AT&T INC.
SEPTEMBER 30, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Dollars in millions except per share amounts

NOTE 1. PREPARATION OF INTERIM FINANCIAL STATEMENTS

Basis of Presentation Throughout this document, AT&T Inc. is referred to as "AT&T," "we" or the "Company." These consolidated financial statements include all adjustments that are necessary to present fairly the results for the presented interim periods, consisting of normal recurring accruals and other items. The results for the interim periods are not necessarily indicative of those for the full year. You should read this document in conjunction with the consolidated financial statements and accompanying notes included in our Annual Report on Form 10-K for the year ended December 31, 2014.

The consolidated financial statements include the accounts of the Company and our majority-owned subsidiaries and affiliates, including the results of DIRECTV for the 68-day period ended September 30, 2015. Our subsidiaries and affiliates operate in the communications and digital entertainment services industry, providing services and equipment that deliver voice, video and broadband services domestically and internationally.

All significant intercompany transactions are eliminated in the consolidation process. Investments in less than majority-owned subsidiaries and partnerships where we have significant influence are accounted for under the equity method. Earnings from certain investments accounted for using the equity method are included for periods ended within up to one month of our period end. We also recorded our proportionate share of our equity method investees' other comprehensive income (OCI) items, including actuarial gains and losses on pension and other postretirement benefit obligations and cumulative translation adjustments.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes, including estimates of probable losses and expenses. Actual results could differ from those estimates. Certain amounts have been reclassified to conform to the current period's presentation, including our presentation of "Equipment" and "Broadcast, programming and operations" expenses separately from other cost of services in the consolidated statements of income.

Due to recent organizational changes and our July 24, 2015 acquisition of DIRECTV, effective for the quarter ended September 30, 2015, we are revising our operating segments to align with the new management structure and organizational responsibilities. We have revised our prior-period presentation to conform to our current reporting. (See Note 4)

Customer Fulfillment Costs In August 2015, with our acquisition of DIRECTV, we announced a change in accounting for customer set-up and installation costs. Historically we have followed an accounting policy of deferring customer set-up and installation costs only to the extent of deferred revenues recorded for upfront fees (e.g., activation charges), and to expense any costs that exceed deferred revenues. After discussing this change with the Securities and Exchange Commission, we changed our accounting to a preferable method of capitalizing these costs and amortizing them over the expected economic life of the customer relationship of approximately four years, subject to an assessment of the recoverability of such costs. This change in accounting principle impacts video, broadband Internet and wireline voice services and is considered preferable in that it provides an accurate reflection of assets (i.e., the contractual customer relationship obtained through the set-up and installation) generated by those specific business activities. Our new accounting method is more comparable with the accounting method used in the cable entertainment industry. With our acquisition of DIRECTV, changing to this accounting method will enhance comparability to other companies in the industry. This change in accounting does not have an impact on our wireless

results, due to the absence of these types of expenses in those business activities.

The cumulative effect of the change on Retained Earnings as of January 1, 2014, was an increase of approximately \$3,128 on our consolidated balance sheets. This change did not have an impact on cash provided by or used in operations for any period presented.

New Accounting Standards

Revenue Recognition In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2014-09, "Revenue from Contracts with Customers (Topic 606)" (ASU 2014-09), which replaces existing revenue recognition rules with a comprehensive revenue measurement and recognition standard and expanded disclosure requirements. ASU 2014-09 becomes effective for annual reporting periods beginning after December 15, 2017, following the July 2015 approval of a one-year deferral of the effective date by the FASB. While we continue to evaluate the impact of the new standard on revenue and costs of acquisition as well as available adoption methods, the requirement to defer costs is not expected to have a significant impact on our operating results as a result of our policy change on fulfillment costs.

Long-Term Debt and Debt Issuance Costs In April 2015, the FASB issued ASU No. 2015-03, "Interest—Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs" (ASU 2015-03), which will result in the reclassification of debt issuance costs from "Other Assets" to inclusion as a reduction of our reportable "Long-Term Debt" balance on our consolidated balance sheets. Since ASU 2015-03 does not address deferred issuance costs for line-of-credit arrangements, the FASB issued ASU No. 2015-15, "Interest—Imputation of Interest: Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements" (ASU 2015-15), in August 2015. ASU 2015-15 allows a company to defer debt issuance costs associated with line-of-credit arrangements, including arrangements with no outstanding borrowings, classify them as an asset, and amortize them over the term of the arrangements. ASU 2015-03 becomes effective January 1, 2016, subject to early adoption, and will require full retrospective application. We do not expect these new standards to have a material impact on our consolidated balance sheets.

Business Combinations In September 2015, the FASB issued ASU No 2015-16, "Business Combinations—Simplifying the Accounting for Measurement-Period Adjustments" (ASU 2015-16), which will result in the ability to recognize, in current-period earnings, any changes in provisional amounts during the measurement period after the closing of an acquisition, instead of retroactively accounting for these changes. ASU 2015-16 becomes effective January 1, 2016, subject to early adoption, and will require prospective application to adjustments to provisional amounts that occur after the effective date of ASU 2015-16. We are evaluating the impact of the new standard on our operating results.

NOTE 4. SEGMENT INFORMATION

Our segments are strategic business units that offer products and services to different customer segments over various technology platforms and/or in different geographies that are managed accordingly. Due to recent organizational changes and our July 24, 2015 acquisition of DIRECTV, effective for the quarter ended September 30, 2015, we are revising our operating segments to align with our new management structure and organizational responsibilities. We analyze our operating segments based on segment contribution, which consists of operating income, excluding acquisition-related costs and other significant items (as discussed below), and equity in net income of affiliates for investments managed within each operating segment. We have four reportable segments: (1) Business Solutions, (2) Entertainment and Internet Services, (3) Consumer Mobility and (4) International. We have revised our prior-period presentation to conform to our current reporting.

We also evaluate segment performance based on segment operating income before depreciation and amortization, which we refer to as EBITDA and/or EBITDA margin. For AT&T, EBITDA is defined as operating income before depreciation and amortization. We believe EBITDA to be a relevant and useful measurement to our investors as it is part of our internal management reporting and planning processes and it is an important metric that management uses to evaluate segment operating performance. EBITDA does not give effect to cash used for debt service requirements and thus does not reflect available funds for distributions, reinvestment or other discretionary uses.

The Business Solutions segment provides both wireless and wireline services to business customers and individual subscribers who purchase wireless services through employer-sponsored plans. We provide advanced IP-based services including Virtual Private Networks (VPN), Ethernet-related products and broadband (strategic business services) as well as traditional data and voice products. Services in this segment utilize our wireless and wired network and are marketed to provide a complete communications solution to our business customers.

The Entertainment and Internet Services segment provides video, Internet and voice communication services to residential customers located in the U.S. or in U.S. territories. Services utilize our copper and IP-based wired network and/or our satellite technology to provide video, high speed Internet and voice services.

The Consumer Mobility segment provides nationwide wireless service to consumers, wholesale and resale subscribers located in the U.S. or in U.S. territories. Services utilize our U.S. wireless network to provide voice and data services, including high-speed Internet, video entertainment and home monitoring services.

The International segment provides entertainment services in Latin America and wireless services in Mexico. Video entertainment services are provided primarily to residential customers using satellite technology. Wireless services utilize our regional and national networks in Mexico to provide consumer and business customers with wireless data and voice communication services. Our international subsidiaries transact in their local currency and operating results are converted to U.S. dollars using official exchange rates. The exchange rate used to report net monetary assets and operating results of our Venezuelan subsidiary is the Sistema Marginal de Divisas (SIMADI), which was 199.65 and 199.42 Venezuelan bolivars per U.S. dollar at July 24, 2015 and September 30, 2015, respectively. Our International segment is subject to foreign currency fluctuations.

In reconciling items to consolidated operating income, Corporate and Other includes: (1) operations that are not considered reportable segments and that are no longer integral to our operations or which we no longer actively market, and (2) impacts of corporate-wide decisions for which the individual operating segments are not being

evaluated, including interest costs and expected return on plan assets for our pension and postretirement benefit plans.

Certain operating items are not allocated to our business segments:

Acquisition-related items include (1) operations and support items associated with the merger and integration of newly acquired businesses, and (2) the noncash amortization of intangible assets acquired in acquisitions.

Certain significant items include (1) noncash actuarial gains and losses from pension and other postretirement benefits, (2) employee separation charges associated with voluntary and/or strategic offers, (3) abandonment or impairments of assets and (4) other items for which the segments are not being evaluated.

12

AT&T INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

Interest expense and other income (expense) – net, are managed only on a total company basis and are, accordingly, reflected only in consolidated results. Therefore, these items are also not included in each segment's reportable results.

Our operating assets are shared by multiple segments and consist of our wireless and wired networks as well as an international satellite fleet. We manage our assets on a total company basis, not by operating segment, and therefore asset information and capital expenditures by operating segment are not presented. Depreciation is allocated based on network usage or asset utilization by segment.

NOTE 5. PENSION AND POSTRETIREMENT BENEFITS

Substantially all of our employees are covered by one of our noncontributory pension plans. We also provide certain medical, dental, life insurance, and death benefits to certain retired employees under various plans and accrue actuarially determined postretirement benefit costs. Our objective in funding these plans, in combination with the standards of the Employee Retirement Income Security Act of 1974, as amended (ERISA), is to accumulate assets sufficient to provide benefits described in the plans to employees upon their retirement.

In December 2014, we offered an opportunity for certain management employees who were retirement eligible as of March 31, 2015 to elect an enhanced, full lump sum payment option of their accrued pension if they retired on or before March 31, 2015. The lump sum value totaled approximately \$1,200 which was distributed in 2015. We recorded special termination benefits of approximately \$150 as a result of this offer.

In 2013, we made a voluntary contribution of a preferred equity interest in AT&T Mobility II LLC, the primary holding company for our domestic wireless business, to the trust used to pay pension benefits under our qualified pension plans. The preferred equity interest had a value of \$8,838 at September 30, 2015. The trust is entitled to receive cumulative cash distributions of \$560 per annum, which are distributed quarterly in equal amounts and accounted for as contributions. We distributed \$420 to the trust during the nine months ended September 30, 2015. So long as we make the distributions, we will have no limitations on our ability to declare a dividend or repurchase shares. This preferred equity interest is a plan asset under ERISA and is recognized as such in the plan's separate financial statements. However, because the preferred equity interest is not unconditionally transferable to an unrelated

party, it is not reflected in plan assets in our consolidated financial statements and instead has been eliminated in consolidation. We also agreed to make a cash contribution to the trust of \$175 no later than the due date of our federal income tax return for 2014. This contribution was made in June 2015.

AT&T INC.
SEPTEMBER 30, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

We acquired DIRECTV on July 24, 2015. DIRECTV sponsors a noncontributory defined benefit pension plan, which provides benefits to most employees based on either years of service and final average salary, or eligible compensation while employed by DIRECTV. DIRECTV also maintains (1) a postretirement benefit plan for those retirees eligible to participate in health care and life insurance benefits generally until they reach age 65 and (2) an unfunded nonqualified pension plan for certain eligible employees. We have recorded the fair value of the DIRECTV plans using assumptions and accounting policies consistent with those disclosed by AT&T. Upon acquisition, the excess of projected benefit obligation over the plan assets was recognized as a liability and previously existing deferred actuarial gains and losses and unrecognized service costs or benefits were eliminated.

We recognize actuarial gains and losses on pension and postretirement plan assets in our operating results at our annual measurement date of December 31, unless earlier remeasurements are required. The following table details pension and postretirement benefit costs included in operating expenses in the accompanying consolidated statements of income; expense credits are denoted with parentheses. A portion of these expenses is capitalized as part of internal construction projects, providing a small reduction in the net expense recorded.

