million of charge-offs during 2016.

A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

TDRs for which there was a payment default within twelve months following the modification during the year were insignificant in 2018, 2017, and 2016.

The terms of certain other loans were modified during 2018 that did not meet the definition of a TDR. It is our process to review all classified and criticized loans that, during the period, have been renewed, have entered into a forbearance agreement, have gone from principal and interest to interest only, or have extended the maturity date. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on its debt in the foreseeable future without the modification. The evaluation is performed under our internal underwriting policy. We also evaluate whether a concession has been granted or if we were adequately compensated through a market interest rate, additional collateral or a bona fide guarantee. We also consider whether the modification was insignificant relative to the other terms of the agreement or the delay in a payment.

PCI loans are not considered impaired until after the point at which there has been a degradation of cash flows below our expected cash flows at acquisition. If a PCI loan is subsequently modified, and meets the definition of a TDR, it will be removed from PCI accounting and accounted for as a TDR only if the PCI loan was being accounted

for individually. If the PCI loan is being accounted for as part of a pool, it will not be removed from the pool. As of December 31, 2018, it has not been necessary to remove any loans from PCI accounting.

In general, once a modified loan is considered a TDR, the loan will always be considered a TDR, and therefore impaired, until it is paid in full, otherwise settled, sold or charged off. However, guidance also permits for loans to be removed from TDR status when subsequently restructured under these circumstances: (1) at the time of the subsequent restructuring, the borrower is not experiencing financial difficulties, and this is documented by a current credit evaluation at the time of the restructuring, (2) under the terms of the subsequent restructuring agreement, the institution has granted no concession to the borrower; and (3) the subsequent restructuring agreement includes market terms that are no less favorable than those that would be offered for a comparable new loan. For loans subsequently restructured that have cumulative principal forgiveness, the loan should continue to be measured in accordance with ASC 310-10, *Receivables – Overall*. However, consistent with ASC 310-40-50-2, *Troubled Debt Restructurings by Creditors, Creditor Disclosure of Troubled Debt Restructurings*, the loan would not be required to be reported in the years following the restructuring if the subsequent restructuring meets both of these criteria: (1) has an interest rate at the time of the subsequent restructuring that is not less than a market interest rate; and (2) is performing in compliance with its modified terms after the subsequent restructuring.

Purchased Credit Impaired Loans

Purchased loans acquired in a business combination are recorded at estimated fair value on their purchase date with no carryover of the related allowance for loan and lease losses. In determining the estimated fair value of purchased loans, management considers a number of factors including, among others, the remaining life of the acquired loans, estimated prepayments, estimated loss ratios, estimated value of the underlying collateral, and net present value of cash flows expected to be received. Purchased loans are accounted for in accordance with guidance for certain loans acquired in a transfer (ASC 310-30), when the loans have evidence of credit deterioration since origination and it is probable at the date of acquisition that the acquirer will not collect all contractually required principal and interest payments. The difference between contractually required payments and the cash flows expected to be collected at acquisition is referred to as the non-accretable difference. Subsequent decreases to the expected cash flows will generally result in a provision for loan and lease losses. Subsequent increases in expected cash flows will result in a reversal of the provision for loan losses to the extent of prior charges and then an adjustment to accretable yield, which would have a positive impact on interest income prospectively.

Old National has purchased loans for which there was, at acquisition, evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected. For these loans that meet the criteria of ASC 310-30 treatment, the carrying amount was as follows:

(dollars in thousands)	December 31,	
	2018	2017
Commercial	\$6,193	\$5,152
Commercial real estate	25,391	21,826
Residential	9,257	11,303
Consumer	3,552	5,245
Carrying amount	44,393	43,526
Allowance for loan losses	(478)	(166)
Carrying amount, net of allowance	\$43,915	\$43,360

The outstanding balance of loans accounted for under ASC 310-30, including contractual principal, interest, fees and penalties, was \$246.9 million at December 31, 2018 and \$235.9 million at December 31, 2017.

