UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the Fiscal Year Ended December 31, 2015
Commission File Number 0-7087

Astronics Corporation
(Exact Name of Registrant as Specified in its Charter)

New York 16-0959303
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

130 Commerce Way, East Aurora, N.Y. 14052
(Address of principal executive office)
Registrant's telephone number, including area code (716) 805-1599
Securities registered pursuant to Section 12(b) of the Act: None
Securities registered pursuant to Section 12(g) of the Act:
\$.01 par value Common Stock; \$.01 par value Class B Stock
(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer", an "accelerated filer", a "non-accelerated filer" and a "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller Reporting Company

Edgar Filing: ASTRONICS CORP - Form 10-K

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of February 18, 2016, 25,600,468 shares were outstanding, consisting of 19,474,585 shares of Common Stock \$.01 par value and 6,125,883 shares of Class B Stock \$.01 par value. The aggregate market value, as of the last business day of the Company's most recently completed second fiscal quarter, of the shares of Common Stock and Class B Stock of Astronics Corporation held by non-affiliates was approximately \$1,291,000,000 (assuming conversion of all of the outstanding Class B Stock into Common Stock and assuming the affiliates of the Registrant to be its directors, executive officers and persons known to the Registrant to beneficially own more than 10% of the outstanding capital stock of the Corporation).

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Company's Proxy Statement for the 2016 Annual Meeting of Shareholders to be held June 1, 2016 are incorporated by reference into Part III of this Report.

FORWARD LOOKING STATEMENTS

Information included or incorporated by reference in this report that does not consist of historical facts, including statements accompanied by or containing words such as “may,” “will,” “should,” “believes,” “expects,” “expected,” “intends,” “projects,” “approximate,” “estimates,” “predicts,” “potential,” “outlook,” “forecast,” “anticipates,” “presume” and “assume,” forward-looking statements. Such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not guarantees of future performance and are subject to several factors, risks and uncertainties, the impact or occurrence of which could cause actual results to differ materially from the expected results described in the forward-looking statements. Certain of these factors, risks and uncertainties are discussed in the sections of this report entitled “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” New factors, risks and uncertainties may emerge from time to time that may affect the forward-looking statements made herein. Given these factors, risks and uncertainties, investors should not place undue reliance on forward-looking statements as predictive of future results. We disclaim any obligation to update the forward-looking statements made in this report.

Table of Contents

PART I

ITEM 1. BUSINESS

Astronics Corporation (“Astronics” or the “Company”) is a leading supplier of products to the global aerospace, defense, electronics and semiconductor industries. Our products and services include advanced, high-performance electrical power generation, distribution and motion systems, lighting & safety systems, avionics products, aircraft structures, systems certification and automated test systems.

We have operations in the United States (“U.S.”), Canada and France. We design and build our products through our wholly owned subsidiaries Astronics Advanced Electronic Systems Corp. (“AES”); Astronics AeroSat Corporation (“AeroSat”); Ballard Technology, Inc. (“Ballard”); Astronics DME LLC (“DME”); Luminescent Systems, Inc. (“LSI”); Luminescent Systems Canada, Inc. (“LSI Canada”); Max-Viz, Inc. (“Max-Viz”); Peco, Inc. (“Peco”); PGA Electronic s.a. (“PGA”); Astronics Test Systems, Inc. and Armstrong Aerospace, Inc. (“Armstrong”). We have two reportable segments, Aerospace and Test Systems.

Acquisitions

On July 18, 2013, Astronics acquired all of the outstanding capital stock of Peco. Peco designs and manufactures highly engineered commercial aerospace interior components and systems for the aerospace industry. Peco is included in our Aerospace segment.

On October 1, 2013, Astronics acquired certain assets and liabilities from AeroSat Corporation and related entities, a manufacturer of fuselage and tail-mounted antenna systems for commercial transport, business jet, and military aircraft. AeroSat is included in our Aerospace segment.

On December 5, 2013, Astronics acquired all of the outstanding capital stock of PGA. PGA designs and manufactures seat motion and lighting systems primarily for business and first class aircraft seats and is Europe’s leading provider of in-flight entertainment/communication systems as well as cabin management systems for private aircraft. PGA is included in our Aerospace segment.

On February 28, 2014, Astronics acquired, through its wholly-owned subsidiary Astronics Test Systems, Inc. (“ATS”), certain assets and liabilities of EADS North America’s Test and Services division, located in Irvine, California. ATS is a leading provider of highly engineered automatic test systems, subsystems and instruments for semiconductor and consumer electronics products to both the commercial and defense industries. ATS is included in our Test Systems segment.

On January 14, 2015, the Company acquired all of the outstanding stock of Armstrong, located in Itasca, Illinois. Armstrong is a leading provider of engineering, design and certification solutions for commercial aircraft, specializing in connectivity, in-flight entertainment, and electrical power systems. Armstrong is included in our Aerospace segment.

Products and Customers

Our Aerospace segment designs and manufactures products for the global aerospace industry. Product lines include lighting and safety systems, electrical power generation, distribution and motions systems, aircraft structures, avionics products, systems certification and other products. Our Aerospace customers are the airframe manufacturers (“OEM”) that build aircraft for the commercial, military and general aviation markets, suppliers to those OEM’s, aircraft operators such as airlines and branches of the U.S. Department of Defense as well as the Federal Aviation Administration and airport operators. During 2015, this segment’s sales were divided 83% to the commercial transport market, 8% to the military aircraft market, 6% to the business jet market and 3% to other markets. Most of this segment’s sales are a result of contracts or purchase orders received from customers, placed on a day-to-day basis or for single year procurements rather than long-term multi-year contract commitments. On occasion, the Company does receive contractual commitments or blanket purchase orders from our customers covering multiple-year deliveries of hardware to our customers.

Our Test Systems segment designs, develops, manufactures and maintains automated test systems that support the semiconductor, aerospace, communications and weapons test systems as well as training and simulation devices for both commercial and military applications. In the Test Systems segment, Astronics’ products are sold to a global customer base including OEMs and prime government contractors for both electronics and military products. During 2015, this segment’s sales were divided 65% to the semiconductor market and 35% to the aerospace & defense market.

Before the acquisition of ATS in February 2014, this segment's sales were all to the military market.

4

Table of Contents

Sales by segment, geographic region, major customer and foreign operations are provided in Note 18 of Item 8, Financial Statements and Supplementary Data in this report.

We have a significant concentration of business with three major customers; Panasonic Avionics Corporation (“Panasonic”), Apple Inc. (“Apple”), and The Boeing Company (“Boeing”). Sales to Panasonic accounted for 21.0% of sales in 2015, 17.7% of sales in 2014 and 29.6% of sales in 2013. Sales to Apple accounted for 13.1% of sales in 2015 and 17.9% of sales in 2014. Sales to Boeing accounted for 13.0% of sales in 2015, 14.1% of sales in 2014 and 14.5% of sales in 2013.

Strategy

Our strategy is to increase our value by developing technologies and capabilities either internally or through acquisition, and using those capabilities to provide innovative solutions to the aerospace & defense, semiconductor and other markets where our technology can be beneficial.

Practices as to Maintaining Working Capital

Liquidity is discussed in Part II, Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, in the Liquidity section of this report.

Competitive Conditions

We experience considerable competition in the market sectors we serve, principally with respect to product performance and price, from various competitors, many of which are substantially larger and have greater resources. Success in the markets we serve depends upon product innovation, customer support, responsiveness and cost management. We continue to invest in developing the technologies and engineering support critical to competing in our markets.

Government Contracts

All U.S. government contracts, including subcontracts where the U.S. government is the ultimate customer, may be subject to termination at the election of the government. Our revenue stream relies on military spending.

Approximately 14% of our consolidated sales were made to the military aircraft and military test systems markets combined.

Raw Materials

Materials, supplies and components are purchased from numerous sources. We believe that the loss of any one source, although potentially disruptive in the short-term, would not materially affect our operations in the long-term.

Seasonality

Our business is typically not seasonal.

Backlog

At December 31, 2015, our backlog was \$274.4 million. At December 31, 2014, our backlog was \$370.7 million. Backlog in the Aerospace segment was \$212.7 million at December 31, 2015, of which \$186.8 million is expected to be realized in 2016. Backlog in the Test Systems segment was \$61.7 million at December 31, 2015, of which \$49.3 million is expected to be realized in 2016.

Patents

We have a number of patents. While the aggregate protection of these patents is of value, our only material business that is dependent upon the protection afforded by these patents is our cabin power distribution products. Our patents and patent applications relate to electroluminescence, instrument panels, keyboard technology and a broad patent covering the cabin power distribution technology. We regard our expertise and techniques as proprietary and rely upon trade secret laws and contractual arrangements to protect our rights. We have trademark protection in our major markets.

Table of Contents

Research, Development and Engineering Activities

We are engaged in a variety of engineering and design activities as well as basic research and development activities directed to the substantial improvement or new application of our existing technologies. These costs are expensed when incurred and included in cost of sales. Research, development and engineering costs amounted to approximately \$90.1 million in 2015, \$76.7 million in 2014 and \$52.8 million in 2013.

Employees

We employed approximately 2,300 employees at December 31, 2015. We consider our relations with our employees to be good. Except for the hourly production workforce at Peco, none of our employees are subject to collective bargaining agreements.

Stock Distribution

On September 10, 2015, the Company announced a three-for-twenty distribution of Class B Stock to holders of both Common and Class B Stock. Stockholders received three shares of Class B Stock for every twenty shares of Common and Class B Stock held on the record date of October 8, 2015. Fractional shares were paid in cash. All share quantities, share prices and per share data reported throughout this report have been adjusted to reflect the impact of this distribution.

Available information

We file our financial information and other materials as electronically required with the Securities and Exchange Commission ("SEC"). These materials can be accessed electronically via the Internet at www.sec.gov. Such materials and other information about the Company are also available through our website at www.astronics.com.

ITEM 1A. RISK FACTORS

The loss of Panasonic, Apple or Boeing as major customers or a significant reduction in sales to any or all of those three customers would reduce our sales and earnings. In 2015, we had a concentration of sales to Panasonic, Apple and Boeing representing approximately 21.0%, 13.1% and 13.0% of our sales, respectively. The loss of one or all of these customers or a significant reduction in sales to them would significantly reduce our sales and earnings. The amount of debt we have outstanding, as well as any debt we may incur in the future, could have an adverse effect on our operational and financial flexibility. As of December 31, 2015, we had approximately \$169.8 million of debt outstanding, of which \$167.2 million is long-term debt. Changes to our level of debt subsequent to December 31, 2015 could have significant consequences to our business, including the following:

Depending on interest rates and debt maturities, a substantial portion of our cash flow from operations could be dedicated to paying principal and interest on our debt, thereby reducing funds available for our acquisition strategy, capital expenditures or other purposes;

A significant amount of debt could make us more vulnerable to changes in economic conditions or increases in prevailing interest rates;

Our ability to obtain additional financing for acquisitions, capital expenditures or for other purposes could be impaired;

The increase in the amount of debt we have outstanding increases the risk of non-compliance with some of the covenants in our debt agreements which require us to maintain specified financial ratios; and

We may be more leveraged than some of our competitors, which may result in a competitive disadvantage.

We are subject to debt covenant restrictions. Our credit facility contains several financial and other restrictive covenants. A significant decline in our operating income could cause us to violate our covenants. A covenant violation would require a waiver by the lenders or an alternative financing arrangement be achieved. This could result in our being unable to borrow under our bank credit facility or being obliged to refinance and renegotiate the terms of our bank indebtedness. Historically both choices have been available to us, however, it is difficult to predict the availability of these options in the future.

Our future operating results could be impacted by estimates used to calculate impairment losses on long term assets. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make significant and subjective estimates and assumptions that may affect the reported amounts of long term assets in the

Table of Contents

financial statements. These estimates are integral in the determination of whether a potential impairment loss exists as well as the calculation of that loss. Actual future results could differ from those estimates.

A write-off of all or part of our goodwill or other intangible assets could adversely affect our operating results and net worth. At December 31, 2015, goodwill and purchased intangible assets were approximately 18.9% and 17.8% of our total assets, respectively. Our goodwill and other intangible assets may increase in the future since our strategy includes growing through acquisitions. We may have to write-off all or part of our goodwill or purchased intangible assets if their value becomes impaired. Although this write-off would be a non-cash charge, it could reduce our earnings and net worth significantly.

The markets we serve are cyclical and sensitive to domestic and foreign economic conditions and events, which may cause our operating results to fluctuate. Demand for our products is to a large extent dependent on the demand and success of our customers' products where we are a supplier to an OEM. In our Aerospace segment, demand by the business jet markets for our products is dependent upon several factors, including capital investment, product innovations, economic growth and wealth creation and technology upgrades. In addition, the commercial airline industry is highly cyclical and sensitive to fuel price increases, labor disputes, global economic conditions, availability of capital to fund new aircraft purchases and upgrades of existing aircraft and passenger demand. A change in any of these factors could result in a reduction in the amount of air travel and the ability of airlines to invest in new aircraft or to upgrade existing aircraft. These factors would reduce orders for new aircraft and would likely reduce airlines' spending for cabin upgrades for which we supply products, thus reducing our sales and profits. A reduction in air travel may also result in our commercial airline customers being unable to pay our invoices on a timely basis or not at all.

We are a supplier on various new aircraft programs just entering or expected to begin production in the future. As with any new program, there is risk as to whether the aircraft or program will be successful and accepted by the market. As is customary for our business, we purchase inventory and invest in specific capital equipment to support our production requirements generally based on delivery schedules provided by our customer. If a program or aircraft is not successful we may have to write-off all or a part of the inventory, accounts receivable and capital equipment related to the program. A write-off of these assets could result in a significant reduction of earnings and cause covenant violations relating to our debt agreements. This could result in our being unable to borrow additional funds under our bank credit facility or being obliged to refinance or renegotiate the terms of our bank indebtedness.

In our Test Systems segment, the market for our products is concentrated with a limited number of significant customers accounting for a substantial portion of the purchases of test equipment. In any one reporting period, a single customer or several customers may contribute an even larger percentage of our consolidated revenues. In addition, our ability to increase sales will depend, in part, on our ability to obtain orders from current or new significant customers. The opportunities to obtain orders from these customers may be limited, which may impair our ability to grow revenues. We expect that sales of our Test Systems products will continue to be concentrated with a limited number of significant customers for the foreseeable future. Additionally, demand for some of our test products is dependent upon government funding levels for our products, our ability to compete successfully for those contracts and our ability to develop products to satisfy the demands of our customers.

Our products are sold in highly competitive markets. Some of our competitors are larger, more diversified corporations and have greater financial, marketing, production and research and development resources. As a result, they may be better able to withstand the effects of periodic economic downturns. Our operations and financial performance will be negatively impacted if our competitors:

- develop products that are superior to our products;
- develop products that are more competitively priced than our products;
- develop methods of more efficiently and effectively providing products and services; or
- adapt more quickly than we do to new technologies or evolving customer requirements.

We believe that the principal points of competition in our markets are product quality, price, design and engineering capabilities, product development, conformity to customer specifications, quality of support after the sale, timeliness of delivery and effectiveness of the distribution organization. Maintaining and improving our competitive position will

require continued investment in manufacturing, engineering, quality standards, marketing, customer service and support and our distribution networks. If we do not maintain sufficient resources to make these investments, or are not successful in maintaining our competitive position, our operations and financial performance will suffer.

7

Table of Contents

Our future success depends to a significant degree upon the continued contributions of our management team and technical personnel. The loss of members of our management team could have a material and adverse effect on our business. In addition, competition for qualified technical personnel in our industry is intense, and we believe that our future growth and success will depend on our ability to attract, train and retain such personnel.

Future terror attacks, war, or other civil disturbances could negatively impact our business. Continued terror attacks, war or other disturbances could lead to economic instability and decreases in demand for our products, which could negatively impact our business, financial condition and results of operations. Terrorist attacks world-wide have caused instability from time to time in global financial markets and the aviation industry. The long-term effects of terrorist attacks on us are unknown. These attacks and the U.S. government's continued efforts against terrorist organizations may lead to additional armed hostilities or to further acts of terrorism and civil disturbance in the U.S. or elsewhere, which may further contribute to economic instability.

Our business operations may be adversely affected by information systems interruptions or intrusions. We are dependent on various information technologies throughout our Company to administer, store and support multiple business activities. Disruptions or cyber security attacks such as unauthorized access, malicious software and other intrusions may lead to exposure of proprietary and confidential information as well as potential data corruption. Any intrusion may cause operational stoppages, diminished competitive advantages through reputational damages and increased operational costs.

Our inability to adequately enforce and protect our intellectual property or defend against assertions of infringement could prevent or restrict our ability to compete. We rely on patents, trademarks and proprietary knowledge and technology, both internally developed and acquired, in order to maintain a competitive advantage. Our inability to defend against the unauthorized use of these rights and assets could have an adverse effect on our results of operations and financial condition. Litigation may be necessary to protect our intellectual property rights or defend against claims of infringement. This litigation could result in significant costs and divert our management's focus away from operations.

If we are unable to adapt to technological change, demand for our products may be reduced. The technologies related to our products have undergone, and in the future may undergo, significant changes. To succeed in the future, we will need to continue to design, develop, manufacture, assemble, test, market and support new products and enhancements on a timely and cost effective basis. Our competitors may develop technologies and products that are more effective than those we develop or that render our technology and products obsolete or uncompetitive. Furthermore, our products could become unmarketable if new industry standards emerge. We may have to modify our products significantly in the future to remain competitive, and new products we introduce may not be accepted by our customers.

Our new product development efforts may not be successful, which would result in a reduction in our sales and earnings. We may experience difficulties that could delay or prevent the successful development of new products or product enhancements, and new products or product enhancements may not be accepted by our customers. In addition, the development expenses we incur may exceed our cost estimates, and new products we develop may not generate sales sufficient to offset our costs. If any of these events occur, our sales and profits could be adversely affected.