	Three months ended September 30, 2015		Nine months ended September 30, 2015	
	2015	2014	2015	2014
Pension cost:				
Service cost – benefits earned during the period	\$ 305	\$ 282	\$ 904	\$ 846
Interest cost on projected benefit obligation	477	661	1,424	1,984
Expected return on assets	(832)	(849)	(2,484)	(2,549)
Amortization of prior service credit	(25)	(24)	(77)	(71)
Net pension (credit) cost	\$(75)	\$ 70	\$(233)	\$ 210
Postretirement cost:				
Service cost – benefits earned during the period	\$ 55	\$ 59	\$ 166	\$ 175
Interest cost on accumulated postretirement benefit obligation	242	365	725	1,094
Expected return on assets	(105)	(165)	(315)	(491)
Amortization of prior service credit	(320)	(362)	(959)	(1,086)
Net postretirement (credit) cost	\$(128)	\$(103)	\$(383)	\$(308)
Combined net pension and postretirement (credit) cost	\$(203)	\$(33)	\$(616)	\$(98)

Our combined net pension and postretirement cost decreased \$170 in the third quarter and \$518 for the first nine months of 2015. Our combined net pension and postretirement cost decreased \$223 in the third quarter and \$669 for the first nine months due to the change in the method used to estimate the service and interest components of net periodic benefit cost for pension and other postretirement benefits. While this change, which was made in the fourth quarter of 2014, provides a more precise measurement of interim service and interest costs, it will not affect the measurement of our total benefit obligations as of December 31 or our annual net periodic benefit cost as the change in the service and interest costs is completely offset in the actuarial gain or loss reported. The decrease in cost resulting from this change was partially offset by lower amortization of prior service credits as previous postretirement plan changes have become fully amortized, our lower expected long-term rate of return on our postretirement plan assets and updated assumed mortality rates.

We also provide senior- and middle-management employees with nonqualified, unfunded supplemental retirement and savings plans. Net supplemental retirement pension benefits cost, which is not included in the table above, was \$22 in the third quarter of 2015, of which \$20 was interest cost, and \$63 for the first nine months, of which \$57 was interest cost. In 2014, net supplemental retirement pension benefits cost was \$29 in the third quarter, of which \$27 was interest cost, and \$87 for the first nine months, of which \$82 was interest cost.

NOTE 6. FAIR VALUE MEASUREMENTS AND DISCLOSURE

The Fair Value Measurement and Disclosure framework provides a three-tiered fair value hierarchy that gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that we have the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets and liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in inactive markets.
- Inputs other than quoted market prices that are observable for the asset or liability.
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

- Fair value is often based on developed models in which there are few, if any, external observations.

The fair value measurements level of an asset or liability within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used should maximize the use of observable inputs and minimize the use of unobservable inputs.

The valuation methodologies described above may produce a fair value calculation that may not be indicative of future net realizable value or reflective of future fair values. We believe our valuation methods are appropriate and consistent with other market participants. The use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There have been no changes in the methodologies used since December 31, 2014.

Long-Term Debt and Other Financial Instruments

The carrying amounts and estimated fair values of our long-term debt, including current maturities and other financial instruments, are summarized as follows:

	September 30, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Notes and debentures	\$126,042	\$129,524	\$81,632	\$90,367
Bank borrowings	4	4	5	5
Investment securities	2,644	2,644	2,735	2,735

The carrying value of debt with an original maturity of less than one year approximates market value. The fair value measurements used for notes and debentures are considered Level 2 and are determined using various methods, including quoted prices for identical or similar securities in both active and inactive markets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

Following is the fair value leveling for available-for-sale securities and derivatives as of September 30, 2015 and December 31, 2014:

	September 30, 2015			
	Level 1	Level 2	Level 3	Total
Available-for-Sale Securities				
Domestic equities	\$1,094	\$-	\$ -	\$1,094
International equities	561	-	-	561
Fixed income bonds	-	737	-	737
Asset Derivatives ¹				
Interest rate swaps	-	217	-	217
Cross-currency swaps	-	796	-	796
Liability Derivatives ¹				
Cross-currency swaps	-	(3,202)	-	(3,202)
Foreign exchange contracts	-	(1)	-	(1)

	December 31, 2014			
	Level 1	Level 2	Level 3	Total
Available-for-Sale Securities				
Domestic equities	\$1,160	\$-	\$ -	\$1,160
International equities	553	-	-	553
Fixed income bonds	-	836	-	836
Asset Derivatives ¹				
Interest rate swaps	-	157	-	157
Cross-currency swaps	-	1,243	-	1,243
Interest rate locks	-	5	-	5
Liability Derivatives ¹				
Cross-currency swaps	-	(1,506)	-	(1,506)
Interest rate locks	-	(133)	-	(133)

¹ Derivatives designated as hedging instruments are reflected as "Other assets," "Other noncurrent liabilities" and, for a portion of interest rate swaps, "Other current assets" in our consolidated balance sheets.

Investment Securities

Our investment securities include equities, fixed income bonds and other securities. A substantial portion of the fair values of our available-for-sale securities was estimated based on quoted market prices. Investments in securities not traded on a national securities exchange are valued using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. Realized gains and losses on securities are included in "Other income (expense) – net" in the consolidated statements of income using the specific identification method. Unrealized gains and losses, net of tax, on available-for-sale securities are recorded in accumulated OCI. Unrealized losses that are considered other than temporary are recorded in "Other income (expense) – net" with the corresponding reduction to the carrying basis of the investment. Fixed income investments of \$93 have maturities of less than one year, \$379 within one to three years, \$52 within three to five years, and \$213 for five or more years.

Our cash equivalents (money market securities), short-term investments (certificate and time deposits) and customer deposits are recorded at amortized cost, and the respective carrying amounts approximate fair values. Short-term investments are recorded in "Other current assets" and our investment securities are recorded in "Other assets" on the consolidated balance sheets.

AT&T INC.
SEPTEMBER 30, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

Derivative Financial Instruments

We employ derivatives to manage certain market risks, primarily interest rate risk and foreign currency exchange risk. This includes the use of interest rate swaps, interest rate locks, foreign exchange forward contracts and combined interest rate foreign exchange contracts (cross-currency swaps). We do not use derivatives for trading or speculative purposes. We record derivatives on our consolidated balance sheets at fair value that is derived from observable market data, including yield curves and foreign exchange rates (all of our derivatives are Level 2). Cash flows associated with derivative instruments are presented in the same category on the consolidated statements of cash flows as the item being hedged.

The majority of our derivatives are designated either as a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge), or as a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge).

Fair Value Hedging We designate our fixed-to-floating interest rate swaps as fair value hedges. The purpose of these swaps is to manage interest rate risk by managing our mix of fixed-rate and floating-rate debt. These swaps involve the receipt of fixed-rate amounts for floating interest rate payments over the life of the swaps without exchange of the underlying principal amount. Accrued and realized gains or losses from interest rate swaps impact interest expense in the consolidated statements of income. Unrealized gains on interest rate swaps are recorded at fair market value as assets, and unrealized losses on interest rate swaps are recorded at fair market value as liabilities. Changes in the fair values of the interest rate swaps are exactly offset by changes in the fair value of the underlying debt. Gains or losses realized upon early termination of our fair value hedges are recognized in interest expense. In the nine months ended September 30, 2015 and September 30, 2014, no ineffectiveness was measured on interest rate swaps designated as fair value hedges.

Cash Flow Hedging We designate our cross-currency swaps as cash flow hedges. We have entered into multiple cross-currency swaps to hedge our exposure to variability in expected future cash flows that are attributable to foreign currency risk generated from the issuance of our Euro, British pound sterling, Canadian dollar and Swiss Franc denominated debt. These agreements include initial and final exchanges of principal from fixed foreign denominations to fixed U.S. denominated amounts, to be exchanged at a specified rate, usually determined by the market spot rate upon issuance. They also include an interest rate swap of a fixed or floating foreign-denominated rate to a fixed U.S. denominated interest rate.

Unrealized gains on derivatives designated as cash flow hedges are recorded at fair value as assets, and unrealized losses on derivatives designated as cash flow hedges are recorded at fair value as liabilities, both for the period they are outstanding. For derivative instruments designated as cash flow hedges, the effective portion is reported as a component of accumulated OCI until reclassified into interest expense in the same period the hedged transaction affects earnings. The gain or loss on the ineffective portion is recognized as "Other income (expense) – net" in the consolidated statements of income in each period. We evaluate the effectiveness of our cross-currency swaps each quarter. In the nine months ended September 30, 2015 and September 30, 2014, no ineffectiveness was measured on cross-currency swaps designated as cash flow hedges.

Periodically, we enter into and designate interest rate locks to partially hedge the risk of changes in interest payments attributable to increases in the benchmark interest rate during the period leading up to the probable issuance of fixed-rate debt. We designate our interest rate locks as cash flow hedges. Gains and losses when we settle our interest rate locks are amortized into income over the life of the related debt, except where a material amount is deemed to be

ineffective, which would be immediately reclassified to "Other income (expense) – net" in the consolidated statements of income. Over the next 12 months, we expect to reclassify \$59 from accumulated OCI to interest expense due to the amortization of net losses on historical interest rate locks.

We hedge a portion of the exchange risk involved in anticipation of highly probable foreign currency-denominated transactions. In anticipation of these transactions, we often enter into foreign exchange contracts to provide currency at a fixed rate. Some of these instruments are designated as cash flow hedges while others remain nondesignated. Gains and losses at the time we settle or take delivery on our designated foreign exchange contracts are amortized into income in the same period the hedged transaction affects earnings, except where an amount is deemed to be ineffective, which would be immediately reclassified to "Other income (expense) – net" in the consolidated statements of income. In the nine months ended September 30, 2015 and September 30, 2014, no ineffectiveness was measured on foreign exchange contracts designated as cash flow hedges.

Dollars in millions except per share amounts

Collateral and Credit-Risk Contingency We have entered into agreements with our derivative counterparties establishing collateral thresholds based on respective credit ratings and netting agreements. At September 30, 2015, we had posted collateral of \$1,807 (a deposit asset) and held collateral of \$379 (a receipt liability). Under the agreements, if our credit rating had been downgraded one rating level by Fitch Ratings, before the final collateral exchange in September, we would have been required to post additional collateral of \$105. If DIRECTV Holdings LLC's credit rating had been downgraded below BBB- (S&P) and below Baa3 (Moody's) we would owe an additional \$92. At December 31, 2014, we had posted collateral of \$530 (a deposit asset) and held collateral of \$599 (a receipt liability). We do not offset the fair value of collateral, whether the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable), against the fair value of the derivative instruments.

Following is the notional amount of our outstanding derivative positions:

	September 30, 2015	December 31, 2014
Interest rate swaps	\$ 7,050	\$ 6,550
Cross-currency swaps	29,642	26,505
Interest rate locks	-	6,750
Foreign exchange contracts	23	-
Total	\$ 36,715	\$ 39,805

Following are the related hedged items affecting our financial position and performance:

Effect of Derivatives on the Consolidated
Statements of Income

	Three months ended September 30, 2015		September 30, 2014		Nine months ended September 30, 2015		September 30, 2014

NOTE 7. ACQUISITIONS, DISPOSITIONS AND OTHER ADJUSTMENTS

Acquisitions

DIRECTV On July 24, 2015, we completed our acquisition of DIRECTV, a leading provider of digital television entertainment services in both the United States and Latin America. The acquisition represents an opportunity for us to integrate a unique and complementary set of assets and achieve substantial cost synergies over time, as well as generate revenue from pay television in Latin America. Our distribution scale will enable us to offer consumers bundles including video, high-speed broadband and mobile services, using all the sales channels of both companies. We believe the combined company will be a content distribution leader across mobile, video and broadband platforms.

Under the merger agreement, each share of DIRECTV stock was exchanged for \$28.50 cash plus 1.892 shares of our common stock. After adjustment for shares issued to trusts consolidated by AT&T, share-based payment arrangements and fractional shares, which were settled in cash, AT&T issued 954,407,524 shares to DIRECTV shareholders, giving them an approximate 16% stake in the combined company, based on common shares outstanding. Based on our \$34.29 per share closing stock price on July 24, 2015, the aggregate value of consideration paid to DIRECTV shareholders was \$47,404, including \$32,727 of AT&T stock and \$14,378 in cash and \$299 for share-based payment arrangements.

Our third-quarter 2015 operating results include the results from DIRECTV following the acquisition date. The fair values of the assets acquired and liabilities assumed were preliminarily determined using the income, cost and market approaches. The fair value measurements were primarily based on significant inputs that are not observable in the market and thus represent a Level 3 measurement as defined in ASC 820, other than long-term debt assumed in the acquisition. The income approach was primarily used to value the intangible assets, consisting primarily of acquired technology and customer relationships. The income approach estimates fair value for an asset based on the present value of cash flow projected to be generated by the asset. Projected cash flow is discounted at a required rate of return that reflects the relative risk of achieving the cash flow and the time value of money. The cost approach, which estimates value by determining the current cost of replacing an asset with another of equivalent economic utility, was used, as appropriate, for plant, property and equipment. The cost to replace a given asset reflects the estimated reproduction or replacement cost for the property, less an allowance for loss in value due to depreciation. Our September 30, 2015 consolidated balance sheet includes the assets and liabilities of DIRECTV, which have been measured at fair value.