The accretable difference on PCI loans is the difference between the expected cash flows and the net present value of expected cash flows with such difference accreted into earnings using the effective yield method over the term of the loans. Accretion recorded as loan interest income totaled \$12.3 million during 2018 and \$15.2 million during 2017. Improvement in cash flow expectations has resulted in a reclassification from nonaccretable difference to accretable yield as shown in the table below.

101

Accretable yield of PCI loans, or income expected to be collected, was as follows:

(dollars in thousands)	Years Ended December 31,		
	2018	2017	2016
Balance at beginning of period	\$27,835	\$33,603	\$45,310
New loans purchased	2,384	1,556	3,217
Accretion of income	(12,252)	(15,217)	(23,447)
Reclassifications from (to) nonaccretable difference	6,133	7,614	10,589
Disposals/other adjustments	951	279	(2,066)
Balance at end of period	\$25,051	\$27,835	\$33,603

Included in Old National's allowance for loan losses is \$0.5 million related to the purchased loans disclosed above at December 31, 2018, compared to \$0.2 million at December 31, 2017.

PCI loans purchased during 2018 and 2017 for which it was probable at acquisition that all contractually required payments would not be collected were as follows:

(dollars in thousands)	Anchor (MN) (1)	Klein (2)
Contractually required payments	\$ 16,898	\$ 18,568
Nonaccretable difference	(4,787)) (4,521)
Cash flows expected to be collected at acquisition	12,111	14,047
Accretable yield	(1,556)) (2,384)
Fair value of acquired loans at acquisition	\$ 10,555	\$ 11,663

(1) Old National acquired Anchor (MN) effective November 1, 2017.

(2) Old National acquired Klein effective November 1, 2018.

Income would not be recognized on certain purchased loans if Old National could not reasonably estimate cash flows to be collected. Old National had no purchased loans for which it could not reasonably estimate cash flows to be collected.

NOTE 6 – OTHER REAL ESTATE OWNED

The following table presents activity in other real estate owned for the years ended December 31, 2018 and 2017:

(dollars in thousands)	Years Ended	
	2018	2017
Balance at beginning of period	\$8,810	\$18,546
Additions (1)	2,025	4,016
Sales	(6,689)	(11,160)
Impairment	(914)) (2,592)
Balance at end of period (2)	\$3,232	\$8,810

(1)

Additions in 2018 include other real estate owned of \$1.0 million acquired from Klein in November 2018. Additions in 2017 include other real estate owned of \$1.1 million acquired from Anchor (MN) in November 2017.

(2) Includes repossessed personal property of \$0.3 million at December 31, 2018 and 2017.

Foreclosed residential real estate property included in the table above totaled \$1.3 million at December 31, 2018 and \$1.6 million at December 31, 2017. Consumer mortgage loans collateralized by residential real property that were in the process of foreclosure totaled \$4.9 million at December 31, 2018 and \$5.2 million at December 31, 2017.

NOTE 7 – PREMISES AND EQUIPMENT

The composition of premises and equipment was as follows at December 31:

(dollars in thousands)	December 31,	
	2018	2017
Land	\$79,231	\$73,046
Buildings	365,102	343,833
Furniture, fixtures, and equipment	107,862	94,254
Leasehold improvements	42,288	38,918
Total	594,483	550,051
Accumulated depreciation	(108,571)	(91,977)
Premises and equipment, net	\$485,912	\$458,074

The increase in premises and equipment at December 31, 2018 was primarily due to \$33.4 million of assets attributable to the Klein acquisition.

Depreciation expense was \$23.8 million in 2018, \$22.2 million in 2017, and \$16.6 million in 2016.

Operating Leases

Old National rents certain premises and equipment under operating leases, which expire at various dates. Many of these leases require the payment of property taxes, insurance premiums, maintenance, and other costs. In some cases, rentals are subject to increase in relation to a cost-of-living index. The leases have original terms ranging from one year and five months to twenty-five years, and Old National has the right, at its option, to extend the terms of certain leases for five additional successive terms of five years. Old National does not have any material sub-lease agreements. See Note 1 to the consolidated financial statements for details regarding new guidance in Topic 842 that will affect the accounting for these leases effective January 1, 2019.