We depend on government contracts and subcontracts with defense prime contractors and sub-contractors that may not be fully funded, may be terminated, or may be awarded to our competitors. The failure to be awarded these contracts, the failure to receive funding or the termination of one or more of these contracts could reduce our sales. Sales to the U.S. government and its prime contractors and subcontractors represent a significant portion of our business. The funding of these programs is generally subject to annual congressional appropriations, and congressional priorities are subject to change. In addition, government expenditures for defense programs may decline or these defense programs may be terminated. A decline in governmental expenditures or the termination of existing contracts may result in a reduction in the volume of contracts awarded to us. We have resources applied to specific government contracts and if any of those contracts were terminated, we may incur substantial costs redeploying those resources.

If our subcontractors or suppliers fail to perform their contractual obligations, our prime contract performance and our ability to obtain future business could be materially and adversely impacted. Many of our contracts involve

subcontracts with other companies upon which we rely to perform a portion of the services we must provide to our customers. There is a risk that we may have disputes with our subcontractors, including disputes regarding the quality and timeliness of work performed by the subcontractor or customer concerns about the subcontractor. Failure by our subcontractors to satisfactorily provide, on a timely basis, the agreed-upon supplies or perform the agreed-upon services may materially and adversely impact our ability to perform our obligations with our customer. Subcontractor performance deficiencies could result in a customer terminating our contract for default. A default termination could expose us to liability and substantially impair our ability to compete for future contracts and orders. In addition, a delay in our ability to obtain components and equipment

Table of Contents

parts from our suppliers may affect our ability to meet our customers' needs and may have an adverse effect upon our profitability.

Our results of operations are affected by our fixed-price contracts, which could subject us to losses in the event that we have cost overruns. For the year ended December 31, 2015, fixed-price contracts represented almost all of the Company's sales. On fixed-price contracts, we agree to perform the scope of work specified in the contract for a predetermined price. Depending on the fixed price negotiated, these contracts may provide us with an opportunity to achieve higher profits based on the relationship between our costs and the contract's fixed price. However, we bear the risk that increased or unexpected costs may reduce our profit.

Some of our contracts contain late delivery penalties. Failure to deliver in a timely manner due to supplier problems, development schedule slides, manufacturing difficulties, or similar schedule related events could have a material adverse effect on our business.

The failure of our products may damage our reputation, necessitate a product recall or result in claims against us that exceed our insurance coverage, thereby requiring us to pay significant damages. Defects in the design and manufacture of our products may necessitate a product recall. We include complex system design and components in our products that could contain errors or defects, particularly when we incorporate new technology into our products. If any of our products are defective, we could be required to redesign or recall those products or pay substantial damages or warranty claims. Such an event could result in significant expenses, disrupt sales and affect our reputation and that of our products. We are also exposed to product liability claims. We carry aircraft and non-aircraft product liability insurance consistent with industry norms. However, this insurance coverage may not be sufficient to fully cover the payment of any potential claim. A product recall or a product liability claim not covered by insurance could have a material adverse effect on our business, financial condition and results of operations.

Changes in discount rates and other estimates could affect our future earnings and equity. Our goodwill impairment evaluations are determined using valuations that involve several assumptions, including discount rates, cash flow estimates, growth rates and terminal values. Certain of these assumptions, particularly the discount rate, are based on market conditions and are outside of our control. Changes in these assumptions could affect our future earnings and equity.

Additionally, pension obligations and the related costs are determined using actual results and actuarial valuations that involve several assumptions. The most critical assumption is the discount rate. Other assumptions include mortality, salary increases and retirement age. The discount rate assumptions are based on current market conditions and are outside of our control. Changes in these assumptions could affect our future earnings and equity.

We are subject to financing and interest rate exposure risks that could adversely affect our business, liquidity and operating results. Changes in the availability, terms and cost of capital, and increases in interest rates could cause our cost of doing business to increase and place us at a competitive disadvantage. At December 31, 2015, approximately 9% of our debt was at fixed interest rates with the remainder subject to variable interest rates.

Contracting in the defense industry is subject to significant regulation, including rules related to bidding, billing and accounting kickbacks and false claims, and any non-compliance could subject us to fines and penalties or possible debarment. Like all government contractors, we are subject to risks associated with this contracting. These risks include the potential for substantial civil and criminal fines and penalties. These fines and penalties could be imposed for failing to follow procurement integrity and bidding rules, employing improper billing practices or otherwise failing to follow cost accounting standards, receiving or paying kickbacks or filing false claims. We have been, and expect to continue to be, subjected to audits and investigations by government agencies. The failure to comply with the terms of our government contracts could harm our business reputation. It could also result in suspension or debarment from future government contracts.

If we fail to meet expectations of securities analysts or investors due to fluctuations in our revenue or operating results, our stock price could decline significantly. Our revenue and earnings may fluctuate from quarter to quarter due to a number of factors, including delays or cancellations of programs. It is likely that in some future quarters our operating results may fall below the expectations of securities analysts or investors. In this event, the trading price of our stock could decline significantly.

Our operations in foreign countries expose us to political and currency risks and adverse changes in local legal and regulatory environments. In 2015, approximately 7.3% of our sales were made by our subsidiaries in France and Canada. Net assets held by these subsidiaries total \$36.1 million at December 31, 2015. Our financial results may be adversely affected by fluctuations in foreign currencies and by the translation of the financial statements of our foreign subsidiaries from local

Table of Contents

currencies into U.S. dollars. We expect international operations and export sales to continue to contribute to our earnings for the foreseeable future. Both the sales from international operations and export sales are subject in varying degrees to risks inherent in doing business outside of the U.S. Such risks include the possibility of unfavorable circumstances arising from host country laws or regulations, changes in tariff and trade barriers and import or export licensing requirements, and political or economic reprioritization, insurrection, civil disturbance or war.

Government regulations could limit our ability to sell our products outside the U.S. and could otherwise adversely affect our business. Certain of our sales are subject to compliance with U.S. export regulations. Our failure to obtain, or fully adhere to the limitations contained in, the requisite licenses, meet registration standards or comply with other government export regulations would hinder our ability to generate revenues from the sale of our products outside the U.S. Compliance with these government regulations may also subject us to additional fees and operating costs. The absence of comparable restrictions on competitors in other countries may adversely affect our competitive position. In order to sell our products in European Union countries, we must satisfy certain technical requirements. If we are unable to comply with those requirements with respect to a significant quantity of our products, our sales in Europe would be restricted. Doing business internationally also subjects us to numerous U.S. and foreign laws and regulations, including regulations relating to import-export control, technology transfer restrictions, foreign corrupt practices and anti-boycott provisions. Our failure, or failure by an authorized agent or representative that is attributable to us, to comply with these laws and regulations could result in administrative, civil or criminal liabilities and could, in the extreme case, result in monetary penalties, suspension or debarment from government contracts or suspension of our export privileges, which would have a material adverse effect on us.

Our stock price is volatile. For the year ended December 31, 2015, our stock price ranged from a low of \$33.74 to a high of \$66.61. The price of our common stock has been and likely will continue to be subject to wide fluctuations in response to a number of events and factors, such as:

- quarterly variations in operating results;
- variances of our quarterly results of operations from securities analyst estimates;
- changes in financial estimates;
- announcements of technological innovations and new products; and
- news reports relating to trends in our markets.

In addition, the stock market in general, and the market prices for companies in the aerospace & defense industry in particular, have experienced significant price and volume fluctuations that often have been unrelated to the operating performance of the companies affected by these fluctuations. These broad market fluctuations may adversely affect the market price of our common stock, regardless of our operating performance.

We may incur losses and liabilities as a result of our acquisition strategy. Growth by acquisition involves risks that could adversely affect our financial condition and operating results, including:

- diversion of management time and attention from our core business;
- the potential exposure to unanticipated liabilities;
- the potential that expected benefits or synergies are not realized and that operating costs increase;
- the risks associated with incurring additional acquisition indebtedness, including that additional indebtedness could limit our cash flow availability for operations and our flexibility;
- difficulties in integrating the operations and personnel of acquired companies; and
- the potential loss of key employees, suppliers or customers of acquired businesses.

In addition, any acquisition, once successfully integrated, could negatively impact our financial performance if it does not perform as planned, does not increase earnings, or does not prove otherwise to be beneficial to us.

We currently are involved or may become involved in the future, in legal proceedings that, if adversely adjudicated or settled, could materially impact our financial condition. As an aerospace company, we may become a party to litigation in the ordinary course of our business, including, among others, matters alleging product liability, warranty claims, breach of commercial or government contract or other legal actions. In general, litigation claims can be expensive and time consuming to

Table of Contents

bring or defend against and could result in settlements or damages that could significantly impact results of operations and financial condition.

We are a defendant in actions filed in the Regional State Court of Mannheim, Germany (Lufthansa Technik AG v. Astronics Advanced Electronics Systems Corp.) and the United States District for the Western District of Washington relating to an allegation of patent infringement. On December 29, 2010, Lufthansa Technik AG (“Lufthansa”) filed a Statement of Claim in the Regional State Court of Mannheim, Germany. Lufthansa’s claim asserts that our subsidiary, Astronics Advanced Electronic Systems Corp. (“AES”) sold, marketed and brought into use in Germany a power supply system which infringes upon a German patent held by Lufthansa. The relief sought by Lufthansa includes requiring AES to stop selling and marketing the allegedly infringing power supply system, a recall of allegedly infringing products sold to commercial customers since November 26, 2003 and compensation for damages. The claim does not specify an estimate of damages and a damages claim will be made by Lufthansa only if it receives a favorable ruling on the determination of infringement. The value of the dispute has been set by the court to be €2 million. This is an estimate of the commercial value of the matter.

On February 6, 2015, the Regional State Court of Mannheim, Germany rendered its decision that the patent was infringed. The judgment does not require AES to recall products which are already installed in aircraft or have been sold to other end users. On July 15, 2015, Lufthansa advised AES of their intention to enforce the accounting provisions of the decision, which require AES to provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. Additionally, if Lufthansa provides the required bank guarantees specified in the decision, the Company may be required to offer a recall of products which are in the distribution channels in Germany, and provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. No such bank guarantees have been issued to date.

The Company appealed and believes it has valid defenses to refute the decision. The appeal process is estimated to extend up to two years. The enforcement of the accounting provision of the decision, as discussed above, has no impact on the appeals process. As a result, we do not currently have sufficient information to provide an estimate of AES’s potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of December 31, 2015.

On November 26, 2014, Lufthansa filed a complaint in the United States District for the Western District of Washington. Lufthansa’s complaint in this action alleges that AES manufactures, uses, sells and offers for sale a power supply system which infringes upon a U.S. patent held by Lufthansa. The patent at issue in the U.S. action is based on technology similar to that involved in the German action. However, the U.S. court will not be bound by the ultimate determination made by the German court. The Company believes it has valid defenses to refute Lufthansa’s claims and intends to contest this matter vigorously. As this matter is in the early stages of fact discovery, we do not currently have sufficient information to provide an estimate of AES’s potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of December 31, 2015.

ITEM 2. PROPERTIES

On December 31, 2015, we own or lease 1.0 million square feet of space in the U.S., Canada and France, distributed as follows:

	Owned	Leased	Total
Aerospace:			
Clackamas, OR	237,000	—	237,000
East Aurora, NY	125,000	—	125,000
Kirkland, WA	97,000	39,500	136,500
Ft. Lauderdale, FL	96,000	—	96,000
Lebanon, NH	80,000	—	80,000
Itasca, IL	49,000	—	49,000
Montierchaume, France*	—	80,000	80,000
Amherst, NH	—	28,000	28,000
Montreal, Quebec, Canada	—	25,000	25,000
Everett, WA	—	16,000	16,000
Portland, OR	—	3,500	3,500
Hillsboro, OR	—	1,000	1,000
Chicago, IL	—	500	500
Aerospace Square Feet	684,000	193,500	877,500
Test Systems:			
Irvine, CA*	—	99,000	99,000
Orlando, FL	—	51,000	51,000
Test Systems Square Feet	—	150,000	150,000
Total Square Feet	684,000	343,500	1,027,500

* - Capitalized leases.

Upon the expiration of our current leases, we believe that we will be able to either secure renewal terms or enter into leases for or purchases of alternative locations at market terms. We believe that our properties have been adequately maintained and are generally in good condition.

In January 2014, Peco purchased real estate that included two buildings totaling 237,000 square feet in Clackamas, Oregon and began moving its operations into the buildings in the fourth quarter of 2014. Peco vacated its former facilities in 2015. In January 2015, we acquired three buildings totaling 49,000 square feet in Itasca, Illinois in conjunction with the Armstrong acquisition.

ITEM 3. LEGAL PROCEEDINGS

The Company is subject to various legal proceedings, claims, and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, we do not expect these matters will have a material adverse effect on our business, financial position, results of operations, or cash flows. However, the results of these matters cannot be predicted with certainty. Should the Company fail to prevail in any legal matter or should several legal matters be resolved against the Company in the same reporting period, then the financial results of that particular reporting period could be materially adversely affected.

On December 29, 2010, Lufthansa Technik AG (“Lufthansa”) filed a Statement of Claim in the Regional State Court of Mannheim, Germany. Lufthansa’s claim asserts that our subsidiary, Astronics Advanced Electronic Systems Corp. (“AES”) sold, marketed and brought into use in Germany a power supply system which infringes upon a German patent held by Lufthansa. The relief sought by Lufthansa includes requiring AES to stop selling and marketing the allegedly infringing power supply system, a recall of allegedly infringing products sold to commercial customers since November 26, 2003 and compensation for damages. The claim does not specify an estimate of damages and a damages claim will be made by Lufthansa

Table of Contents

only if it receives a favorable ruling on the determination of infringement. The value of the dispute has been set by the court to be €2 million. This is an estimate of the commercial value of the matter.

On February 6, 2015, the Regional State Court of Mannheim, Germany rendered its decision that the patent was infringed. The judgment does not require AES to recall products which are already installed in aircraft or have been sold to other end users. On July 15, 2015, Lufthansa advised AES of their intention to enforce the accounting provisions of the decision, which require AES to provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. Additionally, if Lufthansa provides the required bank guarantees specified in the decision, the Company may be required to offer a recall of products which are in the distribution channels in Germany, and provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. No such bank guarantees have been issued to date.

The Company appealed and believes it has valid defenses to refute the decision. The appeal process is estimated to extend up to two years. The enforcement of the accounting provision of the decision, as discussed above, has no impact on the appeals process. As a result, we do not currently have sufficient information to provide an estimate of AES's potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of December 31, 2015.

On November 26, 2014, Lufthansa filed a complaint in the United States District for the Western District of Washington. Lufthansa's complaint in this action alleges that AES manufactures, uses, sells and offers for sale a power supply system which infringes upon a U.S. patent held by Lufthansa. The patent at issue in the U.S. action is based on technology similar to that involved in the German action. However, the U.S. court will not be bound by the ultimate determination made by the German court. The Company believes it has valid defenses to refute Lufthansa's claims and intends to contest this matter vigorously. As this matter is in the early stages of fact discovery, we do not currently have sufficient information to provide an estimate of AES's potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of December 31, 2015.

Other than these proceedings, we are not party to any significant pending legal proceedings that management believes will result in material adverse effect on our financial condition or results of operations.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The table below sets forth the range of prices for the Company's Common Stock, traded on the NASDAQ National Market System, for each quarterly period during the last two years. The approximate number of shareholders of record as of February 18, 2016, was 835 for Common Stock and 2,088 for Class B Stock.

2015	High	Low
First	\$65.26	\$44.35
Second	\$66.61	\$58.53
Third	\$61.74	\$33.74
Fourth	\$42.48	\$34.61
2014	High	Low
First	\$52.14	\$36.62
Second	\$46.28	\$37.77
Third	\$49.35	\$37.07
Fourth	\$48.10	\$37.12

The Company has not paid any cash dividends in the three-year period ended December 31, 2015. The Company has no plans to pay cash dividends as it plans to retain all cash from operations as a source of capital to finance growth in the business.

On September 10, 2015, the Company announced a three-for-twenty distribution of Class B Stock to holders of both Common and Class B Stock. Stockholders received three shares of Class B Stock for every twenty shares of Common and Class B Stock held on the record date of October 8, 2015. Fractional shares were paid in cash. All share quantities, share prices and per share data reported throughout this report have been adjusted to reflect the impact of this distribution.

With respect to information regarding our securities authorized for issuance under equity incentive plans, the information contained in the section entitled "Equity Compensation Plan Information" of our definitive Proxy Statement for the 2016 Annual Meeting of Shareholders is incorporated herein by reference.

The Company repurchased and subsequently retired approximately 23,197 and 48,991 shares of common stock in conjunction with the exercise of stock options in 2015 and 2014, respectively.

Table of Contents

The following graph and table shows the performance of the Company's common stock compared with the S&P 500 Index — Total Return and the NASDAQ US and Foreign Companies for a \$100 investment made December 31, 2010:

		2010	2011	2012	2013	2014	2015
Astronics Corp.	Return %	—	85.02	-27.61	122.90	30.51	-15.99
	Cum \$	100.00	185.02	133.94	298.56	389.66	327.34

- (1) - Diluted Earnings Per Share, Weighted Average Shares Outstanding - Diluted, Book Value Per Share and Shares Outstanding have been adjusted for the impact of the October 8, 2015 fifteen percent Class B stock distribution, the September 5, 2014 twenty percent Class B stock distribution, the October 10, 2013 twenty percent Class B stock distribution and the October 29, 2012 fifteen percent Class B stock distribution.
- (2) - Information includes the results of Ballard, acquired on November 30, 2011, from the acquisition date forward.
- (3) - Information includes the results of Max-Viz, acquired on July 30, 2012, from the acquisition date forward.
- (4) - Information includes the results of Peco, acquired on July 18, 2013, AeroSat acquired on October 1, 2013 and - PGA acquired December 5, 2013, each from the acquisition date forward.
- (5) - Information includes the results of ATS, acquired on February 28, 2014, from the acquisition date forward.
- (6) - Information includes the results of Armstrong, acquired on January 14, 2015, from the acquisition date forward.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Astronics, through its subsidiaries, designs and manufactures advanced, high-performance electrical power generation, distribution and motion systems, lighting and safety systems, avionics products, systems certification and aircraft structures for the global aerospace industry as well as test, training and simulation systems primarily for the military and semiconductor markets.

Our strategy is to increase our value by developing technologies and capabilities either internally or through acquisition, and using those capabilities to provide innovative solutions to the aerospace & defense, semiconductor and other markets where our technology can be beneficial.