AT&T INC.
SEPTEMBER 30, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

The following table summarizes the preliminary estimated fair values of the DIRECTV assets acquired and liabilities assumed and related deferred income taxes as of the acquisition date.

	DIRECTV
Assets acquired	
Cash	\$ 4,763
Accounts receivable	2,116
All other current assets	1,795
Property, plant and equipment (including satellites)	8,811
Intangible assets not subject to amortization	
Orbital slots	11,946
Trade name (Latin America)	1,371
Intangible assets subject to amortization	
Customer lists and relationships	19,803
Trade name (U.S.)	1,634
Other	324
Investments and other assets	3,730
Goodwill	35,343
Total assets acquired	91,636
Liabilities assumed	
Current liabilities, excluding current portion of long-term debt	5,886
Long-term debt	20,500
Other noncurrent liabilities	17,492
Total liabilities assumed	43,878
Net assets acquired	47,758
Noncontrolling interest	(354)
Aggregate value of consideration paid	\$ 47,404

These estimates are preliminary in nature and subject to adjustments, which could be material. Any necessary adjustments will be finalized within one year from the date of acquisition. Substantially all the receivables acquired are expected to be collectible. We have not identified any material unrecorded pre-acquisition contingencies where the related asset, liability or impairment is probable and the amount can be reasonably estimated. Goodwill is calculated as the difference between the acquisition date fair value of the consideration transferred and the fair value of the net assets acquired, and represents the future economic benefits that we expect to achieve as a result of acquisition. Prior to the finalization of the purchase price allocation, if information becomes available that would indicate it is probable that such events had occurred and the amounts can be reasonably estimated, such items will be included in the final purchase price allocation and may change goodwill. Purchased goodwill is not expected to be deductible for tax purposes. As we finalize the valuation of assets acquired and liabilities assumed, we will determine to which business segments and reporting units that any changes in goodwill should be recorded.

AT&T INC.
SEPTEMBER 30, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

The following unaudited pro forma consolidated results of operations assume that the acquisition of DIRECTV was completed as of January 1 for each of the fiscal years shown below:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Total operating revenues ¹	\$41,230	\$41,301	\$123,346	\$122,263
Net Income Attributable to AT&T	2,985	3,429	9,210	11,065
Basic Earnings Per Share Attributable to AT&T	\$0.50	\$0.56	\$1.69	\$1.80
Diluted Earnings Per Share Attributable to AT&T	\$0.50	\$0.55	\$1.69	\$1.79

¹ Reflects revenue declines resulting from our fourth-quarter 2014 sale of our Connecticut wireline operations.

Nonrecurring adjustments included in the pro forma results above consist of the following: At June 30, 2015, due to the continued economic uncertainty and lack of liquidity in all three of the official currency exchange mechanisms in Venezuela, DIRECTV changed the exchange rate used to measure its Venezuelan subsidiary's monetary assets and liabilities into U.S. dollars from Sistema Complementario de Administración de Divisas (SICAD) to SIMADI. The significant change in exchange rates also required the reevaluation of the recoverability of fixed and intangible assets and inventory, which resulted in an impairment charge of \$1,060 recorded in DIRECTV's consolidated statement of operations. Prior to DIRECTV's June 30, 2015 change to the SIMADI, operating results for the six months ended June 30, 2015 were measured using the SICAD exchange rate which resulted in revenues in Venezuela of approximately \$500 and operating profit before depreciation and amortization of approximately \$180. Pro forma data may not be indicative of the results that would have been obtained had these events occurred at the beginning of the periods presented, nor is it intended to be a projection of future results.

Nextel Mexico On April 30, 2015, we completed our acquisition of the subsidiaries of NII Holdings Inc., operating its wireless business in Mexico, for \$1,875, including approximately \$427 of net debt and other adjustments. The subsidiaries offer service under the name Nextel Mexico.

The preliminary values of assets acquired were: \$376 in licenses, \$1,391 in property, plant and equipment, \$65 in customer lists and \$414 of goodwill.

GSF Telecom On January 16, 2015, we acquired Mexican wireless company GSF Telecom Holdings, S.A.P.I. de C.V. (GSF Telecom) for \$2,500, including net debt of approximately \$700. GSF Telecom offers service under both the Iusacell and Unefon brand names in Mexico.

The preliminary values of assets acquired were: \$920 in licenses, \$712 in property, plant and equipment, \$311 in customer lists, \$26 in trade names and \$1,124 of goodwill.

AWS-3 Auction In January 2015, we submitted winning bids for 251 Advanced Wireless Service (AWS) spectrum licenses in the AWS-3 Auction (FCC Auction 97) for \$18,189. We provided the Federal Communications Commission (FCC) an initial down payment of \$921 in October 2014 and paid the remaining \$17,268 in the first quarter of 2015. The interest associated with this acquisition will be excluded from interest expense and capitalized until this spectrum is ready for its intended use.

AT&T INC.
SEPTEMBER 30, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

NOTE 8. GOODWILL

As part of our organizational realignment discussed in Note 4, the goodwill from the previous Wireless segment was allocated to the Business Solutions and Consumer Mobility segments and the goodwill from the previous Wireline segment was allocated to the Business Solutions and Entertainment and Internet Services segment. The allocation was based on the relative fair value of the portions of the previous Wireless and Wireline segments which were moved into the new Business Solutions, Entertainment and Internet Services and Consumer Mobility segments.

Changes in the carrying amounts of goodwill, by segment were as follows:

	Wireless	Wireline	Business Solutions	Entertainment and Internet Services	Consumer Mobility	International	Total
Balance as of December 31, 2013	\$36,106	\$33,167	\$ -	\$ -	\$ -	\$ -	\$69,273
Goodwill Acquired	367	-	-	-	-	-	367
Other	(4)	56	-	-	-	-	52
Balance as of December 31, 2014	36,469	33,223	-	-	-	-	69,692
Goodwill Acquired	6	-	-	31,653	-	5,228	36,887
Foreign Currency Translation Adjustments	-	-	-	-	-	(610)	(610)
Allocation of Goodwill	(36,471)	(33,226)	44,763	8,422	16,512	-	-
Other	(4)	3	-	-	-	(2)	(3)
Balance as of September 30, 2015	\$-	\$-	\$44,763	\$40,075	\$16,512	\$4,616	\$105,966

The majority of our goodwill acquired during 2015 related to our acquisitions of DIRECTV, Nextel Mexico and GSF Telecom (see Note 7). The allocation of goodwill represents goodwill previously assigned to our Wireless and Wireline segments. Other changes to our goodwill in 2015 include foreign currency translation adjustments and the final valuation of Leap Wireless, Inc. (Leap). The majority of our goodwill acquired during 2014 related to our acquisition of Leap. Other changes to our goodwill during 2014 include adjustments related to closing the sale of our Connecticut wireline operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Dollars in millions except per share amounts

NOTE 9. SALES OF EQUIPMENT INSTALLMENT RECEIVABLES

We offer our customers the option to purchase certain wireless devices in installments over a period of up to 30 months, with the right to trade in the original equipment for a new device within a set period and have the remaining unpaid balance satisfied. As of September 30, 2015 and December 31, 2014, gross equipment installment receivables of \$4,428 and \$4,265 were included on our consolidated balance sheets, of which \$2,690 and \$2,514 are notes receivable that are included in "Accounts receivable, net."

On June 27, 2014, we entered into the first of a series of uncommitted agreements pertaining to the sale of equipment installment receivables and related security with Citibank, N.A. and various other relationship banks as purchasers (collectively, the Purchasers). Under these agreements, we transferred the receivables to the Purchasers for cash and additional consideration upon settlement of the receivables. Under the terms of the arrangements, we continue to bill and collect on behalf of our customers for the receivables sold. To date, we have collected and remitted approximately \$3,394 (net of fees), of which \$421 was returned as deferred purchase price.

The following table sets forth a summary of equipment installment receivables sold during the three months and nine months ended September 30, 2015 and 2014:

	Three months ended September 30, 2015		Nine months ended September 30, 2015	
	2015	2014	2015	2014
Gross receivables sold	\$1,601	\$1,028	\$5,964	\$2,665
Net receivables sold ¹	1,431	885	5,367	2,276
Cash proceeds received	980	556	3,553	1,375
Deferred purchase price recorded	456	324	1,819	889

¹ Receivables net of allowance, imputed interest and trade-in right guarantees.

The deferred purchase price was initially recorded at estimated fair value, which was based on remaining installment payments expected to be collected, adjusted by the expected timing and value of device trade-ins, and is subsequently carried at the lower of cost or net realizable value. The estimated value of the device trade-ins considers prices offered to us by independent third parties that contemplate changes in value after the launch of a device model. The fair value measurements used are considered Level 3 under the Fair Value Measurement and Disclosure framework (see Note 6).

During the third quarter of 2015, we repurchased installment receivables previously sold to the Purchasers, with a fair value of \$412. This transaction reduced our current deferred purchase price receivable by \$314, resulting in a gain of \$98 in the third quarter of 2015. This gain is included in "Selling, general and administrative" in the consolidated statements of income.

At September 30, 2015, our deferred purchase price receivable was \$2,869, of which \$1,676 is included in "Other current assets" on our consolidated balance sheets, with the remainder in "Other Assets." At December 31, 2014, our deferred purchase price receivable was \$1,606, which is included in "Other Assets." Our maximum exposure to loss as a result of selling these equipment installment receivables is limited to the amount of our deferred purchase price at any point in time.

The sales of equipment installment receivables did not have a material impact in our consolidated statements of income or to "Total Assets" reported on our consolidated balance sheets. We reflect the cash flows related to the

arrangement as operating activities in our consolidated statements of cash flows because the cash received from the Purchasers upon both the sale of the receivables and the collection of the deferred purchase price is not subject to significant interest rate risk.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Dollars in millions except per share amounts

RESULTS OF OPERATIONS

For ease of reading, AT&T Inc. is referred to as "we," "AT&T" or the "Company" throughout this document, and the names of the particular subsidiaries and affiliates providing the services generally have been omitted. AT&T is a holding company whose subsidiaries and affiliates operate in the communications and digital entertainment services industry. Our subsidiaries and affiliates provide services and equipment that deliver voice, video and broadband services both domestically and internationally. You should read this discussion in conjunction with the consolidated financial statements, accompanying notes and management's discussion and analysis of financial condition and results of operations included in our Annual Report on Form 10-K for the year ended December 31, 2014. A reference to a "Note" in this section refers to the accompanying Notes to Consolidated Financial Statements. In the tables throughout this section, percentage increases and decreases that are not considered meaningful are denoted with a dash. We completed our acquisition of DIRECTV on July 24, 2015, and have included DIRECTV results for the 68-day period ended September 30, 2015. In accordance with U.S. generally accepted accounting principles (GAAP), operating results from DIRECTV prior to the acquisition are excluded. Certain amounts have been reclassified to conform to the current period's presentation.

Consolidated Results Our financial results in the third quarter and for the first nine months of 2015 and 2014 are summarized as follows:

	Third Quarter				Nine-Month Period		
	2015	2014	Percent Change		2015	2014	Percent Change
Operating Revenues							
Service	\$35,625	\$29,790	19.6 %		\$94,128	\$89,122	5.6 %
Equipment	3,466	3,167	9.4		10,554	8,886	18.8
Total Operating Revenues	39,091	32,957	18.6		104,682	98,008	6.8
Operating expenses							
Cost of services and sales							
Equipment	4,501	4,432	1.6		13,400	12,503	7.2
Broadcast, programming and operations	4,081	1,038	-		6,351	3,019	-
Other cost of services (exclusive of depreciation and amortization shown separately below)	9,214	8,866	3.9		27,604	26,167	5.5
Selling, general and administrative	9,107	8,475	7.5		24,535	24,932	(1.6)
Depreciation and amortization	6,265	4,539	38.0		15,539	13,706	13.4
Total Operating Expenses	33,168	27,350	21.3		87,429	80,327	8.8
Operating Income	5,923	5,607	5.6		17,253	17,681	(2.4)
Income Before Income Taxes	4,735	4,631	2.2		14,385	16,568	(13.2)
Net Income	3,078	3,187	(3.4)		9,601	10,654	(9.9)
Net Income Attributable to AT&T	\$2,994	\$3,130	(4.3) %		\$9,339	\$10,441	(10.6) %

Overview

Operating revenues increased \$6,134, or 18.6%, in the third quarter and \$6,674, or 6.8%, for the first nine months of 2015.

