COVER OF THIS REPORT FOR STEP-BY-STEP INSTRUCTIONS."

Dear  
SHAREHOLDER

Once again, I am pleased to write that during the period covered by this report your Nuveen Fund continued to meet its objective of providing attractive monthly income free from federal income taxes and, where applicable, state income taxes. Detailed information on your Fund's performance can be found in the Portfolio Manager's Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing regular tax-free income, we believe that a municipal bond investment like your Nuveen Fund also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Fund reports and other Fund information through the Internet and by e-mail rather than in hard copy. Not only will you be able to receive the information faster, but this also may help lower your Fund expenses. Sign up is quick and easy - see the inside front cover of this report for step-by-step instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as your Nuveen Fund to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by our seasoned portfolio management team has never been stronger. Our mission continues to be to assist you and your financial advisor by offering the investment solutions and services that can help you meet your financial objectives. We thank you for choosing us as a partner as you work toward that goal.

Sincerely,

Portfolio Manager's  
COMMENTS

Portfolio manager Tom O'Shaughnessy discusses U.S. and state economic conditions, key investment strategies, and the recent performance of the Funds. A 20-year Nuveen veteran, Tom has managed NPG and NNC since 1998 and NZX, NRB, and NNO since 2001, and NKG and NII since their inceptions in September 2002.

## Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-30D

(In January 2003, as part of a general realignment of portfolio management assignments, Rick Huber assumed primary management responsibility for these Georgia and North Carolina Funds. Rick has 17 years' of investment management experience. There were no changes in the investment objectives or general investment strategies of these Funds.)

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In many ways, economic and market conditions did not significantly change since the last shareholder report dated May 31, 2002. We believe the most influential factors affecting the U.S. economy and the municipal market continued to be the slow pace of economic growth and interest rates that remained at 40-year lows. The ongoing threat of terrorism and continued geopolitical uncertainty also had an economic impact during this reporting period.

In the municipal market, the sluggish economic recovery and lack of inflationary pressures helped many bonds perform well during much of 2002. However, during October and, to a lesser degree, November 2002, the market environment for all fixed income investments was negatively impacted by a rebound in the equity markets, which appeared to prompt some investors to sell fixed income products and purchase common stocks.

During the first eleven months of 2002, new municipal supply nationwide reached a record \$328 billion, a 27% increase over January-November 2001 levels. Demand for municipal bonds also remained strong over most of this period, as many individual investors continued to seek investments offering tax-free income and diversification for their portfolios. Institutional investors, especially traditional municipal bond purchasers such as property/casualty insurance companies, also were active buyers.

WHAT ABOUT ECONOMIC AND MARKET CONDITIONS IN GEORGIA AND NORTH CAROLINA?

Between January and November 2002, Georgia issued \$5.7 billion in new municipal debt, an increase of 43% over the first 11 months of 2001, while North Carolina went against the general trend toward increased issuance, offering \$4.1 billion in new bonds, down 18% from 2001 levels. In both states, investor demand often exceeded available supply. Over the past twelve months, Georgia maintained its credit rating from Moody's and Standard & Poor's at Aaa/AAA, respectively. In North Carolina, however, the state's continued budget issues led Moody's to downgrade the state's general obligation debt to Aa1 from Aaa in August 2002, while Standard & Poor's maintained its AAA rating for the state.

In Georgia, the state economy appeared to be slowly emerging from recession, although its overall performance remained weak. Healthy residential building activity supported construction employment and improving demand for manufactured products, and the state's transportation industry began to show signs of recovery. Unemployment in Georgia remained relatively stable over the past year, standing at 4.6% in November 2002, compared with a state rate of 4.5% a year earlier and the current national average of 6.0%. Georgia continues to maintain strong financial reserves and a tradition of conservative fiscal management. As in other states, tax revenues, particularly those from personal income taxes, have declined recently, requiring the state to reduce funding to state agencies and cut budget requests for fiscal 2003. Despite weaker tax collections, the state continues to have substantial financial flexibility and has not had to draw down reserves to maintain its balanced budget.

Based on early signs of a potential turnaround in the manufacturing sector, North Carolina's economy also seemed to be gradually improving. The state remained a national banking center, and its universities continued to attract

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-30D

businesses and professional workers to the state. However, downside risks remained.