Table of Contents

We have two reportable segments, Aerospace and Test Systems. Our Aerospace segment has eleven principal operating facilities located in New York State, Florida, Illinois, two in New Hampshire, two in Oregon, two in Washington State, Quebec, Canada and Montierchaume, France. Our Test Systems segment has facilities located in Florida and California.

Our Aerospace segment serves three primary markets. They are the military, commercial transport and business jet markets. Our Test Systems segment serves the aerospace & defense and semiconductor markets.

Important factors affecting our growth and profitability are the rate at which new aircraft are produced, government funding of military programs, our ability to have our products designed into new aircraft and the rates at which aircraft owners, including commercial airlines, refurbish or install upgrades to their aircraft. New aircraft build rates and aircraft owners spending on upgrades and refurbishments is cyclical and dependent on the strength of the global economy. Once designed into a new aircraft, the spare parts business is frequently retained by the Company. With the acquisition of ATS in 2014, future growth and profitability of the test business is dependent on developing and procuring new and follow-on business in the semiconductor market as well as with the military. The nature of our test systems business is such that it pursues large multi-year projects. There can be significant periods of time between orders in this business which may result in large fluctuations of sales and profit levels and backlog from period to period.

Each of the markets that we serve presents opportunities that we expect will provide growth for the Company over the long-term. We continue to look for opportunities in all of our markets to capitalize on our core competencies to expand our existing business and to grow through strategic acquisitions.

Challenges which continue to face us include improving shareholder value through increasing profitability. Increasing profitability is dependent on many things, primarily revenue growth and the Company's ability to control operating expenses and to identify means of creating improved productivity. Revenue is driven by increased build rates for existing aircraft, market acceptance and economic success of new aircraft, continued government funding of defense programs, the Company's ability to obtain production contracts for parts we currently supply or have been selected to design and develop for new aircraft platforms and continually identifying and winning new business for our Test Systems segment. Our semiconductor test products are highly dependent on winning new and follow-on programs with our current customers as well as developing new customers. Reduced aircraft build rates driven by a weak economy, tight credit markets, reduced air passenger travel and an increasing supply of used aircraft on the market would likely result in reduced demand for our products, which will result in lower profits. Reduction of defense spending may result in fewer opportunities for us to compete, which could result in lower profits in the future. Many of our newer development programs are based on new and unproven technology and at the same time we are challenged to develop the technology on a schedule that is consistent with specific programs. We will continue to address these challenges by working to improve operating efficiencies and focusing on executing on the growth opportunities currently in front of us.

ACQUISITIONS

On January 14, 2015, the Company purchased 100% of the equity of Armstrong for approximately \$52.3 million in cash. Armstrong, located in Itasca, Illinois, is a leading provider of engineering, design and certification solutions for commercial aircraft, specializing in connectivity, in-flight entertainment, and electrical power systems. Armstrong is included in our Aerospace segment.

On February 28, 2014, Astronics, through its wholly owned subsidiary ATS, completed the acquisition of substantially all of the assets and liabilities of EADS North America's Test and Services division. ATS is located in Irvine, California and is a leading provider of highly engineered automatic test systems, subsystems and instruments for the semiconductor, consumer electronics, commercial aerospace & defense industries. The purchase price was approximately \$69.4 million in cash.

On December 5, 2013, we acquired 100% of the stock of PGA, located in Chateauroux, France. PGA designs and manufactures seat motion and lighting systems primarily for premium class aircraft seats and is a provider of in-flight entertainment/communication systems as well as cabin management systems for private aircraft. The purchase price was approximately \$31.3 million, comprised of \$9.1 million of cash and the balance paid with 264,168 shares of Astronics stock valued at \$51.00/share. PGA is included in our Aerospace segment.

On October 1, 2013, we acquired certain assets and liabilities from AeroSat Corporation and related entities, a supplier of aircraft antenna systems, for \$12 million in cash, plus contingent purchase consideration of up to a maximum of \$53.0 million based upon the achievement of certain revenue levels in 2014 and 2015. The fair value of the estimated contingent consideration at December 31, 2015 is zero. AeroSat is included in our Aerospace segment.

Table of Contents

On July 18, 2013, we acquired 100% of the stock of Peco, which designs and manufactures highly engineered commercial aerospace interior components and systems for the aerospace industry. The company specializes in overhead Passenger Service Units (“PSUs”), which incorporate air handling, emergency oxygen, electrical power management and cabin lighting systems. It also manufactures a wide range of fuel access doors that meet stringent strength, fuel sealing and anti-corrosion requirements. We purchased the outstanding stock of Peco for \$136.0 million in cash. Peco is included in our Aerospace segment.

MARKETS

Commercial Transport Market

Sales to the commercial transport market include sales of electrical power generation, distribution and motion products, lighting & safety products, avionics products, systems certification and structures products. Sales to this market totaled approximately \$455.6 million or 65.8% of our consolidated sales in 2015.

Maintaining and growing sales to the commercial transport market will depend on airlines’ capital spending budgets for cabin upgrades as well as the purchase of new aircraft by global airlines. This spending by the airlines is impacted by their profits, cash flow and available financing as well as competitive pressures between the airlines to improve the travel experience for their passengers. We expect that new aircraft will be equipped with more passenger and aircraft connectivity and in-seat power than previous generation aircraft. This market has experienced strong growth from airlines installing in-seat passenger power systems on their existing and newly delivered aircraft. Our ability to maintain and grow sales to this market depends on our ability to maintain our technological advantages over our competitors and maintain our relationships with major IFE suppliers and global airlines.

Military Aerospace Market

Sales to the military aerospace market include sales of lighting & safety products, avionics products, electrical power & motion products and other products. Sales to this market totaled approximately 6.3% of our consolidated revenue and amounted to \$43.3 million in 2015.

The military market is dependent on governmental funding which can change from year to year. Risks are that overall spending may be reduced in the future, specific programs may be eliminated or that we fail to win new business through the competitive bid process. Astronics does not have significant reliance on any one program such that cancellation of a particular program will cause material financial loss. We believe that we will continue to have opportunities similar to past years regarding this market.

Business Jet Market

Sales to the business jet aerospace market include sales of lighting & safety products, avionics products, and electrical power & motion products. Sales to this market totaled approximately 4.7% of our consolidated revenue in 2015 and amounted to \$32.8 million.

Sales to the business jet market are driven by our ship set content on new aircraft and build rates of new aircraft. Business jet OEM build rates continue to be significantly impacted by slow global wealth creation and corporate profitability which have been negatively affected during the past several years by global economic uncertainty among prospective buyers. Our sales to the business jet market will continue to be challenged in the upcoming year as business jet aircraft production rates are not expected to increase significantly during 2016 due to global macroeconomic conditions. Despite the current market conditions, we continue to see opportunities on new aircraft currently in the design phase to employ our lighting & safety, electrical power and avionics technologies in the business jet market. There is risk involved in the development of any new aircraft including the risk that the aircraft will not ultimately be produced or that it will be produced in lower quantities than originally expected and thus impacting our return on our engineering and development efforts.

Other Aerospace

Sales of our other aerospace products include sales of airfield lighting products and other Peco products. Sales to this market totaled approximately 2.6% of our total revenue or \$18.1 million in 2015.

Table of Contents

Tests Systems Products

Our Test Systems segment accounted for approximately 20.6% of our consolidated sales in 2015 and amounted to \$142.5 million. Sales to the semiconductor market were approximately \$92.1 million, and were attributable to the acquisition of ATS in February 2014. Sales to the military test market were approximately \$50.4 million in 2015.

CRITICAL ACCOUNTING POLICIES

Our financial statements and accompanying notes are prepared in accordance with U.S. generally accepted accounting principles. The preparation of the Company's financial statements requires management to make estimates, assumptions and judgments that affect the amounts reported. These estimates, assumptions and judgments are affected by management's application of accounting policies, which are discussed in the Notes to Consolidated Financial Statements, Note 1 of Item 8, Financial Statements and Supplementary Data of this report. The critical accounting policies have been reviewed with the Audit Committee of our Board of Directors.

Revenue Recognition

The vast majority of our sales agreements are for standard products and services, with revenue recognized on the accrual basis at the time of shipment of goods, transfer of title and customer acceptance, where required. There are no significant contracts allowing for right of return. To a limited extent, as a result of the acquisition of ATS, certain of our contracts involve multiple elements (such as equipment and service). The Company recognizes revenue for delivered elements when they have stand-alone value to the customer, they have been accepted by the customer, and for which there are only customary refund or return rights. Arrangement consideration is allocated to the deliverables by use of the relative selling price method. The selling price used for each deliverable is based on vendor-specific objective evidence ("VSOE") if available, third party-evidence ("TPE") if VSOE is not available, or estimated selling price if neither VSOE nor TPE is available. Estimated selling price is determined in a manner consistent with that used to establish the price to sell the deliverable on a standalone basis.

For prepaid service contracts, sales revenue is recognized on a straight-line basis over the term of the contract, unless historical evidence indicates the costs are incurred on other than a straight-line basis.

Revenue of approximately \$17.2 million, \$2.7 million and \$4.4 million for the years ending December 31, 2015, 2014 and 2013, respectively, was recognized from long-term, fixed-price contracts using the percentage-of-completion method of accounting.

Reviews for Impairment of Long-Lived Assets

Goodwill Impairment Testing

Our goodwill is the result of the excess of purchase price over net assets acquired from acquisitions. As of December 31, 2015, we had approximately \$115.4 million of goodwill. As of December 31, 2014, we had approximately \$100.2 million of goodwill. The change in goodwill is due to the acquisition of Armstrong in January 2015, coupled with currency translation adjustments, collectively increasing goodwill by \$15.2 million.

We identify our reporting units by assessing whether the components of our operating segments constitute businesses for which discrete financial information is available and segment management regularly reviews the operating results of those components. The Test Systems operating segment is its own reporting unit while the other reporting units are one level below our Aerospace operating segment.

Companies may perform a qualitative assessment as the initial step in the annual goodwill impairment testing process for all or selected reporting units. Companies are also allowed to bypass the qualitative analysis and perform a quantitative analysis if desired. Economic uncertainties and the length of time from the calculation of a baseline fair value are factors that we would consider in determining whether to perform a quantitative test.

When we evaluate the potential for goodwill impairment using a qualitative assessment, we consider factors including, but not limited to, macroeconomic conditions, industry conditions, the competitive environment, changes in the market for our products and services, regulatory and political developments, entity specific factors such as strategy and changes in key personnel and overall financial performance. If, after completing this assessment, it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying value, we proceed to a quantitative two-step impairment test.

Table of Contents

Quantitative testing first requires a comparison of the fair value of each reporting unit to the carrying value. We use the discounted cash flow method to estimate the fair value of each of our reporting units. The discounted cash flow method incorporates various assumptions, the most significant being projected revenue growth rates, operating profit margins and cash flows, the terminal growth rate and the discount rate. Management projects revenue growth rates, operating margins and cash flows based on each reporting unit's current business, expected developments and operational strategies. If the carrying value of the reporting unit exceeds its fair value, goodwill is considered impaired and any loss must be measured.

In measuring the impairment loss, the implied fair value of goodwill is determined by assigning a fair value to all of the reporting unit's assets and liabilities, including any unrecognized intangible assets, as if the reporting unit had been acquired in a business combination at fair value. If the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss would be recognized in an amount equal to that excess.

In 2015, we performed quantitative assessments for the eight reporting units which have goodwill and concluded that it is more likely than not that their fair values exceed their carrying values. Based on our quantitative assessments of our reporting units, we concluded that goodwill was not impaired.

Amortized Intangible Asset Impairment Testing

Amortizable intangible assets with a carrying value of \$108.3 million at December 31, 2015 and \$95.0 million at December 31, 2014 are amortized over their assigned useful lives. We test these long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of those assets may not be recoverable. The recoverability test consists of comparing the projected undiscounted cash flows associated with the asset to its carrying amount. An impairment loss would then be recognized for the carrying amount in excess of its fair value. There were no impairment charges in 2015, 2014 or 2013.

Depreciable Asset Impairment Testing

Property, plant and equipment with a carrying value of \$124.7 million at December 31, 2015 and \$116.3 million at December 31, 2014 are depreciated over their assigned useful lives. We test these long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of those assets may not be recoverable. The recoverability test consists of comparing the projected undiscounted cash flows, with its carrying amount. An impairment loss would then be recognized for the carrying amount in excess of its fair value. There were no impairment charges in 2015, 2014 or 2013.

Inventory Valuation

We record valuation reserves to provide for excess, slow moving or obsolete inventory or to reduce inventory to the lower of cost or market value. In determining the appropriate reserve, management considers the age of inventory on hand, the overall inventory levels in relation to forecasted demands as well as reserving for specifically identified inventory that we believe is no longer salable. At December 31, 2015, our reserve for inventory valuation was \$14.6 million, or 11.2% of gross inventory. At December 31, 2014, our reserve for inventory valuation was \$12.3 million, or 9.6% of gross inventory.

Deferred Tax Asset Valuation Allowances

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. We record a valuation allowance to reduce deferred tax assets to the amount of future tax benefit that we believe is more likely than not to be realized. Significant assumptions regarding future profitability is required to estimate the value of these deferred tax assets. We consider allowable tax carryforward periods, historical earnings performance, tax planning strategies and recent earnings projections to determine the amount of the valuation allowance. Changes in these factors could cause us to adjust our valuation allowance, which would impact our income tax expense and the carrying value of these assets when we determine that these factors have changed.

As of December 31, 2015, we had net deferred tax liabilities of \$13.4 million. Included in the net deferred tax liabilities are approximately \$19.6 million in deferred tax assets net of a \$2.6 million valuation allowance. These deferred tax assets principally relate to goodwill and intangible assets, employee benefit liabilities, asset reserves, depreciation, deferred revenue, state net operating loss carry-forwards, and state general business tax credit carry-forwards.

As of December 31, 2014, we had net deferred tax liabilities of \$13.2 million. Included in the net deferred tax liabilities are approximately \$20.3 million in deferred tax assets net of a \$3.1 million valuation allowance. These deferred tax assets

Table of Contents

principally relate to goodwill and intangible assets, employee benefit liabilities, asset reserves, depreciation, deferred revenue, state net operating loss carry-forwards and state and foreign general business tax credit carry-forwards. Because of the uncertainty as to the Company's ability to generate sufficient future taxable income in certain states, the Company has recorded the valuation allowances accordingly in 2015 and 2014.

Supplemental Executive Retirement Plan (SERP) Assumptions

We maintain two non-qualified defined benefit supplemental retirement plans ("SERP" and "SERP II") for certain executive officers and retired former executive officers. Expense for these plans in 2015 was \$2.1 million and in 2014 was \$1.6 million. Plan obligations and the related costs are determined using actuarial valuations that involve several assumptions that may be highly uncertain and may have a material impact on the financial statements if different reasonable assumptions had been used. The most critical assumptions include the discount rate, future wage increases, retirement age and life expectancy. The discount rate is used to state expected future cash flows at present value. Using a lower discount rate increases the present value of pension obligations and increases pension expense. For determining the discount rate the Company considers long-term interest rates for high-grade corporate bonds. The discount rate for determining the expense recognized in 2015 was 4.05% compared with 5.10% in 2014. We will use a discount rate of 4.45% in determining our 2016 expense. The assumption for compensation increases takes a long-term view of inflation and performance based salary adjustments based on the Company's approach to executive compensation. The rate used for future wage increases was 3-5%. It was assumed that each participant retires after fully vesting in the plan at age 62 or 65. A 100 point increase in the discount rate we used would decrease our annual pension expense for 2016 by \$0.4 million. If we had assumed annual wage increases of 4-6%, our 2016 pension expense would increase approximately \$0.2 million.

Stock-Based Compensation

We have stock-based compensation plans, which include non-qualified stock options as well as incentive stock options. Expense recognized for stock-based compensation was \$2.3 million for 2015, \$1.7 million for 2014 and \$1.4 million for 2013. We determine the fair value of the option awards at the date of grant using a Black-Scholes model. Option pricing models require management to make assumptions and to apply judgment to determine the fair value of the award. These assumptions and judgments include estimating the future volatility of our stock price, expected dividend yield, future employee stock option exercise behaviors and future employee turnover rates. Changes in these assumptions can materially affect the fair value estimate.

Acquisitions

The Company accounts for its acquisitions under ASC Topic 805, Business Combinations and Reorganizations ("ASC Topic 805"). ASC Topic 805 provides guidance on how the acquirer recognizes and measures the consideration transferred, identifiable assets acquired, liabilities assumed, non-controlling interests, and goodwill acquired in a business combination. ASC Topic 805 also expands required disclosures surrounding the nature and financial effects of business combinations. Acquisition costs are expensed as incurred. Acquisition related expenses were approximately \$0.4 million, \$0.3 million and \$1.9 million in 2015, 2014 and 2013, respectively.

When the Company acquires a business, we allocate the purchase price to the assets acquired and liabilities assumed in the transaction at their respective estimated fair values. We record any premium over the fair value of net assets acquired as goodwill. The allocation of the purchase price involves judgments and estimates both in characterizing the assets and in determining their fair value. The way we characterize the assets has important implications, as long-lived assets with definitive lives, for example, are depreciated or amortized, whereas goodwill is tested annually for impairment, as explained previously. With respect to determining the fair value of assets, the most subjective estimates involve valuations of long-lived assets, such as property, plant, and equipment as well as identified intangible assets. We use all available information to make these fair value determinations and engage independent valuation specialists to assist in the fair value determination of the acquired long-lived assets. The fair values of long-lived assets are determined using valuation techniques that use discounted cash flow methods, independent market appraisals and other acceptable valuation techniques.

With respect to determining the fair value of the purchase price, the most subjective estimates involve valuations of contingent consideration. Significant judgment is necessary to determine the fair value of the purchase price when the transaction includes an earn-out provision, such as the earn-out provision included in our 2013 acquisition of AeroSat.

We engage valuation specialists to assist in the determination of the fair value of contingent consideration. Key assumptions used to value the contingent consideration include future projections and discount rates.

Table of Contents

During 2015, acquisitions added approximately \$4.7 million in property, plant and equipment and \$25.1 million in purchased intangible assets. See Note 19 in the Notes to the Consolidated Financial Statements in Item 8, Financial Statements and Supplementary Data, regarding the acquisitions in 2015, 2014 and 2013.