Rent expense was \$17.9 million in 2018, \$15.8 million in 2017, and \$25.4 million in 2016. The following is a summary of future minimum lease commitments as of December 31, 2018:

(dollars in thousands)	
2019	\$19,480
2020	18,416
2021	17,400
2022	15,169
2023	9,697
Thereafter	65,612
Total	\$145,774

Old National purchased 23 properties during 2016 that it had previously leased, 20 of which had deferred gains that were accelerated when the associated leases were terminated. These gains were partially offset by the recognition of

deferred rent expense, cease-use liabilities, and other expense, resulting in a net gain of \$12.0 million.

Old National had deferred gains remaining associated with prior sale leaseback transactions totaling \$6.5 million at December 31, 2018 and \$8.2 million at December 31, 2017. The deferred gains were eliminated as a cumulative-effect adjustment upon adoption of the new accounting guidance in Topic 842 effective January 1, 2019. See Note 1 to the consolidated financial statements for details regarding new accounting guidance in Topic 842.

Capital Leases

Old National leases two branch buildings and certain equipment under capital leases. See Note 14 to the consolidated financial statements for detail regarding these leases.

NOTE 8 – GOODWILL AND OTHER INTANGIBLE ASSETS

The following table shows the changes in the carrying amount of goodwill for the years ended December 31, 2018 and 2017:

(dollars in thousands)	Years Ended	
	December 31,	
	2018	2017
Balance at beginning of period	\$828,051	\$655,018
Acquisitions	208,787	173,033
Divestitures	(580)	—
Balance at end of period	\$1,036,258	\$828,051

Goodwill is reviewed annually for impairment. No events or circumstances since the August 31, 2018 annual impairment test were noted that would indicate it was more likely than not a goodwill impairment exists.

During 2018, Old National recorded \$208.0 million of goodwill associated with the acquisition of Klein and increased goodwill associated with the acquisition of Anchor (MN) by \$0.8 million. Also during 2018, Old National eliminated \$0.6 million of goodwill associated with the sale of branches to Marine Credit Union. See Note 2 to the consolidated financial statements for detail regarding changes in goodwill recorded in 2017 associated with acquisitions and divestitures.

The gross carrying amounts and accumulated amortization of other intangible assets at December 31, 2018 and 2017 were as follows:

(dollars in thousands)	Gross Carrying Amount	Accumulated Amortization and Impairment	Net Carrying Amount
December 31, 2018			
Core deposit	\$129,100	\$ (57,524)	\$71,576
Customer trust relationships	16,547	(11,107)	5,440
Total intangible assets	\$145,647	\$ (68,631)	\$77,016
December 31, 2017			
Core deposit	\$108,923	\$ (62,874)	\$46,049
Customer trust relationships	16,547	(9,533)	7,014
Customer loan relationships	4,413	(4,380)	33
Total intangible assets	\$129,883	\$ (76,787)	\$53,096

Other intangible assets consist of core deposit intangibles and customer relationship intangibles and are being amortized primarily on an accelerated basis over their estimated useful lives, generally over a period of 5 to 15 years. During 2018, Old National increased core deposit intangibles by \$39.0 million related to the Klein acquisition.

Old National reviews other intangible assets for possible impairment whenever events or changes in circumstances indicate that carrying amounts may not be recoverable. No impairment charges were recorded in 2018, 2017, or 2016. Total amortization expense associated with intangible assets was \$14.4 million in 2018, \$11.8 million in 2017, and \$12.5 million in 2016.

Estimated amortization expense for future years is as follows:

(dollars in thousands)

2019	\$ 16,929
2020	14,091
2021	11,336
2022	9,014
2023	7,053
Thereafter	18,593
Total	\$77,016

NOTE 9 – LOAN SERVICING RIGHTS

At December 31, 2018, loan servicing rights derived from loans sold with servicing retained totaled \$24.5 million, compared to \$24.7 million at December 31, 2017. Loans serviced for others are not reported as assets. The principal balance of loans serviced for others was \$3.306 billion at December 31, 2018, compared to \$3.321 billion at December 31, 2017. Approximately 99.7% of the loans serviced for others at December 31, 2018 were residential mortgage loans. Custodial escrow balances maintained in connection with serviced loans were \$10.7 million at December 31, 2018 and \$8.9 million at December 31, 2017.