2

While the services industry has served as a growth driver, the trade and construction sectors remained a drag on job growth, and the textile industry continued to decline. Over the past 12 months, unemployment in North Carolina has fallen from 6.5% to 6.1% as of November 2002, bringing the state more closely in line with the national average of 6.0%, although unemployment remains higher in rural areas. Shortfalls in North Carolina's fiscal 2003 budget were addressed through non-recurring revenues, funds from rainy day reserves, and spending measures that left the state to face another structural budget imbalance in fiscal 2004.

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended November 30, 2002, each of the Funds in this report having at least one year of performance history (with the exception of NPG) outperformed the unleveraged, unmanaged Lehman Brothers Municipal Bond Index and the Lipper average. Much of this outperformance can be attributed to the leveraged structure of these Funds, which provides the opportunity for additional income for common shareholders while adding volatility to the Fund's NAV and share price. It also can be attributed to the relatively long leverage-adjusted durations<sup>4</sup> of these Funds, which ranged from 10.95 to 12.55, compared with 8.04 for the Lehman Index. A longer duration generally will help a Fund to perform well during periods of declining interest rates, as has been the case over much of the past year. (Please see the individual Performance Overview pages for each Fund's duration.)

It is difficult to compare the performance of these Funds with the Lipper Average shown in the table because Lipper combines the performance of many different funds from different states into one overall multi-state average. Looking specifically at the Nuveen Funds, we believe that in addition to leverage and duration their relative performances were also influenced by

factors including call exposure, portfolio trading activity, and the price movement of specific sectors. For example, as of November 30, 2002, NPG held 16% of its portfolio in multifamily housing bonds, the largest allocation to this sector among these seven Funds. Over the past twelve months ended November 30, 2002, the performance of the multifamily housing sector lagged that of the general municipal market as well as other revenue bond sectors. This had a direct impact on NPG's performance over this period.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As the Federal Reserve continued to keep short-term interest rates relatively low, the dividend-payment capabilities of all of these Funds benefited from their use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred, shareholders. Low short-term rates, such as those currently in effect, can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support common share dividends.

During the fiscal year ended November 30, 2002, the relatively low level of short-term interest rates enabled us to implement three dividend increases in NRB, two in NNC, and one in NPG. NZX and NNO, which were introduced in September and November 2001, respectively, continued to pay attractive monthly dividends during this period, while the two Funds introduced in September 2002--NKG and NII--paid their first dividends in November 2002.

Over the course of the twelve months ended November 30, 2002, the share prices of the three oldest Funds - NPG, NNC, and NRB - rose. For NZX, NKG, NNO and NII, the general weakening of bond prices during October and November 2002 resulted in share prices at the end of this period that were lower than at the beginning or at inception. All of the Funds covered in this report were trading at premiums to their common share net asset values as of the end of this reporting period (see charts on individual Performance Overview pages).

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of these Funds are compared with the average annualized return of the 31 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: Georgia 34% and North Carolina 36%.
- 4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE FISCAL YEAR ENDED NOVEMBER 30, 2002?

Over the period, our strategic focus continued to be on diversifying Fund holdings while remaining fully invested, enhancing call protection, and positioning the Funds more defensively in anticipation of potential changes in the interest rate environment. Specifically, that included purchasing a number of high-quality and insured bonds, as well as bonds in the 15- to 20-year part of the yield curve. We believed bonds in this maturity range offered yields similar to those of longer bonds, but with less inherent risk. We think the addition of these long-intermediate bonds should help to moderate the Funds' durations over time, making the portfolios less sensitive to interest rate changes while still allowing the Funds to provide competitive yields and returns.

Over the past year, the addition of bonds with 15- to 20-year maturities resulted in shorter durations in the three Funds with 2001 inception dates. In the two older Funds, NPG and NNC, the reinvestment of proceeds from callable bonds into this part of the yield curve actually led to a modest lengthening of their durations.

In addition to an emphasis on yield curve positioning, we also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. In Georgia, this included selected purchases in the healthcare sector, which has been one of the top performers in 2002, as well as general obligation and water and sewer bonds. In North Carolina, we saw the most opportunities in education bonds. In both states, we avoided the purchase of industrial development bonds.

In the current geopolitical and economic climate, we believed that maintaining strong credit quality remained a key requirement. As of November 30, 2002, each of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 77% to 96%. In general, our weightings in higher quality and insured bonds benefited the performance of these Funds during the past year.