CONSOLIDATED RESULTS OF OPERATIONS AND OUTLOOK

	2015 (3)	2014 (2)	2013 (1)	
(Dollars in thousands)				
Sales	\$692,279	\$661,039	\$339,937	
Gross Margin	27.1	% 25.3	% 25.8	%
SG&A Expenses as a Percentage of Sales	12.9	% 12.1	% 13.4	%
Interest Expense	\$4,751	\$8,255	\$4,094	
Effective Tax Rate	28.8	% 29.0	% 28.6	%

(1) Our results of operations for 2013 include the operations of Peco beginning July 18, 2013, AeroSat beginning October 1, 2013 and PGA beginning December 5, 2013.

(2) Our results of operations for 2014 include the operations of ATS, beginning February 28, 2014.

(3) Our results of operations for 2015 include the operations of Armstrong, beginning January 14, 2015.

A discussion by segment can be found at “Segment Results of Operations and Outlook” in this MD&A.

CONSOLIDATED OVERVIEW OF OPERATIONS

2015 Compared With 2014

Consolidated sales for 2015 increased by \$31.2 million, or 4.7%, to \$692.3 million, from \$661.0 million in 2014. The acquisition of Armstrong contributed \$25.5 million to consolidated sales, while consolidated organic sales increased \$5.7 million, or 0.9%.

Consolidated cost of products sold increased \$10.3 million to \$504.3 million in 2015 from \$494.0 million in the prior year. The increase was due primarily to the incremental cost of products sold associated with Armstrong of \$20.9 million and increased engineering and development (“E&D”) costs offset by lower step-up expense when compared to the same period last year. E&D costs were 13.0% of sales, or \$90.1 million, which included \$6.8 million for Armstrong, compared with \$76.7 million, or 11.6% of sales, in the prior year. Cost of products sold in 2014 included \$19.4 million related to inventory step-up expense, as compared to \$1.0 million in 2015. Consolidated cost of products sold as a percentage of sales was 72.9% in 2015 compared with 74.7% in the prior year.

Selling, general and administrative (“SG&A”) expenses were \$89.1 million, or 12.9% of sales, in 2015 compared with \$79.7 million, or 12.1% of sales, in the prior year. The increase was due primarily to the incremental SG&A costs of Armstrong, which added approximately \$5.7 million to SG&A in 2015, including \$2.2 million of amortization expense for acquired intangible assets of that business. SG&A expenses in 2014 were positively affected by a \$5.0 million fair value writedown of a contingent consideration liability related to prior acquisitions, compared with a writedown of \$1.8 million in 2015. These increases were partially offset by a decrease in amortization expense for acquired intangible assets of ATS of \$4.7 million.

Interest expense decreased in 2015 compared to 2014 due to decreased debt levels.

2014 Compared With 2013

Consolidated sales in 2014 increased by 94.5%, or \$321.1 million, to \$661.0 million, compared with \$339.9 million in 2013. The increase was due to a combination of acquisitions and organic sales volume growth. Acquisitions contributed \$270.4 million (comprised of \$111.2 million in the Aerospace segment and \$159.2 million in the Test Systems segment), while organic sales increased by \$50.7 million or 14.9% from the prior year. On a segment basis, Aerospace sales of \$494.7 million increased by \$164.2 million, while Test Systems sales of \$166.3 million increased by \$156.9 million compared with the prior year.

Consolidated cost of products sold increased \$241.9 million to \$494.0 million in 2014 from \$252.1 million in the prior year. The increase was due to the cost of products sold associated with increased organic sales volumes and the incremental costs of products sold associated with sales from acquired businesses totaling \$208.0 million.

Consolidated cost of products sold as a

22

Table of Contents

percentage of sales was 74.7% in 2014 as compared with 74.2% in the prior year. Leverage achieved from increased organic sales volume was offset by lower margins from the acquired businesses, which were impacted by higher costs related to the fair value step-up of acquired inventory. Expense related to the fair value step-up of inventory from acquired businesses was \$19.4 million and \$5.5 million in 2014 and 2013, respectively. Consolidated cost of products sold was also negatively impacted by increased depreciation expenses of \$3.0 million, increased warranty costs of \$2.9 million and increased E&D costs. Total E&D costs were \$76.7 million in 2014, including \$19.1 million from acquired businesses. E&D costs were \$52.8 million in 2013.

SG&A expenses in 2014 were \$79.7 million, or 12.1% of sales compared with \$45.6 million, or 13.4% of sales, in the prior year. The increase was due primarily to \$34.8 million in incremental SG&A costs of acquired businesses, including \$10.4 million of incremental amortization expense for acquired intangible assets. Additionally, higher SG&A expense reflects increased headcount and compensation costs to support growth. SG&A expenses in 2014 were positively affected by the \$5.0 million fair value writedown of a contingent consideration liability related to prior acquisitions.

Interest expense increased in 2014 compared to 2013 due to increased debt levels used primarily to finance the acquisition of ATS, somewhat offset by lower interest rates due to the September 2014 debt refinancing.

Income Taxes

Our effective tax rates for 2015, 2014 and 2013 were 28.8%, 29.0% and 28.6%, respectively. Our tax rate is affected by recurring items, such as tax rates in foreign jurisdictions and the relative amount of income we earn in jurisdictions, which we expect to be fairly consistent in the near term. It is also affected by discrete items that may occur in any given year, but are not consistent from year to year. In addition to state income taxes, the following items had the most significant impact on the difference between our statutory U.S. federal income tax rate of 35% and our effective tax rate:

2015:

1. Recognition of approximately \$2.6 million of 2015 U.S. R&D tax credits.
2. Permanent differences, primarily the impact of the Domestic Production Activities Deduction.

2014:

1. Recognition of \$1.8 million of 2014 U.S. R&D tax credits as well as \$1.6 million of U.S. R&D tax credits recognized relating to prior years.
2. Permanent differences, primarily the impact of the Domestic Production Activities Deduction.
3. Foreign tax credits.

2013:

- Recognition of \$0.8 million of 2013 U.S. R&D tax credits as well as \$1.1 million of U.S. R&D tax credits
1. recognized relating to 2012. The 2012 R&D tax credits were not recognized in 2012, as the American Tax Payer Relief Act of 2012, which extended the R&D tax credit for 2012, was not enacted until 2013.
 2. Permanent differences, primarily the impact of the Domestic Production Activities Deduction.

2016 Outlook

We expect consolidated sales in 2016 to be between \$665 million and \$725 million. Our consolidated backlog at December 31, 2015 was \$274.4 million of which approximately \$236.1 million is expected to ship in 2016.

We expect our capital equipment spending in 2016 to be in the range of \$25 million to \$30 million. E&D costs are expected to continue at roughly the same rate as 2015.

Table of Contents

SEGMENT RESULTS OF OPERATIONS AND OUTLOOK

Operating profit, as presented below, is sales less cost of products sold and other operating expenses excluding interest expense, corporate expenses and other non-operating revenue and expenses. Cost of products sold and operating expenses are directly attributable to the respective segment. Operating profit is reconciled to earnings before income taxes in Note 18 of Item 8, Financial Statements and Supplementary Data, of this report.

AEROSPACE SEGMENT

Other	19,004	19,607	15,012
	\$549,738	\$494,747	\$330,530

2015 Compared With 2014

Aerospace segment sales increased by \$55.0 million, or 11.1%, when compared with the prior year, to \$549.7 million. Organic sales grew 6.0%, or \$29.5 million, and sales from Armstrong added \$25.5 million.

Aerospace sales growth year-to-date was driven by increased Electrical Power & Motion sales, which increased \$25.3 million, or 9.9%. The increase in this product line was driven by in-seat power products, which increased 14.9% in 2015. The Lighting & Safety product line increased \$8.9 million, or 6.0%, due to increased passenger service unit sales. Systems Certification sales was \$21.3 million due to the January acquisition of Armstrong. The other Aerospace product lines comprised the remainder of the variance.

Aerospace operating profit for 2015 was \$85.1 million, or 15.5% of sales, compared with \$79.8 million, or 16.1% of sales in the prior year. Operating leverage gained on increased volume for the organic business was partially offset by higher organic E&D costs of approximately \$6.2 million and lower operating margins from Armstrong. Aerospace SG&A expense increased \$6.6 million in 2015 as compared with 2014. Incremental SG&A from Armstrong was \$5.8 million, including \$2.2 million of intangible asset amortization expense for acquired intangible assets. Operating profit in 2014 included inventory step-up costs of \$2.6 million that reduced normal operating margins.

Table of Contents

2014 Compared With 2013

Sales for the Aerospace segment increased \$164.2 million in 2014 compared with 2013. Organic sales grew 16.0%, or \$53.0 million. Incremental sales from acquired businesses were \$111.2 million.

Sales to the Commercial Transport market increased \$158.3 million. Organic sales increased \$64.2 million and sales from acquired businesses added \$94.1 million. The organic sales increase was primarily from Electrical Power & Motion products, which increased approximately \$42.2 million as global demand for passenger power systems continued to be strong. Additionally, organic sales of Lighting & Safety products to this market increased approximately \$11.9 million, while organic sales of Avionics products increased \$8.6 million.

Military aircraft sales decreased \$6.2 million when compared with the prior year. The acquired businesses added \$1.8 million while organic sales were \$8.0 million lower due primarily to general reduction of volumes.

Sales to the Business Jet market increased \$9.0 million when compared with the prior year. The acquired businesses added \$10.7 million in sales, more than offsetting lower organic sales which decreased \$1.7 million, primarily from the Lighting & Safety and Electrical Power & Motion product lines.

The \$3.1 million increase in 2014 to other markets reflected approximately \$4.6 million from acquired businesses offset by a \$1.5 million decrease of organic sales.

Aerospace operating profit for 2014 was \$79.8 million, or 16.1% of sales, compared with \$55.2 million, or 16.7% of sales, in the prior year. The acquired businesses contributed approximately \$9.4 million in incremental operating profit in 2014. Leverage achieved from higher organic sales volume was partially offset by increased organic E&D costs of approximately \$5.0 million and an increase in organic warranty costs of \$2.3 million. Additionally impacting Aerospace operating margins, cost of products sold had expense related to the fair value step-up of inventory from acquired businesses of approximately \$2.6 million and \$5.5 million in 2014 and 2013, respectively. Aerospace SG&A expense increased \$19.4 million in 2014 compared to 2013. The increase was due primarily to the incremental SG&A of acquired businesses, which added \$16.7 million, including \$4.4 million of acquired intangible asset amortization expense.

It is our intention to continue investing in capabilities and technologies as needed that allows us to execute our strategy to increase the ship set content and value we provide on aircraft in all markets that we serve. The rate of spending on these activities, however, will continue to be driven by market opportunities.

2016 Outlook for Aerospace – We expect 2016 Aerospace segment sales to be in the range of \$572 million to \$616 million. The Aerospace segment's backlog at December 31, 2015 was \$212.7 million, compared to \$223.7 million at December 31, 2014. Approximately \$186.8 million of the backlog at December 31, 2015 is expected to be shipped over the next 12 months.

TEST SYSTEMS SEGMENT

(in thousands, except percentages)

	2015	2014	2013
Sales	\$142,541	\$166,292	\$9,407
Operating Profit (Loss)	\$25,529	\$12,401	\$(3,756)
Operating Margin	17.9	% 7.4	% (37.2)
	2015	2014

Semiconductor	\$92,136	\$130,859	\$—
Aerospace & Defense	50,405	35,433	9,407
	\$142,541	\$166,292	\$9,407

Table of Contents

2015 Compared With 2014

Sales in 2015 decreased 14.3% to \$142.5 million compared with sales of \$166.3 million for 2014, due to lower sales to the Semiconductor market. Sales to the Semiconductor market decreased \$38.7 million compared with 2014, which was partially offset by increased sales of \$14.9 million to the Aerospace & Defense market.

Operating profit was \$25.5 million, or 17.9% of sales, compared with \$12.4 million, or 7.4% of sales, in the prior year. Operating profit for 2014 was negatively impacted by non-recurring purchase accounting related inventory step-up costs of \$16.8 million, and \$1.7 million of charges related to work force reductions. Additionally, amortization expense in 2014 related to the ATS acquisition was approximately \$6.0 million compared with \$1.3 million in 2015. E&D costs were approximately \$12.2 million in 2015, and \$11.8 million in 2014.

2014 Compared With 2013

Sales in 2014 increased \$156.9 million to \$166.3 million compared with sales of \$9.4 million for 2013. Incremental sales to both the Semiconductor and Aerospace & Defense markets from the acquisition of ATS drove the growth. Sales from this acquired business were \$159.2 million in 2014; organic Test System sales were \$7.1 million for 2014. Sales from ATS's largest customer were \$118.1 million in 2014.

Operating profit for 2014 was \$12.4 million compared with an operating loss of \$3.8 million for 2013. All of the improvement was due to the margin provided by the ATS acquisition. Included in 2014 cost of products sold was the impact of \$16.8 million of expense related to the fair value step-up of acquired inventory. Incremental SG&A and E&D costs of the acquired business were approximately \$18.2 million and \$9.1 million, respectively.

2016 Outlook for Test Systems – We expect 2016 Test System segment sales to be in the range of \$93 million to \$109 million. The Test System segment's backlog at December 31, 2015 was \$61.7 million, compared with \$147.0 million at December 31, 2014. Approximately \$49.3 million is expected to be shipped over the next 12 months.

OFF BALANCE SHEET ARRANGEMENTS

We do not have material off-balance sheet arrangements that have or are reasonably likely to have a material future effect on our results of operations or financial condition.

CONTRACTUAL OBLIGATIONS

The following table represents contractual obligations as of December 31, 2015:

(In thousands)	Payments Due by Period				
	Total	2016	2017-2018	2019-2020	After 2020
Long-term Debt	\$169,789	\$2,579	\$5,389	\$3,877	\$157,944
Purchase Obligations	99,151	97,403	1,718	30	—
Interest on Long-term Debt	18,463	3,793	7,235	5,215	2,220
Supplemental Retirement Plan and Post Retirement Obligations	21,343	408	815	803	19,317
Operating Leases	7,751	2,444	3,599	1,708	—
Other Long-term Liabilities	118	8	20	26	64
Total Contractual Obligations	\$316,615	\$106,635	\$18,776	\$11,659	\$179,545

Notes to Contractual Obligations Table

Long-term Debt — See Item 8, Financial Statements and Supplementary Data, Note 6, Long-Term Debt and Note Payable in this report. The timing of the payments above consider the amendment to the revolving credit facility as discussed in Note 6.

Interest on Long-term Debt — Future interest payments have been calculated using the applicable interest rate of each debt facility based on actual borrowings as of December 31, 2015. Actual future borrowings and rates may differ from these estimates.

Table of Contents

Purchase Obligations — Purchase obligations are comprised of the Company’s commitments for goods and services in the normal course of business.

Operating Leases — Operating lease obligations are primarily related to facility leases for AES, AeroSat, Ballard, ATS, Max-Viz, and LSI Canada.

LIQUIDITY AND CAPITAL RESOURCES

(in thousands)	2015	2014	2013
Net cash provided (used) by:			
Operating Activities	\$78,501	\$99,874	\$49,549
Investing Activities	\$(73,586)	\$(109,120)	\$(166,710)
Financing Activities	\$(6,725)	\$(23,113)	\$164,334

Our cash flow from operations and available borrowing capacity provide us with the financial resources needed to run our operations and reinvest in our business.

Operating Activities

Cash provided by operating activities was \$78.5 million in 2015 compared with \$99.9 million in 2014. The decrease of \$21.4 million in 2015 was primarily a result of the impact of increases in net operating assets in 2015 when compared with 2014 net of the effects from acquisitions of businesses.

Cash provided by operating activities was \$99.9 million in 2014 compared with \$49.5 million in 2013. The increase of \$50.4 million in 2014 was primarily a result of higher net income as adjusted for non-cash expenses and the impact of decreases in net operating assets in 2014 when compared with 2013 net of the effects from acquisitions of business.

Cash provided by operating activities was \$49.5 million in 2013. The increase of \$25.3 million in 2013 was primarily a result of higher net income, increases in non-cash expenses offset by cash used for net working capital components.

Our cash flows from operations are primarily dependent on our net income adjusted for non-cash expenses and the timing of collections of receivables, level of inventory and payments to suppliers and employees. Sales and operating results of our Aerospace segment are influenced by the build rates of new aircraft, which are subject to general economic conditions, airline passenger travel and spending for government and military programs. Our Test Systems segment depends on capital expenditures of the semiconductor industry which, in turn, depend on current and future demand for those products. A reduction in demand for our customers’ products would adversely affect our operating results and cash flows.

Investing Activities

Cash used for investing activities in 2015 was \$73.6 million. The acquisition of Armstrong used approximately \$52.3 million of cash in 2015 and purchases of property, plant and equipment (“PP&E”) used \$18.6 million.

Cash used for investing activities in 2014 was \$109.1 million. The acquisition of ATS used approximately \$69.4 million of cash in 2014 and purchases of PP&E used \$40.9 million, primarily related to the acquisition and modification of the new buildings for our Peco operation in Clackamas, Oregon (\$24.7 million).

Cash used for investing activities in 2013 was approximately \$166.7 million. The acquisitions of Peco, AeroSat and PGA used approximately \$159.8 million of cash in 2013 and purchases of PP&E used \$6.9 million.

Our expectation for 2016 is that we will invest between \$25 million and \$30 million for PP&E. Future requirements for PP&E depend on numerous factors, including expansion of existing product lines and introduction of new products. Management believes that our cash flow from operations and current borrowing arrangements will provide for these capital expenditures. We expect to continue to evaluate acquisition opportunities in the future.

Financing Activities

Our ability to maintain sufficient liquidity is highly dependent upon achieving expected operating results. Failure to achieve expected operating results could have a material adverse effect on our liquidity, our ability to obtain financing and our operations in the future. Our obligations under our Credit Agreement are jointly and severally guaranteed by each of our

Table of Contents

domestic subsidiaries. The obligations are secured by a first priority lien on substantially all of the Company's and the guarantors' assets and 100% of the issued and outstanding equity interest of each subsidiary.