The following table summarizes the activity related to loan servicing rights and the related valuation allowance in 2018 and 2017:

(dollars in thousands)	Years Ended	
	December 31,	
	2018	2017
Balance at beginning of period	\$24,690	\$25,629
Additions (1)	4,264	4,206
Amortization	(4,442)	(5,145)
Balance before valuation allowance at end of period	24,512	24,690
Valuation allowance:		
Balance at beginning of period	(29)	(68)
(Additions)/recoveries	14	39
Balance at end of period	(15)	(29)
Loan servicing rights, net	\$24,497	\$24,661

(1) Additions in 2018 include loan servicing rights of \$0.3 million acquired from Klein in November 2018.

At December 31, 2018, the fair value of servicing rights was \$27.4 million, which was determined using a discount rate of 12% and a weighted average prepayment speed of 119% PSA. At December 31, 2017, the fair value of servicing rights was \$25.8 million, which was determined using a discount rate of 13% and a weighted average prepayment speed of 140% PSA.

NOTE 10 – QUALIFIED AFFORDABLE HOUSING PROJECTS AND OTHER TAX CREDIT INVESTMENTS

Old National is a limited partner in several tax-advantaged limited partnerships whose purpose is to invest in approved qualified affordable housing, renewable energy, or other renovation or community revitalization projects. As of December 31, 2018, Old National expects to recover its remaining investments through the use of the tax credits that are generated by the investments.

105

The following table summarizes Old National's investments in qualified affordable housing projects and other tax credit investments at December 31, 2018 and 2017:

(dollars in thousands)	Accounting Method	December 31, 2018		December 31, 2017	
		Investment	Commitment (1)	Investment	Commitment
	Proportional amortization	\$28,396	\$ 2,238	\$31,183	\$ 15,553
LIHTC	Equity	16,815	17,945	10,645	12,040
FHTC	Equity	17	538	704	1,502
CReED	Equity	9,176	17,827	22,364	19,771
Renewable Energy		\$54,404	\$ 38,548	\$64,896	\$ 48,866
Total					

(1) All commitments will be paid by Old National by 2027.

The following table summarizes the amortization expense and tax benefit recognized for Old National's qualified affordable housing projects and other tax credit investments during 2018, 2017, and 2016:

(dollars in thousands)	Amortization Expense (1)	Tax Expense (Benefit) Recognized (2)
Year Ended December 31, 2018		
LIHTC	\$ 2,585	\$ (3,349)
FHTC	9,206	(10,775)
CReED (3)	687	(687)
Renewable Energy	13,055	(14,566)
Total	\$ 25,533	\$ (29,377)
Year Ended December 31, 2017		
LIHTC	\$ 1,922	\$ (2,666)
FHTC	10,441	(11,348)
CReED (3)	800	(1,074)
Renewable Energy	492	(613)
Total	\$ 13,655	\$ (15,701)
Year Ended December 31, 2016		
LIHTC	\$ 804	\$ (1,125)
FHTC	—	—
CReED (3)	—	—
Total	\$ 804	\$ (1,125)

(1) The amortization expense for the LIHTC investments are included in our income tax expense. The amortization expense for the FHTC, CReED, and Renewable Energy tax credits are included in noninterest expense.

(2) All of the tax benefits recognized are included in our income tax expense. The tax benefit recognized for the FHTC, CReED, and Renewable Energy investments primarily reflects the tax credits generated from the

investments and excludes the net tax expense/benefit of the investments' income (loss).

(3) The CReED tax credit investment qualifies for an Indiana state tax credit.

