- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01. Regulation FD Disclosure.

On July 8, 2013, Coeur Mining, Inc. (the “Company” or “Coeur”) issued a press release announcing the results of a preliminary economic assessment (“PEA”) for its wholly-owned La Preciosa silver-gold project located in Durango state, Mexico. The press release and Company presentation materials dated as of July 8, 2013 including a discussion of the PEA results are attached hereto as Exhibits 99.1 and 99.2, respectively, and are incorporated herein by reference.

Cautionary Statements

The information contained in this Current Report on Form 8-K and the exhibits attached hereto contain forward-looking statements within the meaning of securities legislation in the United States and Canada, including, among others, Coeur's expectations with respect to Coeur's business, including expectations as to the La Preciosa PEA, future mineral production, reserve potential, capital expenditures, exploration drilling, potential quality and/or grade of material, estimation of mineral reserves and resources, anticipated operating results, such as production and costs, and share repurchases. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risks and hazards inherent in the mining business (including developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the SEC, and the Canadian securities regulators, including, without limitation, Coeur's reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

The La Preciosa PEA is preliminary in nature and it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be characterized as mineral reserves and there is no certainty that the results reflected in the PEA will be realized. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. There is no certainty that the inferred mineral resources will be converted to the measured and indicated categories or that the measured and indicated mineral resources will be converted to the proven and probable mineral reserve categories.

Item 9.01. Financial Statements and Exhibits.

(d) List of Exhibits

Exhibit No.	Description
Exhibit 99.1	Press Release dated July 8, 2013
Exhibit 99.2	Presentation Materials dated July 8, 2013