On July 18, 2013, in connection with the funding of the Peco acquisition, the Company amended its existing credit facility by entering into a Third Amended and Restated Credit Agreement, which continued to provide for a \$75 million five-year revolving credit facility and a new \$190 million five-year term loan, both expiring on June 30, 2018. The amended facilities carried an interest rate of LIBOR plus between 2.25% and 3.50%, depending on the Company's leverage ratio as defined in the credit agreement. Variable principal payments on the term loan were required quarterly through March 31, 2018 with a balloon payment at maturity. In addition, the Company was required to pay a commitment fee of between 0.25% and 0.50% on the unused portion of the total credit commitment for the preceding quarter, based on the Company's leverage ratio under the credit agreement.

In connection with the funding of the acquisition of ATS, the Company amended its existing credit facility to exercise its option to increase the revolving credit commitment. The credit agreement provided for a \$125 million, five-year revolving credit facility maturing on June 30, 2018, of which \$58.0 million was drawn to finance the acquisition. In addition, the Company was required to pay a commitment fee quarterly at a rate of between 0.25% and 0.50% per annum on the unused portion of the total revolving credit commitment, based on the Company's leverage ratio.

On September 26, 2014, the Company modified and extended its existing credit facility (the "Original Facility") by entering into the Fourth Amended and Restated Credit Agreement (the "Agreement"). On the closing date, there were \$180.5 million of term loans, \$6.0 million of revolving loans and letters of credit with a face amount of \$8.7 million outstanding under the Original Facility. Pursuant to the Agreement, the Original Facility was replaced with a \$350 million revolving credit line with the option to increase the line by up to \$150 million. The outstanding balances in the Original Facility were rolled into the Agreement on the date of entry. In addition, the maturity date of the loans under the Agreement is now September 26, 2019. The credit facility allocates up to \$20 million of the \$350 million revolving credit line for the issuance of letters of credit, including certain existing letters of credit. At December 31, 2015, outstanding letters of credit totaled \$1.1 million.

On January 13, 2016, the Company amended the Agreement to add a new lender and extend the maturity date of the credit facility from September 26, 2019 to January 13, 2021.

The primary financing activities in 2015 relate to borrowings on our senior credit facility to fund the acquisition of Armstrong and voluntary principal payments against our outstanding balance on the senior facility. We borrowed \$50.0 million to fund the acquisition of Armstrong. During 2015, we made principal payments of \$65.0 million on the senior credit facility, primarily using cash generated by operations. In February 2014, we borrowed \$58.0 million to fund the acquisition of ATS. We also terminated our outstanding Industrial Revenue Bonds, which were repaid in full in November 2014 (\$7.6 million). In 2013, we borrowed \$190.0 million to fund the acquisitions of Peco, AeroSat and PGA and made principal payments of \$17.8 million on the senior debt facility through December 31, 2013.

Covenants in the Agreement were modified to where the maximum permitted leverage ratio of funded debt to Adjusted EBITDA (as defined in the Agreement) is 3.5 to 1, increasing to 4.0 to 1 for up to two fiscal quarters following the closing of an acquisition permitted under the Agreement. The Company will pay interest on the unpaid principal amount of the facility at a rate equal to one-, three- or six-month LIBOR plus between 1.375% and 2.25% based upon the Company's leverage ratio. The Company will also pay a commitment fee to the Lenders in an amount equal to between 0.175% and 0.35% on the undrawn portion of the credit facility, based upon the Company's leverage ratio. The Company is required to maintain a minimum interest coverage ratio (Adjusted EBITDA to interest expense) of 3.0 to 1 for the term of the Agreement. The Company's interest coverage ratio was 34.9 to 1 at December 31, 2015. The Company's leverage ratio was 1.28 to 1 at December 31, 2015. The Company is in compliance with all financial and other covenants at December 31, 2015.

The Company's cash needs for working capital, debt service and capital equipment during 2016 is expected to be met by cash flows from operations and cash balances and, if necessary, utilization of the revolving credit facility.

In the event of voluntary or involuntary bankruptcy of the Company or any subsidiary, all unpaid principal and other amounts owing under the Agreement automatically become due and payable. Other events of default, such as failure to make payments as they become due and breach of financial and other covenants, give the Agent the option to declare all such amounts immediately due and payable. At December 31, 2015, we were in compliance with all of the

covenants pursuant to the Agreement.

On February 24, 2016, the Company's Board of Directors authorized the repurchase of up to \$50 million of common stock (the "Buyback Program"). The Buyback Program allows the Company to purchase shares of its common stock in accordance with

28

Table of Contents

applicable securities laws on the open market or through privately negotiated transactions. The Buyback Program may be suspended or discontinued at any time. The timing and the amount of any repurchases will be determined based on an evaluation of market conditions, share price and other factors.

DIVIDENDS

Management believes that it should retain the capital generated from operating activities for investment in advancing technologies, acquisitions and debt retirement. Accordingly, there are no plans to institute a cash dividend program.

BACKLOG

At December 31, 2015, the Company's backlog was approximately \$274.4 million compared with approximately \$370.7 million at December 31, 2014.

RELATED-PARTY TRANSACTIONS

Information regarding certain relationships and related transactions is incorporated herein by reference to the information included in the Company's 2016 Proxy Statement which will be filed with the Commission within 120 days after the end of the Company's 2015 fiscal year.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 1 of the Consolidated Financial Statements at Item 8 of this report.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company has limited exposure to fluctuation in Canadian and Euro currency exchange rates to the U.S. dollar. Over 90% of the Company's consolidated sales are transacted in U.S. dollars.

Net assets held in or measured in Canadian dollars amounted to \$7.7 million at December 31, 2015. Annual disbursements transacted in Canadian dollars were approximately \$16.5 million in 2015. A 10% change in the value of the U.S. dollar versus the Canadian dollar would have had an insignificant impact to 2015 net income; however it could be significant in the future.

Net assets held in or measured in Euros amounted to \$28.4 million at December 31, 2015. Disbursements transacted in Euros in 2015 were approximately \$38.5 million. A 10% change in the value of the U.S. dollar versus the Euros would have had an insignificant impact to 2015 net income; however it could be significant in the future.

Risk due to fluctuation in interest rates is a function of the Company's floating rate debt obligations, which total approximately \$155.0 million at December 31, 2015. A change of 1% in interest rates of all variable rate debt would impact annual net income by approximately \$1.0 million.

ITEM 8. FINANCIAL STATEMENTS AND
SUPPLEMENTARY DATA
REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Astronics Corporation

We have audited the accompanying consolidated balance sheets of Astronics Corporation as of December 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2015. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Astronics Corporation at December 31, 2015 and 2014, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Astronics Corporation's internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 24, 2016 expressed an unqualified opinion thereon.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act. Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2015 based upon the framework in Internal Control – Integrated Framework originally issued in 2013 by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that evaluation, our management concluded that our internal control over financial reporting is effective as of December 31, 2015.

We completed an acquisition in 2015, which was excluded from our management's report on internal control over financial reporting as of December 31, 2015. We acquired Armstrong Aerospace, Inc. on January 14, 2015. This acquisition was included in our 2015 consolidated financial statements and constituted \$51.7 million and \$48.2 million of total and net assets, respectively, as of December 31, 2015 and \$25.5 million and (\$1.4) million of sales and net income, respectively, for the year then ended.

Ernst & Young LLP, independent registered public accounting firm, has audited our consolidated financial statements included in this Annual Report on Form 10-K and, as part of their audit, has issued their report, included herein, on the effectiveness of our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Astronics Corporation

We have audited Astronics Corporation's internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Astronics Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Controls Over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Armstrong Aerospace, Inc., which is included in the 2015 consolidated financial statements of Astronics Corporation and constituted \$51.7 million and \$48.2 million of total and net assets, respectively, as of December 31, 2015 and \$25.5 million and (\$1.4) million of sales and net income, respectively, for the year then ended. Our audit of internal control over financial reporting of Astronics Corporation also did not include an evaluation of the internal control over financial reporting of Armstrong Aerospace, Inc.

In our opinion, Astronics Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Astronics Corporation as of December 31, 2015 and 2014 and the related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for each of the

three years in the period ended December 31, 2015 of Astronics Corporation and our report dated February 24, 2016 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 — SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES AND PRACTICES

Description of the Business

Astronics Corporation (“Astronics” or the “Company”) is a leading supplier of products to the global aerospace, defense, and semiconductor industries. Our products include advanced, high-performance electrical power generation, distribution and motion systems, lighting and safety systems, avionics products, systems certification, aircraft structures and automated test systems.

We have operations in the United States (“U.S.”), Canada and France. We design and build our products through our wholly owned subsidiaries Astronics Advanced Electronic Systems Corp. (“AES”); Astronics AeroSat Corporation (“AeroSat”); Ballard Technology, Inc. (“Ballard”); Astronics DME LLC (“DME”); Luminescent Systems, Inc. (“LSI”); Luminescent Systems Canada, Inc. (“LSI Canada”); Max-Viz, Inc. (“Max-Viz”); Peco, Inc. (“Peco”); PGA Electronic s.a. (“PGA”); Astronics Test Systems, Inc. and Armstrong Aerospace, Inc. (“Armstrong”).

On July 18, 2013, Astronics acquired all of the outstanding capital stock of Peco. Peco designs and manufactures highly engineered commercial aerospace interior components and systems for the aerospace industry. On October 1, 2013, Astronics acquired certain assets and liabilities from AeroSat Corporation and related entities, a supplier of aircraft antenna systems. On December 5, 2013, Astronics acquired 100% of the stock of PGA. PGA designs and manufactures seat motion and lighting systems primarily for business and first class aircraft seats and is Europe’s leading provider of in-flight entertainment/ communication systems as well as cabin management systems for private aircraft. Peco, AeroSat and PGA are all included in our Aerospace segment.

On February 28, 2014, Astronics acquired, through a wholly owned subsidiary Astronics Test Systems, Inc. (“ATS”), certain assets and liabilities of EADS North America’s Test and Services division, located in Irvine, California. ATS is a leading provider of highly engineered automatic test systems, subsystems and instruments for semiconductor and consumer electronics products to both the commercial and defense industries. ATS is included in our Test Systems segment.

On January 14, 2015, the Company acquired 100% of the equity of Armstrong for approximately \$52.3 million in cash. Armstrong, located in Itasca, Illinois, is a leading provider of engineering, design and certification solutions for commercial aircraft, specializing in connectivity, in-flight entertainment, and electrical power systems. Armstrong is included in our Aerospace segment.

At December 31, 2015, the Company has two reportable segments, Aerospace and Test Systems. The Aerospace segment designs and manufactures products for the global aerospace industry. The Test Systems segment designs, manufactures and maintains communications and weapons test systems and training and simulation devices for military applications.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany transactions and balances have been eliminated.

Acquisitions are accounted for under the acquisition method and, accordingly, the operating results for the acquired companies are included in the consolidated statements of operations from the respective dates of acquisition.

For additional information on the acquired businesses, see Note 19.

Revenue Recognition

The vast majority of our sales agreements are for standard products and services, with revenue recognized on the accrual basis at the time of shipment of goods, transfer of title and customer acceptance, where required. There are no significant contracts allowing for right of return. To a limited extent, as a result of the acquisition of ATS, certain of our contracts involve multiple elements (such as equipment and service). The Company recognizes revenue for delivered elements when they have stand-alone value to the customer, they have been accepted by the customer, and for which there are only customary refund or return rights. Arrangement consideration is allocated to the deliverables by use of the relative selling price method. The selling price used for each deliverable is based on vendor-specific objective evidence (“VSOE”) if available, third party-evidence (“TPE”) if VSOE is not available, or estimated selling price if neither VSOE nor TPE is available. Estimated selling price is determined in a manner consistent with that used to establish the price to sell the deliverable on a standalone basis.

Table of Contents

For prepaid service contracts, sales revenue is recognized on a straight-line basis over the term of the contract, unless historical evidence indicates the costs are incurred on other than a straight-line basis.

Revenue of approximately \$17.2 million, \$2.7 million and \$4.4 million for the years ended December 31, 2015, 2014 and 2013, respectively, was recognized from long-term, fixed-price contracts using the percentage-of-completion method of accounting.

Cost of Products Sold, Engineering and Development and Selling, General and Administrative Expenses

Cost of products sold includes the costs to manufacture products such as direct materials and labor and manufacturing overhead as well as all engineering and developmental costs. The Company is engaged in a variety of engineering and design activities as well as basic research and development activities directed to the substantial improvement or new application of the Company's existing technologies. These costs are expensed when incurred and included in cost of products sold. Research and development, design and related engineering amounted to \$90.1 million in 2015, \$76.7 million in 2014 and \$52.8 million in 2013. Selling, general and administrative ("SG&A") expenses include costs primarily related to our sales, marketing and administrative departments.

Shipping and Handling

Shipping and handling costs are expensed as incurred and are included in costs of products sold.

Stock Distribution

On September 10, 2015, the Company announced a three-for-twenty distribution of Class B Stock to holders of both Common and Class B Stock. Stockholders received three shares of Class B Stock for every twenty shares of Common and Class B Stock held on the record date of October 8, 2015. Fractional shares were paid in cash. All share quantities, share prices and per share data reported throughout this report have been adjusted to reflect the impact of this distribution.

Equity-Based Compensation

The Company accounts for its stock options following Accounting Standards Codification ("ASC") Topic 718, Compensation – Stock Compensation ("ASC Topic 718"). This Topic requires all equity-based payments to employees, including grants of employee stock options, to be recognized in the statement of earnings based on the grant date fair value of the award. For awards with graded vesting, the Company uses a straight-line method of attributing the value of stock-based compensation expense, subject to minimum levels of expense, based on vesting.

Under ASC Topic 718, stock compensation expense recognized during the period is based on the value of the portion of share-based payment awards that is ultimately expected to vest during the period. Vesting requirements vary for directors, officers and key employees. In general, options granted to outside directors vest six months from the date of grant and options granted to officers and key employees vest with graded vesting over a five-year period, 20% each year, from the date of grant.

The tax benefits from share based payment arrangements were approximately \$3.0 million in 2015, \$5.3 million in 2014 and \$1.2 million in 2013.

Cash and Cash Equivalents

All highly liquid instruments with a maturity of three months or less at the time of purchase are considered cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are composed of trade and contract receivables recorded at either the invoiced amount or costs in excess of billings, are expected to be collected within one year, and do not bear interest. The Company will record a valuation allowance to account for potentially uncollectible accounts receivable. The allowance is determined based on our knowledge of the business, specific customers, review of the receivables' aging and a specific identification of accounts where collection is at risk. Account balances are charged against the allowance after all means of collections have been exhausted and recovery is considered remote. The Company typically does not require collateral.

Table of Contents

Inventories

Inventories are stated at the lower of cost or market, cost being determined in accordance with the first-in, first-out method. The Company records valuation reserves to provide for excess, slow moving or obsolete inventory. In determining the appropriate reserve, the Company considers the age of inventory on hand, the overall inventory levels in relation to forecasted demands as well as reserving for specifically identified inventory that the Company believes is no longer salable.

Property, Plant and Equipment

Depreciation of property, plant and equipment is computed using the straight-line method for financial reporting purposes and using accelerated methods for income tax purposes. Estimated useful lives of the assets are as follows: buildings, 25-40 years; machinery and equipment, 4-10 years. Leased buildings and associated leasehold improvements are amortized over the shorter of the terms of the lease or the estimated useful lives of the assets, with the amortization of such assets included within depreciation expense.

The cost of properties sold or otherwise disposed of and the accumulated depreciation thereon are eliminated from the accounts and the resulting gain or loss, as well as maintenance and repair expenses, is reflected in income.

Replacements and improvements are capitalized.

Depreciation expense was approximately \$13.3 million, \$10.6 million and \$5.7 million in 2015, 2014 and 2013, respectively.

Buildings acquired under capital leases amounted to \$12.3 million (\$14.8 million, net of \$2.5 million of accumulated amortization) and \$12.7 million (\$16.0 million, net of \$3.3 million accumulated amortization) at December 31, 2015 and 2014, respectively. Future minimum lease payments associated with these capital leases are expected to be \$2.6 million in 2016, \$2.6 million in 2017, \$2.6 million in 2018, \$2.0 million in 2019 and \$2.1 million in 2020.

Long-Lived Assets

Long-lived assets to be held and used are initially recorded at cost. The carrying value of these assets is evaluated for recoverability whenever adverse effects or changes in circumstances indicate that the carrying amount may not be recoverable. Impairments are recognized if future undiscounted cash flows from operations are not expected to be sufficient to recover long-lived assets. The carrying amounts are then reduced to fair value, which is typically determined by using a discounted cash flow model.

Goodwill

The Company tests goodwill at the reporting unit level on an annual basis or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The Company has eleven reporting units, however as of November 1, 2015 (the annual testing date), only eight reporting units have goodwill and were subject to the goodwill impairment test.

We may elect to perform a qualitative assessment that considers economic, industry and company-specific factors for all or selected reporting units. If, after completing the assessment, it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying value, we proceed to a quantitative test. We may also elect to perform a quantitative test instead of a qualitative test for any or all of our reporting units.

Quantitative testing requires a comparison of the fair value of each reporting unit to its carrying value. We use the discounted cash flow method to estimate the fair value of our reporting units. The discounted cash flow method incorporates various assumptions, the most significant being projected revenue growth rates, operating margins and cash flows, the terminal growth rate and the weighted average cost of capital. If the carrying value of the reporting unit exceeds its fair value, goodwill is considered impaired and any loss must be measured. To determine the amount of the impairment loss, the implied fair value of goodwill is determined by assigning a fair value to all of the reporting unit's assets and liabilities, including any unrecognized intangible assets, as if the reporting unit had been acquired in a business combination at fair value. If the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss would be recognized in an amount equal to that excess.

There were no impairment charges in 2015, 2014 or 2013.

Table of Contents

Intangible Assets

Acquired intangibles are generally valued based upon future economic benefits such as earnings and cash flows. Acquired identifiable intangible assets are recorded at fair value and are amortized over their estimated useful lives. Acquired intangible assets with an indefinite life are not amortized, but are reviewed for impairment at least annually or more frequently whenever events or changes in circumstances indicate that the carrying amounts of those assets are below their estimated fair values.