Service revenues increased \$5,835, or 19.6%, in the third quarter and \$5,006, or 5.6%, for the first nine months of 2015. The increases were primarily due to our acquisition of DIRECTV and our new wireless operations in Mexico. Also contributing to the revenue increases were gains in fixed strategic business services and IP broadband, offset by continued declines in our legacy voice and data products.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Equipment revenues increased \$299, or 9.4%, in the third quarter and \$1,668, or 18.8%, for the first nine months of 2015. This growth reflected the continuing trend by our postpaid wireless subscribers to choose devices on installment purchase rather than the device subsidy model, which resulted in higher equipment revenue recognized from device sales.

Operating expenses increased \$5,818, or 21.3%, in the third quarter and \$7,102, or 8.8%, for the first nine months of 2015.

Equipment expenses increased \$69, or 1.6%, in the third quarter and \$897, or 7.2%, for the first nine months of 2015. Expense increases in the third quarter are primarily due to customers choosing higher priced wireless devices. The increase for the first nine months is primarily due to the continuing trend of customers choosing higher-priced wireless devices.

Broadcast, programming and operations expenses increased \$3,043 in the third quarter and \$3,332 for the first nine months of 2015 due to our acquisition of DIRECTV. Also contributing to the increase were higher content costs for our AT&T U-verse® (U-verse) subscribers.

Other cost of services expenses increased \$348, or 3.9%, in the third quarter and \$1,437, or 5.5%, for the first nine months of 2015. Included in other costs of services were net expense deferrals of \$428 in the third quarter and \$590 for the first nine months of 2015, compared to \$205 in the third quarter and \$385 for the first nine months of 2014, resulting from our deferral and amortization of customer fulfillment costs. Expense increases include network rationalization charges related to Leap Wireless International, Inc. (Leap) totaling \$250 in the three months and \$614 for the first nine months. Also contributing to the expense increases were merger and integration charges, wireless handset insurance costs and the addition of DIRECTV. These increases were partially offset by lower Universal Service Fund and Connect America Fund fees and the fourth-quarter 2014 sale of our Connecticut wireline operations.

Selling, general and administrative expenses increased \$632, or 7.5%, in the third quarter and decreased \$397, or 1.6%, for the first nine months of 2015. The increase in the third quarter was primarily due to our acquisition of DIRECTV offset by lower employee, sales and wireless commission expenses. The decrease for the first nine months was due to lower employee, sales, wireless commission, advertising and marketing expenses and the fourth-quarter 2014 sale of our Connecticut wireline operations, partially offset by the acquisition of DIRECTV.

Depreciation and amortization expense increased \$1,726, or 38.0%, in the third quarter and \$1,833, or 13.4%, for the first nine months of 2015. Amortization expense increased \$1,072 in the third quarter and \$1,061 for the first nine months of 2015 due to the amortization of intangibles from recent acquisitions. Amortization expense is not allocated to the operating segments.

Depreciation expense increased \$654, or 14.8%, in the third quarter and \$772, or 5.8%, for the first nine months of 2015. The increase was primarily due to the acquisitions of DIRECTV and our wireless properties in Mexico, ongoing capital spending for network upgrades and extending the estimated useful life of software. The increases were partially offset by abandonment of certain wireline network assets, which occurred in 2014.

Operating income increased \$316, or 5.6%, in the third quarter and decreased \$428, or 2.4%, for the first nine months of 2015. Our operating income margin in the third quarter decreased from 17.0% in 2014 to 15.2% in 2015, and from 18.0% in 2014 to 16.5% in 2015 for the first nine months, and include the impact of higher acquisition-related charges in 2015.

Interest expense increased \$130, or 12.8%, in the third quarter and \$220, or 8.0%, for the first nine months of 2015. The increases were primarily due to higher average debt balances, including debt issued and debt acquired in connection with our acquisition of DIRECTV and spectrum acquired in the Advanced Wireless Service (AWS)-3 Auction. The increases were partially offset by lower average interest rates and an increase in capitalized interest resulting from spectrum acquired in the AWS-3 Auction (see Note 7).

Equity in net income of affiliates increased \$17, in the third quarter and decreased \$140, or 74.5%, for the first nine months of 2015. Results for the third quarter and first nine months include earnings from equity method investments acquired in the purchase of DIRECTV in the third quarter of 2015. The decrease for the first nine months primarily resulted from the sale of shares of América Móvil, S.A. de C.V. (América Móvil) in June 2014.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Other income (expense) – net We had other expense of \$57 in the third quarter and other income of \$61 for the first nine months of 2015, compared to other income of \$42 in the third quarter and \$1,456 for the first nine months of 2014. Results in the third quarter and for the first nine months of 2015 included foreign exchange losses of \$73 and \$68, net (losses) gains on the sale of investments of \$(4) and \$46 and interest and dividend income of \$29 and \$74, respectively.

Other income in the third quarter of 2014 included interest and dividend income of \$15, foreign exchange gains of \$10 and a net gain on the sale of various investments of \$9. Results for the first nine months of 2014 included net gains on the sale of América Móvil shares and other investments of \$1,376, interest and dividend income of \$51 and foreign exchange gains of \$9.

Income taxes increased \$213, or 14.8%, in the third quarter and decreased \$1,130, or 19.1%, for the first nine months of 2015. Our effective tax rate was 35.0% for the third quarter and 33.3% for the first nine months of 2015, as compared to 31.2% for the third quarter and 35.7% for the first nine months of 2014. The higher effective tax rate for the third quarter was primarily due to a favorable tax adjustment recorded in third quarter 2014. The lower effective tax rate for the first nine months were primarily due to the sale of América Móvil shares in 2014, and the recognition of tax benefits related to the restructuring of a portion of our enterprise business in 2015.

Selected Financial and Operating Data

	September 30,	
	2015	2014
Subscribers and connections in (000s)		
Domestic wireless subscribers	126,406	118,650
Mexican wireless subscribers	8,091	-

Segment Results

Our segments are strategic business units that offer different products and services over various technology platforms and/or in different geographies that are managed accordingly. Our operating segment results presented in Note 4 and discussed below for each segment follow our internal management reporting. We analyze our operating segments based on segment contribution, which consists of operating income, excluding acquisition-related costs and other significant items, and equity in net income of affiliate for investments managed within each operating segment. We have four reportable segments: (1) Business Solutions, (2) Entertainment and Internet Services, (3) Consumer Mobility and (4) International. We have revised our prior-period presentation to conform to our current reporting.

We also evaluate segment performance based on segment operating income before depreciation and amortization, which we refer to as EBITDA and/or EBITDA margin. We believe EBITDA to be a relevant and useful measurement to our investors as it is part of our internal management reporting and planning processes and it is an important metric that management uses to evaluate operating performance. EBITDA does not give effect to cash used for debt service requirements and thus does not reflect available funds for distributions, reinvestment or other discretionary uses. EBITDA margin is operating income before depreciation and amortization, divided by total revenues. (See Note 4)

The Business Solutions segment provides both wireless and wireline services to business customers and individual subscribers who purchase wireless services through employer-sponsored plans. We provide advanced IP-based services including Virtual Private Networks (VPN), Ethernet-related products and broadband (strategic business services) as well as traditional data and voice products. Services in this segment utilize our wireless and wired network and are marketed to provide a complete communications solution to our business customers.

The Entertainment and Internet Services segment provides video, Internet and voice communication services to residential customers located in the U.S. or in U.S. territories. Services utilize our copper and IP-based wired network and/or our satellite technology to provide video, high speed Internet and voice services.

The Consumer Mobility segment provides nationwide wireless service to consumers, wholesale and resale subscribers located in the U.S. or in U.S. territories. Services utilize our U.S. wireless network to provide voice and data services, including high- speed Internet, video entertainment and home monitoring services.

The International segment provides entertainment services in Latin America and wireless services in Mexico. Video entertainment services are provided primarily to residential customers using satellite technology. Wireless services utilize our regional and national networks in Mexico to provide consumer and business customers with wireless data and voice communication services. Our international subsidiaries transact in their local currency and operating results are converted to U.S. dollars using official exchange rates. The exchange rate used to report net monetary assets and operating results of our Venezuelan subsidiary is the Sistema Marginal de Divisas (SIMADI), which was 199.65 and 199.42 Venezuelan bolivars per U.S. dollar at July 24, 2015 and September 30, 2015, respectively. Our International segment is subject to foreign currency fluctuations.

Our operating assets are shared by multiple segments and consist of our wireless and wired networks as well as an international satellite fleet. We manage our assets on a total company basis, not by operating segment, and therefore asset information and capital expenditures by operating segment are not presented. Depreciation is allocated based on network usage or asset utilization by segment.

We discuss capital expenditures in "Liquidity and Capital Resources."

¹ Includes data-centric devices such as session-based tablets, monitoring devices and automobile systems.

Excludes postpaid tablets.

² Excludes migrations between AT&T segments and/or subscriber categories and acquisition-related additions during the period.

³ Calculated by dividing the aggregate number of wireless subscribers who canceled service during a period divided by the total number of wireless subscribers at the beginning of that period. The churn rate for the period is equal to the average of the churn rate for each month of that period.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Operating Revenues increased \$205, or 1.2%, in the third quarter and \$1,036, or 2.0%, for the first nine months of 2015. Revenue growth was driven by mobility revenues and continued growth in fixed strategic business services, partially offset by continued declines in our legacy voice and data services and foreign exchange pressures.

Wireless service revenues increased \$190, or 2.5%, in the third quarter and \$410, or 1.8%, for the first nine months of 2015. The revenue increases reflect smartphone and tablet gains as well as customer migrations from our Consumer Mobility segment.

When compared to September 30, 2014, business wireless subscribers increased 14.4%, to 71.6 million subscribers at September 30, 2015. Postpaid subscribers increased 7.6% reflecting the addition of new customers as well as migrations from our Consumer Mobility segment, partially offset by continuing competitive pressures in the industry. Connected devices, which have lower average revenue per average subscriber (ARPU) and lower churn, increased 30.2% reflecting growth in business customers using tracking, monitoring and other sensor-embedded devices on their equipment.

The effective management of subscriber churn is critical to our ability to maximize revenue growth and to maintain and improve margins. In the third quarter, business wireless postpaid churn increased from 0.84% in 2014 to 1.05% in 2015 and for the first nine months increased from 0.84% to 0.95%, respectively.

Fixed strategic services revenues increased \$309, or 12.6%, in the third quarter and \$980, or 13.8%, for the first nine months of 2015. Our revenues, which were negatively impacted by foreign exchange rates, increased in the third quarter and for the first nine months due to: Ethernet increases of \$103 and \$318, U-verse services increases of \$63 and \$185, Ethernet access to Managed Internet Services increases of \$48 and \$140 and VPN increases of \$12 and \$109.

Legacy wired voice and data service revenues decreased \$429, or 8.7%, in the third quarter and \$1,312, or 8.7%, for the first nine months of 2015. Traditional data revenues decreased \$252 and \$766 and long-distance and local voice revenues decreased \$178 and \$549. The decreases were primarily due to lower demand as customers continue to shift to our more advanced IP-based offerings, or our competitors.

Other service revenues decreased \$92, or 9.4%, in the third quarter and \$249, or 8.8%, for the first nine months of 2015. Other service revenues include project-based revenue, which is nonrecurring in nature, as well as revenues from other managed services, outsourcing, government professional service and equipment. The declines in the third quarter and for the first nine months are primarily due to lower project-based and equipment revenues, as well as impacts from foreign exchange rates.

Wireless equipment revenues increased \$227, or 14.3%, in the third quarter and \$1,207, or 28.1%, for the first nine months of 2015. The increase was primarily due to the increase in handsets sold under our AT&T NextSM (AT&T Next) program and the increase in sales of higher-priced smartphones.

Operations and support expenses decreased \$374, or 3.3%, in the third quarter and increased \$130, or 0.4%, for the first nine months of 2015. Operations and support expenses consist of costs incurred to provide our products and services, including costs of operating and maintaining our networks and personnel costs, such as compensation and benefits.