In September 2002, we introduced two new Funds, NKG and NII. As of November 30, 2002, these Funds had completed their initial investment phase and were in the process of investing the proceeds from MuniPreferred shares. Due to the tighter supply of municipal bonds in both Georgia and North Carolina over the past six months, each of these Funds held bonds issued by other states and Puerto Rico. We expect to replace these issues with in-state paper as attractive opportunities present themselves. As mentioned earlier, both NKG and NII paid their first dividends in November 2002.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE FUNDS IN PARTICULAR?

In general, our outlook for the fixed income markets remains positive. We believe the U.S. economy is headed for an eventual recovery, but one that may be less robust and slower to arrive than some are predicting. We expect inflation and interest rates to remain relatively low over the near term, while new municipal volume nationally should continue to be strong, though probably below the record levels seen in 2002, as issuers take advantage of the low rate environment for both new issues and refinancings. In Georgia and North Carolina, however, we expect to see little new issue supply during the first few months of 2003, a situation that is typical in these states. Demand for tax-exempt municipal bonds should remain solid, as investors continue to look for ways to

## Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-30D

rebalance their portfolios and reduce overall investment risk.

Over the next two years, we believe that these Georgia and North Carolina Funds generally will offer good levels of call protection, with call exposure ranging from zero in NZX and NKG to 18% in NNC during 2003 and 2004. During the past twelve months, we worked to mitigate the call risk and improve the positions of all the Funds, particularly NPG and NNC, which mark their 10-year anniversaries in May 2003. While the number of actual calls in each Fund will depend largely on market interest rates over this time, we believe the short-term call exposure of these Funds is manageable.

In the months ahead, specific areas of concentration will include managing duration through additional purchases of high-quality bonds in the 15- to 20-year part of the yield curve. In general, we plan to remain focused on strategies that can add value for our shareholders and provide support for the Funds' long-term dividend-paying capabilities.

Notes to  
FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Georgia Premium Income Municipal Fund (NPG), Nuveen Georgia Dividend Advantage Municipal Fund (NZX), Nuveen Georgia Dividend Advantage Municipal Fund 2 (NKG), Nuveen North Carolina Premium Income Municipal Fund (NNC), Nuveen North Carolina Dividend Advantage Municipal Fund (NRB), Nuveen North Carolina Dividend Advantage Municipal Fund 2 (NNO) and Nuveen North Carolina Dividend Advantage Municipal Fund 3 (NII). Georgia Premium Income (NPG), Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage (NRB), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) are traded on the American Stock Exchange while North Carolina Premium Income (NNC) is traded on the New York Stock Exchange.

Prior to the commencement of operations of Georgia Dividend Advantage (NZX),

## Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-30D

Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company, and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, also a wholly owned subsidiary of The John Nuveen Company.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

### Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds or its designee may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

### Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At November 30, 2002, Georgia Premium Income (NPG), Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Premium Income (NNC), North Carolina Dividend Advantage (NRB), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) had outstanding when-issued purchase commitments of \$4,275,528, \$3,109,470, \$16,469,944, \$2,081,240, \$4,949,043, \$1,418,930 and \$8,353,774, respectively.

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

	GEORGIA PREMIUM INCOME (NPG)	GEORGIA DIVIDEND ADVANTAGE (NZX)	GEORGIA DIVIDEND ADVANTAGE 2 (NKG)	NORTH CAROLINA PREMIUM INCOME (NNC)	NORTH CAROLINA DIVIDEND ADVANTAGE (NRB)	NORTH CAROLINA DIVIDEND ADVANTAGE 2 (NNO)	ADVANTAGE 3 (NII)

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the period ended November 30, 2002.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-30D

Offering Costs

Nuveen Investments has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII). Georgia Dividend Advantage's (NZX), Georgia Dividend Advantage 2's (NKG), North Carolina Dividend Advantage 2's (NNO) and North Carolina Dividend Advantage 3's (NII) share of offering costs (\$58,470, \$136,200, \$111,750 and \$117,375, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) in connection with their offering of Preferred shares (\$315,750, \$782,000, \$421,392 and \$678,500, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth  
AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

#### NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price

per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

### FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

### GLOSSARY OF TERMS USED IN THIS REPORT

**AVERAGE ANNUAL TOTAL RETURN:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

**AVERAGE EFFECTIVE MATURITY:** The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**LEVERAGE-ADJUSTED DURATION:** Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

**MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD):** An investment's current annualized dividend divided by its current market price.

**NET ASSET VALUE (NAV):** A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**TAXABLE-EQUIVALENT YIELD:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

-----  
Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended November 30, 2002. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