Impairment is tested under ASC Topic 350, Intangibles - Goodwill and Other, as amended by Accounting Standards Update ("ASU") 2012-2, by first performing a qualitative analysis in a manner similar to the testing methodology of goodwill discussed previously. The qualitative factors applied under this new provision indicated no impairment to the Company's indefinite lived intangible assets in 2015, 2014 or 2013.

Financial Instruments

The Company's financial instruments consist primarily of cash and cash equivalents, accounts receivable, accounts payable, notes payable and long-term debt. The Company performs periodic credit evaluations of its customers' financial condition and generally does not require collateral. The Company does not hold or issue financial instruments for trading purposes. Due to their short-term nature, the carrying values of cash and equivalents, accounts receivable, accounts payable, and notes payable approximate fair value. The carrying value of the Company's variable rate long-term debt instruments also approximates fair value due to the variable rate feature of these instruments.

Derivatives

The accounting for changes in the fair value of derivatives depends on the intended use and resulting designation. The Company's use of derivative instruments was limited to cash flow hedges for interest rate risk associated with long-term debt. All such instruments were terminated in 2014. Interest rate swaps were used to adjust the proportion of total debt that is subject to variable and fixed interest rates. The interest rate swaps were designated as hedges of the amount of future cash flows related to interest payments on variable-rate debt that, in combination with the interest payments on the debt, converted a portion of the variable-rate debt to fixed-rate debt. The Company recorded all derivatives on the balance sheet at fair value. The related gains or losses, to the extent the derivatives were effective as a hedge, were deferred in shareholders' equity as a component of Accumulated Other Comprehensive Income (Loss) ("AOCI") and reclassified into earnings at the time interest expense was recognized on the associated long-term debt. Any ineffectiveness was recorded in the Consolidated Statements of Operations.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities and the reported amounts of revenues and expenses during the reporting periods in the financial statements and accompanying notes. Actual results could differ from those estimates.

Foreign Currency Translation

The Company accounts for its foreign currency translation in accordance with ASC Topic 830, Foreign Currency Translation. The aggregate transaction gain included in operations was \$1.0 million in 2015, and insignificant for 2014 and 2013.

Dividends

The Company has not paid any cash dividends in the three-year period ended December 31, 2015.

Loss Contingencies

Loss contingencies may from time to time arise from situations such as claims and other legal actions. Loss contingencies are recorded as liabilities when it is probable that a liability has been incurred and the amount of the loss is reasonably estimable. Disclosure is required when there is a reasonable possibility that the ultimate loss will exceed the recorded provision. Contingent liabilities are often resolved over long time periods. In recording liabilities for probable losses, management is required to make estimates and judgments regarding the amount or range of the probable loss. Management continually assesses the adequacy of estimated loss contingencies and, if necessary, adjusts the amounts recorded as better information becomes known.

Table of Contents

Acquisitions

The Company accounts for its acquisitions under ASC Topic 805, Business Combinations and Reorganizations (“ASC Topic 805”). ASC Topic 805 provides guidance on how the acquirer recognizes and measures the consideration transferred, identifiable assets acquired, liabilities assumed, non-controlling interests, and goodwill acquired in a business combination. ASC Topic 805 also expands required disclosures surrounding the nature and financial effects of business combinations. See Note 19 regarding the acquisitions in 2015, 2014 and 2013.

Newly Adopted and Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2014-9, Revenue from Contracts with Customers. This new standard is effective for reporting periods beginning after December 15, 2017, pursuant to the issuance of ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date issued in August 2015. The comprehensive new standard will supersede existing revenue recognition guidance and require revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. Adoption of the new rules could affect the timing of revenue recognition for certain transactions. The guidance permits two implementation approaches, one requiring retrospective application of the new standard with restatement of prior years and one requiring prospective application of the new standard with disclosure of results under old standards. Early adoption is not permitted. The Company is currently evaluating the impacts of adoption and the implementation approach to be used.

In April 2015, the FASB issued ASU No. 2015-03, Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. This ASU requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. ASU 2015-03 does not affect the recognition and measurement guidance for debt issuance costs. The provisions of this ASU are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted, and retrospective application is required. ASU 2015-15, Interest - Imputation of Interest (Subtopic 835-30): Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements, issued in August 2015, provides additional guidance specific to debt issuance costs arising from line-of-credit arrangements. This ASU provides an option to either apply the provisions of ASU No. 2015-03 to line-of-credit arrangements or to defer and instead present debt issuance costs as an asset and subsequently amortize the deferred debt issuance costs ratably over the term of the line-of-credit arrangement. The additional guidance does not alter any other effective date provisions set forth in ASU No. 2015-03. The adoption of this standard did not have a material impact on the Company’s financial statements, as the Company’s debt issuance costs are associated with its revolving credit facility, and therefore such costs will continue to be classified within other non-current assets and amortized ratably over the term of the facility.

In September 2015, the FASB issued ASU No. 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. This ASU eliminates the requirement to retrospectively account for changes to provisional amounts initially recorded in a business acquisition opening balance sheet. The provisions of this ASU are effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted as of the effective date for financial statements that have not yet been made available for issuance. The adoption of this standard is not expected to have a material impact on our financial statements.

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes. This ASU amends existing guidance to require presentation of deferred tax assets and liabilities as non-current within the balance sheet. The provisions of the ASU are effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years. Early adoption is permitted, and may be applied either prospectively or retrospectively. The Company adopted this amendment as of December 31, 2015, applied on a prospective basis. Therefore, prior period amounts have not been recasted.

Table of Contents

NOTE 2 — ACCOUNTS RECEIVABLE

Accounts receivable at December 31 consists of:

(In thousands)	2015	2014
Trade Accounts Receivable	\$87,282	\$87,575
Unbilled Recoverable Costs and Accrued Profits	8,307	1,606
Total Receivables	95,589	89,181
Less Allowance for Doubtful Accounts	(312)	(293)
	\$95,277	\$88,888

NOTE 3 — INVENTORIES

Inventories at December 31 are as follows:

(In thousands)	2015	2014
Finished Goods	\$27,770	\$28,763
Work in Progress	23,977	28,488
Raw Material	63,720	57,802
	\$115,467	\$115,053

At December 31, 2015, the Company's reserve for inventory valuation was \$14.6 million, or 11.2% of gross inventory.

At December 31, 2014, the Company's reserve for inventory valuation was \$12.3 million, or 9.6% of gross inventory.

NOTE 4 — INTANGIBLE ASSETS

The following table summarizes acquired intangible assets as follows:

(In thousands)	Weighted Average Life	December 31, 2015		December 31, 2014	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Patents	5 Years	\$2,146	\$1,264	\$2,146	\$1,077
Noncompete Agreement	4 Years	2,500	479	—	—
Trade Names	8 Years	10,217	2,216	8,304	1,288
Completed and Unpatented Technology	7 Years	24,056	6,795	18,107	4,396
Backlog	1 Year	11,202	10,793	10,902	9,629
Customer Relationships	13 Years	96,472	16,770	82,546	10,624
Total Intangible Assets	6 Years	\$146,593	\$38,317	\$122,005	\$27,014

Amortization is computed on the straight-line method for financial reporting purposes, with the exception of backlog, which is amortized based on the expected realization period of the acquired backlog. Amortization expense for intangibles was \$11.3 million, \$15.8 million and \$4.9 million for 2015, 2014 and 2013, respectively.

Based upon acquired intangible assets at December 31, 2015, amortization expense for each of the next five years is estimated to be:

(In thousands)	
2016	\$10,762
2017	\$10,336
2018	\$10,023
2019	\$9,622
2020	\$9,088

Table of Contents

NOTE 5 — GOODWILL

The following table summarizes the changes in the carrying amount of goodwill for 2015 and 2014:

(In thousands)	2015	2014
Balance at Beginning of the Year	\$100,153	\$100,998
Acquisition	16,237	—
Foreign Currency Translations and Other	(1,021) (845
Balance at End of the Year	\$115,369	\$100,153
Goodwill	\$131,911	\$116,695
Accumulated Impairment Losses	(16,542) (16,542
Goodwill - Net	\$115,369	\$100,153

As discussed in Note 1, goodwill is not amortized but is periodically tested for impairment. For the eight reporting units with goodwill at November 1, 2015, the Company performed a quantitative assessment of the goodwill's carrying value. The assessment indicated no impairment to the carrying value of goodwill in any of the Company's reporting units and no impairment charge was recognized. There was no impairment to the carrying value of goodwill in 2014 or 2013. All goodwill relates to the Aerospace segment; the acquisition of ATS did not result in the recognition of goodwill.

NOTE 6 — LONG-TERM DEBT AND NOTES PAYABLE

Long-term debt consists of the following:

(In thousands)	2015	2014
Revolving Credit Line issued under the Fourth Amended and Restated Credit Agreement dated September 26, 2014. Interest is at LIBOR plus between 1.375% and 2.25% (1.80% at December 31, 2015).		\$165,000
Other Bank Debt	1,963	3,102
Capital Lease Obligations	12,826	14,906
	169,789	183,008
Less Current Maturities	2,579	2,796
	\$167,210	\$180,212

Principal maturities of long-term debt are approximately:

(In thousands)	
2016	\$2,579
2017	2,705
2018	2,684
2019	1,861
2020	2,016
Thereafter	157,944
	\$169,789

The Company's obligations under the Credit Agreement as amended are jointly and severally guaranteed by each domestic subsidiary of the Company other than a non-material subsidiary. The obligations are secured by a first priority lien on substantially all of the Company's and the guarantors' assets.

The Company extended and modified its existing credit facility by entering into Amendment No. 1, dated as of March 27, 2013, to the Second Amended and Restated Credit Agreement, which provided for an increase in the Company's revolving credit facility from \$35 million to \$75 million and for an extension of the maturity date. Interest remained at a rate of LIBOR plus between 1.50% and 2.50% based on the Company's leverage ratio under the Credit Agreement.

Table of Contents

On July 18, 2013, in connection with the funding of the Peco acquisition (See Note 19), the Company amended its existing credit facility by entering into a Third Amended and Restated Credit Agreement, which continued to provide for a \$75 million five-year revolving credit facility and a new \$190 million five-year term loan, both expiring on June 30, 2018. The amended facilities carried an interest rate of LIBOR plus between 2.25% and 3.50%, depending on the Company's leverage ratio as defined in the Credit Agreement. Variable principal payments on the term loan were required quarterly through March 31, 2018 with a balloon payment at maturity. In addition, the Company was required to pay a commitment fee of between 0.25% and 0.50% on the unused portion of the total credit commitment for the preceding quarter, based on the Company's leverage ratio under the credit agreement.

On February 28, 2014, in connection with the funding of the acquisition of ATS, the Company amended its existing credit facility to exercise its option to increase the revolving credit commitment. The credit agreement provided for a \$125 million, five-year revolving credit facility maturing on June 30, 2018, of which \$58.0 million was drawn to finance the acquisition. In addition, the Company was required to pay a commitment fee quarterly at a rate of between 0.25% and 0.50% per annum on the unused portion of the total revolving credit commitment, based on the Company's leverage ratio.

On September 26, 2014, the Company modified and extended its existing credit facility (the "Original Facility") by entering into the Fourth Amended and Restated Credit Agreement (the "Agreement"). On the closing date, there were \$180.5 million of term loans outstanding and \$6 million of revolving loans outstanding under the Original Facility. Pursuant to the Agreement, the Original Facility was replaced with a \$350 million revolving credit line with the option to increase the line by up to \$150 million. The outstanding balances in the Original Facility were rolled into the Agreement on the date of entry. In addition, the maturity date of the loans under the Agreement was extended to September 26, 2019. The credit facility allocates up to \$20 million of the \$350 million revolving credit line for the issuance of letters of credit, including certain existing letters of credit. At December 31, 2015, outstanding letters of credit totaled \$1.1 million.

Covenants in the Agreement were modified to where the maximum permitted leverage ratio of funded debt to Adjusted EBITDA (as defined in the Agreement) is 3.5 to 1, increasing to 4.0 to 1 for up to two fiscal quarters following the closing of an acquisition permitted under the Agreement. The Company will pay interest on the unpaid principal amount of the facility at a rate equal to one-, three- or six-month LIBOR plus between 1.375% and 2.25% based upon the Company's leverage ratio. The Company will also pay a commitment fee to the Lenders in an amount equal to between 0.175% and 0.35% on the undrawn portion of the credit facility, based upon the Company's leverage ratio. The Company is required to maintain a minimum interest coverage ratio (Adjusted EBITDA to interest expense) of 3.0 to 1 for the term of the Agreement. The Company's interest coverage ratio was 34.9 to 1 at December 31, 2015. The Company's leverage ratio was 1.28 to 1 at December 31, 2015. The Company is in compliance with all financial and other covenants at December 31, 2015.

On January 13, 2016, the Company amended the Agreement to add a new lender and extend the maturity date of the credit facility from September 26, 2019 to January 13, 2021. This extension is reflected above in the table of principal maturities by year.

In the event of voluntary or involuntary bankruptcy of the Company or any subsidiary, all unpaid principal and other amounts owing under the Credit Agreement automatically become due and payable. Other events of default, such as failure to make payments as they become due and breach of financial and other covenants, change of control, judgments over a certain amount, and cross default under other agreements give the Agent the option to declare all such amounts immediately due and payable.

NOTE 7 — WARRANTY

In the ordinary course of business, the Company warrants its products against defects in design, materials and workmanship typically over periods ranging from twelve to sixty months. The Company determines warranty reserves needed by product line based on experience and current facts and circumstances. Activity in the warranty accrual, which is included in other accrued expenses on the Consolidated Balance Sheets, is summarized as follows:

(In thousands)	2015	2014	2013
Balance at Beginning of the Year	\$4,884	\$2,796	\$2,551
Warranty Liabilities Acquired	500	564	671

Edgar Filing: ASTRONICS CORP - Form 10-K

Warranties Issued	4,039	3,431	722	
Reassessed Warranty Exposure	(485) (34) (222)
Warranties Settled	(3,197) (1,873) (926)
Balance at End of the Year	\$5,741	\$4,884	\$2,796	

45

Table of Contents

NOTE 8 — INCOME TAXES

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities. Deferred tax assets are reduced, if deemed necessary, by a valuation allowance for the amount of tax benefits which are not expected to be realized. Investment tax credits are recognized on the flow through method.

The provision (benefit) for income taxes consists of the following:

(In thousands)	2015	2014	2013
Current			
U.S. Federal	\$24,809	\$22,705	\$10,904
State	2,382	3,797	682
Foreign	137	1,112	81
Deferred			
U.S. Federal	703	(3,035)) 181
State	(1,019) (655) (757
Foreign	64	(987) (146
	\$27,076	\$22,937	\$10,945

The effective tax rates differ from the statutory federal income tax rate as follows:

	2015	2014	2013
Statutory Federal Income Tax Rate	35.0	% 35.0	% 35.0
Permanent Items			
Non-deductible Stock Compensation Expense	0.6	% 0.6	% 1.0
Domestic Production Activity Deduction	(2.9)% (2.6)% (3.0
Non-deductible Acquisition Costs	—	% —	% 1.0
Other	0.2	% 0.1	% —
Foreign Tax Benefits	(1.1)% (1.7)% (0.3
State Income Tax (Benefits), Net of Federal Income Tax Effect	0.9	% 2.6	% (0.1
Research and Development Tax Credits	(2.7)% (4.3)% (5.0
Other	(1.2)% (0.7)% —
Effective Tax Rate	28.8	% 29.0	% 28.6

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

No provision has been made for U.S. federal or foreign taxes on that portion of certain foreign subsidiaries' undistributed earnings (\$11.3 million at December 31, 2015) considered to be permanently reinvested. It is not practicable to determine the amount of tax that would be payable if these amounts were repatriated to the U.S.

Table of Contents

Significant components of the Company's deferred tax assets and liabilities as of December 31, are as follows:

(In thousands)	2015	2014
Deferred Tax Assets:		
Goodwill and Intangible Assets	\$1,261	\$2,470
Asset Reserves	6,589	4,497
Deferred Compensation	7,986	8,895
Capital Lease Basis Difference	1,753	1,935
State Investment Tax Credit Carryforwards, Net of Federal Tax	533	1,028
Customer Advanced Payments and Deferred Revenue	1,722	1,795
State Net Operating Loss Carryforwards and Other	2,401	2,853
Total Gross Deferred Tax Assets	22,245	23,473
Valuation Allowance for State Deferred Tax Assets and Tax Credit Carryforwards, Net of Federal Tax	(2,640)	(3,134)
Deferred Tax Assets	19,605	20,339
Deferred Tax Liabilities:		
Depreciation	12,561	8,586
Intangible Assets	19,254	23,693
Other	1,199	1,237
Deferred Tax Liabilities	33,014	33,516
Net Deferred Tax Liabilities	\$(13,409)	\$(13,177)
The net deferred tax assets and liabilities presented in the Consolidated Balance Sheets are as follows at December 31:		
(In thousands)	2015	2014
Deferred Tax Asset — Current	\$—	\$7,762
Other Assets — Long-term	1,558	—
Deferred Tax Liabilities — Long-term	(14,967)	(20,939)
Net Deferred Tax Liabilities	\$(13,409)	\$(13,177)

At December 31, 2015, state tax credit carryforwards amounted to approximately \$0.8 million. These state tax credit carryforwards will expire from 2016 through 2029. At December 31, 2015, state net operating loss carryforwards which the Company expects to utilize amounted to approximately \$8.2 million and expire at various dates between 2032 and 2035.

Due to the uncertainty as to the Company's ability to generate sufficient taxable income in certain states in the future and utilize certain of the Company's state operating loss carryforwards before they expire, the Company has recorded a valuation allowance accordingly. These state net operating loss carryforwards amount to approximately \$31.4 million and expire at various dates from 2023 through 2035. The excess tax benefits associated with stock option exercises are recorded directly to shareholders' equity only when realized and amounted to approximately \$3.0 million, \$5.3 million and \$1.2 million for the years ended December 31, 2015, 2014, and 2013 respectively.