Expense decreases in the third quarter were primarily due to:

- Lower commission costs of \$304 primarily due to lower average commission rates and fewer upgrade transactions.
- Reductions of \$58 in access costs, primarily due to lower interconnect, roaming and traffic compensations costs.
- Lower customer service costs of \$45 primarily due to our simplified offers and increased efforts to take care of customers on their first call.
- Lower employee charges resulting from workforce reductions and other cost initiatives.

Partially offsetting the decreases in the third quarter were higher wireless handset insurance cost of \$130 due to higher claim rates and costs per claim.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Expense increases for the first nine months were primarily due to:

- Increased equipment expense of \$765 due to the continuing trend of customers choosing higher-cost devices.
- Higher wireless handset insurance cost of \$304 resulting from higher claim rates and costs per claim.

Partially offsetting the increases for the first nine months were:

- Lower commission costs of \$437 primarily due to lower average commission rates and fewer upgrade transactions..
- Lower customer service costs of \$160 primarily due to our simplified offers and increased efforts to take care of customers on their first call.
- Reductions of \$159 in access costs, primarily due to lower interconnect, roaming and traffic compensations costs.
- Lower employee charges resulting from workforce reductions and other cost initiatives.

Depreciation expense increased \$143, or 6.1%, in the third quarter and \$267, or 3.8%, for the first nine months of 2015. The increases in the third quarter and for first nine months were primarily due to the increase in ongoing capital spending for network upgrades and expansion partially offset by fully depreciated assets.

Operating income increased \$436, or 11.3%, in the third quarter and \$639, or 5.3%, for the first nine months of 2015. Our Business Solutions segment operating income margin in the third quarter was 24.3% in 2015 and 22.1% in 2014, and for the first nine months 23.9% in 2015 and 23.2% in 2014. Our Business Solutions EBITDA margin in the third quarter was 38.3% in 2015 and 35.4% in 2014, and for the first nine months 37.7% in 2015 and 36.7% in 2014.

U-verse Consumer VoIP Connections				5,216	4,530	15.1
Total Retail Consumer Voice Connections				12,891	14,381	(10.4) %

¹ Excludes acquisition-related additions during the period.

Operating revenues increased \$5,305, or 95.5%, in the third quarter and \$5,660, or 34.0%, for the first nine months of 2015. Our July 2015 acquisition of DIRECTV was largely responsible for higher revenues beginning in the third quarter of 2015. Also contributing to that gain was continued strong growth in U-verse video and consumer IP broadband, which more than offset lower revenues from legacy voice and data products.

Video entertainment revenues increased \$5,443 in the third quarter and \$6,008 for the first nine months of 2015, primarily related to our acquisition of DIRECTV. With our acquisition of DIRECTV, we are now focusing our sales efforts on satellite service as there are lower content costs for DIRECTV.

High-speed Internet revenues increased \$271, or 19.2%, in the third quarter and \$821, or 20.3%, for the first nine months of 2015. When compared to September 30, 2014, IP broadband subscribers increased 10.7%, to 12.2 million subscribers at September 30, 2015; however, third-quarter net additions were lower due to fewer U-verse sales promotions in the quarter and churn of video customers, some of which also purchased broadband service.

Legacy voice and data service revenues decreased \$415, or 22.6%, in the third quarter and \$1,350, or 22.9%, for the first nine months of 2015. The revenue decreases were due to a \$264 and \$886 decrease in long-distance and local voice revenues and a \$150 and \$464 decrease in traditional data revenues, which include circuit-based services.

34

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Equipment and other revenues increased \$6, or 1.0%, in the third quarter and \$181, or 10.7%, for the first nine months of 2015.

Operations and support expenses increased \$3,669, or 76.7%, in the third quarter and \$4,040, or 28.5%, for the first nine months of 2015. Operations and support expenses consist of costs incurred to provide our products and services, including costs of operating and maintaining our networks, providing video content and personnel costs, such as compensation and benefits.

Increased operations and support expenses were primarily due to our acquisition of DIRECTV, which increased our Entertainment and Internet Services operations and support expenses \$3,905. The increases were attributable to higher broadcast programming and content costs, which were primarily due to our addition of DIRECTV, but also included content cost pressures for our U-verse services. Partially offsetting increased expenses were lower employee charges resulting from workforce reductions, lower equipment costs and our focus on cost initiatives.

Depreciation expenses increased \$280, or 25.2%, in the third quarter and \$123, or 3.6%, for the first nine months of 2015, primarily due to our acquisition of DIRECTV and ongoing capital spending for network upgrades and expansion, partially offset by fully depreciated assets.

Operating income increased \$1,356 in the third quarter and \$1,497 for the first nine months of 2015. Our Entertainment and Internet Services segment operating income margin in the third quarter was 9.4% in 2015 and (6.1)% in 2014, and for the first nine months was 2.5% in 2015 and (5.6)% in 2014. Our Entertainment and Internet Services EBITDA margin in the third quarter was 22.2% in 2015 and 13.9% in 2014, and the first nine months was 18.3% in 2015 and 14.8% in 2014.

Postpaid	23	240	(90.4) %	289	938	(69.2)
Prepaid	466	(46)	-	895	(244)	-
Reseller	149	91	63.7	(218)	(286)	23.8
Connected devices ¹	-	(94)	-	(109)	(351)	68.9
Consumer Mobility Net Subscriber Additions	638	191	-	857	57	-
Consumer Mobility Postpaid Churn ^{2,3}	1.33 %	1.20 %	13 BP	1.23 %	1.15 %	8 BP
Total Consumer Mobility Churn ^{2,3}	1.90 %	2.03 %	(13) BP	1.93 %	2.00 %	(7) BP

¹ Includes data-centric devices such as session-based tablets, monitoring devices and automobile systems.

Excludes postpaid tablets.

² Excludes migrations between AT&T segments and/or subscriber categories and acquisition-related additions during the period.

³ Calculated by dividing the aggregate number of wireless subscribers who canceled service during a period divided by the total number of wireless subscribers at the beginning of that period. The churn rate for the period is equal to the average of the churn rate for each month of that period.

Operating Revenues decreased \$424, or 4.6%, in the third quarter and \$930, or 3.4%, for the first nine months of 2015. Consumer Mobility revenues reflect declines in postpaid service revenues due to the success of Mobile Share Value plans and migrations of customers to our Business Solutions segment, offset by higher prepaid service revenues and an increase in equipment revenues. Our business wireless offerings allow for individual subscribers to purchase wireless services through employer-sponsored plans for a reduced price. The migration of these subscribers to the Business Solutions segment negatively impacted consumer postpaid subscriber and service revenues growth.

Postpaid wireless revenues decreased \$544, or 9.0%, in the third quarter and \$1,707, or 9.2%, for the first nine months of 2015. These decreases were largely due to customers continuing to shift to no-device-subsidy plans, which allow for discounted monthly service charges under our Mobile Share plans and the migration of subscribers to Business Solutions. Without the migration of customers to Business Solutions, postpaid wireless revenues would have decreased approximately 4% in the third quarter and for the first nine months.

Prepaid wireless revenues increased \$35, or 3.0%, in the third quarter and \$305, or 9.8%, for the first nine months of 2015. Our prepaid services, which include services sold under the Cricket brand, are monthly prepaid services. Prepaid wireless revenues increased primarily due to growth in the subscriber base and our March 2014 acquisition of

Leap.

Other service revenue decreased \$8, or 1.2%, in the third quarter and increased \$57, or 3.2%, for the first nine months of 2015.

Equipment revenue increased \$93, or 7.0%, in the third quarter and \$415, or 10.7%, for the first nine months of 2015. These increases were primarily related to the increase in devices sold under our AT&T Next program and the increase in sales of higher-priced smartphones.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued
Dollars in millions except per share amounts

Operations and support expenses decreased \$666, or 11.6%, in the third quarter and \$1,365, or 7.9%, for the first nine months of 2015. Operations and support expenses consist of costs incurred to provide our products and services, including costs of operating and maintaining our networks and personnel costs, such as compensation and benefits.

Decreased operations and support expenses in the third quarter were primarily due to the following:

- Selling and commission expenses decreased \$202 primarily due to lower average commission rates, including those paid under the AT&T Next program, combined with fewer upgrade transactions.
- Network costs decreased \$135 primarily due to lower interconnect costs resulting from our ongoing network transition to more efficient Ethernet/IP-based technologies.
- Customer service costs decreased \$108 primarily due to lower call volumes, reductions in professional services and contract labor, and lower payroll costs.
- Other cost of service decreased \$90 primarily due to incollect roaming fee rate declines, which were partially offset by increased data volume.

Decreased operations and support expenses for the first nine months were primarily due to the following:

- Selling and commission expenses decreased \$403 primarily due to lower average commission rates, including those paid under the AT&T Next program, partially offset by an increase in rates associated with Cricket sales.
- Network costs decreased \$299 primarily due to lower interconnect costs resulting from our ongoing network transition to more efficient Ethernet/IP-based technologies.
- Customer service costs decreased \$187 primarily due to reduced salaries and benefits, lower outsourced vendor and professional services from reduced call volumes and integration activities.
- Other cost of service decreased \$168 primarily due to incollect roaming fee rate declines, which were partially offset by increased data volume.

Depreciation expense increased \$26, or 2.7%, in the third quarter and \$66, or 2.3%, for the first nine months of 2015 primarily due to ongoing capital spending for network upgrades and expansion partially offset by fully depreciated assets.

Operating income increased \$216, or 8.5%, in the third quarter and \$369, or 5.1%, for the first nine months of 2015. Our Consumer Mobility segment operating income margin in the third quarter was 31.2% in 2015 and 27.4% in 2014, and for the first nine months was 28.9% in 2015 and 26.5% in 2014. Our Consumer Mobility EBITDA margin in the third quarter was 42.3% in 2015 and 37.8% in 2014, and for the first nine months 39.9% in 2015 and 37.0% in 2014.

Operating Results

Our International segment consists of the Latin American operations acquired in our July 2015 acquisition of DIRECTV as well as the Mexican wireless operations acquired earlier in 2015 (see Note 7). Our International segment operating income margin was (5.4)% in the third quarter and (9.9)% for the first nine months of 2015. Our International EBITDA margin was 9.3% in the third quarter and 5.4% for the first nine months of 2015.

Operating revenues consist of wireless service and equipment revenues from subscribers in Mexico as well as video entertainment revenues from DIRECTV subscribers in Latin America. Our operating revenues were \$1,526 in the third quarter of 2015, with \$945 attributable to video services in Latin America and \$581 of wireless revenues in Mexico. For the first nine months of 2015 operating revenues were \$2,253, with \$1,308 attributable to wireless revenues in Mexico and \$945 in video services in Latin America.

Operations and support expenses consist of costs incurred to provide our products and services, including costs of operating and maintaining our networks and personnel costs, such as compensation and benefits. Operating expenses in the third quarter were \$1,609 and operating loss was \$83. For the first nine months of 2015, our operating expenses were \$2,477 and operating loss was \$224.

Connections Summary

At September 30, 2015, we had approximately 8.1 million wireless subscribers in Mexico and 12.5 million video connections in Latin America, including 5.5 million in Brazil. During the third quarter of 2015, our Mexico wireless business had a net loss of 231,000 subscribers, mainly prepaid customers, and our Latin America operations had a net loss of 113,000 video connections. Since acquisition, our Mexico wireless business had a net loss of 689,000 subscribers.

The following table highlights other key measures of performance for AT&T Mobility:

(in 000s)	Third Quarter		Percent Change	Nine-Month Period		Percent Change
	2015	2014		2015	2014	
Wireless Subscribers ¹						
Postpaid smartphones				57,733	55,791	3.5 %
Postpaid feature phones and data-centric devices				18,938	19,314	(1.9)
Postpaid				76,671	75,105	2.1
Prepaid				10,988	10,026	9.6
Reseller				13,729	13,884	(1.1)
Connected devices ²				25,018	19,635	27.4
Total Wireless Subscribers				126,406	118,650	6.5
Net Additions ³						
Postpaid	289	785	(63.2) %	1,140	2,436	(53.2)
Prepaid	466	(46)	-	895	(244)	-
Reseller	156	87	79.3	(205)	(281)	27.0
Connected devices ²	1,602	1,181	35.6	3,995	1,792	-
Net Subscriber Additions	2,513	2,007	25.2	5,825	3,703	57.3
Mobile Share connections				59,592	46,909	27.0
Smartphones under our installment program at end of period				23,487	10,133	-
Smartphones sold under our installment program during period	4,074	3,401	19.8 %	11,998	9,411	27.5 %
Total Churn ⁴	1.33 %	1.36 %	(3) BP	1.35 %	1.41 %	(6) BP
Postpaid Churn ⁴	1.16 %	0.99 %	17 BP	1.06 %	0.97 %	9 BP

¹ Represents 100% of AT&T Mobility wireless subscribers.