106

NOTE 11 – DEPOSITS

The aggregate amount of time deposits in denominations of \$250,000 or more was \$612.7 million at December 31, 2018 and \$422.3 million at December 31, 2017. At December 31, 2018, the scheduled maturities of total time deposits were as follows:

(dollars in thousands)	
Due in 2019	\$ 1,505,694
Due in 2020	277,142
Due in 2021	109,890
Due in 2022	52,697
Due in 2023	54,637
Thereafter	24,196
Total	\$ 2,024,256

NOTE 12 – SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Securities sold under agreements to repurchase are secured borrowings. Old National pledges investment securities to secure these borrowings. The following table presents securities sold under agreements to repurchase and related weighted-average interest rates for each of the years ended December 31:

(dollars in thousands)	2018	2017
Outstanding at year-end	\$ 362,294	\$ 384,810
Average amount outstanding	344,964	336,539
Maximum amount outstanding at any month-end	364,001	402,543
Weighted-average interest rate:		
During year	0.57	% 0.38
End of year	0.75	0.49

The following table presents the contractual maturity of our secured borrowings and class of collateral pledged:

(dollars in thousands)	At December 31, 2018				
	Remaining Contractual Maturity of the Agreements				
	Overnight and	Up to	Up to	Greater Than	Total
	Continuous	30	30-90	90 days	
Repurchase Agreements:		Days	Days	90 days	
U.S. Treasury and agency securities	\$ 362,294	\$ —	\$ —	\$ —	\$ 362,294
Total	\$ 362,294	\$ —	\$ —	\$ —	\$ 362,294

The fair value of securities pledged to secure repurchase agreements may decline. Old National has pledged securities valued at 122% of the gross outstanding balance of repurchase agreements at December 31, 2018 to manage this risk.

NOTE 13 – FEDERAL HOME LOAN BANK ADVANCES

The following table summarizes Old National Bank’s FHLB advances at December 31:

(dollars in thousands)	December 31,	
	2018	2017
FHLB advances (fixed rates 1.50% to 6.08% and variable rates 2.51% to 2.75%) maturing January 2019 to October 2028	\$1,603,643	\$1,610,531
ASC 815 fair value hedge and other basis adjustments	9,838	(952)
Total other borrowings	\$1,613,481	\$1,609,579

FHLB advances had weighted-average rates of 2.56% at December 31, 2018 and 1.55% at December 31, 2017. These borrowings are collateralized by investment securities and residential real estate loans up to 140% of outstanding debt.

Contractual maturities of FHLB advances at December 31, 2018 were as follows:

(dollars in thousands)	
Due in 2019	\$326,474
Due in 2020	100,000
Due in 2021	20,000
Due in 2022	57,000
Due in 2023	169
Thereafter	1,100,000
ASC 815 fair value hedge and other basis adjustments	9,838
Total	\$1,613,481

NOTE 14 – OTHER BORROWINGS

The following table summarizes Old National’s other borrowings at December 31:

	December 31,	
(dollars in thousands)	2018	2017
Old National Bancorp:		
Senior unsecured notes (fixed rate 4.125%)		
maturing August 2024	\$175,000	\$175,000
Unamortized debt issuance costs related		
to senior unsecured bank notes	(870)	(1,026)
Junior subordinated debentures (variable rates		
of 4.01% to 6.39%) maturing April 2032		
to June 2037	60,310	60,310
Other basis adjustments	(3,046)	(3,585)
Old National Bank:		
Capital lease obligations	5,262	5,389
Subordinated debentures (fixed rate 5.75%)	12,000	12,000
Other	(773)	694
Total other borrowings	\$247,883	\$248,782

Contractual maturities of other borrowings at December 31, 2018 were as follows:

(dollars in thousands)

Due in 2019	\$ 137
Due in 2020	147
Due in 2021	160
Due in 2022	172
Due in 2023	196
Thereafter	250,382
Unamortized debt issuance costs and other	
basis adjustments	(3,311)
Total	\$247,883

Senior Notes

In August 2014, Old National issued \$175.0 million of senior unsecured notes with a 4.125% interest rate. These notes pay interest on February 15 and August 15. The notes mature on August 15, 2024.

Junior Subordinated Debentures

Junior subordinated debentures related to trust preferred securities are classified in “other borrowings.” With the addition of Anchor (MN) assets, these securities now qualify as Tier 2 capital for regulatory purposes, subject to certain limitations. Prior to the fourth quarter of 2017, these securities qualified as Tier 1 capital for regulatory purposes.

