TASEKO ADDS 74 MILLION TONS TO GIBRALTAR'S MINERAL RESERVES

December 12, 2006, Vancouver, BC - Taseko Mines Limited ("Taseko" or the "Company") (TSX: TKO; AMEX: TGB) announces an increase in the mineral reserves at its 100% owned Gibraltar copper-molybdenum mine. The Gibraltar mine is located near the City of Williams Lake in south-central British Columbia.

The new Gibraltar reserves represent a 40% increase from those reported at the Company's previous year end (September 30, 2005) and a 72% increase from the reserves reported when the mine was re-opened in October

Sixty-seven new diamond drill holes, completed to the end of August 2006, were included in the geological model and this, combined with updated pit wall optimizations, current mining cost projections and metal price information has allowed for further expansion of Gibraltar's Granite Lake pit.

In addition to the increase of 74 million tons, the new reserves have a 5% higher copper grade and an 11% higher molybdenum grade than the previously reported reserves.

Under present mine operating parameters of 36,000 tons milled per day, this addition to reserves extends

the mine life to 21 years. Upon completion of the mill expansion in December 2007 to 46,000 tons per day, Gibraltar mine life will be approximately 15 years. The Company is continuing to drill through the winter with the expectation that the reserves will be expanded again in 2007.

Russell Hallbauer, Taseko's President and CEO says "This is very important and exciting news as continued reserve growth at Gibraltar allows the Company to consider additional expansions beyond those announced, providing opportunities for further increases in production and reductions in unit costs."

Gibraltar's reserves as of September 30, 2006 are tabulated below:

Gibraltar Mineral Reserves at 0.20% Copper Cut-off				
Category	Tons (millions)	Cu (%)	Mo (%)	
Proven	17.2	0.335	0.011	
Probable	1.4	0.276	0.009	
Subtotal	18.6	0.331	0.011	
Proven	43.0	0.297	0.010	
Probable	13.3	0.278	0.014	
Subtotal	56.3	0.293	0.011	
Proven	97.0	0.318	0.009	
Probable	10.5	0.317	0.006	
Proven	60.6	0.334	0.011	
Probable	13.4	0.326	0.011	
Subtotal	181.5	0.324	0.010	
Total		256.4	0.318	0.010

In addition to the above reserves, the mineral resources at Gibraltar are estimated to be:

Gibraltar Mineral Resources at 0.16% to 0.20% Copper Cut-off				

Category	Tons (millions)	Cu (%)	Mo (%)
Measured	414	0.284	0.008
Indicated	197	0.272	0.007
Total	611	0.280	0.008

The resource and reserve estimation was completed by Gibraltar mine staff under the supervision of Ian S. Thompson, P.Eng., Superintendent of Technical Services and a Qualified Person under National Instrument 43-101. Mr Thompson has verified the methods used to determine grade and tonnage in the geological model, reviewed the long range mine plan, and directed the updated economic evaluation. The estimates used long term metal prices of US\$1.50/lb for copper and US\$8.00/lb for molybdenum and a foreign exchange of C\$0.88 per US dollar. A technical report will be filed on www.sedar.com.

For further details on Taseko Mines Limited, please visit the Company's website at www.tasekomines.com or contact Investor Services at (604) 684-6365 or within North America at 1-800-667-2114.

Forward Looking Statement

This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address estimated resource quantities, grades and contained gold, possible future mining, exploration and development activities, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements should not be in any way construed as guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices for metals, the conclusions of detailed feasibility and technical analyses, lower than expected grades and quantities of reserves or resources, mining rates and recovery rates and the lack of availability of necessary capital, which may not be available to the Company on terms acceptable to it or at all. The Company is subject to the specific risks inherent in the mining business as well as general economic and business conditions. For more information on the Company, Investors should review the Company's annual Form 20-F filing with the United States Securities and Exchange Commission and its home jurisdiction filings that are available at www.sedar.com.

Cautionary Note Concerning Estimates of Measured and Indicated Resources

This news release also uses the terms "measured resources" and "indicated resources". Taseko advises U.S. investors that although these terms are recognized and required by Canadian regulations (under National Instrument 43-101 Standards of Disclosure for Mineral Projects), the U.S. Securities and Exchange Commission does not recognize them. U.S. investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into reserves.