² Includes data-centric devices such as session-based tablets, monitoring devices and automobile systems. Excludes postpaid tablets.

³ Excludes acquisition-related additions during the period.

⁴ Calculated by dividing the aggregate number of wireless subscribers who canceled service during a period divided by the total number of wireless subscribers at the beginning of that period. The churn rate for the period is equal to the average of the churn rate for each month of that period.

Operating income increased \$673, or 14.2%, in the third quarter and \$1,100, or 7.7%, for the first nine months of 2015. The operating income margin of AT&T Mobility was 29.6% in the third quarter of 2015 compared to 25.9% in 2014 and 28.1% for the first nine months of 2015 compared to 26.5%. AT&T Mobility's EBITDA margin in the third quarter was 40.7% in 2015 and 36.3% in 2014, and for the first nine months 39.2% in 2015 and 37.2% in 2014. AT&T Mobility's EBITDA service margin in the third quarter was 49.4% in 2015 and 43.1% in 2014, and for the first

nine months 47.8% in 2015 and 43.8% in 2014. (EBITDA service margin is operating income before depreciation and amortization, divided by total service revenues.) AT&T Mobility's operating results reflect strong adoption of AT&T Next, BYOD (bring your own devices) customers, lower smartphone gross adds and strong operational efficiencies.

Subscriber Relationships

As the wireless industry continues to mature, we believe that future wireless growth will increasingly depend on our ability to offer innovative services, plans and devices and a wireless network that has sufficient spectrum and capacity to support these innovations on as broad a geographic basis as possible. To attract and retain subscribers in a maturing market, we have launched a wide variety of plans, including Mobile Share and Mobile Share Value (collectively referred to as Mobile Share) and AT&T Next.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

ARPU

Postpaid phone-only ARPU (average revenue per average wireless subscriber) decreased 2.6% compared to the third quarter of 2014 and 4.7% compared to the first nine months of 2014 reflecting subscribers' continued adoption of AT&T Next and Mobile Share Value plans. Postpaid phone-only ARPU plus Next subscriber installment billings (postpaid phone-only ARPU plus AT&T Next) increased 4.9% and 3.0% compared to the same periods last year, as expected due to the continuing growth of the AT&T Next program. Compared to the second quarter of 2015, postpaid phone-only ARPU decreased 0.7% and postpaid phone-only ARPU plus AT&T Next increased 0.8%.

Churn

The effective management of subscriber churn is critical to our ability to maximize revenue growth and to maintain and improve margins. Total churn was lower for the third quarter and first nine months of 2015. Postpaid churn was higher for both the third quarter and the first nine months reflecting continuing competitive pressures in the industry.

Postpaid

Postpaid subscribers increased 0.2% during the third quarter when compared to June 30, 2015 and 2.1% when compared to September 30, 2014. At September 30, 2015, 86% of our postpaid phone subscriber base used smartphones, compared to 81% at September 30, 2014. About 98% of our postpaid smartphone subscribers are on plans that provide for service on multiple devices at reduced rates, and such subscribers tend to have higher retention and lower churn rates. A growing percentage of our postpaid smartphone subscribers are on usage-based data plans, with approximately 50.4 million subscribers on these plans as compared to 46.1 million subscribers in the prior year. About half of our Mobile Share accounts have chosen data plans with 10 gigabytes or higher. Device connections on our Mobile Share plans now represent over 77% of our postpaid customer base. Such offerings are intended to encourage existing subscribers to upgrade their current services and/or add connected devices, attract subscribers from other providers and minimize subscriber churn.

Historically, our postpaid customers had signed two-year service contracts when they purchased subsidized handsets. However, through our Mobile Share plans, we offer postpaid services at lower prices for those customers who either bring their own devices (BYOD) or participate in our AT&T Next program. Approximately 71% of all postpaid smartphone gross adds and upgrades during the third quarter of 2015 chose AT&T Next. While BYOD customers do not generate equipment revenue or incur additional expenses for device subsidy, the service revenue helps improve our margins.

Our AT&T Next program allows for postpaid subscribers to purchase certain devices in installments over a period of up to 30 months. Additionally, after a specified period of time, they also have the right to trade in the original device for a new device and have the remaining unpaid balance satisfied. For customers that elect these trade-in programs, we recognize equipment revenue at the time of the sale for the amount of the customer receivable, net of the fair value of the trade-in right guarantee and imputed interest. A significant percentage of our customers on the AT&T Next program pay a lower monthly service charge, which results in lower service revenue recorded for these subscribers.

Prepaid

In the first quarter of 2015, we updated our definition of prepaid subscribers to exclude session-based tablets, which are now included with connected devices. Prepaid subscribers now consist primarily of phone users. Prepaid subscribers increased 5.3% during the third quarter when compared to June 30, 2015 and 9.6% when compared to September 30, 2014.

Connected Devices

Connected Devices includes data-centric devices such as session-based tablets, monitoring devices and automobile systems. Connected device subscribers increased 6.8% when compared to June 30, 2015 and 27.4% when compared to September 30, 2014. During the third-quarter 2015, we added approximately 1.0 million "connected" cars through agreements with various carmakers. We believe that these connected car agreements give us the opportunity to create future retail relationships with the car owners.

Dollars in millions except per share amounts

OTHER BUSINESS MATTERS

DIRECTV In July 2015, we completed our acquisition of DIRECTV, a leading provider of digital television entertainment services in both the United States and Latin America. The acquisition gives us a unique and complementary set of assets and the opportunity to achieve substantial cost synergies over time, as well as increasing revenue from pay television in Latin America. Our distribution scale will enable us to offer consumers attractive combinations of video, high-speed broadband and mobile services, using all the sales channels of both companies. We believe the combined company will be a content distribution leader across mobile, video and broadband platforms.

Under the merger agreement, each share of DIRECTV stock was exchanged for \$28.50 cash plus 1.892 shares of our common stock. After adjustment for shares issued to trusts consolidated by AT&T, stock based payment arrangements and fractional shares, which were settled in cash, AT&T issued 954,407,524 shares to DIRECTV shareholders, giving them an approximate 16% stake in the combined company, based on common shares outstanding. Based on our \$34.29 per share closing stock price on July 24, 2015, the aggregate value of consideration paid to DIRECTV shareholders was \$47,404, including \$32,727 of AT&T stock and \$14,378 in cash and \$299 for shared based payment arrangements.

The Federal Communications Commission (FCC) approved the transaction subject to the following conditions:

Fiber to the Premises Deployment – Within four years, we will offer our all-fiber Internet access service to at least 12.5 million customer locations such as residences, home offices and very small businesses. Combined with our existing high-speed broadband network, at least 25.7 million customer locations will have access to broadband speeds of 45Mbps or higher by the end of the four-year build. While the addition of medium and large businesses do not count towards the commitments, we will have the opportunity to provide services to those customers as part of this expansion. In addition, we will offer 1 Gbps fiber Internet access service pursuant to applicable E-rate rules to any eligible school or library requesting that service within or contiguous to our all-fiber footprint.

Discounted Broadband Services Program – Within our 21-state area, we will offer a discounted fixed broadband service to low-income households that qualify for the government's Supplemental Nutrition Assistance Program. In locations where it is available, service with speeds of at least 10Mbps will be offered for ten dollars per month. Elsewhere, 5Mbps service will be offered for ten dollars per month or, in some locations, 3Mbps service will be offered for five dollars per month.

Non-Discriminatory Usage-Based Practices – We are required to refrain from using usage-based allowances or other retail terms and conditions on our fixed broadband Internet access service, as defined in the order, to discriminate in favor of our own online video services. We can and will continue to offer discounts on integrated bundles of our video and fixed broadband services.

Internet Interconnection Disclosure Requirements – We will submit to the FCC new interconnection agreements we enter into with peering networks and with "on-net" customers that purchase Managed Internet Service to exchange Internet traffic with other AT&T customers. We will develop, together with an independent expert, a methodology for measuring the performance of our Internet traffic exchange and regularly report these metrics to the FCC.

Compliance Program and Reporting – We will appoint a Company Compliance Officer to develop and implement a plan to ensure compliance with these merger conditions. We will engage an independent, third-party compliance officer to evaluate the plan and our implementation. Both AT&T and the independent compliance officer will submit periodic reports to the FCC.

The conditions will remain in effect for four years from July 24, 2015. A condition may be extended once for two years if the FCC makes a formal finding that we have violated the condition in whole or in part.

Litigation Challenging DIRECTV's NFL Sunday Ticket More than a dozen putative class actions have been filed in the U.S. District Courts for the Central District of California and the Southern District of New York against DIRECTV and the National Football League (NFL) alleging that the NFL and DIRECTV violated federal antitrust law in connection with the NFL Sunday Ticket package. Among other things, the complaints allege that plaintiffs have been overcharged for the televised presentation of out-of-market NFL games due to DIRECTV's exclusive agreement with the NFL to broadcast out-of-market games through the Sunday Ticket package. The complaints seek unspecified treble damages and attorneys' fees along with injunctive relief. The first complaint, Abrahamian v. National Football League, Inc., et al., was served in June 2015. We vigorously dispute these allegations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Federal Trade Commission Litigation Involving DIRECTV In March 2015, the Federal Trade Commission (FTC) filed a civil suit in the U.S. District Court for the Northern District of California against DIRECTV seeking injunctive relief and unspecified money damages under Section 5 of the Federal Trade Commission Act and Section 4 of the Restore Online Shoppers' Confidence Act. The FTC's allegations concern DIRECTV's advertising, marketing and sale of programming packages. The FTC alleges that DIRECTV did not adequately disclose all relevant terms. We are disputing these allegations vigorously.

Unlimited Data Plan Claims In October 2014, the Federal Trade Commission (FTC) filed a civil suit in the U.S. District Court for the Northern District of California against AT&T Mobility, LLC seeking injunctive relief and unspecified money damages under Section 5 of the Federal Trade Commission Act. The FTC's allegations concern AT&T's Maximum Bit Rate (MBR) program, which temporarily reduces the download speeds of a small portion of our legacy Unlimited Data Plan customers each month. MBR is an industry-standard practice that is designed to affect only the most data-intensive applications (such as video streaming). Texts, emails, tweets, social media posts, Internet browsing, and many other applications are typically unaffected. Contrary to the FTC's allegations, which we vigorously dispute, our MBR program is permitted by our customer contracts, was fully disclosed in advance to our Unlimited Data Plan customers, and was implemented to protect the network for the benefit of all customers. In March 2015, our motion to dismiss the litigation on the grounds that the FTC lacked jurisdiction to file suit was denied. In May 2015, the Court granted our motion to certify its decision for immediate appeal. The United States Court of Appeals for the Ninth Circuit subsequently granted our petition to accept the appeal, and the appeal is now pending before that Court while limited discovery proceeds in the District Court.

On June 17, 2015, the FCC issued a Notice of Apparent Liability and Order (NAL) to AT&T Mobility, LLC concerning our MBR policy that applies to Unlimited Data Plan customers. The NAL alleges that we violated the FCC's Open Internet Transparency Rule by using the term "unlimited" in connection with the offerings subject to the MBR policy and by failing adequately to disclose the speed reductions that apply once a customer reaches a specified data threshold. The NAL proposes a forfeiture penalty of \$100, and further proposes to order us to correct any misleading and inaccurate statements about our unlimited plans, inform customers of the alleged violation, revise our disclosures to address the alleged violation and inform these customers that they may cancel their plans without penalty after reviewing the revised disclosures. On July 17, 2015, we filed our response to the NAL. We believe that the NAL is unlawful and should be withdrawn, because we have fully complied with the Open Internet Transparency Rule and the FCC has no authority to impose the proposed remedies. The matter is currently pending before the FCC.

Labor Contracts New three-year agreements covering approximately 17,000 traditional wireline employees, which expired in April, have been ratified. On October 20, 2015, we reached tentative four-year agreements on three southeast regional contracts covering 24,000 traditional wireline employees. These southeast contracts remain subject to ratification by the union membership.