108

Through various acquisitions, Old National assumed junior subordinated debenture obligations related to various trusts that issued trust preferred securities. Old National guarantees the payment of distributions on the trust preferred securities issued by the trusts. Proceeds from the issuance of each of these securities were used to purchase junior subordinated debentures with the same financial terms as the securities issued by the trusts.

Old National, at any time, may redeem the junior subordinated debentures at par and, thereby cause a redemption of the trust preferred securities in whole or in part.

The following table summarizes the terms of our outstanding junior subordinated debentures as of December 31, 2018:

(dollars in thousands)		Issuance		Rate at		Maturity Date
Name of Trust	Issuance Date	Amount	Rate	2018	December 31,	
VFSC Capital Trust I	April 2002	\$ 3,093	6-month LIBOR plus 3.70%	6.39%		April 22, 2032
VFSC Capital Trust II	October 2002	4,124	3-month LIBOR plus 3.45%	6.09%		November 7, 2032
VFSC Capital Trust III	April 2004	3,093	3-month LIBOR plus 2.80%	5.57%		September 8, 2034
St. Joseph Capital Trust II	March 2005	5,000	3-month LIBOR plus 1.75%	4.54%		March 17, 2035
Anchor Capital Trust III	August 2005	5,000	3-month LIBOR plus 1.55%	4.35%		September 30, 2035
Tower Capital Trust 2	December 2005	8,000	3-month LIBOR plus 1.34%	4.14%		December 30, 2035
Home Federal Statutory						
Trust I Monroe Bancorp Capital	September 2006	15,000	3-month LIBOR plus 1.65%	4.44%		September 15, 2036
Trust I Tower Capital Trust 3	July 2006	3,000	3-month LIBOR plus 1.60%	4.01%		October 7, 2036
Monroe Bancorp Statutory	December 2006	9,000	3-month LIBOR plus 1.69%	4.43%		March 1, 2037
Trust II	March 2007	5,000	3-month LIBOR plus 1.60%	4.39%		June 15, 2037
Total		\$60,310				

Subordinated Debentures

On November 1, 2017, Old National assumed \$12.0 million of subordinated fixed-to-floating notes related to the acquisition of Anchor (MN). The subordinated debentures have a 5.75% fixed rate of interest through October 29, 2020. From October 30, 2020 to the October 30, 2025 maturity date, the debentures have a floating rate of interest equal to the three-month LIBOR rate plus 4.356%.

Capital Lease Obligations

On January 1, 2004, Old National entered into a long-term capital lease obligation for a branch office building in Owensboro, Kentucky, which extends for 25 years with one renewal option for 10 years. The economic substance of this lease is that Old National is financing the acquisition of the building through the lease and accordingly, the building is recorded as an asset and the lease is recorded as a liability. The fair value of the capital lease obligation

was estimated using a discounted cash flow analysis based on Old National's current incremental borrowing rate for similar types of borrowing arrangements.

On November 1, 2017, Old National assumed a capital lease obligation for a banking center in Arden Hills, Minnesota related to the acquisition of Anchor (MN). The remaining base term of the lease is five years with one renewal option of ten years. For purposes of measuring the lease obligation, we determined that we would be "reasonably assured" to exercise the renewal option. The fair value of the capital lease obligation was estimated using a discounted cash flow analysis based on a market rate for similar types of borrowing arrangements. Based on the above assumptions, Old National measured the capital lease obligation at \$1.5 million as of the date of acquisition.

At December 31, 2018, the future minimum lease payments under the capital lease arrangements were as follows:

(dollars in thousands)	
2019	\$ 589
2020	589
2021	589
2022	589
2023	599
Thereafter	8,676
Total minimum lease payments	11,631
Less amounts representing interest	(6,369)
Present value of net minimum lease payments	\$ 5,262

See Note 1 to the consolidated financial statements for details regarding new guidance in Topic 842 that will affect the accounting for these leases effective January 1, 2019.

NOTE 15 – ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table summarizes the changes within each classification of AOCI, net of tax, for the years ended December 31, 2018, 2017, and 2016:

	Unrealized				
	Gains and	Unrealized	Gains		
	Losses on	Gains and	and		
	Available-	Losses on	Losses	Defined	
	for-Sale	Held-to-	on	Benefit
