**REGAL-BELOIT REPORTS 19% INCREASE  
IN SECOND QUARTER 2004 EARNINGS PER SHARE**

July 21, 2004 (Beloit, WI): James L. Packard, Chairman and Chief Executive Officer of REGAL-BELOIT CORPORATION (AMEX:RBC), today announced second quarter 2004 financial results.

Net income in the second quarter of 2004 was \$7.6 million, a 17% increase from \$6.5 million in the second quarter of 2003. For the first six months of 2004, net income rose 15% to \$14.5 million from \$12.6 million in comparable 2003. Earnings per share were \$.31 and \$.58 for the second quarter and first half of 2004, respectively, increases of 19% and 16% from \$.26 and \$.50 per share in the comparable periods of 2003.

Second quarter net sales of the Company increased 15% to \$177.7 million, the highest quarterly sales in the history of REGAL-BELOIT, from \$154.6 million in the second quarter a year ago. Sequentially, the sales growth was a 9% improvement from first quarter 2004 sales of \$163.1 million. Both operating segments achieved double digit sales growth in the second quarter, Mechanical Group sales increasing 12% and Electrical Group sales 16% from comparable 2003. Six months sales of the Company of \$340.7 million were 11% greater than \$308.0 million in 2003. A broad based increase in demand in the Company's markets was the primary factor in the sales increases. (See accompanying financial schedules for segment data.)

The Company's income from operations increased in the second quarter to \$14.2 million, a 15% increase from 2003's second quarter. Due to non-recurring costs in the second quarter associated with plant consolidation activities, Mechanical Group income from operations in the second quarter increased just 3% over comparable 2003, despite a 12% Group sales increase and strong improvement in the Group's other operating units. Electrical Group income from operations in the second quarter of 2004 increased 20% from a year ago. The impact of higher commodity costs muted the improvements achieved in income from operations for both Groups.

The Company's long-term debt increased to \$214.5 million at June 29, 2004 from \$202.5 million at the end of the first quarter of the year. The increase was due primarily to the repurchase of 614,000 shares of REGAL-BELOIT stock as part of the Company's \$115 million convertible subordinated debt financing settled on April 5, 2004.

*"We were extremely pleased with the increased demand for our products throughout the second quarter and the resultant 15% sales increase from 2003,"* said Packard, Chairman and CEO. *"Our order entry was strong in the second quarter, with total*

## Edgar Filing: REGAL BELOIT CORP - Form 8-K

*Company orders up 21%, led by a 23% increase in Electrical Group orders. While we were pleased with our earnings growth, plant consolidation costs and raw material cost increases prevented us from realizing even greater profit improvement. The consolidations are now essentially complete and we believe that the material costs will be balanced by our pricing actions and programs as the year continues.”*

*“The demonstrated recovery in our markets the past six months gives us the highest level of optimism we have felt over the past several years,” added Packard. “As always, there remain challenges that we must address and overcome, but believe we will see continued growth in both sales and earnings in the months ahead. For the third quarter of 2004, we estimate that our earnings will be in a range of \$.33 - \$.37 per share.”*