COMPETITIVE AND REGULATORY ENVIRONMENT

Overview AT&T subsidiaries operating within the United States are subject to federal and state regulatory authorities. AT&T subsidiaries operating outside the United States are subject to the jurisdiction of national and supranational regulatory authorities in the markets where service is provided.

In the Telecommunications Act of 1996 (Telecom Act), Congress established a national policy framework intended to bring the benefits of competition and investment in advanced telecommunications facilities and services to all Americans by opening all telecommunications markets to competition and reducing or eliminating regulatory burdens

that harm consumer welfare. However, since the Telecom Act was passed, the FCC and some state regulatory commissions have maintained or expanded certain regulatory requirements that were imposed decades ago on our traditional wireline subsidiaries when they operated as legal monopolies. We are pursuing, at both the state and federal levels, additional legislative and regulatory measures to reduce regulatory burdens that are no longer appropriate in a competitive telecommunications market and that inhibit our ability to compete more effectively and offer services wanted and needed by our customers, including initiatives to transition services from traditional networks to all IP-based networks. At the same time, we also seek to ensure that legacy regulations are not extended to broadband or wireless services, which are subject to vigorous competition.

43

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued
Dollars in millions except per share amounts

We provide satellite video service through our subsidiary DIRECTV, whose satellites are licensed by the FCC. The Communications Act of 1934 and other related acts give the FCC broad authority to regulate the U.S. operations of DIRECTV. In addition, states representing a majority of our local service access lines have adopted legislation that enables us to provide U-verse video service through a single statewide or state-approved franchise (as opposed to the need to acquire hundreds or even thousands of municipal-approved franchises) to offer competitive video services. We also are supporting efforts to update and improve regulatory treatment for retail services. Regulatory reform and passage of legislation is uncertain and depends on many factors.

We provide wireless services in robustly competitive markets, but those services are subject to substantial and increasing governmental regulation. Wireless communications providers must obtain licenses from the FCC to provide communications services at specified spectrum frequencies within specified geographic areas and must comply with the FCC rules and policies governing the use of the spectrum. While wireless communications providers' prices and service offerings are generally not subject to state regulation, states sometimes attempt to regulate or legislate various aspects of wireless services, such as in the area of consumer protection.

The FCC has recognized that the explosive growth of bandwidth-intensive wireless data services requires the U.S. Government to make more spectrum available. In February 2012, Congress set forth specific spectrum blocks to be auctioned and licensed by February 2015 (the "AWS-3 Auction"), and also authorized the FCC to conduct an "incentive auction," to make available for wireless broadband use certain spectrum that is currently used by broadcast television licensees (the "600 MHz Auction"). We participated in the AWS-3 Auction. The FCC announced that the 600 MHz Auction (Auction 1000) is scheduled to begin on March 29, 2016.

In May 2014, in a separate proceeding, the FCC issued an order revising its policies governing mobile spectrum holdings. The FCC rejected the imposition of caps on the amount of spectrum any carrier could acquire, retaining its case-by-case review policy. Moreover, it increased the amount of spectrum that could be acquired before exceeding an aggregation "screen" that would automatically trigger closer scrutiny of a proposed transaction. On the other hand, it indicated that it will separately consider an acquisition of "low band" spectrum that exceeds one-third of the available low band spectrum as presumptively harmful to competition. In addition, the FCC imposed limits on certain bidders in the 600 MHz Auction, including AT&T, restricting them from bidding on up to 40 percent of the available spectrum in the incentive auction in markets that cover as much as 70-80 percent of the U.S. population. On balance, the order and the new spectrum screen should allow AT&T to obtain additional spectrum to meet our customers' needs, but because AT&T uses more "low band" spectrum in its network than some other national carriers, the separate consideration of low band spectrum acquisitions might affect AT&T's ability to expand capacity in these bands ("low band" spectrum has better propagation characteristics than "high band" spectrum). We seek to ensure that we have the opportunity, through the auction process and otherwise, to obtain the spectrum we need to provide our customers with high-quality service in the future.

As the wireless industry continues to mature, we believe that future wireless growth will increasingly depend on our ability to offer innovative data services and a wireless network that has sufficient spectrum and capacity to support these innovations. We are facing significant spectrum and capacity constraints on our wireless network in certain markets. We expect such constraints to increase and expand to additional markets in the coming years. While we are continuing to invest significant capital in expanding our network capacity, our capacity constraints could affect the quality of existing voice and data services and our ability to launch new, advanced wireless broadband services, unless we are able to obtain more spectrum. Any long-term spectrum solution will require that the FCC make additional spectrum available to the wireless industry to meet the expanding needs of our subscribers. We will continue to

attempt to address spectrum and capacity constraints on a market-by-market basis.

Net Neutrality In February 2015, the FCC released an order in response to the D.C. Circuit's January 2014 decision adopting new rules, and reclassifying both fixed and mobile consumer broadband Internet access services as telecommunications services, subject to comprehensive regulation under the Act. The FCC's decision significantly expands the FCC's existing authority to regulate the provision of fixed and mobile broadband Internet access services. The FCC also asserted jurisdiction over Internet interconnection arrangements, which until now have been unregulated. These actions could have an adverse impact on our fixed and mobile broadband services and operating results. AT&T and several other parties, including US Telecom and CTIA trade groups, have appealed the FCC's order. The case is scheduled for oral argument in December 2015.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

LIQUIDITY AND CAPITAL RESOURCES

We had \$6,202 in cash and cash equivalents available at September 30, 2015. Cash and cash equivalents included cash of \$2,699 and money market funds and other cash equivalents of \$3,503. Approximately \$828 of our cash and cash equivalents resided in foreign jurisdictions, some of which are subject to restrictions on repatriation. Cash and cash equivalents decreased \$2,401 since December 31, 2014. We also had \$400 in short-term investments, which we included in "Other current assets" on our consolidated balance sheets. In the first nine months of 2015, cash inflows were primarily provided by long-term debt issuances and cash receipts from operations, including cash from our sale and transfer of certain equipment installment receivables to third parties. These inflows were offset by cash used to meet the needs of the business, including, but not limited to, payment of operating expenses; acquisitions of wireless spectrum, DIRECTV, GSF Telecom Holdings, S.A.P.I. de C.V. (GSF Telecom) and Nextel Mexico; funding capital expenditures; debt repayments; dividends to stockholders; and collateral posting (see Note 6). We discuss many of these factors in detail below.

Cash Provided by or Used in Operating Activities

During the first nine months of 2015, cash provided by operating activities was \$26,695, compared to \$25,593 for the first nine months of 2014. Higher operating cash flows in 2015 were primarily due to increased operating results resulting from our acquisition of DIRECTV. Higher proceeds from the sale of equipment installment receivables in 2015, offset by timing of other working capital payments, also impacted operating cash flows.

Cash Used in or Provided by Investing Activities

For the first nine months of 2015, cash used in investing activities totaled \$43,047 and consisted primarily of:

- \$17,703 for acquisitions of spectrum licenses, largely due to the remaining payment for AWS spectrum licenses in the AWS-3 Auction.

- \$13,356 for capital expenditures, excluding interest during construction.

- \$12,991 for the acquisitions of DIRECTV, GSF Telecom, Nextel Mexico and other operations.

During the first nine months, we also received \$1,890 upon the maturity of certain short-term investments and paid \$400 for additional short-term investments.

Virtually all of our capital expenditures are spent on our wireless and wireline networks, our video services and support systems for our communications and video services. Capital expenditures, excluding interest during construction, decreased \$3,473 in the first nine months, reflecting the completion of our LTE build and other Project VIP initiatives in 2014. Capital expenditures also include spending for DIRECTV, GSF Telecom and Nextel Mexico after the acquisition dates. As part of our organization realignment, we no longer allocate capital expenditures to our segments.

We expect our 2015 capital expenditures to be in the \$21,000 range, and we expect our capital expenditures to be in the 15 percent range of service revenues or lower from 2016 through 2018. The amount of capital investment is influenced by demand for services and products, capacity needs and network enhancements. We are also focused on ensuring merger commitments are met.

AT&T INC.
SEPTEMBER 30, 2015

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued
Dollars in millions except per share amounts

Cash Provided by or Used in Financing Activities

For the first nine months of 2015, cash provided by financing activities totaled \$13,951 and included net proceeds of \$33,967 from the following long-term debt issuances:

- February 2015 issuance of \$2,619 of 4.600% global notes due 2045.
- March 2015 borrowings under a variable rate term loan facility due 2018, variable rate term loan facility due 2020 and variable rate 18-month credit agreement due 2016, together totaling \$11,155.
- March 2015 issuance of €1,250 of 1.300% global notes due 2023 and €1,250 of 2.450% global notes due 2035 (together, equivalent to \$2,844, when issued).
- May 2015 issuance of \$3,000 of 2.450% global notes due 2020; \$2,750 of 3.000% global notes due 2022; \$5,000 of 3.400% global notes due 2025; \$2,500 of 4.500% global notes due 2035; \$3,500 of 4.750% global notes due 2046; and \$750 floating rate global notes due 2020. The floating rate for the note is based upon the three-month London Interbank Offered Rate (LIBOR), reset quarterly, plus 93 basis points.

During the first nine months of 2015, we redeemed \$9,962 of debt, primarily consisting of the following:

- Redemption of \$899 of various senior notes in connection with the January 2015 GSF Telecom acquisition and April 2015 Nextel Mexico acquisition.
 - April 2015 redemption of €1,250 (approximately \$1,975 at maturity) of AT&T 6.125% notes due 2015.
 - August 2015 redemption of \$1,500 of AT&T 2.500% notes due August 2015.
 - September 2015 redemption of \$1,000 of 0.800% notes due December 2015; \$1,000 of 0.900% AT&T notes due February 2016; \$750 of 3.125% DIRECTV Holdings LLC and DIRECTV Financing Co., Inc. notes due February 2016; and \$1,500 of 3.500% of DIRECTV senior notes due March 2016.
 - September 2015 prepayment of \$1,000 of the outstanding advances under the \$2,000 18-month credit agreement (the "18-Month Credit Agreement") by and between AT&T and Mizuho. (See the "Credit Facilities" discussion below.)
- Our weighted average interest rate of our entire long-term debt portfolio, including the impact of derivatives, was approximately 4.0% as of September 30, 2015, compared to 3.8% as of June 30, 2015, and 4.2% as of December 31, 2014. We had \$126,042 of total notes and debentures outstanding at September 30, 2015, which included Euro, British pound sterling, Swiss Franc, Canadian dollar and Brazilian real denominated debt of approximately \$27,073.

As of September 30, 2015, we had approximately 415 million shares remaining from 2013 and 2014 authorizations from our Board of Directors to repurchase shares of our common stock. With the completion of the DIRECTV acquisition, our priority will be to use free cash flow (operating cash flows less construction and capital expenditures) after dividends to pay down debt.

We paid dividends of \$7,311 during the first nine months of 2015, compared with \$7,170 for the first nine months of 2014, primarily reflecting the increase in the quarterly dividend approved by our Board of Directors in December 2014, partially offset by the impact of the decline in shares outstanding (prior to our completion of the DIRECTV merger), due to repurchases in 2014. Dividends declared by our Board of Directors totaled \$0.47 per share in the third quarter and \$1.41 per share for the first nine months of 2015 and \$0.46 per share in the third quarter and \$1.38 per share for the first nine months of 2014. With significantly higher outstanding shares of AT&T common stock due to the DIRECTV merger, our total dividend payments for 2015 will be higher when compared to 2014. Our dividend policy considers the expectations and requirements of stockholders, capital funding requirements of AT&T and long-term growth opportunities. It is our intent to provide the financial flexibility to allow our Board of Directors to consider dividend growth and to recommend an increase in dividends to be paid in future periods. All dividends remain subject to declaration by our Board of Directors.

At September 30, 2015, we had \$7,535 of debt maturing within one year, \$7,380 of which was related to long-term debt issuances. Debt maturing within one year includes the following notes that may be put back to us by the holders:

- \$1,000 of annual put reset securities issued by BellSouth that may be put back to us each April until maturity in 2021.
- An accreting zero-coupon note that may be redeemed each May until maturity in 2022. If the zero-coupon note (issued for principal of \$500 in 2007) is held to maturity, the redemption amount will be \$1,030.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Dollars in millions except per share amounts

Credit Facilities

We have a \$5,000 revolving credit agreement with a syndicate of banks that expires in December 2018 (the "December 2018 Facility") and a \$3,000 revolving credit agreement with a syndicate of banks that expires in December 2017 (the "December 2017 Facility"). There were no advances outstanding under the December 2018 Facility or the December 2017 Facility at September 30, 2015.