The Company has analyzed its filing positions in all of the federal and state jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. Should the Company need to accrue a liability for uncertain tax benefits, any interest associated with that liability would be recorded as interest expense. Penalties, if any, would be recorded as operating expenses. As of December 31, 2015, we no longer have any unrecognized tax benefits. Reserves for uncertain tax positions that had been recorded pursuant to ASC Topic 740-10 as of December 31, 2014 were reversed during the year-ended December 31, 2015. No additional reserves for uncertain income tax positions were deemed necessary for the year ended December 31, 2015. A reconciliation of the total amounts of unrecognized tax benefits, excluding interest and penalties which are insignificant, is as follows:

Table of Contents

(in thousands)	2015	2014	2013
Balance at Beginning of the Year	\$181	\$1,940	\$840
Increases (Decreases) as a Result of Tax Positions Taken in Prior Years	(181) (1,901) 145
Increases as a Result of Tax Positions Taken in the Current Year	—	142	955
Balance at End of the Year	\$—	\$181	\$1,940

There are no penalties or interest liabilities accrued as of December 31, 2015 or 2014, nor are any penalties or interest costs included in expense for each of the years ended December 31, 2015, 2014 and 2013. The years under which we conducted our evaluation coincided with the tax years currently still subject to examination by major federal and state tax jurisdictions, those being 2012 through 2015 for federal purposes and 2011 through 2015 for state purposes.

Pretax income from the Company's foreign subsidiaries amounted to \$3.6 million, \$4.3 million and \$0.2 million for 2015, 2014 and 2013, respectively. The balance of pretax earnings for each of those years were domestic.

In January 2013, the American Taxpayer Relief Act of 2012 extended the research and development tax credits for the year ended December 31, 2012. As the new law was not enacted until 2013, the 2012 tax provision contains no estimated benefit for research and development tax credits. The Company recognized a total benefit of \$1.1 million in 2013 related to the 2012 credit.

NOTE 9 — PROFIT SHARING/401(k) PLAN

The Company offers eligible domestic full-time employees participation in certain profit sharing/401(k) plans. The plans provide for a discretionary annual company contribution. In addition, employees may contribute a portion of their salary to the plans which is partially matched by the Company. The plans may be amended or terminated at any time.

Total charges to income before income taxes for these plans were approximately \$6.3 million, \$5.1 million and \$3.7 million in 2015, 2014 and 2013, respectively.

NOTE 10 — RETIREMENT PLANS AND RELATED POST RETIREMENT BENEFITS

The Company has two non-qualified supplemental retirement defined benefit plans ("SERP" and "SERP II") for certain current and retired executive officers. The accumulated benefit obligation of the plans as of December 31, 2015 and 2014 amounts to \$16.7 million and \$16.5 million, respectively.

The Plans provide for benefits based upon average annual compensation and years of service and in the case of SERP, there are offsets for social security and profit sharing benefits. It is the Company's intent to fund the plans as plan benefits become payable, since no assets exist at December 31, 2015 or 2014 for either of the plans.

The Company accounts for the funded status (i.e., the difference between the fair value of plan assets and the projected benefit obligations) of its pension plans in accordance with the recognition and disclosure provisions of ASC Topic 715, Compensation, Retirement Benefits, which requires the Company to recognize the funded status in its balance sheet, with a corresponding adjustment to AOCI, net of tax. These amounts will be subsequently recognized as net periodic pension cost pursuant to the Company's historical policy for amortizing such amounts. Further, actuarial gains and losses that arise in subsequent periods and are not recognized as net periodic pension cost in the same periods will be recognized as a component of AOCI. Those amounts will be subsequently recognized as a component of net periodic pension cost on the same basis as the amounts recognized in AOCI.

Unrecognized prior service costs of \$2.8 million (\$4.3 million net of \$1.5 million in taxes) and unrecognized actuarial losses of \$4.0 million (\$6.1 million net of \$2.1 million in taxes) are included in AOCI at December 31, 2015 and have not yet been recognized in net periodic pension cost. The prior service cost included in AOCI that is expected to be recognized in net periodic pension cost during the fiscal year-ended December 31, 2016 is \$0.3 million (\$0.4 million net of \$0.1 million in taxes). The actuarial loss included in AOCI expected to be recognized in net periodic pension cost during the fiscal year-ended December 31, 2016 is \$0.2 million (\$0.3 million net of \$0.1 million in taxes).

Table of Contents

The reconciliation of the beginning and ending balances of the projected benefit obligation of the plans for the years ended December 31 is as follows:

(In thousands)	2015	2014
Funded Status		
Projected Benefit Obligation		
Beginning of the Year — January 1	\$20,990	\$14,314
Service Cost	194	247
Interest Cost	843	721
Actuarial (Gain) Loss	(1,261) 6,056
Benefits Paid	(348) (348
End of the Year — December 31	\$20,418	\$20,990

The assumptions used to calculate the projected benefit obligation as of December 31 are as follows:

	2015	2014
Discount Rate	4.45%	4.05%
Future Average Compensation Increases	3.00% – 5.00%	5.00%

The plans are unfunded at December 31, 2015 and are recognized in the accompanying Consolidated Balance Sheets as a current accrued pension liability of \$0.3 million and a long-term accrued pension liability of \$20.1 million. This also is the expected future contribution to the plan, since the plan is unfunded.

The following table summarizes the components of the net periodic cost for the years ended December 31:

(In thousands)	2015	2014	2013
Net Periodic Cost			
Service Cost — Benefits Earned During Period	\$194	\$247	\$295
Interest Cost	843	721	624
Amortization of Prior Service Cost	495	495	495
Amortization of Losses	449	108	128
Net Periodic Cost	\$1,981	\$1,571	\$1,542

The assumptions used to determine the net periodic cost are as follows:

	2015	2014	2013
Discount Rate	4.05%	5.10%	4.20%
Future Average Compensation Increases	5.00%	5.00%	5.00%

The Company expects the benefits to be paid in each of the next five years to be \$0.3 million and \$2.1 million in the aggregate for the next five years after that. This also is the expected Company contribution to the plans.

Participants in SERP are entitled to paid medical, dental and long-term care insurance benefits upon retirement under the plan. The measurement date for determining the plan obligation and cost is December 31.

Table of Contents

The reconciliation of the beginning and ending balances of the accumulated postretirement benefit obligation for the years ended December 31, is as follows:

(In thousands)	2015	2014
Funded Status		
Accumulated Postretirement Benefit Obligation		
Beginning of the Year — January 1	\$990	\$630
Service Cost	6	3
Interest Cost	39	31
Actuarial (Gain) Loss	(54) 373
Benefits Paid	(56) (47
End of the Year — December 31	\$925	\$990

The assumptions used to calculate the accumulated postretirement benefit obligation as of December 31 are as follows:

	2015	2014
Discount Rate	4.45%	4.05%

The following table summarizes the components of the net periodic cost for the years ended December 31:

(In thousands)	2015	2014	2013
Net Periodic Cost			
Service Cost — Benefits Earned During Period	\$6	\$3	\$3
Interest Cost	39	31	24
Amortization of Prior Service Cost	26	25	25
Amortization of Losses	26	—	—
Net Periodic Cost	\$97	\$59	\$52

The assumptions used to determine the net periodic cost are as follows:

	2015	2014	2013
Discount Rate	4.05%	5.10%	4.20%
Future Average Healthcare Benefit Increases	5.32%	5.48%	5.76%

Unrecognized prior service costs of \$0.1 million and unrecognized actuarial losses of \$0.2 million for medical, dental and long-term care insurance benefits (net of taxes of \$0.2 million) are included in AOCI at December 31, 2015 and have not been recognized in net periodic cost. The Company estimates that the prior service costs and net losses in AOCI as of December 31, 2015 that will be recognized as components of net periodic benefit cost during the year ended December 31, 2016 for the Plan will be insignificant. For measurement purposes, a 5.2% and 5.5% increase in the cost of health care benefits was assumed for 2016 and 2017, respectively, and a range between 3.8% and 6.4% from 2018 through 2050. A one percentage point increase or decrease in this rate would change the post retirement benefit obligation by approximately \$0.1 million. The plan is recognized in the accompanying Consolidated Balance Sheets as a current accrued pension liability of less than \$0.1 million and a long-term accrued pension liability of \$0.9 million. The Company expects the benefits to be paid in each of the next five years to be less than \$0.1 million per year and approximately \$0.3 million in the aggregate for the next five years after that. This also is the expected Company contribution to the plan, as it is unfunded.

As of July 18, 2013, upon completion of the acquisition of Peco, the Company is now a participating employer in a trustee-managed multiemployer defined benefit pension plan for employees who participate in collective bargaining agreements. The plan generally provides retirement benefits to employees based on years of service to the Company. Contributions are based on the hours worked and are expensed on a current basis. The Plan is 91.8% funded as of January 1, 2015. The Company's contributions to the plan were \$1.0 million in 2015 and \$0.9 million in 2014. These contributions represent less than 1% of total contributions to the plan. There was no participation in multiemployer plans prior to 2013.

Table of Contents

NOTE 11 — SHAREHOLDERS' EQUITY

Reserved Common Stock

At December 31, 2015, approximately 9.8 million shares of common stock were reserved for issuance upon conversion of the Class B stock, exercise of stock options and purchases under the Employee Stock Purchase Plan. Class B Stock is identical to Common Stock, except Class B Stock has ten votes per share, is automatically converted to Common Stock on a one-for-one basis when sold or transferred other than via gift, devise or bequest and cannot receive dividends unless an equal or greater amount of dividends is declared on Common Stock.

Comprehensive Income and Accumulated Other Comprehensive Income (Loss)

Comprehensive income consists of net income and the after-tax impact of currency translation adjustments, mark to market adjustments for derivatives and retirement liability adjustments. Income taxes related to derivatives and retirement liability adjustments within other comprehensive income are generally recorded based on an effective tax rate of approximately 35%. No income tax effect is recorded for currency translation adjustments.

The components of accumulated other comprehensive income (loss) are as follows:

(In thousands)	2015	2014	
Foreign Currency Translation Adjustments	\$(7,971)	\$(3,354)
Retirement Liability Adjustment – Before Tax	(10,912)	(13,223)
Tax Benefit	3,819		4,628
Retirement Liability Adjustment – After Tax	(7,093)	(8,595)
Accumulated Other Comprehensive Loss	\$(15,064)	\$(11,949)

The components of other comprehensive income (loss) are as follows:

(In thousands)	2015	2014	2013	
Foreign Currency Translation Adjustments	\$(4,617)	\$(4,638)
Reclassification to Interest Expense	—	103	109	
Mark to Market Adjustments for Derivatives	—	4	2	
Tax Expense	—	(38)	(38)
Mark to Market Adjustments for Derivatives	—	69	73	
Retirement Liability Adjustment	2,311	(5,800)	1,893
Tax Benefit (Expense)	(809)	2,031	(663)
Retirement Liability Adjustment	1,502	(3,769)	1,230
Other Comprehensive (Loss) Income	\$(3,115)	\$(8,338)

NOTE 12 — EARNINGS PER SHARE

Earnings per share computations are based upon the following table:

(In thousands, except per share data)	2015	2014	2013
Net Income	\$66,974	\$56,170	\$27,266
Basic Earnings Weighted Average Shares	25,430	24,970	24,128
Net Effect of Dilutive Stock Options	813	1,091	1,207
Diluted Earnings Weighted Average Shares	26,243	26,061	25,335
Basic Earnings Per Share	\$2.63	\$2.25	\$1.13
Diluted Earnings Per Share	\$2.55	\$2.16	\$1.08

The above information has been adjusted to reflect the impact of the three-for-twenty distribution of Class B Stock for shareholders of record on October 8, 2015.

Table of Contents

Stock options with exercise prices greater than the average market price of the underlying common shares are excluded from the computation of diluted earnings per share because they are out-of-the-money and the effect of their inclusion would be anti-dilutive. The number of common shares covered by out-of-the-money stock options was approximately 0.1 million at December 31, 2015, and were insignificant at December 31, 2014 and 2013.

NOTE 13 — STOCK OPTION AND PURCHASE PLANS

The Company has stock option plans that authorize the issuance of options for shares of Common Stock to directors, officers and key employees. Stock option grants are designed to reward long-term contributions to the Company and provide incentives for recipients to remain with the Company. The exercise price, determined by a committee of the Board of Directors, may not be less than the fair market value of the Common Stock on the grant date. Options become exercisable over periods not exceeding ten years. The Company's practice has been to issue new shares upon the exercise of the options.

Stock compensation expense recognized during the period is based on the value of the portion of share-based payment awards that is ultimately expected to vest during the period. Vesting requirements vary for directors, officers and key employees. In general, options granted to outside directors vest six months from the date of grant and options granted to officers and key employees straight line vest over a five-year period from the date of grant.

	2015	2014	2013
Weighted Average Fair Value of the Options Granted	\$20.70	\$22.25	\$16.83

The weighted average fair value for these options was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions:

	2015	2014	2013
Risk-free Interest Rate	1.36% – 2.10%	0.12% – 2.30%	0.88% – 2.22%
Dividend Yield	—%	—%	—%
Volatility Factor	0.40 – 0.51	0.42 – 0.52	0.51 – 0.56
Expected Life in Years	4.0 – 8.0	4.0 – 8.0	5.0 – 8.0

To determine expected volatility, the Company uses historical volatility based on weekly closing prices of its Common Stock and considers currently available information to determine if future volatility is expected to differ over the expected terms of the options granted. The risk-free rate is based on the U.S. Treasury yield curve at the time of grant for the appropriate term of the options granted. Expected dividends are based on the Company's history and expectation of dividend payouts. The expected term of stock options is based on vesting schedules, expected exercise patterns and contractual terms.

The following table provides compensation expense information based on the fair value of stock options for the years ended December 31, 2015, 2014 and 2013:

(In thousands)	2015	2014	2013
Stock Compensation Expense	\$2,274	\$1,730	\$1,384
Tax Benefit	(177)) (122)) (112)
Stock Compensation Expense, Net of Tax	\$2,097	\$1,608	\$1,272

A summary of the Company's stock option activity and related information for the years ended December 31 is as follows:

	2015			2014			2013		
(Aggregate intrinsic value in thousands)	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Options	Weighted Average Exercise Price	Aggregate Intrinsic Value

Table of Contents

The aggregate intrinsic value in the preceding table represents the total pretax option holder's intrinsic value, based on the Company's closing stock price of Common Stock which would have been received by the option holders had all option holders exercised their options as of that date. The Company's closing stock price of Common Stock was \$40.71, \$48.10 and \$36.96 as of December 31, 2015, 2014 and 2013, respectively.

The weighted average fair value of options vested during 2015, 2014 and 2013 was \$12.48, \$7.05 and \$4.50, respectively. The total fair value of options that vested during the year amounted to \$1.5 million, \$1.2 million and \$1.0 million for the years ended December 31, 2015, 2014 and 2013, respectively. At December 31, 2015, total compensation costs related to non-vested awards not yet recognized amounts to \$4.9 million and will be recognized over a weighted average period of 2.4 years.

The following is a summary of weighted average exercise prices and contractual lives for outstanding and exercisable stock options as of December 31, 2015:

Exercise Price Range	Outstanding			Exercisable		
	Shares	Weighted Average Remaining Life in Years	Weighted Average Exercise Price	Shares	Weighted Average Remaining Life in Years	Weighted Average Exercise Price
\$ 3.50 - \$ 5.12	458,470	3.3	\$3.86	458,470	3.3	\$3.86
\$ 6.63 - \$ 7.30	125,041	1.2	6.75	125,041	1.2	6.75
\$10.16 - \$18.03	426,869	5.6	13.51	358,240	5.4	13.51
\$30.00 - \$47.37	228,848	8.9	38.42	55,816	8.2	40.01
\$60.68 - \$60.68	17,250	9.2	60.68	17,250	9.2	60.68
	1,256,478	5.0	14.50	1,014,817	4.2	10.58

The Company established Incentive Stock Option Plans for the purpose of attracting and retaining executive officers and key employees, and to align management's interest with those of the shareholders. Generally, the options must be exercised within ten years from the grant date and vest ratably over a five-year period. The exercise price for the options is equal to the share price at the date of grant. At December 31, 2015, the Company had options outstanding for 1,033,176 shares under the plans. At December 31, 2015, there were 587,687 options available for future grant under the plan established in 2011.

The Company established the Directors Stock Option Plans for the purpose of attracting and retaining the services of experienced and knowledgeable outside directors, and to align their interest with those of the shareholders. The options must be exercised within ten years from the grant date. The exercise price for the option is equal to the share price at the date of grant and vests six months from the grant date. At December 31, 2015, the Company had options outstanding for 223,302 shares under the plans. At December 31, 2015, there were 169,816 options available for future grant under the plan established in 2005.

In addition to the options discussed above, the Company has established the Employee Stock Purchase Plan to encourage employees to invest in Astronics Corporation. The plan provides employees the opportunity to invest up to the IRS annual maximum of approximately \$21,250 in Astronics common stock at a price equal to 85% of the fair market value of the Astronics common stock, determined each October 1. Employees are allowed to enroll annually. Employees indicate the number of shares they wish to obtain through the program and their intention to pay for the shares through payroll deductions over the annual cycle of October 1 through September 30. Employees can withdraw anytime during the annual cycle, and all money withheld from the employees pay is returned with interest. If an employee remains enrolled in the program, enough money will have been withheld from the employees' pay during the year to pay for all the shares that the employee opted for under the program. At December 31, 2015, employees had subscribed to purchase 128,802 shares at \$28.82 per share. The weighted average fair value of the options was approximately \$7.97, \$9.66 and \$6.75 for options granted during the year ended December 31, 2015, 2014 and 2013, respectively.

The fair value for the options granted under the Employee Stock Purchase Plan was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions:

2015	2014	2013
------	------	------

Edgar Filing: ASTRONICS CORP - Form 10-K

Risk-free Interest Rate	0.31	%	0.10	%	0.10	%

Table of Contents

NOTE 14 — FAIR VALUE

ASC Topic 820, Fair value Measurements and Disclosures, (“ASC Topic 820”) defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The statement indicates, among other things, that a fair value measurement assumes that the transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. ASC Topic 820 defines fair value based upon an exit price model. The Company’s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and involves consideration of factors specific to the asset or liability.

ASC Topic 820 establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument.

Level 3 inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value.

