TABLE OF CONTENTS

Item 2.02 Results of Operations and Financial Condition.Item 9.01 Financial Statements and Exhibits.

Item 2.02 Results of Operations and Financial Condition.

On May 2, 2016, Kennametal Inc. (Kennametal or the Company) issued an earnings announcement for its fiscal third quarter ended March 31, 2016.

The press release contains certain non-generally accepted accounting principles (GAAP) financial measures. The following GAAP financial measures have been presented on an adjusted basis: gross profit and margin, operating expense, operating expense as a percentage of sales, operating income (loss) and margin, net income (loss), diluted earnings per share (EPS) and diluted loss per share (LPS), effective tax rate, Industrial operating income and margin and Infrastructure operating income (loss) and margin. Adjustments for the three months ended March 31, 2016 include (1) tax effect of prior asset impairment charges, (2) restructuring and related charges and (3) loss on divestiture. Adjustments for the nine months ended March 31, 2016 include: (1) restructuring and related charges, (2) goodwill and other intangible asset impairment charges and (3) loss on divestiture and related charges. Adjustments for the three and nine months ended March 31, 2015 include: (1) restructuring and related charges, (2) goodwill and other intangible asset impairment charges and (3) tax redeployment expense. Management adjusts for these items in measuring and compensating internal performance and to more readily compare the Company's financial performance period-to-period. The press release also contains free operating cash flow which is a non-GAAP measure and is defined below.

Management believes that presentation of these non-GAAP financial measures provides useful information about the results of operations of the Company for the current and past periods. Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies. Refer to Exhibit 99.1 of the Form 8-K filed February 2, 2016 (File No 001-05318) for a reconciliation of the non-GAAP financial measure of adjusted operating margin for the six months ended December 31, 2015.

Free Operating Cash Flow

Free operating cash flow is a non-GAAP financial measure and is defined by the Company as cash provided by operations (which is the most directly comparable GAAP measure) less capital expenditures plus proceeds from disposals of fixed assets. Management considers free operating cash flow to be an important indicator of Kennametal's cash generating capability because it better represents cash generated from operations that can be used for dividends, debt repayment, strategic initiatives, and other investing and financing activities.

Additionally, during our quarterly earnings teleconference we may use various non-GAAP financial measures to describe the underlying operating results. Accordingly, we have compiled below certain reconciliations as required by Regulation G. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

ADJUSTED SALES (UNAUDITED)	Three Months Ended March 31, 2015
(in millions)