On January 21, 2015, we entered into a \$9,155 credit agreement (the "Syndicated Credit Agreement") containing (i) a \$6,286 term loan facility (the "Tranche A Facility") and (ii) a \$2,869 term loan facility (the "Tranche B Facility"), with certain investment and commercial banks and Mizuho Bank, Ltd. ("Mizuho"), as administrative agent. On that date, we also entered into the 18-Month Credit Agreement with Mizuho as initial lender and agent.

On March 2, 2015, we borrowed \$9,155 under the Syndicated Credit Agreement and \$2,000 under the 18-Month Credit Agreement at floating interest rates. We used these advances for general corporate purposes, including acquisition related payments. Amounts borrowed under the Tranche A Facility will be due and payable on March 2, 2018. The Tranche A Facility interest rate equals three-month LIBOR, reset quarterly, plus the Applicable Margin (or 100 basis points when issued). Amounts borrowed under the Tranche B Facility will be subject to amortization from March 2, 2018, with twenty-five percent of the aggregate principal amount thereof being payable prior to March 2, 2020, and all remaining principal amount due and payable on March 2, 2020. The Tranche B Facility interest rate equals three-month LIBOR, reset quarterly, plus the Applicable Margin (or 112.5 basis points when issued). Outstanding amounts borrowed under the 18-Month Credit Agreement will be due and payable on September 2, 2016. The 18-Month Credit Agreement interest rate equals three-month LIBOR, reset quarterly, plus the Applicable Margin (or 80 basis points when issued).

At September 30, 2015, we had advances outstanding of \$9,155 under the Syndicated Credit Agreement and were in compliance with all covenants. At September 30, 2015, we had advances outstanding of \$1,000 under the 18-Month Credit Agreement and were in compliance with all covenants. Additional details regarding the Syndicated Credit Agreement and 18-Month Credit Agreement are available in our Annual Report on Form 10-K for the year ended December 31, 2014.

Collateral Arrangements

During the first nine months of 2015, we posted \$1,496 of additional cash collateral, on a net basis, to banks and other participants in our derivative arrangements. Cash postings under these arrangements vary with changes in credit ratings and netting agreements. (See Note 6)

Other

Our total capital consists of debt (long-term debt and debt maturing within one year) and stockholders' equity. Our capital structure does not include debt issued by our equity method investments. At September 30, 2015, our debt ratio, which includes the debt raised in anticipation of our recently closed DIRECTV acquisition, was 50.8%, compared to 55.6% at June 30, 2015, and 47.6% at December 31, 2014. Our net debt ratio was 48.2% at September 30, 2015, compared to 45.3% at June 30, 2015, and 41.5% at December 31, 2014. The debt ratio is affected by the same factors that affect total capital, and reflects our debt issuances during the first half of 2015, inclusion of DIRECTV debt and additional outstanding shares of AT&T common stock in our balance sheet as of the acquisition date, and debt redemptions for the first nine months of 2015.

During 2015, we received \$3,642 from the monetization of various assets, primarily the sale of certain equipment installment receivables. We plan to continue to explore similar opportunities during the remainder of 2015.

In 2013, we made a voluntary contribution of a preferred equity interest in AT&T Mobility II LLC (Mobility), the holding company for our U.S. wireless operations, to the trust used to pay pension benefits under our qualified pension plans. The preferred equity interest had a value of \$8,838 as of September 30, 2015, and \$9,021 as of December 31, 2014, does not have any voting rights and has a liquidation value of \$8,000. The trust is entitled to receive cumulative cash distributions of \$560 per annum, which are distributed quarterly in equal amounts. We distributed \$420 to the trust during the first nine months of 2015. So long as we make the distributions, the terms of the preferred equity interest will not impose any limitations on our ability to declare a dividend or repurchase shares. At the time of the contribution of the preferred equity interest, we agreed to annual cash contributions to the trust of \$175 no later than the due date for our federal income tax return for each of 2014, 2015 and 2016. The 2014 contribution of \$175 was made to the trust during the second quarter of 2015.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Dollars in millions except per share amounts

At September 30, 2015, we had interest rate swaps with a notional value of \$7,050 and a fair value of \$217.

We have fixed-to-fixed and floating-to-fixed cross-currency swaps on foreign-currency-denominated debt instruments with a U.S. dollar notional value of \$29,642 to hedge our exposure to changes in foreign currency exchange rates. These derivatives have been designated at inception and qualify as cash flow hedges with a net fair value of \$(2,406) at September 30, 2015.

We also have foreign exchange contracts with a notional value of \$23 and a fair value of \$0.

Item 4. Controls and Procedures

The registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed by the registrant is recorded, processed, summarized, accumulated and communicated to its management, including its principal executive and principal financial officers, to allow timely decisions regarding required disclosure, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. The chief executive officer and chief financial officer have performed an evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of September 30, 2015. Based on that evaluation, the chief executive officer and chief financial officer concluded that the registrant's disclosure controls and procedures were effective as of September 30, 2015.

Internal control Over Financial Reporting

There have been no changes in the registrant's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during the registrant's third quarter of 2015 that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting. Due to the timing of our acquisitions of GSF Telecom, Nextel Mexico and DIRECTV, we will exclude the operations of these recently acquired companies as we continue to evaluate the internal controls over financial reporting of each entity. This exclusion is in accordance with the general guidance issued by the Staff of the Securities and Exchange Commission that an assessment of a recent business combination may be omitted from management's report on internal control over financial reporting in the first year of consolidation.

CAUTIONARY LANGUAGE CONCERNING FORWARD-LOOKING STATEMENTS

Information set forth in this report contains forward-looking statements that are subject to risks and uncertainties, and actual results could differ materially. Many of these factors are discussed in more detail in the "Risk Factors" section. We claim the protection of the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995.

The following factors could cause our future results to differ materially from those expressed in the forward-looking statements:

Adverse economic and/or capital access changes in the markets served by us or in countries in which we have significant investments, including the impact on customer demand and our ability and our suppliers' ability to access financial markets at favorable rates and terms.

Changes in available technology and the effects of such changes, including product substitutions and deployment costs.

Increases in our benefit plans' costs, including increases due to adverse changes in the United States and foreign securities markets, resulting in worse-than-assumed investment returns and discount rates; adverse changes in mortality assumptions; adverse medical cost trends, and unfavorable or delayed implementation of healthcare legislation, regulations or related court decisions.

The final outcome of FCC and other federal or state agency proceedings (including judicial review, if any, of such proceedings) involving issues that are important to our business, including, without limit, intercarrier compensation, interconnection obligations, pending Notices of Apparent Liability, the transition from legacy technologies to IP-based infrastructure including the withdrawal of legacy TDM-based services, universal service, broadband deployment, E911 services, competition policy, net neutrality, including the FCC's order reclassifying broadband as Title II services subject to much more fulsome regulation, unbundled network elements and other wholesale obligations, availability of new spectrum from the FCC on fair and balanced terms, and wireless and satellite license awards and renewals.

The final outcome of state and federal legislative efforts involving issues that are important to our business, including deregulation of IP-based services, relief from Carrier of Last Resort obligations, and elimination of state commission review of the withdrawal of services.

Enactment of additional state, federal and/or foreign regulatory and tax laws and regulations pertaining to our subsidiaries and foreign investments, including laws and regulations that reduce our incentive to invest in our networks, resulting in lower revenue growth and/or higher operating costs.

Our ability to absorb revenue losses caused by increasing competition, including offerings that use alternative technologies or delivery methods (e.g., cable, wireless, VoIP and Over The Top Video service) and our ability to maintain capital expenditures.

The extent of competition and the resulting pressure on customer and access line totals and segment operating margins.

Our ability to develop attractive and profitable product/service offerings to offset increasing competition.

The ability of our competitors to offer product/service offerings at lower prices due to lower cost structures and regulatory and legislative actions adverse to us, including state regulatory proceedings relating to unbundled network elements and nonregulation of comparable alternative technologies (e.g., VoIP).

The continued development and delivery of attractive and profitable video offerings through satellite and U-verse; the extent to which regulatory and build-out requirements apply to our offerings; and the availability, cost and/or reliability of the various technologies and/or content required to provide such offerings.

Our continued ability to attract and offer a diverse portfolio of wireless service and devices, device financing plans, and maintain margins.

The availability and cost of additional wireless spectrum and regulations and conditions relating to spectrum use, licensing, obtaining additional spectrum, technical standards and deployment and usage, including network

management rules.

Our ability to manage growth in wireless data services, including network quality and acquisition of adequate spectrum at reasonable costs and terms.

The outcome of pending, threatened or potential litigation, including patent and product safety claims by or against third parties.

The impact on our networks, including satellites operated by DIRECTV, and business from major equipment failures; security breaches related to the network or customer information; our inability to obtain handsets, equipment/software or have handsets, equipment/software serviced, and in the case of satellites launched, in a timely and cost-effective manner from suppliers; or severe weather conditions, natural disasters, pandemics, energy shortages, wars or terrorist attacks.

The issuance by the Financial Accounting Standards Board or other accounting oversight bodies of new accounting standards or changes to existing standards.

The issuance by the Internal Revenue Service and/or state or foreign tax authorities of new tax regulations or changes to existing standards and actions by federal, state, local or foreign tax agencies and judicial authorities with respect to applying applicable tax laws and regulations and the resolution of disputes with any taxing jurisdictions.

Our ability to integrate our acquisition of DIRECTV.

Our ability to adequately fund our wireless operations, including payment for additional spectrum, network upgrades and technological advancements.

Our increased exposure to video competition and foreign economies due to our recent acquisitions of DIRECTV and Mexican wireless properties, including foreign exchange fluctuations, as well as regulatory and political uncertainty in Latin America.

Changes in our corporate strategies, such as changing network requirements or acquisitions and dispositions, which may require significant amounts of cash or stock, to respond to competition and regulatory, legislative and technological developments.

The uncertainty surrounding further congressional action to address spending reductions, which may result in a significant reduction in government spending and reluctance of businesses and consumers to spend in general and on our products and services specifically, due to this fiscal uncertainty.

Readers are cautioned that other factors discussed in this report, although not enumerated here, also could materially affect our future earnings.

PART II – OTHER INFORMATION

Dollars in millions except per share amounts

Item 1A. Risk Factors

We discuss in our Annual Report on Form 10-K various risks that may materially affect our business. We use this section to update this discussion to reflect material developments since our Form 10-K was filed.

Our ability to successfully integrate our July 2015 acquisition of DIRECTV, including the risk that the cost savings and any other synergies from the acquisition may not be fully realized or may take longer to realize than expected; our costs in financing the acquisition and potential adverse effects on our share price and dividend amount due to the issuance of additional shares; the addition of DIRECTV's existing debt to our balance sheet; disruption from the acquisition making it more difficult to maintain relationships with customers, employees or suppliers; and competition and its effect on pricing, spending, third party relationships and revenues.

We completed our acquisition of DIRECTV in July 2015. We believe that the acquisition will give us the scale, resources and ability to deploy video services to more customers than otherwise possible and to provide an integrated bundle of broadband, video and wireless services enabling us to compete more effectively against cable operators as well as other technology, media and communications companies. In addition, we believe the acquisition will result in cost savings, especially in the area of video content costs, and other potential synergies, enabling us to expand and enhance our broadband deployment and provide more video options across multiple fixed and mobile devices. We must comply with various regulatory conditions and integrate a large number of video network and other operational systems and administrative systems. The integration process may also result in significant expenses and charges against earnings, both cash and noncash. While we have successfully merged large companies into our operations in the past, delays in the process could have a material adverse effect on our revenues, expenses, operating results and financial condition. This acquisition has increased the amount of debt on our balance sheet (both from DIRECTV's debt and the indebtedness needed to pay a portion of the purchase price) leading to additional interest expense and, due to additional shares being issued, will result in additional cash being required for any dividends declared. Both of these factors could put pressure on our financial flexibility to continue capital investments, develop new services and declare future dividends. In addition, events outside of our control, including changes in regulation and laws as well as economic trends, could adversely affect our ability to realize the expected benefits from this acquisition.