On a Recurring Basis:

A financial asset or liability’s classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement. The financial liabilities carried at fair value measured on a recurring basis consisted of contingent consideration related to certain prior acquisitions, valued at zero and \$1.7 million at December 31, 2015 and 2014 respectively, recorded within Other Liabilities. The values were determined using Level 3 inputs. There were no financial assets carried at fair value measured on a recurring basis at December 31, 2015 or 2014. The amounts recorded for the contingent considerations were calculated using an estimate of the probability of the future cash outflows. The varying contingent payments were then discounted to the present value utilizing a discounted cash flow methodology. The contingent consideration liabilities have no observable Level 1 or Level 2 inputs. The change in the balance of contingent consideration during fiscal 2015 was primarily due to fair value adjustments of \$1.8 million resulting from the re-evaluation of the probability of the achievement of the contingent consideration targets. There was a similar adjustment of \$5.0 million in fiscal 2014. These adjustments were recorded within SG&A expenses in the Consolidated Statements of Operations.

On a Non-recurring Basis:

In accordance with the provisions of ASC Topic 350, Intangibles – Goodwill and Other, the Company estimates the fair value of reporting units, utilizing unobservable Level 3 inputs. Level 3 inputs require significant management judgment due to the absence of quoted market prices or observable inputs for assets of a similar nature. The Company utilizes a discounted cash flow method to estimate the fair value of reporting units utilizing unobservable inputs. The fair value measurement of the reporting unit under the step-one and step-two analysis of the quantitative goodwill impairment test are classified as Level 3 inputs. There were no impairment charges to goodwill in any of the Company’s reporting units in 2015, 2014 or 2013.

Intangible assets that are amortized are evaluated for recoverability whenever adverse effects or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability test consists of comparing the undiscounted projected cash flows with the carrying amount. Should the carrying amount exceed undiscounted projected cash flows, an impairment loss would be recognized to the extent the carrying amount exceeds fair value. There were no impairment charges to any of the Company’s intangible assets in either of the Company’s segments in 2015, 2014 or 2013.

The Armstrong intangible assets acquired on January 14, 2015 were valued using a discounted cash flow methodology and are classified as Level 3 inputs.

Due to their short-term nature, the carrying value of cash and equivalents, accounts receivable, accounts payable, and notes payable approximate fair value. The carrying value of the Company’s variable rate long-term debt instruments also approximates fair value due to the variable rate feature of these instruments.

NOTE 15 — DERIVATIVE FINANCIAL INSTRUMENTS

At December 31, 2013, the Company had one interest rate swap with a notional amount of approximately \$1.5 million related to certain industrial revenue bonds. The interest rate swap effectively fixed the interest rate on these obligations through

54

Table of Contents

February, 2016. In November 2014, the Company terminated the interest rate swap in connection with the redemption of the underlying bonds.

An interest rate swap related to a 2009 term note was terminated in the third quarter of 2013 with no significant impact to the results of our operations.

Activity in AOCI related to these derivatives is summarized below:

(In thousands)	2014	2013
Derivative Balance at the Beginning of the Year in AOCI	\$(69) \$(142
Net Deferral in AOCI of Derivatives:		
Net Decrease (Increase) in Fair Value of Derivatives	4	2
Tax Effect	(2) —
	2	2
Net Reclassification from AOCI into Earnings:		
Reclassification from AOCI into Earnings – Interest Expense	103	109
Tax Effect	(36) (38
	67	71
Net Change in Derivatives for the Year	69	73
Derivative Balance at the End of the Year in AOCI	\$—	\$(69

To the extent the interest rate swaps were not perfectly effective in offsetting the change in the value of the payments being hedged; the ineffective portion of these contracts was recognized in earnings immediately as interest expense. Ineffectiveness, if any, was not significant for the years ended December 31, 2014 and 2013. The Company classified the cash flows from hedging transactions in the same category as the cash flows from the respective hedged items.

NOTE 16 — SELECTED QUARTERLY FINANCIAL INFORMATION

The following table summarizes selected quarterly financial information for 2015 and 2014:

(Unaudited) (In thousands, except for per share data)	Quarter Ended							
	Dec. 31, 2015	Oct. 3, 2015	July 4, 2015	April 4, 2015	Dec. 31, 2014	Sept. 27, 2014	June 28, 2014	March 29, 2014
Sales	\$157,340	\$200,145	\$173,156	\$161,638	\$166,083	\$179,442	\$174,563	\$140,951
Gross Profit (sales less cost of products sold)	\$38,901	\$59,427	\$49,452	\$40,162	\$42,525	\$51,310	\$43,202	\$30,005
Income Before Income Taxes	\$14,822	\$35,887	\$27,044	\$16,297	\$24,411	\$23,470	\$19,922	\$11,304
Net Income	\$13,907	\$24,694	\$17,690	\$10,683	\$18,439	\$17,080	\$13,144	\$7,507
Basic Earnings Per Share	\$0.54	\$0.97	\$0.70	\$0.42	\$0.73	\$0.68	\$0.53	\$0.30
Diluted Earnings Per Share	\$0.53	\$0.94	\$0.67	\$0.41	\$0.71	\$0.65	\$0.50	\$0.29

NOTE 17 — COMMITMENTS AND CONTINGENCIES

The Company leases certain facilities and equipment under various lease contracts with terms that meet the accounting definition of operating leases. These arrangements may include fair value renewal or purchase options. Rental expense for the years ended December 31, 2015, 2014 and 2013 was \$2.9 million, \$3.0 million and \$2.4 million, respectively. The following table represents future minimum lease payment commitments as of December 31, 2015:

(In thousands)	
2016	\$2,444
2017	1,964
2018	1,635
2019	1,560
2020	148
	\$7,751

Table of Contents

From time to time the Company may enter into purchase agreements with suppliers under which there is a commitment to buy a minimum amount of product. Purchase commitments outstanding at December 31, 2015 were \$99.2 million. These commitments are not reflected as liabilities in the Company's Consolidated Balance Sheets.

Legal Proceedings

The Company is subject to various legal proceedings, claims, and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, we do not expect these matters will have a material adverse effect on our business, financial position, results of operations, or cash flows. However, the results of these matters cannot be predicted with certainty. Should the Company fail to prevail in any legal matter or should several legal matters be resolved against the Company in the same reporting period, then the financial results of that particular reporting period could be materially adversely affected.

On December 29, 2010, Lufthansa Technik AG ("Lufthansa") filed a Statement of Claim in the Regional State Court of Mannheim, Germany. Lufthansa's claim asserts that our subsidiary, Astronics Advanced Electronic Systems Corp. ("AES") sold, marketed and brought into use in Germany a power supply system which infringes upon a German patent held by Lufthansa. The relief sought by Lufthansa includes requiring AES to stop selling and marketing the allegedly infringing power supply system, a recall of allegedly infringing products sold to commercial customers since November 26, 2003 and compensation for damages. The claim does not specify an estimate of damages and a damages claim will be made by Lufthansa only if it receives a favorable ruling on the determination of infringement. The value of the dispute has been set by the court to be €2 million. This is an estimate of the commercial value of the matter.

On February 6, 2015, the Regional State Court of Mannheim, Germany rendered its decision that the patent was infringed. The judgment does not require AES to recall products which are already installed in aircraft or have been sold to other end users. On July 15, 2015, Lufthansa advised AES of their intention to enforce the accounting provisions of the decision, which require AES to provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. Additionally, if Lufthansa provides the required bank guarantees specified in the decision, the Company may be required to offer a recall of products which are in the distribution channels in Germany, and provide certain financial information regarding sales of the infringing product to enable Lufthansa to make an estimate of requested damages. No such bank guarantees have been issued to date.

The Company appealed and believes it has valid defenses to refute the decision. The appeal process is estimated to extend up to two years. The enforcement of the accounting provision of the decision, as discussed above, has no impact on the appeals process. As a result, we do not currently have sufficient information to provide an estimate of AES's potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of December 31, 2015.

On November 26, 2014, Lufthansa filed a complaint in the United States District for the Western District of Washington. Lufthansa's complaint in this action alleges that AES manufactures, uses, sells and offers for sale a power supply system which infringes upon a U.S. patent held by Lufthansa. The patent at issue in the U.S. action is based on technology similar to that involved in the German action. However, the U.S. court will not be bound by the ultimate determination made by the German court. The Company believes it has valid defenses to refute Lufthansa's claims and intends to contest this matter vigorously. As this matter is in the early stages of fact discovery, we do not currently have sufficient information to provide an estimate of AES's potential exposure related to this matter. As loss exposure is neither probable nor estimable at this time, the Company has not recorded any liability with respect to this litigation as of December 31, 2015.

Table of Contents

NOTE 18 — SEGMENTS

Segment information and reconciliations to consolidated amounts for the years ended December 31 are as follows:

(In thousands)	2015	2014	2013		
Sales:					
Aerospace	\$549,738	\$494,747	\$330,530		
Test Systems	142,596	166,769	10,103		
Less Inter-segment Sales	(55) (477) (696))
	142,541	166,292	9,407		
Total Consolidated Sales	\$692,279	\$661,039	\$339,937		
Operating Profit (Loss) and Margins:					
Aerospace	\$85,103	\$79,753	\$55,200		
	15.5	% 16.1	% 16.7		%
Test Systems	25,529	12,401	(3,756)))
	17.9	% 7.4	% (37.2))%
Total Operating Profit	110,632	92,154	51,444		
	16.0	% 13.9	% 15.1		%
Deductions from Operating Profit:					
Interest Expense, Net of Interest Income	(4,751) (8,255) (4,094))
Corporate and Other Expenses, Net	(11,831) (4,792) (9,139))
Income before Income Taxes	\$94,050	\$79,107	\$38,211		
Depreciation and Amortization:					
Aerospace	\$19,377	\$17,847	\$10,058		
Test Systems	5,209	8,786	590		
Corporate	723	621	411		
Total Depreciation and Amortization	\$25,309	\$27,254	\$11,059		
Identifiable Assets:					
Aerospace	\$510,884	\$468,481	\$428,619		
Test Systems	64,934	69,247	11,035		
Corporate	33,425	25,182	51,617		
Total Assets	\$609,243	\$562,910	\$491,271		
Capital Expenditures:					
Aerospace	\$16,503	\$35,650	\$6,711		
Test Systems	2,103	3,472	61		
Corporate	35	1,760	96		
Total Capital Expenditures	\$18,641	\$40,882	\$6,868		

Operating profit is sales less cost of products sold and other operating expenses, excluding interest expense and other corporate expenses. Cost of products sold and other operating expenses are directly identifiable to the respective segment.

For the years ended December 31, 2015, 2014 and 2013, there was no goodwill or purchased intangible asset impairment losses in either the Aerospace or Test System segment. In the Aerospace segment, goodwill amounted to \$115.4 million and \$100.2 million at December 31, 2015 and 2014, respectively. In the Test Systems segment, there was no goodwill as of December 31, 2015 and 2014.

Table of Contents

The following table summarizes the Company's sales into the following geographic regions for the years ended December 31:

	2015	2014	2013
(In thousands)			
North America	\$521,768	\$452,994	\$300,368
Asia	108,967	141,247	15,570
Europe	57,936	64,742	21,190
South America	1,112	1,192	1,851
Other	2,496	864	958
	\$692,279	\$661,039	\$339,937

The following table summarizes the Company's property, plant and equipment by country for the years ended December 31:

	2015	2014	2013
(In thousands)			
United States	\$115,117	\$105,698	\$59,803
France	9,092	10,347	10,771
Canada	533	271	326
	\$124,742	\$116,316	\$70,900

Sales recorded by the Company's foreign operations were \$50.8 million, \$64.5 million and \$16.5 million in 2015, 2014 and 2013, respectively. Net income from these locations was \$3.4 million, \$4.1 million and \$0.2 million in 2015, 2014 and 2013, respectively. Net assets held outside of the U.S. total \$36.1 million and \$38.0 million at December 31, 2015 and 2014, respectively. The exchange gain included in determining net income was \$1.0 million in 2015 and was insignificant in 2014 and 2013. Cumulative translation adjustments amounted to \$(8.0) million and \$(3.4) million at December 31, 2015 and 2014, respectively.

The Company has a significant concentration of business with three major customers; Panasonic Aviation Corporation ("Panasonic"), Apple Inc. ("Apple"), and The Boeing Company ("Boeing"). The following is information relating to the activity with those customers:

	2015	2014	2013	
Percent of Consolidated Revenue				
Panasonic	21.0	% 17.7	% 29.6	%
Apple	13.1	% 17.9	% —	
Boeing	13.0	% 14.1	% 14.5	%
(In thousands)		2015	2014	
Accounts Receivable at December 31,				
Panasonic		\$14,433	\$21,808	
Apple		\$—	\$4,342	
Boeing		\$9,598	\$6,874	

Sales to Apple are in the Test Systems segment. Sales to Panasonic are in the Aerospace segment. Sales to Boeing occur in both segments.

NOTE 19 — ACQUISITIONS

Armstrong Aerospace, Inc.

On January 14, 2015, the Company purchased 100% of the equity of Armstrong for \$52.3 million in cash. Armstrong, located in Itasca, Illinois, is a leading provider of engineering, design and certification solutions for commercial aircraft, specializing in connectivity, in-flight entertainment, and electrical power systems. Armstrong is included in our Aerospace segment. This transaction was not considered material to the Company's financial position or results of operations. All of the goodwill and

Table of Contents

purchased intangible assets are expected to be deductible for tax purposes over 15 years. The purchase price allocation for this acquisition has been finalized.

Astronics Test Systems

On February 28, 2014, our wholly owned subsidiary, ATS, purchased substantially all of the assets and liabilities of the Test and Services Division of EADS North America, Inc. for approximately \$69.4 million in cash, including a net working capital adjustment of approximately \$16.4 million. Located in Irvine, California, ATS is a leading provider of highly-engineered automatic test systems, subsystems and instruments for the semiconductor, consumer electronics, commercial aerospace & defense industries. ATS provides fully customized testing systems and support services for these markets. It also designs and manufactures test equipment under the test instrument brands known as Racal and Talon. The acquisition strengthens our service offerings and expertise in the test market. This subsidiary is included in our Test Systems segment. The purchase price allocation for this acquisition has been finalized.

PGA Electronic S.A.

On December 5, 2013, we acquired 100% of the stock of PGA, a designer and manufacturer of seat motion and lighting systems primarily for business and first class aircraft seats and is Europe's leading provider of in-flight entertainment/ communication systems as well as cabin management systems for private VVIP aircraft. The addition of PGA further diversifies the products and technologies that Astronics offers. The purchase price was approximately \$31.3 million for which approximately \$9.1 million, net of cash acquired, was paid in cash and the balance paid with 264,168 shares of Astronics stock valued at \$51.00 per share. PGA is included in our Aerospace reporting segment. The purchase price allocation for this acquisition is complete.

Astronics AeroSat Corporation

On October 1, 2013, we acquired certain assets and liabilities from AeroSat Corporation and related entities, a supplier of aircraft antenna systems for \$12 million in cash, plus the a potential additional purchase consideration of up to \$53 million based upon the achievement of certain revenue targets in 2014 and 2015. The addition of AeroSat further diversifies the products and technologies that Astronics offers. The additional contingent purchase consideration was recorded at its estimated fair value of approximately \$5.0 million at the date of acquisition based upon the Company's assessment of the probability of AeroSat achieving the revenue growth targets. Substantially all of the goodwill and purchased intangible assets are expected to be deductible for tax purposes over 15 years. AeroSat is included in our Aerospace reporting segment. The purchase price allocation for this acquisition is complete.

Peco, Inc.

On July 18, 2013, we acquired 100% of the stock of Peco, Inc. which designs and manufacturers highly engineered commercial aerospace interior components and systems for the aerospace industry. The company specializes in passenger service units ("PSUs") which incorporate air handling, emergency oxygen, electrical power management and cabin lighting systems. It also manufactures a wide range of fuel access doors that meet stringent strength, fuel sealing and anti-corrosion requirements. The addition of Peco diversifies the products and technologies that Astronics offers. We purchased the outstanding stock of Peco for \$136.0 million in cash. Peco's unaudited 2013 revenue prior to the acquisition date was approximately \$46.2 million. Peco is included in our Aerospace reporting segment. Purchased intangible assets and goodwill are not deductible for tax purposes. The purchase price allocation for this acquisition is complete.

The following is a summary of the sales and amounts included in income from operations for Peco included in the consolidated financial statements of the Company from the date of acquisition to December 31, 2013 (in thousands):

Sales	\$36,452
Operating Income	\$122

The following summary, prepared on a pro forma basis, combines the consolidated results of operations of the Company with those of Peco as if the acquisition took place on January 1, 2012. The pro forma consolidated results include the impact of certain adjustments, including increased interest expense on acquisition debt, amortization of purchased intangible assets and income taxes.

Table of Contents

(in thousands, except earnings per share)	2013	2012
Sales	\$386,170	\$344,233
Net Income	\$29,456	\$24,348
Basic Earnings Per Share	\$1.22	\$1.03
Diluted Earnings Per Share	\$1.17	\$0.97

The pro forma results are not necessarily indicative of what actually would have occurred if the acquisition had been in effect for the year ended December 31, 2013 and 2012. In addition, they are not intended to be a projection of future results.

Adjustments made to the preliminary purchase price valuations for the acquisitions during the respective measurement periods were not material.

Acquisition costs are expensed as incurred. Acquisition related expenses were approximately \$0.4 million, \$0.3 million and \$1.9 million in 2015, 2014 and 2013, respectively.

NOTE 20 — SUBSEQUENT EVENTS

On January 13, 2016, the Company amended its existing credit facility to add a new lender and extend the maturity date of the credit facility from September 26, 2019 to January 13, 2021.

On February 24, 2016, the Company's Board of Directors authorized the repurchase of up to \$50 million of common stock (the "Buyback Program"). The Buyback Program allows the Company to purchase shares of its common stock in accordance with applicable securities laws on the open market or through privately negotiated transactions. The Buyback Program may be suspended or discontinued at any time. The timing and the amount of any repurchases will be determined based on an evaluation of market conditions, share price and other factors.

ITEM CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND
9. FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company carried out an evaluation, under the supervision and with the participation of Company Management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures are effective as of the end of the period covered by this report, to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is made known to them on a timely basis, and that these disclosure controls and procedures are effective to ensure such information is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Management's report on Internal Control over Financial Reporting

See the report appearing under Item 8, Financial Statements and Supplemental Data, Managements report on Internal Control Over Financial Reporting.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Effective during our first quarter of 2015, we are utilizing the 2013 version of the Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.
